POSTAL SERVICE

39 CFR Part 111

New Mailing Standards for Domestic Mailing Services Products

AGENCY: Postal Service™.

ACTION: Final rule.

SUMMARY: On October 12, 2016, the Postal Service filed a notice of mailing services price adjustments with the Postal Regulatory Commission (PRC), effective January 22, 2017. This final rule contains the revisions to *Mailing Standards of the United States Postal Service*, Domestic Mail Manual (DMM®) that we will adopt to implement the changes coincident with the price adjustments.

DATES: *Effective date:* January 22, 2017.

FOR FURTHER INFORMATION CONTACT:

Audrey Meloni at (856) 933–4360, or Lizbeth Dobbins at (202) 268–3789.

SUPPLEMENTARY INFORMATION: Final prices are available under Docket Number R2017–1 on the Postal Regulatory Commission’s Web site at www.prc.gov.

The Postal Service’s final rule includes: Changes to prices, several mail classification updates, mailpiece marking changes, modifications to mailpiece weights and mail preparation categories, multiple product simplification efforts, a few minor revisions to the DMM to condense language and eliminate redundancy, a change to the redemption period of a money order claim from two years to one year, the addition of Official Mail Accounting System (OMAS) stamp shipment fee language, and updates to Enterprise Post Office Box Online (ePOBOL) process that change payment periods for online Post Office Box activity. Changes to Collect On Delivery will be published in a future final rule.

Comments on Proposed Changes and USPS Response

The Postal Service received 21 formal responses encompassing 34 comments on our price-change related proposal. Five responses included comments regarding more than one issue.

Standard Mail Name Change to USPS Marketing Mail

Nine comments requested that the Postal Service reconsider its decision to rename Standard Mail to USPS Marketing Mail. The commenters suggested that using the term “marketing” would indicate “advertising mail” or “junk mail” and cause the mail to have a lower “open rate”. Customers were unclear how a name change would encourage more people to use the mail.

Additional comments asked about the indicia, labeling criteria, transition period, and the lack of discussion with the industry and supportive research that would support such a measure that could be costly to both the USPS™ and the mailing industry.

One commenter believed the change would help promote the use of mail for marketing; while another was willing to explore an 18-month transition period before any changes to indicia would be required.

USPS Response

The Postal Service is updating the name to reflect vibrancy and to breathe new life into the former “Third-Class Mail” and “Standard Mail”. We expressed a desire at the National Postal Forum and through MTAC in early 2016 to improve the position of Standard Mail in the marketplace and to improve its perception.

In response to feedback from the mailing community, the new indicia or postage markings should not be used for letter or flat mail until January 2018 at the earliest. Tray label and pallet markings will be deferred until mid-2017 at the earliest. Other types of changes, such as changes to postage statements and forms, can move forward with the January 2017 price change. This phased transition period will allow both hardware and software changes to be implemented successfully.

First-Class Mail up to 3.5 ounces

Three commenters requested clarification on the pricing methodology for computing prices for First-Class Mail up to 3.5 ounces, and for residual pieces from either a presorted or automation mailing.

One comment suggested that heavier letters might slow down processing for mail service providers. The same commenter wanted to know whether the next price increase would be within the existing CPI allowances for the existing product, or the USPS would seek higher pricing based on this current proposed change.

Additional comments cited the lack of DMM language in the proposed rule identifying the types of pieces to which the weight increase changes would apply (such as enveloped pieces only, envelopes containing discs, heavy letters only, etc.), and clarifying the barcode placement for such pieces.

USPS Response

There are no changes to the pricing methodology for residual mail pieces. Also, there are no changes to the requirements for enveloped mail pieces, heavy letters, or envelopes containing discs. The market dominant price change will be done using the Centralized Accounting Postage System (CAPS), and all applicable DMM sections have been updated in this final rule.

First-Class Package Service

One commenter asked if the new Labeling List 104 was being proposed as an added convenience.

USPS Response

Use of the new labeling list is optional.

USPS Marketing Mail Letters Weight Limit

Three commenters requested clarification of the USPS Marketing Mail weight limits. One wanted to know if the Notice 123, *Price List* would be updated to reflect these changes. Another requested clarification regarding the barcode clear zone.

USPS Response

USPS Marketing Mail automation letters weight will increase to 3.5 ounces, eliminating the previous piece/pound price for 3.3 to 3.5 ounces. Automation letters over 3.5 ounces will pay the applicable flats prices, however, for non-automation letters; the weight is up to 4 ounces.

Notice 123, *Price List*, will be updated to reflect all the piece/pound and weight changes and will be available on Postal Explorer at *pe.usps.com* beginning January 22, 2017. The applicable DMM sections regarding barcode clear zones are also updated with this final rule

USPS Marketing Mail Flats Weight Limit

Three comments were received. One comment stated that the Postal Service has not considered the unintended effects of the proposed rule change, and the associated loss of revenue, and suggested withdrawing this change. The commenter suggested that many mailers will take advantage of the rule change by combining more mailpieces, thus reducing the number of pieces entered and the associated revenue, while increasing the average cost to handle those pieces.

Another comment wanted clarification regarding the effect of this change on booklets and folded self-mailers.

Lastly, one comment stated that raising the weight limit on the piece/pound break is a great move as long as the rate is not raised to make up for the resulting lost revenue.

USPS Response

There will be no changes to the parameters of booklets or Folded Self-Mailers.

Permit and Annual Mailing Fees

Two comments requested clarification about the elimination of permit and annual mailing fees, specifically with regard to Bound Printed Matter and the QBRM quarterly fee.

USPS Response

A permit application fee and annual mailing fee must be paid for any destination entry Bound Printed Matter flats (except for qualifying Full-service Intelligent Mail barcode mailings). There is no application fee or annual mailing fee if a mailer uses Bound Printed Matter to mail parcels only.

There is no change to the QBRM quarterly fee at this time.

Combining 3-Digit and AADC

Two comments addressed the combining of 3-Digit and AADC letters,

requesting clarification regarding the mandatory origin 3-Digit trays for the local SCF area, and the use of labeling lists L801 and L003.

USPS Response

Labeling list L003 will be combined with L801 with the following exceptions. With this final rule, effective January 22, 2017, all First-Class and Standard Mail automation/machinable letters will no longer be sorted to the 3 Digit level. They will be sorted to the AADC level, after optional 5-Digit sort, whether they are Destinating AADC trays or Originating AADC trays. The current requirement that origin SCF mail be sorted down to 3-Digit trays will be eliminated. There is no minimum quantity for Origin AADC trays; however, less bundling should result in fuller trays, and the use of many fewer trays. The entry price is the same. The L801 will be applicable to all of this type of mail.

The use of 3 Digit trays will still apply to Nonmachinable letters in all three classes, and Periodicals Machinable/Automation prices. Destinating and Originating 3 Digit trays can still be made for these three classes of Nonmachinable letters along with Periodicals machinable/auto letters. The origin 3-Digit tray preparation will thus remain the same for all Nonmachinable letters and Periodicals machinable/automation letters. Labeling List 002 will be used, which may involve L003 for 3-Digit schemes.

Prices

One organization submitted two comments suggesting that a price increase for commercial USPS Marketing Mail flats would result from increasing the pound rate and decreasing the per piece rate; producing a potential 4–10 percent increase in postage costs for their mailings.

USPS Response

Comments from comparable mailers expressed satisfaction with the prices as proposed. [A request for a recent postage statement so that USPS could do a before-and-after analysis to see if correct prices were being charged was not received.]

FSS Price Structure

Two comments were received. One strongly supported the proposal to eliminate the FSS-specific price structures for Periodicals, USPS Marketing Mail, and Bound Printed Matter; however, the commenter disagreed with the proposal to leave the 250-pound minimum intact, fearing the unintended consequences of curtailing

the benefits sought to be realized by the restoration of a more rational price structure.

Another comment asked if the Notice 123 would be updated and if FSS facility preparation would become mandatory.

USPS Response

The 250-pound minimum requirements will remain intact. The Notice 123, *Price List*, will be updated on January 22, 2017, to remove all pricing related to FSS preparation. Additionally, FSS facility preparation will be optional.

Shipping Products Permit

One comment asked what indicia changes are proposed, and whether USPS data under the combined permit would be broken down by product.

USPS Response

There will be no changes to current procedures. Each product must be identified for volume reporting purposes.

Informed Delivery

One comment regarding the Informed Delivery enhancement suggested that the process would add another level of complexity and potential for errors, thereby, increasing costs.

USPS Response

Informed Delivery is outside the scope of the price changes addressed in this final rule.

General

We received three comments of a general nature. One comment suggested that DMM exhibit 708.7.1.1 was missing an indicator for presorted Bound Printed Matter flats, and another requested that educational webinars should be provided on Premium Forwarding Service and Share Mail.

USPS Response

The DMM will be updated as part of the January 22, 2017, price change implementation. Educational seminars will be presented on various subjects in the near future.

Overview of Changes Made by This Final Rule*Flats Sequencing System (FSS)*

As background, on December 18, 2013, the Postal Service began to require bundle and pallet preparation of flat-size Standard Mail®, Periodicals, and Bound Printed Matter mailpieces for delivery within ZIP Codes™ served by FSS processing (78 FR 76533–76548). This requirement was incorporated into

the DMM on January 26, 2014. Subsequently, on May 31, 2015, the Postal Service introduced FSS specific price structures for flat-sized Bound Printed Matter, Standard Mail, and Periodicals mailpieces, pursuant to PRC Order no. 2472, issued on May 7, 2015. This final rule removes all FSS specific pricing structures from Periodicals, Standard Mail and Bound Printed Matter. One change, for example, requires mailers to add Optional Endorsement Lines (OELs) on each FSS scheme mailpiece. For FSS preparation, mailers place qualifying mailpieces from all price categories into a separate pool for each individual 5-digit FSS scheme combination.

All carrier route Bound Printed Matter (BPM), carrier route Periodicals and carrier route (except saturation) Standard Mail flats meeting the standards in DMM 201.6.2 must be sorted to FSS schemes, properly bundled and placed on or in pallets, trays, sacks or approved containers, for FSS scheme ZIP Code combinations within the same facility. Mailings (excluding saturation mailings of Standard Mail) with non-presorted BPM flats may be included in FSS preparation, but will continue to be ineligible for presorted or carrier route prices.

To reiterate, all mailpieces in a 5-digit scheme FSS bundle must be identified with an OEL, as described in DMM 708.7.0. Mailpieces entered under a combined mailing of Standard Mail and Periodicals flats (DMM 705.15.0) still include class and price markings, applicable to the price paid, in addition to the OEL.

Periodicals, Standard Mail, and Bound Printed Matter flats properly included in a FSS scheme bundle qualify for the piece price applied prior to inclusion in the FSS scheme pool with the following exceptions for Standard Mail:

1. A carrier route mailpiece in a FSS bundle on a FSS scheme pallet will receive the Basic CR-Bundles/Pallet price.
2. A carrier route mailpiece in a FSS bundle on a FSS facility pallet will receive the Basic CR price.

Additional information on each mail class affected is under the Bound Printed Matter, Periodicals, and Standard Mail sections.

First-Class Mail—Combine First-Class Mail (FCM) Commercial Automation Automated Area Distribution Center (AADC) and 3-Digit Sortations for Letters and Cards Into One Combined Sortation Level Known as AADC

Currently, there are four presort levels for FCM Commercial Automation Letters and Cards: Mixed AADC, AADC, 3-Digit, and 5-Digit. To help simplify the pricing structure, the Postal Service implemented the same price for AADC Automation Letters (Cards) and 3-Digit Automations Letters (Cards) in Docket No. R2012-3. The Postal Service is now combining AADC and 3-Digit presort levels into one sortation. The new sortation name will be AADC. The existing labeling List 801 will drive the FCM AADC separations, and origin entry separations, based on labeling List 002, will be modified to reflect origin entry AADC separations.

First-Class Mail—Increase the Weight Standard for First-Class Mail (FCM) Commercial Automation and Machinable Letters and Cards From Up to 3.3 Ounces to Up to 3.5 Ounces

Currently, the “up to” weight standard for FCM Commercial Machinable Letters is 3.3 ounces. This lower weight break of up to 3.3 ounces is being increased due to mail processing improvements. Since machinable letters must follow the standards for Automation Letters (except for IMb), the same weight maximum should apply. Based on this, the Postal Service will increase the weight maximum from 3.3 ounces to 3.5 ounces. This change does not apply to the maximum weight of Booklets which are capped at 3.0 ounces.

First-Class Mail—One Price for Up To 3.5 Ounces for First-Class Mail (FCM) Commercial Automation Letters

Currently, the same price applies for one- and two-ounce pieces for each individual mail sortation level for FCM Commercial Automation Letters. With this final rule there will be one price for up to 3.5 ounces for each individual mail sortation level for FCM Commercial Automation Letters. This will also apply to mixed-weight FCM Residual mailings up to 3.5 ounces. The current preparation requirements for non-blended trays, such as one ounce, up to two ounces, and now extending to 3.5 ounces will continue. This change does not include FCM single-piece letters (non-residual) or FCM Flats.

First-Class Mail—Simplifying and Renaming FCM Alternate Postage as FCM Share Mail

The Postal Service will rename Alternate Postage as Share Mail. This implements a proposal published in the June 9, 2016, Postal Bulletin (Issue #22443). Share Mail allows Postal Service customers to distribute single-piece FCM letters or cards to consumers, who may in turn mail those pieces to any domestic address, without having to affix postage. Share Mail pieces are permitted to weigh up to one ounce each. Payment is collected electronically from the customer's Postage Due and Centralized Accounting Postage System (CAPS) Account. Invoicing is performed manually, by the Postal Service's Share Mail Program Office in Marketing. To continue the Postal Service's efforts to simplify its product line, the Share Mail payment tiers will be collapsed into one, and upfront postage payment requirements will be eliminated. Unique Intelligent Mail barcodes are no longer required nor is a signed Marketing Agreement. Picture Permit will no longer be available in order to help expedite the approval process. A customer who wishes to participate must submit a request to the Share Mail Program Office along with production pieces to ensure readability for postal processing. Share Mail relies on Intelligent Mail barcode (IMb) technology and scan data collected as the mailpiece travels through the mailstream to determine piece counts, so readability is paramount.

Periodicals—Eliminate Flats Sequencing System (FSS) Pricing

The Postal Service will eliminate the FSS specific price structures for Periodicals Outside-County. FSS preparation will still be required and all FSS marking requirements will remain as is. Outside-County Periodicals flats properly included in a FSS scheme bundle will qualify for the price applied prior to inclusion in the FSS scheme pool. If a FSS scheme pallet is drop-shipped to a DFSS facility, the pallet will receive Carrier Route pallet pricing. If a FSS facility pallet is drop-shipped to a DFSS facility the pallet will receive DSCF pallet pricing. Qualifying FSS scheme pieces entered at a DFSS facility will receive DSCF pound pricing. FSS scheme bundles on an FSS scheme pallet will receive carrier route bundle prices. FSS scheme bundles on an FSS facility pallet will receive 3-digit/SCF bundle pricing. FSS scheme and facility sack/trays or other authorized container

will receive 3-digit/SCF sack/tray prices.

Standard Mail—Renaming Standard Mail as “USPS Marketing Mail”

The Postal Service will rename Standard Mail as “USPS Marketing Mail”. This name change will better communicate to our customers the message that Standard Mail fits into their marketing mix.

To help smooth the transition for this change, the Postal Service will modify postage statements and the DMM for January 2017 and implement other changes to postal forms or documents during the normal update cycles. The initial implementation date for mailers to adopt the new USPS Marketing Mail abbreviations (such as MKT in lieu of STD) is July 1, 2018. Abbreviations and examples of permit imprints will be available in a future Postal Bulletin.

Bound Printed Matter—Eliminate Flat Sequencing System (FSS) Pricing

The Postal Service is eliminating FSS specific price structures for Bound Printed Matter Flats. FSS preparation will still be required, and all FSS marking requirements will remain in place. Bound Printed Matter flat pieces included in an FSS scheme bundle will qualify for the zone and entry piece pricing and pound pricing applicable to the mailing piece before inclusion in the FSS scheme pool. If an FSS container is drop shipped to a DFSS facility, those pieces will receive DSCF pricing.

Standard Mail—Combine AADC and 3 Digit Automation Sorts for Letters Into One Sort Level

Currently there are four presort levels for Standard Mail and Standard Mail Nonprofit Automation Letters: Mixed AADC Automation Letters, AADC Automation Letters, 3-Digit Automation Letters, and 5-Digit Automation Letters. To simplify the pricing structure, the Postal Service implemented the same price for AADC Automation Letters and 3-Digit Automation Letters in Docket No. R2013–1. The Postal Service is combining these two presort levels (AADC and 3-Digit) into one new sortation which will be named AADC.

Standard Mail—Increase the Weight Standard for Standard Mail and Standard Mail Nonprofit Nonautomation Machinable Letters From Up to 3.3 Ounces to Up to 3.5 Ounces

Currently, the “up to” weight standard for Standard Mail and Standard Mail Nonprofit Machinable Letters is 3.3 ounces. This lower “weight break” is no longer needed due

to improvements in mail processing equipment. Since machinable letters must follow the standards for Automation Letters (except for the IMb standards), the weight maximum should also apply. Accordingly, the Postal Service will increase the weight maximum from 3.3 ounces to 3.5 ounces. This change does not include Standard Mail Ride-Along mailpieces which are capped at 3.3 ounces and are inserted into a host Periodicals mailpiece.

It is important that both the Industry and the Postal Service evaluate the effects of higher weight breaks for First-Class Mail automation letters and cards along with Standard Mail letters. Collaboration and feedback throughout calendar year 2017 will be critical in helping to determine whether higher weights cause processing or address quality metrics to be put at risk.

Standard Mail—Reduce the Number of Simple Sample Tiers

There are currently six volume tiers for Standard Mail Commercial and Nonprofit Simple Samples. Based on the volume thresholds currently used by most customers, the Postal Service will collapse the existing six tiers into two new tiers: Volumes up to and including 200,000 pieces, and volumes greater than 200,000 pieces.

Standard Mail—Eliminate Flat Sequencing System (FSS) Pricing

The Postal Service will eliminate the FSS-specific price structures within Standard Mail and Standard Mail Nonprofit. FSS preparation will still be required and all FSS marking requirements will remain intact.

Standard Mail and Standard Mail Nonprofit flats properly included in a FSS scheme pool will qualify for the price applied prior to the FSS scheme pool with the following exceptions:

1. A carrier route mailpiece in an FSS bundle on an FSS scheme pallet will receive the Basic CR-Bundles/Pallet price, and

2. A carrier route mailpiece in a FSS bundle on an FSS facility pallet will receive the Basic CR price.

If an FSS pallet is drop shipped to a DFSS facility, those pieces will receive DSCF pricing.

Standard Mail—Increase Standard Mail and Standard Mail Nonprofit Flats, Nonautomation Letters, and Nonmachinable Letters Piece-Price Weight Break Structure From 3.3 Ounces to 4.0 Ounces

The current piece/pound price structure for Standard Mail and Standard Mail Nonprofit Flats,

Nonautomation Letters, and Nonmachinable Letters does not provide a simple, clear view of the actual price of a mailing, especially if it includes nonidentical-weight pieces between 3.3 and 4 ounces. The Postal Service will increase the piece price weight break structure from 3.3 ounces to 4.0 ounces for Standard Mail and Standard Mail Nonprofit Flats, and Nonautomation and Nonmachinable Letters. Pieces up to 4 ounces will pay the same price and a pound price will apply over 4 ounces. This will not include Nonautomation Machinable Letters.

Extra Services (Returns Simplification)—Eliminate BRM Parcels Permit & Account Maintenance Fee

Business Reply Mail (BRM) currently consists of letters, flats, and parcels. Occasionally, BRM customers may choose to use Business Reply Mail for return parcels because they possess a BRM permit for inbound correspondence. The Postal Service will waive the annual permit fee for those customers using BRM exclusively for return parcels. This will align BRM parcels with other returns products. BRM permit fees for letters and flats, and for weight-averaged BRM letters, flats and parcels, will remain.

Extra Services—Eliminate QBRM Permit Fees

The Postal Service is also eliminating the annual permit fees for Business Reply customers who use only QBRM Basic and High Volume Qualified for letters and cards. All other fees and postage pricing remain intact.

Extra Services—Shipping Services Permit Fees

The Postal Service will eliminate the fees for certain outbound and return permits used for parcel shipments including associated annual account maintenance fees. This will streamline the application and returns process, and eliminate the need to pay permit application fees for additional entry points. Shipping Products included under this umbrella are outbound shipments of Priority Mail Express, Priority Mail, First-Class Package Service, Parcel Select (including Parcel Select Lightweight), Bound Printed Matter (parcels only), Media Mail, and Library Mail, as well as for return shipments of MRS, Parcel Return Service and BRM (parcels only).

Extra Services (Address Correction)—Adjust Standard Mail Forwarding Fee to 2 Decimal Places

Standard Mail letters and flats mailers that use this service are charged the

Forwarding Fee via Address Correction Service (ACS) billing which is managed by the ACS Department of Address Management Systems in Memphis, TN. The ACS data file, Shipping Notice data file, and the Invoice data file have an implied decimal position that is conducive to 2-decimal places for address correction services. When mailers use these files to track their ACS fees and costs, they must recognize that the Forwarded Fee product codes have an implied 3-decimal place price and must manipulate the data files provided to them through ACS so that the decimal place differences are recognized in all of the data files provided via ACS. This would adjust the Standard Mail Forwarding Fee to 2-decimal point places to allow mailers to track their ACS fees and costs without making adjustments for the Forwarding Fees.

Extra Services—Money Order Redemption Period

To be consistent with Banking Industry Standards and other companies' comparable money order offerings, the Postal Service will change the time limit for claims for improper payment to a limit of one year. This language will be updated on the reverse side of the domestic and international money order form so the purchaser is aware of the time limit.

Extra Services—Enterprise PO Boxes Online (ePOBOL) Payment Process Change

The Postal Service plans to allow Enterprise PO Boxes Online customers to modify their current payment period to align their multiple PO Boxes, Caller Service, and Reserve payments to one due date per year, when using an Enterprise Payment Account (EPA). Eligible customers will be allowed to pay pro-rated fees on a one-time basis to align all payments to a selected annual renewal date in the future. This method is optional and will be available for all of an eligible customer's PO Boxes and Caller Service numbers. When the true-up date is reached they will continue to pay for the 12 month term as committed when first enrolled in the Enterprise Payment Account.

Extra Services—OMAS Stamp Delivery Fee for Federal Agencies Ordering Stamps From the Stamp Fulfillment Center

Federal agencies have the option today to order stamps from the USPS Stamp Fulfillment Services in Kansas

City and to pay for the stamps through their Official Mail Accounting System (OMAS) accounts. It has been a long-standing practice to charge customers other than federal agencies a nominal handling fee for all purchases ordered through Stamp Fulfillment Services. Beginning January 1, 2017, these fees will apply to federal agencies using OMAS.

The handling fee schedule can be found in section 1560 of the *Mail Classification Schedule*, under References, on the Postal Regulatory Commission Web site at <http://www.prc.gov/>.

Extra Services—Resources

The Postal Service will provide additional resources to assist customers with this price change for competitive products. These tools include price lists, downloadable price files, and **Federal Register** Notices, which may be found on the Postal Explorer® Web site at pe.usps.com.

List of Subjects in 39 CFR Part 111

Administrative practice and procedure, Postal Service.

The Postal Service adopts the following changes to *Mailing Standards of the United States Postal Service*, Domestic Mail Manual (DMM), incorporated by reference in the *Code of Federal Regulations*. See 39 CFR 111.1.

■ Accordingly, 39 CFR part 111 is amended as follows:

a. Piece prices are based on shape, machinability, barcoding, and presort level. The presort level of the piece is based primarily on the bundle level of the piece, except the presort level of pieces loose in trays is based on the tray level and qualifying FSS scheme flats are based on presort levels prior to inclusion in the FSS scheme bundle.

b. Bundle prices are based on the bundle and container sortation level except FSS scheme bundles in/on a FSS scheme container receives carrier route pricing; FSS scheme bundles in/on a FSS facility container receives 3-digit/SCF pricing.

c. Container prices are based on the type of container (tray, sack, or pallet), the level of sortation of the container and where the container is entered except FSS facility containers and FSS

scheme sacks or trays receive 3-digit/SCF pricing and where the container is entered, and FSS scheme pallets receive carrier route prices and where the pallet is entered.

29.4.2 Price Eligibility

[Revise the text of 29.4.2 to read as follows.]

Determine price eligibility as follows:

a. Pound Prices. Outside-County pieces are eligible for DSCF pound prices when placed on an SCF or more finely presorted container, deposited at the DSCF, DFSS or USPS-designated facility (see also 29.4.2b), and addressed for delivery within the DSCF's or DFSS service area. Non-letter-size pieces are also eligible when the mailer deposits 5-digit bundles at the destination delivery unit (DDU) (the facility where the carrier cases mail for delivery to the addresses on the pieces) and the 5-digit bundles are in or on the following types of containers:

- 1. A merged 5-digit scheme or merged 5-digit sack.
2. A merged 5-digit scheme, merged 5-digit, or 5-digit scheme pallet.

b. Container Prices. Mailers may claim the DSCF container price for SCF or FSS and more finely presorted containers that are entered at and destined within the service area of the SCF or FSS at which the container is deposited.

29.5 Destination Flat Sequencing System (DFSS) Facility Entry

* * * * *

29.5.2 Eligibility

[Revise the first sentence of 29.5.2 to read as follows.]

DSCF prices apply to eligible FSS pieces deposited at a USPS-designated FSS processing facility and correctly placed in a flat tray, sack, alternate approved container or on a pallet, labeled to a FSS scheme processed by that facility, under labeling list L006, column B or C.

* * * * *

6.5 Tray Preparation

[Revise the introductory text of 6.5 to read as follows.]

Instead of preparing overflow trays with fewer than 150 pieces, mailers may include these pieces in an existing qualified tray of at least 150 or more pieces at the next tray level. (For example, if a mailer has 30 overflow 5-digit pieces for ZIP Code 20260, these pieces may be added to an existing qualified AADC tray for the correct destination and the overflow 5-digit pieces will still qualify for the 5-digit

price.) Mailers must note these trays on standardized documentation (see 708.1.2). Pieces that are placed in the next tray level must be grouped by destination and placed in the front or back of that tray. Mailers may use this option selectively for AADC ZIP Codes. This option does not apply to origin/entry trays. Preparation sequence, tray size, and Line 1 labeling:

503 Extra and Additional Services

* * * * *

1.10 Receipts

[Revise the text of 1.10 to read as follows.]

Except for certificate of mailing under 5.0, the mailer receives a USPS sales receipt and the postmarked (round-dated) extra service form for services purchased at retail channels. The mailer must provide the receipt when submitting an insurance claim or filing an inquiry. For articles mailed via PC Postage or other online services, the mailer may access a computer printout online that identifies the applicable extra service number, total postage paid, insurance fee amount, declared value, declared mailing date, origin ZIP Code, and delivery ZIP Code. For three or more pieces with extra or accountable services presented for mailing at one time, the mailer uses Form 3877 (firm sheet) or USPS-approved privately printed firm sheets (see 1.7.2) in lieu of the receipt portion of the individual form. All entries made on firm sheets must be computer generated or made by typewriter, ink, or ballpoint pen. Alterations must be initialed by the mailer and accepting employee. Obliterate all unused portions of the addressee column with a diagonal line. USPS-approved privately printed firm sheets that contain the same information as Form 3877 may be approved by the local Postmaster or manager Business Mail Entry. The mailer may omit columns from privately printed Form 3877 that are not applicable to extra service requested. If the mailer wants the firm sheets receipted by the USPS (postmarked), the mailer must present the firm sheets with the articles to be mailed at a Post Office. The postmarked firm sheets become the mailer's receipts. For Registered Mail and COD (when Label 3816 is used), the mailer submits

the forms in duplicate and receives one copy as a mailing receipt after the entries are verified by the postal employee accepting the mailing. Except for Registered Mail and COD items, the USPS keeps no mailing records for mail pieces bearing extra services.

1.2.4 Renewal of Annual Permit Fee

[Revise the introductory text of 1.2.4 to read as follows.]

Except for QBRM permits, an annual renewal notice is provided to each BRM permit holder by the USPS. QBRM permits do not expire unless the account is unused for a period of 12 months. The renewal notice and the payment for the next 12 months must be returned by the expiration date to the Post Office that issued the permit. After the expiration date, if the permit holder has not paid the annual permit fee, then returned BRM pieces are treated as follows:

* * * * *

1.2.6 Revocation of a Permit

[Revise the text of 1.2.6 to read as follows.]

The USPS may revoke any BRM permit because of format errors or for refusal to pay the applicable permit fees (annual, accounting, quarterly, or monthly), postage, or per piece fees. If the permit was revoked due to format errors, then a former permit holder may obtain a new permit and permit number by completing and submitting a new Form 3615, paying the required BRM annual permit fee (if applicable), paying a new annual account maintenance fee (if applicable), and, for the next 2 years, submitting two samples of each BRM format to the appropriate Post Office for approval.

14.0 FSS Scheme Preparation

14.1 General

[Revise the introductory text of 14.1 to read as follows.]

All presorted and high density plus, high density and basic carrier route USPS Marketing Mail, presorted and carrier route Bound Printed Matter (BPM), and Periodicals flats including all carrier route flats meeting the standards in 201.6.2 must be separated/pooled into FSS schemes, properly bundled and placed on or in pallets, trays, sacks, or approved alternate containers, for FSS scheme ZIP Code combinations within the same facility. Mailings that include 10 or more pieces of USPS Marketing Mail flats, 6 or more pieces of Periodicals flats, or 10 or more pieces (or 10 or more pounds) of BPM flats to an FSS scheme must be separated/pooled into FSS scheme bundles. The Postal Service also recommends the use of authorized flat trays in lieu of sacks for FSS bundles. FSS scheme bundles that are not required to be placed in a FSS scheme or FSS facility container are combined with bundles of non-FSS sorted bundles and placed on an applicable SCF, 3-digit

or NDC container. Mailers must prepare FSS scheme qualifying mailpieces for each individual FSS scheme combination, and then prepare bundles of uniform size from those pieces. Mailings (excluding saturation mailings of USPS Marketing Mail) with nonpresorted BPM flats may be included in FSS preparation, but will not be eligible for presorted or carrier route prices. Mailpieces that meet the eligibility standards for 5-digit or 3-digit automation, 5-digit or 3-digit nonautomation, carrier route (except USPS Marketing Mail saturation) or presort will continue to be eligible for those piece prices when prepared in accordance with the FSS preparations standards. Mailpieces and bundles must also be prepared as follows:

14.2 Basic Standards

14.2.1 Basic Standards

[Revise the introductory text and items a through e to read as follows.]

All Periodicals flats (including carrier route flats) meeting the standards in 201.6.2 and destinating to FSS sites as shown in L006 must be prepared according to these standards. Mailings of In-County Periodicals flats and the associated Outside-County Periodicals flats mailings of 5,000 pieces or less may be prepared according to these standards. Periodicals are subject to the following:

a. Pricing eligibility is based on 207.11.0 through 207.14.0. FSS bundles placed on FSS facility pallets, sacks, trays, or approved alternate container will claim the 3-Digit/SCF bundle price. FSS bundles placed on a FSS scheme pallet, sack, tray or approved alternate container will claim the Carrier Route bundle price.

b. FSS scheme pallets will be assessed the Carrier Route Pallet price. FSS facility sort level pallets will be charged a 3-Digit/SCF Pallet container price. FSS scheme or facility sacks or trays will be assessed the 3-Digit/SCF Sack/Tray price. Pallets, sacks and trays entered at a DFSS will claim the DSCF entry price.

c. The Outside-County pound price for mail entered at a DFSS will be the DSCF price. The Inside-County price will claim prices for the "None" entry level.

d. Mailers must provide standardized presort documentation under 708.1.0 that demonstrates eligibility for prices in accordance with 207.14.0 and 207.25.0.

e. Each mailpiece must be identified with an optional endorsement line in accordance with Exhibit 708.7.1.1, or when authorized, using a red Label 5

SCH barcoded pressure-sensitive bundle label.

* * * * *

14.3 USPS Marketing Mail

14.3.1 Basic Standards

[Revise the introductory text of 14.3.1 to read as follows.]

All flat-size USPS Marketing Mail mailpieces (except saturation) must be separated/pooled into 5-digit FSS scheme bundles and placed on pallets, or in sacks or approved alternate containers, for delivery to ZIP Codes having Flats Sequencing System (FSS) processing capability, as shown in L006. USPS Marketing Mail flats are subject to the following:

* * * * *

[Revise items b and c to read as follows.]

b. Mailers must provide standardized presort documentation under 708.1.0 that demonstrates eligibility for prices in accordance with 243.

c. Each mailpiece must be identified with an optional endorsement line in accordance with Exhibit 708.7.1.1; or when authorized, using a red Label 5 SCH barcoded pressure-sensitive bundle label.

* * * * *

14.4 Bound Printed Matter

14.4.1 Basic Standards

[Revise the introductory text of 14.4.1 to read as follows.]

Bound Printed Matter (BPM) flats that meet the standards in 201.6.2 must be separated/pooled into FSS scheme bundles and placed on pallets, or in flat trays, sacks, or approved alternate containers, for delivery to ZIP Codes having FSS processing capability, as shown in L006. BPM flats are subject to the following:

* * * * *

[Revise items b, c and d to read as follows.]

b. Mailers must provide standardized presort documentation under 708.1.0 that demonstrates eligibility for prices in accordance with 263.

c. Mailers must separate/pool all eligible flat-size mailpieces into FSS scheme bundles according to L006.

d. Each mailpiece must be identified with an optional endorsement line in accordance with Exhibit 708.7.1.1; or when authorized, using a red Label 5 SCH barcoded pressure-sensitive bundle label.

15.1.11 Preparation for FSS Zones

[Revise the introductory text of 15.1.11 to read as follows.]

Mailers authorized to combine mailings of USPS Marketing Mail flats and Periodicals flats must prepare these mailings under 14.0, when the mailing includes pieces destinating within one or more of the FSS zones in L006. The following applies:

[Revise item a to read as follows.]

a. Each mailpiece must be identified with an optional endorsement line (OEL), including the correct ZIP Code listed in L006, Column B, in accordance with Exhibit 708.7.1.1. The OEL described in 2.2 must not be used with mailpieces prepared under this option.

* * * * *

15.4.0 Pallet Preparation

15.4.1 Pallet Preparation, Sequence and Labeling

When combining USPS Marketing Mail and Periodicals flats within the same bundle or combining bundles of USPS Marketing Mail flats and bundles of Periodicals flats on pallets, bundles must be placed on pallets. Preparation, sequence and labeling:

[Reverse the order of items a and b to read as follows.]

a. 5-digit scheme carrier routes, required. Pallet must contain only carrier route bundles for the same 5-digit scheme under L001. For 5-digit destinations not part of L001, 5-digit carrier routes pallet preparation begins with 15.4.1c. Labeling:

- 1. Line 1: L001.
- 2. Line 2: "STD/PER FLTS"; followed by "CARRIER ROUTES" (or "CR-RTS"); followed by "SCHEME" (or "SCH"); followed by "MIX COMAIL."

b. Merged 5-digit scheme, optional. Not permitted for bundles containing non-carrier route automation-compatible flats under 201.6.0. Required for all other bundles. Pallet must contain carrier route bundles and non-

carrier route 5-digit bundles (Presorted bundles only) for the same 5-digit scheme under L001. For 5-digit destinations not part of L001, merged 5-digit pallet preparation begins with 15.4.1d. Labeling:

1. Line 1: L001.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA-R09-OAR-2016-0543 FRL-9956-98-Region 9]

Determination of Attainment of the 2008 Ozone National Ambient Air Quality Standards; Eastern San Luis Obispo, California

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is finalizing our determination that the San Luis Obispo (Eastern San Luis Obispo) ozone nonattainment area (NAA) in California has attained the 2008 ozone National

Ambient Air Quality Standards (NAAQS or “standards”) by the applicable attainment date of July 20, 2016. This determination is based on complete, quality-assured and certified data for the 3-year period preceding that attainment date. Based on this determination, the Eastern San Luis Obispo NAA will not be reclassified to a higher ozone classification.

DATES: This rule will be effective on January 20, 2017.

ADDRESSES: The EPA has established a docket for this action under Docket ID No. EPA-R09-OAR-2016-0543. All documents in the docket are listed on the <http://www.regulations.gov> Web site. Although listed in the index, some information is not publicly-available, e.g., Confidential Business Information or other information whose disclosure is restricted by statute. I. Summary of Proposed Rule

On October 12, 2016 (81 FR 70382), the EPA proposed to determine that the Eastern San Luis Obispo ozone NAA has attained the 2008 ozone standard by the applicable attainment date of July 20,

2106, based on complete, quality-assured and certified ambient air quality monitoring data for the 2013–2015 monitoring period. San Luis Obispo County is the northern-most county within the air basin designated by California as the South Central Coast Air Basin. The NAA encompasses roughly the eastern half of San Luis Obispo County. For the precise boundaries of the Eastern San Luis Obispo 2008 ozone NAA, see 40 CFR 81.305.

Our proposed rule provided background information on the 2008 ozone standards,¹ the EPA’s classification of the Eastern San Luis Obispo NAA under the Clean Air Act (CAA) as “Marginal” for the 2008 ozone standard, and the EPA’s prior approval of an extension of the applicable attainment date for the area from July 20, 2015 to July 20, 2016 (81 FR 26697, May 4, 2016). In our proposed rule, we described our obligation under CAA section 181(b)(2)(A) to determine whether an ozone NAA attained the ozone NAAQS by the applicable attainment date within six months of that date; how we determine whether an area’s air quality meets the 2008 ozone standard; and the relevant air quality monitoring agencies in the Eastern San Luis Obispo ozone NAA, their monitoring network plans, and the relevant ozone monitoring sites. We also discussed our previous review of the networks and network plans, the annual certifications of ambient air monitoring data, and our determination of completeness for 2013–2015 data from the two ozone monitoring sites within the Eastern San Luis Obispo NAA.

Our proposed rule included a table of ozone “design values” at the two ozone monitoring sites in the Eastern San Luis

¹ Since the primary and secondary 2008 ozone standards are the same, we hereafter refer to them herein using the singular “2008 ozone standard.”
