(c) Mediators facilitate communication between the parties, including joint or separate discussions, to help them come to a mutually agreeable solution. The mediators may use all appropriate customary techniques associated with dispute resolution.

(d) We do not permit the parties to make any audio or video recordings of dispute resolution meetings. The mediator's notes are confidential and we do not disclose them. The parties also agree to keep the content of the dispute resolution discussions confidential.

(e) Proceedings with the mediator are informal, and the mediator has no authority to compel the parties to resolve the dispute. Either party may withdraw from the dispute resolution process at any point. If one of the parties initiates litigation during the course of the dispute resolution process, they must notify us.

(f) If the parties reach an impasse, the mediator may raise the dispute to the Deputy Director of OGIS. The Deputy Director may provide the parties with an assessment of the situation as an additional level of dispute resolution efforts to assist the parties with breaking the impasse. Any assessment the Deputy Director provides is confidential and the parties may not rely upon it in any subsequent proceedings.

(g) OGIS issues a final response letter to the parties when the dispute resolution process concludes. This letter documents the outcome of the process and any resolution the parties reach. No party may rely on the letter in subsequent proceedings and its contents are confidential unless both parties agree in writing to allow OGIS to disclose it publicly.

#### Air Plan Approval; Illinois; Volatile Organic Compounds Definition

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

**SUMMARY:** The Environmental Protection Agency (EPA) is proposing to approve a revision to the Illinois State Implementation Plan (SIP). The revision amends the Illinois Administrative Code by updating the definition of volatile organic material or volatile organic compounds to exclude 2-amino-2-methyl-1-propanol. This revision is in response to an EPA rulemaking in 2014 which exempted this compound from the Federal definition of volatile organic compounds on the basis that the compound makes a negligible contribution to tropospheric ozone formation.
