

Institute of Nuclear Materials Management. Only one of the terms “limits of error,” referenced in ANSI N15.5–1972 had a definition specific to MC&A applications, and this term was defined in 10 CFR 70.51(a)(5). In moving the 10 CFR 70.51(a) definitions to 10 CFR 74.4 in 2002, the “limits of error” definition was removed, and this term is no longer used by the NRC except in transaction reports submitted to the national database.

Further, any other statistical terms that require explanation or clarification are now included in the 10 CFR 74.4 set of MC&A definitions, and regulatory guidance related to MC&A definitions is included in NUREG–1065, “Acceptable Standard Format and Content for the Fundamental Nuclear Material Control (FNMC) Plan Required for Low-Enriched Uranium Facilities,” (ADAMS Accession No. ML031340288) and NUREG/CR–5734, “Recommendations to the NRC on Acceptable Standard Format and Content for the Fundamental Nuclear Material Control (FNMC) Plan Required for Low-Enriched Uranium Enrichment Facilities” (ADAMS Accession No. ML15120A354). Additional general statistical information is provided in NUREG/CR–4604, “Statistical Methods for Nuclear Materials Management” (ADAMS Accession No. ML103430339).

Because RG 5.3 is no longer needed, the NRC is withdrawing RG 5.3. Withdrawal of a regulatory guide means that the guide no longer provides useful information or has been superseded by other guidance, technological innovations, congressional actions, changes in NRC regulations, or other events. The withdrawal of RG 5.3 does not alter any prior or existing NRC licensing approval or the acceptability of licensee commitments to RG 5.3. Although RG 5.3 is withdrawn, current licensees may continue to use it, and withdrawal does not affect any existing licenses or agreements. However, RG 5.3 should not be used in future requests or applications for NRC licensing actions.

Dated at Rockville, Maryland, this 2nd day of November, 2016.

For the Nuclear Regulatory Commission.

Thomas H. Boyce,

Chief, Regulatory Guidance and Generic Issues Branch, Division of Engineering, Office of Nuclear Regulatory Research.
