

(5) All hand-held methane detectors will be MSHA-approved and maintained in permissible and proper operating condition as defined in 30 CFR 75.320.

(6) All electronic testing and diagnostic equipment will be used in accordance with the manufacturer's recommendations.

(7) Qualified personnel who use electronic testing and diagnostic equipment will be properly trained to recognize the hazards and limitations associated with use of the equipment.

The petitioner asserts that under the terms and conditions of the petition for modification, the use of nonpermissible electronic testing and diagnostic equipment will at all times guarantee no less than the same measure of protection afforded by the existing standard.

Docket Number: M-2016-030-C.

Petitioner: Pennyrite Energy, LLC, 7386 State Route 593, Calhoun, Kentucky 42327.

Mine: Riveredge Mine, MSHA I.D. No. 15-19424, located in McLean County, Kentucky.

Regulation Affected: 30 CFR 75.313(c)(2) (Main mine fan stoppage with persons underground).

Modification Request: The petitioner requests a modification of the existing standard to prevent excessive levels of water from building up in the mine in the event of a long term electrical power outage due to uncontrollable circumstances. The petitioner states that:

(1) The mine has water that comes in continuously from the slope and would build up to dangerous levels if not maintained properly in a power outage. The only deviation to the standard would be to power the main sump pump with a generator through a long-term electrical outage. This electrical power would not need to be used when miners are underground and would be removed after restoration of power to the main fan and not switch back to regular power until an examination of the area is conducted. This could cause a diminution of safety to the miners when returning underground after a long-term power outage because of water levels reaching the mine roof causing unstable roof conditions. Water entering some of the main electrical substations and high voltage power feeds could cause an electrical explosion or possible electrocution.

(2) The pump to be used is a permissible Stancor MSHA-approved P series portable electric submersible pump (Product #P-70CE-HH). The pump is a 460VAC three-phase motor, FLC 39 amperes, 28Hp with two

overload thermal switches incorporated in the stator and short circuit, locked rotor overload protection. The cable powering the pump will start in the hoist house branching from the 480VAC in the hoist house through a Fused Disconnect Switch with 60 ampere fuses. The fused Disconnect Switch will be connected to a Ground Check Enclosure mounted in the Hoist House to monitor the Grounding Conductor. Approximately 80 feet of #6 G-GC cable will be installed to power the permissible Stancor pump control box mounted at the Fan House. The pump control box will feed into the return airshaft with #6 G-GC cable for 444 feet to a permissible Disconnect Switch and from the permissible Disconnect Switch through #6 G-GC cable 40 feet to the 28Hp pump.

(3) The controller will be located on the side of the main fan house on the surface and will have a 45 ampere circuit breaker for short circuit protection and a Stancor model 821 liquid controller and motor protection unit for overload protection. The pump will be started and stopped from the Stancor model protection relay. There will be an electrical disconnect located underground at the pump location to aid in servicing the pump. The pump will be operated by the pump current control system.

(4) If mine power is down and fan off, the pump will run on a generator that is grounded with two 8-foot grounding rods attached with #4 bare copper. All persons will be kept 100 feet away from the slope entrance while the generator and pump are in operation. After power is restored, areas around the immediate bottom (sump pump and power centers) will be examined as required. The Sump Pump and power cable will be included as part of this examination. Weekly and monthly examinations will be conducted on the pump, controller, and generator as required.

The petitioner asserts that application of the existing standard will result in a diminution of safety to the miners.

Sheila McConnell,

Director, Office of Standards, Regulations, and Variances.

BILLING CODE 4520-43-P

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

[NARA-2017-006]

Records Schedules; Availability and Request for Comments

AGENCY: National Archives and Records Administration (NARA).

ACTION: Notice of availability of proposed records schedules; request for comments.

SUMMARY: The National Archives and Records Administration (NARA) publishes notice at least once monthly of certain Federal agency requests for records disposition authority (records schedules). Once approved by NARA, records schedules provide mandatory instructions on what happens to records when agencies no longer need them for current Government business. The records schedules authorize agencies to preserve records of continuing value in the National Archives of the United States and to destroy, after a specified period, records lacking administrative, legal, research, or other value. NARA publishes notice in the **Federal Register** for records schedules in which agencies propose to destroy records not previously authorized for disposal or reduce the retention period of records already authorized for disposal. NARA invites public comments on such records schedules, as required by 44 U.S.C. 3303a(a).

DATES: NARA must receive requests for copies in writing by December 14, 2016. Once NARA finishes appraising the records, we will send you a copy of the schedule you requested. We usually prepare appraisal memoranda that contain additional information concerning the records covered by a proposed schedule. You may also request these. If you do, we will also provide them once we have completed the appraisal. You have 30 days after we send to you these requested documents in which to submit comments.

ADDRESSES: You may request a copy of any records schedule identified in this notice by contacting Records Appraisal and Agency Assistance (ACRA) using one of the following means:

Mail: NARA (ACRA); 8601 Adelphi Road; College Park, MD 20740-6001.

Email: request.schedule@nara.gov.

FAX: 301-837-3698.

You must cite the control number, which appears in parentheses after the name of the agency that submitted the schedule, and a mailing address. If you would like an appraisal report, please include that in your request.

FOR FURTHER INFORMATION CONTACT:

Margaret Hawkins, Director, by mail at

Records Appraisal and Agency Assistance (ACRA); National Archives and Records Administration; 8601 Adelphi Road, College Park, MD 20740–6001, by phone at 301–837–1799, or by email at request.schedule@nara.gov.

SUPPLEMENTARY INFORMATION: Each year, Federal agencies create billions of records on paper, film, magnetic tape, and other media. To control this accumulation, agency records managers prepare schedules proposing records retention periods and submit these schedules for NARA's approval. These schedules provide for timely transfer into the National Archives of historically valuable records and authorize the agency to dispose of all other records after the agency no longer needs them to conduct its business. Some schedules are comprehensive and cover all the records of an agency or one of its major subdivisions. Most schedules, however, cover records of only one office or program or a few series of records. Many of these update previously approved schedules, and some include records proposed as permanent.

The schedules listed in this notice are media neutral unless otherwise specified. An item in a schedule is media neutral when an agency may apply the disposition instructions to records regardless of the medium in which it creates or maintains the records. Items included in schedules submitted to NARA on or after December 17, 2007, are media neutral unless the item is expressly limited to a specific medium. (See 36 CFR 1225.12(e).)

Agencies may not destroy Federal records without Archivist of the United States' approval. The Archivist approves destruction only after thoroughly considering the records' administrative use by the agency of origin, the rights of the Government and of private people directly affected by the Government's activities, and whether or not the records have historical or other value.

In addition to identifying the Federal agencies and any subdivisions requesting disposition authority, this notice lists the organizational unit(s) accumulating the records (or notes that the schedule has agency-wide applicability when schedules cover records that may be accumulated throughout an agency); provides the control number assigned to each schedule, the total number of schedule items, and the number of temporary items (the records proposed for destruction); and includes a brief description of the temporary records. The records schedule itself contains a

full description of the records at the file unit level as well as their disposition. If NARA staff has prepared an appraisal memorandum for the schedule, it also includes information about the records. You may request additional information about the disposition process at the addresses above.
