Federal Register / Vol. 81, No. 221 / Wednesday, November 16, 2016 / Notices

Purpose of Meeting: To advise NSF on the impact of its policies, programs and activities on the CISE community. To provide advice to the Assistant Director for CISE on issues related to long-range planning, and to form ad hoc subcommittees and working groups to carry out needed studies and tasks.

Agenda:
Welcome and CISE updates
Program updates for CISE divisions
Presentation and discussion of the CISE AC data science report
NSF Big Ideas discussion
Closing remarks and wrap-up

Dated: November 10, 2016.
Suzanne Plimpston,
Acting Committee Management Officer.

NUCLEAR REGULATORY COMMISSION

[NRC–2016–0232]

Response of Nuclear Power Plant Instrumentation Cables When Exposed to Fire Conditions—Test Plan

AGENCY: Nuclear Regulatory Commission.

ACTION: Draft test plan; request for comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is requesting public comment on the draft test plan entitled, “Response of Nuclear Power Plant Instrumentation Cables When Exposed to Fire Conditions—Test Plan,” in order to receive feedback from the widest range of interested parties and to ensure that all information relevant to developing this document is available to the NRC staff. The purpose of this draft test plan is to better understand the fire-induced failure modes of instrumentation cables and evaluate the potential effect those failure modes could have on plant instrumentation circuits (i.e., circuit, component, and/or system response).

DATES: Submit comments by December 16, 2016. Comments received after this date will be considered if it is practical to do so, but the Commission is able to ensure consideration only for comments received on or before this date.

ADDRESSES: You may submit comments by any of the following methods (unless this document describes a different method for submitting comments on a specific subject):

- Federal Rulemaking Web site: Go to http://www.regulations.gov and search for Docket ID NRC–2016–0232. Address questions about NRC dockets to Carol Gallagher; telephone: 301–415–3463; email: Carol.Gallagher@nrc.gov. For technical questions, contact the individual listed in the FOR FURTHER INFORMATION CONTACT section of this document.

For additional direction on obtaining information and submitting comments, see “Obtaining Information and Submitting Comments” in the SUPPLEMENTARY INFORMATION section of this document.

FOR FURTHER INFORMATION CONTACT:

SUPPLEMENTARY INFORMATION:

I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC–2016–0232 when contacting the NRC about this action. You may obtain publicly-available information related to this action by any of the following methods:

- NRC’s PDR: You may examine and purchase copies of public documents at the NRC’s PDR, Room O1–F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

B. Submitting Comments

Please include Docket ID NRC–2016–0232 in the subject line of your comment submission.

The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC posts all comment submissions at http://www.regulations.gov as well as entering the comment submissions into ADAMS. The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Discussion

In 1990, the NRC sponsored a series of tests at Sandia National Laboratories (SNL) to investigate the effects of thermal aging on fire damageability, documented in NUREG/CR–5546, “An Investigation of the Effects of Thermal Aging on the Fire Damageability of Electric Cables” (ADAMS Accession No. ML041270223). An instrumentation cable was tested to determine the failure time and temperature for both aged and unaged cables. During the testing, levels of leakage current, on the order of 15 mA, were observed prior to the onset of catastrophic failure. In 2001, additional testing was performed by the Nuclear Energy Institute and the Electric Power Research Institute. The NRC was invited to observe and participate by sponsoring SNL to evaluate various cables and instrumentation techniques. Six tests included instrumentation cables and those results are documented in NUREG/CR–6776, “Cable Insulation Resistance Measurements Made During Cable Fire Tests” (ADAMS Accession No. ML022600316). Those results indicated pronounced differences observed between the failure of the thermoplastic and thermoset insulated cables. In previous years the NRC has published cable functionality test reports which focused on power and control cables when exposed to fire conditions including: NUREG/CR–7102, “Kerite Analysis in Thermal Environment of FIRE (KATE-Fire): Test Results” (ADAMS Accession No.
The Commission is noticing a recent Postal Service filing for the Commission’s consideration concerning a negotiated service agreement. This notice informs the public of the filing, invites public comment, and takes other administrative steps.

**DATES:** Comments are due: November 17, 2016

**ADDRESSES:** Submit comments electronically via the Commission’s Filing Online system at http://www.prc.gov. Those who cannot submit comments electronically should contact the person identified in the FOR FURTHER INFORMATION CONTACT section by telephone for advice on filing alternatives.

**FOR FURTHER INFORMATION CONTACT:**

Mark Henry Salley, Chief, Fire and External Hazard Analysis Branch, Division of Risk Analysis, Office of Nuclear Regulatory Research.

This notice will be published in the Federal Register.

### II. Docketed Proceeding(s)

1. **Docket No(s).:** CP2017–34; Filing Title: Notice of United States Postal Service of Filing a Functionally Equivalent Global Expedited Package Services 3 Negotiated Service Agreement and Application for Non-Public Treatment of Materials Filed Under Seal; Filing Acceptance Date: November 8, 2016; Filing Authority: 39 CFR 3015.5; Public Representative: Lawrence Fenster; Comments Due: November 17, 2016.

### SECURITIES AND EXCHANGE COMMISSION

**Self-Regulatory Organizations; Chicago Board Options Exchange, Incorporated; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend the Fees Schedule**

November 9, 2016.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the “Act”), and Rule 19b–4 thereunder, notice is hereby given that on November 1, 2016, Chicago Board Options Exchange, Incorporated (the “Exchange” or “CBOE”) filed with the Securities and Exchange Commission (the “Commission”) the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.
