

2014 Protocol agreement between the BLM Colorado and the SHPO, this undertaking does not exceed any of the review thresholds requiring SHPO concurrence, and that there will be no adverse effect to historic properties. Finally, the BLM began tribal consultation for the project in April 2014 when the field manager sent a scoping letter via certified mail to the Ute Indian Tribe (Uintah and Ouray Reservation), Ute Mountain Ute Tribe, and Southern Ute Indian Tribe. Consultation and outreach continued through April 22, 2016, when the BLM sent the tribes a letter that identified the Preferred Alternative and summarized cultural resource records within the area of potential effect (including potential Traditional Cultural Properties). The letter also offered the opportunity for comments or clarifications. The BLM will continue to offer opportunities for tribes that may be affected by potential future development of these leases as stipulated under E.O. 13175, November 6, 2000.

The BLM published the Notice of Availability of the Final Previously Issued Leases in the WRNF EIS in the **Federal Register** on August 5, 2016 (81 FR 51936). Publication of the Notice of Availability initiated a 30-day availability period. Even though there was no comment period on the Final EIS, the BLM received a number of comments, all of which were addressed in the ROD as appropriate.

The BLM's ROD for the Previously Issued Leases in the WRNF EIS implements a slightly modified version of the Preferred Alternative, which combines portions of *Alternatives 2 and 4*. The decision applies stipulations described under *Alternative 2* (including minor updates to reflect the 1993 USFS ROD stipulations) to all leases within the analysis area that are producing or committed to a unit or agreement. For those leases within the analysis area that are not producing or committed to a unit, *Alternative 4* applies (canceling or modifying leases to match the 2015 USFS Final ROD) with one exception: The decision cancels in their entirety all undeveloped leases that overlap the area identified as closed to future leasing by the USFS's 2015 Final ROD. The difference between lease cancellations under *Alternative 4* in the BLM's Previously Issued Leases in the WRNF EIS and this ROD is that seven leases having acres retained under *Alternative 4* are cancelled in full under the ROD. There are no partial lease cancellations. On August 15, 2016, the Middleton Creek Unit was automatically contracted, retroactively effective August 20, 2015, according to Section

2(e) of the unit agreement and as per BLM regulation at 43 CFR 3186.1. As a result of the contraction, three leases (COC67147, COC70013, and COC70361) considered producing in the Final EIS are now considered undeveloped, and thus will be offered modified lease terms consistent with *Alternative 4* of the Final EIS.

Under the BLM's Previously Issued Oil and Gas Lease ROD, 25 undeveloped leases are administratively cancelled in full, 12 undeveloped leases remain open with new stipulations applied under *Alternative 4* (with lessee consent), 20 producing or committed leases are reaffirmed or modified as described under *Alternative 2*, four expired leases currently under appeal that had previously been part of the Willow Creek Unit (held by production) would have *Alternative 2* applied if the appeal is successful, and one expired lease subject to appeal would have *Alternative 4* stipulations applied if it were reauthorized. No decision is made for three leases that have expired or terminated and are not subject to appeal.

The BLM's Previously Issued Oil and Gas Lease ROD takes agency and public comments into account and best meets the BLM's mandate to protect important resources while allowing oil and gas development. For reaffirmed or modified leases, upon receiving an application to approve an action on the ground, the BLM will conduct site-specific analysis of impacts through the subsequent NEPA reviews and analyses that will be necessary before the BLM issues any permit or approval for oil and gas development.

This decision is approved by the Deputy Secretary for the U.S. Department of the Interior; therefore it is not subject to administrative appeal (43 CFR 4.410(a)(3)).

Authority: 40 CFR 1506.6, 40 CFR 1506.10.

Gregory P. Shoop,

BLM Colorado Associate State Director.

SUPPLEMENTARY INFORMATION: This ICR seeks PRA authority for the Leave Supplement to the American Time Use Survey (ATUS) information collection. The leave supplement includes questions about workers' access to and use of paid and unpaid leave, job flexibility, and their work schedules. Information collected in the supplement will be published as a public use data set to facilitate research on numerous topics, such as: The characteristics of people with paid and unpaid leave; occupations with the greatest and least access to paid leave; reasons workers are able to take leave from their jobs; how many workers have access to job flexibilities such as the ability to work from home or adjust their start and stop times; and the relationship between workers' time use and their access to job flexibilities. The supplement would survey eligible wage and salary workers aged 15-years and up from a nationally representative sample of approximately 2,060 sample households each month. The BLS Authorizing Statute authorizes this information collection. See 29 U.S.C. 1.

This proposed information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number.
