

standards were last revised) and 2015 (the most recent year of PPI data available) (Ref. 1). EPA found that the PPI has changed by 129 percent, far exceeding the 20 percent inflation index specified as a level above which EPA may adjust annual sales levels in the current standard if deemed necessary. Furthermore, among the more than 500 revenue-based size standards set by the Small Business Administration (SBA), the lowest is \$5.5 million, and more than 75% of those standards are in excess of \$7.5 million. Some revenue-based standards are as high as \$38.5 million. Thus, EPA's existing \$4 million annual sales standard is an outlier at the low end of this range. Because of the magnitude of the increase in the PPI since the last revision of the size standards and the current annual sales standard is comparatively low given current revenue-based size standards developed by SBA, EPA has preliminarily determined that a revision to currently codified size standards is warranted.

EPA is requesting public comment on the adequacy of the current standards and whether revision of the standards is warranted. In the event that EPA determines that a revision to the standards is warranted, any such revision would occur by subsequent rulemaking, which would involve a further opportunity for public notice and comment. Accordingly, the scope of this first action (*i.e.*, the determination) will not necessarily include responding to stakeholder comments as to what specific amendments ought to be made to the standards.

EPA is also in the process of consulting with the SBA on the adequacy of the current standards and whether revision of the standards is warranted. (Ref. 2.) EPA has requested that SBA provide its input within 15 business days of receiving EPA's consultation request. When SBA's consultation response becomes available, EPA plans to add that response to the docket for this preliminary determination.
