Title and OMB Number: Defense Federal Acquisition Regulation Supplement (DFARS) Part 211, Describing Agency Needs, and related clause at DFARS 252.211.

Needs and Uses:

a. The information collected under DFARS provision 252.211–7004, Alternate Preservation, Packaging, and Packing, is used by DoD contracting officers to evaluate and award contracts using commercial or industrial preservation, packaging, or packing if the offeror chooses to propose such alternates.

b. The information collected under DFARS provision 252.211–7005, Substitutions for Military or Federal Specifications and Standards, is used by DoD contracting officers to verify that a Single Process Initiative (SPI) process proposed by an offeror is a valid replacement for a military or Federal specification or standard.

c. The information collected under DFARS 252.211–7007, Reporting of Government-Furnished Property, strengthens the accountability and end-to-end traceability of Government-furnished property (GFP) within DoD. Through electronic notification of physical receipt, the contracting officer is made aware that GFP has arrived at the contractor’s facility. The DoD logistics community uses the information as a data source of available DoD equipment. In addition, the DoD organization responsible for contract

administration uses the data to test the adequacy of the contractor's property management system.

Summary of Information Collection

a. DFARS 252.211-7004 allows potential offerors to propose alternatives to military preservation, packaging, or packing specifications. Specifically, the offeror may include in its offer two unit prices in the format specified in the clause: One price based on use of the military specifications, and another price based on commercial or industry preservation, packaging, or packing of equal or better protection than the military.

b. DFARS provision 252.211-7005 permits offerors to propose SPI processes as alternatives to military or Federal specifications and standards cited in DoD solicitations for previously developed items. As defined in the clause, "SPI process" means a management or manufacturing process that has been accepted previously by a DoD Management Council for use in lieu of a specific military or Federal specification or standard at a specific facility. When proposing SPI processes, offerors identify the proposed SPI process, specific facility to which it will apply, and the specific contract line items, which will be affected.

c. DFARS clause 252.211-7007 requires contractors to report to the Item Unique Identification (IUID) Registry all serially-managed Government-furnished property (GFP), as well as contractor receipt of non-serially managed items. "Serially managed item" means an item designated by DoD to be uniquely tracked, controlled, or managed in maintenance, repair, and/or supply systems by means of its serial number. The clause provides a list of specific data elements contractors are to report to the IUID registry, as well as procedures for updating the registry.
