Certain Carbon and Alloy Steel Cut-to-Length Plate From France: Correction to the Amended Preliminary Determination of Sales at Less Than Fair Value

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

FOR FURTHER INFORMATION CONTACT:

Brandon Custard or Terre Keaton Stefanova, AD/CVD Operations, Office II, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482-1823 or (202) 482-1280, respectively.

SUPPLEMENTARY INFORMATION: On December 2, 2016, the Department of Commerce (the Department) published in the *Federal Register* the amended preliminary determination in the less than fair value investigation for certain carbon and alloy steel cut-to-length plate from France.¹

The Department is issuing this notice to correct two inadvertent errors in the *Amended Preliminary Determination*. First, the Department listed the case number as A-427-428. The correct case number is A-427-828. Second, the Department stated an incorrect all-others rate of 6.33 percent.² The correct all-others rate is 6.34 percent, as stated in the calculation memorandum accompanying the *Amended Preliminary Determination*.³ Therefore, the Department is hereby correcting the *Amended Preliminary Determination*.

This correction to the amended preliminary determination of sales at less than fair value is issued and published in accordance with sections 733(f) and 777(i)(1) of the Tariff Act of 1930, as amended.

Dated: December 9, 2016.

Paul Piquado,

Assistant Secretary for Enforcement and Compliance.

Endangered and Threatened Species; Recovery Plan for Oregon Coast Coho Salmon ESU

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of availability.

SUMMARY: The National Marine Fisheries Service (NMFS) announces the adoption of a Final Endangered Species Act (ESA) recovery plan (Plan) for the Oregon Coast Coho Salmon (*Oncorhynchus kisutch*) evolutionarily significant unit (ESU) which is listed as threatened under the ESA. The geographic area covered by the Plan is the Pacific Ocean and freshwater habitat (rivers, streams and lakes) from the Necanicum River near Seaside, Oregon, on the northern end to the Sixes River near Port Orford, Oregon on the south. The objective of the Plan is to provide a guidance framework for restoring the threatened Oregon Coast Coho Salmon ESU to the point where it no longer needs the protections of the ESA. As required under the ESA, the Plan contains objective, measurable delisting criteria, site-specific management actions necessary to achieve the Plan's goals, and estimates of the time and costs required to implement recovery actions. The Plan is now available.

ADDRESSES: Electronic copies of the Plan and the Response to Comments are available online at: www.westcoast.fisheries.noaa.gov/protected_species/salmon_steelhead/recovery_planning_and_implementation/oregon_coast/oregon_coast_recovery_plan.html. A CD ROM of the Plan can be obtained by emailing a request to Nancy Johnson with the subject line "CD ROM Request for Oregon Coast Coho Salmon Recovery Plan", by phone at (503) 230-5442, by email at nancy.johnson@noaa.gov, or by writing to NMFS Oregon Washington Coastal Office, 1201 NE Lloyd Blvd., Suite 1100, Portland, Oregon 97232 ATTN: Recovery Coordinator.

FOR FURTHER INFORMATION CONTACT: Robert Walton, NMFS Oregon Coast Coho Salmon Recovery Coordinator, at (503) 231-2285, or rob.walton@noaa.gov.

SUPPLEMENTARY INFORMATION:

Background

We are responsible for developing and implementing recovery plans for Pacific salmon and steelhead listed under the ESA of 1973, as amended (16 U.S.C. 1531 *et seq.*). Recovery means that the listed species and their ecosystems are sufficiently restored, and their future secured, to the point that the protections of the ESA are no longer necessary. See 50 CFR 424.11(d)(2). Section 4(f) (1) of the ESA requires that recovery plans include, to the maximum extent practicable: (1) Objective, measurable criteria which, when met, would result in a determination that the species is no longer threatened or endangered; (2) site-specific management actions necessary to achieve the plan's goals; and (3) estimates of the time required and costs to implement recovery actions. The ESA requires the development of recovery plans for each listed species unless such a plan would not promote its recovery.

We believe it is essential to have local support of recovery plans by those whose activities directly affect the listed species and whose continued commitment and leadership will be needed to implement the necessary recovery actions. We therefore support and participate in locally led, collaborative efforts to develop recovery plans that involve state, tribal, and Federal entities, local communities, and other stakeholders.

Section 4(f) of the ESA, as amended in 1988, requires that public notice and an opportunity for public review and comment be provided prior to final approval of a recovery plan. We published a Notice of Availability of the Draft Plan in *Federal Register* on October 13, 2015. (80 FR 61379). In response to requests, we extended the public comment period until December 31, 2015 to provide additional opportunity for public comment. We received extensive comments on the Proposed Plan, summarized the comments and revised the Proposed Plan based on the comments received, and this final version now constitutes the Recovery Plan for the Oregon Coast coho salmon ESU. In brief, we revised several important sections (including the delisting criteria and implementation chapters), clarified a number of issues, and added information provided by commenters, including a number of new initiatives by the state of Oregon. We have determined that this *ESA Recovery Plan for Oregon Coast Coho Salmon* meets the statutory requirements for a recovery plan.
