ICR Status: OMB approval for this ICR expired on September 1, 2016, due to administrative error. This action is a request to reinstate OMB approval for the information collection activities outlined in this document.

Under PRA, 44 U.S.C. 3501 *et seq.*, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers for certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: Section 12(b) of the Toxic Substances Control Act (TSCA) requires any person who exports or intends to export a chemical substance or mixture that is regulated under TSCA sections 4, 5, 6 and/or 7 to notify EPA of such export or intent to export. This requirement is described in more detail in the Code of Federal Regulations (CFR) at 40 CFR part 707, subpart D. Upon receipt of notification, EPA advises the government of the importing country of the U.S. regulatory action that required the notification with respect to that substance. EPA uses the information obtained from the submitter via this collection to advise the government of the importing country. This information collection addresses the burden associated with industry reporting of export notifications.

EPA will disclose information that is covered by a claim of confidentiality only to the extent permitted by, and in accordance with, the procedures in TSCA section 14 and 40 CFR part 2.

Respondents/Affected Entities:

Entities potentially affected by this ICR are companies that export chemical substances or mixtures from the United States to foreign countries.

Respondent's Obligation To Respond:

Responses to the collection of information are mandatory (see 40 CFR part 707, subpart D). Respondents may claim all or part of a notice of confidentiality.

Estimated Total Number of Potential Respondents: 240.

Frequency of Response: On occasion.

Estimated Total Burden: 4,032 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Estimated Total Costs: \$278,118 (per year), includes no annualized capital investment or maintenance and operational costs.

Changes in the Estimates: There is an increase of seven hours in the total estimated respondent burden compared with that identified in the ICR previously approved by OMB. This increase reflects EPA's correction of arithmetic errors in the previous submission. This change is an adjustment.

Authority: 44 U.S.C. 3501 *et seq.*

Director, Regulatory Support Division.

Abstract: Owners and operators of affected facilities are required to comply with reporting and recordkeeping requirements for the General Provisions (40 CFR part 63, subpart A), as well as for the standards at 40 CFR part 63, subpart VVVV. This includes submittal initial notifications, performance tests and periodic reports and results, and maintaining records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring systems is inoperative. These reports are used by EPA to determine compliance with the standards.

Form Numbers: None.

Respondents/affected entities: Boat manufacturing facilities.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart VVVV).

Estimated number of respondents: 144 (total).

Frequency of response: Initially, occasionally and semiannually.

Total estimated burden: 23,500 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$2,430,000 (per year), includes \$800 in annualized

capital/startup and/or operation & maintenance costs.

Changes in the Estimates: There is no change in the labor hours in this ICR compared to the previous ICR. This is due to two considerations. First, the regulations have not changed over the past three years and are not anticipated to change over the next three years. Secondly, the growth rate for the industry is very low, negative or non-existent, so there is no significant change in the overall burden. However, there is an adjustment increase in the respondent burden costs due to an increase in labor rates. This ICR uses updated labor rates from the Bureau of Labor Statistics to calculate burden costs. This ICR also rounds all calculated total values to 3 significant figures.

Director, Regulatory Support Division.
