Approval of California Air Plan Revisions, South Coast Air Quality Management District

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is taking final action to approve revisions to the South Coast Air Quality Management District (SCAQMD) portion of the California State Implementation Plan (SIP). These revisions concern emissions of oxides of nitrogen (NO_x) from ovens, dryers, dehydrators, heaters, kilns, calciners, furnaces, crematories, incinerators, heated pots, cookers, roasters, smokers, fryers, closed and open heated tanks and evaporators, distillation units, afterburners, degassing units, vapor incinerators, catalytic or thermal oxidizers, soil and water remediation units, and other combustion equipment. We are finalizing our approval of local rules that regulate these emission sources under the Clean Air Act (CAA or the Act).

DATES: These rules will be effective on January 27, 2017.

ADDRESSES: The EPA has established a docket for this action under Docket ID No. EPA-R09-OAR-2016-0444. All documents in the docket are listed on the <http://www.regulations.gov> Web site. Although listed in the index, some

I. Proposed Action

On September 16, 2016, the EPA proposed to approve the following rules into the California SIP. 81 FR 63732.

Local agency	Rule No.	Rule title	Adopted/ amended/ revised	Submitted
SCAQMD	1147	NO _x Reductions from Miscellaneous Sources	09/09/2011	02/06/2013
SCAQMD	1153.1	Emissions of Oxides of Nitrogen from Commercial Food Ovens	09/07/2014	04/07/2015

We proposed to approve these rules because we determined that they complied with the relevant CAA requirements. Our proposed action contains more information on the rules and our evaluation.

II. Public Comments and EPA Responses

The EPA’s proposed action provided a 30-day public comment period. During this period, we received one comment regarding EPA’s proposed approval of Rule 1153.1 that was submitted anonymously.

Comment: The comment generally supports EPA’s proposal to approve Rule 1153.1. The commenter acknowledges Rule 1153.1 was designed to address delays in emission reduction technology development. However, the comment letter expressed a concern regarding the exemption for units with daily NO_x emissions of 1 pound per day or less. The commenter states, “burners could be replaced with larger emission burners and it could easily go unknown by the enforcing agency.” Additionally, the commenter makes a

recommendation for “a testing schedule that is less strict for the small emission burners compared to the larger ones.”

Response: The EPA appreciates the comment letter’s general support of our approval of Rule 1153.1. The exemption discussed in the comment is found in section (g)(2) of Rule 1153.1. Sections (g)(2)(A)–(g)(2)(E) of Rule 1153.1 describe the documentation required of units with daily NO_x emissions of 1 pound per day or less. These requirements ensure the exempted units are rated at a heat input capacity of less than 325,000 BTU per hour, comply with a permit condition limiting NO_x emissions to 1 pound per day or less, and keep daily records of unit operation and fuel gas consumption. Because of these requirements, we disagree that the enforcing agency would not know about these units. The rule exempts these units from requirements to comply with the limits for larger units and testing requirements associated with those units. The testing required is used to confirm compliance with the limits in Table 1 of the rule. If the commenter’s recommendation for a less strict testing

schedule were implemented for the smaller units, it is unclear what would be tested, since the exempted units do not have emissions limits in the rule to comply with. As noted above, the comment letter generally supports our approval of Rule 1153.1 and does not request or recommend any specific changes to our proposed action. The comment letter recognizes that Rule 1153.1 will decrease NO_x emissions. For these reasons, the EPA is finalizing its proposed approval of Rule 1153.1 without change based on the comment.

III. EPA Action

No comments were submitted that change our assessment of the rules as described in our proposed action. Therefore, as authorized in section 110(k)(3) of the Act, the EPA is fully approving these rules into the California SIP.

IV. Incorporation by Reference

In this rule, the EPA is finalizing regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR
