

packages involving covered foreign countries as defined in section 3136(i)(2) of the NDAA, DOE/NNSA sends the end user, equipment, supplier information, and any other relevant information to ODNI. ODNI notifies Intelligence Community (IC) elements of the application for transfer of technology as soon as possible.

1.b. Within 10 business days of initial notification, ODNI identifies, based on the details of the transfer application and availability, an IC point of contact (POC) to provide a response. DOE/NNSA provides ODNI with any technical reviews or assessments conducted by DOE/NNSA relevant to the technology transfer.

1.c. Within 30 business days of receiving the end user, equipment, and supplier information from DOE/NNSA, ODNI makes its coordinated response available to: DOE/NNSA; DOS; and NRC, DOC, and DoD (collectively herein referred to as the "Consulting Agencies").

2. After the DOE/NNSA technical review is complete, with expected timelines of not more than 60 days for covered foreign countries and 30 days for other destinations, DOE/NNSA transmits through appropriate means the application and DOE/NNSA analysis to DoD, DOC, DOS, and NRC for review. Within 30 days after receipt, DOS and the Consulting Agencies provide their views on the application and analysis. If DOS or a Consulting Agency notifies DOE/NNSA NPAC in writing that additional information is required, NPAC will provide appropriate time for all Consulting Agencies to consider the application and a new time line will be established for reviews based on individual circumstances. Note that the U.S. Government, through DOS, requests foreign government assurances for specific authorizations, and it is the foreign government's control over how long it may take to deliver these assurances, which may lengthen the time line for interagency review beyond the expected 30 days.

3. Within 100 days following the completion of the interagency consultations, NPAC provides the Secretary of Energy with a recommendation for action on the application, including the views of DOS, the Consulting Agencies, and ODNI, if applicable. In the event that any such agencies recommend further consideration this timeline may be extended.

Information provided to DOE in connection with these procedures may be marked or otherwise identified as business proprietary and/or personally identifiable information and would be

subject to protection in accordance with applicable law and Executive Orders. Such information would be made available within the respective agencies only to those personnel who have a need to know for the purpose of reviewing applications for exports of unclassified nuclear technology and assistance under section 57b.(2) of the Atomic Energy Act of 1954, as amended, and otherwise disclosed only with the express consent of DOE/NNSA or when such disclosure is required by law.

Dated: November 2, 2016.

**[Docket No. EL17-15-000]**

**Big Rivers Electric Corporation v. Midcontinent Independent System Operator, Inc.; Notice of Complaint**

Take notice that on November 4, 2016, pursuant to section 206 of the Federal Power Act, 16 U.S.C. 824e, and Rules 206 and 212 of the Federal Energy Regulatory Commission's (Commission) Rules of Practice and Procedure, 18 CFR 385.206 and 385.212 (2016), Big Rivers Electric Corporation (Complainant) filed a formal complaint against Midcontinent Independent System Operator, Inc. (Respondent) alleging that Respondent's application of the relevant Open Access Transmission, Energy and Operating Reserves Markets Tariff provisions to Complainant is not just and reasonable, all as more fully explained in the complaint.
