

chemical substance for a non-exempt commercial purpose, is required to provide EPA with notice before initiating the activity. Additionally, EPA must also be notified before chemical substances are used in new significant uses. Pursuant to the amended law, EPA is now required to make an affirmative determination as to whether or not the new use or new chemical presents, may present, or is not likely to present an unreasonable risk of injury to health or the environment, or, alternatively, if there is insufficient information to allow for a determination. This amendment went into effect immediately after the law was signed by the President and has resulted in significant changes for both the EPA's New Chemicals Review Program and those manufacturers submitting notices, including manufacturers of the notices under review on June 22, 2016. EPA has worked to keep manufacturers informed of these changes and hopes to continue this dialogue during this public meeting.
