The Federal Reserve Board (FRB) uses the ACES data to improve estimates of investment indicators for monetary policy. The Bureau of Labor Statistics (BLS) uses the ACES annual data to improve estimates of capital stocks for productivity analysis and the detailed types of structures and types of equipment data collected every five years to improve estimates of manufacturing multifactor productivity measures.

The Centers for Medicare and Medicaid Services uses the data for monitoring and evaluating the healthcare industries.

The Department of the Treasury uses the data in analysis of depreciation.

In addition, the ACES data provide industry analysts with capital expenditure data for market analysts, economic forecasting, identifying business opportunities, product development, and business planning.

The capital expenditures by type of structure and type of equipment are critical to ensuring the appropriateness of capital expenditures statistics in years detailed data by types of structures and types of equipment are not collected.

**[B–75–2016]**

**Foreign-Trade Zone (FTZ) 122—Corpus Christi, Texas; Notification of Proposed Production Activity; voestalpine Texas, LLC (Hot Briquetted Iron By-Products); Portland, Texas**

The Port of Corpus Christi Authority, grantee of FTZ 122, submitted a notification of proposed production activity to the FTZ Board on behalf of voestalpine Texas, LLC (voestalpine), located in Portland, Texas. The notification conforming to the requirements of the regulations of the FTZ Board (15 CFR 400.22) was received on November 7, 2016.

voestalpine already has authority to produce hot briquetted iron using foreign-sourced iron ore pellets within Subzone 122T. The current request would add hot briquetted iron (HBI) by-products and foreign-status materials/components to the scope of authority. Pursuant to 15 CFR 400.14(b), additional FTZ authority would be limited to the specific foreign-status materials/components and specific by-products described in the submitted notification (as described below) and subsequently authorized by the FTZ Board.

Production under FTZ procedures could exempt voestalpine from customs duty payments on the foreign-status materials/components used in export production. On its domestic sales, voestalpine would be able to choose the duty rates during customs entry procedures that apply to the HBI by-products—iron sludge, recycled iron briquettes, direct reduction remet, and iron fines (duty free) for the foreign-status materials/components noted below and in the existing scope of authority. Customs duties also could possibly be deferred or reduced on foreign-status production equipment.

The materials which may be sourced from abroad include sodium bentonite and slaked lime (duty free).

Public comment is invited from interested parties. Submissions shall be addressed to the FTZ Board’s Executive Secretary at the address below. The
