

station at the Panda Stonewall Power Project both in Loudoun County. Finally, DTI would install one 15,900 hp unit at the Myersville Compressor Station in Frederick County, Maryland.

Background

On July 23, 2015, the Commission issued a *Notice of Intent to Prepare an Environmental Assessment for the Proposed Leidy South Project and Request for Comments on Environmental Issues* (NOI). The NOI was sent to affected landowners; federal, state, and local government agencies; elected officials; environmental and public interest groups; Native American tribes; other interested parties; and local libraries and newspapers. In response to the NOI, the Commission received comments from several state and federal agencies and from the Allegheny Defense Project, Wild Virginia, and Chesapeake Climate Action Network. The primary issues raised by the commentors are the purpose and need for the Project; potential impacts on wildlife, surface water, drinking water, and wetland resources; the potential for increased soil compactions and watershed impacts on the Tamarack Swamp Natural Area; noise impacts; climate change; and cumulative impacts.

Additional Information

In order to receive notification of the issuance of the EA and to keep track of all formal issuances and submittals in specific dockets, the Commission offers a free service called eSubscription. This can reduce the amount of time you spend researching proceedings by automatically providing you with notification of these filings, document summaries, and direct links to the documents. Go to www.ferc.gov/docs-filing/esubscription.asp.

Additional information about the Project is available from the Commission's Office of External Affairs at (866) 208-FERC or on the FERC Web site (www.ferc.gov). Using the "eLibrary" link, select "General Search" from the eLibrary menu, enter the selected date range and "Docket Number" excluding the last three digits (*i.e.*, CP15-492), and follow the instructions. For assistance with access to eLibrary, the helpline can be reached at (866) 208-3676, TTY (202) 502-8659, or at FERCOnlineSupport@ferc.gov. The eLibrary link on the FERC Web site also provides access to the texts of formal documents issued by the Commission, such as orders, notices, and rule makings.

SUPPLEMENTARY INFORMATION:

Title: FERC-725J, Definition of the Bulk Electric System

OMB Control No.: 1902-0259

Type of Request: Three-year extension of the FERC-725J information collection requirements with no changes to the current reporting requirements.

Abstract: On December 20, 2012, the Commission issued Order No. 773, a Final Rule approving NERC's modifications to the definition of "bulk electric system" and the Rules of Procedure exception process to be effective July 1, 2013. On April 18, 2013, in Order No. 773-A, the Commission largely affirmed its findings in Order No. 773. In Order Nos. 773 and 773-A, the Commission directed NERC to modify the definition of bulk electric system in two respects: (1) Modify the local network exclusion (exclusion E3) to remove the 100 kV minimum operating voltage to allow systems that include one or more looped configurations connected below 100 kV to be eligible for the local network exclusion; and (2) modify the exclusions to ensure that generator interconnection facilities at or above 100 kV connected to bulk electric system generators identified in inclusion I2 are not excluded from the bulk electric system.

Type of Respondents: Generator owners, distribution providers, other NERC-registered entities.

Estimate of Annual Burden:¹ The Commission estimates the annual public reporting burden for the information collection as:

FERC-725J (DEFINITION OF THE BULK ELECTRIC SYSTEM)

	Number of respondents (1)	Annual number of responses per respondent (2)	Total number of responses (1)*(2)=(3)	Average burden and cost per response ² (4)	Total annual burden hours and total annual cost (3)*(4)=(5)	Cost per respondent (\$) (5)÷(1)
Generator Owners and Distribution Providers (Exception Request)	20	1	20	94 hrs.; \$5,864	1,880 hrs.; \$117,274	\$5,864
All Registered Entities (Implementation Plans and Compliance)	186	1	186	350 hrs.; \$21,833	65,100 hrs.; \$4,060,938	\$21,833
Total	206	66,980 hrs.; \$4,178,212	\$27,697

Comments: Comments are invited on: (1) Whether the collection of information is necessary for the proper performance of the functions of the

Commission, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden and cost of the collection

of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collection;

¹ The Commission defines burden as the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. For further explanation of what is included in the

information collection burden, reference 5 Code of Federal Regulations 1320.3.

² The estimates for cost per response are derived using the following formula: Average Burden Hours per Response * \$62.38/hour = Average Cost per

Response. The hourly cost figure (wages plus benefits) comes from the Bureau of Labor Statistics (http://www.bls.gov/oes/current/naics2_22.htm). The figure is for an electric engineer (Occupational Code: 17-2071).
