

*Background and Brief Description*

This is a revision request for three years for the currently approved OMB Control Number 0920–0968, with an expiration date of May 31, 2016. This request is to extend the time and slightly reduce burden.

Intimate Partner Violence (IPV) is a serious, preventable public health problem that affects millions of Americans and results in serious consequences for victims, families, and communities. IPV occurs between two people in a close relationship. The term “intimate partner” describes physical, sexual, or psychological harm by a current or former partner or spouse. IPV can impact health in many ways, including long-term health problems, emotional impacts, and links to negative health behaviors. Given these factors, the Family Violence Prevention and Services Act (42 U.S.C. 10401) provides an important opportunity for the advancement of public health and reduction of IPV. Support and guidance

for programs addressing IPV have been provided through cooperative agreement funding and technical assistance administered by CDC’s National Center for Injury Prevention and Control (NCIPC). NCIPC will continue collecting information needed to monitor cooperative agreement programs funded under Domestic Violence Prevention Enhancement and Leadership through Alliances, Focusing on Outcomes for Communities United with States (DELTA FOCUS).

Information to be collected will provide crucial data for program performance monitoring and provide CDC with the capacity to respond in a timely manner to requests for information about the program from the Department of Health and Human Services (HHS), the White House, Congress, and other sources. Awardees will report progress and activity information to CDC on an annual schedule using the Program Management Information System (PMIS)

consisting of fillable electronic templates and submitted via Grant Solutions. CDC will use the information collected to monitor each awardee’s progress and to identify facilitators and challenges to program implementation and achievement of outcomes. Monitoring allows CDC to determine whether an awardee is meeting performance goals and to make adjustments in the type and level of technical assistance provided to them, as needed, to support attainment of their objectives. CDC’s monitoring and evaluation activities also allow CDC to provide oversight of the use of federal funds, and to identify and disseminate information about successful prevention and control strategies implemented by awardees.

Participation in the information collection is required as a condition of funding. The estimated annual burden hours are 60. There are no costs to respondents other than their time.

The Privacy Act, as amended, regulates the use of computer matching by Federal agencies when records in a system of records are matched with other Federal, state, or local government records. It requires Federal agencies involved in computer matching programs to:

1. Negotiate written agreements with the other agencies participating in the matching programs;
2. Obtain the Data Integrity Board approval of the match agreements;
3. Furnish detailed reports about matching programs to Congress and OMB;
4. Notify applicants and beneficiaries that the records are subject to matching; and,
5. Verify match findings before reducing, suspending, terminating, or denying an individual's benefits or payments.

This matching program meets the requirements of the Privacy Act of 1974, as amended.
