Appendix A—Allocation of CDBG-DR Funds to Most Impacted and Distressed Areas Due to 2016 Federally Declared Disasters Thru September 29, 2016

This section describes the methods behind HUD's allocation of \$500 million in the 2016 CDBG-DR Funds. Section 145(a) of Division C of the Continuing Appropriations Act, Public Law 114-223, enacted on September 29, 2016, appropriates \$500 million through the Community Development Block Grant (CDBG) program for necessary expenses for authorized activities related to disaster relief, long-term recovery, restoration of infrastructure and housing, and economic revitalization in the most impacted and distressed areas resulting from a major disaster declared in 2016 and occurring prior to September 29, 2016.

This section requires that funds be awarded directly to the State or unit of general local government at the discretion of the Secretary. The key underlying metric used in the allocation process is the unmet need that remains to be addressed from qualifying disasters. Although funds may be used to address infrastructure and economic revitalization needs in addition to housing, this allocation only uses unmet needs related to housing to determine the most impacted and distressed areas that are eligible for grants and then to determine the amount of funding to be made available to each grantee. HUD only uses unmet housing needs for two reasons: (1) There is very limited data on infrastructure and economic revitalization unmet needs for the largest of the eligible disasters, and (2) the total funding provided through this allocation is limited relative to need.

Methods for estimating unmet housing needs. The data HUD staff have identified as being available to calculate unmet needs for qualifying disasters come from the FEMA Individual Assistance program data on housing-unit damage as of September 28, 2016.

The core data on housing damage for both the unmet housing needs calculation and the concentrated damage are based on home inspection data for FEMA's Individual Assistance program. HUD calculates "unmet

housing needs" as the number of housing units with unmet needs times the estimated cost to repair those units less repair funds already provided by FEMA, where:

Each of the FEMA inspected owner units are categorized by HUD into one of five categories:

- *Minor-Low*: Less than \$3,000 of FEMA inspected real property damage.
- *Minor-High*: \$3,000 to \$7,999 of FEMA inspected real property damage.
- *Major-Low*: \$8,000 to \$14,999 of FEMA inspected real property damage.
- *Major-High*: \$15,000 to \$28,800 of FEMA inspected real property damage and/or 4 to 6 feet of flooding on the first floor.
- *Severe*: Greater than \$28,800 of FEMA inspected real property damage or determined destroyed and/or 6 or more feet of flooding on the first floor.

To meet the statutory requirement of "most impacted" in this legislative language, homes are determined to have a high level of damage if they have damage of "major-low" or higher. That is, they have a real property FEMA inspected damage of \$8,000 or flooding over 1 foot. Furthermore, a homeowner is determined to have unmet needs if they reported damage and no insurance to cover that damage.

FEMA does not inspect rental units for real property damage so personal property damage is used as a proxy for unit damage. Each of the FEMA inspected renter units are categorized by HUD into one of five categories:

- *Minor-Low*: Less than \$1,000 of FEMA inspected personal property damage.
- *Minor-High*: \$1,000 to \$1,999 of FEMA inspected personal property damage.
- *Major-Low*: \$2,000 to \$3,499 of FEMA inspected personal property damage.
- *Major-High*: \$3,500 to \$7,499 of FEMA inspected personal property damage or 4 to 6 feet of flooding on the first floor.
- *Severe*: Greater than \$7,500 of FEMA inspected personal property damage or determined destroyed and/or 6 or more feet of flooding on the first floor.

For rental properties, to meet the statutory requirement of "most impacted" in this legislative language, homes are determined to have a high level of damage if they have damage of "major-low" or higher. That is, they have a FEMA personal property damage assessment of \$2,000 or greater or flooding over 1 foot. Furthermore, landlords are presumed to have adequate insurance coverage unless the unit is occupied by a renter with income of \$20,000 or less. Units that are occupied by a tenant with income less than \$20,000 are used to calculate likely unmet needs for affordable rental housing.

The average cost to fully repair a home for a specific disaster to code within each of the damage categories noted above is calculated using the average real property damage repair costs determined by the Small Business Administration for its disaster loan program for the subset of homes inspected by both SBA and FEMA for 2011 to 2013 disasters. Because SBA is inspecting for full repair costs, it is presumed to reflect the full cost to repair the home, which is generally more than the FEMA estimates on the cost to make the home habitable.

For each household determined to have unmet housing needs (as described above), their estimated average unmet housing need less assumed assistance from FEMA, SBA, and Insurance was calculated at \$27,455 for major damage (low); \$45,688 for major damage (high); and \$59,493 for severe damage.

Most Impacted and Distressed Designation. President Obama signed the Continuing Resolution into law on September 29, 2016 and 33 disasters had received major declarations in calendar year 2016 by that date. To meet the statutory requirement that the funds be targeted to "the most impacted or distressed areas," this allocation:

(1) Limits allocations to those disasters where FEMA had determined the damage was sufficient to declare the disaster as eligible to receive Individual and Households Program (IHP) funding. Only 11 of 33 disasters that were declared in 2016 have an IHP designation.

(2) Limits the allocations to data from counties with high levels of damage. For this allocation, HUD is using the amount of serious unmet housing need as its measure of concentrated damage and limits the data used for the allocation only to counties exceeding a "natural break" in the data for their total amount of serious unmet housing needs. For the 2016 events, the serious unmet housing needs break at the county level occurs at \$25 million.

(3) Among disasters with data meeting the first two thresholds, HUD limits the allocation to jurisdictions that have substantially higher unmet needs than other jurisdictions. Louisiana, Texas, and West Virginia have far greater unmet needs than other jurisdictions affected by major disasters declared since January 1, 2016.
