SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a draft guidance for industry entitled "Anthrax: Developing Drugs for Prophylaxis of Inhalational Anthrax." The purpose of this draft guidance is to assist sponsors in the development of new drugs to be administered to persons who have inhaled *Bacillus anthracis* spores, but who have not yet manifested clinical evidence of disease, to prevent the development of inhalational anthrax

disease. We refer to this indication as "prophylaxis of inhalational anthrax." This draft guidance describes approaches for the designs of the animal model efficacy studies and recognizes that drug development for the sole indication of prophylaxis of inhalational anthrax is possible.

This draft guidance supersedes the draft guidance for industry entitled "Inhalational Anthrax (Post-Exposure)—Developing Antimicrobial Drugs" published in March 2002 (2002 draft guidance). The 2002 draft guidance stated that drugs for the prophylaxis of inhalational anthrax would be approved under the accelerated approval regulations (21 CFR part 314, subpart H, for drugs and 21 CFR part 601, subpart E, for biological products), unless the drug already carried an anthrax indication. Shortly after the 2002 draft guidance issued, FDA amended its regulations to provide a regulatory mechanism to approve drugs and biological products when human efficacy studies are not ethical or feasible (part 314, subpart I, for drugs and part 601, subpart H, for biological products). These regulations are commonly referred to as the "animal rule."¹ This draft guidance states that drugs developed for prophylaxis of inhalational anthrax will be considered for approval under the animal rule regulations. Other changes from the 2002 draft guidance are incorporated into the appropriate sections of this guidance and are based on comments received to the docket for the 2002 draft guidance as well as recent developments in scientific information that pertain to drugs being developed for prophylaxis of inhalational anthrax.

Issuance of this draft guidance fulfills a portion of the requirements of Title VIII, section 804, of the Food and Drug Administration Safety and Innovation Act (Pub. L. 112-144), which requires FDA to review and, as appropriate, revise not fewer than three guidance documents per year for the conduct of clinical trials with respect to antibacterial and antifungal drugs.

This draft guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the current thinking of FDA on this topic. It does not establish any rights for any person and is not binding

¹ The animal rule regulations in this guidance specifically refer to part 314, subpart I, for drugs and part 601, subpart H, for biological products. In October 2015, FDA finalized the guidance for industry entitled "Product Development Under the Animal Rule" that contains general information and recommendations on the development and approval of products under the animal rule.

on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

II. The Paperwork Reduction Act of 1995

This draft guidance refers to previously approved collections of information that are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520). The collections of information in 21 CFR parts 312 and 314 have been approved under OMB control numbers 0910–0014 and 0910–0001, respectively.

III. Electronic Access

Persons with access to the Internet may obtain the draft guidance at either <http://www.fda.gov/Drugs/GuidanceComplianceRegulatoryInformation/Guidances/default.htm> or <http://www.regulations.gov>.
