

FEDERAL REGISTER

Vol. 81 Friday,
No. 141 July 22, 2016

Pages 47689–48314

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097-6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, Washington, DC 20402 is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see www.ofr.gov.

The seal of the National Archives and Records Administration authenticates the **Federal Register** as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at www.fdsys.gov, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 59, 1 (January 2, 1994) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, gpocusthelp.com.

The annual subscription price for the **Federal Register** paper edition is \$749 plus postage, or \$808, plus postage, for a combined **Federal Register**, **Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is \$165, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register**, including postage, is based on the number of pages: \$11 for an issue containing less than 200 pages; \$22 for an issue containing 200 to 400 pages; and \$33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for \$3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see bookstore.gpo.gov.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 81 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

Rules and Regulations

Federal Register

Vol. 81, No. 141

Friday, July 22, 2016

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Rural Utilities Service

7 CFR Part 1780

Procurement Methods; Correction

AGENCY: Rural Utilities Service, Agriculture.

ACTION: Correcting amendment.

SUMMARY: The Rural Utilities Service (RUS), an agency of the United States Department of Agriculture (USDA), is correcting its portion of USDA's uniform federal assistance final rule, that was published in the **Federal Register** on February 16, 2016 (81 FR 7695) by revising the procurement methods section.

DATES: *Effective Date:* July 22, 2016.

FOR FURTHER INFORMATION CONTACT: Ben Shuman, Water and Environmental Programs, Rural Utilities Service, United States Department of Agriculture, 1400 Independence Avenue SW., Washington, DC 20250-9011, Telephone: 202-720-1784, email: Ben.Shuman@wdc.usda.gov.

SUPPLEMENTARY INFORMATION: On December 26, 2013, OMB published *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* final guidance (78 FR 78589) giving all federal award making agencies one year to implement conforming changes to all regulations as needed to address changes in requirements associated with this new Uniform Guidance. On December 19, 2014, OMB published a joint interim final rule and conforming changes in the **Federal Register** (79 FR 75871), making the conforming changes for award making agencies across the Federal government. Included in this joint interim final rule were conforming changes to regulations regarding procurement methods under Federal awards for the Rural Utilities Service

Water and Waste Disposal program to ensure consistency with the Uniform Guidance.

Need for Correction

The United States Department of Agriculture finalized its portion of the conforming changes in the **Federal Register** on Tuesday, February 16, 2016 (81 FR 7695), that inadvertently stated instructions in § 1780.72, as published, which contains errors that may prove to be misleading and need to be clarified.

List of Subjects in 7 CFR Part 1780

Business and industry, Community development, Community facilities, Grant programs—housing and community development, Reporting and recordkeeping requirements, Rural areas, Waste treatment and disposal, Water supply, Watersheds.

Accordingly, 7 CFR part 1780 is corrected by making the following correcting amendment:

PART 1780—WATER AND WASTE LOANS AND GRANTS

■ 1. The authority citation for part 1780 continues to read as follows:

Authority: 5 U.S.C. 301; 7 U.S.C. 1989; 16 U.S.C. 1005.

Subpart C—Planning, Designing, Bidding, Contracting, Constructing and Inspections

■ 2. Revise § 1780.72 to read as follows:

§ 1780.72 Procurement methods.

Procurement shall be made by one of the following methods and in accordance with requirements of 2 CFR 200.320: Micro-purchases, procurement by small purchase procedures, procurement by sealed bids (formal advertising), procurement by competitive proposals, or procurement by noncompetitive proposals. The sealed bid method is the preferred method for procuring construction.

Dated: July 13, 2016.

Brandon McBride,

Administrator, Rural Utilities Service.

BILLING CODE P

NUCLEAR REGULATORY COMMISSION

10 CFR Chapter I

[NRC-2016-0134]

NRC Enforcement Policy

AGENCY: Nuclear Regulatory Commission.

ACTION: Policy revision; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing a revision to its Enforcement Policy (Enforcement Policy or Policy) to reflect the new maximum civil penalty amount the agency can assess for a violation of the Atomic Energy Act of 1954, as amended (AEA), or any regulation or order issued under the AEA. By interim final rule, the NRC changed this amount from \$140,000 to \$280,469 per violation per day, as mandated by the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015 (the 2015 Improvements Act). This action revises the Enforcement Policy so that dollar amounts in the policy correspond to the agency's revised civil penalty amount, and also provides guidance regarding instances where the NRC may exercise discretion in mitigating the amount of a civil penalty.

DATES: This revision to the Enforcement Policy is effective on August 1, 2016. The Commission will apply the revised Enforcement Policy to any penalties assessed on and after the effective date; the penalty is not based on the date that the violation occurs.

ADDRESSES: Please refer to Docket ID NRC-2016-0134 when contacting the NRC about the availability of information regarding this action. You may obtain publicly-available information related to this document using any of the following methods:

- *Federal Rulemaking Web site:* Go to <http://www.regulations.gov> and search for Docket ID NRC-2016-0134. Address questions about NRC dockets to Carol Gallagher; telephone: 301-415-3463; email: Carol.Gallagher@nrc.gov. For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly-available documents online in the

ADAMS Public Documents collection <http://www.nrc.gov/reading-rm/adams.html>. To begin the search, select "ADAMS Public Documents" and then select "Begin Web-based ADAMS Search." For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1-800-397-4209, 301-415-4737, or by email to pdr.resource@nrc.gov. SUPPLEMENTARY INFORMATION:

I. Background

On November 2, 2015, the President signed into law the 2015 Improvements Act, which amended the Federal Civil Penalties Inflation Adjustment Act of 1990 (FCPIAA) and required all agencies to adjust for inflation their levels of civil monetary penalties via rulemaking by July 1, 2016, to be effective no later than August 1, 2016. In an interim final rule published in the Rules and Regulations section of the *Federal Register* (81 FR 43019; July 1, 2016), the NRC is amending its regulations to implement the 2015 Improvements Act by adjusting the amount in § 2.205(j) of title 10 of the *Code of Federal Regulations* (10 CFR), according to a statutory formula based on the Consumer Price Index (CPI), from \$140,000 to \$280,469. This amount represents the new maximum civil penalty that the NRC may impose for a violation of the AEA, or any regulation or order issued under the AEA, per violation per day. Starting in January 2017, the 2015 Improvements Act also requires that the NRC make annual inflation adjustments to the maximum civil penalty amount in 10 CFR 2.205, rounded to the nearest multiple of \$1.

To incorporate the updated maximum civil penalty amount specified in its regulations, the NRC is issuing a

revision to its Enforcement Policy (ADAMS Accession No. ML16197A561). Specifically, the NRC is updating Table A in Section 8.0, "Table of Base Civil Penalties," which currently lists \$140,000 as the maximum civil penalty amount the agency may assess for the most significant severity level of violation. To promote regulatory certainty and save NRC staff resources by lessening the chances that the Enforcement Policy will have to be revised on an annual basis alongside 10 CFR 2.205 resulting from minor increases in inflation (less than one half percent), the maximum civil penalty amount in the revised Table A will be calculated by rounding the maximum civil penalty amount in 10 CFR 2.205 down to the nearest multiple of \$10,000 (assuming the amount in 10 CFR 2.205 is not already a multiple of \$10,000). Therefore, the new maximum civil penalty in Table A is now \$280,000, rounded down from \$280,469. The 2015 Improvements Act does not limit the Commission's authority to exercise discretion and assess civil penalty levels below the statutory maximum, and the gains to be realized from a more stable table of base civil penalties outweighs any arguable loss of deterrent effect from rounding this maximum figure down, at most, \$9,999 in a given year. Additionally (and as stated in the Preface to the Enforcement Policy), this is a statement of policy, not regulation, and the Commission still reserves the right to deviate from the Enforcement Policy where particular circumstances warrant and assess the full statutory maximum.

The revised Table A in Section 8.0 of the Enforcement Policy also now includes a note explaining how the table's maximum civil penalty amount is generated as a result of rounding down from the number in 10 CFR 2.205. The note also explains that other amounts listed in the table have been adjusted to maintain the same proportional relationship between penalties. The revised table also now includes a footnote explaining that the maximum civil penalty is adjusted on an annual basis to put the regulated community on notice that the NRC may periodically update the amount in 10 CFR 2.205 pursuant to the 2015 Improvements Act, which would necessitate a change to the amounts in Table A in Section 8.0 of the Enforcement Policy. In the event of such an update, the NRC may assess civil penalties consistent with the updated amount in 10 CFR 2.205 even if it has not yet performed an update to Table A (though the NRC will strive to provide

timely updates of the Enforcement Policy when necessitated by updates to 10 CFR 2.205). Additionally, as stated in Section 6 of the FCPIAA (28 U.S.C. 2461 note), when the NRC increases civil penalty amounts through rulemaking pursuant to the 2015 Improvements Act, it will apply those increased amounts when assessing any penalty after the effective date of that rulemaking, regardless of whether the underlying violation occurred before that effective date.

The NRC is not adjusting the civil penalty amounts in Table A for the "loss, abandonment, or improper transfer of disposal of regulated material, regardless of the use or type of licensee," other than to note that these values will be periodically reviewed and updated, since these civil penalty amounts are determined by the estimated or actual cost of authorized disposal.

Lastly, because the agency's authority to issue civil penalties for violations of the AEA has more than doubled as a result of the 2015 Improvements Act, the NRC is also including new language in Section 3.6 of the Enforcement Policy, "Use of Discretion in Determining the Amount of a Civil Penalty," to confirm that, notwithstanding the outcome of the normal civil penalty process, the agency may take into account mitigating factors based on the merits of an individual case, including the ability of various classes of licensees to pay. It is not the NRC's intention that the economic impact of a civil penalty be so severe that it adversely affects a licensee's ability to safely conduct licensed activities or puts a licensee out of business. Section 3.6 now allows NRC staff to consider enforcement discretion for cases where there is a concern that imposition of a base civil penalty would be overly punitive rather than a deterrent for the individual or licensee.

II. Congressional Review Act

This policy statement is a rule as defined in the Congressional Review Act (5 U.S.C. 801-808). However, the Office of Management and Budget has not found it to be a major rule as defined in the Congressional Review Act.

Dated at Rockville, Maryland, this 6th day of July, 2016.

For the Nuclear Regulatory Commission.

Andrew L. Bates,

Acting, Secretary of the Commission.

[FR Doc. 2016-16476 Filed 7-21-16; 8:45 a.m.]

BILLING CODE 7590-01-P

FARM CREDIT ADMINISTRATION**12 CFR Parts 600, 602, 603, and 606**

RIN 3052-AD17

FCA Organization; Updates and Technical Corrections**AGENCY:** Farm Credit Administration.**ACTION:** Final rule.

SUMMARY: The Farm Credit Administration (FCA or Agency) issues a final rule amending its regulations to reflect changes in the Agency's organizational structure and correct the zip code for the field office located in Irving, TX.

DATES: This regulation will become effective no earlier than 30 days after publication in the **Federal Register** during which either one or both Houses of Congress are in session. We will publish a notice of the effective date in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Mike Wilson, Policy Analyst, Office of Regulatory Policy, Farm Credit Administration, McLean, VA 22102-5090, (703) 883-4124, TTY (703) 883-4434; or Autumn Agans, Attorney-Advisor, Office of General Counsel, Farm Credit Administration, McLean, Virginia 22102-5090, (703) 883-4020, TTY (703) 883-4020.

SUPPLEMENTARY INFORMATION:**I. Objectives**

The objective of this final rule is to reflect changes to the FCA's organizational structure and correct the zip code for the field office located in Irving, TX. In addition, references in our regulations to various FCA offices, which have changed, have been revised. We also are re-ordering the list of FCA offices into a more logical progression that is consistent with FCA's organizational chart.

II. Overview

On April 27, 2016, the FCA Board approved an organizational chart that separated the unrelated functions of the Office of Management Services (OMS) into the Office of Agency Services (OAS) and the Office of the Chief Financial Officer (OCFO). This change will allow the Directors of the new offices to better focus on the core functions and duties of the offices.

III. Organizational Structure

The Freedom of Information Act, 5 U.S.C. 552, requires, in part, that each Federal agency publish in the **Federal Register**, for the guidance of the public, a description of its organization

structure. Accordingly, we revise our regulations by:

(1) In § 600.2, changing the zip code for the Irving, TX field office from 75602-3957 to 75062-3906;

(2) In § 600.4,

(a) Including the Office of the Chief Financial Officer in FCA's organization structure;

(b) Including the Office of Agency Services in FCA's organizational structure;

(c) Removing the Office of Management Services from the FCA's organizational structure; and

(d) Re-ordering the list of FCA offices into a more logical progression that is consistent with FCA's organizational chart.

(3) In §§ 602.8, 603.340, and 606.670, changing the Office of Management Services to the Office of Agency Services, and corresponding office name abbreviations, where appropriate;

(4) In § 602.25, removing "Regulation and Policy Division" and changing the Office of Policy and Analysis to the Office of Regulatory Policy.

IV. Certain Findings

We have determined that the amendments involve Agency management and personnel and other minor technical changes. Therefore, the amendments do not constitute a rulemaking under the Administrative Procedure Act (APA), 5 U.S.C. 551, 553(a)(2). Under the APA, the public may participate in the promulgation of rules that have a substantial impact on the public. The amendments to our regulations relate to Agency management and personnel and a minor technical change only and have no direct impact on the public and, therefore, do not require public participation.

Even if these amendments were a rulemaking under 5 U.S.C. 551, 553(a)(2) of the APA, we have determined that notice and public comment are unnecessary and contrary to the public interest. Under 5 U.S.C. 553(b)(A) and (B) of the APA, an agency may publish regulations in final form when they involve matters of agency organization or where the agency for good cause finds that notice and public comment are impracticable, unnecessary, or contrary to the public interest. As discussed above, these amendments result from recent office reorganizations. Because the amendments will provide accurate and current information on the organization of the FCA and update the citation to the Act, it would be contrary to the public interest to delay amending the regulations.

V. Regulatory Flexibility Act

Pursuant to section 605(b) of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), FCA hereby certifies that the final rule will not have a significant economic impact on a substantial number of small entities. Each of the banks in the Farm Credit System (System), considered together with its affiliated associations, has assets and annual income in excess of the amounts that would qualify them as small entities. Therefore, System institutions are not "small entities" as defined in the Regulatory Flexibility Act.

List of Subjects*12 CFR Part 600*

Organization and functions (Government agencies).

12 CFR Part 602

Freedom of information.

12 CFR Part 603

Privacy.

12 CFR Part 606

Administrative practice and procedure, Civil rights, Equal employment opportunity, Federal buildings and facilities, Individuals with disabilities.

For the reasons stated in the preamble, parts 600, 602, 603, and 606 of chapter VI, title 12 of the Code of Federal Regulations are amended as follows:

PART 600—ORGANIZATION AND FUNCTIONS

- 1. The authority citation for part 600 continues to read as follows:

Authority: Secs. 5.7, 5.8, 5.9, 5.10, 5.11, 5.17, 8.11 of the Farm Credit Act (12 U.S.C. 2241, 2242, 2243, 2244, 2245, 2252, 2279aa-11).

§ 600.2 [Amended]

- 2. Amend § 600.2 in paragraph (b) by removing the zip code "75602-3957" and adding in its place the zip code "75062-3906."

- 3. Revise § 600.4 to read as follows:

§ 600.4 Organization of the Farm Credit Administration.

(a) *Offices and functions.* The primary offices of the FCA are:

(1) *Office of Inspector General.* The Office of Inspector General conducts independent audits, inspections, and investigations of Agency programs and operations and reviews proposed legislation and regulations.

(2) *Secretary to the Board.* The Secretary to the Board serves as the

parliamentarian for the Board and keeps permanent and complete records and minutes of the acts and proceedings of the Board.

(3) *Equal Employment and Inclusion Director.* The Office of Equal Employment and Inclusion manages and directs the Agency-wide Diversity, Inclusion, and Equal Employment Opportunity Program for FCA and FCSIC. The office serves as the chief liaison with the Equal Employment Opportunity Commission and the Office of Personnel Management on all EEO, diversity, and inclusion issues. The office provides counsel and leadership to Agency management to carry out its continuing policy and program of nondiscrimination, affirmative action, and diversity.

(4) *Designated Agency Ethics Official.* The Designated Agency Ethics Official is designated by the FCA Chairman to administer the provisions of title I of the Ethics in Government Act of 1978, as amended, to coordinate and manage FCA's ethics program and to provide liaison to the Office of Government Ethics with regard to all aspects of FCA's ethics program.

(5) *Office of Congressional and Public Affairs.* The Office of Congressional and Public Affairs performs Congressional liaison duties and coordinates and disseminates Agency communications.

(6) *Office of Secondary Market Oversight.* The Office of Secondary Market Oversight regulates and examines the Federal Agricultural Mortgage Corporation for safety and soundness and compliance with law and regulations.

(7) *Office of the Chief Operating Officer.* The Chief Operating Officer has broad responsibility for planning, directing, and controlling the operations of the Offices of Management Services, Examination, Regulatory Policy, and General Counsel in accordance with the operating philosophy and policies of the FCA Board.

(8) *Office of Agency Services.* The Office of Agency Services manages human capital and administrative services for the Agency. This includes providing the following services to the Agency: Staffing and placement, job evaluation, compensation and benefits, payroll administration, performance management and awards, employee relations, employee training and development, contracting, acquisitions, records and property management, supply services, agency purchase cards, design, publication, and mail service.

(9) *Office of the Chief Financial Officer.* The Office of the Chief Financial Officer manages and delivers timely, accurate, and reliable financial

services to the Agency. The office establishes financial policies and procedures and oversees the formulation and execution of the Agency's budget. The office reports periodically on the status of the Agency's financial position, results of operations, and budgetary resources. It also oversees the Agency's travel management, internal controls, and personnel security programs.

(10) *Office of Regulatory Policy.* The Office of Regulatory Policy develops policies and regulations for the FCA Board's consideration; evaluates regulatory and statutory prior approvals; manages the Agency's chartering activities; and analyzes policy and strategic risks to the System.

(11) *Office of Examination.* The Office of Examination evaluates the safety and soundness of FCS institutions and their compliance with law and regulations and manages FCA's enforcement and supervision functions.

(12) *Office of Information Technology.* The Office of Information Technology manages and delivers the Agency's information technology, data analysis infrastructure, and the security supporting Agency technology resources.

(13) *Office of General Counsel.* The Office of General Counsel provides legal advice and services to the FCA Chairman, the FCA Board, and Agency staff.

(b) *Additional information.* You may obtain more information on the FCA's organization by visiting our Web site at <http://www.fca.gov>. You may also contact the Office of Congressional and Public Affairs:

- (1) In writing at FCA, 1501 Farm Credit Drive, McLean, Virginia 22102–5090;
- (2) By email at info-line@fca.gov; or
- (3) By telephone at (703) 883–4056.

PART 602—RELEASING INFORMATION

■ 4. The authority citation for part 602 continues to read as follows:

Authority: Secs. 5.9, 5.17, 5.59 of the Farm Credit Act (12 U.S.C. 2243, 2252, 2277a–8); 5 U.S.C. 301, 552; 12 U.S.C. 1821(t); 52 FR 10012; E.O. 12600; 52 FR 23781, 3 CFR 1987, p. 235.

§ 602.8 [Amended]

- 5. Amend § 602.8 as follows:
- a. In the second sentence of paragraph (a), by removing the words “Office of Management Services (OMS)” and adding in their place the words “Office of Agency Services (OAS).”
- b. In paragraphs (b) and (c), by removing the abbreviation “OMS” and

adding in its place the abbreviation “OAS” each place it appears.

§ 602.25 [Amended]

- 6. Amend § 602.25 by removing the words “Regulation and Policy Division, Office of Policy and Analysis” and adding in their place the words “Office of Regulatory Policy.”

PART 603—PRIVACY ACT REGULATIONS

■ 7. The authority citation for part 603 continues to read as follows:

Authority: Secs. 5.9, 5.17 of the Farm Credit Act (12 U.S.C. 2243, 2252); 5 U.S.C. app. 3, 5 U.S.C. 552a(j)(2) and (k)(2).

§ 603.340 [Amended]

- 8. Amend § 603.340 in paragraphs (a) and (b) by removing the words “Office of Management Services” and adding in their place the words “Office of Agency Services” each place they appear.

PART 606—ENFORCEMENT OF NONDISCRIMINATION ON THE BASIS OF HANDICAP IN PROGRAMS OR ACTIVITIES CONDUCTED BY THE FARM CREDIT ADMINISTRATION

■ 9. The authority citation for part 606 continues to read as follows:

Authority: 29 U.S.C. 794.

§ 606.670 [Amended]

- 10. Amend § 606.670 in paragraph (c) by removing the words “Office of Management Services” and adding in their place the words “Office of Agency Services.”

Dated: July 13, 2016.

Dale L. Aultman,

Secretary, Farm Credit Administration Board.

BILLING CODE 6705–01–P

FEDERAL RESERVE SYSTEM

12 CFR Chapter II

[Docket No. OP–1544]

Federal Reserve Policy on Payment System Risk; Procedures for Measuring Daylight Overdrafts

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Policy statement.

SUMMARY: The Board of Governors of the Federal Reserve System (Board) has revised part II of the Federal Reserve Policy on Payment System Risk (PSR policy) related to the procedures for measuring balances intraday in institutions' accounts at the Federal

Reserve Banks (Reserve Banks) to conform with enhancements to the Reserve Banks' same-day automated clearinghouse (ACH) service previously approved by the Board.

DATES: *Effective Date:* September 23, 2016.

FOR FURTHER INFORMATION CONTACT:

Jeffrey D. Walker, Assistant Director (202-721-4559), Jason Hinkle, Manager, Financial Risk Management (202-912-7805), or Michelle D. Olivier, Senior Financial Services Analyst (202-452-2404), Division of Reserve Bank Operations and Payment Systems, Board of Governors of the Federal Reserve System; for users of Telecommunications Device for the Deaf (TDD) only, contact 202/263-4869.

SUPPLEMENTARY INFORMATION:

Background

The Board's PSR policy establishes the procedures, referred to as posting rules, for the settlement of credits and debits to institutions' Federal Reserve accounts for different payment types.¹ The application of these posting rules determines an institution's intraday account balance and whether it has incurred a negative balance (daylight overdraft).

As announced on September 23, 2015, the Board approved enhancements to the Reserve Banks' FedACH® SameDay Service (FedACH SameDay Service) effective September 23, 2016.² The enhancements are intended to align the Reserve Banks' existing opt-in same-day ACH service with amendments to NACHA's Operating Rules and Guidelines.³ Under the newly enhanced Reserve Bank service, all receiving depository financial institutions will be required to participate in same-day ACH, and originating depository financial institutions will be required to pay a fee to receiving depository financial institutions for each same-day ACH forward transaction. The NACHA amendments, as incorporated into the Reserve Bank Operating Circulars, will become effective in multiple phases, beginning with same-day credit and return transactions this September and

followed by same-day debit transactions in September 2017. Upon implementation of the first phase, the Reserve Banks' current opt-in same-day ACH service will cease to exist and will be supplanted by the newly-enhanced same-day service. The PSR policy's posting rules for forward and return same-day ACH transactions are being updated to conform to the Reserve Banks' new FedACH SameDay Service, effective September 23, 2016.

Under the Reserve Banks' current same-day ACH service, credits and debits for forward same-day ACH transactions post at 5:00 p.m.⁴ Beginning September 23, 2016, credits and debits for same-day ACH credit transactions will post at 1:00 p.m. or 5:00 p.m., depending on when the ACH file is received by the Reserve Banks for processing. Forward ACH debit transactions will be eligible to settle same-day beginning September 15, 2017, as part of the implementation of the second phase of the NACHA rule amendments, and credits and debits for same-day ACH debit transactions will post according to the same posting rules as same-day ACH credit transactions.⁵ The posting of future-dated ACH forward transactions will not be affected, and credits and debits for these transactions will continue to post at 8:30 a.m. on the effective settlement date.

The approved enhancements effective this September also alter the settlement of ACH return items processed by the Reserve Banks. Under the current posting rules, credits and debits for returns of future-dated and same-day ACH forward items post either at 8:30 a.m. or in the afternoon at 5:00 p.m. and 5:30 p.m., respectively, with the specific posting time determined by when the item is received by the Reserve Banks. Effective September 23, 2016, all ACH return items, regardless of whether the associated forward item was future-dated or same-day, will post at the next available posting time or following the settlement of the associated forward

⁴ All times are eastern time.

⁵ Enhancements to the Reserve Banks' same-day ACH service will alter treatment of check truncation items that settle through FedACH. A check truncation item is a check that has been converted into an ACH debit entry for presentment and settlement over the ACH network based on an agreement between the collecting and paying banks. Under the current posting rules, check truncation transactions post at 5:00 p.m. on the current business day. Beginning September 23, 2016, check truncation transactions will post at the same time as other ACH debit transactions at 8:30 a.m. on the next business day and will post either next-day or same-day, as appropriate, beginning with phase two of the NACHA rule amendments. At this time, the Reserve Banks do not have any volume associated with check truncation items.

transaction. Thus, credits and debits for return items will post at 8:30 a.m., 1:00 p.m., 5:00 p.m., or 5:30 p.m., with the specific posting time determined by when the item is received by the Reserve Banks.⁶

Policy on Payment System Risk

The Federal Reserve Policy on Payment System Risk, section II.A, under the heading "Procedures for Measuring Daylight Overdrafts" and the subheadings "Post at 8:30 a.m. eastern time," "Post at 1:00 p.m. eastern time," "Post at 5:00 p.m. eastern time," and "Post at 5:30 p.m. eastern time," is amended as follows:

Post at 8:30 a.m. eastern time:

- +/- Term deposit maturities and accrued interest
- +/- Government and commercial ACH transactions, including return items⁷
- +/- Commercial check transactions, including returned checks⁸
- + Treasury checks, postal money orders, local Federal Reserve Bank checks, and savings bond redemptions in separately sorted deposits; these items must be deposited by the latest applicable deposit deadline preceding the posting time
- + Advance-notice Treasury investments

⁶ Paper returns, FedLine Web returns, paper notifications of change (NOCs) and FedLine Web NOCs will only be processed twice daily at 2:15 a.m. and 2:45 p.m. As such, these transactions will post at 8:30 a.m. or 5:00 p.m., depending on when the item is received by the Reserve Banks.

⁷ Institutions that are monitored in real time must fund the total amount of their commercial ACH credit originations in order for the transactions to be processed. If the Federal Reserve receives commercial ACH credit transactions from institutions monitored in real time after the scheduled close of the Fedwire Funds Service, these transactions will be processed at 12:30 a.m. the next business day, or by the ACH deposit deadline, whichever is earlier. The Account Balance Monitoring System provides intraday account information to the Reserve Banks and institutions and is used primarily to give authorized Reserve Bank personnel a mechanism to control and monitor account activity for selected institutions. For more information on ACH transaction processing, refer to the ACH Settlement Day Finality Guide available through the Federal Reserve Financial Services Web site at <http://www.frb-services.org>.

The federal government will not participate in the same-day ACH upon initial implementation in September 2016. ACH forward transactions originated or received by the federal government will not be eligible for same-day settlement and will settle on the next business day, or on a future date as indicated by the effective settlement date.

⁸ For the three commercial check transaction posting times, the Reserve Banks will post credits and debits to institutions' accounts for checks deposited and presented, respectively, at least 30 minutes before the posting time.

¹ The Board's PSR policy is available at www.federalreserve.gov/paymentsystems/psr_policy.htm.

² 80 FR 58248 (Sep. 28, 2015).

³ NACHA, whose membership consists of insured financial institutions and regional payment associations, establishes network-wide ACH rules through its Operating Rules & Guidelines. As an ACH operator, the Reserve Banks, through Operating Circular 4, incorporate NACHA's Operating Rules & Guidelines as rules that govern clearing and settlement of commercial ACH items by the Reserve Banks, except for those provisions specifically excluded in the Operating Circular.

- Penalty assessments for tax payments from the Treasury Investment Program (TIP)⁹
- Post by 1:00 p.m. eastern time:
- +/- Commercial check transactions, including returned checks
- +/- FedACH SameDay Service transactions, including return items
- + Same-day Treasury investments
- Post at 5:00 p.m. eastern time:
- +/- FedACH SameDay Service transactions, including return items¹⁰
- + Treasury checks, postal money orders, and savings bond redemptions in separately sorted deposits; these items must be deposited by the latest applicable deposit deadline preceding the posting time
- + Local Federal Reserve Bank checks; these items must be presented before 3:00 p.m. eastern time
- Post at 5:30 p.m. eastern time:
- +/- FedACH SameDay Service return transactions
- +/- Commercial check transactions, including returned checks
- * * * * *

By order of the Board of Governors of the Federal Reserve System, acting through the Director of the Division of Reserve Bank Operations and Payment Systems under delegated authority, July 18, 2016.

Robert deV. Frierson,
Secretary of the Board.

BILLING CODE 6210-01-P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA-2016-5431; Directorate Identifier 2015-CE-044-AD; Amendment 39-18593; AD 2016-15-02]

RIN 2120-AA64

Airworthiness Directives; M7 Aerospace LLC Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

⁹ The Reserve Banks will identify and notify institutions with Treasury-authorized penalties on Thursdays. In the event that Thursday is a holiday, the Reserve Banks will identify and notify institutions with Treasury-authorized penalties on the following business day. Penalties will then be posted on the business day following notification.

¹⁰ Paper returns, FedLine Web returns, paper notifications of change (NOCs), and FedLine Web NOCS will only post at 8:30 a.m. and 5:00 p.m., depending on when the item is received by the Reserve Banks.

SUMMARY: We are adopting a new airworthiness directive (AD) for all M7 Aerospace LLC Models SA26-AT, SA26-T, SA226-AT, SA226-T, SA226-T(B), SA226-TC, SA227-AC (C-26A), SA227-AT, SA227-BC (C-26A), SA227-CC, SA227-DC (C-26B), and SA227-TT airplanes. This AD was prompted by reports of multiple cracks in the steel horizontal tube of the cockpit control column. This AD requires inspection of the cockpit control column horizontal tube for cracks and repair or replacement of the cockpit control column as necessary. We are issuing this AD to correct the unsafe condition on these products.

DATES: This AD is effective August 26, 2016.

The Director of the Federal Register approved the incorporation by reference of certain publications listed in this AD as of August 26, 2016.

ADDRESSES: For service information identified in this final rule, contact M7 Aerospace LLC, 10823 NE Entrance Road, San Antonio, Texas 78216; phone: (210) 824-9421; fax: (210) 804-7766; Internet: <http://www.elbitsystems-us.com>; email: MetroTech@M7Aerospace.com. For information on the availability of this material at the FAA, call 816-329-4148. It is also available on the internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2016-5431.

Examining the AD Docket

You may examine the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2016-5431; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the regulatory evaluation, any comments received, and other information. The address for the Docket Office (phone: 800-647-5527) is Document Management Facility, U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT:

Andrew McAnaul, Aerospace Engineer, FAA, ASW-143 (c/o San Antonio MIDO), 10100 Reunion Place, Suite 650, San Antonio, Texas 78216; phone: (210) 308-3365; fax: (210) 308-3370; email: andrew.mcanaul@faa.gov.

SUPPLEMENTARY INFORMATION:

Discussion

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to all M7 Aerospace LLC Models SA26-AT, SA26-T, SA226-AT, SA226-T, SA226-T(B), SA226-TC, SA227-AC (C-26A), SA227-AT, SA227-BC (C-26A), SA227-CC, SA227-DC (C-26B), and SA227-TT airplanes. The NPRM published in the **Federal Register** on April 1, 2016 (81 FR 18804). The NPRM was prompted by reports of multiple cracks in the cockpit control column horizontal tube at the corners of the access panel cutout, at the pulley bolt welds, and at the elevator arm weld in the steel horizontal tube of the control column on M7 Aerospace SA26, SA226, and SA227 airplanes. The NPRM proposed to require inspection of the cockpit control column horizontal tube for cracks and repair or replacement of the cockpit control column as necessary. This condition, if not corrected, could result in partial or complete control column failure with partial or complete loss of pitch and/or roll control. We are issuing this AD to correct the unsafe condition on these products.

Comments

We gave the public the opportunity to participate in developing this AD. The following presents the comment received on the NPRM (81 FR 18804, April 1, 2016) and the FAA's response to the comment.

Request for Previously Done Credit

Michael O'Brien at Bearskin Airlines commented they had been complying with this AD by accomplishing the service bulletins that are listed in the proposed AD. He asked if it would be acceptable to just accomplish a technical records research to see when the required actions were last done.

We agree that credit should be given for actions previously done with the service bulletins called out in the NPRM. The NPRM already allows for this with the phrase "unless already done" in paragraphs (g)(1) and (2) of the NPRM.

Because the requested change is already part of this AD, we have not changed the final rule AD action based on this comment.

Conclusion

We reviewed the relevant data, considered the comment received, and determined that air safety and the public interest require adopting this AD as proposed except for minor editorial changes. We have determined that these minor changes:

- Are consistent with the intent that was proposed in the NPRM (81 FR 18804, April 1, 2016) for correcting the unsafe condition; and
- Do not add any additional burden upon the public than was already proposed in the NPRM (81 FR 18804, April 1, 2016).

Related Service Information Under 1 CFR Part 51

We reviewed M7 Aerospace LLC SA26 Series Service Bulletin (SB) 26–

27–002, M7 Aerospace LLC SA226 Series SB 226–27–078, M7 Aerospace LLC SA227 Series SB 227–27–058, and M7 Aerospace LLC SA227 Series SB CC7–27–030, all dated October 8, 2015. The service information describes procedures for inspection of the cockpit control column horizontal tube for cracks and repair or replacement of the cockpit control column as necessary. All of the related service information is reasonably available because the

interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section of this NPRM.

Costs of Compliance

We estimate that this AD affects 350 airplanes of U.S. registry.

We estimate the following costs to comply with this AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Inspection	12 work-hours × \$85 per hour = \$1,020	Not applicable	\$1,020	\$357,000

We estimate the following costs to do any necessary repairs/replacements that would be required based on the results

of the inspection. We have no way of determining the number of airplanes

that might need these repairs/replacements:

ON-CONDITION COSTS

Action	Labor cost	Parts cost	Cost per product
Repair cracks	2 work-hours × \$85 per hour = \$170	Not applicable	\$170
Replace parts	16 work-hours × \$85 per hour = \$1,360	\$5,000	6,360

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA’s authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency’s authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: “General requirements.” Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and

responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

- (1) Is not a “significant regulatory action” under Executive Order 12866,
- (2) Is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979),
- (3) Will not affect intrastate aviation in Alaska, and
- (4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

- 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

2016–15–02 M7 Aerospace LLC:
Amendment 39–18593; Docket No. FAA–2016–5431; Directorate Identifier 2016–CE–044–AD.

(a) Effective Date

This AD is effective August 26, 2016.

(b) Affected ADs

None.

(c) Applicability

This AD applies to M7 Aerospace LLC Models SA26–AT, SA26–T, SA226–AT, SA226–T, SA226–T(B), SA226–TC, SA227–AC (C–26A), SA227–AT, SA227–BC (C–26A), SA227–CC, SA227–DC (C–26B), and SA227–TT airplanes, all serial numbers, certificated in any category.

(d) Subject

Joint Aircraft System Component (JASC)/ Air Transport Association (ATA) of America Code 2700, Flight Controls.

(e) Unsafe Condition

This AD was prompted by reports of multiple cracks in the steel horizontal tube of the cockpit control column. We are requiring repetitive inspections of the cockpit control column horizontal tube with repair or replacement, as necessary, of the cockpit control column. We are issuing this AD to

correct the unsafe condition on these products.

(f) Compliance

Comply with paragraphs (g)(1) through (2) of this AD using the following service bulletins within the compliance times specified below, unless already done:

(1) *For Models SA26-T and SA26-AT*: M7 Aerospace LLC Service Bulletin (SB) 26-27-002, dated October 8, 2015;

(2) *For Models SA226-AT, SA226-T, SA226-T(B), and SA226-TC*: M7 Aerospace LLC SB 226-27-078, dated October 8, 2015;

(3) *For Models SA227-AC(C-26A), SA227-AT, SA227-BC(C-26A), and SA227-TT*: M7 Aerospace LLC SB 227-27-058, dated October 8, 2015; or

(4) *For Models SA227-CC and SA227-DC (C-26B)*: M7 Aerospace LLC SB CC7-27-030, dated October 8, 2015.

(g) Actions

(1) *For all airplanes*: Within the next 2,000 hours time-in-service (TIS) after [insert date 35 days after date of publication in the **Federal Register**] (the effective date of this AD) or no later than when the airplane accumulates 20,000 hours TIS, whichever occurs later, do an initial inspection of the cockpit control column horizontal tube for cracks following the Accomplishment Instructions in section 2. of the service bulletins identified in paragraphs (f)(1), (2), (3), or (4) of this AD, as applicable; and repetitively inspect as follows:

(i) *For airplanes with less than 35,000 hours TIS as of [insert date 35 days after date of publication in the Federal Register] (the effective date of this AD)*: Repetitively inspect the cockpit control column horizontal tube for cracks every 5,000 hours TIS until the airplane reaches 35,000 hours TIS at which time do the inspection within 2,000 hours TIS from the last inspection or within the next 100 hours TIS, whichever occurs later, and then thereafter at intervals not to exceed 2,000 hours TIS.

(ii) *For airplanes with 35,000 hours TIS or more as of [insert date 35 days after date of publication in the Federal Register] (the effective date of this AD)*: Repetitively inspect the cockpit control column horizontal tube for cracks every 2,000 hours TIS.

(2) *For all airplanes*: If any cracks are found following the inspections required in paragraphs (g)(1), (g)(1)(i), or (ii), as applicable, before further flight, repair the control column following the Accomplishment Instructions in section 2. of the service bulletins identified in paragraphs (f)(1), (2), (3), or (4), as applicable, of this AD.

Note to paragraph (g)(1) through (2) of this AD: The reporting of information requested in paragraph 2.H. of the Accomplishment Instructions in the service bulletins identified in paragraphs (f)(1), (2), (3), and (4) of this AD is not a required action of this AD.

(h) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Fort Worth Airplane Certification Office, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your

request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the ACO, send it to the attention of the person identified in paragraph (j) of this AD.

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(i) Related Information

For more information about this AD, contact Andrew McAnaul, Aerospace Engineer, FAA, ASW-143 (c/o San Antonio MIDO), 10100 Reunion Place, Suite 650, San Antonio, Texas 78216; phone: (210) 308-3365; fax: (210) 308-3370; email: andrew.mcanaul@faa.gov.

(j) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(i) M7 Aerospace LLC Service Bulletin (SB) 26-27-002, dated October 8, 2015;

(ii) M7 Aerospace LLC SB 226-27-078, dated October 8, 2015;

(iii) M7 Aerospace LLC SB 227-27-058, dated October 8, 2015; or

(iv) M7 Aerospace LLC SB CC7-27-030, dated October 8, 2015.

(3) For service information identified in this AD, contact M7 Aerospace LLC, 10823 NE Entrance Road, San Antonio, Texas 78216; phone: (210) 824-9421; fax: (210) 804-7766; Internet: <http://www.elbitsystems-us.com>; email: MetroTech@M7Aerospace.com.

(4) You may view this referenced service information at the FAA, Small Airplane Directorate, 901 Locust, Kansas City, Missouri 64106. For information on the availability of this material at the FAA, call 816-329-4148.

(5) You may view this service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202-741-6030, or go to: <http://www.archives.gov/federal-register/cfr/ibr-locations.html>.

Issued in Kansas City, Missouri, on July 13, 2016.

Pat Mullen,

Acting Manager, Small Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA-2016-3993; Directorate Identifier 2015-NM-065-AD; Amendment 39-18592; AD 2016-15-01]

RIN 2120-AA64

Airworthiness Directives; Airbus Airplanes

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: We are adopting a new airworthiness directive (AD) for all Airbus Model A300 series airplanes; Model A300 B4-600, B4-600R, F4-600R series airplanes, and Model A300 C4-605R Variant F airplanes (collectively called Model A300-600 series airplanes); and Model A310 series airplanes. This AD was prompted by reports of partial loss of no-back brake (NBB) efficiency on the trimmable horizontal stabilizer actuator (THSA). This AD requires an inspection to determine THSA part numbers, serial numbers, and flight cycles on certain THSAs; and repetitive replacement of certain THSAs. We are issuing this AD to prevent loss of THSA NBB efficiency, which, in conjunction with the inability of the power gear to keep the ball screw in its last commanded position, could lead to an uncommanded movement of the horizontal stabilizer, possibly resulting in loss of control of the airplane.

DATES: This AD is effective August 26, 2016.

The Director of the Federal Register approved the incorporation by reference of certain publications listed in this AD as of August 26, 2016.

ADDRESSES: For service information identified in this final rule, contact Airbus SAS, Airworthiness Office—EAW, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France; telephone: +33 5 61 93 36 96; fax: +33 5 61 93 44 51; email: account.airworth-eas@airbus.com; Internet <http://www.airbus.com>. You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425-227-1221. It is also available on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2016-3993.

Examining the AD Docket

You may examine the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2016-3993; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Office (telephone 800-647-5527) is Docket Management Facility, U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Dan Rodina, Aerospace Engineer, International Branch, ANM-116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057-3356; telephone: 425-227-2125; fax: 425-227-1149.

SUPPLEMENTARY INFORMATION:

Discussion

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to all Airbus Model A300 series airplanes; Model A300 B4-600, B4-600R, F4-600R series airplanes, and Model A300 C4-605R Variant F airplanes (collectively called Model A300-600 series airplanes); and Model A310 series airplanes. The NPRM published in the **Federal Register** on March 7, 2016 (81 FR 11690) (“the NPRM”). The NPRM was prompted by reports of partial loss of NBB efficiency on the THSA. The NPRM proposed to require an inspection to determine THSA part numbers, serial numbers, and flight cycles on certain THSAs; and repetitive replacement for certain THSAs. We are issuing this AD to prevent loss of THSA NBB efficiency, which, in conjunction with the inability of the power gear to keep the ball screw in its last commanded position, could lead to an uncommanded movement of the horizontal stabilizer, possibly resulting in loss of control of the airplane.

The European Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Union, has issued EASA AD 2015-0081, dated May 7, 2015 (referred to after this as the Mandatory Continuing Airworthiness Information, or “the MCAI”), to correct an unsafe condition on all Airbus Model A300 series airplanes; Model A300 B4-600, B4-600R, F4-600R series airplanes, and

Model A300 C4-605R Variant F airplanes (collectively called Model A300-600 series airplanes); and Model A310 series airplanes. The MCAI states:

During endurance qualification tests on a Trimmable Horizontal Stabilizer Actuator (THSA) concerning another aeroplane type, a partial loss of the no-back brake (NBB) efficiency was experienced. Investigation results concluded that this partial loss of braking efficiency in some specific aerodynamic load conditions was due to polishing and auto-contamination of the NBB carbon friction disks.

Due to design similarity on the A300-600, A300-600ST and A310 fleet, the same tests were initiated by the THSA manufacturer on certain type THSA, sampled from the field. Subject tests confirmed that THSA Part Number (P/N) 47142 series, as installed on the A300-600, A300-600ST and A310 fleet, are also affected by this partial loss of NBB efficiency.

This condition, if not detected and corrected, and in conjunction with the power gear not able to keep the ball screw in its last commanded position, could potentially lead to an uncommanded movement of the Horizontal Stabilizer, possibly resulting in loss of control of the aeroplane.

For the reasons described above, this [EASA] AD requires the removal from service of each affected THSA, with the intent of in-shop NBB carbon disk replacement.

You may examine the MCAI in the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2016-3993.

Comments

We gave the public the opportunity to participate in developing this AD. The following presents the comments received on the NPRM and the FAA’s response to each comment.

Support for the NPRM

The Airline Pilots Association International stated that it fully supports the intent of the NPRM.

Requests To Revise Compliance Date

Airbus, FedEx Express, and United Parcel Service requested that we revise the compliance date in paragraph (j)(3) of the proposed AD from February 1, 2018, to February 1, 2019. The commenters stated that this revision would match the MCAI.

We agree with the commenters’ request. This was a typographical error. Our intent was to match the MCAI. We have revised paragraph (j)(3) of this AD accordingly.

Request To Allow Maintenance Records Review

FedEx Express requested that we allow a review of the operator’s maintenance records to determine the

part number and serial number of the THSA specified in paragraph (h)(1) of the proposed AD. FedEx Express stated that this review would accomplish the same intent as a physical inspection of the THSA.

We agree with the commenter’s request. We have revised paragraph (h)(1) of this AD to allow doing a review of airplane maintenance records in lieu of the THSA inspection if the part number and serial number of the THSA can be conclusively determined from that review.

Conclusion

We reviewed the relevant data, considered the comments received, and determined that air safety and the public interest require adopting this AD with the changes described previously and minor editorial changes. We have determined that these minor changes:

- Are consistent with the intent that was proposed in the NPRM for correcting the unsafe condition; and
- Do not add any additional burden upon the public than was already proposed in the NPRM.

We also determined that these changes will not increase the economic burden on any operator or increase the scope of this AD.

Related Service Information Under 1 CFR Part 51

Airbus has issued Airbus Service Bulletin A300-27-6070, dated February 17, 2015; and Airbus Service Bulletin A310-27-2106, dated February 17, 2015. This service information describes procedures for inspection and replacement of the THSA.

This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Costs of Compliance

We estimate that this AD affects 152 airplanes of U.S. registry.

We also estimate that it would take about 27 work-hours per product to comply with the basic requirements of this AD. The average labor rate is \$85 per work-hour. Required parts would cost about \$590,000 per product. Based on these figures, we estimate the cost of this AD on U.S. operators to be \$90,028,840, or \$592,295 per product.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA’s authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. “Subtitle VII: Aviation Programs,” describes in more

detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in "Subtitle VII, Part A, Subpart III, Section 44701: General requirements." Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

1. Is not a "significant regulatory action" under Executive Order 12866;
2. Is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979);
3. Will not affect intrastate aviation in Alaska; and
4. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

- 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

2016-15-01 Airbus: Amendment 39-18592. Docket No. FAA-2016-3993; Directorate Identifier 2015-NM-065-AD.

(a) Effective Date

This AD is effective August 26, 2016.

(b) Affected ADs

None.

(c) Applicability

This AD applies to the Airbus airplanes identified in paragraphs (c)(1) through (c)(6) of this AD, certificated in any category, all manufacturer serial numbers.

(1) Airbus Model A300 B2-1A, B2-1C, B2K-3C, B2-203, B4-2C, B4-103, and B4-203 airplanes.

(2) Airbus Model A300 B4-601, B4-603, B4-620, and B4-622 airplanes.

(3) Airbus Model A300 B4-605R and B4-622R airplanes.

(4) Airbus Model A300 F4-605R and F4-622R airplanes.

(5) Airbus Model A300 C4-605R Variant F airplanes.

(6) Airbus Model A310-203, -204, -221, -222, -304, -322, -324, and -325 airplanes.

(d) Subject

Air Transport Association (ATA) of America Code 27, Flight controls.

(e) Reason

This AD was prompted by reports of partial loss of no-back brake (NBB) efficiency on the trimmable horizontal stabilizer actuator (THSA). We are issuing this AD to prevent loss of THSA NBB efficiency, which, in conjunction with the inability of the power gear to keep the ball screw in its last commanded position, could lead to an uncommanded movement of the horizontal stabilizer, possibly resulting in loss of control of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Affected THSAs

THSAs affected by the requirements of this AD have part numbers (P/Ns) 47142-403, 47142-413, 47142-414, and 47142-423.

Note 1 to paragraph (g) of this AD: FAA AD 2011-15-08, Amendment 39-16755 (76 FR 42029, July 18, 2011), requires installation of three secondary retention plates for the gimbal bearings on the THSA upper primary attachment, which involved a THSA part number change from the -300 series to the -400 series.

Note 2 to paragraph (g) of this AD: The life limits specified in Part 4 of the airworthiness limitations section are still relevant for the affected THSA. This AD addresses a replacement limit for the NBB disks installed on the THSA, not the life limit for the THSA itself.

(h) Inspection for Affected THSAs, Flight Cycles, and THSA Replacement

Before each date and before exceeding the corresponding THSA flight-cycle limits specified in paragraphs (j)(1), (j)(2), and (j)(3) of this AD, do the actions specified in paragraphs (h)(1) and (h)(2) of this AD; and before exceeding the flight-cycle limit corresponding to each date as specified in

paragraphs (j)(1), (j)(2), and (j)(3) of this AD, do the actions specified in paragraph (i) of this AD.

(1) Do an inspection of the THSA to determine the part number and serial number. A review of airplane maintenance records is acceptable in lieu of this inspection if the part number and serial number of the THSA can be conclusively determined from that review.

(2) Do an inspection of the airplane maintenance records to determine the flight cycles accumulated on each affected THSA since first installation on an airplane, or since last NBB replacement, whichever is later. If no maintenance records conclusively identifying the last NBB disk replacement are available, the flight cycles accumulated since first installation of the THSA on an airplane apply.

(i) THSA Replacement

By each date specified in paragraphs (j)(1), (j)(2), and (j)(3) of this AD, for those affected THSAs having reached or exceeded the corresponding number of flight cycles specified in paragraphs (j)(1), (j)(2), and (j)(3) of this AD, replace the THSA with a serviceable unit, in accordance with the Accomplishment Instructions of Airbus Service Bulletin A300-27-6070, dated February 17, 2015; or Airbus Service Bulletin A310-27-2106, dated February 17, 2015, as applicable.

(j) Compliance Dates and THSA Flight-Cycle Limits

Paragraphs (j)(1), (j)(2), and (j)(3) of this AD specify compliance dates and THSA flight-cycle limits for accomplishing the actions required by paragraphs (h) and (i) of this AD.

(1) *As of 30 days after the effective date of this AD:* The affected THSA flight-cycle limit is 30,000 flight cycles since first installation of the THSA on an airplane, or since last NBB replacement, whichever is later.

(2) *As of February 1, 2017:* The affected THSA flight-cycle limit is 20,000 flight cycles since first installation of the THSA on an airplane, or since last NBB replacement, whichever is later.

(3) *As of February 1, 2019:* The affected THSA flight-cycle limit is 14,600 flight cycles since first installation of the THSA on an airplane, or since last NBB replacement, whichever is later.

(k) Serviceable THSA Definition

For the purpose of this AD, a serviceable THSA is a unit identified in paragraph (k)(1) or (k)(2) of this AD.

(1) A THSA identified in paragraph (g) of this AD that, as of each date specified in paragraphs (j)(1), (j)(2), and (j)(3) of this AD, has not exceeded the flight-cycle limits specified in paragraphs (j)(1), (j)(2), and (j)(3) of this AD since first installation of the THSA on an airplane, or since the last NBB disk replacement, whichever is later.

(2) A THSA with a different part number (e.g., a THSA that is not identified in paragraph (g) of this AD) that is not affected by the requirements of this AD.

(l) THSA Replacements

As of each date and before exceeding the flight-cycle limit corresponding to each date

specified in paragraphs (j)(1), (j)(2), and (j)(3) of this AD: Replace each affected THSA with a serviceable unit, in accordance with the Accomplishment Instructions of Airbus Service Bulletin A300-27-6070, dated February 17, 2015; or Airbus Service Bulletin A310-27-2106, dated February 17, 2015.

(m) Parts Installation Limitation

Before each date specified in paragraphs (j)(1), (j)(2), and (j)(3) of this AD, an operator may install an affected THSA on an airplane, provided that the unit has not exceeded the corresponding number of flight cycles specified in paragraphs (j)(1), (j)(2), and (j)(3) of this AD, since first installation on an airplane, or since last NBB replacement, whichever is later.

(n) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs)*: The Manager, International Branch, ANM-116, Transport Airplane Directorate, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the International Branch, send it to Dan Rodina, Aerospace Engineer, International Branch, ANM-116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057-3356; telephone: 425-227-2125; fax: 425-227-1149. Information may be emailed to: 9-ANM-116-AMOC-REQUESTS@faa.gov. Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office. The AMOC approval letter must specifically reference this AD.

(2) *Contacting the Manufacturer*: For any requirement in this AD to obtain corrective actions from a manufacturer, the action must be accomplished using a method approved by the Manager, International Branch, ANM-116, Transport Airplane Directorate, FAA; or the European Aviation Safety Agency (EASA); or Airbus's EASA Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature.

(3) *Required for Compliance (RC)*: If any service information contains procedures or tests that are identified as RC, those procedures and tests must be done to comply with this AD; any procedures or tests that are not identified as RC are recommended. Those procedures and tests that are not identified as RC may be deviated from using accepted methods in accordance with the operator's maintenance or inspection program without obtaining approval of an AMOC, provided the procedures and tests identified as RC can be done and the airplane can be put back in an airworthy condition. Any substitutions or changes to procedures or tests identified as RC require approval of an AMOC.

(o) Related Information

Refer to Mandatory Continuing Airworthiness Information (MCAI) EASA AD

2015-0081, dated May 7, 2015, for related information. This MCAI may be found in the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2016-3993.

(p) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(i) Airbus Service Bulletin A300-27-6070, dated February 17, 2015.

(ii) Airbus Service Bulletin A310-27-2106, dated February 17, 2015.

(3) For service information identified in this AD, contact Airbus SAS, Airworthiness Office—EAW, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France; telephone: +33 5 61 93 36 96; fax: +33 5 61 93 44 51; email: account.airworth-eas@airbus.com; Internet <http://www.airbus.com>.

(4) You may view this service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425-227-1221.

(5) You may view this service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202-741-6030, or go to: <http://www.archives.gov/federal-register/cfr/ibr-locations.html>.

Issued in Renton, Washington, on July 11, 2016.

Michael Kaszycki,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

RIN 2120-AK78

Extension of the Prohibition Against Certain Flights in the Simferopol (UKFV) and Dnipropetrovsk (UKDV) Flight Information Regions (FIRs); Technical Amendment

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Final rule; technical amendment.

SUMMARY: On October 27, 2015, the Federal Aviation Administration (FAA) published a final rule extending the

prohibition against certain flight operations in the Simferopol (UKFV) and Dnipropetrovsk (UKDV) flight information regions (FIRs) by all United States (U.S.) air carriers; U.S. commercial operators; persons exercising the privileges of a U.S. airman certificate, except when such persons are operating a U.S.-registered aircraft for a foreign air carrier; and operators of U.S.-registered civil aircraft, except when such operators are foreign air carriers. The State Aviation Administration of Ukraine conducted and completed an airspace restructuring that altered the Simferopol (UKFV) and Dnipropetrovsk (UKDV) Flight Information Region (FIR) altitude structure specified in the final rule. To address the Ukraine airspace restructuring and provide additional clarity, this technical amendment specifically identifies the prohibited airspace in which Special Federal Aviation Regulation (SFAR) 113, applies, with inclusive altitudes and lateral limitations (latitude and longitude coordinates).

DATES: This final rule is effective on July 21, 2016.

FOR FURTHER INFORMATION CONTACT: Michael Filippell, Air Transportation Division, AFS-220, Flight Standards Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone: 202-267-8166; email: michael.e.filippell@faa.gov.

SUPPLEMENTARY INFORMATION:

I. Good Cause for Immediate Adoption

Section 553(b)(3)(B) of the Administrative Procedure Act (APA) (5 U.S.C.) authorizes agencies to dispense with notice and comment procedures for rules when the agency for "good cause" finds that those procedures are "impracticable, unnecessary, or contrary to the public interest." Under this section, an agency, upon finding good cause, may issue a final rule without seeking comment prior to the rulemaking.

The FAA finds that good cause exists under APA section 553(b)(3)(B) for this technical amendment to published without public notice and comment because this amendment is limited to providing additional clarity concerning specific airspace subject to the existing SFAR restriction, by adding latitude and longitude coordinates in lieu of the names for the FIRs.

In addition, section 553(d)(3) of the Administrative Procedure Act requires publication of a substantive rule must be made not less than 30 days before the effective date except when the agency

finds good cause and publishes such justification with the rule.

Good cause exists under section 553(d)(3) of the APA for this technical amendment to become effective on the date of its filing for public inspection. Section 553(d)(3) allows an effective date less than 30 days after publication “as otherwise provided by the agency for good cause found and published with the rule.” 5 U.S.C. 553(d)(3). This rule merely provides additional clarity for the specific airspace subject to the existing restriction, by adding latitude and longitude coordinates in lieu of the names for the FIRs. In addition, the public interest is served by avoiding delay in the effective date of this technical amendment because clarity in the coverage of airspace subject to the rule is necessary to address the potential hazard to civil aviation that exists in the Simferopol (UKFV) and Dnepropetrovsk (UKDV) FIRs, as described in the FAA’s final rule promulgating the SFAR. 80 FR 65621, 65622. For these reasons, the FAA finds good cause under APA section 553(d)(3) exists for this amendment to become effective on July 21, 2016.

II. Background

SFAR 113, § 91.1607, Prohibition Against Certain Flights in the Simferopol (UKFV) and Dnepropetrovsk (UKDV) Flight Information Regions (FIRs) was published on December 29, 2014, and subsequently extended on October 27, 2015. As explained in the preamble accompanying the December 29, 2014 rule, the FAA first restricted flights over Simferopol (UKFV) by publishing the SFAR on April 25, 2014. On December 29, 2014, the FAA extended the scope of the airspace covered by the SFAR, based on increased safety concerns. The December 29, 2014, rule was extended on October 27, 2015. During this time period, the State Aviation Administration of Ukraine restructured the airspace. The new configuration altered both the Simferopol (UKFV) and Dnepropetrovsk (UKDV) Flight Information Region (FIR) altitude structures. In order to address the Ukraine airspace restructuring, this technical amendment specifically identifies the prohibited airspace in which SFAR 113, § 91.1607, applies, to provide inclusive altitudes and lateral limitations (latitude and longitude coordinates).

III. Technical Amendment

Consistent with the foregoing, the FAA clarifies the lateral limits of the prohibited airspace to include that area

previously described as the Simferopol (UKFV) FIR, which is defined as:

465800N 0360000E–463500N 0364200E–
463424N 0372206E–452700N 0364100E–
452242N 0364100E–451824N 0363524E–
451442N 0363542E–451218N 0363200E–
450418N 0363418E–445612N 0363636E–
443100N 0364000E–424400N 0361600E–
424700N 0340000E–424800N 0320000E–
424800N 0310000E–424800N 0304500E–
434100N 0303200E–441000N 0302512E–
441500N 0302400E–444600N 0300900E–
445447N 0300448E–445230N 0302130E–
445848N 0303342E–451530N 0310642E–
452436N 0312500E–453828N 0315311E–
454436N 0320548E–455442N 0322700E–
460730N 0325430E–464600N 0325300E–
474400N 0330300E–472700N 0344800E–
470630N 0355500E–465800N 0360000E

The prohibited airspace within the above lateral limits extends in altitude from the surface to unlimited.

Additionally, prohibited airspace includes that area previously described as the Dnepropetrovsk (UKDV) FIR, which is defined as:

511400N 0342700E–504942N 0341300E–
502043N 0335720E–501246N 0335307E–
491848N 0333700E–485700N 0332200E–
484118N 0324431E–483620N 0324010E–
483128N 0323605E–482300N 0323900E–
480730N 0325324E–474600N 0325000E–
474400N 0330300E–472700N 0344800E–
470630N 0355500E–465800N 0360000E–
463500N 0364200E–463424N 0372206E–
463930N 0372518E–464700N 0373000E–
465900N 0382000E–470642N 0381324E–
then along state boundary until point/–
511400N 0342700E

The prohibited airspace within the above lateral limits extends in altitude from the surface to unlimited.

List of Subjects in 14 CFR Part 91

Air traffic control, Aircraft, Airmen, Airports, Aviation safety, Freight, Ukraine.

The Amendment

In consideration of the foregoing, the Federal Aviation Administration amends chapter I of title 14, Code of Federal Regulations, as follows:

PART 91—GENERAL OPERATING AND FLIGHT RULES

■ 1. The authority citation for part 91 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g), 1155, 40101, 40103, 40105, 40113, 40120, 44101, 44111, 44701, 44704, 44709, 44711, 44712, 44715, 44716, 44717, 44722, 46306, 46315, 46316, 46504, 46506–46507, 47122, 47508, 47528–47531, 47534, articles 12 and 29 of the Convention on International Civil Aviation (61 Stat. 1180), (126 Stat. 11).

■ 2. In § 91.1607, revise paragraph (b) to read as follows:

§ 91.1607 Special Federal Aviation Regulation No. 113—Prohibition Against Certain Flights in the Simferopol (UKFV) and Dnepropetrovsk (UKDV) Flight Information Regions (FIRs).

* * * * *

(b) *Flight prohibition.* Except as provided in paragraphs (c) and (d) of this section, no person described in paragraph (a) of this section may conduct flight operations in the Simferopol (UKFV) FIR or the Dnepropetrovsk (UKDV) FIR.

(1)(i) The lateral limits of the prohibited airspace includes that area currently described as the Simferopol (UKFV) FIR, which is defined as:

465800N 0360000E–463500N 0364200E–
463424N 0372206E–452700N 0364100E–
452242N 0364100E–451824N 0363524E–
451442N 0363542E–451218N 0363200E–
450418N 0363418E–445612N 0363636E–
443100N 0364000E–424400N 0361600E–
424700N 0340000E–424800N 0320000E–
424800N 0310000E–424800N 0304500E–
434100N 0303200E–441000N 0302512E–
441500N 0302400E–444600N 0300900E–
445447N 0300448E–445230N 0302130E–
445848N 0303342E–451530N 0310642E–
452436N 0312500E–453828N 0315311E–
454436N 0320548E–455442N 0322700E–
460730N 0325430E–464600N 0325300E–
474400N 0330300E–472700N 0344800E–
470630N 0355500E–465800N 0360000E

(ii) The prohibited airspace within the lateral limits extends in altitude from the surface to unlimited.

(2)(i) The lateral limits of the prohibited airspace includes that area previously described as the Dnepropetrovsk (UKDV) FIR, which is defined as:

511400N 0342700E–504942N 0341300E–
502043N 0335720E–501246N 0335307E–
491848N 0333700E–485700N 0332200E–
484118N 0324431E–483620N 0324010E–
483128N 0323605E–482300N 0323900E–
480730N 0325324E–474600N 0325000E–
474400N 0330300E–472700N 0344800E–
470630N 0355500E–465800N 0360000E–
463500N 0364200E–463424N 0372206E–
463930N 0372518E–464700N 0373000E–
465900N 0382000E–470642N 0381324E–
then along state boundary until point/–
511400N 0342700E

(ii) The prohibited airspace within the lateral limits extends in altitude from the surface to unlimited.

* * * * *

Issued in Washington, DC, under the authority of 49 U.S.C. 106(f), 40101(d)(1), 40105(b)(1)(A), and 44701(a)(5), on July 14, 2016.

Dale Bouffiou,

Deputy Director, Office of Rulemaking.

RIN 1545-BM74

Income Inclusion When Lessee Treated as Having Acquired Investment Credit Property**AGENCY:** Internal Revenue Service (IRS), Treasury.**ACTION:** Final and temporary regulations.

SUMMARY: This document contains temporary regulations that provide guidance regarding the income inclusion rules under section 50(d)(5) of the Internal Revenue Code (Code) that are applicable to a lessee of investment credit property when a lessor of such property elects to treat the lessee as having acquired the property. These temporary regulations also provide rules to coordinate the section 50(a) recapture rules with the section 50(d)(5) income inclusion rules. In addition, these temporary regulations provide rules regarding income inclusion upon a lease termination, lease disposition by a lessee, or disposition of a partner's or S corporation shareholder's entire interest in a lessee partnership or S corporation outside of the recapture period. Accordingly, these regulations will affect lessees of investment credit property when the lessor of such property makes an election to treat the lessee as having acquired the property and an investment credit is determined under section 46 with respect to such lessee. The text of these temporary regulations also serves as the text of the proposed regulations set forth in the Proposed Rules section in this issue of the **Federal Register**.

DATES:

Effective Date: These regulations are effective on July 22, 2016.

Applicability Date: For date of applicability, see § 1.50-1T(f).

FOR FURTHER INFORMATION CONTACT:

Jennifer A. Records, (202) 317-6853 (not a toll-free number).

SUPPLEMENTARY INFORMATION:**Background**

These temporary regulations amend the Income Tax Regulations (26 CFR part 1) under section 50(d)(5) to provide the income inclusion rules applicable to a lessee of investment credit property when a lessor elects to treat the lessee as having acquired such property. Section 50(d)(5) provides that, for

purposes of the investment credit, rules similar to former section 48(d) (as in effect prior to the enactment of Revenue Reconciliation Act of 1990 (Pub. L. 101-508, 104 Stat 1388 (November 5, 1990))) apply.

Former section 48(d)(1) permitted a lessor of new section 38 property to elect to treat that property as having been acquired by the lessee for an amount equal to its fair market value (or, if the lessor and lessee were members of a controlled group of corporations, equal to the lessor's basis). Former section 48(d)(3) provided that if the lessor made the election provided in former section 48(d)(1) with respect to any such property, the lessee would be treated for all purposes of subpart E, part IV, subchapter A, Chapter 1, subtitle A, as having acquired such property. Section 50(a)(5)(A) replaced the term "section 38 property" with the term "investment credit property."

Under former section 48(q), if a credit was determined under section 46 with respect to section 38 property, the basis of the property was reduced by 50 percent of the amount of the credit determined (or 100 percent of the amount of the credit determined in the case of a credit for qualified rehabilitation expenditures). Former section 48(d)(5) provided specific rules coordinating the effect of the former section 48(d) election with the basis adjustment rules under former section 48(q). Because the lessee would have no basis in the property that the lessee was only deemed to have acquired pursuant to the election, former section 48(d)(5)(A) provided that the basis adjustment rules under former section 48(q) did not apply. Section 50(c) replaced former section 48(q) and provides the current basis adjustment rules.

In lieu of a basis adjustment, former section 48(d)(5)(B) provided that the lessee was required to include ratably in gross income, over the shortest recovery period which could be applicable under section 168 with respect to the property, an amount equal to 50 percent of the amount of the credit allowable under section 38 to the lessee with respect to such property. In the case of the rehabilitation credit, former section 48(q)(3) provided that former section 48(d)(5)(B) was to be applied without the phrase "50 percent of."

Former section 48(d)(5)(C) provided that, in the case of a disposition of property to which former section 47 (the former recapture rules) applied, the income inclusion rules of former section 48(d)(5) applied in accordance with regulations prescribed by the Secretary. Section 50(a) replaced former section 47

and provides the current recapture rules.

Explanation of Provisions*A. Scope*

These temporary regulations provide the applicable rules that the Secretary has determined are similar to the rules of former section 48(d)(5). Thus, these temporary regulations are limited in scope to the income inclusion rules that apply when a lessor elects under § 1.48-4 of the Treasury Regulations to treat the lessee as having acquired investment credit property.

B. In General

Section 1.50-1T(b) provides the general rules for coordinating the basis adjustment rules under section 50(c) (the successor to former section 48(q)) with the rules under § 1.48-4 pursuant to which a lessor may elect to treat the lessee of investment credit property as having acquired such property for purposes of calculating the investment credit. Similar to the rule in former section 48(d)(5)(A), which provided that the basis adjustment rules under former section 48(q) did not apply when a § 1.48-4 election was made, § 1.50-1T(b)(1) provides that section 50(c) does not apply when the election is made. Thus, the lessor is not required to reduce its basis in the property by the amount of the investment credit determined under section 46 (or 50 percent of the amount of the credit in the case of the energy credit under section 48).

Under § 1.50-1T(b)(2), in lieu of a basis adjustment, and similar to the rule contained in former section 48(d)(5)(B), a lessee must include in gross income an amount equal to the amount of the credit (or, in the case of the section 48 energy credit, 50 percent of the amount of the credit) determined under section 46. Generally, the lessee includes such amount ratably over the shortest recovery period applicable under the accelerated cost recovery system provided in section 168, beginning on the date the investment credit property is placed in service and continuing on each one year anniversary date thereafter until the end of the applicable recovery period. The amount required to be included by the lessee is not subject to any limitations under section 38(c) on the amount of the credit allowed based on the amount of the lessee's income tax.

Because section 50(c) replaces the old basis adjustment rules under former section 48(q), the amount the lessee is required to include in gross income under these temporary regulations in

§ 1.50–1T(b)(2) corresponds to the current basis adjustment amounts required under section 50(c), rather than the former basis adjustment amounts provided in former section 48(q).

C. Special Rule for Partnerships and S Corporations

Section 1.50–1T(b)(3) provides that, in the case of a partnership (other than an electing large partnership) or an S corporation for which an election is made under § 1.48–4 to treat such entity as having acquired the investment credit property, each partner or S corporation shareholder that is the “ultimate credit claimant” is treated as the lessee for purposes of the income inclusion rules under § 1.50–1T(b)(2). The term *ultimate credit claimant* is defined in § 1.50–1T(b)(3)(ii) as any partner or S corporation shareholder that files (or that would file) Form 3468, “Investment Credit” (or its successor form), with such partner’s or S corporation shareholder’s income tax return to claim the investment credit determined under section 46 that results in the corresponding income inclusion under § 1.50–1T(b)(2). Each partner or S corporation shareholder that is the ultimate credit claimant must include in gross income the amount required under § 1.50–1T(b)(2) in proportion to the amount of the credit determined under section 46 (or 50 percent of the amount of the credit in the case of the energy credit under section 48) with respect to the partner or S corporation shareholder.

The Treasury Department and the IRS believe that, because the investment credit and any limitations on the credit itself are determined at the partner or S corporation shareholder level, it is appropriate that the income inclusion occurs at the partner or shareholder level. In the case of a partnership that actually owns the investment credit property, a partner in a partnership is treated as the taxpayer with respect to the partner’s share of the basis of partnership investment credit property under § 1.46–3(f)(1) and separately computes the investment credit based on its share of the basis of the investment credit property. Similarly, in the case of a lessee partnership where the lessor makes an election under § 1.48–4 to treat the partnership as having acquired investment credit property, each partner in the lessee partnership is the taxpayer with respect to whom the investment credit is determined under section 46. Each partner in the lessee partnership will separately compute the investment credit based on each partner’s share of the investment credit property. The

credit is therefore computed at the partner level based on partner level limitations. Section 1.704–1(b)(4)(ii), which requires allocations with respect to the investment tax credit provided by section 38 to be made in accordance with the partners’ interests in the partnership, provides that allocations of cost or qualified investment (as opposed to the investment credit itself, which is not determined at the partnership level) made in accordance with § 1.46–3(f) shall be deemed to be made in accordance with the partners’ interests in the partnership.

Under similar principles, in the case of a lessor that makes an election under § 1.48–4 to treat an S corporation as having acquired investment credit property, each shareholder in the lessee S corporation is the taxpayer with respect to whom the investment credit is determined under section 46. The credit is therefore computed at the S corporation shareholder level based on shareholder level limitations.

The Treasury Department and the IRS believe that the burden of income inclusion should match the benefits of the allowable credit. Therefore, because the investment credit and any limitations on the credit are determined at the partner or shareholder level, these temporary regulations in § 1.50–1T(b)(3) provide that the gross income required to be ratably included under § 1.50–1T(b)(2) is not an item of partnership income for purposes of subchapter K or an item of S corporation income for purposes of subchapter S. Accordingly, the rules that would apply were such gross income an item of income under section 702 or section 1366, such as section 705(a) (providing for an increase in the partner’s outside basis for items of income) or section 1367(a) (providing for an increase in the S corporation shareholder’s stock basis for items of income) do not apply.

The Treasury Department and the IRS are aware that some partnerships and S corporations have taken the position that this income is includible by the partnership or S corporation and that their partners or S corporation shareholders are entitled to increase their bases in their partnership interests or S corporation stock as a result of the income inclusion. The Treasury Department and the IRS believe that such basis increases are inconsistent with Congressional intent as they thwart the purpose of the income inclusion requirement in former section 48(d)(5)(B) and confer an unintended benefit upon partners and S corporation shareholders of lessee partnerships and S corporations that is not available to any other credit claimant.

The investment credit rules operate to allow a taxpayer to claim the immediate benefit of the full amount of the allowable credit in exchange for the recoupment of that amount (or 50 percent of that amount in the case of the section 48 energy credit) over time. Where the taxpayer claiming the credit owns the investment credit property, the basis reduction provided in section 50(c) results in reduced cost recovery deductions over the life of the property or the realization of gain (or a reduction in the amount of loss realized) upon the disposition of the property. In the case of a lessor that elects under § 1.48–4 to treat the lessee of investment credit property as having acquired such property, § 1.50–1T(b)(2) instead requires the lessee to ratably include this amount in gross income over the life of the property.

If that lessee is a partnership or an S corporation, however, some partnerships and S corporations contend that this income inclusion is treated as an item of partnership or S corporation income that entitles their partners or S corporation shareholders to a corresponding basis increase under section 705(a) or section 1367(a). As a result of the basis increase, these partners or S corporation shareholders claim a loss (or reduce the amount of gain realized) upon the disposition of their partnership interests or S corporation shares.

As noted, the Treasury Department and the IRS have concluded that the income inclusion is not properly treated as an item of partnership income or of S corporation income. Nonetheless, had the Treasury Department and the IRS determined otherwise, the Treasury Department and the IRS believe that in addition to being inconsistent with the purpose of section 48(d)(5)(B), allowing a basis increase for the income inclusion would also be inconsistent with the purpose of sections 705 and 1367. The income to be included is a notional amount, which has no current or future economic effect on the basis of assets held by a partnership or S corporation. In general, Congress intended for sections 705 and 1367 to preserve inside and outside basis parity for partnerships and S corporations so as to prevent any unintended tax benefit or detriment to the partners or shareholders. See H.R. Rep. No. 1337, 83d Cong., 2d Sess. A225 (1954); S. Rep. No. 1622, 83d Cong., 2d Sess. 384 (1954); H.R. Rep. No. 97–826, 97th Cong. 2d Sess. p. 17 (1982); S. Rep. No. 97–640, 97th Cong. 2d Sess. 16, 18 (1982); and Rev. Rul. 96–11 (1996–1 CB 140). Ultimately, the Treasury Department and the IRS have concluded that, under any approach, allowing

partners and S corporation shareholders a basis increase to offset the income inclusion required by § 1.50–1T(b)(2) upon disposition of their partnership interests or S corporation shares is inappropriate, and that Congress did not intend to allow partners and S corporation shareholders the full benefit of the credit without any of the corresponding burden.

D. Coordination With the Recapture Rules

Section 1.50–1T(c) provides that if the investment credit recapture rules under section 50(a) are triggered (including if there is a lease termination), causing a recapture of the credit or a portion of the credit, an adjustment will be made to the lessee's (or, as applicable, the ultimate credit claimant's) gross income for any discrepancies between the total amount included in gross income under these temporary regulations in § 1.50–1T(b)(2) and the total credit allowable after recapture. The adjustment amount is taken into account in the taxable year in which the property is disposed of or otherwise ceases to be investment credit property.

If the amount of the unrecaptured credit (that is, the allowable credit after taking into account the recapture amount), or 50 percent of the unrecaptured credit in the case of the energy credit, exceeds the amount previously included in gross income under § 1.50–1T(b)(2), the lessee's (or the ultimate credit claimant's) gross income is increased. The lessee (or the ultimate credit claimant) is required to include in gross income an amount equal to the excess of the amount of the credit that is not recaptured (or 50 percent of the amount of the credit that is not recaptured in the case of the energy credit) over the amount of the total increases in gross income previously made under § 1.50–1T(b)(2). This amount is in addition to the amounts previously included in gross income under § 1.50–1T(b)(2).

If the income inclusion prior to recapture under § 1.50–1T(b)(2) exceeds the unrecaptured credit (that is, the allowable credit after taking into account the recapture amount), or 50 percent of the unrecaptured credit in the case of the energy credit, the lessee's (or the ultimate credit claimant's) gross income is reduced. The lessee's or ultimate credit claimant's gross income is reduced by an amount equal to the excess of the total increases in gross income previously made under § 1.50–1T(b)(2) over the amount of the credit that is not recaptured (50 percent of the amount of the credit that is not

recaptured in the case of the energy credit).

E. Election To Accelerate Income Inclusion Outside of the Recapture Period

Section 1.50–1T(d)(1) provides that a lessee or an ultimate credit claimant may make an irrevocable election to include in gross income any remaining income required to be taken into account under § 1.50–1T(b)(2) in the taxable year in which the lease terminates or is otherwise disposed of. Similarly, § 1.50–1T(d)(1) provides that if an ultimate credit claimant disposes of its entire interest, either direct or indirect, in a partnership (other than an electing large partnership) or an S corporation, the ultimate credit claimant may make an irrevocable election to include in gross income any remaining income required to be taken into account under § 1.50–1T(b)(2) in the taxable year in which the ultimate credit claimant no longer owns a direct or indirect interest in the lessee of the investment credit property. The availability of this election allows a lessee or an ultimate credit claimant to account for any remaining required gross income inclusion in the taxable year in which it is exiting its investment.

This election is available only outside of the section 50(a) recapture period, and only if the lessee or the ultimate credit claimant was not already required to accelerate the gross income required to be included under § 1.50–1T(b)(2) because of a recapture event during the recapture period. Additionally, a former partner or S corporation shareholder that owns no direct or indirect interest in the lessee partnership or S corporation may not elect to accelerate the gross income required to be included under § 1.50–1T(b)(2) at the time of a termination or disposition of the lease by the lessee partnership or S corporation. The appropriate time for a former partner or S corporation shareholder that is an ultimate credit claimant to elect income acceleration is the taxable year that it disposes of its entire interest in a lessee partnership or S corporation.

Section 1.50–1T(d)(2) provides that the election to accelerate the income inclusion must be made by the due date (including any extension of time) of the lessee's return, or, in the case of a partnership or S corporation, by the due date (including any extension of time) of the ultimate credit claimant's return for the taxable year in which the relevant event occurs (for example, the lease termination, lease disposition, or disposition of the entire interest in the

lessee partnership or S corporation). The election is made by including the remaining gross income required by these temporary regulations in the taxable year of the relevant event (for example, the lease termination, lease disposition, or disposition of the entire interest in the lessee partnership or S corporation).

F. Applicability Date

These temporary regulations apply with respect to investment credit property placed in service on or after the date that is 60 days after the date of filing of these regulations in the **Federal Register**. The temporary regulations should not be construed to create any inference concerning the proper interpretation of section 50(d)(5) prior to the effective date of the regulations.

G. Rev. Proc. 2014–12

Rev. Proc. 2014–12 (2014–3 IRB 415) establishes the requirements under which the IRS will not challenge partnership allocations of section 47 rehabilitation credits by a partnership to its partners. Section 3 states that Rev. Proc. 2014–12 does not address how a partnership is required to allocate the income inclusion required by section 50(d)(5). Furthermore, section 4.07 provides that, solely for purposes of determining whether a partnership meets the requirements of that section, the partnership's allocation to its partners of the income inclusion required by section 50(d)(5) shall not be taken into account.

Because § 1.704–1(b)(4)(ii) provides that allocations of cost or qualified investment, and not the investment credit itself (which is not determined at the partnership level), made in accordance with § 1.46–3(f) shall be deemed to be made in accordance with the partners' interests in a partnership, this Treasury decision modifies Rev. Proc. 2014–12 by changing all references to allocations of section 47 rehabilitation credits to refer instead to allocations of qualified rehabilitation expenditures under section 47(c)(2). Additionally, because § 1.50–1T(b)(3) provides that the gross income required to be included under section 50(d)(5) is not an item of partnership income to which the rules of subchapter K apply, this Treasury decision modifies Rev. Proc. 2014–12 by deleting the sentences in section 3 and section 4.07 that refer to allocation by a partnership of the income inclusion required under section 50(d)(5).

Effect on Other Documents

Rev. Proc. 2014–12 (2014–3 IRB 415) is modified by: (1) Changing all

references to allocations of section 47 rehabilitation credits to refer instead to allocations of qualified rehabilitation expenditures under section 47(c)(2); and (2) deleting the sentences in section 3 and section 4.07 that refer to allocation by a partnership of the income inclusion required under section 50(d)(5).

Statement of Availability of IRS Documents

Rev. Proc. 2014–12 (2014–3 IRB 415) is published in the Internal Revenue Bulletin (or Cumulative Bulletin) and is available from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or by visiting the IRS Web site at <http://www.irs.gov>.

Special Analyses

Certain IRS regulations, including this one, are exempt from the requirements of Executive Order 12866, as supplemented and reaffirmed by Executive Order 13563. Therefore, a regulatory impact assessment is not required. It has also been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) does not apply to these regulations. For applicability of the Regulatory Flexibility Act, please refer to the Special Analyses section of the preamble to the cross-referenced notice of proposed rulemaking published in the Proposed Rules section in this issue of the **Federal Register**. Pursuant to section 7805(f) of the Code, these regulations have been submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on their impact on small business.

Drafting Information

The principal author of these temporary regulations is Jennifer A. Records, Office of the Associate Chief Counsel (Passthroughs and Special Industries), IRS. However, other personnel from the Treasury Department and the IRS participated in their development.

List of Subjects in 26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

Adoption of Amendments to the Regulations

Accordingly, 26 CFR part 1 is amended as follows:

PART 1—INCOME TAXES

■ **Paragraph 1.** The authority citation for part 1 continues to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

■ **Par. 2.** Section 1.50–1 is revised to read as follows:

§ 1.50–1 Lessee's income inclusion following election of lessor of investment credit property to treat lessee as acquirer.

(a) through (f) [Reserved]. For further guidance, see § 1.50–1T(a) through (f).

■ **Par. 3.** Section 1.50–1T is added to read as follows:

§ 1.50–1T Lessee's income inclusion following election of lessor of investment credit property to treat lessee as acquirer (temporary).

(a) *In general.* Section 50(d)(5) provides that, for purposes of computing the investment credit, rules similar to the rules of former section 48(d) (relating to certain leased property) (as in effect on the day before the date of the enactment of the Revenue Reconciliation Act of 1990 (Pub. L. 101–508, 104 Stat. 1388 (November 5, 1990))) apply. This section provides rules similar to the rules of former section 48(d)(5) that the Secretary has determined shall apply for purposes of determining the inclusion in gross income required when a lessor elects to treat a lessee as having acquired investment credit property.

(b) *Coordination with basis adjustment rules.* In the case of any property with respect to which an election is made under § 1.48–4 by a lessor of investment credit property to treat the lessee as having acquired the property—

(1) *Basis adjustment.* Section 50(c) does not apply with respect to such property.

(2) *Amount of credit included ratably in gross income—(i) In general.* A lessee of the property must include ratably in gross income, over the shortest recovery period which could be applicable under section 168 with respect to that property, an amount equal to the amount of the credit determined under section 46 with respect to that property. The ratable income inclusion under this paragraph begins on the date the investment credit property is placed in service and continues on each one year anniversary date thereafter until the end of the applicable recovery period. The lessee will include in gross income the amount of its credit determined under section 46 regardless of limitations on the amount of the credit allowed under section 38(c) based on the amount of the lessee's income tax.

(ii) *Special rule for the energy credit.* In the case of any energy credit determined under section 48(a), paragraph (b)(2)(i) of this section applies only to the extent of 50 percent of the amount of the credit determined under section 46.

(3) *Special rule for partnerships and S corporations—(i) In general.* For purposes of paragraph (b)(2) of this section, if the lessee of the property is a partnership (other than an electing large partnership) or an S corporation, the gross income includible under such paragraph is not an item of partnership income to which the rules of subchapter K of Chapter 1, subtitle A of the Code apply or an item of S corporation income to which the rules of subchapter S of Chapter 1, subtitle A of the Code apply. Any partner or S corporation shareholder that is an ultimate credit claimant (as defined in paragraph (b)(3)(ii) of this section) is treated as a lessee that must include in gross income the amounts required under paragraph (b)(2) of this section in proportion to the credit determined under section 46 with respect to such partner or S corporation shareholder.

(ii) *Definition of ultimate credit claimant.* For purposes of this section, the term *ultimate credit claimant* means any partner or S corporation shareholder that files (or that would file) Form 3468, "Investment Credit", with such partner's or S corporation shareholder's income tax return to claim an investment credit determined under section 46 with respect to such partner or S corporation shareholder.

(c) *Coordination with the recapture rules—(1) In general.* If section 50(a) requires an increase in the lessee's or the ultimate credit claimant's tax or a reduction in the carryback or carryover of an unused credit (or both) as a result of an early disposition (including a lease termination), etc., of leased property for which an election had been made under § 1.48–4, the lessee or the ultimate credit claimant is required to include in gross income an amount equal to the excess, if any, of the amount of the credit that is not recaptured over the total increases in gross income previously made under paragraph (b)(2) of this section with respect to the property. Such amount is in addition to the amounts the lessee or the ultimate credit claimant previously included in gross income under paragraph (b)(2) of this section.

(2) *Income inclusion exceeds unrecaptured credit.* If section 50(a) requires an increase in the lessee's or ultimate credit claimant's tax or a reduction in the carryback or carryover of an unused credit (or both) as a result of an early disposition (including a lease termination), etc., of leased property for which an election had been made under § 1.48–4, the lessee's or the ultimate credit claimant's gross income shall be reduced by an amount equal to the excess, if any, of the total increases in

gross income previously included under paragraph (b)(2) of this section over the amount of the credit that is not recaptured.

(3) *Special rule for the energy credit.* In the case of any energy credit determined under section 48(a), paragraphs (c)(1) and (2) of this section apply by substituting the phrase “50 percent of the amount of the credit that is not recaptured” for the phrase “the amount of the credit that is not recaptured.”

(4) *Timing of income inclusion or reduction following recapture.* Any adjustment required by paragraphs (c)(1) and (2) of this section is taken into account in the taxable year in which the property is disposed of or otherwise ceases to be investment credit property.

(d) *Election to accelerate income inclusion outside of the recapture period—(1) In general.* If after the recapture period described in section 50(a), but prior to the expiration of the recovery period described in paragraph (b)(2) of this section, there is a lease termination, the lessee otherwise disposes of the lease, or a partner or S corporation shareholder that is an ultimate credit claimant disposes of its entire interest, either direct or indirect, in a lessee partnership (other than an electing large partnership) or S corporation, the lessee, or, in the case of a partnership or S corporation, the ultimate credit claimant may irrevocably elect to take into account the remaining amount required to be included in gross income under this section in the taxable year of the disposition or termination.

(2) *Exceptions.* The election provided under paragraph (d)(1) of this section is not available to—

(i) Lessees or ultimate credit claimants required by paragraph (c) of this section to account for the remaining amount required to be included in gross income after accounting for recapture in the taxable year in which the property was disposed of or otherwise ceased to be investment credit property under section 50(a); or

(ii) Former partners or S corporation shareholders that own no interest, either direct or indirect, in a lessee partnership or S corporation at the time of a lease termination or disposition.

(3) *Manner and time for making election.* The election under paragraph (d)(1) of this section is made by including the remaining amount required to be included under this section in gross income in the taxable year of the lease termination or disposition or the disposition of the ultimate credit claimant's entire interest, either direct or indirect, in a

partnership or S corporation. The election must be made on or before the due date (including any extension of time) of the lessee's income tax return, or, in the case of a partnership or S corporation, the ultimate credit claimant's income tax return for the taxable year in which the lease termination or disposition or the disposition of the ultimate credit claimant's entire interest, either direct or indirect, in a partnership or S corporation occurs.

(e) *Examples.* The provisions of this section may be illustrated by the following examples:

Example 1. X, a calendar year C corporation, leases nonresidential real property from Y. The property is placed in service on July 1, 2016. Y elects under § 1.48-4 to treat X as having acquired the property. X's investment credit determined under section 46 for 2016 with respect to such property is \$9,750. The shortest recovery period that could be available to the property under section 168 is 39 years. Because Y has elected to treat X as having acquired the property, Y does not reduce its basis in the property under section 50(c). Instead, X, the lessee of the property, must include ratably in gross income over 39 years an amount equal to the credit determined under section 46 with respect to such property. Under paragraph (b)(2) of this section, X's increase in gross income for each of the 39 years beginning with 2016 is \$250 (\$9,750/39 year recovery period).

Example 2. The facts are the same as in *Example 1* of this paragraph (e), except that instead of nonresidential real property, X leases from Y solar energy equipment for which an energy credit under section 48 is determined under section 46. X's investment credit determined under section 46 for 2016 with respect to the property is \$9,750. The shortest recovery period that could be available to the property under section 168 is 5 years. X, the lessee of the property, must include ratably in gross income over 5 years an amount equal to 50% of the credit determined under section 46 with respect to such property. Under paragraph (b)(2) of this section, X's increase in gross income for each of the 5 years beginning with 2016 is \$975 (\$4,875/5 year recovery period).

Example 3. A and B, calendar year taxpayers, form a partnership, the AB partnership, that leases nonresidential real property from Y. The property is placed in service on July 1, 2016. Y elects under § 1.48-4 to treat the AB partnership as having acquired the property. A's investment credit determined under section 46 for 2016 is \$3,900 and B's investment credit determined under section 46 for 2016 is \$7,800 with respect to the property. The shortest recovery period that could be available to the property under section 168 is 39 years. Because Y has elected to treat the AB partnership as having acquired the property, Y does not reduce its basis in the building under section 50(c). Instead, A and B, the ultimate credit claimants, must include the amount of the credit determined with respect to A and B

under section 46 ratably in gross income over 39 years, the shortest recovery period available with respect to such property. Therefore, A and B must include ratably in gross income over 39 years under paragraph (b)(2) of this section an amount equal to \$3,900 and \$7,800, respectively. Under paragraph (b)(2) of this section, A's increase in gross income for each of the 39 years beginning with 2016 is \$100 (\$3,900/39 year recovery period) and B's is \$200 (\$7,800/39 year recovery period). Because the gross income A and B are required to include under paragraph (b)(2) of this section is not an item of partnership income, the rules under subchapter K applicable to items of partnership income do not apply with respect to such income. In particular, A and B are not entitled to an increase in the outside basis of their partnership interests under section 705(a) and are not entitled to an increase in their capital accounts under section 704(b).

Example 4. The facts are the same as in *Example 3* of this paragraph (e), except that on January 1, 2019, the lease between AB partnership and Y terminates (Y retains ownership of the property), which is a recapture event under section 50(a). A's and B's income tax for 2019 is increased under section 50(a) by \$2,340 and \$4,680, respectively (60% of \$3,900 and \$7,800, respectively, assuming that the aggregate decrease in the credits allowed under section 38 was the full amount of the investment credits determined as to A and B under section 46). Therefore, the amount of the unrecaptured credit as to A and B is \$1,560 and \$3,120, respectively (40% of \$3,900 and \$7,800, respectively). The amounts that A and B previously included in gross income under paragraph (b)(2) of this section are \$300 (\$100 for each of 2016, 2017, and 2018) and \$600 (\$200 for each of 2016, 2017, and 2018), respectively. A and B are required under paragraph (c)(1) of this section to include in gross income an amount equal to the excess of the credit that is not recaptured (\$1,560 and \$3,120, respectively) over the total increases in gross income previously made under paragraph (b)(2) of this section with respect to the property (\$300 and \$600, respectively). Therefore, A and B must include in gross income \$1,260 and \$2,520, respectively, in the taxable year of the lease termination (2019) in addition to the recapture amounts described above.

Example 5. (i) The facts are the same as in *Example 4* of this paragraph (e), except that instead of nonresidential real property, the AB partnership leases from Y solar energy equipment for which an energy credit under section 48 is determined under section 46. Because the shortest recovery period that could be available to the property under section 168 is 5 years, A and B are required under paragraph (b)(2)(ii) of this section to include ratably in gross income over 5 years an amount equal to 50% of the credit determined under section 46 with respect to such property (50% of \$3,900/5, or \$390, per year for A, and 50% of \$7,800/5, or \$780, per year for B).

(ii) The January 1, 2019 lease termination requires A's and B's income tax for 2019 to be increased under section 50(a) by \$2,340

and \$4,680, respectively (60% of \$3,900 and \$7,800, respectively). Therefore, the amount of the unrecaptured credit as to A and B is \$1,560 and \$3,120, respectively (40% of \$3,900 and \$7,800, respectively). Under paragraph (b)(2)(ii) of this section, the amounts A and B previously included in gross income are \$1,170 (\$390 for each of 2016, 2017, and 2018) and \$2,340 (\$780 for each of 2016, 2017, and 2018), respectively. A and B are entitled to a reduction in gross income under paragraph (c)(2) of this section equal to the excess of the total increases in gross income made under paragraph (b)(2)(ii) of this section (\$1,170 and \$2,340, respectively) over 50% of the amount of the credit that is not recaptured (\$780 and \$1,560, respectively). Therefore, A and B are entitled to a reduction in gross income in the amount of \$390 and \$780, respectively, in the taxable year of the lease termination (2019).

Example 6. (i) The facts are the same as in *Example 3* of this paragraph (e), except that on December 1, 2021, A sells its entire interest to C, and on January 1, 2022, the lease between AB partnership and Y terminates. At the time of the lease termination, B is still a partner in the AB partnership. There is no recapture event under section 50(a) because both the lease termination and the disposition of A's interest in the partnership occurred outside of the recapture period.

(ii) At the time that A sold its interest in the AB partnership to C, A had previously included \$500 (\$100 for each of 2016–2020) in gross income under paragraph (b)(2) of this section. Under paragraph (b)(2) of this section, A must continue to include the remaining \$3,400 (including \$100 in 2021) in gross income ratably over the remaining portion of the applicable recovery period of 39 years. Alternatively, under paragraph (d)(1) of this section, A may irrevocably elect to include the remaining \$3,400 in gross income in the taxable year that A sold its entire interest in the AB partnership to C (2021). Pursuant to paragraph (d)(2) of this section, A cannot make this election in the taxable year of the lease termination (2022).

(iii) At the time of the lease termination, B had previously included \$1,200 (\$200 for each of 2016–2021) in gross income under paragraph (b)(2) of this section. Under paragraph (b)(2) of this section, B must continue to include the remaining \$6,600 required in gross income ratably over the remaining portion of the applicable recovery period of 39 years. Alternatively, under paragraph (d)(1) of this section, B may irrevocably elect to include the remaining \$6,600 in gross income in the taxable year of the lease termination (2022).

(f) *Applicability date.* This section applies to property placed in service on or after September 19, 2016.

(g) *Expiration date.* The applicability of this section will expire on or before July 19, 2019.

John Dalrymple,
Deputy Commissioner for Services and Enforcement.

Approved: June 1, 2016.

Mark J. Mazur,
Assistant Secretary of the Treasury (Tax Policy).

[FR Doc. 2016–16563 Filed 7–21–16; 8:45 am]

BILLING CODE 4830–01–P

DEPARTMENT OF DEFENSE

Department of the Navy

32 CFR Part 706

Certifications and Exemptions Under the International Regulations for Preventing Collisions at Sea, 1972

AGENCY: Department of the Navy, DoD.

ACTION: Final rule.

SUMMARY: The Department of the Navy (DoN) is amending its certifications and exemptions under the International Regulations for Preventing Collisions at Sea, 1972 (72 COLREGS), to reflect that the Deputy Assistant Judge Advocate General (DAJAG) (Admiralty and Maritime Law) has determined that USS RAFAEL PERALTA (DDG 115) is a vessel of the Navy which, due to its special construction and purpose, cannot fully comply with certain provisions of the 72 COLREGS without interfering with its special function as a naval ship. The intended effect of this rule is to warn mariners in waters where 72 COLREGS apply.

DATES: This rule is effective July 22, 2016 and is applicable beginning June 27, 2016.

FOR FURTHER INFORMATION CONTACT: Commander Theron R. Korsak, (Admiralty and Maritime Law), Office of the Judge Advocate General, Department of the Navy, 1322 Patterson Ave. SE., Suite 3000, Washington Navy Yard, DC 20374–5066, telephone 202–685–5040.

SUPPLEMENTARY INFORMATION: Pursuant to the authority granted in 33 U.S.C. 1605, the DoN amends 32 CFR part 706.

This amendment provides notice that the DAJAG (Admiralty and Maritime Law), under authority delegated by the Secretary of the Navy, has certified that USS RAFAEL PERALTA (DDG 115) is a vessel of the Navy which, due to its special construction and purpose, cannot fully comply with the following specific provisions of 72 COLREGS without interfering with its special function as a naval ship: Annex I,

paragraph 3(a), pertaining to the location of the forward masthead light in the forward quarter of the ship, and the horizontal distance between the forward and after masthead lights; Annex I, paragraph 3(c), pertaining to placement of task lights not less than two meters from the fore and aft centerline of the ship in the athwartship direction; and Annex I, paragraph 2(f)(ii), pertaining to the vertical placement of task lights. The DAJAG (Admiralty and Maritime Law) has also certified that the lights involved are located in closest possible compliance with the applicable 72 COLREGS requirements.

Moreover, it has been determined, in accordance with 32 CFR parts 296 and 701, that publication of this amendment for public comment prior to adoption is impracticable, unnecessary, and contrary to public interest since it is based on technical findings that the placement of lights on this vessel in a manner differently from that prescribed herein will adversely affect the vessel's ability to perform its military functions.

List of Subjects in 32 CFR Part 706

Marine safety, Navigation (water), and Vessels.

For the reasons set forth in the preamble, the DoN amends part 706 of title 32 of the Code of Federal Regulations as follows:

PART 706—CERTIFICATIONS AND EXEMPTIONS UNDER THE INTERNATIONAL REGULATIONS FOR PREVENTING COLLISIONS AT SEA, 1972

■ 1. The authority citation for part 706 continues to read as follows:

Authority: 33 U.S.C. 1605.

■ 2. Section 706.2 is amended by:

■ a. In Table Four, paragraph 15, adding, in alpha numerical order, by vessel number, an entry for USS RAFAEL PERALTA (DDG 115); and

■ b. In Table Five, by adding, in alpha numerical order, by vessel number, an entry for USS RAFAEL PERALTA (DDG 115).

§ 706.2 Certifications of the Secretary of the Navy under Executive Order 11964 and 33 U.S.C. 1605.

DEPARTMENT OF DEFENSE

Department of the Navy

32 CFR Part 706

Certifications and Exemptions Under the International Regulations for Preventing Collisions at Sea, 1972

AGENCY: Department of the Navy, DoD.

ACTION: Final rule.

SUMMARY: The Department of the Navy (DoN) is amending its certifications and exemptions under the International Regulations for Preventing Collisions at Sea, 1972 (72 COLREGS), to reflect that the Deputy Assistant Judge Advocate General (DAJAG) (Admiralty and Maritime Law) has determined that USS LITTLE ROCK (LCS 9) is a vessel of the Navy which, due to its special construction and purpose, cannot fully comply with certain provisions of the 72 COLREGS without interfering with its

special function as a naval ship. The intended effect of this rule is to warn mariners in waters where 72 COLREGS apply.

DATES: This rule is effective July 22, 2016 and is applicable beginning July 6, 2016.

FOR FURTHER INFORMATION CONTACT: Commander Theron R. Korsak, JAGC, U.S. Navy, Admiralty Attorney, (Admiralty and Maritime Law), Office of the Judge Advocate General, Department of the Navy, 1322 Patterson Ave. SE., Suite 3000, Washington Navy Yard, DC 20374-5066, telephone number: 202-685-5040.

SUPPLEMENTARY INFORMATION: Pursuant to the authority granted in 33 U.S.C. 1605, the DoN amends 32 CFR part 706.

This amendment provides notice that the DAJAG (Admiralty and Maritime Law), under authority delegated by the Secretary of the Navy, has certified that USS LITTLE ROCK (LCS 9) is a vessel of the Navy which, due to its special construction and purpose, cannot fully comply with the following specific provisions of 72 COLREGS without interfering with its special function as a naval ship: Annex I paragraph 2(a)(i), pertaining to the height of the forward masthead light above the hull; Annex I, paragraph 3(a), pertaining to the location of the forward masthead light in the forward quarter of the ship, and the horizontal distance between the forward and after masthead light. The

DAJAG (Admiralty and Maritime Law) has also certified that the lights involved are located in closest possible compliance with the applicable 72 COLREGS requirements.

Moreover, it has been determined, in accordance with 32 CFR parts 296 and 701, that publication of this amendment for public comment prior to adoption is impracticable, unnecessary, and contrary to public interest since it is based on technical findings that the placement of lights on this vessel in a manner differently from that prescribed herein will adversely affect the vessel's ability to perform its military functions.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA-R01-OAR-2015-0306; A-1-FRL-9949-32-Region 1]

Air Plan Approval; RI; Correction, Administrative and Miscellaneous Revisions

AGENCY: Environmental Protection Agency.

ACTION: Direct final rule.

SUMMARY: The Environmental Protection Agency (EPA) is approving a State Implementation Plan (SIP) revision submitted by the State of Rhode Island. This SIP revision includes fifteen

revised Rhode Island Air Pollution Control Regulations. These regulations have been previously approved into the Rhode Island SIP and the revisions to these regulations currently being approved are mainly administrative in nature, but also include technical corrections and a few substantive changes to several of the rules. In addition, EPA is promulgating a correction to the Rhode Island SIP to remove Rhode Island's odor regulation because it was previously erroneously approved into the SIP. The intended effect of this action is to approve Rhode Island's fifteen revised regulations into the Rhode Island SIP and to correct the Rhode Island SIP by removing Rhode Island's odor regulation. This action is being taken in accordance with the Clean Air Act.

DATES: This direct final rule will be effective September 20, 2016, unless EPA receives adverse comments by August 22, 2016. If adverse comments are received, EPA will publish a timely withdrawal of the direct final rule in the **Federal Register** informing the public that the rule will not take effect.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA-R01-

OAR-2015-0306 at <http://www.regulations.gov>, or via email to mcdonnell.ida@epa.gov. For comments submitted at [Regulations.gov](http://www.regulations.gov), follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from [Regulations.gov](http://www.regulations.gov). For either manner of submission, the EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.* on the web, cloud, or other file sharing system). For additional submission methods, please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section. For the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit

<http://www2.epa.gov/dockets/commenting-epa-dockets>.

FOR FURTHER INFORMATION CONTACT:

SUPPLEMENTARY INFORMATION:

Throughout this document whenever “we,” “us,” or “our” is used, we mean EPA.

Organization of this document. The following outline is provided to aid in locating information in this preamble.

- I. Background and Purpose
- II. Correction to Rhode Island’s SIP
- III. Rhode Island’s SIP Revision
- IV. EPA’s Evaluation of Rhode Island’s SIP Revision
- V. Final Action
- VI. Incorporation by Reference
- VII. Statutory and Executive Order Reviews

I. Background and Purpose

On September 22, 2008, the Rhode Island Department of Environmental Management (RI DEM) submitted a SIP revision to EPA. This SIP revision includes fifteen revised Rhode Island Air Pollution Control Regulations, with the revisions mainly being administrative in nature, but several rules also included technical corrections and four rules included additional changes. In addition, in a letter dated May 24, 2016, Rhode Island requested that EPA remove Rhode Island’s Air Pollution Control Regulation No. 17 “Odors” from the existing SIP, a revision to which was initially included in Rhode Island’s September 22, 2008 SIP submittal. Also, on March 25, 2015, Rhode Island submitted a separate SIP revision with revised versions of three regulations that were part of the September 22, 2008 SIP submittal. These three revisions consisted of minor technical corrections. In a letter dated May 25, 2016, Rhode Island submitted another letter, withdrawing from its SIP revision several provisions of the fifteen regulations included in the original September 22, 2008 SIP submittal.¹

¹ In a letter dated May 25, 2016, Rhode Island submitted revised versions of each of these regulations to withdraw certain provisions from the September 22, 2008 SIP submittal. Rhode Island withdrew “director discretion” provisions from Rhode Island APC Regulation No. 3 and No. 12, and air toxics provisions from Rhode Island APC Regulation No. 7. Rhode Island also withdrew the “Application” section from the General Provisions of all fifteen regulations. In addition, the September 22, 2008 SIP submittal did not include “halogenated organic compound” applicability provisions in APC Regulation No. 15, No. 19, No. 21, No. 26, No. 30, No. 32, and No. 35.

Rhode Island’s new “Air Pollution Control General Definitions Regulation” was also included in the September 22, 2008 SIP revision. However, an updated version of that regulation (effective in the state of Rhode Island on September 29, 2010) was subsequently submitted by RI DEM on March 25, 2011, and was approved by EPA on March 1, 2012. See 77 FR 14691.

In addition, by letters dated June 27, 2014, March 28, 2016, and May 24, 2016, Rhode Island withdrew seventeen of the regulations originally included in the September 22, 2008 SIP submittal. Consequently, we are taking action only on the following revised regulations from Rhode Island’s September 22, 2008 submittal: Rhode Island’s Air Pollution Control (APC) Regulation No. 1 “Visible Emissions,” No. 3 “Particulate Emissions from Industrial Processes,” No. 4 “Open Fires,” No. 6 “Continuous Emissions Monitors,” No. 7 “Emissions of Air Contaminants Detrimental to Person or Property,” No. 12 “Incinerators,” No. 14 “Record Keeping and Reporting,” No. 15 “Control of Organic Solvent Emissions,” No. 19 “Control of Volatile Organic Compounds from Surface Coating Operations,” No. 21 “Control of Volatile Organic Compounds from Printing Operations,” No. 26 “Control of Organic Solvent Emissions from Manufacturers of Synthesized Pharmaceutical Products,” No. 27 “Control of Nitrogen Oxide Emissions,” No. 30 “Control of Volatile Organic Compounds from Automobile Refinishing Operations,” No. 32 “Control of Volatile Organic Compounds from Marine Vessel Loading Operations,” and No. 35 “Control of Volatile Organic Compounds and Volatile Hazardous Air Pollutants from Wood Product Manufacturing Operations.” All of these regulations were effective in the State of Rhode Island on July 19, 2007.

See section II of this document for details about the correction to Rhode Island’s SIP to remove the odor regulation. See section III for details about the rule changes we are taking action on, which were contained in Rhode Island’s September 22, 2008 SIP revision. See section IV for a summary of EPA’s evaluation of the State’s amended September 22, 2008 SIP submittal. Please note that if EPA receives adverse comment(s) on a particular amendment, paragraph, or section of Rhode Island’s SIP revision and if that amendment, paragraph, or section is severable from the remainder of the regulation in question, EPA may adopt as final those provisions of the regulation that are not the subject of the adverse comment(s).

II. Correction to Rhode Island’s SIP

A revision to APC Regulation No. 17 “Odors” was initially included in Rhode Island’s September 22, 2008 SIP submittal. However, in a letter dated May 24, 2016, Rhode Island withdrew that revision from its SIP submittal and also requested that EPA remove Rhode Island’s already existing Air Pollution Control Regulation No. 17 “Odors” from the SIP. EPA has determined that Rhode Island’s Air Pollution Control Regulation No. 17 “Odors,” which was originally approved into the SIP in 1981, does not have reasonable connection to the National Ambient Air Quality Standards (NAAQS) and related air quality goals of the Clean Air Act and thus is not properly part of the SIP. Consequently, pursuant to CAA section 110(k)(6), EPA is correcting the erroneous approval of Rhode Island’s odor regulation into the SIP. Section 110(k)(6) of the CAA provides that “[w]henver the Administrator determines that the Administrator’s action approving, disapproving, or promulgating any plan or plan revision (or part thereof), area designation, redesignation, classification or reclassification was in error, the Administrator may in the same manner as the approval, disapproval, or promulgation revise any such action as appropriate without requiring any further submission from the State. Such determination and the basis thereof shall be provided to the State and the public.” It should be noted that Section 110(k)(6) has been used by EPA to delete improperly approved odor provisions from the Wyoming SIP and the New York SIP. See 61 FR 47058 and 63 FR 65557.

III. Rhode Island’s SIP Revision

For ten of the fifteen regulations included in Rhode Island’s amended September 22, 2008 SIP submittal, Rhode Island removed common definitions from each of those individual regulations and recodified them in Rhode Island’s Air Pollution Control General Definitions Regulation. As noted above, the “Air Pollution Control General Definitions Regulation” with those added definitions was approved into the SIP on March 1, 2012. In addition, for all of the fifteen regulations included in Rhode Island’s amended September 22, 2008 SIP submittal, Rhode Island added General Provisions to each of the regulations. These General Provisions state the purpose of the rule, cite the authority pursuant to which the regulations were promulgated, and provide the effective date of the regulation.

On March 25, 2015, Rhode Island amended the September 22, 2008 SIP submittal by submitting revised versions of Air Pollution Control Regulations No. 15, No. 26, and No. 32, including minor technical corrections. Rhode Island's APC Regulation No. 15 was revised to correct the numbering of subsections 15.4.10(g) and (h) and was revised to correct the references to these sections in subsections 15.2.4(b) and 15.2.5(b). Rhode Island's APC Regulation No. 26 was revised in subsection 26.6.2 to correct a cross reference to another subsection. Rhode Island's APC Regulation No. 32 was revised to correct a typographical error in subsection 32.1.1 and to correct the symbol for degrees in subsection 32.4.3(f).

In addition to the changes noted above, in the amended September 22, 2008 SIP submittal, the following eight regulations added a Table of Contents in each regulation: Rhode Island's APC Regulation No. 15, No. 19, No. 21, No. 26, No. 27, No. 30, No. 32, and No. 35. Furthermore, APC Regulation No. 4, No. 7, No. 12, and No. 14 included additional changes. The following discussion provides a summary of the changes to these four regulations.

Rhode Island's APC Regulation No. 4 "Open Fires" was approved into the SIP in 1981. *See* 46 FR 25446. The currently approved standard prohibits burning of any material in an open fire at a solid waste management facility or in connection with any salvage, industrial, commercial or institutional operation. Rhode Island added a definition for hazardous waste disposal facility to mean real and personal property acquired, constructed or operated for the purpose of the disposal of hazardous waste, and added an explicit prohibition for open burning at hazardous waste disposal facilities. In addition, Rhode Island added a provision allowing the RI DEM Air Director to approve open burning of solid or liquid fuels or structures for the purpose of instruction and training of municipal, volunteer and industrial firefighters in the method of fighting fires when conducted under the direct control and supervision of qualified instructors. The rule also added a provision allowing the Director to approve the combustion of material if no alternative means of disposal is available, and so long as the burning is conducted during periods of good ventilation, without causing a nuisance, and using smoke minimizing starters if smoke starters are used. Alternative disposal methods may include chipping, cutting for forest products, landfilling, piling for protective cover for wildlife and others. EPA concluded that sufficient, concrete bounds and

conditions were placed on the Director's ability to approve alternative means of combusting material, such that the Director's discretion in this particular instance is approvable under the CAA.

Rhode Island's Air Pollution Control Regulation No. 7 "Emissions of Air Contaminants Detrimental to Person or Property" was approved into the SIP in 1981. *See* 46 FR 25446. The standard prohibits emissions of any contaminant that may be injurious to human, plant or animal life, or cause damage to property or which unreasonably interferes with the enjoyment of life and property. Rhode Island's APC Regulation No. 7 was revised to include criteria for determining compliance with the standard for new sources or modifications. In the issuance of any approval under Rhode Island's APC Regulation No. 9 "Air Pollution Control Permits" the criteria for determining compliance with regard to the APC Regulation No. 7 standards will be based on compliance with the primary and secondary NAAQS.

Rhode Island's Air Pollution Control Regulation No. 12 "Incinerators" was approved into the SIP in 1982. *See* 47 FR 17816. Rhode Island's APC Regulation No. 12 was amended to exclude new hospital, medical, and infectious waste incinerators subject to sections 39.3–39.10 of Rhode Island's APC Regulation No. 39. Rhode Island's APC Regulation No. 39 was approved by EPA as part of a State Plan required by sections 111(d) and 129 of the Clean Air Act. *See* 66 FR 21092.

Rhode Island's APC Regulation No. 14, Recordkeeping and Reporting, was approved into the SIP in 1999. *See* 64 FR 67495. Rhode Island's APC Regulation No. 14 was revised to require emission statements to be submitted by April 15 of each year instead of "within 45 days of the end of the calendar year."

IV. EPA's Evaluation of Rhode Island's SIP Revision

We have reviewed the regulations included in Rhode Island's amended September 22, 2008 SIP submittal and have found that all of the regulations currently pending before EPA from that submittal had previously been approved into the Rhode Island SIP (without the revisions included in the amended September 22, 2008 submission).² The changes to Rhode Island's APC

² It should be noted that the only newly adopted regulation included in Rhode Island's September 22, 2008 SIP submittal was the "General Definitions" regulation. An updated version of that regulation was approved by EPA on March 13, 2012. *See* 77 FR 14691. Therefore, the definitions regulation was one of the rules that Rhode Island withdrew in its March 28, 2016 letter.

Regulation No. 4 "Open Fires" to allow open burning for the instruction and training of firefighters or where there are no alternatives to open burning available, are practical and properly limited exceptions to the general prohibition against open fires. Rhode Island's APC Regulation No. 7 "Emissions of Air Contaminants Detrimental to Person or Property" was strengthened by adding criteria for determining compliance with the standard for new and modified sources. Rhode Island's APC Regulation No. 12 "Incinerators" now excludes incinerators more appropriately regulated by Rhode Island's APC Regulation No. 39 as part of an EPA approved State Plan under sections 111(d) and 129 of the Clean Air Act. Lastly, the change to the date for submissions in Rhode Island's APC Regulation No. 14 "Record Keeping and Reporting" is minor in nature and has no bearing on air quality. As described above, the revisions to the majority of those regulations submitted as part of the amended September 22, 2008 submittal are primarily administrative in nature and also include certain minor technical corrections, as well as a few substantive changes we find acceptable to several of the rules. Therefore, EPA is approving the revised regulations into the Rhode Island SIP.

V. Final Action

EPA is removing Rhode Island's APC Regulation No. 17 "Odors" from the approved Rhode Island SIP pursuant to Section 110(k)(6) of the Act. In addition, EPA is approving, and incorporating into the Rhode Island SIP, the following revised Rhode Island Air Pollution Control Regulations, effective in the state of Rhode Island on July 19, 2007:

- No. 1 "Visible Emissions" (except section 1.5.3 of the General Provisions which was formally withdrawn from consideration as part of the SIP revision)
- No. 3 "Particulate Emissions from Industrial Processes" (except section 3.4.3 of the General Provisions and the "director discretion" provisions in section 3.3(a), which were formally withdrawn from consideration as part of the SIP revision)
- No. 4 "Open Fires" (except section 4.5.3 of the General Provisions which was formally withdrawn from consideration as part of the SIP revision)
- No. 6 "Continuous Emissions Monitors" (except section 6.4.3 of the General Provisions which was formally withdrawn from consideration as part of the SIP revision)

- No. 7 “Emissions of Air Contaminants Detrimental to Person or Property” (except section 7.5.3 of the General Provisions and the air toxics provisions in sections 7.4.1(b), (c), and (d), which were formally withdrawn from consideration as part of the SIP revision)
- No. 12 “Incinerators” (except section 12.8.3 of the General Provisions and the “director discretion” provisions in sections 12.5(a) and (c), which were formally withdrawn from consideration as part of the SIP revision)
- No. 14 “Record Keeping and Reporting” (except section 14.4.3 of the General Provisions which was formally withdrawn from consideration as part of the SIP revision)
- No. 15 “Control of Organic Solvent Emissions” (except section 15.5.3 of the General Provisions which was formally withdrawn from consideration as part of the SIP revision, and section 15.2.2 which was not submitted as part of the SIP revision)
- No. 19 “Control of Volatile Organic Compounds from Surface Coating Operations” (except section 19.9.3 of the General Provisions which was formally withdrawn from consideration as part of the SIP revision, and section 19.2.2 which was not submitted as part of the SIP revision)
- No. 21 “Control of Volatile Organic Compounds from Printing Operations” (except section 21.8.3 of the General Provisions which was formally withdrawn from consideration as part of the SIP revision, and section 21.2.3 which was not submitted as part of the SIP revision)
- No. 26 “Control of Organic Solvent Emissions from Manufacturers of Synthesized Pharmaceutical Products” (except section 26.8.3 of the General Provisions which was formally withdrawn from consideration as part of the SIP revision, and section 26.2.3 which was not submitted as part of the SIP revision)
- No. 27 “Control of Nitrogen Oxide Emissions” (except section 27.7.3 of the General Provisions which was formally withdrawn from consideration as part of the SIP revision)
- No. 30 “Control of Volatile Organic Compounds from Automobile Refinishing Operations” (except section 30.9.3 of the General Provisions which was formally withdrawn from consideration as part of the SIP revision, and section 30.2.2

- which was not submitted as part of the SIP revision)
- No. 32 “Control of Volatile Organic Compounds from Marine Vessel Loading Operations” (except section 32.7.3 of the General Provisions which was formally withdrawn from consideration as part of the SIP revision, and section 32.2.2 which was not submitted as part of the SIP revision)
- No. 35 “Control of Volatile Organic Compounds and Volatile Hazardous Air Pollutants from Wood Product Manufacturing Operations” (except section 35.9.3 of the General Provisions which was formally withdrawn from consideration as part of the SIP revision, and section 35.2.3 which was not submitted as part of the SIP revision)

The EPA is publishing this action without prior proposal because the Agency views this as a noncontroversial amendment and anticipates no adverse comments. However, in the proposed rules section of this **Federal Register** publication, EPA is publishing a separate document that will serve as the proposal to approve the SIP revision should relevant adverse comments be filed. This rule will be effective September 20, 2016 without further notice unless the Agency receives relevant adverse comments by August 22, 2016.

If the EPA receives such comments, then EPA will publish a notice withdrawing the final rule and informing the public that the rule will not take effect. All public comments received will then be addressed in a subsequent final rule based on the proposed rule. The EPA will not institute a second comment period on the proposed rule. All parties interested in commenting on the proposed rule should do so at this time. If no such comments are received, the public is advised that this rule will be effective on September 20, 2016 and no further action will be taken on the proposed rule. Please note that if EPA receives adverse comment on an amendment, paragraph, or section of this rule and if that provision may be severed from the remainder of the rule, EPA may adopt as final those provisions of the rule that are not the subject of an adverse comment.

VI. Incorporation by Reference

In this rule, the EPA is finalizing regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, the EPA is finalizing the incorporation by reference of Rhode Island’s Air Pollution Control

Regulations No. 1 “Visible Emissions” (except section 1.5.3 of the General Provisions which was formally withdrawn from consideration as part of the SIP revision), No. 3 “Particulate Emissions from Industrial Processes” (except section 3.4.3 of the General Provisions and the “director discretion” provisions in section 3.3(a), which were formally withdrawn from consideration as part of the SIP revision), No. 4 “Open Fires” (except section 4.5.3 of the General Provisions which was formally withdrawn from consideration as part of the SIP revision), No. 6 “Continuous Emissions Monitors” (except section 6.4.3 of the General Provisions which was formally withdrawn from consideration as part of the SIP revision), No. 7 “Emissions of Air Contaminants Detrimental to Person or Property” (except section 7.5.3 of the General Provisions and the air toxics provisions in sections 7.4.1(b), (c), and (d), which were formally withdrawn from consideration as part of the SIP revision), No. 12 “Incinerators” (except section 12.8.3 of the General Provisions and the “director discretion” provisions in sections 12.5(a) and (c), which were formally withdrawn from consideration as part of the SIP revision), No. 14 “Record Keeping and Reporting” (except section 14.4.3 of the General Provisions which was formally withdrawn from consideration as part of the SIP revision), No. 15 “Control of Organic Solvent Emissions” (except section 15.5.3 of the General Provisions which was formally withdrawn from consideration as part of the SIP revision, and section 15.2.2 which was not submitted as part of the SIP revision), No. 19 “Control of Volatile Organic Compounds from Surface Coating Operations” (except section 19.9.3 of the General Provisions which was formally withdrawn from consideration as part of the SIP revision, and section 19.2.2 which was not submitted as part of the SIP revision), No. 21 “Control of Volatile Organic Compounds from Printing Operations” (except section 21.8.3 of the General Provisions which was formally withdrawn from consideration as part of the SIP revision, and section 21.2.3 which was not submitted as part of the SIP revision), No. 26 “Control of Organic Solvent Emissions from Manufacturers of Synthesized Pharmaceutical Products” (except section 26.8.3 of the General Provisions which was formally withdrawn from consideration as part of the SIP revision, and section 26.2.3 which was not submitted as part of the SIP revision), No. 27 “Control of Nitrogen Oxide Emissions” (except

section 27.7.3 of the General Provisions which was formally withdrawn from consideration as part of the SIP revision), No. 30 “Control of Volatile Organic Compounds from Automobile Refinishing Operations” (except section 30.9.3 of the General Provisions which was formally withdrawn from consideration as part of the SIP revision, and section 30.2.2 which was not submitted as part of the SIP revision), No. 32 “Control of Volatile Organic Compounds from Marine Vessel Loading Operations” (except section 32.7.3 of the General Provisions which was formally withdrawn from consideration as part of the SIP revision, and section 32.2.2 which was not submitted as part of the SIP revision), and No. 35 “Control of Volatile Organic Compounds and Volatile Hazardous Air Pollutants from Wood Product Manufacturing Operations” (except section 35.9.3 of the General Provisions which was formally withdrawn from consideration as part of the SIP revision, and section 35.2.3 which was not submitted as part of the SIP revision), described in the amendments to 40 CFR part 52 set forth below. The EPA has made, and will continue to make, these documents generally available electronically through <http://www.regulations.gov>.

VII. Statutory and Executive Order Reviews

Under the Clean Air Act, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA’s role is to approve state choices, provided that they meet the criteria of the Clean Air Act. Accordingly, this action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities

under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);

- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the Clean Air Act; and
- Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a “major rule” as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of

this action must be filed in the United States Court of Appeals for the appropriate circuit by September 20, 2016. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. Parties with objections to this direct final rule are encouraged to file a comment in response to the parallel notice of proposed rulemaking for this action published in the proposed rules section of today’s **Federal Register**, rather than file an immediate petition for judicial review of this direct final rule, so that EPA can withdraw this direct final rule and address the comment in the proposed rulemaking. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Carbon monoxide, Incorporation by reference, Intergovernmental relations, Lead, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, Sulfur oxides, Volatile organic compounds.

Dated: July 5, 2016.

H. Curtis Spalding,

Regional Administrator, EPA New England.

Part 52 of chapter I, title 40 of the Code of Federal Regulations is amended as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

- 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart OO—Rhode Island

- 2. In § 52.2070, paragraph (c), the table is amended by removing the entry for state citation Air Pollution Control Regulation 17; and by revising entries to state citations for Air Pollution Control Regulations 1, 3, 4, 6, 7, 12, 14, 15, 19, 21, 26, 27, 30, 32, and 35 to read as follows:

§ 52.2070 Identification of plan.

RIN 2126-AB89

Amendments To Implement Certain Provisions of the Fixing America’s Surface Transportation Act or “FAST Act”

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Final rule.

SUMMARY: The Federal Motor Carrier Safety Administration (FMCSA) adopts, as final, certain regulations required by the Fixing America’s Surface Transportation Act (FAST Act) enacted on December 4, 2015. The statutory changes went into effect on October 1, 2015, retroactively, and require that FMCSA make conforming changes to its regulations to ensure they are current and consistent with the statutory requirements. Adoption of these rules is a nondiscretionary, ministerial action that FMCSA may take without issuing a notice of proposed rulemaking and receiving public comment, in accordance with the good cause exception available to Federal agencies under the Administrative Procedure Act (APA).

DATES: This final rule is effective July 22, 2016. Petitions for Reconsideration must be received by the Agency no later than August 22, 2016.

ADDRESSES: Petitions for reconsideration must be submitted to: Administrator, Federal Motor Carrier Safety Administration, 1200 New Jersey Avenue SE., Washington, DC 20590-0001.

FOR FURTHER INFORMATION CONTACT: Kathryn Sinniger, Federal Motor Carrier Safety Administration, 1200 New Jersey Avenue SE., Washington, DC 20590; by telephone at (202) 493-0908, or by electronic mail at *kathryn.sinniger@dot.gov*. If you have questions regarding the docket, call Docket Services, telephone 202-366-9826.

SUPPLEMENTARY INFORMATION:

I. Executive Summary

A. Purpose and Summary of the Major Provisions

This rule makes nondiscretionary, ministerial changes to FMCSA regulations that are required by the FAST Act (Pub. L. 114-94, 129 Stat. 1312, December 4, 2015). The FAST Act made several notable changes to the authorities implemented by requirements in the Code of Federal Regulations (CFR). For example, it exempts welding trucks used in the construction and maintenance of pipelines from FMCSA’s regulations. It exempts drivers of ready-mixed concrete trucks and hi-rail vehicles, as well as

drivers of commercial motor vehicles (CMVs) transporting livestock and bees, from some of the hours of service (HOS) requirements in 49 CFR part 395. It also extends the length of the time (from 2 years to 5 years) that an exemption or renewal of an exemption may provide relief from the regulations.

A full explanation of all changes made in this rule is included below in section III. Fast Act Provisions Implemented by this Rulemaking. A copy of the FAST Act has been placed in the docket for this rulemaking for reference.

B. Benefits and Costs

The economic impact of this rule’s provisions, considered both individually and in the aggregate, does not rise to the level of economic significance, and a cost-benefit analysis is therefore not required.

II. Legal Basis for the Rulemaking

A. FAST Act

This rule is based on the FAST Act. Certain provisions of the FAST Act made mandatory, non-discretionary changes to FMCSA programs. The majority of these statutory changes went into effect on October 1, 2015, while others will go into effect on October 1, 2016.¹ This rule makes only those changes that went into effect on October 1, 2015, that can be implemented without prior notice and opportunity for comment as addressed in section II(B) below. Publication of today’s rule triggers the 3-year period during which the States are required to adopt compatible provisions under FMCSA’s Motor Carrier Safety Assistance Program (MCSAP). 49 CFR 350.331(d), 350.335(b), and part 355, appendix A.

At a later date, before October 1, 2016, the Agency will issue another final rule to implement additional ministerial requirements that will become effective on October 1, 2016.² The Agency also expects that there will be rulemakings required to address additional

provisions of the FAST Act, where Congress either provided the Agency with some discretion regarding implementation, or specifically required that notice and comment rulemaking procedures be followed.

It is necessary to make conforming changes to ensure that FMCSA’s regulations are current and consistent with the applicable statutes. The provisions implemented in this final rule are from the following sections of the FAST Act, which impacted Title 49, United States Code (U.S.C.):

1. Section 5206 Applications.
2. Section 5507 Electronic Logging Device Requirements.
3. Section 5518 Covered Farm Vehicles.
4. Section 5519 Operators of Hi-Rail Vehicles.
5. Section 5521 Ready Mix Concrete Delivery Vehicles.
6. Section 5522 Transportation of Construction Materials and Equipment.
7. Section 5524 Exemptions from Requirements for Certain Welding Trucks Used in Pipeline Industry.
8. Section 7208 Hazardous Materials Endorsement Exemption.

FMCSA is authorized to implement these statutory provisions by delegation from the Secretary of Transportation in 49 CFR 1.87.

B. Administrative Procedure Act

Generally, agencies may promulgate final rules only after issuing a notice of proposed rulemaking and providing an opportunity for public comment under procedures required by the APA [5 U.S.C. 553(b) and (c)]. Section 553(b)(3)(B) allows an exception from these requirements when notice and public comment procedures are “impracticable, unnecessary, or contrary to the public interest.” FMCSA finds that prior notice and an opportunity for comment are unnecessary because the changes adopted in this final rule are statutorily mandated, and the Agency is performing a nondiscretionary, ministerial act. For these same reasons,

the rule will be effective upon publication, as these statutory changes went into effect on October 1, 2015 [5 U.S.C. 553(d)].

C. FAST Act Waiver of Advance Notice of Proposed Rulemaking/Negotiated Rulemaking

FMCSA is aware of the regulatory reform requirements imposed by section 5202 of the FAST Act concerning public participation in rulemaking (49 U.S.C. 31136(g)). These requirements pertain to certain major rules, but because this final rule is not major, they are not applicable. In any event, the Agency finds that, for the reasons stated below, publication of an advance notice of proposed rulemaking under 49 U.S.C. 31136(g)(1)(A), or a negotiated rulemaking under 49 U.S.C. 31136(g)(1)(B), is unnecessary and contrary to the public interest in accordance with the waiver provision in 49 U.S.C. 31136(g)(3).

III. Fast Act Provisions Implemented by This Rulemaking

This section describes those portions of the FAST Act that require FMCSA to make conforming changes to the regulations, which are also listed here. These regulatory changes are non-discretionary; in other words, the FAST Act provided all of the necessary content of the regulations. As noted in the executive summary, there are additional regulatory changes that will be required by the FAST Act, but those either have a later effective date, will require FMCSA to exercise some degree of discretion, or are required to be subject to notice and comment.

FMCSA has included here a table of affected CFR sections, which will cross-reference corresponding requirements of the FAST Act. This table will make it easier for the reader to move back and forth between the revised regulations and the corresponding section(s) of the FAST Act.

Section 5206 Applications

Previously, 49 U.S.C. 31315(b) allowed an exemption from a regulation for no longer than 2 years from its approval date, and allowed an exemption to be renewed upon application to the Secretary for subsequent periods of no more than 2 years. Section 5206(a)(3) of the FAST Act amends section 31315(b) to allow an exemption to be granted for no longer than 5 years and to be renewed, upon request, for subsequent periods no longer than 5 years, if the Secretary finds that such an exemption would likely achieve an equivalent, or greater, level of safety. This rulemaking changes § 381.300(b) to allow exemptions for up to 5 years that may be renewed for subsequent periods of up to 5 years.

Section 5206(a)(3) of the FAST Act also added subsection (b)(3) to 49 U.S.C. 31315 to permit an applicant whose application for exemption has been denied to resubmit the application addressing the reason for denial. FMCSA adds a new § 381.317 describing this process.

Section 5206(b)(1) of the FAST Act made permanent three existing exemptions from the 30-minute rest break requirements in § 395.3(a)(3)(ii). The first was granted to the National Ready Mixed Concrete Association (80 FR 17819, April 2, 2015). In this rulemaking, FMCSA adds new § 395.1(t) allowing a driver of a ready-mixed concrete delivery vehicle to use time spent waiting with the vehicle at a job site or terminal to meet the requirement for a 30-minute rest break. The driver may not perform any other work during this time waiting. FMCSA also adds a definition of “ready mix concrete delivery vehicle” to § 395.2, to reflect the definition in related section 5521 of the FAST Act, Ready Mix Concrete Delivery Vehicles, which is discussed below.

The second exemption, also from the requirements in § 395.3(a)(3)(ii), was granted to the California Farm Bureau

Federation (80 FR 35425, June 19, 2015). In this rule, FMCSA adds new § 395.1(u) that provides that the 30-minute rest break requirements do not apply to a driver transporting bees in interstate commerce if there are bees on the vehicle.

The third exemption from the 30-minute rest break was granted to the Agricultural and Food Transporters Conference (AFTC) of the American Trucking Associations (80 FR 33584, June 12, 2015). In this rulemaking, FMCSA implements this requirement of the Act by adding new § 395.1(v) that provides that the 30-minute rest break requirements do not apply to a driver transporting livestock while the livestock are on the vehicle. FMCSA also adds a definition of livestock to § 395.2, to reflect the classification in the regulatory exemption developed in response to the AFTC petition.

Section 5507 Electronic Logging Device Requirements

Section 5507 of the FAST Act amends 49 U.S.C. 31137(b) to provide an exception for motor carriers transporting a motor home or recreation vehicle trailer in a driveway-towaway operation, as defined in 49 CFR 390.5. Under this provision, a motor carrier could comply with the HOS requirements by using either a paper record of duty status form or an electronic logging device. FMCSA changes § 395.8(a)(1)(iii)(A) by adding this new exception.

Section 5518 Covered Farm Vehicles

Previously, section 32934(b)(1) of the Moving Ahead for Progress for the 21st Century Act (MAP-21) (Pub. L. 112-141, 126 Stat. 405, 830, July 6, 2012; 49 U.S.C. 31136 note) provided that Federal transportation funding to a State could not be terminated, limited, or interfered with because the State exempts a covered farm vehicle, including its operator, from “any State requirement relating to the operation of that vehicle.” The term “covered farm

vehicle” is defined in section 32924(c) of MAP-21. Section 5518 of the FAST Act amends section 32934(b)(1) of MAP-21 to specify that the requirements are those in section 32934(a) or any other minimum standard provided by a State relating to the operation of that vehicle. The specific requirements outlined in section 32934(a) of MAP-21 exempt a covered farm vehicle and its driver from any requirement relating to (1) operating with a commercial driver’s license (CDL) or drug and alcohol testing established under 49 U.S.C. chapter 313; (2) medical certificates established under 49 U.S.C. chapter 311, subchapter III, or 49 U.S.C. chapter 313; and (3) HOS and vehicle inspection, repair, and maintenance established under 49 U.S.C. chapter 311, subchapter III, or 49 U.S.C. chapter 315. The Agency revises § 390.39(b)(1) to reflect these changes, which should clarify which exemptions found in State laws for covered farm vehicles may not be taken into consideration during Federal grants management.

Section 5519 Operators of Hi-Rail Vehicles

For the CMV driver of a hi-rail vehicle who is subject to the HOS regulations in 49 CFR part 395, section 5519 of the FAST Act provides that the maximum on-duty time under § 395.3 shall not include certain time in transportation to or from a duty assignment. Time in transportation, to or from a duty assignment, will not be included in the 14 hours on-duty time under § 395.3(a)(2) if (1) it does not exceed 2 hours per calendar day or a total of 30 hours per calendar month, and (2) the motor carrier fully and accurately accounts for this time in the records it maintains and makes such records available to FMCSA or the Federal Railroad Administration upon request. Section 5519(b) defines “hi-rail vehicle” as “an internal rail flaw detection vehicle equipped with flange hi-rails.”

FMCSA adds a new paragraph (w) to § 395.1 to reflect this exception. In addition, FMCSA adds a definition of hi-rail vehicle to § 395.2.

Section 5521 Ready Mix Concrete Delivery Vehicles

Section 5521 of the FAST Act amends 49 U.S.C. 31502 by adding a new subsection (f) that exempts drivers of ready-mixed concrete delivery vehicles from keeping records of duty status under certain circumstances. The driver of the ready-mixed concrete delivery vehicle must (1) operate within a 100-mile radius of the normal work reporting location; (2) return to the work reporting location and be released from work within 14 consecutive hours; (3) have at least 10 hours off duty following each 14 hours on duty; and (4) not exceed 11 hours of driving time following 10 consecutive hours off duty. The motor carrier that employs the driver must keep accurate time records. This change essentially allows the driver of a ready-mixed concrete truck to use the short-haul exception in § 395.1(e)(1), but with a 14-hour on-duty period. Section 5521 also adds a definition of “driver of a ready mixed concrete delivery vehicle.”

FMCSA revises § 395.1(e)(1) to reflect new 49 U.S.C. 31502(f)(1). The Agency also adds a new definition of “ready-mixed concrete delivery vehicle” to § 395.2. “Driver” is already defined in § 390.5.

Section 5522 Transportation of Construction Materials and Equipment

Section 5522 of the FAST Act amends section 229(e)(4) of the Motor Carrier Safety Improvement Act of 1999, as transferred and amended (49 U.S.C. 31136 note), which is the definition of transportation of construction materials and equipment. That definition provided that, for a driver who transports construction materials and equipment within a 50 air mile radius of the normal work reporting location of the driver, any period of 7 or 8 consecutive days may end with the beginning of any off-duty period of 24 or more successive hours. The FAST Act increases this to a 75 air mile radius. The Act also allows a State to establish a different air mile radius limitation if such limitation is between 50 and 75 air miles and applies only to movements that take place entirely within the State. FMCSA changes the definition of transportation of construction materials and equipment in § 395.2 to conform to this change.

Section 5524 Exemptions From Requirements for Certain Welding Trucks Used in Pipeline Industry

Section 5524 of the FAST Act defines a welding truck used in the pipeline industry as a pick-up style truck, owned by a welder, equipped with a welding rig that is used in the construction or maintenance of pipelines, and that has a gross vehicle weight and combination weight rating and weight of 15,000 pounds or less. Section 5524 exempts the operator of such a vehicle and the operator’s employer from any requirement relating to: (1) Registration as a motor carrier, including obtaining and displaying a U.S. Department of Transportation (DOT) number (49 U.S.C. chapters 139 and 311); (2) driver qualifications (49 U.S.C. chapter 311); (3) driving a CMV (49 U.S.C. chapter 311); (4) parts and accessories and inspection, repair, and maintenance of CMVs (49 U.S.C. chapter 311); and HOS of drivers, including maximum driving and on duty time (49 U.S.C. chapter 315). To reflect this section of the FAST Act, FMCSA adds new § 390.38 that exempts welding trucks, equipped with a welding rig used in the construction and maintenance of pipelines, from the requirements in 49 CFR parts 365, 390, 391, 392, 393, 395, and 396. The new § 390.38 also defines “pipeline welding trucks” to conform to the FAST Act.

The Agency also adds specific exemptions in each of the parts listed in new § 390.38, to ensure that the exemption is clear. These new exemptions are found at: §§ 365.101(j) (exemption from requirement to apply for operating authority in part 365); 391.2 (e) (exemption from minimum qualifications for CMV drivers in part 391); 392.1 (b) (exemption from CMV operating rules in part 392); 393.1(e) (exemption from parts and accessories requirements in part 393); 395.1(x) (exemption from the HOS rules in part 395); and 396.1(d) (exemption from inspection, repair, and maintenance requirements in part 396).

Section 7208 Hazardous Materials Endorsement Exemption

Section 7208 of the FAST Act provides that the Secretary allow a State, at its discretion, to waive the requirement for a holder of a Class A CDL to obtain a hazardous materials endorsement to transport 1,000 gallons or less of diesel fuel. A State may waive the requirement if the license holder is (1) acting within the scope of the license holder’s employment as an employee of a custom harvester operation, agrichemical business, farm retail outlet and supplier, or livestock feeder; and (2)

is operating a service vehicle that is transporting diesel in a quantity of 3,785 liters (1,000 gallons) or less and that is clearly marked with a “flammable” or “combustible” placard, as appropriate. FMCSA adds a new paragraph (i) to § 383.3 to reflect this exemption. Note that if a State exercises this discretion, a driver may still be required to obtain a hazardous materials endorsement if they travel to a State that has not opted to waive the requirement.

IV. This Final Rule

This rule adopts as final certain regulations required by the FAST Act. These statutory changes went into effect retroactively on October 1, 2015. Because adoption of these rules is a nondiscretionary, ministerial action, FMCSA did not issue an NPRM or receive public comment.

V. Section-by-Section Analysis

A. Part 365

In § 365.101, paragraph (j) is added to exempt pipeline welding trucks from the rules of part 365.

B. Part 381

In § 381.300, paragraph (b) is revised, changing the timeframe from 2 years to 5 years.

Section 381.317 is added to allow an application for exemption to be resubmitted if it has been denied.

C. Part 383

In § 383.3, a new paragraph (i) is added to provide that a State may waive the requirement that a driver obtain a hazardous materials endorsement to transport diesel fuel under certain circumstances.

D. Part 390

FMCSA adds new § 390.38 to exempt pipeline welding trucks from certain requirements of the FMCSRs. Paragraph (a) describes those parts of the FMCSRs from which the pipeline welding truck is exempt. Paragraph (b) provides a definition of “pipeline welding truck.”

In § 390.39, paragraph (b)(1) is revised to reflect changes in the statutes concerning exemptions found in State laws for covered farm vehicles.

E. Part 391

In § 391.2, paragraph (e) is added to exempt drivers of pipeline welding trucks from the rules of part 391.

F. Part 392

In § 392.1, the existing text is designated as paragraph (a), and a paragraph (b) is added to exempt drivers of pipeline welding trucks from the rules of part 392.

G. Part 393

In § 393.1, paragraph (e) is added to exempt pipeline welding trucks from the rules of part 393.

H. Part 395

FMCSA makes a number of changes to § 395.1 to exempt certain operations from aspects of the hours of service rules. Paragraph (e)(1) is changed to provide that drivers of ready-mixed concrete delivery vehicles who are on duty for 14 consecutive hours may be exempt from the requirements of § 395.8.

Section 395.1(t) is added to allow the driver of a ready-mixed concrete delivery vehicle to use 30-minutes or more of time spent waiting with the vehicle to meet the requirement for the 30-minute rest break in § 395.3(a)(3)(ii). Paragraphs (u) and (v) are added to exempt drivers engaged in the interstate transportation of bees or livestock, respectively, from the requirement for a 30-minute rest break. FMCSA adds paragraph (w) to provide that on-duty time for the driver of a hi-rail vehicle does not include time in transportation to or from a duty assignment under certain circumstances. Paragraph (x) exempts drivers of pipeline welding trucks from the rules of part 395.

The definitions in § 395.2 are changed to conform to the changes in the statutes. FMCSA adds definitions of “hi-rail vehicle,” “livestock,” and “ready-mixed concrete delivery vehicle.” FMCSA changes the definition of “transportation of construction material and equipment” to increase the air mile radius to the normal work reporting location. The definition is also changed to allow the States to establish a different air mile radius limitation upon notice to the Administrator.

Section 395.8(a) is changed to allow a motor carrier to require the driver transporting a motor home or recreation vehicle trailer, in a driveaway-towaway operation, to record his or her records of duty status manually.

I. Part 396

In § 396.1, paragraph (d) is added to exempt pipeline welding trucks from the rules of part 396.

VI. Rulemaking Analyses

Executive Order 12866 (Regulatory Planning and Review and DOT Regulatory Policies and Procedures as Supplemented by E.O. 13563)

FMCSA has determined this final rule is not a significant regulatory action within the meaning of Executive Order (E.O.) 12866, as supplemented by E.O. 13563 (76 FR 3821, January 21, 2011),

and is also not significant within the meaning of DOT regulatory policies and procedures (44 FR 11034, February 26, 1979). As explained above, this final rule is strictly ministerial in that it incorporates nondiscretionary statutory requirements. These statutory changes went into effect retroactively on October 1, 2015. The regulatory changes included in this rule are necessary to make FMCSA’s regulations consistent with the FAST Act and their economic impact will not exceed the \$100 million annual threshold. Any costs associated with this action are attributable to the non-discretionary statutory provisions. This final rule is not expected to generate substantial congressional or public interest. Therefore, a full regulatory impact analysis has not been conducted nor has there been a review by the Office of Management and Budget (OMB).

Although a full regulatory evaluation is unnecessary because of the low economic impact of this rulemaking, FMCSA analyzed the cost impact of the FAST Act provisions implemented by this final rule. This rule’s provisions generally provided exemptions to FMCSA regulations and should ease the economic burden on regulated entities. The impacts of these provisions should be small and affect a small number of individuals and businesses.

Regulatory Flexibility Act

Pursuant to the Regulatory Flexibility Act (RFA) of 1980 (5 U.S.C. 601 *et seq.*), as amended by the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121, 110 Stat. 857), FMCSA is not required to prepare a final regulatory flexibility analysis under 5 U.S.C. 604(a) for this final rule because the Agency has not issued a notice of proposed rulemaking prior to this action. FMCSA has determined that it has good cause to adopt the rule without notice and comment.

Assistance for Small Entities

In accordance with section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996, FMCSA wants to assist small entities in understanding this rule so that they can better evaluate its effects on themselves and participate in the rulemaking initiative. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please consult the FMCSA point of contact, Kathryn Sinniger, listed in the **FOR FURTHER INFORMATION CONTACT** section of this rule.

Small businesses may send comments on the actions of Federal employees who enforce or otherwise determine compliance with Federal regulations to the SBA’s Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency’s responsiveness to small business. If you wish to comment on actions by employees of FMCSA, call 1–888–REG–FAIR (1–888–734–3247). DOT has a policy ensuring the rights of small entities to regulatory enforcement fairness and an explicit policy against retaliation for exercising these rights.

Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of \$155 million (which is the value equivalent of \$100,000,000 in 1995, adjusted for inflation to 2014 levels) or more in any 1 year. Though this final rule will not result in such an expenditure, the Agency does discuss the effects of this rule elsewhere in this preamble.

Paperwork Reduction Act

This final rule calls for no new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520), nor does it revise any existing approved collections of information.

E.O. 13132 (Federalism)

A rule has implications for Federalism under section 1(a) of Executive Order 13132 if it has “substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.”

FMCSA has determined that this rule would not have substantial direct costs on or for States, nor would it limit the policymaking discretion of States. Nothing in this document preempts any State law or regulation. Therefore, this rule does not have sufficient federalism implications to warrant the preparation of a Federalism summary impact statement.

E.O. 12988 (Civil Justice Reform)

This final rule meets applicable standards in sections 3(a) and 3(b)(2) of

E.O. 12988 to minimize litigation, eliminate ambiguity, and reduce burden.

E.O. 13045 (Protection of Children)

E.O. 13045, Protection of Children from Environmental Health Risks and Safety Risks (62 FR 19885, Apr. 23, 1997), requires agencies issuing “economically significant” rules, if the regulation also concerns an environmental health or safety risk that an agency has reason to believe may disproportionately affect children, to include an evaluation of the regulation’s environmental health and safety effects on children. The Agency determined this final rule is not economically significant. Therefore, no analysis of the impacts on children is required. In any event, this regulatory action does not pose an environmental or safety risk that could disproportionately affect children.

E.O. 12630 (Taking of Private Property)

FMCSA reviewed this final rule in accordance with E.O. 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights, and has determined it will not effect a taking of private property or otherwise have takings implications.

Privacy Impact Assessment

Section 522 of title I of division H of the Consolidated Appropriations Act, 2005, enacted December 8, 2004 (Pub. L. 108–447, 118 Stat. 2809, 3268, 5 U.S.C. 552a note), requires the Agency to conduct a privacy impact assessment (PIA) of a regulation that will affect the privacy of individuals. This rule does not require the collection of personally identifiable information (PII), therefore the Agency finds that there will be no impact on the privacy of individuals.

The Privacy Act (5 U.S.C. 552a) applies only to Federal agencies and any non-Federal agency which receives records contained in a system of records from a Federal agency for use in a matching program.

E.O. 12372 (Intergovernmental Review)

The regulations implementing E.O. 12372 regarding intergovernmental consultation on Federal programs and activities do not apply to this action.

E.O. 13211 (Energy Supply, Distribution, or Use)

FMCSA analyzed this action under E.O. 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use. FMCSA determined that it is not a “significant energy action” under that E.O. because it is not economically

significant and is not likely to have an adverse effect on the supply, distribution, or use of energy.

E.O. 13175 (Indian Tribal Governments)

This final rule does not have tribal implications under E.O. 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

National Technology Transfer and Advancement Act (Technical Standards)

The National Technology Transfer and Advancement Act (NTTAA) (15 U.S.C. 272 note) directs agencies to use voluntary consensus standards in their regulatory activities unless the agency provides Congress, through OMB, with an explanation of why using these standards would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards (*e.g.*, specifications of materials, performance, design, or operation; test methods; sampling procedures; and related management systems practices) are standards that are developed or adopted by voluntary consensus standards bodies. This final rule does not use technical standards. Therefore, we did not consider the use of voluntary consensus standards.

National Environmental Policy Act and Clean Air Act

FMCSA analyzed this rule in accordance with the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321, *et seq.*) and FMCSA’s *NEPA Implementing Procedures and Policy for Considering Environmental Impacts*, Order 5610.1 (FMCSA Order), March 1, 2004 (69 FR 9680). FMCSA’s Order states that “[w]here FMCSA has no discretion to withhold or condition an action if the action is taken in accordance with specific statutory criteria and FMCSA lacks control and responsibility over the effects of an action, that action is not subject to this Order.” *Id.* at chapter 1(D). Because Congress specifies the Agency’s precise action here, thus leaving the Agency no discretion over such action, and since the Agency lacks jurisdiction and therefore control and responsibility over the effects of this action, this rulemaking falls under chapter 1(D). Therefore, no further analysis is considered.

In addition to the NEPA requirements to examine impacts on air quality, the Clean Air Act (CAA) as amended (42 U.S.C. 7401, *et seq.*) also requires FMCSA to analyze the potential impact of its actions on air quality and to ensure that FMCSA actions conform to State and local air quality implementation plans. This non-discretionary action is expected to fall within the CAA *de minimis* standards and is not subject to the Environmental Protection Agency’s General Conformity Rule (40 CFR parts 51 and 93).

Additionally, FMCSA evaluated the effects of this final rule in accordance with Executive Order 12898 and determined that there are no environmental justice issues associated with its provisions nor any collective environmental impacts resulting from its promulgation. Environmental justice issues would be raised if there were a “disproportionate” and “high and adverse impact” on minority or low-income populations. This final rule is exempt from analysis under the National Environmental Policy Act. This final rule simply makes ministerial, mandatory changes and would not result in high and adverse environmental impacts.

List of Subjects

49 CFR Part 365

Administrative practice and procedure, Brokers, Buses, Freight forwarders, Maritime carriers, Mexico, Motor Carriers, Moving of household goods.

49 CFR Part 381

Motor carriers.

49 CFR Part 383

Administrative practice and procedure, Alcohol abuse, Drug abuse, Highway safety, Motor carriers.

49 CFR Part 390

Highway safety, Intermodal transportation, Motor carriers, Motor vehicle safety, Reporting and recordkeeping requirements.

49 CFR Part 391

Alcohol abuse, Drug abuse, Drug testing, Highway safety, Motor Carriers, Reporting and recordkeeping requirements, Safety, Transportation.

49 CFR Part 392

Alcohol abuse, Drug abuse, Highway safety, Motor carriers.

49 CFR Part 393

Highway safety, Motor carriers, Motor vehicle safety.

49 CFR Part 395

Highway safety, Motor carriers, Reporting and recordkeeping requirements.

49 CFR Part 396

Highway safety, Motor carriers, Motor vehicle safety, Reporting and recordkeeping requirements.

For the reasons stated in this preamble, FMCSA amends 49 CFR chapter III as set forth below:

PART 365—RULES GOVERNING APPLICATIONS FOR OPERATING AUTHORITY

■ 1. The authority citation for part 365 is revised to read as follows:

Authority: 5 U.S.C. 553 and 559; 49 U.S.C. 13101, 13301, 13901–13906, 14708, 31138, and 31144; sec. 5524 of Pub. L. 114–94, 129 Stat. 1312, 1560; and 49 CFR 1.87.

■ 2. Amend § 365.101 by adding paragraph (j) to read as follows:

§ 365.101 Applications governed by these rules.

* * * * *

(j) The rules in this part do not apply to “pipeline welding trucks” as defined in 49 CFR 390.38(b).

PART 381—WAIVERS, EXEMPTIONS, AND PILOT PROGRAMS

■ 3. The authority citation for part 381 continues to read as follows:

Authority: 49 U.S.C. 31136(e) and 31315; and 49 CFR 1.87.

■ 4. Amend § 381.300 by revising paragraph (b) to read as follows:

§ 381.300 What is an exemption?

* * * * *

(b) An exemption provides the person or class of persons with relief from the regulations for up to 5 years, and may be renewed, upon request, for subsequent 5-year periods.

* * * * *

■ 5. Add § 381.317 to read as follows:

§ 381.317 May I resubmit my application for exemption if it is denied?

If the Administrator denies your application for exemption and you can reasonably address the reasons for denial, you may resubmit your application following the procedures in § 381.310.

PART 383—COMMERCIAL DRIVER’S LICENSE STANDARDS; REQUIREMENTS AND PENALTIES

■ 6. The authority citation for part 383 is revised to read as follows:

Authority: 49 U.S.C. 521, 31136, 31301 et seq., and 31502; secs. 214 and 215 of Pub. L. 106–159, 113 Stat. 1748, 1766, 1767; sec. 1012(b) of Pub. L. 107–56, 115 Stat. 272, 297; sec. 4140 of Pub. L. 109–59, 119 Stat. 1144, 1746; sec. 32934 of Pub. L. 112–141, 126 Stat. 405, 830; sec. 7208 of Pub. L. 114–94, 129 Stat. 1312, 1593; and 49 CFR 1.87.

■ 7. Amend § 383.3 by adding paragraph (i) to read as follows:

§ 383.3 Applicability.

* * * * *

(i) Hazardous materials endorsement exemption for certain drivers transporting diesel.

A State may waive the requirement for a holder of a Class A commercial driver’s license to obtain a hazardous materials endorsement under this part, if the license holder is:

(1) Acting within the scope of the license holder’s employment, and within the State of domicile (or another State with a hazardous materials endorsement exemption) as an employee of a custom harvester operation, agrichemical business, farm retail outlet and supplier, or livestock feeder; and

(2) Operating a service vehicle that is:

(i) Transporting diesel in a quantity of 3,785 liters (1,000 gallons) or less; and

(ii) Clearly marked with a “flammable” or “combustible” placard, as appropriate.

PART 390—FEDERAL MOTOR CARRIER SAFETY REGULATIONS; GENERAL

■ 8. The authority citation for part 390 is revised to read as follows:

Authority: 49 U.S.C. 504, 508, 31132, 31133, 31134, 31136, 31137, 31144, 31151, 31502; sec. 114, Pub. L. 103–311, 108 Stat. 1673, 1677–1678; sec. 212, 217, Pub. L. 106–159, 113 Stat. 1748, 1766, 1767; sec. 229, Pub. L. 106–159 (as transferred by sec. 4114 and amended by secs. 4130–4132, Pub. L. 109–59, 119 Stat. 1144, 1726, 1743–1744); sec. 4136, Pub. L. 109–59, 119 Stat. 1144, 1745; sec. 32101(d) and 32934, Pub. L. 112–141, 126 Stat. 405, 778, 830; sec. 2, Pub. L. 113–125, 128 Stat. 1388; sec. 5403(d), 5518, 5524, Pub. L. 114–94, 129 Stat. 1312, 1548, 1558, 1560; and 49 CFR 1.81, 1.81a and 1.87.

■ 9. Add § 390.38 to read as follows:

§ 390.38 Exemptions for pipeline welding trucks.

(a) Federal requirements. A pipeline welding truck, as defined in paragraph (b) of this section, including the individuals operating such vehicle and the employer of such individual, is exempt from the following:

(1) Any requirement relating to registration as a motor carrier, including the requirement to obtain and display a Department of Transportation number, in 49 CFR part 365 or 390.

(2) Any requirement relating to driver qualifications in 49 CFR part 391.

(3) Any requirement relating to driving of commercial motor vehicles in 49 CFR part 392.

(4) Any requirement relating to parts and accessories and inspection, repair, and maintenance of commercial motor vehicles in 49 CFR parts 393 and 396.

(5) Any requirement relating to hours of service of drivers, including maximum driving and on duty time, found in 49 CFR part 395.

(b) Definition. “Pipeline welding truck” means a motor vehicle that is travelling in the State in which the vehicle is registered or another State, is owned by a welder, is a pick-up style truck, is equipped with a welding rig that is used in the construction or maintenance of pipelines, and has a gross vehicle weight and combination weight rating and weight of 15,000 pounds or less.

■ 10. Amend § 390.39 by revising paragraph (b)(1) to read as follows:

§ 390.39 Exemptions for “covered farm vehicles.”

* * * * *

(b) State requirements—(1) In general. Federal transportation funding to a State may not be terminated, limited, or otherwise interfered with as a result of the State exempting a covered farm vehicle, including the individual operating that vehicle, from—

(i) A requirement described in paragraph (a) of this section; or
(ii) Any other minimum standard provided by a State relating to the operation of that vehicle.

* * * * *

PART 391—QUALIFICATIONS OF DRIVERS AND LONGER COMBINATION VEHICLE (LCV) DRIVER INSTRUCTORS

■ 11. The authority citation for part 391 is revised to read as follows:

Authority: 49 U.S.C. 504, 508, 31133, 31136, 31149, and 31502; sec. 4007(b) of Pub. L. 102–240, 105 Stat. 1914, 2152; sec. 114 of Pub. L. 103–311, 108 Stat. 1673, 1677; sec. 215 of Pub. L. 106–159, 113 Stat. 1748, 1767; sec. 32934 of Pub. L. 112–141, 126 Stat. 405, 830; sec. 5524 of Pub. L. 114–94, 129 Stat. 1312, 1560; and 49 CFR 1.87.

■ 12. Revise § 391.2 by adding paragraph (e) to read as follows:

§ 391.2 General exceptions.

* * * * *

(e) Pipeline welding trucks. The rules in this part do not apply to drivers of “pipeline welding trucks” as defined in 49 CFR 390.38(b).

PART 392—DRIVING OF COMMERCIAL MOTOR VEHICLES

■ 13. The authority citation for part 392 is revised to read as follows:

Authority: 49 U.S.C. 504, 13902, 31136, 31151, 31502; Section 112 of Pub. L. 103–311, 108 Stat. 1673, 1676 (1994), as amended by sec. 32509 of Pub. L. 112–141, 126 Stat. 405, 805 (2012); sec. 5524 of Pub. L. 114–94, 129 Stat. 1312, 1560; and 49 CFR 1.87.

■ 14. Revise § 392.1 by designating the existing text as paragraph (a) and adding paragraph (b) to read as follows:

§ 392.1 Scope of the rules in this part.

* * * * *

(b) The rules in this part do not apply to drivers of “pipeline welding trucks” as defined in 49 CFR 390.38(b).

PART 393—PARTS AND ACCESSORIES NECESSARY FOR SAFE OPERATION

■ 15. The authority citation for part 393 is revised to read as follows:

Authority: 49 U.S.C. 31136, 31151, and 31502; sec. 1041(b) of Pub. L. 102–240, 105 Stat. 1914, 1993 (1991); sec. 5524 of Pub. L. 114–94, 129 Stat. 1312, 1560; and 49 CFR 1.87.

■ 16. Revise § 393.1 by adding paragraph (e) to read as follows:

§ 393.1 Scope of the rules in this part.

* * * * *

(e) The rules in this part do not apply to “pipeline welding trucks” as defined in 49 CFR 390.38(b).

PART 395—HOURS OF SERVICE OF DRIVERS

■ 17. The authority citation for part 395 is revised to read as follows:

Authority: 49 U.S.C. 504, 31133, 31136, 31137, and 31502; sec. 113, Pub. L. 103–311, 108 Stat. 1673, 1676; sec. 229, Pub. L. 106–159 (as transferred by sec. 4115 and amended by secs. 4130–4132, Pub. L. 109–59, 119 Stat. 1144, 1726, 1743, 1744); sec. 4133, Pub. L. 109–59, 119 Stat. 1144, 1744; sec. 108, Pub. L. 110–432, 122 Stat. 4860–4866; sec. 32934, Pub. L. 112–141, 126 Stat. 405, 830; sec. 5206(b) of Pub. L. 114–94, 129 Stat. 1312, 1537; and 49 CFR 1.87.

■ 18. Amend § 395.1 by revising paragraph (e)(1) and adding paragraphs (t), (u), (v), (w), and (x), to read as follows:

§ 395.1 Scope of rules in this part.

* * * * *

(e) *Short-haul operations*—(1) *100 air-mile radius driver*. A driver is exempt from the requirements of § 395.8 if:

(i) The driver operates within a 100 air-mile radius of the normal work reporting location;

(ii)(A) The driver, except a driver-salesperson or a driver of a ready-mixed concrete delivery vehicle, returns to the work reporting location and is released from work within 12 consecutive hours;

(B) The driver of a ready-mixed concrete delivery vehicle returns to the work reporting location and is released from work within 14 consecutive hours;

(iii)(A) A property-carrying commercial motor vehicle driver, except the driver of a ready-mixed concrete delivery vehicle, has at least 10 consecutive hours off duty separating each 12 hours on duty;

(B) A driver of a ready-mixed concrete delivery vehicle has at least 10 consecutive hours off duty separating each 14 hours on duty;

(C) A passenger-carrying commercial motor vehicle driver has at least 8 consecutive hours off duty separating each 12 hours on duty;

(iv)(A) A property-carrying commercial motor vehicle driver, except the driver of a ready-mixed concrete delivery vehicle, does not exceed the maximum driving time specified in § 395.3(a)(3) following 10 consecutive hours off duty; or

(B) A driver of a ready-mixed concrete delivery vehicle does not exceed 11 hours maximum driving time following 10 consecutive hours off duty; or

(C) A passenger-carrying commercial motor vehicle driver does not exceed 10 hours maximum driving time following 8 consecutive hours off duty; and

(v) The motor carrier that employs the driver maintains and retains for a period of 6 months accurate and true time records showing:

(A) The time the driver reports for duty each day;

(B) The total number of hours the driver is on duty each day;

(C) The time the driver is released from duty each day; and

(D) The total time for the preceding 7 days in accordance with § 395.8(j)(2) for drivers used for the first time or intermittently.

* * * * *

(t) *Ready-mixed concrete delivery vehicle*. A driver of a ready-mixed concrete delivery vehicle subject to the requirement for a 30-minute rest break in § 395.3(a)(3)(ii) may use 30-minutes or more of time spent while waiting with the commercial motor vehicle at a job site or terminal to meet the requirement for the 30-minute rest break, providing the driver performs no other work during the break.

(u) *Transport of commercial bees*. The provisions of § 395.3(a)(3)(ii), requiring a 30-minute rest break, do not apply to a driver engaged in the interstate

transportation of bees by commercial motor vehicle as long as the bees are on the vehicle.

(v) *Transport of livestock*. The provisions of § 395.3(a)(3)(ii), requiring a 30-minute rest break, do not apply to a driver engaged in the interstate transportation of livestock by commercial motor vehicle while the livestock are on the vehicle.

(w) *Hi-rail vehicles*. For the driver of a hi-rail vehicle, the maximum on duty time under § 395.3 shall not include time in transportation to or from a duty assignment if such time in transportation—

(1) Does not exceed 2 hours per calendar day or a total of 30 hours per calendar month; and

(2) Is fully and accurately accounted for in records to be maintained by the motor carrier and such records are made available upon request of the Federal Motor Carrier Safety Administration or the Federal Railroad Administration.

(x) *Pipeline welding trucks*. The rules in this part do not apply to drivers of “pipeline welding trucks,” as defined in 49 CFR 390.38(b).

■ 19. Amend § 395.2 by revising the first sentence in the definition of “Transportation of construction materials and equipment” and by adding definitions of “Hi-rail vehicle,” “Livestock,” and “Ready-mixed concrete delivery vehicle,” in alphabetical order, to read as follows:

§ 395.2 Definitions.

* * * * *

Hi-rail vehicle means an internal rail flaw detection vehicle equipped with flange hi-rails.

Livestock means cattle, elk, reindeer, bison, horses, deer, sheep, goats, swine, poultry (including egg-producing poultry), fish used for food, and other animals designated by the Secretary of Agriculture that are part of a foundation herd (including dairy producing cattle) or offspring; or are purchased as part of a normal operation and not to obtain additional benefits under the Emergency Livestock Feed Assistance Act of 1988, as amended.

* * * * *

Ready-mixed concrete delivery vehicle means a vehicle designed to deliver ready-mixed concrete on a daily basis and equipped with a mechanism under which the vehicle’s propulsion engine provides the power to operate a mixer drum to agitate and mix the product en route to the delivery site.

* * * * *

Transportation of construction material and equipment means the transportation of construction and

pavement materials, construction equipment, and construction maintenance vehicles, by a driver to or from an active construction site (a construction site between mobilization of equipment and materials to the site to the final completion of the construction project) within a 75 air mile radius of the normal work reporting location of the driver, except that a State, upon notice to the Administrator, may establish a different air mile radius limitation for purposes of this definition if such limitation is between 50 and 75 air miles and applies only to movements that take place entirely within the State. * * *

* * * * *
■ 20. Amend § 395.8 by revising paragraph (a)(1)(iii)(A) to read as follows.

§ 395.8 Driver's record of duty status.

(a)(1) * * *
(iii)(A) A motor carrier may require a driver to record the driver's duty status manually in accordance with this section, rather than require the use of an ELD, if the driver is operating a commercial motor vehicle:

- (1) In a manner requiring completion of a record of duty status on not more than 8 days within any 30-day period;
(2) In a driveway-towaway operation in which the vehicle being driven is part of the shipment being delivered;
(3) In a driveway-towaway operation in which the vehicle being transported is a motor home or a recreation vehicle trailer; or
(4) That was manufactured before model year 2000.

* * * * *

PART 396—INSPECTION, REPAIR, AND MAINTENANCE

■ 21. The authority citation for part 396 is revised to read as follows:

Authority: 49 U.S.C. 504, 31133, 31136, 31151, and 31502; sec. 32934, Pub. L. 112-141, 126 Stat. 405, 830; sec. 5524 of Pub. L. 114-94, 129 Stat. 1312, 1560; and 49 CFR 1.87.

■ 22. Revise § 396.1 by adding paragraph (d) to read as follows:

§ 396.1 Scope.

* * * * *

(d) The rules in this part do not apply to "pipeline welding trucks" as defined in 49 CFR 390.38(b).

Issued under the authority of delegation in 49 CFR 1.87: July 14, 2016.

T.F. Scott Darling, III, Acting Administrator.

BILLING CODE 4910-EX-P

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

49 CFR Parts 393 and 396 and Appendix G to Subchapter B of Chapter III

[Docket No. FMCSA-2015-0176]

RIN 2126-AB81

Parts and Accessories Necessary for Safe Operation; Inspection, Repair, and Maintenance; General Amendments

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Final rule.

SUMMARY: FMCSA amends the Federal Motor Carrier Safety Regulations (FMCSRs) in response to several petitions for rulemaking from the Commercial Vehicle Safety Alliance (CVSA) and the American Trucking Associations (ATA), and two safety recommendations from the National Transportation Safety Board (NTSB). Specifically, the Agency adds a definition of "major tread groove" and an illustration to indicate the location of tread wear indicators or wear bars on a tire signifying a major tread groove; revises the rear license plate lamp requirement to eliminate the requirement for an operable rear license plate lamp on vehicles when there is no rear license plate present; amends the regulations regarding tires to prohibit the operation of a vehicle with speed-restricted tires at speeds that exceed the rated limit of the tire; provides specific requirements regarding when violations or defects noted on an inspection report must be corrected; amends two appendixes to the FMCSRs to include provisions for the inspection of antilock braking systems (ABS) and automatic brake adjusters, speed-restricted tires, and motorcoach passenger seat mounting anchorages; amends the periodic inspection rules to eliminate the option for a motor carrier to satisfy the annual inspection requirement through a violation-free roadside inspection; and amends the inspector qualification requirements as a result of the amendments to the periodic inspection rules. In addition, the Agency eliminates introductory regulatory text from an appendix to the FMCSRs because the discussion of the differences between the North American Standard Inspection out-of-service criteria and FMCSA's periodic inspection criteria is unnecessary.

DATES: The rule is effective July 22, 2016.

Petitions for Reconsideration of this final rule must be submitted to the FMCSA Administrator no later than August 22, 2016.

FOR FURTHER INFORMATION CONTACT: Mr. Mike Huntley, Vehicle and Roadside Operations Division, Office of Bus and Truck Standards and Operations, Federal Motor Carrier Safety Administration, telephone: 202-366-5370; michael.huntley@dot.gov.

If you have questions on viewing or submitting material to the docket, contact Docket Services, telephone (202) 366-9826.

SUPPLEMENTARY INFORMATION:

I. Rulemaking Documents

A. Availability of Rulemaking Documents

For access to docket FMCSA-2015-0176 to read background documents and comments received, go to http://www.regulations.gov at any time, or to Docket Services at U.S. Department of Transportation, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

B. Privacy Act

In accordance with 5 U.S.C. 553(c), DOT accepts comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to www.regulations.gov, as described in the system of records notice (DOT/ALL-14 FDMS), which can be reviewed at www.dot.gov/privacy.

II. Executive Summary

FMCSA is responsible for regulations to ensure that all commercial motor vehicles (CMVs) are systematically inspected, repaired, and maintained and that all parts and accessories necessary for the safe operation of CMVs are in safe and proper operating condition at all times. In response to several petitions for rulemaking from CVSA and ATA and two safety recommendations from the NTSB, FMCSA amends various provisions in parts 393 and 396 of the FMCSRs. The amendments generally do not involve the establishment of new or more stringent requirements, but instead clarify existing requirements to increase consistency of enforcement activities, and therefore the economic impact of these changes is negligible.

Specifically, the Agency (1) adds a definition of "major tread groove" in § 393.5 and an illustration in § 393.75 to

indicate the location of tread wear indicators or wear bars on a tire signifying a major tread groove; (2) revises the rear license plate lamp requirement to eliminate the requirement in Table 1 of § 393.11 for vehicles to have an operable rear license plate lamp when there is no rear license plate present; (3) amends the regulations regarding tires to prohibit the operation of a vehicle with speed-restricted tires at speeds that exceed the rated limit of the tire; (4) clarifies § 396.9 regarding when violations or defects noted on a roadside inspection report need to be corrected; (5) amends Appendix G to the FMCSRs, “Minimum Periodic Inspection Standards,” to include provisions for the inspection of ABS and automatic brake adjusters, speed-restricted tires, and motorcoach passenger seat mounting anchorages; (6) amends § 396.17(f) and removes § 396.23(a) to eliminate the option for a motor carrier to meet the periodic inspection requirements through roadside inspections; and (7) amends § 396.19(b) regarding inspector qualifications as a result of the amendments to § 396.17(f) described above. In addition, the Agency eliminates as unnecessary a portion of Appendix G to the FMCSRs that describes the differences between the out-of-service criteria and FMCSA’s annual inspection requirement. Elsewhere in today’s issue of the **Federal Register**, FMCSA amends certain regulatory guidance to ensure consistency between the FMCSRs, as amended by this final rule, and the published guidance.

III. Legal Basis for the Rulemaking

This rulemaking is based on the authority of the Motor Carrier Act of 1935 [1935 Act] and the Motor Carrier Safety Act of 1984 [1984 Act].

The 1935 Act, as amended, provides that “[t]he Secretary of Transportation may prescribe requirements for—(1) qualifications and maximum hours of service of employees of, and safety of operation and equipment of, a motor carrier; and (2) qualifications and maximum hours of service of employees of, and standards of equipment of, a private motor carrier, when needed to promote safety of operation” (49 U.S.C. 31502(b)).

This final rule amends the FMCSRs in response to several petitions for rulemaking. The adoption and enforcement of such rules is specifically authorized by the 1935 Act. This rulemaking rests squarely on that authority.

The 1984 Act provides concurrent authority to regulate drivers, motor carriers, and vehicle equipment. It

requires the Secretary to “prescribe regulations on commercial motor vehicle safety.” The regulations shall prescribe minimum safety standards for CMVs. At a minimum, the regulations shall ensure that: (1) CMVs are maintained, equipped, loaded, and operated safely; (2) the responsibilities imposed on operators of CMVs do not impair their ability to operate the vehicles safely; (3) the physical condition of operators of CMVs is adequate to enable them to operate vehicles safely; (4) the operation of CMVs does not have a deleterious effect on the physical condition of the operators; and (5) drivers are not coerced by motor carriers, shippers, receivers, or transportation intermediaries to operate a vehicle in violation of a regulation promulgated under 49 U.S.C. 31136 or 49 U.S.C. chapters 51 or 313 (49 U.S.C. 31136(a)).

This final rule concerns (1) parts and accessories necessary for the safe operation of CMVs, and (2) the inspection, repair, and maintenance of CMVs. It is based primarily on section 31136(a)(1) and (2), and secondarily on section 31136(a)(4). This rulemaking ensures that CMVs are maintained, equipped, loaded, and operated safely by requiring certain vehicle components, systems, and equipment to meet minimum standards such that the mechanical condition of the vehicle is not likely to cause a crash or breakdown. Section 31136(a)(3) is not applicable because this rulemaking does not deal with driver qualification standards. Because the amendments are primarily technical changes that clarify existing requirements and improve enforcement consistency, FMCSA believes they will be welcomed by motor carriers and drivers alike and that coercion to violate them will not be an issue.

Before prescribing any such regulations, FMCSA must consider the “costs and benefits” of any proposal (49 U.S.C. 31136(c)(2)(A) and 31502(d)). As discussed in greater detail in the “Regulatory Analyses” section, FMCSA determined that this final rule is not a significant regulatory action. The economic impact is negligible because the amendments generally do not involve the adoption of new or more stringent requirements, but rather the clarification of existing requirements. As such, the costs of the final rule do not approach the \$100 million annual threshold for economic significance.

IV. Background

On October 7, 2015, FMCSA published a notice of proposed rulemaking (NPRM) in the **Federal**

Register titled Parts and Accessories Necessary for Safe Operation; Inspection, Repair, and Maintenance; General Amendments (80 FR 60592). FMCSA received 16 comments on the NPRM.

V. Summary of the NPRM

FMCSA proposed to amend § 393.5 to define “major tread groove” as “The space between two adjacent tread ribs or lugs on a tire that contains a tread wear indicator or wear bar. (In most cases, the locations of tread wear indicators are designated on the upper sidewall/shoulder of the tire on original tread tires.)” In addition, FMCSA proposed adding an illustration to § 393.75 to indicate the location of tread wear indicators or wear bars signifying a major tread groove. FMCSA agreed that uniformity and consistency in enforcement and maintenance is critical. By including a definition of “major tread groove” in § 393.5—a term that is currently included in the regulatory text of § 393.75(b) and (c), but not specifically defined—and a corresponding illustration in § 393.75, the Agency expects increased consistency in the application and citation of § 393.75 during roadside inspections.

FMCSA proposed to amend Footnote 11 to Table 1 of § 393.11 to indicate that “No rear license plate lamp is required on truck tractors registered in States that do not require tractors to display a rear license plate.” As noted in both the National Highway Traffic Safety Administration’s (NHTSA) Federal Motor Vehicle Safety Standard (FMVSS) No. 108 and the FMCSRs, the only function of the rear license plate lamp is to illuminate the rear license plate. FMCSA agreed with ATA that if a truck tractor is not required to display a rear license plate, then there is no corresponding safety need for a functioning rear license plate light.

FMCSA proposed to amend Appendix G to include a review of ABS and automatic brake adjusters and brake adjustment indicators to maintain consistency between part 393 and Appendix G. FMCSA agreed that the failure of a motor carrier to properly maintain an important safety technology such as ABS should result in the vehicle failing the periodic inspection. Although CVSA did not mention automatic brake adjusters and brake adjustment indicators in its petition to amend Appendix G, FMCSA proposed changes in Appendix G relating to these brake components to ensure that vehicles may not pass the periodic inspection without this important safety equipment.

To clarify the intent of § 396.9(d)(2), FMCSA proposed to amend that section by including a specific cross reference to § 396.11(a)(3). Section 396.11(a)(3) makes it clear that all defects and deficiencies discovered by or reported to a driver—including those identified during a roadside inspection conducted under the authority of § 396.9—must be corrected (or a certification must be provided stating that repair is unnecessary) before a vehicle is operated each day. However, the Agency agreed that the language of § 396.9(d)(2) is not as explicit as it could be, and could lead to uncertainty and/or inconsistency in both the enforcement community and the motor carrier industry regarding when violations and defects noted on roadside inspection reports need to be corrected.

FMCSA proposed to amend § 396.17(f) to remove the words “roadside or” from the current regulatory text. The proposed amendment would eliminate any uncertainties and make clear that a roadside inspection is not equivalent to the periodic/annual inspection required under § 396.17. FMCSA does not believe it is appropriate to continue to allow carriers relief from this responsibility by using a roadside inspection conducted by enforcement officials to meet the periodic inspection requirement. Motor carriers will now be responsible for ensuring the completion of a periodic inspection irrespective of whether a roadside inspection is performed, and amending the regulations will require them to do so at least once every 12 months, irrespective of whether a roadside inspection is performed during that period.

In light of the proposed amendments to § 396.17(f), and to further decrease the possibility of confusion regarding differing requirements of the roadside inspection program and the periodic/annual inspection program, FMCSA proposed to delete the section at the end of Appendix G titled “*Comparison of Appendix G, and the new North American Uniform Driver-Vehicle Inspection Procedure (North American Commercial Vehicle Critical Safety Inspection Items and Out-Of-Service Criteria)*. . .”

Consistent with the proposed amendments to § 396.17, FMCSA also proposed to amend § 396.19(b) by deleting language regarding a “random roadside inspection program.”

FMCSA proposed to add language to section 10 of Appendix G that would prohibit the use of speed-restricted tires on CMVs subject to the FMCSRs unless the use of such tires is specifically designated by the motor carrier. FMCSA

agreed that speed-restricted tires should not be used on CMVs operating on highways in excess of 55 mph for extended periods of time.

FMCSA proposed to add a new section to Appendix G that would require an examination of motorcoach seats during the conduct of a periodic inspection in accordance with § 396.17 to ensure that they are securely attached to the vehicle structure. However, given the wide range of seat anchorage designs, coupled with the lack of testing requirements specifically for seat anchorage strength in the FMVSSs, it is not practicable for FMCSA to develop a detailed methodology for the inspection of motorcoach passenger seat mounting anchorages.

VI. Comment Response

In response to the NPRM, the Agency received 16 comments from two motor carriers (Capitol Bus Lines and Southern Company), eight organizations (the Advocates for Highway and Auto Safety (Advocates), the American Bus Association (ABA), ATA, CVSA, the National Automobile Dealers Association (NADA), the Owner-Operator Independent Drivers Association (OOIDA)), the Rubber Manufacturers Association (RMA), and the Transportation Safety Equipment Institute (TSEI), and six individuals (Steve Bixler, Jim Bramm, Richard Crawford, Richard Pingel, Robert Spoon, and Miles Verhoef).

Discussion of Issues

Section 393.5, Definition of “Major Tread Groove.”

Comments: RMA supported adding a definition for “major tread groove,” but recommended that “major tread groove” be defined as “the full depth space between two adjacent tread ribs or lugs on a tire that repeats along the circumference and/or at an angle across the tread area and contains a tread wear indicator. (In most cases, the locations of tread wear indicators are designated on the upper sidewall or shoulder of the tire on original tread tires.)” In addition, RMA noted that new tire tread designs feature tread grooves that are “hidden” on a new tire, but that appear and deepen and/or widen as the tire tread wears. RMA states that in most cases, the locations of tread wear indicators are designated on the tire’s upper sidewall/shoulder, but that those markings are voluntary and not required by the Federal Motor Vehicle Safety Standards (FMVSS).

FMCSA Response: FMCSA believes that the definition proposed in the NPRM is sufficiently clear. The

language provided by RMA added complexity without clarifying the language proposed by FMCSA. While the preamble to the NPRM stated that an illustration would be added to § 393.75 to indicate the location of tread wear indicators or wear bars on a tire signifying a major tread groove, and FMCSA included a proposed illustration in the preamble, the illustration inadvertently was not included in the proposed regulatory changes. FMCSA did not receive any comments regarding the illustration, and adds it to § 393.75 as discussed in the NPRM. We anticipate that inclusion of the illustration will further enhance clarity of the regulatory language.

Table 1 to § 393.11, License Plate Lights

Comments: Jim Bramm, CVSA, and NADA recommended that the exception for vehicles not required to have a rear license plate light be extended to apply to all types of CMVs, and not be limited to truck tractors as proposed in the NPRM. Mr. Bramm stated “Our company’s corporate office is located in Wisconsin and the majority of our commercial motor vehicles are registered in this state. When registering a vehicle for an apportioned plate you have the ability in this state to not only register truck tractors but other types of commercial vehicles such as dump trucks and pickup trucks. Wisconsin law states only 1 plate will be issued for apportioned registered vehicles and that plate is to be affixed to the front. Therefore I believe the wording should remain as petitioned by the ATA so that the regulation would apply to any commercial vehicle not just truck tractors.”

OOIDA stated “. . . state inspectors do not have the authority to write up violations of rules that their state has not adopted. Therefore, inspectors from states that do not require rear license plates (or illumination) do not have the authority to find violations for failing to illuminate a license plate. Nor may such enforcement officials use their observation of lack of a license plate (or illumination) as probable cause to stop a truck for inspection. They only have the authority to use probable cause that there is a violation of their own state law.” In addition, OOIDA noted that FMCSA “should consider what role the requirement for a license plate light plays in highway safety. The requirements for conspicuity systems clearly address night time visibility in a manner which far exceeds a license plate light. The role of a license plate light in vehicle safety should be explained and justified by FMCSA or dropped from the requirements.”

FMCSA Response: FMVSS No. 108, “Lamps, reflective devices, and associated equipment” (incorporated by reference in section 393.11 of the FMCSRs), specifies comprehensive requirements to enhance the conspicuity of all motor vehicles, including CMVs, on the public roads so that their presence is perceived and their signals understood, both in daylight and in darkness or other conditions of reduced visibility. While NHTSA has required license plate lamps on all vehicles since 1968, license plate lamps are not intended to enhance safety in a manner similar to the other required lamps and conspicuity treatments, and eliminating the requirement for a rear license plate lamp when no license plate is required will not reduce safety to the motoring public.

FMCSA agrees with the commenters that any regulatory changes to the requirements for license plate lamps should apply to all CMVs, and not just truck tractors as proposed in the NPRM. However, if adopted, the proposed regulatory changes would have required roadside enforcement officials in each State to know the license plate display requirements of every other State. FMCSA believes that enforcement of the license plate lamp requirement can be simplified—without compromising safety—by requiring an operable rear license plate lamp only when there is a license plate present at the time of inspection. FMCSA believes that this approach will simplify enforcement and avoid enforcement confusion and inconsistency that would likely result from the State-by-State approach outlined in the NPRM. FMCSA does not expect drivers and/or motor carriers to remove license plates to avoid citations in the event that a rear license plate lamp is missing or inoperative, and if they do, they will be subject to the more severe penalties associated with not displaying a license plate when required by law.

In response to OOIDA’s concerns about the authority of an inspector to enforce regulations adopted by another State that the inspector’s state has not similarly adopted, FMCSA notes that under the Motor Carrier Safety Assistance Program (MCSAP), each State is required to adopt regulations that are compatible with the FMCSRs within 3 years as a condition of receiving Federal grant funding. As such, each State will be required to adopt a regulation consistent with today’s final rule requiring an operable rear license plate lamp only when there is a rear license plate present, eliminating the possibility of inconsistent State regulations.

Appendix G to the FMCSRs—ABS

Comments: CVSA supports the proposed language adding ABS to Appendix G but recommended a number of additions, corrections, and clarifications. First, CVSA states that the effective date for ABS regarding hydraulic-braked vehicles should be September 1, 1999, and not March 1, 1999, as stated in the NPRM. CVSA notes that while NHTSA originally proposed a March 1, 1999, compliance date, NHTSA later granted a petition extending the deadline to September 1, 1999. Second, CVSA recommends the addition of a second footnote to clarify that certain power units have two ABS malfunction indicators—one for the power unit and one for the towed unit(s)—and that both need to be fully functional. Third, CVSA notes that ABS powered by a backup power source (*i.e.*, the backup power from the brake lamp circuit) is not compliant with FMVSS No. 121. As such, CVSA recommends that subparagraph (2) of the proposed Appendix G requirements for ABS be amended to specifically state “ABS malfunction indicator that does not illuminate when power is first applied to the ABS controller (ECU) *during initial power up.*” Fourth, CVSA recommends adding two subparagraphs under the proposed ABS requirements in Appendix G to address FMVSS No. 121 requirements that (1) a power unit manufactured with ABS supply continuous power to the trailer, and (2) the stoplight switch power the trailer ABS system if the continuous power from the towing vehicle is interrupted.

CVSA agrees with FMCSA’s proposal to add requirements for automatic brake adjusters to Appendix G, but noted that FMCSA failed to include proposed regulatory text for automatic brake adjusters in the NPRM. In its comments, CVSA (1) provided suggested language for inclusion in Appendix G, and (2) recommended use of the term “self-adjusting brake adjusters” as opposed to “automatic brake adjusters.”

CVSA and Southern Company opposed the need to include requirements for brake adjustment indicators in Appendix G. CVSA states “. . . the requirement is not necessary or practical. If all brakes are in proper adjustment during the inspection, the indicators (pushrod markings) will not be visible and checking for their presence would require disassembly of or a major adjustment/readjustment of the brakes, which is not advisable. To our knowledge, the likelihood of finding a vehicle without pushrod markings is extremely low.” Southern Company states that “Over the last 20 years the

industry has adopted automatic slack adjusters, alleviating the concerns which lead to the brake adjustment indicators,” and “This technology [brake adjustment indicators] has proven to be ineffective. After a very short time frame, the tape or plastic wears off and is no longer visible,” and “Manufacturers no longer install the brake adjustment indicator.”

FMCSA Response: CVSA is correct in noting that NHTSA had extended the compliance date for ABS on hydraulic-braked vehicles from March 1, 1999, to September 1, 1999, but that action was limited to an extension of the malfunction indicator lamp requirement in S5.3.3(b) of FMVSS No. 105 (64 FR 9446, February 26, 1999)—and not for the general requirement to equip hydraulic-braked vehicles with ABS. As such, all hydraulic-braked vehicles were still expected to be equipped with ABS effective March 1, 1999. As subparagraphs (1)—(3) under the ABS section in Appendix G refer specifically to the malfunction indicator, FMCSA amends footnote (1) to that section to reflect the September 1, 1999, compliance date for hydraulic-braked vehicles. In addition, FMCSA clarifies that footnote (1) applies only to subparagraphs (1)—(3) of the ABS section, and not to subparagraph (4) which addresses “other missing or inoperative ABS components.” Further, FMCSA agrees with CVSA’s other largely editorial recommended changes to the ABS section in Appendix G and adopts those changes as suggested.

Automatic brake adjusters automatically maintain proper brake adjustment, thus eliminating the need for frequent inspection and manual adjustment of the brakes. CVSA correctly notes that while FMCSA discussed the intent to include requirements for automatic brake adjusters in Appendix G in the preamble to the NPRM, the Agency did not provide corresponding proposed regulatory text in the NPRM. The omission of proposed regulatory text in the NPRM was inadvertent. The language recommended by CVSA in its comments is accurate and complete, and properly complements the requirements for automatic brake adjusters in FMVSS Nos. 105 and 121 that need to be included in Appendix G. FMCSA amends Appendix G to include requirements for automatic brake adjusters as suggested. With respect to CVSA’s recommendation to use the term “self-adjusting brake adjusters” as opposed to “automatic brake adjusters,” FMCSA retains the terminology “automatic brake adjusters” to maintain consistency with existing regulatory

language in both the FMVSSs and the FMCSRs.

FMCSA discussed its intent to add requirements in Appendix G for brake adjustment indicators in the preamble to the NPRM, but did not provide corresponding proposed regulatory text. Brake adjustment indicators can improve brake adjustment by increasing the convenience of checking brake adjusters and their proper functioning. A brake adjustment indicator can reduce the time needed to assess brake adjustment status by providing a visible indication of pushrod stroke as opposed to physically measuring the push rod length before and during brake application.

While brake adjustment indicators can simplify brake inspection, CVSA is correct in noting that if brakes are in proper adjustment during an inspection, the indicators will not be visible. In this case, an inspector would have to either disassemble the brake (unhook the clevis from the slack adjuster and pull out the pushrod), or back the brakes off until they are out of adjustment to confirm that the indicators are present. Further, although both the FMVSSs and the FMCSRs require brake adjustment indicators, FMCSA understands that virtually all evaluations of brake adjustment—both during roadside inspections and periodic inspections—are made by physically measuring pushrod length before and during brake application, and that very few inspections rely solely on brake adjustment indicators. Based on the above, FMCSA has not included any specific requirements for brake adjustment indicators in Appendix G.

Section 396.9, Inspection of Motor Vehicles and Intermodal Equipment in Operation

Comments: FMCSA did not receive any comments on § 396.9(d)(2) and amends as proposed.

FMCSA also requested comments regarding whether the current 15-day requirement in § 396.9(d)(3) for motor carriers to certify that all violations have been corrected by completing and returning the roadside inspection form to the issuing agency remains appropriate, or whether a different time period should be considered. CVSA, OOIDA, and Advocates stated that the 15-day requirement is appropriate. ABA and Capitol Bus Lines noted that, in limited circumstances, the 15-day requirement may not be sufficient when replacement parts are not readily available to conduct repairs, either because the parts need to be ordered from a different country or because the

replacement parts are no longer available for older buses.

FMCSA Response: FMCSA believes that, in most cases, repairs can be made and certification of those repairs can be sent within the current 15-day time period specified in the FMCSRs. In instances where a motor carrier can demonstrate that extenuating circumstances (such as those described in the ABA and Capitol Bus Lines comments) preclude repairs from being completed and certified within the 15-day time period specified, FMCSA will address those circumstances on a case-by-case basis. However, FMCSA does not believe that the 15-day requirement in § 396.9(d)(3) for motor carriers to certify that all violations have been corrected by completing and returning the roadside inspection form to the issuing agency needs to be amended at this time.

Section 396.17, Periodic Inspection

CVSA agreed with the proposed changes, but also recommended additional changes to § 396.17 to make it clear that inspections conducted by FMCSA inspectors, investigators, and safety auditors are not equivalent to required periodic inspections. Capitol Bus Lines and ABA commented that, while several States permit motor carriers to self-certify the conduct and completion of the annual inspections required under § 396.17, other States that have implemented mandatory annual inspection programs refuse to accept the “self-certified” annual inspections conducted by the motor carrier as “legitimate annual inspections.” ATA commented that “The basis for . . . this rule change appears to be . . . a change in agency philosophy rather than . . . data or factual evidence. ATA has great difficulty supporting a national policy change of this magnitude without factual evidence showing an enhanced safety benefit from this change.”

Four members of OOIDA—Steve Bixler, Richard Pingel, Robert Spoon, and Miles Verhoef—submitted nearly identical comments stating that (1) they “have never seen a copy of how roadside truck inspections are supposed to be conducted;” (2) they “have never seen a copy of CVSA’s out of service criteria;” (3) “If FMCSA were to publish roadside inspection and out-of-service criteria standards and procedures, it would help me know what parts of my equipment FMCSA and CVSA think I should focus on in between my periodic inspections;” and (4) “It is my right under the Constitution to be told the scope of any government search of me or my truck.”

OOIDA stated that, “Where the Notice begins to discuss roadside inspection standards and the Commercial Vehicle Safety Alliance’s out-of-service criteria however, the Notice is woefully deficient in informing the public what exactly these standards are. It appears that CVSA has proposed, and FMCSA consented, to proposals that remove all references to roadside inspections and the content of the out-of-service criteria in the rules. Without making those standards public, FMCSA has not given the public an adequate opportunity to comment on its proposal. If there is any imperative upon FMCSA to deal with roadside inspections and the out-of-service criteria differently than it does now, that imperative is to give the regulated public notice of their contents and scope.” OOIDA also asked numerous, more specific questions relating to the general concerns noted above.

FMCSA Response: Today, the overwhelming majority of the approximately 3.5 million roadside inspections of CMVs performed annually in the United States are conducted by State personnel using funding provided under the MCSAP.

The scope of a roadside inspection conducted under the North American Standard (NAS) Inspection is quite comprehensive, and covers both (1) critical vehicle inspection items (brake systems; cargo securement; coupling devices; driveline/driveshaft; exhaust systems; frames; fuel systems; lighting devices; steering mechanisms; suspensions; tires; van and open-top trailer bodies; wheels, rims and hubs; windshield wipers; and emergency exits, electrical cables and systems in engine and battery compartments; and seating on passenger-carrying vehicles), and (2) other parts and accessories required under part 393.

However, while a roadside inspection conducted under the NAS Inspection is far-reaching, there are certain limitations to roadside procedures that prevent inspectors from properly examining all of the items in Appendix G. These include, but are not necessarily limited to, the following:

- *Brake linings and pads and brake drums or rotors:* Inspectors cannot remove wheels or dust shields; only visible components can be examined at roadside.
- *Hydraulic brakes:* Inspectors cannot disassemble components; only visible components can be examined at roadside.
- *Fifth wheels, pintle hooks:* Combination vehicles are not typically decoupled to view upper and lower fifth wheel assemblies and other coupler

assemblies; only visible components can be examined at roadside.

- *Tires:* Low boy, car hauler, and other low profile or tight clearance vehicles, and dual tire sets have limited access to the entire tire circumference without wheel removal; only visible components can be examined at roadside.

- *Wheels and rims:* Dual wheel sets may have limited access to inside wheel visibility; only visible components can be examined at roadside.

Because not every element of Appendix G is reviewed/inspected during a roadside inspection conducted under the NAS Inspection, most roadside inspections do not meet the periodic (annual) inspection requirements under § 396.17. For this reason, FMCSA does not believe it is appropriate to continue to allow motor carriers to use roadside inspections conducted by enforcement officials to satisfy the annual inspection requirements in § 396.17(f). Motor carriers or their agents will now be required to complete a periodic inspection of every CMV under its control in accordance with Appendix G at least once every 12 months, irrespective of whether a roadside inspection is performed, unless the vehicle is subject to a mandatory State inspection program in accordance with § 396.23(b)(1) which has been determined to be as effective as the requirements of § 396.17.

Section 396.23, Equivalent to periodic inspection, currently outlines two options that are deemed to be equivalent to the periodic inspections required under § 396.17—a roadside inspection program of a State or other jurisdiction, or a mandatory State inspection program which has been determined to be as effective as the Federal requirements. FMCSA did not propose any amendments to § 396.23 in the NPRM. However, and given the amendments to § 396.17(f) discussed above, it is also necessary to remove § 396.23(a) to ensure that the FMCSRs are consistent regarding the determination that a roadside inspection will no longer be considered as meeting the periodic inspection requirements of § 396.17.

In response to the specific comments to the October 2015 NPRM:

FMCSA agrees that inspections conducted by FMCSA inspectors, investigators, and safety auditors are not equivalent to required periodic inspections, and corresponding changes have been made to § 396.17, as suggested by CVSA.

In response to the comments from Capitol Bus Lines and ABA, FMCSA

notes that if a motor carrier is located in a State that permits motor carriers to self-certify the conduct and completion of the annual inspections required under § 396.17, section 210 of the Motor Carrier Safety Act of 1984 (49 U.S.C. 31142) establishes the principle that State inspections meeting federally approved criteria must be recognized by every other State. If, as Capitol Bus Lines and ABA contend, States that have implemented mandatory annual inspection programs refuse to accept the “self-certified” annual inspections conducted by motor carriers in other States as legitimate annual inspections, aggrieved motor carriers are encouraged to contact the FMCSA Division Administrator in their State for assistance. FMCSA notes that States may require additional inspections as a condition of issuing some type of permit or license, but additional inspections cannot be required otherwise.

While ATA argued that FMCSA failed to provide “factual evidence” to show an “enhanced safety benefit” of the proposed change, FMCSA has clearly shown that current roadside inspections conducted under the NAS Inspection do not examine every component listed in Appendix G. As such, roadside inspections conducted using the NAS Inspection procedures cannot be considered as meeting the annual inspection requirements of § 396.17. While FMCSA does not track the number of motor carriers that use a violation-free roadside inspection to meet the periodic inspection requirement or the number of roadside inspections so used, the Agency has reason to believe these numbers are small. Roadside inspections are not “scheduled” inspections, and a motor carrier therefore cannot plan to defer its periodic inspections until roadside inspections are conducted. OOIDA also commented that it “is not aware of any truck owners who have used a roadside inspection to comply with the periodic inspection requirement.” Given that the estimated number of roadside inspections used to meet the periodic inspection requirement is very small, today’s rule will not significantly affect carriers who relied on such inspections in the past, nor will the number of motor carrier inspection personnel and facilities now needed to perform Appendix G periodic inspections be significantly increased. Eliminating the possibility that roadside inspections can be used as equivalent to periodic inspections in the future will only enhance safety.

In response to the comments from OOIDA members Bixler, Pingel, Spoon, and Verhoef, FMCSA reiterates that all

parts and accessories specified in part 393, as well as any additional parts and accessories as allowed by § 393.3, are required to be in safe and proper operating condition at all times. As such, any and all components of a CMV are subject to examination during a roadside inspection, regardless of whether those components are included in any inspection procedure or the CVSA Out-of-Service Criteria (OOSC). Importantly, the amendments made in today’s rule do not have anything to do with the OOSC, which are simply a set of enforcement tolerances used by inspectors in determining whether violations discovered during an inspection pose such serious safety risks that they must be corrected immediately before the vehicle is allowed to continue. OOIDA’s tangential argument that the scope of a search—its characterization of roadside inspections—“must be widely published in advance so that the regulated parties have notice of it” and that the CVSA OOSC do not meet that standard, is misguided. The Federal courts have long recognized that “[t]he CVSA’s OOSC are not themselves *federal* rules subject to our review Rather, the OOSC merely interpret the standards set forth in existing *federal* and state laws and regulations. . . . [T]he *federal* regulations are the binding legal norms and the operation of a commercial vehicle that falls below the regulatory criteria is unlawful.” *National Tank Truck Carriers, Inc. v. Federal Highway Administration*, 170 F.3d 203, 207–208 (D.C. Cir. 1999) (emphasis in original). The FMCSRs adopted through notice and comment rulemaking provide motor carriers and drivers the constitutionally required notice of their legal obligations.

Similar to the discussion above, the questions posed by OOIDA regarding roadside inspections, specific inspection procedures, and the CVSA OOSC are outside the scope of this rulemaking. The amendments made by this rule eliminate the possibility that a roadside inspection can be considered equivalent to an annual inspection, for the simple reason that not every element required to be examined during an annual inspection as identified in Appendix G to the FMCSRs is examined during a roadside inspection conducted under the NAS Inspection.

Section 396.19, Inspector Qualifications

Comments: FMCSA did not receive any comments on § 396.19(b) and amends as proposed.

Speed-Restricted Tires

Comments: In its comments, Southern Company states:

The utility industry uses speed rated tires on their CMVs for on/off road work. Tires with a lug tread pattern design are typically speed rated and used extensively in the following industries; Utility, Municipalities, Refuse, Logging, Livestock, Farming, Construction, and by Carriers which routinely encounter snow.

Based on review of the proposed changes to Appendix G to Subchapter B of Chapter III—Minimum Periodic Inspection Standards, Section 10. Tires, the intent of the FMCSA was to eliminate speed rated tires for motorcoach CMVs.

SOCO recommends that the FMCSA clarify their proposed language on the modification of the current regulations to prohibit the use of speed rated tires specifically on motorcoach CMVs only.

ABA supported FMCSA's intent to address speed-restricted tires in Appendix G, but stated that "absent a requirement for labeling maximum speeds on all tires, it will be difficult for the law enforcement community to easily determine whether tires on a vehicle in use, are appropriate." ABA recommended that FMCSA provide additional guidance regarding (1) the intended meaning of "extended periods of time," (2) how a carrier would designate the appropriate use of speed-restricted tires, and (3) when/where such designation would need to be produced for the purposes of compliance.

RMA supported the proposed amendments to Appendix G. In addition, RMA noted that amendments to (1) FMVSS No. 119 to require all tires to be labeled with a maximum speed rating, and (2) FMVSS No. 120 to include such information on a required label, would "greatly improve the ability of consumers, fleets, tire service personnel, [and] State and Federal inspection personnel to correctly identify appropriate tires for a given vehicle and vehicle operation."

FMCSA Response: Vehicles should be equipped with tires that have the proper speed rating for the vehicle's intended use, because operating a vehicle at speeds that exceed the specified tire speed rating could lead to heat build-up in a tire and cause premature or sudden tire failure. This potential safety issue could have significant consequences, especially in passenger carrier operations, and FMCSA believes that regulatory measures are necessary to ensure—to the extent practicable—that speed-restricted tires are properly installed in accordance with a vehicle's intended use.

Although the October 2003 crash in Tallulah, LA, involved a motorcoach,

the NTSB Safety Recommendation was not specific only to motorcoach tires, but advised the Agency to "address a tire's speed rating to ensure that it is appropriate for a vehicle's intended use." As noted above, tires labeled with a specific speed restriction/limit should not be operated at speeds that exceed that specified limit, as doing so could lead to heat build-up and cause premature or sudden tire failure. As such, FMCSA believes that any regulatory requirements regarding speed-restricted tires should apply to all CMVs, and not to just motorcoaches as suggested by Southern Company.

The NPRM proposed to amend Appendix G to prohibit the use of speed-restricted tires on CMVs unless the use of such tires is specifically designated by the motor carrier. FMCSA believes that amending only the periodic (annual) inspection requirements in Appendix G—without a corresponding amendment to § 393.75, "Tires"—will not fully address the potential safety problem of using speed-restricted tires on vehicles that operate at speeds that exceed the rated limit of the tire as specified by the tire manufacturer. By including requirements relating to the appropriate use of speed-restricted tires in both § 393.75 and Appendix G, potential safety issues associated with the improper use of speed-restricted tires can be identified at any time and not just during periodic inspections conducted once a year. However, and because FMVSS No. 119 currently requires only tires that are speed-restricted to 55 mph or less to be labeled on the sidewall of the tire, it is not practicable to apply requirements to all tires (to include those that are rated for above 55 mph) as inspectors would have no way of easily determining the design maximum speed capability of the tire for the specified maximum load rating and corresponding inflation pressure.

Based on the above, FMCSA adopts new language in § 393.75 to prohibit the use of speed-restricted tires labeled for 55 mph or less in accordance with S6.5(e) of FMVSS No. 119 on vehicles that operate at speeds that exceed the rated limit of the tire. In addition, FMCSA amends Appendix G as proposed in the NPRM to prohibit the use of speed-restricted tires unless specifically designated by the motor carrier. This will require every CMV to be examined for the possible improper use of speed-restricted tires at least once a year.

Given that not all tires are currently required to be marked with a maximum speed rating, FMCSA understands ABA's concerns regarding how a motor

carrier will adequately "designate the appropriate use of speed-restricted tires" as proposed in the NPRM. NHTSA estimates that speed-restricted tires comprise less than 2 percent of the heavy truck tires, and, as Southern Company notes, these are typically used on utility, refuse, logging, livestock, farming, construction, and similar vehicles that are more often operated in heavy mixed-use service (on/off road operations in lower speed applications). Inspectors conducting roadside inspections will rarely encounter speed-restricted tires, and can generally expect that regional and long haul trucks and motorcoaches should not be equipped with speed-restricted tires. By including a requirement in Appendix G that prohibits the use of speed-restricted tires on vehicles "unless designated by the motor carrier," motor carrier or other personnel conducting periodic inspections of the limited number of vehicles with speed-restricted tires will be prompted to confirm with the motor carrier that the use of such tires is appropriate for the specific vehicle. FMCSA retains the amendment to Appendix G as proposed in the NPRM.

Motorcoach Seat Anchorage Strength

Comments: Capitol Bus Lines agrees that seat anchor points should be inspected, and believes that "most reputable motorcoach operators check [the anchor points] as part of their 'best practices.'" However, Capitol Bus Lines also noted that "to add this item to Appendix G with no guidance as to the inspection criteria puts an undue burden on carrier maintenance personnel as to the inspection standard. The lack of guidance can also result in different interpretations as to what is acceptable between operator and enforcement personnel. It would seem appropriate that for this item to be included in Appendix G, some minimum guidance must be provided for clarity and for the benefit of both operator and enforcement personnel." ABA commented that ". . . an alternative . . . may be to make a more complimentary change to Appendix G in line with the requirements of § 393.93, and develop a proposal to look for the presence of, and evidence of well maintained, seat belt assemblies at all driver and passenger seating positions, as appropriate."

FMCSA Response: As noted in the NPRM, the wide range of seat anchorage designs, coupled with the lack of testing requirements specifically for seat anchorage strength in the FMVSSs, makes it impracticable for FMCSA to develop a detailed methodology for the inspection of motorcoach passenger seat

mounting anchorages. FMCSA adopts the amendment as proposed in the NPRM.

VII. Today's Final Rule

Today's final rule codifies changes to parts 393 and 396 by adding a definition of "major tread groove" and an illustration to show the location of tread wear indicators or wear bars on a tire signifying a major tread groove; revising the rear license plate lamp requirement to eliminate the requirement for an operable rear license plate lamp on vehicles when there is no rear license plate present; prohibiting the operation of a vehicle with speed-restricted tires at speeds that exceed the rated limit of the tire; providing specific requirements regarding when violations or defects noted on an inspection report must be corrected; amending Appendix G to the FMCSRs, "Minimum Periodic Inspection Standards," to include provisions for the inspection of antilock braking systems (ABS) and automatic brake adjusters, speed-restricted tires, and motorcoach passenger seat mounting anchorages; amending the periodic inspection rules to eliminate the option for a motor carrier to satisfy the periodic inspection requirement through use of a violation-free roadside inspection; and amending the inspector qualification requirements as a result of the amendments to the periodic inspection rules. In addition, the Agency eliminates introductory regulatory text from Appendix G to the FMCSRs.

VIII. Section-by-Section Analysis

A. Part 393—Parts and Accessories Necessary for Safe Operation

Section 393.5 (Definitions)

FMCSA modifies this section by adding a definition of "major tread groove."

Section 393.11 (Lamps and Reflective Devices)

FMCSA modifies Footnote 11 to Table 1 of § 393.11 dealing with rear license plates lights.

Section 393.75 (Tires)

FMCSA adds a new paragraph (f) dealing with speed-restricted tires and tread wear indicators and an illustration of a tread wear indicator.

B. Part 396—Inspection, Repair and Maintenance

Section 396.9 (Inspection of Motor Vehicles and Intermodal Equipment in Operation)

FMCSA amends paragraph (d)(2) dealing with correction of violations of defects.

Section 396.17 (Periodic Inspection)

FMCSA amends paragraph (f) to bar roadside inspections from serving as annual inspections.

Section 396.19 (Inspector Qualifications)

FMCSA amends paragraph (b) to make it consistent with amended § 396.17.

Section 396.23 (Equivalent to Periodic Inspection)

FMCSA removes § 396.23(a) to make it consistent with § 396.17, and renumbers the remainder of the section accordingly.

Appendix G to Subchapter B of Chapter III (Minimum Periodic Inspection Standards)

FMCSA amends Appendix G by adding sections 1.l and 1.m, revising section 10.c, adding section 14, and eliminating introductory regulatory text, as explained in detail above.

Amendments to Existing Regulatory Guidance

Elsewhere in today's issue of the **Federal Register**, FMCSA amends certain regulatory guidance to ensure consistency between the FMCSRs, as amended by this final rule, and the published guidance.

IX. Regulatory Analyses

A. Executive Order 12866 (Regulatory Planning and Review and DOT Regulatory Policies and Procedures as Supplemented by E.O. 13563)

This final rule is not a significant regulatory action under section 3(f) of Executive Order 12866, Regulatory Planning and Review, as supplemented by E.O. 13563 (76 FR 3821, January 21, 2011), and is also not significant within the meaning of DOT regulatory policies and procedures (DOT Order 2100.5 dated May 22, 1980; 44 FR 11034, February 26, 1979) and does not require an assessment of potential costs and benefits under section 6(a)(3) of that Order. The Office of Management and Budget has not reviewed this final rule under that Order.

B. Regulatory Flexibility Act

The Regulatory Flexibility Act of 1980 (5 U.S.C. 601 *et seq.*) requires Federal agencies to consider the effects of their regulatory actions on small business and other small entities and to minimize any significant economic impact. The term "small entities" encompasses small businesses and not-for-profit organizations that are independently owned and operated and are not dominant in their fields and governmental jurisdictions with populations of less than 50,000.¹ Accordingly, DOT policy requires an analysis of the impact of all regulations on small entities and mandates that agencies strive to lessen any adverse effects on these businesses.

Under the Regulatory Flexibility Act, as amended by the Small Business Regulatory Enforcement Fairness Act of 1996 (SBREFA) (Title II, Pub. L. 104–121, 110 Stat. 857, March 29, 1996), this final rule is not expected to have a significant economic impact on a substantial number of small entities because the amendments generally do not involve the adoption of new or more stringent requirements, but, instead, the clarification of existing requirements. Therefore, there is no disproportionate burden to small entities.

Consequently, I certify that the action will not have a significant economic impact on a substantial number of small entities.

C. Assistance for Small Entities

In accordance with section 213(a) of the SBREFA, FMCSA wants to assist small entities in understanding this final rule so that they can better evaluate its effects on themselves. If the final rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please consult the FMCSA point of contact, Mike Huntley, listed in the **FOR FURTHER INFORMATION CONTACT** section of the rule.

Small businesses may send comments on the actions of Federal employees who enforce or otherwise determine compliance with Federal regulations to the Small Business Administration's Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small business. If you wish to comment on actions by

¹Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), see National Archives at <http://www.archives.gov/federal-register/laws/regulatory-flexibility/601.html>.

employees of FMCSA, call 1-888-REG-FAIR (1-888-734-3247). DOT has a policy ensuring the rights of small entities to regulatory enforcement fairness and an explicit policy against retaliation for exercising these rights.

D. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531-1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, taken together, or by the private sector, of \$155 million (which is the value equivalent of \$100 million in 1995, adjusted for inflation to 2014 levels) or more in any 1 year. This final rule would not result in such an expenditure.

E. Paperwork Reduction Act

This final rule calls for no new collection of information and is therefore not subject to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501-3520).

F. Executive Order 13132 (Federalism)

A rule has implications for Federalism under Section 1(a) of Executive Order 13132 if it has "substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government." FMCSA has determined that this final rule does not have substantial direct effects on or costs to States, nor does it limit the policymaking discretion of States. Nothing in this document preempts any State law or regulation.

G. Executive Order 12988 (Civil Justice Reform)

This final rule meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

H. Executive Order 13045 (Protection of Children)

E.O. 13045, Protection of Children from Environmental Health Risks and Safety Risks (62 FR 19885, Apr. 23, 1997), requires agencies issuing "economically significant" rules, if the regulation also concerns an environmental health or safety risk that an agency has reason to believe may disproportionately affect children, to include an evaluation of the regulation's

environmental health and safety effects on children. The Agency determined this final rule is not economically significant. Therefore, no analysis of the impacts on children is required. In any event, this regulatory action could not present an environmental or safety risk that would disproportionately affect children.

I. Executive Order 12630 (Taking of Private Property)

FMCSA has reviewed this final rule in accordance with Executive Order 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights, and has determined it will not effect a taking of private property or otherwise have taking implications.

J. Privacy Impact Assessment

Section 522 of title I of division H of the Consolidated Appropriations Act, 2005, enacted December 8, 2004 (Pub. L. 108-447, 118 Stat. 2809, 3268, 5 U.S.C. 552a note), requires the Agency to conduct a privacy impact assessment (PIA) of a regulation that will affect the privacy of individuals.

The Privacy Act (5 U.S.C. 552a) applies only to Federal agencies and any non-Federal agency which receives records contained in a system of records from a Federal agency for use in a matching program.

The E-Government Act of 2002, Public Law 107-347, § 208, 116 Stat. 2899, 2921 (Dec. 17, 2002), requires Federal agencies to conduct a PIA for new or substantially changed technology that collects, maintains, or disseminates information in an identifiable form.

This rule does not require a PIA because it does not require the collection of personally identifiable information (PII).

K. Executive Order 12372 (Intergovernmental Review)

The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities do not apply to this program.

L. Executive Order 13211 (Energy Supply, Distribution, or Use)

FMCSA has analyzed this final rule under E.O. 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use. The Agency has determined that it is not a "significant energy action" under that order because it is not a "significant regulatory action" likely to have a significant adverse effect on the supply, distribution, or use of energy. Therefore,

it does not require a Statement of Energy Effects under E.O. 13211.

M. Executive Order 13175 (Indian Tribal Governments)

This rule does not have tribal implications under E.O. 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

N. National Technology Transfer and Advancement Act

The National Technology Transfer and Advancement Act (15 U.S.C. 272 note) directs agencies to use voluntary consensus standards in their regulatory activities unless the agency provides Congress, through OMB, with an explanation of why using these standards would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards (*e.g.*, specifications of materials, performance, design, or operation; test methods; sampling procedures; and related management systems practices) are standards that are developed or adopted by voluntary consensus standards bodies. This final rule does not use technical standards. Therefore, we did not consider the use of voluntary consensus standards.

O. Environment (National Environmental Policy Act, Clean Air Act, Environmental Justice)

FMCSA analyzed this final rule for purposes of the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*) and determined this action is categorically excluded from further analysis and documentation in an environmental assessment or environmental impact statement under FMCSA Order 5610.1 (69 FR 9680, March 1, 2004), Appendix 2, paragraphs 6(z)(aa) and 6(z)(bb). The Categorical Exclusion (CE) in paragraph 6(z)(aa) covers regulations requiring motor carriers, their officers, drivers, agents, representatives, and employees directly in control of CMVs to inspect, repair, and provide maintenance for every CMV used on a public road. The CE in paragraph 6(z)(bb) covers regulations concerning vehicle operation safety standards (*e.g.*, regulations requiring: certain motor carriers to use approved equipment which is required to be installed such as an ignition cut-off switch, or carried on board, such as a fire extinguisher, and/or stricter blood

alcohol concentration (BAC) standards for drivers, etc.), equipment approval, and/or equipment carriage requirements (e.g., fire extinguishers and flares). The CE determination is available for inspection or copying in the *Regulations.gov* Web site listed under **ADDRESSES**.

FMCSA also analyzed this rule under the Clean Air Act, as amended (CAA), section 176(c) (42 U.S.C. 7401 *et seq.*), and implementing regulations promulgated by the Environmental Protection Agency. Approval of this action is exempt from the CAA's general conformity requirement since it does not affect direct or indirect emissions of criteria pollutants.

Under E.O. 12898 (Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations), each Federal agency must identify and address, as appropriate, "disproportionately high and adverse human health or environmental effects of its programs, policies, and activities on minority populations and low-income populations" in the United States, its possessions, and territories. FMCSA has determined that this rule will have no environmental justice effects, nor would its promulgation have any collective environmental impact.

List of Subjects

49 CFR Part 393

Highway safety, Motor carriers, Motor vehicle safety.

49 CFR Part 396

Highway safety, Motor carriers, Motor vehicle safety, Reporting and recordkeeping requirements.

For the reasons stated above, FMCSA amends 49 CFR chapter III, subchapter B, as follows:

PART 393—PARTS AND ACCESSORIES NECESSARY FOR SAFE OPERATION

■ 1. The authority citation for part 393 continues to read as follows:

Authority: 49 U.S.C. 31136, 31151, and 31502; sec. 1041(b) of Pub. L. 102-240, 105 Stat. 1914, 1993 (1991); and 49 CFR 1.87.

■ 2. Amend § 393.5 to add a definition for "Major tread groove" in alphabetical order to read as follows:

§ 393.5 Definitions.

* * * * *

Major tread groove is the space between two adjacent tread ribs or lugs on a tire that contains a tread wear indicator or wear bar. (In most cases, the locations of tread wear indicators are designated on the upper sidewall/shoulder of the tire on original tread tires.)

* * * * *

■ 3. In § 393.11, revise Footnote 11 of Table 1 to read as follows:

§ 393.11 Lamps and reflective devices.

* * * * *

Table 1 of § 393.11—Required Lamps and Reflectors on Commercial Motor Vehicles

* * * * *

Footnote—11 To be illuminated when headlamps are illuminated. No rear license plate lamp is required on vehicles that do display a rear license plate.

* * * * *

■ 4. In § 393.75:

■ a. Redesignate paragraphs (f) through (h) as paragraphs (g) through (i) and in redesignated paragraph (g) remove "paragraph (g)" and add in its place "paragraph (h)";

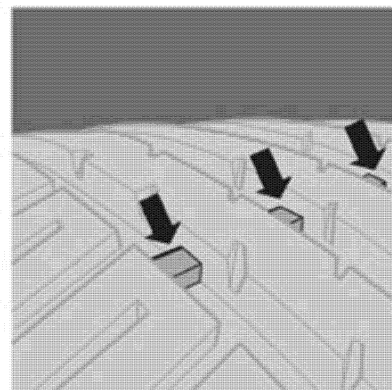

■ b. Add a new paragraph (f) and add Figure 23—"Location of Tread Wear Indicators or Wear Bars Signifying a Major Tread Groove" immediately following new paragraph (f) to read as follows:

§ 393.75 Tires.

* * * * *

(f) No motor vehicle may be operated with speed-restricted tires labeled with a maximum speed of 55 mph or less in accordance with S6.5(e) of FMVSS No. 119 at speeds that exceed the rated limit of the tire.

Figure 23 – "Location of Tread Wear Indicators or Wear Bars Signifying a Major Tread Groove"

* * * * *

PART 396—INSPECTION, REPAIR, AND MAINTENANCE

■ 5. The authority citation for part 396 continues to read as follows:

Authority: 49 U.S.C. 504, 31133, 31136, 31151, and 31502; sec. 32934, Pub. L. 112-141, 126 Stat. 405, 830; and 49 CFR 1.87.

■ 6. Revise § 396.9(d)(2) to read as follows:

§ 396.9 Inspection of motor vehicles and intermodal equipment in operation.

* * * * *

(d) * * *

(2) Motor carriers and intermodal equipment providers shall examine the report. Violations or defects noted

thereon shall be corrected in accordance with § 396.11(a)(3). Repairs of items of intermodal equipment placed out-of-service are also to be documented in the maintenance records for such equipment.

* * * * *

■ 7. Revise § 396.17(f) to read as follows:

§ 396.17 Periodic inspection.

* * * * *

(f) Vehicles passing periodic inspections performed under the auspices of any State government or equivalent jurisdiction, meeting the minimum standards contained in appendix G of this subchapter, will be considered to have met the requirements of an annual inspection for a period of 12 months commencing from the last day of the month in which the inspection was performed.

* * * * *

■ 8. Revise § 396.19(b) to read as follows:

§ 396.19 Inspector qualifications.

* * * * *

(b) Motor carriers and intermodal equipment providers must retain evidence of that individual's qualifications under this section. They must retain this evidence for the period during which that individual is performing annual motor vehicle inspections for the motor carrier or intermodal equipment provider, and for one year thereafter. However, motor carriers and intermodal equipment providers do not have to maintain documentation of inspector qualifications for those inspections performed as part of a State periodic inspection program.

§ 396.23 [Amended]

■ 9. In § 396.23, remove paragraph (a) and redesignate paragraph (b) as paragraph (a) and reserve a new paragraph (b).

■ 10. Amend Appendix G to Subchapter B of Chapter III by:

■ a. Adding Section 1.l and footnotes 1 and 2;

■ b. Adding Section 1.m;

■ b. Adding Section 10.c;

■ c. Adding Section 14; and

■ d. Removing "Comparison of Appendix G, and the New North American Uniform Driver Vehicle Inspection Procedure (North American Commercial Vehicle Critical Safety Inspection Items and Out-Of-Service Criteria)," including the introductory text and paragraphs 1.–13.

The additions read as follows:

Appendix G to Subchapter B of Chapter III—Minimum Periodic Inspection Standards

* * * * *

1. Brake System

* * * * *

l. Antilock Brake System¹

(1) Missing ABS malfunction indicator components (*i.e.*, bulb, wiring, etc.).

(2) ABS malfunction indicator that does not illuminate when power is first applied to the ABS controller (ECU) during initial power up.

(3) ABS malfunction indicator that stays illuminated while power is continuously applied to the ABS controller (ECU).

(4) ABS malfunction indicator lamp on a trailer or dolly does not cycle when electrical power is applied:

(a) Only to the vehicle's constant ABS power circuit, or

(b) Only to the vehicle.²

(5) With its brakes released and its ignition switch in the normal run position, power unit does not provide continuous electrical power to the ABS on any vehicle it is equipped to tow.

(6) Other missing or inoperative ABS components.

m. Automatic Brake Adjusters

(1) Failure to maintain a brake within the brake stroke limit specified by the vehicle manufacturer.

(2) Any automatic brake adjuster that has been replaced with a manual adjuster.

(3) Damaged, loose, or missing components.

(4) Any brake that is found to be out of adjustment on initial inspection must be evaluated to determine why the automatic brake adjuster is not functioning properly and the problem must be corrected in order for the vehicle to pass the inspection. It is not acceptable to manually adjust automatic brake adjusters without first correcting the underlying problem. For example, there may be other components within the braking system that are distressed or out of specification (*i.e.*, broken welds, loose mounting hardware, cracked brake drums, worn bushings, etc.) that would require immediate attention.

* * * * *

10. Tires

* * * * *

c. Installation of speed-restricted tires unless specifically designated by motor carrier.

* * * * *

14. Motorcoach Seats

a. Any passenger seat that is not securely fastened to the vehicle structure.

b. [Reserved]

¹ Power units manufactured after March 1, 2001, have two ABS malfunction indicators, one for the power unit and one for the units that they tow. Both malfunction indicators are required to be fully functional.

² This section is applicable to tractors with air brakes built on or after March 1, 1997, and all other vehicles with air brakes built on or after March 1, 1998. This section is also applicable to vehicles over 10,000 lbs. GVWR with hydraulic brakes built on or after March 1, 1999.

Issued under the authority of delegation in 49 CFR 1.87. July 14, 2016.

T.F. Scott Darling, III,
Acting Administrator.

BILLING CODE 4910-EX-P

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

49 CFR Part 396

[Docket No. FMCSA-2015-0176]

RIN 2126-AB81

Amendments to Regulatory Guidance Concerning Periodic Inspection of Commercial Motor Vehicles

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Amendment of regulatory guidance.

SUMMARY: FMCSA amends regulatory guidance, previously published in the **Federal Register**, regarding the periodic inspection of commercial motor vehicles (CMVs). Elsewhere in today's issue of the **Federal Register**, FMCSA amends the Federal Motor Carrier Safety Regulations (FMCSRs) to, among other things, eliminate the option for a motor carrier to satisfy the periodic (annual) inspection requirement through a violation-free roadside inspection. As a result of this amendment to the FMCSRs, certain regulatory guidance is amended to ensure consistency between the FMCSRs and the published guidance.

DATES: Effective Date: This regulatory guidance is effective July 22, 2016.

FOR FURTHER INFORMATION CONTACT: Mr. Mike Huntley, Vehicle and Roadside Operations Division, Office of Bus and Truck Standards and Operations, Federal Motor Carrier Safety Administration, telephone: 202-366-5370; *michael.huntley@dot.gov*.

SUPPLEMENTARY INFORMATION: On November 17, 1993, the Federal Highway Administration (FHWA)¹ published "Regulatory Guidance for the Federal Motor Carrier Safety Regulations" at 58 FR 60734. The publication included interpretations of

¹ The Motor Carrier Safety Improvement Act of 1999 [Pub. L. 106-159, 113 Stat. 1748 (December 9, 1999)] established the FMCSA in the Department of Transportation. On January 4, 2000, the Office of the Secretary published a final rule delegating to the FMCSA Administrator the motor carrier safety functions required by MCSIA, which included certain motor carrier safety functions previously delegated to the FHWA (65 FR 200).

49 CFR 396.17, a rule that requires all CMVs to be inspected at least once every 12 months in accordance with Appendix G to the FMCSRs (“Minimum Periodic Inspection Standards”), and 49 CFR 396.23, a rule that identifies alternative inspections that are considered equivalent to the annual inspection required under 49 CFR 396.17. The Agency interpreted the regulations to permit a roadside inspection to be considered as equivalent to the annual inspection. The regulatory guidance was republished on April 4, 1997, at 62 FR 16370.

A final rule issued by FMCSA, published elsewhere in today’s issue of the **Federal Register**, amends 49 CFR 396.17(f) and removes 49 CFR 396.23(a) to eliminate the option for a motor carrier to meet the periodic inspection requirements through roadside inspections.

Because not every element of Appendix G is reviewed/inspected during a roadside inspection conducted under the North American Standard Inspection, most roadside inspections do not meet the periodic (annual) inspection requirements under 49 CFR 396.17. For this reason, FMCSA does not believe it is appropriate to continue to allow motor carriers to use roadside inspections conducted by enforcement officials to satisfy the annual inspection requirements in 49 CFR 396.17(f). Motor carriers or their agents will now be required to complete a periodic inspection of every CMV under their control in accordance with Appendix G at least once every 12 months, irrespective of whether a roadside inspection is performed, unless the vehicle is subject to a mandatory State inspection program in accordance with 49 CFR 396.23 which has been determined to be as effective as the requirements of 49 CFR 396.17.

Given the amendments to 49 CFR 396.17(f) discussed above, the final rule also removes 49 CFR 396.23(a), which currently permits a roadside inspection program of a State or other jurisdiction to be considered as meeting the periodic inspection requirements of 49 CFR 396.17.

As a result of the final rule, and to maintain consistency between the amended FMCSRs and the published regulatory guidance, two regulatory guidance questions/answers are amended as follows:

Section 396.17, Question 1

Question 1: Some of a motor carrier’s vehicles are registered in a State with a mandated inspection program which has been determined to be as effective as the Federal periodic inspection

program, but these vehicles are not used in that State. Is the motor carrier required to make sure the vehicles are inspected under that State’s program in order to meet the Federal periodic inspection requirements?

Guidance: If the State requires all vehicles registered in the State to be inspected through its mandatory program, then the motor carrier must use the State program to satisfy the Federal requirements. If, however, the State inspection program includes an exception or exemption for vehicles which are registered in the State but domiciled outside of the State, then the motor carrier may meet the Federal requirements through a self-inspection, a third party inspection, or a periodic inspection performed in any State with a program that the Federal Motor Carrier Administration (FMCSA) determines is comparable to, or as effective as, the part 396 requirements.

Section 396.23, Question 1

Question 1: Can a violation-free Commercial Vehicle Safety Alliance (CVSA) Level I or Level V inspection be used to satisfy the periodic inspection requirements of § 396.17?

Guidance: No, a CVSA Level I or Level V inspection is not equivalent to the Federal periodic inspection requirements.

Issued on July 14, 2016.

T.F. Scott Darling, III,

Acting Administrator.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 622

[Docket No. 160222132-6585-02]

RIN 0648-BF77

Fisheries of the Caribbean, Gulf of Mexico, and South Atlantic; Shrimp Fishery of the Gulf of Mexico; Amendment 17A

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: NMFS issues regulations to implement Amendment 17A to the Fishery Management Plan for the Shrimp Fishery of the Gulf of Mexico (FMP), as prepared and submitted by the Gulf of Mexico (Gulf) Fishery

Management Council (Council). This final rule extends the current Gulf commercial shrimp permit moratorium for 10 more years. The intent of this final rule and Amendment 17A is to protect federally managed Gulf shrimp stocks while promoting catch efficiency, economic efficiency, and stability in the fishery.

DATES: This rule is effective August 22, 2016.

ADDRESSES: Electronic copies of Amendment 17A, which includes an environmental assessment, a Regulatory Flexibility Act analysis, and a regulatory impact review, may be obtained from the Southeast Regional Office Web site at http://sero.nmfs.noaa.gov/sustainable_fisheries/gulf_fisheries/shrimp/2016/am17a/index.html.

FOR FURTHER INFORMATION CONTACT: Susan Gerhart, telephone: 727-824-5305, or email: Susan.Gerhart@noaa.gov.

SUPPLEMENTARY INFORMATION: The shrimp fishery in the Gulf is managed under the FMP. The FMP was prepared by the Council and implemented through regulations at 50 CFR part 622 under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act).

On April 5, 2016, NMFS published a notice of availability for Amendment 17A and requested public comment (81 FR 19547). On April 14, 2016, NMFS published a proposed rule for Amendment 17A and requested public comment (81 FR 22042). The proposed rule and Amendment 17A outline the rationale for the actions contained in this final rule. A summary of the action implemented by Amendment 17A and this final rule is provided below.

Management Measure Contained in This Final Rule

This final rule extends the Gulf shrimp Federal permit moratorium until October 26, 2026. Through Amendment 13 to the FMP, the Council established a 10-year moratorium on the issuance of new Federal commercial shrimp vessel permits (71 FR 56039, September 26, 2006). The moratorium on permits indirectly controls shrimping effort in Federal waters and thereby bycatch levels of juvenile red snapper and sea turtles. The final rule implementing the moratorium became effective October 26, 2006, and the moratorium permits became effective in March 2007. Extending the moratorium for an additional 10 years until October 26, 2026, is expected to maintain the biological, social, and economic benefits to the shrimp fishery achieved under

the moratorium permit over the past 10 years.

Comments and Responses

NMFS received a total of 831 submissions from the public on Amendment 17A and the proposed rule. Of these submissions, 702 expressed general support for an extension of the permit moratorium. Some comments within the submissions addressed issues beyond the scope of Amendment 17A or the proposed rule, such as prohibiting shrimp trawling to reduce the impact on sea turtles and other marine life and modifying the requirements for turtle excluder devices and observers. From the submissions, NMFS has identified six issues related to Amendment 17A and the proposed rule. These comments and NMFS' respective responses are summarized below.

Comment 1: Extending the permit moratorium would protect and expand gains in the shrimp fishery by limiting potential exploitation. Gulf shrimp landings have only slightly declined during the past 10 years and catch per day has increased.

Response: NMFS agrees that continuing the moratorium would constrain effort and protect economic gains from higher catch rates. Returning the fishery to open access could undo any positive effects of the moratorium.

Removing the moratorium would allow an unlimited number of new entrants into the commercial shrimp fishery and could have negative effects if the fishery then became overcapitalized. Overcapitalization or effort increases could lead to increases in sea turtle and red snapper bycatch and could result in additional requirements to reduce bycatch.

Before the moratorium was implemented, increasing fuel costs, decreasing shrimp prices, and increasing foreign shrimp imports were all contributing to the overcapitalization of the commercial shrimp fleet. Since implementation of the moratorium, the catch per unit effort for the offshore shrimp fishery increased and has remained relatively constant. Additional effort in the fishery could negate, or at least lessen, profitability for the Gulf shrimp fleet as a whole.

Comment 2: There is no need for continuing the moratorium because of the decreasing number of valid permits over last 10 years.

Response: NMFS disagrees that the moratorium should be allowed to expire. The Council determined, and NMFS agrees, that extending the moratorium for an additional 10 years will continue stability for the fishery. As explained in the response to Comment

1, continuing the moratorium would constrain effort and protect economic gains from higher catch rates. The moratorium also indirectly controls effort and, therefore, bycatch levels of juvenile red snapper and sea turtles. Returning to an open access fishery would promote a return to less stable economic conditions.

Comment 3: Continuing the permit moratorium will help protect sea turtles and other marine life.

Response: NMFS agrees. In 2014, NMFS issued a biological opinion on the continued authorization of the Southeast U.S. shrimp fisheries in Federal waters on threatened and endangered species (including sea turtles) and designated critical habitat, in accordance with the Endangered Species Act (ESA). The sea turtle effects analyses and incidental take statement in the opinion were based on the expectation that future total effort levels in the southeastern shrimp fisheries would remain at or below 2009 effort levels. An increase in shrimp effort greater than the 2009 level may require re-initiation of the Endangered Species Act consultation and further rulemaking to address any increased effects on sea turtles. Continuing the moratorium would cap effort and reduce the chance of exceeding the 2009 effort levels, thereby continuing to limit any adverse effects of the shrimp fishery on sea turtles and other marine life.

Comment 4: Gulf shrimp permit holders who have lost their moratorium permit due to non-renewal should be allowed to re-apply for a shrimp permit.

Response: NMFS disagrees. The purpose of the moratorium was to limit the number of permits available to fish for shrimp because the fishery was overcapitalized, as described in the response to Comment 1.

The Federal Gulf shrimp moratorium permit is renewable for up to 1 year from its date of expiration. NMFS sends a renewal letter and permit application to the permit holder 1 month prior to the permit's expiration date. After a year with no permit renewal, a permit is terminated and permanently removed from the permit pool. However, valid permits are fully transferable, which may allow someone who has lost a permit as a result of non-renewal to obtain a new permit.

Comment 5: As a result of the moratorium, the current market price of permits is too high.

Response: NMFS disagrees. Based on the best available information, the current average price of a moratorium permit is approximately \$5,000, and this price has been relatively constant since the moratorium was put in place. Thus,

permits are not any more costly than they were 10 years ago, and in fact are likely less costly in real (inflation-adjusted) terms. Moreover, as previously noted, average profitability in the fishery has improved in recent years. An economically efficient business desiring to enter the fishery would be expected to recoup this cost relatively quickly and, thus, NMFS does not consider the cost of obtaining a permit to be onerous for businesses wanting to enter the fishery.

Comment 6: Permit holders who sub-lease shrimp moratorium permits should be required to forfeit the permits.

Response: NMFS disagrees. Although shrimp moratorium permits are fully transferable and a permit may be transferred to a vessel that is leased, there is no mechanism to sub-lease a permit through NMFS. To the extent the commenter is stating that the permits should not be transferable, economic efficiency is promoted when resources are allowed to shift to their most valuable use. The full transferability of permits is expected to improve economic efficiency by allowing those who place the greatest economic value on these permits to buy them. Any restrictions on the transferability of permits would be expected to reduce economic efficiency in the fishery, contrary to the objectives of Amendment 17A and this final rule.

Classification

The Regional Administrator, Southeast Region, NMFS has determined that this final rule is consistent with Amendment 17A, the FMP, the Magnuson-Stevens Act, and other applicable law.

This final rule has been determined to be not significant for purposes of Executive Order 12866.

The Magnuson-Stevens Act provides the statutory basis for this rule.

The Chief Counsel for Regulation of the Department of Commerce certified to the Chief Counsel for Advocacy of the Small Business Administration (SBA) during the proposed rule stage that this rule, if adopted, would not have a significant economic impact on a substantial number of small entities. NMFS did not receive any comments from SBA's Office of Advocacy or the public on the certification in the proposed rule. NMFS received two comments regarding the economic analysis of Amendment 17A and the proposed rule. One comment suggested that the current market price of moratorium permits is too high and the other comment stated that permit holders who sub-lease shrimp moratorium permits should be required

to forfeit the permits. NMFS disagrees with these comments as explained in the responses to comments 5 and 6, above. The factual basis for the certification was published in the proposed rule and is repeated below.

The current moratorium on Gulf shrimp permits became effective on October 26, 2006 (71 FR 56039, September 26, 2006). This final rule extends the current moratorium on Federal Gulf shrimp permits until October 26, 2026. The purpose of this rule is to maintain the biological, social, and economic benefits to the Gulf shrimp fishery achieved under the current moratorium. The objectives of this rule are to protect federally managed Gulf shrimp stocks, and promote catch efficiency, economic efficiency, and stability in the Gulf shrimp fishery.

This final rule is expected to directly regulate businesses that possess Federal Gulf shrimp moratorium permits. As of September 21, 2015, there were 1,464 vessels with valid or renewable Gulf shrimp moratorium permits. Although some permits are thought to be held by businesses with the same or substantively the same individual owners, and thus would likely be considered affiliated, ownership data for Gulf shrimp permit holders is incomplete and thus it is not currently feasible to accurately determine whether businesses that have these permits are in fact affiliated. NMFS is currently making changes to its permit application forms so that such determinations can be accurately made for future regulatory actions in this fishery. As a result of the incomplete ownership data, for purposes of this analysis, NMFS assumes each vessel is independently owned by a single business, which will result in an overestimate of the actual number of businesses directly regulated by this final rule. Thus, NMFS estimates the number of businesses directly regulated by this final rule to be 1,464.

Based on landings and economic data from 2013, which is the most current year for which complete economic data is available, all of these businesses are thought to be primarily engaged in shellfish harvesting activities (*e.g.*, Gulf shrimp, South Atlantic shrimp, and Atlantic sea scallops fisheries). In 2013, the primary source of gross revenue for approximately 84 percent of these businesses was landings from one or more of these shellfish fisheries, while the other 16 percent did not have commercial landings in any fishery. A certain percentage of businesses with Gulf shrimp permits are usually inactive in the Gulf shrimp fishery in a given

year, because of economic conditions in that fishery, other fisheries, or other industries (*e.g.*, oil and gas) in which these businesses, their owners, and their crew sometimes participate. Some businesses may have also been inactive due to issues associated with the Deepwater Horizon MC252 event in 2010, and subsequent payouts from British Petroleum (BP). NMFS only possesses data on such payouts and other transfer payments for a sample of the permitted businesses, and thus cannot confirm the extent to which such payouts contributed to the lack of commercial harvesting activity by all of the inactive businesses. Given the lack of data to the contrary and because these businesses possess Gulf shrimp moratorium permits, for the purpose of this analysis, these 1,464 businesses are assumed to be primarily engaged in commercial shellfish harvesting.

From 2011 through 2013, the greatest average annual gross revenue earned by a single business was approximately \$2.48 million. On average, a business with a Gulf shrimp moratorium permit had an annual gross revenue of approximately \$247,000, annual net revenue from operations (commercial fishing activities) of approximately \$6,300, and an annual economic profit of approximately \$37,000. All monetary estimates are in 2001 dollars. Average annual economic profit was greater between 2011 and 2013 compared to the 2006 through 2009 time period, and greater than net revenue from operations, partly because of non-fishing related income, mostly in the form of payouts from BP (*i.e.*, transfer payments) due to the Deepwater Horizon MC252 event in 2010. Thus, although the average profit margin from 2011 through 2013 was nearly 15 percent of gross revenue, the average margin from operations was only about 2.6 percent. Though relatively small, this margin from operations is still greater than what these businesses earned between 2006 and 2009 when net revenue from operations was generally negative, on average.

On December 29, 2015, NMFS issued a final rule establishing a small business size standard of \$11 million in annual gross receipts for all businesses primarily engaged in the commercial fishing industry (NAICS 11411) for Regulatory Flexibility Act (RFA) compliance purposes only (80 FR 81194, December 29, 2015). The \$11 million standard became effective on July 1, 2016, and is to be used in place of the SBA's current standards of \$20.5 million, \$5.5 million, and \$7.5 million for the finfish (NAICS 114111), shellfish (NAICS 114112), and other marine

fishing (NAICS 114119) sectors of the U.S. commercial fishing industry in all NMFS rules subject to the RFA after July 1, 2016. *Id.* at 81194.

Pursuant to the RFA, and prior to July 1, 2016, a certification was developed for this regulatory action using SBA's size standards. NMFS has reviewed the analyses prepared for this regulatory action in light of the new size standard. All of the entities directly regulated by this regulatory action are shellfish commercial fishing businesses and were considered small under the SBA's size standards, and thus they all would continue to be considered small under the new standard. Thus, NMFS has determined that the new size standard does not affect analyses prepared for this regulatory action.

Based on the information above, a reduction in profits for a substantial number of small entities is not expected. The Chief Counsel for Regulation of the Department of Commerce hereby reaffirms that the rule will not have a significant economic impact on a substantial number of small entities. Because this final rule, if implemented, is not expected to have a significant economic impact on a substantial number of small entities, a final regulatory flexibility analysis is not required and none has been prepared.

No duplicative, overlapping, or conflicting Federal rules have been identified. This final rule will not establish any new reporting or record-keeping requirements.

List of Subjects in 50 CFR Part 622

Commercial, Fisheries, Fishing, Gulf, Permits, Shrimp.

Dated: July 14, 2016.

Samuel D. Rauch III,

*Deputy Assistant for Regulatory Programs,
National Marine Fisheries Service.*

For the reasons set out in the preamble, 50 CFR part 622 is amended as follows:

PART 622—FISHERIES OF THE CARIBBEAN, GULF OF MEXICO, AND SOUTH ATLANTIC

■ 1. The authority citation for part 622 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

■ 2. In § 622.50, revise the introductory text of paragraph (b) to read as follows:

§ 622.50 Permits, permit moratorium, and endorsements.

* * * * *

(b) *Moratorium on commercial vessel permits for Gulf shrimp.* The provisions

of this paragraph (b) are applicable through October 26, 2026.

* * * * *

BILLING CODE 3510-22-P

Proposed Rules

Federal Register

Vol. 81, No. 141

Friday, July 22, 2016

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Docket No. FAA-2012-1308; Airspace Docket No. 12-ASO-44]

Proposed Establishment of Class E Airspace; Camden, AL

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action proposes to establish Class E airspace at Camden, AL, to accommodate new Area Navigation (RNAV) Global Positioning System (GPS) Standard Instrument Approach Procedures (SIAPs) serving Camden Municipal Airport. Controlled airspace is necessary for the safety and management of instrument flight rules (IFR) operations at the airport.

DATES: Comments must be received on or before September 6, 2016.

ADDRESSES: Send comments on this rule to: U.S. Department of Transportation, Docket Operations, 1200 New Jersey Avenue SE., West Building Ground Floor, Room 12-140, Washington, DC 20590; Telephone: 1-800-647-5527 or 202-366-9826. You must identify the Docket Number FAA-2012-1308; Airspace Docket No. 12-ASO-44, at the beginning of your comments. You may also submit and review received comments through the Internet at <http://www.regulations.gov>. You may review the public docket containing the proposal, any comments received, and any final disposition in person in the Dockets Office between 9:00 a.m. and 5:00 p.m., Monday through Friday, except Federal holidays. The Docket Office (telephone 1-800-647-5527), is on the ground floor of the building at the above address.

FAA Order 7400.9Z, Airspace Designations and Reporting Points, and subsequent amendments can be viewed on line at http://www.faa.gov/air_

[traffic/publications/](#). For further information, you can contact the Airspace Policy Group, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone: 202-267-8783. The Order is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of FAA Order 7400.9Z at NARA, call 202-741-6030, or go to http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html.

FAA Order 7400.9, Airspace Designations and Reporting Points, is published yearly and effective on September 15.

FOR FURTHER INFORMATION CONTACT: John Fornito, Operations Support Group, Eastern Service Center, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone (404) 305-6364.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would establish Class E airspace at Camden Municipal Airport, Camden, AL.

Comments Invited

Interested persons are invited to comment on this proposed rulemaking by submitting such written data, views, or arguments, as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal.

Communications should identify both docket numbers and be submitted in triplicate to the address listed above. You may also submit comments through the Internet at <http://www.regulations.gov>.

Persons wishing the FAA to acknowledge receipt of their comments on this action must submit with those comments a self-addressed stamped postcard on which the following statement is made: "Comments to Docket No. FAA-2012-1308; Airspace Docket No. 12-ASO-44." The postcard will be date/time stamped and returned to the commenter.

All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in light of the comments received. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRMs

An electronic copy of this document may be downloaded from and comments submitted through <http://www.regulations.gov>. Recently published rulemaking documents can also be accessed through the FAA's Web page at <http://www.regulations.gov>.

You may review the public docket containing the proposal, any comments received, and any final disposition in person in the Dockets Office (see the **ADDRESSES** section for address and phone number) between 9:00 a.m. and 5:00 p.m., Monday through Friday, except Federal Holidays. An informal docket may also be examined between 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal Holidays at the office of the Eastern Service Center, Federal Aviation Administration, Room 350, 1701 Columbia Avenue, College Park, Georgia 30337.

Availability and Summary of Documents for Incorporation by Reference

This document proposes to amend FAA Order 7400.9Z, Airspace Designations and Reporting Points, dated August 6, 2015, and effective September 15, 2015. FAA Order 7400.9Z is publicly available as listed in the **ADDRESSES** section of this document. FAA Order 7400.9Z lists Class A, B, C,

D, and E airspace areas, air traffic service routes, and reporting points.

The Proposal

The FAA is considering an amendment to Title 14, Code of Federal Regulations (14 CFR) Part 71 to establish Class E airspace at Camden, AL., providing the controlled airspace required to support the new RNAV (GPS) standard instrument approach procedures for Camden Municipal Airport. Controlled airspace extending upward from 700 feet above the surface within a 7.7-mile radius of the airport would be established for IFR operations.

Class E airspace designations are published in Paragraph 6005 of FAA Order 7400.9Z, dated August 6, 2015, and effective September 15, 2015, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in the Order.

Regulatory Notices and Analyses

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore; (1) Is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, “Environmental Impacts: Policies and Procedures” prior to any FAA final regulatory action.

Lists of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (Air).

The Proposed Amendment:

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71 —DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order 7400.9Z, Airspace Designations and Reporting Points, dated August 6, 2015, effective September 15, 2015, is amended as follows:

Paragraph 6005 Class E Airspace Areas Extending Upward From 700 Feet or More Above the Surface of the Earth.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA’s authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency’s authority. This proposed rulemaking is promulgated under the authority described in Subtitle VII, Part, A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would establish Class E airspace at Murray

Calloway County Hospital Heliport,
Murray, KY.

Comments Invited

Interested persons are invited to comment on this rule by submitting such written data, views, or arguments, as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal.

Communications should identify both docket numbers and be submitted in triplicate to the address listed above. You may also submit comments through the Internet at <http://www.regulations.gov>.

Persons wishing the FAA to acknowledge receipt of their comments on this action must submit with those comments a self-addressed stamped postcard on which the following statement is made: "Comments to Docket No. FAA-2016-6775; Airspace Docket No. 16-ASO-9." The postcard will be date/time stamped and returned to the commenter.

All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in light of the comments received. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRMs

An electronic copy of this document may be downloaded from and comments submitted through <http://www.regulations.gov>. Recently published rulemaking documents can also be accessed through <http://www.regulations.gov>.

You may review the public docket containing the proposal, any comments received, and any final disposition in person in the Dockets Office (see the **ADDRESSES** section for address and phone number) between 9:00 a.m. and 5:00 p.m., Monday through Friday, except Federal Holidays. An informal docket may also be examined between 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal Holidays at the office of the Eastern Service Center, Federal Aviation Administration, Room 350, 1701 Columbia Avenue, College Park, Georgia 30337.

Availability and Summary of Documents for Incorporation by Reference

This document proposes to amend FAA Order 7400.9Z, Airspace Designations and Reporting Points, dated August 6, 2015, and effective September 15, 2015. FAA Order 7400.9Z is publicly available as listed in the **ADDRESSES** section of this document. FAA Order 7400.9Z lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Proposal

The FAA is considering an amendment to Title 14, Code of Federal Regulations (14 CFR) part 71 to establish Class E airspace at Murray, KY, providing the controlled airspace required to support the new Copter RNAV (GPS) standard instrument approach procedures for Murray Calloway County Hospital Heliport. Controlled airspace extending upward from 700 feet above the surface within a 6-mile radius of the heliport would be established for IFR operations.

Class E airspace designations are published in Paragraph 6005 of FAA Order 7400.9Z, dated August 6, 2015, and effective September 15, 2015, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in the Order.

Regulatory Notices and Analyses

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal would be subject to an environmental analysis in accordance with FAA Order 1050.1F, "Environmental Impacts: Policies and Procedures" prior to any FAA final regulatory action.

Lists of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (Air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of Federal Aviation Administration Order 7400.9Z, Airspace Designations and Reporting Points, dated August 6, 2015, effective September 15, 2015, is amended as follows:

Paragraph 6005 Class E Airspace Areas Extending Upward From 700 feet or More Above the Surface of the Earth.

BILLING CODE 4910-13-P

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[REG-102516-15]

RIN 1545-BM65

Income Inclusion When Lessee Treated as Having Acquired Investment Credit Property

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Withdrawal of notice of proposed rulemaking; and notice of

proposed rulemaking by cross-reference to temporary regulations.

SUMMARY: This document withdraws the notice of proposed rulemaking published in the **Federal Register** on December 20, 1985, and the notice of proposed rulemaking published in the **Federal Register** on September 21, 1987. In the Rules and Regulations section of this issue of the **Federal Register**, the Treasury Department and the IRS are issuing temporary regulations relating to the income inclusion rules under section 50(d)(5) of the Internal Revenue Code (Code) that are applicable to a lessee of investment credit property when a lessor of such property elects to treat the lessee as having acquired the property. The text of those regulations also serves as the text of these proposed regulations.

DATES: Written or electronic comments and requests for a public hearing must be received by October 20, 2016.

ADDRESSES: Send submissions to: CC:PA:LPD:PR (REG-102516-15), Room 5203, Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, Washington, DC 20044. Submissions may be hand-delivered Monday through Friday between the hours of 8 a.m. and 4 p.m. to: CC:PA:LPD:PR (REG-102516-15), Courier's Desk, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, DC, or sent electronically via the Federal eRulemaking Portal at www.regulations.gov (IRS REG-102516-15).

FOR FURTHER INFORMATION CONTACT: Concerning the regulations, Jennifer A. Records at (202) 317-6853; concerning submissions of comments and requests for a public hearing, Regina Johnson of the Publications and Regulations Branch at (202) 317-6901 (not toll-free numbers).

SUPPLEMENTARY INFORMATION:

Background and Explanation of Provisions

On December 20, 1985, the Treasury Department and the IRS published in the **Federal Register** (50 FR 51874-01) a notice of proposed rulemaking (LR-92-73) under sections 46, 47, 48, and 167 providing proposed rules related to the determination of the amount of taxpayer's qualified investment and recapture of the investment credit with respect to mass assets. On September 21, 1987, the Treasury Department and the IRS published in the **Federal Register** (52 FR 35438-01) a notice of proposed rulemaking (LR-183-82) under sections 48, 196, 312, and 705 providing proposed rules related to the adjustment in the basis of property with

respect to which a taxpayer claimed the investment credit. On April 27, 1993, the Treasury Department and the IRS withdrew (58 FR 25587-01) the proposed amendments to § 1.48-7 of the Income Tax Regulations that were published as part of the notice of proposed rulemaking (LR-183-82) published in the **Federal Register** (52 FR 35438-01) on September 21, 1987. Because of numerous statutory changes since the publication of those proposed regulations, the remainder of the proposed regulations (50 FR 51874-01 and 52 FR 35438-01) are withdrawn.

Temporary regulations in the Rules and Regulations section of this issue of the **Federal Register** amend the Income Tax Regulations (26 CFR part 1) relating to section 50(d)(5). The temporary regulations provide rules regarding the income inclusion required under section 50(d)(5) of the Code by a lessee of investment credit property when a lessor of such property elects to treat the lessee as having acquired the property. The temporary regulations also provide rules to coordinate the section 50(a) recapture rules with the section 50(d)(5) income inclusion rules and rules regarding income inclusion upon a disposition or lease termination outside of the recapture period. The text of those regulations also serves as the text of these proposed regulations. The preamble to the temporary regulations explains the amendments.

Special Analyses

Certain IRS regulations, including this one, are exempt from the requirements of Executive Order 12866, as supplemented and reaffirmed by Executive Order 13563. Therefore, a regulatory impact assessment is not required. It also has been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) does not apply to these regulations, and, because these regulations do not impose a collection of information on small entities, the Regulatory Flexibility Act (5 U.S.C. chapter 6) does not apply. Therefore, a regulatory flexibility analysis is not required. Pursuant to section 7805(f) of the Code, these proposed regulations have been submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on their impact on small business.

Comments and Requests for a Public Hearing

Before these proposed regulations are adopted as final regulations, consideration will be given to any written (a signed original and eight (8) copies) or electronic comments that are

submitted timely to the IRS. The Treasury Department and the IRS request comments on all aspects of these proposed regulations. Specifically, the Treasury Department and the IRS request comments regarding whether guidance is needed to address the applicability of the income inclusion rules under section 50(d)(5) to trusts, estates, and/or electing large partnerships. All comments will be available for public inspection and copying. A public hearing will be scheduled if requested in writing by any person that timely submits written comments. If a public hearing is scheduled, notice of the date, time, and place for the public hearing will be published in the **Federal Register**.

Drafting Information

The principal author of these regulations is Jennifer A. Records, Office of the Associate Chief Counsel (Passthroughs and Special Industries), IRS. However, other personnel from the Treasury Department and the IRS participated in their development.

List of Subjects in 26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

Withdrawal of Notice of Proposed Rulemaking

Accordingly, under authority of 26 U.S.C. 7805, the notice of proposed rulemaking (LR-92-73) that was published in the **Federal Register** on December 20, 1985 (50 FR 51874-01), and the notice of proposed rulemaking (LR-183-82) that was published in the **Federal Register** on September 21, 1987 (52 FR 35438-01), are withdrawn.

Proposed Amendments to the Regulations

Accordingly, 26 CFR part 1 is proposed to be amended as follows:

PART 1—INCOME TAXES

■ **Paragraph 1.** The authority citation for part 1 continues to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

■ **Par. 2.** Section 1.50-1 is revised to read as follows:

§ 1.50-1 Lessee's income inclusion following election of lessor of investment credit property to treat lessee as acquirer.

[The text of proposed amendment to § 1.50-1 is the same as the text of § 1.50-1T(a) through (f) published

elsewhere in this issue of the **Federal Register**].

John Dalrymple,

Deputy Commissioner for Services and Enforcement.

Coverage for Contraceptive Services

AGENCY: Internal Revenue Service, Department of the Treasury; Employee Benefits Security Administration, Department of Labor; Centers for Medicare & Medicaid Services, Department of Health and Human Services.

ACTION: Request for information.

SUMMARY: This document is a request for information on whether there are alternative ways (other than those offered in current regulations) for eligible organizations that object to providing coverage for contraceptive services on religious grounds to obtain an accommodation, while still ensuring that women enrolled in the organizations' health plans have access to seamless coverage of the full range of Food and Drug Administration-approved contraceptives without cost sharing. This information is being solicited in light of the Supreme Court's opinion in *Zubik v. Burwell*, 136 S. Ct. 1557 (2016). The Departments of Health and Human Services (HHS), Labor, and the Treasury (collectively, the Departments) invite public comments via this request for information.

DATES: Comments must be submitted on or before September 20, 2016.

ADDRESSES: In commenting, please refer to file code CMS-9931-NC. Because of staff and resource limitations, we cannot accept comments by facsimile (FAX) transmission.

You may submit comments in one of four ways (please choose only one of the ways listed):

1. *Electronically.* You may submit electronic comments on this regulation to <http://www.regulations.gov>. Follow the "Submit a comment" instructions.

2. *By regular mail.* You may mail written comments to the following address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS-9931-NC, P.O. Box 8010, Baltimore, MD 21244-8010. Please allow sufficient time for mailed comments to be received before the close of the comment period.

3. *By express or overnight mail.* You may send written comments to the following address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS-9931-NC, Mail Stop C4-26-05, 7500 Security Boulevard, Baltimore, MD 21244-1850.

4. *By hand or courier.* Alternatively, you may deliver (by hand or courier) your written comments ONLY to the following addresses prior to the close of the comment period:

a. For delivery in Washington, DC—Centers for Medicare & Medicaid Services, Department of Health and Human Services, Room 445-G, Hubert H. Humphrey Building, 200 Independence Avenue SW., Washington, DC 20201.

(Because access to the interior of the Hubert H. Humphrey Building is not readily available to persons without Federal government identification, commenters are encouraged to leave their comments in the CMS drop slots located in the main lobby of the building. A stamp-in clock is available for persons wishing to retain a proof of filing by stamping in and retaining an extra copy of the comments being filed.)

b. For delivery in Baltimore, MD—Centers for Medicare & Medicaid Services, Department of Health and Human Services, 7500 Security Boulevard, Baltimore, MD 21244-1850.

If you intend to deliver your comments to the Baltimore address, call telephone number (410) 786-9994 in advance to schedule your arrival with one of our staff members.

Comments erroneously mailed to the addresses indicated as appropriate for hand or courier delivery may be delayed and received after the comment period.

For information on viewing public comments, see the beginning of the **SUPPLEMENTARY INFORMATION** section.

FOR FURTHER INFORMATION CONTACT:

David Mlawsky, Centers for Medicare & Medicaid Services (CMS), Department

of Health and Human Services, at (410) 786-1565.

Elizabeth Schumacher or Suzanne Adelman, Employee Benefits Security Administration, Department of Labor, at (202) 693-8335.

Karen Levin, Internal Revenue Service, Department of the Treasury, at (202) 317-6846.

Customer Service Information: Individuals interested in obtaining information from the Department of Labor concerning employment-based health coverage laws may call the EBSA Toll-Free Hotline at 1-866-444-EBSA (3272) or visit the Department of Labor's Web site (<http://www.dol.gov/ebsa>). In addition, information from HHS on private health insurance for consumers can be found on the CMS Web site (www.cciio.cms.gov), and information on health reform can be found at <http://www.HealthCare.gov>.

SUPPLEMENTARY INFORMATION:

Inspection of Public Comments: All comments received before the close of the comment period are available for viewing by the public, including any personally identifiable or confidential business information that is included in a comment. We post all comments received before the close of the comment period on the following Web site as soon as possible after they have been received: <http://www.regulations.gov>. Follow the search instructions on that Web site to view public comments.

Comments received timely will also be available for public inspection as they are received, generally beginning approximately 3 weeks after publication of a document, at the headquarters of the Centers for Medicare & Medicaid Services, 7500 Security Boulevard, Baltimore, Maryland 21244, Monday through Friday of each week from 8:30 a.m. to 4 p.m. To schedule an appointment to view public comments, phone 1-800-743-3951.

I. Background

The Patient Protection and Affordable Care Act (Pub. L. 111-148) was enacted on March 23, 2010. The Health Care and Education Reconciliation Act of 2010 (Pub. L. 111-152) was enacted on March 30, 2010. These statutes are collectively known as the Affordable Care Act. The Affordable Care Act reorganizes, amends, and adds to the provisions of part A of title XXVII of the Public Health Service Act (PHS Act) relating to group health plans and health insurance issuers in the group and individual markets. The Affordable Care Act adds section 715(a)(1) to the Employee Retirement Income Security Act of 1974 (ERISA) and section 9815(a)(1) to the

Internal Revenue Code (Code) to incorporate the provisions of part A of title XXVII of the PHS Act into ERISA and the Code, and to make those provisions applicable to group health plans and health insurance issuers providing health insurance coverage in connection with group health plans. The sections of the PHS Act incorporated into ERISA and the Code are sections 2701 through 2728.

Section 2713 of the PHS Act, as added by the Affordable Care Act and incorporated into ERISA and the Code, requires that non-grandfathered group health plans and health insurance issuers offering non-grandfathered group or individual health insurance coverage provide coverage of certain specified preventive services without cost sharing. These preventive services include preventive care and screenings for women provided for in comprehensive guidelines supported by the Health Resources and Services Administration (HRSA). On August 1, 2011, the Departments amended regulations to cover women's preventive services provided for in HRSA guidelines,¹ and HRSA adopted and released such guidelines, which were based on recommendations of the independent organization, the National Academy of Medicine (formerly Institute of Medicine). The preventive services identified in the HRSA guidelines include all Food and Drug Administration (FDA)-approved contraceptives, sterilization procedures, and patient education and counseling for women with reproductive capacity, as prescribed by a health care provider (collectively, contraceptive services).²

The Departments issued regulations that provide an accommodation for eligible organizations that object on religious grounds to providing coverage for contraceptive services.³ Under the accommodation, an eligible organization does not have to contract, arrange, pay, or provide a referral for contraceptive coverage. At the same time, the accommodation generally ensures that women enrolled in the health plan established by the eligible organization, like women enrolled in health plans maintained by other employers, receive contraceptive coverage seamlessly—that is, through the same issuers or third party administrators that provide or administer the rest of their health coverage, and without financial,

logistical, or administrative obstacles.⁴ Minimizing such obstacles is essential to achieving the purpose of the Affordable Care Act's preventive services provision, which seeks to remove barriers to the use of preventive services and to ensure that women receive full and equal health coverage appropriate to their medical needs.

Under the Departments' regulations, an eligible organization may invoke the accommodation by self-certifying its eligibility using a form provided by the Department of Labor, EBSA Form 700, and providing the form to its health insurance issuer (to the extent it has an insured plan) or third party administrator (to the extent it has a self-insured plan).⁵ Alternatively, instead of sending the self-certification form to its issuer or third party administrator, the regulations allow an eligible organization to invoke the accommodation by providing certain information to HHS, without using any particular form.⁶

In *Zubik v. Burwell*, 136 S. Ct. 1557 (2016), the Supreme Court considered claims by a number of employers that, even with the accommodation provided in the regulations, the contraceptive-coverage requirement violates the Religious Freedom Restoration Act of 1993 (RFRA). Following oral argument, the Court requested supplemental briefing from the parties. The Court's order noted that under the existing regulations, an objecting employer with an insured plan that seeks to invoke the accommodation by contacting its issuer must use a form of notice provided by the government.⁷ The Court directed the parties to file supplemental briefs addressing "whether contraceptive coverage could be provided to [the objecting employers'] employees, through [the employers'] insurance companies, without any such notice."⁸ After consideration of the supplemental briefing, the Supreme Court vacated the

judgments of the courts below and remanded *Zubik* and several other cases raising parallel RFRA challenges to the accommodation. 136 S. Ct. at 1560–1561. The Court emphasized that it "expresse[d] no view on the merits of the cases" and, in particular, that it did not "decide whether [the employers'] religious exercise has been substantially burdened, whether the Government has a compelling interest, or whether the current regulations are the least restrictive means of serving that interest." *Id.* at 1560. The Court, however, stated that in light of what it viewed as "the substantial clarification and refinement in the positions of the parties" in their supplemental briefs, the parties "should be afforded an opportunity to arrive at an approach going forward that accommodates [the objecting employers'] religious exercise while at the same time ensuring that women covered by [the employers'] health plans 'receive full and equal health coverage, including contraceptive coverage.'" *Id.* (citation omitted).

As the government explained in its briefs in *Zubik*, the Departments continue to believe that the existing accommodation regulations are consistent with RFRA for two independent reasons. First, as eight of the nine courts of appeals to consider the issue have held, the accommodation does not substantially burden objecting employers' exercise of religion. Second, as some of those courts have also held, the accommodation is the least restrictive means of furthering the government's compelling interest in ensuring that women receive full and equal health coverage, including contraceptive coverage. Nevertheless, the Departments also are committed to respecting the beliefs of religious employers that object to providing contraceptive coverage, and the Departments have consistently sought to accommodate religious objections to the contraceptive-coverage requirement even where not required to do so by RFRA. Consistent with that approach, the Departments are issuing this Request for Information (RFI) to determine, as contemplated by the Supreme Court's opinion in *Zubik*, whether modifications to the existing accommodation procedure could resolve the objections asserted by the plaintiffs in the pending RFRA cases while still ensuring that the affected women seamlessly receive full and equal health coverage, including contraceptive coverage.

The Departments are using the RFI procedure because the issues addressed in the supplemental briefing in *Zubik* affect a wide variety of stakeholders,

⁴ An accommodation is also available with respect to student health insurance coverage arranged by eligible organizations that are institutions of higher education. 45 CFR 147.131(f). For ease of use, this RFI refers only to "employers" with religious objections to the contraceptive-coverage requirement, but references to employers with respect to insured group health plans should also be considered to include institutions of higher education that are eligible organizations with respect to student health insurance coverage.

⁵ The EBSA form 700 is available at: <https://www.dol.gov/ebsa/pdf/preventiveserviceseligibleorganizationcertificationform.pdf>

⁶ A model notice to HHS that eligible organizations may, but are not required to, use is available at: <http://www.cms.gov/ccio/resources/Regulations-and-Guidance/index.html#Prevention>.

⁷ *Zubik v. Burwell*, Nos. 14–1418 et al., 2016 WL 1203818, at *2 (Mar. 29, 2016).

⁸ *Id.*

¹ 26 CFR 54.9815–2713, 29 CFR 2590.715–2713, 45 CFR 147.130.

² The HRSA guidelines exclude services relating to a man's reproductive capacity, such as vasectomies and condoms.

including many who are not parties to the cases that were before the Supreme Court. Other employers also have brought RFRA challenges to the accommodation, and their views may differ from the views held by the employers in *Zubik* and the consolidated cases. In addition, any change to the accommodation could have implications for the rights and obligations of issuers, third party administrators, and women enrolled in health plans established by objecting employers. RFIs are commonly used to solicit public comments on potential rulemaking in a transparent and open way. Information gathered through this RFI will be used to determine whether changes to the current regulations should be made and, if so, to inform the nature of those changes. The Departments welcome comments from all stakeholders. A principal purpose of this RFI is to determine whether there are modifications to the accommodation that would be available under current law and that could resolve the RFRA claims raised by organizations that object to the existing accommodation on religious grounds. The Departments invite all such organizations to submit comments, and request that their submissions include specific responses to the questions posed below.⁹

II. Solicitation of Comments

A. Notification to Issuers Without Self-Certification

In its request for supplemental briefing in *Zubik*, the Supreme Court asked the parties to address whether and how “contraceptive coverage may be obtained by [objecting employers’] employees through [the employers’] insurance companies, but in a way that does not require any involvement of [the employers] beyond their own decision to provide health insurance without contraceptive coverage to their employees.”¹⁰ In particular, the Court posited “a situation in which [objecting

employers] would contract to provide health insurance for their employees, and in the course of obtaining such insurance, inform their insurance company that they do not want their health plan to include contraceptive coverage of the type to which they object on religious grounds. [The employers] would have no legal obligation to provide such contraceptive coverage, would not pay for such coverage, and would not be required to submit any separate notice to their insurer, to the Federal government, or to their employees. At the same time, [the employers’] insurance compan[ies]—aware that [the employers] are not providing certain contraceptive coverage on religious grounds—would separately notify [the employers’] employees that the insurance company will provide cost-free contraceptive coverage, and that such coverage is not paid for by [the employers] and is not provided through [the employers’] health plan[s].”¹¹

In response, the government explained:

For employers with insured plans, the Court described an arrangement very similar to the existing accommodation. The accommodation already relieves [employers with religious objections] of any obligation to provide contraceptive coverage and instead requires insurers to provide coverage separately. The only difference is the way the accommodation is invoked. Currently, an employer that chooses to opt out by notifying its insurer (rather than HHS) must use a written form self-certifying its religious objection and eligibility for the accommodation. The Court’s order posited an alternative procedure in which the employer could opt out by asking an insurer for a policy that excluded contraceptives to which it objects. That request would not need to take any particular form, but the employer and the insurer would be in the same position as after a self-certification: The employer’s obligation to provide contraceptive coverage would be extinguished, and the insurer would instead be required to provide the coverage separately.” Gov’t Supp. Brief 2 (citation omitted); see *id.* 3–7.¹²

The government explained that because “[i]nsurers have an independent statutory obligation to provide contraceptive coverage,” “the accommodation for employers with insured plans could be modified to operate in the manner posited in the Court’s order while still ensuring that the affected women receive contraceptive coverage seamlessly,

together with the rest of their health coverage.” *Id.* at 14–15. The government also noted, however, that the current requirement of a written self-certification plays an important role in effectuating the accommodation, and therefore cautioned that such a modification could “impose real costs on the parties whose rights and duties are affected—including objecting employers.” *Id.* at 14; see *id.* at 8–11 (describing the function of the self-certification requirement).

The Departments seek comments from all interested stakeholders, including all objecting employers, on the procedure for invoking the accommodation described above, including with respect to the following:

1. The Departments ask objecting organizations with insured plans to indicate whether the alternative procedure described above would resolve their RFRA objections to the accommodation. If it would not resolve a particular organization’s RFRA objection, the Departments ask the organization to indicate whether its RFRA objection could be resolved by any procedure(s) or system(s) in which the organization’s issuer provides contraceptive coverage to the women enrolled in the organization’s health plan, and, if so, describe the procedure(s) or system(s) with specificity.

2. The Supreme Court’s supplemental briefing order appears to contemplate that, in requesting insurance coverage that excludes contraceptive coverage, an employer would inform its issuer that it objects to providing contraceptive coverage “on religious grounds.”¹³ The Departments ask objecting organizations to indicate whether they would have any RFRA objection to informing their issuers that they object to providing contraceptive coverage “on religious grounds,” or to a further requirement that the request by an eligible organization¹⁴ to its issuer be made in writing, or to a further requirement that the request be made via a particular form.

3. The government’s supplemental brief explained that eliminating the written notification requirement in the existing accommodation could impose additional burdens on objecting employers, issuers, and regulators. Gov’t Supp. Br. 8–10, 14–15. The Departments seek comment on the extent of those burdens and what steps could be taken

⁹ Consistent with the Supreme Court’s decision in *Zubik*, the Departments seek to determine whether changes to the existing accommodation could resolve the pending RFRA claims brought by objecting employers. The Supreme Court separately specified that, while the RFRA litigation remains pending, “the Government may not impose taxes or penalties on [the plaintiffs] for failure to provide the . . . notice” required under the existing accommodation regulations. *Zubik*, 136 S. Ct. at 1561. At the same time, the Court also emphasized that “[n]othing in [its] opinion, or in the opinions or orders of the courts below, is to affect the ability of the Government to ensure that women covered by [plaintiffs’] health plans ‘obtain, without cost, the full range of FDA approved contraceptives.’” *Id.* at 1560–1561 (quoting *Wheaton College v. Burwell*, 134 S. Ct. 2806, 2807 (2014)). As such, those interim matters are not within the scope of this RFI.

¹⁰ *Zubik*, 2016 WL 1203818, at *2.

¹¹ *Id.*

¹² The government’s supplemental brief is available at <https://www.justice.gov/osg/brief/zubik-v-burwell-0>. The government’s supplemental reply brief is available at <https://www.justice.gov/osg/brief/zubik-v-burwell-1>.

¹³ *Zubik*, 2016 WL 1203818, at *2.

¹⁴ An eligible organization, which may seek the accommodation based on its sincerely held religious objection to providing contraceptive coverage, is defined at 26 CFR 54.9815–2713A(a), 29 CFR 2590.715–2713A(a), and 45 CFR 147.131(b).

to mitigate them. The Departments ask health insurance issuers, as well as other commenters, to indicate whether it is feasible for issuers to implement the accommodation without the written notification requirement.

4. What impact would the alternative procedure described above have on the ability of women enrolled in group health plans established by objecting employers to receive seamless coverage for contraceptive services?

B. Other Approaches With Respect to Insured Plans Described in the Supplemental Briefing

In their supplemental brief, the plaintiffs in *Zubik* and the consolidated cases proposed additional modifications to the existing accommodation for insured plans, beyond those described in the Supreme Court's supplemental briefing order and discussed above. As in the alternative described above, the *Zubik* plaintiffs proposed that when an eligible employer with an insured plan requests insurance coverage that excludes contraceptive coverage to which the employer objects on religious grounds, the employer's issuer should be required to provide the required coverage separately. However, the *Zubik* plaintiffs further proposed that the separate coverage provided by the issuer should differ from the separate coverage required under the existing accommodation in two respects. First, the *Zubik* plaintiffs proposed that the issuer be required to offer women the opportunity to enroll in contraceptive-only insurance policies, rather than the issuer providing separate direct payments for contraceptive services. Second, the *Zubik* plaintiffs proposed that the affected women should be required to take affirmative steps to enroll in those contraceptive-only policies, rather than being automatically eligible for payments by the issuer for contraceptive services. Pet. Supp. Br. 3–12.¹⁵

The Departments seek comments on this approach, including with respect to the following:

1. The Departments ask objecting organizations with insured plans to indicate whether this alternative procedure would resolve their RFRA objections to the accommodation.

2. What impact would this approach have on the ability of women enrolled in group health plans established by

objecting employers to receive seamless coverage for contraceptive services?

3. Is this approach feasible for health insurance issuers?

4. Relying on the record developed in the prior rulemaking proceedings, the government's supplemental reply brief in *Zubik* explained that contraceptive-only insurance policies would be inconsistent with state laws regulating insurance and that an affirmative enrollment requirement would impose a barrier to access to preventive services. Gov't Supp. Reply Br. 3–6. The Departments seek further comment on those issues in this RFI.

5. Are there alternative procedure(s) or systems (without relying on contraceptive-only policies or imposing an affirmative enrollment requirement) that would resolve objecting organizations' RFRA objection to the accommodation? If so, please describe the procedure(s) or system(s) with specificity.

C. Self-Insured Plans

The Supreme Court's supplemental briefing order in *Zubik* addressed only employers with "insured plans."¹⁶ In its supplemental brief, the government described the operation of the accommodation for self-insured plans and explained that an alternative process like the one the Court posited for insured plans could not work for the many employers with self-insured plans:

If an employer has a self-insured plan, the statutory obligation to provide contraceptive coverage falls only on the plan—there is no insurer with a preexisting duty to provide coverage. Accordingly, to relieve self-insured employers of any obligation to provide contraceptive coverage while still ensuring that the affected women receive coverage without the employer's involvement, the accommodation establishes a mechanism for the government to designate the employer's TPA as a 'plan administrator' responsible for separately providing the required coverage under [ERISA]. That designation is made by the government, not the employer, and the employer does not fund, control, or have any other involvement with the separate portion of the ERISA plan administered by the TPA.

The government's designation of the TPA must be reflected in a written plan instrument. To satisfy that requirement, the accommodation relies on either (1) a written designation sent by the government to the TPA, which requires the government to know the TPA's identity, or (2) the self-certification form, which the regulations treat as a plan instrument in which the government designates the TPA as a plan administrator. There is no mechanism for requiring TPAs to provide separate contraceptive coverage without a plan instrument; self-insured employers could not opt out of the

contraceptive-coverage requirement by simply informing their TPAs that they do not want to provide coverage for contraceptives. Gov't Supp. Br. 16–17 (citations omitted).

The *Zubik* plaintiffs also stated that an arrangement like the one posited in the Supreme Court's briefing order for insured plans could not work for self-insured plans. See Pet. Supp. Br. 16–17.

Although the Departments have not identified any viable alternative to the existing accommodation for self-insured plans, they seek comment on any possible modifications to the accommodation for self-insured plans, including self-insured church plans that would resolve objecting organizations' RFRA objections while still providing seamless access to coverage, including with respect to the following:

1. Are any reasonable alternative means available under existing law by which the Departments could ensure that women enrolled in self-insured plans maintained by objecting employers receive separate contraceptive coverage that is not contracted, arranged, paid, or referred for by the objecting organization but that is provided through the same third party administrators that administer the rest of their health benefits?

2. The Departments ask objecting organizations with self-insured plans to indicate whether their RFRA objections to the existing accommodation could be resolved by any alternative procedure or system in which the objecting organization's third party administrator provides contraceptive coverage to the women enrolled in the organization's health plan, and, if so, to describe the procedure(s) or system(s) with specificity.

III. Collection of Information Requirements

This document does not impose information collection requirements, that is, reporting, recordkeeping or third-party disclosure requirements. Consequently, it need not be reviewed by the Office of Management and Budget under the authority of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

BILLING CODE 4120-01-P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA-R01-OAR-2015-0306; A-1-FRL-9949-31-Region 1]

Air Plan Approval; Rhode Island; Correction, Administrative and Miscellaneous Revisions

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing to approve a State Implementation Plan (SIP) revision submitted by the State of Rhode Island. This SIP revision includes fifteen revised Rhode Island Air Pollution Control Regulations. These regulations have been previously approved into the Rhode Island SIP and

the revisions to these regulations are mainly administrative in nature, but also include technical corrections and a few substantive changes to several of the rules. In addition, EPA is proposing a correction to the Rhode Island SIP to remove Rhode Island's odor regulation because it was previously erroneously approved into the SIP. The intended effect of this action is to propose to approve Rhode Island's fifteen revised regulations into the Rhode Island SIP and correct the Rhode Island SIP by removing Rhode Island's odor regulation. This action is being taken in accordance with the Clean Air Act.

DATES: Written comments must be received on or before August 22, 2016.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA-R01-OAR-2015-0306 at <http://www.regulations.gov>, or via email to mcdonnell.ida@epa.gov. For comments submitted at [Regulations.gov](http://www.regulations.gov), follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from [Regulations.gov](http://www.regulations.gov). For either manner of submission, the EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.* on the web, cloud, or other file sharing system). For additional submission methods, please contact the person identified in the "For Further Information Contact" section. For the full EPA public comment policy, information about CBI or multimedia

submissions, and general guidance on making effective comments, please visit <http://www2.epa.gov/dockets/commenting-epa-dockets>.

FOR FURTHER INFORMATION CONTACT:

Susan Lancey, Air Permits, Toxics and Indoor Programs Unit, Office of Ecosystem Protection, 5 Post Office Square—Suite 100, (Mail code OEP05-2), Boston, MA 02109-3912, telephone 617-918-1656, fax 617-918-0656, email lancey.susan@epa.gov.

SUPPLEMENTARY INFORMATION: In the Rules and Regulations section of this **Federal Register**, EPA is approving the State's SIP submittal as a direct final rule without prior proposal because the Agency views this as a noncontroversial submittal and anticipates no adverse comments. A detailed rationale for the approval is set forth in the direct final rule. If no adverse comments are received in response to this action rule, no further activity is contemplated. If EPA receives adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on this proposed rule. EPA will not institute a second comment period. Any parties interested in commenting on this action should do so at this time. Please note that if EPA receives adverse comment on an amendment, paragraph, or section of the rule and if that provision may be severed from the remainder of the rule, EPA may adopt as final those provisions of the rule that are not the subject of an adverse comment.

For additional information, see the direct final rule which is located in the Rules and Regulations section of this **Federal Register**.

Dated: July 5, 2016.

H. Curtis Spalding,

Regional Administrator, EPA New England.

DEPARTMENT OF AGRICULTURE

Information Collection Request; Registration Form To Request Electronic Access Code Information

AGENCY: Office of the Chief Information Officer, USDA.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3506), this notice announces and requests comments on the intention of the Office of the Chief Information Officer (OCIO) to request approval for the continuation of and changes to the U.S. Department of Agriculture (USDA) Registration Form to Request Electronic Access Code information collection to allow USDA customers to securely and confidently share data and receive services electronically. Authority for obtaining information from customers is included in the Freedom to E-File Act, the Electronic Signatures in Global and National Commerce Act (E-SIGN), the E-Government Act of 2002. Customer information is collected through the USDA eAuthentication Service (eAuth), located at <https://www.eauth.usda.gov>. The USDA eAuth service provides both public citizens as well as federal government employees with a secure single sign-on capability for USDA applications, management of user credentials, and verification of identity, authorization, and electronic signatures. USDA's eAuth Application service obtains customer information through an electronic self-registration process provided through the eAuth Web site. This voluntary online self-registration process and online identity proofing service (either in person at a USDA Service Center or online with national credit bureaus) enables USDA customers, as well as employees, to obtain accounts as authorized users that will provide single sign-on capability, self-registration, and account

management to access USDA Web applications and services via the Internet.

DATES: Comments on this notice must be received on or before September 20, 2016 to be assured of consideration.

ADDRESSES:

■ *Federal eRulemaking Portal:* This Web site provides the ability to type short comments directly into the comment field on this Web page or attach a file for lengthier comments. Go to <http://www.regulations.gov>. Follow the on-line instructions at that site for submitting comments.

■ Interested persons are invited to submit comments concerning this information collection to Adam Zeimet, 2150 Centre Avenue, Building A-Suite 350, Fort Collins, Colorado 80526. Fax comments should be sent to the attention of Adam Zeimet at fax number (970) 295-5528.

FOR FURTHER INFORMATION CONTACT: Adam Zeimet by telephone at (970) 295-5678, or via email at Adam.Zeimet@usda.gov.

SUPPLEMENTARY INFORMATION: In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), this notice announces the intention of USDA-OCIO-Client Technology Services-Identity Access Branch (Identity, Credential, and Access Management Program) to request approval for an existing collection.

Title: USDA Registration Form to Request Electronic Access Code.

OMB Number: 0503-0014.

Expiration Date of Approval: 12/31/2016.

Type of Request: Extension and revision of a currently approved information collection.

Abstract: The USDA OCIO has developed eAuthentication Application Services as a management and technical process that addresses user authentication and authorization prerequisites for providing services electronically. The process requires a one-time electronic self-registration to obtain an eAuth account for each USDA customer desiring access to on-line services or applications that require user authentication. USDA customers can self-register for an account at a Level of Assurance (LOA) 1 or 2 (and in the future LOA 3) as defined by OMB Memorandum M-04-04 and National Institute of Standards and Technology

Special Publication 800-63-2 (or superseding publications). Level of Assurance refers to a level of confidence in the user's claimed identity. An account at LOA 1 provides users with limited access to USDA Web site portals and applications that have minimal security requirements. An account at LOA 2 enables users to conduct official electronic business transactions via the Internet, enter into a contract with the USDA, and submit forms electronically via the Internet to USDA agencies. Due to the increased risk associated with these types of transactions, the identity of customers must be verified through a process called "identity proofing", in addition to completing an electronic self-registration. Identity proofing can be accomplished for customers in two ways: (1) By visiting a local registrant authority at a USDA Service Center; or (2) Through an online identity proofing service implemented with an integration with a National Credit Bureau. The new on-line identity proofing service will provide registrants with a more efficient mechanism to have their identity proofed. The on-line identity proofing requires responses to at least four randomly selected identity questions that are verified by a national credit bureau identity proofing service in an automated interface. The USDA OCIO is also developing a solution to provide accounts for public citizens at LOA 3, which leverages the same self-registration and identity proofing, but also incorporates strong multi-factor authentication credentials for access to secure, high risk, or sensitive systems, if authorized. Once an account is activated, customers may use the associated credential to access USDA resources that are protected by eAuth.

Estimate of Burden: Public reporting burden for this collection of information is estimated to take eight (8) minutes to complete the self-registration process for a LOA 1 account. LOA 2 (and in the future, LOA 3) account registration is estimated to be completed in one hour 40 minutes when travelling to a USDA Service Center to visit a local registration authority (expected to be approximately 30% of the registrants), or ten (10) minutes when using the on-line identity proofing service (expected to be approximately 70% of the registrants).

Respondents: Individual USDA Customers.

Estimated Number of Respondents per Level:

- LOA 1 Account: 114,256.
- LOA 2 Account: 17,848.
 - In Person ID Proofing (subset of LOA 2): 5,354.
 - Online\Remote ID Proofing (subset of LOA 2): 12,494.

Estimated Total Number of Respondents: 132,104.*Estimated Number of Responses per Respondent:* 1.*Estimated Total Annual Burden on Respondents:* 26,239.8 hours.

Comments are invited on (1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of the information on those who respond, through the use of appropriate automated, electronic, mechanical, technological or other forms of information technology collection methods. Copies of the information collection may be obtained from Mr. Zeimet by calling or emailing your request to the contact information above in the **FOR FURTHER INFORMATION** section. All responses to this notice will be summarized and included in the request for OMB approval. All comments will become a matter of public record.

Dated: July 11, 2016.

Jonathan Alboum,

Chief Information Officer, Office of the Chief Information Officer.

BILLING CODE 3410-KR-P

DEPARTMENT OF AGRICULTURE**Food Safety and Inspection Service**

[Docket No. FSIS-2016-0024]

Codex Alimentarius Commission: Meeting of the Codex Committee on Residues of Veterinary Drugs in Food

AGENCY: Office of the Deputy Under Secretary for Food Safety, USDA.

ACTION: Notice of public meeting and request for comments.

SUMMARY: The Office of the Deputy Under Secretary for Food Safety, U.S. Department of Agriculture (USDA), and the Food and Drug Administration

(FDA), are sponsoring a public meeting on September 22, 2016. The objective of the public meeting is to provide information and receive public comments on agenda items and draft United States (U.S.) positions to be discussed at the 23rd Session of the Codex Committee on Residues of Veterinary Drugs in Foods (CCRVDF) of the Codex Alimentarius Commission (Codex), taking place in Houston, Texas, October 17-21, 2016. The Deputy Under Secretary for Food Safety and the FDA recognize the importance of providing interested parties the opportunity to obtain background information on the 23rd Session of the CCRVDF and to address items on the agenda.

DATES: The public meeting is scheduled for Thursday, September 22, 2016, from 1:00 p.m.-4:00 p.m.

ADDRESSES: The public meeting will take place at the USDA, Jamie L. Whitten Building, 1400 Independence Avenue SW., Room 107-A, Washington, DC 20250.

Documents related to the 23rd Session of the CCRVDF will be accessible via the Internet at the following address: <http://www.codexalimentarius.org/meetings-reports/en/>.

Brandi Robinson, U.S. Delegate to the 23rd Session of the CCRVDF, invites U.S. interested parties to submit their comments electronically to the following email address: Brandi.Robinson@fda.hhs.gov.

Call-In-Number

If you wish to participate in the public meeting for the 23rd Session of the CCRVDF by conference call, please use the following call-in-number:

Call-in-Number: 1-888-844-9904.

The participant code will be posted on the following Web page: <http://www.fsis.usda.gov/wps/portal/ffsis/topics/international-affairs/us-codex-alimentarius/public-meetings>.

Registration

Attendees may register to attend the public meeting by emailing uscodex@ffsis.usda.gov by September 16, 2016. Early registration is encouraged as it will expedite entry into the building. The meeting will be held in a Federal building. Attendees should bring photo identification and plan for adequate time to pass through the security screening systems. Attendees who are not able to attend the meeting in person, but who wish to participate, may do so by phone.

FOR FURTHER INFORMATION ABOUT THE 23RD SESSION OF THE CCRVDF CONTACT: Brandi Robinson, ONADE International Coordinator, Center for Veterinary

Medicine, U.S. Food and Drug Administration, 7500 Standish Place, HFV-100, Rockville, MD 20855. Telephone: (240) 402-0645, Email: Brandi.Robinson@fda.hhs.gov.

For Further Information About the Public Meeting Contact

Kenneth Lowery, U.S. Codex Office, 1400 Independence Avenue SW., South Agriculture Building, Room 4861, Washington, DC 20250. Telephone: (202) 690-4042, Fax: (202) 720-3157, Email: Kenneth.Lowery@ffsis.usda.gov

SUPPLEMENTARY INFORMATION:**Background**

Codex was established in 1963 by two United Nations organizations, the Food and Agriculture Organization and the World Health Organization (FAO/WHO). Through adoption of food standards, codes of practice, and other guidelines developed by its committees, and by promoting their adoption and implementation by governments, Codex seeks to protect the health of consumers and ensure fair practices in the food trade.

The CCRVDF is responsible for determining priorities for the consideration of residues of veterinary drugs in foods, recommending maximum levels of such substances, developing codes of practice as may be required, and considering methods of sampling and analysis for the determination of veterinary drug residues in foods.

The Committee is hosted by the United States.

Issues To Be Discussed at the Public Meeting

The following items on the Agenda for the 23rd Session of the CCRVDF will be discussed during the public meeting:

- Matters referred to the Committee by Codex or its subsidiary bodies;
- Matters of interest arising from the FAO/WHO and from the 81st Meeting of the Joint FAO/WHO Expert Committee on Food Additives (JECFA);
- Report of the World Organisation for Animal Health activities, including the International Cooperation on Harmonisation of Technical Requirements for Registration of Veterinary Medicinal Products;
 - Proposed draft Risk Management Recommendations (RMR) for gentian violet at Step 3;
 - Proposed draft Maximum Residue Limits (MRLs) for ivermectin (cattle muscle) and lasalocid sodium (chicken, turkey, quail, and pheasant kidney, liver, muscle, skin and fat) at Step 4;
 - Proposed draft MRLs for ivermectin (cattle fat, kidney, muscle),

teflubenzuron (salmon fillet, muscle) and zilpaterol hydrochloride (cattle fat, kidney, liver, muscle) at Step 3;

- Discussion paper on the unintended presence of residues of veterinary drugs in food commodities resulting from the carry-over of drug residues into feed;

- Discussion paper on the establishment of a rating system to establish priority for the CCRVDF work;

- Global survey to provide information to the CCRVDF to move compounds from the database on countries' needs for MRLs to the JECFA Priority List (Report of Environmental Working Group) and Database on countries' needs for MRLs;

- Draft priority list of veterinary drugs requiring evaluation or re-evaluation by JECFA; and

- Other Business & Future Work.

Each issue listed will be fully described in documents distributed, or to be distributed, by the Secretariat before the Meeting. Members of the public may access or request copies of these documents (see **ADDRESSES**).

Public Meeting

At the September 22, 2016, public meeting, draft U.S. positions on the agenda items will be described and discussed, and attendees will have the opportunity to pose questions and offer comments. Written comments may be offered at the meeting or sent to the U.S. Delegate for the 23rd Session of the CCRVDF, Brandi Robinson (see **ADDRESSES**). Written comments should state that they relate to the activities of the 23rd Session of the CCRVDF.

Additional Public Notification

Public awareness of all segments of rulemaking and policy development is important. Consequently, FSIS will announce this **Federal Register** publication on-line through the FSIS Web page located at: <http://www.fsis.usda.gov/federal-register>.

FSIS also will make copies of this publication available through the FSIS Constituent Update, which is used to provide information regarding FSIS policies, procedures, regulations, **Federal Register** notices, FSIS public meetings, and other types of information that could affect or would be of interest to our constituents and stakeholders. The Update is available on the FSIS Web page. Through the Web page, FSIS is able to provide information to a much broader, more diverse audience. In addition, FSIS offers an email subscription service which provides automatic and customized access to selected food safety news and information. This service is available at: <http://www.fsis.usda.gov/subscribe>.

Options range from recalls to export information, regulations, directives, and notices. Customers can add or delete subscriptions themselves, and have the option to password protect their accounts.

USDA Non-Discrimination Statement

No agency, officer, or employee of the USDA shall, on the grounds of race, color, national origin, religion, sex, gender identity, sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program, or political beliefs, exclude from participation in, deny the benefits of, or subject to discrimination any person in the United States under any program or activity conducted by the USDA.

How To File a Complaint of Discrimination

To file a complaint of discrimination, complete the USDA Program Discrimination Complaint Form, which may be accessed online at http://www.ocio.usda.gov/sites/default/files/docs/2012/Complain_combined_6_8_12.pdf, or write a letter signed by you or your authorized representative.

Send your completed complaint form or letter to USDA by mail, fax, or email:

Mail: U.S. Department of Agriculture, Director, Office of Adjudication, 1400 Independence Avenue SW., Washington, DC 20250-9410.

Fax: (202) 690-7442.

Email: program.intake@usda.gov.

Persons with disabilities who require alternative means for communication (Braille, large print, audiotape, etc.), should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD).

Done at Washington, DC, on July 19, 2016.

Paulo Almeida,

U.S. Manager for Codex Alimentarius.

Forest Service

Missoula Resource Advisory Committee Meeting

AGENCY: Forest Service, USDA.

ACTION: Notice of meeting.

SUMMARY: The Missoula Resource Advisory Committee (RAC) will meet in Frenchtown, Montana. The committee is authorized under the Secure Rural Schools and Community Self-Determination Act (the Act) and operates in compliance with the Federal Advisory Committee Act. The purpose

of the committee is to improve collaborative relationships and to provide advice and recommendations to the Forest Service concerning projects and funding consistent with Title II of the Act. RAC information can be found at the following Web site: <http://www.fs.usda.gov/main/lolo/workingtogether/advisorycommittees>.

DATES: The meeting will be held on Wednesday, August 3, 2016, at 6 p.m.

All RAC meetings are subject to cancellation. For status of meeting prior to attendance, please contact the person listed under **FOR FURTHER INFORMATION CONTACT**.

ADDRESSES: The meeting will be held at Frenchtown Rural Fire Station 1, 16875 Marion Street, Frenchtown, Montana.

Written comments may be submitted as described under **SUPPLEMENTARY INFORMATION**. All comments, including names and addresses when provided, are placed in the record and are available for public inspection and copying. The public may inspect comments received at Ninemile Ranger District.

FOR FURTHER INFORMATION CONTACT: Sari Lehl, RAC Coordinator, by phone at 406-626-5201 or via email at slehl@fs.fed.us.

Individuals who use telecommunication devices for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1-800-877-8339 between 8:00 a.m. and 8:00 p.m., Eastern Standard Time, Monday through Friday.

SUPPLEMENTARY INFORMATION: The purpose of the meeting is for RAC project proposal presentations.

The meeting is open to the public. The agenda will include time for people to make oral statements of three minutes or less. Individuals wishing to make an oral statement should request in writing by August 1, 2016, to be scheduled on the agenda. Anyone who would like to bring related matters to the attention of the committee may file written statements with the committee staff before or after the meeting. Written comments and requests for time to make oral comments must be sent to Sari Lehl, RAC Coordinator, Ninemile Ranger District, 20325 Remount Road, Huson, Montana 59846; by email to slehl@fs.fed.us, or via facsimile to 406-626-5201.

Meeting Accommodations: If you are a person requiring reasonable accommodation, please make requests in advance for sign language interpreting, assistive listening devices, or other reasonable accommodation. For access to the facility or proceedings, please contact the person listed in the

section titled **FOR FURTHER INFORMATION CONTACT.**

All reasonable accommodation requests are managed on a case by case basis.

Dated: June 14, 2016.

Erin Phelps,

District Ranger.

DEPARTMENT OF AGRICULTURE

Forest Service

Assessment Report of Ecological, Social and Economic Conditions, Trends and Sustainability for the Ashley National Forest

AGENCY: Forest Service, USDA.

ACTION: Notice of initiating the assessment phase of the forest plan revision for the Ashley National Forest.

SUMMARY: The Ashley National Forest (Forest), located in northeastern Utah and southwestern Wyoming, is initiating the first phase of the forest planning process pursuant to the National Forest System Land Management Planning rule (36 CFR part 219). This process will result in a revised forest land management plan (forest plan) which provides strategic direction for management of resources on the Ashley National Forest for the next ten to fifteen years. The first phase of the planning process involves assessing ecological, social and economic conditions and trends in the planning area and documenting the findings in an assessment report.

The assessment phase is just beginning on the Ashley National Forest and interested parties are invited to contribute to the development of the assessment. The Forest will be hosting public meetings to explain the revision process and invite the public to share information relevant to the assessment, including sources of existing information and local knowledge of current conditions and trends in the natural resources, social values, and goods and services produced by lands within the Ashley National Forest.

DATES: Public meetings to discuss development of the assessment will be held in July and August 2016. Dates, locations and agendas will be posted on the Forest Web site (www.fs.usda.gov/goto/AshleyForestPlan) and mailed to individuals and organizations on our mailing list. Another round of meetings is planned for November-December 2016, when a draft assessment is ready for public review. We expect to

complete the assessment in the spring of 2017. Following completion of the assessment, the Forest will initiate procedures pursuant to the National Environmental Policy Act (NEPA) to prepare and evaluate a revised forest plan.

ADDRESSES: Written correspondence can be sent to: Ashley National Forest, Attn: Forest Plan, 355 N. Vernal Avenue, Vernal, UT 84078; or emailed to AshleyForestPlan@fs.fed.us.

FOR FURTHER INFORMATION CONTACT:

Kathy Paulin, Forest Plan Revision Team Leader at the mailing address above; or call 435-781-5118. Individuals who use telecommunication devices for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1-800-877-8339 between 8 a.m. and 8 p.m. Eastern Time, Monday through Friday. More information on our plan revision process is available on the Forest's planning Web site at www.fs.usda.gov/goto/AshleyForestPlan. You may also contact us by email at: AshleyForestPlan@fs.fed.us.

SUPPLEMENTARY INFORMATION: The National Forest Management Act (NFMA) of 1976 requires that every National Forest System (NFS) unit develop and periodically revise a forest plan. The procedures for doing this are in federal regulation ("Planning Rule," 36 CFR 219) and in Forest Service directives. Forest plans provide strategic direction for managing forest resources for ten to fifteen years, and are adaptive and amendable as conditions change over time.

Under the Planning Rule, an assessment of ecological, social, and economic conditions and trends in the planning area is the first phase of a 3-phase planning process (36 CFR 219.6). The second phase is guided, in part, by the National Environmental Policy Act (NEPA). It includes preparation of a draft revised forest plan, one or more alternatives to the draft plan, and a draft environmental impact statement (DEIS) for public review and comment. This is followed by a final environmental impact statement (FEIS) and draft decision. The draft decision is subject to the objection procedures of 36 CFR part 219, subpart B, before it can be finalized. The third stage of the process is monitoring and feedback, which is ongoing over the life of the revised forest plan.

This notice announces the start of the Ashley National Forest's assessment process. The assessment will rapidly evaluate existing information about relevant ecological, economic, cultural and social conditions, trends and

sustainability and their relationship to the current forest plan within the context of the broader landscape. The assessment does not include any decisions or require any actions on the ground. Its purpose is to provide a solid base of information that will be used to identify preliminary needs for change in the current forest plan, and to inform development of a revised plan.

With this notice, the Ashley National Forest invites other governments, non-governmental parties, and the public to contribute to assessment development. The intent of public participation during this phase is to identify as much relevant information as possible to inform the plan revision process. We also encourage contributors to share their concerns and perceptions of risk to social, economic, and ecological systems in or connected to the planning area.

As public engagement opportunities are scheduled, public announcements will be made and information will be posted on the Forest's Web site: www.fs.usda.gov/goto/AshleyForestPlan. To contribute information or ask to be added to our mailing list, please call 435-781-5118 or email AshleyForestPlan@fs.fed.us.

Responsible Official: The responsible official for the revision of the land management plan for the Ashley National Forest is the Forest Supervisor, John R. Erickson, Ashley National Forest, 355 N. Vernal Avenue, Vernal, UT 84078.

Dated: July 15, 2016.

John R. Erickson,

Forest Supervisor.

Tuolumne and Mariposa Counties Resource Advisory Committee Meeting

AGENCY: Forest Service, USDA.

ACTION: Notice of meeting.

SUMMARY: The Tuolumne and Mariposa Counties Resource Advisory Committee (RAC) will meet in Sonora, California. The committee is authorized under the Secure Rural Schools and Community Self-Determination Act (the Act) and operates in compliance with the Federal Advisory Committee Act. The purpose of the committee is to improve collaborative relationships and to provide advice and recommendations to the Forest Service concerning projects and funding consistent with title II of

the Act. RAC information can be found at the following Web site: <http://www.fs.usda.gov/main/pts/specialprojects/racweb>.

DATES: The meeting will be held on August 22, 2016, from 12 p.m. to 3 p.m.

All RAC meetings are subject to cancellation. For status of meeting prior to attendance, please contact the person listed under **FOR FURTHER INFORMATION CONTACT**.

ADDRESSES: The meeting will be held at the Stanislaus National Forest Supervisor's Office, Tuolumne Room, 19777 Greenley Road, Sonora, California. A phone line will be available to attend the meeting via conference call; for the conference line information, please contact the person listed under **FOR FURTHER INFORMATION CONTACT**.

Written comments may be submitted as described under **SUPPLEMENTARY INFORMATION**. All comments, including names and addresses when provided, are placed in the record and are available for public inspection and copying. The public may inspect comments received at the Stanislaus National Forest Supervisor's Office. Please call ahead to facilitate entry into the building.

FOR FURTHER INFORMATION CONTACT: Beth Martinez, RAC Coordinator, by phone at 209-532-3671 extension 321 or via email at bethmartinez@fs.fed.us.

Individuals who use telecommunication devices for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1-800-877-8339 between 8:00 a.m. and 8:00 p.m., Eastern Standard Time, Monday through Friday.

SUPPLEMENTARY INFORMATION: The purpose of the meeting is to:

1. Vote on project proposals; and
2. Make recommendations to the Forest Service from the Tuolumne and Mariposa Counties RAC.

The meeting is open to the public. The agenda will include time for people to make oral statements of three minutes or less. Individuals wishing to make an oral statement should request in writing by at least a week in advance to be scheduled on the agenda. Anyone who would like to bring related matters to the attention of the committee may file written statements with the committee staff before or after the meeting. Written comments and requests for time for oral comments must be sent to Beth Martinez, RAC Coordinator, Stanislaus National Forest, 19777 Greenley Road, Sonora, California 95370; by email to bethmartinez@fs.fed.us, or via facsimile to Attention: Beth Martinez at 209-533-1890.

Meeting Accommodations: If you are a person requiring reasonable accommodation, please make requests in advance for sign language interpreting, assistive listening devices, or other reasonable accommodation. For access to the facility or proceedings, please contact the person listed in the section titled **FOR FURTHER INFORMATION CONTACT**. All reasonable accommodation requests are managed on a case by case basis.

Dated: July 14, 2016.

COMMISSION ON CIVIL RIGHTS

Agenda and Notice of Public Meeting of the New York Advisory Committee

AGENCY: Commission on Civil Rights.

ACTION: Announcement of meeting.

SUMMARY: Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights (Commission), and the Federal Advisory Committee Act (FACA), that a planning meeting of the New York Advisory Committee to the Commission will convene at 12:30 p.m. (EDT) on Wednesday, August 3, 2016 at the Midtown Conference Center of Sullivan & Cromwell, located at 535 Madison Ave., New York, NY 10022. The purpose of the planning meeting is for staff to conduct an orientation for new and returning members and for the Advisory Committee to discuss project planning for its new appointment term.

Persons needing accessibility services should contact the Eastern Regional Office at least ten (10) working days before the scheduled date of the meeting. Please contact Evelyn Bohor at eroATisccr.gov.

Members of the public are invited to submit written comments; the comments must be received in the regional office by Monday, September 5, 2016. Written comments may be mailed to the Eastern Regional Office, U.S. Commission on Civil Rights, 1331 Pennsylvania Avenue, Suite 1150, Washington, DC 20425, faxed to (202)

376-7548, or emailed to Evelyn Bohor at eroATusccr.gov. Persons who desire additional information may contact the Eastern Regional Office at (202) 376-7533.

Records and documents discussed during the meeting will be available for public viewing as they become available at: <https://database.faca.gov/committee/meetings.aspx?cid=265> and clicking on the "Meeting Details" and "Documents" links. Records generated from this meeting may also be inspected and reproduced at the Eastern Regional Office, as they become available, both before and after the meeting. Persons interested in the work of this advisory committee are advised to go to the Commission's Web site, www.usccr.gov, or to contact the Eastern Regional Office at the above phone number, email or street address.

Agenda

- I. Welcome and Introductions
 - Rollcall
 - Planning Meeting
 - Discuss Project Planning
- II. Other Business
 - Adjournment

DATES: Wednesday, August 3, 2016 at 12:00 p.m. (EDT).

ADDRESSES: The meeting will be held at: Sullivan & Cromwell, Midtown Conference Center, 535 Madison Ave., New York, NY 10022.

FOR FURTHER INFORMATION CONTACT: Ivy L. Davis, DFO, ero@usccr.gov, 202-376-7533.

Dated: July 19, 2016.

David Mussatt,
Chief, Regional Programs Unit.

BILLING CODE 6335-01-P

COMMISSION ON CIVIL RIGHTS

Notice of Public Meeting of the Alaska State Advisory Committee

AGENCY: U.S. Commission on Civil Rights.

ACTION: Announcement of public meeting.

DATES: Monday, August 1, 2016.

TIME: 12:00 p.m.–1:00 p.m. (Alaska Time).

SUMMARY: Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights (Commission) and the Federal Advisory Committee Act (FACA) that a webinar meeting of the Alaska State Advisory Committee (Committee) to the Commission will be held at 12:00 p.m. (Alaska Time)

Monday, August 1, 2016 with the Alaska Division of Elections regarding the status of recent settlements on voting access for limited English proficient (LEP) persons, as well as the impact of recent pre-clearance changes to the Voting Rights Act of 1965. This meeting is available to the public through the following toll-free call-in number: Toll-Free Phone Number: 888-523-1228; when prompted, please provide conference ID number: 4919191.

Any interested member of the public may call this number and listen to the meeting. Callers can expect to incur charges for calls they initiate over wireless lines, and the Commission will not refund any incurred charges. Callers will incur no charge for calls they initiate over land-line connections to the toll-free telephone number. Persons with hearing impairments may also follow the proceedings by first calling the Federal Relay Service at 1-800-977-8339 and providing the Service with the conference call number and conference ID number. Hearing-impaired persons who will attend the meeting and require the services of a sign language interpreter should contact the Regional Office at least ten (10) working days before the scheduled date of the meeting.

Members of the public are entitled to make comments during the open period at the end of the meeting. Members of the public may also submit written comments within thirty (30) days of the meeting. The comments must be received in the Western Regional Office of the Commission by Monday, August 29, 2016. The address is Western Regional Office, U.S. Commission on Civil Rights, 300 N. Los Angeles Street, Suite 2010, Los Angeles, CA 90012. Persons wishing to email their comments may do so by sending them to Angela French-Bell, Regional Director, Western Regional Office, at abell@usccr.gov.

Records and documents discussed during the meeting will be available for public viewing prior to and after the meeting at <http://facadatabase.gov/committee/meetings.aspx?cid=234>. Please click on the "Meeting Details" and "Documents" links. Records generated from this meeting may also be inspected and reproduced at the Western Regional Office, as they become available, both before and after the meeting. Persons interested in the work of this Committee are directed to the Commission's Web site, <http://www.usccr.gov>, or may contact the Western Regional Office at the above email or street address.

Agenda for August 1, 2016

- I. Introductory Remarks
- II. Discussion with Alaska Division of Elections
- III. Public Comment

BILLING CODE 6335-01-P

COMMISSION ON CIVIL RIGHTS

Notice of Public Meeting of the Nevada State Advisory Committee

AGENCY: U.S. Commission on Civil Rights.

ACTION: Announcement of public meeting.

DATES: Friday, July 29, 2016.

TIME: 1:00 p.m.–2:30 p.m. (Pacific Time).

SUMMARY: Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights (Commission) and the Federal Advisory Committee Act (FACA) that a meeting of the Nevada Advisory Committee (Committee) to the Commission will be held on Friday, July 29, 2016, at the Department of Employment, Training and Rehabilitation, 2800 East St. Louis Avenue, Conference Room C, Las Vegas, NV 89104. The meeting is scheduled to begin at 1:00 p.m. and adjourn at approximately 2:30 p.m. The purpose of the meeting is for the Committee to consider and discuss potential topics for their FY17 civil rights project.

Members of the public are entitled to make comments during the open period at the end of the meeting. Members of the public may also submit written comments within thirty (30) days of the meeting. The comments must be received in the Western Regional Office of the Commission by Monday, August 29, 2016. The address is Western Regional Office, U.S. Commission on Civil Rights, 300 N. Los Angeles Street, Suite 2010, Los Angeles, CA 90012. Persons wishing to email their comments may do so by sending them to Angela French-Bell, Regional

Director, Western Regional Office, at abell@usccr.gov.

Records and documents discussed during the meeting will be available for public viewing prior to and after the meeting at <http://facadatabase.gov/committee/meetings.aspx?cid=261>.

Please click on the "Meeting Details" and "Documents" links. Records generated from this meeting may also be inspected and reproduced at the Western Regional Office, as they become available, both before and after the meeting. Persons interested in the work of this Committee are directed to the Commission's Web site, <http://www.usccr.gov>, or may contact the Western Regional Office at the above email or street address.

Agenda for July 29, 2016

- I. Welcome
- II. Introductory Remarks
- III. Orientation
- IV. Discussion Regarding Potential FY17 Topics
- V. Public Comment
- VI. Adjournment

FOR FURTHER INFORMATION CONTACT:

Angela French-Bell, DFO, at (213) 894-3437 or abell@usccr.gov.

Dated: July 18, 2016.

DEPARTMENT OF COMMERCE

International Trade Administration

[Docket No.: 160713610-6610-01]

RIN 0625-XC020

Cost Recovery Fee Schedule for the EU-U.S. Privacy Shield Framework

AGENCY: International Trade Administration, U.S. Department of Commerce.

ACTION: Notice of implementation of a cost recovery program fee with request for comments.

SUMMARY: Consistent with the guidelines in OMB Circular A-25, the U.S. Department of Commerce's International Trade Administration (ITA) is implementing a cost recovery program fee to support the operation of the EU-U.S. Privacy Shield Framework (Privacy Shield), which will require that U.S. organizations pay an annual fee to ITA in order to participate in the Privacy Shield. The cost recovery program will support the administration and supervision of the Privacy Shield program and support the provision of

Privacy Shield-related services, including education and outreach. The Privacy Shield fee schedule will become effective on August 1, 2016, when ITA will begin accepting self-certifications. ITA also is providing the public with the opportunity to comment on the fee schedule. ITA will reassess the fee schedule after the first year of implementation and, in accordance with OMB Circular A–25, at least every two years thereafter.

DATES: This fee schedule is effective August 1, 2016. Comments must be received by August 22, 2016.

ADDRESSES: You may submit comments by either of the following methods:

- *Federal eRulemaking Portal:*

www.Regulations.gov. The identification number is ITA–2016–0007.

- Postal Mail/Commercial Delivery to Grace Harter, Department of Commerce, International Trade Administration, Room 20001, 1401 Constitution Avenue NW., Washington, DC and reference “Privacy Shield Fee Structure, ITA–2016–0007” in the subject line.

Instructions: You must submit comments by one of the above methods to ensure that we receive the comments and consider them. Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered. All comments received are a part of the public record and will generally be posted to *http://www.regulations.gov* without change. All Personal Identifying Information (for example, name, address, etc.) voluntarily submitted by the commenter may be publicly accessible. Do not submit Confidential Business Information or otherwise sensitive or protected information.

Commerce Department will accept anonymous comments (enter “N/A” in the required fields if you wish to remain anonymous). Attachments to electronic comments will be accepted in Microsoft Word, Excel, WordPerfect, or Adobe PDF file formats only. Supporting documents and any comments we receive on this docket may be viewed at *http://www.regulations.gov/ITA-2016-0002*.

FOR FURTHER INFORMATION CONTACT:

Requests for additional information regarding the EU–U.S. Privacy Shield Framework should be directed to David Ritchie or Grace Harter, Department of Commerce, International Trade Administration, Room 20001, 1401 Constitution Avenue NW., Washington, DC, tel. 202–482–4936 or 202–482–1512 or via email at *privacyshield@trade.gov*. Additional information on ITA fees is available at *trade.gov/fees*.

SUPPLEMENTARY INFORMATION:

Background

Consistent with the guidelines in OMB Circular A–25 (*https://www.whitehouse.gov/omb/circulars/a025*), federal agencies are responsible for implementing cost recovery program fees.

The role of ITA is to strengthen the competitiveness of U.S. industry, promote trade and investment, and ensure fair trade through the rigorous enforcement of our trade laws and agreements. ITA works to promote privacy policy frameworks to facilitate the flow of data across borders to support international trade.

The United States and the European Union (EU) share the goal of enhancing privacy protection but take different approaches to protecting personal data. Given those differences, the Department of Commerce (DOC) developed the Privacy Shield in consultation with the European Commission, as well as with industry and other stakeholders, to provide organizations in the United States with a reliable mechanism for personal data transfers to the United States from the European Union while ensuring the protection of the data as required by EU law.

In July 2016, the European Commission approved the EU–U.S. Privacy Shield Framework. The published Privacy Shield Principles are available at: [insert link]. The DOC has issued the Privacy Shield Principles under its statutory authority to foster, promote, and develop international commerce (15 U.S.C. 1512). ITA will administer and supervise the Privacy Shield, including by maintaining and making publicly available an authoritative list of U.S. organizations that have self-certified to the DOC. U.S. organizations submit information to ITA to self-certify their compliance with Privacy Shield. ITA will accept self-certification submissions beginning on August 1, 2016. At a future date, ITA will publish for public notice and comment information collections as described in the Privacy Shield Framework consistent with the Paperwork Reduction Act.

U.S. organizations considering self-certifying to the Privacy Shield should review the Privacy Shield Framework. In summary, in order to enter the Privacy Shield, an organization must (a) be subject to the investigatory and enforcement powers of the Federal Trade Commission (FTC) or the Department of Transportation; (b) publicly declare its commitment to comply with the Principles through self-certification to the DOC; (c) publicly

disclose its privacy policies in line with the Principles; and (d) fully implement them.

Self-certification to the DOC is voluntary; however, an organization’s failure to comply with the Principles after its self-certification is enforceable under Section 5 of the Federal Trade Commission Act prohibiting unfair and deceptive acts in or affecting commerce (15 U.S.C. 45(a)) or other laws or regulations prohibiting such acts.

ITA is implementing a cost recovery program to support the operation of the Privacy Shield, which will require U.S. organizations to pay an annual fee to ITA in order to participate in the program. The cost recovery program will support the administration and supervision of the Privacy Shield program and support the provision of Privacy Shield-related services, including education and outreach. The fee a given organization will be charged will be based on the organization’s annual revenue:

Fee Schedule:

EU–U.S. PRIVACY SHIELD FRAMEWORK COST RECOVERY PROGRAM

Organization’s annual revenue	Annual fee
\$0 to \$5 million	\$250
Over \$5 million to \$25 million	650
Over \$25 million to \$500 million	1,000
Over \$500 million to \$5 billion	2,500
Over \$5 billion	3,250

Organizations will have additional direct costs associated with participating in the Privacy Shield. For example, Privacy Shield organizations must provide a readily available independent recourse mechanism to hear individual complaints at no cost to the individual. Furthermore, organizations will be required to pay contributions in connection with the arbitral model, as described in Annex I to the Principles.

Method for Determining Fees

ITA collects, retains, and expends user fees pursuant to delegated authority under the Mutual Educational and Cultural Exchange Act as authorized in its annual appropriations acts.

The EU–U.S. Privacy Shield Framework was developed to provide organizations in the United States with a reliable mechanism for personal data transfers that underpin the trade and investment relationship between the United States and the EU.

Fees are set taking into account the operational costs borne by ITA to administer and supervise the Privacy Shield program. The Privacy Shield program will require a significant commitment of resources and staff. The Privacy Shield Framework includes commitments from ITA to:

- Maintain a Privacy Shield Web site;
- verify self-certification requirements submitted by organizations to participate in the program;
- expand efforts to follow up with organizations that have been removed from the Privacy Shield List;
- search for and address false claims of participation;
- conduct periodic compliance reviews and assessments of the program;
- provide information regarding the program to targeted audiences;
- increase cooperation with EU data protection authorities;
- facilitate resolution of complaints about non-compliance;
- hold annual meetings with the European Commission and other authorities to review the program, and
- provide an update of laws relevant to Privacy Shield.

In setting the Privacy Shield fee schedule, ITA determined that the services provided offer special benefits to an identifiable recipient beyond those that accrue to the general public. ITA calculated the actual cost of providing its services in order to provide a basis for setting each fee. Actual cost incorporates direct and indirect costs, including operations and maintenance, overhead, and charges for the use of capital facilities. ITA also took into account additional factors, including adequacy of cost recovery, affordability, and costs associated with alternative options available to U.S. organizations for the receipt of personal data from the EU.

ITA is establishing a 5-tiered fee schedule that will promote the participation of small organizations in Privacy Shield. A multiple-tiered fee schedule allows ITA to offer the organizations with lower revenue a lower fee. In setting the 5 tiers, ITA considered, in conjunction with the factors mentioned above: (1) The Small Business Administration's guidance on identifying SMEs in various industries most likely to participate in the Privacy Shield, such as computer services, software and information services; (2) the likelihood that small companies would be expected to receive less personal data and thereby use fewer government resources; and (3) the likelihood that companies with higher revenue would have more customers

whose data they process, which would use more government resources dedicated to administering and overseeing Privacy Shield. For example, if a company holds more data it could reasonably produce more questions and complaints from consumers and the European Union's Data Protection Authorities (DPAs). ITA has committed to facilitating the resolution of individual complaints and to communicating with the FTC and the DPAs regarding consumer complaints. Lastly, the fee increases between the tiers are based in part on projected program costs and estimated participation levels among companies within each tier.

Conclusion

Based on the information provided above, ITA believes that its Privacy Shield cost recovery fee schedule is consistent with the objective of OMB Circular A-25 to "promote efficient allocation of the nation's resources by establishing charges for special benefits provided to the recipient that are at least as great as the cost to the U.S. Government of providing the special benefits . . ." OMB Circular A-25(5)(b). ITA is providing the public with the opportunity to comment on the fee schedule, and it will consider these comments when it reassesses the fee schedule. ITA will reassess the fee schedule after the first year of implementation and, in accordance with OMB Circular A-25, at least every two years thereafter.

Dated: July 20, 2016.

Edward M. Dean,

*Deputy Assistant Secretary for Services,
International Trade Administration, U.S.
Department of Commerce.*

DEPARTMENT OF COMMERCE

International Trade Administration

[A-570-912]

Certain New Pneumatic Off-the-Road Tires From the People's Republic of China: Notice of Amended Final Determination Pursuant to a Final Court Decision

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: On October 1, 2010, the United States Court of International Trade ("CIT") sustained the remand redetermination made by the Department of Commerce

("Department") pursuant to the CIT's remand of the final determination in the antidumping duty investigation on certain new pneumatic off-the-road tires ("OTR tires") from the People's Republic of China ("PRC"). This case arises out of the Department's final determination in the antidumping duty ("AD") investigation on OTR tires from the PRC. See *Certain New Pneumatic Off-The-Road-Tires from the People's Republic of China: Final Affirmative Determination of Sales at Less Than Fair Value and Partial Affirmative Determination of Critical Circumstances*, 73 FR 40485 (July 15, 2008), as amended by *Certain New Pneumatic Off-the-Road Tires from the People's Republic of China: Notice of Amended Final Affirmative Determination of Sales at Less Than Fair Value and Antidumping Duty Order*, 73 FR 51624 (September 4, 2008) (collectively, "Final Determination").

The Department notified the public that the final CIT judgment (See *GPX Int'l Tire Corp. v. United States*, Consol. Ct. No. 08-00285, Slip Op. 10-112 (Ct. Int'l Trade October 1, 2010) ("GPX III")) in this case was not in harmony with the Department's final affirmative determination in the AD investigation of OTR tires from the PRC on October 12, 2010. See *Certain New Pneumatic Off-the-Road Tires from the People's Republic of China: Notice of Decision of the Court of International Trade Not in Harmony*, 75 FR 62504 (October 12, 2010) ("2010 Timken Notice"). As there is now a final and conclusive decision in this case, the Department is amending its final determination with respect to the antidumping duty rate calculated for the separate rate companies.

DATES: Effective March 23, 2015.

FOR FURTHER INFORMATION CONTACT: Andrew Medley, AD/CVD Operations, Office III, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone (202) 482-4987.

SUPPLEMENTARY INFORMATION:

Background

In July 2008, the Department published a final determination in which it found that OTR tires from the PRC are being, or are likely to be, sold in the United States at less-than-fair-value ("LTFV").¹ As part of the *Final Determination*, the Department calculated a margin for the separate-rate

¹ See *Final Determination*.

respondents of 12.91 percent.² Starbright Tire Co., Ltd. (“Starbright”), its importer GPX International Tire Corporation (“GPX”), petitioners Titan Tire Corporation and the United Steel, Paper and Forestry, Rubber, Manufacturing, Energy, Allied and Industrial Service Workers International Union, AFL–CIO–CLC (collectively, “Titan”), and domestic interested party Bridgestone Americas, Inc. and Bridgestone Americas Tire Operations, LLC (collectively, “Bridgestone”), each timely challenged various aspects of the *Final Determination* to the CIT. The antidumping duty case was then consolidated with the companion countervailing duty case at the CIT. With regard to the antidumping duty case, among the issues raised before the Court was the valuation of wire input consumed by two of the respondent companies, Starbright and Tianjin United Tire & Rubber International Co., Ltd. (“TUTRIC”), under the factors of production methodology to calculate normal value in a non-market economy country pursuant to section 773(c)(1)(B) of the Tariff Act of 1930, as amended (“the Act”).

On August 4, 2010, pursuant to the Department’s request for a voluntary remand, the CIT remanded the wire

input valuation issue to the Department for reconsideration or further explanation.³ In a remand redetermination filed on September 3, 2010, the Department determined that record evidence supported using a different surrogate value for the wire input consumed by Starbright and TUTRIC in the production of OTR tires.⁴ As a result of this change, the weighted-average dumping margin calculated for subject merchandise produced by Starbright and exported by Starbright/GPX changed from 29.93 percent to 31.79 percent, the weighted average dumping margin calculated for subject merchandise produced and exported by TUTRIC changed from 8.44 percent to 10.08 percent, and the weighted-average dumping margin calculated for separate rate companies changed from 12.91 percent to 13.92 percent.⁵ The CIT affirmed the Department’s remand redetermination on October 1, 2010.⁶ On October 12, 2010, the Department notified the public that the final CIT judgment in this case was not in harmony with the Department’s final affirmative determination in the AD investigation of OTR tires from the PRC.⁷ Subsequently, domestic litigation over issues pertaining to the consolidated countervailing duty case

continued.⁸ On March 13, 2015, the United States Court of Appeals for the Federal Circuit (“Federal Circuit”) issued a final and conclusive decision in this case, which no party appealed.⁹ Because there is now a final and conclusive court decision in this case, the Department is amending the final determination for the separate rate respondents.

Amended Final Determination

Since the *Final Determination*, the Department has established a new cash deposit rate for TUTRIC and for Starbright.¹⁰ Therefore, this amended final determination does not change TUTRIC’s or Starbright’s cash deposit rates. Because there is now a final and conclusive court decision with respect to the *Final Determination*, the revised cash deposit rate for the separate rate companies is 13.92 percent. For those separate-rate companies that do not have a superseding cash deposit rate identified in the table below, the Department will issue revised cash deposit instructions to U.S. Customs and Border Protection, adjusting the cash deposit rate for the below separate-rate companies to 13.92 percent, effective March 23, 2015.¹¹

Certain Frozen Warmwater Shrimp From the Socialist Republic of Vietnam: Notice of Implementation of Determination Under Section 129 of the Uruguay Round Agreements Act and Partial Revocation of the Antidumping Duty Order

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: On July 18, 2016, the Department of Commerce (“Department”) issued its final determination under a section 129 proceeding regarding the fourth administrative review of the antidumping duty order on certain frozen warmwater shrimp from the Socialist Republic of Vietnam (“Vietnam”) with respect to the Minh Phu Group. On July 18, 2016, the U.S. Trade Representative (“USTR”) instructed the Department to implement the 129 Final Determination. As a result, the Department is now implementing its determination.

DATES: Effective July 18, 2016.

FOR FURTHER INFORMATION CONTACT: Irene Gorelik, AD/CVD Operations, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482-6905.

SUPPLEMENTARY INFORMATION:

Nature of the Proceeding

Section 129 of the Uruguay Rounds Agreement Act (“URAA”)¹ allows the Department to amend, rescind, or modify a determination found by a WTO dispute settlement panel or the Appellate Body to be inconsistent with U.S. obligations under the Antidumping Agreement. Specifically, section 129(b)(2) provides that, “notwithstanding any provision of the Tariff Act of 1930 . . .,” within 180 days after receipt of a written request from the U.S. Trade Representative, the Department shall issue a determination that would render its actions not inconsistent with an adverse finding of a WTO panel or the Appellate Body.² The Statement of Administrative Action, URAA, H. Doc. 316, Vol. 1, 103d Cong. (1994) (“SAA”), refers variously to such a determination by the Department as a “new,” “second,” and “different” determination.³ After consulting with the Department and the appropriate congressional committees, the USTR may direct the Department to implement, in whole or in part, the new determinations made under section 129 of the URAA.⁴ Pursuant to section 129(c) of the URAA, the new determinations shall apply with respect to unliquidated entries of the subject merchandise that are entered, or withdrawn from warehouse, for consumption on or after the date on which the USTR directs the Department to implement the new determinations.⁵ This determination may be subject to judicial review separate and apart from judicial review of the Department’s original determination.⁶

Background

At the written request of USTR, the Department informed interested parties

on May 20, 2016, that it was initiating a proceeding under section 129 of the URAA to implement certain findings of the WTO dispute settlement panel in *United States—Anti-Dumping Measures on Certain Frozen Warmwater Shrimp from VietNam* (WTO/DS429) (“*Panel Report*”).⁷ On May 20, 2016, the Department issued its preliminary determination in this proceeding⁸ in which the Department recalculated the weighted-average dumping margin for the Minh Phu Group⁹ from the *AR4 Amended Final*¹⁰ by eliminating the denial of offsets for non-dumped sales

On July 6, 2016, the Department solicited comments from interested

⁷ See Letter from USTR, re: “Request to Comply with WTO Panel Report,” dated May 20, 2016. See also Letter from the Department to All Interested Parties, re: “Initiation of DS429,” dated May 20, 2016.

⁸ See Memorandum from Christian Marsh, Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations to Paul Piquado, Assistant Secretary for Enforcement and Compliance, re: “Preliminary Determination Under Section 129 of the Uruguay Round Agreements Act: Antidumping Measures on Certain Frozen Warmwater Shrimp from the Socialist Republic of Vietnam,” dated May 20, 2016 (“129 Preliminary Determination”). See also Memorandum to the File, from Irene Gorelik, Senior Analyst, Office V, re: “Preliminary Determination Under Section 129 of the Uruguay Round Agreements Act: Antidumping Measures on Certain Frozen Warmwater Shrimp from the Socialist Republic of Vietnam (“Vietnam”)” (“MPG 129 Prelim Memo”), dated May 20, 2016.

⁹ For purposes of this proceeding, the “Minh Phu Group” includes the following companies: (1) Minh Phu Seafood Export Import Corporation (and affiliates Minh Qui Seafood Co., Ltd. and Minh Phat Seafood Co., Ltd.), (2) Minh Phu Seafood Corp., (3) Minh Phu Seafood Corporation, (4) Minh Phu Seafood Pte, (5) Minh Qui Seafood, (6) Minh Qui Seafood Co., Ltd., (7) Minh Qui, (8) Minh Phat Seafood Co., Ltd., (9) Minh Phat, (10) Minh Phat Seafood, (11) Minh Phat Seafood Corp., (12) Minh Phu Hau Giang Seafood Joint Stock Company, (13) Minh Phu Hau Giang Seafood Co., Ltd., (14) Minh Phu Hau Giang Seafood Corp., and (15) Minh Phu Hau Giang Seafood Processing Co., Ltd. See 129 Final Determination.

¹⁰ See *Certain Frozen Warmwater Shrimp from the Socialist Republic of Vietnam: Final Results and Partial Rescission of Antidumping Duty Administrative Review*, 75 FR 47771 (August 9, 2010) (“*AR4 Final*”) and *Certain Frozen Warmwater Shrimp from the Socialist Republic of Vietnam: Amended Final Results of Antidumping Duty Administrative Review*, 75 FR 61122 (October 4, 2010) (“*AR4 Amended Final*”).

² See 19 U.S.C. 3538(b)(2).

³ See SAA at 1025, 1027.

⁴ See 19 U.S.C. 3538(b)(4).

⁵ See 19 U.S.C. 3538(c).

⁶ See 19 U.S.C. 1516a(a)(2)(B)(vii).

parties regarding the Preliminary 129 Determination, and also released the draft revocation instructions with a proposed importer and exporter certification requirement.¹¹ On July 13, 2016, the Minh Phu Group filed comments regarding the trade names listed for revocation in the Prelim Comment Memo at Attachment I.¹² Consequently, the Department issued the 129 Final Determination on July 18, 2016.¹³

On July 18, 2016, the USTR notified the Department that, consistent with section 129(b)(3) of the URAA, consultations with the Department and the appropriate congressional committees with respect to the 129 Final Determination have been

completed. As a result, in accordance with section 129(b)(4) of the URAA, USTR directed the Department to implement this determination.¹⁴

Implementation of the 129 Final Determination

Pursuant to the USTR Implementation Letter, the 129 Final Determination is hereby implemented and adopted by this notice. A list of the issues discussed in the 129 Final Determination are attached as an Appendix to this notice. The 129 Final Determination is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System ("ACCESS"). Access to ACCESS is available to registered users at <http://>

access.trade.gov, and is available to all parties in the Central Records Unit, room B8024 of the main Commerce building. A complete version of the memorandum can be accessed directly on the Internet at <http://enforcement.trade.gov/download/section129/full-129-index.html>. The signed 129 Final Determination and the respective electronic version of the memorandum are identical in content.

Final Weighted-Average Dumping Margin

As a result of the above, the *AR4 Amended Final* recalculated weighted-average dumping margin for the Minh Phu Group, unchanged from the Preliminary 129 Determination, is:

Producer and exporter	Section 129 results
Minh Phu Seafood Export Import Corporation (and affiliates Minh Qui Seafood Co., Ltd. and Minh Phat Seafood Co., Ltd.), aka Minh Phu Seafood Corp., aka Minh Phu Seafood Corporation, aka Minh Phu Seafood Pte, aka Minh Qui Seafood, aka Minh Qui Seafood Co., Ltd., aka Minh Qui, aka Minh Phat Seafood Co., Ltd., aka Minh Phat, aka Minh Phat Seafood, aka Minh Phat Seafood Corp., aka Minh Phu Hau Giang Seafood Joint Stock Company, aka Minh Phu Hau Giang Seafood Co., Ltd., aka Minh Phu Hau Giang Seafood Corp., aka Minh Phu Hau Giang Seafood Processing Co., Ltd	0.00%

Partial Revocation of the Antidumping Duty Order

Because the Department has recalculated a weighted-average dumping margin of zero percent for the Minh Phu Group, which results in three consecutive years of no dumping, and the Minh Phu Group has certified¹⁵ that it will not sell certain frozen warmwater

shrimp in the future at less than fair value, the Department is revoking the *AD Order* with respect to the Minh Phu Group, for entries made on or after July 18, 2016. The Department's practice with respect to revocation of companies from an antidumping duty order is to exclude companies in specific producer-exporter combinations.¹⁶ Accordingly, the Department will instruct U.S.

Customs and Border Protection ("CBP") to liquidate, without regard to antidumping duties, entries of certain frozen warmwater shrimp, produced and exported by the Minh Phu Group¹⁷ which were entered, or withdrawn from warehouse, for consumption on or after July 18, 2016. Furthermore, the Department will instruct CBP to discontinue the suspension of

Documents on the Record of DS429," dated May 20, 2016, at .pdf page 15.

¹⁶ See, e.g., *Brake Rotors From the People's Republic of China: Final Results and Partial Rescission of the Fifth Antidumping Duty Administrative Review and Final Results of the Seventh New Shipper Review*, 68 FR 25861 (May 14, 2003) and accompanying Issues and Decision Memorandum at Comment 1. See also *Notice of Final Determination of Sales at Less Than Fair Value: Certain Frozen and Canned Warmwater Shrimp From the People's Republic of China*, 69 FR 70997, 71004 (December 8, 2004), where the Department stated that "the Department does not require any cash deposit or posting of a bond for Zhanjiang Guolian when the subject merchandise is produced and exported by Zhanjiang Guolian." Subsequently, in the *PRC Shrimp Order*, the Department stated that "pursuant to 735(c)(1)(B) of the Act, we will instruct CBP to suspend liquidation of all entries of certain frozen warmwater shrimp and prawns from the PRC

(except merchandise produced and exported by Zhanjiang Guolian because this company has a *de minimis* margin)" (emphasis added). See Notice of Amended Final Determination of Sales at Less Than Fair Value and Antidumping Duty Order: Certain Frozen Warmwater Shrimp From the People's Republic of China, 70 FR 5149, 5152 (February 1, 2005) ("*PRC Shrimp Order*").

¹⁷ Revocation for the Minh Phu Group is specific to merchandise produced and exported by: (1) Minh Phu Seafood Export Import Corporation (and affiliates Minh Qui Seafood Co., Ltd. and Minh Phat Seafood Co., Ltd.), (2) Minh Phu Seafood Corp., (3) Minh Phu Seafood Corporation, (4) Minh Phu Seafood Pte, (5) Minh Qui Seafood, (6) Minh Qui Seafood Co., Ltd., (7) Minh Qui, (8) Minh Phat Seafood Co., Ltd., (9) Minh Phat, (10) Minh Phat Seafood, (11) Minh Phat Seafood Corp., (12) Minh Phu Hau Giang Seafood Joint Stock Company, (13) Minh Phu Hau Giang Seafood Co., Ltd., (14) Minh Phu Hau Giang Seafood Corp., and (15) Minh Phu Hau Giang Seafood Processing Co., Ltd.

liquidation and the collection of cash deposits for estimated antidumping duties for entries of certain frozen warmwater shrimp produced and exported by the Minh Phu Group. The Department will instruct CBP to continue to collect cash deposits for estimated antidumping duties from other Vietnamese exporters as the *AD Order*, in whole, has not been revoked. Furthermore, the Department will require the Minh Phu Group and its importers to participate in a certification requirement for those entries which are no longer subject to the *AD Order*, as discussed in the 129 Final Determination.¹⁸

This final determination is issued and published in accordance with section 129(c)(2)(A) of the URAA.

Dated: July 18, 2016.

Paul Piquado,

Assistant Secretary for Enforcement and Compliance.

International Trade Administration

[A-552-802]

Certain Frozen Warmwater Shrimp From the Socialist Republic of Vietnam: Partial Rescission of Antidumping Duty Administrative Reviews (2014–2015; 2015–2016) and Compromise of Outstanding Claims

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (“Department”) is rescinding, in part, the antidumping duty administrative reviews for the antidumping duty order (“the Order”) on certain frozen warmwater shrimp from the Socialist Republic of Vietnam (“Vietnam”) for the periods February 1, 2014, through January 31, 2015, and February 1, 2015, through January 31, 2016 with respect to sales made by the Minh Phu Group. Further, the Department is

compromising its claims for certain antidumping duties for entries of subject merchandise exported by the Minh Phu Group for the period February 1, 2014, through July 17, 2016.

DATES: Effective July 18, 2016.

FOR FURTHER INFORMATION CONTACT: Irene Gorelik, AD/CVD Operations, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482-6905.

SUPPLEMENTARY INFORMATION:

Rescission of Reviews

Tenth Administrative Review (2014–2015)

On February 27, 2015, Vietnamese Association of Shrimp Exporters and Producers (“VASEP”), Ad Hoc Shrimp Trade Action Committee (“AHSTAC”), and American Shrimp Processors Association (“ASPA”) each requested a review of the Order for the period February 1, 2014, through January 31, 2015, with respect to sales made by the Minh Phu Group.¹

On April 3, 2015, the Department published in the **Federal Register** a notice of initiation of the tenth administrative review of the Order, covering the period February 1, 2014, through January 31, 2015.² On July 6, 2016, VASEP, AHSTAC, and ASPA withdrew their requests for review with respect to the Minh Phu Group and requested that the Department exercise its authority to extend the 90-day deadline to withdraw the requests for review and rescind the administrative review, in part, under extraordinary circumstances. In particular, the parties explained their understanding that extraordinary circumstances exist because the withdrawals of review requests for the Minh Phu Group will assist the government of the United

States and government of Vietnam in reaching a mutually satisfactory resolution with respect to *United States—Anti-dumping Measures of Certain Shrimp from Viet Nam* (DS429) and *United States Anti-dumping Measures of Certain Shrimp from Viet Nam* (DS404). The parties further explained their understanding that a mutually satisfactory resolution of these disputes was not effectuated within the 90-day deadline, and, but for this mutually satisfactory resolution, the parties would not be withdrawing their request for review of the Minh Phu Group.

Section 351.213(d)(1) of the Department’s regulations states that the Department will rescind an administrative review if a party requesting the review withdraws the request within 90 days of the publication of the notice of initiation. Further, 19 CFR 351.213(d)(1) allows the Department to extend the 90-day deadline if it considers it reasonable to do so. In the *AR10 Initiation Notice*, the Department stated that a party requesting an extension of the deadline must demonstrate that an “extraordinary circumstance” prevented it from submitting a timely withdrawal request, and that a determination to extend the deadline would be made on a case-by-case basis.³ Although the parties’ withdrawals of review request for the tenth administrative review are past the 90-day deadline, the Department determines that the parties have demonstrated that extraordinary circumstances exist for this segment of the proceeding, and thus, find it reasonable to extend the deadline pursuant to 19 CFR 351.213(d)(1). Therefore, because all parties that requested a review of the Minh Phu Group have withdrawn their requests, the Department is rescinding the review with respect to the Minh Phu Group for the period February 1, 2014, through January 31, 2015.

Eleventh Administrative Review (2015–2016)

On February 29, 2016, VASEP, AHSTAC, and ASPA each requested a review of the Order for the period February 1, 2015, through January 31, 2016, with respect to sales made by the Minh Phu Group.⁴

³ *Id.*, 80 FR at 18202.

⁴ These requests for review included, in relevant part: Minh Phu Seafood Corporation (and its affiliates Minh Qui Seafood Co., Ltd., Minh Phu Hau Giang Seafood Corp and Minh Phat Seafood Co., Ltd.) (collectively “Minh Phu Group”), as requested by VASEP; Minh Phat Seafood Co., Ltd., Minh Phu Hau Giang Seafood Corp., Minh Phu Seafood Corp., and Minh Qui Seafood Co., Ltd., as

¹⁸ See 129 Final Determination Memo at 6 and Appendix.

¹ These requests for review included: Minh Phu Seafood Corporation (and its affiliates Minh Qui Seafood Co. Ltd., Minh Phat Seafood Co. Ltd., Minh Phu Hau Giang, collectively “Minh Phu Group”), as requested by VASEP; Minh Phat Seafood Co., Ltd., Minh Phu Hau Giang Seafood Corp., and Minh Phu Seafood Corp., as requested by AHSTAC; and Minh Phat Seafood, Minh Phat Seafood Co., Ltd., Minh Phu Seafood Corp., Minh Phu Seafood Pte, Minh Qui Seafood, and Minh Qui Seafood Co., Ltd., as requested by ASPA.

² See *Initiation of Antidumping and Countervailing Duty Administrative Reviews*, 80 FR 18202 (April 3, 2015) (“*AR10 Initiation Notice*”). This initiation notice included, in relevant part: Minh Phat Seafood, Minh Phat Seafood Co., Ltd., Minh Phu Seafood Corp., Minh Phu Seafood Pte, Minh Phu Seafood Corporation (and its affiliates Minh Qui Seafood Co. Ltd., Minh Phat Seafood Co. Ltd., Minh Phu Hau Giang, collectively “Minh Phu Group”), Minh Phu Hau Giang Seafood Corp., Minh Qui Seafood, and Minh Qui Seafood Co., Ltd.

On April 7, 2016, the Department published in the **Federal Register** a notice of initiation of the eleventh administrative review of the Order, covering the period February 1, 2015, through January 31, 2016.⁵ On July 6, 2016, VASEP, AHSTAC, and ASPA timely withdrew their requests for review with respect to the Minh Phu Group and requested that the Department rescind the administrative review, in part.

Because all parties that requested a review of the Minh Phu Group have timely withdrawn their requests, the Department is rescinding the administrative review with respect to the Minh Phu Group for the period February 1, 2015, through January 31, 2016, pursuant to 19 CFR 351.213(d)(1).

Compromise of Outstanding Claims

On July 18, 2016, the United States and Vietnam entered into an Agreement on the Antidumping Duty Order on Certain Frozen Warmwater Shrimp from Vietnam ("Agreement") to reach a mutually satisfactory resolution of the WTO disputes, *United States—Anti-dumping Measures on Certain Shrimp from Viet Nam* (DS429) and *United States—Anti-dumping Measures on Certain Shrimp from Viet Nam* (DS404), and to provide for the settlement of certain litigation, and the compromise of certain claims arising under the Order. In conjunction with the Agreement, on July 18, 2016, the Department issued its determination pursuant to section 129 of the Uruguay Round Agreements Act ("URAA") which has culminated in the revocation of the Order, in part, with respect to the Minh Phu Group.^{6,7} In a July 18, 2016,

requested by AHSTAC; and Minh Phat Seafood, Minh Phat Seafood Co., Ltd., Minh Phu Seafood Corp., Minh Phu Seafood Corporation (and its affiliates Minh Qui Seafood Co., Ltd., Minh Phat Seafood Co. Ltd., Minh Phu Hau Giang, collectively "Minh Phu Group"), Minh Phu Hau Giang Seafood Corp., Minh Phu Seafood Pte, Minh Qui Seafood, and Minh Qui Seafood Co., Ltd., as requested by ASPA.

⁵ See *Initiation of Antidumping and Countervailing Duty Administrative Reviews*, 81 FR 20324 (April 7, 2016) ("AR11 Initiation Notice"). This initiation notice included, in relevant part: Minh Phat Seafood, Minh Phat Seafood Co., Ltd., Minh Phu Seafood Corp., Minh Phu Seafood Pte, Minh Phu Seafood Corporation, Minh Phu Hau Giang Seafood Corp., Minh Qui Seafood, Minh Qui Seafood Co., Ltd., Minh Phu Seafood Corporation (and its affiliates Minh Qui Seafood Co., Ltd., Minh Phu Hau Giang Seafood Corp and Minh Phat Seafood Co., Ltd.) (collectively "Minh Phu Group").

⁶ See Memorandum from Christian Marsh, Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations to Paul Piquado, Assistant Secretary for Enforcement and Compliance, re: "Final Determination of the Proceeding under Section 129 of the Uruguay Round Agreements Act: Antidumping Measures on Certain Frozen Warmwater Shrimp from the

letter, the United States Trade Representative ("USTR") notified the Department that, consistent with section 129(b)(3) of the URAA, consultations with the Department and the appropriate congressional committees with respect to the 129 Final Determination have been completed, and directed the Department, in accordance with section 129(b)(4) of the URAA, to implement this determination.⁸

Effective July 18, 2016, the Agreement compromises the United States' claims for certain outstanding duties on shipments of subject merchandise from the Minh Phu Group that entered, or were withdrawn from warehouse, for consumption during the period February 1, 2014, through July 17, 2016, pursuant to section 617 of the Tariff Act of 1930, as amended ("the Act").⁹ In accordance with the terms of the Agreement, the Department will instruct United States Customs and Border Protection ("CBP") to liquidate entries of certain frozen warmwater shrimp exported by the Minh Phu Group¹⁰ and imported by Mseafood Corporation which entered, or were withdrawn from warehouse, for consumption during the period February 1, 2014, through July 17, 2016, without regard to antidumping duties, with the exception of such entries which entered the United States during the period February 1, 2016, through May 3, 2016, which will be liquidated at the cash deposit rate in

Socialist Republic of Vietnam," dated July 18, 2016 ("129 Final Determination").

⁷ In the 129 Final Determination, the Department indicated its intent to revoke the following Minh Phu Group individual company names from the Order: Minh Phu Seafood Export Import Corporation (and affiliates Minh Qui Seafood Co., Ltd. and Minh Phat Seafood Co., Ltd.), Minh Phu Seafood Corp., Minh Phu Seafood Corporation, Minh Phu Seafood Pte, Minh Qui Seafood, Minh Qui Seafood Co., Ltd., Minh Qui, Minh Phat Seafood Co., Ltd., Minh Phat, Minh Phu Hau Giang Seafood Joint Stock Company, Minh Phu Hau Giang Seafood Co., Ltd., Minh Phat Seafood, Minh Phat Seafood Corp., Minh Phu Hau Giang Seafood Corp., and Minh Phu Hau Giang Seafood Processing Co., Ltd.

⁸ See Letter from USTR, re: "Request to Implement Final Determination," dated July 18, 2016.

⁹ See also Appendix 6 to the Agreement, entitled "Agreement between DOC, Minh Phu Group, MSeafood Corporation, AHSTAC, and ASPA."

¹⁰ The following names will be listed in the CBP instructions: (1) Minh Phu Seafood Export Import Corporation (and affiliates Minh Qui Seafood Co., Ltd. and Minh Phat Seafood Co., Ltd.), aka (2) Minh Phu Seafood Corp., aka (3) Minh Phu Seafood Corporation, aka (4) Minh Phu Seafood Pte, or (5) Minh Qui Seafood, aka (6) Minh Qui Seafood Co., Ltd., aka (7) Minh Qui, or (8) Minh Phat Seafood Co., Ltd., aka (9) Minh Phat, aka (10) Minh Phat Seafood, aka (11) Minh Phat Seafood Corp., or (12) Minh Phu Hau Giang Seafood Joint Stock Company, aka (13) Minh Phu Hau Giang Seafood Co., Ltd., aka (14) Minh Phu Hau Giang Seafood Corp., aka (15) Minh Phu Hau Giang Seafood Processing Co., Ltd.

effect at the time of entry. Further, the Department will instruct CBP to liquidate all other entries of certain frozen warmwater shrimp exported by the Minh Phu Group which entered, or were withdrawn from warehouse, for consumption during the period February 1, 2014, through July 17, 2016, at the cash deposit rate in effect at the time of entry.

Because there is no further basis for conducting an administrative review of the Order with respect to the Minh Phu Group for the period February 1, 2016, through January 31, 2017, the Department does not intend to initiate an administrative review with respect to the Minh Phu Group for this period.

This notice is issued and published in accordance with 19 CFR 351.213(d)(1) and (4).

Dated: July 18, 2016.

Paul Piquado,

Assistant Secretary for Enforcement and Compliance.

BILLING CODE 3510-DS-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648-XE752

New England Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; public meeting.

SUMMARY: The New England Fishery Management Council (Council) is scheduling a public meeting of its Scientific & Statistical Committee to consider actions affecting New England fisheries in the exclusive economic zone (EEZ). Recommendations from this group will be brought to the full Council for formal consideration and action, if appropriate.

DATES: This meeting will be held on Wednesday, August 10, 2016 beginning at 9 a.m.

ADDRESSES: The meeting will be held at the Hilton Garden Inn, Boston Logan, 100 Boardman Street, Boston, MA 02128; phone: (617) 567-6789.

Council address: New England Fishery Management Council, 50 Water Street, Mill 2, Newburyport, MA 01950.

FOR FURTHER INFORMATION CONTACT: Thomas A. Nies, Executive Director, New England Fishery Management Council; telephone: (978) 465-0492.

SUPPLEMENTARY INFORMATION:**Agenda**

The Committee will develop OFL (overfishing level) and ABC (acceptable biological catch) recommendations for Georges Bank yellowtail flounder for fishing year 2017. They will also develop OFL and ABC recommendations for monkfish for fishing years 2017–19 as well as develop OFL and ABC recommendations for Atlantic deep-sea red crab for fishing years 2017–19. They will discuss other business as needed.

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Act, provided the public has been notified of the Council's intent to take final action to address the emergency.

Special Accommodations

This meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Thomas A. Nies, Executive Director, at (978) 465-0492, at least 5 days prior to the meeting date.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: July 19, 2016.

Tracey L. Thompson,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

DEPARTMENT OF COMMERCE**National Oceanic and Atmospheric Administration**

RIN 0648-XE751

Caribbean Fishery Management Council; Public Hearings

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public hearings on Amendments to the U.S. Caribbean Reef Fish, Spiny Lobster, and Corals and Reef Associated Plants and Invertebrates Fishery Management Plans: Timing of Accountability Measure-Based Closures in the U.S. Caribbean Draft Document.

SUMMARY: The Caribbean Fishery Management Council will hold public

hearings on the Amendments to the U.S. Caribbean Reef Fish, Spiny Lobster, and Corals and Reef Associated Plants and Invertebrates Fishery Management Plans: Timing of Accountability Measure-Based Seasonal Closures Including Draft Environmental Assessment: Amendment 8 to the Fishery Management Plan for the Reef Fish Fishery of Puerto Rico and the U.S. Virgin Islands, Amendment 7 to the Fishery Management Plan for the Spiny Lobster of Puerto Rico and the U.S. Virgin Islands, Amendment 6 to the Fishery Management Plan for the Corals and Reef Associated Plants and Invertebrates of Puerto Rico and the U.S. Virgin Islands. The complete document is available upon request and can be found at the Caribbean Council's Web site: www.caribbeanfmc.com.

DATES AND ADDRESSES: The dates and locations for the public hearings are:

August 15, 2016, Doubletree Hotel, De Diego Avenue, Condado, San Juan, Puerto Rico, from 7 p.m. to 9 p.m.

August 17, 2016, Mayagüez Holiday Inn Hotel, Mayagüez Holiday Inn, 2701 Hostos Avenue, Mayagüez, Puerto Rico, from 7 p.m. to 9 p.m.

FOR FURTHER INFORMATION CONTACT: Caribbean Fishery Management Council, 270 Muñoz Rivera Avenue, Suite 401, San Juan, Puerto Rico 00918-1903, telephone (787) 766-5926.

SUPPLEMENTARY INFORMATION: The proposed actions are to modify the timing for the application of accountability measures in the Reef Fish, Spiny Lobster, and Corals and Reef Associated Plants and Invertebrates Fishery Management Plans of Puerto Rico and the U.S. Virgin Islands. The Amendment contains the following Actions and Alternatives:

ACTION 1: Modify the timing for the implementation of AM-based closures in the U.S. Caribbean EEZ.

Alternative 1: No Action. Continue AM-based closures resulting from an annual catch limit (ACL) overage, ending on December 31st of the closure year, and extending backward into the closure year for the number of days necessary to achieve the required reduction in landings.

Alternative 2 (Preferred): Accountability measure-based closures resulting from an ACL overage would end on September 30th of the closure year and extend backward toward the beginning of the year for the number of days necessary to achieve the required reduction in landings. The September 30th closure date would apply to all fishery management units (FMUs) for each of the Puerto Rico commercial and recreational sectors, St. Thomas/St.

John, St. Croix, and Caribbean-wide. If Alternative 5 of this Action is also chosen for an FMU that includes species with seasonal closures in federal waters, closure dates for that FMU would be governed by Alternative 5. If, for any of the FMUs covered by Alternative 2, the number of available days running from September 30th backward to the beginning of the year is not enough to achieve the required reduction in landings, then the additional days needed would be captured by extending the closure forward toward the end of the year, beginning on October 1st and continuing for the number of days needed to achieve the required reduction.

Alternative 3: Accountability measure-based closures resulting from an ACL overage would begin on January 1st of the closure year and extend forward into the year for the number of days necessary to achieve the required reduction in landings. The January 1st closure start date would apply to all FMUs for each of Puerto Rico commercial and recreational sectors, St. Thomas/St. John, St. Croix, and Caribbean-wide. If Alternative 5 of this Action is also chosen for an FMU that includes species with seasonal closures in federal waters, closure dates for that FMU would be governed by Alternative 5.

Alternative 4: Establish a fixed fishing closure end date for the implementation of AMs for each FMU by island management area and, in the case of Puerto Rico, fishing sector (A. Puerto Rico (I. Commercial sector [The Puerto Rico spiny lobster FMU is addressed under the Commercial Sector sub-alternatives. This is because the spiny lobster ACL is governed by commercial landings. If the AM is triggered due to a Puerto Rico spiny lobster ACL overage, the commercial and recreational fishing season is reduced.] II. Recreational sector), B. St. Thomas/St. John, C. St. Croix, and D. Caribbean-wide), based on the highest or lowest average monthly landings of the most recent three years of available data (2012, 2013, 2014). A different closure date may be chosen for each FMU for each island management area and Puerto Rico fishing sector. The closure date will end on the last day of the identified month and extend backward toward the beginning of the year for the number of days necessary to achieve the required reduction in landings. If, for any FMU in any year, the number of available days running from the closure implementation date backward toward the beginning of the year is not enough to achieve the required reduction in landings, then the additional days

needed would be captured by extending the closure forward toward the end of the year and continuing for the number of days needed to achieve the required reduction.

A. Puerto Rico

I. Commercial

Sub-Alternative 4a. Closure to end the last day of the month that has the highest landings based on monthly average landings through time, using 2012–2014 as the most recent three years of available landings data.

Sub-Alternative 4b. Closure to end the last day of the month with lowest landings based on monthly average landings through time, using 2012–2014 as the most recent three years of available landings data.

II. Recreational

Sub-Alternative 4c. Closure to end the last day of the second month that has the highest landings based on bi-monthly average landings through time, using 2012–14 as the most recent three years of available landings data.

Sub-Alternative 4d. Closure to end the last day of the second month with lowest landings based on bi-monthly average landings through time, using 2012–14 as the most recent three years of available landings data.

B. St. Thomas/St. John, USVI (All Sectors)

Sub-Alternative 4e. Closure to end the last day of the month that has the highest landings based on monthly average landings through time, using 2012–14 as the most recent three years of available landings data.

Sub-Alternative 4f. Closure to end the last day of the month with the lowest landings based on monthly average landings through time, using 2012–14 as the most recent three years of available landings data.

C. St. Croix, USVI (All Sectors)

Sub-Alternative 4g. Closure to end the last day of the month that has the highest landings based on monthly average landings through time, using 2012–2014 as the most recent three years of available landings data.

Sub-Alternative 4h. Closure to end the last day of the month with the lowest landings based on monthly average landings through time, using 2012–2014 as the most recent three years of available landings data.

D. Caribbean-Wide (All Sectors)

Sub-Alternative 4i. Closure to end the last day of the month that has the highest landings based on monthly average landings through time, using

2012–14 as the most recent three years of available landings data.

Sub-Alternative 4j. Closure to end the last day of the month with the lowest landings based on monthly average landings through time using 2012–14 as the most recent three years of available landings data.

Alternative 5: For FMUs that include species with seasonal closures in U.S. Caribbean federal waters (Table 2.2.6 in the document), AM-based closures resulting from an ACL overage for these FMUs would be timed to be continuous with the seasonal closure. The AM-based closure would extend either forward or backward from the seasonal closure into the year as specified in Sub-Alternatives 5a through 5n for the number of days necessary to achieve the required reduction in landings. If, for any of these FMUs, in any year, the number of available days running from the date specified by the sub-alternative, is not enough to achieve the required reduction in landings, then the additional days needed would be captured by extending the closure in the opposite direction and continuing for the number of days needed to fulfill the required reduction.

I. Groupers

A. Puerto Rico

1. Commercial

Sub-Alternative 5a: For the commercial sector of the Puerto Rico management area, an AM-based closure for the grouper complex would start on May 1st of the closure year and move forward toward the end of the year.

Sub-Alternative 5b: For the commercial sector of the Puerto Rico management area, an AM-based closure for the grouper complex would end on November 30th of the closure year and move backward toward the beginning of the year.

2. Recreational

Sub-Alternative 5c: For the recreational sector of the Puerto Rico management area, an AM-based closure for the grouper complex would start on May 1st of the closure year and move forward toward the end of the year.

Sub-Alternative 5d: For the recreational sector of the Puerto Rico management area, an AM-based closure for the grouper complex would end on November 30th of the closure year and move backward toward the beginning of the year.

B. St. Thomas/St. John, USVI (All Sectors)

Sub-Alternative 5e: For the St. Thomas/St. John management area, an

AM-based closure for the grouper complex would start on May 1st of the closure year and move forward toward the end of the year.

C. St. Croix, USVI (All Sectors)

Sub-Alternative 5f: For the St. Croix management area, an AM-based closure for the grouper complex would start on May 1st of the closure year and move forward toward the end of the year.

II. Snappers

A. Puerto Rico

1. Commercial

Sub-Alternative 5g: For the commercial sector of the Puerto Rico management area, an AM-based closure for all snapper species in Snapper Unit 3 (SU3) would start on July 1st of the closure year and move forward toward the end of the year.

Sub-Alternative 5h: For the commercial sector of the Puerto Rico management area, an AM-based closure for all snapper species in Snapper Unit 1 (SU1) would end on September 30th of the closure year and move backward toward the beginning of the year.

2. Recreational

Sub-Alternative 5i: For the recreational sector of the Puerto Rico management area, an AM-based closure for all snapper species in SU3 would start on July 1st of the closure year and move forward toward the end of the year.

Sub-Alternative 5j: For the recreational sector of the Puerto Rico management area, an AM-based closure for all snapper species in SU1 would end on September 30th of the closure year and move backward toward the beginning of the year.

B. St. Thomas/St. John, USVI (All Sectors)

Sub-Alternative 5k: For the St. Thomas/St. John management area, an AM-based closure the snapper complex would start on July 1st of the closure year and move forward toward the end of the year.

Sub-Alternative 5l: For the St. Thomas/St. John management area, an AM-based closure for the snapper complex would end on September 30th of the closure year and move backward toward the beginning of the year.

C. St. Croix, USVI (All Sectors)

Sub-Alternative 5m: For the St. Croix management area, an AM-based closure for the snapper complex would start on July 1st of the closure year and move forward into the year.

Sub-Alternative 5n: For the St. Croix management area, an AM-based closure

for the snapper complex would end on September 30th of the closure year and move backward toward the beginning of the year.

Action 2: Specify a time period for revisiting the approach to establish AM-based closures selected in Action 1.

Alternative 1. No action. Do not specify how often the approach chosen should be revisited.

Alternative 2 (Preferred). Revisit the approach selected no longer than 2 years from implementation and every 2 years thereafter.

Alternative 3. Revisit the approach selected no longer than 5 years from implementation and every 5 years thereafter.

Additional Information: Written comments can be sent to Dr. Graciela García-Moliner by email at [graciela_cfm@yahoo.com](mailto:graciela_cfm@yaho.com) or by regular mail to Caribbean Fishery Management Council, 270 Muñoz Rivera Avenue, Suite 401, San Juan, Puerto Rico 00918, no later than August 22, 2016.

Special Accommodations

These meetings are physically accessible to people with disabilities. For more information or request for sign language interpretation and other auxiliary aids, please contact Mr. Miguel A. Rolón, Executive Director, Caribbean Fishery Management Council, 270 Muñoz Rivera Avenue, Suite 401, San Juan, Puerto Rico, 00918-1903, telephone (787) 766-5926, at least 5 days prior to the meeting date.

Dated: July 19, 2016.

Tracey L. Thompson,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

RIN 0648-XE736

Pacific Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; public meeting.

SUMMARY: The Pacific Fishery Management Council's (Council) Highly Migratory Species Management Team (HMSMT) will hold a meeting, which is open to the public.

DATES: The HMSMT will meet Monday, August 8 through Thursday, August 11,

2016. The meeting will begin at 1:30 p.m. on August 8 and at 8:30 a.m. on August 9-11. On each day the meeting will end at 5 p.m. or when business for the day is concluded.

ADDRESSES:

Meeting address: The meeting will be held in the Large Conference Room at the Pacific Fishery Management Council's office.

Council address: Pacific Council, 7700 NE Ambassador Place, Suite 101, Portland, Oregon 97220-1384.

FOR FURTHER INFORMATION CONTACT: Dr. Kit Dahl, Pacific Council; telephone: (503) 820-2422.

SUPPLEMENTARY INFORMATION: The Council assigned several tasks to the HMSMT for completion by the September 2016 Council meeting. At this meeting, the HMSMT plans to draft reports for these tasks that can be included in the advanced briefing materials for the September Council meeting. These tasks include: (1) An update on international HMS management, including outcomes of the 80th Inter-American Tropical Tuna Commission meeting; (2) If available, reviewing exempted fishing permit (EFP) applications; (3) Developing recommendations for updates to the Fishery Management Plan for U.S. West Coast Fisheries for Highly Migratory Species (HMS FMP) to correct errors, revise out of date descriptions, and clarify descriptive passages; (4) Drafting a framework for reporting estimates of reference points for HMS FMP management unit species; (5) Developing recommendations responding to the referral to the Council by National Marine Fisheries Service of requests for rulemaking contained in the agency's response to the Center for Biological Diversity's petition for rulemaking to address the relative impacts of the U.S. fleet on the Pacific bluefin tuna stock (81 FR 39213); (6) Identifying data gaps and research needs for deep-set buoy gear (DSBG) to inform future Council recommendations on issuance of EFPs to test this gear for the objectives of developing a Federal fishing permit system for DSBG and regulatory authorizing use of the gear; (7) Identifying incentives for EFPs to test DSBG; (8) Developing a range of alternatives for a Federal permit for the California large mesh driftnet fishery for swordfish and sharks; and (9) Making recommendations on indicators to be included in the Annual State of the California Current Ecosystem Report delivered to the Council each March. The HMSMT may also discuss other matters related to HMS management

besides the assignments enumerated above.

Although non-emergency issues not contained in the meeting agenda may be discussed, those issues may not be the subject of formal action during these meetings. Action will be restricted to those issues specifically listed in this document and any issues arising after publication of this document that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.

Special Accommodations

The meetings are physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Mr. Kris Kleinschmidt at (503) 820-2280 at least 5 days prior to the meeting date.

Dated: July 19, 2016.

Tracey L. Thompson,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

BILLING CODE 3510-22-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Submission for OMB Review; Comment Request

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: National Oceanic and Atmospheric Administration (NOAA).

Title: StormReady, TsunamiReady, StormReady/TsunamiReady, and StormReady and TsunamiReady Supporter Application Forms.

OMB Control Number: 0648-0419.

Form Number(s): None.

Type of Request: Regular (revision of a currently approved information collection).

Number of Respondents: 305.

Average Hours per Response: Two hours for StormReady, TsunamiReady and Stormready/TsunamiReady applications, and one hour for support applications.

Burden Hours: 545.

Needs and Uses: This request is for revision of a currently approved information collection.

NOAA's National Weather Service would like to add a TsunamiReady Supporter Application Form to its currently approved collection, which includes StormReady, TsunamiReady, StormReady/TsunamiReady, and StormReady Supporter application forms. The title would then change to "StormReady, TsunamiReady, StormReady/TsunamiReady, StormReady Supporter and TsunamiReady Supporter Application Forms". This new application would be used by entities such as businesses and not-for-profit institutions that may not have the resources necessary to fulfill all the eligibility requirements to achieve the full TsunamiReady recognition. The form will be used to apply for initial TsunamiReady Supporter recognition and renewal of that recognition every five years. The federal government will use the information collected to determine whether an entity has met all of the criteria to receive TsunamiReady Supporter recognition.

Affected Public: Business or other for-profit organizations; state, local or tribal government.

Frequency: Every six years or one time only.

Respondent's Obligation: Voluntary.

This information collection request may be viewed at reginfo.gov. Follow the instructions to view Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to OIRA_Submission@omb.eop.gov or fax to (202) 395-5806.

Dated: July 18, 2016.

Sarah Brabson,

NOAA PRA Clearance Officer.

[Docket No. 131105931-6595-02]

RIN 0648-XC970

Endangered and Threatened Wildlife and Plants: Notice of 12-Month Finding on a Petition To List the Caribbean Electric Ray as Threatened or Endangered Under the Endangered Species Act (ESA)

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and

Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of 12-month finding and availability of status review document.

SUMMARY: We, NMFS, announce a 12-month finding and listing determination on a petition to list the Caribbean electric ray (*Narcine bancroftii*) as threatened or endangered under the Endangered Species Act (ESA). We have completed a comprehensive status review of the species in response to a petition submitted by WildEarth Guardians and Defenders of Wildlife and considered the best scientific and commercial data available. Based on the best scientific and commercial data available, including the status review report (Carlson *et al.* 2015), we have determined that the species is not currently in danger of extinction throughout all or a significant portion of its range and is not likely to become so within the foreseeable future. Therefore, we conclude that the Caribbean electric ray does not warrant listing at this time.

DATES: This finding was made on July 22, 2016.

ADDRESSES: The Caribbean electric ray status review document associated with this determination and its references are available by submitting a request to the Species Conservation Branch Chief, Protected Resources Division, NMFS Southeast Regional Office, 263 13th Avenue South, St. Petersburg, FL 33701-5505, Attn: Caribbean Electric Ray 12-month Finding. The report and references are also available electronically at: http://sero.nmfs.noaa.gov/protected_resources/listing_petitions/index.html.

FOR FURTHER INFORMATION CONTACT: Jennifer Lee, NMFS, Southeast Regional Office (727) 551-5778; or Marta Nammack, NMFS, Office of Protected Resources (301) 427-8469.

SUPPLEMENTARY INFORMATION:

Background

On September 7, 2010, we received a petition from WildEarth Guardians to list the Caribbean electric ray as threatened or endangered throughout its historical and current range and to designate critical habitat within the territory of the United States concurrently with listing the species under the ESA. On March 22, 2011 (76 FR 15947), we made a 90-day finding that the petition did not present substantial scientific or commercial information indicating that the petitioned action may be warranted.

On March 22, 2012, we received a 60-day notice of intent to sue from WildEarth Guardians on the negative

90-day finding. On February 26, 2013, WildEarth Guardians filed a Complaint for Declaratory and Injunctive Relief in the United States District Court for the Middle District of Florida, Tampa Division, on the negative 90-day finding. On October 1, 2013, the Court approved a settlement agreement under which we agreed to accept a supplement to the 2010 petition, if any was provided, and to make a new 90-day finding based on the 2010 petition, the supplement, and any additional information readily available in our files.

On October 31, 2013, we received a supplemental petition from WildEarth Guardians and Defenders of Wildlife. On January 30, 2014, we published a 90-day finding with our determination that the petition presented substantial scientific and commercial information indicating that the petitioned action may be warranted (79 FR 4877). In our 90-day finding, we requested scientific and commercial information from the public to inform the status review on the species. Specifically, we requested information on the status of the Caribbean electric ray throughout its range including: (1) Historical and current distribution and abundance of this species throughout its range; (2) historical and current population trends; (3) life history and habitat requirements; (4) population structure information, such as genetics data; (5) past, current and future threats specific to the Caribbean electric ray, including any current or planned activities that may adversely impact the species, especially information on destruction, modification, or curtailment of habitat and on bycatch in commercial and artisanal fisheries worldwide; (6) ongoing or planned efforts to protect and restore the species and its habitat; and (7) management, regulatory, and enforcement information on the species and its habitats. We received information from the public in response to the 90-day finding and incorporated relevant information in the species status review.

Listing Determinations Under the ESA

We are responsible for determining whether the Caribbean electric ray is threatened or endangered under the ESA (16 U.S.C. 1531 *et seq.*). Section 4(b)(1)(A) of the ESA requires us to make listing determinations based solely on the best scientific and commercial data available after conducting a review of the status of the species and after taking into account efforts being made by any state or foreign nation to protect the species.

To be considered for listing under the ESA, a group of organisms must constitute a “species,” which is defined in section 3 of the ESA to include taxonomic species and “any subspecies of fish, or wildlife, or plants, and any distinct population segment of any species of vertebrate fish or wildlife which interbreeds when mature.” In our 90-day finding we found that the petitioned species constitutes a valid species eligible for listing under the ESA based on the information presented in the petition, along with information readily available in our files. To determine whether the Caribbean electric ray warrants listing under the ESA, we convened a Status Review Team (SRT). The SRT was comprised of NMFS Southeast Fisheries Science Center and NMFS Southeast Regional Office biologists. The SRT reviewed an unpublished dissertation that separated the genus *Narcine* of the western Atlantic Ocean into two species: *N. brasiliensis*, and *N. bancroftii* (de Carvalho 1999). The SRT noted some taxonomic uncertainty (see *Taxonomy and Species Description*), but accepted de Carvalho (1999) as the best available information on the species taxonomy. *Narcine bancroftii* is recognized as a valid species in the Catalog of Fishes, the authoritative reference for taxonomic fish names and taxonomic revision (Eschmeyer 2015). We accept both de Carvalho (1999) and Eschmeyer (2015) as the best available science at this time, thus we maintain that *Narcine bancroftii* is a valid species eligible for listing.

When we consider whether a species might qualify as threatened under the ESA, we must consider the meaning of the term “foreseeable future.” It is appropriate to interpret “foreseeable future” as the horizon over which predictions about the conservation status of the species can be reasonably relied upon. The foreseeable future considers the life history of the species, habitat characteristics, availability of data, particular threats, ability to predict threats, and the ability to forecast the effects of these threats and future events on the status of the species under consideration. Because a species may be susceptible to a variety of threats for which different data are available, or which operate across different time scales, the foreseeable future is not necessarily reducible to a particular number of years or a single timeframe.

Under section 4(a) of the ESA, we must determine whether any species is endangered or threatened due to any of the following five factors: (A) The present or threatened destruction, modification, or curtailment of its

habitat or range; (B) overutilization for commercial, recreational, scientific, or educational purposes; (C) disease or predation; (D) the inadequacy of existing regulatory mechanisms; or (E) other natural or manmade factors affecting its continued existence (sections 4(a)(1)(A) through (E)).

The SRT completed a status review report, which summarized the best available information on the taxonomy, distribution, abundance, life history and biology of the species, analyzed the threats identified as potentially impacting the status of the species, and conducted an extinction risk analysis (ERA) to determine the status of the species. The results of the ERA are discussed below under “Extinction Risk Analysis.” The status review report incorporates relevant information received from the public in response to our request for information (79 FR 4877; January 30, 2014). The draft status review report was submitted to 3 independent peer reviewers and comments and information received from the peer reviewers were addressed and incorporated as appropriate into the draft report before finalizing it. The peer review report is available at http://www.cio.noaa.gov/services_programs/prplans/PRsummaries.html.

Section 3 of the ESA defines an endangered species as “any species which is in danger of extinction throughout all or a significant portion of its range” and a threatened species as one “which is likely to become an endangered species within the foreseeable future throughout all or a significant portion of its range.” Thus, we interpret an “endangered species” to be one that is presently in danger of extinction. A “threatened species” is not currently in danger of extinction but is likely to become so within the foreseeable future. The key statutory difference between a threatened and endangered species is the timing of when a species may be in danger of extinction, either presently (endangered) or in the foreseeable future (threatened).

In determining whether the species meets the standard of endangered or threatened, we considered the specific life history and ecology of the species, the nature of threats, the species’ response to those threats, and population numbers and trends. We considered information summarized in the status review report (Carlson *et al.* 2015). We considered each threat that was identified, both individually and cumulatively. For purposes of our analysis, the mere identification of factors that could impact a species negatively is not sufficient to compel a

finding that ESA listing is appropriate. In considering those factors that might constitute threats, we look beyond mere exposure of the species to the factor to determine whether the species responds, either to a single or multiple threats, in a way that causes actual impacts to the species’ status. In making this finding, we have considered and evaluated the best available scientific and commercial information, including information received in response to our 90-day finding.

The following sections provide key information presented in the status review report (Carlson *et al.* 2015).

Summary of the Status Review

Life History, Biology and Ecology

Taxonomy and Morphology

Narcine bancroftii is a species in the phylum *Chondrata*, class *Chondrichthyes*, order *Torpediniformes* and family *Narcinidae*. Common names for this species include the lesser electric ray, Bancroft’s numbfish, and Caribbean electric ray. The SRT titled the status review report and referred to the species in its report as the ‘lesser electric ray’ because the species is almost unanimously referred to as the lesser electric ray, including in the published literature. In our finding, we retain the use of ‘Caribbean electric ray’ for the sole purpose of being consistent with the petitioned action.

Rays within the genus *Narcine*, collectively known as numbfishes, occur globally in temperate to tropical marine waters and according to Eschmeyer (2015) are composed of 23 species. Until recently, rays of the genus *Narcine* within the western North Atlantic Ocean were considered to be one widely distributed species, *N. brasiliensis* (von Olfers 1831). However, Garman (1913) was the first to notice that there was sufficient regional variability among individuals and suggested that *N. brasiliensis* could be separated into two distinct species. Later, in a taxonomic revision of the genus *Narcine*, de Carvalho (1999) separated numbfishes of the western Atlantic Ocean into two species: *N. brasiliensis*, known as the Brazilian electric ray, and *N. bancroftii* (Griffith and Smith 1834), known as Bancroft’s numbfish, or more commonly, the lesser electric ray. *N. brasiliensis* is thought to range from southeastern Brazil to northern Argentina, whereas *N. bancroftii* is reported to range from North Carolina to northeastern Brazil, including the Gulf of Mexico (GOM) and the Caribbean Sea (de Carvalho 1999).

The SRT noted that “the taxonomy of *Narcine* in the western Atlantic Ocean

remains uncertain because taxonomic changes are sometimes accepted in ichthyology without adequate or supporting proof and the de Carvalho (1999) study remains unpublished." The SRT pointed out the need for a genetics-based examination (e.g., mitochondrial DNA analysis) of *Narcine* specimens from throughout their known range in the western Atlantic Ocean to support the presence of two distinct species. However, as we previously discussed (see Listing Determinations Under the ESA), we accept both de Carvalho (1999) and Eschmeyer (2015) as the best available science at this time, thus we maintain that *Narcine bancroftii* is a valid species eligible for listing.

Species Description

The Caribbean electric ray is a small, shallow-water batoid characterized by a flattened, oval-shaped disc, large pelvic fins, and oversized dorsal and caudal fins that cover most of its tapering tail (Tricas *et al.* 1997). The dorsal surface of the Caribbean electric ray varies from a light yellow brown to a darker greyish brown with dark blotches over the snout and small incomplete eyespots over the disc and base of the tail. The underside of the species is white or cream colored sometimes with grey or brown blotches (McEachran and Carvalho 2002). The Caribbean electric ray has two electric organs that can produce 14–37 volts of electricity (Smith 1997; Tricas *et al.* 1997). Outlines of these kidney-shaped electric organs may be visible behind the eyes as well as spiracles with rounded tubercles along the edges next to the eyes (Smith 1997). Each organ consists of a honeycomb of 280 to 430 columns, containing several hundred electric plates, and the organs combined account for about a sixth of total body weight (Tricas *et al.* 1997).

Range and Distribution

The Caribbean electric ray is widely distributed in warm temperate to tropical waters of the western Atlantic from North Carolina, through the GOM, the Caribbean, the Lesser and Greater Antilles, and the north coast of South America (McEachran and de Carvalho 2002). Bigelow and Schroeder (1953) wrote: "This Electric Ray has been reported from localities so widely distributed, and it is so well represented in the larger museums of both America and Europe, that it is expected anywhere in the American littoral [zone], provided that the type of bottom and depth be suitable . . ." The southern extent of the range of Caribbean electric rays is uncertain. De Carvalho (1999) reported specimens taken from the southern hemisphere off

the State of Bahia, Brazil, however, McEachran and de Carvalho (2002) later placed the southern extent of the range within the northern hemisphere off Venezuela.

The Caribbean electric ray exhibits a patchy distribution throughout its range and is locally abundant in areas that contain specific habitat characteristics. Fishery independent trawl surveys in the Gulf of Mexico show that the species is patchily distributed (see *Abundance and Trends*). The species' local abundance is best documented by Rudloe (1989a) who found Caribbean electric rays abundant in barrier beach surf zones and adjacent passes between barrier islands at depths of 8–16 m around Cape San Blas, Florida, in the northern Gulf of Mexico. Rudloe (1989a) collected 3,913 rays from March 1985 to March 1987 from sites in those areas at rates ranging from 3–31 rays per hour. Rudloe (1989a) points out that "the rays were concentrated over an extremely limited area on each bar" and that "As little as several tens of meters change in position could determine whether there were two or 20 rays in the catch."

Further, data indicate seasonal variation in their local distributions. Rudloe (1989a) suggested that "rays are localized in their habitats during the warm months at least, and move directly from one preferred locality to another or remain in one area over a period of weeks to months." The species is evidently migratory but its movements are poorly known. Existing information suggests at least some Caribbean electric ray seasonal migrations are likely associated with water temperature. Bigelow and Schroeder (1953) stated: "Captures of *Narcine brasiliensis* [*bancroftii*] off the Texas coast in the months of September, November, and March show that it winters that far north and probably does likewise at least along the southern part of Florida. However, northward along the Atlantic Coast of the United States, to North Carolina, all of the records of it, except one, have been in summer." Similarly, Coles (1915) reported Caribbean electric rays are present only off the northernmost part of their range (North Carolina) during the summer. Rudloe (1989a) stated that within the GOM, rays were caught in the surf zone at Alligator Point, Florida, from March to December, and no rays were taken anywhere in the area from December to February. Funicelli (1975) reported that Caribbean electric rays are found at the deeper ends of their depth range during winter in the northern GOM, particularly during colder months from November–February.

Habitat Use

The Caribbean electric ray inhabits relatively shallow waters, often within the surf zone (Coles 1910; Fowler 1910; Bigelow and Schroeder 1953; Hoese and Moore 1998; Rudloe 1989a). The Caribbean electric ray generally occupies depths ranging from the intertidal zone to approximately 37 m (Bigelow and Schroeder 1953, Rudloe 1989a); however, there is at least one report of a Caribbean electric ray being captured at a depth of 340 m (Schwartz 2010). Fisheries independent data collected by NMFS verify that the Caribbean electric ray is primarily a shallow water species. From 2002–2013, 5,137 trawls were conducted in the northern GOM at randomly selected stations ranging in depth from 4.7–326 m. A total of 127 Caribbean electric rays were collected, and the mean depth of capture was 9.29 m (range 5.20–17.50 m; S.D. 2.93). Environmental data were collected during these surveys demonstrating that this species inhabits waters ranging in temperature from 21.9–30.2 °C (mean = 27.18 °C; S.D. = 1.57), salinity from 27.7–36.9 ppt (mean = 34.10 ppt; S.D. 2.32), dissolved oxygen from 2.0–3.7 mg/l (mean = 2.85 mg/l; S.D. = 0.99) and turbidity from 0.6–94.0 percent transmissivity (mean = 37.77 percent transmissivity; S.D. = 28.23). These data are consistent with past reports of environmental conditions associated with the presence of Caribbean electric rays (e.g., Gunter 1945, Rudloe 1989a, Steiner *et al.* 2007).

The best available information on the species indicates that it occurs predominately in sand bottom habitats. While Caribbean electric rays have a relatively broad distribution in the western Atlantic Ocean, the species is reported to occur almost exclusively on sand bottom habitats (Coles 1910, Bigelow and Schroeder 1953, Rudloe 1989a). For example, Rudloe (1989a) determined that "barrier beach surf zones and on [sand]bars adjacent to passes between barrier islands" are the preferred habitat for Caribbean electric rays. Both of these habitats are dominated by sand. Anecdotal reports also document Caribbean electric rays exclusively in high energy beach and sandbar habitats. In NMFS fisheries-independent trawl survey data, all Caribbean electric ray specimens recorded in the GOM were collected over sand bottom habitats. The SRT found only one study of Caribbean electric rays occurring in mud and fine silt habitats (i.e., Dean *et al.* 2005).

Caribbean electric rays are generally nocturnal and spend daylight hours buried under the sand. Rudloe (1989a)

noted that sampling was limited to night-time when the rays were active. Numerous reports of Caribbean electric ray sightings document that these rays are most commonly found buried in the sand with only their spiracles visible.

Age and Growth

There are no age and growth studies for this species. McEachran and de Carvalho (2002) report size at birth at 9–10 cm with maximum growth to 58 cm TL. Observations of Rudloe (1989a) suggest rapid growth during the first year. Rudloe (1989a) estimated that newborn rays less than 14 cm total length (TL) in late summer attain a size of 15–19 cm TL by fall. Rudloe (1989a) reported growth was dormant January and February and then resumed in March, with young attaining a size of 20–29.9 cm TL by the end of their first year.

Reproductive Biology

Estimates of size at reproductive maturity for male Caribbean electric rays range from 20 to 26 cm TL (Bigelow and Schroeder 1953, Funicelli 1975, de Carvalho 1999, Moreno *et al.* 2010). Females are reported to reach a larger size than males at reproductive maturity. The smallest reported female with well-developed gonads measured 26 cm TL (Funicelli 1975), and the smallest gravid female measured 27.1 cm TL (Bigelow and Schroeder 1953).

Rudloe (1989a) observed that all the females larger than 29 cm TL, both in captivity and collected from the field off Florida, were gravid in July. This indicates that the reproductive cycle is annual, and adult females in the population are capable of reproducing each year. Moreno *et al.* (2010) verified annual reproduction by mature females. Rudloe (1989a) documents that females give birth off Florida in August and September in the surf zone. Rudloe (1989a) also observed a peak in newborn rays at more offshore Florida locations in November (*i.e.*, at West Pass) and December (*i.e.*, at Cape San Blas), but could not determine if these rays were born offshore or had immigrated from the beach. Rudloe (1989a) did not estimate gestation period of Caribbean electric rays. In the Colombian Caribbean Sea, Moreno *et al.* (2010) found that the gestation period lasts approximately 4 months, with birth occurring from February to April.

The brood size of female Caribbean electric rays has been reported as 14 by Bean and Weed (1911), 4–15 by Bigelow and Schroeder (1953), 5–13 by de Carvalho (1999), and 1–14 by Moreno *et al.* (2010).

Diet and Feeding

Caribbean electric rays are reported to feed on small, benthic organisms (Moreno *et al.* 2010). Funicelli (1975) observed annelids in 84 percent of the Caribbean electric ray stomachs he examined from the northern GOM, which was in agreement with the limited data presented by Gudger (1912) and Bigelow and Schroeder (1953). Fishes within the order Anguilliformes were the next most abundant prey (30 percent of individuals), followed by arthropods and molluscs. Arthropods were the dominant prey type found in small individuals less than 300 mm TL (Funicelli 1975). Moreno *et al.* (2009) and Grijalba-Bendeck *et al.* (2012) reported similar findings for Caribbean electric rays collected in the Caribbean Sea off Colombia with annelids occurring in the majority of stomachs examined. Both studies reported that arthropods constituted a larger portion of the diet than anguilliform fishes. A diet composed primarily of annelids has also been reported for the closely related Brazilian electric ray (Goitein *et al.* 1998).

Dean and Motta (2004a and b) characterize Caribbean electric ray feeding behavior and kinematics. The Caribbean electric ray is a benthic suction feeder with highly protrusible jaws. The Caribbean electric ray has the ability to protrude its jaws by nearly 100 percent of its head length to excavate buried polychaetes.

Predation and Disease

Almost nothing is known of natural predation on the Caribbean electric ray. Presumably its electric organs deter potential predators, such as sharks and dolphins. Rudloe (1989a) reported that tagged rays released off trawlers were repeatedly observed to be actively avoided by both sharks and dolphins that fed heavily on other rays and bony fishes as they were culled overboard. A researcher reported observed consumption of Caribbean electric rays by large red drum that were captured on bottom longlines and dissected. It was not clear to the researcher whether the rays were discarded bycatch that were opportunistically consumed or not (M. Ajemian, Texas A&M-Corpus Christi, pers. comm. to Jennifer Lee, NMFS, June 19, 2015). Similarly, there is scant information on disease within the species. Tao (2013) reported that bacteria, such as *Vibrio* species, are prevalent in the blood of healthy Caribbean electric rays. This condition is not uncommon among chondrichthyan fishes.

Status, Abundance and Trends

The International Union for the Conservation of Nature (IUCN) Red List Assessment classifies the Caribbean electric ray as Critically Endangered (de Carvalho *et al.* 2007). The IUCN Red List assessment notes that the species has declined 98 percent since 1972 in the northern GOM according to a study by Shepherd and Myers (2005) of trawl data from the Southeast Area Monitoring and Assessment Program (SEAMAP). The IUCN Red List assessment reports that “similar high rates of decline are seen in the U.S. coastal areas between Cape Canaveral (Florida) and Cape Hatter[a]s (North Carolina) in U.S. trawl surveys between 1989 and 2001 (a decline to 5% during this period)”. The IUCN also states that diver survey data from the Reef Environmental Education Foundation (REEF) program show similar rates of decline for Caribbean electric ray between 1994 and 2004 in eastern Florida and the Florida Keys. The Red List Assessment formed the basis of the petition to list Caribbean electric ray under the ESA.

To fully evaluate the above purported declines in abundance and rarity of the species, the SRT attempted to find any and all abundance data related to the species. This included a review of the known scientific literature, internet searches, and communication with state and Federal resource agencies that monitor fisheries. There are no population size estimates available for Caribbean electric rays. The SRT acquired the original data sets used for the IUCN assessment and conducted an independent analysis of these data. The SRT also considered a variety of other smaller datasets and encounter reports it acquired in forming its conclusions about the abundance and trends of the species. While some of these other data were anecdotal in nature and couldn't be used to statistically assess trends in abundance, the SRT believed they were useful in illustrating recent encounters of the species. Below we provide a summary of each data source considered and of the SRT's associated findings.

Gulf of Mexico SEAMAP

The primary source of fishery independent data reviewed was Gulf of Mexico SEAMAP data. The NMFS Southeast Fisheries Science Center Mississippi Laboratories have conducted trawl surveys in the northern GOM dating back to the 1950s. Early work was exploratory and often only recorded catch of target species. In 1972 a standardized fall trawl survey began as a part of a resource assessment program.

Then in 1982 a standardized summer trawl survey began under the SEAMAP. Finally, in 1987, the SEAMAP was adopted in the fall, thus unifying the two surveys. SEAMAP is a collaborative effort between Federal, state and university programs designed to collect, manage and distribute fishery independent data throughout the region. The primary objective of this trawl survey is to collect data on the abundance and distribution of demersal organisms in the northern GOM. The survey is conducted semi-annually (summer and fall) and provides an important source of fisheries independent information on many commercially and recreationally important species throughout the northern GOM (Pollack and Ingram 2014, Pollack & Ingram 2015). A full description of the historical and current surveys can be found in Nichols (2004) and Rester (2015).

Shepherd and Myers (2005) examined trends in elasmobranch abundance from SEAMAP data using the longest continuous temporal coverage (1972–2002) for the areas between 10 and 110 m in depth near Alabama, Mississippi and Louisiana (*i.e.*, statistical zones 11, 13–16). The authors correctly noted that *N. brasiliensis* has been historically misidentified and is not known to inhabit the GOM. Thus, all *N. brasiliensis* and *Narcine* species identified within the trawl survey data were treated as *N. bancroftii* during the analysis. Using a generalized linear modeling approach to correct for factors unrelated to abundance, Shepherd and Myers (2005) reported a decline of 98 percent since the baseline abundance of Caribbean electric rays in 1972 in the northern GOM, *i.e.* the number of Caribbean electric rays documented in the survey that year.

The SRT also used a generalized linear model approach in its re-analysis of the Gulf SEAMAP data. In statistics, a covariate is a variable that is possibly predictive of the outcome under study. Covariates considered in the analysis that may have affected abundance include year, area, water depth, and time-of-day. Irrespective of statistical methodology, the major difference between Shepherd and Myers (2005) and the analysis conducted by the SRT is the former did not take into account major changes in survey design and how they would affect the relative abundance of electric ray. There also was an apparent misunderstanding of how the catch was sorted.

Because there were major changes in survey design and survey coverage between 1972–1986 and 1987–2013 (Pollack and Ingram 2014), the SRT

determined that using one continuous time series as Shepherd and Myers (2005) did was inappropriate. Instead, the SRT used three separate time series: Fall SEAMAP 1972–1986, Fall SEAMAP 1988–2013, and Summer SEAMAP 1982–2013. The Fall SEAMAP 1987 trawl survey was omitted from analysis because the cruise track differed from that of all the other surveys (counterclockwise around the northern GOM and missed half of the area off Texas due to weather). The SRT extended the analysis of these survey data 11 years beyond the analysis by Shepherd and Myers (2005), to reflect the best available data and the most complete representation of abundance over time in the survey. Similar to Shepherd and Myers (2005), all *N. brasiliensis* and *Narcine* (*I. sp.* were treated as *N. bancroftii* for this analysis.

The abundance index constructed for Fall SEAMAP 1972–1986 was limited to NMFS statistical zones 11, 13, 14 and 15 (Figure 1). Sampling outside of these zones was inconsistent; therefore, the analysis was limited to this core area. In addition, all stations deeper than 75 m were removed from the dataset since there were no records of Caribbean electric ray occurring at those depths from any year of the survey. There are, in actuality, only two records in the entire SEAMAP data set of Caribbean electric ray occurring beyond 36.5 m, one in 1972 at 42 m and one in 1975 at 64 m (depths for these stations were verified by the NOAA National Geophysical Data Center, <http://www.ngdc.noaa.gov/mgg/coastal/crm.html>). The second index constructed was Fall SEAMAP 1988–2013. Following the methods outlined for the Fall SEAMAP survey, data for this index were limited to NMFS statistical zones 10–21 (excluding 12), and at stations shallower than 31 m. The third index constructed was Summer SEAMAP 1982–2013. Again following the methods outlined for the previous time series, data for this index were limited to NMFS statistical zones 10–21 (excluding 12), and at stations shallower than 33 m.

There were no discernable trends in relative abundance (CPUEs) of Caribbean electric ray in any of the three Gulf of Mexico SEAMAP indices. All three time series analyzed were relatively flat with peaks in abundance scattered throughout the abundance trend. Within the northern Gulf of Mexico 9,876 tows were included in the analysis, with 624 Caribbean electric rays captured. Most captures occurred off the coast of Louisiana and Texas. Shepherd and Myers (2005) indicated that only 78 individuals were captured

from 1972–2002. However, the SRT identified 351 individuals recorded from the same time period, more than four times as many. Shepherd and Myers' (2005) exclusion of data off Texas explains this partly, but the discrepancy also reflects their lack of understanding of how the data were sampled (See "sampled versus select" discussion in Carlson *et al.* 2016). The distribution of Caribbean electric ray seems to be heavily concentrated along the barrier islands around south Texas and Mississippi and Louisiana. However, off the coast of Mississippi and Louisiana the survey is conducted from the National Oceanic and Atmospheric Administration (NOAA) Ship *Oregon II*, which cannot fish in waters shallower than 9 m due to the vessel's draft. Presently, efforts are being made to include waters as shallow as two fathoms (4 m) in the sampling universe, but there are only a few research vessels that can sample that shallow. With the proportional allocation of stations by NMFS statistical zone, very few stations may end up in these shallow depths in future survey years. The SRT noted this could lead to a decrease in Caribbean electric rays captured by the survey in the future because SEAMAP is no longer sampling their habitat and therefore would not reflect abundance changes. Overall, the SRT concluded the Caribbean electric ray is a rare species to encounter during the trawl surveys due to their shallow-water habitat and the inability of research vessels to sample that habitat.

South Atlantic SEAMAP

The SRT also reviewed South Atlantic SEAMAP data. A similar SEAMAP survey occurs in the Atlantic Ocean off the southeastern U.S. East Coast. Samples are collected by trawl from the coastal zone of the South Atlantic Bight between Cape Hatteras, North Carolina, and Cape Canaveral, Florida. Multi-legged cruises are conducted in spring (early April–mid-May), summer (mid-July–early August), and fall (October–mid-November). Stations are randomly selected from a pool of stations within each stratum. The number of stations sampled in each stratum is determined by optimal allocation. From 1990–2000, the survey sampled 78 stations each season within 24 shallow water strata. Beginning in 2001, the number of stations sampled each season in the 24 shallow water strata increased to 102, and strata were delineated by the 4-m depth contour inshore and the 10-m depth contour offshore. In previous years (1990–2000), stations were sampled in deeper strata with station depths ranging from 10 to 19 m in order

to gather data on the reproductive condition of commercially important penaeid shrimp. Those strata were abandoned in 2001 in order to intensify sampling in the shallower depth-zone. Further details are available in Eldridge (1988).

Neither we nor the SRT could find a reference or analysis to support the IUCN Red List assessment's statement regarding high rates of decline in Caribbean electric rays in U.S. coastal areas between Cape Canaveral, Florida and Cape Hatteras, North Carolina. The SRT used a generalized linear modeling approach to correct for factors unrelated to abundance to standardize the South Atlantic SEAMAP data following methods similar to the GOM SEAMAP data. Covariates considered in this analysis that may have affected abundance include year, season, area, and sampling statistical zone. Time of day was not included as a covariate as data were discontinuous due to most participating vessels not conducting 24-hour operations. The abundance trend for this time series was flat with peaks in abundance of different magnitudes found every 5–10 years. The data showed high inter-annual variability in Caribbean electric ray catches in the survey, and catches were very low throughout, but there was no trend in the catch rates suggestive of a decline in Caribbean electric rays.

REEF Data

The REEF (www.reef.org) is a dataset that is composed of more than 100,000 visual surveys conducted by volunteer divers during their daily dive activities. This data set has been previously used for evaluating species abundance trends (e.g., Ward-Paige *et al.* 2010 and references therein) and was referenced in the petition as evidence of the low occurrence of Caribbean electric rays along the east coast of Florida, the GOM, and the northwestern Caribbean.

The IUCN had cursorily reviewed 1994–2004 REEF data for apparent trends, but had not conducted a thorough analysis. Because these visual surveys vary in duration, location and diver skill level (experience, including experience in species identification), the SRT applied a generalized linear model to examine standardized rates of change in sighting frequency as an index of abundance. The SRT considered area as a covariate based on 8 major sampling areas from the REEF database: Gulf of Mexico, east coast of Florida, the Florida Keys, the Bahamas (including Turks and Caicos), and the northwestern Caribbean (including Cuba, the Cayman Islands, Jamaica, Haiti/Dominican Republic), Greater Antilles (Puerto Rico

to Grenada), Continental Caribbean (Belize-Panama), and Netherland Antilles. The SRT also considered skill level of the diver (experienced or novice), the bottom type, year, season, water temperature and water visibility as covariates.

In the REEF database, Caribbean electric rays were observed on 476 out of 119,620 surveys (0.4 percent). Caribbean electric rays were observed throughout the survey area with sighting records averaging 10–18 percent of the total number of fish in the Antilles, Bahamas, Florida and Central America. Positive occurrences were lowest in the northwest Caribbean Sea and Gulf of Mexico. The average depth where diver sightings occurred was about 5 meters generally over a habitat where a diver recorded a variety of individual habitats. The final covariates included in the model were year, area and bottom type. The trend in number of occurrences was relatively flat and similar to the other data series that showed high fluctuation across years. Due to the low encounter rate, there was high uncertainty in the abundance trend.

The SRT found that relative abundance fluctuated dramatically between years, but found no trend. The final model selected contained year, area and bottom type as covariates with the trend in occurrences relatively flat with the number of encounters rapidly fluctuating over the time series.

State Agency Data

As noted earlier, the SRT sought additional datasets that were not included in the IUCN Red list Assessment or the petition. Fishery independent data sets with Caribbean electric ray records were obtained from Texas Parks and Wildlife Department (TPWD) and Florida Fish and Wildlife Research Institute (FFWRI). The North Carolina Department of Environment and Natural Resources (NCDENR) also provided the SRT with the 6 records it had from all of its fishery-dependent and -independent programs combined.

The TPWD fishery-independent nearshore Gulf trawl survey is the only TPWD program that catches *Narcine bancroftii* somewhat regularly. Trawl collections did not begin coast-wide until 1982 in bays and 1986 in the GOM. Trawl sampling in Sabine Lake began in January 1986, and in East Matagorda Bay in April 1987. The trawl sampling program began in the Texas Territorial Sea (within 16.7 kilometers (km) of shore) in 1984 off Port Aransas (24.1 km either side of each jetty) and was expanded to similar areas off the Sabine Pass, Galveston, Port O'Connor,

and Port Isabel jetties in January 1986 (sampling off Port Isabel was restricted to 48.2 km north of the Rio Grande River) (Matlock 1992).

TPWD provided trawl data for the three Gulf areas that encounter Caribbean electric rays, *i.e.*, Aransas Pass, Matagorda, and Santiago Pass (Mark Fisher, TPFWD, pers. comm. to Jennifer Lee, NMFS SERO, July 31, 2014). Data from Aransas Pass and Matagorda show increases in abundance especially since early 2000. The trend in abundance for Santiago Pass increases until the late 1990s, then decreases to its original level at the start of the time series. Santiago Pass Caribbean electric ray catches were about 0.1/hour from 1985–1990, increased to 0.4/hour from 1991–2004, then declined back to 0.1/hour from 2005–present.

The FFWRI's fisheries independent monitoring program uses a stratified-random sampling design to monitor fish populations of specific rivers and estuaries throughout Florida. They use a variety of gears to sample, including small seines, large seines, and otter trawls. The program has long-term data sets for Apalachicola (since 1998), Cedar Key (since 1996), Tampa Bay (since 1989), and Charlotte Harbor (since 1989) along the GOM and Tequesta (since 1997) and Indian River Lagoon (since 1990) on the Atlantic Coast.

Despite the large geographic area sampled and the extensive sampling efforts over time, the FFWRI fisheries independent monitoring program has collected very few Caribbean electric rays to date (*i.e.*, 34 specimens). Of these, 13 Caribbean electric rays were collected from Apalachicola (*i.e.*, 2 per year in 1998, 2004, and 2012; 1 per year during 2000–2002 and 2006–2008, and 2010), 15 were collected from Cedar Key (1 per year during 2001–2002 and 2008, 5 in 2004, 2 per year in 2009 and 2012, and 3 in 2013); 4 were collected from Tequesta (2 in 1998, and 2 in 2009), and 1 was collected from each of Tampa Bay (1990) and Indian River Lagoon (1994). The SRT determined it was not appropriate to analyze these data points further due to the rarity of this species within their samples.

The SRT also considered the NCDENR data. The SRT determined it was not appropriate to analyze these data points further due to the extreme rarity of this species' occurrence (*i.e.*, 6 records) within their samples.

Shrimp Observer Program

The Southeast Fisheries Science Center, Galveston Laboratory, began placing at-sea observers on commercial shrimping vessels in 1992 in the U.S. southeastern region through a

cooperative voluntary research effort. In July 2007, a mandatory Federal observer program was implemented to characterize the U.S. Gulf of Mexico penaeid shrimp fishery, and in June 2008, the mandatory program expanded to include the South Atlantic penaeid and rock shrimp fisheries. The program was initiated to identify and minimize the impacts of shrimp trawling on federally managed species. The specific objectives are to (1) estimate catch rates during commercial shrimping operations for target and non-target species, including protected species by area, season and depth; and (2) evaluate bycatch reduction devices designed to eliminate or significantly reduce non-targeted catch. During the voluntary research effort, several different projects were initiated. One project, referred to as a characterization, involved identifying all species in a subsample from one randomly selected net. In the mandatory shrimp observer program, there are approximately 30 species (common, federally managed, etc.) that are selected and subsampled from every sampled net, but other species, including Caribbean electric rays, are only grouped into broad categories (e.g., crustaceans, inverts, finfish).

Data associated with commercial trawl bycatch of Caribbean electric rays (recorded as *Narcine brasiliensis*—Ray, Lesser Electric) in the eastern GOM and off the east coast of the United States were available from the characterization project conducted in 2001, 2002, 2005, and 2007. A total of 1,150 trawls were observed, and the catch was sorted in its entirety to the species level. Across all years, 28 Caribbean electric rays were captured during 4,016.6 hours of trawl effort, with 387 and 763 trawls being observed off the east coast and in the northern GOM, respectively. Due to the low occurrence of Caribbean electric rays, the SRT chose not to develop an index of abundance for this species from these data. The SRT believed the low number of animals captured across all years would make the index relatively uninformative. These data were evaluated in considering bycatch as a potential other manmade factor that may threaten the species.

Anecdotal Reports

In addition to the datasets reviewed above, the SRT found anecdotal accounts of Caribbean electric rays through various other sources. Many of these additional anecdotal accounts are from YouTube videos by beach goers or forum discussions by boaters and fishermen who encountered the species along the northern Gulf Coast. There are also anecdotal reports by divers around

south Florida, along the Atlantic coast, and throughout parts of the Caribbean. A researcher at Auburn University provided anecdotal accounts of Caribbean electric rays along the Fort Morgan Peninsula in Alabama. The researcher observed large numbers of Caribbean electric rays during late summer to early fall over 3 years (2011–2013) of sampling in that particular area during that particular time of year (Dr. Ash Bullard, to Jennifer Lee, NMFS, pers. com, August 15, 2014). The most common anecdotal encounters are sightings. The sightings typically describe the number of Caribbean electric rays observed at one time as very abundant (e.g., “lots,” “everywhere”). One anecdote notes that when you know what to look for they can be seen everywhere. The SRT noted while these reports cannot be used to analyze trends in abundance, they illustrate that people continue to encounter the species in coastal areas around the GOM, South Atlantic, and Caribbean and that when they do the species appears to be locally abundant.

Conclusion

Based on all times series analyzed by the SRT, including those used to support the listing petition, the SRT found no evidence of a decline in Caribbean electric ray. Differences in reported trends are related to the more robust analysis used by the SRT in the status review. Moreover, the preliminary analyses in our 90-day finding used only ratio estimators, and we did not have the raw data to derive the confidence interval. No discernable trends in abundance of the Caribbean electric ray were detected in any of the three Gulf of Mexico SEAMAP indices or the South Atlantic SEAMP index. The SRT noted the number of encounters did dramatically fluctuate over each time series, but that it was not surprising based on the species' apparent clustered but patchy distribution over shallow, sandy habitats as documented repeatedly in the literature. As additional support for this characterization, the SRT noted that recent encounters documented through anecdotes indicate the Caribbean electric ray is fairly abundant in specific habitats while consistently absent from others. The SRT was unable to find any historical or current abundance information outside of U.S. waters for the Caribbean electric ray. A non-commercial species, there are no statistics on Caribbean commercial fishery catches or on efforts that would enable an assessment of the population.

Threats Evaluation

A. The Present or Threatened Destruction, Modification, or Curtailment of Its Habitat or Range

The SRT concluded that man-made activities that have the potential to impact shallow sandy habitats include dredging, beach nourishment, and shoreline hardening projects (e.g., groins). These types of activities can negatively impact Caribbean electric rays by removing habitat features (e.g., alteration or destruction of sand bars) and affecting prey species. For example, annelids that Caribbean electric rays prey on are killed or otherwise directly or indirectly affected by large dredge-and-fill projects (Greene 2002).

The SRT determined that coastal habitats in the United States are being impacted by urbanization. Coastal habitats in the southern United States, including both the areas along the Atlantic and GOM, have experienced and continue to experience losses due to urbanization. For example, wetland losses in the GOM region of the United States averaged annual net losses of 60,000 acres (24,281 hectares) of coastal and freshwater habitat from 1998 to 2004 (Stedman and Dahl 2008). Although wetland restoration activities are ongoing in this region of the United States, the losses outweigh the gains, significantly (Stedman and Dahl 2008). These losses have been attributed to commercial and residential development, port construction (e.g., dredging, blasting, and filling activities), construction of water control structures, modification to freshwater inflows (e.g., Rio Grande River in Texas), and oil and gas related activities.

The oil and gas industry may affect marine resources in a variety of ways, including increased vessel traffic, the discharge of pollutants, noise from seismic surveys, and decommissioning charges. Although routine oil and gas drilling activities generally occur outside of the known depth range of the species, miles of pipelines associated with oil and gas activities may run through Caribbean electric ray habitat. The SRT concluded that the effect or magnitude of effects on Caribbean electric ray habitat from oil and gas activities is unknown. The largest threat is the release of oil from accidental spills. While safety precautions are in place to prevent the probability of spills and to decrease the duration of spills, these events still occur. In the GOM, the Deepwater Horizon oil spill was an unprecedented disaster, both in terms of the area affected and the duration of the spill. The Deepwater Horizon incident resulted in injuries to a wide array of

resources and habitat across the Northern Gulf of Mexico from Texas to Florida, including shoreline beaches and sediments, organisms that live on and in the sand and sediment, and fish and shellfish and other invertebrates that live in the water in nearshore ocean-bottom habitats (NOAA 2015, <http://www.gulfspillrestoration.noaa.gov/restoration-planning/gulf-plan/>). While there has been no production of oil along the Atlantic coast of the United States to date, there remains the possibility of production in the future.

The SRT reported on NOAA's Restoration Center's involvement in ongoing coastal restoration activities throughout the southeastern United States. In 2010, NOAA funded coastal restoration activities in Texas and Louisiana using appropriations from The American Recovery and Investment Act of 2009. In Louisiana, where 25 square miles (64.7 square kilometers) of wetlands are lost per year, funding from the Coastal Wetlands Planning, Protection and Restoration Act helps to implement large-scale wetlands restoration projects, including barrier island restoration and terrace and channel construction.

The SRT anticipated an increase in large-scale restoration projects in the GOM to mitigate the adverse effects of the Deepwater Horizon oil spill and foster restoration of coastal habitat, including those used by the Caribbean electric ray. Numerous large coastal restoration projects in the GOM are expected to be funded by the Resources and Ecosystems Sustainability, Tourist Opportunities and Revived Economies of the Gulf Coast States Act, Natural Resource Damage Assessment, and Clean Water Act settlement agreements related to the Deepwater Horizon oil spill. Many additional restoration projects will also be funded by the Gulf of Mexico Energy Security Act, beginning in Fiscal Year 2017.

While fewer in number, restoration efforts are also expected along coastal areas of the South Atlantic states. For example, funding is expected to be available to support comprehensive and cooperative habitat conservation projects in Biscayne Bay located in south Florida, as one of NOAA's three Habitat Focus Areas.

The SRT concluded the geographic areas in which the Caribbean electric ray occurs are being impacted by human activities. Despite ongoing and anticipated efforts to restore coastal habitats of the GOM and Atlantic off the Southeastern United States, coastal habitat losses will continue to occur in these regions as well as throughout the

Caribbean electric ray's entire range. However, the SRT could find no information on specific effects to the Caribbean electric ray beyond broad statements on the impacts to coastal habitat resulting from development and oil and gas exploration. Data are lacking on impacts to habitat features related to the Caribbean electric ray and/or threats that result in curtailment of the Caribbean electric ray's range. In October 2015, NOAA published a Programmatic Damage Assessment and Restoration Plan (PDARP) and Draft Programmatic Environmental Impact Statement, which considers programmatic alternatives to restore natural resources, ecological services, and recreational use services injured or lost as a result of the Deepwater Horizon oil spill. The PDARP presents data on impacts to nearshore habitats and resources, but there are no data specific to Caribbean electric rays.

As discussed above, anthropogenic impacts to shallow, soft bottom habitats have been occurring for decades and are expected to continue into the future indefinitely. However, there is no available information that indicates that the Caribbean electric ray has been adversely affected by impacts to the coastal soft bottom habitats they prefer. Sand substrate is not limiting throughout the Caribbean electric ray's range, and the limited data available on the species' movements indicate they do travel between areas with suitable habitat. The SRT concluded that predictions of coastal habitat losses adversely impacting the Caribbean ray in the future would be speculative.

B. Overutilization for Commercial, Recreational, Scientific, or Educational Purposes

The SRT details how McEachran and Carvalho (2002) reported for the Narcinidae family that "flesh of the tail region may be marketed after removal of the electric organs in the larger species, but is generally considered to be mediocre in quality." The SRT notes that in the species-specific account for Caribbean electric ray, McEachran and Carvalho (2002) reported that "the tail region may be consumed as food and considered of good quality, but it is not targeted regularly by fisheries in the Western Central Atlantic."

The SRT found no evidence of commercial or recreational harvest of the species. Interest in the species by those who detect it in the surf zone is largely one of curiosity. As Caribbean electric rays are generally nocturnal and spend daylight hours buried under the sand, they likely go undetected by the general public. Recreational fishermen

who are gigging for flounder at night are most likely to encounter this species. The SRT noted there are some anecdotal reports of recreational surf fishermen capturing them in dip-nets; however, available data indicate that captured individuals are released.

Scientific research on Caribbean electric rays has been sparse. Rudloe (1989a) collected and studied the ecology of Caribbean electric rays from March 1985 to March 1987, to assess the feasibility of its use in biochemical and neurophysiological research. Rudloe (1989a) reported catching 3,913 rays at several stations from Cape San Blas to Alligator Point, Florida, during this time period. Of these, 3,229 were retained, 455 were tagged and released, and 229 were released untagged due to small size. Funding for research was discontinued after these 2 years of sampling.

The SRT uncovered only a few additional studies involving the Caribbean electric ray that post-date the Rudloe study (Dean and Motta 2004a, b; Dean *et al.* 2005, 2006; Tao 2013). Dr. Mason Dean led a study on Caribbean electric ray husbandry (Dean *et al.* 2005) and three studies on jaw morphology and feeding behavior (Dean and Motta 2004a, b; Dean *et al.* 2006). For these studies, samples were collected using a trawl off Cape Canaveral on the east coast of Florida (41 individuals total) and in the northeast portion of the GOM (6 individuals); six individual specimens preserved at the Florida Museum of Natural History that had been collected from Little St. George Island, Florida were also used. Tao (2013), as a Ph.D. candidate at Auburn University, analyzed the blood vascular systems of ten Caribbean electric rays captured in the northern GOM off Alabama for bacteria. The Bullard Laboratory at Auburn University provided the samples for that study, subsequently releasing them alive after collecting external parasites (Dr. Ash Bullard, Auburn University pers. comm. to J. Lee, NMFS, August 15, 2014). Bullard Laboratory at Auburn University sampled an unknown number of additional Caribbean electric rays in accordance with its state collection permit; no record was kept of the number of Caribbean electric rays observed in the field or the total number of individuals examined. A few researchers from the GOM expressed interest in studying the species in the future, but the SRT did not uncover nor are we aware of any directed studies on Caribbean electric rays at this time.

Captive display of Caribbean electric rays in public aquaria is extremely rare. Due to their selective food habits (*i.e.*,

live polychaete worms) and feeding behavior, they are not easy to keep in aquaria (Rudloe 1989b, Dean *et al.* 2005). The 2008 American Elasmobranch Society International Captive Elasmobranch Census documented two male electric rays and one female electric ray in captivity. They were recorded as *Narcine brasiliensis* and were in captivity at a single aquarium. The SRT was unable to determine if these animals were still in captivity or the location of this aquarium. Nevertheless this serves as the only record of electric rays in aquaria.

The Gulf Marine Specimens Laboratory sells 6–24 cm wild caught Caribbean electric rays for \$126 (<http://www.gulfspecimen.org/specimen/fish/sharks-and-rays/>). However, no more than a few are sold annually, and the cost of collection and delivery greatly reduces the likelihood of their use as student specimens (Jack Rudloe pers. comm. to J. Lee, NMFS, August 15, 2014).

The species has apparent fidelity for specific, localized habitats, thus targeting Caribbean electric rays could adversely affect the population. However, the SRT found no information to indicate that commercial, recreational, scientific, or educational overutilization of Caribbean electric rays has occurred or is occurring. Further, based on the information presented above, the SRT did not expect overutilization by any specific industry in the future.

C. Competition, Disease and Predation

The available data reviewed by the SRT on competition for Caribbean electric ray prey species or other resources, and disease and predation on Caribbean electric rays, are summarized in the Life History, Biology, and Ecology Section. The SRT found no information to indicate that competition for Caribbean electric ray prey species or other resources (*e.g.*, sandy substrate habitat) is negatively affecting the Caribbean electric ray abundance or survival. The SRT also found no information indicating that predation or disease is impacting Caribbean electric ray abundance and survival. Given the lack of data, the SRT concluded that predictions of whether competition, predation, or disease, may impact the Caribbean electric ray in the future would be entirely speculative.

D. Inadequacy of Existing Regulatory Mechanisms

The SRT evaluated this factor in terms of whether existing regulations may be inadequate to address potential threats

to the species. The SRT concluded that although there were no species-specific regulations, there is no evidence that the lack of such is having a detrimental effect on the Caribbean electric ray.

E. Other Natural or Manmade Factors Affecting Its Continued Existence

There are a variety of other natural and manmade factors that may affect the Caribbean electric ray and thus the continued existence of this species. Factors reviewed by the SRT included the species' life history and habitat use, natural events such as extreme tidal or red tide events, bycatch in commercial fisheries, and climate change.

Life History and Habitat Use

Rudloe (1989a) believed the species was potentially vulnerable to overharvest as a result of its low rate of reproduction and localized distribution. Caribbean electric rays reproduce annually (Rudloe 1989a, Moreno *et al.* 2010) with brood sizes ranging from 1–14 young (Bigelow and Schroeder 1953, de Carvalho *et al.* 1999, Moreno *et al.* 2010). While it is generally believed that elasmobranchs exhibit life history traits that make them more susceptible to exploitation (*e.g.*, low fecundity, late age of maturity, slow growth), the limited evidence on Caribbean electric ray life-history traits and population parameters (*e.g.*, mature by age 2, females reproduce every year) likely place the species among those elasmobranchs that are more productive. Therefore, the SRT did not consider the species to be vulnerable due to its rate of reproduction. The SRT did believe the species' patchy distribution and fidelity for specific habitats increases vulnerability, but they did not find evidence of this vulnerability having detrimental effects on the Caribbean electric ray. Thus they believed there was no basis to conclude these traits would increase extinction risk into the future.

Natural Events

Red tide (*Karenia brevis*) impacts many species of fish and wildlife in the GOM and along the Florida coast. *Karenia brevis* produces brevetoxins capable of killing fish, birds, and other marine animals. While red tide events can cause deaths of aquatic species, the SRT has no information on the extent to which red tides may be affecting the Caribbean electric ray. The SRT did not find any reports of red tide resulting in Caribbean electric ray mortalities.

There are a couple of reports of mass strandings of electric rays resulting from extremely low tides. The National Park Service at Padre National Seashore

reported documenting a dozen or so dead electric rays in the tidal zone of Padre Island, Texas, after an extremely low tide event in the fall. Showing no signs of trauma or disease, officials at the National Park Service at Padre National Seashore attributed the mortalities to the extreme low tide leaving them stranded. The SRT concluded that such events have always occurred occasionally and are expected to continue to occur in the future without affecting overall population abundance.

Bycatch in Commercial Fisheries

Caribbean electric rays have been incidentally captured by commercial fisheries targeting other species, specifically those fisheries using trawl gear. The likelihood and frequency of exposure to bycatch in fisheries is generally a function of (1) the extent of spatial and temporal overlap of the species and fishing effort, and (2) the likelihood of an interaction resulting in capture and the extent of injury from capture.

As stated earlier, data associated with commercial trawl bycatch of Caribbean electric ray in the eastern GOM and off the east coast of the United States are available from the NMFS Observer Program. During 2001, 2002, 2005 and 2007, 1,150 trawls were observed and the catch was sorted in its entirety to the species level. Across all years, 28 Caribbean electric rays were captured during 4,016.6 hours of trawl effort. NMFS observed 387 trawls off the east coast and 763 trawls in the northern GOM over this time period. Trawl duration ranged from 0.1 to 11 hours (mean = 3.48 hours, S.D. = 1.41) and occurred at depths ranging from 0.6 to 71.1 m (mean = 15.08, S.D. = 9.04). In the combined areas there were 0.0070 individuals caught per hour of trawling. Examining area specific Caribbean electric ray catch rates, there were 0.0171 and 0.0015 individuals caught per hour off the east coast and in the GOM, respectively. For trawls with positive catch, there was no significant relationship between trawl duration and the number of individuals captured ($F = 0.01$, $P = 0.92$), consistent with what would be expected for a species with a patchy distribution. Based on the number of trawls associated with Caribbean electric ray captures ($n = 10$) and the total number of trawls observed ($n = 1150$), the probability of capturing Caribbean electric rays off the east coast and in the GOM is 0.0087 (C.V. = 0.3148).

Acevedo *et al.* (2007) reported on 99 shrimp trawls in the Caribbean Sea off the northern coast of Colombia from

August to November 2004. These trawls were conducted at depths ranging from 14–72 m. Elasmobranch fishes were captured in 30 of the 99 trawls, including 6 Caribbean electric rays. The six specimens were reported for the months of August and September, the only months in which the species was taken.

The SRT believes the capture of six Caribbean electric rays is likely the result of their patchy distribution and not reflective of overall Colombian fleet annual catch per unit of effort levels. The SRT noted that there are few areas of suitable habitat for the species off northern Colombia because the bottoms are rocky or coralline, and that this also makes most areas in that area unsuitable for trawling. Based on that information, the SRT concluded that it did not believe the documented bycatch is particularly notable or cause for concern.

The lack of sandy bottom habitat in northern Colombia could also mean that Caribbean electric rays and trawling effort may overlap more in that particular area. However, the SRT did not conclude that documented bycatch in Colombia raises concerns about the status of the species.

Overall, the SRT concluded there is no evidence that the bycatch of Caribbean electric ray occurring in U.S. or foreign fisheries, including the Colombia trawl fisheries, has had any past impact on Caribbean electric rays. Given that declines have not been documented in U.S. waters where data are available, there is no reason to suspect that declines are occurring elsewhere in the species' range. The SRT further found there is no basis to conclude that operations of these fisheries indefinitely into the future would result in a decline in Caribbean electric ray abundance.

Climate Change

The Intergovernmental Panel on Climate Change has stated that global climate change is unequivocal (IPCC 2007) and its impacts to coastal resources may be significant. There is a large and growing body of literature on past, present, and future impacts of global climate change induced by human activities, *i.e.*, global warming mostly driven by the burning of fossil fuels. Some of the likely effects commonly mentioned are sea level rise, increased frequency of severe weather events, and change in air and water temperatures. NOAA's climate change web portal provides information on the climate-related variability and changes that are exacerbated by human activities (<http://www.climate.gov/>

#understandingClimate). The EPA's climate change Web page also provides basic background information on these and other measured or anticipated effects (<http://www.epa.gov/climatechange/index.html>).

The SRT concluded that climate change impacts on Caribbean electric rays cannot currently be predicted with any degree of certainty. Climate change can potentially affect the distribution and abundance of marine fish species. Distributional changes are believed to be highly dependent on the biogeography of each species, but changes in ocean temperature are believed likely to drive poleward movement of ranges for tropical and lower latitude organisms (Nye *et al.* 2009). Evidence of climate change-induced shifts in distribution of marine fish has been recorded in the western Atlantic, the Gulf of Mexico, and in the Northeastern Atlantic (Fodrie *et al.* 2010, Murawski 1993, Nye *et al.* 2009). The SRT predicts that increased water levels and warmer water temperatures will have little impact on the species and, if anything, could possibly expand its range off the U.S. east coast. Given what the SRT knows about the species' current depth distribution, the SRT concluded it is unlikely that sea level rise will have adverse effects. Similarly, because the range of the Caribbean electric ray seems to be restricted to warm temperate to tropical water temperature, the SRT concluded increased water temperatures are unlikely to negatively influence the species and could possibly expand their northern range in the future.

Extinction Risk Analysis

In addition to reviewing the best available data on potential threats to Caribbean electric rays, the SRT considered demographic risks to the species similar to approaches described by Wainwright and Kope (1999) and McElhany *et al.* (2000). The approach of considering demographic risk factors to help frame the discussion of extinction risk has been used in many status reviews (<http://www.nmfs.noaa.gov/pr/species>). In this approach, the collective condition of individual populations is considered at the species level, typically according to four demographic viability risk criteria: Abundance, population growth, spatial structure/connectivity, and diversity/resilience. These viability criteria reflect concepts that are well-founded in conservation biology and that individually and collectively provide strong indicators of extinction risk.

Because the information on Caribbean electric ray demographics and threats is

largely sparse and non-quantitative, the SRT used qualitative reference levels for its analysis to the extent consistent with the best available information. The three qualitative 'reference levels' of extinction risk relative to the demographic criteria used were high risk, moderate risk, and low risk as defined in NMFS' Guidance on Responding to Petitions and Conducting Status Reviews under the ESA. A species or distinct population segment (DPS) with a high risk of extinction was defined as being at or near a level of abundance, productivity, spatial structure, and/or diversity that places its continued persistence in question. The demographics of a species or DPS at such a high level of risk may be highly uncertain and strongly influenced by stochastic or compensatory processes. Similarly, a species or DPS may be at high risk of extinction if it faces clear and present threats (*e.g.*, confinement to a small geographic area; imminent destruction, modification, or curtailment of its habitat; or disease epidemic) that are likely to create present and substantial demographic risks.

A species or DPS was defined as being at moderate risk of extinction if it is on a trajectory that puts it at a high level of extinction risk in the foreseeable future (see description of "High risk" above). A species or DPS may be at moderate risk of extinction due to projected threats or declining trends in abundance, productivity, spatial structure, or diversity.

A species or DPS was defined as being at low risk of extinction if it is not at moderate or high level of extinction risk (see "Moderate risk" and "High risk" above). A species or DPS may be at low risk of extinction if it is not facing threats that result in declining trends in abundance, productivity, spatial structure, or diversity. A species or DPS at low risk of extinction is likely to show stable or increasing trends in abundance and productivity with connected, diverse populations.

The SRT evaluated the current extent of extinction risk based on Caribbean electric ray relative abundance trends data and the likelihood the species will respond negatively in the future to potential threats. The foreseeable future is linked to the ability to forecast population trends. The SRT considered the degree of certainty and foreseeability that could be gleaned concerning each potential threat, whether the threat was temporary or permanent in nature, how the various threats affect the life history of the species, and whether observations concerning the species' response to the threat are adequate to establish a trend.

In evaluating the foreseeable future, it is not just the foreseeability of the threats, but also the foreseeability of the impacts of the threats on the species that must be considered. Thus, the nature of the data concerning each threat and the degree to which reliable predictions about their impacts on the species could be made were assessed. There are no data documenting discernable decreases in relative abundance trends or other data showing that Caribbean electric ray populations have been impacted by identified potential threats. The magnitude of potential threats and factors described above were generally expected to remain unchanged. Thus, the SRT determined it was unable to specify a definitive time frame to define the foreseeable future for evaluating the degree to which demographic factors and potential threats contribute to the species' risk of extinction.

Qualitative Risk Analysis of Demographics

The SRT's ability to analyze many of the specific criteria embedded in the risk definitions for demographic factors was limited. There are no data available on age-at maturity or natural mortality that would be necessary to determine population growth rates. Population structure and levels of genetic diversity in Caribbean electric rays are completely unknown, with no genetic studies ever conducted, even for the species' taxonomy.

The SRT determined that the relative abundance trend information for Caribbean electric rays represents a low risk to the species' continued existence now and into the future. The Caribbean electric ray has a broad range in warm temperate to tropical waters of the western Atlantic from North Carolina to Florida (its presence in the Bahamas is unknown, however), the Gulf of Mexico and the Caribbean Sea to the northern coast of South America. Within its range, it has a patchy distribution within relatively shallow waters, often within the surf zone. There are no estimates of absolute population size over the species' range; however, analyses of available long-term datasets indicate that the trend in relative abundance is relatively flat with abundance dramatically fluctuating over each time series. The SRT did not find this surprising given the patchy distribution over specific habitat types.

The SRT found very little information available on the life history of Caribbean electric ray. There are no age and growth studies for this species but anecdotal studies suggest rapid growth. Size at maturity for females is estimated at about 26 cm TL (Funicelli 1975).

Caribbean electric rays are estimated to reach reproductive size by the end of their first year, and the reproductive cycle is annual (Rudloe 1989a). The brood size ranges from 1–14 depending on the study. While it is generally regarded that elasmobranchs exhibit life history traits (e.g., low fecundity, late age of maturity, slow growth) that make them more susceptible to exploitation, the limited evidence on Caribbean electric ray life-history traits and population parameters likely place the species among those elasmobranchs that are more productive. Thus, the SRT believed that the species likely will be able to withstand moderate anthropogenic mortality levels and have a higher potential to recover from exploitation and stochastic events. The SRT concluded that available information on the species' demographic characteristics currently represent a low risk of extinction, and risks are unlikely to increase into the future.

The SRT found no evidence that Caribbean electric rays are at risk of extinction due to a change or loss of variation in genetic characteristics or gene flow among populations currently or into the future. This species is found over a broad range and appears to be opportunistic and well adapted to its environment. In addition, the risk of extinction due to the loss of spatial structure and connectivity for the Caribbean electric ray is low. Caribbean electric rays have a relatively broad distribution in the western Atlantic Ocean generally in habitats dominated by sand bottom substrate. Sand substrate is not limiting throughout the range, and the limited data available on species movements indicate individuals do travel between areas with suitable habitat.

Qualitative Risk Analysis of Threats

Regarding habitat threats to the species, the SRT concluded that man-made activities that have the potential to impact shallow sandy habitats include dredging, oil and gas pipelines and pipeline development, beach nourishment, and shoreline hardening projects (e.g., groins). These types of activities could negatively impact Caribbean electric rays by removing habitat features they require. Although specific data are lacking on impacts to the Caribbean electric ray, it is reasonable to anticipate that coastal development will continue perpetually and may damage habitat within the species' range. However, the species does occur over a broad range and most impacts to the coastal zone have more significantly occurred to wetlands, coral

reefs and mangrove ecosystems, rather than sand bottom habitats. For these reasons, the SRT concluded that the Caribbean electric ray is at low risk of extinction due to destruction and modification of habitat currently and in the future.

The SRT determined impacts from overutilization are unlikely to cause the species to be at heightened risk of extinction. There is little to no direct harvest for the species. The SRT considered bycatch in commercial fisheries as one of the natural or manmade factors it reviewed. Caribbean electric rays are very uncommon as bycatch in trawl and gillnet fisheries. Moreover, many states throughout their U.S. range (e.g., Florida, Texas, and Georgia) have banned gillnet fishing in state waters which will further reduce the likelihood of bycatch as a negative impact on the continued existence of Caribbean electric rays. The level of bycatch from U.S. shrimp trawl fisheries is believed to be low primarily because they operate mainly in areas where Caribbean electric rays are not found. The SRT concluded that overutilization presented a low risk of extinction. The risk associated with the level of bycatch from U.S. shrimp trawl fisheries is unlikely to change in the future given the areas where the fishery mainly operates are also unlikely to change. Since 2001, there has been a dramatic decrease in otter trawl effort in southeast U.S. shrimp fisheries, which has been attributed to low shrimp prices, rising fuel costs, competition with imported products, and the impacts of 2005 and 2006 hurricanes in the Gulf of Mexico. Although otter trawl effort from year to year may fluctuate some, there are no data to indicate that otter trawl effort levels will increase in the future from recent levels. Also, the species has been subject to bycatch for centuries and does not appear to have experienced any measurable decline during those earlier periods, based on the relative abundance trends data available. The SRT also determined the risk to Caribbean electric ray from disease or predation is also low now; in the absence of data on past or current impacts to the species, the SRT concluded that no impacts can be foreseen into the future.

Overall Risk of Extinction Throughout Its Range Analysis

In this section we evaluate the overall risk of extinction to the Caribbean electric ray throughout its range. In determining the overall risk of extinction to the species throughout its range, we considered available data on the specific life history and ecology of

the species, the nature of potential threats, any known responses of the species to those threats, and population abundance trends. We considered the information summarized in the status review report (Carlson *et al.* 2015).

The SRT determined it could not define a foreseeable future for their extinction risk. However, we think the available information on abundance trends can provide an appropriate horizon over which to consider how the species may respond to potential impacts into the future. The fisheries-independent datasets from which we evaluated abundance trends span time periods of 11 to 34 years, during which abundance trends were flat, with scattered and varied peaks in abundance. All of the potential threats evaluated by the SRT were occurring at the same time that the fishery independent surveys were performed. All of the activities that constitute potential threats were also projected by the SRT to continue at their current levels into the future. Therefore, we feel it is appropriate to consider the foreseeable future to be the next few decades, or 20 to 30 years, for Caribbean electric ray. Although the lifespan of Caribbean electric ray is not known, based on their early size of maturity and apparent annual reproduction, 20 to 30 years would encompass several generations of the species and thus any adverse responses to threats would be discernible over this timeframe.

We concur with the SRT's analysis and risk conclusions for potential threats and for demographic factors. The threat and demographic factors identified present either no risk or at most low risk to Caribbean electric ray, now and over the foreseeable future. There is no information indicating that any potential threats have adversely impacted Caribbean electric ray in the past, and there is no basis to predict that potential threats will adversely impact the species over the next 20 to 30 years. The species has not faced threats in the past, and is not expected to face any over the foreseeable future, that would result in declining trends in abundance, spatial structure, or diversity.

Based on all time series of data analyzed by the SRT, including those used to support the listing petition, there is no evidence of a decline in relative abundance of Caribbean electric rays. No discernable trends in abundance of Caribbean electric ray were detected in any of the available datasets. Number of encounters did dramatically fluctuate over each time series, but we believe this reflects the species' apparent clustered but patchy distribution over shallow, sandy

habitats. Anecdotal accounts of recent encounters indicate they are abundant in specific habitats while consistently absent from others. Our 90-day determination that the petitioned action may be warranted due to impacts from incidental take in fisheries was based on one study (Shepherd and Myers 2005) indicating that nearshore shrimp trawl fisheries operating in the northern Gulf of Mexico may be negatively impacting the species in that region. However, further examination of the dataset by the SRT revealed that Shepherd and Myers (2005) did not take into account major changes in survey design and how they would affect the relative abundance of Caribbean electric rays, and did not understand how the catch was sorted, thus Shepherd and Myers (2005) underestimated the number of individual reports in the data. The SRT's analysis showed no discernable trends in abundance of Caribbean electric ray in any of the three Gulf of Mexico Southeast Area Monitoring and Assessment Program indices.

There is no evidence that potential threats comprising ESA section (4)(a)(1) factors (A)–(C) or (E) have contributed to heightened extinction risk and endangerment of the species. Incidental take in fisheries was the only activity we initially believed might be resulting in adverse impacts to the species due to the decline presented in Shepherd and Myers (2005). However, after further review we believe there is no evidence indicating that nearshore shrimp trawl fisheries operating in the northern Gulf of Mexico or in foreign waters (*e.g.*, Colombia shrimp trawls) are negatively impacting the species in those areas.

Neither we nor the SRT identified any threats under the other Section 4(a)(1) factors that may be causing or contributing to heightened extinction risk of this species. Therefore, we conclude that inadequate regulatory mechanisms (Section (4)(a)(1)(D)) are also not a factor affecting the status of Caribbean electric ray.

So to summarize, we did not find that any of the demographic factors or Section 4(a)(1) factors contribute significantly to the extinction risk of this species throughout its range, now or in the foreseeable future. Based on our consideration of the best available data, as summarized here and in Carlson *et al.* (2016), we determine that the present overall risk of extinction to the Caribbean electric ray throughout its range is low, and will remain low over the foreseeable future, and thus listing as threatened or endangered under the ESA throughout its range is not warranted. We also considered whether any threats or demographic factors

elevated risks to the species when considered cumulatively. With no evidence of any decline in the species or other negative impacts to life history characteristics, there is no evidence to suggest that potential threats and demographic factors cumulatively are currently elevating the species' risk of extinction, or will elevate extinction risk throughout its range over the foreseeable future.

Significant Portion of Its Range (SPOIR)

Because we found that listing the species as endangered or threatened throughout its range was not warranted, we then conducted a "significant portion of its range analysis." The U.S. Fish and Wildlife Service (FWS) and NMFS—together, "the Services"—have jointly finalized a policy interpreting the phrase "significant portion of its range" (SPOIR) (79 FR 37578; July 1, 2014). The SPOIR policy provides that: (1) If a species is found to be endangered or threatened in only a significant portion of its range, the entire species is listed as endangered or threatened, respectively, and the Act's protections apply across the species' entire range; (2) a portion of the range of a species is "significant" if the species is not currently endangered or threatened throughout its range, but the portion's contribution to the viability of the species is so important that, without the members in that portion, the species would be in danger of extinction or likely to become so in the foreseeable future, throughout all of its range; and (3) the range of a species is considered to be the general geographical area within which that species can be found at the time we make any particular status determination.

We evaluated whether substantial information indicated that (i) portions of the Caribbean electric ray's range are significant and (ii) the species occupying those portions is in danger of extinction or likely to become so within the foreseeable future (79 FR 37578; July 1, 2014). Under the SPOIR policy, both considerations must apply to warrant listing a species as threatened or endangered throughout its range based upon its status within a portion of the range.

The historical range of the Caribbean electric ray is in western Atlantic shallow coastal waters, from North Carolina through the northern coast of Brazil (Carvalho *et al.* 2007). Individual populations are localized and do not migrate extensively, but do move onshore and offshore at least seasonally, crossing between barrier beach surf zones and sandbars adjacent to passes associated with estuarine barrier islands

(Rudloe 1989a). Movements also include travel east and west between sand bar habitats (Rudloe 1989a). Geographically as well as quantitatively, those parts of the electric ray's range that are within U.S. waters (Gulf of Mexico, South Atlantic) may each constitute a significant portion of the Caribbean electric ray's range because if the population were to disappear from either portion, it could result in the rest of the species being threatened or endangered. However, there is no information to indicate that the members of the species in either the Gulf of Mexico or the South Atlantic have different demographic viability or are facing different or more intense threats to the point where they would be threatened or endangered in these portions. Because a portion may be both significant and threatened or endangered before we can list a species based on its status in a significant portion of its range, we do not find that listing the Caribbean electric ray is threatened or endangered based on its status in a significant portion of its range is warranted.

Final Listing Determination

Section 4(b)(1) of the ESA requires that NMFS make listing determinations based solely on the best scientific and commercial data available after conducting a review of the status of the species and taking into account those efforts, if any, being made by any state or foreign nation, or political subdivisions thereof, to protect and conserve the species. We have independently reviewed the best available scientific and commercial information including the petitions, public comments submitted on the 90-day finding (79 FR 4877; January 30, 2014), the status review report (Carlson *et al.* 2015), and other published and unpublished information. We considered each of the statutory factors to determine whether it contributed significantly to the extinction risk of the species. As previously explained, we could not identify a significant portion of the species' range that is threatened or endangered. Therefore, our determination is based on a synthesis and integration of the foregoing information, factors and considerations, and their effects on the status of the species throughout its entire range.

We conclude that the Caribbean electric ray is not presently in danger of extinction, nor is it likely to become so in the foreseeable future throughout all of its range. Accordingly, the Caribbean electric ray does not meet the definition of a threatened species or an endangered species and our listing determination is

that the Caribbean electric ray does not warrant listing as threatened or endangered at this time.

National Oceanic and Atmospheric Administration

RIN 0648-XE750

Mid-Atlantic Fishery Management Council (MAFMC); Public Meetings

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meetings.

SUMMARY: The Mid-Atlantic Fishery Management Council (Council) will hold public meetings of the Council and its Committees.

DATES: The meetings will be held Monday, August 8, 2016 through Thursday, August 11, 2016. For agenda details, see **SUPPLEMENTARY INFORMATION**.

ADDRESSES: The meeting will be held at: Hilton Virginia Beach Oceanfront, 3001 Atlantic Avenue, Virginia Beach, VA 23451, telephone: (757) 213-3000.

Council address: Mid-Atlantic Fishery Management Council, 800 N. State St., Suite 201, Dover, DE 19901; telephone: (302) 674-2331.

FOR FURTHER INFORMATION CONTACT: Christopher M. Moore, Ph.D., Executive Director, Mid-Atlantic Fishery Management Council; telephone: (302) 526-5255. The Council's Web site, www.mafmc.org also has details on the meeting location, proposed agenda, webinar listen-in access, and briefing materials.

SUPPLEMENTARY INFORMATION: The following items are on the agenda, though agenda items may be addressed out of order (changes will be noted on the Council's Web site when possible.)

Monday, August 8, 2016

Executive Committee

The Executive Committee will hold a closed session and then open to review the letter regarding governance of summer flounder, scup, and black sea bass and coordination of research with SAFMC.

Unmanaged Forage Amendment Final Action

Review comments received during public hearings, review Ecosystem and Ocean Planning Advisory Panel and Committee recommendations for final action, and select preferred alternatives.

Ecosystem Approach to Fisheries Management (EAFM) Guidance Document

Review, finalize, and approve EAFM Guidance Document and review and discuss potential framework for integrating ecosystem interactions into fisheries assessment and management.

Tuesday, August 9, 2016

Demersal Committee Meeting as a Committee of the Whole With the Atlantic States Marine Fisheries Commission's Summer Flounder, Scup and Black Sea Bass and Bluefish Boards

Summer Flounder Allocation Project Report

A presentation will be received on the summer flounder allocation model and initial findings.

Summer Flounder Amendment Alternatives

Review and provide feedback on the list of amendment issues and Fishery Management Action Team recommendations.

Summer Flounder Specifications

Review SSC, Monitoring Committee, Advisory Panel, and staff recommendations regarding 2017-2018 specifications and recommend any changes if necessary.

Black Sea Bass Specifications

Review SSC, Monitoring Committee, Advisory Panel, and staff recommendations regarding 2017 specifications and recommend any changes if necessary.

Wednesday, August 10, 2016

Demersal Committee Meeting as a Committee of the Whole With the Atlantic States Marine Fisheries Commission's Summer Flounder, Scup and Black Sea Bass and Bluefish Boards

Scup Specifications

Review SSC, Monitoring Committee, Advisory Panel, and staff recommendations regarding 2017–18 specifications and recommend any changes if necessary.

Bluefish Specifications

Review SSC, Monitoring Committee, Advisory Panel, and staff recommendations regarding 2017–18 specifications and recommend any changes if necessary.

Executive Committee Report**Policy on Fishing Impacts on Habitat**

Review and consider approval of draft policy.

For-Hire Electronic VTR Framework Meeting 2

Review Framework document and analyses to address issues raised at the June Council meeting, summary of constituent input, and summarize revisions made. Also, select final alternative(s), and discuss the implementation process.

Law Enforcement Reports

Reports will be received from the NOAA Office of Law Enforcement and the U.S. Coast Guard.

Thursday, August 11, 2016**Swearing In of New Council Members/ Election of Officers****Business Session**

Organization Reports; Liaison Reports; Executive Director's Report; Science Report; Committee Reports; and Continuing and New Business.

Although non-emergency issues not contained in this agenda may come before this group for discussion, in accordance with the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act), those issues may not be the subject of formal action during these meetings. Actions will be restricted to those issues specifically identified in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Act, provided the public has been notified of the Council's intent to take final action to address the emergency.

Special Accommodations

These meetings are physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aid should be directed to M. Jan Saunders, (302) 526–5251, at least 5 days prior to the meeting date.

Dated: July 19, 2016.

Tracey L. Thompson,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

DEPARTMENT OF COMMERCE**National Oceanic and Atmospheric Administration**

RIN 0648–XE662

Marine Fisheries Advisory Committee

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; request for nominations.

SUMMARY: Nominations are being sought for appointment to a new task force of the Marine Fisheries Advisory Committee (MAFAC) to support its advisory work for the Secretary of Commerce on living marine resource matters. The task force will focus on providing information and advice on the establishment of long-term goals for salmon and steelhead in the Columbia River Basin. National Marine Fisheries Service (NMFS) will appoint the members in consultation with MAFAC and they will serve for a term of up to two (2) years. The terms would begin in December 2016.

DATES: Nominations must be postmarked or have an email date stamp on or before September 6, 2016.

ADDRESSES: Nominations should be sent to Katherine Cheney, NMFS West Coast Region, 1201 Northeast Lloyd Boulevard, Suite 1100, Portland, OR 97232 or to katherine.cheney@noaa.gov.

FOR FURTHER INFORMATION CONTACT: Katherine Cheney, (503) 231–6730; email: katherine.cheney@noaa.gov.

SUPPLEMENTARY INFORMATION: MAFAC is the only Federal advisory committee with the responsibility to advise the Secretary of Commerce (Secretary) on all matters concerning living marine resources that are the responsibility of the Department of Commerce. MAFAC is establishing a Columbia Basin Partnership Task Force to assist it in the development of long-term goals for

salmon and steelhead in the Columbia River Basin, which is critical to the mission and goals of the NMFS.

Columbia Basin Partnership Task Force

This Columbia Basin Partnership Task Force is being created for state, tribal and stakeholder input to MAFAC to support development of quantitative goals for Columbia River Basin salmon and steelhead at the species, stock, major population group (MPG), and population levels. The goals will be collaboratively developed to meet conservation needs while also providing harvest (including those necessary to satisfy tribal treaty rights). Shared goals will enhance engagement and understanding by providing a concise, common definition of success, consistent means to measure progress, and improved public support for work across the Columbia River Basin.

The scope of the Columbia Basin Partnership Task Force will fall within the objectives and scope of the MAFAC; is more comprehensive than any prior goal-setting effort in the Basin; and will encompass:

- All Endangered Species Act-listed and non-listed salmon and steelhead in the Columbia Basin, above and below Bonneville Dam.
- Ocean, mainstem, and tributary fisheries that harvest Columbia Basin stocks, including commercial, recreational, and tribal fisheries.
- Multiple geographic scales (Basin-wide, species, and major population group).
- All impacts across the salmon and steelhead life-cycle (e.g., habitat, hatchery, hydro, and harvest).
- Consideration of ecological conditions and of current and future habitat capacity.

The Task Force will report to MAFAC and will not provide advice or work product directly to NMFS. Recommendations generated by this Task Force's efforts will not result in any regulatory decision, obligate any party to undertake certain activities, or diminish treaty/trust obligations. The input of the Task Force will support efforts that seek common solutions that work for all sovereigns and stakeholders. The strength of the Task Force will hinge on the breadth of regional participation, collaboration, and commitment.

This Task Force will consist of 25–35 individuals who have demonstrated subject matter expertise regarding salmon and steelhead biology and management in the Columbia River Basin, as well as the interest and ability to work collaboratively and respectfully with other sovereigns and stakeholders

to find solutions. Individuals should represent the geographic diversity of the Columbia River Basin, as well as the diversity of interests including state and tribal fish managers; NGO/ environmental interests; commercial fishing interests; recreational fishing interests; utility interests; river industry interests; agricultural/irrigation interests; and local watershed or recovery planning interests. At least one member of MAFAC will serve as a member of the Task Force.

It is intended that the Task Force be established for an initial period of two (2) years with a possibility of extending that term if deemed necessary by NMFS and MAFAC. Task Force members should be able to fulfill the time commitments required for quarterly meetings (mostly by webinar or teleconference and potentially in-person). Members of the Task Force are not compensated for their services, but will upon request be allowed to travel and per diem expenses as authorized by 5 U.S.C. 5701 *et seq.*

Nomination Materials

Each nomination submission must include: resume or curriculum vitae of the nominee and a cover letter, not to exceed 3 pages, that describes the nominee's qualifications and interest in serving on the Task Force and how the nominee meets the following criteria:

- Is able to broadly represent his or her interests and constituency that he/she affiliates with as they are affected by salmon and steelhead management in the Columbia River Basin.
- Has organizational and/or subject matter expertise regarding salmon and steelhead management in the Columbia River Basin.
- Has demonstrated a willingness and ability to work collaboratively and respectfully with other stakeholders to find solutions.
- Contributes to representation of the geographic diversity of the Columbia River Basin.

Self-nominations are acceptable. The following contact information should accompany each nominee's submission: full name, address, telephone number, fax number, and email address. Nominations should be sent to (see **ADDRESSES**) and must be received by September 6, 2016. Information about MAFAC, its Committee Charter, current membership, and activities can be viewed on the NMFS' Web page at www.nmfs.noaa.gov/mafac.htm.

Dated: July 19, 2016.

Jennifer Lukens,

Director, Office of Policy, National Marine Fisheries Service.

BILLING CODE 3510-22-P

COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

Procurement List; Proposed Deletions

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Proposed Deletions from the Procurement List.

SUMMARY: The Committee is proposing to delete products and services from the Procurement List that was furnished by nonprofit agencies employing persons who are blind or have other severe disabilities.

DATES: Comments must be received on or before: 8/21/2016.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, 1401 S. Clark Street, Suite 715, Arlington, Virginia, 22202-4149.

FOR FURTHER INFORMATION CONTACT: Barry S. Lineback, Telephone: (703) 603-7740, Fax: (703) 603-0655, or email CMTEFedReg@AbilityOne.gov.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 8503 (a)(2) and 41 CFR 51-2.3. Its purpose is to provide interested persons an opportunity to submit comments on the proposed actions.

Deletions

The following products and services are proposed for deletion from the Procurement List:

Products

NSN(s)—Product Name(s):

- 8415-00-NIB-1053—Jacket, Tanker, USMC, Pewter Gray, Size 38R
- 8415-00-NIB-1054—Jacket, Tanker, USMC, Pewter Gray, Size 38L
- 8415-00-NIB-1055—Jacket, Tanker, USMC, Pewter Gray, Size 38XL
- 8415-00-NIB-1056—Jacket, Tanker, USMC, Pewter Gray, Size 40S
- 8415-00-NIB-1057—Jacket, Tanker, USMC, Pewter Gray, Size 40R

COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

Procurement List; Deletions

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Deletions from the Procurement List.

SUMMARY: The Committee is proposing to delete services from the Procurement List that were previously furnished by nonprofit agencies employing persons who are blind or have other severe disabilities.

DATES: *Effective Date:* 8/21/2016.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, 1401 S. Clark Street, Suite 715, Arlington, Virginia 22202-4149.

FOR FURTHER INFORMATION CONTACT: Barry S. Lineback, Telephone: (703) 603-7740, Fax: (703) 603-0655, or email CMTEFedReg@AbilityOne.gov.

SUPPLEMENTARY INFORMATION:

Deletions

On 6/17/2016 (81 FR 39630), the Committee for Purchase From People Who Are Blind or Severely Disabled published notice of proposed deletions from the Procurement List.

After consideration of the relevant matter presented, the Committee has determined that the services listed below are no longer suitable for procurement by the Federal Government under 41 U.S.C. 8501-8506 and 41 CFR 51-2.4.

Regulatory Flexibility Act Certification

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in additional reporting, recordkeeping or other compliance requirements for small entities.

2. The action may result in authorizing small entities to provide the services to the Government.

3. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 8501–8506) in connection with the services deleted from the Procurement List.

End of Certification

Accordingly, the following services are deleted from the Procurement List:

Services

Service Types: Library Service

Mandatory for: Travis Air Force Base, Travis Air Force Base, CA

Beale Air Force Base, Beale Air Force Base, CA

Mandatory Source(s) of Supply: PRIDE Industries, Roseville, CA

Contracting Activity: Dept of the Air Force, FA7014 AFDW PK, Andrews AFB, MD

Service Type: Family Housing Maintenance Service

Mandatory for: Travis Air Force Base, Travis AFB, CA

Mandatory Source(s) of Supply: PRIDE Industries, Roseville, CA

Contracting Activity: Dept of the Air Force, FA7014 AFDW PK, Andrews AFB, MD

Service Type: Baggage Inspection Service

Mandatory for: Travis Air Force Base: Air Passenger Terminal, Travis Air Force Base, CA

Mandatory Source(s) of Supply: PRIDE Industries, Roseville, CA

Contracting Activity: Dept of the Air Force, FA7014 AFDW PK, Andrews AFB, MD

Service Type: Furnishings Management Service

Mandatory for: Travis Air Force Base, Travis Air Force Base, CA

Mandatory Source(s) of Supply: Pacific Coast Community Services, Richmond, CA

Contracting Activity: Dept of the Air Force, FA7014 AFDW PK, Andrews AFB, MD

Service Type: Linen Service

Mandatory for: Hickam Air Force Base, Hickam Air Force Base, HI

Mandatory Source(s) of Supply: Network Enterprises, Inc., Honolulu, HI

Contracting Activity: Dept of the Air Force, FA7014 AFDW PK, Andrews AFB, MD

Service Type: Facilities Management Service

Mandatory for: Television Audio Support Activity (TASA), McClellan AFB, CA

Mandatory Source(s) of Supply: PRIDE Industries, Roseville, CA

Contracting Activity: Dept of the Air Force, FA7014 AFDW PK, Andrews AFB, MD

Service Type: Repair of Air Cargo Top & Side Nets Service

Mandatory for: Travis Air Force Base, Travis AFB, CA

Mandatory Source(s) of Supply: Fontana Resources at Work, Fontana, CA

Contracting Activity: Dept of the Air Force,

FA7014 AFDW PK, Andrews AFB, MD

Barry S. Lineback,

Director, Business Operations.

BILLING CODE 6353–01–P

COMMODITY FUTURES TRADING COMMISSION

Agency Information Collection Activities: Notice of Intent To Renew Collection 3038–0074, Core Principles and Other Requirements for Swap Execution Facilities

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice.

SUMMARY: The Commodity Futures Trading Commission (Commission) is announcing an opportunity for public comment on the renewal of the collection of certain information by the agency. Under the Paperwork Reduction Act (PRA), Federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information and to allow 60 days for public comment. This notice solicits comments in connection with part 37 of the Commission's regulations, which requires certain recordkeeping and reporting information collections for swap execution facilities (SEFs).

DATES: Comments must be submitted on or before September 20, 2016.

ADDRESSES: You may submit comments, identified by "Renewal of Collection Pertaining to Core Principles and Other Requirements for Swap Execution Facilities" by any of the following methods:

- The Agency's Web site, at <http://comments.cftc.gov/>. Follow the instructions for submitting comments through the Web site.

- *Mail:* Christopher Kirkpatrick, Secretary of the Commission, Commodity Futures Trading Commission, Three Lafayette Centre, 1155 21st Street NW., Washington, DC 20581.

- *Hand Delivery/Courier:* Same as Mail above.

- *Federal eRulemaking Portal:* <http://www.regulations.gov/>. Follow the instructions for submitting comments through the Portal.

Please submit your comments using only one method.

FOR FURTHER INFORMATION CONTACT: Steven A. Haidar, Attorney-Advisor, Division of Market Oversight, Commodity Futures Trading Commission, (202) 418–5611; email:

shaidar@cftc.gov, and refer to OMB Control No. 3038–0074.

SUPPLEMENTARY INFORMATION: Under the PRA, Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. "Collection of Information" is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3 and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA, 44 U.S.C. 3506(c)(2)(A), requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information before submitting the collection to OMB for approval. To comply with this requirement, the Commission is publishing notice of the existing collections of information listed below.

Title: Core Principles and Other Requirements for Swap Execution Facilities (OMB Control No. 3038–0074). This is a request for extension of currently approved information collections.

Abstract: Title VII of the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act) added new section 5h to the Commodity Exchange Act (CEA) to impose requirements concerning the registration and operation of SEFs, which the Commission has incorporated in part 37 of its regulations.¹ These information collections are needed for the Commission to ensure that SEFs (and entities applying for SEF registration) comply with these requirements. Among other requirements, part 37 of the Commission's regulations imposes SEF registration requirements for a trading platform or system, obligates SEFs to provide transaction confirmations to swap counterparties, and requires SEFs to comply with 15 core principles.²

¹ In general, this OMB control number covers the information collections in part 37 of the Commission's regulations, including subpart A and the SEF core principles (*i.e.*, subparts B and C). However, any information collections related to § 37.10 of the Commission's regulations are subject to a separate information collection with OMB control number 3038–0099 (Process for a Swap Execution Facility or Designated Contract Market to Make a Swap Available to Trade).

² These 15 core principles include: Enforcing rules; listing contracts for trading that are not readily susceptible to manipulation; monitoring trading to prevent market manipulation; obtaining information; adopting position limits or position accountability levels; adopting rules to enforce financial integrity of swaps transactions entered on or through the SEF; adopting rules to provide for the exercise of emergency authority, in consultation with the Commission; making public information

With respect to these information collections, the Commission invites comments on:

- Whether the collections of information are necessary for the proper performance of the functions of the Commission, including whether the information will have a practical use;
- The accuracy of the Commission's estimate of the burden of the collections of information, including the validity of the methodology and assumptions used;
- Ways to enhance the quality, usefulness, and clarity of the information to be collected; and
- Ways to minimize the burden of collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology; e.g., permitting electronic submission of responses.

All comments must be submitted in English, or if not, accompanied by an English translation. Comments will be posted as received to <http://www.cftc.gov>. You should submit only information that you wish to make available publicly. If you wish the Commission to consider information that you believe is exempt from disclosure under the Freedom of Information Act, a petition for

confidential treatment of the exempt information may be submitted according to the procedures established in § 145.9 of the Commission's regulations.³

The Commission reserves the right, but shall have no obligation, to review, pre-screen, filter, redact, refuse or remove any or all of your submission from <http://www.cftc.gov> that it may deem to be inappropriate for publication, such as obscene language. All submissions that have been redacted or removed that contain comments on the merits of the Information Collection Request will be retained in the public comment file and will be considered as required under the Administrative Procedure Act and other applicable laws, and may be accessible under the Freedom of Information Act.

Burden Statement: Part 37 of the Commission's regulations result in information collection requirements within the meaning of the PRA. These regulations impose requirements concerning the registration and operation of SEFs, including requiring SEFs to continually be in compliance with 15 core principles. The Commission initially estimated that each respondent SEF would incur annually 308 burden hours in connection with collections of

information and that there would be 35 SEF respondents for an aggregate of 10,780 annual burden hours.⁴ Based on the Commission's observation of registered SEFs' operations and compliance with part 37's requirements, the Commission is increasing this estimate and now estimates that each respondent SEF would incur annually 1,000 burden hours. Additionally, the Commission notes that rather than the initial estimate of 35 SEFs, there currently are 22 SEFs registered with the Commission. The recurring annual burden hours for each SEF are increased as noted in the applicable table below.

Furthermore, in its initial PRA analysis, the Commission did not explicitly distinguish the non-recurring burden hours related to the registration process from the Commission's estimate of the recurring, annual burden hours, but rather provided an aggregated number.⁵ Based on the experience gained by the Commission during the SEF permanent registration review process, the Commission estimates that each SEF incurs approximately 300 non-recurring burden hours in connection with completing the registration process. The non-recurring burden hours for each SEF are noted in the applicable table below.

RECURRING ANNUAL BURDEN HOURS FOR SEFs

Respondents/Affected Entities	SEFs.
Estimated number of respondents	22. ⁶
Estimated annual burden hours per respondent SEF	1000 burden hours.
Estimated total annual burden on respondents	22,000 hours. ⁷
Frequency of collection	Once per trade day. ⁸

NON-RECURRING ANNUAL BURDEN HOURS FOR SEFs

Respondents/Affected Entities	SEFs.
Estimated number of respondents	4. ⁹
Estimated annual burden hours per respondent SEF	300.
Estimated total annual burden on respondents	1,200. ¹⁰
Frequency of collection	Initial registration.

regarding prices and volume on a timely basis; maintaining records of all activities of the business of the contract market in a form and manner acceptable to the Commission for five years; avoiding rules that result in unreasonable restraints of trade or anticompetitive burden on trading; enforcing rules to minimize conflicts of interest in its decision-making process; maintaining adequate financial resources; establishing system safeguards; and designating a chief compliance officer.

³ 17 CFR 145.9.

⁴ See 78 FR 33476, 33549. (35 SEFs × 308 burden hours = 10,780 hours per SEF).

⁵ See *id.*

⁶ In the part 37 final rule release, the Commission estimated that there would be 35 SEFs. See *id.* The Commission, however, notes that 22 SEFs are currently registered with the Commission. Accordingly, the revised aggregate burden hour estimate accounts for both the increased annual burden hours estimate to 1,000 hours per SEF as well as the decrease in the number of SEFs from 35 to 22.

⁷ 1,000 average recurring burden hours per respondent SEF × 22 registered SEFs = 22,000 total burden hours for all registered SEFs.

⁸ The Commission notes that respondent SEFs also are required to provide 4 quarterly reports and

one annual report as part of their recurring information collection obligations.

⁹ Based on the number of applicants that have applied for permanent SEF registration since the Commission first granted permanent registration status to SEFs on January 22, 2016, the Commission expects to receive 4 applications per year for permanent SEF registration.

¹⁰ 300 average initial burden hours per respondent SEF × 4 anticipated SEF applicants = 1,200 total burden hours incurred for all anticipated SEF applicants.

Authority: 44 U.S.C. 3501 *et seq.*

Dated: July 19, 2016.

Robert N. Sidman,

Deputy Secretary of the Commission.

BILLING CODE 6351-01-P

BUREAU OF CONSUMER FINANCIAL PROTECTION

[Docket No. CFPB-2016-0026]

RIN 3170-AA40

Request for Information on Payday Loans, Vehicle Title Loans, Installment Loans, and Open-End Lines of Credit

AGENCY: Bureau of Consumer Financial Protection.

ACTION: Request for information.

SUMMARY: Congress established the Bureau of Consumer Financial Protection (Bureau or CFPB) in the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (Dodd-Frank Act). As set forth in section 1021 of the Dodd-Frank Act, the Bureau's purpose is to implement and, where applicable, enforce Federal consumer financial law consistently for the purpose of ensuring that all consumers have access to markets for consumer financial products and services and that markets for consumer financial products and services are fair, transparent, and competitive. In discharging this obligation, the CFPB seeks feedback on practices and products that are related to but may not be addressed in the Bureau's concurrently published Notice of Proposed Rulemaking on Payday, Vehicle Title, and Certain High-Cost Installment Loans (Concurrent Proposal). Specifically, in this Request for Information (RFI), the Bureau seeks comment on: Potential consumer protection concerns with loans that fall outside the scope of the Bureau's Concurrent Proposal but are designed to serve similar populations and needs as those loans covered by the proposal; and business practices concerning loans falling within the Bureau's Concurrent Proposal's coverage that raise potential consumer protection concerns that are not addressed by the Concurrent Proposal. The Bureau seeks comment from the public about these consumer lending practices to increase the Bureau's understanding of and support for potential future efforts, including but not limited to future rulemakings, supervision, enforcement, or consumer education initiatives. Where the Bureau requests evidence, data, or other information regarding a particularly

concern about consumer protections, the Bureau does not seek information that directly identifies an individual consumer.

DATES: Comments must be received on or before October 14, 2016.

ADDRESSES: You may submit comments, identified by Docket No. CFPB-2016-0026 or RIN 3170-AA40, by any of the following methods:

- *Email:* FederalRegisterComments@cfpb.gov. Include Docket No. CFPB-2016-0026 or RIN 3170-AA40 in the subject line of the email.
- *Electronic:* <http://www.regulations.gov>. Follow the instructions for submitting comments.
- *Mail:* Monica Jackson, Office of the Executive Secretary, Consumer Financial Protection Bureau, 1700 G Street NW., Washington, DC 20552.
- *Hand Delivery/Courier:* Monica Jackson, Office of the Executive Secretary, Consumer Financial Protection Bureau, 1275 First Street NE., Washington, DC 20002.

Instructions: Because paper mail in the Washington, DC area and at the Bureau is subject to delay, commenters are encouraged to submit comments electronically. In general, all comments received will be posted without change to <http://www.regulations.gov>. In addition, comments will be available for public inspection and copying at 1275 First Street NE., Washington, DC 20002, on official business days between the hours of 10 a.m. and 5 p.m. eastern time. You can make an appointment to inspect the documents by telephoning (202) 435-7275.

All comments, including attachments and other supporting materials, will become part of the public record and subject to public disclosure. Sensitive personal information, such as account numbers or Social Security numbers, should not be included. Comments will not be edited to remove any identifying or contact information.

FOR FURTHER INFORMATION CONTACT: For general inquiries, submission process questions, or any additional information, please contact Monica Jackson, Office of the Executive Secretary, at 202-435-7275.

Authority: 12 U.S.C. 5511(c).

SUPPLEMENTARY INFORMATION: Pursuant to the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act) that established the Bureau, part of the Bureau's mission is to empower consumers to take control over their economic lives. Section 1021(c)(3) of the Dodd-Frank Act provides that one of the primary functions of the Bureau is collecting, researching, monitoring,

and publishing information relevant to the function of markets for consumer financial products and services.¹ Specifically section 1022(c)(1) directs the Bureau to monitor for risks to consumers in the offering or provision of consumer financial products or services in order to support its rulemaking and other functions.² Moreover, the Bureau is charged with using its rulemaking, supervision, and enforcement authorities under Federal consumer financial law to prevent unfair, deceptive, or abusive acts or practices in the consumer financial services markets.³ In discharging these obligations, the Bureau has studied certain types of loans made to consumers facing liquidity shortfalls, including payday loans, vehicle title loans, and certain types of installment loans. The Bureau also has conducted supervisory examinations of payday lenders and pursued public law enforcement actions against creditors making payday loans, vehicle title loans, and similar forms of credit.

The Bureau is concerned that lenders that make these loans have developed business models that deviate substantially from the practices in other credit markets by failing to assess consumers' ability to repay their loans and by engaging in harmful practices in the course of seeking to withdraw payments from consumers' accounts. The Bureau believes that there may be a high likelihood of consumer harm in connection with these covered loans because many consumers struggle to repay their loans. In particular, many consumers who take out covered loans appear to lack the ability to repay them and face one of three options when an unaffordable loan payment is due: Take out additional covered loans, default on the covered loan, or make the payment on the covered loan and fail to meet other major financial obligations or basic living expenses. Many lenders may seek to obtain repayment of covered loans directly from consumers' accounts. The Bureau is concerned that consumers may be subject to multiple fees and other harms when lenders make repeated unsuccessful attempts to withdraw funds from consumers' accounts.

The Concurrent Proposal generally would cover two categories of loans. First, the proposal generally would cover loans with a term of 45 days or less or loans with multiple advances if each advance is required to be repaid within 45 days. Second, the proposal

¹ 12 U.S.C. 5511(c)(3).

² 12 U.S.C. 5512(c)(1).

³ 12 U.S.C. 5511(b)(2).

generally would cover loans with a term greater than 45 days, provided that they (1) have an all-in annual percentage rate greater than 36 percent; and (2) either are repaid directly from the consumer's account or income or are secured by the consumer's vehicle. For both categories of covered loans, the proposal would identify it as an abusive and unfair practice for a lender to make a covered loan without reasonably determining that the consumer has the ability to repay the loan. The proposal generally would require that, before making a covered loan, a lender must reasonably determine that the consumer has the ability to repay the loan. The proposal also would impose certain restrictions on making covered loans when a consumer has or recently had certain outstanding covered loans. The proposal would provide lenders with options to make covered loans without satisfying the ability-to-repay requirements, if those loans meet certain conditions. The proposal also would identify it as an unfair and abusive practice to attempt to withdraw payment from a consumer's account for a covered loan after two consecutive payment attempts have failed. The proposal would require lenders to provide certain notices to the consumer before attempting to withdraw payment for a covered loan from the consumer's account. The Bureau's Concurrent Proposal appears in a separate **Federal Register** notice concurrently published with this RFI. The Bureau is seeking comment on that proposal in the rulemaking docket, which is separate from the docket for this RFI.

The Bureau is also engaged in pre-rulemaking activity concerning debt collection practices generally and on checking account overdraft services, which some consumers may use in lieu of small-dollar loans. Those practices are not the focus of this RFI. Finally, the Bureau has also proposed to regulate certain credit products offered in conjunction with prepaid accounts, which is also not the focus of this RFI.

The Bureau is aware that the Concurrent Proposal may not address all potential concerns in these markets. Most particularly, while the Bureau has chosen to issue a proposed rule on payday loans and similar forms of credit for public comment, the Bureau is aware that the Concurrent Proposal does not cover all loans made to consumers facing liquidity shortfalls. Such loans may include other high-cost products, where the risks to consumers from making unaffordable payments may be similar to the types of harms detailed in the Concurrent Proposal. The Bureau is specifically seeking to learn more about

the scope, use, underwriting, and impact of such products for purposes of determining what types of Bureau action may be appropriate. To protect consumers from unfair, deceptive, or abusive acts or practices, the Bureau is expressly empowered to use all of its authorities, not just rulemaking. Therefore, in this RFI the Bureau is seeking information about certain consumer lending practices to increase the Bureau's understanding of whether there is a need and basis for potential future efforts, including but not limited to future rulemakings, supervisory examinations, or enforcement investigations.

Similarly, the Bureau is aware that the Concurrent Proposal may not address all potentially harmful practices with regard to products that would be covered by the Concurrent Proposal. Specifically, the proposal focuses on lenders' practices with regard to underwriting and attempts to withdraw loan payments from consumers' bank accounts. The Bureau is thus seeking information on other potentially problematic lender practices and consumer protection concerns regarding products that would be covered by the proposal, in order to determine whether additional Bureau actions are warranted.

Accordingly, the Bureau is interested in learning more about potential consumer protection concerns that may not be addressed by the Bureau's Concurrent Proposal. The Bureau encourages comments from the public, including:

- Borrowers and their families;
- Lenders and their investors or employees;
- Debt collectors, payment processors, and other service providers;
- Financial counselors and social workers;
- Pastors, priests, nuns, rabbis, imams, and other clergy or faith leaders;
- Accountants;
- Journalists;
- Consumer advocates;
- Banks, thrifts, and credit unions;
- State, local, and tribal governments;
- Academics including but not limited to psychologists, economists, sociologists, geographers, and historians; as well as
- Any other interested parties.

I. Background

Throughout American history, the Federal government and the States have taken varied approaches to regulating payday and similar forms of credit. Early on, the 13 original American States adopted interest rate limits of between 5 percent and 12 percent per

annum in the early years of the Republic.⁴ Later entrants into the Union typically followed this pattern and most of these "general usury limits" remained in force throughout the United States during the 19th Century. Later, Congress passed legislation intended to provide protection to consumers in the Wheeler-Lea Act of 1938.⁵ The Wheeler-Lea Act amended the Federal Trade Commission (FTC) Act of 1914 to provide the FTC with the authority to pursue unfair or deceptive acts or practices in commerce to protect consumers against oppression that might not amount to common law or criminal fraud.⁶

In the 1960s, Congress began passing a wave of consumer protection laws focused on financial products, beginning with the Consumer Credit Protection Act (CCPA) in 1968.⁷ The CCPA included the Truth in Lending Act (TILA), which imposed disclosure and other requirements on creditors.⁸ Congress followed the enactment of TILA with several other consumer financial protection laws. For example, in 1970, Congress passed the Fair Credit Reporting Act (FCRA), which promotes the accuracy, fairness, and privacy of consumer information contained in the files of consumer reporting agencies, as well as providing consumers access to their own information.⁹ In 1974, Congress passed the Equal Credit Opportunity Act (ECOA) to prohibit creditors from discriminating against applicants with respect to credit transactions.¹⁰ In 1977, Congress passed the Fair Debt Collection Practices Act (FDCPA) to promote the fair treatment of consumers who are subject to debt collection activities.¹¹ Congress has

⁴ These State price limits were based on English statutes. Ransom H. Tyler, *A Treatise on the Law of Usury, Pawns or Pledges and Maritime Loans*, at 49–55 (1891). American usury law drew upon an older legal tradition. For example, historians report that the Roman Empire capped interest rates at 12 percent per annum. And, the Code of Hammurabi (c. 1750 BCE) includes an interest rate limit of 33.3 percent for loans payable in grain and a limit of 20 percent on loans payable in silver. Sydney Homer & Richard Sylla, *A History of Interest Rates*, at 30, 49 (3d. ed. 1996).

⁷ Consumer Credit Protection Act, Public Law 90–321, 82 Stat. 146 (1968).

⁸ 15 U.S.C. 1601.

⁹ 15 U.S.C. 1681.

¹⁰ 15 U.S.C. 1691.

¹¹ 15 U.S.C. 1692. Other such Federal consumer protection laws include those enumerated in the Dodd-Frank Act and made subject to the Bureau's rulemaking, supervision, and enforcement authority: Alternative Mortgage Transaction Parity Act of 1982, 12 U.S.C. 3801; Consumer Leasing Act

placed limitations on the rates Federal credit unions may impose, generally 15 percent with certain allowance for the NCUA to make adjustments.¹² Congress has established a usury limit for loans to servicemembers. In 2006 Congress established an all-in interest rate limit of 36 percent annual percentage rate (APR) on consumer credit extended to military servicemembers and their dependents and charged the Bureau with enforcing this limit in 2013.¹³

In addition, in the early 20th Century many States began to adopt small loan laws that allowed licensed lenders to make small consumer loans at interest rates of between 2 and 4 percent per month, or 24 to 48 percent per year.¹⁴ A variety of “special” usury limits along these lines proliferated in most States throughout the 20th Century. By 1965, all States limited interest rates on small loans, with an annual rate of 36 percent

of 1976, 15 U.S.C. 1667; Electronic Fund Transfer Act (EFTA), 15 U.S.C. 1693 (except with respect to § 920 of that Act); Fair Credit Billing Act, 15 U.S.C. 1666; Home Mortgage Disclosure Act of 1975, 12 U.S.C. 2801; Home Owners Protection Act of 1998, 12 U.S.C. 4901; Federal Deposit Insurance Act, 12 U.S.C. 1831t (b)–(f); Gramm-Leach-Bliley Act 15 U.S.C. 6802–09 (except with respect to § 505 as it applies to § 501(b) of that Act); Interstate Land Sales Full Disclosure Act, 15 U.S.C. 1701; section 626 of the Omnibus Appropriations Act, 2009, 12 U.S.C. 5338; Real Estate Settlement Procedures Act of 1974 (RESPA), 12 U.S.C. 2601; S.A.F.E. Mortgage Licensing Act of 2008, 12 U.S.C. 5101. Federal consumer protection law also includes the Bureau’s authority to take action to prevent a covered person or service provider from committing or engaging in an unfair, deceptive, and abusive acts or practices, Dodd-Frank section 1031, and its disclosure authority, Dodd-Frank section 1032.

¹² 12 U.S.C. 1757(5)(A)(vi).

¹³ 10 U.S.C. 987(b), (f)(6). Moreover, Congress has also established criminal laws enforced by the Department of Justice that address some forms of payday and similar credit. First, Congress established a threshold of 45 percent per annum as a limitation in determining whether the government is entitled to a presumption that a debtor believed a creditor used extortionate collection methods in criminal loansharking prosecutions under the Consumer Credit Protection Act. 18 U.S.C. 892(b)(2). And second, the Racketeer Influenced and Corrupt Organizations Act established a federal crime for collecting an unenforceable debt with a price in excess of twice an applicable federal or state usury limit. 18 U.S.C. 1961(6)(B), 1962(c), 1963. See, e.g., *U.S. v. Scott Tucker and Timothy Muir, Sealed Indictment, No. 16 Crim 091 (S.D.N.Y. 2016)*; *Press Release, Department of Justice, U.S. Attorney’s Office, Southern District of New York, Manhattan U.S. Attorney Announces Charges Against owner of, and Attorney For, \$2 Billion Unlawful Internet Payday Lending Enterprise* (February 10, 2016), <https://www.justice.gov/usao-sdny/pr/manhattan-us-attorney-announces-charges-against-owner-and-attorney-2-billion-unlawful>.

Gallert, Walter Stern, and Geoffrey May, *Small Loan Legislation: A History of the Regulation of the Business of Lending Small Sums*, at 89 (1932).

per annum being the most common ceiling.¹⁵

In the 1960s, States began passing their own consumer protection statutes modeled on the FTC Act to prohibit unfair and deceptive practices. The FTC encouraged the adoption of consumer protection statutes at the State level and worked directly with the Council of State Governments to draft model legislation that influenced many state consumer protection statutes.¹⁶ Currently, “[e]very state has a consumer protection law that prohibits deceptive practices, and many prohibit unfair or unconscionable practices as well.”¹⁷ At the same time that States have become more active in providing substantive consumer protection, there has been some movement away from State regulation of interest rates. In States with usury limits, a majority of State legislatures have created carve outs for payday loans, permitting licensed businesses to make payday loans with average effective interest rates of over 300 percent per annum.¹⁸

As discussed in greater detail in the Concurrent Proposal, some states and municipalities have set other limits on payday and similar lending. For example, Washington and Delaware have restricted repeat borrowing by imposing limits on the number of payday loans consumers may obtain. Through 2010 amendments to its payday loan law, Colorado no longer permits short-term single-payment payday loans. Instead, in order to charge fees in excess of the 36 percent APR cap for most other consumer loans, the minimum loan term must be six months.¹⁹ The maximum payday loan

¹⁸ As discussed in further detail within the Concurrent Proposal, there are now 36 States that either have created a carve-out from their general usury cap for payday loans or have no usury caps on consumer loans. The remaining 14 States and the District of Columbia either ban payday loans or have fee or interest rate caps that payday lenders apparently find too low to sustain their business models.

¹⁹ Colo. Rev. Stat. sec. 5–3.1–103. Although loans may be structured in multiple installments of substantially equal payments or a single installment, almost all lenders contract for repayment in monthly or bi-weekly installments. 4 Colo. Code Regs. sec. 902–1, Rule 17(B)1, available at <http://www.sos.state.co.us/CCR/GenerateRulePdf.do?ruleVersionId=3842>; Adm’r of the Colo. Unif. Consumer Credit Code, *Colorado Payday Lending—Demographic and Statistical Information July 2000 Through December 2012*, at

amount remains capped at \$500, and lenders are permitted to take a series of post-dated checks or payment authorizations to cover each payment under the loan, providing lenders with the same access to borrowers’ accounts as a single-payment payday loan. At least 35 Texas municipalities have adopted local ordinances setting business regulations on payday lending (and vehicle title lending).²⁰

In the wake of the financial crisis, Congress adopted the Dodd-Frank Act. Title X of the Dodd-Frank Act established the Consumer Financial Protection Bureau to regulate the offering and provision of consumer financial products and services under the Federal consumer financial laws.²¹ The Dodd-Frank Act defines Federal consumer financial law to include certain enumerated federal consumer laws, including the TILA, FCRA, FDCPA, EFTA as well as Title X of the Dodd-Frank Act itself. Congress provided the Bureau with a range of enforcement and regulatory tools to fulfill its mission. For example, the Bureau has both supervisory and enforcement authority over all banks, savings associations, and credit unions with over 10 billion dollars in assets, as well as over a variety of nondepository financial companies including payday lenders.²² Congress also provided the Bureau with a range of rulemaking authorities. Section 1022(b) of the Dodd-Frank Act provides that the Bureau’s Director may prescribe rules and issue orders and guidance, as may be necessary or appropriate to enable the Bureau to administer and carry out the purposes and objectives of the Federal consumer financial laws, and to prevent evasion thereof.²³ Section 1031(b) of the Dodd-Frank Act also provides the Bureau with authority to prescribe rules to identify as unlawful unfair, deceptive, or abusive acts or practices in connection with any transaction with a consumer for a consumer financial product or service, or the offering of a consumer financial product or service.²⁴ Rules issued identifying as unlawful

²² 12 U.S.C. 5514(a), 5515, 5516(a).

²³ 12 U.S.C. 5512(b)(1).

²⁴ 12 U.S.C. 5531(b).

unfair, deceptive, or abusive acts or practices may include requirements for the purpose of preventing such acts or practices.²⁵ The Bureau also has the authority to prescribe rules to ensure that the features of any consumer financial product or service are fully, accurately, and effectively disclosed to consumers.²⁶ Finally, the Bureau is also charged with conducting financial education programs to assist consumers in making responsible decisions about financial transactions.²⁷

In addition to establishing the Bureau, Title X of the Dodd-Frank Act also prohibits any unfair, deceptive or abusive act or practice in connection with any transaction with a consumer for a consumer financial product or service or the offering of such product or service.²⁸ The Bureau is charged with conducting examinations of institutions within its jurisdiction for the purpose, among others, of assessing compliance with the requirements of Federal consumer financial laws;²⁹ this includes assessing compliance with the prohibition on unfair, deceptive and abusive acts and practices. The Bureau is likewise charged with conducting investigations “for the purpose of ascertaining whether any person is or has been engaged in any conduct that is a . . . violation of any provision of Federal consumer finance law,” again including the prohibition on unfair, deceptive, or abusive acts or practices in consumer finance markets. Congress specifically provided that “No provision of [Title X] shall be construed as conferring authority on the Bureau to establish a usury limit applicable to an extension of credit offered or made by a covered person to a consumer, unless explicitly authorized by law.”³⁰

The Bureau is aware that the Concurrent Proposal may not address all potential concerns relating to loans made to consumers facing liquidity shortfalls. Most particularly, while the Bureau has chosen to issue a proposed rule on payday, vehicle title, and certain high-cost installment loans, the Bureau is aware that the Concurrent Proposal does not cover all loans made to consumers facing liquidity shortfalls.

Such loans may include other high-cost products, where the risks to consumers from making unaffordable payments may be similar to the types of harms detailed in the Concurrent Proposal. The Bureau is specifically seeking to learn more about the scope, use, underwriting, and impact of such products for purposes of determining what types of Bureau action may be appropriate. To protect consumers from unfair, deceptive, or abusive acts or practices, the Bureau is expressly empowered to use all of its authorities, not just rulemaking. Therefore, in this RFI the Bureau is seeking information about certain consumer lending practices to increase the Bureau’s understanding of whether there is a need and basis for potential future efforts, including but not limited to future rulemakings, supervisory examinations, or enforcement investigations.

Similarly, the Bureau is aware that the Concurrent Proposal may not address all potentially harmful practices with regard to products that would be covered by the Concurrent Proposal. Specifically, the proposal focuses on lenders’ practices with regard to underwriting and attempts to withdraw loan payments from consumers’ bank accounts. The Bureau is thus seeking information on other potentially problematic lender practices and consumer protections concerns regarding products that would be covered by the proposal, in order to determine whether additional Bureau actions are warranted.

Accordingly, the Bureau is interested in learning more about potential consumer protection concerns that may not be addressed by the Bureau’s Concurrent Proposal.

II. Potential Consumer Protection Concerns With High-Cost Installment Loans and Open-End Lines of Credit Not Covered Within the Bureau’s Concurrent Proposal

As detailed in the Concurrent Proposal, the Bureau believes that there may be a high likelihood of consumer harm in connection with loans that would be covered by the Concurrent Proposal. As noted above, the Concurrent Proposal generally would cover loans with a term of 45 days or less or loans with multiple advances if each advance is required to be repaid within 45 days. Second, the Concurrent Proposal generally would cover loans with a term greater than 45 days, provided that they (1) have an all-in annual percentage rate greater than 36 percent; and (2) either are repaid directly from the consumer’s account or

income (*i.e.*, have a “leveraged payment mechanism”³¹) or are secured by the consumer’s vehicle.

Thus, the Bureau’s Concurrent Proposal would not cover either closed-end installment loans or open-end lines of credit with durations longer than 45 days with no vehicle title or leveraged payment mechanisms, regardless of the total cost of credit. The Bureau’s Concurrent Proposal also would not cover loans that fall within the proposed exceptions, including non-recourse pawn loans, certain money purchase loans, real-estate secured credit, student loans, and credit card loans. In this RFI, the Bureau refers to loans that fall outside the scope of the proposal as “non-covered products.”

The Bureau believes that most loans made to consumers facing liquidity shortfalls would fall within the scope of the proposal. As discussed further in the Concurrent Proposal, these consumers tend to have low or non-existent credit scores and limited access to mainstream sources of credit. The loans that are made to them tend to be at a high interest rate and the Bureau believes that, with most of these loans, lenders generally obtain either a security interest in the borrower’s vehicle or the ability to secure repayment directly from the consumer’s deposit account or paycheck. On the other hand, the Bureau also has identified a limited number of lenders offering non-covered longer duration loans with high annual percentage rates that lack a vehicle security interest or leveraged payment mechanism and that may raise consumer protection concerns.³²

³¹ In the Concurrent Proposal, the Bureau refers to methods by which the lender can obtain payment directly “leveraged payment mechanisms.” As provided in proposed § 1041.3(c), in general, a lender or service provider would obtain a leveraged payment mechanism if it has the right to initiate a transfer of money, through any means, from a consumer’s account to satisfy an obligation on a loan, except that the lender or service provider does not obtain a leverage payment mechanism by initiating a one-time electronic fund transfer immediately after the consumer authorizes the transfer, has the contractual right to obtain payment directly from the consumer’s employer or other source of income, or requires the consumer to repay the loan through a payroll deduction or deduction from another source of income.

³² For example, in New Mexico, Idaho, Utah, and Wisconsin The CashStore offers 140 day installment loans of \$500 repayable in cash only with a 780 percent APR. *Cash Store APR And Rate Card Information*, Thecashstore.com, <https://www.cashstore.com/apr-rate-card> (last visited March 24, 2016). In Utah, Mountain Loan Centers, Inc. has offered seven month, 432 percent APR, “signature” loans of \$800 with no post-dated check or account access. Mountain Loan Centers, Inc. v. Audra Crizer, *Complaint, Fourth Judicial District Court*, Utah (March 25, 2015). See also Mountain Loan Centers, Inc., *Mountain Loan Centers Get \$5000! EZ Approval!*, YouTube (Nov. 7, 2011), <https://www.youtube.com/watch?v=PtipWKKOoAo>

²⁵ 12 U.S.C. 5531(b).

²⁶ 12 U.S.C. 5532(a).

²⁷ 12 U.S.C. 5511(b)(1), (c)(1).

²⁸ 12 U.S.C. 5536(a)(1)(B) (“It shall be unlawful” for any covered person or service provider “to engage in any unfair, deceptive, or abusive act or practice.”).

²⁹ 12 U.S.C. 5515(b)(1)(A).

³⁰ 12 U.S.C. 5517(o). As discussed in greater detail in the Concurrent Proposal, the Bureau believes the prohibition in this section is reasonably interpreted not to prohibit differential regulation such as certain requirements contained in the Bureau’s Concurrent Proposal.

The Bureau believes that some non-covered products may be different in significant ways from loans that would be covered under the Concurrent Proposal. For example, in bona fide pawn transactions, borrowers grant a possessory security interest in personal property in exchange for a non-recourse loan. Because these loans are non-recourse and because the consumer turns over physical possession of the collateral to the lender at the outset, the Bureau believes the consumer risks posed by these loans are somewhat different from the consumer risks posed by other high-cost products. In a bona fide pawn loan, the borrower has the option to either repay the loan or permit the pawnbroker to retain and sell the pledged collateral at the end of the loan term, relieving the borrower of any additional financial obligation, and the process of surrendering the item may reinforce to the consumer what the consequences will be if the consumer is later unable to repay the pawn loan.

The Bureau is seeking additional information about forms of non-covered credit offered to the types of consumers who use covered loans to deal with cash shortfalls, including the types and volume of installment and open-end credit products that would not be covered by the Concurrent Proposal and are offered in this market segment, their pricing structures, and lenders' practices with regard to marketing, underwriting, servicing and collections. For example, an installment loan or open-end line of credit without a leveraged payment mechanism or vehicle security interest would be beyond the scope of the Bureau's Concurrent Proposal even if the agreement calls for non-amortizing, interest-only payments and without regard to the cost. Such loans could raise substantial consumer protection concerns and might potentially be unfair, deceptive, or abusive depending on the circumstances, including instances where there are long-term financial hardships imposed by such loans or where consumers fail to understand the payment structure of the loans. Since such loans lack vehicle security or leveraged payment

mechanisms, the Bureau is also particularly interested in any other mechanisms or practices that lenders may use with regard to such loans to mitigate the risk that consumers would be unable to repay their loans.

Because Congress has charged the Bureau with protecting consumers from unfair, deceptive, or abusive credit practices, the Bureau is interested in learning more about the potential consumer protection concerns that may arise in high-cost loans that are not covered by the Bureau's Concurrent Proposal. The Bureau is also looking ahead to anticipate potential changes in the consumer lending market in response to both the Concurrent Proposal and other regulatory and economic developments. Accordingly, the Bureau seeks public feedback to better understand the prevalence of problematic business practices in this market.

While the Bureau invites all comments relevant to this general topic, the Bureau specifically invites commenters to address the following questions. With respect to these non-covered, high-cost, longer-duration installment loans and open-end lines of credit that lack vehicle security or leveraged payment features:

1. Is there a viable business model in extending high-cost, non-covered loans for terms longer than 45 days without regard to the borrower's ability to repay the loan as scheduled? If so, what are the essential characteristics of this business model or models and what consumer protection concerns, if any, are associated with such practices? For example:

a. Are there non-covered loan products with particular payment structures that make it viable for a lender to extend loans without regard to the consumer's ability to repay?

b. Are there non-covered loan products with security or possessory interests in products or documents other than the consumer's vehicle (and without leveraged access to the consumer's transaction account) that make it viable for a lender to extend loans without regard to the consumer's ability to repay?

c. Are there particular collection practices that make it viable for lenders to make high-cost, non-covered loans without regard to the consumer's ability to repay?

d. Are there other loan features or practices that make it viable for lenders to extend loans without regard to the consumer's ability to repay?

e. To the extent there are loans made in categories a through d, how prevalent are such practices? How easy is it for

consumers to find and obtain such products? To what extent are these loans leading to injury to consumers? To what extent are consumers aware of the costs and risks of such loans?

f. Are there changes in technology or the market that make such practices more likely to develop or spread in the future?

2. To the extent that certain business models enable lenders to extend non-covered loans to consumers facing liquidity shortfalls without regard to the consumer's ability to repay, what factors might limit or encourage growth of these business models going forward?

a. What are the State and Federal regulations that affect their viability and growth?

b. What effect, if any, would the Bureau's Concurrent Proposal, if finalized, have on their viability and growth?

c. Are technology, investment, and other market factors affecting their viability and growth?

d. What factors affect competition in these markets, particularly the emergence of new market players and development of new product alternatives?

3. To what extent are consumers able to protect themselves in the selection or use of products identified in response to questions number 1(a) through 1(d)? For example:

a. What evidence, data, or other information exists with respect to the ability of consumers to shop effectively for products of the type described above and for alternative products that may better serve consumers' needs? Are there currently Web sites or other digital tools that facilitate effective price comparison among lenders offering products designed to serve the needs of liquidity-constrained borrowers, including comparison of prices, prior to surrendering personal information such as names, email addresses, and bank account numbers? Are consumers in search of a loan to meet a liquidity shortfall able to avail themselves of common internet search engines to effectively shop for loans to meet their needs?

b. Are new business entrants in the market for high-cost, non-covered loans able to offer loans at a lower cost than those offered by established lenders? What factors enhance or inhibit the ability of new market entrants to do so? Are new business entrants with lower pricing able to effectively raise customer awareness about the benefits of their products in comparison to established covered or non-covered loans?

c. Are there cognitive, behavioral, or psychological limitations that make it

(advertisement stating "we don't hold a check and we don't even care if you have a bank account."). And in Missouri Capital Solutions Investments, Inc. (d/b/a Loan Express Co.) has made five month loans of \$100 with no account access and an interest rate of 199 percent APR. *Hollins v. Capital Solutions Investments, Inc.* 477 SW.3d 19, 21 (Mo. Ct. App. 2015); Defendant's Statement of Uncontroverted Material Facts Supporting Motion for Summary Judgment, Exhibit B-1, Case, *Hollins v. Capital Solutions Investments, Inc.*, No. 11SL-CC04216 Div. 7, (Mo. Cir. Ct. St. Louis County, 21st Jud. Cir. Nov. 7, 2012).

more difficult for consumers facing a liquidity crisis to shop effectively for a non-covered loan to meet their needs?

d. Are there marketing practices or loan features that take advantage of these cognitive, behavioral, or psychological limitations?

e. What evidence, data, or other information exists with respect to the existence and prevalence of any such limitations, marketing practices, or loan features?

III. Potential Consumer Harm from Garnishment Orders, Judgment Liens, or Other Forms of Enhanced Collection

As discussed above, the Bureau's Concurrent Proposal would cover high-cost, longer-term loans that include a leveraged payment mechanism or a vehicle security interest and would generally require lenders making such loans to first reasonably determine whether the consumer has the ability to repay the loan.³³ The Bureau anticipates that, if the Concurrent Proposal is finalized, even where lenders do successfully determine a consumer's ability to repay, some consumers will nonetheless end up defaulting on their loans if, for example, the consumer becomes disabled and is unable to work for a prolonged period of time.

The Bureau's Concurrent Proposal does not address the collection practices of lenders making covered loans. The Bureau anticipates that at a future date it will be issuing a proposal to regulate debt collection practices that will apply to the collection of covered and non-covered loans alike. But the Bureau is concerned that there may be certain practices that are more prevalent with respect to high-cost loans made to consumers facing cash shortfalls and that pose serious risks for such consumers. The Bureau is concerned that these practices could become more prevalent with covered or non-covered high-cost loans if the Bureau finalizes the Concurrent Proposal.

In particular, the Bureau seeks information about possible alternatives to leveraged payment mechanisms and vehicle security interests that may exist currently or develop in response to the Bureau's Concurrent Proposal and market or technology changes. For example, the laws of some States allow creditors to sue borrowers over a debt,

³³ Under the Concurrent Proposal a lender with a leveraged payment mechanism generally includes a lender that has the right to initiate a transfer of money from a consumer's transaction account to satisfy an obligation, to obtain payment directly from the consumer's employer or other source of income, or to require the consumer to repay the loan through a payroll deduction or deduction from another source of income.

and subsequently obtain garnishment orders that permit lenders to seize borrowers' wages, bank account funds, or vehicles under some circumstances. The Federal CCPA and implementing regulations issued by the Department of Labor provide some protection for consumers by limiting the amount of wages that can be garnished during a pay period.³⁴ Moreover, State and Federal due process guarantees as well as debtor asset exemption statutes also provide borrowers with some protection. However, the Bureau's market monitoring and research suggests that State laws vary widely in this regard and may place burdens on consumers that they may not be prepared to meet and that the consumer financial services market has seen substantial and potentially problematic innovation and change in recent years. For example, a recent case in the Missouri Court of Appeals highlights a lender practice of allowing interest and fees to accrue post-default—as discussed further in part V of this RFI—and then suing and obtaining a garnishment order for amounts that a concurring opinion found “shocks the conscience” such as the following seven consumers that “exemplif[ied] the situation of the class action members in this case”:

Class member, D.W., took out a \$100 loan from CSI. A judgment was entered against him for \$705.18; the garnishment is still pending. So far, \$3,174.81 has been collected, and a balance of \$4,105.77 remains

Class member, S.S., took out an \$80 loan from CSI. A judgment was entered against her for \$2,137.68; the garnishment is still pending. So far, \$5,346.41 has been collected, and a balance of \$19,643.48 remains.

Class member, C.R., took out a \$155 loan from CSI. A judgment was entered against her for \$1,686.93; the garnishment is still pending. So far, \$9,566.15 has been collected, and a balance of \$2,162.07 remains.

Class member, C.N., took out a \$155 loan from CSI. A judgment was entered against him for \$1,627.44. There is now a lien on C.N.'s property.

³⁴ Subject to certain exceptions, the Title III of the Consumer Credit Protection Act protects employees by limiting the amount of earnings that may be garnished in any workweek or pay period to the lesser of 25 percent of disposable earnings or the amount by which disposable earnings are greater than 30 times the federal minimum hourly wage prescribed by Section 6(a)(1) of the Fair Labor Standards Act of 1938, 15 U.S.C. 1673(a). This limit applies regardless of how many garnishment orders an employer receives. The Federal minimum wage is \$7.25 per hour effective July 24, 2009. *Wages and Hours Worked: Wage Garnishment*, Department of Labor, <https://www.dol.gov/compliance/guide/garnish.htm> (last visited May 24, 2016).

Class member, S.L., took out a \$360 loan from CSI. A judgment was entered against her for \$1,305.17; the garnishment is still pending. So far, \$6,021.80 has been collected, and a balance of \$2,182.90 remains.

Class member, F.H., took out a \$100 loan from CSI. A judgment was entered against her for \$380.82; the garnishment is still pending. So far, \$3,935.54 has been collected, and a balance of \$707.98 remains.

Class member, B.D., took out a \$200 loan from CSI. A judgment was entered against her for \$853.05; the garnishment is still pending. So far, \$4,692.31 has been collected, and a balance of \$1,531.57 remains.³⁵

The Bureau believes that business practices of this nature, which might be referred to as enhanced collections practices, may raise substantial consumer protection concerns. Therefore, the Bureau requests information about methods creditors may use in connection with loans covered under the Concurrent Proposal or with non-covered loans to seize wages, funds, vehicles or other forms of personal property from borrowers that face liquidity crisis and obtain loans outside mainstream credit systems.

4. Are there practices in obtaining or using wage garnishment orders to collect covered or non-covered loans that raise consumer protection concerns? If so, what data, evidence, or other information tends to show these concerns exist or are likely to emerge in the future?

5. Are there practices in obtaining or using attachment or garnishment orders to seize funds from deposit accounts, prepaid cards, or other consumer assets to collect covered or non-covered loans that raise consumer protection concerns? If so, what data, evidence, or other information tends to show these concerns exist or are likely to emerge in the future?

6. Are there practices in obtaining or using judgment liens on vehicles or other consumer goods that raise consumer protection concerns? If so, what data, evidence, or other information tends to show these concerns exist or are likely to emerge in the future?

7. With respect to each of these questions, what is the prevalence of these practices in the current market? And, can the Bureau reasonably anticipate that these practices would increase or decrease if the Bureau were to finalize a rule along the lines of the

³⁵ *Hollins v. Capital Sols. Investments, Inc.*, 477 SW.3d at 27.

Bureau's Concurrent Proposal? If so, why?

8. Do particular Federal, State, or local laws affect consumer protection concerns associated with enhanced collection practices that would not be addressed by the Concurrent Proposal?

IV. Potential Consumer Harm From Loan Churning, Prepayment Penalties, and Slowly Amortizing Credit in Covered and Non-Covered High-Cost Credit

The Bureau's research into high-cost installment loans indicates that a substantial percentage of consumers refinance their loans during the term of their loans. Under the Concurrent Proposal, where consumers reborrow because their loan payments have proven to be unaffordable, a presumption would apply that a new loan with similar payment terms would likewise be unaffordable. However, that presumption would not apply in circumstances in which there is not an indication of financial distress or evidence that the refinancing was masking unaffordability of the outstanding loan.

The Bureau is concerned, however, that under certain circumstances lenders may have an incentive to encourage borrowers to refinance their loans in a way that creates extended patterns of payment that do not serve consumers' interests. These patterns of extended repayment may be caused or exacerbated by marketing or business practices that tend to frustrate the ability of borrowers to understand their loan terms. For example, some lenders may structure their loans such that a refinancing generates additional revenue for the lender, beyond the incremental finance charges, as a result of prepayment penalties, rebates calculated under the Rule of 78s, new origination fees, or new fees to purchase ancillary products associated with the refinancing. Moreover, because, in some high-cost loans, repayment of loan principal does not occur until the final few payments of the borrower's payment schedule, refinancing can deprive borrowers of the opportunity to make substantial progress in escaping their debts. The Bureau seeks to better understand the use of incentives and sales practices that might encourage borrowers to refinance high-cost loans, including practices that encourage refinancing after the consumer has made multiple payments allocated to interest and fees, but before making substantial progress reducing the loan principal.

The Bureau also requests information about the nature of consumer protection concerns associated with the imposition

of prepayment penalties in longer-duration, high-cost covered loans and also whether comparable concerns exist in non-covered loan products. In the Concurrent Proposal, the Bureau has noted that penalizing consumers for prepaying loans with durations of less than 24 months is likely to be inconsistent with consumers' expectations for their loans and may prevent consumers from repaying debts that they otherwise would be able to retire. Accordingly the proposal would prohibit lenders from imposing a prepayment penalty in connection with certain covered longer duration loans that are made under a conditional exemption from the proposed ability-to-repay requirements. While the Bureau believes there is a basis for proposing to prohibit prepayment penalties from conditionally exempt covered loans, the Bureau requests further information about whether consumer protection concerns may exist more generally with respect to prepayment penalties incorporated into longer duration covered and non-covered loans marketed to consumers facing liquidity crises. In particular, the Bureau seeks to explore whether there may be informal methods of imposing prepayment penalties, such as denial of a promised rebate, which could make it more costly for borrowers in either covered or non-covered longer duration high-cost loans to repay those loans. The Bureau also seeks to obtain more information about the prevalence of prepayment penalties and potential consumer protection concerns associated with non-covered, longer duration, high-cost loans.

The Bureau is also concerned that, for borrowers facing cash shortfalls that lack access to the mainstream credit system, loans could be structured in such a way that even if borrowers have the ability to make their payments, doing so could cause borrowers to suffer undue, long-term hardships. These hardships could be caused or exacerbated by marketing, business practices, or contract terms that tend to frustrate the ability of borrowers to understand their payment obligations or otherwise interfere with their ability to protect their interests. For example, a lender might aggressively market a payment-option, adjustable-rate installment loan that allows borrowers to temporarily make negatively amortizing payments until a later recast date. After the recast date, borrowers facing larger, adjusted installment payment obligations could be vulnerable to payment shock because their income may be insufficient to cover the adjusted payment along with

their other obligations and basic living expenses at that time.

Similarly, a lender might offer a fully amortizing loan with a sufficiently long term and high interest rate and apply most payments to interest for a large portion of the loan's life. Consider, for example, a \$500 consumer loan with a 450 percent APR and a two-year duration payable in equal monthly installments. This borrower would face 24 monthly payments of about \$188 each. After the first three months, a successfully repaying borrower would have repaid more than the initial amount financed, but reduced that balance by less than 50 cents. After 18 of 24 payments, the successfully repaying borrower would still owe over \$400 of the \$500 originally borrowed. Under the Bureau's Concurrent Proposal, if the loan included a leveraged payment mechanism or vehicle security interest, the lender would be required to reach a reasonable determination of the borrower's ability to repay each \$188 monthly payment. On the other hand, a lender making this loan without a leveraged payment mechanism or vehicle security interest would not be subject to the proposed ability-to-repay requirement. In either case, the Bureau requests information about whether loans along the lines of these or similar examples currently exist or could be anticipated to evolve if the Bureau finalizes the Concurrent Proposal.

With respect to these potential concerns:

9. Are there marketing or other business practices with respect to lender incentives or encouragement of loan refinancing that raise consumer protection concerns?

a. If so, what specific business practices or contractual terms are associated with consumer harm?

b. What data, evidence, or other information tends to show the current or likely future prevalence of consumer harm associated with these practices?

10. Are there circumstances in which the imposition of prepayment penalties raises consumer protection concerns in non-covered loans marketed to consumers facing a liquidity crisis?

a. If so, what specific contractual terms or business activities are associated with consumer harm?

b. What evidence, data, or other information tends to show the current or likely future prevalence of consumer harm associated with prepayment penalties in non-covered loans?

11. Are there methods of imposing informal penalties for prepayment, such as withholding a promised rebate, which raise consumer protection

concerns in either covered or non-covered loans marketed to consumers facing liquidity crisis?

a. If so, specifically what contractual terms or business activities are associated with consumer harm?

b. What evidence, data, or other information tends to show the current or likely future prevalence of consumer harm associated with such informal penalties for prepayment.

12. Are there circumstances in which excessively slow amortization of high-cost installment loans or open-end lines of credit raise consumer protection concerns?

a. If so, what specific contractual terms or business activities are associated with consumer harm?

b. To what extent are consumers aware of the costs and risks of such loans? Are there other factors that might frustrate the ability of consumers to protect their interests in using such loans?

c. Is there consumer harm from loan payment schedules where the bulk of repayment allocated to principal occurs in the final few payments of an even-payment loan? What specific criteria should the Bureau consider in identifying such consumer harm, if any?

d. What data, evidence, or other information tends to show the current or likely future prevalence of consumer harm, if any, associated with payment schedules of this type?

e. What evidence exists that consumers who make an even-payment understand that the lower principal is not being evenly paid down?

13. With respect to each of these questions, what is the prevalence of these practices in the current market? And, can the Bureau reasonably anticipate that these practices would increase or decrease if the Bureau were to issue a final rule along the lines of the Bureau's notice of proposed rulemaking? If so, why?

V. Potential Consumer Harm From Default Interest Rates, Late Payment Penalties, Teaser Rate Loans, or Other Back-End Pricing Practices

In the Bureau's experience, post-delinquency or default revenue terms such as late fees, default interest rates, or other contractual remedies can lead to consumer protection concerns. For example, in 2009 Congress adopted the Credit Card Accountability, Responsibility, and Disclosure Act (CARD Act) to curb excessive or unfair late fees by generally requiring card issuers to refrain from imposing a late fee unless the creditor has adopted reasonable policies and procedures to ensure that consumers are given at least

21 days to pay their bill and by limiting late fees to an amount that is "reasonable and proportional" to the violation of the account terms in question.³⁶

Unlike credit card markets, there are currently no broadly applicable Federal rules comparable to the CARD Act's late payment provisions for consumers of high-cost payday, vehicle title, installment loans, or open-end lines of credit. The Bureau seeks information about whether post-delinquency or default revenue terms such as late fees, default interest rates, or other back-end pricing practices may create a mismatch between borrowers' expectations and their actual experiences with their loans over time. For example, some consumers may have the ability to repay at origination but changes in their circumstances such as illness, loss of employment, family disruptions such as divorce or separation, or unexpected expenses could nevertheless lead to delinquency or default. Similarly, some consumers may fall into arrears due to inattention to detail, miscommunication, payment system delay, or clerical error. The Bureau seeks to learn whether revenue generation provisions imposed on consumers in these and similar situations may raise consumer protection concerns.³⁷ The Bureau is not, however, soliciting information in this RFI on the examples of such practices that would constitute evasions of the Concurrent Proposal, as described in proposed § 1041.19 and its commentary.

The Bureau is also aware that teaser rate products can, under some circumstances, give rise to consumer protection concerns. With a teaser rate, the initial interest rate and payment may remain in effect for a limited period of time. For some such loans, the initial rate and payment can vary considerably from the rate and payment obligations later on. Teaser rate loans can lead to unexpected "payment shock" when borrowers face payments associated with a recast interest rate that increases borrower payments.³⁸ The Bureau seeks

³⁶ 15 U.S.C. 1665d, 1666b. To assist credit card issuers in complying with their CARD Act obligations Regulation Z establishes a safe harbor benchmark for reasonable and proportional penalty fees. 12 CFR 1026.52(b)(1)(ii).

³⁷ For example, Mountain Loan Centers' seven-month, 432 percent APR "signature" loans of \$800 include a default interest rate of 600 percent imposed when any installment payment is more than three days past due. Complaint, *Mountain Loan Centers, Inc. v. Audra Crizer*, No. 159401338.

³⁸ Federal Reserve Board of Governors, *Consumer Handbook on Adjustable-Rate Mortgages*, available at http://files.consumerfinance.gov/f/201204_CFPB_ARMs-brochure.pdf.

to learn whether covered or non-covered high-cost loans made to consumers facing liquidity crisis are being offered with teaser rate features. If so, the Bureau would like to obtain information about whether the use of teaser rate loan terms in this market may create risks to consumers.

With respect to these issues:

14. Other than circumstances identified in the Concurrent Proposal, as discussed above, under what circumstances do lenders' use of post-delinquency or default revenue terms such as late fees, default interest rates, or other contractual provisions or remedies in either covered or non-covered loans marketed to consumers facing liquidity crisis raise consumer protection concerns?

a. To what extent do lenders making covered loans or non-covered, high-cost loans to consumers facing cash shortfalls consider post-delinquency or default revenue generating terms such as late fees, default interest rates, or other contractual provisions or remedies when they perform underwriting? If they do so, how do they do it?

b. If lenders' current underwriting practices do not include consideration of the borrower's ability to repay post-delinquency or default revenue generating terms, what would be a reasonable method of underwriting for this factor?

c. What evidence, data, or other information shows the current or likely future prevalence of consumer harm, if any, associated with post-delinquency or default revenue terms in covered or non-covered high-cost consumer loans?

15. Are there circumstances in which the use of teaser rates which reset to high-cost loans made to consumers facing liquidity crisis raise consumer protection concerns?

a. If so, what specific contractual terms or business activities are associated with consumer harm?

b. Do teaser rate products, to the extent any exist, create a mismatch between borrowers' repayment expectations and their actual experiences in either covered or non-covered loans?

c. If lenders offer teaser rate products in loans to consumers facing liquidity needs, do they consider recast interest rates in underwriting? If they do so, how do they do it?

d. What data, evidence, or other information tends to show the current or likely future prevalence of consumer harm, if any, associated with adjustable interest rates products in covered or non-covered high-cost loans?

16. Are there other circumstances in which "back-end" pricing impedes the

ability of consumers to afford or to understand and compare credit options marketed to consumers facing liquidity crisis in a way that raises consumer protection concerns or impedes their ability to understand or anticipate the full cost of the loan to that consumer?

a. If so, what specific back-end pricing fees, contractual terms, or other business activities exist in the marketplace or are likely to evolve in the future?

b. If so, what back-end pricing fees, contractual terms, or other business activities are associated with consumer harm?

c. What data, evidence, or other information tends to show the current or likely future prevalence of consumer harm, if any, associated with such back-end pricing in covered or non-covered high-cost loans?

VI. Potential Consumer Harm from Ancillary Products

In the Bureau's experience, the marketing of ancillary products, sometimes called "add-ons," can lead to consumer protection concerns.³⁹ For instance, the Bureau is concerned that some creditors may engage in sales and marketing practices that raise consumer protection concerns with respect to the sale of credit insurance, debt suspension or debt cancellation agreements, and other credit related ancillary products. For example, in the past four years the Bureau has announced numerous different public enforcement actions associated with illegal marketing of add-ons that led to approximately \$2.4 billion in consumer redress, refunds, and forgiven debts. In these ancillary product matters, the Bureau, in some instances working in cooperation with other Federal or State regulators, imposed over \$128 million in civil money penalties. Among other practices and concerns, the Bureau has found or alleged that some companies offering ancillary products failed to accurately describe those products, offered products that provided little or no benefit to consumers without disclosing this fact, stated or implied that ancillary products were required as a condition of borrowing when they were not, and billed consumers for add-on products without permission.⁴⁰ For both covered

and non-covered loans, the Bureau seeks to learn more about the marketing of ancillary products to consumers facing liquidity crisis and borrowing outside the mainstream credit system.

Moreover, ancillary products can affect the affordability of consumer credit. The Bureau's Concurrent Proposal includes the cost of credit insurance, debt suspension agreements, and credit-related ancillary products sold in originating a loan in calculating the total cost of credit for purposes of determining whether a longer duration loan is covered by the proposed rule. The Bureau's Concurrent Proposal also would require that creditors consider the cost of these products in determining borrowers' ability to repay. Nevertheless, the Bureau seeks to obtain more information about the prevalence and affordability of add-on products in non-covered loans made to consumers facing liquidity crisis.

With respect to these potential issues:

17. Aside from affordability, are there consumer protection concerns arising out of the marketing of ancillary products in covered payday, vehicle title, or similar loans? If so, what evidence, data, or other information shows the current or likely future prevalence of these concerns?

18. To what extent do lenders making non-covered, high-cost loans consider the cost of ancillary products in determining whether borrowers have the ability to repay?

a. If they do so, how do they do it?

b. If lenders do not currently consider the affordability of such products, what would be a reasonable method of underwriting for this component of the loan?

c. What evidence, data, or other information shows the current or likely future prevalence of unaffordable ancillary products in non-covered loans?

19. Are there other consumer protection concerns associated with the marketing or use of ancillary products in combination with covered or non-covered, high-cost credit? If so, what evidence, data, or other information shows the current or likely future prevalence of such consumer protection concerns?

VII. Potential Market Evolution and Other Topics Not Identified

The market for high-cost consumer credit is currently in transition due to regulatory and technological change.

American-Express-Centurion-Consent-Order.pdf; Discover Bank, CFPB No. 2012-CFPB-0005 (Sept. 24, 2012), available at http://files.consumerfinance.gov/f/201209_cfpb_consult_order_0005.pdf.

Many lenders are developing new technological channels for delivering consumer financial products to the market place. State, local and tribal laws are continually evolving in response to these forces. The Bureau seeks to apprise itself of current and expected changes in the marketplace for high-cost loans that could present consumer protection concerns. Moreover, the Bureau is mindful that, in the past, markets supplying credit to borrowers facing cash shortfalls have evolved in response to regulatory action, thereby causing the government considerable difficulty in addressing some consumer protection issues.

Bearing in mind the potential for future evolution in this market and in lender practices:

20. Are there other marketing, origination, underwriting, or collection practices that currently exist or, if the Bureau issues a final rule along the lines of the Concurrent Proposal, are likely to emerge, that pose risk to consumers and may warrant Bureau regulatory, supervisory, enforcement, or consumer educational action?

21. Are there arrangements with brokers, credit service organizations, or other intermediaries in the marketing, origination, underwriting, collection or information-sharing practices associated with non-covered high-cost credit markets that pose risk to consumers and may warrant Bureau regulatory, supervisory, enforcement, or consumer educational action?

22. If so, what specific actions or policies should the Bureau consider in addressing such consumer harm? Other than usury limits applicable to an extension of credit, which Congress has not authorized the Bureau to establish, are there examples of existing law, regulations, or other policy interventions that the Bureau should consider?

Dated: June, 2016.

Richard Cordray,
Director, Bureau of Consumer Financial Protection.

BILLING CODE 4810-AM-P

DEPARTMENT OF DEFENSE

Office of the Secretary

Defense Health Board; Notice of Federal Advisory Committee Meeting

AGENCY: Department of Defense (DoD).

ACTION: Notice of Federal Advisory Committee meeting.

³⁹ Examples of ancillary products include credit insurance, debt suspension or debt cancellation agreements, and identity theft protection plans.

⁴⁰ See, e.g., Citibank, N.A., CFPB No. 2015-CFPB-0015 (July 21, 2015), available at http://files.consumerfinance.gov/f/201507_cfpb_consult-order-citibank-na-department-stores-national-bank-and-citicorp-credit-services-inc-usa.pdf; Am. Express Centurion Bank, CFPB No. 2012-CFPB-0002 (Oct. 1, 2012), available at <http://files.consumerfinance.gov/f/2012-CFPB-0002->

SUMMARY: The Department of Defense is publishing this notice to announce that the following Federal Advisory Committee meeting of the Defense Health Board will take place.

DATES:

Tuesday, August 9, 2016

9:00 a.m.–11:30 a.m. (Open Session)
11:30 a.m.–12:30 p.m. (Administrative Session)
12:30 p.m.–5:00 p.m. (Open Session)

ADDRESSES: The St. Anthony, San Antonio—Peraux Room, 300 East Travis Street, San Antonio, TX 78205 (Pre-meeting registration required; see guidance in **SUPPLEMENTARY INFORMATION**, “Public’s Accessibility to the Meeting”).

FOR FURTHER INFORMATION CONTACT: The Executive Director of the Defense Health Board is Ms. Christine Bader, 7700 Arlington Boulevard, Suite 5101, Falls Church, Virginia 22042, (703) 681-6653, Fax: (703) 681-9539, christine.e.bader.civ@mail.mil. For meeting information, please contact Ms. Kendal Brown, 7700 Arlington Boulevard, Suite 5101, Falls Church, Virginia 22042, kendal.l.brown2.ctr@mail.mil, (703) 681-6670, Fax: (703) 681-9539.

SUPPLEMENTARY INFORMATION: This meeting is being held under the provisions of the Federal Advisory Committee Act of 1972 (5 U.S.C., Appendix, as amended), the Government in the Sunshine Act of 1976 (5 U.S.C. 552b, as amended), and 41 CFR 102-3.150. Additional information, including the agenda and electronic registration, is available at the DHB Web site, <http://www.health.mil/About-MHS/Other-MHS-Organizations/Defense-Health-Board/Meetings>.

Purpose of the Meeting

The purpose of the meeting is to provide progress updates on specific taskings before the DHB. In addition, the DHB will receive information briefings on current issues or lessons learned related to military medicine, health policy, health research, disease/injury prevention, health promotion, and health care delivery.

Agenda

Pursuant to 5 U.S.C. 552b and 41 CFR 102-3.140 through 102-3.165 and subject to availability of space, the DHB meeting is open to the public from 9:00 a.m. to 11:30 a.m. and 12:30 p.m. to 5:00 p.m. on August 9, 2016. The DHB anticipates receiving progress updates from the Health Care Delivery Subcommittee on the pediatric clinical preventive services tasking, Public

Health Subcommittee on its review of improving Defense Health Program medical research processes, and a subset of the Board on the Deployment Health Centers review. In addition, the DHB anticipates receiving information briefings on the Military Health System Population Health Portal; the Army Medical Home; a review of recommendations from the 2014 DHB report *Combat Trauma Lessons Learned from Military Operations of 2001–2013*; an update on progress in the evolution of the Joint Trauma System; a review of the recent National Academies of Sciences, Engineering, and Medicine report on *A National Trauma Care System: Integrating Military and Civilian Trauma Systems to Achieve Zero Preventable Deaths After Injury*; and advances in genitourinary reconstruction following combat trauma. Any changes to the agenda can be found at the link provided in this **SUPPLEMENTARY INFORMATION** section.

Public’s Accessibility to the Meeting

Pursuant to 5 U.S.C. 552b, and 41 CFR 102-3.140 through 102-3.165 and subject to availability of space, this meeting is open to the public. Seating is limited and is on a first-come basis. All members of the public who wish to attend the public meeting must contact Ms. Kendal Brown at the number listed in the section **FOR FURTHER INFORMATION CONTACT** no later than 12:00 p.m. on Monday, August 1, 2016 to register. Additional details will be provided to all registrants.

Special Accommodations

Individuals requiring special accommodations to access the public meeting should contact Ms. Kendal Brown at least five (5) business days prior to the meeting so that appropriate arrangements can be made.

Written Statements

Any member of the public wishing to provide comments to the DHB may do so in accordance with section 10(a)(3) of the Federal Advisory Committee Act, 41 CFR 102-3.105(j) and 102-3.140, and the procedures described in this notice.

Individuals desiring to provide comments to the DHB may do so by submitting a written statement to the DHB Designated Federal Officer (DFO) (see **FOR FURTHER INFORMATION CONTACT**). Written statements should not be longer than two type-written pages and address the following details: The issue, discussion, and a recommended course of action. Supporting documentation may also be included, as needed, to establish the appropriate historical

context and to provide any necessary background information.

If the written statement is not received at least five (5) business days prior to the meeting, the DFO may choose to postpone consideration of the statement until the next open meeting.

The DFO will review all timely submissions with the DHB President and ensure they are provided to members of the DHB before the meeting that is subject to this notice. After reviewing the written comments, the President and the DFO may choose to invite the submitter to orally present their issue during an open portion of this meeting or at a future meeting. The DFO, in consultation with the DHB President, may allot time for members of the public to present their issues for review and discussion by the Defense Health Board.

Dated: July 19, 2016.

Aaron Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

[FR Doc. 2016-17349 Filed 7-21-16; 8:45 am]

BILLING CODE 5001-06-P

DEPARTMENT OF DEFENSE

Office of the Secretary

[Docket ID DOD-2015-OS-0048]

Submission for OMB Review; Comment Request

ACTION: Notice.

SUMMARY: The Department of Defense has submitted to OMB for clearance, the following proposal for collection of information under the provisions of the Paperwork Reduction Act.

DATES: Consideration will be given to all comments received by August 22, 2016.

FOR FURTHER INFORMATION CONTACT: Fred Licari, 571-372-0493.

SUPPLEMENTARY INFORMATION:

Title, Associated Form and OMB Number: “Department of Defense Security Agreement,” “Appendage to Department of Defense Security Agreement,” “Certificate Pertaining to Foreign Interests;” DD Forms 441, 441-1 and SF 328; OMB Control Number 0704-0194.

Type of Request: Reinstatement, with change, of a previously approved collection for which approval has expired.

Number of Respondents: 6,851.

Responses per Respondent: 1.

Annual Responses: 6,851.

Average Burden per Response: 1.5 hours.

Annual Burden Hours: 4171.3 hours.

Needs And Uses: Executive Order (EO) 12829 as amended, "National Industrial Security Program (NISP)," stipulates that the Secretary of Defense shall serve as the Executive Agent for inspecting and monitoring the contractors, licensees, and grantees who require or will require access to or who store or will store classified information; and for determining the eligibility for access to classified information of contractors, licensees, and grantees and their respective employees. The specific requirements necessary to protect classified information released to private industry are set forth in Department of Defense (DoD) 5220.22M, "National Industrial Security Program Operating Manual (NISPOM)," dated February 28, 2006 as amended by Conforming Change 1, dated March 28, 2013. These forms are mandated in the Industrial Security Regulation DoD 5220.22-R dated December 1985 as amended, DoD 5220.22—NISP Volume 3, dated April 17, 2014 and the Federal Acquisition Regulation. Respondents must execute DD Form 441, "Department of Defense Security Agreement," which is the initial agreement between the contractor and the government regarding security requirements necessary to protect classified information associated with the contract. This legally binding document details the responsibility of both parties and obligates the contractor to fulfill the requirements outlined in DoD 5220.22M. The DD Form 441-1, "Appendage to Department of Defense Security Agreement," is used to extend the agreement to branch offices of the contractor. The SF Form 328, "Certificate Pertaining to Foreign Interests," must be submitted to provide certification regarding elements of Foreign Ownership, Control, or Influence (FOCI) as stipulated in paragraph 2-302 of the NISPOM. DSS proposes to make changes to the DD Form 441 and SF 328. The requirement for execution of the corporate "Certificate" section and the use of a corporate seal is being deleted. Currently the government does not require all corporations to execute the corporate Certificate portion of the Forms. Only those corporations who are in possession of a seal were being required to execute the Certificate. Corporations that do not have a seal and other types of business structures such as limited liability companies, partnership and sole proprietors are only required to have the signing of the agreement witnessed. DSS proposes that a witness is sufficient for all companies whether or not they are a corporation.

Affected Public: Business or other for-profit; individuals or households; Not-for-profit institutions.

Frequency: On occasion.

Respondent's Obligation: Voluntary.

OMB Desk Officer: Ms. Jasmeet

Seehra.

Comments and recommendations on the proposed information collection should be emailed to Ms. Jasmeet Seehra, DoD Desk Officer, at Oira_submission@omb.eop.gov. Please identify the proposed information collection by DoD Desk Officer and the Docket ID number and title of the information collection.

You may also submit comments and recommendations, identified by Docket ID number and title, by the following method:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the instructions for submitting comments.

Instructions: All submissions received must include the agency name, Docket ID number and title for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the Internet at <http://www.regulations.gov> as they are received without change, including any personal identifiers or contact information.

DOD Clearance Officer: Mr. Frederick Licari.

Written requests for copies of the information collection proposal should be sent to Mr. Licari at WHS/ESD Directives Division, 4800 Mark Center Drive, East Tower, Suite 02G09, Alexandria, VA 22350-3100.

Dated: July 19, 2016.

Aaron Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 5001-06-P

DEPARTMENT OF DEFENSE

Department of the Navy

Notice of Intent To Grant an Exclusive License; SpringStar Inc.

AGENCY: Department of the Navy, DoD.

ACTION: Notice.

SUMMARY: The Department of the Navy hereby gives notice of its intent to grant SpringStar Inc. a revocable, nonassignable, exclusive license to practice worldwide the Government owned inventions described in U.S. Patent Application 14/693,615 filed April 22, 2015 and entitled "Insect

control formulation with improved auto-dissemination characteristics," as well as any issued patent, divisional or continuation from that and related foreign filings in the field of insect control.

DATES: Anyone wishing to object to the grant of this license has fifteen (15) days from the date of this notice to file written objections along with supporting evidence, if any, not later than August 8, 2016.

ADDRESSES: Written objections are to be filed with Attn: Naval Medical Research Center, Code 1URO/OPBD, 503 Robert Grant Avenue, Silver Spring, MD 20910-7500.

FOR FURTHER INFORMATION CONTACT: Dr. T.A. Ponzio, Director, Partnerships & Business Development, Naval Medical Research Center, 503 Robert Grant Ave., Silver Spring, MD 20910-7500; todd.a.ponzio.civ@mail.mil; telephone: 240-762-0673.

Authority: 35 U.S.C. 207, 37 CFR part 404.

Dated: July 13, 2016.

N.A. Hagerty-Ford,

Commander, Judge Advocate General's Corps, U.S. Navy, Federal Register Liaison Officer.

BILLING CODE 3810-FF-P

ENVIRONMENTAL PROTECTION AGENCY

[EPA-HQ-OECA-2012-0656; FRL-9947-44-OEI]

Information Collection Request Submitted to OMB for Review and Approval; Comment Request; NSPS for Lead-Acid Battery Manufacturing (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency has submitted an information collection request (ICR), "NSPS for Lead-Acid Battery Manufacturing (40 CFR part 60, subpart KK) (Renewal)" (EPA ICR No. 1072.11, OMB Control No. 2060-0081), to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*). This is a proposed extension of the ICR, which is currently approved through July 31, 2016. Public comments were previously requested via the **Federal Register** (80 FR 32116) on June 5, 2015, during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the

ICR is given below, including its estimated burden and cost to the public. An Agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

DATES: Additional comments may be submitted on or before August 22, 2016.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA-HQ-OECA-2012-0656, to: (1) EPA online using www.regulations.gov (our preferred method), or by email to docket.oeca@epa.gov, or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW., Washington, DC 20460; and (2) OMB via email to oira_submission@omb.eop.gov. Address comments to OMB Desk Officer for EPA.

EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI), or other information whose disclosure is restricted by statute.

FOR FURTHER INFORMATION CONTACT: Patrick Yellin, Monitoring, Assistance, and Media Programs Division, Office of Compliance, Mail Code 2227A, Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460; telephone number: (202) 564-2970; fax number: (202) 564-0050; email address: yellin.patrick@epa.gov.

SUPPLEMENTARY INFORMATION:

Supporting documents which explain in detail the information that the EPA will be collecting are available in the public docket for this ICR. The docket can be viewed online at www.regulations.gov or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW., Washington, DC. The telephone number for the Docket Center is 202-566-1744. For additional information about EPA's public docket, visit: <http://www.epa.gov/dockets>.

Abstract: The affected entities are subject to the General Provisions of the NSPS (40 CFR part 60, subpart A), and any changes, or additions to the Provisions are specified at 40 CFR part 60, subpart KK. Owners or operators of the affected facilities must submit initial notification reports, performance tests, and periodic reports and results. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during

which the monitoring system is inoperative. Reports, at a minimum, are required semiannually.

Form Numbers: None.

Respondents/affected entities: Lead-acid battery manufacturing plants.

Respondent's obligation to respond: Mandatory (40 CFR part 60, subpart KK).

Estimated number of respondents: 52 (total).

Frequency of response: Initially and semiannually.

Total estimated burden: 3,990 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$423,000 (per year), which includes \$11,700 in either annualized capital/startup or operation & maintenance costs.

Changes in the Estimates: There is an adjustment decrease in respondent labor hours in this ICR from the most recently approved ICR. This decrease is due to rounding differences and a mathematical correction in the burden calculations.

Courtney Kerwin,

Acting Director, Collection Strategies Division.

Information Collection Request Submitted to OMB for Review and Approval; Comment Request; NSPS for Nitric Acid Plants (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency has submitted an information collection request (ICR), "NSPS for Nitric Acid Plants (40 CFR part 60, subparts G and Ga) (Renewal)" (EPA ICR No. 1056.12, OMB Control No. 2060-0019), to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*). This is a proposed extension of the ICR, which is currently approved through July 31, 2016. Public comments were previously requested via the **Federal Register** (80 FR 32116) on June 5, 2015, during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its

estimated burden and cost to the public. An Agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

DATES: Additional comments may be submitted on or before August 22, 2016.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA-HQ-OECA-2015-0190, to: (1) EPA online using www.regulations.gov (our preferred method), or by email to docket.oeca@epa.gov, or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW., Washington, DC 20460; and (2) OMB via email to oira_submission@omb.eop.gov. Address comments to OMB Desk Officer for EPA.

EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI), or other information whose disclosure is restricted by statute.

FOR FURTHER INFORMATION CONTACT: Patrick Yellin, Monitoring, Assistance, and Media Programs Division, Office of Compliance, Mail Code 2227A, Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460; telephone number: (202) 564-2970; fax number: (202) 564-0050; email address: yellin.patrick@epa.gov.

SUPPLEMENTARY INFORMATION:

Supporting documents which explain in detail the information that the EPA will be collecting are available in the public docket for this ICR. The docket can be viewed online at www.regulations.gov or in person at the EPA Docket Center, EPA West, Room 3334, 1301 Constitution Ave. NW., Washington, DC. The telephone number for the Docket Center is 202-566-1744. For additional information about EPA's public docket, visit: <http://www.epa.gov/dockets>.

Abstract: Owners and operators of affected facilities are required to comply with reporting and record keeping requirements for the General Provisions (40 CFR part 60, subpart A), as well as for the specific requirements (40 CFR part 60, subparts G and Ga). This includes submitting initial notification reports, performance tests and periodic reports and results, and maintaining records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is

inoperative. These reports are used by EPA to determine compliance with the standards.

Form Numbers: None.

Respondents/affected entities: Nitric acid plants.

Respondent's obligation to respond: Mandatory (40 CFR part 60, subparts G and Ga).

Estimated number of respondents: 29 (total).

Frequency of response: Initially, occasionally and semiannually.

Total estimated burden: 2,190 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$2,970,000 (per year), which includes \$2,740,000 in both annualized capital/startup and operation & maintenance costs.

Changes in the Estimates: There is an adjustment increase in the total estimated burden as currently identified in the OMB Inventory of Approved Burdens. This increase is not due to any program changes. The change in the burden and cost estimates occurred due to industry growth in the past three years, resulting in an additional number of respondents that have become subject to Subpart Ga. Additionally, this ICR assumes that all respondents will have to familiarize themselves with regulatory requirements each year. These changes result in an increase in the number of responses, labor hours and costs, and total O&M costs.

Courtney Kerwin,

Acting Director, Collection Strategies Division.

Information Collection Request Submitted to OMB for Review and Approval; Comment Request; Cellulosic Production Volume Projections and Efficient Producer Reporting

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency has submitted an information collection request (ICR), "Cellulosic Production Volume Projections and Efficient Producer Reporting" (EPA ICR No. 2551.01, OMB Control No. 2060-NEW) to the Office of Management and Budget (OMB) for review and approval

in accordance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*). This is a request for approval of a new collection. Public comments were previously requested via the **Federal Register** (80 FR 15597) on March 24, 2015 during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. An Agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

DATES: Additional comments may be submitted on or before August 22, 2016.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA-HQ-OAR-2015-0207, to (1) EPA online using www.regulations.gov (our preferred method), by email to a-and-r-docket@epa.gov, Attention Air and Radiation Docket ID No. EPA-HQ-OAR-2015-0207, or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW., Washington, DC 20460, and (2) OMB via email to oira_submission@omb.eop.gov. Address comments to OMB Desk Officer for EPA.

EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

FOR FURTHER INFORMATION CONTACT: Jon Monger, Policy Advisor, Office of Transportation and Air Quality, Mail Code: 6401A, Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460; telephone number: 202-564-0628; fax number: 202-564-1177; email address: monger.jon@epa.gov.

SUPPLEMENTARY INFORMATION:

Supporting documents which explain in detail the information that the EPA will be collecting are available in the public docket for this ICR. The docket can be viewed online at www.regulations.gov or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW., Washington, DC. The telephone number for the Docket Center is 202-566-1744. For additional information about EPA's public docket, visit <http://www.epa.gov/dockets>.

Abstract: EPA is seeking to collect information from potential cellulosic biofuel producers to aid in determining

the annual volume standards. This ICR includes a questionnaire form to facilitate the collection of this information. EPA would also like to use a data form to collect information from certain producers and importers who have requested and been approved to use an "efficient producer" pathway. This data form would standardize collection of selected data points and allow better and more efficient compliance with the RFS program. We inform respondents that they may assert claims of business confidentiality (CBI) for information they submit in accordance with 40 CFR 2.203.

Form Numbers: RFS Efficient Producer Data Form (RFS2500), RFS Cellulosic Biofuel Producer Questionnaire Form (RFS2700).

Respondents/affected entities: Producers, Importers of Renewable Fuels.

Respondent's obligation to respond: RFS Cellulosic Biofuel Producer Questionnaire Form is voluntary; RFS Efficient Producer Data Form is mandatory pursuant to Sections 114 and 208 of the Clean Air Act (CAA), 42 U.S.C. 7414 and 7542 for producers eligible to generate RINs through an efficient producer pathway pursuant to 40 CFR 80.1416.

Estimated number of respondents: 90 (total).

Frequency of response: Annually (RFS Cellulosic Biofuel Producer Questionnaire Form) or quarterly (RFS Efficient Producer Data Form).

Total estimated burden: 880 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$101,920 (per year), includes no annualized capital or operation & maintenance costs.

Changes in the Estimates: There is no previous ICR for this collection.

Courtney Kerwin,

Acting Director, Collection Strategies Division.

Information Collection Request Submitted to OMB for Review and Approval; Comment Request; NESHAP for Mineral Wool Production (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency has submitted an information collection request (ICR), "NESHAP for Mineral Wool Production (40 CFR part 63, subpart DDD) (Renewal)" (EPA ICR No. 1799.09, OMB Control No. 2060-0362), to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*). This is a proposed extension of the ICR, which is currently approved through July 31, 2016. Public comments were previously requested via the **Federal Register** (80 FR 32116) on June 5, 2015, during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. An Agency may neither conduct nor sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

DATES: Additional comments may be submitted on or before August 22, 2016.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA-HQ-OECA-2012-0678, to: (1) EPA online using www.regulations.gov (our preferred method), or by email to docket.oeca@epa.gov, or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW., Washington, DC 20460; and (2) OMB via email to oir_submission@omb.eop.gov. Address comments to OMB Desk Officer for EPA.

EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI), or other information whose disclosure is restricted by statute.

FOR FURTHER INFORMATION CONTACT:

Patrick Yellin, Monitoring, Assistance, and Media Programs Division, Office of Compliance, Mail Code 2227A, Environmental Protection Agency, 1200

Pennsylvania Ave. NW., Washington, DC 20460; telephone number: (202) 564-2970; fax number: (202) 564-0050; email address: yellin.patrick@epa.gov.

SUPPLEMENTARY INFORMATION:

Supporting documents which explain in detail the information that the EPA will be collecting are available in the public docket for this ICR. The docket can be viewed online at www.regulations.gov or in person at the EPA Docket Center, EPA West, Room 3334, 1301 Constitution Ave. NW., Washington, DC. The telephone number for the Docket Center is 202-566-1744. For additional information about EPA's public docket, visit: <http://www.epa.gov/dockets>.

Abstract: The affected entities are subject to the General Provisions of the NESHAP (40 CFR part 63, subpart A), and any changes, or additions to the Provisions that are specified (40 CFR part 63, subpart DDD). Owners or operators of the affected facilities must submit initial notification reports, performance tests, and periodic reports and results. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Reports, at a minimum, are required semiannually.

Form Numbers: None.

Respondents/affected entities: Mineral wool production facilities.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart DDD).

Estimated number of respondents: 8 (total).

Frequency of response: Initially and semiannually.

Total estimated burden: 2,130 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$285,000 (per year), which includes \$6,000 in either annualized capital/startup or operation & maintenance costs.

Changes in the Estimates: There is an adjustment increase in burden due to an update to the estimated respondent universe. During development of the 2015 amendment, EPA estimates that 8 mineral wool production facilities are currently subject to the standard. There is also an increase in the respondent labor costs due to additional compliance testing requirements from the 2015 amendment.

Courtney Kerwin,

Acting Director, Collection Strategies Division.

BILLING CODE 6560-50-P

ENVIRONMENTAL PROTECTION AGENCY

[EPA-HQ-OPP-2015-0022; FRL-9947-94]

Pesticide Product Registration; Receipt of Applications for New Uses**AGENCY:** Environmental Protection Agency (EPA).**ACTION:** Notice.

SUMMARY: EPA has received applications to register pesticide products containing active ingredients not included in any currently registered pesticide products. Pursuant to the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), EPA is hereby providing notice of receipt and opportunity to comment on these applications.

DATES: Comments must be received on or before August 22, 2016.

ADDRESSES: Submit your comments, identified by docket identification (ID) number EPA-HQ-OPP-2015-0022 and the File Symbol of interest as shown in the body of this document, by one of the following methods:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.
- *Mail:* OPP Docket, Environmental Protection Agency Docket Center (EPA/DC), (28221T), 1200 Pennsylvania Ave. NW., Washington, DC 20460-0001.
- *Hand Delivery:* To make special arrangements for hand delivery or delivery of boxed information, please follow the instructions at <http://www.epa.gov/dockets/contacts.html>.

Additional instructions on commenting or visiting the docket, along with more information about dockets generally, is available at <http://www.epa.gov/dockets>.

FOR FURTHER INFORMATION CONTACT: Susan Lewis, Registration Division (7505P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460-0001; main telephone number: (703) 305-7090; email address: RDFRNotices@epa.gov.

SUPPLEMENTARY INFORMATION:**I. General Information***A. Does this action apply to me?*

You may be potentially affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. The following list of North American Industrial

Classification System (NAICS) codes is not intended to be exhaustive, but rather provides a guide to help readers determine whether this document applies to them. Potentially affected entities may include:

- Crop production (NAICS code 111).
- Animal production (NAICS code 112).
- Food manufacturing (NAICS code 311).
- Pesticide manufacturing (NAICS code 32532).

B. What should I consider as I prepare my comments for EPA?

1. *Submitting CBI.* Do not submit this information to EPA through regulations.gov or email. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD-ROM that you mail to EPA, mark the outside of the disk or CD-ROM as CBI and then identify electronically within the disk or CD-ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for preparing your comments.* When preparing and submitting your comments, see the commenting tips at <http://www.epa.gov/dockets/comments.html>.

II. Registration Applications

EPA has received applications to register pesticide products containing active ingredients not included in any currently registered pesticide products. Pursuant to the provisions of FIFRA section 3(c)(4) (7 U.S.C. 136a(c)(4)), EPA is hereby providing notice of receipt and opportunity to comment on these applications. Notice of receipt of these applications does not imply a decision by the Agency on these applications.

EPA Registration Number: 100-1533. *Docket ID number:* EPA-HQ-OPP-2016-0049. *Applicant:* Syngenta Crop Protection LLC, 410 Swing Road, P.O. ENVIRONMENTAL PROTECTION AGENCY

[EPA-HQ-OECA-2012-0499; FRL-9947-52-OEII]

Information Collection Request Submitted to OMB for Review and Approval; Comment Request; NSPS for Industrial/Commercial/Institutional Steam Generating Units (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency has submitted an information collection request (ICR), "NSPS for Industrial/Commercial/Institutional Steam Generating Units (40 CFR part 60, subpart Db) (Renewal)" (EPA ICR No. 1088.14, OMB Control No. 2060-0072), to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*). This is a proposed extension of the ICR, which is currently approved through July 31, 2016. Public comments were previously-requested via the **Federal Register** (80 FR 32116) on June 5, 2015, during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. An Agency may neither conduct nor sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

DATES: Additional comments may be submitted on or before August 22, 2016.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA-HQ-OECA-2012-0499, to: (1) EPA online using www.regulations.gov (our preferred method), or by email to docket.oeca@epa.gov, or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW., Washington, DC 20460; and (2) OMB via email to oira_submission@omb.eop.gov. Address comments to OMB Desk Officer for EPA.

EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI), or other information whose disclosure is restricted by statute.

FOR FURTHER INFORMATION CONTACT:

Patrick Yellin, Monitoring, Assistance, and Media Programs Division, Office of

Compliance, Mail Code 2227A, Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460; telephone number: (202) 564-2970; fax number: (202) 564-0050; email address: yellin.patrick@epa.gov.

SUPPLEMENTARY INFORMATION:

Supporting documents which explain in detail the information that the EPA will be collecting are available in the public docket for this ICR. The docket can be viewed online at www.regulations.gov or in person at the EPA Docket Center, EPA West, Room 3334, 1301 Constitution Ave. NW., Washington, DC. The telephone number for the Docket Center is 202-566-1744. For additional information about EPA's public docket, visit: <http://www.epa.gov/dockets>.

Abstract: The affected entities are subject to the General Provisions of the NSPS (40 CFR part 60, subpart A) and any changes, or additions to the Provisions are specified at 40 CFR part 60, subpart Db. Owners or operators of the affected facilities must make an initial notification, performance tests, periodic reports, and maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Reports are also required semiannually.

Form Numbers: None.

Respondents/affected entities: Industrial, commercial, and institutional steam generating units.

Respondent's obligation to respond: Mandatory (40 CFR part 60, subpart Db).

Estimated number of respondents: 1,846 (total).

Frequency of response: Initially, quarterly and semiannually.

Total estimated burden: 1,690,000 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$210,000,000 (per year), which includes \$35,100,000 in both annualized capital/startup and operation & maintenance costs.

Changes in the Estimates: There is an adjustment increase in the overall burden in this ICR from the most-recently approved ICR. This is due to a projection of industry growth, resulting in additional sources becoming subject to the regulation. The growth projection is based on the Agency's November 2011 industry analysis. This results in an increase in the respondent labor

hours, labor costs, capital and O&M costs, and number of responses.

Courtney Kerwin,

Acting Director, Collection Strategies Division.

Information Collection Request Submitted to OMB for Review and Approval; Comment Request; NESHAP for Oil and Natural Gas Production (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency has submitted an information collection request (ICR), "NESHAP for Oil and Natural Gas Production (40 CFR part 63, subpart HH) (Renewal)" (EPA ICR No. 1788.11, OMB Control No. 2060-0417), to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*). This is a proposed extension of the ICR, which is currently approved through July 31, 2016. Public comments were previously requested via the **Federal Register** (80 FR 32116) on June 5, 2015, during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. An Agency may neither conduct nor sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

DATES: Additional comments may be submitted on or before August 22, 2016.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA-HQ-OECA-2012-0669, to: (1) EPA online using www.regulations.gov (our preferred method), or by email to docket.oeca@epa.gov, or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW., Washington, DC 20460; and (2) OMB via email to oir_submission@omb.eop.gov. Address comments to OMB Desk Officer for EPA.

EPA's policy is that all comments received will be included in the public docket without change including any

personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI), or other information whose disclosure is restricted by statute.

FOR FURTHER INFORMATION CONTACT:

Patrick Yellin, Monitoring, Assistance, and Media Programs Division, Office of Compliance, Mail Code 2227A, Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460; telephone number: (202) 564-2970; fax number: (202) 564-0050; email address: yellin.patrick@epa.gov.

SUPPLEMENTARY INFORMATION:

Supporting documents which explain in detail the information that the EPA will be collecting are available in the public docket for this ICR. The docket can be viewed online at www.regulations.gov or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW., Washington, DC. The telephone number for the Docket Center is 202-566-1744. For additional information about EPA's public docket, visit: <http://www.epa.gov/dockets>.

Abstract: Owners and operators of affected facilities are required to comply with reporting and record keeping requirements for the General Provisions (40 CFR part 63, subpart A), as well as for the specific requirements at 40 CFR part 63, subpart HH. This includes submitting initial notification reports, performance tests and periodic reports and results, and maintaining records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These reports are used by EPA to determine compliance with these standards.

Form Numbers: None.

Respondents/affected entities: Oil and natural gas production facilities.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart HH).

Estimated number of respondents: 4,242 (total).

Frequency of response: Initially, occasionally, and semiannually.

Total estimated burden: 52,500 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$6,420,000 (per year), which includes \$1,010,000 for both annualized capital/startup and operation & maintenance costs.

Changes in the Estimates: There is an adjustment increase in the estimated burden. This is not due to program changes. The increase occurred because there is a projected industry growth,

where an additional 28 major sources and 141 area sources are expected to become subject to the rule each year. This results in an estimated increase in the respondent labor hours, O&M costs, and number of responses.

Courtney Kerwin,

Acting Director, Collection Strategies Division.

Patrick Yellin, Monitoring, Assistance, and Media Programs Division, Office of Compliance, Mail Code 2227A, Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460; telephone number: (202) 564-2970; fax number: (202) 564-0050; email address: yellin.patrick@epa.gov.

SUPPLEMENTARY INFORMATION:

Supporting documents which explain in detail the information that the EPA will be collecting are available in the public docket for this ICR. The docket can be viewed online at www.regulations.gov or in person at the EPA Docket Center, EPA West, Room 3334, 1301 Constitution Ave. NW., Washington, DC. The telephone number for the Docket Center is 202-566-1744. For additional information about EPA's public docket, visit: <http://www.epa.gov/dockets>.

Abstract: Owners and operators of affected facilities are required to comply with reporting and record keeping requirements for the General Provisions (40 CFR part 63, subpart A), as well as for the specific requirements at 40 CFR part 63 Subpart EE. This includes submitting initial notifications, performance tests and periodic reports and results, and maintaining records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These reports are used by EPA to determine compliance with the standards.

Form Numbers: None.

Respondents/affected entities:

Magnetic tape manufacturing facilities.

Respondent's obligation to respond:

Mandatory (40 CFR part 63, subpart EE).

Estimated number of respondents: 6 (total).

Frequency of response: Initially, quarterly and semiannually.

Total estimated burden: 3,910 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$451,000 (per year), which includes \$47,000 in both annualized capital/startup and operation & maintenance costs.

Changes in the Estimates: There is an adjustment increase in the respondent

burden as currently identified in the OMB Inventory of Approved Burdens. This increase is not due to any program changes. The change in the burden and cost estimates occurred because of a change in assumption. This ICR assumes all sources will have to familiarize themselves with the regulatory requirements each year. In addition, this ICR has an increase of one response to account for the initial performance test notification.

Courtney Kerwin,

Acting Director, Collection Strategies Division.

Information Collection Request Submitted to OMB for Review and Approval; Comment Request; NESHAP for Halogenated Solvent Cleaners/ Halogenated Hazardous Air Pollutants (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency has submitted an information collection request (ICR), "NESHAP for Halogenated Solvent Cleaners/ Halogenated Hazardous Air Pollutants (40 CFR part 63, subpart T) (Renewal)" (EPA ICR No. 1652.09, OMB Control No. 2060-0273), to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*). This is a proposed extension of the ICR, which is currently approved through July 31, 2016. Public comments were requested previously via the **Federal Register** (80 FR 32116) on June 5, 2015, during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

DATES: Additional comments may be submitted on or before August 22, 2016.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA-HQ-OECA-2012-0660, to: (1) EPA online using www.regulations.gov (our

preferred method), or by email to docket.oeca@epa.gov, or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW., Washington, DC 20460; and (2) OMB via email to oira_submission@omb.eop.gov. Address comments to OMB Desk Officer for EPA.

EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI), or other information whose disclosure is restricted by statute.

FOR FURTHER INFORMATION CONTACT:

Patrick Yellin, Monitoring, Assistance, and Media Programs Division, Office of Compliance, Mail Code 2227A, Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460; telephone number: (202) 564-2970; fax number: (202) 564-0050; email address: yellin.patrick@epa.gov.

SUPPLEMENTARY INFORMATION:

Supporting documents which explain in detail the information that the EPA will be collecting are available in the public docket for this ICR. The docket can be viewed online at www.regulations.gov or in person at the EPA Docket Center, EPA West, Room 3334, 1301 Constitution Ave. NW., Washington, DC. The telephone number for the Docket Center is 202-566-1744. For additional information about EPA's public docket, visit: <http://www.epa.gov/dockets>.

Abstract: The affected entities are subject to the General Provisions of the NESHAP (40 CFR part 63, subpart A), and any changes, or additions, to the Provisions are specified at 40 CFR part 63, subpart T. Owners or operators of the affected facilities must submit initial notification reports, performance tests, and periodic reports and results. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Reports, at a minimum, are required semiannually.

Form Numbers: None.

Respondents/affected entities:

Facilities with halogenated HAP solvent cleaning machines.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart T).

Estimated number of respondents: 1,431 (total).

Frequency of response: Initially, quarterly, semiannually and annually.

Total estimated burden: 48,000 hours (rounded) (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$5,960,000 (per year), which includes \$1,010,000 in either annualized capital/startup or operation & maintenance costs.

Changes in the Estimates: There is an adjustment increase in respondent labor hours in this ICR from the most recently approved ICR. This is due to assuming all existing sources will have to re-familiarize with the regulatory requirements each year. Additionally, there is a small decrease in the total capital and O&M cost due to the rounding of all calculated values to three significant digits.

Courtney Kerwin,

Acting Director, Collection Strategies Division.

Patrick Yellin, Monitoring, Assistance, and Media Programs Division, Office of Compliance, Mail Code 2227A, Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460; telephone number: (202) 564-2970; fax number: (202) 564-0050; email address: yellin.patrick@epa.gov.

SUPPLEMENTARY INFORMATION:

Supporting documents which explain in detail the information that the EPA will be collecting are available in the public docket for this ICR. The docket can be viewed online at www.regulations.gov or in person at the EPA Docket Center, EPA West, Room 3334, 1301 Constitution Ave. NW., Washington, DC. The telephone number for the Docket Center is 202-566-1744. For additional information about EPA's public docket, visit: <http://www.epa.gov/dockets>.

Abstract: The affected entities are subject to the General Provisions of the NSPS at 40 CFR part 60, subpart A, and any changes, or additions to the Provisions are specified at 40 CFR part 60, subpart MM. Owners or operators of the affected facilities must submit initial notification reports, performance tests, and periodic reports and results. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Reports, at a minimum, are required semiannually.

Form Numbers: None.

Respondents/affected entities: Facilities that perform surface coating of automobile and light duty truck.

Respondent's obligation to respond: Mandatory (40 CFR part 60, subpart MM).

Estimated number of respondents: 66 (total).

Frequency of response: Initially, quarterly and semiannually.

Total estimated burden: 192,000 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$19,900,000 (per year), which includes \$114,000 in both annualized capital/startup and operation & maintenance costs.

Changes in the Estimates: There is an adjustment increase in the respondent and Agency burden in this ICR compared to the most recently approved ICR. This increase is due to an estimated increase in the number of sources, which results in an increase in labor hours, number of responses, and total O&M costs.

Courtney Kerwin,

Acting Director, Collection Strategies Division.

DATES: Comments must be received on or before August 22, 2016.

ADDRESSES: Submit your comments, identified by docket identification (ID) number EPA-HQ-OPP-2015-0022 and the File Symbol of interest as shown in the body of this document, by one of the following methods:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

- *Mail:* OPP Docket, Environmental Protection Agency Docket Center (EPA/DC), (28221T), 1200 Pennsylvania Ave. NW., Washington, DC 20460-0001.

- *Hand Delivery:* To make special arrangements for hand delivery or delivery of boxed information, please follow the instructions at <http://www.epa.gov/dockets/contacts.html>.

Additional instructions on commenting or visiting the docket, along with more information about dockets generally, is available at <http://www.epa.gov/dockets>.

FOR FURTHER INFORMATION CONTACT:

Steve Knizner, Antimicrobials Division (7510P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460-0001; main telephone number: (703) 305-7090; email address: ADFRNotices@epa.gov.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this action apply to me?

You may be potentially affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. The following list of North American Industrial Classification System (NAICS) codes is not intended to be exhaustive, but rather provides a guide to help readers determine whether this document applies to them. Potentially affected entities may include:

- Crop production (NAICS code 111).
- Animal production (NAICS code 112).
- Food manufacturing (NAICS code 311).
- Pesticide manufacturing (NAICS code 32532).

B. What should I consider as I prepare my comments for EPA?

1. *Submitting CBI.* Do not submit this information to EPA through www.regulations.gov or email. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD-ROM that you mail to EPA, mark the outside of the disk or CD-ROM as CBI and then identify electronically within the disk or CD-ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for preparing your comments.* When preparing and submitting your comments, see the commenting tips at <http://www.epa.gov/dockets/comments.html>.

II. Registration Applications

EPA has received an application to register a pesticide product containing an active ingredient not included in any currently registered pesticide products. Pursuant to the provisions of FIFRA section 3(c)(4) (7 U.S.C. 136a(c)(4)), EPA is hereby providing notice of receipt and opportunity to comment on this application. Notice of receipt of this application does not imply a decision by the Agency on these applications.

EPA File Symbols: 91413-R and 91413-E. *Docket ID number:* EPA-HQ-OPP-2016-0220. *Applicant:* Poly Group LLC, 451 Baxter Avenue, Louisville, KY 40204. *Product name:* Nouvex N950-9010. *Active ingredient:* Nouvex Antimicrobial Polymer—Pyridine, 4-Ethenyl-, Polymer with a-(2-Methyl-1-Oxo-2-Propen-1-yl)- ω -Methoxypoly(oxy-1,2-Ethanediy), Compound with 1-Bromohexane (Nouvex N950-9010) at 97.2%. *Proposed use:* Material preservative used to control microorganisms that cause deterioration and discoloration for use in paper, plastic and textiles. *Contact:* AD.

Authority: 7 U.S.C. 136 *et seq.*

Dated: June 29, 2016.

Steve Knizner,

Director, Antimicrobials Division, Office of Pesticide Programs.

BILLING CODE 6560-50-P

ENVIRONMENTAL PROTECTION AGENCY

[EPA-HQ-OECA-2012-0676; FRL-9947-97-OEI]

Information Collection Request Submitted to OMB for Review and Approval; Comment Request; NESHAP for Phosphoric Acid Manufacturing and Phosphate Fertilizers Production (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency has submitted an information collection request (ICR), “NESHAP for Phosphoric Acid Manufacturing and Phosphate Fertilizers Production (40 CFR part 63, subparts AA and BB) (Renewal)” (EPA ICR No. 1790.08, OMB Control No. 2060-0361), to the Office of Management and Budget (OMB) for

review and approval in accordance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*). This is a proposed extension of the ICR, which is currently approved through July 31, 2016. Public comments were requested previously via the **Federal Register** (80 FR 32116) on June 5, 2015, during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. An Agency may neither conduct nor sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

DATES: Additional comments may be submitted on or before August 22, 2016.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA-HQ-OECA-2012-0676, to: (1) EPA online using www.regulations.gov (our preferred method), or by email to docket.oeca@epa.gov, or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW., Washington, DC 20460; and (2) OMB via email to oira_submission@omb.eop.gov. Address comments to OMB Desk Officer for EPA.

EPA’s policy is that all comments received will be included in the public docket without change, including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI), or other information whose disclosure is restricted by statute.

FOR FURTHER INFORMATION CONTACT:

Patrick Yellin, Monitoring, Assistance, and Media Programs Division, Office of Compliance, Mail Code 2227A, Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460; telephone number: (202) 564-2970; fax number: (202) 564-0050; email address: yellin.patrick@epa.gov.

SUPPLEMENTARY INFORMATION:

Supporting documents which explain in detail the information that the EPA will be collecting are available in the public docket for this ICR. The docket can be viewed online at www.regulations.gov or in person at the EPA Docket Center, EPA West, Room 3334, 1301 Constitution Ave. NW., Washington, DC. The telephone number for the Docket Center is 202-566-1744. For additional information about EPA’s public docket, visit: <http://www.epa.gov/dockets>.

Abstract: Owners and operators of affected facilities are required to comply with reporting and record-keeping

requirements for the General Provisions (40 CFR part 63, subpart A), as well as for the specific requirements at 40 CFR part 63 subparts AA and BB. This includes submitting initial notifications, performance tests and periodic reports and results, and maintaining records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These reports are used by EPA to determine compliance with the standards.

Form Numbers: None.

Respondents/affected entities:

Phosphoric acid manufacturing and phosphate fertilizer production facilities.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subparts AA and BB).

Estimated number of respondents: 13 (total).

Frequency of response: Initially, occasionally, quarterly, semiannually and annually.

Total estimated burden: 2,200 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$413,000 (per year), which includes \$186,000 in either annualized capital/startup or operation & maintenance costs.

Changes in the Estimates: There is an adjustment increase in the total estimated cost, burden, number of responses, and capital and O&M costs as currently identified in the OMB Inventory of Approved Burdens. The change in burden for the new and existing facilities is due primarily to a program change in the regulation requiring: (1) Mercury testing and total fluoride (TF) testing of phosphate rock calciners; and (2) TF testing of oxidation reactors. The Residual Risk and Technology Review (RTR) associated with this program change estimated 12 phosphoric acid units and 11 phosphate fertilizer units (a total of 23 process units) located at 13 facilities.

Courtney Kerwin,

Acting Director, Collection Strategies Division.

BILLING CODE 6560-50-P

with revision, the clearance under the Paperwork Reduction Act for the following information collection activity.

SUMMARY: The Board of Governors of the Federal Reserve System (Board or Federal Reserve) invites comment on a proposal to revise the FR H-(b)11, an information collection submitted by Savings and Loan Holding Companies (SLHCs).

On June 15, 1984, the Office of Management and Budget (OMB) delegated to the Board authority under the Paperwork Reduction Act (PRA) to approve of and assign OMB control numbers to collection of information requests and requirements conducted or sponsored by the Board. In exercising this delegated authority, the Board is directed to take every reasonable step to solicit comment. In determining whether to approve a collection of information, the Board will consider all comments received from the public and other agencies.

DATES: Comments must be submitted on or before September 20, 2016.

ADDRESSES: You may submit comments, identified by FR H-(b)11 by any of the following methods:

- *Agency Web site:* <http://www.federalreserve.gov>. Follow the instructions for submitting comments at <http://www.federalreserve.gov/apps/foia/proposedregs.aspx>.

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the instructions for submitting comments.

- *Email:* regs.comments@federalreserve.gov. Include OMB number in the subject line of the message.

- *FAX:* (202) 452-3819 or (202) 452-3102.

- *Mail:* Robert deV. Frierson, Secretary, Board of Governors of the Federal Reserve System, 20th Street and Constitution Avenue NW., Washington, DC 20551.

All public comments are available from the Board's Web site at <http://www.federalreserve.gov/apps/foia/proposedregs.aspx> as submitted, unless modified for technical reasons.

Accordingly, your comments will not be edited to remove any identifying or contact information. Public comments may also be viewed electronically or in paper form in Room 3515, 1801 K Street (between 18th and 19th Streets NW) Washington, DC 20006 between 9:00 a.m. and 5:00 p.m. on weekdays.

Additionally, commenters may send a copy of their comments to the OMB Desk Officer—Shagufta Ahmed—Office of Information and Regulatory Affairs, Office of Management and Budget, New

Executive Office Building, Room 10235 725 17th Street NW., Washington, DC 20503 or by fax to (202) 395-6974.

FOR FURTHER INFORMATION CONTACT: A copy of the PRA OMB submission, including the proposed reporting form and instructions, supporting statement, and other documentation will be placed into OMB's public docket files, once approved. These documents will also be made available on the Federal Reserve Board's public Web site at: <http://www.federalreserve.gov/apps/reportforms/review.aspx> or may be requested from the agency clearance officer, whose name appears below.

Federal Reserve Board Clearance Officer—Nuha Elmaghrahi—Office of the Chief Data Officer, Board of Governors of the Federal Reserve System, Washington, DC 20551 (202) 452-3829. Telecommunications Device for the Deaf (TDD) users may contact (202) 263-4869, Board of Governors of the Federal Reserve System, Washington, DC 20551.

SUPPLEMENTARY INFORMATION:

Request for Comment on Information Collection Proposal

The Board invites public comment on the following information collection, which is being reviewed under authority delegated by the OMB under the PRA. Comments are invited on the following:

- a. Whether the proposed collection of information is necessary for the proper performance of the Federal Reserve's functions; including whether the information has practical utility;
- b. The accuracy of the Federal Reserve's estimate of the burden of the proposed information collection, including the validity of the methodology and assumptions used;
- c. Ways to enhance the quality, utility, and clarity of the information to be collected;
- d. Ways to minimize the burden of information collection on respondents, including through the use of automated collection techniques or other forms of information technology; and
- e. Estimates of capital or startup costs and costs of operation, maintenance, and purchase of services to provide information.

At the end of the comment period, the comments and recommendations received will be analyzed to determine the extent to which the Federal Reserve should modify the proposed revisions prior to giving final approval.

Proposal to approve under OMB delegated authority the extension for three years, with revision, of the following report:

FEDERAL RESERVE SYSTEM

Proposed Agency Information Collection Activities; Comment Request

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Notice for comment regarding the Federal Reserve proposal to extend

Report title: Savings Association Holding Company Report.
Agency form number: FR H–(b)11.
OMB control number: 7100–0334.
Frequency: Quarterly.
Respondents: Savings and Loan Holding Companies.
Estimated number of respondents: 15.
Estimated Average Hours per Response: 2 hours.
Estimated Annual Burden Hours: 120 hours.

General Description of Report: The FR H–(b)11 collects information on filings with the Securities and Exchange Commission (SEC), reports provided by the nationally recognized statistical rating organizations and securities analysts, supplemental information for select questions from the *Quarterly Savings and Loan Holding Company Report* (FR 2320; OMB No. 7100–0345), financial statements, and other materially important events and exhibits. Respondents are (1) grandfathered unitary SLHCs whose assets are primarily commercial and whose thrifts make up less than 5 percent of its consolidated assets and (2) SLHCs whose assets are primarily insurance-related and do not otherwise submit financial reports with the SEC pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934. The Federal Reserve uses the FR H–(b)11 data to analyze the overall financial condition of SLHCs to ensure safe and sound operations.

Legal Authorization and Confidentiality: The Board's Legal Division has determined that the FR H–(b)11 is authorized by Section 10 of the Home Owners' Loan Act, which requires SLHCs to file "such reports as may be required by the Board" and provides that such reports "shall contain such information concerning the operations of such SLHC and its subsidiaries as the Board may require" (12 U.S.C. 1467a(b)(2)(A)).

The obligation to respond to the FR H–(b)11 is mandatory. The FR H–(b)11 covers 6 different items. Item 1 consists of SEC filings made by the SLHC that are not publicly traded companies and item 2 consists of reports provided by nationally recognized statistical rating organizations and securities analysts on any company in the SLHC's consolidated organization. The Board's Legal Division has determined that neither of these items should raise any issue of confidentiality.

Item 3 consists of supplemental information for any questions on the FR 2320 to which the SLHC answered "yes." The Board's Legal Division has determined that supplemental information in response to a "yes"

answer for the FR 2320's questions 24, 25, and 26 may be protected from disclosure under exemption 4 of the Freedom of Information Act (FOIA), which covers "trade secrets and commercial or financial information obtained from a person [that is] privileged or confidential" (5 U.S.C. 522(b)(4)). These questions concern any new or changed pledges of capital stock of any subsidiary savings association that secures short-term or long-term debt or other borrowings of the SLHC; changes to any class of securities of the SLHC or any of its subsidiaries that would negatively impact investors; and any default of the SLHC or any of its subsidiaries during the quarter. Disclosure of this type of information is likely to cause substantial competitive harm to the SLHC providing the information and thus this information may be protected from disclosure under FOIA exemption 4 (5 U.S.C. 522(b)(4)).

With regard to the supplemental information for other FR 2320 questions that would be provided in item 3 of the FR H–(b)11, as well as item 4 (Other Materially Important Events), item 5 (Financial Statements) and item 6 (Exhibits—essentially copies not previously filed of its charter or bylaws), the respondent may request confidential treatment of such information under one or more of the exemptions in the FOIA. The most likely case for confidential treatment will be exemption 4 (5 U.S.C. 522(b)(4)). However, all such requests for confidential treatment would need to be reviewed on a case-by-case basis and in response to a specific request for disclosure.

Proposed Revisions: The Federal Reserve proposes to eliminate the requirement that a publicly-traded SLHC submit a copy of its filings with the SEC.

Board of Governors of the Federal Reserve System, July 14, 2016.

Robert deV. Frierson,
Secretary of the Board.

BILLING CODE 6210–01–P

GENERAL SERVICES ADMINISTRATION

[Notice–MV–2016–01; Docket No. 2016–0002; Sequence No. 9]

Public Availability of General Services Administration Fiscal Year 2015 Service Contract Inventory

AGENCY: General Services Administration (GSA).

ACTION: Notice of public availability of GSA Fiscal Year 2015 Service Contract Inventories.

SUMMARY: In accordance with The Fiscal Year (FY) 2010 Consolidated Appropriations Act, GSA is publishing this notice to advise the public of the availability of the FY 2015 Service Contract Inventories.

DATES: July 22, 2016.

FOR FURTHER INFORMATION CONTACT: Questions regarding the Service Contract Inventory should be directed to Mr. James Tsujimoto, Office of Acquisition Policy, at 202–206–3585, or james.tsujimoto@gsa.gov.

SUPPLEMENTARY INFORMATION: In accordance with section 743 of Division C of the FY 2010 Consolidated Appropriations Act (Pub. L. 111–117), GSA is publishing this notice to advise the public of the availability of the FY 2015 Service Contract Inventories. These inventories provide information on service contract actions over \$25,000 that were made in FY 2015. The information is organized by component to show how contracted resources are distributed throughout the agency. The inventory has been developed in accordance with the guidance issued on December 19, 2011, by the Office of Management and Budget's Office of Federal Procurement Policy (OFPP). OFPP's guidance is available at: <http://www.whitehouse.gov/sites/default/files/omb/procurement/memo/service-contract-inventory-guidance>. GSA has posted its inventory and a summary of the inventory at the following location: <http://www.gsa.gov/gsasoci>.

Jeffrey A. Koses,

Director, Office of Acquisition Policy, Office of Government-wide Policy.

[FR Doc. 2016–17347 Filed 7–21–16; 8:45 am]

BILLING CODE 6820–61–P

GULF COAST ECOSYSTEM RESTORATION COUNCIL

[Docket Number: 107222016–1111–04]

Local Contracting Preference

AGENCY: Gulf Coast Ecosystem Restoration Council.

ACTION: Notice of final policy.

SUMMARY: The Gulf Coast Ecosystem Restoration Council (Council) hereby issues notice of its final policy for implementing the local contracting preference requirement of the Resources and Ecosystems Sustainability, Tourist Opportunities, and Revived Economies of the Gulf Coast States Act of 2012 (RESTORE Act).

DATES: *Effective Date:* July 22, 2016.

FOR FURTHER INFORMATION CONTACT:

Mark Bisgeier, General Counsel, via email at mark.bisgeier@restorethegulf.gov.

SUPPLEMENTARY INFORMATION:

I. Background

The RESTORE Act, Public Law 112–141 (July 6, 2012), codified at 33 U.S.C. 1321(t) and *note*, makes funds available for the restoration and protection of the Gulf Coast Region through a new trust fund in the Treasury of the United States, known as the Gulf Coast Restoration Trust Fund (Trust Fund). The Trust Fund will contain 80 percent of the administrative and civil penalties paid after July 6, 2012 under the Federal Water Pollution Control Act by responsible parties in connection with the *Deepwater Horizon* oil spill. These funds will be invested and made available through five components of the RESTORE Act. On December 14, 2015, the Department of Treasury (Treasury) issued final regulations (80 FR 77239) applicable to all five components that generally describe the responsibilities of the Federal and State entities that administer RESTORE Act programs and carry out restoration activities in the Gulf Coast Region.

Two of the five components, the Comprehensive Plan Component (sometimes referred to as the Council-Selected Restoration Component) and the Spill Impact Component, are administered by the Council, an independent federal entity created by the RESTORE Act. Under the Comprehensive Plan Component (33 U.S.C. 1321(t)(2)), the subject of this policy, 30 percent of the amount in the Trust Fund will be used to fund the operations of the Council and to carry out projects and programs adopted in the Council's Comprehensive Plan. An Initial Comprehensive Plan was adopted by the Council in August 2013 and is available at <https://www.restorethegulf.gov/sites/default/files/Final%20Initial%20Comprehensive%20Plan.pdf>.

Pursuant to the RESTORE Act at 33 U.S.C. 1321(t)(2)(D)(ii)(IV)(dd), on December 9, 2015, the Council finalized a Funded Priorities List (FPL) to be included as part of the Initial Comprehensive Plan, setting forth programs and projects to be funded and prioritized for further review. These programs and projects will help to restore and protect the natural resources, ecosystems, fisheries, marine and wildlife habitats, beaches and coastal wetlands of the Gulf Coast region. The FPL is available at https://www.restorethegulf.gov/sites/default/files/FPL_FINAL_Dec9Vote_EC_Library_Links.pdf.

www.restorethegulf.gov/sites/default/files/FPL_FINAL_Dec9Vote_EC_Library_Links.pdf.

Programs and projects selected for funding in the FPL will be funded either through grants to the State members of the Council (the Governors of the States of Alabama, Florida, Louisiana, Mississippi, and Texas) (State or States) or interagency agreements with the Federal members of the Council (the Secretaries of the Departments of Agriculture, the Army, Commerce, the Interior and the Department in which the Coast Guard is operating, and the Administrator of the Environmental Protection Agency). Those State and Federal members of the Council may in turn award grants or contracts to carry out the funded programs and projects.

II. Discussion of This Policy and Response to Public Comments

The RESTORE Act requires the Council to “develop standard terms to include in contracts for projects and programs awarded pursuant to the Comprehensive Plan that provide a preference to individuals and companies that reside in, are headquartered in, or are principally engaged in business in a Gulf Coast State.” 33 U.S.C. 1321(t)(2)(C)(vii)(V). On May 22, 2015, the Council published in the **Federal Register** notice of its preliminary interpretation of this local contracting preference and described its proposed implementation of that interpretation (80 FR 29708). Public comment was requested and three public comments were received, one each from a private individual, a non-profit organization and a consortium of Gulf Coast organizations and businesses. The latter two commenters made similar recommendations and are addressed together.

Preliminarily, due to differing legal requirements in the various jurisdictions, the Council will apply the local contracting requirement at the Federal level (see comment topic 2 below) while permitting each State to apply any local contracting preference in conformity with local requirements. The Council will therefore not impose on the States any special grant award conditions requiring a local contracting preference or related contractual certifications. Each of the States has enacted laws pertaining to local contracting preferences, most of which do not address preferences for another State's local firms; in some cases such laws prohibit preferences for another State's local firms. If the Council were to require the States to provide preferences for another State's local firms, those States with prohibitions

against such preferences would be unable to participate in the grant program. Having one or more of the States ineligible to receive grants under the Comprehensive Plan Component would be inconsistent with the intent and purposes of the RESTORE Act. Council policy for State contracting action using RESTORE Act funds is therefore to have each State act in conformance with its laws with respect to contracting preferences, with no further requirements. This policy is consistent with 2 CFR part 200.319(b), which permits grant recipients to apply state or local geographic preferences in the evaluation of bids or proposals only where a Federal statute, such as the RESTORE Act, expressly mandates or encourages geographical preference.

Comment topic 1: The private individual recommended that any local contracting preference not detract from existing Federal acquisition requirements, particularly those related to small business programs.

Response to comment topic 1: The Council will comply with all applicable Federal acquisition requirements.

Comment topic 2: The two comments from the non-profit organization and the consortium of organizations and businesses included arguments for a stronger local contracting preference, especially at the Federal level, and recommendations for various certifications and local workforce development plans, training and hiring process provisions.

Response to comment topic 2: At the Federal level, a local contracting preference is permitted only when a statute expressly authorizes or requires it. See 41 U.S.C. 3304(a)(5). The Council has determined that 33 U.S.C. 1321(t)(2)(C)(vii)(V) provides such an express authorization. To implement this at the Federal level, in May 2015 the Council proposed requiring federal agencies to either (1) provide a preference to Gulf Coast firms if proposals are determined equivalent under all other evaluation factors, or (2) include a weighted evaluation factor providing a preference to Gulf Coast firms (80 FR 29709). The non-profit organization recommended revising option (2) such that the agencies would be required to provide an explicit weight of 20% to the weighted evaluation factor. The Council has declined to do so. Assigning a specific weight to the local contractor preference factor unnecessarily limits the discretion of the contracting agency to tailor evaluation factors and their relative weights for each procurement. Further, contracting agencies are not required to assign specific percentage

weights to each evaluation factor and doing so can result in a more quantitative than qualitative analysis of subjective evaluation factors. Agencies may use a variety of rating schemes, and requiring them to assign a specific percentage weight to the local contracting preference factor would be overly prescriptive and have the effect of restricting their ability to determine what constitutes best value for procurements on a case-by-case basis.

Instead of assigning a specific weight or otherwise changing the two foregoing options, the Council has instead decided to provide Federal member contracting agencies with a third option of including in contracts a financial incentive that rewards contractors for specific local hiring thresholds. Because this third option provides an explicit financial incentive, the Council believes that it may actually make achieving a local hiring objective more likely than either of the other options. The Council thanks the commenters for encouraging the Council to devise a more robust and creative option to encourage local contracting.

The two comments also included suggestions to include various certifications and contractual clauses to require offerors to develop and submit local workforce development plans and train local workers, and various mechanisms to process job opportunities through state and local hiring agencies. The Council declines to add these additional requirements for two reasons: First, the Council believes that requiring local training is beyond the scope of the RESTORE Act provision for a local contracting preference; and second, the Council is concerned that adding such additional requirements may actually discourage or inhibit local contractors from offering to undertake the work. It is the Federal members' collective experience that additional requirements can be burdensome to the point that potential offerors are discouraged from even participating in the contract proposal process. This is especially true with small, possibly local firms. Potentially discouraging local firms from participating would be inconsistent with the purpose of the local contracting preference.

The Council believes that offering the choice of one of the three options discussed above would provide Federal agencies with sufficient discretion to make an award to an offeror whose proposal provides the best value to the Government. Furthermore, in order to prevent a Gulf Coast firm from serving as merely a pass-through for a firm outside the Gulf Coast region or other avoidance the objective of the

preference, to be considered a "local firm" an offeror must certify that it resides, is headquartered or is principally engaged in business in a State. The offeror must also agree that it will perform at least a minimum percentage of the work under the contract with either local employees or local manufacturing, as the case may be. The method for determining whether an offeror meets these tests is adapted from the Small Business Administration's regulation found at 13 CFR 125.6.

III. Provisions in Council Comprehensive Plan Interagency Agreements With Federal Members

The text below will therefore be included in all solicitations by federal Council members for Comprehensive Plan Component contracts, and will be incorporated into all awards for such contracts.

(a) *The offeror represents as part of its offer that it () is, () is not a firm residing, headquartered or principally engaged in business in a Gulf Coast state. For purposes hereof, a "Gulf Coast state" is any of the states of Alabama, Florida, Louisiana, Mississippi or Texas.*

(b) *If the offeror (1) is a firm residing, headquartered or principally engaged in business in a Gulf Coast state and (2) agrees to the following applicable provisions and submits supporting documentation with its offer, then for purposes hereof the offeror will be deemed a "Gulf Coast Firm":*

(i) *For a contract for services (except construction), the offeror will perform services representing at least fifty percent (50%) of the total labor costs under the contract with employees that are residents of a Gulf Coast state;*

(ii) *For a contract for supplies or products (other than procurement from a non-manufacturer of such supplies or products), the offeror will manufacture, within a Gulf Coast state, such supplies or products representing at least fifty percent (50%) of the total manufacturing costs under the contract (excluding costs of materials); or*

(iii) *For a contract for general construction services, the firm will perform services representing at least fifteen percent (15%) of the total labor costs under the contract with employees that are residents of a Gulf Coast state.*

(c) *For purposes hereof, a "resident of a Gulf Coast state" means a resident as defined by the applicable Gulf Coast state law.*

Additionally, one of the three options, generally in the form set forth below, will be included in all solicitations for Comprehensive Plan Component contracts by federal Council members. This term notifies prospective offerors

that the Federal member contracting agency will either prefer Gulf Coast Firms in awarding Comprehensive Plan Component contracts or will include an incentive for contractors that perform the contracts using a certain percentage of residents of a Gulf Coast state.

Option 1 provides a preference to Gulf Coast Firms if proposals are determined to be equivalent under all other evaluation factors.

Option 2 provides a weighted evaluation factor providing a preference to Gulf Coast Firm offers. The solicitation should identify the relative weight of the local contracting preference to the other stated evaluation criteria.

Option 3 provides a financial incentive to contractors that perform the contract using a certain percentage of residents of a Gulf Coast state.

[Option 1] *It is the policy of [contracting agency] to encourage the participation of Gulf Coast Firms in the procurement process. This solicitation includes a preference for Gulf Coast Firms. If [contracting agency] determines all other factors to be equivalent, [contracting agency] will give preference to a Gulf Coast Firm. [contracting agency] will review your Gulf Coast Firm status at the time the contract solicitation closes.*

[Option 2—to be assigned relative weight by the contracting agency] *It is the policy of [contracting agency] to encourage the participation of Gulf Coast Firms in the procurement process. This solicitation includes a preference for Gulf Coast Firms. The [contracting agency] will review your Gulf Coast Firm status at the time the contract solicitation closes.*

[Option 3—Prescription]

It is the policy of the [contracting agency] to encourage contractors to hire residents of Gulf Coast states in connection with contracts for RESTORE Act Funded Priorities List projects. Accordingly, [contracting agency] will include the following Local Hiring Incentive Award provision in any contract for which [contracting agency] authorizes such an award.

[Option 3—Contract Provision]

(1) *To qualify for the Local Hiring Incentive Award set forth in section (2) below, a contractor must, on or before [deadline date], submit to the cognizant contracting officer documentation verifying that during the contract's performance period (i.e., base period, option period), on average at least [percent] of the [contractor's employees and/or consultants and/or subcontractor employees] performing*

work on the contract were residents of a Gulf Coast state.

(2) If the cognizant contracting officer confirms in writing that the contractor has satisfied the requirements of section (1) above, then subject to any applicable appropriations laws the contractor will be entitled to receive an award ("Local Hiring Incentive Award") equal to [percent] of the contract amount earned during the contract's performance period.

Will D. Spoon,

Program Analyst, Gulf Coast Ecosystem Restoration Council.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[Document Identifier: CMS-317, CMS-319, CMS-10166, CMS-10178, and CMS-10184]

Agency Information Collection Activities: Submission for OMB Review; Comment Request

AGENCY: Centers for Medicare & Medicaid Services, HHS.

ACTION: Notice.

SUMMARY: The Centers for Medicare & Medicaid Services (CMS) is announcing an opportunity for the public to comment on CMS' intention to collect information from the public. Under the Paperwork Reduction Act of 1995 (PRA), federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, and to allow a second opportunity for public comment on the notice. Interested persons are invited to send comments regarding the burden estimate or any other aspect of this collection of information, including any of the following subjects: (1) The necessity and utility of the proposed information collection for the proper performance of the agency's functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

DATES: Comments on the collection(s) of information must be received by the OMB desk officer by August 22, 2016.

ADDRESSES: When commenting on the proposed information collections, please reference the document identifier or OMB control number. To be assured consideration, comments and recommendations must be received by the OMB desk officer via one of the following transmissions: OMB, Office of Information and Regulatory Affairs, Attention: CMS Desk Officer, Fax Number: (202) 395-5806 OR Email: OIRA_submission@omb.eop.gov.

To obtain copies of a supporting statement and any related forms for the proposed collection(s) summarized in this notice, you may make your request using one of following:

1. Access CMS' Web site address at <http://www.cms.hhs.gov/PaperworkReductionActof1995>.
2. Email your request, including your address, phone number, OMB number, and CMS document identifier, to Paperwork@cms.hhs.gov.
3. Call the Reports Clearance Office at (410) 786-1326.

FOR FURTHER INFORMATION CONTACT: Reports Clearance Office at (410) 786-1326.

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501-3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. The term "collection of information" is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires federal agencies to publish a 30-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, CMS is publishing this notice that summarizes the following proposed collection(s) of information for public comment:

1. *Type of Information Collection Request:* Extension of a currently approved collection; *Title of Information Collection:* State Medicaid Eligibility Quality Control Sample Plans; *Use:* The Medicaid Eligibility Quality Control (MEQC) system is based on monthly State reviews of Medicaid and Medicaid expansion under Title XXI cases by States performing the traditional sampling process identified through statistically reliable statewide samples of cases selected from the

eligibility files. These reviews are conducted to determine whether or not the sampled cases meet applicable State Title XIX or XXI eligibility requirements when applicable. The reviews are also used to assess beneficiary liability, if any, and to determine the amounts paid to provide Medicaid services for these cases. In the MEQC system, sampling is the only practical method of validating eligibility of the total caseload and determining the dollar value of eligibility liability errors. Any attempt to make such validations and determinations by reviewing every case would be an enormous and unwieldy undertaking. In 1993, CMS implemented MEQC pilots in which States could focus on special studies, targeted populations, geographic areas or other forms of oversight with CMS approval. States must submit a sampling plan, or pilot proposal to be approved by CMS before implementing their pilot program. The Children's Health Insurance Program Reauthorization Act (CHIPRA) was enacted February 4, 2009. Sections 203 and 601 of the CHIPRA relate to MEQC. Section 203 of the CHIPRA establishes an error rate measurement with respect to the enrollment of children under the express lane eligibility option. The law directs States not to include children enrolled using the express lane eligibility option in data or samples used for purposes of complying with the MEQC requirements. Section 601 of the CHIPRA, among other things, requires a new final rule for the Payment Error Rate Measurement (PERM) program and aims to harmonize the PERM and MEQC programs and provides States with the option to apply PERM data resulting from its eligibility reviews for meeting MEQC requirements and vice versa, with certain conditions. We review, either directly or through its contractors, of the sampling plans helps to ensure States are using valid statistical methods for sample selection. The collection of information is also necessary to implement provisions from the Children's Health Insurance Program Reauthorization Act of 2009 (CHIPRA) (Pub. L. 111-3) with regard to the Medicaid Eligibility Quality Control (MEQC) and Payment Error Rate Measurement (PERM) programs. *Form Number:* CMS-317 (OMB control number: 0938-0146); *Frequency:* Semi-Annually *Affected Public:* State, Local, or Tribal Governments; *Number of Respondents:* 10; *Total Annual Responses:* 20; *Total Annual Hours:* 480. (For policy questions regarding this collection contact Bridgett Rider at 410-786-2602.)

2. *Type of Information Collection Request:* Extension of a currently approved collection; *Title of Information Collection:* State Medicaid Eligibility Quality Control Sample Selection Lists; *Use:* The Medicaid Eligibility Quality Control (MEQC) system is based on monthly State reviews of Medicaid and Medicaid expansion under Title XXI cases by States performing the traditional sampling process identified through statistically reliable statewide samples of cases selected from the eligibility files. These reviews are conducted to determine whether or not the sampled cases meet applicable State Title XIX or XXI eligibility requirements when applicable. The reviews are also used to assess beneficiary liability, if any, and to determine the amounts paid to provide Medicaid services for these cases. In the MEQC system, sampling is the only practical method of validating eligibility of the total caseload and determining the dollar value of eligibility liability errors. Any attempt to make such validations and determinations by reviewing every case would be an enormous and unwieldy undertaking. At the beginning of each month, State agencies still performing the traditional sample are required to submit sample selection lists which identify all of the cases selected for review in the States' samples. The sample selection lists contain identifying information on Medicaid beneficiaries such as: State agency review number, beneficiary's name and address, the name of the county where the beneficiary resides, Medicaid case number, etc. The submittal of the sample selection lists is necessary for Regional Office validation of State reviews. Without these lists, the integrity of the sampling results would be suspect and the Regional Offices would have no data on the adequacy of the States' monthly sample draw or review completion status. The authority for collecting this information is Section 1903(u) of the Social Security Act. The specific requirement for submitting sample selection lists is described in regulations at 42 CFR 431.814(h). Regional Office staff review the sample selection lists to determine that States are sampling a sufficient number of cases for review. *Form Number:* CMS-319 (OMB control number: 0938-0147); *Frequency:* Monthly; *Affected Public:* State, Local, or Tribal Governments; *Number of Respondents:* 10; *Total Annual Responses:* 120; *Total Annual Hours:* 960. (For policy questions regarding this collection contact Bridgett Rider at 410-786-2602.)

3. *Type of Information Collection Request:* Extension of a currently approved collection; *Title of Information Collection:* Payment Error Rate Measurement in Medicaid & Children's Health Insurance Program (CHIP); *Use:* The Improper Payments Information Act (IPIA) of 2002 as amended by the Improper Payments Elimination and Recovery Improvement Act (IPERIA) of 2012 requires CMS to produce national error rates for Medicaid and Children's Health Insurance Program (CHIP). To comply with the IPIA, CMS will engage a Federal contractor to produce the error rates in Medicaid and CHIP. The error rates for Medicaid and CHIP are calculated based on the reviews on three components of both Medicaid and CHIP program. They are: Fee-for-service claims medical reviews and data processing reviews, managed care claims data-processing reviews, and eligibility reviews. Each of the review components collects different types of information, and the state-specific error rates for each of the review components will be used to calculate an overall state-specific error rate, and the individual state-specific error rates will be used to produce a national error rate for Medicaid and CHIP. The states will be requested to submit, at their option, test data which include full claims details to the contractor prior to the quarterly submissions to detect potential problems in the dataset to and ensure the quality of the data. These states will be required to submit quarterly claims data to the contractor who will pull a statistically valid random sample, each quarter, by strata, so that medical and data processing reviews can be performed. State-specific error rates will be based on these review results. We need to collect the fee-for-service claims data, medical policies, and other information from states as well as medical records from providers in order for the contractor to sample and review adjudicated claims in those states selected for medical reviews and data processing reviews. Based on the reviews, state-specific error rates will be calculated which will serve as part of the basis for calculating national Medicaid and CHIP error rates. *Form Number:* CMS-10166 (OMB control number: 0938-0974); *Frequency:* Annually, Quarterly; *Affected Public:* State, Local, or Tribal Governments; *Number of Respondents:* 34; *Total Annual Responses:* 34; *Total Annual Hours:* 56,100. (For policy questions regarding this collection contact Bridgett Rider at 410-786-2602.)

4. *Type of Information Collection Request:* Extension of a currently approved collection; *Title of Information Collection:* Medicaid and State Children's Health Insurance Plan (SCHIP) Managed Care; *Use:* The Payment Error Rate Measurement (PERM) program measures improper payments for Medicaid and the State Children's Health Insurance Program (SCHIP). The program was designed to comply with the Improper Payments Information Act (IPIA) of 2002 and the Office of Management and Budget (OMB) guidance. Although OMB guidance requires error rate measurement for SCHIP, 2009 SCHIP legislation temporarily suspended PERM measurement for this program and changed to Children's Health Insurance Program (CHIP) effective April 01, 2009. See Children's Health Insurance Program Reauthorization Act of 2009 (CHIPRA) Public Law 111-3 for more details. There are two phases of the PERM program, the measurement phase and the corrective action phase. The PERM measures improper payments in Medicaid and CHIP and produces State and national-level error rates for each program. The error rates are based on reviews of Medicaid and CHIP fee-for-service (FFS) and managed care payments made in the Federal fiscal year under review. States conduct eligibility reviews and report eligibility related payment error rates also used in the national error rate calculation. We created a 17 State rotation cycle so that each State will participate in PERM once every three years. Following is the list of States in which we will measure improper payments over the next three years in Medicaid. We need to collect capitation payment information from the selected States so that the federal contractor can draw a sample and review the managed care capitation payments. We will also collect State managed care contracts, rate schedules and updates to the contracts and rate schedules. This information will be used by the Federal contractor when conducting the managed care claims reviews. Sections 1902(a)(6) and 2107(b)(1) of the Social Security Act grants CMS authority to collect information from the States. The IPIA requires us to produce national error rates in Medicaid and CHIP fee-for-service, including the managed care component. The State-specific Medicaid managed care and CHIP managed care error rates will be based on reviews of managed care capitation payments in each program and will be used to produce national Medicaid managed care and CHIP managed care error rates.

Form Number: CMS–10178 (OMB control number: 0938–0994); *Frequency:* Occasionally; *Affected Public:* State, Local, or Tribal Governments; *Number of Respondents:* 34; *Total Annual Responses:* 28,050; *Total Annual Hours:* 28,050. (For policy questions regarding this collection contact Bridgett Rider at 410–786–2602.)

5. *Type of Information Collection Request:* Extension of a currently approved collection; *Title of Information Collection:* Payment Error Rate Measurement—State Medicaid and SCHIP Eligibility; *Use:* The Improper Payments Information Act (IPIA) of 2002 requires CMS to produce national error rates for Medicaid and the Children’s Health Insurance Program (CHIP). To comply with the IPIA, CMS will use a national contracting strategy to produce error rates for Medicaid and CHIP fee-for-service and managed care improper payments. The Federal contractor will review States on a rotational basis so that each State will be measured for improper payments, in each program, once and only once every three years. Subsequent to the first publication, we determined that we will measure Medicaid and CHIP in the same State. Therefore, States will measure Medicaid and CHIP eligibility in the same year measured for fee-for-service and managed care. We believe this approach will advantage States through economies of scale (e.g., administrative ease and shared staffing for both programs reviews). We also determined that interim case completion timeframes and reporting are critical to the integrity of the reviews and to keep the reviews on schedule to produce a timely error rate. Lastly, the sample sizes were increased slightly in order to produce an equal sample size per strata each month. Periodically, CMS will conduct Federal re-reviews of States’ PERM files to ensure the accuracy of States’ review findings and the validity of the review process. CMS will select a random subsample of Medicaid and CHIP cases from the sample selection lists provided by each State. States will submit all pertinent information related to the review of each sampled case that is selected by CMS. *Form Number:* CMS–10184 (OMB control number: 0938–1012); *Frequency:* Annually, Quarterly; *Affected Public:* State, Local, or Tribal Governments; *Number of Respondents:* 34; *Total Annual Responses:* 1,583; *Total Annual Hours:* 946,164. (For policy questions regarding this collection contact Bridgett Rider at 410–786–2602.)

Dated: July 18, 2016.

Martique Jones,

*Director, Regulations Development Group,
Office of Strategic Operations and Regulatory
Affairs.*

Centers for Medicare & Medicaid Services

[Document Identifiers: CMS–R–70, CMS–R–72, CMS–R–247, CMS–10151, CMS–10268, CMS–R–5, CMS–10615, and CMS–10062]

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Centers for Medicare & Medicaid Services, HHS.

ACTION: Notice.

SUMMARY: The Centers for Medicare & Medicaid Services (CMS) is announcing an opportunity for the public to comment on CMS’ intention to collect information from the public. Under the Paperwork Reduction Act of 1995 (the PRA), federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information (including each proposed extension or reinstatement of an existing collection of information) and to allow 60 days for public comment on the proposed action. Interested persons are invited to send comments regarding our burden estimates or any other aspect of this collection of information, including any of the following subjects: (1) The necessity and utility of the proposed information collection for the proper performance of the agency’s functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

DATES: Comments must be received by September 20, 2016.

ADDRESSES: When commenting, please reference the document identifier or OMB control number. To be assured consideration, comments and recommendations must be submitted in any one of the following ways:

1. *Electronically.* You may send your comments electronically to <http://www.regulations.gov>. Follow the instructions for “Comment or Submission” or “More Search Options” to find the information collection

document(s) that are accepting comments.

2. *By regular mail.* You may mail written comments to the following address: CMS, Office of Strategic Operations and Regulatory Affairs, Division of Regulations Development, Attention: Document Identifier/OMB Control Number _____, Room C4–26–05, 7500 Security Boulevard, Baltimore, Maryland 21244–1850.

To obtain copies of a supporting statement and any related forms for the proposed collection(s) summarized in this notice, you may make your request using one of following:

1. Access CMS’ Web site address at <http://www.cms.hhs.gov/PaperworkReductionActof1995>.

2. Email your request, including your address, phone number, OMB number, and CMS document identifier, to Paperwork@cms.hhs.gov.

3. Call the Reports Clearance Office at (410) 786–1326.

FOR FURTHER INFORMATION CONTACT: Reports Clearance Office at (410) 786–1326.

SUPPLEMENTARY INFORMATION:

Contents

This notice sets out a summary of the use and burden associated with the following information collections. More detailed information can be found in each collection’s supporting statement and associated materials (see **ADDRESSES**).

- CMS–R–70 Information Collection Requirements in HSQ–110, Acquisition, Protection and Disclosure of Peer review Organization Information and Supporting Regulations
- CMS–R–72 Information Collection Requirements in 42 CFR 478.18, 478.34, 478.36, 478.42, QIO Reconsiderations and Appeals
- CMS–R–247 Expanded Coverage for Diabetes Outpatient Self-Management Training Services and Supporting Regulations
- CMS–10151 Data Collection for Medicare Beneficiaries Receiving Implantable Cardioverter-Defibrillators for Primary Prevention of Sudden Cardiac Death
- CMS–10268 Consolidated Renal Operations in a Web Enabled Network (CROWNWeb) Third-party Submission Authorization Form
- CMS–R–5 Physician Certification/Recertification in Skilled Nursing Facilities (SNFs) Manual Instructions
- CMS–10615 Healthy Indiana Program (HIP) 2.0 Beneficiaries Survey, Focus Groups, and Informational Interviews
- CMS–10062 Collection of Diagnostic Data from Medicare Advantage Organizations for Risk Adjusted Payments

Under the PRA (44 U.S.C. 3501–3520), federal agencies must obtain

approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. The term “collection of information” is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA requires federal agencies to publish a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, CMS is publishing this notice.

Information Collection

1. Type of Information Collection

Request: Extension of a currently approved collection; *Title of Information Collection:* Information Collection Requirements in HSQ-110, Acquisition, Protection and Disclosure of Peer review Organization Information and Supporting Regulations; *Use:* The Peer Review Improvement Act of 1982 authorizes quality improvement organizations (QIOs), formally known as peer review organizations (PROs), to acquire information necessary to fulfill their duties and functions and places limits on disclosure of the information. The QIOs are required to provide notices to the affected parties when disclosing information about them. These requirements serve to protect the rights of the affected parties. The information provided in these notices is used by the patients, practitioners and providers to: Obtain access to the data maintained and collected on them by the QIOs; add additional data or make changes to existing QIO data; and reflect in the QIO's record the reasons for the QIO's disagreeing with an individual's or provider's request for amendment. *Form Number:* CMS-R-70 (OMB control number: 0938-0426); *Frequency:* Reporting—On occasion; *Affected Public:* Business or other for-profits; *Number of Respondents:* 400; *Total Annual Responses:* 21,200; *Total Annual Hours:* 42,400. (For policy questions regarding this collection contact Winsome Higgins at 410-786-1835.)

2. Type of Information Collection

Request: Extension of a currently approved collection; *Title of Information Collection:* Information Collection Requirements in 42 CFR 478.18, 478.34, 478.36, 478.42, QIO Reconsiderations and Appeals; *Use:* In the event that a beneficiary, provider,

physician, or other practitioner does not agree with the initial determination of a Quality Improvement Organization (QIO) or a QIO subcontractor, it is within that party's rights to request reconsideration. The information collection requirements 42 CFR 478.18, 478.34, 478.36, and 478.42, contain procedures for QIOs to use in reconsideration of initial determinations. The information requirements contained in these regulations are on QIOs to provide information to parties requesting the reconsideration. These parties will use the information as guidelines for appeal rights in instances where issues are actively being disputed. *Form Number:* CMS-R-72 (OMB control number: 0938-0443); *Frequency:* Reporting—On occasion; *Affected Public:* Individuals or Households and Business or other for-profit institutions; *Number of Respondents:* 2,590; *Total Annual Responses:* 5,228; *Total Annual Hours:* 2,822. (For policy questions regarding this collection contact Winsome Higgins at 410-786-1835.)

3. Type of Information Collection

Request: Extension of a currently approved collection; *Title of Information Collection:* Expanded Coverage for Diabetes Outpatient Self-Management Training Services and Supporting Regulations; *Use:* According to the National Health and Nutrition Examination Survey (NHANES), as many as 18.7 percent of Americans over age 65 are at risk for developing diabetes. The goals in the management of diabetes are to achieve normal metabolic control and reduce the risk of micro- and macro-vascular complications. Numerous epidemiologic and interventional studies point to the necessity of maintaining good glycemic control to reduce the risk of the complications of diabetes. Despite this knowledge, diabetes remains the leading cause of blindness, lower extremity amputations and kidney disease requiring dialysis. Diabetes and its complications are primary or secondary factors in an estimated 9 percent of hospitalizations (Aubert, RE, et al., Diabetes-related hospitalizations and hospital utilization. In: Diabetes in America. 2nd ed. National Institutes of Health, National Institute of Diabetes and Digestive and Kidney Disease, NIH, Pub. No 95-1468-1995: 553-570). Overall, beneficiaries with diabetes are hospitalized 1.5 times more often than beneficiaries without diabetes. HCFA-3002-F provided for uniform coverage of diabetes outpatient self-management training services. These services include educational and training services

furnished to a beneficiary with diabetes by an entity approved to furnish the services. The physician or qualified non-physician practitioner treating the beneficiary's diabetes would certify that these services are needed as part of a comprehensive plan of care. This rule established the quality standards that an entity would be required to meet in order to participate in furnishing diabetes outpatient self-management training services. It set forth payment amounts that have been established in consultation with appropriate diabetes organizations. It implements section 4105 of the Balanced Budget Act of 1997. *Form Number:* CMS-R-247 (OMB control number: 0938-0818); *Frequency:* Recordkeeping and Reporting—Occasionally; *Affected Public:* Business or other for-profit institutions; *Number of Respondents:* 5327; *Total Annual Responses:* 63,924; *Total Annual Hours:* 197,542. (For policy questions regarding this collection contact Kristin Shifflett at 410-786-4133.)

4. Type of Information Collection

Request: Extension of a currently approved collection; *Title of Information Collection:* Data Collection for Medicare Beneficiaries Receiving Implantable Cardioverter-Defibrillators for Primary Prevention of Sudden Cardiac Death; *Use:* We provide coverage for implantable cardioverter-defibrillators (ICDs) for secondary prevention of sudden cardiac death based on extensive evidence showing that use of ICDs among patients with a certain set of physiologic conditions are effective. Accordingly, we consider coverage for ICDs reasonable and necessary under Section 1862(a)(1)(A) of the Social Security Act. However, evidence for use of ICDs for primary prevention of sudden cardiac death is less compelling for certain patients.

To encourage responsible and appropriate use of ICDs, we issued a “Decision Memo for Implantable Defibrillators” on January 27, 2005, indicating that ICDs will be covered for primary prevention of sudden cardiac death if the beneficiary is enrolled in either an FDA-approved category B IDE clinical trial (42 CFR 405.201), a trial under the CMS Clinical Trial Policy (NCD Manual § 310.1) or a qualifying prospective data collection system (either a practical clinical trial or prospective systematic data collection, which is sometimes referred to as a registry). *Form Number:* CMS-10151 (OMB control number: 0938-0967); *Frequency:* Occasionally; *Affected Public:* Business or other for-profits, Not-for-profit institutions; *Number of Respondents:* 1,702; *Total Annual Responses:* 82; *Total Annual Hours:*

139,356. (For policy questions regarding this collection contact JoAnna Baldwin at 410-786-7205.)

5. Type of Information Collection

Request: Extension of a currently approved collection; **Title of Information Collection:** Consolidated Renal Operations in a Web Enabled Network (CROWNWeb) Third-party Submission Authorization Form; **Use:** The Consolidated Renal Operations in a Web Enabled Network (CROWNWeb) Third-Party Submission Authorization form (CWTPSA) is to be completed by "Facility Administrators"

(administrators of CMS-certified dialysis facilities) if they intend to authorize a third party (a business with which the facility is associated, or an independent vendor) to submit data to us to comply with the recently-revised Conditions for Coverage of dialysis facilities. The CROWNWeb system is the system used as the collection point of data necessary for entitlement of ESRD patients to Medicare benefits and for federal government monitoring and assessing of the quality and types of care provided to renal patients. The information collected through the CWTPSA form will allow us along with our contractors to receive data from authorized parties acting on behalf of CMS-certified dialysis facilities. Since February 2009, we have received 4,160 CWTPSA forms and anticipates that they will continue to receive no more than 400 new CWTPSA forms annually to address the creation of new facilities under the current participating "third party submitters." **Form Number:** CMS-10268 (OMB control number: 0938-1052); **Frequency:** Occasionally; **Affected Public:** Business or other for-profits and Not-for-profit institutions; **Number of Respondents:** 400; **Total Annual Responses:** 400; **Total Annual Hours:** 34. (For policy questions regarding this collection contact Victoria Schlining at 410-786-6878.)

6. Type of Information Collection

Request: Extension of a currently approved collection; **Title of Information Collection:** Physician Certification/Recertification in Skilled Nursing Facilities (SNFs) Manual Instructions; **Use:** Section 1814(a) of the Social Security Act (the Act) requires specific certifications in order for Medicare payments to be made for certain services. Before the enactment of the Omnibus Budget Reconciliation Act of 1989 (OBRA1989, Pub. L. 101-239), section 1814(a)(2) of the Act required that, in the case of post hospital extended care services, a physician certify that the services are or were required to be given because the individual needs or needed, on a daily

basis, skilled nursing care (provided directly by or requiring the supervision of skilled nursing personnel) or other skilled rehabilitation services that, as a practical matter, can only be provided in a SNF on an inpatient basis. The physician certification requirements were included in the law to ensure that patients require a level of care that is covered by the Medicare program and because the physician is a key figure in determining the utilization of health services. **Form Number:** CMS-R-5 (OMB control number: 0938-0454); **Frequency:** Occasionally; **Affected Public:** Business or other for-profits and Not-for-profit institutions; **Number of Respondents:** 2,711,136; **Total Annual Responses:** 2,711,136; **Total Annual Hours:** 624,515. (For policy questions regarding this collection contact Kia Sidbury at 410-786-7816.)

7. Type of Information Collection

Request: Extension of a currently approved collection; **Title of Information Collection:** Healthy Indiana Program (HIP) 2.0 Beneficiaries Survey, Focus Groups, and Informational Interviews; **Use:** The collected information will be used to make decisions about the renewal of precedent-setting waivers of Medicaid policy that assure important beneficiary protections regarding coverage and access to care; e.g., the State of Indiana's non-emergency medical transportation waiver which will end or will be extended by no later than December 1, 2016. To support CMS decision making, the collection's survey effort would provide more detailed information on the Healthy Indiana Program (HIP) 2.0 demonstration's beneficiary understanding and experiences (current and new enrollees as well as disenrollees/lockouts). Additional information on other key policies under the demonstration, such as the 60-day beneficiary lock-out period, is also included in this information collection request.

This request does not propose any new or revised information collection requirements or burden estimates outside of what is currently approved by OMB. Rather, it seeks to extend the collection's current expiration date of September 30, 2016 (approved under the emergency PRA process on March 21, 2016; see 81 FR 17460 dated March 29, 2016, and 81 FR 26798 dated May 4, 2016). Since the collection has already been subject to the public comment process for collection activities taking place through September 30, 2016, this "Extension of a currently approved collection" will only consider comments for activities taking place from October 1, 2016,

through the end of the revised expiration date. The revised expiration date will be made available upon OMB approval at reginfo.gov. **Form Number:** CMS-10615 (OMB control number: 0938-1300); **Frequency:** Once; **Affected Public:** Individuals and households, Private sector (Business or other for-profits and Not-for-profits institutions), and State, Local, or Tribal Governments; **Number of Respondents:** 5,240; **Total Annual Responses:** 5,240; **Total Annual Hours:** 1,442. (For policy questions regarding this collection contact Teresa DeCaro at 202-384-6309.)

8. Type of Information Collection

Request: Extension of a currently approved collection; **Title of Information Collection:** Collection of Diagnostic Data from Medicare Advantage Organizations for Risk Adjusted Payments; **Use:** CMS requires hospital inpatient, hospital outpatient and physician diagnostic data from Medicare Advantage (MA) organizations to continue making payment under the risk adjustment methodology. CMS will use the data to make risk adjusted payment under Parts C and D. MA and MA-PD plans will use the data to develop their Part C and D bids. As required by law, CMS also annually publishes the risk adjustment factors for plans and other interested entities in the Advance Notice of Methodological Changes for MA Payment Rates (every February) and the Announcement of Medicare Advantage Payment Rates (every April). Lastly, CMS issues monthly reports to each individual plan that contains the CMS Hierarchical Condition Category (HCC) and RxHCC models' output and the risk scores and reimbursements for each beneficiary that is enrolled in their plan. **Form Number:** CMS-10062 (OMB control number: 0938-0878); **Frequency:** Quarterly; **Affected Public:** Private sector (Business or other for profit and Not-for-profit institutions); **Number of Respondents:** 691; **Total Annual Responses:** 83,000,000; **Total Annual Hours:** 40,650. (For policy questions regarding this collection contact Michael P. Massimini at 410-786-1566.)

Dated: July 19, 2016.

William N. Parham, III,

Director, Paperwork Reduction Staff, Office of Strategic Operations and Regulatory Affairs.

BILLING CODE 4120-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

Submission for OMB Review; Comment Request

Title: Child Care and Development Fund Financial Report (ACF-696) for States and Territories.

OMB No.: 0970-0163.

Description: States and Territories use the Financial Report Form ACF-696 to

report Child Care and Development Fund (CCDF) expenditures. Authority to collect and report this information is found in section 658G of the Child Care and Development Block Grant Act of 1990, as revised. In addition to the Program Reporting Requirements set forth in 45 CFR part 98, subpart H, the regulations at 45 CFR 98.65(g) and 98.67(c)(1) authorize the Secretary to require financial reports as necessary.

The form provides specific data regarding claims and provides a mechanism for States to request Child Care grant awards and to certify the

availability of State matching funds. Failure to collect this data would seriously compromise ACF's ability to monitor Child Care and Development Fund expenditures. This information is also used to estimate outlays and may be used to prepare ACF budget submissions to Congress.

The previous information collection requirements related to the American Recovery and Reinvestment Act (ARRA) of 2009, (Pub. L. 111-5) have been deleted from this reporting form.

Respondents: States and Territories

ANNUAL BURDEN ESTIMATES

Instrument	Number of respondents	Number of responses per respondent	Average burden hours per response	Total burden hours
ACF-696	56	4	5	1120

Estimated Total Annual Burden Hours: 1120.

Additional Information: Copies of the proposed collection may be obtained by writing to the Administration for Children and Families, Office of Planning, Research and Evaluation, 330 C Street SW., Washington, DC 20201. Attention Reports Clearance Officer. All requests should be identified by the title of the information collection. Email address: infocollection@acf.hhs.gov.

OMB Comment: OMB is required to make a decision concerning the collection of information between 30 and 60 days after publication of this document in the **Federal Register**. Therefore, a comment is best assured of having its full effect if OMB receives it within 30 days of publication. Written comments and recommendations for the proposed information collection should be sent directly to the following: Office of Management and Budget, Paperwork Reduction Project, Email: OIRA_SUBMISSION@OMB.EOP.GOV, Attn: Desk Officer for the Administration for Children and Families.

Robert Sargis,

Reports Clearance Officer.

BILLING CODE 4184-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Meeting of the Advisory Group on Prevention, Health Promotion, and Integrative and Public Health

AGENCY: Department of Health and Human Services, Office of the Secretary, Office of the Assistant Secretary for

Health, Office of the Surgeon General of the United States Public Health Service.

ACTION: Notice.

SUMMARY: In accordance with Section 10(a) of the Federal Advisory Committee Act, Public Law 92-463, as amended (5 U.S.C. App.), notice is hereby given that a meeting is scheduled for the Advisory Group on Prevention, Health Promotion, and Integrative and Public Health (the "Advisory Group"). This meeting will be open to the public. Information about the Advisory Group and the agenda for this meeting can be obtained by accessing the following Web site: <http://www.surgeongeneral.gov/priorities/prevention/advisorygrp/advisory-group-meetings.html>.

DATES: The meeting will be held on September 26, 2016, from 8:45 a.m. to 5 p.m. EST.

ADDRESSES: This meeting will be held at the CDC Washington Office, Room 9000, 395 E Street SW., Washington DC 20201. Space to accommodate public in-person attendance is very limited. Therefore, arrangements are being made for the public to have access to the meeting by teleconference. Teleconference information will be published closer to the meeting date at: <http://www.surgeongeneral.gov/priorities/prevention/advisorygrp/advisory-group-meetings.html>. Individuals planning to attend the meeting by teleconference must register. The registration procedure is included in this notice under **SUPPLEMENTARY INFORMATION**.

FOR FURTHER INFORMATION CONTACT: Office of the Surgeon General, U.S. Department of Health and Human

Services, 200 Independence Ave. SW., Washington, DC 20201; 202-205-9517; npcsupport@cdc.gov.

SUPPLEMENTARY INFORMATION: The Advisory Group is a non-discretionary federal advisory committee that was initially established under Executive Order 13544, dated June 10, 2010, to comply with the statutes under Section 4001 of the Patient Protection and Affordable Care Act, Public Law 111-148. The Advisory Group was terminated on September 30, 2012, by Executive Order 13591, dated November 23, 2011. Authority for the Advisory Group to be re-established was given under Executive Order 13631, dated December 7, 2012. Authority for the Advisory Group to continue to operate until September 30, 2017, was given under Executive Order 13708, dated September 30, 2015.

The Advisory Group was established to assist in carrying out the mission of the National Prevention, Health Promotion, and Public Health Council (the Council). The Advisory Group provides recommendations and advice to the Council.

It is authorized for the Advisory Group to consist of no more than 25 non-federal members. The Advisory Group currently has 21 members who were appointed by the President. The membership includes a diverse group of licensed health professionals, including integrative health practitioners who have expertise in (1) worksite health promotion; (2) community services, including community health centers; (3) preventive medicine; (4) health coaching; (5) public health education; (6) geriatrics; and (7) rehabilitation medicine.

A meeting description and relevant materials will be published closer to the meeting date at: <http://www.surgeongeneral.gov/priorities/prevention/advisorygrp/advisory-group-meetings.html>. Members of the public have the opportunity to participate in the meeting and/or provide comments via teleconference to the Advisory Group on September 26, 2016. Public comment will be limited to 3 minutes per speaker. Individuals who wish to participate in the meeting and/or provide comments via teleconference must register by 12:00 p.m. EST on September 19, 2016. In order to register, individuals must send their full name and affiliation via email to npcsupport@cdc.gov. Individuals who need special assistance and/or accommodations, *i.e.*, sign language interpretation or other reasonable accommodations, should indicate so when they register. Members of the public who wish to have materials distributed to the Advisory Group members at these scheduled meetings should submit those materials when they register.

Dated: July 5, 2016.

Brigitte Ulin, MPH,

Designated Federal Officer, Advisory Group on Prevention, Health Promotion, and Integrative and Public Health, Office of the Surgeon General.

BILLING CODE 4140-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental Health Services Administration

Center for Substance Abuse Treatment; Notice of Meeting

Pursuant to Public Law 92-463, notice is hereby given that the Substance Abuse and Mental Health Services Administration's (SAMHSA) Center for Substance Abuse Treatment (CSAT) National Advisory Council (NAC) will meet on August 24, 2016, 9:00 a.m.-5:00 p.m. (EDT) and will include a session that is closed to the public.

The open session of the meeting will be held from 9:00 a.m.-4:00 p.m. and will include consideration of minutes from the SAMHSA CSAT NAC meeting of February 24, 2016, the Director's report, discussions of SAMHSA's role regarding treatment of mental illness, substance use disorders, and a budget update.

The closed meeting will include the review of grant applications, which contain budget information, including the description of how an agency prices its services, information on proposed business relationships and subcontracts. Grant applications also contain personal information and contact information on agency principles. Since the closed meeting will include discussion and evaluation of grant applications reviewed by Initial Review Groups and involve an examination of confidential financial and business information as well as personal information concerning the applicants, it will be closed to the public from 4:05 p.m. to 5:00 p.m. as determined by the Principal Deputy SAMHSA Administrator, in accordance

with Title 5 U.S.C. 552b(c)(4) and (6) and Title 5 U.S.C. App. 2, Section 10(d).

The meeting will be held at the SAMHSA 5600 Fishers Lane, Conference Room 5 E29, Rockville, MD 20857. Attendance by the public will be limited to space available and will be limited to the open sessions of the meeting. Interested persons may present data, information, or views, orally or in writing, on issues pending before the Council. Written submissions should be forwarded to the contact person on or before August 15, 2016. Oral presentations from the public will be scheduled at the conclusion of the meeting. Individuals interested in making oral presentations are encouraged to notify the contact person on or before August 15, 2016. Five minutes will be allotted for each presentation.

The open meeting session may be accessed via telephone. To attend on site, obtain the call-in number and access code, submit written or brief oral comments, or request special accommodations for persons with disabilities, please register on-line at <http://nac.samhsa.gov/Registration/meetingsRegistration.aspx>, or communicate with the CSAT national Advisory Council Designated Federal Officer; Tracy Goss (see contact information below).

Meeting information and a roster of Council members may be obtained by accessing the SAMHSA Committee Web site at <http://www.samhsa.gov/about-us/advisory-councils/csat-national-advisory-council> or by contacting the CSAT National Advisory Council Designated Federal Officer; Tracy Goss (see contact information below).

Council Name: SAMHSA's Center for Substance Abuse Treatment, National Advisory Council.

Date/Time/Type: August 24, 2016, 9:00 a.m.–4:00 p.m. EDT, OPEN; August 24, 2016, 4:05 p.m.–5:00 p.m. EDT, CLOSED.

Place: SAMHSA, 5600 Fishers Lane, Rockville, Maryland 20857.

Contact: Tracy Goss, Designated Federal Officer, CSAT National Advisory Council, 5600 Fishers Lane, Rockville, Maryland 20857 (mail), Telephone: (240) 276-0759, Fax: (240) 276-2252, *Email:* tracy.goss@samhsa.hhs.gov.

Summer King,

Statistician, SAMHSA.

BILLING CODE 4162-20-P

DEPARTMENT OF HOMELAND SECURITY

U.S. Customs and Border Protection

Extension of the Air Cargo Advance Screening (ACAS) Pilot Program

AGENCY: U.S. Customs and Border Protection, DHS.

ACTION: General notice.

SUMMARY: On October 24, 2012, U.S. Customs and Border Protection (CBP) published a notice in the **Federal Register** that announced the formalization and expansion of the Air Cargo Advance Screening (ACAS) pilot program that would run for six months. CBP subsequently published several notices extending the pilot period and/or reopening the application period to new participants for limited periods. The most recent notice extended the pilot period through July 26, 2016. This document announces that CBP is extending the pilot period for an additional year. The ACAS pilot is a voluntary test in which participants submit a subset of required advance air cargo data to CBP at the earliest point practicable prior to loading of the cargo onto the aircraft destined to or transiting through the United States.

DATES: CBP is extending the ACAS pilot program through July 26, 2017. Comments concerning any aspect of the announced test may be submitted at any time during the test period.

ADDRESSES: Written comments concerning program, policy, and technical issues may be submitted via email to CBPCCS@cbp.dhs.gov. In the subject line of the email, please use "Comment on ACAS pilot".

FOR FURTHER INFORMATION CONTACT: Craig Clark, Cargo and Conveyance Security, Office of Field Operations, U.S. Customs & Border Protection, via email at craig.clark@cbp.dhs.gov.

SUPPLEMENTARY INFORMATION:

Background

On October 24, 2012, CBP published a general notice in the **Federal Register** (77 FR 65006, corrected in 77 FR 65395)¹ announcing that CBP is formalizing and expanding the ACAS pilot to include other eligible participants in the air cargo environment. The notice provides a description of the ACAS pilot, sets forth eligibility requirements for participation, and invites public

comments on any aspect of the test. In brief, the ACAS pilot revises the time frame for pilot participants to transmit a subset of mandatory advance electronic information for air cargo. CBP regulations implementing the Trade Act of 2002 specify the required data elements and the time frame for submitting them to CBP. Pursuant to title 19, Code of Federal Regulations (19 CFR) 122.48a, the required advance information for air cargo must be submitted no later than the time of departure of the aircraft for the United States (from specified locations) or four hours prior to arrival in the United States for all other locations.

The ACAS pilot is a voluntary test in which participants agree to submit a subset of the required 19 CFR 122.48a data elements (ACAS data) at the earliest point practicable prior to loading of the cargo onto the aircraft destined to or transiting through the United States. The ACAS data is used to target high-risk air cargo. CBP is considering possible amendments to the regulations regarding advance information for air cargo. The results of the ACAS pilot will help determine the relevant data elements, the time frame within which data must be submitted to permit CBP to effectively target, identify and mitigate any risk with the least practicable impact on trade operations, and any other related procedures and policies.

Extension of the ACAS Pilot Period

The October 2012 notice announced that the ACAS pilot would run for six months. The notice provided that if CBP determined that the pilot period should be extended, CBP would publish another notice in the **Federal Register**. The October 2012 notice also stated that applications for new ACAS pilot participants would be accepted until November 23, 2012. CBP subsequently published several notices extending the pilot period and/or reopening the application period to new participants for limited periods. On December 26, 2012, CBP published a notice in the **Federal Register** (77 FR 76064) reopening the application period for new participants until January 8, 2013. On January 3, 2013, the **Federal Register** published a correction (78 FR 315) stating that the correct date of the close of the reopened application period was January 10, 2013. On April 23, 2013, CBP published a notice in the **Federal Register** (78 FR 23946) extending the ACAS pilot period through October 26, 2013, and reopening the application period through May 23, 2013. On October 23, 2013, CBP published a notice in the **Federal Register** (78 FR

¹ This **Federal Register** notice, published on October 26, 2012, corrected the email address under the **ADDRESSES** heading for submitting applications or comments. The correct email address is CBPCCS@cbp.dhs.gov.

63237) extending the ACAS pilot period through July 26, 2014, and reopening the application period through December 23, 2013. On July 28, 2014, CBP published a notice in the **Federal Register** (79 FR 43766) extending the ACAS pilot period through July 26, 2015, and reopening the application period through September 26, 2014. Finally, on July 27, 2015, CBP published a notice in the **Federal Register** (80 FR 44360) extending the ACAS pilot period through July 26, 2016, and reopening the application period through October 26, 2015.

Each extension of the pilot period and reopening of the application period has allowed for a significant increase in the diversity and number of pilot participants. The current pilot participants now represent a strong sample size of the air cargo community and new pilot participants will not be accepted.

CBP intends to issue a notice of proposed rulemaking to incorporate ACAS as an ongoing regulatory program taking into account the results of the pilot and has begun work on that process. CBP would like the pilot to continue during the rulemaking process. This will provide continuity in the flow of advance air cargo security information and serve as a stop-gap measure to address the vulnerability of the air cargo supply chain identified by the October 2010 Yemen cargo plot. CBP would also like to provide pilot participants with the additional opportunity to adjust and test business procedures and operations in preparation for the forthcoming rulemaking.

For these reasons, CBP is extending the ACAS pilot period through July 26, 2017.

Dated: July 19, 2016.

Todd C. Owen,

Executive Assistant Commissioner, Office of Field Operations.

BILLING CODE 9111-14-P

DEPARTMENT OF HOMELAND SECURITY

[Docket ID DHS-2016-0040]

The President's National Security Telecommunications Advisory Committee

AGENCY: Department of Homeland Security.

ACTION: Committee management; Notice of Federal Advisory Committee meeting.

SUMMARY: The President's National Security Telecommunications Advisory

Committee (NSTAC) will meet via teleconference on Wednesday, August 10, 2016. The meeting will be open to the public.

DATES: The NSTAC will meet on Wednesday, August 10, 2016, from 2:00 p.m. to 2:40 p.m. Eastern Daylight Time (EDT). Please note that the meeting may close early if the committee has completed its business.

ADDRESSES: The meeting will be held via conference call. For access to the conference call bridge, information on services for individuals with disabilities, or to request special assistance to attend, please email NSTAC@hq.dhs.gov by 5:00 p.m. EDT on August 9, 2016.

Members of the public are invited to provide comment on the issues that will be considered by the committee as listed in the **SUPPLEMENTARY INFORMATION** section below. Associated briefing materials that participants may discuss during the meeting will be available at www.dhs.gov/nstac for review as of August 1, 2016. Comments may be submitted at any time and must be identified by docket number DHS-2016-0040. Comments may be submitted by one of the following methods:

- **Federal eRulemaking Portal:** <http://www.regulations.gov>. Follow the instructions for submitting written comments.

- **Email:** NSTAC@hq.dhs.gov. Include the docket number DHS-2016-0040 in the subject line of the email message.

- **Fax:** 703-235-5961, Attn: Helen Jackson.

- **Mail:** Designated Federal Officer, Stakeholder Engagement and Critical Infrastructure Resilience Division, National Protection and Programs Directorate, Department of Homeland Security, 245 Murray Lane, Mail Stop 0604, Arlington, VA 20598-0604.

Instructions: All submissions received must include the words "Department of Homeland Security" and the docket number for this action. Comments received will be posted without alteration at www.regulations.gov, including any personal information that has been provided.

Docket: For access to the docket and comments received by the NSTAC, please go to www.regulations.gov and enter docket number DHS-2016-0040.

A public comment period will be held during the conference call on August 10, 2016, from 2:30 p.m. to 2:40 p.m. EDT. Speakers who wish to participate in the public comment period must register in advance by no later than August 9, 2016, at 5:00 p.m. EDT by emailing NSTAC at NSTAC@hq.dhs.gov.

Speakers are requested to limit their comments to three minutes and will speak in order of registration. Please note that the public comment period may end before the time indicated, following the last request for comments.

FOR FURTHER INFORMATION CONTACT: Ms. Helen Jackson, NSTAC Designated Federal Officer, Department of Homeland Security, 703-235-5321.

SUPPLEMENTARY INFORMATION: Notice of this meeting is given under the *Federal Advisory Committee Act*, 5 U.S.C. appendix. The NSTAC advises the President on matters related to national security and emergency preparedness (NS/EP) telecommunications policy.

Agenda: The NSTAC will hold a conference call on August 10, 2016, to discuss issues and challenges related to NS/EP communications, which will include discussions with high-level Government stakeholders and a review of on-going NSTAC work, including an update on the Emerging Technologies Strategic Vision Subcommittee.

Dated: July 13, 2016.

Helen Jackson,

Designated Federal Officer for the NSTAC.

BILLING CODE 9110-9P-P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR-5915-N-06]

60-Day Notice of Proposed Information Collection: Notice of Proposed Information Collection for Public Comment: Evaluation of the Office of Public and Indian Housing's (PIH) Energy Performance Contracting (EPC) Program

AGENCY: Office of Policy Development and Research, HUD.

ACTION: Notice.

SUMMARY: HUD is seeking approval from the Office of Management and Budget (OMB) for the information collection described below. In accordance with the Paperwork Reduction Act, HUD is requesting comment from all interested parties on the proposed collection of information. The purpose of this notice is to allow for 60 days of public comment.

DATES: *Comments Due Date:* September 20, 2016.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and/or OMB Control Number and should be sent to: Colette Pollard, Reports Management

Officer, QDAM, Department of Housing and Urban Development, 451 7th Street SW., Room 4176, Washington, DC 20410–5000; telephone 202–402–3400 (this is not a toll-free number) or email at Colette.Pollard@hud.gov for a copy of the proposed forms or other available information. Persons with hearing or speech impairments may access this number through TTY by calling the toll-free Federal Relay Service at (800) 877–8339.

FOR FURTHER INFORMATION CONTACT: Colette Pollard, Reports Management Officer, QDAM, Department of Housing and Urban Development, 451 7th Street SW., Washington, DC 20410; email Colette.Pollard@hud.gov or telephone 202–402–3400. This is not a toll-free number. Persons with hearing or speech impairments may access this number through TTY by calling the toll-free Federal Relay Service at (800) 877–8339.

Copies of available documents submitted to OMB may be obtained from Ms. Pollard.

SUPPLEMENTARY INFORMATION: This notice informs the public that HUD is

seeking approval from OMB for the information collection described in Section A.

A. Overview of Information Collection

Title of Information Collection: Evaluation of the Office of Public and Indian Housing’s (PIH) Energy Performance Contracting (EPC) Program.

OMB Approval Number: None.

Type of Request: This is a new request.

Form Number: None.

Description of the need for the information and proposed use: The information is being collected to explore and document the effectiveness and value of HUD’s Energy Performance Contracting (EPC) program. EPCs are an innovative financing technique designed to provide Public Housing Authorities (PHAs) with cost-effective energy improvements that are installed with little or no up-front expenditures, wherein the costs of the improvements are typically borne by the performance contractor and repaid using a portion of the cost savings resulting from the improvements. HUD has approved approximately 315 EPCs, totally nearly

\$1.5 billion in investments, since this type of financing began in the 1980s. EPCs have been executed in all ten HUD Regions and in very small (less than 250 units) to very large (more than 6,599 units) PHAs; however to date, no substantive review of the program’s performance has been conducted. The proposed data collection instrument is a web-based survey that will be supported by follow-up telephone interviews to a subset of the study’s participants.

Respondents (i.e. affected public): Employees of housing organizations receiving funding from HUD, specifically public housing authorities.

Estimated Number of Respondents: 492 (consisting of PHAs that have: (1) Executed an EPC, (2) begun the EPC application process but didn’t execute the EPC, and (3) never been associated with an EPC),

Estimated Number of Responses: 394 (based on an 80% response rate, web survey or telephone interviews).

Frequency of Response: 1.

Average Hours per Response: 0.79 (weighted average).

Total Estimated Burdens: 312.

Information collection	Number of respondents	Frequency of response	Responses per annum	Burden hour per response	Annual burden hours	Hourly cost per response	Annual cost
Web Survey	328	1	1	0.75	246	\$44.15	\$10,861
Telephone Interview	66	1	1	1	66	44.15	2,914
Total	394	312	13,775

B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in Section A on the following:

- (1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- (2) The accuracy of the agency’s estimate of the burden of the proposed collection of information;
- (3) Ways to enhance the quality, utility, and clarity of the information to be collected; and
- (4) Ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

HUD encourages interested parties to submit comment in response to these questions.

Authority: Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. Chapter 35.

Dated: May 11, 2016.
Matthew E. Ammon,
General Deputy Assistant Secretary for Policy Development and Research.

[Docket No. FR–5907–N–30]

Federal Property Suitable as Facilities To Assist the Homeless

AGENCY: Office of the Assistant Secretary for Community Planning and Development, HUD.

ACTION: Notice.

SUMMARY: This Notice identifies unutilized, underutilized, excess, and surplus Federal property reviewed by HUD for suitability for possible use to assist the homeless.

FOR FURTHER INFORMATION CONTACT: Juanita Perry, Department of Housing and Urban Development, 451 Seventh Street SW., Room 7266, Washington, DC

20410; telephone (202) 402–3970; TTY number for the hearing- and speech-impaired (202) 708–2565 (these telephone numbers are not toll-free), call the toll-free Title V information line at 800–927–7588 or send an email to title5@hud.gov.

SUPPLEMENTARY INFORMATION: In accordance with the December 12, 1988 court order in *National Coalition for the Homeless v. Veterans Administration*, No. 88–2503–OG (D.D.C.), HUD publishes a Notice, on a weekly basis, identifying unutilized, underutilized, excess and surplus Federal buildings and real property that HUD has reviewed for suitability for use to assist the homeless. Today’s Notice is for the purpose of announcing that no additional properties have been determined suitable or unsuitable this week.

Dated: July 14, 2016.
Brian P. Fitzmaurice,
Director, Division of Community Assistance, Office of Special Needs Assistance Programs.

[Docket No. FR-5910-N-11]

60-Day Notice of Proposed Information Collection: HOME Investment Partnership Program

AGENCY: Office of Community Planning and Development, HUD.

ACTION: Notice of proposed information collection.

SUMMARY: HUD is seeking approval from the Office of Management and Budget (OMB) for the information collection described below. In accordance with the Paperwork Reduction Act, HUD is requesting comment from all interested parties on the proposed collection of information. The purpose of this notice is to allow for 60 days of public comment.

DATES: *Comments Due Date:* September 20, 2016.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and/or OMB Control Number and should be sent to: Colette Pollard, Reports Management Officer, QDAM, Department of Housing and Urban Development, 451 7th Street SW., Room 4176, Washington, DC 20410-5000; telephone (202) 402-3400 (this is not a toll-free number) or email at Colette.Pollard@hud.gov for a copy of the proposed forms or other available information. Persons with hearing or speech impairments may access this number through TTY by calling the toll-free Federal Relay Service at (800) 877-8339.

FOR FURTHER INFORMATION CONTACT: Peter Huber, Deputy Director, Office of Affordable Housing Program, Department of Housing and Urban Development, 451 7th Street SW., Washington, DC 20410; email Peter Huber at Peter.h.huber@hud.gov or telephone (202) 402-3941. This is not a toll-free number. Persons with hearing or speech impairments may access this number through TTY by calling the toll-free Federal Relay Service at (800) 877-8339.

Copies of available documents submitted to OMB may be obtained from Ms. Pollard.

SUPPLEMENTARY INFORMATION: This notice informs the public that HUD is seeking approval from OMB for the information collection described in Section A.

A. Overview of Information Collection

Title of Information Collection: HOME Investment Partnerships Program (HOME).

OMB Approval Number: 2506-0171.
Type of Request: Extension of currently approved collection.

Form Number: HUD 40093, SF 1199A, HUD 27055, HUD 40107, HUD 40107A.

Description of the need for the information and proposed use: The information collected through HUD's Integrated Disbursement and Information System (IDIS) (24 CFR 92.502) is used by HUD Field Offices, HUD Headquarters, and HOME Program Participating Jurisdictions (PJs). The information on program funds committed and disbursed is used by HUD to track PJ performance and to determine compliance with the statutory 24-month commitment deadline and the regulatory 5-year expenditure deadline (§ 92.500(d)). The project-specific property, tenant, owner, and financial data is used to compile annual reports to Congress required at Section 284(b) of the HOME Investment Partnerships Act, as well as to make program management decisions about how well program participants are achieving the statutory objectives of the HOME Program. Program management reports are generated by IDIS to provide data on the status of program participants' commitment and disbursement of HOME funds. These reports are provided to HUD staff as well as to HOME PJs.

Management reports required in conjunction with the Annual Performance Report (§ 92.509) are used by HUD Field Offices to assess the effectiveness of locally designed programs in meeting specific statutory requirements and by Headquarters in preparing the Annual Report to Congress. Specifically, these reports permit HUD to determine compliance

with the requirement that PJs provide a 25 percent match for HOME funds expended during the Federal fiscal year (Section 220 of the Act) and that program income be used for HOME eligible activities (Section 219 of the Act), as well as the Women and Minority Business Enterprise requirements (§ 92.351(b)).

Financial, project, tenant and owner documentation is used to determine compliance with HOME Program cost limits (Section 212(e) of the Act), eligible activities (§ 92.205), and eligible costs (§ 92.206), as well as to determine whether program participants are achieving the income targeting and affordability requirements of the Act (Sections 214 and 215). Other information collected under Subpart H (Other Federal Requirements) is primarily intended for local program management and is only viewed by HUD during routine monitoring visits. The written agreement with the owner for long-term obligation (§ 92.504) and tenant protections (§ 92.253) are required to ensure that the property owner complies with these important elements of the HOME Program and are also reviewed by HUD during monitoring visits. HUD reviews all other data collection requirements during monitoring to assure compliance with the requirements of the Act and other related laws and authorities.

HUD tracks PJ performance and compliance with the requirements of 24 CFR parts 91 and 92. PJs use the required information in the execution of their program, and to gauge their own performance in relation to stated goals.

Respondents (i.e. affected public): State and local government participating jurisdictions.

Estimated Number of Respondents: 6,667.

Estimated Number of Responses: 244,127.

Frequency of Response: Most data is collected annually, though there are specific items that are requested semi-annually or quarterly.

Average Hours per Response: 2.74 hours.

Total Estimated Burdens: 738,270 hours.

B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in Section A on the following:

(1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) The accuracy of the agency's estimate of the burden of the proposed collection of information;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) Ways to minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of responses.

HUD encourages interested parties to submit comments in response to these questions.

Authority: Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. Chapter 35.

Dated: July 15, 2016.

Harriet Tregoning,

Principal Deputy Assistant Secretary for Community Planning and Development.

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

[167A21000DD/AAKC001030/
A0A501010.9999.00]

Final Environmental Impact Statement for the Pokagon Band of Potawatomi Indians Fee to Trust Transfer for Tribal Village and Casino, City of South Bend, St. Joseph County, Indiana

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice of availability.

SUMMARY: The Bureau of Indian Affairs (BIA) as the lead Federal agency, with the Pokagon Band of Potawatomi Indians, the Environmental Protection Agency, and U.S. Army Corps of Engineers as cooperating agencies, has prepared a Final Environmental Impact Statement (FEIS) for the proposed approval of the fee-to-trust transfer of land located within the municipal limits of the City of South Bend, Indiana, for the construction of tribal housing, government facilities, and a Class III gaming facility. This notice also announces the FEIS is now available for public review. Copies are available upon request or may be found at the addresses indicated in the **SUPPLEMENTARY INFORMATION** section below.

DATES: The Record of Decision (ROD) on the proposed action will be issued no sooner than 30 days after the release of the FEIS.

ADDRESSES: You may request a copy of the FEIS by contacting Ms. Diane Rosen, Regional Director, Midwest Region, Bureau of Indian Affairs, 5600 West American Boulevard, Suite 500, Bloomington, MN 55437, telephone (612) 725-4500, fax (612) 713-4401. Please see the **SUPPLEMENTARY INFORMATION** section of this notice for directions on how to obtain a copy of the FEIS.

FOR FURTHER INFORMATION CONTACT: Mr. Scott Doig, Regional Environmental Scientist, Midwest Region, Bureau of Indian Affairs, 5600 West American Boulevard, Suite 500, Bloomington, MN 55437, telephone (612) 725-4514, fax (612) 713-4401.

SUPPLEMENTARY INFORMATION: The Pokagon Band of Potawatomi Indians (Tribe) has requested BIA to take 165.81 acres, more or less, into trust on behalf of the Tribe, on which the Tribe proposes to develop a casino-hotel complex. The proposed project is located within the municipal limits of the City of South Bend, in St. Joseph County, Indiana. The BIA serves as lead agency for compliance with the National Environmental Policy Act (NEPA). The Tribe, Environmental Protection Agency, and U.S. Army Corps of

Engineers, as entities having jurisdiction and special expertise relevant to potentially affected resources, are acting as cooperating agencies.

The purpose of the proposed action is to improve access to essential tribal government services, and provide housing, employment opportunities and economic development for the tribal community residing in northern Indiana. The Tribe proposes to develop 44 housing units, a multi-purpose facility, health service, and other tribal government facilities. The Tribe also proposes to develop a Class III gaming facility with a hotel, restaurants, meeting space, and a parking garage. A range of project alternatives is considered in the FEIS, including: (1) Preferred Alternative—South Bend tribal housing, government facilities, and casino; (2) Elkhart site with same uses as the preferred alternative; (3) South Bend site with government facilities and commercial development; and (4) no action. Alternative 1, the Preferred Alternative, reflects the Tribe's proposed project and has been selected as the Preferred Alternative as discussed in the FEIS. The information and analysis contained in the EIS, as well as its evaluation and assessment of the Preferred Alternative, are intended to assist the review of the issues presented in the Tribe's fee-to-trust application. The Preferred Alternative does not necessarily reflect the Department of the Interior's (Department) final decision, because the Department must evaluate all of the criteria in 25 CFR part 151. The Department's consideration and analysis of the applicable criteria may lead to a final decision that selects an alternative other than the Preferred Alternative. Environmental issues addressed in the FEIS include land and water resources, air quality, biological resources, cultural and paleontological resources, socioeconomic conditions, transportation and circulation, land use, public services, noise, hazardous materials, visual resources, environmental justice, cumulative effects, indirect effects, and mitigation.

The BIA has afforded other government agencies and the public opportunity to participate in the preparation of this FEIS. The BIA published a Notice of Intent to Prepare an EIS (NOI) for the proposed action in the **Federal Register** on August 24, 2012. See 77 FR 51558. The BIA held a public scoping meeting on September 27, 2012, in South Bend, Indiana. A Notice of Availability (NOA) for the Draft EIS (DEIS) was published in the **Federal Register** on March 12, 2015. See 80 FR 13014. The document was available for public comment from

March 12, 2015 to April 28, 2015, and a public hearing was held on April 14, 2015, in South Bend, Indiana.

Locations where the FEIS is Available for Review: The FEIS will be available at the South Bend Public Library, Main Branch, 304 S. Main St., South Bend, IN 46601, and the Elkhart Public Library, Main Branch, 300 S 2nd St, Elkhart, IN 46516. An electronic version of the FEIS can be viewed at the following Web site: www.pokagonsouthbendeis.com. If you would like to obtain a compact disc copy of the FEIS, please provide your name and address in writing or by voicemail to the person listed in the **ADDRESSES** section of this notice. Individual paper copies of the FEIS will be provided only upon payment of applicable printing expenses by the requestor for the number of copies requested.

Authority: This notice is published pursuant to Sec. 1503.1 of the Council of Environmental Quality Regulations (40 CFR parts 1500 through 1508) and Sec. 46.305 of the Department of the Interior Regulations (43 CFR part 46), implementing the procedural requirements of the National Environmental Policy Act of 1969, as amended (42 U.S.C. 4321 *et seq.*), and is in the exercise of authority delegated to the Assistant Secretary—Indian Affairs by 209 DM 8.

Dated: July 11, 2016.

Lawrence S. Roberts,

Acting Assistant Secretary—Indian Affairs.

DEPARTMENT OF THE INTERIOR

National Park Service

[NPS–NER–20796; PPNEHATUC0, PPMRSCR1Y.CU0000 (166)]

Information Collection Request Sent to the Office of Management and Budget (OMB) for Approval; National Underground Railroad Network to Freedom Program

AGENCY: National Park Service, Interior.

ACTION: Notice; request for comments.

SUMMARY: We (National Park Service, NPS) have sent an Information Collection Request (ICR) to OMB for review and approval. We summarize the ICR below and describe the nature of the collection and the estimated burden and cost. This information collection is scheduled to expire on July 31, 2016. We may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. However, under OMB

regulations, we may continue to conduct or sponsor this information collection while it is pending at OMB.

DATES: You must submit comments on or before August 22, 2016.

ADDRESSES: Send your comments and suggestions on this information collection to the Desk Officer for the Department of the Interior at OMB–OIRA at (202) 395–5806 (fax) or OIRA_Submission@omb.eop.gov (email). Please provide a copy of your comments to Madonna L. Baucum, Information Collection Clearance Officer, National Park Service, 12201 Sunrise Valley Drive (Mail Stop 242), Reston, VA 20192 (mail); or madonna_baucum@nps.gov (email). Please include “1024–0232” in the subject line of your comments. You may review the ICR online at <http://www.reginfo.gov>. Follow the instructions to review Department of the Interior collections under review by OMB.

FOR FURTHER INFORMATION CONTACT: To request additional information about this ICR, contact Diane Miller, National Manager, National Underground Railroad Network to Freedom Program, National Park Service, National Park Service, c/o Blackwater National Wildlife Refuge, 2145 Key Wallace Drive, Cambridge, Maryland 21613; or via email at diane_miller@nps.gov.

SUPPLEMENTARY INFORMATION:

I. Abstract

The National Underground Railroad Network to Freedom Act of 1998 (54 U.S.C. 308301, *et seq.*) authorizes the Secretary of the Interior to establish the Network to Freedom (Network). The Network is a collection of sites, facilities, and programs, both governmental and nongovernmental, around the United States. All entities must have a verifiable association with the historic Underground Railroad movement. The National Park Service administers the National Underground Railroad Network to Freedom Program. The program coordinates preservation and education efforts Nationwide and integrates local historical places, museums, and interpretive programs associated with the Underground Railroad into a mosaic of community, regional, and national stories.

Individuals; businesses; organizations; State, tribal and local governments; and Federal agencies that want to join the Network must complete NPS Form 10–946 (National Underground Railroad Network to Freedom Application). The application and instructions are available on our Web site at <http://www.nps.gov/subjects/ugrr/index.htm>. Respondents

must (1) verify associations and characteristics through descriptive texts that are the result of historical research and (2) submit supporting documentation; e.g., copies of rare documents, photographs, and maps. Much of the information is submitted in electronic format and used to determine eligibility to become part of the Network.

One of the principal components of the Network to Freedom Program is to validate the efforts of local and regional organizations, and to make it easier for them to share expertise and communicate with us and each other. The vehicle through which this can

happen is for these local entities to become Network Partners. Partners of the Network to Freedom Program work alongside and often in cooperation with us to fulfill the program's mission. Prospective partners must submit a letter with the following information:

- Name and address of the agency, company or organization;
- Name, address, and phone, fax, and email information of principal contact;
- Abstract not to exceed 200 words describing the partner's activity or mission statement; and
- Brief description of the entity's association to the Underground Railroad.

II. Data

OMB Number: 1024-0232.
Title: National Underground Railroad Network to Freedom Program.
Form Number(s): NPS Form 10-946, "National Underground Railroad Network to Freedom Application".
Type of Request: Revision of a currently approved collection of information.
Description of Respondents: Individuals; businesses; nonprofit organizations; and Federal, State, tribal, and local governments.
Respondent's Obligation: Required to obtain or retain a benefit.
Frequency of Collection: On occasion.

Activity	Number of respondents	Number of responses	Completion time per response	Total annual burden hours
Network Applications (NPS Form 10-946)	35	35	40 hours	1,400
Partner Requests	2	2	.5 hours	1
Totals	37	37	1,401

Estimated Annual Nonhour Burden Cost: None.

III. Comments

On January 15, 2016, we published in the **Federal Register** (81 FR 2232) a notice of our intent to request that OMB renew approval for this information collection. In that notice, we solicited public comments for 60 days, ending on March 15, 2016. We did not receive any comments in response to that notice.

We again invite comments concerning this information collection on:

- Whether or not the collection of information is necessary, including whether or not the information will have practical utility;
- The accuracy of our estimate of the burden for this collection of information;
- Ways to enhance the quality, utility, and clarity of the information to be collected; and
- Ways to minimize the burden of the collection of information on respondents.

Please note that the comments submitted in response to this notice are a matter of public record. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment, including your personal identifying information, may be made publicly available at any time. While you can ask OMB or us in your comment to withhold your personal identifying information from public review, we cannot guarantee that it will be done.

Dated: July 18, 2016.
Madonna L. Baucum,
Information Collection Clearance Officer,
National Park Service.

DEPARTMENT OF THE INTERIOR
Bureau of Ocean Energy Management
[Docket No. BOEM-2014-0001]
Draft Environmental Impact Statement for the Cook Inlet Outer Continental Shelf Oil and Gas Lease Sale 244; MMAA104000

AGENCY: Bureau of Ocean Energy Management (BOEM), Interior.
ACTION: Notice of Availability (NOA) of a Draft Environmental Impact Statement.

SUMMARY: BOEM is announcing the availability of the Draft Environmental Impact Statement (EIS) for the proposed Cook Inlet Outer Continental Shelf Oil and Gas Lease Sale 244. This notice marks the start of the public review and comment period and serves to announce public hearings on the Draft EIS. After the public hearings and written comments on the Draft EIS have been reviewed and considered, a Final EIS will be prepared.

The proposed action addressed in this Draft EIS is to conduct an oil and gas lease sale on portions of the Cook Inlet Outer Continental Shelf (OCS) Planning Area. Lease Sale 244 would provide qualified bidders the opportunity to bid

on OCS blocks in Cook Inlet to gain conditional rights to explore, develop, and produce oil and natural gas.

The Draft EIS analyzes the potential direct, indirect, and cumulative environmental impacts of the proposed lease sale on the physical, biological, and human environments in the Cook Inlet area. The EIS describes a hypothetical scenario of exploration, development, production, and decommissioning activities that could result from the proposed lease sale, and analyzes the potential impacts of those activities on the environment.

Authority: This Notice of Availability for the Draft EIS is in compliance with the National Environmental Policy Act of 1969, as amended (42 U.S.C. 4231 *et seq.*), and is published pursuant to 43 CFR 46.415.

DATES: Comments should be submitted no later than September 6, 2016. See public hearing dates in the **SUPPLEMENTARY INFORMATION.**

SUPPLEMENTARY INFORMATION: On August 27, 2012, the Secretary of the Interior approved the June 2012 *Proposed Final Outer Continental Shelf Oil & Gas Leasing Program 2012-2017* (Five-Year Program). The Five-Year Program includes proposed Lease Sale 244.

The proposed Lease Sale 244 area defined in the Area Identification (Area ID) is located offshore of the State of Alaska in the northern portion of the Federal waters of Cook Inlet. The Area ID is comprised of 224 OCS blocks, which encompass an area of approximately 442,875 hectares (1.09 million acres). This area is close to infrastructure needed to support

exploration, development, and production activities.

The Area ID includes areas identified by industry in their responses to a March 27, 2012, Request for Interest. The proposed lease sale area also defers certain areas from consideration due to potential conflicts with areas of high ecological and subsistence value. These include: (1) The majority of the designated critical habitat areas for beluga whale and northern sea otter, and all of the critical habitat areas for Stellar sea lions and the North Pacific right whale, that are located within the Planning Area; (2) a buffer between the area considered for leasing and the Katmai National Park and Preserve, the Kodiak National Wildlife Refuge, and the Alaska Maritime National Wildlife Refuge; and (3) many of the subsistence use areas for the Native Villages of Nanwalek, Seldovia, and Port Graham identified during the Cook Inlet Lease Sale 191 process.

On October 23, 2014, BOEM published in the **Federal Register** a Notice of Intent (NOI) to prepare an EIS in support of Lease Sale 244. Publication of the NOI opened a public comment period that extended through December 8, 2014. In November 2014, BOEM held a series of scoping meetings for the EIS. The 26 comments received during this scoping period were used to inform the scope and content of this Draft EIS.

In this Draft EIS, BOEM has examined the potential environmental effects of activities that could result from the Lease Sale 244 proposed action, along with several alternatives. The Draft EIS is based on BOEM estimates of the potential oil and gas resources in the proposed lease sale area and an associated scenario that estimates a range of potential oil and gas activities, including exploration seismic surveying, on-lease ancillary activities, exploration and delineation drilling, development, production, and decommissioning.

Draft EIS Availability: Persons interested in reviewing the Cook Inlet Lease Sale 244 Draft EIS (OCS EIS/EA BOEM-2016-004) can download it from the Internet at <http://www.boem.gov/ak-eis-ea/> or they may contact BOEM by calling (907) 334-5200 to request a paper copy (subject to availability) or a CD-ROM version. The Draft EIS will also be available for review at libraries in towns adjacent to the proposed lease sale and at multiple libraries in Anchorage.

Comments: All interested parties, including Federal, State, Tribal, and local governments, and the public are invited to submit written comments on

the Draft EIS at: Federal eRulemaking Portal: <http://www.regulations.gov>. In the field entitled, "Enter Keyword or ID," enter BOEM-2014-0001, and then click "Search."

BOEM does not consider anonymous comments; please include your name and address as part of your submittal. Individual respondents may request that BOEM withhold their names and/or addresses from the public record; however, BOEM cannot guarantee that we will be able to do so. If you wish your name and/or address to be withheld, you must state your preference prominently at the beginning of your comment. All submissions from organizations, businesses, and identified individuals will be available for public viewing on [regulations.gov](http://www.regulations.gov).

Public Hearings: BOEM will hold public hearings on the Draft EIS from August 15, 2016, through August 18, 2016. The purpose of these hearings is to receive public comments on the Draft EIS. These hearings are scheduled as follows:

- Monday, August 15, 2016; Dena'ina Civic and Convention Center, Anchorage, Alaska; 5:00–8:00 p.m.
- Wednesday, August 17, 2016; Alaska Maritime National Wildlife Refuge Islands and Ocean Visitor Center, Homer, Alaska; 5:00–8:00 p.m.
- Thursday, August 18, 2016; Alaska National Guard Armory, Kenai/Soldotna, Alaska; 5:00–8:00 p.m.

FOR FURTHER INFORMATION CONTACT: Bureau of Ocean Energy Management, Alaska OCS Region, 3801 Centerpoint Drive, Suite 500, Anchorage, Alaska 99503-5823; or Caron McKee, Lease Sale 244 Environmental Coordinator, (907) 334-5200.

Dated: July 8, 2016.

Abigail Ross Hopper,
Director, Bureau of Ocean Energy
Management.

BILLING CODE 3510-MR-P

INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 701-TA-490 and 731-TA-1204 (Final) (Remand)]

Hardwood Plywood From China

AGENCY: United States International Trade Commission.

ACTION: Notice of remand proceedings.

SUMMARY: The U.S. International Trade Commission ("Commission") hereby gives notice of the court-ordered remand of its final determinations in the countervailing and antidumping duty

investigations of hardwood plywood from China. For further information concerning the conduct of these remand proceedings and rules of general application, consult the Commission's Rules of Practice and Procedure, part 201, subparts A through E (19 CFR part 201), and part 207, subpart A (19 CFR part 207).

DATES: *Effective Date:* July 18, 2016.

FOR FURTHER INFORMATION CONTACT: Fred Ruggles (202-205-3187), Office of Investigations, or Robin L. Turner (202-205-3103), Office of the General Counsel, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202-205-1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202-205-2000. General information concerning the Commission may also be obtained by accessing its internet server (<http://www.usitc.gov>). The public record of Investigation Nos. 701-TA-490 and 731-TA-1204 (Final) may be viewed on the Commission's electronic docket (EDIS) at <http://edis.usitc.gov>.

SUPPLEMENTARY INFORMATION:

Background.—In November 2013, the Commission determined by an unanimous vote by the five participating Commissioners that an industry in the United States was not materially injured or threatened with material injury by reason of imports of hardwood plywood from China that were sold in the United States at less than fair value and that were subsidized by the Government of China. Petitioners and domestic producers contested the Commission's determinations before the U.S. Court of International Trade ("CIT"). The CIT remanded certain issues to the Commission and affirmed all other aspects of the Commission's determinations. *Coalition of Fair Trade of Hardwood Plywood v. United States International Trade Commission*, Slip. Op. 16-57 (Ct. Int'l Trade June 8, 2016).

Participation in the proceeding.—Only those persons who were interested parties that participated in the investigations (*i.e.*, persons listed on the Commission Secretary's service list) and also parties to the appeal may participate in the remand proceedings. Such persons need not make any additional notice of appearances or applications with the Commission to participate in the remand proceedings, unless they are adding new individuals to the list of persons entitled to receive

business proprietary information (“BPI”) under administrative protective order. BPI referred to during the remand proceedings will be governed, as appropriate, by the administrative protective order issued in the investigations. The Secretary will maintain a service list containing the names and addresses of all persons or their representatives who are parties to the remand proceedings, and the Secretary will maintain a separate list of those authorized to receive BPI under the administrative protective order during the remand proceedings.

Written Submissions.—The Commission is not reopening the record and will not accept the submission of new factual information for the record. The Commission will permit the parties to file comments concerning how the Commission could best comply with the Court’s remand instructions.

The comments must be based solely on the information in the Commission’s record. The Commission will reject submissions containing additional factual information or arguments pertaining to issues other than those on which the Court has remanded this matter. The deadline for filing comments is August 1, 2016. Comments shall be limited to no more than fifteen (15) double-spaced and single-sided pages of textual material.

Parties are advised to consult with the Commission’s Rules of Practice and Procedure, part 201, subparts A through E (19 CFR part 201), and part 207, subpart A (19 CFR part 207) for provisions of general applicability concerning written submissions to the Commission. All written submissions must conform with the provisions of section 201.8 of the Commission’s rules; any submissions that contain BPI must also conform with the requirements of sections 201.6, 207.3, and 207.7 of the Commission’s rules. The Commission’s *Handbook on E-Filing*, available on the Commission’s Web site at <http://edis.usitc.gov>, elaborates upon the Commission’s rules with respect to electronic filing.

Additional written submissions to the Commission, including requests pursuant to section 201.12 of the Commission’s rules, shall not be accepted unless good cause is shown for accepting such submissions or unless the submission is pursuant to a specific request by a Commissioner or Commission staff.

In accordance with sections 201.16(c) and 207.3 of the Commission’s rules, each document filed by a party to the investigation must be served on all other parties to the investigation (as identified by either the public or BPI service list),

and a certificate of service must be timely filed. The Secretary will not accept a document for filing without a certificate of service.

By order of the Commission.

Issued: July 18, 2016.

Lisa Barton,

Secretary to the Commission.

BILLING CODE 7020–02–P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

[Docket No. DEA–443N]

Proposed Aggregate Production Quotas for Schedule I and II Controlled Substances and Assessment of Annual Needs for the List I Chemicals Ephedrine, Pseudoephedrine, and Phenylpropanolamine for 2017

AGENCY: Drug Enforcement Administration, Department of Justice.

ACTION: Notice with request for comments.

SUMMARY: The Drug Enforcement Administration (DEA) proposes to establish the 2017 aggregate production quotas for controlled substances in schedules I and II of the Controlled Substances Act and assessment of annual needs for the list I chemicals ephedrine, pseudoephedrine, and phenylpropanolamine.

DATES: Interested persons may file written comments on this notice in accordance with 21 CFR 1303.11(c) and 1315.11(d). Electronic comments must be submitted, and written comments must be postmarked, on or before August 22, 2016. Commenters should be aware that the electronic Federal Docket Management System will not accept comments after 11:59 p.m. Eastern Time on the last day of the comment period.

Based on comments received in response to this notice, the Administrator may hold a public hearing on one or more issues raised. In the event the Administrator decides in his sole discretion to hold such a hearing, the Administrator will publish a notice of any such hearing in the **Federal Register**. After consideration of any comments or objections, or after a hearing, if one is held, the Administrator will publish in the **Federal Register** a final order establishing the 2017 aggregate production quotas for schedule I and II controlled substances, and an assessment of annual needs for the list I chemicals ephedrine,

pseudoephedrine, and phenylpropanolamine.

ADDRESSES: To ensure proper handling of comments, please reference “Docket No. DEA–443N” on all correspondence, including any attachments. The Drug Enforcement Administration encourages that all comments be submitted electronically through the Federal eRulemaking Portal which provides the ability to type short comments directly into the comment field on the Web page or attach a file for lengthier comments. Please go to <http://www.regulations.gov> and follow the online instructions at that site for submitting comments. Upon completion of your submission you will receive a Comment Tracking Number for your comment. Please be aware that submitted comments are not instantaneously available for public view on [Regulations.gov](http://www.regulations.gov). If you have received a Comment Tracking Number, your comment has been successfully submitted and there is no need to resubmit the same comment. Paper comments that duplicate electronic submissions are not necessary and are discouraged. Should you wish to mail a paper comment *in lieu* of an electronic comment, it should be sent via regular or express mail to: Drug Enforcement Administration, Attention: DEA Federal Register Representative/ODW, 8701 Morrisette Drive, Springfield, Virginia 22152.

FOR FURTHER INFORMATION CONTACT: Michael J. Lewis, Office of Diversion Control, Drug Enforcement Administration; Mailing Address: 8701 Morrisette Drive, Springfield, Virginia 22152, Telephone: (202) 598–6812.

SUPPLEMENTARY INFORMATION:

Posting of Public Comments

Please note that all comments received in response to this docket are considered part of the public record. They will, unless reasonable cause is given, be made available by the Drug Enforcement Administration (DEA) for public inspection online at <http://www.regulations.gov>. Such information includes personal identifying information (such as your name, address, etc.) voluntarily submitted by the commenter.

The Freedom of Information Act (FOIA) applies to all comments received. If you want to submit personal identifying information (such as your name, address, etc.) as part of your comment, but do not want it to be made publicly available, you must include the phrase “PERSONAL IDENTIFYING INFORMATION” in the first paragraph of your comment. You must also place all the personal identifying information

you do not want made publicly available in the first paragraph of your comment and identify what information you want redacted.

If you want to submit confidential business information as part of your comment, but do not want it to be made publicly available, you must include the phrase "CONFIDENTIAL BUSINESS INFORMATION" in the first paragraph of your comment. You must also prominently identify confidential business information to be redacted within the comment.

Comments containing personal identifying information or confidential business information identified and located as directed above will generally be made available in redacted form. If a comment contains so much confidential business information or personal identifying information that it cannot be effectively redacted, all or part of that comment may not be made publicly available. Comments posted to <http://www.regulations.gov> may include any personal identifying information (such as name, address, and phone number) included in the text of your electronic submission that is not identified as directed above as confidential.

An electronic copy of this document is available at <http://www.regulations.gov> for easy reference.

Legal Authority

Section 306 of the Controlled Substances Act (CSA) (21 U.S.C. 826) requires the Attorney General to establish aggregate production quotas for each basic class of controlled substance listed in schedules I and II and for the list I chemicals ephedrine, pseudoephedrine, and phenylpropanolamine. The Attorney General has delegated this function to the Administrator of the DEA pursuant to 28 CFR 0.100.

Analysis for Proposed 2017 Aggregate Production Quotas and Assessment of Annual Needs

The proposed year 2017 aggregate production quotas and assessment of annual needs represent those quantities of schedule I and II controlled substances, and the list I chemicals

ephedrine, pseudoephedrine, and phenylpropanolamine, to be manufactured in the United States in 2017 to provide for the estimated medical, scientific, research, and industrial needs of the United States, lawful export requirements, and the establishment and maintenance of reserve stocks. These quotas include imports of ephedrine, pseudoephedrine, and phenylpropanolamine, but do not include imports of controlled substances for use in industrial processes.

In determining the proposed 2017 aggregate production quotas and assessment of annual needs, the Acting Administrator has taken into account the criteria pursuant to 21 U.S.C. 826(a) and in accordance with 21 CFR 1303.11 (aggregate production quotas for controlled substances) and 21 CFR 1315.11 (assessment of annual needs for ephedrine, pseudoephedrine, and phenylpropanolamine). The DEA proposes the aggregate production quotas and assessment of annual needs for 2017 by considering: (1) Total net disposal of each class or chemical by all manufacturers and chemical importers during the current and two preceding years; (2) trends in the national rate of net disposal of the class or chemical; (3) total actual (or estimated) inventories of the class or chemical and of all substances manufactured from the class or chemical, and trends in inventory accumulation; (4) projected demand for each class or chemical as indicated by procurement and import quotas requested in accordance with 21 CFR 1303.12, 1315.32, and 1315.34; and (5) other factors affecting medical, scientific, research, and industrial needs of the United States and lawful export requirements, as the Acting Administrator finds relevant. These quotas do not include imports of controlled substances for use in industrial processes.

Other factors the Acting Administrator considered in calculating the aggregate production quotas, but not the assessment of annual needs, include product development requirements of both bulk and finished dosage form

manufacturers, and other pertinent information. In determining the proposed 2017 assessment of annual needs, the DEA used the calculation methodology previously described in the 2010 and 2011 assessment of annual needs (74 FR 60294, Nov. 20, 2009, and 75 FR 79407, Dec. 20, 2010, respectively).

During the calendar years 2013–2016, the DEA included an additional 25% of the estimated medical, scientific, and research needs for the United States as part of the amount necessary to ensure the establishment and maintenance of reserve stocks for all schedule II aggregate production quotas, and certain schedule I aggregate production quotas (difenoxin, gamma-hydroxybutyric acid, and tetrahydrocannabinols). Based on interagency discussions beginning in November 2015, and after reviewing all relevant quota applications received, published FDA drug shortage lists, and subsequent reports required under 21 U.S.C. 826a for those calendar years, the Acting Administrator has determined that inclusion of the additional 25% of the estimated medical, scientific, and research needs for the United States is unnecessary. Instead, the Acting Administrator determined that 21 U.S.C. 826(c) and 21 U.S.C. 952(a)(2)(A) provide sufficient ability for the DEA to mitigate adverse public effects should a natural disaster or other unforeseen event result in substantial disruption to the amount of controlled substances available for legitimate public need. As such, DEA proposes to remove the additional 25% from the aggregate production quotas. The resulting proposed established aggregate production quotas reflect these reduced amounts.

The Acting Administrator, therefore, proposes to establish the 2017 aggregate production quotas for certain schedule I and II controlled substances and assessment of annual needs for the list I chemicals ephedrine, pseudoephedrine, and phenylpropanolamine, expressed in grams of anhydrous acid or base, as follows:

Basic class	Proposed 2017 quotas (g)
Schedule I	
[1-(5-fluoropentyl)-1H-indazol-3-yl](naphthalen-1-yl)methanone (THJ-2201)	15
1-(1-Phenylcyclohexyl)pyrrolidine	10
1-(5-Fluoropentyl)-3-(1-naphthoyl)indole (AM2201)	30
1-(5-Fluoropentyl)-3-(2-iodobenzoyl)indole (AM694)	30
1-[1-(2-Thienyl)cyclohexyl]piperidine	15
1-[2-(4-Morpholinyl)ethyl]-3-(1-naphthoyl)indole (JWH-200)	35
1-Benzylpiperazine	25

Basic class	Proposed 2017 quotas (g)
1-Butyl-3-(1-naphthoyl)indole (JWH-073)	45
1-Cyclohexylethyl-3-(2-methoxyphenylacetyl)indole (SR-18 and RCS-8)	45
1-Hexyl-3-(1-naphthoyl)indole (JWH-019)	45
1-Methyl-4-phenyl-4-propionoxypiperidine	2
1-Pentyl-3-(1-naphthoyl)indole (JWH-018 and AM678)	35
1-Pentyl-3-(2-chlorophenylacetyl)indole (JWH-203)	30
1-Pentyl-3-(2-methoxyphenylacetyl)indole (JWH-250)	30
1-Pentyl-3-(4-chloro-1-naphthoyl)indole (JWH-398)	30
1-Pentyl-3-(4-methyl-1-naphthoyl)indole (JWH-122)	30
1-Pentyl-3-[(4-methoxy)-benzoyl]indole (SR-19, RCS-4)	30
1-Pentyl-3-[1-(4-methoxynaphthoyl)]indole (JWH-081)	30
2-(2,5-Dimethoxy-4-ethylphenyl)ethanamine (2C-E)	30
2-(2,5-Dimethoxy-4-methylphenyl)ethanamine (2C-D)	30
2-(2,5-Dimethoxy-4-nitro-phenyl)ethanamine (2C-N)	30
2-(2,5-Dimethoxy-4-n-propylphenyl)ethanamine (2C-P)	30
2-(2,5-Dimethoxyphenyl)ethanamine (2C-H)	30
2-(4-Bromo-2,5-dimethoxyphenyl)-N-(2-methoxybenzyl)ethanamine (25B-NBOMe; 2C-B-NBOMe; 25B; Cimbi-36)	25
2-(4-Chloro-2,5-dimethoxyphenyl)ethanamine (2C-C)	30
2-(4-Chloro-2,5-dimethoxyphenyl)-N-(2-methoxybenzyl)ethanamine (25C-NBOMe; 2C-C-NBOMe; 25C; Cimbi-82)	25
2-(4-Iodo-2,5-dimethoxyphenyl)ethanamine (2C-I)	30
2-(4-Iodo-2,5-dimethoxyphenyl)-N-(2-methoxybenzyl)ethanamine (25I-NBOMe; 2C-I-NBOMe; 25I; Cimbi-5)	5
2,5-Dimethoxy-4-ethylamphetamine (DOET)	25
2,5-Dimethoxy-4-n-propylthiophenethylamine	25
2,5-Dimethoxyamphetamine	25
2-[4-(Ethylthio)-2,5-dimethoxyphenyl]ethanamine (2C-T-2)	30
2-[4-(Isopropylthio)-2,5-dimethoxyphenyl]ethanamine (2C-T-4)	30
3,4,5-Trimethoxyamphetamine	25
3,4-Methylenedioxyamphetamine (MDA)	55
3,4-Methylenedioxymethamphetamine (MDMA)	50
3,4-Methylenedioxy-N-ethylamphetamine (MDEA)	40
3,4-Methylenedioxy-N-methylcathinone (methylone)	40
3,4-Methylenedioxypropylvalerone (MDPV)	35
3-FMC; 3-Fluoro-N-methylcathinone	25
3-Methylfentanyl	2
3-Methylthiofentanyl	2
4-Bromo-2,5-dimethoxyamphetamine (DOB)	25
4-Bromo-2,5-dimethoxyphenethylamine (2-CB)	25
4-FMC; Flephedrone	25
4-Methoxyamphetamine	150
4-Methyl-2,5-dimethoxyamphetamine (DOM)	25
4-Methylaminorex	25
4-MEC; 4-Methyl-N-ethylcathinone	25
4-Methyl-N-methylcathinone (mephedrone)	45
4-Methyl- α -pyrrolidinopropiophenone (4-MePPP)	25
5-(1,1-Dimethylheptyl)-2-[(1R,3S)-3-hydroxycyclohexyl]-phenol	50
5-(1,1-Dimethyloctyl)-2-[(1R,3S)-3-hydroxycyclohexyl]-phenol (cannabicyclohexanol or CP-47,497 C8-homolog)	40
5-Fluoro-UR144, XLR11	25
5-Methoxy-3,4-methylenedioxyamphetamine	25
5-Methoxy-N,N-diisopropyltryptamine	25
5-Methoxy-N,N-dimethyltryptamine	25
AB-PINACA	15
Acetyl-alpha-methylfentanyl	2
Acetyldihydrocodeine	2
Acetylmethadol	2
AH-7921	30
Allylprodine	2
alpha-Ethyltryptamine	25
alpha-Methylfentanyl	2
alpha-Methylthiofentanyl	2
alpha-Methyltryptamine (AMT)	25
alpha-Pyrrolidinobutiophenone (α -PBP)	25
alpha-Pyrrolidinopentiophenone (α -PVP)	25
Alphacetylmethadol	2
Alphameprodine	2
Alphamethadol	2
Aminorex	25
APINCA, AKB48	25
Benzylmorphine	2
beta-Hydroxy-3-methylfentanyl	2
beta-Hydroxyfentanyl	2
beta-Hydroxythiofentanyl	30
Betacetylmethadol	2
Betameprodine	2

Basic class	Proposed 2017 quotas (g)
Betamethadol	4
Betaprodine	2
Bufotenine	3
Butylone	25
Butyryl fentanyl	30
Cathinone	24
Codeine methylbromide	5
Codeine-N-oxide	305
Desomorphine	25
Diethyltryptamine	25
Difenoxin	8,750
Dihydromorphine	1,566,000
Dimethyltryptamine	35
Dipipanone	5
Fenethylline	5
gamma-Hydroxybutyric acid	56,200,000
Heroin	25
Hydromorphinol	2
Hydroxypethidine	2
Ibogaine	5
Lysergic acid diethylamide (LSD)	10
Marihuana	472,000
Mescaline	25
Methaqualone	10
Methcathinone	25
Methyldesorphine	5
Methyldihydromorphine	2
Morphine methylbromide	5
Morphine methylsulfonate	5
Morphine-N-oxide	350
N,N-Dimethylamphetamine	25
N-(1-Amino-3,3-dimethyl-1-oxobutan-2-yl)-1-pentyl-1H-indazole-3-carboxamide (ADB-PINACA)	50
N-(1-Amino-3-methyl-1-oxobutan-2-yl)-1-(4-fluorobenzyl)-1H-indazole-3-carboxamide (AB-FUBINACA)	50
N-(1-Amino-3-methyl-1-oxobutan-2-yl)-1-(cyclohexylmethyl)-1H-indazole-3-carboxamide (AB-CHMINACA)	15
N-(1-phenethylpiperidin-4-yl)-N-phenylacetamide (acetyl fentanyl)	100
N-Ethyl-1-phenylcyclohexylamine	5
N-Ethylamphetamine	24
N-Hydroxy-3,4-methylenedioxyamphetamine	24
Naphyrone	25
Noracymethadol	2
Norlevorphanol	52
Normethadone	2
Normorphine	40
Para-fluorofentanyl	5
Parahexyl	5
Pentdrone	25
Pentylone	25
Phenomorphan	2
Pholcodine	5
Psilocybin	30
Psilocyn	50
Quinolin-8-yl 1-(5-fluoropentyl)-1H-indole-3-carboxylate (5-fluoro-PB-22; 5F-PB-22)	20
Quinolin-8-yl 1-pentyl-1H-indole-3-carboxylate (PB-22; QUPIC)	20
Tetrahydrocannabinols	409,000
Thiofentanyl	2
Tilidine	25
Trimeperidine	2
UR-144	25

Schedule II

1-Phenylcyclohexylamine	4
1-Piperidinocyclohexanecarbonitrile	4
4-Anilino-N-phenethyl-4-piperidine (ANPP)	1,000,000
Alfentanil	4,200
Alphaprodine	2
Amobarbital	20,100
Amphetamine (for conversion)	9,000,000
Amphetamine (for sale)	37,500,000
Carfentanil	10
Cocaine	94,000
Codeine (for conversion)	40,000,000
Codeine (for sale)	45,000,000

Basic class	Proposed 2017 quotas (g)
Dextropropoxyphene	15
Dihydrocodeine	81,100
Dihydroetorphine	2
Diphenoxylate (for conversion)	15,000
Diphenoxylate (for sale)	820,000
Ecgonine	90,000
Ethylmorphine	2
Etorphine hydrochloride	2
Fentanyl	1,750,000
Glutethimide	2
Hydrocodone (for conversion)	122,000
Hydrocodone (for sale)	58,410,000

Methadone Intermediate	25,600,000
Methamphetamine	1,539,100
[900,000 grams of levo-desoxyephedrine for use in a non-controlled, non-prescription product; 600,000 grams for methamphetamine mostly for conversion to a schedule III product; and 39,100 grams for methamphetamine (for sale)]	
Methylphenidate	73,000,000
Morphine (for conversion)	27,300,000
Morphine (for sale)	41,000,000
Nabilone	15,000
Noroxymorphone (for conversion)	17,700,000
Noroxymorphone (for sale)	400,000
Opium (powder)	90,000
Opium (tincture)	300,000
Oripavine	20,000,000
Oxycodone (for conversion)	2,610,000
Oxycodone (for sale)	108,510,000
Oxymorphone (for conversion)	22,300,000
Oxymorphone (for sale)	4,200,000
Pentobarbital	27,500,000
Phenazocine	5
Phencyclidine	20
Phenmetrazine	2
Phenylacetone	20
Racemethorphan	2
Racemorphan	2
Remifentanyl	3,000
Secobarbital	172,002
Sufentanyl	4,000
Tapentadol	21,000,000
Thebaine	100,000,000
List I Chemicals	
Ephedrine (for conversion)	50,000
Ephedrine (for sale)	4,100,000
Phenylpropanolamine (for conversion)	15,000,000
Phenylpropanolamine (for sale)	8,500,000
Pseudoephedrine (for sale)	200,000,000

The Acting Administrator further proposes that aggregate production quotas for all other schedule I and II controlled substances included in 21 CFR 1308.11 and 1308.12 remain at zero. In accordance with 21 CFR

1303.13 and 21 CFR 1315.13, upon consideration of the relevant factors, the Acting Administrator may adjust the 2017 aggregate production quotas and assessment of annual needs as needed.

Conclusion

After consideration of any comments or objections, or after a hearing, if one is held, the Acting Administrator will issue and publish in the **Federal Register** a final order establishing the

2017 aggregate production quota for controlled substances in schedules I and II and establishing an assessment of annual needs for the list I chemicals ephedrine, pseudoephedrine, and phenylpropanolamine, 21 CFR 1303.11(c) and 1315.11(f).

Dated: July 14, 2016.

Chuck Rosenberg,

Acting Administrator.

BILLING CODE 4410-09-P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

Mikhayl Soliman, M.D.: Decision and Order

On March 27, 2015, the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration, issued an Order to Show Cause to Mikhayl Soliman, M.D. (hereinafter, Applicant), of both Wayne, Michigan and Los Angeles, California. The Show Cause Order proposed the denial of Applicant's applications for DEA Certificates of Registration in the States of Michigan and California on multiple grounds. GX 7, at 1.

First, the Show Cause Order alleged that Applicant had previously been registered to handle controlled substances in only Schedule III and IIIN, at the registered address of 3152 South Wayne Road, Wayne, Michigan. *Id.* The Show Cause Order alleged that on September 14, 2012, Applicant was issued an Order to Show Cause and Immediate Suspension of Registration and that he subsequently voluntarily surrendered his registration.

The Show Cause Order alleged that on September 24, 2012, Applicant applied for a new DEA practitioner's registration at his previous registered location in Wayne, Michigan, and that on October 2, 2012, he applied for a new practitioner's registration at a proposed location in Los Angeles, California. *Id.* The Order then alleged that on both applications, Applicant had failed to disclose that he had voluntarily surrendered his registration and had materially falsified both applications. *Id.* at 1-2 (citing 21 U.S.C. 843(a)(4)(A)).

Second, the Show Cause Order alleged that as a result of actions taken by the medical boards of California and Michigan, Applicant is "without authority to practice in the States . . . in which [he] applied for" DEA registrations. *Id.* at 2. Specifically, the Show Cause Order alleged that on January 15, 2014, the Michigan Board of Medicine issued a Consent Order which

found that he "had prescribed controlled substances . . . in a manner which demonstrated negligence, incompetence, and a lack of good moral character" and that he "prescribed, gave away or administered drugs for other than lawful diagnostic or therapeutic purposes." *Id.* The Order also alleged that the Michigan Board had suspended his medical license for six months and one day and required that he petition the Board for reinstatement; the Order then alleged that Applicant's Michigan medical license remains suspended. *Id.* The Order further alleged that based on the Michigan Board's findings, the Medical Board of California revoked his California license effective October 10, 2014. *Id.*

Finally, the Show Cause Order alleged that on May 16, 2012, DEA Investigators had seized 323 patient files which Applicant had discarded in the trash at his residence, and that the files showed that Applicant had prescribed both hydrocodone (then a Schedule III controlled substance) and alprazolam (a Schedule IV drug) "to the majority of these patients." *Id.* The Order then alleged that DEA Investigators obtained information from the Michigan Automated Prescriptions System which showed that "between January 1, 2007 and August 20, 2012, [Applicant] prescribed at least 19,409 dosage units of [s]chedule II [drugs], 725,760 dosage units of [s]chedule IV [drugs], and 246,397 dosage units of [s]chedule V [drugs], without the registered authority to do so." *Id.*¹

Thereafter, the Government attempted to serve the Show Cause Order by FedEx delivered to the proposed business address Applicant used when he applied for a registration in Los Angeles. GX 9, at 1. The Government did not, however, require a signature. *Id.* at 1-2. Moreover, the Government does not point to any precedent of either the courts or this Agency which allows for the use of FedEx to serve a charging document or complaint (as opposed to post-service filings) on a person.² Thus, this attempt was deemed inadequate to accomplish service.

The Government also noted that it emailed a lawyer who was representing Applicant "in a pending criminal matter" and asked him if he could

¹ The Show Cause Order also notified Applicant of his right to either request a hearing on the allegations of the Order to Show Cause or to submit a written statement while waiving his right to a hearing, the procedure for electing either option, and the consequence of failing to elect either option. GX 7, at 3.

² Nor am I aware of any rules of procedure which allow for a charging document or complaint to be served in this manner.

confirm Applicant's current address or accept service on Applicant's behalf. GX 10. The lawyer, however, did not respond. Request for Final Agency Action, at 3. Moreover, according to the Government, a Supervisory Diversion Investigator phoned the attorney and asked for Applicant's address in order to serve the Show Cause Order. *Id.* According to the Government, while the attorney stated that he would contact the Government's counsel, he did not.³ *Id.*

The Government then mailed the Show Cause Order by certified mail, return receipt requested, addressed to Applicant at his proposed business address in Wayne, Michigan. GX 11, 12, and 13. Several weeks later the mailing was returned unclaimed, with the Post Office indicating that it was "unable to forward" the mailing. GX 13. The Government did not, however, send the Show Cause Order to Applicant by First Class Mail. *See Jones v. Flowers*, 547 U.S. 220 (2006).

Subsequently, the Government submitted a Request for Final Agency Action along with the Investigative File. Upon review of the record, I found that service was inadequate and directed that the Request for Final Agency Action be returned.

On November 9, 2015, the Government again mailed the Show Cause Order by certified mail, return receipt requested, addressed to Applicant at his proposed registered location. Here again, several weeks later the mailing was returned by the Post Office as undeliverable. GX 18.

Also on November 9, 2015, the same day the Government had re-mailed the Show Cause Order, it emailed the Order to Applicant at the email address he had provided to the Agency on his applications. According to an affidavit submitted by the Government, it "did not receive any bounce-back email or other indication that the email . . . was undeliverable or otherwise not received." GX 19.

Upon re-submission of its Request for Final Agency Action, the Government advised that on September 24, 2015, Applicant was found guilty in the United States District Court for the Eastern District of Michigan on multiple counts of health care fraud and aiding and abetting the unlawful distribution of controlled substances. Request for Final Agency Action, at 4; *see also* GX 15, at 5). The Government further advised that on October 5, 2015,

³ Given that Applicant had been criminally charged and released on bond, the Pre-Trial Services Office would likely have been a more fruitful source for obtaining his residence address.

Applicant failed to appear for a bond hearing leading the District Court to issue a bench warrant for his arrest.

Based on the above, I find that the Government has satisfied its obligation under the Due Process Clause “to provide ‘notice reasonably calculated, under all the circumstances, to apprise interested parties of the pendency of the action and afford them an opportunity to present their objections.’” *Jones*, 547 U.S. at 226 (quoting *Mullane v. Central Hanover Bank & Trust Co.*, 339 U.S. 306, 314 (1950)). Due process does not, however, require actual notice, *Jones*, 547 U.S. at 226 (quoting *Dusenbery v. United States*, 534 U.S. 161, 170 (2002)), but rather, only “‘notice reasonably calculated, under all the circumstances, to apprise interested parties of the pendency of the action and afford them an opportunity to present their objections.’” *Id.* (quoting *Mullane*, 339 U.S. at 314). Moreover, the Government is not required to undertake “heroic efforts” to find an applicant. *Dusenbery*, 534 U.S. at 170 (2002).

Here, I conclude that Applicant’s secreting himself rendered the Government’s use of the traditional means of service futile, and that therefore, the Government was entitled to attempt to serve the Show Cause Order by emailing it to him at the email address he had previously provided to the Agency. See *Rio Properties, Inc. v. Rio Int’l Interlink*, 284 F.3d 1007, 1017–18 (9th Cir. 2002); see also *Snyder, et al. v. Alternate Energy Inc.*, 857 N.Y.S. 2d 442, 447–449 (N.Y. Civ. Ct. 2008); *In re International Telemedia Associates, Inc.*, 245 B.R. 713, 721–22 (Bankr. N.D. Ga. 2000).

To be sure, courts have recognized that the use of email to serve process has “its limitations,” including that “[i]n most instances, there is no way to confirm receipt of an email message.” *Rio Properties*, 284 F.3d at 1018. Here, however, I conclude that the use of email to serve Applicant satisfied due process because service was made to an email address he had previously provided to the Agency and the Government did not receive back either an error or undeliverable message. See *Richard C. Quigley, D.O.*, 79 FR 50945 (2014); *Emilio Luna, M.D.*, 77 FR 4829 (2012), see also *Robert Leigh Kale*, 76 FR 48898, 48899–900 (2011). Thus, I am satisfied that the Government has provided Applicant with notice “reasonably calculated . . . to apprise [him] of the pendency of the action” and to present his objections.⁴ *Jones*, 547

U.S. at 226 (quoting *Mullane*, 339 U.S. at 314).

Having found that the service of the Show Cause Order was constitutionally adequate, I turn to whether Applicant has waived his right to a hearing or to submit a written statement in lieu of a hearing. According to the Government, since the re-service of the Show Cause Order, neither Applicant, nor anyone purporting to represent him, has requested a hearing or submitted a written statement of position. Accordingly, as more than 30 days have now passed since the date of service, I find that Applicant has waived his right to a hearing or to submit a written statement. 21 CFR 1301.43(d). I therefore issue this Decision and Final Order based on relevant evidence contained in the Investigative Record submitted by the Government. *Id.* 1301.43(d) & (e). I make the following additional findings of fact.

Findings of Fact

Applicant previously held DEA Certificate of Registration BS9471309, pursuant to which he was authorized to dispense controlled substances in Schedules III and IIIN, at the registered address of Soliman Medical Center, 3152 South Wayne Road, Wayne, Michigan. GX 2, at 1. However, on September 14, 2012, the former Administrator issued an Order to Show Cause and Immediate Suspension of Registration to Applicant, based on allegations that he was prescribing controlled substances in Schedules II, IV, and V, for which he lacked authority, and that he also issued prescriptions for drug cocktails of hydrocodone (then Schedule III) and alprazolam (Schedule IV) which lacked a legitimate medical purpose. GX 3, at 1–2. The former Administrator also noted that of the 323 patient files DEA Investigators found in his trash, 143 of the patients had “criminal histories involving controlled substance violations.” *Id.* at 2. The same day, Applicant voluntarily surrendered his registration “in view of [his] alleged failure to comply with the Federal requirements pertaining to controlled substances.” GX 4, at 1.

Four days later, on September 21, 2012, Applicant submitted an application for a new registration as a practitioner in Schedules IIN, III, IIIN and IV at the registered address of 3152 South Wayne Road, Wayne, Michigan. The DEA Chief of Registration certified

that on his application, Applicant answered “No” to question 3, which asks: “[h]as the applicant ever surrendered (for cause) or had a federal controlled substance registration revoked, suspended, restricted or denied, or is any such action pending?” GX 1, at 1, 3. This application remains pending before the Agency. *Id.* at 1.

On October 1, 2012, Applicant submitted a second application for registration as a practitioner in Schedules III, IIIN, IV, and V, at the registered address of 3844 Wasatch Ave #4, Los Angeles, California. GX 8. The DEA Chief of Registration certified that on his application, Applicant answered “No” to the question, “Has the applicant ever surrendered (for cause) or had a federal controlled substance registration revoked, suspended, restricted or denied, or is any such action pending?” GX 8, at 2, 4.

On February 25, 2013, the Michigan Board of Medicine’s Disciplinary Subcommittee filed an Administrative Complaint against Applicant. GX 5, at 13. Based on a review of 20 patient charts, the Board alleged that his charting was lacking:

- (1) “information pertaining to past medical history or current treating clinicians”;
- (2) “any findings pertaining to pain assessment, level of dysfunction from pain, treatment plan, or diagnostic testing”;
- (3) “any documentation pertaining to patient informed consents, prescribing agreements, pain assessments, clinical documentation, drug analysis screens, lab test results, patient risk assessments, copies of previous medical records, or the implementation of a pain management program”; and
- (4) “any documentation that [he] monitored the patients’ use of the controlled substances for drug dependency or diversion, or that he verified the efficacy of the long term use of the controlled substances in treating the diagnoses of the patients.”

Id. at 10–11. The Board also alleged that the charts “lack[ed] documentation that [he] counselled the patients about the risk associated with being prescribed a combination of hydrocodone and alprazolam, or the long term effects of continued consumption of acetaminophen.” *Id.* Based on its findings, the Board alleged that Applicant had violated various provisions of Michigan law, and had engaged in “selling, prescribing, giving away, or administering drugs for other than lawful diagnostic or therapeutic purposes.” *Id.* at 12 (quoting Mich. Comp. Laws section 162221(c)(iv)).

On January 15, 2014, Applicant stipulated with the Board to the entry of a Consent Order, pursuant to which his medical license was suspended for six months and one day, effective February

⁴ Because Applicant is a fugitive, I need not decide whether the Government could have satisfied its constitutional obligation by simply re-

mailing the Show Cause Order to him by regular first class mail as the Supreme Court’s decision in *Jones v. Flowers* suggests. *Jones*, 547 U.S. at 234–35.

15, 2014.⁵ GX 5, at 1–3. However, the Consent Order also provided that the reinstatement of Applicant’s medical license “is not automatic and that he will have to petition for reinstatement” and show that he is of “good moral character,” that he has “the ability to practice . . . with reasonable skill and safety,” that he has satisfied “the guidelines on reinstatement,” and that the reinstatement of his license “is in the public interest.” *Id.* at 2. *See also* M.C.L.A. 333.16221.

To date, Applicant has not been reinstated. I therefore find that Applicant is currently without authority to dispense controlled substances in Michigan, one of the States in which he seeks registration.

Applicant also formerly held a Physician’s and Surgeon’s Certificate issued by the Medical Board of California. However, on October 10, 2014, the Medical Board revoked his Physician’s and Surgeon’s Certificate based on the Michigan Board of Medicine’s suspension of his Michigan medical license.

In its Request for Final Agency Action, the Government notes that the Order to Show Cause also sought to deny Applicant’s application for a DEA registration in California on the basis that the California Medical Board had revoked his medical license. Request for Final Agency Action, at 2 n.1. The Government, however, now advises that “subsequent to the issuance of the [Show Cause Order], the undersigned counsel learned that the . . . Los Angeles Field Division . . . withdrew [Applicant]’s application pursuant to 21 CFR 1301.16(b), which provides that ‘failure of the applicant to respond to official correspondence regarding the application, when sent by registered or certified mail, return receipt requested, shall be deemed to be a withdrawal of the application.’” *Id.* (quoting 21 CFR 1301.16(b)). The Government further explains that in December 2014, the Los Angeles Field Division “attempted to reach [Applicant] via certified mail at his application addresses in California and Michigan, [but] the certified letters were returned as unclaimed and undeliverable, and consequently, [his] application for a DEA Registration in California was ‘deemed’ a withdrawal and terminated in the registration database.” *Id.* at 2–3.

The Agency’s registration records (of which I take official notice, *see* 5 U.S.C. 556(e)), show that on December 5, 2014, Applicant was sent a letter requesting that he provide a valid California

Medical Board license number in order to process his pending application for registration. According to the affidavit of the then-chief of the Agency’s registration unit, on February 27, 2015, Applicant’s October 1, 2012, application for his proposed Los Angeles, California address was deemed “withdrawn and retired from the DEA computer system.” GX 8, at 1.

Discussion

Pursuant to section 303(f) of the Controlled Substances Act, “[t]he Attorney General shall register practitioners . . . to dispense . . . controlled substances . . . if the applicant is authorized to dispense controlled substances under the laws of the State in which he practices.” 21 U.S.C. 823(f). Section 303(f) further provides that an application for a practitioner’s registration may be denied upon a determination “that the issuance of such registration . . . would be inconsistent with the public interest.” *Id.* In making the public interest determination, the CSA requires the consideration of the following factors:

- (1) The recommendation of the appropriate State licensing board or appropriate disciplinary authority.
 - (2) The Applicant’s experience in dispensing . . . controlled substances.
 - (3) The Applicant’s conviction record under Federal or State laws relating to the manufacture, distribution, or dispensing of controlled substances.
 - (4) Compliance with applicable State, Federal, or local laws relating to controlled substances.
 - (5) Such other conduct which may threaten the public health and safety.
- Id.*

“These factors are . . . considered in the disjunctive.” *Robert A. Leslie, M.D.*, 68 FR 15227, 15230 (2003). I “may rely on any one or a combination of factors, and may give each factor the weight [I] deem[] appropriate in determining whether . . . an application for registration [should be] denied.” *Id.* Moreover, while I am required to consider each of the factors, I “need not make explicit findings as to each one.” *MacKay v. DEA*, 664 F.3d 808, 816 (10th Cir. 2011) (quoting *Volkman*, 567 F.3d 215, 222 (6th Cir. 2009) (quoting *Hoxie*, 419 F.3d 477, 482 (6th Cir. 2005))).⁶

In this case, I conclude that the record supports two independent grounds for

denying Applicant’s application for a DEA registration. First, Applicant does not possess authority under the laws of Michigan, the State in which he seeks registration with the Agency. Second, Applicant materially falsified his application for a DEA registration.

Applicant’s Lack of State Authority

Under the Controlled Substances Act (CSA), a practitioner must be currently authorized to handle controlled substances in “the jurisdiction in which he practices” in order to obtain a DEA registration. *See* 21 U.S.C. 823(f) (“The Attorney General shall register practitioners . . . if the applicant is authorized to dispense . . . controlled substances under the laws of the State in which he practices.”). *See also* 21 U.S.C. 802(21) (“[t]he term ‘practitioner’ means a physician . . . licensed, registered, or otherwise permitted, by . . . the jurisdiction in which he practices . . . to distribute, dispense, [or] administer . . . a controlled substance in the course of professional practice”). Moreover, the CSA authorizes the revocation of a registration “upon a finding that the registrant . . . has had his State license or registration suspended [or] revoked . . . and is no longer authorized by State law to engage in the . . . distribution [or] dispensing of controlled substances.” *Id.* section 824(a)(3). As the Supreme Court has explained, “[i]n the case of a physician, this scheme contemplates that he is authorized by the State to practice medicine and to dispense drugs in connection with his professional practice.” *United States v. Moore*, 423 U.S. 122, 140–41 (1975).

Based on these provisions, DEA has long and repeatedly held that the possession of state authority is a prerequisite for obtaining and maintaining a practitioner’s registration. *See Frederick Marsh Blanton, M.D.*, 43 FR 27616, 27617 (1978) (“State authorization to dispense or otherwise handle controlled substances is a prerequisite to the issuance and maintenance of a Federal controlled substances registration.”). *See also Sheran Arden Yeates*, 71 FR 39130, 39131 (2006); *Dominick A. Ricci*, 58 FR 51104, 51105 (1993); *Bobby Watts*, 53 FR 11919, 11920 (1988).

Here, the investigative file establishes that the Michigan Board suspended applicant’s medical license on February 15, 2014. Moreover, as found above, Applicant’s Michigan medical license remains suspended as of the date of this Decision and Order. I therefore find that Applicant is without authority to dispense controlled substances in

⁵ Applicant was not required to admit that the allegations were true. GX 5, at 3.

⁶ “In short, this is not a contest in which score is kept; the Agency is not required to mechanically count up the factors and determine how many favor the Government and how many favor the [applicant]. Rather, it is an inquiry which focuses on protecting the public interest; what matters is the seriousness of the [applicant’s] misconduct.” *Jayam Krishna-Iyer*, 74 FR 459, 462 (2009).

Michigan, the State in which he seeks registration. Because he does not meet this prerequisite for obtaining a DEA registration, I will deny his application on this basis.

Material Falsification

Pursuant to section 304(a)(1), the Attorney General is also authorized to suspend or revoke a registration “upon a finding that the registrant . . . has materially falsified any application filed pursuant to or required by this subchapter.” 21 U.S.C. 824(a)(1). It is well established that the various grounds for revocation or suspension of an existing registration that Congress enumerated in section 304(a), 21 U.S.C. 824(a), are also properly considered in deciding whether to grant or deny an application under section 303. *See The Lawsons, Inc.*, 72 FR 74334, 74337 (2007); *Anthony D. Funches*, 64 FR 14267, 14268 (1999); *Alan R. Schankman*, 63 FR 45260 (1998); *Kuen H. Chen*, 58 FR 65401, 65402 (1993).

Thus, the allegation that Applicant materially falsified his application is properly considered in this proceeding. *See Samuel S. Jackson*, 72 FR 23848, 23852 (2007). Moreover, just as materially falsifying an application provides a basis for revoking an existing registration without proof of any other misconduct, *see* 21 U.S.C. 824(a)(1), it also provides an independent and adequate ground for denying an application. *The Lawsons*, 72 FR 74338; *cf. Bobby Watts, M.D.*, 58 FR 46995 (1993).

Here, the Government’s evidence shows that upon being served with an Order to Show Cause and Immediate Suspension of Registration which alleged that he had prescribed controlled substances in violation of the CSA, Applicant surrendered his registration. GXs 3 & 4. Moreover, on the Voluntary Surrender form, Applicant acknowledged that he was doing so “[i]n view of my alleged failure to comply with the Federal requirements pertaining to controlled substances.” GX 4. Yet days later, Applicant applied for a new registration and provided a “no” answer to the question: “[h]as the applicant ever surrendered (for cause) or had a federal controlled substance registration revoked, suspended, restricted or denied, or is any such action pending?” GX 1, at 1, 3.

Applicant’s answer was false as he had clearly surrendered his registration for cause. His false answer was also material as “it ‘ha[d] a natural tendency to influence, or was capable of influencing, the decision of the decisionmaking body to which it was addressed.” *Kungys v. United States*,

485 U.S. 759, 770 (1988) (quoting *Weinstock v. United States*, 231 F.2d 699, 701 (D.C. Cir. 1956)) (other citation omitted); *see also United States v. Wells*, 519 U.S. 482, 489 (1997) (quoting *Kungys*, 485 U.S. at 770). As the Supreme Court has further explained, “it has never been the test of materiality that the misrepresentation or concealment would *more likely than not* have produced an erroneous decision, or even that it would *more likely than not* have triggered an investigation, but rather, whether the misrepresentation or concealment was predictably capable of affecting, *i.e.*, had a natural tendency to affect, the official decision.” *Kungys*, 485 U.S. at 771. While the evidence must be “clear, unequivocal, and convincing,” the “ultimate finding of materiality turns on an interpretation of the substantive law.” *Id.* at 772 (int. quotations and citations omitted).

Applicant’s false answer to the question of whether he had ever surrendered his federal registration was clearly “capable of affecting” the decision of whether to grant his application. As the evidence shows, Applicant surrendered his registration in response to allegations that he violated the CSA and DEA regulations by prescribing controlled substances that were in schedules for which he lacked authorization, as well as allegations that he issued prescriptions that lacked a legitimate medical purpose. GX 3, at 2 (Sept. 24, 2012 Immediate Suspension Order) (citing 21 U.S.C. 822(b) and 841(a)(1); 21 CFR 1301.12(a) and 1306.04(a)). Notably, under the public interest standard, the Agency is required to consider both the Applicant’s “experience in dispensing . . . controlled substances” and his “[c]ompliance with applicable State, Federal, or local laws relating to controlled substances.” 21 U.S.C. 823(f)(2) & (4). *See also Shannon L. Gallentine, D.P.M.*, 76 FR 45864, 45866 (2011).

Thus, notwithstanding that the Agency did not grant his application, his false answer was still material as it was capable of influencing the decision as to whether to grant his application. *See United States v. Alemany Rivera*, 781 F.2d 229, 234 (1st Cir. 1985) (“It makes no difference that a specific falsification did not exert influence so long as it had the capacity to do so.”); *United States v. Norris*, 749 F.2d 1116, 1121 (4th Cir. 1984) (“There is no requirement that the false statement influence or effect the decision making process of a department of the United States Government.”). Accordingly, I conclude that Applicant materially falsified his September 2012 application

for registration. This provides a further reason to deny his pending application.

Order

Pursuant to the authority vested in me by 21 U.S.C. 823(f) and 28 CFR 0.100(b), I order that the application of Mikhayl Soliman, M.D., for a DEA Certificate of Registration as a practitioner, be, and it hereby is, denied. This Order is effective immediately.

Dated: July 15, 2016.

Chuck Rosenberg,
Acting Administrator.

[FR Doc. 2016-17394 Filed 7-21-16; 8:45 am]

BILLING CODE 4410-09-P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

[Docket No. DEA-420P]

Proposed Adjustments to the Aggregate Production Quotas for Schedule I and II Controlled Substances and Assessment of Annual Needs for the List I Chemicals Ephedrine, Pseudoephedrine, and Phenylpropanolamine for 2016

AGENCY: Drug Enforcement Administration, Department of Justice.

ACTION: Notice with request for comments.

SUMMARY: The Drug Enforcement Administration (DEA) proposes to adjust the 2016 aggregate production quotas for several controlled substances in schedules I and II of the Controlled Substances Act and assessment of annual needs for the list I chemicals ephedrine, pseudoephedrine, and phenylpropanolamine.

DATES: Interested persons may file written comments on this notice in accordance with 21 CFR 1303.13(c) and 1315.13(d). Electronic comments must be submitted, and written comments must be postmarked, on or before August 22, 2016. Commenters should be aware that the electronic Federal Docket Management System will not accept comments after 11:59 p.m. Eastern Time on the last day of the comment period.

Based on comments received in response to this notice, the Administrator may hold a public hearing on one or more issues raised. In the event the Administrator decides in his sole discretion to hold such a hearing, the Administrator will publish a notice of any such hearing in the **Federal Register**. After consideration of any comments or objections, or after a hearing, if one is held, the Administrator will publish in the

Federal Register a final order establishing the 2016 adjusted aggregate production quotas for schedule I and II controlled substances, and an assessment of annual needs for the list I chemicals ephedrine, pseudoephedrine, and phenylpropanolamine.

ADDRESSES: To ensure proper handling of comments, please reference "Docket No. DEA-420P" on all correspondence, including any attachments. The Drug Enforcement Administration encourages that all comments be submitted electronically through the Federal eRulemaking Portal which provides the ability to type short comments directly into the comment field on the Web page or attach a file for lengthier comments. Please go to <http://www.regulations.gov> and follow the online instructions at that site for submitting comments. Upon completion of your submission you will receive a Comment Tracking Number for your comment. Please be aware that submitted comments are not instantaneously available for public view on [Regulations.gov](http://www.regulations.gov). If you have received a Comment Tracking Number, your comment has been successfully submitted and there is no need to resubmit the same comment. Paper comments that duplicate electronic submissions are not necessary and are discouraged. Should you wish to mail a paper comment *in lieu* of an electronic comment, it should be sent via regular or express mail to: Drug Enforcement Administration, Attention: DEA Federal Register Representative/ODW, 8701 Morrisette Drive, Springfield, Virginia 22152.

FOR FURTHER INFORMATION CONTACT:

Michael J. Lewis, Office of Diversion Control, Drug Enforcement Administration; Mailing Address: 8701 Morrisette Drive, Springfield, Virginia 22152, Telephone: (202) 598-6812.

SUPPLEMENTARY INFORMATION:

Posting of Public Comments

Please note that all comments received in response to this docket are considered part of the public record. They will, unless reasonable cause is given, be made available by the Drug Enforcement Administration (DEA) for public inspection online at <http://www.regulations.gov>. Such information includes personal identifying information (such as your name, address, etc.) voluntarily submitted by the commenter.

The Freedom of Information Act (FOIA) applies to all comments received. If you want to submit personal identifying information (such as your name, address, etc.) as part of your

comment, but do not want it to be made publicly available, you must include the phrase "PERSONAL IDENTIFYING INFORMATION" in the first paragraph of your comment. You must also place all the personal identifying information you do not want made publicly available in the first paragraph of your comment and identify what information you want redacted.

If you want to submit confidential business information as part of your comment, but do not want it to be made publicly available, you must include the phrase "CONFIDENTIAL BUSINESS INFORMATION" in the first paragraph of your comment. You must also prominently identify confidential business information to be redacted within the comment.

Comments containing personal identifying information or confidential business information identified and located as directed above will generally be made available in redacted form. If a comment contains so much confidential business information or personal identifying information that it cannot be effectively redacted, all or part of that comment may not be made publicly available. Comments posted to <http://www.regulations.gov> may include any personal identifying information (such as name, address, and phone number) included in the text of your electronic submission that is not identified as directed above as confidential.

An electronic copy of this document is available at <http://www.regulations.gov> for easy reference.

Legal Authority and Background

Section 306 of the Controlled Substances Act (CSA) (21 U.S.C. 826) requires the Attorney General to establish aggregate production quotas for each basic class of controlled substance listed in schedules I and II and for the list I chemicals ephedrine, pseudoephedrine, and phenylpropanolamine. The Attorney General has delegated this function to the Administrator of the DEA pursuant to 28 CFR 0.100.

The DEA established the 2016 aggregate production quotas for substances in schedules I and II and the assessment of annual needs for the list I chemicals ephedrine, pseudoephedrine, and phenylpropanolamine on October 6, 2015 (80 FR 60400). That notice stipulated that, in accordance with 21 CFR 1303.13 and 1315.13, all aggregate production quotas and assessments of annual need are subject to adjustment.

Analysis for Proposed Adjusted 2016 Aggregate Production Quotas and Assessment of Annual Needs

The DEA proposes to adjust the established 2016 aggregate production quotas and assessment of annual needs for certain schedule I and II controlled substances, and the list I chemicals ephedrine, pseudoephedrine, and phenylpropanolamine, to be manufactured in the United States in 2016 to provide for the estimated medical, scientific, research, and industrial needs of the United States, for lawful export requirements, and for the establishment and maintenance of reserve stocks. These quotas do not include imports of controlled substances for use in industrial processes.

In determining the proposed adjustment, the Acting Administrator has taken into account the criteria in accordance with 21 CFR 1303.13 (adjustment of aggregate production quotas for controlled substances) and 21 CFR 1315.13 (adjustment of the assessment of annual needs for ephedrine, pseudoephedrine, and phenylpropanolamine). The DEA determined whether to propose an adjustment of the aggregate production quotas and assessment of annual needs for 2016 by considering: (1) Changes in the demand for that class or chemical, changes in the national rate of net disposal of the class or chemical, and changes in the rate of net disposal of the class or chemical by registrants holding individual manufacturing quotas for the class; (2) whether any increased demand for that class or chemical, the national and/or individual rates of net disposal of that class or chemical are temporary, short term, or long term; (3) whether any increased demand for that class or chemical can be met through existing inventories, increased individual manufacturing quotas, or increased importation, without increasing the aggregate production quota; (4) whether any decreased demand for that class or chemical will result in excessive inventory accumulation by all persons registered to handle that class or chemical; and (5) other factors affecting medical, scientific, research, and industrial needs in the United States and lawful export requirements, as the Acting Administrator finds relevant. These quotas do not include imports of controlled substances for use in industrial processes.

The Acting Administrator also considered updated information obtained from 2015 year-end inventories, 2015 disposition data submitted by quota applicants,

estimates of the medical needs of the United States, product development, and other information made available to the DEA after the initial aggregate production quotas and assessment of annual needs had been established. Other factors the Acting Administrator considered in calculating the aggregate production quotas, but not the assessment of annual needs, include product development requirements of both bulk and finished dosage form manufacturers, and other pertinent information. In determining the proposed adjusted 2016 assessment of annual needs, the DEA used the calculation methodology previously described in the 2010 and 2011 established assessment of annual needs (74 FR 60294, Nov. 20, 2009, and 75 FR 79407, Dec. 20, 2010, respectively).

As described in the previously published notice establishing the 2016 aggregate production quotas and assessment of annual needs, the DEA has specifically considered that

inventory allowances granted to individual manufacturers, 21 CFR 1303.24, may not always result in the availability of sufficient quantities to maintain an adequate reserve stock pursuant to 21 U.S.C. 826(a), as intended. This would be concerning if a natural disaster or other unforeseen event resulted in substantial disruption to the amount of controlled substances available to provide for legitimate public need. As such, the DEA has included in all proposed adjusted schedule II controlled substance aggregate production quotas, and certain proposed adjusted schedule I controlled substance aggregate production quotas, an additional 25% of the estimated medical, scientific, and research needs as part of the amount necessary to ensure the establishment and maintenance of reserve stocks. The resulting adjusted established aggregate production quotas will reflect these included amounts. This action will not affect the ability of manufacturers to

maintain inventory allowances as specified by regulation. The DEA expects that maintaining this reserve in certain established aggregate production quotas will mitigate adverse public effects if an unforeseen event resulted in substantial disruption to the amount of controlled substances available to provide for legitimate public need, as determined by the DEA. The DEA does not anticipate utilizing the reserve in the absence of these circumstances.

The Acting Administrator, therefore, proposes that the year 2016 aggregate production quotas for the two temporarily scheduled substances be established, and to adjust the 2016 aggregate production quotas for certain schedule I and II controlled substances and assessment of annual needs for the list I chemicals ephedrine, pseudoephedrine, and phenylpropanolamine, expressed in grams of anhydrous acid or base, as follows:

Basic class	Established 2016 quotas	Proposed revised 2016 quotas
	(g)	(g)
Temporarily Scheduled Substances		
<i>beta</i> -Hydroxythiofentanyl	N/A	30.
Butyryl fentanyl	N/A	30.
Schedule I		
[1-(5-fluoropentyl)-1H-indazol-3-yl](naphthalen-1-yl)methanone (THJ-2201)	15	no change.
1-(1-Phenylcyclohexyl)pyrrolidine	10	no change.
1-(5-Fluoropentyl)-3-(1-naphthoyl)indole (AM2201)	45	no change.
1-(5-Fluoropentyl)-3-(2-iodobenzoyl)indole (AM694)	45	no change.
1-[1-(2-Thienyl)cyclohexyl]piperidine	15	no change.
1-[2-(4-Morpholinyl)ethyl]-3-(1-naphthoyl)indole (JWH-200)	45	no change.
1-Benzylpiperazine	25	no change.
1-Butyl-3-(1-naphthoyl)indole (JWH-073)	45	no change.
1-Cyclohexylethyl-3-(2-methoxyphenylacetyl)indole (SR-18 and RCS-8)	45	no change.
1-Hexyl-3-(1-naphthoyl)indole (JWH-019)	45	no change.
1-Methyl-4-phenyl-4-propionoxypiperidine	2	no change.
1-Pentyl-3-(1-naphthoyl)indole (JWH-018 and AM678)	45	no change.
1-Pentyl-3-(2-chlorophenylacetyl)indole (JWH-203)	45	no change.
1-Pentyl-3-(2-methoxyphenylacetyl)indole (JWH-250)	45	no change.
1-Pentyl-3-(4-chloro-1-naphthoyl)indole (JWH-398)	45	no change.
1-Pentyl-3-(4-methyl-1-naphthoyl)indole (JWH-122)	45	no change.
1-Pentyl-3-[(4-methoxy)benzoyl]indole (SR-19, RCS-4)	45	no change.
1-Pentyl-3-[1-(4-methoxynaphthoyl)]indole (JWH-081)	45	no change.
2-(2,5-Dimethoxy-4-ethylphenyl)ethanamine (2C-E)	30	no change.
2-(2,5-Dimethoxy-4-methylphenyl)ethanamine (2C-D)	30	no change.
2-(2,5-Dimethoxy-4-nitro-phenyl)ethanamine (2C-N)	30	no change.
2-(2,5-Dimethoxy-4-n-propylphenyl)ethanamine (2C-P)	30	no change.
2-(2,5-Dimethoxyphenyl)ethanamine (2C-H)	30	no change.
2-(4-Bromo-2,5-dimethoxyphenyl)-N-(2-methoxybenzyl)ethanamine (25B-NBOMe; 2C-B-NBOMe; 25B; Cimbi-36)	25	no change.
2-(4-Chloro-2,5-dimethoxyphenyl)ethanamine (2C-C)	30	no change.
2-(4-Chloro-2,5-dimethoxyphenyl)-N-(2-methoxybenzyl)ethanamine (25C-NBOMe; 2C-C-NBOMe; 25C; Cimbi-82)	25	no change.
2-(4-Iodo-2,5-dimethoxyphenyl)ethanamine (2C-I)	30	no change.
2-(4-Iodo-2,5-dimethoxyphenyl)-N-(2-methoxybenzyl)ethanamine (25I-NBOMe; 2C-I-NBOMe; 25I; Cimbi-5)	15	no change.
2,5-Dimethoxy-4-ethylamphetamine (DOET)	25	no change.
2,5-Dimethoxy-4-n-propylthiophenethylamine	25	no change.
2,5-Dimethoxyamphetamine	25	no change.

Basic class	Established 2016 quotas	Proposed revised 2016 quotas
	(g)	(g)
2-[4-(Ethylthio)-2,5-dimethoxyphenyl]ethanamine (2C-T-2)	30	no change.
2-[4-(Isopropylthio)-2,5-dimethoxyphenyl]ethanamine (2C-T-4)	30	no change.
3,4,5-Trimethoxyamphetamine	25	no change.
3,4-Methylenedioxyamphetamine (MDA)	55	no change.
3,4-Methylenedioxymethamphetamine (MDMA)	50	no change.
3,4-Methylenedioxy-N-ethylamphetamine (MDEA)	40	no change.
3,4-Methylenedioxy-N-methylcathinone (methylole)	50	no change.
3,4-Methylenedioxypropylvalerone (MDPV)	35	no change.
3-FMC; 3-Fluoro-N-methylcathinone	25	no change.
3-Methylfentanyl	2	no change.
3-Methylthiofentanyl	2	no change.
4-Bromo-2,5-dimethoxyamphetamine (DOB)	25	no change.
4-Bromo-2,5-dimethoxyphenethylamine (2-CB)	25	no change.
4-FMC; Flephedrone	25	no change.
4-Methoxyamphetamine	150	no change.
4-Methyl-2,5-dimethoxyamphetamine (DOM)	25	no change.
4-Methylaminorex	25	no change.
4-MEC; 4-Methyl-N-ethylcathinone	25	no change.
4-Methyl-N-methylcathinone (mephedrone)	45	no change.
4-Methyl- α -pyrrolidinopropiophenone (4-MePPP)	25	no change.
5-(1,1-Dimethylheptyl)-2-[(1R,3S)-3-hydroxycyclohexyl]-phenol	68	50.
5-(1,1-Dimethyloctyl)-2-[(1R,3S)-3-hydroxycyclohexyl]-phenol (cannabicyclohexanol or CP-47,497 C8-homolog)	53	40.
5-Fluoro-UR144, XLR11	25	no change.
5-Methoxy-3,4-methylenedioxyamphetamine	25	no change.
5-Methoxy-N,N-diisopropyltryptamine	25	no change.
5-Methoxy-N,N-dimethyltryptamine	25	no change.

Ethylmorphine	3	5.
Etorphine hydrochloride	3	no change.
Fentanyl	2,300,000	no change.
Glutethimide	3	no change.
Hydrocodone (for conversion)	235,000	177,500.
Hydrocodone (for sale)	88,500,000	86,000,000.
Hydromorphone	8,250,000	7,000,000.
Isomethadone	5	no change.
Levo-alphaacetylmethadol (LAAM)	4	no change.
Levomethorphan	30	33.
Levorphanol	7,125	no change.
Lisdexamfetamine	29,750,000	23,750,000.
Meperidine	5,450,000	4,632,500.
Meperidine Intermediate-A	6	no change.

Basic class	Established 2016 quotas	Proposed revised 2016 quotas
	(g)	(g)
Meperidine Intermediate-B	11	no change.
Meperidine Intermediate-C	6	no change.
Metazocine	19	no change.
Methadone (for sale)	31,875,000	no change.
Methadone Intermediate	34,375,000	no change.
Methamphetamine	2,061,375	no change.
[1,250,000 grams of levo-desoxyephedrine for use in a non-controlled, non-prescription product; 750,000 grams for methamphetamine mostly for conversion to a schedule III product; and 61,375 grams for methamphetamine (for sale)]		
Methylphenidate	96,750,000	84,375,000.
Morphine (for conversion)	91,250,000	no change.
Morphine (for sale)	62,500,000	no change.
Nabilone	18,750	no change.
Noroxymorphone (for conversion)	17,500,000	no change.
Noroxymorphone (for sale)	1,475,000	625,000.
Opium (powder)	112,500	no change.
Opium (tincture)	687,500	375,000.
Oripavine	30,000,000	no change.
Oxycodone (for conversion)	6,250,000	5,000,000.
Oxycodone (for sale)	139,150,000	no change.
Oxymorphone (for conversion)	29,000,000	25,000,000.
Oxymorphone (for sale)	7,750,000	6,250,000.
Pentobarbital	38,125,000	no change.
Phenazocine	6	no change.
Phencyclidine	50	no change.
Phenmetrazine	3	no change.
Phenylacetone	50	no change.
Racemethorphan	3	5.
Racemorphan	3	no change.
Remifentanyl	3,750	no change.
Secobarbital	215,003	no change.
Sufentanyl	6,255	no change.
Tapentadol	25,500,000	no change.
Thebaine	125,000,000	no change.
List I Chemicals		
Ephedrine (for conversion)	100,000	50,000.
Ephedrine (for sale)	4,000,000	no change.
Phenylpropanolamine (for conversion)	22,400,000	15,000,000.
Phenylpropanolamine (for sale)	8,500,000	no change.
Pseudoephedrine (for conversion)	7,000	40.
Pseudoephedrine (for sale)	224,500,000	200,000,000.

The Acting Administrator further proposes that aggregate production quotas for all other schedule I and II controlled substances included in 21 CFR 1308.11 and 1308.12 remain at zero. In accordance with 21 CFR 1303.13 and 21 CFR 1315.13, upon consideration of the relevant factors, the Acting Administrator may adjust the 2016 aggregate production quotas and assessment of annual needs as needed.

Conclusion

After consideration of any comments or objections, or after a hearing, if one is held, the Acting Administrator will issue and publish in the **Federal Register** a final order establishing any adjustment of 2016 aggregate production quota for each basic class of controlled substances in schedules I and II and

established assessment of annual needs for the list I chemicals ephedrine, pseudoephedrine, and phenylpropanolamine, 21 CFR 1303.13(c) and 1315.13(f).

Dated: July 14, 2016.
Chuck Rosenberg,
Acting Administrator.

BILLING CODE 4410-09-P

DEPARTMENT OF JUSTICE

Notice of Charter Renewal

AGENCY: Justice Department.
ACTION: Notice of Charter Renewal of the Executive Advisory Board of the National Domestic Communications Assistance Center.

SUMMARY: In accordance with the provisions of the Federal Advisory Committee Act, title 5, United States Code, Appendix, and title 41 of the U.S. Code of Federal Regulations, section 101-6.1015, notice is hereby given that the Charter of the National Domestic Communications Assistance Center (NDCAC) Executive Advisory Board (EAB) has been renewed. The Charter is on file with the General Services Administration. The Attorney General determined that the NDCAC EAB is in the public interest and is necessary in connection with the performance of duties of the United States Department of Justice. These duties can best be performed through the advice and counsel of this group.

The purpose of the EAB is to provide advice and recommendations to the

Attorney General or designee, and to the Director of the NDCAC that promote public safety and national security by advancing the NDCAC's core functions: law enforcement coordination with respect to technical capabilities and solutions, technology sharing, industry relations, and implementation of the Communications Assistance for Law Enforcement Act (CALEA). The EAB consists of 15 voting members from Federal, State, local and tribal law enforcement agencies. Additionally, there are two non-voting members as follows: a federally-employed attorney assigned full time to the NDCAC to serve as a legal advisor to the EAB, and the DOJ Chief Privacy Officer or designee to ensure that privacy and civil rights and civil liberties issues are fully considered in the EAB's recommendations. The EAB is composed of eight State, local, and/or tribal representatives and seven federal representatives.

The EAB functions solely as an advisory body in compliance with the provisions of the Federal Advisory Committee Act. The Charter has been filed in accordance with the provisions of the Act.

Alice Bardney-Boose,

Designated Federal Officer, National Domestic Communication Assistance Center, Executive Advisory Board.

BILLING CODE 4410-02-P

DEPARTMENT OF JUSTICE

Notice of Lodging of Consent Decree Under the Clean Air Act

On July 18, 2016, the Department of Justice lodged a proposed Consent Decree with the United States District Court for the Western District of Texas in *United States, et al. v. Tesoro Refining & Marketing Co. LLC et al.* Civil Action No. SA-16-cv-00722.

The Consent Decree settles claims brought by the United States, states of Alaska and Hawaii, and the Northwest Clean Air Agency against Tesoro Refining & Marketing Co. LLC, Tesoro Alaska Co. LLC, Tesoro Logistics L.P., and Par Hawaii Refining, LLC for violations of the Clean Air Act, federal regulations promulgated thereunder, and various state regulations and permits at six petroleum refineries located in Kenai, Alaska; Martinez, California; Kapolei, Hawaii; Mandan, North Dakota; Salt Lake City, Utah; and Anacortes, Washington. Under the Consent Decree, Defendants will undertake extensive measures to correct the alleged violations, pay a civil

penalty of \$10,450 to the United States and state co-plaintiffs, and perform three projects to mitigate excess emissions associated with the violations.

The publication of this notice opens a period for public comment on the proposed Consent Decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, and should refer to *United States et al. v. Tesoro Refining & Marketing Co. LLC et al.*, D.J. Ref. No. 90-5-2-1-09512/1. All comments must be submitted no later than thirty (30) days after the publication date of this notice. Comments may be submitted either by email or by mail:

To submit comments:	Send them to:
By email	pubcomment-ees.enrd@usdoj.gov .
By mail	Assistant Attorney General, U.S. DOJ—ENRD, P.O. Box 7611, Washington, DC 20044-7611.

During the public comment period, the Consent Decree may be examined and downloaded at this Justice Department Web site: <https://www.justice.gov/enrd/consent-decrees>. We will provide a paper copy of the Consent Decree upon written request and payment of reproduction costs. Please mail your request and payment to: Consent Decree Library, U.S. DOJ—ENRD, P.O. Box 7611, Washington, DC 20044-7611.

Please enclose a check or money order for \$59.75 (25 cents per page reproduction cost) payable to the United States Treasury.

Jeffrey Sands,

Assistant Section Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

BILLING CODE 4410-15-P

DEPARTMENT OF JUSTICE

Office of Justice Programs

[OJP (OJJDP) Docket No. 1718]

Webinar Meeting of the Federal Advisory Committee on Juvenile Justice

AGENCY: Office of Juvenile Justice and Delinquency Prevention, Justice.

ACTION: Notice of webinar meeting.

SUMMARY: The Office of Juvenile Justice and Delinquency Prevention (OJJDP) has scheduled a webinar meeting of the

Federal Advisory Committee on Juvenile Justice (FACJJ).

DATES: The webinar meeting will take place online on Tuesday, August 2, 2016, at 1:00 p.m. ET.

FOR FURTHER INFORMATION CONTACT: Jeff Slowikowski, Designated Federal Official, OJJDP, Jeff.Slowikowski@usdoj.gov or (202) 616-3646. [This is not a toll-free number.]

SUPPLEMENTARY INFORMATION: FACJJ, established pursuant to Section 3(2)A of the Federal Advisory Committee Act (5 U.S.C. App.2), will meet to carry out its advisory functions under Section 223(f)(2)(C-E) of the Juvenile Justice and Delinquency Prevention Act of 2002. The FACJJ is composed of representatives from the states and territories. FACJJ member duties include: Reviewing Federal policies regarding juvenile justice and delinquency prevention; advising the OJJDP Administrator with respect to particular functions and aspects of OJJDP; and advising the President and Congress with regard to State perspectives on the operation of OJJDP and Federal legislation pertaining to juvenile justice and delinquency prevention. More information on the FACJJ may be found at www.facjj.org.

Meeting Agenda: The proposed agenda includes: (a) Opening Introductions, and Webinar Logistics; (b) Remarks of Robert L. Listenbee, Administrator, OJJDP; (c) FACJJ Subcommittee Reports (Legislation; Expungement/Sealing of Juvenile Court Records; Research/Publications; LGBT); (d) FACJJ Administrative Business; and (e) Summary, Next Steps, and Meeting Adjournment.

To participate in or view the webinar meeting, FACJJ members and the public must pre-register online. Members and interested persons must link to the webinar registration portal through www.facjj.org, no later than Wednesday, July 27, 2016. Upon registration, information will be sent to you at the email address you provide to enable you to connect to the webinar. Should problems arise with webinar registration, please call Callie Long Murray at 571-308-6617. [This is not a toll-free telephone number.] Note: Members of the public will be able to listen to and view the webinar as observers, but will not be able to participate actively in the webinar.

An on-site room is available for members of the public interested in viewing the webinar in person. If members of the public wish to view the webinar in person, they must notify Melissa Kanaya by email message at

Melissa.Kanaya@usdoj.gov no later than Friday, July 29, 2016.

FACJJ members will not be physically present in Washington, DC for the webinar. They will participate in the webinar from their respective home jurisdictions.

Written Comments: Interested parties may submit written comments by email message in advance of the webinar to Jeff Slowikowski, Designated Federal Official, at Jeff.Slowikowski@usdoj.gov, no later than Wednesday, July 27, 2016. In the alternative, interested parties may fax comments to 202-307-2819 and contact Melissa Kanaya at 202-532-0121 to ensure that they are received. [These are not toll-free numbers.]

Robert L. Listenbee,

Administrator, Office of Juvenile Justice and Delinquency Prevention.

BILLING CODE 4410-18-P

DEPARTMENT OF LABOR

Office of the Secretary

Agency Information Collection Activities; Submission for OMB Review; Comment Request; National Longitudinal Survey of Youth 1979

ACTION: Notice.

SUMMARY: The Department of Labor (DOL) is submitting the Bureau of Labor Statistics (BLS) sponsored information collection request (ICR) revision titled, "National Longitudinal Survey of Youth 1979," to the Office of Management and Budget (OMB) for review and approval for use in accordance with the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501 *et seq.*). Public comments on the ICR are invited.

DATES: The OMB will consider all written comments that agency receives on or before August 22, 2016.

ADDRESSES: A copy of this ICR with applicable supporting documentation; including a description of the likely respondents, proposed frequency of response, and estimated total burden may be obtained free of charge from the RegInfo.gov Web site at http://www.reginfo.gov/public/do/PRAViewICR?ref_nbr=201605-1220-001 this link will only become active on the day following publication of this notice) or by contacting Michel Smyth by telephone at 202-693-4129, TTY 202-693-8064, (these are not toll-free numbers) or sending an email to DOL_PRA_PUBLIC@dol.gov.

Submit comments about this request by mail or courier to the Office of

Information and Regulatory Affairs, Attn: OMB Desk Officer for DOL-BLS, Office of Management and Budget, Room 10235, 725 17th Street NW., Washington, DC 20503; by Fax: 202-395-5806 (this is not a toll-free number); or by email: OIRA_submission@omb.eop.gov. Commenters are encouraged, but not required, to send a courtesy copy of any comments by mail or courier to the U.S. Department of Labor-OASAM, Office of the Chief Information Officer, Attn: Departmental Information Compliance Management Program, Room N1301, 200 Constitution Avenue NW., Washington, DC 20210; or by email: DOL_PRA_PUBLIC@dol.gov.

FOR FURTHER INFORMATION CONTACT:

Contact Michel Smyth by telephone at 202-693-4129, TTY 202-693-8064, (these are not toll-free numbers) or sending an email to DOL_PRA_PUBLIC@dol.gov.

Authority: 44 U.S.C. 3507(a)(1)(D).

SUPPLEMENTARY INFORMATION: This ICR seeks approval under the PRA for revisions to the National Longitudinal Survey of Youth 1979 (NLSY79). The NLSY79 is a representative national sample of persons who were born in the years 1957 to 1964 and lived in the U.S. in 1978. These respondents were ages 14 to 22 when the first round of interviews began in 1979; they will be ages 51 to 58 when the planned round twenty-seven of interviews is conducted in 2016 and 2017. The NLSY79 was conducted annually from 1979 to 1994 and has been conducted biennially since 1994. The longitudinal focus of this survey requires information to be collected from the same individuals over many years in order to trace their education, training, work experience, fertility, income, and program participation. In addition to the main NLSY79, the biological children of female NLSY79 respondents have been surveyed since 1986. A battery of child cognitive, socio-emotional, and physiological assessments has been administered biennially since 1986 to NLSY79 mothers and their children. Starting in 1994, children who had reached age 15 by December 31, of the survey year (the Young Adults) were interviewed about their work experiences, training, schooling, health, fertility, self-esteem, and other topics. By 2016, the sample includes very few children age 14 and under and so we will no longer conduct a separate child survey; children age 12 and older will join the Young Adults. The Young Adult group will include 1,492 respondents ages 12-22 and 5,178 respondents age 23 and older in Round

27. One DOL goal is to produce and disseminate timely, accurate, and relevant information about the U.S. labor force. The BLS contributes to this goal by gathering information about the labor force and labor market and disseminating it to policymakers and the public so that participants in those markets can make more informed, and thus more efficient, choices. Research based on the NLSY79 contributes to the formation of national policy in the areas of education, training, employment programs, and school-to-work transitions. The BLS has undertaken a continuing redesign effort to examine the current content of the NLSY79 and provide direction for changes that may be appropriate as the respondents age. The 2016 instrument reflects a number of changes recommended by experts in various fields of social science and by our own internal review of the survey's content. Additions to the questionnaire are accompanied by deletions of previous questions that largely offset the burden as compared to 2014. The BLS Authorizing Statute authorizes this information collection. See 29 U.S.C. 1 and 2.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6. The DOL obtains OMB approval for this information collection under Control Number 1220-0109. The current approval is scheduled to expire on September 30, 2016; however, the DOL notes that existing information collection requirements submitted to the OMB receive a month-to-month extension while they undergo review. New requirements would only take effect upon OMB approval. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on March 29, 2016 (81 FR 17496).

Interested parties are encouraged to send comments to the OMB, Office of Information and Regulatory Affairs at the address shown in the **ADDRESSES** section within thirty (30) days of publication of this notice in the **Federal Register**. In order to help ensure appropriate consideration, comments should mention OMB Control Number

1220-0109. The OMB is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Agency: DOL-BLS.

Title of Collection: National Longitudinal Survey of Youth 1979.

OMB Control Number: 1220-0109.

Affected Public: Individuals or Households.

Total Estimated Number of Respondents: 12,545.

Total Estimated Number of Responses: 12,555.

Total Estimated Annual Time Burden: 13,964 hours.

Total Estimated Annual Other Costs Burden: \$0.

Dated: July 15, 2016.

Michel Smyth,

Departmental Clearance Officer.

[FR Doc. 2016-17252 Filed 7-21-16; 8:45 am]

BILLING CODE 4510-24-P

DEPARTMENT OF LABOR

Office of the Secretary

Agency Information Collection Activities; Submission for OMB Review; Comment Request; Petition for Finding Under Employee Retirement Income Security Act Section 3(40)

ACTION: Notice.

SUMMARY: The Department of Labor (DOL) is submitting the Employee Benefits Security Administration (EBSA) sponsored information collection request (ICR) titled, "Petition for Finding Under Employee Retirement Income Security Act Section 3(40)," to the Office of Management and Budget (OMB) for review and approval for continued use, without change, in

accordance with the Paperwork Reduction Act of 1995 (PRA), 44 U.S.C. 3501 *et seq.* Public comments on the ICR are invited.

DATES: The OMB will consider all written comments that agency receives on or before August 22, 2016.

ADDRESSES: A copy of this ICR with applicable supporting documentation; including a description of the likely respondents, proposed frequency of response, and estimated total burden may be obtained free of charge from the RegInfo.gov Web site at http://www.reginfo.gov/public/do/PRAViewICR?ref_nbr=201605-1210-006 (this link will only become active on the day following publication of this notice) or by contacting Michel Smyth by telephone at 202-693-4129, TTY 202-693-8064, (these are not toll-free numbers) or by email at DOL_PRA_PUBLIC@dol.gov.

Submit comments about this request by mail or courier to the Office of Information and Regulatory Affairs, Attn: OMB Desk Officer for DOL-EBSA, Office of Management and Budget, Room 10235, 725 17th Street NW., Washington, DC 20503; by Fax: 202-395-5806 (this is not a toll-free number); or by email: OIRA_submission@omb.eop.gov. Commenters are encouraged, but not required, to send a courtesy copy of any comments by mail or courier to the U.S. Department of Labor-OASAM, Office of the Chief Information Officer, Attn: Departmental Information Compliance Management Program, Room N1301, 200 Constitution Avenue NW., Washington, DC 20210; or by email: DOL_PRA_PUBLIC@dol.gov.

FOR FURTHER INFORMATION CONTACT: Contact Michel Smyth by telephone at 202-693-4129, TTY 202-693-8064, (these are not toll-free numbers) or by email at DOL_PRA_PUBLIC@dol.gov.

Authority: 44 U.S.C. 3507(a)(1)(D).

SUPPLEMENTARY INFORMATION: This ICR seeks to extend PRA authority for the Petition for Finding Under Employee Retirement Income Security Act (ERISA) section 3(40) (29 U.S.C. 1002(40)) information collection. Regulations 29 CFR 2570.150 *et seq.* provide procedures for an entity against whom State jurisdiction has been asserted to petition the Secretary to make a finding under ERISA section 3(40)(A)(i) (29 U.S.C. 1002(40)(A)(i)) that the entity is established or maintained under or pursuant to one or more collective bargaining agreements. The regulations establish procedures for initiating an administrative proceeding before the Office of Administrative Law Judges (OALJ) and establish that an OALJ

decision shall constitute a finding under ERISA section 3(40)(A)(i). The regulations also provide for an appeal of an OALJ decision to the Secretary. ERISA sections 3(40) and 505 authorize this information collection. See 29 U.S.C. 1002(40), 1135.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6. The DOL obtains OMB approval for this information collection under Control Number 1210-0119.

OMB authorization for an ICR cannot be for more than three (3) years without renewal, and the current approval for this collection is scheduled to expire on July 31, 2016. The DOL seeks to extend PRA authorization for this information collection for three (3) more years, without any change to existing requirements. The DOL notes that existing information collection requirements submitted to the OMB receive a month-to-month extension while they undergo review. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on November 23, 2015 (80 FR 72990).

Interested parties are encouraged to send comments to the OMB, Office of Information and Regulatory Affairs at the address shown in the **ADDRESSES** section within thirty (30) days of publication of this notice in the **Federal Register**. In order to help ensure appropriate consideration, comments should mention OMB Control Number 1210-0119. The OMB is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who

are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Agency: DOL–EBSA.

Title of Collection: Petition for Finding Under Employee Retirement Income Security Act Section 3(40).

OMB Control Number: 1210–0119.

Affected Public: Private Sector—businesses or other for-profits and not-for-profit institutions.

Total Estimated Number of Respondents: 10.

Total Estimated Number of Responses: 10.

Total Estimated Annual Time Burden: 50 hours.

Total Estimated Annual Other Costs Burden: \$41,000.

Dated: July 15, 2016.

Michel Smyth,

Departmental Clearance Officer.

[FR Doc. 2016–17253 Filed 7–21–16; 8:45 am]

BILLING CODE 4510–29–P

NATIONAL SCIENCE FOUNDATION

Agency Information Collection Activities: Comment Request

AGENCY: National Science Foundation.

ACTION: Submission for OMB Review; Comment Request.

SUMMARY: The National Science Foundation (NSF) has submitted the following information collection requirement to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104–13. This is the second notice for public comment; the first was published in the **Federal Register** at 81 FR 31668, and no comments were received. NSF is forwarding the proposed submission to the Office of Management and Budget (OMB) for clearance simultaneously with the publication of this second notice. The full submission (including comments) may be found at: <http://www.reginfo.gov/public/do/PRAMain>.

Comments: Comments regarding (a) whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility and clarity of the information to be collected; (d) ways to minimize the burden of the collection of

information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology should be addressed to: Office of Information and Regulatory Affairs of OMB, Attention: Desk Officer for National Science Foundation, 725 17th Street NW., Room 10235, Washington, DC 20503, and to Suzanne H. Plimpton, Reports Clearance Officer, National Science Foundation, 4201 Wilson Boulevard, Suite 1265, Arlington, Virginia 22230 or send email to splimpto@nsf.gov. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339, which is accessible 24 hours a day, 7 days a week, 365 days a year (including federal holidays).

DATES: Comments regarding these information collections are best assured of having their full effect if received within 30 days of this notification. Copies of the submission(s) may be obtained by calling 703–292–7556.

NSF may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

SUPPLEMENTARY INFORMATION:

Title of Collection: Grantee Reporting Requirements for Materials Research Science and Engineering Centers (MRSECs).

OMB Number: 3145–0230.

Type of Request: Intent to seek approval to renew an information collection.

Overview of This Information Collection: The Materials Research Science and Engineering Centers (MRSECs) Program supports innovation in interdisciplinary research, education, and knowledge transfer. MRSECs build intellectual and physical infrastructure within and between disciplines, weaving together knowledge creation, knowledge integration, and knowledge transfer. MRSECs conduct world-class research through partnerships of academic institutions, national laboratories, industrial organizations, and/or other public/private entities. New knowledge thus created is meaningfully linked to society.

MRSECs enable and foster excellent education, integrate research and education, and create bonds between

learning and inquiry so that discovery and creativity more fully support the learning process. MRSECs capitalize on diversity through participation in center activities and demonstrate leadership in the involvement of groups underrepresented in science and engineering.

MRSECs are required to submit annual reports on progress and plans, which are used as a basis for performance review and determining the level of continued funding. To support this review and the management of a Center, MRSECs are required to develop a set of management and performance indicators for submission annually to NSF via the Research Performance Project Reporting module in *Research.gov* and an external technical assistance contractor that collects programmatic data electronically. These indicators are both quantitative and descriptive and may include, for example, the characteristics of center personnel and students; sources of financial support and in-kind support; expenditures by operational component; characteristics of industrial and/or other sector participation; research activities; education activities; knowledge transfer activities; patents, licenses; publications; degrees granted to students involved in Center activities; descriptions of significant advances and other outcomes of the MRSEC effort. Such reporting requirements are included in the cooperative agreement that is binding between the academic institution and the NSF.

Each Center's annual report will address the following categories of activities: (1) Research, (2) education, (3) knowledge transfer, (4) partnerships, (5) shared experimental facilities, (6) diversity, (7) management, and (8) budget issues.

For each of the categories the report will describe overall objectives for the year, problems the Center has encountered in making progress towards goals, anticipated problems in the following year, and specific outputs and outcomes.

MRSECs are required to file a final report through the RPPR and external technical assistance contractor. Final reports contain similar information and metrics as annual reports, but are retrospective.

Use of the Information: NSF will use the information to continue funding of the Centers, and to evaluate the progress of the program.

Estimate of Burden: 185 hours per center for 21 centers for a total of 3,885 hours.

Respondents: Non-profit institutions.

Estimated Number of Responses per Report: One from each of the 21 MRSECS.

Dated: July 19, 2016.

Suzanne H. Plimpton,

Reports Clearance Officer, National Science Foundation.

BILLING CODE 7555-01-P

NUCLEAR REGULATORY COMMISSION

[NRC-2016-0140]

Information Collection: Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery

AGENCY: Nuclear Regulatory Commission.

ACTION: Extension of existing information collection; request for comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) invites public comment on the extension of Office of Management and Budget's (OMB) approval for an existing collection of information. The information collection is entitled, "Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery."

DATES: Submit comments by September 20, 2016. Comments received after this date will be considered if it is practical to do so, but the Commission is able to ensure consideration only for comments received on or before this date.

ADDRESSES: You may submit comments by any of the following methods:

- *Federal Rulemaking Web site:* Go to <http://www.regulations.gov> and search for Docket ID NRC-2016-0140. Address questions about NRC dockets to Carol Gallagher; telephone: 301-415-3463; email: Carol.Gallagher@nrc.gov. For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- *Mail comments to:* David Cullison, Office of the Chief Information Officer, Mail Stop: T-5 F53, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001.

For additional direction on obtaining information and submitting comments, see "Obtaining Information and Submitting Comments" in the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: David Cullison, Office of the Chief Information Officer, U.S. Nuclear

Regulatory Commission, Washington, DC 20555-0001; telephone: 301-415-2084; email: INFOCOLLECTS.Resource@NRC.GOV.

SUPPLEMENTARY INFORMATION:

I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC-2016-0140 when contacting the NRC about the availability of information for this action. You may obtain publicly-available information related to this action by any of the following methods:

- *Federal rulemaking Web site:* Go to <http://www.regulations.gov> and search for Docket ID NRC-2016-0140.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly-available documents online in the ADAMS Public Documents collection at <http://www.nrc.gov/reading-rm/adams.html>. To begin the search, select "ADAMS Public Documents" and then select "Begin Web-based ADAMS Search." For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1-800-397-4209, 301-415-4737, or by email to pdr.resource@nrc.gov. The supporting statement is available in ADAMS under Accession No. ML16189A416.

- *NRC's PDR:* You may examine and purchase copies of public documents at the NRC's PDR, Room O1-F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

- *NRC's Clearance Officer:* A copy of the collection of information and related instructions may be obtained without charge by contacting the NRC's Clearance Officer, David Cullison, Office of the Chief Information Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001; telephone: 301-415-2084; email: INFOCOLLECTS.Resource@NRC.GOV.

B. Submitting Comments

Please include Docket ID NRC-2016-0140 in your comment submission.

The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC will post all comment submissions at <http://www.regulations.gov> as well as enter the comment submissions into ADAMS. The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should

inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Background

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the NRC is requesting public comment on its intention to request OMB's approval for the information collection summarized below.

1. *The title of the information collection:* Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery.

2. *OMB approval number:* 3150-0217.

3. *Type of submission:* Extension.

4. *The form number, if applicable:* Not applicable.

5. *How often the collection is required or requested:* On occasion and annually.

6. *Who will be required or asked to respond:* Individuals and households; businesses and organizations; State, Local, or Tribal governments.

7. *The estimated number of annual responses:* 4,200.

8. *The estimated number of annual respondents:* 4,200.

9. *The estimated number of hours needed annually to comply with the information collection requirement or request:* 1,087.5.

10. *Abstract:* The information collection activity will garner qualitative customer and stakeholder feedback in an efficient, timely manner, for the purpose of improving service delivery. By qualitative feedback we mean information that provides useful insights on perceptions and opinions, but are not statistical surveys that yield quantitative results that can be generalized to the population of study. This feedback will provide insights into customer or stakeholder perceptions, experiences and expectations, provide an early warning of issues with service, or focus attention on areas where communication, training or changes in operations might improve delivery of products or services. These collections will allow for ongoing, collaborative and actionable communications between the Agency and its customers and stakeholders. It will also allow feedback to contribute directly to the improvement of program management. Feedback collected under this generic clearance will provide useful information, but it will not yield data

that can be generalized to the overall population. This type of generic clearance for qualitative information will not be used for quantitative information collections that are designed to yield reliably actionable results, such as monitoring trends over time or documenting program performance. Such data uses require more rigorous designs that address: The target population to which generalizations will be made, the sampling frame, the sample design (including stratification and clustering), the precision requirements or power calculations that justify the proposed sample size, the expected response rate, methods for assessing potential nonresponse bias, the protocols for data collection, and any testing procedures that were or will be undertaken prior to fielding the study. Depending on the degree of influence the results are likely to have, such collections may still be eligible for submission for other generic mechanisms that are designed to yield quantitative results.

III. Specific Requests for Comments

The NRC is seeking comments that address the following questions:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility?
2. Is the estimate of the burden of the information collection accurate?
3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?
4. How can the burden of the information collection on respondents be minimized, including the use of automated collection techniques or other forms of information technology?

Dated at Rockville, Maryland, this 18th day of July, 2016.

For the Nuclear Regulatory Commission.

David Cullison,

NRC Clearance Officer, Office of the Chief Information Officer.

[FR Doc. 2016-17345 Filed 7-21-16; 8:45 am]

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[NRC-2008-0441]

Virgil C. Summer Nuclear Station, Units 2 and 3

AGENCY: Nuclear Regulatory Commission.

ACTION: Determination of the successful completion of inspections, tests, and analyses.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) staff has determined that the inspections, tests, and analyses have been successfully completed, and that the specified acceptance criteria are met for multiple inspections, tests, analyses, and acceptance criteria (ITAAC) for the Virgil C. Summer Nuclear Station (VCSNS), Units 2 and 3.

ADDRESSES: Please refer to Docket ID NRC-2008-0441 when contacting the NRC about the availability of information regarding this document. You may obtain publicly-available information related to this document using any of the following methods:

- *Federal Rulemaking Web site:* Go to <http://www.regulations.gov> and search for Docket ID NRC-2008-0441. Address questions about NRC dockets to Carol Gallagher; telephone: 301-415-3463; email: Carol.Gallagher@nrc.gov. For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at <http://www.nrc.gov/reading-rm/adams.html>. To begin the search, select "ADAMS Public Documents" and then select "Begin Web-based ADAMS Search." For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1-800-397-4209, 301-415-4737, or by email to pdr.resource@nrc.gov. The ADAMS accession number for each document referenced in this document (if that document is available in ADAMS) is provided the first time that a document is referenced.

- *NRC's PDR:* You may examine and purchase copies of public documents at the NRC's PDR, Room O1-F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

FOR FURTHER INFORMATION CONTACT: Billy Gleaves, Office of New Reactors, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001; telephone: 301-415-5848; email: Bill.Gleaves@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Licensee Notification of Completion of ITAAC

South Carolina Electric & Gas (SCE&G), on behalf of itself and the South Carolina Public Service Authority, (both hereafter called the licensee) has submitted ITAAC closure notifications (ICNs) under § 52.99(c)(1) of title 10 of the *Code of Federal Regulations* (10 CFR), informing the

NRC that the licensee has successfully performed the required inspections, tests, and analyses, and that the acceptance criteria are met for:

VCSNS Unit 2 ITAAC

2.1.02.08a.i (28), 2.1.02.08a.ii (29), 2.2.03.08c.vi.01 (189), 2.2.03.08c.vi.02 (190), 2.5.02.13 (552), 3.1.00.01 (733), C.3.8.01.04.01 (848), C.3.8.01.05.01.01 (849), C.3.8.01.05.02.01 (857), and C.3.8.01.05.02.02 (858)

VCSNS Unit 3 ITAAC

2.1.02.08a.i (28), 2.1.02.08a.ii (29), 2.1.03.11 (86), 2.2.03.08c.vi.01 (189), 2.2.03.08c.vi.02 (190), 2.5.02.13 (552), 3.1.00.01 (733), C.3.8.01.04.01 (848), C.3.8.01.05.01.01 (849), C.3.8.01.05.02.01 (857), and C.3.8.01.05.02.02 (858)

The ITAAC for VCSNS Unit 2 are in Appendix C of the VCSNS Unit 2 combined license (ADAMS Accession No. ML14100A092). The ITAAC for VCSNS Unit 3 are in Appendix C of VCSNS Unit 3 combined license (ADAMS Accession No. ML14100A101).

II. NRC Staff Determination of Completion of ITAAC

The NRC staff has determined that the specified inspections, tests, and analyses have been successfully completed, and that the specified acceptance criteria are met. The documentation of the NRC staff's determination is in the ITAAC Closure Verification Evaluation Form (VEF) for each ITAAC. The VEF is a form that represents the NRC staff's structured process for reviewing ICNs. Each ICN presents a narrative description of how the ITAAC was completed. The NRC's ICN review process involves a determination on whether, among other things: (1) Each ICN provides sufficient information, including a summary of the methodology used to perform the ITAAC, to demonstrate that the inspections, tests, and analyses have been successfully completed; (2) each ICN provides sufficient information to demonstrate that the acceptance criteria of the ITAAC are met; and (3) any NRC inspections for the ITAAC have been completed and any ITAAC findings associated with that ITAAC have been closed.

The NRC staff's determination of the successful completion of these ITAAC is based on information available at this time and is subject to the licensee's ability to maintain the condition that the acceptance criteria are met. If the staff receives new information that suggests the staff's determination on any of these ITAAC is incorrect, then the staff will determine whether to reopen

that ITAAC (including withdrawing the staff's determination on that ITAAC). The NRC staff's determination will be used to support a subsequent finding, pursuant to 10 CFR 52.103(g), at the end of construction that all acceptance criteria in the combined license are met. The ITAAC closure process is not finalized for these ITAAC until the NRC makes an affirmative finding under 10 CFR 52.103(g). Any future updates to the status of these ITAAC will be reflected on the NRC's Web site at <http://www.nrc.gov/reactors/new-reactors/oversight/itaac.html>.

This notice fulfills the staff's obligations under 10 CFR 52.99(e)(1) to publish a notice in the **Federal Register** of the NRC staff's determination of the successful completion of inspections, tests and analyses.

Virgil C. Summer Nuclear Station Unit 2, Docket No. 5200027

A complete list of the review status for VCSNS Unit 2 ITAAC, including the submission date and ADAMS accession number for each ICN received, the ADAMS accession number for each VEF, and the ADAMS accession numbers for the inspection reports associated with these specific ITAAC, can be found on the NRC's Web site at <http://www.nrc.gov/reactors/new-reactors/new-licensing-files/sum2-icnsr.pdf>.

Virgil C. Summer Nuclear Station Unit 3, Docket No. 5200028

A complete list of the review status for VCSNS Unit 3 ITAAC, including the submission date and ADAMS accession number for each ICN received, the ADAMS accession number for each VEF, and the ADAMS accession numbers for the inspection reports associated with these specific ITAAC, can be found on the NRC's Web site at <http://www.nrc.gov/reactors/new-reactors/new-licensing-files/sum3-icnsr.pdf>.

Dated at Rockville, Maryland, this 11th day of July 2016.

For the Nuclear Regulatory Commission.

Jennifer Dixon-Herrity,

Acting Chief, Licensing Branch 4, Division of New Reactor Licensing, Office of New Reactors.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 52-027 and 52-028; NRC-2008-0441]

Virgil C. Summer Nuclear Station, Units 2 and 3; South Carolina Electric & Gas Company; South Carolina Public Service Authority; Increased Concrete Thickness Tolerance for Column Line J-1 and J-2 Walls Above 66'6"

AGENCY: Nuclear Regulatory Commission.

ACTION: Exemption and combined license amendment; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is granting an exemption to allow a change to the certification information of Tier 1 of the generic design control document (DCD) and issuing License Amendment No. 47 to Combined Licenses (COL), NPF-93 and NPF-94. The COLs were issued to the South Carolina Electric & Gas Company (SCE&G) and the South Carolina Public Service Authority (together called the licensee) in March 2012, for the construction and operation of the Virgil C. Summer Nuclear Station (VCSNS), Units 2 and 3, located in Fairfield County, South Carolina. The granting of the exemption allows the changes to Tier 1 information requested in the license amendment request. Because the acceptability of the exemption was determined in part by the acceptability of the amendment, the exemption and amendment are being issued concurrently.

DATES: The exemption and combined license amendment referenced in this document are available on July 22, 2016.

ADDRESSES: Please refer to Docket ID NRC-2008-0441 when contacting the NRC about the availability of information regarding this document. You may obtain publicly-available information related to this document using any of the following methods:

- *Federal Rulemaking Web site:* Go to <http://www.regulations.gov> and search for Docket ID NRC-2008-0441. Address questions about NRC dockets to Carol Gallagher; telephone: 301-415-3463; email: Carol.Gallagher@nrc.gov. For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly-available documents online in the ADAMS Public Documents collection at <http://www.nrc.gov/reading-rm/>

adams.html. To begin the search, select "ADAMS Public Documents" and then select "Begin Web-Based ADAMS Search." For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1-800-397-4209, 301-415-4737, or by email to pdr.resource@nrc.gov. The ADAMS accession number for each document referenced (if it is available in ADAMS) is provided the first time that a document is referenced. The request for the amendment and exemption was submitted by the letter dated January 14, 2016 (ADAMS Accession No. ML16015A058). The licensee supplemented this request by letter dated February 22, 2016 (ADAMS Accession No. ML16053A405).

- *NRC's PDR:* You may examine and purchase copies of public documents at the NRC's PDR, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852. Specific information on NRC's PDR is available at <http://www.nrc.gov/reading-rm/pdr.html>.

FOR FURTHER INFORMATION CONTACT: William (Billy) Gleaves, Sr. Project Manager, Office of New Reactors, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001; telephone: 301-415-5848; email: Bill.Gleaves@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Introduction

In a letter dated January 14, 2016, and revised on February 22, 2016, the licensee requested a license amendment and exemption (ADAMS Accession Nos. ML16015A058 and ML16053A405). The NRC is granting an exemption from Tier 1 information in the certified DCD incorporated by reference in part 52 of title 10 of the *Code of Federal Regulations* (10 CFR), appendix D, "Design Certification Rule for the AP1000 Design," and issuing License Amendment No. 47 to COLs NPF-93 and NPF-94. The exemption is required by paragraph A.4 of section VIII, "Processes for Changes and Departures," appendix D to 10 CFR part 52 to allow the licensee to change Tier 1 information. With the requested amendment, the licensee sought proposed changes related to the plant-specific Tier 1 information. The Tier 1 information for which a plant-specific exemption is being requested includes plant-specific Tier 1, Table 3.3-1 to change the tolerance for the concrete thickness of the column line J-1 and J-2 walls from ± 1 inch to a tolerance of -1 inch and $+4$ inch for a length of 24 inches at the interface of these reinforced concrete walls to structural module connections at the column line

4 structural module wall (*i.e.*, the north wall of the CA20 module) and authorizes changes to COL Updated Final Safety Analysis Report (UFSAR) Subsection 3.8.4.1.2 to provide a basis for the revision to plant-specific Tier 1 information. The license amendment request contained proposed changes to plant-specific Tier 1, COL Appendix C, and UFSAR Tier 2 text.

Part of the justification for granting the exemption was provided by the review of the amendment. Because the exemption is necessary in order to issue the requested license amendment, the NRC granted the exemption and issued the amendment concurrently, rather than in sequence. This included issuing a combined safety evaluation containing the NRC staff's review of both the exemption request and the license amendment. The exemption met all applicable regulatory criteria set forth in 10 CFR 50.12, 10 CFR 52.7, and 10 CFR 52.63(b)(1). The license amendment was found to be acceptable as well. The combined safety evaluation is available in ADAMS under Accession No. ML16099A189.

Identical exemption documents (except for referenced unit numbers and license numbers) were issued to the licensee for VCSNS Units 2 and 3 (COLs NPF-93 and NPF-94). These documents can be found in ADAMS under Accession Nos. ML16099A308 and ML16099A311, respectively. The exemption is reproduced (with the exception of abbreviated titles and additional citations) in Section II of this document. The amendment documents for COLs NPF-93 and NPF-94 are available in ADAMS under Accession Nos. ML16099A304 and ML16099A257, respectively. A summary of the amendment documents is provided in Section III of this document.

II. Exemption

The following is the exemption document issued to VCSNS, Units 2 and 3. It makes reference to the combined safety evaluation that provides the reasoning for the findings made by the NRC (and listed under Item 1) in order to grant the exemption:

1. In a letter dated January 14, 2016, and revised by letter dated February 11, 2016, the South Carolina Electric & Gas Company (SC&G/licensee) requested from the Nuclear Regulatory Commission (NRC/Commission) an exemption to allow changes from Tier 1 information in the plant-specific Tier 1 to the certified AP1000 Design, Tier 1 information, incorporated by reference in title 10 of the *Code of Federal Regulations* (10 CFR) part 52, appendix D, "Design Certification Rule for the

AP1000 Design," as part of license amendment request (LAR) 15-20, "Increased Concrete Thickness Tolerance for Column Line J-1 and J-2 Walls above 66'-6".

For the reasons set forth in Section 3.1 of the NRC staff's Safety Evaluation that supports this license amendment, which can be found at Agencywide Documents Access and Management System (ADAMS) Accession Number ML16099A189, the Commission finds that:

A. The exemption is authorized by law;

B. the exemption presents no undue risk to public health and safety;

C. the exemption is consistent with the common defense and security;

D. special circumstances are present in that the application of the rule in this circumstance is not necessary to serve the underlying purpose of the rule;

E. the special circumstances outweigh any decrease in safety that may result from the reduction in standardization caused by the exemption, and

F. the exemption will not result in a significant decrease in the level of safety otherwise provided by the design.

2. Accordingly, the licensee is granted an exemption from the certified AP1000 Design Control Document Tier 1 information, as described in the licensee's request dated January 14, 2016, and revised by letter dated February 11, 2016. This exemption is related to, and necessary for, the granting of License Amendment No. 47, which is being issued concurrently with this exemption.

3. As explained in Section 5 of the NRC staff's Safety Evaluation that supports this license amendment (ADAMS Accession Number ML16099A189), this exemption meets the eligibility criteria for categorical exclusion set forth in 10 CFR 51.22(c)(9). Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment needs to be prepared in connection with the issuance of the exemption

4. This exemption is effective as of the date of its issuance.

III. License Amendment Request

The request for the amendment and exemption was submitted by the letter dated January 14, 2016, and supplemented by letter dated February 11, 2016. The proposed amendment is described in Section I.

The Commission has determined for these amendments that the application complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations.

The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR chapter I, which are set forth in the license amendment.

A notice of consideration of issuance of amendment to facility operating license or combined license, as applicable, proposed no significant hazards consideration determination, and opportunity for a hearing in connection with these actions, was published in the **Federal Register** on March 10, 2016 (81 FR 12751). No comments were received during the 30-day comment period.

The NRC staff has found that the amendment involves no significant hazards consideration. The Commission has determined that these amendments satisfy the criteria for categorical exclusion in accordance with 10 CFR 51.22(c)(9). Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for these amendments. The supplement, dated February 11, 2016, provided additional information that clarified the application, did not expand the scope of the application as originally noticed, and did not change the staff's original proposed no significant hazards consideration determination as published in the **Federal Register**.

IV. Conclusion

Using the reasons set forth in the combined safety evaluation, the staff granted the exemption and issued the amendment that the licensee requested on January 14, 2016, and supplemented by letter dated February 11, 2016. The exemption and amendment were issued on March 31, 2015, as part of a combined package to the licensee (ADAMS Accession No. ML16099A153).

Dated at Rockville, Maryland, this 11th day of July 2016.

For the Nuclear Regulatory Commission.

Jennifer Dixon-Herrity,

Acting Chief, Licensing Branch 4, Division of New Reactor Licensing, Office of New Reactors.

[FR Doc. 2016-17387 Filed 7-21-16; 8:45 am]

BILLING CODE 7590-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-78353; File No. SR-BOX-2016-32]

Self-Regulatory Organizations; BOX Options Exchange LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Extend the Pilot Programs That Permit the Exchange to Have No Minimum Size Requirement for Orders Entered Into the PIP and COPIP

July 18, 2016.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”),¹ and Rule 19b-4 thereunder,² notice is hereby given that on July 11, 2016, BOX Options Exchange LLC (the “Exchange”) filed with the Securities and Exchange Commission (“Commission”) the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule from interested persons.

I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to extend the pilot programs that permit the Exchange to have no minimum size requirement for orders entered into the PIP (“PIP Pilot Program”) and COPIP (“COPIP Pilot Program”). The text of the proposed rule change is available from the principal office of the Exchange, at the Commission’s Public Reference Room and also on the Exchange’s Internet Web site at <http://boxexchange.com>.

II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to extend the PIP and COPIP Pilot Programs for an additional six months or until the date on which the pilot programs are approved on a permanent basis, whichever is earlier. The PIP and COPIP Pilot Programs are currently set to expire on July 18, 2016. The PIP and COPIP Pilot Programs allow the Exchange to have no minimum size requirement for orders entered into the PIP³ and the COPIP.⁴ The Exchange

³ The PIP Pilot Program is currently set to expire on July 18, 2016. See Securities Exchange Act Release Nos. 66871 (April 27, 2012) 77 FR 26323 (May 3, 2012) (File No. 10-206, In the Matter of the Application of BOX Options Exchange LLC for Registration as a National Securities Exchange Findings, Opinion, and Order of the Commission), 67255 (June 26, 2012) 77 FR 39315 (July 2, 2013) (SR-BOX-2012-009) (Notice of Filing and Immediate Effectiveness of a Proposal To Extend a Pilot Program That Permits BOX to Have No Minimum Size Requirement for Orders Entered Into the Price Improvement Period), 69846 (June 25, 2013) 78 FR 39365 (July 1, 2013) (SR-BOX-2013-33) (Notice of Filing and Immediate Effectiveness of a Proposal To Extend a Pilot Program That Permits BOX to Have No Minimum Size Requirement for Orders Entered Into the Price Improvement Period), 72545 (July 7, 2014) 79 FR 40182 (July 11, 2014) (SR-BOX-2014-19) (Notice of Filing and Immediate Effectiveness of a Proposed Rule Change to Amend Interpretive Material to Rule 7150 (Price Improvement Period “PIP”) and Interpretive Material to Rule 7245 (Complex Order Price Improvement Period “COPIP”)), 73314 (October 7, 2014) 79 FR 61682 (October 14, 2014) (SR-BOX-2014-23) (Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Extend the Pilot Programs That Permit the Exchange To Have No Minimum Size Requirement for Orders Entered Into the PIP (“PIP Pilot Program”) and COPIP (“COPIP Pilot Program”) Until December 18, 2014), 73831 (December 12, 2014) 79 FR 75211 (December 17, 2014) (SR-BOX-2014-27) (Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Interpretive Material to Rule 7150 and Interpretive Material to Rule 7245 To Extend the Pilot Period That Permit the Exchange To Have No Minimum Size Requirement for Orders Entered Into the PIP and COPIP Until July 18, 2015), and 75480 (July 17, 2015) 80 FR 43803 (July 23, 2016) (SR-BOX-2015-27) (Notice of Filing and Immediate Effectiveness of a Proposed Rule Change to Extend the Pilot Programs that Permit the Exchange to Have No Minimum Size Requirement for Orders Entered into the PIP and COPIP Until July 18, 2016).

⁴ The COPIP Pilot Program is currently set to expire on July 18, 2016. See Securities Exchange Act Release Nos. 71148 (December 19, 2013) 78 FR 78437 (December 26, 2013) (SR-BOX-2014-23) (Notice of Filing of Amendment Nos. 1 and 2 and Order Granting Accelerated Approval of a Proposed Rule Change, as Modified by Amendment Nos. 1 and 2, to Permit Complex Orders to Participate in Price Improvement Periods), 72545 (July 7, 2014) 79 FR 40182 (July 11, 2014) (SR-BOX-2014-19) (Notice of Filing and Immediate Effectiveness of a Proposed Rule Change to Amend Interpretive Material to Rule 7150 (Price Improvement Period “PIP”) and Interpretive Material to Rule 7245 (Complex Order Price Improvement Period

has been providing certain data to the Commission during the PIP and COPIP Pilot Programs. The proposed rule change retains the text of IM-7150-1 to Rule 7150 and IM-7245-1 to Rule 7245; and seeks to extend the operation of the PIP and COPIP Pilot Programs until January 18, 2017.

The Exchange notes that the PIP and COPIP Pilot Programs permit Participants to trade with their customer orders that are less than 50 contracts. In particular, any order entered into the PIP is guaranteed an execution at the end of the auction at a price at least equal to the national best bid or offer. Any order entered into the COPIP is guaranteed an execution at the end of the auction at a price at least equal to or better than the cNBBO,⁵ cBBO⁶ and BBO on the Complex Order Book for the Strategy at the time of commencement.

The Exchange believes that extending the pilot period is appropriate because it will allow the Exchange the Commission additional time to analyze data regarding the PIP and COPIP Pilot Programs that the Exchange has committed to provide. As such, the Exchange believes that it is appropriate to extend the current operation of the Pilot Programs. The Exchange continues to believe that there remains meaningful competition for all size orders and there is significant price improvement for all orders executed through the PIP and COPIP; and that there is an active and liquid market functioning on the Exchange outside the PIP and COPIP auctions.

“COPIP”), 73314 (October 7, 2014) 79 FR 61682 (October 14, 2014) (SR-BOX-2014-23) (Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Extend the Pilot Programs That Permit the Exchange To Have No Minimum Size Requirement for Orders Entered Into the PIP (“PIP Pilot Program”) and COPIP (“COPIP Pilot Program”) Until December 18, 2014), 73831 (December 12, 2014) 79 FR 75211 (December 17, 2014) (SR-BOX-2014-27) (Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Interpretive Material to Rule 7150 and Interpretive Material to Rule 7245 To Extend the Pilot Period That Permit the Exchange To Have No Minimum Size Requirement for Orders Entered Into the PIP and COPIP Until July 18, 2015), and 75480 (July 17, 2015) 80 FR 43803 (July 23, 2016) (SR-BOX-2015-27) (Notice of Filing and Immediate Effectiveness of a Proposed Rule Change to Extend the Pilot Programs that Permit the Exchange to Have No Minimum Size Requirement for Orders Entered into the PIP and COPIP Until July 18, 2016).

⁵ As defined in BOX Rule 7240(a)(3), the term “cNBBO” means the best net bid and offer price for a Complex Order Strategy based on the NBBO for the individual options components of such Strategy.

⁶ As defined in BOX Rule 7240(a)(1), the term “cBBO” means the best net bid and offer price for a Complex Order Strategy based on the BBO on the BOX Book for the individual options components of such Strategy.

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

2. Statutory Basis

The Exchange believes that the proposal is consistent with the requirements of Section 6(b) of the Act,⁷ in general, and Section 6(b)(5) of the Act,⁸ in particular, in that it is designed to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism for a free and open market and a national market system and, in general, to protect investors and the public interest. The Exchange believes that the data demonstrates that there is sufficient investor interest and demand to extend the PIP and COPIP Pilot Programs for an additional six months or until the date on which the pilot programs are approved on a permanent basis, whichever is earlier. The Exchange represents that the PIP and COPIP Pilot Programs are designed to create tighter markets and ensure that each order receives the best possible price.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. Specifically, the Exchange believes that, by extending the expiration of the PIP and COPIP Pilot Programs, the proposed rule change will allow additional time to analyze data regarding the PIP and COPIP Pilot Programs that the Exchange has committed to provide.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange has neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act⁹ and

subparagraph (f)(6) of Rule 19b-4 thereunder.¹⁰

A proposed rule change filed under Rule 19b-4(f)(6)¹¹ normally does not become operative for 30 days after the date of filing. However, pursuant to Rule 19b-4(f)(6)(iii),¹² the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange requested that the Commission waive the 30-day operative delay. The Exchange stated that the current PIP and COPIP Pilot Programs are set to expire on July 18, 2016. The Exchange stated that a waiver will permit the PIP and COPIP Pilot Programs to continue without interruption.

The Commission believes that waiving the 30-day operative delay is consistent with the protection of investors and the public interest, as it will allow the PIP and COPIP Pilot Programs to continue uninterrupted, thereby avoiding any potential investor confusion that could result from a temporary interruption in the pilot. Therefore, the Commission designates the proposed rule change to be operative on July 18, 2016.¹³

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File Number SR-BOX-2016-32 on the subject line.

¹⁰ 17 CFR 240.19b-4(f)(6). In addition, Rule 19b-4(f)(6) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

¹¹ 17 CFR 240.19b-4(f)(6).

¹² 17 CFR 240.19b-4(f)(6)(iii).

¹³ For purposes only of waiving the operative delay, the Commission has considered the proposed rule's impact on efficiency, competition, and capital formation. See 15 U.S.C. 78c(f).

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549-1090.

All submissions should refer to File Number SR-BOX-2016-32. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-BOX-2016-32 and should be submitted on or before August 12, 2016.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹⁴

Robert W. Errett,
Deputy Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[File No. 500-1]

In the Matter of Scanner Technologies Corp., Seville Ventures Corp., StarInvest Group, Inc., and The Digital Development Group Corp.; Order of Suspension of Trading

July 20, 2016.

It appears to the Securities and Exchange Commission ("Commission")

¹⁴ 17 CFR 200.30-3(a)(12).

⁷ 15 U.S.C. 78f(b).

⁸ 15 U.S.C. 78f(b)(5).

⁹ 15 U.S.C. 78s(b)(3)(a).

that there is a lack of current and accurate information concerning the securities of Scanner Technologies Corp. (“SCNI 1”) (CIK No. 217222), a revoked New Mexico corporation located in Minneapolis, Minnesota with a class of securities registered with the Commission pursuant to Securities Exchange Act of 1934 (“Exchange Act”) Section 12(g) because it is delinquent in its periodic filings with the Commission, having not filed any periodic reports since it filed a Form 10-Q for the period ended September 30, 2008. On January 29, 2016, the Commission’s Division of Corporation Finance (“Corporation Finance”) sent a delinquency letter to SCNI requesting compliance with its periodic filing requirements but SCNI did not receive the delinquency letter due to its failure to maintain a valid address on file with the Commission as required by Commission rules (Rule 301 of Regulation S-T, 17 CFR 232.301 and Section 5.4 of EDGAR Filer Manual) (“Commission Issuer Address Rules”). As of July 14, 2016, the common stock of SCNI was quoted on OTC Link operated by OTC Markets Group Inc. (formerly “Pink Sheets”) (“OTC Link”), had four market makers, and was eligible for the “piggyback” exception of Exchange Act Rule 15c2-11(f)(3).

It appears to the Commission that there is a lack of current and accurate information concerning the securities of Seville Ventures Corp. (“SVLE”) (CIK No. 1527424), a revoked Nevada corporation located in Byron, Illinois with a class of securities registered with the Commission pursuant to Exchange Act Section 12(g) because it is delinquent in its periodic filings with the Commission, having not filed any periodic reports since it filed a Form 10-Q for the period ended April 30, 2014. On October 19, 2015, Corporation Finance sent a delinquency letter to SVLE requesting compliance with its periodic filing requirements but SVLE did not receive the delinquency letter due to its failure to maintain a valid address on file with the Commission as required by Commission Issuer Address Rules. As of July 14, 2016, the common stock of SVLE was quoted on OTC Link, had one market makers, and was eligible for the “piggyback” exception of Exchange Act Rule 15c2-11(f)(3).

It appears to the Commission that there is a lack of current and accurate information concerning the securities of StarInvest Group, Inc. (“STIV”) (CIK No. 810270), a revoked Nevada corporation located in Long Beach, New York with

a class of securities registered with the Commission pursuant to Exchange Act Section 12(g) because it is delinquent in its periodic filings with the Commission, having not filed any periodic reports since it filed a Form 10-K for the period ended December 31, 2010. On March 3, 2014, Corporation Finance sent a delinquency letter to STIV requesting compliance with its periodic filing requirements but STIV did not receive the delinquency letter due to its failure to maintain a valid address on file with the Commission as required by Commission Issuer Address Rules. As of July 14, 2016, the common stock of STIV was quoted on OTC Link, had five market makers, and was eligible for the “piggyback” exception of Exchange Act Rule 15c2-11(f)(3).

It appears to the Commission that there is a lack of current and accurate information concerning the securities of The Digital Development Group Corp. (“DIDG”) (CIK No. 1379699), a Nevada corporation located in Los Angeles, California with a class of securities registered with the Commission pursuant to Exchange Act Section 12(g) because it is delinquent in its periodic filings with the Commission, having not filed any periodic reports since it filed a Form 10-Q for the period ended September 30, 2014. On November 30, 2015, Corporation Finance sent a delinquency letter to DIDG requesting compliance with its periodic filing requirements but DIDG did not receive the delinquency letter due to its failure to maintain a valid address on file with the Commission as required by Commission Issuer Address Rules. As of July 14, 2016, the common stock of DIDG was quoted on OTC Link, had five market makers, and was eligible for the “piggyback” exception of Exchange Act Rule 15c2-11(f)(3).

The Commission is of the opinion that the public interest and the protection of investors require a suspension of trading in the securities of the above-listed companies. Therefore, it is ordered, pursuant to Section 12(k) of the Securities Exchange Act of 1934, that trading in the securities of the above-listed companies is suspended for the period from 9:30 a.m. EDT on July 20, 2016, through 11:59 p.m. EDT on August 2, 2016.

By the Commission.

Jill M. Peterson,

Assistant Secretary.

BILLING CODE 8011-01-P

SMALL BUSINESS ADMINISTRATION

Harbert Mezzanine Partners II SBIC, L.P., License No. 04/04-0298; Notice Seeking Exemption Under Section 312 of the Small Business Investment Act, Conflicts of Interest

Notice is hereby given that Harbert Mezzanine Partners II SBIC, L.P., 2100 Third Avenue North, Suite 600, Birmingham, AL 35203, a Federal Licensee under the Small Business Investment Act of 1958, as amended (“the Act”), in connection with the financing of CDA, Inc., 8500 South Tyron Street, Charlotte, NC 28273, has sought an exemption under Section 312 of the Act and 13 CFR 107.730 financings which constitute conflicts of interest of the Small Business Administration (“SBA”) Rules and Regulations. Harbert Mezzanine Partners II SBIC, L.P. proposes to provide debt financing to CDA, Inc., owned by Harbinger Mezzanine Partners, L.P., an associate as defined in 13 CFR 107.50 of the SBA Rules and Regulations. Therefore this transaction is considered a conflict of interest requiring SBA’s prior written exemption.

Notice is hereby given that any interested person may submit written comments on the transaction, within fifteen days of the date of this publication, to the Associate Administrator for Investment, U.S. Small Business Administration, 409 Third Street SW., Washington, DC 20416.

Mark Walsh,

Associate Administrator, Office of Investment and Innovation.

BILLING CODE P

SOCIAL SECURITY ADMINISTRATION

[Docket No: SSA-2016-0033]

Agency Information Collection Activities: Proposed Request and Comment Request

The Social Security Administration (SSA) publishes a list of information collection packages requiring clearance by the Office of Management and Budget (OMB) in compliance with Public Law 104-13, the Paperwork Reduction Act of 1995, effective October 1, 1995. This notice includes revisions and one extension of OMB-approved information collections.

SSA is soliciting comments on the accuracy of the agency’s burden estimate; the need for the information;

¹ The short form of each issuer’s name is also its stock symbol.

its practical utility; ways to enhance its quality, utility, and clarity; and ways to minimize burden on respondents, including the use of automated collection techniques or other forms of information technology. Mail, email, or fax your comments and recommendations on the information collection(s) to the OMB Desk Officer and SSA Reports Clearance Officer at the following addresses or fax numbers. (OMB); Office of Management and Budget, Attn: Desk Officer for SSA, Fax: 202-395-6974, Email address: OIRA_Submission@omb.eop.gov (SSA); Social Security Administration, OLCA, Attn: Reports Clearance Director, 3100 West High Rise, 6401 Security Blvd., Baltimore, MD 21235, Fax: 410-966-2830, Email address: OR.Reports.Clearance@ssa.gov Or you may submit your comments online through www.regulations.gov, referencing Docket ID Number [SSA-2016-0033].

I. The information collections below are pending at SSA. SSA will submit them to OMB within 60 days from the date of this notice. To be sure we consider your comments, we must receive them no later than September 20, 2016. Individuals can obtain copies of the collection instruments by writing to the above email address.
 1. *Request for Hearing by Administrative Law Judge—20 CFR 404.929, 404.933, 416.1429, 404.1433, 418.1350, and 42 CFR 405.722—0960-0269.* When SSA denies applicants' or beneficiaries' requests for new or continuing benefits, the Social Security Act entitles those applicants or beneficiaries to request a hearing to appeal the decision. To request a hearing, individuals complete Form HA-501, the associated Modernized Claims System (MCS) or Modernized Supplemental Security Income Claims System (MSSICS) interview, or the Internet application (i501). SSA uses the

information to determine if the individual: (1) Filed the request within the prescribed time; (2) is the proper party; and (3) took the steps necessary to obtain the right to a hearing. SSA also uses the information to determine: (1) The individual's reason(s) for disagreeing with SSA's prior determinations in the case; (2) if the individual has additional evidence to submit; (3) if the individual wants an oral hearing or a decision on the record; and (4) whether the individual has (or wants to appoint) a representative. The respondents are Social Security benefit applicants and recipients who want to appeal SSA's denial of their request for new or continued benefits, and Medicare Part B recipients who must pay the Medicare Part B Income-Related Monthly Adjustment Amount.
Type of Request: Revision of an OMB-approved information collection.

Modality of completion	Number of respondents	Frequency of response	Average burden per response (minutes)	Estimated total annual burden (hours)
HA-501; Modernized Claims System (MCS); Modernized Supplemental Security Income Claims System (MSSICS)	25,953	1	10	4,326
I501 (Internet iAppeals)	643,516	1	5	53,626
Totals	669,469	57,952

2. *Travel Expense Reimbursement—20 CFR 404.999(d) and 416.1499—0960-0434.* The Social Security Act provides for travel expense reimbursement from Federal and State agencies for claimant travel incidental to medical examinations, and to parties, their representatives, and all reasonably necessary witnesses for travel exceeding

75 miles to attend medical examinations, reconsideration interviews and proceedings before an administrative law judge. Reimbursement procedures require the claimant to provide: (1) A list of expenses incurred, and (2) receipts of such expenses. Federal and state personnel review the listings and

receipts to verify the reimbursable amount to the requestor. The respondents are claimants for Title II benefits and Title XVI payments, their representatives, and witnesses.
Type of Request: Extension of an OMB-approved information collection.

Modality of completion	Number of respondents	Frequency of response	Average burden per response (minutes)	Estimated total annual burden (hours)
404.99(d) & 416.1499	60,000	1	10	10,000

3. *Request for Reconsideration—20 CFR 404.907-404.921, 416.1407-416.1421, 408.1009, and 418.1325—0960-0622.* Individuals use Form SSA-561-U2, the associated MCS interview, or the Internet application (i561) to initiate a request for reconsideration of

a denied claim. SSA uses the information to document the request and to determine an individual's eligibility or entitlement to Social Security benefits (Title II), SSI payments (Title XVI), Special Veterans Benefits (Title VIII), Medicare (Title XVIII), and

for initial determinations regarding Medicare Part B income-related premium subsidy reductions. The respondents are individuals filing for reconsideration of a denied claim.
Type of Request: Revision of an OMB-approved information collection.

Modality of completion	Number of respondents	Frequency of response	Average burden per response (minutes)	Estimated total annual burden (hours)
SSA-561 and Modernized Claims System (MCS)	550,370	1	8	73,383

Modality of completion	Number of respondents	Frequency of response	Average burden per response (minutes)	Estimated total annual burden (hours)
1561 (Internet iAppeals)	911,330	1	5	75,944
Totals	1,461,700	149,327

II. SSA submitted the information collections below to OMB for clearance. Your comments regarding the information collections would be most useful if OMB and SSA receive them 30 days from the date of this publication. To be sure we consider your comments, we must receive them no later than August 22, 2016. Individuals can obtain copies of the OMB clearance package by

writing to *OR.Reports.Clearance@ssa.gov*.
 1. *Application for Supplemental Security Income—20 CFR 416.207 and 416.305–416.335, Subpart C—0960–0229.* The Supplemental Security Income (SSI) program provides aged, blind, and disabled individuals who have little or no income, with funds for food, clothing, and shelter. Individuals complete Form SSA–8000–BK to apply

for SSI. SSA uses the information from Form SSA–8000–BK and its electronic intranet counterpart, MSSICS, to determine: (1) Whether SSI claimants meet all statutory and regulatory eligibility requirements; and (2) SSI payment amounts. The respondents are applicants for SSI or their representative payees.

Type of Request: Revision of an OMB-approved information collection.

Modality of completion	Number of respondents	Frequency of response	Average burden per response (minutes)	Estimated total annual burden (hours)
SSA–8000–BK (Paper Version)	17,541	1	41	11,986
MSSICS/Signature Proxy	1,373,401	1	35	801,151
Totals	1,390,942	813,137

2. *Medical Application for Supplemental Security Income—20 CFR 416.305–416.335, Subpart C—0960–0444.* SSA uses Form SSA–8001–BK to determine an applicant’s eligibility for SSI and SSI payment amounts. SSA employees also collect this information

during interviews with members of the public who wish to file for SSI. SSA uses the information for two purposes: (1) To formally deny SSI for non-medical reasons when information the applicant provides results in ineligibility; or (2) to establish a

disability claim, but defer the complete development of non-medical issues until SSA approves the disability. The respondents are applicants for SSI.

Type of Request: Revision of an OMB-approved information collection.

Modality of completion	Number of responses	Frequency of response	Average burden per response (minutes)	Estimated total annual burden (hours)
MSSICS/Signature Proxy	937,207	1	20	312,402
Non-MSSICS (Paper)	1,033	1	20	344
Totals	938,240	312,746

3. *Function Report—Child (Birth to 1st Birthday, Age 1 to 3rd Birthday, Age 3 to 6th Birthday, Age 6 to 12th Birthday, Age 12 to 18th Birthday)—20 CFR 416.912 and 416.924a(a)(2)—0960–0542.* As part of SSA’s disability determination process, we use Forms SSA–3375–BK through SSA–3379–BK to request information from a child’s parent or guardian for children applying for SSI. The five different versions of the form contain questions about the child’s

day-to-day functioning appropriate to a particular age group; thus, respondents use only one version of the form for each child. The adjudicative team (disability examiners and medical or psychological consultants) of State disability determination services offices collect the information on the appropriate version of this form (in conjunction with medical and other evidence) to form a complete picture of the children’s ability to function and

their impairment-related limitations. The adjudicative team uses the completed profile to determine: (1) If each child’s impairment(s) results in marked and severe functional limitations; and (2) whether each child is disabled. The respondents are parents and guardians of child applicants for SSI.

Type of Request: Revision on an OMB-approved information collection.

Modality of completion	Number of respondents	Frequency of response	Average burden per response (minutes)	Estimated total annual burden (hours)
SSA–3375; SSA-3376; SSA-3377; SSA-3378; SSA–3379	532,000	1	20	177,333

4. *Government-to-Government Services Online Web site Registration; Government-to-Government Services Online Web site Account Modification/ Deletion Form—20 CFR 401.45—0960–0757.* The Government-to-Government Services Online (GSO) Web site allows various external organizations to submit files to a variety of SSA systems and, in some cases, receive files in return. The SSA systems that process data transferred via GSO include, but are not

limited to, systems responsible for disability processing and benefit determination or termination. SSA uses the information on Form SSA–159, Government-to-Government Online Web site Registration Form, to register the requestor to use the GSO Web site. Once we receive the SSA–159, SSA provides the user with account information and conducts a walkthrough of the GSO Web site as necessary. Established organizations may submit Form SSA–

159 to register additional users as well. The established requesting organizations can also complete Form SSA–160, Government-to-Government Online Web site Account Modification/ Deletion Form, to modify their online accounts (e.g., address change). Respondents are State and local government agencies, and some private sector business entities.

Type of Request: Revision of an OMB-approved information collection.

Modality of completion	Number of respondents	Frequency of response	Average burden per response (minutes)	Estimated total annual burden (hours)
SSA–159	1,543	1	15	386
SSA–160	130	1	15	33
Totals	1,673	419

Dated: July 18, 2016.

DEPARTMENT OF STATE**[Public Notice: 9646]****30-Day Notice of Proposed Information Collection: Electronic Diversity Visa Entry Form**

ACTION: Notice of request for public comment and submission to OMB of proposed collection of information.

SUMMARY: The Department of State has submitted the information collection described below to the Office of Management and Budget (OMB) for approval. In accordance with the Paperwork Reduction Act of 1995 we are requesting comments on this collection from all interested individuals and organizations. The purpose of this Notice is to allow 30 days for public comment.

DATES: Submit comments directly to the Office of Management and Budget (OMB) up to August 22, 2016.

ADDRESSES: Direct comments to the Department of State Desk Officer in the Office of Information and Regulatory Affairs at the Office of Management and Budget (OMB). You may submit comments by the following methods:

- *Email:* oira_submission@omb.eop.gov. You must include the DS form number, information collection title, and the OMB control number in the subject line of your message.
- *Fax:* 202-395-5806. Attention: Desk Officer for Department of State.

FOR FURTHER INFORMATION CONTACT: Direct requests for additional information regarding the collection listed in this notice, including requests for copies of the proposed collection instrument and supporting documents, to Andrea Lage, who may be reached at PRA_BurdenComments@state.gov.

SUPPLEMENTARY INFORMATION:

- *Title of Information Collection:* Electronic Diversity Visa Entry Form
- *OMB Control Number:* 1405-0153
- *Type of Request:* Extension of Currently Approved Collection
- *Originating Office:* CA/VO/L/R
- *Form Number:* DS-5501
- *Respondents:* Diversity Visa Registrants
- *Estimated Number of Respondents:* 11,072,400
- *Estimated Number of Responses:* 11,072,400
- *Average Time Per Response:* 30 minutes
- *Total Estimated Burden Time:* 5,536,200 hours
- *Frequency:* Annually
- *Obligation to Respond:* Required to Obtain or Retain a Benefit

We are soliciting public comments to permit the Department to:

- Evaluate whether the proposed information collection is necessary for the proper functions of the Department.

- Evaluate the accuracy of our estimate of the time and cost burden for this proposed collection, including the validity of the methodology and assumptions used.

- Enhance the quality, utility, and clarity of the information to be collected.

- Minimize the reporting burden on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Please note that comments submitted in response to this Notice are public record. Before including any detailed personal information, you should be aware that your comments as submitted, including your personal information, will be available for public review.

Abstract of Proposed Collection

The Department of State utilizes the Electronic Diversity Visa Lottery (EDV) Entry Form to elicit information necessary to ascertain the applicability of the legal provisions of the diversity immigrant visa program. The 2 primary requirements are: the applicant is from a low admission country and is a high school graduate, or has two years of experience in a job that requires two years of training. The foreign nationals complete the electronic entry forms and then applications are randomly selected for further participation in the program. Department of State regulations pertaining to diversity immigrant visas under the INA are published in 22 CFR 42.33.

Methodology

The EDV Entry Form is available online at www.dvlottery.state.gov and can only be submitted electronically during the annual registration period.

Dated: June 24, 2016.

Edward Ramotowski,

Deputy Assistant Secretary, Bureau of Consular Affairs, Department of State.

BILLING CODE 4710-06-P

SURFACE TRANSPORTATION BOARD**[Docket No. MCF 21069]****Academy Bus, LLC, and Corporate Coaches, Inc.—Purchase of Certain Assets of Corporate Coaches, Inc.**

AGENCY: Surface Transportation Board.

ACTION: Notice Tentatively Approving and Authorizing Finance Transaction.

SUMMARY: On June 23, 2016, Academy Bus, LLC (Florida) (Academy), a motor carrier of passengers, and Corporate Coaches, Inc. (Corporate Coaches), also a motor carrier of passengers, jointly filed an application under 49 U.S.C. 14303 for Academy to acquire certain properties of Corporate Coaches. The Board is tentatively approving and authorizing the transaction, and, if no opposing comments are timely filed, this notice will be the final Board action. Persons wishing to oppose the application must follow the rules at 49 CFR 1182.5 and 1182.8.

DATES: Comments must be filed by September 6, 2016. The applicants may file a reply by September 20, 2016. If no opposing comments are filed by September 6, 2016, this notice shall be effective on September 7, 2016.

ADDRESSES: Send an original and 10 copies of any comments referring to Docket No. MCF 21069 to: Surface Transportation Board, 395 E Street SW., Washington, DC 20423-0001. In addition, send one copy of comments to Academy's representatives: Peter A. Pfohl and Bradford J. Kelley, Slover and Loftus, LLP, 1224 Seventeenth Street NW., Washington, DC 20036.

FOR FURTHER INFORMATION CONTACT: Nathaniel Bawcombe (202) 245-0376. Federal Information Relay Service (FIRS) for the hearing impaired: 1-800-877-8339.

SUPPLEMENTARY INFORMATION: Academy is a motor carrier licensed by the Federal Motor Carrier Safety Administration (MC-646780) and provides charter bus operations in Florida. The applicants state that Academy is owned by Academy Bus (Florida) EST Trust (Academy Trust), a non-carrier controlled by Francis Tedesco, sole trustee. According to the applicants, Franmar Leasing, LLC (Franmar) is a non-carrier controlled by the Tedesco Family ESB Trust (Tedesco Trust), also a non-carrier, exclusively engaged in the ownership and leasing of passenger motor coaches.¹ The applicants state that Corporate Coaches, a licensed motor carrier of passengers (MC-539370), presently operates charter motor coach transportation services and black car sedan and limo services primarily in the state of Florida. The

¹ The applicants state that Francis Tedesco and Mark Tedesco are lifetime beneficiaries of the Tedesco Trust, which controls Academy Bus, LLC (New Jersey), a non-carrier and the sole member of three limited liability company passenger motor carriers: Academy Express, LLC, Academy Lines, and Number 22 Hillside, LLC (Academy Companies). However, according to the applicants, none of the Academy Companies are parties to the agreement with Corporate Coaches that is the subject of this application.

applicants further state that Andy Bardar is the shareholder, President, and Chief Executive Officer of Corporate Coaches.

Corporate Coaches proposes to sell all the assets used in its motor coach passenger transportation business pursuant to an Asset Purchase Agreement (APA), dated May 16, 2016. According to the applicants, this transaction is a result of the business determination made by the owners of Corporate Coaches to permanently withdraw from the motor coach transportation business and direct all of its future efforts and activities to the company's black car sedan and limo services. Under the terms of the APA, the applicants state, Franmar will acquire the motor coach assets of Corporate Coaches, and Academy will acquire Corporate Coaches' motor coach customer lists, charter contracts, telephone numbers, Web site, charter contract deposits, and related assets and intangibles.²

Under 49 U.S.C. 14303(b), the Board must approve and authorize a transaction that it finds consistent with the public interest, taking into consideration at least: (1) The effect of the proposed transaction on the adequacy of transportation to the public; (2) the total fixed charges that result; and (3) the interest of affected carrier employees. Academy has submitted information required by 49 CFR 1182.2, including information to demonstrate that the proposed transaction is consistent with the public interest under 49 U.S.C. 14303(b) and a statement that Academy and its motor carrier affiliated companies exceeded \$2 million in gross operating revenues for the preceding 12-month period. See 49 U.S.C. 14303(g).³

Academy and Corporate Coaches assert that this acquisition is in the public interest because the transaction will not have a materially detrimental impact on the adequacy of transportation services available to the public. The applicants also assert that the transaction would promote more efficiencies and greater economic use of existing transportation capital resources, and offer the general public continued service options to the customers of Corporate Coaches in need of such

service. They also state that the proposed transaction would not result in an increase to fixed charges as the proposed transaction by the carriers is expected to be for cash. In addition, according to the applicants, the proposed transaction would also have no adverse effect on qualified Corporate Coaches employees at the locations from which Corporate Coaches operates because Academy will interview and offer employment opportunities to those employees, a necessity to permit Academy to continue to operate the acquired motor coach assets. Finally, the applicants state that the proposed transaction is unlikely to exert any anticompetitive impact because none of the operable motor vehicles will be scrapped by the seller, and no new buses will need to be purchased by Franmar at this time. Thus, the applicants state that the public would not lose service because the same number of buses would continue to operate.

On the basis of the application, the Board finds that the proposed acquisition is consistent with the public interest and should be tentatively approved and authorized. If any opposing comments are timely filed, these findings will be deemed vacated, and, unless a final decision can be made on the record as developed, a procedural schedule will be adopted to reconsider the application. See 49 CFR 1182.6(c). If no opposing comments are filed by the expiration of the comment period, this notice will take effect automatically and will be the final Board action.

Board decisions and notices are available on our Web site at WWW.STB.DOT.GOV.

This action is categorically excluded from environmental review under 49 CFR 1105.6(c).

It is ordered:

1. The proposed transaction is approved and authorized, subject to the filing of opposing comments.
2. If opposing comments are timely filed, the findings made in this notice will be deemed as having been vacated.
3. This notice will be effective September 7, 2016, unless opposing comments are filed by September 6, 2016.
4. A copy of this notice will be served on: (1) The U.S. Department of Transportation, Federal Motor Carrier Safety Administration, 1200 New Jersey Avenue SE., Washington, DC 20590; (2) the U.S. Department of Justice, Antitrust Division, 10th Street & Pennsylvania Avenue NW., Washington, DC 20530; and (3) the U.S. Department of Transportation, Office of the General

Counsel, 1200 New Jersey Avenue SE., Washington, DC 20590.

Decided: July 15, 2016.

By the Board, Chairman Elliott, Vice Chairman Miller, and Commissioner Begeman.

Tia Delano,

Clearance Clerk.

BILLING CODE 4915-01-P

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

[FHWA Docket No. FHWA-2016-0017]

Fixing America's Surface Transportation Act—Designation of Alternative Fuel Corridors

AGENCY: Federal Highway Administration (FHWA), Department of Transportation (DOT).

ACTION: Notice; solicitation of nominations.

SUMMARY: Section 1413 of the Fixing America's Surface Transportation (FAST) Act requires the Secretary of Transportation to designate national electric vehicle (EV) charging, hydrogen, propane, and natural gas fueling corridors. The FHWA is issuing this **Federal Register** Notice to invite nominations from State and local officials to assist in making such designations.

DATES: Submissions must be received on or before August 22, 2016. Late submissions will be considered to the extent practicable.

ADDRESSES: You may submit comments identified by the docket number FHWA-2016-0017 by any one of the following methods:

Fax: 1-202-493-2251;

Mail: U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC 20590;
Hand Delivery: U.S. Department of Transportation, Docket Operations, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays; or electronically through the Federal eRulemaking Portal: <http://www.regulations.gov>. Follow the online instructions for submitting comments.

Instructions: All submissions must include the agency name, docket name and docket number for this notice (FHWA-2016-0017). The DOT posts

² The applicants also state that ABC Bus Inc. (ABC), a non-carrier motor coach dealer, shall purchase the remaining motor coaches owned by Corporate Coaches that are not purchased by Franmar. The applicants state that ABC is unaffiliated with the Academy Trust or the Tedesco Trust.

³ Applicants with gross operating revenues exceeding \$2 million are required to meet the requirements of 49 CFR 1182.

these comments, without edit, including any personal information the commenter provides, to www.regulations.gov, as described in the system of records notice (DOT/ALL-14 FDMS), which can be reviewed at www.dot.gov/privacy.

Docket: For access to the docket to read background documents or comments received, go to <http://www.regulations.gov> at any time or to U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC 20950, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT:

Diane Turchetta, Office of Natural Environment, (202) 493-0158, or via email at diane.turchetta@dot.gov. For legal questions, please contact Robert Black, Office of the Chief Counsel, (202) 366-1359, or via email at robert.black@dot.gov.

SUPPLEMENTARY INFORMATION:

Background

Section 1413 of the FAST Act (Section 1413), signed into law on December 4, 2015, requires the Secretary to designate national EV charging, hydrogen, propane, and natural gas fueling corridors within 1 year from the date of enactment (December 4, 2016). (23 U.S.C. 151). In accordance with 23 U.S.C. 151(a), corridor designations must identify near-and long-term need for, and location of, EV charging infrastructure, hydrogen fueling infrastructure, propane fueling infrastructure, and natural gas fueling infrastructure at strategic locations along major national highways to improve mobility of passenger and commercial vehicles that employ electric, hydrogen fuel cell, propane, and natural gas fueling technologies across the United States.

The FHWA must solicit nominations for corridors from State and local officials and involve a range of stakeholders. (23 U.S.C. 151(b) and (c)). Within 5 years of establishing the corridors, and every 5 years thereafter, DOT must update and re-designate the corridors. During the designation and re-designation of the corridors, the FHWA is to issue a report that identifies EV charging infrastructure, hydrogen fueling infrastructure, propane fueling infrastructure, and natural gas fueling infrastructure and standardization needs for electricity providers, industrial gas providers, natural gas providers, infrastructure providers, vehicle manufacturers, electricity purchases,

and natural gas purchases. The report must also establish aspirational goals of achieving strategic deployment of EV charging infrastructure, hydrogen fueling infrastructure, propane fueling infrastructure, and natural gas fueling infrastructure in those corridors by the end of fiscal year 2020. The FHWA held two national Webinars (May 12, 2016, and May 16, 2016) at which stakeholders were invited to provide input to FHWA on the process, timeline, and specific topics related to the implementation of Section 1413. The presentation, transcript of chat pods, and Webinar recordings can be found at: http://www.fhwa.dot.gov/environment/climate_change/mitigation/webinars/.

Information To Be Included in Nominations

Any State or local agency is invited to nominate an alternative fuel corridor for designation. For the purposes of this solicitation, an eligible corridor is defined as a segment of the National Highway System (NHS).¹ However, to encourage the creation of a national network of alternative fuel infrastructure, a corridor may also include feeder routes/roads that connect to that NHS segment. Both corridors within a single State and multistate corridors are eligible, with the goal of connecting communities, cities, and regions to develop a national network of alternative fuel facilities. A State or local agency interested in submitting a nomination for a corridor designation should develop a 20-page maximum nomination (nothing beyond the first 20 pages will be considered, including attachments) containing the following elements/information:

- Corridor being proposed for designation (include the official name of the NHS segment and beginning and end points of the proposed corridor);
- Name of lead State or local agency originating the nomination;
- Name of the entity (or entities) with jurisdiction over the proposed corridor (*i.e.*, State, local government, Indian tribe and/or Federal land management agency);
- Description of corridor, including the major metropolitan areas and/or intermodal facilities located along the corridor, how the corridor contributes to the national network, and why it is being proposed for designation;
- Corridor use (*i.e.*, mainly freight, mainly passenger, or both);
- Approximate population along proposed corridor or in general area/

¹ See following FHWA Web site for definitions and descriptions of the NHS: http://www.fhwa.dot.gov/planning/national_highway_system/.

region, including median income and basic demographic information;

- Benefits to disadvantaged groups and/or communities, which may include low-income groups, persons with visible or hidden disabilities, elderly individuals, and minority persons and populations;
- Existing and projected usage of the corridor (*i.e.*, vehicle miles traveled and/or freight congestion/tonnage moved);
- Goals for increasing the use of alternative fuels;
- Type of alternative fuel(s) currently used and/or projected to be used along the corridor;
- Estimated/projected cost of planned alternative fuel facilities on proposed corridor, if known;
- Type, number, and distance between existing and planned alternative fuel facilities by fuel type located along proposed corridor (*e.g.*, for electric vehicle charging corridors or CNG facilities, the type and level of charging technology in use or planned);
- Demonstrated interest and support for alternative fuel facilities from stakeholders;
- Standardization needs for fuel/charging providers, manufacturers, and purchasers; and
- Goals for strategic deployment of refueling/recharging infrastructure along corridor and/or network for short-term (by the end of fiscal year 2020), and long-term (by the end of fiscal year 2040).

Criteria for Designating Alternative Fuel Corridors²

The FHWA plans to designate alternative fuel corridors based on the criteria outlined in this solicitation. Corridor designations will be selected based on the following criteria, which are listed in *priority* order and indicated by numbered and bolded headings. Sub-bullets are not in priority order:

1. Alternative Fuel Facilities

- Number of existing alternative fuel facilities on corridor;
- Number of additional planned/projected alternative fuel facilities on corridor;
- Distance between existing and planned/projected alternative fuel facilities on corridor;
- Visibility, convenience, and accessibility to the users on the corridor; and

² Section 111 of Title 23 United States Code prohibits Interstate rest areas built after January 1, 1960 from offering commercial services such as fuel and food on the Interstate right-of-way. In light of this provision, an alternative fuel facility can be located on an Interstate right-of-way, but a fee may not be charged for the facility.

- Explanation of successfully developing new alternative fuel facilities along the corridor based on past activity/success.

2. Corridor Scale/Impact

- Connections to other segments of the NHS in order to create/develop a national network of alternative fuel infrastructure;
- Whether the corridor connects to one or more major metropolitan areas and/or multiple States (multiple States that submit a joint application must identify a lead applicant as the primary point of contact); and/or
- Whether the corridor connects to one or more major intermodal facilities (*i.e.* freight, transit, etc.).

3. Emission Reductions

- Estimated reductions in greenhouse gas and/or criteria pollutant emissions along the corridor, or in the area, due to existing and projected alternative fuel facilities.

4. Development of Team and Degree of Collaboration and Support

- Degree of collaboration, and formation of partnerships, regarding alternative fuel vehicles and infrastructure with both public and private sector entities, which should include:
 - State and local officials (nomination must include support from the transportation agency or agencies with jurisdiction over the proposed corridor such as the State, local government, Indian tribe, and/or Federal land management agency;
 - Other Federal agencies;
 - Department of Energy's (DOE) Clean Cities Program, as well as its associated network of coalitions and stakeholders); and
 - Representatives of energy utilities; electric, fuel cell electric, propane, and natural gas vehicle industries; equipment manufacturers; fuel suppliers; Original Equipment Manufacturers; public or private fleets; auto dealerships; energy marketers; utilities/energy companies; alternative fuel and clean air advocacy organizations; local and regional planning entities; freight and shipping industry; clean technology firms; hospitality industry; highway rest stop vendors; industrial gas and hydrogen manufacturers; and
 - Demonstrated interest and support. For example, support demonstrated through past work in the area on alternative fuels, support from local elected officials, public support, stakeholder support, development of incentives, etc.

- Whether the proposed corridor is an existing electric vehicle charging, hydrogen fueling, propane fueling or natural gas corridor being designated by a State or group of States.

Optional Information and Considerations

- Consideration of Clean Cities coalition³ locations/existing alternative fuel markets;
- Whether the corridor or segments of the corridor are located in ozone, carbon monoxide, or particulate matter nonattainment or maintenance areas;
- Goals for greenhouse gas and/or criteria pollutant emission reductions;
- Available State and/or local alternative fuel vehicle incentives/programs;
- Current and future demand for alternative fuel facilities based on current and predicted usage patterns (passenger, freight, and other commercial vehicles). The analysis of future demand/alternative fuel facilities should include description of how the corridor will be extended and/or how distances between stations will be shortened (*i.e.*, gaps closed);
- Other alternative fuels included under the Energy Policy Act of 2005 but not included in Section 1413, or vehicle technologies such as Truck Stop Electrification used along corridor that contribute to greenhouse gas or criteria air pollutant emission reductions;
- Availability of alternative fuel vehicle support services in the vicinity/region (*e.g.* maintenance and repair shops, first responders, safety officials, towing and road-side rescue services, etc.);
- Potential of designation to serve as a national case to document lessons learned/best practices.

Support for Designated Corridors

Although Section 1413 does *not* provide dedicated funding for designated corridors, FHWA believes the designation of such corridors can serve important public purposes. For instance, the United States has pledged to reduce greenhouse gas (GHG) emissions 26–28 percent by 2025 and 80 percent or more by 2050. The transportation sector is a significant source of U.S. GHG emissions, (tailpipe GHG emissions from transportation sources accounted for 27 percent of total U.S. GHG emissions), and achieving reductions in these emissions will be needed to support national commitments. Alternative fuel corridors with support for lower-emitting vehicles can assist in this effort.

³ <https://cleancities.energy.gov/coalitions/>.

Furthermore, it is FHWA's goal and intent to create and expand a national network of alternative fueling and charging infrastructure along NHS corridors by developing a process that provides the opportunity for a formal corridor designation once the criteria set forth in the solicitation are met, and on a rolling basis, without a cap on the number of corridors; ensures that corridor designations are selected based on criteria that promote the "build out" of a national network; develops national signage and branding to help catalyze applicant and public interest; encourages multistate and regional cooperation and collaboration; and, brings together a consortium of stakeholders including State agencies, utilities, alternative fuel providers, and car manufacturers to promote and advance alternative fuel corridor designations in conjunction with the DOE.

In support of this goal, the FHWA intends to develop appropriate signage that may be placed on designated corridors in accordance with the Manual on Uniform Traffic Control Devices (MUTCD).⁴ The FHWA anticipates that any such signage will distinguish between "zero emission" corridors (supported by electric vehicle charging or hydrogen fueling infrastructure) and "alternative fuel" corridors (supported by propane or natural gas fueling infrastructure), to make clear the nature of the alternative fuel supported in each corridor.

Timeline

The deadline for this initial solicitation is August 22, 2016. After this deadline, FHWA will establish a process for future nominations and designations on a rolling basis.

Authority: Section 1413 of the FAST Act (Pub. L. 114–94).

Issued on: July 8, 2016.

Gregory G. Nadeau,
Administrator, Federal Highway Administration.

DEPARTMENT OF TRANSPORTATION**Maritime Administration****[Docket No. MARAD-2016-0074]****Requested Administrative Waiver of the Coastwise Trade Laws: Vessel INVICTUS; Invitation for Public Comments****AGENCY:** Maritime Administration, Department of Transportation.**ACTION:** Notice.

SUMMARY: As authorized by 46 U.S.C. 12121, the Secretary of Transportation, as represented by the Maritime Administration (MARAD), is authorized to grant waivers of the U.S.-build requirement of the coastwise laws under certain circumstances. A request for such a waiver has been received by MARAD. The vessel, and a brief description of the proposed service, is listed below.

DATES: Submit comments on or before August 22, 2016.

ADDRESSES: Comments should refer to docket number MARAD-2016-0074. Written comments may be submitted by hand or by mail to the Docket Clerk, U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC 20590. You may also send comments electronically via the Internet at <http://www.regulations.gov>. All comments will become part of this docket and will be available for inspection and copying at the above address between 10 a.m. and 5 p.m., E.T., Monday through Friday, except federal holidays. An electronic version of this document and all documents entered into this docket is available on the World Wide Web at <http://www.regulations.gov>.

FOR FURTHER INFORMATION CONTACT: Bianca Carr, U.S. Department of Transportation, Maritime Administration, 1200 New Jersey Avenue SE., Room W23-453, Washington, DC 20590. Telephone 202-366-9309, Email Bianca.carr@dot.gov.

SUPPLEMENTARY INFORMATION:

As described by the applicant the intended service of the vessel INVICTUS is:

INTENDED COMMERCIAL USE OF VESSEL: "Charter Fishing."

GEOGRAPHIC REGION: "Alaska (excluding waters in Southeastern Alaska and waters north of a line between Gore Point to Cape Suckling [including the North Gulf Coast and Prince William Sound])."

The complete application is given in DOT docket MARAD-2016-0074 at <http://www.regulations.gov>. Interested parties may comment on the effect this action may have on U.S. vessel builders or businesses in the U.S. that use U.S.-flag vessels. If MARAD determines, in accordance with 46 U.S.C. 12121 and MARAD's regulations at 46 CFR part 388, that the issuance of the waiver will have an unduly adverse effect on a U.S.-vessel builder or a business that uses U.S.-flag vessels in that business, a waiver will not be granted. Comments should refer to the docket number of this notice and the vessel name in order for MARAD to properly consider the comments. Comments should also state the commenter's interest in the waiver application, and address the waiver criteria given in § 388.4 of MARAD's regulations at 46 CFR part 388.

Privacy Act

Anyone is able to search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (Volume 65, Number 70; Pages 19477-78).

By Order of the Maritime Administrator

Dated: July 12, 2016.

T. Mitchell Hudson, Jr.,
Secretary, Maritime Administration.

BILLING CODE 4910–81–P

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[Docket No. NHTSA–2016–0069]

Request for Information: Nationally Uniform 911 Data System; Correction

AGENCY: National Highway Traffic Safety Administration (NHTSA), U.S. Department of Transportation (DOT).

ACTION: Notice; correction.

SUMMARY: NHTSA published a document in the **Federal Register** of June 30, 2016, concerning a request for information on the development of a

nationally uniform 911 data system. The document contained incorrect information and an incorrect email address.

FOR FURTHER INFORMATION CONTACT: Laurie Flaherty, 202–366–2705.

Correction

In the **Federal Register** of June 30, 2016, in FR Doc. 2016–15368, on page 42786, make the following two corrections:

a. In the third column, correct the **FOR FURTHER INFORMATION CONTACT** caption to read:

Laurie Flaherty, National Highway Traffic Safety Administration, Office of Emergency Medical Services, (202) 366–2705, laurie.flaherty@dot.gov, located at the United States Department of Transportation; 1200 New Jersey Avenue SE., NPD–400, Room W44–322, Washington, DC 20590.

b. In the third column, correct the second sentence of the second paragraph of the **SUPPLEMENTARY INFORMATION** caption to read:

Models for a nationally uniform data system exist in other disciplines, for example, the National Fire Incident Reporting System (N–FIRS), <https://www.nfirs.fema.gov/>, and the National EMS Information System (NEMISIS), <http://nemsis.org>.

Dated: July 11, 2016.

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation.

ACTION: Notice.

SUMMARY: The National Highway Traffic Safety Administration (NHTSA) is issuing this Enforcement Guidance Bulletin to inform the public of the process and procedure the Agency has established in connection with Paragraph 17 of the May 4, 2016 Amendment to the November 3, 2015 Consent Order with TK Holdings Inc., and the standards and criteria that will guide Agency decision-making.

FOR FURTHER INFORMATION CONTACT:

For legal issues: Elizabeth Mykytiuk, Office of the Chief Counsel, NCC-100, National Highway Traffic Safety Administration, 1200 New Jersey Avenue SE., Washington, DC 20590 (telephone: (202) 366-5263).

For general information regarding NHTSA's investigation into Takata Air Bag Inflator ruptures and the related recalls: <http://www.safercar.gov/rs/takata/index.html>.

SUPPLEMENTARY INFORMATION: The National Highway Traffic Safety Administration (NHTSA or Agency) is issuing this Enforcement Guidance Bulletin (the "Bulletin") to inform the public of the circumstances under which NHTSA would consider invoking Paragraph 17 of the Agency's May 4, 2016 Amendment to the November 3, 2015 Consent Order with TK Holdings Inc. ("Takata")¹ to alter the recall schedule, as well as to provide guidance on the standards and criteria that would guide such decision-making.

I. Background

On June 11, 2014, NHTSA opened a formal defect investigation (Preliminary

Evaluation, PE14-016) into certain Takata air bag inflators ("inflators") that may become over-pressurized and/or rupture during air bag deployment, resulting in death or injury to the driver and/or passenger. On February 24, 2015, NHTSA upgraded and expanded this investigation (Engineering Analysis, EA15-001).

Subsequently, Takata agreed to submit four Defect Information Reports (DIRs) on May 18, 2014, declaring that a defect existed in certain inflator types that were manufactured by Takata during certain periods of time. See Recall Nos. 15E-040, 15E-041, 15E-042, and 15E-043. Those DIRs triggered an obligation on the part of affected motor vehicle manufacturers to conduct a recall of motor vehicles containing the defective inflators. See 49 CFR 573.5(a).

On November 3, 2015, NHTSA issued, and Takata agreed to, a Consent Order, which among other things established conditions upon which Takata would be required to expand the scope of the defective inflator population by filing future DIRs. Again, the filing of such DIRs by Takata triggered an obligation by the motor vehicle manufacturers to

submit DIRs covering the affected motor vehicles and to conduct a recall of motor vehicles in which the defective inflators are installed. See 49 CFR 573.3(f), 573.5(a); see also Coordinated Remedy Order at ¶ 46 (Nov. 3, 2015).

On May 4, 2016, NHTSA and Takata agreed to an Amendment to the November 3, 2015 Consent Order (the "Amendment"), under which Takata agreed to declare a defect in all driver and passenger inflators that contain an ammonium nitrate-based propellant, and do not contain a moisture-absorbing desiccant. The Amendment was based upon the findings of three independent research organizations that most of the inflator ruptures are associated with long-term propellant degradation caused by years of exposure to temperature fluctuations and intrusion of moisture present in the ambient atmosphere. See Amendment at ¶ 2. Based upon the Agency's conclusions regarding the root cause of the inflator ruptures, among other reasons, the recall is to be conducted on a rolling basis, with Takata filing additional DIRs on the following schedule (which is set forth in Paragraph 14 of the Amendment):

DIR dates	Zone A population	Zone B population	Zone C population
May 16, 2016	All vehicles not currently under recall containing non-desiccated frontal Takata PSAN inflators—MY 2011 & older.	All vehicles not currently under recall containing non-desiccated frontal Takata PSAN inflators—MY 2008 & older.	All vehicles not currently under recall containing non-desiccated frontal Takata PSAN inflators—MY 2004 & older.
December 31, 2016	All vehicles not currently under recall containing non-desiccated frontal Takata PSAN inflators—MY 2012 & older.	All vehicles not currently under recall containing non-desiccated frontal Takata PSAN inflators—MY 2009 & older.	All vehicles not currently under recall containing non-desiccated frontal Takata PSAN inflators—MY 2008 & older.
December 31, 2017	All vehicles not currently under recall containing non-desiccated frontal Takata PSAN inflators—MY 2013 & older.	All vehicles not currently under recall containing non-desiccated frontal Takata PSAN inflators—MY 2010 & older.	All vehicles not currently under recall containing non-desiccated frontal Takata PSAN inflators—MY 2009 & older.
December 31, 2018	All remaining vehicles not currently under recall containing non-desiccated frontal Takata PSAN inflators.	All remaining vehicles not currently under recall containing non-desiccated frontal Takata PSAN inflators.	All remaining vehicles not currently under recall containing non-desiccated frontal Takata PSAN inflators.
December 31, 2019	All like for like non-desiccated frontal Takata PSAN replacement parts.	All like for like non-desiccated frontal Takata PSAN replacement parts.	All like for like non-desiccated frontal Takata PSAN replacement parts.

As set forth in Paragraph 7.a. of the Amendment, Zone A comprises the states and U.S. territories with the greatest temperature cycling and absolute humidity. It includes the following states and U.S. territories: Alabama, California, Florida, Georgia, Hawaii, Louisiana, Mississippi, South Carolina, Texas, Puerto Rico, American Samoa, Guam, the Northern Mariana Islands (Saipan), and the U.S. Virgin Islands.

Zone B comprises states with moderate temperature cycling and absolute humidity. It includes the following states: Arizona, Arkansas, Delaware, District of Columbia, Illinois, Indiana, Kansas, Kentucky, Maryland, Missouri, Nebraska, Nevada, New Jersey, New Mexico, North Carolina, Ohio, Oklahoma, Pennsylvania, Tennessee, Virginia, and West Virginia. See Amendment at ¶ 7.b.

Zone C comprises states with lower temperature cycling and absolute

humidity. It includes the following states: Alaska, Colorado, Connecticut, Idaho, Iowa, Maine, Massachusetts, Michigan, Minnesota, Montana, New Hampshire, New York, North Dakota, Oregon, Rhode Island, South Dakota, Utah, Vermont, Washington, Wisconsin, and Wyoming. See Amendment at ¶ 7.c.

The Amendment also sets forth a procedure under which the DIR schedule above may be modified or amended. More specifically, Paragraph 17 provides:

¹ The November 3, 2015 Consent Order and May 4, 2016 Amendment are available on NHTSA's Web

site at <http://www.safercar.gov/rs/takata/>

[index.html](#), under the "Related Documents" hyperlink.

Based on the presentation of additional test data, analysis, or other relevant and appropriate evidence, by Takata, an automobile manufacturer, or any other credible source, NHTSA may, after consultation with Takata, alter the schedule set forth in Paragraph 14 to modify or amend a DIR or to defer certain inflator types or vehicles, or a portion thereof, to a later DIR filing date. Any such evidence must be submitted to NHTSA no later than one-hundred-twenty (120) days before the relevant DIR filing date. This paragraph applies only to the DIRs scheduled to be issued on or after December 31, 2016 under the schedule established by Paragraph 14 of this Amendment.

The Agency believes it is important to provide additional guidance on the process and conditions under which NHTSA would consider altering the recall schedule to modify or amend a DIR or defer the filing of a DIR, as well as guidance on the standards and criteria that would guide such decision-making. This process shall not be used to expedite or expand the DIR schedule, nor shall it be used to eliminate a population of vehicles from the recall.

II. Process and Procedure

A. Petition: No later than 120 days before the applicable DIR filing date, Takata, a vehicle manufacturer, or other credible source (the "petitioner") may petition the Agency for a modification or amendment to the DIR schedule. The petition shall be in writing and shall be directed to the Associate Administrator for Enforcement, with a copy to Chief Counsel. The petition shall specify the precise modification or amendment to the DIR schedule being requested by the petitioner, including the affected vehicle makes, models, and model years (the "particular class of vehicles"). The petition shall also set forth all data, information, and arguments of the petitioner supporting its petition. To the extent the petitioner requests confidential treatment under 49 CFR part 512 in connection with any data, information, and arguments, it shall submit a publicly available summary of such confidential materials.

B. Public Notice and Comment: Within 14 days of receiving a petition, NHTSA shall publish a notice of the petition in the **Federal Register**. The notice shall include a brief summary of the petition, a description of the particular class of vehicles, a statement of the availability of the petition and other relevant information for public inspection, and an invitation to interested persons to submit written data, information, and arguments concerning the petition to a public

docket. The notice of the petition shall also specify the deadline for submitting data, information, and arguments concerning the petition, which deadline shall not be less than 14 days after the **Federal Register** notice.

C. Disposition of the Petition: After reviewing the written data, views, and arguments from the petitioner and any interested persons, as well as other available information, and after consulting with Takata, the Associate Administrator for Enforcement shall make a decision whether to grant or deny the petition. Notice of the grant or denial of the petition shall be issued to the petitioner, and to Takata and any affected vehicle manufacturer, no less than 45 days before the relevant DIR filing date. Notice of the grant or denial of the petition shall also be published in the **Federal Register**.

D. Appeal: Within 14 days of notice of a grant or denial in the **Federal Register**, any interested person may appeal the grant or denial of the petition to the Administrator. An appeal shall be in writing and shall be directed to the Administrator, with a copy to the Chief Counsel. The Administrator will base his final decision on the data, information, and arguments submitted in support of the petition and during the comment period, and other available information. The final decision will be issued no less than 5 days before the applicable DIR filing date. Notice of final decision shall also be published in the **Federal Register**.

III. Standard of Proof

NHTSA may grant the petition if the Agency finds that the written data, information, and arguments regarding the petition and other available information demonstrate, by a preponderance of the evidence, that either: (i) There has not yet been, nor will be for some period of years in the future, sufficient propellant degradation to render the inflators contained in the particular class of vehicles unreasonably dangerous in terms of susceptibility to rupture; or (ii) the service life expectancy of the inflators installed in the particular class of vehicles is sufficiently long that they will not pose an unreasonable risk to motor vehicle safety if recalled at a later date.

The Agency may rely on any relevant criteria in determining whether the available evidence satisfies the standard of proof. Generally, a petitioner may satisfy the standard of proof by submitting evidence concerning the physical attributes of the category of inflators at issue. Such evidence may include, but is not limited to, inflator diffusion rates, booster and propellant

moisture content (over time), wafer diameter, and closed-bomb test data. In evaluating this evidence, the Agency will closely scrutinize the number of inflators tested, the age of the inflators tested, and the history of the vehicles from which the inflators were removed. A petitioner may also satisfy the standard of proof through robust predictive modeling, which modeling shall be independently verified by NHTSA's expert, Dr. Harold Blomquist. In all instances, a petition will be denied if there has been a rupture incident in the field or in testing that involves the inflator type contained in the particular class of vehicles at issue.

Applicability/Legal Statement: This Enforcement Guidance Bulletin sets forth NHTSA's current interpretation and thinking on the process and procedures under Paragraph 17 of the Amendment, and the standards and criteria that will guide its decision-making. This Bulletin is not a final agency action and is intended as guidance only. This Bulletin is not intended, nor can it be relied upon, to create any rights enforceable by any party against NHTSA, the Department of Transportation, or the United States. Moreover, the process and procedures set forth herein do not establish any defense to any violations of the statutes and regulations that NHTSA administers. This Bulletin may be revised without notice to reflect changes in NHTSA's evaluation and analysis, or to clarify and update text.

Authority: 49 U.S.C. 30101, *et seq.*, 30118, 30162, 30166(b)(1), 30166(g)(1); delegation of authority at 49 CFR 1.95(a).

Issued: July 15, 2016.

Mark R. Rosekind, Ph.D.

Administrator.

BILLING CODE 4910-59-P

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900-0095]

Agency Information Collection (Pension Claim Questionnaire for Farm Income, VA Form 21P-4165); Activity Under OMB Review

AGENCY: Veterans Benefits Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501-3521), this notice announces that the Veterans Benefits Administration (VBA), Department of

Veterans Affairs, will submit the collection of information abstracted below to the Office of Management and Budget (OMB) for review and comment. The PRA submission describes the nature of the information collection and its expected cost and burden; it includes the actual data collection instrument.

DATES: Comments must be submitted on or before August 22, 2016.

ADDRESSES: Submit written comments on the collection of information through www.Regulations.gov, or to Office of Information and Regulatory Affairs, Office of Management and Budget, Attn: VA Desk Officer; 725 17th St. NW., Washington, DC 20503 or sent through electronic mail to oira_submission@omb.eop.gov. Please refer to "OMB Control No. 2900-0095" in any correspondence.

FOR FURTHER INFORMATION CONTACT: Cynthia Harvey-Pryor, Enterprise Records Service (005R1B), Department of Veterans Affairs, 810 Vermont Avenue NW., Washington, DC 20420, (202) 632-7474 or email cynthia.harvey-pryor@va.gov. Please refer to "OMB control No. 2900-0095."

SUPPLEMENTARY INFORMATION:

Title: Pension Claim Questionnaire for Farm Income, VA Form 21P-4165.

OMB Control Number: 2900-0095.

Type of Review: Revision of a currently approved collection.

Abstract: The Department of Veterans Affairs (VA), through its Veterans Benefits Administration (VBA), administers an integrated program of benefits and services, established by law, for veterans, service personnel and their survivors.

38 U.S.C. 1521 establishes a pension benefit for Veterans of a period of war who are permanently and totally disabled. 38 U.S.C. 1541 and 38 U.S.C. 1542 establish a survivor's pension benefit for the surviving dependents of Veterans of a period of war. Entitlement to pension benefits for Veterans and their surviving dependents is based on the family's countable annual income as required by 38 U.S.C. 1503 and net worth as required by 38 U.S.C. 1522.

The information collected on VA Form 21P-4165 will be used by VA to evaluate a claimant's income and net worth related to the operation of a farm for the purpose of establishing entitlement to pension benefits and to evaluate a beneficiary's ongoing entitlement to pension benefits.

Affected Public: Individuals or households.

Estimated Annual Burden: 1,038 hours.

Estimated Average Burden per Respondent: 30 minutes.

Frequency of Response: One time.
Estimated Number of Respondents: 2,075.

By direction of the Secretary:

Cynthia Harvey-Pryor,
Program Specialist, Office of Privacy and Records Management, Department of Veterans Affairs.

Proposed Information Collection (VA Loan Electronic Reporting Interface (VALERI) System); Activity: Comment Request

AGENCY: Veterans Benefits Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: The Veterans Benefits Administration (VBA), Department of Veterans Affairs (VA), is announcing an opportunity for public comment on the proposed collection of certain information by the agency. Under the Paperwork Reduction Act (PRA) of 1995, Federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of a currently approved collection, and allow 60 days for public comment in response to the notice.

DATES: Written comments and recommendations on the proposed collection of information should be received on or before September 20, 2016.

ADDRESSES: Submit written comments on the collection of information through Federal Docket Management System (FDMS) at www.Regulations.gov or to Nancy J. Kessinger, Veterans Benefits Administration (20M33), Department of Veterans Affairs, 810 Vermont Avenue NW., Washington, DC 20420 or email to nancy.kessinger@va.gov. Please refer to "OMB Control No. 2900-0021" in any correspondence. During the comment period, comments may be viewed online through FDMS.

FOR FURTHER INFORMATION CONTACT: Cynthia Harvey-Pryor at (202) 461-5870.

SUPPLEMENTARY INFORMATION: Under the PRA of 1995 (Pub. L. 104-13; 44 U.S.C. 3501-3521), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. This request for comment is being made pursuant to Section 3506(c)(2)(A) of the PRA.

With respect to the following collection of information, VBA invites comments on: (1) Whether the proposed collection of information is necessary for the proper performance of VBA's functions, including whether the information will have practical utility; (2) the accuracy of VBA's estimate of the burden of the proposed collection of information; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or the use of other forms of information technology.

Title: VA Loan Electronic Reporting Interface (VALERI) System.

OMB Control Number: 2900-0021.

Type of Review: Revision of a currently approved collection.

Abstract: VA conducted an in-depth internal review of the entire Loan Administration process. As a result of this review, VA changed previous procedures which include: Collections of information and record retention related to the increased authority of servicers to implement loss-mitigation options; processing of loan modifications; increased information reporting requirements for servicers; elimination of currently-required Notices of Intention to Foreclose; reduction in the amount of documentation provided to VA incident to refunding loans; significant reduction in reporting and recordkeeping burdens pertaining to legal proceedings, including bankruptcies and foreclosures; changes in the way

servicers are permitted to file an election to convey properties to VA; provisions permitting claims to be filed electronically instead of paper submission; authorizing certain servicers to process releases of liability and partial releases; and permitting certain servicers the authority to process liquidation appraisals instead of VA and its appraisers.

Affected Public: Individuals or households.

Estimated Annual Burden: 70 hours.

Estimated Average Burden per

Respondent: 1 second.

Frequency of Response: One-time.

Estimated Number of Respondents: 260.

By direction of the Secretary:

Cynthia Harvey-Pryor,

Program Specialist, Office of Privacy and Records Management, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: The Office of Management (OM), Department of Veterans Affairs (VA), is announcing an opportunity for public comment on the proposed collection of certain information by the agency. Under the Paperwork Reduction Act (PRA) of 1995, Federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each extension of a currently approved collection, and allow 60 days for public comment in response to the notice. This notice describes the nature of the information collection and its expected cost and burden and includes the actual data collection instrument.

DATES: Written comments and recommendations on the proposed collection of information should be received on or before September 20, 2016.

ADDRESSES: Submit written comments on the collection of information through the Federal Docket Management System (FDMS) at www.Regulations.gov; or to Ricky L. Clark, Office of Acquisition and

Logistics (003A2A), Department of Veterans Affairs, 810 Vermont Avenue NW., Washington, DC 20420; or email: Ricky.clark@va.gov. Please refer to "OMB Control No. 2900-0585" in any correspondence. During the comment period, comments may be viewed online through FDMS.

FOR FURTHER INFORMATION CONTACT:

Ricky Clark at (202) 632-5400, Fax (202) 343-1434.

SUPPLEMENTARY INFORMATION: Under the PRA of 1995 (Pub. L. 104-13; 44 U.S.C. 3501-3521), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. This request for comment is being made pursuant to Section 3506(c)(2)(A) of the PRA.

Titles: Veterans Affairs Acquisition Regulation (VAAR) Clause 852.211-73, Brand Name or Equal.

OMB Control Number: 2900-0585.

Type of Review: Extension without change of a previously approved collection.

Abstract: VAAR clause 852.211-73 advises bidders or offerors who are proposing to offer an item that is alleged to be equal to the brand name item stated in the bid, that it is the bidder's or offeror's responsibility to show that the item offered is in fact, equal to the brand name item. This evidence may be in the form of descriptive literature or material, such as cuts, illustrations, drawings, or other information. While submission of the information is voluntary, failure to provide the information may result in rejection of the firm's bid or offer if the Government cannot otherwise determine that the item offered is equal. The contracting officer will use the information to evaluate whether or not the item offered meets the specification requirements.

An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

Affected Public: Business or other for-profit and not-for-profit institutions.

Estimated Annual Burden: 1,125 hours.

Estimated Average Burden per Respondent: 10 minutes.

Frequency of Response: On occasion.

Estimated Number of Respondents: 6,750.

By direction of the Secretary.

Cynthia Harvey-Pryor,

Program Specialist, Enterprise Records Management Service, Office of Privacy and Records Management, Department of Veterans Affairs.

BILLING CODE 8320-01-P

DEPARTMENT OF VETERANS AFFAIRS

Special Medical Advisory Group, Notice of Meeting; Amendment

The Department of Veterans Affairs (VA) gives notice under the Federal Advisory Committee Act, 5 U.S.C. App. 2, that the Special Medical Advisory Group will meet on September 1, 2016, at the VHA National Conference Center, 2011 Crystal Drive, Arlington, VA 22202 from 8 a.m. to 4 p.m. EST in the Potomac A Room. The meeting is open to the public.

The purpose of the Group is to advise the Secretary of Veterans Affairs and the Under Secretary for Health on the care and treatment of Veterans, and other matters pertinent to the Department's Veterans Health Administration (VHA).

The agenda for the meeting will include a review of Commission on Care, Center for Compassionate Innovation (CCI), VA Innovation Center & Innovation Fellows, Strategic Partnerships and Rebuilding Relationships with IBM Watson and Google Deep Mind.

Thirty (30) minutes will be allocated for receiving oral presentations from the public. Members of the public may submit written statements for review by the Committee to Dr. Donna Wells-Taylor, Department of Veterans Affairs, Office of Patient Care Services (10P4), Veterans Health Administration, 810 Vermont Avenue NW., Washington, DC 20420, or by email at donna.wells-taylor@va.gov.

Because the meeting is being held in the VHA National Conference Center, a photo I.D. is required at the entrance as a part of the clearance process. Therefore, you should plan to arrive 15 minutes before the meeting begins to allow time for the clearance process. Any member of the public wishing to attend the meeting or seeking additional information should contact Dr. Donna Wells-Taylor at (202) 461-1025 or by email.

Dated: July 19, 2016.

Jelessa M. Burney,

Federal Advisory Committee Management Officer.

BILLING CODE P

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900-0696]

Proposed Information Collection (Availability of Educational, Licensing, and Certification Records); Activity: Comment Request

AGENCY: Veterans Benefits Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: The Veterans Benefits Administration (VBA), Department of Veterans Affairs (VA), is announcing an opportunity for public comment on the proposed collection of certain information by the agency. Under the Paperwork Reduction Act (PRA) of 1995, Federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of a currently approved collection, and allow 60 days for public comment in response to the notice.

DATES: Written comments and recommendations on the proposed collection of information should be received on or before September 20, 2016.

ADDRESSES: Submit written comments on the collection of information through Federal Docket Management System (FDMS) at www.Regulations.gov or to Nancy J. Kessinger, Veterans Benefits Administration (20M33), Department of Veterans Affairs, 810 Vermont Avenue NW., Washington, DC 20420 or email to nancy.kessinger@va.gov. Please refer to "OMB Control No. 2900-0696" in any correspondence. During the comment period, comments may be viewed online through the FDMS.

FOR FURTHER INFORMATION CONTACT: Nancy J. Kessinger at (202) 632-8924 or FAX (202) 632-8925.

SUPPLEMENTARY INFORMATION: Under the PRA of 1995 (Pub. L. 104-13; 44 U.S.C. 3501-21), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. This request for comment is being made pursuant to Section 3506(c)(2)(A) of the PRA.

With respect to the following collection of information, VBA invites comments on: (1) Whether the proposed collection of information is necessary for the proper performance of VBA's functions, including whether the information will have practical utility; (2) the accuracy of VBA's estimate of the burden of the proposed collection of information; (3) ways to enhance the

quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or the use of other forms of information technology.

Title: Availability of Educational, Licensing, and Certification Records.

OMB Control Number: 2900–0696.

Type of Review: Revision of a currently approved collection.

Abstract: Educational institutions (including licensing and certification organizations) with approved courses or tests must make records available to government representatives. These records are used to insure that payment of benefits under the education programs VA administers have been made correctly.

Affected Public: Educational Institutions.

Estimated Annual Burden: 11,400 hours.

Estimated Average Burden per Respondent: 2 hours.

Frequency of Response: Annually.

Estimated Number of Respondents: 5,700.

By direction of the Secretary.

Cynthia Harvey-Pryor,

Program Specialist, Office of Privacy and Records Management, Department of Veterans Affairs.

FEDERAL REGISTER

Vol. 81

Friday,

No. 141

July 22, 2016

Part II

Bureau of Consumer Financial Protection

12 CFR Part 1041

Payday, Vehicle Title, and Certain High-Cost Installment Loans; Proposed Rule

BUREAU OF CONSUMER FINANCIAL PROTECTION**12 CFR Part 1041**

[Docket No. CFPB-2016-0025]

RIN 3170-AA40

Payday, Vehicle Title, and Certain High-Cost Installment Loans**AGENCY:** Bureau of Consumer Financial Protection.**ACTION:** Proposed rule with request for public comment.

SUMMARY: The Bureau of Consumer Financial Protection (Bureau or CFPB) is proposing to establish 12 CFR 1041, which would contain regulations creating consumer protections for certain consumer credit products. The proposed regulations would cover payday, vehicle title, and certain high-cost installment loans.

DATES: Comments must be received on or before October 7, 2016.

ADDRESSES: You may submit comments, identified by Docket No. CFPB-2016-0025 or RIN 3170-AA40, by any of the following methods:

- *Email:* FederalRegisterComments@cfpb.gov. Include Docket No. CFPB-2016-0025 or RIN 3170-AA40 in the subject line of the email.

- *Electronic:* <http://www.regulations.gov>.

Follow the instructions for submitting comments.

- *Mail:* Monica Jackson, Office of the Executive Secretary, Consumer Financial Protection Bureau, 1700 G Street NW., Washington, DC 20552.

- *Hand Delivery/Courier:* Monica Jackson, Office of the Executive Secretary, Consumer Financial Protection Bureau, 1275 First Street NE., Washington, DC 20002.

Instructions: All submissions should include the agency name and docket number or Regulatory Information Number (RIN) for this rulemaking. Because paper mail in the Washington, DC area and at the Bureau is subject to delay, commenters are encouraged to submit comments electronically. In general, all comments received will be posted without change to <http://www.regulations.gov>. In addition, comments will be available for public inspection and copying at 1275 First Street NE., Washington, DC 20002, on official business days between the hours of 10 a.m. and 5 p.m. eastern time. You can make an appointment to inspect the documents by telephoning (202) 435-7275.

All comments, including attachments and other supporting materials, will become part of the public record and

subject to public disclosure. Sensitive personal information, such as account numbers or Social Security numbers, should not be included. Comments will not be edited to remove any identifying or contact information.

FOR FURTHER INFORMATION CONTACT:

Eleanor Blume, Sarita Frattaroli, Casey Jennings, Sandeep Vaheesan, Steve Wrone, Counsels; Daniel C. Brown, Mark Morelli, Michael G. Silver, Laura B. Stack, Senior Counsels, Office of Regulations, at 202-435-7700.

SUPPLEMENTARY INFORMATION:**I. Summary of the Proposed Rule**

The Bureau is issuing this notice to propose consumer protections for payday loans, vehicle title loans, and certain high-cost installment loans (collectively “covered loans”). Covered loans are typically used by consumers who are living paycheck to paycheck, have little to no access to other credit products, and seek funds to meet recurring or one-time expenses. The Bureau has conducted extensive research on these products, in addition to several years of outreach and review of the available literature. The Bureau is proposing to issue regulations primarily pursuant to authority under section 1031 of the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act) to identify and prevent unfair, deceptive, and abusive acts and practices.¹ The Bureau is also using authorities under section 1022 of the Dodd-Frank Act to prescribe rules and make exemptions from such rules as is necessary or appropriate to carry out the purposes and objectives of the consumer Federal consumer financial laws,² section 1024 of the Dodd-Frank Act to facilitate supervision of certain non-bank financial service providers,³ and section 1032 of the Dodd-Frank Act to require disclosures to convey the costs, benefits, and risks of particular consumer financial products or services.⁴

The Bureau is concerned that lenders that make covered loans have developed business models that deviate substantially from the practices in other credit markets by failing to assess consumers’ ability to repay their loans and by engaging in harmful practices in the course of seeking to withdraw payments from consumers’ accounts. The Bureau believes that there may be a high likelihood of consumer harm in connection with these covered loans

because many consumers struggle to repay their loans. In particular, many consumers who take out covered loans appear to lack the ability to repay them and face one of three options when an unaffordable loan payment is due: take out additional covered loans, default on the covered loan, or make the payment on the covered loan and fail to meet other major financial obligations or basic living expenses. Many lenders may seek to obtain repayment of covered loans directly from consumers’ accounts. The Bureau is concerned that consumers may be subject to multiple fees and other harms when lenders make repeated unsuccessful attempts to withdraw funds from consumers’ accounts.

A. Scope of the Proposed Rule

The Bureau’s proposal would apply to two types of covered loans. First, it would apply to short-term loans that have terms of 45 days or less, including typical 14-day and 30-day payday loans, as well as short-term vehicle title loans that are usually made for 30-day terms. Second, the proposal would apply to longer-term loans with terms of more than 45 days that have (1) a total cost of credit that exceeds 36 percent; and (2) either a lien or other security interest in the consumer’s vehicle or a form of “leveraged payment mechanism” that gives the lender a right to initiate transfers from the consumer’s account or to obtain payment through a payroll deduction or other direct access to the consumer’s paycheck. Included among covered longer-term loans is a subcategory loans with a balloon payment, which require the consumer to pay all of the principal in a single payment or make at least one payment that is more than twice as large as any other payment.

The Bureau is proposing to exclude several types of consumer credit from the scope of the proposal, including: (1) Loans extended solely to finance the purchase of a car or other consumer good in which the good secures the loan; (2) home mortgages and other loans secured by real property or a dwelling if recorded or perfected; (3) credit cards; (4) student loans; (5) non-recourse pawn loans; and (6) overdraft services and lines of credit.

B. Proposed Ability-to-Repay Requirements and Alternative Requirements for Covered Short-Term Loans

The proposed rule would identify it as an abusive and unfair practice for a lender to make a covered short-term loan without reasonably determining that the consumer will have the ability

¹ Public Law 111-203, section 1031(b), 124 Stat. 3176 (2010) (hereinafter Dodd-Frank Act).

² Dodd-Frank Act section 1022(b).

³ Dodd-Frank Act section 1024(b)(7).

⁴ Dodd-Frank Act section 1032(a).

to repay the loan.⁵ The proposed rule would prescribe requirements to prevent the practice. A lender, before making a covered short-term loan, would have to make a reasonable determination that the consumer would be able to make the payments on the loan and be able to meet the consumer's other major financial obligations and basic living expenses without needing to reborrow over the ensuing 30 days. Specifically, a lender would have to:

- Verify the consumer's net income;
- verify the consumer's debt obligations using a national consumer report and a consumer report from a "registered information system" as described below;
- verify the consumer's housing costs or use a reliable method of estimating a consumer's housing expense based on the housing expenses of similarly situated consumers;
- forecast a reasonable amount of basic living expenses for the consumer—expenditures (other than debt obligations and housing costs) necessary for a consumer to maintain the consumer's health, welfare, and ability to produce income;
- project the consumer's net income, debt obligations, and housing costs for a period of time based on the term of the loan; and
- determine the consumer's ability to repay the loan based on the lender's projections of the consumer's income, debt obligations, and housing costs and forecast of basic living expenses for the consumer.

A lender would also have to make, under certain circumstances, additional assumptions or presumptions when evaluating a consumer's ability to repay a covered short-term loan. The proposal would specify certain assumptions for determining the consumer's ability to repay a line of credit that is a covered short-term loan. In addition, if a consumer seeks a covered short-term loan within 30 days of a covered short-term loan or a covered longer-term loan with a balloon payment, a lender generally would be required to presume that the consumer is not able to afford the new loan. A lender would be able to overcome the presumption of unaffordability for a new covered short-term loan only if it could document a sufficient improvement in the consumer's financial capacity.

⁵ This is a notice of proposed rulemaking, so the Bureau's statements herein regarding this and other proposed identifications of unfair and abusive practices, including the necessary elements of such identifications, are provisional only. The Bureau is not herein finding that such elements have been satisfied and identifying unfair and abusive practices.

Furthermore, a lender would be prohibited from making a covered short-term loan to a consumer who has already taken out three covered short-term loans within 30 days of each other.

A lender would also be allowed to make a covered short-term loan, without making an ability-to-repay determination, so long as the loan satisfies certain prescribed terms and the lender confirms that the consumer met specified borrowing history conditions and provides required disclosures to the consumer. Among other conditions, a lender would be allowed to make up to three covered short-term loans in short succession, provided that the first loan has a principal amount no larger than \$500, the second loan has a principal amount at least one-third smaller than the principal amount on the first loan, and the third loan has a principal amount at least two-thirds smaller than the principal amount on the first loan. In addition, a lender would not be allowed to make a covered short-term loan under the alternative requirements if it would result in the consumer having more than six covered short-term loans during a consecutive 12-month period or being in debt for more than 90 days on covered short-term loans during a consecutive 12-month period. A lender would not be permitted to take vehicle security in connection with these loans.

C. Proposed Ability-to-Repay Requirements and Alternative Requirements for Covered Longer-Term Loans

The proposed rule would identify it as an abusive and unfair practice for a lender to make a covered longer-term loan without reasonably determining that the consumer will have the ability to repay the loan. The proposed rule would prescribe requirements to prevent the practice. A lender, before making a covered longer-term loan, would have to make a reasonable determination that the consumer has the ability to make all required payments as scheduled. The proposed ability-to-repay requirements for covered longer-term loans closely track the proposed requirements for covered short-term loans with an added requirement that the lender, in assessing the consumer's ability to repay a longer term loan, reasonably account for the possibility of volatility in the consumer's income, obligations, or basic living expenses during the term of the loan.

A lender would also have to make, under certain circumstances, additional assumptions or presumptions when evaluating a consumer's ability to repay a covered longer-term loan. The

proposal would specify certain assumptions for determining the consumer's ability to repay a line of credit that is a covered longer-term loan. In addition, if a consumer seeks a covered longer-term loan within 30 days of a covered short-term loan or a covered longer-term balloon-payment loan, the lender would, under certain circumstances, be required to presume that the consumer is not able to afford a new loan. A presumption of unaffordability also generally would apply if the consumer has shown or expressed difficulty in repaying other outstanding covered or non-covered loans made by the same lender or its affiliate. A lender would be able to overcome the presumption of unaffordability for a new covered longer-term loan only if it could document a sufficient improvement in the consumer's financial capacity.

A lender would also be permitted to make a covered longer-term loan without having to satisfy the ability-to-repay requirements by making loans under a conditional exemption modeled on the National Credit Union Administration's (NCUA) Payday Alternative Loan (PAL) program. Among other conditions, a covered longer-term loan under this exemption would be required to have a principal amount of not less than \$200 and not more than \$1,000, fully amortizing payments, and a term of at least 46 days but not longer than six months. In addition, loans made under this exemption could not have an interest rate more than the interest rate that is permitted for Federal credit unions to charge under the PAL regulations and an application fee of more than \$20.

A lender would also be permitted to make a covered longer-term loan, without having to satisfy the ability-to-repay requirements, so long as the covered longer-term loan meets certain structural conditions. Among other conditions, a covered longer-term loan under this exemption would be required to have fully amortizing payments and a term of at least 46 days but not longer than 24 months. In addition, to qualify for this conditional exemption, a loan must carry a modified total cost of credit of less than or equal to an annual rate of 36 percent, from which the lender could exclude a single origination fee that is no more than \$50 or that is reasonably proportionate to the lender's costs of underwriting. The projected annual default rate on all loans made pursuant to this conditional exemption must not exceed 5 percent. The lender would have to refund all of the origination fees paid by all borrowers in

any year in which the annual default rate of 5 percent is exceeded.

D. Proposed Payments Practices Rules

The proposed rule would identify it as an abusive and unfair practice for a lender to attempt to withdraw payment from a consumer's account in connection with a covered loan after the lender's second consecutive attempt to withdraw payment from the account has failed due to a lack of sufficient funds, unless the lender obtains from the consumer a new and specific authorization to make further withdrawals from the account. This prohibition on further withdrawal attempts would apply whether the two failed attempts are initiated through a single payment channel or different channels, such as the automated clearinghouse system and the check network. The proposed rule would require that lenders provide notice to consumers when the prohibition has been triggered and follow certain procedures in obtaining new authorizations.

In addition to the requirements related to the prohibition on further payment withdrawal attempts, a lender would be required to provide a written notice at least three business days before each attempt to withdraw payment for a covered loan from a consumer's checking, savings, or prepaid account. The notice would contain key information about the upcoming payment attempt, and, if applicable, alert the consumer to unusual payment attempts. A lender would be permitted to provide electronic notices so long as the consumer consents to electronic communications.

E. Additional Requirements

The Bureau is proposing to require lenders to furnish to registered information systems basic information for most covered loans at origination, any updates to that information over the life of the loan, and certain information when the loan ceases to be outstanding. The registered information systems would have to meet certain eligibility criteria prescribed in the proposed rule. The Bureau is proposing a sequential process that it believes would ensure that information systems would be registered and lenders ready to furnish at the time the furnishing obligation in the proposed rule would take effect. For most covered loans, registered information systems would provide a reasonably comprehensive record of a consumer's recent and current borrowing. Before making most covered loans, a lender would be required to

obtain and review a consumer report from a registered information system.

A lender would be required to establish and follow a compliance program and retain certain records. A lender would be required to develop and follow written policies and procedures that are reasonably designed to ensure compliance with the requirements in this proposal. Furthermore, a lender would be required to retain the loan agreement and documentation obtained for a covered loan, and electronic records in tabular format regarding origination calculations and determinations for a covered loan, for a consumer who qualifies for an exception to or overcomes a presumption of unaffordability for a covered loan, and regarding loan type and terms. The proposed rule also would include an anti-evasion clause.

F. Effective Date

The Bureau is proposing that, in general, the final rule would become effective 15 months after publication of the final rule in the **Federal Register**. The Bureau is proposing that certain provisions necessary to implement the consumer reporting components of the proposal would become effective 60 days after publication of the final rule in the **Federal Register** to facilitate an orderly implementation process.

II. Background

A. Introduction

For most consumers, credit provides a means of purchasing goods or services and spreading the cost of repayment over time. This is true of the three largest consumer credit markets: The market for mortgages (\$9.99 trillion in outstanding balances), for student loans (\$1.3 trillion), and for auto loans (\$1 trillion). This is also one way in which certain types of open-end credit—including home equity loans (\$0.14 trillion) and lines of credit (\$0.51 trillion)—and at least some credit cards and revolving credit (\$0.9 trillion)—can be used.⁶

⁶ For mortgages (one- to four-family) see Bd. of Governors of the Fed. Reserve Sys., *Mortgage Debt Outstanding (1.54)* (Release Date Mar. 2016), available at <http://www.federalreserve.gov/econresdata/releases/mortoutstand/current.htm>; for student loans, auto loans, and revolving credit, see Bd. of Governors of the Fed. Reserve Sys., *Consumer Credit-G.19 February 2016* (Release Date Apr. 2016), available at <http://www.federalreserve.gov/releases/g19/current/default.htm#fn11b>. Home equity loans and lines of credit outstanding estimate derived from Experian & Oliver Wyman, *2015 Q4 Market Intelligence Report: Home Equity Loans Report*, at 16 fig. 21 (2016), available at <http://www.marketintelligence.com> and Experian &

Consumers living paycheck to paycheck and with little to no savings have also used credit as a means of coping with shortfalls. These shortfalls can arise from mismatched timing between income and expenses, misaligned cash flows, income volatility, unexpected expenses or income shocks, or expenses that simply exceed income.⁷ Whatever the cause of the shortfall, consumers in these situations sometimes seek what may broadly be termed a "liquidity loan."⁸ There are a variety of loans and products that consumers use for these purposes including credit cards, deposit account overdraft, pawn loans, payday loans, vehicle title loans, and installment loans.

Credit cards and deposit account overdraft services are each already subject to specific Federal consumer protection regulations and requirements. The Bureau generally considers these markets to be outside the scope of this rulemaking as discussed further below. The Bureau is also separately engaged in research and evaluation of potential rulemaking actions on deposit account overdraft.⁹

Oliver Wyman, *2015 Q4 Market Intelligence Report Market Intelligence Report: Home Equity Lines Report*, at 21 fig. 30 (2016), available at <http://www.marketintelligence.com>.

⁷ For a general discussion, see Rob Levy & Joshua Sledge, Ctr. for Fin. Servs. Innovation, *A Complex Portrait: An Examination of Small-Dollar Credit Consumers* (2012), available at <https://www.fdic.gov/news/conferences/consumersymposium/2012/A%20Complex%20Portrait.pdf>.

⁸ If a consumer's expenses consistently exceed income, a liquidity loan is not likely to be an appropriate solution to the consumer's needs.

⁹ Credit cards and deposit overdraft services would be excluded from the proposed rule under proposed § 1041.3(e)(3) and (6) as discussed further below. The Bureau is engaged in a separate rulemaking concerning credit offered in connection with prepaid accounts and has proposed to treat such products generally as credit cards. See 79 FR 77102 (Dec. 23, 2014). The Bureau has issued a Notice and Request for Information on the Impacts of Overdraft Programs on Consumers and has indicated that it is preparing for a separate rulemaking that will address possible consumer protection concerns from overdraft services. See 77 FR 12031-12034 (Feb. 28, 2012); Kelly Cochran, *Spring 2016 Rulemaking Agenda*, CFPB Blog (May 18, 2016), <http://www.consumerfinance.gov/about-us/blog/spring-2016-rulemaking-agenda/>. In 2015, banks with over \$1 billion in assets reported overdraft and NSF (nonsufficient funds) fee revenue of \$11.16 billion. See Gary Stein, *New Insights on Bank Overdraft Fees and 4 Ways to Avoid Them*, CFPB Blog (Feb. 25, 2016), <http://www.consumerfinance.gov/blog/new-insights-on-bank-overdraft-fees-and-4-ways-to-avoid-them/>. The \$11.16 billion total does not include credit union fee revenue and does not separate out overdraft from NSF amounts but overall, overdraft fee revenue accounts for about 72 percent of that amount. Bureau of Consumer Fin. Prot., *Data Point: Checking Account Overdraft*, at 10 (2014) [*hereinafter* CFPB Data Point: *Checking Account Overdraft*], available at http://files.consumerfinance.gov/f/201407_cfpb_report_

Another liquidity option—pawn—generally involves non-recourse loans made against the value of whatever item a consumer chooses to give the lender in return for the funds.¹⁰ The consumer has the option to either repay the loan or permit the pawnbroker to retain and sell the pawned property at the end of the loan term, relieving the borrower from any additional financial obligation. This feature distinguishes pawn loans from most other types of liquidity loans. The Bureau is proposing to exclude non-recourse possessory pawn loans, as described in proposed § 1041.3(e)(5), from the scope of this rulemaking.

This rulemaking is focused on two general categories of liquidity loan products: Short-term loans and certain higher-cost longer-term loans. The largest category of short-term loans are “payday loans,” which are generally

data-point overdrafts.pdf. The Federal Reserve Board adopted a set of regulations of overdraft services and the Bureau has published two overdraft research reports on overdraft. See Regulation E, 75 FR 31665 (Jun. 4, 2010), available at <https://www.gpo.gov/fdsys/pkg/FR-2010-06-04/pdf/2010-13280.pdf>; Bureau of Consumer Fin. Prot., *CFPB Study of Overdraft Programs: A White Paper of Initial Data Findings*, (2013), [hereinafter *CFPB Study of Overdraft Programs White Paper*], available at http://files.consumerfinance.gov/f/201306_cfpb_whitepaper_overdraft-practices.pdf; *CFPB Data Point: Checking Account Overdraft*.

¹⁰ Pawn lending, also known as pledge lending, has existed for centuries, with references to it in the Old Testament; pawn lending in the U.S. began in the 17th century. See Susan Payne Carter, *Payday Loan and Pawnshop Usage: The Impact of Allowing Payday Loan Rollovers*, at 5 (2012), available at https://my.vanderbilt.edu/susancarter/files/2011/07/Carter_Susan_JMP_Website2.pdf. Pawn revenue for 2014 was estimated at \$6.3 billion. EZCORP, *EZCORP 2014 Institutional Investor Day*, at 31 (Dec. 11, 2014), available at <http://investors.ezcorp.com/index.php?s=65&item=87>. The three largest pawn firms, Cash America, EZCorp, and First Cash Financial Services, accounted for about one-third of total industry revenue but only 13 percent of the over 11,000 storefronts, that are operated by over 5,000 firms. *Id.*; First Cash Financial Services Inc., 2015 Annual Report (Form 10-K), at 1, 33 (Feb. 17, 2016), available at <https://www.sec.gov/Archives/edgar/data/840489/000084048916000076/fcfs1231201510-k.htm>; EZCORP, Inc., 2015 Annual Report (Form 10-K), at 4, 21 (Dec. 23, 2015), available at <https://www.sec.gov/Archives/edgar/data/876523/000087652315000120/a201510-k.htm>, and Cash America International, Inc., 2015 Annual Report (Form 10-K), at 2, 36 (Feb. 25, 2016), available at <https://www.sec.gov/Archives/edgar/data/807884/000080788416000055/0000807884-16-000055-index.htm>. On April 28, 2016, First Cash Financial Services and Cash America announced they had entered into a merger agreement. The resulting company, FirstCash will operate in 26 States. Press Release, “First Cash Financial Services and Cash America International to Combine in Merger of Equals to Create Leading Operator of Retail Pawn Stores in the United States and Latin America” (Apr. 28, 2016), available at http://ww2.firstcash.com/sites/default/files/20160428_PR_M.pdf. Revenue calculations for each firm were made by taking the percentage of total revenue associated with pawn lending activity. For more about pawn lending in general, see John P. Caskey, *Fringe Banking: Cash-Checking Outlets, Pawnshops, and the Poor*, at ch. 2 (1994).

required to be repaid in a lump-sum single-payment on receipt of the borrower’s next income payment, and short-term vehicle title loans, which are also almost always due in a lump-sum single-payment, typically within 30 days after the loan is made. The second general category consists of certain higher-cost longer-term loans. It includes both what are often referred to as “payday installment loans”—that is, loans that are repaid in multiple installments with each installment typically due on the borrower’s payday or regularly-scheduled income payment and with the lender generally having the ability to automatically collect payments from an account into which the income payment is deposited—and vehicle title installment loans. In addition, the latter category includes higher cost, longer-term loans in which the principal is not amortized but is scheduled to be paid off in a large lump sum payment after a series of smaller, often interest-only, payments. Some of these loans are available at storefront locations, others are available on the internet, and some loans are available through multiple delivery channels. This rulemaking is not limited to closed-end loans but includes open-end lines of credit as well.¹¹ It also includes short-term products and some more traditional installment loans made by some depository institutions and by traditional finance companies.

As described in more detail in part III, the Bureau has been studying these markets for liquidity loans for over four years, gaining insights from a variety of sources. During this time the Bureau has conducted supervisory examinations of a number of payday lenders and enforcement investigations of a number of different types of liquidity lenders, which have given the Bureau insights into the business models and practices of such lenders. Through these processes, and through market monitoring activities, the Bureau also has obtained extensive loan-level data that the Bureau has studied to better understand risks to consumers.¹² The

¹¹ The Dodd-Frank Act does not define “payday loans,” and the Bureau is not proposing to do so in this rulemaking. The Bureau may do so in a subsequent rulemaking or in another context. In addition, the Bureau notes that various State, local, and tribal jurisdictions may define “payday loans” in ways that may be more or less coextensive with the coverage of the Bureau’s proposal.

¹² Information underlying this proposed rule is derived from a variety of sources, including from market monitoring and outreach, third-party studies and data, consumer complaints, the Bureau’s enforcement and supervisory work, and the Bureau’s expertise generally. In publicly discussing information, the Bureau has taken steps not to disclose confidential information inappropriately and to otherwise comply with applicable law and

Bureau has published four reports based upon these data, and, concurrently with the issuance of this Notice of Proposed Rulemaking, the Bureau is releasing a fifth report.¹³ The Bureau has also carefully reviewed the published literature with respect to small-dollar liquidity loans and a number of outside researchers have presented their research at seminars for Bureau staff. In addition, over the course of the past four years the Bureau has engaged in extensive outreach with a variety of stakeholders in both formal and informal settings, including several Bureau field hearings across the country specifically focused on the subject of small-dollar lending, meetings with the Bureau’s standing advisory groups, meetings with State and Federal regulators, meetings with consumer advocates, religious groups, and industry trade associations, consultations with Indian tribes, and through a Small Business Review Panel process as described further below.

This Background section provides a brief description of the major components of the markets for both short-term loans and certain higher-cost longer-term loans, describing the product parameters, industry size and structure, lending practices, and business models of each component. It then goes on to describe recent State and Federal regulatory activity in connection with these product markets. Market Concerns—Short-Term Loans and Market Concerns—Longer-Term Loans below, provide a more detailed description of consumer experiences with short-term loans and certain higher-cost longer-term loans, describing research about which consumers use the products, why they

its own rules regarding disclosure of records and information. See 12 CFR 1070.41(c).

use the products, and the outcomes they experience as a result of the product structures and industry practices.

B. Single-payment and Other Short-Term Loans

At around the beginning of the twentieth century, concern arose with respect to companies that were responding to liquidity needs by offering to “purchase” a consumer’s paycheck in advance of it being paid. These companies charged fees that, if calculated as an annualized interest rate, were as high as 400 percent.¹⁴ To address these concerns, between 1914 and 1943, 34 States enacted a form of the Uniform Small Loan Law, which was a model law developed by the Russell Sage Foundation. That law provided for lender licensing and permitted interest rates of between 2 and 4 percent per month, or 24 to 48 percent per year. Those rates were substantially higher than pre-existing usury limits (which generally capped interest rates at between 6 and 8 percent per year) but were viewed by proponents as “equitable to both borrower and lender.”¹⁵

New forms of short-term small-dollar lending appeared in several States in the 1990s,¹⁶ starting with check cashing outlets that would hold a customer’s personal check for a period of time for a fee before cashing it (“check holding” or “deferred presentment”).¹⁷ Several market factors had converged around the same time. Consumers were using credit cards more frequently for short-term liquidity lending needs, a trend that continues today.¹⁸ Storefront

finance companies, described below in part II.C that had provided small loans changed their focus to larger, collateralized products, including vehicle financing and real estate secured loans. At the same time there was substantial consolidation in the storefront installment lending industry. Depository institutions similarly moved away from short-term small-dollar loans.

Around the same time, a number of State legislatures amended their usury laws to allow lending by a broader group of both depository and non-depository lenders by increasing maximum allowable State interest rates or eliminating State usury laws, while other States created usury carve-outs or special rules for short-term loans.¹⁹ The confluence of these trends has led to the development of markets offering what are commonly referred to as payday loans (also known as cash advance loans, deferred deposit, and deferred presentment loans depending on lender and State law terminology), and short-term vehicle title loans that are much shorter in duration than vehicle-secured loans that have traditionally been offered by storefront installment lenders and depository institutions. Although payday loans initially were distributed through storefront retail outlets, they are now also widely available on the internet. Vehicle title loans are typically offered exclusively at storefront retail outlets.

These markets as they have evolved over the last two decades are not strictly segmented. There is substantial overlap between market products and the borrowers who use them. For example, in a 2013 survey, almost 18 percent of U.S. households that had used a payday loan in the prior year had also used a vehicle title loan.²⁰ There is also an established trend away from “monoline” or single-product lending companies. Thus, for example, a number of large payday lenders also offer vehicle title and installment loans.²¹ The following discussion

nonetheless provides a description of major product types.

Storefront Payday Loans

The market that has received the greatest attention among policy makers, advocates, and researchers is the market for single-payment payday loans. These payday loans are short-term small-dollar loans generally repayable in a single payment due when the consumer is scheduled to receive a paycheck or other inflow of income (e.g., government benefits).²² For most borrowers, the loan is due in a single payment on their payday, although State laws with minimum loan terms—seven days for example—or lender practices may affect the loan duration in individual cases. The Bureau refers to these short-term payday loans available at retail locations as “storefront payday loans,” but the requirements for borrowers taking online payday loans are generally similar, as described below. There are now 36 States that either have created a carve-out from their general usury cap for payday loans or have no usury caps on consumer loans.²³ The remaining 14

²¹ See for example, Advance America; Cash America Pawn; Check Into Cash; Community

States and the District of Columbia either ban payday loans or have fee or interest rate caps that payday lenders apparently find too low to sustain their business models. As discussed further below, several of these States previously had authorized payday lending but subsequently changed their laws.

Product definition and regulatory environment. As noted above, payday loans are typically repayable in a single payment on the borrower's next payday. In order to help ensure repayment, in the storefront environment the lender generally holds the borrower's personal check made out to the lender—usually post-dated to the loan due date in the amount of the loan's principal and fees—or the borrower's authorization to electronically debit the funds from her checking account, commonly known as an automated clearing house (ACH) transaction.²⁴ Payment methods are described in more detail below in part II.D.

Payday loan sizes vary depending on State law limits, individual lender credit models, and borrower demand. Many States set a limit on payday loan size; \$500 is a common loan limit although the limits range from \$300 to \$1,000.²⁵ In 2013, the Bureau reported

that the median loan amount for storefront payday loans was \$350, based on supervisory data.²⁶ This finding is broadly consistent with other studies using data from one or more lenders as well as with self-reported information in surveys of payday borrowers²⁷ and State regulatory reports.²⁸

The fee for a payday loan is generally structured as a percentage or dollar amount per \$100 borrowed, rather than a periodic interest rate based on the amount of time the loan is outstanding. Many State laws set a maximum amount for these fees, with 15 percent (\$15 per \$100 borrowed) being the most common limit.²⁹ The median storefront payday

loan fee is \$15 per \$100; thus for a \$350 loan, the borrower must repay \$52.50 in finance charges together with the \$350 borrowed for a total repayment amount of \$402.50.³⁰ The annual percentage rate (APR) on a 14-day loan with these terms is 391 percent.³¹ For payday borrowers who receive monthly income and thus receive a 30-day or monthly payday loan—many of whom are Social Security recipients³²—a \$15 per \$100 charge on a \$350 loan for a term of 30 days equates to an APR of about 180 percent. The Bureau has found the median loan term for a storefront payday loan to be 14 days, with an average term of 18.3 days. The longer average loan duration is due to State laws that require minimum loan terms that may extend beyond the borrower's next pay date.³³ Fees and loan amounts are higher for online loans, described in more detail below.

On the loan's due date, the terms of the loan obligate the borrower to repay the loan in full. Although the States that created exceptions to their usury limits for payday lending generally did so on the theory these were short-term loans to which the usual usury rules did not easily apply, in 19 of the States that authorize payday lending the lender is permitted to roll over the loan when it comes due. A rollover occurs when, instead of repaying the loan in full at maturity, the consumer pays only the fees due and the lender agrees to extend the due date.³⁴ By rolling over, the loan repayment of the principal is extended for another period of time, usually equivalent to the original loan term, in

Fla. Stat. § 560.404(6), Or. Rev. Stat. § 725A.064(1)-(2), Miss. Code Ann. § 75-67-519(4), Del. Code Ann. tit. 5, § 2229, Idaho Code Ann. § 28-46-412(3), S.D. Codified Laws § 54-4-44, Tex. Fin. Code Ann. § 393.602(b), Utah Code Ann. § 7-23-401, Wis. Stat. § 138.14(10) (a).

³⁰ CFPB Payday Loans and Deposit Advance Products White Paper, at 15-17.

³¹ Throughout the part II., APR refers to the annual percentage rate calculated as required by the Truth in Lending Act, 15 U.S.C. 1601 *et seq.* and Regulation Z, 12 CFR 1026, except where otherwise specified.

³² CFPB Payday Loans and Deposit Advance Products White Paper, at 16, 19 (33 percent of payday loan borrowers receive income monthly; 18 percent of payday loan borrowers are public benefits recipients, largely from Social Security including Supplemental Security Income and Social Security Disability, typically paid on a monthly basis).

³³ For example, Washington requires the due date to be on or after the borrower's next pay date but if the pay date is within seven days of taking out the loan, the due date must be on the second pay date after the loan is made. Wash. Rev. Code § 31.45.073(2). A number of States set minimum loan terms, some of which are tied directly to the consumer's next payday.

³⁴ This proposal uses the term "rollover" but this practice is sometimes described under State law or by lenders as a "renewal" or an "extension."

Idaho—25 percent or \$1,000, Illinois—25 percent or \$1,000, Indiana—20 percent or \$550, Washington—30 percent or \$700, and Wisconsin—35 percent or \$1,500. At least two States cap the maximum payday loan at 25 percent of the borrower's gross monthly income (Nevada and New Mexico). A few States laws are silent as to the maximum loan amount (Utah and Wyoming). Idaho Code Ann. § 28-46-413(1), (2); 815 Ill. Comp. Stat. 122/2-5(e); Ind. Code §§ 24-4.5-7-402, -404; Wash. Rev. Code § 31.45.073(2); Wis. Stat. § 138.14(12)(b); Nev. Rev. Stat. § 604A.425(1)(b), N.M. Stat. Ann. § 58-15-32(A), Utah Code Ann. § 7-23-401, Wyo. Stat. Ann. § 40-14-363.

²⁷ Leslie Parrish & Uriah King, Ctr. for Responsible Lending, *Phantom Demand: Short-term Due Date Generates Need for Repeat Payday Loans, Accounting for 76% of total Volume*, at 21 (2009), available at <http://www.responsiblelending.org/payday-lending/research-analysis/phantom-demand-final.pdf> (reporting \$350 as the average loan size); Pew Charitable Trusts, *Payday Lending in America: Who Borrows, Where They Borrow, and Why*, at 9 (2012) [hereinafter *Pew Payday Lending in America: Report 1*], available at http://www.pewtrusts.org/~media/legacy/uploadedfiles/pes_assets/2012/pewpaydaylendingreportpdf.pdf (reporting \$375 as the average).

²⁸ For example: \$361.21 (Illinois average, see Ill. Dep't. of Fin. & Prof. Reg., *Illinois Trends Report All Consumer Loan Products Through December 2013*, at 15 (May 28, 2014), available at https://www.idfpr.com/dfi/ccd/pdfs/IL_Trends_Report%202013.pdf); \$350 (Idaho average, see Idaho Dep't. of Fin., *Idaho Credit Code "Fast Facts" With Fiscal and Annual Report Data as of January 1, 2016*, at 5, available at <https://www.finance.idaho.gov/ConsumerFinance/Documents/Idaho-Credit-Code-Fast-Facts-With-Fiscal-Annual-Report-Data-01012016.pdf>); \$389.50 (Washington average, see Wash. State Dep't. of Fin. Insts., 2014 Payday Lending Report, at 6, available at <http://www.dfi.wa.gov/sites/default/files/reports/2014-payday-lending-report.pdf>).

²⁹ Of the States that expressly authorize payday lending, Rhode Island has the lowest cap at 10 percent of the loan amount. Florida has the same fee amount but also allows a flat \$5 verification fee. Oregon's fees are \$10 per \$100 capped at \$30 plus 36 percent interest. Some States have tiered caps depending on the size of the loan. Generally, in these States the cap declines with loan size. However, in Mississippi, the cap is \$20 per hundred for loans under \$250 and \$21.95 for larger loans (up to the State maximum of \$500). Seven States do not cap fees on payday loans or are silent on fees (Delaware, Idaho, Nevada, South Dakota, Texas (no cap on credit access business fees), Utah, and Wisconsin). Depending on State law, the fee may be referred to as a "charge," "rate," "interest" or other similar term. R.I. Gen. Laws § 19-14.4-4(4),

²⁴ The Bureau is aware from market outreach that at a storefront payday lender's Tennessee branch, almost 100 percent of customers opted to provide ACH authorization rather than leave a post-dated check for their loans. ²⁵ At least 19 States cap payday loan amounts between \$500 and \$600 (Alabama, Alaska, Florida, Hawaii, Iowa, Kansas, Kentucky, Michigan, Mississippi, Missouri, Nebraska, North Dakota, Ohio, Oklahoma, Rhode Island, South Carolina, South Dakota, Tennessee, and Virginia), and California limits payday loans to \$300 (including the fee) and Delaware caps loans at \$1,000. Ala. Code sec. 5-18A-12(a), Alaska Stat. sec. 06.50.410, Cal. Fin. Code sec. 23035(a), Del. Code Ann. tit. 5, sec. 2227(7), Fla. Stat. sec. 560.404(5), Haw. Rev. Stat. sec. 480F-4(c), Iowa Code sec. 533D.10(1)(b), Kan. Stat. Ann. Sec. 16a-2-404(1)(c), Ky. Rev. Stat. Ann. Sec. 286.9-100(9), Mich. Comp. Laws sec. 487.2153(1), Miss. Code Ann. Sec. 75-67-519(2), Mo. Rev. Stat. sec. 408.500(1), Neb. Rev. Stat. sec. 45-919(1)(b), N.D. Cent. Code sec. 13-08-12(3); Ohio Rev. Code Ann. sec. 1321.39(A), Okla. Stat. tit. 59, sec. 3106(7), R.I. Gen. Laws sec. 19-14.4-5.1(a), S.C. Code Ann. sec. 34-39-180(B), S.D. Codified Laws sec. 54-4-66, Tenn. Code Ann. Sec. 45-17-112(o), Va. Code Ann. Sec. 6.2-1816(5). States that limit the loan amount to the lesser of a percent of the borrower's income or a fixed dollar amount include

return for the consumer's agreement to pay a new set of fees calculated in the same manner as the initial fees (e.g., 15 percent of the loan principal). The rollover fee is not applied to reduce the loan principal or amortize the loan. As an example, if the consumer borrows \$300 with a fee of \$45 (calculated as \$15 per \$100 borrowed), the consumer will owe \$345 on the due date, typically 14 days later. On the due date, if the consumer cannot afford to repay the entire \$345 due or is otherwise offered the option to roll over the loan, she will pay the lender \$45 for another 14 days. On the 28th day, the consumer will owe the original \$345 and if she pays the loan in full then, will have paid a total of \$390 for the loan.

In some States in which rollovers are permitted they are subject to certain limitations such as a cap on the number of rollovers or requirements that the borrower amortize—repay part of the original loan amount—on the rollover. Other States have no restrictions on rollovers. Specially, seventeen of the States that authorize single-payment payday lending prohibit lenders from rolling over loans and twelve more States impose some rollover limitations.³⁵ However, in most States where rollovers are prohibited or limited, there is no restriction on the lender immediately making a new loan to the consumer (with new fees) after the consumer has repaid the prior loan. New loans made the same day or “back-to-back” loans effectively replicate a

³⁵ States that prohibit rollovers include California, Florida, Hawaii, Illinois, Indiana, Kentucky, Michigan, Minnesota, Mississippi, Nebraska, New Mexico, Oklahoma, South Carolina, Tennessee, Virginia, Washington, and Wyoming. Other States such as Iowa and Kansas restrict a loan from being repaid with the proceeds of another loan. Cal. Fin. Code § 23037(a), Fla. Stat. § 560.404(18), Haw. Rev. Stat. § 480F-4(d), 815 Ill. Comp. Stat. 122/2-30, Ind. Code § 24-4.5-7-402(7), Ky. Rev. Stat. Ann. § 286.9-100(14), Mich. Comp. Laws § 487.2155(1), Minn. Stat. § 47.60(2)(f), Miss. Code Ann. § 75-67-519(5), Neb. Rev. Stat. § 45-919(1)(f), N.M. Stat. Ann. § 58-15-34(A), Okla. Stat. tit. 59, § 3109(A), S.C. Code Ann. § 34-39-180(F), Tenn. Code Ann. § 45-17-112(q), Va. Code Ann. § 6.2-1816(6), Wash. Rev. Code § 31.45.073(2), Wyo. Stat. Ann. § 40-14-364, Iowa Code § 533D.10(1)(e), Kan. Stat. Ann. § 16a-2-404(6). Other States that permit some degree of rollovers include Alabama (one), Alaska (two), Delaware (four), Idaho (three), Missouri (six if there is at least 5 percent principal reduction on each rollover), Nevada (may extend loan up to 60 days after the end of the initial loan term), North Dakota (one), Oregon (two), Rhode Island (one), South Dakota (four if there is at least 10 percent principal reduction on each rollover), Utah (allowed up to 10 weeks after the execution of the first loan), and Wisconsin (one). Ala. Code § 5-18A-12 (b), Alaska Stat. § 06.50.470(b), Del. Code Ann. tit. 5, § 2235A (a)(2), Idaho Code Ann. § 28-46-413(9), Mo. Rev. Stat. § 408.500(6), Nev. Rev. Stat. § 604A.480(1), N.D. Cent. Code § 13-08-12(12), Or. Rev. Stat. § 725A.064(6), R.I. Gen. Laws § 19-14.4-5.1(g), S.D. Codified Laws § 54-4-65, Utah Code Ann. § 7-23-401 (4)(b), Wis. Stat. § 138.14 (12)(a).

rollover because the borrower remains in debt to the lender on the borrower's next payday.³⁶ A handful of States have implemented a cooling-off period before a lender may make a new loan. The most common cooling-off period is one day, although some States have longer periods following a specified number of rollovers or back-to-back loans.³⁷

Twenty States require payday lenders to offer extended repayment plans to borrowers who encounter difficulty in repaying payday loans.³⁸ Some States' laws are very general and simply provide that a payday lender may allow additional time for repayment of a loan. Other laws provide more detail about the plans including: When lenders must offer repayment plans; how borrowers may elect to participate in repayment

Ann. § 40-14-366(a).

plans; the number and timing of payments; the length of plans; permitted fees for plans; requirements for credit counseling; requirements to report plan payments to a statewide database; cooling-off or “lock-out” periods for new loans after completion of plans; and the consequences of plan defaults. The effects of these various restrictions are discussed further below in Market Concerns—Short-Term Loans.

Industry size and structure. There are various estimates as to the number of consumers who use payday loans on an annual basis. One survey found that 2.4 million households (2 percent of U.S. households) used payday loans in 2013.³⁹ In another survey, 4.2 percent of households reported taking out a payday loan.⁴⁰ These surveys referred to payday loans generally, and did not specify whether they were referring to loans made online or at storefront locations. One report estimated the number of individual borrowers, rather than households, was higher at approximately 12 million and included both storefront and online loans.⁴¹ See Market Concerns—Short-term Loans for additional information on borrower characteristics.

There are several ways to gauge the size of the storefront payday loan industry. Typically, the industry has been measured by counting the total dollar value of each loan made during the course of a year, counting each rollover, back-to-back loan or other reborrowing as a new loan that is added to the total. By this metric, one analyst estimated that from 2009 to 2014, storefront payday lending generated approximately \$30 billion in new loans per year and that by 2015 the volume had declined to \$23.6 billion,⁴² although these numbers may include products other than single-payment loans. Alternatively, the industry can be measured by calculating the dollar amount of loan balances outstanding. Given the amount of payday loan reborrowing, which results in the same funds of the lender being used to

finance multiple loan originations, the dollar amount of loan balances outstanding may provide a more nuanced sense of the industry's scale. Using this metric, the Bureau estimates that in 2012, storefront payday lenders held approximately \$2 billion in outstanding single-payment loans.⁴³ In 2015, industry revenue (fees paid on storefront payday loans) was an estimated \$3.6 billion, representing 15 percent of loan originations.⁴⁴

About ten large firms account for half of all payday storefront locations.⁴⁵ Several of these firms are publicly traded companies offering a diversified range of products that also include installment and pawn loans.⁴⁶ Other large payday lenders are privately held,⁴⁷ and the remaining payday loan stores are owned by smaller regional or local entities. The Bureau estimates

⁴³ Bureau staff estimate based on public company financial information, confidential information gathered in the course of statutory functions, and industry analysts' reports. The estimate is derived from lenders' single-payment payday loans gross receivables and gross revenue and industry analysts' reports on loan volume and revenue. No calculations were done for 2013 to 2015, but that estimate would be less than \$2 billion due to changes in the market as the industry has shifted away from single-payment payday loans to products discussed in part II.C below.

⁴⁴ Hecht, *The State of Short-Term Credit Amid Ambiguity, Evolution and Innovation*.

⁴⁵ See Montezemolo, *Payday Lending Abuses and Predatory Practices*, at 9.

⁴⁶ The publicly traded firms are Cash America (CSH), Community Choice Financial Inc./Checksmart (CCFI), EZCORP (EZPW), First Cash Financial Services (FCFS), and QC Holdings (QCCO). Cash America has de-emphasized payday loans with the exception of stores in Ohio and Texas, and in November 2014 it migrated its online loans to its spin-off company, Enova. Cash America Int'l, Inc., Investor Relations Presentation, at 6, 9, available at http://www.cashamerica.com/Files/InvestorPresentations/15_0331%20CSH%20IR%20Presentation.pdf. First Cash Financial Services closed most of its U.S. payday and vehicle title loan credit access business locations, leaving 42 Texas storefronts at the end of 2015. Its primary focus is on its pawn loan locations; only 4 percent of its revenue is from non-pawn consumer loans. (Credit access businesses are described below.) First Cash Fin. Servs., Inc., 2015 Annual Report (Form 10-K), at 1, 7. As noted above, in April 2016, First Cash Financial Services announced a merger agreement with Cash America. QC Holdings delisted from Nasdaq on Feb. 16, 2016 and is traded over-the-counter. QC Holding Companies, <http://www.qcholdings.com/investor.aspx?id=1> (last visited Apr. 7, 2016). Until July 2015, EZCORP offered payday, vehicle title, and installment loans but now focuses domestically on pawn lending. EZCORP, 2015 Annual Report (Form 10-K), at 3, 23.

⁴⁷ The larger privately held payday lending firms include Advance America, ACE Cash Express, Access Financial (CNG Financial, Check 'n Go, Allied Cash), Check Into Cash, DFC Global (Money Mart), PLS Financial Services, and Speedy Cash Holdings Corporation. See Montezemolo, *Payday Lending Abuses and Predatory Practices*, at 9-10; John Hecht, Stephens, Inc., *Alternative Financial Services: Innovating to Meet Customer Needs in an Evolving Regulatory Framework*, (Feb. 27, 2014) (on file).

there are about 2,400 storefront payday lenders that are small entities as defined by the Small Business Administration (SBA).⁴⁸

There were an estimated 15,766 payday loan stores in 2014 within the 36 States in which storefront payday lending occurs.⁴⁹ By way of comparison, there were 14,350 McDonald's fast food outlets in the United States in 2014.⁵⁰

The average number of payday loan stores in a county with a payday loan store is 6.32.⁵¹ The Bureau has analyzed payday loan store locations in States which maintain lists of licensed lenders and found that half of all stores are less than one-third of a mile from another store, and three-quarters are less than a mile from the nearest store.⁵² Even the 95th percentile of distances between neighboring stores is only 4.3 miles. Stores tend to be closer together in counties within metropolitan statistical areas (MSA).⁵³ In non-MSA counties the 75th percentile of distance to the nearest store is still less than one mile, but the 95th percentile is 22.9 miles.

Research and the Bureau's own market outreach indicate that payday loan stores tend to be relatively small with, on average, three full-time equivalent employees.⁵⁴ An analysis of

⁴⁸ Bureau staff estimated the number of storefront payday lenders using licensee information from State financial regulators, firm revenue information from public filings and non-public sources, and, for a small number of States, industry market research relying on telephone directory listings from Steven Graves and Christopher Peterson, available at http://www.csun.edu/~sg4002/research/data/US_pdl_addr.xls. Based on these sources, there are approximately 2,503 storefront payday lenders, including those operating primarily as loan arrangers or brokers, in the United States. Based on the publicly-available revenue information, at least 56 of the firms have revenue above the small entity threshold. Most of the remaining firms operate a very small number of storefronts. Therefore, while some of the firms without publicly available information may have revenue above the small entity threshold, in the interest of being inclusive they are all assumed to be small entities.

⁴⁹ Bureau staff estimated the number of storefront payday lenders using the method referenced in the immediately preceding footnote.

⁵³ An MSA is a geographic entity delineated by the Office of Management and Budget. An MSA contains a core urban area of 50,000 or more in population. See *Metropolitan and Micropolitan*, U.S. Census Bureau, <http://www.census.gov/population/metro/> (last visited Apr. 7, 2016).

⁵⁴ Mark Flannery & Katherine Samolyk, *Payday Lending: Do the Costs Justify the Price?* (FDIC

loan data from 29 States found that the average store made 3,541 advances in a year.⁵⁵ Given rollover and reborrowing rates, a report estimated that the average store served fewer than 500 customers per year.⁵⁶

Marketing, underwriting, and collections practices. Payday loans tend to be marketed as a short-term bridge to cover emergency expenses. For example, one lender suggests that, for consumers who have insufficient funds on hand to meet such an expense or to avoid a penalty fee, late fee, or utility shut-off, a payday loan can "come in handy" and "help tide you over until your next payday."⁵⁷ Some lenders offer new borrowers their initial loans at no fee ("first loan free") to encourage consumers to try a payday loan.⁵⁸ Stores are typically located in high-traffic commuting corridors and near shopping areas where consumers obtain groceries and other staples.⁵⁹

The evidence of price competition among payday lenders is mixed. In their financial reports, publicly traded payday lenders have reported their key competitive factors to be non-price related. For instance, they cite location, customer service, and convenience as some of the primary factors on which payday lenders compete with one another, as well as with other financial service providers.⁶⁰ Academic studies have found that, in States with rate caps, loans are almost always made at

the maximum rate permitted.⁶¹ Another study likewise found that in States with rate caps, firms lent at the maximum permitted rate, but that lenders operating in multiple States with varying rate caps raise their fees to those caps rather than charging consistent fees company-wide. The study additionally found that in States with no rate caps, different lenders operating in those States charged different rates. The study reviewed four lenders that operate in Texas⁶² and observed differences in the cost to borrow \$300 per two-week pay period: Two lenders charged \$61 in fees, one charged \$67, and another charged \$91, indicating some level of price variation between lenders (ranging from about \$20 to \$32 per \$100 borrowed).⁶³

The application process for a payday loan is relatively simple. For a storefront payday loan, a borrower must generally provide some verification of income (typically a pay stub) and evidence of a personal deposit account.⁶⁴ Although a few States impose limited requirements that lenders consider a borrower's ability to repay,⁶⁵ storefront payday lenders generally do not consider a borrower's other financial obligations or require collateral (other than the check or electronic debit authorization) for the

loan. Most storefront payday lenders do not consider traditional credit reports or credit scores when determining loan eligibility, nor do they report any information about payday loan borrowing history to the nationwide consumer reporting agencies, TransUnion, Equifax, and Experian.⁶⁶ From market outreach activities and confidential information gathered in the course of statutory functions, the Bureau is aware that a number of storefront payday lenders obtain data from one or more specialty consumer reporting agencies to check for previous payday loan defaults, identify recent inquiries that suggest an intention to not repay the loan, and perform other due diligence such as identity and deposit account verification. Some storefront payday lenders use analytical models and scoring that attempt to predict likelihood of default. Through market outreach and confidential information gathered in the course of statutory functions, the Bureau is aware that many storefront payday lenders limit their underwriting to first-time borrowers or those returning after an absence.

From market outreach, the Bureau is aware that the specialty consumer reporting agencies contractually require any lender that obtains data to also report data to them, although compliance may vary. Reporting usually occurs on a real-time or same-day basis. Separately, 14 States require lenders to check statewide databases before making each loan in order to ensure that their loans comply with various State restrictions.⁶⁷ These States likewise require lenders to report certain lending activity to the database, generally on a real-time or same-day basis. As discussed in more detail above, these State restrictions may include prohibitions on consumers having more than one payday loan at a time, cooling-off periods, or restrictions on the

number of loans consumers may take out per year.

Although a consumer is generally required when obtaining a loan to provide a post-dated check or authorization for an electronic debit of the consumer's account which could be presented to the consumer's bank, consumers are in practice strongly encouraged and in some cases required by lenders to return to the store when the loan is due to "redeem" the check.⁶⁸ Some lenders give borrowers appointment cards with a date and time to encourage them to return with cash. For example, one major storefront payday lender explained that after loan origination "the customer then makes an appointment to return on a specified due date, typically his or her next payday, to repay the cash advance Payment is usually made in person, in cash at the center where the cash advance was initiated"⁶⁹

The Bureau is aware, from confidential information gathered in the course of statutory functions and from market outreach, that lenders routinely make reminder calls to borrowers a few days before loan due dates to encourage borrowers to return to the store. One large lender reported this practice in a public filing.⁷⁰ Another major payday lender with a predominantly storefront loan portfolio reported that in 2014, over 90 percent of its payday and installment loans were repaid or renewed in cash;⁷¹ this provides an opportunity for store personnel to solicit borrowers to roll over or reborrow while they visit the store to discuss their loans or make loan payments. The Bureau is aware, from confidential information gathered in the course of statutory functions, that one or more storefront payday lenders have operating policies that specifically state that cash is preferred because only half of their

⁶⁵ For example, Utah requires lenders to make an inquiry to determine that the borrower has the ability to repay the loan, which may include rollovers or extended payment plans. This determination may be made through borrower affirmation of ability to repay, proof of income, repayment history at the same lender, or information from a consumer reporting agency. Utah Code § 7-23-401. Missouri requires lenders to consider borrower financial ability to reasonably repay under the terms of the loan contract, but does not specify how lenders may satisfy this requirement. Mo. Rev. Stat. § 408.500(7). Other States prohibit loans that exceed a certain percentage of the borrower's gross monthly income (generally between 20 and 35 percent) as a proxy for ability to repay. These States include Idaho, Illinois, Indiana, Montana, New Mexico, Oregon, Washington, and Wisconsin. Idaho Code § 28-46-412(2), 815 Ill. Comp. Stat. § 122/2-5(e), Ind. Code § 24-4.5-7-402(1), Mont. ⁷⁰ When Advance America was a publicly traded corporation, it reported: "The day before the due date, we generally call the customer to confirm their payment due date." Advance America, 2011 Annual Report (Form 10-K), at 11.

⁷¹ QC Holdings, 2014 Annual Report (Form 10-K), at 7. These statistics appear to also include QC's online payday loans, but the online portfolio was very small in 2014 (approximately 4.6 percent of revenue).

customers' checks would clear if deposited on the loan due dates. One storefront payday lender even requires its borrowers to return to the store to repay. Its Web site states: "All payday loans must be repaid with either cash or money order. Upon payment, we will return your original check to you."⁷²

Encouraging or requiring borrowers to return to the store on the due date provides lenders an opportunity to offer borrowers the option to roll over the loan or, where rollovers are prohibited by State law, to reborrow following repayment or after the expiration of any cooling-off period. Most storefront lenders examined by the Bureau employ monetary incentives that reward employees and store managers for loan volumes. Since as discussed below, a majority of loans result from rollovers of existing loans or reborrowing shortly after loans have been repaid, rollovers and reborrowing contribute substantially to employees' compensation. From confidential information gathered in the course of statutory functions, the Bureau is aware that rollover and reborrowing offers are made when consumers log into their accounts online, during "courtesy calls" made to remind borrowers of upcoming due dates, and when borrowers repay in person at storefront locations. In addition, some lenders train their employees to offer rollovers during courtesy calls even when borrowers responded that they had lost their jobs or suffered pay reductions.

Store personnel often encourage borrowers to roll over their loans or to reborrow, even when consumers have demonstrated an inability to repay their existing loans. In an enforcement action, the Bureau found that one lender maintained training materials that actively directed employees to encourage reborrowing by struggling borrowers. It further found that if a borrower did not repay or pay to roll over the loan on time, store personnel would initiate collections. Store personnel or collectors would then offer the option to take out a new loan to pay off their existing loan, or refinance or extend the loan as a source of relief from the potentially negative outcomes (e.g., lawsuits, continued collections). This "cycle of debt" was depicted graphically as part of "The Loan Process" in the company's new hire training manual.⁷³

In addition, though some States require lenders to offer extended repayment plans and some trade associations have designated provision of such plans as a best practice, individual lenders may often be reluctant to offer them. In Colorado, for instance, some payday lenders reported prior to a regulatory change in 2010 that they had implemented practices to restrict borrowers from obtaining the number of loans needed to be eligible for State-mandated extended payment plans under the previous regime or banned borrowers on plans from taking new loans.⁷⁴ The Bureau is also aware, from confidential information gathered in the course of statutory functions, that one or more lenders used training manuals that instructed employees not to mention these plans until after employees first offered rollovers, and then only if borrowers specifically asked about the plans. Indeed, details on implementation of the repayment plans that have been designated by two national trade associations for storefront payday lenders as best practices are unclear, and in some cases place a number of limitations on exactly how and when a borrower must request assistance to qualify for these "off-ramps." For instance, one trade association claiming to represent more than half of all payday loan stores states that as a condition of membership, members must offer an "extended payment plan" but that borrowers must request the plan at least one day prior to the date on which the loan is due, generally in person at the store where the loan was made or otherwise by the same method used to originate the loan.⁷⁵ It also states that borrowers must request an extended payment plan at least one day prior to the date on which the loan is due and must return to the store where the loan was made to do so

Plans are to be offered in the absence of State-mandated plans at no charge and payable in four equal payments coinciding with paydays.

or request the plan by using the same method used to originate the loan.⁷⁶ Another trade association claiming over 1,300 members, including both payday lenders and firms that offer non-credit products such as check cashing and money transmission, states that members will provide the option of extended payment plans in the absence of State-mandated plans to customers unable to repay but details of the plans are not available on its Web site.⁷⁷

From confidential information gathered in the course of statutory functions and market outreach, the Bureau is aware that if a borrower fails to return to the store when a loan is due, the lender may attempt to contact the consumer and urge the consumer to make a cash payment before depositing the post-dated check that the consumer had provided at origination or electronically debiting the account. The Bureau is aware, from confidential information gathered in the course of its statutory functions and market outreach, that lenders may take various other actions to try to ensure that a payment will clear before presenting a check or ACH. These efforts may range from storefront lenders calling the borrower's bank to ask if a check of a particular size would clear the account or through the use of software offered by a number of vendors that attempts to model likelihood of repayment ("predictive ACH").⁷⁸ If these attempts are unsuccessful, store personnel at either the storefront level or at a centralized

location will then generally engage in collection activity.

Collection activity may involve further in-house attempts to collect from the borrower's bank account.⁷⁹ If the first attempt fails, the lender may make subsequent attempts at presentment by splitting payments into smaller amounts in hopes of increasing the likelihood of obtaining at least some funds, a practice for which the Bureau recently took enforcement action against a small-dollar lender.⁸⁰ Or, the lender may attempt to present the payment multiple times, a practice that the Bureau has noted in supervisory examinations.⁸¹

Eventually, the lender may attempt other means of collection. The Bureau is aware of in-house collections activities, either by storefront employees or by employees at a centralized collections division, including calls, letters, and visits to consumers and their workplaces,⁸² as well as the selling of debt to third-party collectors.⁸³ The Bureau observed in its consumer complaint data that from November 2013 through December 2015 approximately 24,000 debt collection complaints had payday loan as the

underlying debt. More than 10 percent of the complaints the Bureau has received about debt collection stem from payday loans.⁸⁴

Some payday lenders sue borrowers who fail to repay their loans. A study of small claims court cases filed in Utah from 2005 to 2010 found that 38 percent of cases were attributable to payday loans.⁸⁵ A recent news report found that the majority of non-traffic civil cases filed in 14 Utah small claims courts are payday loan collection lawsuits and in one justice court the percentage was as high as 98.8 percent.⁸⁶ In 2013, the Bureau entered into a Consent Order with a large national payday and installment lender based, in part, on the filing of flawed court documents in about 14,000 debt collection lawsuits.⁸⁷

Business model. As previously noted, the storefront payday industry has built a distribution model that involves a large number of small retail outlets, each serving a relatively small number of consumers. That implies that the overhead cost on a per consumer basis is relatively high.

Additionally, the loss rates on storefront payday loans—the percentage or amounts of loans that are charged off by the lender as uncollectible—are relatively high. Loss rates on payday loans often are reported on a per-loan basis but, given the frequency of rollovers and renewals, that metric understates the amount of principal lost to borrower defaults. For example, if a lender makes a \$100 loan that is rolled over nine times, at which point the consumer defaults, the per-loan default rate would be 10 percent whereas the lender would have in fact lost 100 percent of the amount loaned. In this example, the lender would still have received substantial revenue, as the lender would have collected fees for each rollover prior to default. The Bureau estimates that during the 2011-2012 timeframe, charge-offs (*i.e.*, uncollectible loans defaulted on and never repaid) equaled nearly one-half of

the average amount of outstanding loans during the year. In other words, for every \$1.00 loaned, only \$.50 in principal was eventually repaid.⁸⁸ One academic study found loss rates to be even higher.⁸⁹

To sustain these significant costs, the payday lending business model is dependent upon a large volume of reborrowing—that is, rollovers, back-to-back loans, and reborrowing within a short period of paying off a previous loan—by those borrowers who do not default on their first loan. The Bureau's research found that over the course of a year, 90 percent of all loan fees comes from consumers who borrowed seven or more times and 75 percent comes from consumers who borrowed ten or more times.⁹⁰ Similarly, when the Bureau identified a cohort of borrowers and tracked them over ten months, the Bureau found that more than two-thirds of all loans were in sequences of at least seven loans, and that over half of all loans were in sequences of ten or more loans.⁹¹ The Bureau defines a sequence as an initial loan plus one or more subsequent loans renewed within a period of time after repayment of the prior loan; a sequence thus captures not only rollovers and back-to-back loans but also re-borrowing that occurs within a short period of time after repayment of a prior loan either at the point at which a State-mandated cooling-off period ends or at the point at which the consumer, having repaid the prior loan, runs out of money.⁹²

Other studies are broadly consistent. For example, a 2013 report based on

⁷⁹ For example, one payday lender stated in its public documents that it “subsequently collects a large percentage of these bad debts by redepositing the customers’ checks, ACH collections or receiving subsequent cash repayments by the customers.” First Cash Fin. Servs., 2014 Annual Report (Form 10-K), at 5 (Feb. 12, 2015), available at <https://www.sec.gov/Archives/edgar/data/840489/000084048915000012/fcfs1231201410-k.htm>.

⁹¹ CFPB *Report on Supplemental Findings*, at ch. 5.

⁹² CFPB *Data Point: Payday Lending*, at 7. The Bureau's Data Point defined a sequence to encompass all loans made within 14 days of a prior loan. Other reports have proposed other definitions of sequence length including 30 days (Marc Anthony Fusaro & Patricia J. Cirillo, *Do Payday Loans Trap Consumers in a Cycle of Debt?*, at 12 (2011), available at http://papers.ssrn.com/sol3/papers.cfm?abstract_id=1960776&download=yes) and sequences based on the borrower's pay period (nonPrime 101, *Report 7B: Searching for Harm in Storefront Payday Lending*, at 4 n.9 (2016), available at <https://www.nonprime101.com/wp-content/uploads/2016/02/Report-7-B-Searching-for-Harm-in-Storefront-Payday-Lending-nonPrime101.pdf>.) See part Market Concerns—Short-Term Loans below for an additional discussion of these alternative definitions.

lender data from Florida, Kentucky, Oklahoma, and South Carolina found that 85 percent of loans were made to borrowers with seven or more loans per year, and 62 percent of loans were made to borrowers with 12 or more loans per year.⁹³ These four States have restrictions on payday loans such as cooling-off periods and limits on rollovers that are enforced by State-regulated databases, as well as voluntary extended repayment plans.⁹⁴ An updated report on Florida payday loan usage derived from the State database noted this trend has continued with 83 percent of payday loans in 2015 made to borrowers with seven or more loans and 57 percent of payday loans that same year made to borrowers with 12 or more loans.⁹⁵ Other reports have found that over 80 percent of total payday loans and loan volume is due to repeat borrowing within thirty days of a prior loan.⁹⁶ One trade association has acknowledged that “[i]n any large, mature payday loan portfolio, loans to repeat borrowers generally constitute between 70 and 90 percent of the portfolio, and for some lenders, even more.”⁹⁷

Market Concerns—Short-Term Loans below discusses the impact of these outcomes for consumers who are unable to repay and either default or reborrow.

Recent regulatory and related industry developments. A number of Federal and State regulatory developments have occurred over the last 15 years as concerns about the effects of payday lending have spread. Regulators have found that the industry has tended to shift to new models and products in response.

Since 2000, it has been clear from commentary added to Regulation Z, that payday loans constitute “credit” under the Truth in Lending Act (TILA) and

that cost of credit disclosures are required to be provided in payday loan transactions, regardless of how State law characterizes payday loan fees.⁹⁸

In 2006, Congress enacted the Military Lending Act (MLA) to address concerns that servicemembers and their families were becoming over-indebted in high-cost forms of credit.⁹⁹ The MLA, as implemented by the Department of Defense’s regulation, imposes two broad classes of requirements applicable to a creditor. First, the creditor may not impose a military annual percentage rate¹⁰⁰ (MAPR) greater than 36 percent in connection with an extension of consumer credit to a covered borrower. Second, when extending consumer credit, the creditor must satisfy certain other terms and conditions, such as providing certain information, both orally and in a form the borrower can keep, before or at the time the borrower becomes obligated on the transaction or establishes the account, refraining from requiring the borrower to submit to arbitration in the case of a dispute involving the consumer credit, and refraining from charging a penalty fee if the borrower prepays all or part of the consumer credit. In 2007, the Department of Defense issued its initial regulation under the MLA, limiting the Act’s application to closed-end loans with a term of 91 days or less in which the amount financed did not exceed \$2,000; closed-end vehicle title loans with a term of 181 days or less; and closed-end tax refund anticipation loans.¹⁰¹ However, the Department found that evasions developed in the market as “the extremely narrow definition of ‘consumer credit’ in the [then-existing rule] permits a creditor to structure its credit products in order to reduce or avoid altogether the obligations of the MLA.”¹⁰²

As a result, effective October 2015 the Department of Defense expanded its definition of covered credit to include open-end credit and longer-term loans so that the MLA protections generally apply to all credit subject to the requirements of Regulation Z of the Truth in Lending Act, other than certain

products excluded by statute.¹⁰³ In general, creditors must comply with the new regulations for extensions of credit after October 3, 2016; for credit card accounts, creditors are required to comply with the new rule starting October 3, 2017.¹⁰⁴

At the State level, the last States to enact legislation authorizing payday lending, Alaska and Michigan, did so in 2005.¹⁰⁵ At least eight States that previously had authorized payday loans have taken steps to restrict or eliminate payday lending. In 2001, North Carolina became the first State that had previously permitted payday loans to adopt an effective ban by allowing the authorizing statute to expire. In 2004, Georgia also enacted a law banning payday lending.

In 2008, the Ohio legislature adopted the Short Term Lender Act with a 28 percent APR cap, including all fees and charges, for short-term loans and repealed the existing Check-Cashing Lender Law that authorized higher rates and fees.¹⁰⁶ In a referendum later that year, Ohioans voted against reinstating the Check-Cashing Lender Law, leaving the 28 percent APR cap and the Short Term Lending Act in effect.¹⁰⁷ After the vote, some payday lenders began offering vehicle title loans. Other lenders continued to offer payday loans utilizing Ohio’s Credit Service Organization Act¹⁰⁸ and the Mortgage Loan Act;¹⁰⁹ the latter practice was upheld by the State Supreme Court in 2014.¹¹⁰

In 2010, Colorado’s legislature banned short-term single-payment balloon loans in favor of longer-term, six-month loans. Colorado’s regulatory framework is described in more detail in the discussion of payday installment lending below.

As of July 1, 2010, Arizona effectively prohibited payday lending after the authorizing statute expired and a statewide referendum that would have continued to permit payday lending failed to pass.¹¹¹ However, small-dollar

lending activity continues in the State. The State financial regulator issued an alert in 2013, in response to complaints about online unlicensed lending, advising consumers and lenders that payday and consumer loans of \$1,000 or less are generally subject to a rate of 36 percent per annum and loans in violation of those rates are void.¹¹² In addition, vehicle title loans continue to be made in Arizona as secondary motor vehicle finance transactions.¹¹³ The number of licensed vehicle title lenders has increased by about 300 percent since the payday lending law expired and now exceeds the number of payday lenders that were licensed prior to the ban.¹¹⁴

In 2009, Virginia amended its payday lending law. It extended the minimum loan term to the length of two income periods, added a 45-day cooling-off period after substantial time in debt (the fifth loan in a 180-day period) and a 90-day cooling-off period after completing an extended payment plan, and implemented a database to enforce limits on loan amounts and frequency. The payday law applies to closed-end loans. Virginia has no interest rate regulations or licensure requirements for open-end credit.¹¹⁵ After the amendments, a number of lenders that were previously licensed as payday lenders in Virginia and that offer closed-end payday loans in other States now operate in Virginia by offering open-end credit without a State license.¹¹⁶

Washington and Delaware have restricted repeat borrowing by imposing limits on the number of payday loans consumers may obtain. In 2009, Washington made several changes to its payday lending law. These changes, effective January 1, 2010, include a cap of eight loans per borrower from all lenders in a rolling 12-month period where there had been no previous limit on the number of total loans, an extended repayment plan for any loan, and a database to which that lenders are required to report all payday loans.¹¹⁷ In 2013, Delaware, a State with no fee restrictions for payday loans, implemented a cap of five payday loans, including rollovers, in any 12-month period.¹¹⁸ Delaware defines payday loans as loans due within 60 days for amounts up to \$1,000. Some Delaware lenders have shifted from payday loans to longer-term installment loans with interest-only payments followed by a final balloon payment of the principal and an interest fee payment—sometimes called a "flexpay" loan.¹¹⁹

At least 35 Texas municipalities have adopted local ordinances setting business regulations on payday lending (and vehicle title lending).¹²⁰ Some of the ordinances, such as those in Dallas, El Paso, Houston, and San Antonio, include requirements such as limits on loan amounts (no more than 20 percent of the borrower's gross annual income for payday loans), limits on the number of rollovers, required amortization of the principal loan amount for repeat loans—usually in 25 percent increments, record retention for at least three years, and a registration requirement.¹²¹ On a

¹²⁰ A description of the municipalities is available at Texas Municipal League. An additional 15 Texas municipalities have adopted land use ordinances on payday or vehicle title lending. *City Regulation of Payday and Auto Title Lenders*, Tex. Mun. League, <http://www.tml.org/payday-updates> (last visited May 6, 2016).

¹²¹ Other municipalities have adopted similar ordinances. For example, at least seven Oregon municipalities, including Portland and Eugene, have enacted ordinances that include a 25 percent

statewide basis, there are no Texas laws specifically governing payday lenders or payday loan terms; credit access businesses that act as loan arrangers or broker payday loans (and vehicle title loans) are regulated and subject to licensing, reporting, and requirements to provide consumers with disclosures about repayment and reborrowing rates.¹²²

Online Payday and Hybrid Payday Loans

With the growth of the internet, a significant online payday lending industry has developed. Some storefront lenders use the internet as an additional method of originating payday loans in the States in which they are licensed to do business. In addition, there are now a number of lenders offering payday, and what are referred to as "hybrid" payday loans, exclusively through the internet. Hybrid payday loans are structured so that rollovers occur automatically unless the consumer takes affirmative action to pay off the loan, thus effectively creating a series of interest-only payments followed by a final balloon payment of the principal amount and an additional fee.¹²³ Hybrid loans with automatic rollovers would fall within the category of "covered longer-term loans" under the proposed rule as discussed more fully below.

Industry size, structure, and products. The online payday market size is difficult to measure for a number of reasons. First, many online lenders offer a variety of products including single-

amortization requirement on rollovers and a requirement that lenders offer a no-cost payment plan after two rollovers. Portland, Or., Code § 7.26.050, Eugene Or., Code § 3.556.

¹²² CABs must include a pictorial disclosure with the percentage of borrowers who will repay the loan on the due date and the percentage who will roll over (called renewals) various times. See State of Texas, *Consumer Disclosure, Payday Loan-Single Payment*, available at <http://occc.texas.gov/sites/default/files/uploads/disclosures/cab-disclosure-payday-single-011012.pdf>. The CABs, rather than the lenders, maintain storefront locations, and qualify borrowers, service and collect the loans for the lenders. CABs may also guaranty the loans. There is no cap on CAB fees and when these fees are included in the loan finance charges, the disclosed APRs for Texas payday and vehicle title loans are similar to those in other States with deregulated rates. See Ann Baddour, *Why Texas' Small Dollar Lending Market Matter*, 12 e-Perspectives Issue 2 (2012), available at https://www.dallasfed.org/microsites/cd/epersp/2012/2_2.cfm. In 2004, a Federal appellate court dismissed a putative class action related to these practices. *Lovick v. RiteMoney, Ltd.*, 378 F.3d 433 (5th Cir. 2004).

¹²³ nonPrime101, *Report 1: Profiling Internet Small Dollar Lending- Basic Demographics and Loan Characteristics*, at 2-3, (2014), available at <https://www.nonprime101.com/wp-content/uploads/2015/02/Profiling-Internet-Small-Dollar-Lending-Final.pdf>. The report refers to these automatic rollovers as "renewals."

payment loans (what the Bureau refers to as payday loans), longer-term installment loans, and hybrid loans; this poses challenges in sizing the portion of these firms' business that is attributable to payday and hybrid loans. Second, many online payday lenders are not publicly traded, resulting in little available financial information about this market segment. Third, many other online payday lenders claim exemption from State lending laws and licensing requirements, stating they are located and operated from other jurisdictions.¹²⁴ Consequently, these lenders report less information publicly, whether individually or in aggregate compilations, than lenders holding traditional State licenses. Finally, storefront payday lenders who are also using the online channel generally do not separately report their online originations. Bureau staff's reviews of the largest storefront lenders' Web sites indicate an increased focus in recent years on online loan origination.

With these caveats, a frequently cited industry analyst has estimated that by 2012 online payday loans had grown to generate nearly an equivalent amount of fee revenue as storefront payday loans on roughly 62 percent of the origination volume, about \$19 billion, but originations had then declined somewhat to roughly \$15.9 billion during 2015.¹²⁵ This trend appears consistent with storefront payday loans, as discussed above, and is likely related at least in part to increasing lender migration from short-term into longer-term products. Online payday loan fee revenue has been estimated for 2015 at \$3.1 billion, or 19 percent of origination volume.¹²⁶ However, these estimates may be both over- and under-inclusive; they may not differentiate precisely between online lenders' short-term and

longer-term loans, and they may not account for the online lending activities by storefront payday lenders.

Whatever its precise size, the online industry can broadly be divided into two segments: online lenders licensed in the State in which the borrower resides and lenders that are not licensed in the borrower's State of residence.

The first segment consists largely of storefront lenders with an online channel to complement their storefronts as a means of originating loans, as well as a few online-only payday lenders who lend only to borrowers in States where they have obtained State lending licenses. Because this segment of online lenders is State-licensed, State administrative payday lending reports include this data but generally do not differentiate loans originated online from those originated in storefronts. Accordingly, this portion of the market is included in the market estimates summarized above, and the lenders consider themselves to be subject to, or generally follow, the relevant State laws discussed above.

The second segment consists of lenders that claim exemption from State lending laws. Some of these lenders claim exemption because their loans are made from a physical location outside of the borrower's State of residence, including from an off-shore location outside of the United States. Other lenders claim exemption because they are lending from tribal lands, with such lenders claiming that they are regulated by the sovereign laws of federally recognized Indian tribes.¹²⁷ These lenders claim immunity from suit to enforce State or Federal consumer protection laws on the basis of their sovereign status.¹²⁸ A frequently cited

¹²⁷ According to a tribal trade association representative, about 30 tribes are involved in the payday lending industry. Julia Harte & Joanna Zuckerman Bernstein, *Aljazeera America, Payday Nation* (June 17, 2014) <http://projects.aljazeera.com/2014/payday-nation/>. The Bureau is unaware of other public sources for an estimate of the number of tribal lenders.

source of data on this segment of the market is a series of reports using data from a specialty consumer reporting agency serving certain online lenders, most of whom are unlicensed.¹²⁹ These data are not representative of the entire online industry, but nonetheless cover a large enough sample (2.5 million borrowers over a period of four years) to be significant. These reports indicate the following concerning this market segment:

- Although the mean and median loan size among the payday borrowers in this data set are only slightly higher than the information reported above for storefront payday loans,¹³⁰ the online payday lenders charge higher rates than storefront lenders. As noted above, most of the online lenders reporting this data claim exemption from State laws and do not comply with State rate caps. The median loan fee in this data set is \$23.53 per \$100 borrowed, compared to \$15 per \$100 borrowed for storefront payday loans. The mean fee amount is even higher at \$26.60 per \$100 borrowed.¹³¹ Another study based on a similar dataset from three online payday lenders is generally consistent, putting the range of online payday loan fees at between \$18 and \$25 per \$100 borrowed.¹³²

- More than half of the payday loans made by these online lenders are hybrid payday loans. As described above, a hybrid loan involves automatic rollovers with payment of the loan fee until a final balloon payment of the principal and fee.¹³³ For the hybrid payday loans, the most frequently reported payment amount is 30 percent of principal, implying a finance charge during each pay period of \$30 for each \$100 borrowed.¹³⁴

- Unlike storefront payday loan borrowers who generally return to the same store to reborrow, the credit reporting data may suggest that online borrowers tend to move from lender to

¹²⁹ nonPrime101, *Report 1*, at 9.

¹³⁰ The median online payday loan size is \$400, compared to a median loan size of \$350 for storefront payday loans. *Id.* at 10.

lender. As discussed further below, however, it is difficult to evaluate whether some of this apparent effect is due to online lenders simply not consistently reporting lending activity.¹³⁵

Marketing, underwriting, and collection practices. To acquire customers, online lenders have relied heavily on direct marketing and lead generators. Online lead generators purchase web advertising, usually in the form of banner advertisements or paid search results (the advertisements that appear at the top of an internet search on Google, Bing, or other search engines). When a consumer clicks through on a banner or search advertisement, she is usually prompted to complete a brief form with personal information that will be used to determine the loans for which she may qualify. If a lead generator is involved, the consumer's information becomes a lead that is in turn sold directly to a lender, to a reseller, or to a "lender network" that operates as an auction in which the lead is sold to the highest bidder. A consumer's personal information may be offered to multiple lenders and other vendors as a result of submitting a single form, raising significant privacy and other concerns.¹³⁶ In a survey of online payday borrowers, 39 percent reported that their personal or financial information was sold to a third party without their knowledge.¹³⁷

From the Bureau's market outreach activities, it is aware that large payday and small-dollar installment lenders using lead generators for high quality, "first look" or high-bid leads have paid an average cost per new account of between \$150 and \$200. Indeed, the cost to a lender simply to purchase such leads can be \$100 or more.¹³⁸ Customer

¹³⁵ nonPrime101, *Report 7-A: How Persistent is the Borrower-Lender Relationship in Payday Lending* (2015), available at https://www.nonprime101.com/wp-content/uploads/2015/10/Report-7A-How-Persistent-Is-the-Borrower-Lender-Relationship_1023151.pdf.

¹³⁶ In October 2015 the Federal Trade Commission (FTC) held a workshop on online lead generators and how they operate in a number of industries. The transcript from the workshop is available at: https://www.ftc.gov/system/files/documents/videos/follow-lead-ftc-workshop-lead-generation-part-1/ftc_lead_generation_workshop_-_transcript_segment_1.pdf.

¹³⁷ Pew Charitable Trusts, *Payday Lending in America Report 4: Fraud and Abuse Online: Harmful Practices in Internet Payday Lending*, at 11-12, (2014), available at http://www.pewtrusts.org/~media/assets/2014/10/payday-lending-report/fraud_and_abuse_online_harmful_practices_in_internet_payday_lending.pdf.

¹³⁸ The high lead cost reflects both the value lenders place on new accounts (what they are willing to bid for the leads) and, in turn, the advertising costs that lead sellers incur in order to

acquisition costs reflect lead purchase prices. One online lender reported its customer acquisition costs to be \$297, while in 2015 another spent 25 percent of its total marketing expenditures on customer acquisition, including lead purchases.¹³⁹

Online lenders view fraud (*i.e.*, consumers who misrepresent their identity) as a significant risk and also express concerns about "bad faith" borrowing (*i.e.*, consumers with verified identities who borrow without the intent to repay).¹⁴⁰ Consequently, online payday and hybrid lenders attempt to verify the borrower's identity and the existence of a bank account in good standing. Several specialty consumer reporting agencies have evolved primarily to serve the online payday lending market. The Bureau is aware from market outreach that these lenders also generally report loan closure information on a real-time or daily basis to the specialty consumer reporting agencies. In addition, some online lenders report to the Bureau they use nationwide credit report information to evaluate both credit and potential fraud risk associated with first-time borrowers, including recent bankruptcy filings. However, there is evidence that online lenders do not consistently utilize credit report data for every loan, and instead typically check and report data only for new borrowers or those

generate an actionable lead. For example, one report lists the advertising costs of a click-through on a sponsored search advertisement for the search phrase "payday loan" as ranging from \$5 to \$9 at a point in time in 2014. Pew Charitable Trusts, *Payday Lending in America Report 4*, at 7. These costs were captured by market research firms SpyFu, SEMRush, and KeywordSpy on February 18, 2014. A click-through only results in a live lead when a potential borrower has completed an applicant form. One internet advertising executive at a recent FTC workshop on online lead generation estimated that approximately one in 10 click-throughs result in a live lead, though this finding is not specific to payday loans. FTC, *Lead Generation Workshop Transcript*. This conversion rate brings the lead generator's advertising cost per lead to \$50-\$90. A lender seeking to directly acquire its own borrowers competes for the same advertising space in sponsored searches or online banner advertisements (bidding up the cost per click-through) and likely incurs similar advertising costs for each new borrower.

¹³⁹ Elevate Credit Inc., Registration Statement (Form S-1), at 12 (Nov. 9, 2015), available at <https://www.sec.gov/Archives/edgar/data/1651094/000119312515371673/d83122ds1.htm>; Enova Int'l Inc., 2015 Annual Report (Form 10-K), at 103 (Mar. 7, 2016), https://www.sec.gov/Archives/edgar/data/1529864/000156459016014129/enna-10k_20151231.htm.

¹⁴⁰ For example, Enova states that it uses its own analysis of previous fraud incidences and third party data to determine if applicant information submitted matches other indicators and whether the applicant can authorize transactions from the submitted bank account. In addition, it uses proprietary models to predict fraud. Enova Int'l Inc., 2015 Annual Report (Form 10-K), at 8.

returning after an extended absence from the lender's records.¹⁴¹

Typically, proceeds from online payday loans are disbursed electronically to the consumer's bank account. The consumer authorizes the lender to debit her account as payments are due. If the consumer does not agree to authorize electronic debits, lenders generally will not disburse electronically, but instead will require the consumer to wait for a paper loan proceeds check to arrive in the mail.¹⁴² Lenders may also charge higher interest rates or fees to consumers who do not commit to electronic debits.¹⁴³

Unlike storefront lenders that seek to bring consumers back to the stores to make payments, online lenders collect via electronic debits. Online payday lenders, like their storefront counterparts, use various models and software, described above, to predict when an electronic debit is most likely to succeed in withdrawing funds from a borrower's bank account. As discussed further below, the Bureau has observed lenders seeking to collect multiple payments on the same day. Lenders may be dividing the payment amount in half and presenting two debits at once, presumably to reduce the risk of a larger payment being returned for nonsufficient funds. Indeed, the Bureau found that about one-third of presentments by online payday lenders occur on the same day as another request by the same lender. The Bureau also found that split presentments almost always result in either payment of all presentments or return of all presentments (in which event the consumer will likely incur multiple nonsufficient funds (NSF) fees from the bank). The Bureau's study indicates that when an online payday lender's first attempt to obtain a payment from the consumer's account is unsuccessful, it will make a second attempt 75 percent

¹⁴¹ See Flores, Bretton Woods, *2014 Statistical Report*, at 5; the Bureau's market outreach with lenders and specialty consumer reporting agencies.

¹⁴² For example, see Mobiloans, *Line of Credit Terms and Conditions*, www.mobiloans.com/terms-and-conditions (last visited Feb. 5, 2016) ("If you do not authorize electronic payments from your Demand Deposit Account and instead elect to make payments by mail, you will receive your Mobiloans Cash by check in the mail.")

¹⁴³ Under the Electronic Fund Transfer Act (EFTA) and its implementing regulation (Regulation E), lenders cannot condition the granting of credit on a consumer's repayment by preauthorized (recurring) electronic fund transfers, except for credit extended under an overdraft credit plan or extended to maintain a specified minimum balance in the consumer's account. 12 CFR 1005.10(e). The summary in the text of current lender practices is intended to be purely descriptive. The Bureau is not addressing in this rulemaking the question of whether any of the practices described in text are consistent with EFTA.

of the time and if that attempt fails the lender will make a third attempt 66 percent of the time.¹⁴⁴ As discussed further at part II.D, the success rate on these subsequent attempts is relatively low, and the cost to consumers may be correspondingly high.¹⁴⁵

There is limited information on the extent to which online payday lenders that are unable to collect payments through electronic debits resort to other collection tactics.¹⁴⁶ The available evidence indicates, however, that online lenders sustain higher credit losses and risk of fraud than storefront lenders. One lender with publicly available financial information that originated both storefront and online single-payment loans reported in 2014, a 49 percent and 71 percent charge-off rate, respectively, for these loans.¹⁴⁷ Online lenders generally classify as “fraud” both consumers who misrepresented their identity in order to obtain a loan and consumers whose identity is verified but default on the first payment due, which is viewed as reflecting the intent not to repay.

Business model. While online lenders tend to have fewer costs relating to operation of physical facilities than do storefront lenders, as discussed above, they face high costs relating to lead acquisition, loan origination screening to verify applicant identity, and potentially larger losses due to fraud than their storefront competitors.

¹⁴⁴ See generally *CFPB Online Payday Loan Payments*, at 14.

¹⁴⁵ Because these online lenders may offer single-payment payday, hybrid, and installment loans, reviewing the debits does not necessarily distinguish the type of loan involved. Storefront payday lenders were not included. *Id.* at 7, 13.

¹⁴⁶ One publicly-traded online-only lender that makes single-payment payday loans as well as online installment loans and lines of credit reports that its call center contacts borrowers by phone, email, and in writing after a missed payment and periodically thereafter and that it also may sell uncollectible charged off debt. Enova Int'l Inc., 2015 Annual Report (Form, 10-K), at 9 (Mar. 7, 2016), available at https://www.sec.gov/Archives/edgar/data/1529864/000156459016014129/enva-10k_20151231.htm.

¹⁴⁷ Net charge-offs over average balance based on data from Cash America and Enova Form 10-Ks. See Cash America Int'l, Inc., 2014 Annual Report (Form 10-K) at 102 (Mar. 13, 2015), available at <https://www.sec.gov/Archives/edgar/data/807884/000080788415000012/a201410-k.htm>; Enova Int'l Inc., 2014 Annual Report (Form 10-K) at 95 (Mar. 20, 2015), available at https://www.sec.gov/Archives/edgar/data/1529864/000156459015001871/enva-10k_20141231.htm. Net charge-offs represent single-payment loan losses less recoveries for the year. Average balance is the average of beginning and end of year single-payment loan receivables. Prior to November 14, 2014, Enova comprised the e-commerce division of Cash America. Using the 2014 10-Ks allows for a better comparison of payday loan activity, than the 2015 10-Ks, as Cash America's payday loan operations declined substantially after 2014.

Accordingly, it is not surprising that online lenders—like their storefront counterparts—are dependent upon repeated reborrowing. Indeed, even at a cost of \$25 or \$30 per \$100 borrowed, a typical single online payday loan would generate fee revenue of under \$100, which is not sufficient to cover the typical origination costs discussed above. Consequently, as discussed above, hybrid loans that roll over automatically in the absence of affirmative action by the consumer account for a substantial percentage of online payday business. These products effectively build a number of rollovers into the loan. For example, the Bureau has observed online payday lenders whose loan documents suggest that they are offering a single-payment loan but whose business model is to collect only the finance charges due, roll over the principal, and require consumers to take affirmative steps to notify the lender if consumers want to repay their loans in full rather than allowing them to roll over. The Bureau recently initiated an action against an online lender alleging that it engaged in deceptive practices in connection with such products.¹⁴⁸ In a recent survey conducted of online payday borrowers, 31 percent reported that they had experienced loans with automatic renewals.¹⁴⁹

As discussed above, a number of online payday lenders claim exemption from State laws and the limitations established under those laws. As reported by a specialty consumer reporting agency with data from that market, more than half of the payday loans for which information is furnished to it are hybrid payday loans with the most common fee being \$30 per \$100 borrowed, twice the median amount for storefront payday loans.¹⁵⁰

Similar to associations representing storefront lenders as discussed above, a national trade association representing online lenders includes loan repayment plans as one of its best practices, but does not provide many details in its

¹⁴⁸ Press Release, Bureau of Consumer Fin. Prot., *CFPB Takes Action Against Online Lender for Deceiving Borrowers* (Nov. 18, 2015), <http://www.consumerfinance.gov/newsroom/cfpb-takes-action-against-online-lender-for-deceiving-borrowers/>. The FTC raised and resolved similar claims against online payday lenders. See Press Release, FTC, *FTC Secures \$4.4 Million From Online Payday Lenders to Settle Deception Charges* (Jan. 5, 2016), <https://www.ftc.gov/news-events/press-releases/2016/01/ftc-secures-44-million-online-payday-lenders-settle-deception>.

public material.¹⁵¹ A trade association that represents tribal online lenders has adopted a set of best practices but they do not address repayment plans.¹⁵²

Single-Payment Vehicle Title Loans

Vehicle title loans—also known as “automobile equity loans”—are another form of liquidity lending permitted in certain States. In a title loan transaction, the borrower must provide identification and usually the title to the vehicle as evidence that the borrower owns the vehicle “free and clear.”¹⁵³ Unlike payday loans, there is generally no requirement that the borrower have a bank account, and some lenders do not require a copy of a paystub or other evidence of income.¹⁵⁴ Rather than holding a check or ACH authorization for repayment as with a payday loan, the lender generally retains the vehicle title or some other form of security interest that provides it with the right to repossess the vehicle, which may then be sold, with the proceeds used for repayment.¹⁵⁵

The lender retains the vehicle title or some other form of security interest during the duration of the loan, while the borrower retains physical possession of the vehicle. In some States the lender files a lien with State officials to record and perfect its interest in the vehicle or the lender may charge a fee for non-filing insurance. In a few States, a clear vehicle title is not required and vehicle title loans may be made as secondary liens against the title or against the

¹⁵¹ Online Lenders Alliance, *Best Practices* at 27 (March 2016), available at <http://onlenderalliance.org/wp-content/uploads/2016/03/Best-Practices-2016.pdf>. The materials state that its members “shall comply” with any required State repayment plans; otherwise, if a borrower is unable to repay a loan according to the loan agreement, the trade association's members “should create” repayment plans that “provide flexibility based on the customer's circumstances.”

¹⁵⁵ See Speedy Cash, “*Title Loan FAQ's*,” <https://www.speedycash.com/faqs/title-loans/> (last visited Mar. 29, 2016) (title loans are helpful “when you do not have a checking account to secure your loan. . . . your car serves as collateral for your loan.”).

borrower's automobile registration.¹⁵⁶ In Georgia, vehicle title loans are made under the State's pawnbroker statute that specifically permits borrowers to pawn vehicle certificates of title.¹⁵⁷ Almost all vehicle title lending is conducted at storefront locations, although some title lending does occur online.¹⁵⁸

Product definition and regulatory environment. There are two types of vehicle title loans: Single-payment loans and installment loans. Of the 25 States that permit some form of vehicle title lending, seven States permit only single-payment title loans, 13 States allow the loans to be structured as single-payment or installment loans, and five permit only title installment loans.¹⁵⁹ (Installment title loans are discussed in more detail below.) All but three of the States that permit some form of title lending (Arizona, Georgia, and New Hampshire) also permit payday lending.

Single-payment vehicle title loans are typically due in 30-days and operate much like payday loans: The consumer is charged a fixed price per \$100 borrowed and when the loan is due the consumer is obligated to repay the full amount of the loan plus the fee but is

¹⁵⁶ See, e.g., discussion about Arizona law applicable to vehicle title lending above.

¹⁵⁷ Ga. Code § 44-12-131 (2015).

¹⁵⁸ For example, see the Bureau's action involving Wilshire Consumer Credit for illegal collection practices. Consumers primarily applied for Wilshire's vehicle title loans online. Consumers applied for the title loans online and sent their vehicle titles to the lender. The lender used local agents for repossession services.

¹⁵⁹ Pew Charitable Trusts, *Auto Title Loans: Market Practices and Borrowers' Experiences*, at 4 (2015), available at <http://www.pewtrusts.org/-/media/Assets/2015/03/AutoTitleLoansReport.pdf?la=en>.

typically given the opportunity to roll over or reborrow.¹⁶⁰ The Bureau recently studied anonymized data from vehicle title lenders, consisting of nearly 3.5 million loans made to over 400,000 borrowers in 20 States. For single-payment vehicle title loans with a typical duration of 30 days, the median loan amount is \$694 with a median APR of 317 percent, and the average loan amount is \$959 and the average APR is 291 percent.¹⁶¹ Two other studies contain similar findings.¹⁶² Vehicle title loans are therefore for larger amounts than typical payday loans but carry similar APRs for similar terms.

Some States that authorize vehicle title loans limit the rates lenders may charge to a percentage or dollar amount per one hundred dollars borrowed, similar to some State payday lending pricing structures. A common fee limit is 25 percent of the loan amount per month, but roughly half of the authorizing States have no restrictions on rates or fees.¹⁶³ Some, but not all, States limit the maximum amount that may be borrowed to a fixed dollar amount, a percentage of the borrower's monthly income (50 percent of the borrower's gross monthly income in Illinois), or a percentage of the vehicle's value.¹⁶⁴ Some States limit the initial

¹⁶¹ CFPB *Single-Payment Vehicle Title Lending*, at 7.

¹⁶² Pew, *Auto Title Loans: Market Practices and Borrowers' Experience*, at 3 (average loan is \$1,000, most common APR is a one-month title loan is 300 percent); Montezemolo, *The State of Lending in America*, at 3.

¹⁶³ States with a 15 percent to 25 percent per month cap include Alabama, Georgia (rate decreases after 90 days), Mississippi, and New Hampshire; Tennessee limits interest rates to 2 percent per month, but also allows for a fee up to 20 percent of the original principal amount. Virginia's fees are tiered at 22 percent per month for amounts up to \$700 and then decrease on larger loans. Ala. Code § 5-19A-7(a), Ga. Code Ann. § 44-12-131(a)(4), Miss. Code Ann. § 75-67-413(1), N.H. Rev. Stat. Ann. § 399-A:18(I)(f), Tenn. Code Ann. § 45-15-111(a), Va. Code Ann. § 6.2-2216(A).

¹⁶⁴ For example, some maximum vehicle title loan amounts are \$2,500 in Mississippi, New Mexico, and Tennessee, and \$5,000 in Missouri. Illinois limits the loan to \$4,000 or 50 percent of monthly income, Virginia and Wisconsin limit the loan amount to 50 percent of the vehicle's value and Wisconsin also has a \$25,000 maximum loan

loan term to one month, but several States authorize rollovers, including automatic rollovers arranged at the time of the original loan.¹⁶⁵ Unlike payday loan regulation, few States require cooling-off periods between loans or optional extended repayment plans for borrowers who cannot repay vehicle title loans.¹⁶⁶ State vehicle title regulations sometimes address default, repossession and related fees; any cure periods prior to and after repossession, whether the lender must refund any surplus after the repossession and sale or disposition of the vehicle, and whether the borrower is liable for any deficiency remaining after sale or disposition.¹⁶⁷ Some States have imposed limited requirements that lenders consider a borrower's ability to repay. For example, both Utah and South Carolina require lenders to consider borrower ability to repay, but this may be accomplished through a

amount. Examples of States with no limits on loan amounts, limits of the amount of the value of the vehicle, or statutes that are silent about loan amounts include Arizona, Idaho, South Dakota, and Utah. Miss. Code Ann. § 75-67-415(f), N.M. Stat. Ann. § 58-15-3(A), Tenn. Code Ann. § 45-15-115(3), Mo. Rev. Stat. § 367.527(2), Ill. Admin. Code tit. 38, § 110.370(a), Va. Code Ann. § 6.2-2215(1)(d); Wis. Stat. § 138.16(1)(c), (2)(a), Ariz. Rev. Stat. Ann. § 44-291(A), Idaho Code Ann. § 28-46-508(3), S.D. Codified Laws § 54-4-44, Utah Code Ann. § 7-24-202(3)(c).

¹⁶⁵ States that permit rollovers include Delaware, Georgia, Idaho, Illinois, Mississippi, Missouri, Nevada, New Hampshire, South Dakota, Tennessee, and Utah. Idaho and Tennessee limit title loans to 30 days but allow automatic rollovers and require a principal reduction of 10 percent and 5 percent respectively, starting with the third rollover. Virginia prohibits rollovers and requires a minimum loan term of at least 120 days. Del. Code Ann. tit. 5, § 2254 (rollovers may not exceed 180 days from date of fund disbursement), Ga. Code Ann. § 44-12-138(b)(4), Idaho Code Ann. § 28-46-506(1) & (3), Ill. Admin. Code tit. 38, § 110.370(b)(1) (allowing refinancing if principal is reduced by 20%), Miss. Code Ann. § 75-67-413(3), Mo. Rev. Stat. § 367.512(4), Nev. Rev. Stat. § 604A.445(2), N.H. Rev. Stat. Ann. § 399-A:19(II) (maximum of 10 rollovers), S.D. Codified Laws § 54-4-71, Tenn. Code Ann. § 45-15-113(a), Utah Code Ann. § 7-24-202(3)(a), Va. Code Ann. § 6.2-2216(F).

¹⁶⁶ Illinois requires 15 days between title loans. Delaware requires title lenders to offer a workout agreement after default but prior to repossession that repays at least 10 percent of the outstanding balance each month. Delaware does not cap fees on title loans and interest continues to accrue on workout agreements. Ill. Admin. Code tit. 38, § 110.370(c); Del. Code Ann. 5 §§ 2255 & 2258 (2015).

¹⁶⁷ For example, Georgia allows repossession fees and storage fees. Arizona, Delaware, Idaho, Missouri, South Dakota, Tennessee, Utah, Virginia, and Wisconsin specify that any surplus must be returned to the borrower. Mississippi requires that 85 percent of any surplus be returned. Ga. Code Ann. § 44-12-131(a)(4)(C), Ariz. Rev. Stat. Ann. § 47-9608(A)(4), Del. Code Ann. tit. 5, § 2260, Idaho Code Ann. § 28-9-615(d), Mo. Rev. Stat. § 408.553, S.D. Codified Laws § 54-4-72, Tenn. Code Ann. § 45-15-114(b)(2), Utah Code Ann. § 7-24-204(3), Va. Code Ann. § 6.2-2217(C), Wis. Stat. § 138.16(4)(e), Miss. Code Ann. § 75-67-411(5).

borrower affirming that she has provided accurate financial information and has the ability to repay.¹⁶⁸ Nevada requires lenders to consider borrower ability to repay and obtain borrower affirmation of their ability to repay.¹⁶⁹ Missouri requires that lenders consider borrower financial ability to reasonably repay the loan under the loan's contract, but does not specify how lenders may satisfy this requirement.¹⁷⁰

Industry size and structure.

Information about the vehicle title market is more limited than with respect to the payday industry because there are currently no publicly traded vehicle title loan companies, most payday lending companies that offer vehicle title loans are not publicly traded, and less information is generally available from State regulators and other sources.¹⁷¹ One national survey conducted in June 2013 found that 1.1 million households reported obtaining a vehicle title loan over the preceding 12 months.¹⁷² Another study extrapolating from State regulatory reports estimates that about two million Americans use vehicle title loans annually.¹⁷³ In 2014, vehicle title loan originations were estimated at \$2.4 billion with revenue estimates of \$3 to \$5.6 billion.¹⁷⁴ These estimates may not include the full extent of vehicle title loan expansion by payday lenders.

There are approximately 8,000 title loan storefront locations in the United States, about half of which also offer payday loans.¹⁷⁵ Three privately held firms dominate the vehicle title lending market and together account for about 3,200 stores in about 20 States.¹⁷⁶ These

lenders are concentrated in the southeastern and southwestern regions of the country.¹⁷⁷ In addition to the large title lenders, smaller vehicle title lenders are estimated to have about 800 storefront locations,¹⁷⁸ and as noted above several companies offer both title loans and payday loans.¹⁷⁹ The Bureau understands that for some firms for which the core business had been payday loans, the volume of vehicle title loan originations now exceeds payday loan originations.

State loan data also show vehicle title loans are growing rapidly. The number of borrowers in Illinois taking vehicle title loans increased 78 percent from 2009 to 2013, the most current year for which data are available.¹⁸⁰ The number of title loans taken out in California increased 178 percent between 2011 and 2014.¹⁸¹ In Virginia, between 2011 and 2014, the number of motor vehicle title loans made increased by 21 percent while the number of individual consumers taking title loans increased by 25 percent.¹⁸² In addition to the

It was publicly-traded until 2013 when it was taken private. Its last 10-K reported annual revenue of \$656.8 million. TMX Fin. LLC, 2012 Annual Report (Form 10-K), at 21 (Mar. 27, 2013), available at http://www.sec.gov/Archives/edgar/data/1511967/000110465913024898/a12-29657_110k.htm (year ended Dec. 31, 2012). For TMX Finance store counts see *Store Locations*, TMX Finance Careers, <https://www.tmxcareers.com/store-locations/> (last visited May 10, 2016). Community Loans of America has almost 900 stores and Select Management Resources has about 700 stores. Comm'n, *The 2014 Annual Report of the Bureau of Financial Institutions, Payday Lender Licensees, Check Cashers, Motor Vehicle Title Lender Licensees Operating in Virginia at the Close of Business December 31, 2014*, at 71 (2014), available at <http://www.scc.virginia.gov/bfi/annual/ar04-14.pdf>. Because Virginia vehicle title lenders are authorized by State law to make vehicle title loans to residents

growth in loans made under Virginia's vehicle title law, a series of reports notes that some Virginia title lenders are offering "consumer finance" installment loans without the corresponding consumer protections of the vehicle title lending law and, accounting for about "a quarter of the money loaned in Virginia using automobile titles as collateral."¹⁸³ In Tennessee, the number of licensed vehicle title (title pledge) locations at year-end has been measured yearly since 2006. The number of locations peaked in 2014 at 1,071, 52 percent higher than the 2006 levels. In 2015, the number of locations declined to 965. However, in each year since 2013, the State regulator has reported more licensed locations than existed prior to the State's title lending regulation, the Tennessee Title Pledge Act.¹⁸⁴

Vehicle title loan storefront locations serve a relatively small number of customers. One study estimates that the average vehicle title loan store made 227 loans per year, not including rollovers.¹⁸⁵ Another study using data from four States and public filings from the largest vehicle title lender estimated that the average vehicle title loan store serves about 300 unique borrowers per year—or slightly more than one unique borrower per business day.¹⁸⁶ The same report estimated that the largest vehicle title lender had 4.2 employees per store.¹⁸⁷ But, as mentioned, a number of large payday firms offer both products from the same storefront and may use the same employees to do so. In addition, small vehicle title lenders are

of other States, the data reported by licensed Virginia vehicle title lenders may include loans made to out-of-State residents.

¹⁷⁶ The largest vehicle title lender is TMX Finance, LLC formally known as Title Max Holdings, LLC with about 1,400 stores in 17 States.

likely to have fewer employees per location than do larger title lenders.

Marketing, underwriting, and collections practices. Vehicle title loans are marketed to appeal to borrowers with impaired credit who seek immediate funds. The largest vehicle title lender described title loans as a “way for consumers to meet their liquidity needs” and described their customers as those who “often . . . have a sudden and unexpected need for cash due to common financial challenges.”¹⁸⁸ Advertisements for vehicle title loans suggest that title loans can be used “to cover unforeseen costs this month . . . [if] utilities are a little higher than you expected,” if consumers are “in a bind,” for a “short term cash flow” problem, or for “fast cash to deal with an unexpected expense.”¹⁸⁹ Vehicle title lenders advertise quick loan approval “in as little as 15 minutes.”¹⁹⁰ Some lenders offer promotional discounts for the initial loan and bonuses for referrals,¹⁹¹ for example, a \$100 prepaid card for referring friends for vehicle title loans.¹⁹²

The underwriting policies and practices that vehicle title lenders use vary and may depend on such factors as State law requirements and individual lender practices. As noted above, some vehicle title lenders do not require borrowers to provide information about their income and instead rely on the vehicle title and the underlying collateral that may be repossessed and sold in the event the borrower defaults—a practice known as asset-based lending.¹⁹³ The largest vehicle

title lender stated in 2011 that its underwriting decisions were based entirely on the wholesale value of the vehicle.¹⁹⁴ Other title lenders’ Web sites state that proof of income is required,¹⁹⁵ although it is unclear whether employment information is verified or used for underwriting, whether it is used for collections and communication purposes upon default, or for both purposes. The Bureau is aware, from confidential information gathered in the course of its statutory functions, that one or more vehicle title lenders regularly exceed their maximum loan amount guidelines and instruct employees to consider a vehicle’s sentimental or use value to the borrower when assessing the amount of funds they will lend.

One large title lender stated that it competes on factors such as location, customer service, and convenience, and also highlights its pricing as a competitive factor.¹⁹⁶ An academic study found evidence of price competition in the vehicle title market, citing the abundance of price-related advertising and evidence that in States with rate caps, such as Tennessee, approximately half of the lenders charged the maximum rate allowed by law, with the other half charging lower rates.¹⁹⁷ However, another report found that like payday lenders, title lenders compete primarily on location, speed, and customer service, gaining customers by increasing the number of locations rather than decreasing their prices.¹⁹⁸

Loan amounts are typically for less than half the wholesale value of the consumer’s vehicle. Low loan-to-value ratios reduce lenders’ risk. A survey of title lenders in New Mexico found that the lenders typically lend between 25 and 40 percent of a vehicle’s wholesale

value.¹⁹⁹ At one large title lender, the weighted average loan-to-value ratio was found to be 26 percent of Black Book retail value.²⁰⁰ The same lender has two principal operating divisions; one division requires that vehicles have a minimum appraised value greater than \$500, but the lender will lend against vehicles with a lower appraised value through another brand.²⁰¹

When a borrower defaults on a vehicle title loan, the lender may repossess the vehicle. The Bureau believes, based on market outreach, that the decision whether to repossess a vehicle will depend on factors such as the amount due, the age and resale value of the vehicle, the costs to locate and repossess the vehicle, and State law requirements to refund any surplus amount remaining after the sale proceeds have been applied to the remaining loan balance.²⁰² Available information indicates that lenders are unlikely to repossess vehicles they do not expect to sell. The largest vehicle title lender sold 83 percent of the vehicles it repossessed but did not report overall repossession rates.²⁰³ In 2012, its firm-wide gross charge-offs equaled 30 percent of its average outstanding title loan balances.²⁰⁴ The Bureau is aware of vehicle title lenders engaging in illegal debt collection activities in order to collect amounts claimed to be due under title loan agreements. These practices include altering caller ID information on outgoing calls to borrowers to make it appear that calls were from other businesses, falsely threatening to refer borrowers for criminal investigation or prosecution, and unlawful disclosures of debt information to borrowers’ employers, friends, and family.²⁰⁵ In addition, approximately 20 percent of consumer complaints handled by the Bureau about vehicle title loans

involved consumers reporting concerns about repossession issues.²⁰⁶

Some vehicle title lenders have installed electronic devices on the vehicles, known as starter interrupt devices, automated collection technology, or more colloquially as “kill switches,” that can be programmed to transmit audible sounds in the vehicle before or at the payment due date. The devices may also be programmed to prevent the vehicle from starting when the borrower is in default on the loan, although they may allow a one-time restart upon the borrower’s call to obtain a code.²⁰⁷ One of the starter interrupt providers states that “[a]ssuming proper installation, the device will *not* shut off the vehicle while driving.”²⁰⁸ Due to concerns about consumer harm, one State financial regulator prohibited the devices as an unfair collection practice in all consumer financial transactions,²⁰⁹ and a State attorney general issued a consumer alert about the use of starter interrupt devices specific to vehicle title loans.²¹⁰ The alert also noted that some title lenders require consumers to provide an extra key to their vehicles. In an attempt to avoid illegal repossessions, Wisconsin’s vehicle title law prohibits lenders from requiring borrowers to provide the lender with an extra key to the vehicle.²¹¹ The Bureau has received several complaints about starter interrupt devices.

Business model. As noted above, short-term vehicle title lenders appear to have overhead costs relatively similar to those of storefront payday lenders. Vehicle title lenders’ loss rates and reliance on reborrowing activity appear to be even greater than that of storefront payday lenders.

Based on data analyzed by the Bureau, the default rate on single-payment vehicle title loans is six percent and the sequence-level default rate is 33 percent, compared with a 20

percent sequence-level default rate for storefront payday loans. One-in-five single-payment vehicle title loan borrowers has their vehicle repossessed by the lender.²¹²

Similarly, the rate of vehicle title reborrowing appears high. In the Bureau’s data analysis, more than half, 56 percent, of single-payment vehicle title loan sequences stretched for at least four loans; over a third, 36 percent, were seven or more loans; and 23 percent of loan sequences consisted of ten or more loans. While other sources on vehicle title lending are more limited than for payday lending, the Tennessee Department of Financial Institutions publishes a biennial report on vehicle title lending. Like the single-payment vehicle title loans the Bureau has analyzed, the vehicle title loans in Tennessee are 30-day single-payment loans. The most recent report shows similar patterns to those the Bureau found in its research, with a substantial number of consumers rolling over their loans multiple times. According to the report, of the total number of loan agreements made in 2014, about 15 percent were paid in full after 30 days without rolling over. Of those loans that are rolled over, about 65 percent were at least in their fourth rollover, about 44 percent were at least in their seventh rollover, and about 29 percent were at least in their tenth, up to a maximum of 22 rollovers.²¹³

The impact of these outcomes for consumers who are unable to repay and either default or reborrow is discussed in Market Concerns—Short-Term Loans. Bank Deposit Advance Products and Other Short-Term Lending

As noted above, within the banking system, consumers with liquidity needs rely primarily on credit cards and overdraft services. Some institutions have experimented with short-term payday-like products or partnering with payday lenders, but such experiments have had mixed results and in several cases have prompted prudential regulators to take action discouraging certain types of activity.

In 2000, the Office of the Comptroller of the Currency (OCC) issued an advisory letter alerting national banks that the OCC had significant safety and soundness, compliance, and consumer protection concerns with banks entering

into contractual arrangements with vendors seeking to avoid certain State lending and consumer protection laws. The OCC noted it had learned of nonbank vendors approaching federally chartered banks urging them to enter into agreements to fund payday and title loans. The OCC also expressed concern about unlimited renewals (what the Bureau refers to as reborrowing), and multiple renewals without principal reduction.²¹⁴ The agency subsequently took enforcement actions against two national banks for activities relating to payday lending partnerships.²¹⁵

The Federal Deposit Insurance Corporation (FDIC) has also expressed concerns with similar agreements between payday lenders and the depositories under its purview. In 2003, the FDIC issued Guidelines for Payday Lending applicable to State-chartered FDIC-insured banks and savings associations; the guidelines were revised in 2005 and most recently in 2015. The guidelines focus on third-party relationships between the chartered institutions and other parties, and specifically address rollover limitations. They also indicate that banks should ensure borrowers exhibit both a willingness and ability to repay when rolling over a loan. Among other things, the guidelines indicate that institutions should: (1) ensure that payday loans are not provided to customers who had payday loans outstanding at any lender for a total of three months during the previous 12 months; (2) establish appropriate cooling-off periods between loans; and (3) provide that no more than one payday loan is outstanding with the bank at a time to any one borrower.²¹⁶ In 2007, the FDIC issued guidelines encouraging banks to offer affordable small-dollar loan alternatives with APRs of 36 percent or less, reasonable and limited fees, amortizing payments, underwriting focused on a borrower’s ability to repay but allowing flexible

documentation, and to avoid excessive renewals.²¹⁷

The NCUA has taken some steps to encourage federally chartered credit unions to offer “payday alternative loans,” which generally have a longer term than traditional payday products. This program is discussed in more detail in part II.C.

As the payday lending industry grew, a handful of banks decided to offer their deposit customers a similar product termed a deposit advance product (DAP). While one bank started offering deposit advances in the mid-1990s, the product began to spread more rapidly in the late 2000s and early 2010s. DAP could be structured a number of ways but generally involved a line of credit offered by depository institutions as a feature of an existing consumer deposit account with repayment automatically deducted from the consumer’s next qualifying deposit. Deposit advance products were available to consumers who received recurring electronic deposits if they had an account in good standing and, for some banks, several months of account tenure, such as six months. When an advance was requested, funds were deposited into the consumer’s account. Advances were automatically repaid when the next qualifying electronic deposit, whether recurring or one-time, was made to the consumer’s account rather than on a fixed repayment date. If an outstanding advance was not fully repaid by an incoming electronic deposit within about 35 days, the consumer’s account was debited for the amount due and could result in a negative balance on the account.

The Bureau estimates that at the product’s peak from mid-2013 to mid-2014, banks originated roughly \$6.5 billion of advances, which represents about 22 percent of the volume of storefront payday loans issued in 2013. The Bureau estimates that at least 1.5 million unique borrowers took out one or more DAP loans during that same time period.²¹⁸

DAP fees, like payday loan fees, did not vary with the amount of time that the advance was outstanding but rather were set as dollars per amount advanced. A typical fee was \$2 per \$20 borrowed, the equivalent of \$10 per

\$100. Research undertaken by the Bureau using a supervisory dataset found that the median duration for a DAP advance was 12 days, yielding an effective APR of 304 percent.²¹⁹

The Bureau further found that while the average draw on a DAP was \$180, users typically took more than one draw before the advance was repaid. The multiple draws resulted in a median average daily DAP balance of \$343, which is similar to the size of a typical payday loan. With the typical DAP fee of \$2 per \$20 advanced, the fees for \$343 in advances equate to about \$34.30. The median DAP user was indebted for 112 days over the course of a year and took advances in seven months. Fourteen percent of borrowers took advances totaling over \$9,000 over the course of the year; these borrowers had a median number of days in debt of 254.²²⁰

In 2010, the Office of Thrift Supervision (OTS) issued a supervisory directive ordering one bank to terminate its DAP program, which the bank offered in connection with prepaid accounts, after determining the bank engaged in unfair or deceptive acts or practices and violated the OTS’ Advertising Regulation.²²¹ Consequently, in 2011, pursuant to a cease and desist order, the bank agreed to remunerate its DAP consumers nearly \$5 million and pay a civil monetary penalty of \$400,000.²²²

In November 2013, the FDIC and OCC issued final supervisory guidance on DAP.²²³ This guidance stated that banks offering DAP should adjust their programs in a number of ways, including applying more scrutiny in underwriting DAP loans and discouraging repetitive borrowing. Specifically, the OCC and FDIC stated that banks should ensure that the

customer relationship is of sufficient duration to provide the bank with adequate information regarding the customer’s recurring deposits and expenses, and that the agencies would consider sufficient duration to be no less than six months. In addition, the guidance said that banks should conduct a more stringent financial capacity assessment of a consumer’s ability to repay the DAP advance according to its terms without repeated reborrowing, while meeting typical recurring and other necessary expenses as well as outstanding debt obligations. In particular, the guidance stated that banks should analyze a consumer’s account for recurring inflows and outflows at the end, at least, of each of the preceding six months before determining the appropriateness of a DAP advance. Additionally, the guidance noted that in order to avoid reborrowing, a cooling-off period of at least one monthly statement cycle after the repayment of a DAP advance should be completed before another advance could be extended. Finally, the guidance stated that banks should not increase DAP limits automatically and without a fully underwritten reassessment of a consumer’s ability to repay, and banks should reevaluate a consumer’s eligibility and capacity for DAP at least every six months.²²⁴

Following the issuance of the FDIC and OCC guidance, banks supervised by the FDIC and OCC ceased offering DAP. Of two DAP-issuing banks supervised by the Board of Governors of the Federal Reserve System (Federal Reserve Board) and therefore not subject to either the FDIC or OCC guidance, one eliminated its DAP program while another continues to offer a modified version of DAP to its existing DAP borrowers.²²⁵ Today, with the exception of some short-term lending within the NCUA’s Payday Alternative Loan program, described below in part II.C, relatively

few banks or credit unions offer large-scale formal loan programs of this type.

C. Longer-Term, High-Cost Loans

As discussed above, beginning in the 1990s, a number of States created carve-outs from their usury laws to permit single-payment payday loans at annualized rates of between 300 percent and 400 percent. Although this lending initially focused primarily on loans lasting for a single income cycle, lenders have introduced newer, longer forms of liquidity loans over time. These longer loan forms include the “hybrid payday loans” discussed above, which are high-cost loans where the consumer is automatically scheduled to make a number of interest or fee only payments followed by a balloon payment of the entire amount of the principal and any remaining fees. They also include “payday installment loans,” described in more detail below. In addition, as discussed above, a number of States have authorized longer term vehicle title loans that extend beyond 30 days. Some longer-term, high cost installment loans likely were developed in response to the Department of Defense’s 2007 rules implementing the Military Lending Act. As discussed above in part II.B, those rules applied to payday loans of 91 days or less (with an amount financed of \$2,000 or less) and to vehicle title loans of 180 days or less. The Department of Defense recently expanded the scope of the rules due to its belief that creditors were structuring products to avoid the MLA’s application.²²⁶

Payday Installment Loans

Product definition and regulatory environment. The term “payday installment loan” refers to a high-cost loan repaid in multiple installments, with each installment typically due at the consumer’s payday and with the lender generally having the ability to collect the payment from the consumer’s bank account as money is deposited or directly from the consumer’s paycheck.²²⁷

Two States, Colorado and Illinois, have authorized payday installment loans. A number of other States have adopted usury laws that payday lenders use to offer payday installment loans in addition to more traditional payday loans. For example, a recent report found that eight States have no rate or fee limits for closed-end loans of \$500 and that 11 States have no rate or fee limits for closed-end loans of \$2,000.²²⁸

The same report noted that for open-end credit, 14 States do not limit rates for a \$500 advance and 16 States do limit them for a \$2,000 advance.²²⁹ Another recent study of the Web sites of five payday lenders, that operate both online and at storefront locations, found that these five lenders offered payday installment loans in at least 17 States.²³⁰

In addition, as discussed above, a substantial segment of the online payday industry operates outside of the constraints of State law, and this segment, too, has migrated towards payday installment loans. For example, a study commissioned by a trade association for online lenders surveyed seven lenders and concluded that, while single-payment loans are still a significant portion of these lenders’ volume, they are on the decline while installment loans are growing. Several of the lenders represented in the report had either eliminated single-payment products or were migrating to installment products while still offering single-payment loans.²³¹

There is less public information available about payday installment loans than about single-payment payday loans. Publicly traded payday lenders that make both single-payment and installment loans often report all loans in aggregate and do not report separately on their installment loan products or do not separate their domestic installment loan products from their international installment loan product lines, making sizing the market difficult. However, one analyst suggests that the continuing trend is for installment loans to take market share—both volume and revenue—away from single-payment payday loans.²³²

Predatory Lending?, at v-vi (2015), available at <http://www.nclc.org/images/pdf/pr-reports/report-installment-loans.pdf>. Roughly half of the States with no set limits do prohibit unconscionable interest rates.

The report does not address the State licensing status of the study participants but based on its market outreach activities, the Bureau believes that some of the loans included in the study were not made subject to the licensing laws of the borrowers’ States of residence. See also nonPrime101, *Report 1*, at 9, 11.

²³² Hecht, *Alternative Financial Services*, at 9.

More specifically, data on payday installment lending is available, however, from the two States that expressly authorize it. Through 2010 amendments to its payday loan law, Colorado no longer permits short-term single-payment payday loans. Instead, in order to charge fees in excess of the 36 percent APR cap for most other consumer loans, the minimum loan term must be six months.²³³ The maximum payday loan amount remains capped at \$500, and lenders are permitted to take a series of post-dated checks or payment authorizations to cover each payment under the loan, providing lenders with the same access to borrower’s accounts as a single-payment payday loan. The average payday installment loan amount borrowed in Colorado in 2014 was \$392 and the average contractual loan term was 189 days. The average APR on these payday installment loans was 190 percent, which reflects the fact that at the same time that Colorado mandated minimum six-month terms it also imposed a new set of pricing restrictions on these loans.²³⁴ Borrowers may prepay without a penalty and receive a pro-rata refund of all fees paid. According to loan data from Colorado, the average actual loan term was 94 days, resulting in an effective APR of 121 percent.²³⁵

In Illinois, lenders have been permitted to make payday installment loans since 2011 for terms of 112 to 180 days and amounts up to the lesser of \$1,000 or 22.5 percent of gross monthly income.²³⁶ A consumer may take out two loans concurrently (single-payment payday, payday installment, or a combination thereof) so long as the total amount borrowed does not exceed the cap. The maximum permitted charge on Illinois payday installment loans is \$15.50 per \$100 on the initial principal

²³³ Colo. Rev. Stat. § 5-3.1-103. Although loans may be structured in multiple installments of substantially equal payments or a single installment, almost all lenders contract for repayment in monthly or bi-weekly installments. 4 Colo. ²²⁶ 80 FR 43560, 43567 n.78 (July 22, 2015).

²²⁷ Lenders described in part II.C as payday installment lenders may not use this terminology.

²²⁸ Nat’l. Consumer Law Ctr., *Installment Loans, Will States Protect Borrowers From A New Wave Of*

balance and on the balance scheduled to be outstanding at each installment period. For 2013, the average payday installment loan amount was \$634 to be repaid in 163 days along with total fees of \$645. The average APR on Illinois payday installment loans was 228 percent.²³⁷

In Illinois, payday installment loans have grown rapidly. In 2013, the volume of payday installment loans made was 113 percent of the 2011 volume. From 2010 to 2013, however, the volume of single-payment payday loans decreased by 21 percent.²³⁸

Beyond the data from these two States, several studies shed additional light on payday installment lending. A research paper based on a dataset from several payday installment lenders, consisting of over 1.02 million loans made between January 2012 and September 2013, provides some information on payday installment loans.²³⁹ It contains data from both storefront installment loans (55 percent) and online installment loans (45 percent). It found that the median loan amount borrowed was \$900 for six months (181 days) with 12 bi-weekly installment payments coinciding with paydays. The median APR on these loans was 295 percent. Online borrowers had higher median gross incomes than storefront borrowers (\$39,000 compared to \$31,000). When the researchers included additional loans they described as being made under “alternative business models, such as loans extended under tribal jurisdiction,” the median loan amount borrowed was \$800 for 187 days due in 12 installments at a higher median APR of 319 percent.²⁴⁰

Similarly, a report using data from a specialty consumer reporting agency that included data primarily from online payday lenders that claim exemption from State lending laws examined the pricing and structure of their installment loans.²⁴¹ From 2010 to 2014, loans that may be described as payday installment loans generally accounted for one-third of all loans in the sample; however, this fluctuated by quarter between approximately 10 and 50 percent.²⁴² The payday installment

loans had a median APR of 335 percent, across all payment structures. The most common payday installment loan in the sample had 12 bi-weekly payments; a median size of \$500 and a median APR of 348 percent.

A third study commissioned by an online lender trade association surveyed a number of online lenders. The survey found that the average payday installment loan was for \$667 with an average term of five months. The average fees for these loans were \$690. The survey did not provide any APRs but the Bureau estimates that the average APR for a loan with these terms (and bi-weekly payments, the most common payment frequency seen) is about 373 percent.²⁴³

In a few States, such as Virginia discussed above in part II.B, and Kansas,²⁴⁴ lenders offer loans structured as open-end payday installment loans. The Bureau believes based on market outreach, that lenders utilize open-end credit structures where they view State licensing or lending provisions as more favorable for open-end products. Some open-end products are for similar loan amounts as single-payment payday loans, cash advances are restricted to set increments such as \$50 and must be requested in person, by calling the lender, or visiting the lender’s Web site, and payments under the open-end line of credit are due on the borrower’s scheduled paydays.

Marketing and underwriting practices. The Bureau believes based on market outreach, that some lenders use similar underwriting practices for both single-payment and payday installment loans (borrower identification, and information about income and a bank account) so long as they have access to the borrower’s bank account for repayment. Some payday installment lenders, particularly but not exclusively online lenders, may use underwriting technology that pulls data from nationwide consumer reporting agencies and commercial or proprietary credit scoring models based on alternative data to assess fraud and credit risk.²⁴⁵ In

which made up approximately one-third of the loans, traditional single-payment payday loans, also one-third of the loans, and non-amortizing payday installment loans, which made up a negligible percentage of loans in the dataset. *Id.* at 7.

²⁴⁵ For example, use of risk assessment and national databases. *Payday Loans/Cash Advance*, Advance America, <https://www.advanceamerica.net/locations/details/store-4500/2828-S-17th-Ave-Unit-B/Broadview/IL/60155> (last visited March 10, 2016). For example, obtain credit report from a national consumer reporting

2014, net charge-offs at two of the large licensed online installment lenders were over 50 percent of average balances.²⁴⁶

The Bureau likewise believes that the customer acquisition costs for online payday installment loans are likely similar to the costs to acquire a customer for an online single-payment payday loan. For example, one large licensed online payday installment lender reported that its 2014 customer acquisition cost per new loan was \$297.²⁴⁷ Another large online lender with both single-payment and payday installment loans reported that its marketing expense is 15.8 percent of revenue in 2014.²⁴⁸

Business model. In many respects, payday installment loans are similar to single-payment payday loans. However, one obvious difference is that the loan agreements provide for repayment in installments, rather than single-payment loans that may be rolled over or hybrid loans that automatically rollover, described above in part II.B above.

Regulatory reports from Colorado and Illinois provide evidence of repeat borrowing on payday installment loans. In Colorado, in 2012, two years after the State’s amendments to its payday lending law, 36.7 percent of new loans were taken out on the same day that a previous loan was paid off, an increase from the prior year; for larger loans, nearly 50 percent were taken out on the same day that a previous loan was

²⁴¹ nonPrime 101, *Report 5: Loan Product Structures and Pricing in Internet Installment Lending*.

²⁴² The other loan types in the sample were hybrid payday loans (described above in part II.B),

repaid.²⁴⁹ Further, despite a statutorily-required minimum loan term of six months, on average, consumers took out 2.9 loans from the same lender during 2012 (by prepaying before the end of the loan term and then reborrowing).²⁵⁰ Colorado's regulatory reports demonstrate that in 2013, the number of loan defaults on payday installment loans, calculated as a percent of the total number of borrowers, was 38 percent but increased in 2014 to 44 percent.²⁵¹

One feature of Illinois' database is that it tracks applications declined due to ineligibility. In 2013, of those payday installment loan applications declined, 54 percent were declined because the applicants would have exceeded the permissible six months of consecutive days in debt and 29 percent were declined as they would have violated the prohibition on more than two concurrently open loans.²⁵²

In a study of high-cost unsecured installment loans, the Bureau has found that 37 percent of these loans are refinanced. For a subset of loans made at storefront locations, 94 percent of refinances involved cash out (meaning the consumer received cash from the loan refinance); for a subset of loans made online, nearly 100 percent of refinanced loans involved cash out. At the loan level, for unsecured installment loans in general, 24 percent resulted in default; for those made at storefront locations, 17 percent defaulted, compared to a 41 percent default rate for online loans.²⁵³

A report based on data from several payday installment lenders was generally consistent. It found that nearly 34 percent of these payday installment loans ended in charge-off. Charge-offs were more common for loans in the sample that had been made online (42 percent) compared to those made at storefront locations (27 percent).²⁵⁴

Installment Vehicle Title Loans

Product definition and regulatory environment. Installment vehicle title loans are vehicle title loans that are contracted to be repaid in multiple installments rather than in a single payment. Operationally, they are similar to single-payment vehicle title loans that are rolled over and discussed above in part II.B. As discussed in that section, about half of the States authorizing vehicle title loans permit the loans to be repaid in installments rather than, or in addition to, a single lump sum.²⁵⁵

As with single-payment vehicle title loans, the State laws applicable to installment vehicle title loans vary. Illinois requires vehicle title loans to be repaid in equal installments, limits the maximum loan amount to the lesser of \$4,000 or 50 percent of the borrower's monthly income, has a 15-day cooling-off period except for refinances (defined as extensions or renewals) but does not limit fees. A refinance may be made only when the original principal of the loan is reduced by at least 20 percent.²⁵⁶ Texas limits the loan term for CSO-arranged title loans to 180 days but does not cap fees.²⁵⁷ Virginia has both a minimum loan term (120 days) and a maximum loan term (12 months) and caps fees at between 15 to 22 percent of the loan amount per month.²⁵⁸ It also prohibits rollovers. Wisconsin limits the original loan term to six months but does not limit fees other than default charges, which are limited to 2.75 percent per month; it caps the maximum loan amount at \$25,000.²⁵⁹ Rollovers are not permitted on Wisconsin installment loans.

Some States do not specify loan terms for vehicle title loans, thereby authorizing both single-payment and installment title loans. These States include Arizona, New Mexico, and Utah. Arizona limits fees to between 10 and 17 percent per month depending on the loan amount; fees do not vary by loan duration.²⁶⁰ New Mexico and Utah do not limit fees for vehicle title loans, regardless of the loan term.²⁶¹ Delaware has no limit on fees but limits the term to 180 days, including rollovers,

²⁵⁵ Pew, *Auto Title Loans: Market Practices and Borrowers' Experience*, at 4.

²⁵⁶ Ill. Admin. Code, tit. 38, § 110.370.

²⁵⁷ Tex. Fin. Code Ann. § 393.221 to 393.224.

²⁵⁸ VA. Code §§ 6.2-2215, 6.2-2216. As noted above in part II.B, Virginia has no interest rate regulations or licensure requirements for open-end credit.

²⁵⁹ Wis. Stat. § 138.16(2)(b)(2).

²⁶⁰ Ariz. Rev. Stat. § 44-281 and § 44-291.

²⁶¹ N.M. Stat. §§ 58-15-1 to 30; Utah Code § 7-24-101 through 305.

likewise authorizing either 30-day loans or installment loans.²⁶²

State regulator data from two States track loan amounts, APRs, and loan terms for installment vehicle title loans. Illinois reported that in 2013, the average installment vehicle title loan amount was over \$950 to be repaid in 442.7 days along with total fees of \$2,316.43, and the average APR was 201 percent.²⁶³ Virginia data show similar results. In 2014, the average amount borrowed on vehicle title loans was \$1,048. The average APR was 222 percent and the average loan term was 345 days.²⁶⁴ For a \$1,048 loan, a Virginia title lender could charge interest of about \$216.64 per month, or \$2,491.36 for 345 days.²⁶⁵ The average installment vehicle title loan amounts borrowed are similar to the amounts borrowed in single-payment title loan transactions; the average APRs are generally lower due to the longer loan term, described above in part II.B.

The Bureau obtained anonymized multi-year data from seven lenders offering either or both vehicle title and payday installment loans. The vehicle title installment loan data are from 2010 through 2013; the payday installment data are from 2007 through 2014. The Bureau reported that the average vehicle title installment loan amount was \$1,098 and the median loan amount was \$710; the average was 14 percent higher, and the median was two percent higher, than for single-payment vehicle title loans. The average APR was 250 percent and the median 259 percent compared to 291 percent and 317 percent for single-payment vehicle title loans.

Industry size and structure. The three largest vehicle title lenders, as defined by store count and described above in part II.B, make both single-payment and installment vehicle title loans, depending on the requirements and authority of State laws. As discussed above, there are no publicly traded vehicle title lenders (though some of the publicly-traded payday lenders also make vehicle title loans) and the one formerly public company did not distinguish its single-payment title loans from its installment title loans in its financial reports. Consequently, estimates of vehicle title loan market size include both single-payment and

²⁶² Del. Code ANN. tit. 5, §§ 2250, 2254.

²⁶⁴ Va. State Corp. Comm'n, *The 2014 Annual Report*, at 71.

²⁶⁵ A licensed vehicle title lender may charge 22 percent per month on the principal up to \$700, 18 percent per month on amounts over \$700 to \$1,400, and 15 percent per month on amount that exceed \$1,400. VA Code § 6.2-2216.

installment vehicle title loans, including the estimates provided above in part II.B, above.

Marketing and underwriting practices. In most respects, installment vehicle title loans are similar to single-payment vehicle title loans in marketing, borrower demographics, underwriting, and collections. For example, the Bureau is aware from market outreach and market monitoring activities that some installment vehicle title lenders require proof of income as part of the application process for installment vehicle title loans,²⁶⁶ while others do not. Some installment vehicle title loans are set up to include repayment by ACH from the borrower's account, a practice common to payday installment loans. The Bureau has reviewed some installment vehicle title lenders' loan agreements that provide for delinquency fees if a payment is late.

Business model. Installment vehicle title loans generally perform in a manner similar to single-payment vehicle title loans. One study has analyzed data on repeat borrowing in installment vehicle title loans. The study found that in Q4 2014 in Texas, over 20 percent of installment vehicle title loans were refinanced in the same quarter the loan was made, and that during 2014 as a whole, the dollar volume of vehicle title loans refinanced almost equaled the volume of these loans originated.²⁶⁷ More recent Texas regulator data indicates similar findings. Of the installment vehicle title loans originated in 2015, 39 percent were subsequently refinanced in the same year, and of all refinances of installment vehicle title loans in 2015, regardless of year of origination, 17 percent were refinanced five or more times.²⁶⁸

The Bureau has also analyzed installment vehicle lending data. The Bureau found that 20 percent of vehicle title installment loans were refinanced, with about 96 percent of refinances involving cash out. The median cash-out amount was \$450, about 35 percent of the new loan's principal. At the loan level, 22 percent of installment vehicle title loans resulted in default and 8 percent in repossession; at the loan sequence level, 31 percent resulted in

default and 11 percent in repossession.²⁶⁹

Other Nonbank Installment Loans

Product definition and regulatory environment. Before the advent of single-payment payday loans or online lending, and before widespread availability of credit cards, liquidity loans—also known as “personal loans” or “personal installment loans”—were offered by storefront nonbank installment lenders, often referred to as “finance companies.” “Personal loans” are typically unsecured loans used for any variety of purposes and distinguished from loans where the lender generally requires the funds be used for the specific intended purpose, such as automobile purchase loans, student loans, and mortgage loans. As discussed below, these finance companies, and their newer online counterparts (that offer similar loan products but place more reliance on automated processes and innovative underwriting), have a different business model than payday installment lenders and vehicle title installment lenders. Nonetheless, some loans offered by these installment lenders fall within the proposal's definition of “covered longer-term loan,” as they are made at interest rates that exceed 36 percent or include fees that result in a total cost of credit that exceeds 36 percent, and include repayment by access to the borrower's account or include a non-purchase money security interest in a consumer's vehicle. Additional information regarding the market for these finance company loans and their online counterparts is described below.

According to a report from a consulting firm using data derived from a nationwide consumer reporting agency, in 2015, finance companies originated 8.2 million personal loans (unsecured installment loans) totaling \$37.6 billion in originations, of which approximately 6.8 million loans worth \$24.3 billion were made to nonprime consumers (categorized as near prime, subprime, and deep subprime, with VantageScores of 660 and below), with an average loan size of about \$3,593.²⁷⁰

As of the end of 2015 there were 7.1 million outstanding loans worth \$29.2 billion to nonprime consumers. These nonprime consumers accounted for 71 percent of outstanding accounts and 59 percent of outstanding balances, with an average balance outstanding of about \$4,113. Subprime and deep subprime consumers, those with scores between 300 and 600 represented 41 percent of the borrowers and 28 percent of outstanding balances with an average balance of approximately \$3,380.²⁷¹

APRs at storefront locations in States that do not cap rates on installment loans can be 50 to 90 percent for subprime and deep subprime borrowers; APRs in States with rate caps are about 36 percent APR for near prime and subprime borrowers.²⁷² A survey of finance companies conducted in conjunction with a national trade association reported that 80 percent of loans were for \$2,000 or less and 85 percent of loans had durations of 24 months or less (60 percent of loans had durations of one year or less).²⁷³ No average loan amount was stated. Almost half of the loans had APRs between 49 and 99 percent; 9 percent of loans of \$501 or less had APRs between 100 and 199 percent, but there was substantial rate variation among States.²⁷⁴ Although APR calculations under Regulation Z include origination fees, lenders generally are not required to include within the finance charge application fees, document preparation fees, and add-on services such as optional credit insurance and guaranteed automobile

Wyman, 2015 Q1 Market Intelligence Report: Personal Loans Report, at 11-13 figs. 9, 10, 12, & 13 (2015), available at <http://www.marketintelligencereports.com>. These finance company personal loans are not segmented by cost and likely include some loans with a total cost of credit of 36 percent APR or less that would not be covered by the Bureau's proposed rule as described below in proposed § 1041.2(a)(18).

²⁷¹ Experian & Oliver Wyman, 2015 Q4 Market Intelligence Report: Personal Loans Report at 20-22 figs. 27, 28, 30, & 31. In contrast, 29 percent of the loans and 41 percent of the loan volume were made to consumers with prime or superprime credit scores (VantageScore 3.0 of 661 or above). These loans likely have a total cost of credit of 36 percent APR or less and would not be covered by the Bureau's proposed rule.

protection.²⁷⁵ A wider range and number of such up-front fees and add-on products and services appear to be charged by the storefront lenders than by their newer online counterparts.

Finance companies generally hold State lending licenses in each State in which they lend money and are subject to each State's usury caps. Finance companies operate primarily from storefront locations, but some of them now offer complete online loan platforms.²⁷⁶

Industry size and structure. There are an estimated 8,000 to 10,000 storefront finance company locations in the United States²⁷⁷—about half to two-thirds the number of payday loan stores—with approximately seven million loans to nonprime borrowers outstanding at any given point in time.²⁷⁸ Three publicly traded companies account for about 40 percent of these storefront locations.²⁷⁹ Of these, one makes the majority of its loans to consumers with FICO Scores above 600, and another makes a majority of loans to consumers who have either FICO Scores below 600 or no credit scores due to an absence of credit experience. Another considers its customer base to include borrowers with FICO Scores as low as 500.²⁸⁰ Among the three publicly

traded finance companies in this market, one will make installment loans starting at about \$500 and another at \$1,500, as well as larger installment loans as high as \$15,000 to \$25,000.²⁸¹

Given the range of loan sizes of personal loans made by finance companies, and the range of credit scores of some finance company borrowers, it is likely that some of these loans are used to address liquidity shortfalls while others are used either to finance new purchases or to consolidate and pay off other debt.

Marketing and underwriting practices. Customer acquisition methods are generally similar for finance companies and online installment lenders. Finance companies rely on direct mail marketing and online advertising including banner advertisements, search engine optimization, and purchasing online leads to drive traffic to stores. Where allowed by State law, some finance companies mail “live” or “convenience checks” that, when endorsed and cashed or deposited, commit the consumer to repay the loan at the terms stated in the accompanying loan disclosures.²⁸² Promotional offers include 0 percent interest loans for borrowers who prepare and file their tax

returns at the lender's office or refer friends²⁸³ and free credit scores and gift cards.²⁸⁴

Finance companies suggest that loans may be used for bill consolidation, home repairs or improvements, or unexpected expenses such as medical bills and automobile repairs.²⁸⁵ Like their storefront counterparts, online installment lenders also offer promotions such as offers of lower rates on installment loans after a history of successful loan repayments.²⁸⁶

Finance companies secure some of their loans with vehicle titles or with a legal security interest in borrowers' vehicles, although the Bureau believes based on market outreach that these loans are generally underwritten based on an assessment of the consumer's income and expenses and are not based primarily on the value of the vehicle in which the interest is provided as collateral. The portfolio of finance company loans collateralized by security interests in vehicles varies by lender and some do not separately report this data from overall portfolio metrics that include direct larger loans, automobile purchase loans, real estate loans, and retail sales finance loans.²⁸⁷ The Bureau's market outreach with finance companies and their trade associations indicates that at most, 20 to 25 percent of finance company loans—though a higher percentage of receivables—involved a non-purchase money security interest in a vehicle.

Finance companies typically engage in underwriting that includes a monthly net income and expense budget, a review of the consumer's credit report,

²⁷⁵ 12 CFR 1026.4(a) to (d).

²⁷⁶ For example, see iLoan offered by Springleaf, now OneMain Holdings, <https://iloan.com/> (last visited Mar. 10, 2016). These may not necessarily be covered loans, depending on the total cost of credit. On November 15, 2015, Springleaf Holdings acquired OneMain Financial Holdings and became OneMain Holdings. OneMain Holdings Inc., 2015 Annual Report (Form 10-K) at 5 (Feb. 29, 2016), available at <https://www.sec.gov/Archives/edgar/data/1584207/000158420716000065/omh-20151231x10k.htm>.

²⁷⁷ Hecht, *Alternative Financial Services*, at 10.

²⁷⁸ Estimates of number of borrowers from Bureau staff calculations using Form 10-Ks of publicly traded companies and other material. For the estimate of seven million nonprime consumers, see Experian & Oliver Wyman, *2015 Q4 Market Intelligence Report: Personal Loans*, at 20-21 figs. 27 & 31. The Bureau believes that most consumers have only one finance company installment loan at any given time as lenders likely consolidate multiple loans or refinance additional needs into a single loan. Consequently, the estimate of seven million loans outstanding is roughly equal to the number of consumers with an outstanding installment loan.

²⁷⁹ Estimates of storefront locations from Bureau staff calculations using Form 10-Ks of publicly traded companies and other materials.

²⁸⁰ FICO is a producer of commercially available credit risk scores developed using data reported by the three national consumer reporting agencies. Base FICO Scores range from 350 to 850, and those below 670 are generally considered below average. For a description of FICO Scores, see myFICO, *Understanding FICO Scores*, at 4-5, available at http://www.myfico.com/Downloads/Files/myFICO_UYFS_Booklet.pdf. Prior to Springleaf's acquisition of One Main, Springleaf reported that 45 percent of its customers had FICO Scores below 600 and another 32 percent had scores between 601 and 660.

At OneMain, a higher percentage of customers (40 percent) had FICO Scores between 601 and 660 and a lower percentage (22 percent) had scores below 600. One Main, “New” OneMain Overview, at 8 (Jan. 2016), available at http://files.shareholder.com/downloads/AMDA-28PMI5/1420156915x0x873656/635ABE19-CE94-44BB-BB27-BC1C6B78266B/New_OneMain_Overview_Jan_2016.final.pdf. World Acceptance reports over half of its domestic borrowers have either no credit score (< 5 percent) or FICO Scores under 600 (50 percent), while approximately 20 percent have scores above 650. World Acceptance Corp., Investor Presentation, at 16 (June 30, 2015), available at <http://www.worldacceptance.com/wp-content/uploads/2015/09/Investor-Presentation-6-30-15-reduced.pdf>. Regional Management's target borrowers have FICO Scores between 500-749. See Regional Mgmt. Corp., *Investor Presentation*, at 12 (Sept. 21, 2015), available at <http://www.regionalmanagement.com/phoenix.zhtml?c=246622&p=irol-irhome>.

²⁸¹ World Acceptance reports that two-thirds of its loans are for \$1,500 or less, but its larger installment loans average about \$3,400 and it will lend a maximum of about \$13,500. World Acceptance Corp., *June 2015 Investor Presentation*, at 14-15. Regional Management makes loans of \$500 to \$2,500 but will make loans up to \$25,000 excluding auto and retail loans. Regional Mgmt., *Sept. 2015 Investor Presentation*, at 4. OneMain Holdings through its Springleaf brand makes loans as small as \$1,500 but will loan up to \$15,000, excluding direct auto loans. ²⁸⁷ World Acceptance estimates that 13 percent of the total number of loans and 20 percent of gross loan volume are vehicle-secured loans. World Acceptance Corp., 2015 Annual Report (Form 10-K), at Item 1A. OneMain Holdings reported that as of the end of 2015, \$2.8 billion or 21 percent of personal loan net finance receivables were secured by titled personal property, such as automobiles. In contrast, the previous year, before acquiring OneMain, the portfolio (consisting solely of Springleaf loans) had 49 percent of personal loan receivables secured by titled personal property. OneMain Holdings Inc., 2015 Annual Report (Form 10-K), at 38.

and an assessment of monthly cash flow.²⁸⁸ One trade association representing traditional finance companies has described the underwriting process used by these lenders as evaluating the borrower's "stability, ability, and willingness" to repay the loan.²⁸⁹ In addition to the typical underwriting described above, one finance company has publicized that it is now utilizing alternative sources of consumer data to assess creditworthiness, including the borrower's history of utility payments and returned checks, as well as nontraditional data (such as the type of personal device used when applying for the loan).²⁹⁰ Many finance companies report loan payment history to one or more of the nationwide consumer reporting agencies,²⁹¹ and the Bureau believes from market outreach that these lenders generally furnish on a monthly basis.

From market monitoring activities, the Bureau is aware that there is an emerging group of online installment lenders entering the market with products that in some ways resemble the types of loans made by finance companies rather than payday installment loans. Some of these online installment lenders engage in sophisticated underwriting that involves substantial use of analytics and technology. These lenders utilize systems to verify application information including identity, bank account, and contact information focused on identifying fraud and borrowers intending to not repay. These lenders also review nationwide credit report information as well as data sources that provide payment and other information from wireless, cable, and utility company payments. The Bureau is aware that some online installment lenders obtain authorization to view

borrowers' bank and credit card accounts to validate their reported income, assess income stability, and identify major recurring expenses.

Business model. Although traditional finance companies share a similar storefront distribution channel with storefront payday and vehicle title lenders, other aspects of their business model differs markedly. The publicly traded finance companies are concentrated in Midwestern and Southern States, with a particularly large number of storefronts in Texas.²⁹² A number of finance companies are located in rural areas.²⁹³ One of the publicly traded finance companies states it competes on price and product offerings while another states it emphasizes customer relationships, customer service, and reputation.²⁹⁴ Similarly, while the emerging online installment lenders share a similar distribution approach with online payday lenders, online hybrid payday installment lenders, and online payday installment lenders, their business models, particularly underwriting, are substantially different.

One of the indicators that underscores this contrast is default rates. In contrast to the high double digit charge-off rates discussed for some industry segments discussed above, reporting to a national consumer reporting agency indicates that during each quarter of 2015, between 2.9 and 3.4 percent of finance company loan balances were charged off. However, these figures include loans made to prime and superprime consumers that would likely not be covered loans under the total cost of credit threshold in proposed § 1041.2(a)(18).²⁹⁵ In recent years, net charge-off rates at two publicly traded finance companies have ranged from 12 to 15 percent of average balances.²⁹⁶

In contrast, the 2013 survey of six million finance company loans conducted on behalf of a trade association of storefront finance companies, referenced above, found that more than 38 percent of the loans were delinquent on the survey date, but the survey did not track whether these loans ultimately cured or were charged-off. Durkin, at 14.

²⁹⁶ World Acceptance Corp., 2015 Annual Report (Form 10-K), at Part II, Item 6. World Acceptance calculated net charge-offs as a percentage of average loan receivables by averaging the month-end gross loan receivables less unearned interest and deferred fees over the time period under consideration. Regional Management lists net charge-offs as a

Reborrowing in this market is relatively common, but finance companies refinance many existing loans before the loan maturity date, in contrast to the payday lending practice of rolling over debt on the loan's due date. The three publicly traded finance companies refinance 50 to 70 percent of all of their installment loans before the loan's due date.²⁹⁷ At least one finance company states it will not "encourage" refinancing if the proceeds from the refinance (cash-out) are less than 10 percent of the refinanced loan amount.²⁹⁸ In the installment context, refinancing refers to the lender extinguishing the existing loan and may include providing additional funds to the borrower, having the effect of allowing the borrower to skip a payment or reducing the total cost of credit relative to the outstanding loan.²⁹⁹ The emerging online installment lenders also offer to refinance loans and some notify borrowers of their refinance options with email notifications and notices when they log in to their accounts.³⁰⁰ Finance companies notify borrowers of refinance options by mail, telephone, text messages, on written payment receipts, and in stores.³⁰¹ State laws and company policies vary with respect to whether various loan

percent of average finance receivables on small installment loans to be in this range. Regional Mgmt. Corp., 2015 Annual Report (Form 10-K), at 26. OneMain Holdings charge-off rate is not included here as it does not separate out direct auto loans from personal loans.

²⁹⁷ World Acceptance Corp. reports that 71.5 percent of its loans, measured by loan volume, were refinances, that the average loan is refinanced at month eight of a 13 month term, and that it used text messages to notify consumers that they may refinance existing loans, World Acceptance Corp., 2015 Annual Report (Form 10-K), at Part I, Item 1 and Part II, Item 7; World Acceptance Corp., 2015 Annual Report at 3, available at http://www.worldacceptance.com/wp-content/uploads/2015/07/2015-ANNUAL-REPORT_6-25-15.compressed.pdf. Regional Management reports that 58.8 percent of 2015 loan originations were renewals. Regional Mgmt. Corp., 2015 Annual Report (Form 10-K), at 15. About half of Springleaf's customers renew their loans. Springleaf Holdings, Inc., *Springleaf ABS Overview, ABS East Conference*, at 21 (Sept. 2015), available at http://files.shareholder.com/downloads/AMDA-28PMI5/456541976x0x850559/08A5B379-9475-4AD4-9037-B6AEC6D3EC6D/SL_2015.09_ABS_East_2015_vF.pdf.

²⁹⁸ World Acceptance Corp., 2015 Annual Report (Form 10-K), at Part II, Item 7.

²⁹⁹ Some installment lenders use the word "renewal" to describe this process, although it means satisfying the prior legal obligation in full rather than paying only the finance charge or a fee as occurs in the payday loan context.

origination and add-on fees must be refunded upon refinancing and prepayment and, if so, the refund methodology used.

Personal Lending by Banks and Credit Unions

Although as discussed above depository institutions over the last several decades have increasingly emphasized credit cards and overdraft services to meet customers short-term credit needs, they remain a major source of installment loans. According to an industry report, in 2015 banks and credit unions originated 3.8 million unsecured installment loans totaling \$22.3 billion to nonprime consumers (defined as near prime, subprime, and deep subprime consumers with VantageScores below 660), with an average loan size of approximately \$5,867.³⁰² As of the end of 2015, there were approximately 6.1 million outstanding bank and credit union unsecured installment loans to these nonprime consumers, with \$41.5 billion in outstanding loan balances.³⁰³ Approximately 29 percent of the number of outstanding bank loans (representing 21 percent of outstanding balances) and 49 percent of the credit union loans (representing 35 percent of balances) were to these nonprime consumers.³⁰⁴

National banks, most State-chartered banks, and State credit unions are permitted under existing Federal law to charge interest on loans at the highest rate allowed by the laws of the State in which the lender is located (lender's home State).³⁰⁵ The bank or State-chartered credit union may then charge the interest rate of its home State on loans it makes to borrowers in other

States without needing to comply with the usury limits of the States in which it makes the loans (borrower's home State). Federal credit unions must not charge more than 18 percent interest rate, with an exception for payday alternative loans described below.³⁰⁶ The laws applicable to Federal credit unions are discussed below.

The Bureau believes that the vast majority of the personal loans made by banks and credit unions have a total cost of credit of 36 percent or less, and thus would not be covered loans under the Bureau's proposal. However, through market outreach the Bureau is also aware that many community banks make small personal loans to existing customers who face liquidity shortfalls, at least on an ad hoc basis at relatively low interest rates but some with an origination fee that would bring the total cost of credit to more than 36 percent. These products are generally offered to existing customers as an accommodation and are not mass marketed.

Two bank trade associations recently surveyed their members about their personal loan programs.³⁰⁷ Although the surveys were small and may not have been representative, both found that banks continue to make personal loans. One survey generated 93 responses with banks ranging in size from \$37 million in assets to \$48.6 billion, with a heavy concentration of community banks (all bank survey).³⁰⁸ The second survey was limited to community banks (community bank survey) and generated 132 responses.³⁰⁹ The surveys, though

asking different questions and not necessarily nationally representative, found:

- *Loan size and duration.* In the community bank survey, 74 percent of the respondents reported that they make loans under \$1,000 for durations longer than 45 days, with an average loan amount of \$872. No average loan term was reported. Ninety-five percent reported making personal loans larger than \$1,000, with an average loan size of under \$4,000. In the all bank survey, 73 percent reported making loans of \$5,000 or less for a term of less than one year, either as an accommodation for existing customers or as an established lending program. Slightly more than half of the respondents reported making more than 50 such loans in 2014.

- *Cost.* In the community bank survey the average of the "typical interest rate" reported by the respondents was 12.1 percent for smaller dollar loans and the average maximum rate for such loans was 16.7 percent. Average interest rates for loans greater than \$1,000 were about 250 basis points lower. At the same time, two-thirds of the banks reported that they also charge loan fees for the smaller loans and 70 percent do so for the larger loans over \$1,000, with fees almost equally divided between application fees and origination fees. For the smaller loans, the median fee when set as a fixed dollar amount was \$50 and the average fee \$61.44 and when set as a percentage of the loan the average was 3 percent; average fees for loans above \$1,000 were slightly higher and average percentage rates slightly lower. The all bank survey did not obtain data at this granular level but 53 percent of the respondents reported that the total cost of credit on at least some loans was above 36 percent.

The community bank survey provided some information about the lending practices of banks that offer small-dollar loans.

- *Underwriting.* While the Bureau's outreach indicates that these loans are often thought of by the banks as "relationship loans" underwritten based on the bank's knowledge of the customer, in the community bank survey 93 percent reported that they also verified major financial obligations and debt and 78 percent reported that they verified income.

The two bank trade association surveys also provided information relative to repeat use and losses.

- *Rollovers.* In the community bank survey 52 percent of respondents reported that they do not permit

³⁰² Experian & Oliver Wyman, *2015 Q4 Market Intelligence Report: Personal Loans Report*, at 11-13 figs. 9, 10, 12, & 13; Experian & Oliver Wyman, *2015 Q3 Market Intelligence Report: Personal Loans Report*, at 11-13 figs. 9, 10, 12 & 13, *2015 Q2 Market Intelligence Report: Personal Loans Report*, at 11-13 figs. 9, 10, 12, & 13; Experian & Oliver Wyman, *2015 Q1 Market Intelligence Report: Personal Loans Report*, at 11-13 figs. 9, 10, 12, 13.

Ware, Executive Vice President, Independent Cmty. Bankers of America, to David

Silberman, Associate Director, Consumer Financial Protection Bureau (Nov. 3, 2015) (on file).

rollovers and 26 percent reported that they allow only a single rollover. Repayment methods vary and include manual payments as well as automated payments. Financial institutions that make loans to account holders retain the contractual right to set off payments due from existing accounts in the event of nonpayment.

- *Charge-offs.* Both bank surveys reported low charge-off rates: in the community bank survey the average net charge-off rate for loans under \$1,000 was 1 percent and for larger loans was less than 1 percent (.86 percent). In the all bank survey, 34 percent reported no charge-offs and 61 percent reported charge-offs of 3 percent or less.

There is little data available on the demographic characteristics of borrowers who take liquidity loans from banks. The Bureau's market monitoring indicates that a number of banks offering these loans are located in small towns and rural areas. Further, market outreach with bank trade associations indicates that it is not uncommon for borrowers to be in non-traditional employment and have seasonal or variable income.

As noted above, Federal credit unions may not charge more than 18 percent interest. However, as described below, they are authorized to make some small-dollar loans at rates up to 28 percent interest plus an applicable fee.

Through market monitoring and outreach, the Bureau is aware that a significant number of credit unions, both Federal and State chartered, offer liquidity loans to their members, at least on an accommodation basis. As with banks, these are small programs and may not be widely advertised. The credit unions generally engage in some sort of underwriting for these loans, including verifying borrower income and its sufficiency to cover loan payments, reviewing past borrowing history with the institution, and verifying major financial obligations. Many credit unions report these loans to a consumer reporting agency. On a hypothetical \$500, 6-month loan, many credit unions would charge a 36 percent or less total cost of credit.

Some Federal credit unions offer small-dollar loans aimed at consumers with payday loan debt to pay off these loans at interest rates of 18 percent or less with application fees of \$50 or less.³¹⁰ Other Federal credit unions (and

State credit unions) offer installment vehicle title loans with APRs below 36 percent.³¹¹ The total cost of credit, when application fees are included, may range from approximately 36 to 70 percent on a small loan of about \$500, depending on the loan term.

Federal credit unions are also authorized to offer "payday alternative loans." In 2010, the NCUA adopted an exception to the interest rate limit under the Federal Credit Union Act that permitted Federal credit unions to make payday alternative loans at an interest rate of up to 28 percent plus an application fee, "that reflects the actual costs associated with processing the application" up to \$20.³¹² PALs may be made in amounts of \$200 to \$1,000 to borrowers who have been members of the credit union for at least one month. PAL terms range from one to six months, may not be rolled over, and borrowers are limited one PAL at a time and no more than three PALs from the same credit union in a rolling six-month period. PALs must fully amortize and the credit union must establish underwriting guidelines such as verifying employment by requiring at least two pay stubs.³¹³

In 2015, over 700 Federal credit unions (nearly 20 percent of all Federal credit unions) offered PALs, with originations at \$123.3 million, representing a 7.2 percent increase from 2014.³¹⁴ In 2014, the average PAL amount was about \$678 and carried a median interest rate of 25 percent.³¹⁵ The NCUA estimated that, based on the median PAL interest rate and loan size for 2013, the APR calculated by including all fees (total cost of credit) for a 30-day PAL was approximately 63 percent.³¹⁶ However, the Bureau

of \$500 or less at an 18 percent APR with a \$50 application fee to be repaid over four months. Payment includes a \$20 deposit into a savings account. *Personal Loans*, MariSol Federal Credit Union, https://marisolcu.org/loans_personal.html (last visited Apr. 29, 2016); *Consumer Loan Rates*, MariSol Federal; Credit Union, https://marisolcu.org/rates_loan_view.html (last visited Apr. 29, 2016).

³¹² 12 CFR 701.21(c)(7)(iii). Application fees charged to all applicants for credit are not part of the finance charge that must be disclosed under Regulation Z, 12 CFR 1026.4(c).

³¹³ 12 CFR 701.21(c)(7)(iii).

³¹⁴ Nat'l Credit Union Admin., *Dec. 2015 FCU 5300 Call Report Aggregate Financial Performance Reports (FPRs)*, available at <https://www.ncua.gov/analysis/Pages/call-report-data/aggregate-financial-performance-reports.aspx>.

³¹⁵ NCUA estimates based on public Call Report data, available at <https://www.ncua.gov/analysis/Pages/call-report-data.aspx>.

³¹⁶ Based on a PAL of \$630 for 30 days at a rate of 24.6 percent with a \$20 application fee, the 2014

believes based on market outreach that the average PAL term is about 100 days, resulting in a total cost of credit of approximately 43 percent.³¹⁷ Based on NCUA calculations, during 2014, annualized PAL charge-offs net of recoveries, as a percent of average PAL balances outstanding, were 7.5 percent.³¹⁸

D. Initiating Payment from Consumers' Accounts

As discussed above, payday and payday installment lenders nearly universally obtain at origination one or more authorizations to initiate withdrawal of payment from the consumer's account. There are a variety of payment options or channels that they use to accomplish this goal, and lenders frequently obtain authorizations for multiple types. Different payment channels are subject to different laws and, in some cases, private network rules, leaving lenders with broad control over the parameters of how a particular payment will be pulled from a consumer's account, including the date, amount, and payment method.

Obtaining Payment Authorization

A variety of payment methods enable lenders to use a previously-obtained authorization to initiate a withdrawal from a consumer's account without further action from the consumer. These methods include paper signature checks, remotely created checks (RCCs) and remotely created payment orders (RCPOs),³¹⁹ and electronic payments like ACH³²⁰ and debit and prepaid card

terms provided in NCUA's comment letter to the Department of Defense. Letter from Debbie Matz, Chairman, NCUA, to Aaron Siegel, Alternate OSD Federal Register Liaison Officer, Dep't of Defense, at 5 (Dec. 16, 2014) [hereinafter NCUA Letter to Department of Defense (Dec. 16, 2014)] (re: Limitations on Terms of Consumer Credit Extended to Service Members and Dependents; Docket DOD-2013-OS-0133, RIN 0790-AJ10), available at <https://www.regulations.gov/#!documentDetail;D=DOD-2013-OS-0133-0171>.

³¹⁷ Bureau staff calculations based on an average PAL of \$678, the 2014 average amount, at a 25 percent interest rate with a \$20 application fee (figures based on NCUA calculations from call report data, as noted above), due in 3 months with 3 monthly payments.

³¹⁸ NCUA estimates based on public Call Report data, available at <https://www.ncua.gov/analysis/Pages/call-report-data.aspx>.

³¹⁹ A remotely created check or remotely created payment order is a type of check that is created by the payee—in this case, it would be created by the lender—and processed through the check clearing system. Given that the check is created by the lender, it does not bear the consumer's signature. See Regulation CC, 12 CFR 229.2(fff) (defining remotely created check); Telemarketing Sales Rule, 16 CFR 310(cc) (defining "remotely created payment order" as a payment instrument that includes remotely created checks).

³²⁰ In order to initiate an ACH payment from a consumer's account, a lender must send a request

³¹⁰ See, for example, Nix Lending's Payday Payoff Loan offered through Kinecta Federal Credit Union at an 18 percent APR plus a \$49.95 application fee. *Payday Payoff® Loan*, Nix Neighborhood Lending, <http://nixlending.com/en/personal-loans/detail/payday-payoff-loan> (last visited March 9, 2016). MariSol Federal Credit Union offers a Quick Loan

transactions. Payday and payday installment lenders—both online and in storefronts—typically obtain a post-dated check or electronic payment authorization from consumers for repayments of loans.³²¹ For storefront payday loans, lenders typically obtain a post-dated check (or, where payday installment products are authorized, a series of postdated checks) that they can use to initiate a check or ACH transaction from a consumer's account.³²² For an online loan, a consumer often provides bank account information to receive the loan funds, and the lender often uses that bank account information to obtain payment from the consumer.³²³ This account

(also known as an “entry”) through an originating depository financial institution (ODFI). An ODFI is a bank or other financial institution that the lender or the lender's payment processor has a relationship with. ODFIs aggregate and submit batches of entries for all of their originators to an ACH operator. The ACH operators sort the ACH entries and send them to the receiving depository financial institutions (RDFI) that hold the individual consumer accounts. The RDFI then decides whether to debit the consumer's account or to send it back unpaid. ACH debit transactions generally clear and settle in one business day after the payment is initiated by the lender. The private operating rules for the ACH network are administered by the National Automated Clearinghouse Association (NACHA), an industry trade organization.

³²¹ See, e.g., QC Holdings, Inc., 2014 Annual Report (Form 10-K), at 6 (Mar. 12, 2015), available at <https://www.sec.gov/Archives/edgar/data/1289505/000119312515088809/d854360d10k.htm> (“Upon completion of a loan application, the customer signs a promissory note with a maturity of generally two to three weeks. The loan is collateralized by a check (for the principal amount of the loan plus a specified fee), ACH authorization or a debit card.”); see also Advance America, 2011 Annual Report (Form 10-K) at 45 (Mar. 15, 2012), available at <https://www.sec.gov/Archives/edgar/data/1299704/000104746912002758/a2208026z10-k.htm> (“After the required documents presented by the customer have been reviewed for completeness and accuracy, copied for record-keeping purposes, and the cash advance has been approved, the customer enters into an agreement governing the terms of the cash advance. The customer then provides a personal check or an Automated Clearing House (“ACH”) authorization, which enables electronic payment from the customer's account, to cover the amount of the cash advance and charges for applicable fees and interest of the balance due under the agreement.”); ENOVA Int'l, Inc., 2014 Annual Report (Form 10-K), at 6 (Mar. 20, 2015), available at https://www.sec.gov/Archives/edgar/data/1529864/000156459015001871/enva-10k_20141231.htm (“When a customer takes out a new loan, loan proceeds are promptly deposited in the customer's bank account or onto a debit card in exchange for a preauthorized debit for repayment of the loan from the customer's account.”).

³²³ See, e.g., *Frequently Asked Questions (FAQs)*, Great Plains Lending d/b/a Cash Advance Now, <https://www.cashadvancenow.com/FAQ.aspx> (last visited May 16, 2016) (“If we extend credit to a consumer, we will consider the bank account information provided by the consumer as eligible for us to process payments against. In addition, as part of our information collection process, we may detect additional bank accounts under the

information can be used to initiate an ACH payment from a consumer's account. Typically, online lenders require consumers to authorize payments from their account as part of their agreement to receive the loan proceeds electronically.³²⁴ Some traditional installment lenders also obtain an electronic payment authorization from their customers.

Payday and payday installment lenders often take authorization for multiple payment methods, such as taking a post-dated check along with the consumer's debit card information.³²⁵ Consumers usually provide the payment authorization as part of the loan origination process.³²⁶

For storefront payday loans, providing a post-dated check is typically a requirement to obtain a loan. Under the Electronic Fund Transfer Act (EFTA) lenders cannot condition credit on obtaining an authorization from the consumer for “preauthorized” (recurring) electronic fund transfers,³²⁷ but in practice online payday and payday installment lenders are able to obtain such authorizations from

ownership of the consumer. We will consider these additional accounts to be part of the application process.”).

³²⁴ See, e.g., One Click Cash and US Fast Cash, Authorization to Initiate ACH Debit and Credit Entries, Ex. 1 at 38, 55, *Labajo v. First International Bank & Trust*, No. 14-00627 (C.D. Cal. May 23, 2014), ECF No. 26-3.

³²⁵ See, e.g., Castle Payday Loan Agreement, Ex. A, *Parm v. BMO Harris Bank, N.A.*, No. 13-03326 (N.D. Ga. Dec. 23, 2013), ECF No. 60-1 (“You may revoke this authorization by contacting us in writing at ach@castlepayday.com or by phone at 1-888-945-2727. You must contact us at least three (3) business days prior to when you wish the authorization to terminate. If you revoke your authorization, you authorize us to make your payments by remotely-created checks as set forth below.”); Plain Green Loan Agreement, Ex. 5, *Booth v. BMO Harris Bank, N.A.*, No. 13-5968 (E.D. Pa. Dec. 13, 2013), ECF No. 41-8 (stating that in the event that the consumer terminates an ACH authorization, the lender would be authorized to initiate payment by remotely created check); Sandpoint Capital Loan Agreement, Ex. A, *Labajo*, No. 14-627 (May 23, 2014), ECF 25-1 (taking ACH and remotely created check authorization).

³²⁶ See, e.g., Advance America, 2011 Annual Report (Form 10-K), at 10. (“To obtain a cash advance, a customer typically . . . enters into an agreement governing the terms of the cash advance, including the customer's agreement to repay the amount advanced in full on or before a specified due date (usually the customer's next payday), and our agreement to defer the presentment or deposit of the customer's check or ACH authorization until the due date.”).

³²⁷ EFTA and its implementing regulation, Regulation E, prohibit the conditioning of credit on an authorization for a preauthorized recurring electronic fund transfer. See 12 CFR 1005.10(e)(1) (“No financial institution or other person may condition an extension of credit to a consumer on the consumer's repayment by preauthorized electronic fund transfers, except for credit extended under an overdraft credit plan or extended to maintain a specified minimum balance in the consumer's account.”).

consumers for almost all loans. The EFTA provision concerning compulsory use does not apply to paper checks and one-time electronic fund transfers. Moreover, even for loans subject to the EFTA compulsory use provision, lenders use various methods to obtain electronic authorizations. For example, although some payday and payday installment lenders provide consumers with alternative methods to repay loans, these options may be burdensome and may significantly change the terms of the loan. For example, one lender increases its APR by an additional 61 percent or 260 percent, depending on the length of the loan, if a consumer elects a cash-only payment option for its installment loan product, resulting in a total APR of 462 percent (210 day loan) to 780 percent (140 day loan).³²⁸ Other lenders change the origination process if consumers do not immediately provide account access. For example, some online payday lenders require prospective customers to contact them by phone if they do not want to provide a payment authorization and wish to pay by money order or check at a later time. Other lenders delay the disbursement of the loan proceeds if the consumer does not immediately provide a payment authorization.³²⁹

Banks and credit unions have additional payment channel options when they lend to consumers who have a deposit account at the same institution. As a condition of certain types of loans, many financial institutions require consumers to have a deposit account at that same institution.³³⁰ The loan contract often authorizes the financial institution to pull payment directly from the consumer's account. Since these payments can be processed through an internal transfer within the bank or credit union, these institutions do not typically use external payment channels

³³⁰ See, e.g., Fifth Third Bank, *Early Access Terms & Conditions, Important Changes to Fifth Third Early Access Terms & Conditions*, at 3 (last visited May 17, 2016), available at <https://www.53.com/doc/pe/pe-eax-tc.pdf> (providing eligibility requirements including that the consumer “must have a Fifth Third Bank checking deposit account that has been open for the past 90 (ninety) days and is in good standing”).

to complete an internal payment transfer.

Exercising Payment Authorizations

For different types of loans that would be covered under the proposed rule, lenders use their authorizations to collect payment differently. As discussed above, most storefront lenders encourage or require consumers to return to their stores to pay in cash, roll over, or otherwise renew their loans. The lender often will deposit a post-dated check or initiate an electronic fund transfer only where the lender considers the consumer to be in “default” under the contract or where the consumer has not responded to the lender’s communications.³³¹ Bureau examiners have cited one or more payday lenders for threatening to initiate payments from consumer accounts that were contrary to the agreement, and that the lenders did not intend to initiate.³³²

In contrast, online lenders typically use the authorization to collect all payments, not just those initiated after there has been some indication of distress from the consumer. Moreover, as discussed above, online lenders offering “hybrid” payday loan products structure them so that the lender is authorized to collect a series of interest-only payments—the functional equivalent of paying finance charges to roll over the loan—before full payment or amortizing payments are due.³³³ The Bureau also is aware that some online lenders, although structuring their product as nominally a two-week loan, automatically roll over the loan every two weeks unless the consumer takes affirmative action to make full payment.³³⁴ The payments processed in

such cases are for the cost of the rollover rather than the full balance due.

As a result of these distinctions, storefront and online lenders have different success rates in exercising such payment authorizations. Some large storefront lenders report that they initiate payment attempts in less than 10 percent of cases, and that 60 to 80 percent of those attempts are returned for non-sufficient funds.³³⁵ Bureau analysis of ACH payments by online payday and payday installment lenders, which typically collect all payments by initiating a transfer from consumers’ accounts, indicates that for any given payment only about 6 percent fail on the first try. However, over an eighteen-month observation period, 50% of online borrowers were found to experience at least one payment attempt that failed or caused an overdraft and over-third of the borrowers experienced more than one such incident.

Lenders typically charge fees for these returned payments, sometimes charging both a returned payment fee and a late fee.³³⁶ These fees are in addition to fees, such as NSF fees, that may be charged by the financial institution that holds the consumer’s account.

The Bureau found that if an electronic payment attempt failed, online lenders try again three-quarters of the time. However, after an initial failure the lender’s likelihood of failure jumps to 70 percent for the second attempt and 73 percent for the third. Of those that succeed, roughly a third result in an overdraft.

³³⁵ One major lender with a predominantly storefront loan portfolio, QC Holdings, notes that in 2014, 91.5 percent of its payday and installment loans were repaid or renewed in cash. QC Holdings 2014 Annual Report (Form 10-K), at 7. For the remaining 8.5 percent of loans for which QC Holdings initiated a payment attempt, 78.5 percent were returned due to non-sufficient funds. *Id.* Advance America, which offers mostly storefront payday and installment loans, initiated check or ACH payments on approximately 6.7 and 6.5 percent, respectively, of its loans in 2011; approximately 63 and 64 percent, respectively, of those attempts failed. Advance America 2011 Annual Report (Form 10-K), at 27.

³³⁶ See, Advance America 2011 Annual Report (Form 10-K), at 8 (“We may charge and collect fees for returned checks, late fees, and other fees as permitted by applicable law. Fees for returned checks or electronic debits that are declined for non-sufficient funds (NSF) vary by State and range up to \$30, and late fees vary by State and range up to \$50. For each of the years ended December 31, 2011 and 2010, total NSF fees collected were approximately \$2.9 million and total late fees collected were approximately \$1 million and \$0.9 million, respectively.”); *Frequently Asked Questions, Mypaydayloan.com*, <https://www.mypaydayloan.com/faq#loancost> (last visited May 17, 2016) (“If your payment is returned due to NSF (or Account Frozen or Account Closed), our collections department will contact you to arrange a second attempt to debit the payment. A return item fee of \$25 and a late fee of \$50 will also be collected with the next debit.”).

Both storefront and online lenders also frequently change the ways in which they attempt to exercise authorizations after one attempt has failed. For example, many typically make additional attempts to collect initial payment due.³³⁷ Some lenders attempt to collect the entire payment amount once or twice within a few weeks of the initial failure. The Bureau, however, is aware of online and storefront lenders that use more aggressive and unpredictable payment collection practices, including breaking payments into multiple smaller payments and attempting to collect payment multiple times in one day or over a short period of time.³³⁸ The cost to lenders to repeatedly attempt payment depends on their contracts with payment processors and commercial banks, but is generally nominal; the Bureau estimates the cost is in a range of 5 to 15 cents for an ACH transaction.³³⁹ These practices are discussed in more detail in Market Concerns—Payments.

As noted above, banks and credit unions that lend to their account holders can use their internal system to transfer funds from the consumer accounts and do not need to utilize the payment networks. Deposit advance products and their payment structures are discussed further in part II B. The Bureau believes that many small dollar loans with depository institutions are paid through internal transfers.

Due to the fact that lenders obtain authorizations to use multiple payment

³³⁷ See *CFPB Supervisory Highlights*, at 20 (Spring 2014) (“Upon a borrower’s default, payday lenders frequently will initiate one or more preauthorized ACH transactions pursuant to the loan agreement for repayment from the borrower’s checking account.”); First Cash Fin. Servs., Inc. 2014 Annual Report (Form 10-K) at 5 (Feb. 12, 2015) (“Banks return a significant number of ACH transactions and customer checks deposited into the Independent Lender’s account due to insufficient funds in the customers’ accounts The Company subsequently collects a large percentage of these bad debts by redepositing the customers’ checks, ACH collections or receiving subsequent cash repayments by the customers.”); *Frequently Asked Questions*, Advance America, <https://www.onlineapplyadvance.com/faq> (last visited May 17, 2016) (“Once we present your bank with your ACH authorization for payment, your bank will send the specified amount to CashNetUSA. If the payment is returned because of insufficient funds, CashNetUSA can and will represent the ACH Authorization to your bank.”).

³³⁸ See, e.g., *CFPB Online Payday Loan Payments*.

³³⁹ The Bureau reviewed publicly available litigation documents and fee schedules posted online by originating depository institutions to compile these estimates. However, because of the limited availability of private contracts and variability of commercial bank fees, these estimates are tentative. Originators typically also pay their commercial bank or payment processor fees for returned ACH and check payments. These fees appear to range widely, from 5 cents to several dollars.

³³¹ Payday and payday installment lenders may contact consumers a few days before the payment is due to remind them of their upcoming payment. This is a common practice, with many lenders calling the consumer 1 to 3 days before the payment is due, and some providing reminders through text or email.

³³² Bureau of Consumer Fin. Prot., *Supervisory Highlights*, at 20 (Spring 2014), available at http://files.consumerfinance.gov/f/201405_cfpb_supervisory-highlights-spring-2014.pdf.

³³³ See, e.g., Integrity Advance Loan Agreement, CFPB Notice of Charges Against Integrity Advance, LLC, CFPB No. 2015-CFPB-0029, at 5 (Nov. 18, 2015), available at http://files.consumerfinance.gov/f/201511_cfpb_notice-of-charges-integrity-advance-llc-james-r-carnes.pdf (providing lender contract for loan beginning with four automatic interest-only rollover payments before converting to a series of amortizing payments).

³³⁴ See, e.g., Cash Jar Loan Agreement, Exhibit A, *Riley v. BMO Harris Bank, N.A.*, No. 13-1677 (D.D.C. Jan. 10, 2014), ECF No. 33-2 (interpreting silence from consumer before the payment due date as a request for a loan extension; contract was for a 14 day single payment loan, loan amount financed was \$700 for a total payment due of \$875).

channels and benefit from flexibility in the underlying payment systems, lenders generally enjoy broad discretion over the parameters of how a particular payment will be pulled from a consumer's account, including the date, amount, and payment method. For example, although a check specifies a date, lenders may not present the check on that date. Under UCC Section 4-401, merchants can present checks for payment even if the check specifies a later date.³⁴⁰ Lenders sometimes attempt to collect payment on a different date from the one stated on a check or original authorization. They may shift the attempt date in order to maximize the likelihood that funds will be in the account; some use their own models to determine when to collect, while others use predictive payment products provided by third parties that estimate when funds are most likely to be in the account.³⁴¹

Moreover, the checks provided by consumers during origination often are not processed as checks. Rather than sending these payments through the check clearing network, lenders often process these payments through the ACH network. They are able to use the consumer account number and routing number on a check to initiate an ACH transaction. When lenders use the ACH network in a first attempt to collect payment, the lender has used the check as a source document and the payment is considered an electronic fund transfer under EFTA and Regulation E,³⁴² which generally provide additional consumer protections—such as error resolution rights—beyond those applicable to checks. However, if a transaction is initially processed through the check system and then processed through the ACH network because the first attempt failed for insufficient funds, the

subsequent ACH attempt is *not* considered an electronic fund transfer under current Regulation E.³⁴³ Similarly, consumers may provide their account and routing number to lenders for the purposes of an ACH payment, but the lender may use that information to initiate a remotely created check that is processed through the check system and thus may not receive Regulation E protections.³⁴⁴

Payment System Regulation and Private Network Requirements

Different payment mechanisms are subject to different laws and, in some cases, private network rules that affect how lenders can exercise their rights to initiate withdrawals from consumers' accounts and how consumers may attempt to limit or stop certain withdrawal activity after granting an initial authorization. Because ACH payments and post-dated checks are the most common authorization mechanisms used by payday and payday installment lenders, this section briefly outlines applicable Federal laws and National Automated Clearinghouse Association (NACHA) rules concerning stop payment rights, prohibitions on unauthorized payments, notices where payment amounts vary, and rules governing failed withdrawal attempts.

NACHA recently adopted several changes to the ACH network rules in response to complaints about problematic behavior by payday and payday installment lenders, including a rule that allows it to more closely scrutinize originators who have a high rate of returned payments.³⁴⁵ Issues

around monitoring and enforcing those rules and their application to problems in the market for covered loans are discussed in more detail in Market Concerns—Payments.

Stop payment rights. For preauthorized (recurring) electronic fund transfers,³⁴⁶ EFTA grants consumers a right to stop payment by issuing a stop payment order through their depository institution.³⁴⁷ The NACHA private rules adopt this EFTA provision along with additional stop payment rights. In contrast to EFTA, NACHA provides consumers with a stop payment right for both one-time and preauthorized transfers.³⁴⁸ Specifically, for recurring transfers, NACHA Rules require financial institutions to honor a stop payment order as long as the consumer notifies the bank at least 3 banking days before the scheduled debit.³⁴⁹ For one-time transfers, NACHA Rules require financial institutions to honor the stop payment order as long as the notification provides them with a "reasonable opportunity to act upon the order."³⁵⁰ Consumers may notify the bank or credit union verbally or in writing, but if the consumer does not provide written confirmation the oral stop payment order may not be binding beyond 14 days. If a consumer wishes to stop all future payments from an originator, NACHA Rules allow a bank or credit union to require the consumer to confirm in writing that she has revoked authorization from the originator.

Checks are also subject to a stop payment right under the Uniform Commercial Code (UCC).³⁵¹ Consumers have a right to stop-payment on any check by providing the bank with oral (valid for 14 days) or written (valid for 6 months) notice. To be effective, the stop payment must describe the check "with reasonable certainty" and give the

businesses, such as online payday lenders, in using the ACH Network to debit consumers' accounts.").

³⁴⁶ A preauthorized transfer is "an electronic fund transfer authorized in advance to recur at substantially regular intervals." EFTA, 15 U.S.C. 1693a(10); Regulation E, 12 CFR 1005.2(k).

³⁴⁷ "A consumer may stop payment of a preauthorized electronic fund transfer by notifying the financial institution orally or in writing at any time up to three business days preceding the scheduled date of such transfer." EFTA, 15 U.S.C. 1693e(a); Regulation E, 12 CFR 1005.10(c).

³⁴⁸ See NACHA Rule 3.7.1.2, RDFI Obligation to Stop Payment of Single Entries ("An RDFI must honor a stop payment order provided by a Receiver, either verbally or in writing, to the RDFI at such time and in such manner as to allow the RDFI a reasonable opportunity to act upon the order prior to acting on an ARC, BOC, POP, or RCK Entry, or a Single Entry IAT, PPD, TEL, or WEB Entry to a Consumer Account.").

³⁴⁹ NACHA Rule 3.7.1.1.

³⁵⁰ NACHA Rule 3.7.1.2.

³⁵¹ U.C.C. 4-403.

³⁴⁰ UCC Section 4-401(c) ("A bank may charge against the account of a customer a check that is otherwise properly payable from the account, even though payment was made before the date of the check, unless the customer has given notice to the bank of the postdating describing the check with reasonable certainty.").

³⁴¹ See, e.g., Press Release, Clarity Servs., Inc., *ACH Presentation Will Help Lenders Reduce Failed ACH Pulls* (Aug. 1, 2013), <https://www.clarityservices.com/clear-warning-ach-presentation-will-help-lenders-reduce-failed-ach-pulls/>; *Service Offerings*, FactorTrust, <http://ws.factortrust.com/products/> (last visited May 4, 2016); *Bank Account Verify*, Microbilt, <http://www.microbilt.com/bank-account-verification.aspx> (last visited May 4, 2016); *Sufficient Funds Assurance*, DataX Lending Intelligence, <http://www.dataxld.com/ancillary-services/successful-collections/> (last visited May 4, 2016).

³⁴² 12 CFR 1005.3(b)(2)(i) ("This part applies where a check, draft, or similar paper instrument is used as a source of information to initiate a one-time electronic fund transfer from a consumer's account. The consumer must authorize the transfer.").

³⁴³ Supplement I, Official Staff Interpretations, 12 CFR 1005.3(c)(1) ("The electronic re-presentation of a returned check is not covered by Regulation E because the transaction originated by check.").

³⁴⁴ Remotely created checks are particularly risky for consumers because they have been considered to fall outside of protections for electronic fund transfers under Regulation E. Also, unlike signature paper checks, they are created by the entity seeking payment (in this case, the lender)—making such payments particularly difficult to track and reverse in cases of error or fraud. Due to concerns about remotely created checks and remotely created payment orders, the FTC recently banned the use of these payment methods by telemarketers. See FTC Final Amendments to Telemarketing Sales Rule, 80 FR 77520 (Dec. 14, 2015).

³⁴⁵ See *ACH Network Risk and Enforcement Topics*, NACHA (Jan. 1, 2015), <https://www.nacha.org/rules/ach-network-risk-and-enforcement-topics-january-1-2015> (providing an overview of changes to the NACHA Rules); *Operations Bulletin*, NACHA, *ACH Operations Bulletin #1-2014: Questionable ACH Debit Origination: Roles and Responsibilities of ODFIs and RDFIs* (Sept. 30, 2014), <https://www.nacha.org/news/ach-operations-bulletin-1-2014-questionable-ach-debit-origination-roles-and-responsibilities> ("During 2013, the ACH Network and its financial institution participants came under scrutiny as a result of the origination practices of certain

bank enough information to find the check under the technology then existing.³⁵² The stop payment also must be given at a time that affords the bank a reasonable opportunity to act on the stop payment before it becomes liable for the check under U.C.C. 4-303.

Although EFTA, the UCC, and NACHA Rules provide consumers with stop payment rights, financial institutions typically charge a fee of approximately \$32 for consumers to exercise those rights.³⁵³ Further, both lenders and financial institutions often impose a variety of requirements that make the process for stopping payments confusing and burdensome for consumers. See discussion in Market Concerns—Payments.

Protection from unauthorized payments. Regulation E and NACHA Rules both provide protections with respect to payments by a consumer's financial institution if the electronic transfer is unauthorized.³⁵⁴ Payments originally authorized by the consumer can become unauthorized under EFTA if the consumer notifies his or her financial institution that the originator's authorization has been revoked.³⁵⁵ NACHA has a specific threshold for unauthorized returns, which involve transactions that originally collected funds from a consumer's account but that the consumer is disputing as unauthorized. Under NACHA Rules, originators are required to operate with an unauthorized return rate below 0.5 percent or they risk fines and loss of access to the ACH network.³⁵⁶

Notice of variable amounts. Regulation E and the NACHA Rules both provide that if the debit amount for a preauthorized transfer changes from the previous transfer or from the preauthorized amount, consumers must

receive a notice 10 calendar days prior to the debit.³⁵⁷ However, both of these rules have an exception from this requirement if consumers have agreed to a range of debit amounts and the payment does not fall outside that range.³⁵⁸

Based on outreach and market research, the Bureau does not believe that most payday and payday installment lenders making loans that would be covered under the proposed rule are providing a notice of transfers varying in amount. However, the Bureau is aware that many of these lenders take authorizations for a range of amounts. As a result, lenders use these broad authorizations rather than fall under the Regulation E requirement to send a notice of transfers varying in amount even when collecting for an irregular amount (for example, by adding fees or a past due amount to a regularly-scheduled payment). Some of these contracts provide that the consumer is authorizing the lender to initiate payment for any amount up to the full amount due on the loan.³⁵⁹

Reinitiation Cap. After a payment attempt has failed, NACHA Rules allow an originator—in this case, the lender that is trying to collect payment—to attempt to collect that same payment no more than two additional times through the ACH network.³⁶⁰ NACHA Rules also

³⁵⁷ 12 CFR 1005.10(d)(1) (“When a preauthorized electronic fund transfer from the consumer's account will vary in amount from the previous transfer under the same authorization or from the preauthorized amount, the designated payee or the financial institution shall send the consumer written notice of the amount and date of the transfer at least 10 days before the scheduled date of transfer.”); NACHA Rule 2.3.2.6(a).

³⁵⁸ 12 CFR 1005.10(d)(2) (“The designated payee or the institution shall inform the consumer of the right to receive notice of all varying transfers, but may give the consumer the option of receiving notice only when a transfer falls outside a specified range of amounts or only when a transfer differs from the most recent transfer by more than an agreed-upon amount.”); NACHA Rule 2.3.2.6(b).

³⁵⁹ For example, a 2013 One Click Cash Loan Contract states:

The range of ACH debit entries will be from the amount applied to finance charge for the payment due on the payment date as detailed in the repayment schedule in your loan agreement to an amount equal to the entire balance due and payable if you default on your loan agreement, plus a return item fee you may owe as explained in your loan agreement. You further authorize us to vary the amount of any ACH debit entry we may initiate to your account as needed to pay the payment due on the payment date as detailed in the repayment schedule in your loan agreement as modified by any prepayment arrangements you may make, any modifications you and we agree to regarding your loan agreement, or to pay any return item fee you may owe as explained in your loan agreement.

Ex. 1 at 38, *Labajo v. First International Bank & Trust*, No. 14-00627 (C.D. Cal. May 23, 2014), ECF No. 26-3 (SFS Inc, dba One Click Cash, Authorization to Initiate ACH Debit and Credit Entries).

³⁶⁰ NACHA Rule 2.12.4.

require the ACH files³⁶¹ for the two additional attempts to be labeled as “reinitiated” transactions. Because the rule applies on a per-payment basis, for lenders with recurring payment authorizations, the count resets to zero when the next scheduled payment comes due.

III. Research, Outreach, and Consumer Testing

A. Research and Stakeholder Outreach

The Bureau has undertaken extensive research and conducted broad outreach with a multitude of stakeholders in the years leading up to the release of this Notice of Proposed Rulemaking. All of the input and feedback the Bureau received from this outreach has assisted the Bureau in the development of this notice.

That process began in January 2012 when the Bureau held its first public field hearing in Birmingham, Alabama, focused on small dollar lending. At the field hearing, the Bureau heard testimony and received input from consumers, civil rights groups, consumer advocates, religious leaders, industry and trade association representatives, academics, and elected representatives and other governmental officials about consumers' experiences with small dollar loan products. The Bureau transcribed that field hearing and posted the transcript on its Web site.³⁶² Concurrently with doing this, the Bureau placed a notice in the **Federal Register** inviting public comment on the issues discussed in the field hearing.³⁶³ The Bureau received 664 public comments in response to that request.

At the Birmingham field hearing, the Bureau announced the launch of a program to conduct supervisory examinations of payday lenders pursuant to the Bureau's authority under Dodd-Frank Act section 1024. As part of the initial set of supervisory exams, the Bureau obtained loan-level records from a number of large payday lenders.

In April 2013 and March 2014, the Bureau issued two research publications reporting on findings by Bureau staff

³⁶¹ ACH transactions are transferred in a standardized electronic file format between financial institutions and ACH network operators. These files contain information about the payment itself along with routing information for the applicable consumer account, originator (or in this case, the lender) account, and financial institution.

³⁶² Bureau of Consumer Fin. Prot., *In the Matter of: A Field Hearing on Payday Lending*, Hearing Transcript, Jan. 19, 2012, available at http://files.consumerfinance.gov/f/201201_cfpb_transcript_payday-lending-field-hearing-alabama.pdf.

³⁶³ 77 FR 16817 (March 22, 2012).

³⁵² U.C.C. 4-403 cmt. 5.

³⁵³ Median stop payment fee for an individual stop payment order charged by the 50 largest financial institutions in 2015 based on information in the Informa Research Database. Informa Research Services, Inc. (Mar. 2016), www.informars.com. Although information has been obtained from the various financial institutions, the accuracy cannot be guaranteed.

³⁵⁴ NACHA Rule 2.3.1, General Rule, Originator Must Obtain Authorization from Receiver.

³⁵⁵ Electronic Fund Transfer Act, 15 U.S.C. 1693a(12) (“The term “unauthorized electronic fund transfer” means an electronic fund transfer from a consumer's account initiated by a person other than the consumer without actual authority to initiate such transfer and from which the consumer receives no benefit, but the term does not include any electronic fund transfer (A) initiated by a person other than the consumer who was furnished with the card, code, or other means of access to such consumer's account by such consumer, unless the consumer has notified the financial institution involved that transfers by such other person are no longer authorized. . . .”). Regulation E implements this provision at 12 CFR 1005.2(m).

³⁵⁶ NACHA Rule 2.17.2.

using the supervisory data. In conjunction with the second of these reports, the Bureau held a field hearing in Nashville, Tennessee, to gather further input from consumers, providers, and advocates alike. While the Bureau was working on these reports and in the period following their release, the Bureau held numerous meetings with stakeholders on small dollar lending in general and to hear their views on potential policy approaches.

The Bureau has conducted extensive outreach to industry, including national trade associations and member businesses, to gain knowledge of small dollar lending operations, underwriting processes, State laws, and the anticipated regulatory impact of the approaches proposed in the Small Business Review Panel Outline. Industry meetings have included non-depository lenders of different sizes, publicly traded and privately held, that offer single-payment payday loans through storefronts and online, multi-payment payday loans, vehicle title loans, open-end credit, and installment loans. The Bureau's outreach with depository lenders has likewise been extensive and included meetings with retail banks, community banks, and credit unions of varying sizes, both Federally and State-chartered. In addition, the Bureau has held extensive outreach on multiple occasions with the trade associations that represent these lenders. The Bureau's outreach also extended to specialty consumer reporting agencies utilized by some of these lenders. On other occasions, Bureau staff met to hear recommendations on responsible lending practices from a voluntarily-organized roundtable made up of lenders, advocates, and representatives of a specialty consumer reporting agency and a research organization.

As part of the process under the Small Business Regulatory Enforcement and Fairness Act (SBREFA process), which is discussed in more detail below, the Bureau released in March 2015 a summary of the rulemaking proposals under consideration in the Small Business Review Panel Outline. At the same time that the Bureau published the Small Business Review Panel Outline, the Bureau held a field hearing in Richmond, Virginia, to begin the process of gathering feedback on the proposals under consideration from a broad range of stakeholders. Immediately after the Richmond field hearing, the Bureau held separate roundtable discussions with consumer advocates and with industry members and trade associations to hear feedback

on the Small Business Review Panel Outline. On other occasions, the Bureau met with members of two trade associations representing storefront payday lenders to discuss their feedback on issues presented in the Small Business Review Panel Outline.

At the Bureau's Consumer Advisory Board meeting in June 2015 in Omaha, Nebraska, a number of meetings and field events were held about payday, vehicle title, and similar loans. The Consumer Advisory Board advises and consults with the Bureau in the exercise of its functions under the Federal consumer financial laws, and provides information on emerging practices in the consumer financial products and services industry, including regional trends, concerns, and other relevant information. The Omaha events included a visit to a payday loan store and a day-long public session that focused on the Bureau's proposals in the Small Business Review Panel Outline and trends in payday and vehicle title lending. The Consumer Advisory Board has convened six other discussions on consumer lending. Two of the Bureau's other advisory bodies also discussed the proposals outlined in the Small Business Review Panel Outline: The Community Bank Advisory Council held two subcommittee discussions in March 2015 and November 2015, and the Credit Union Advisory Council conducted one Council discussion in March 2016 and held two subcommittee discussions in April 2015 and October 2015.

Bureau leaders, including its director, and staff have also spoken at events and conferences throughout the country. These meetings have provided additional opportunities to gather insight and recommendations from both industry and consumer groups about how to formulate a proposed rule. In addition to gathering information from meetings with lenders and trade associations and through regular supervisory and enforcement activities, Bureau staff has made fact-finding visits to at least 12 non-depository payday and vehicle title lenders, including those that offer single-payment and installment loans.

In conducting research, the Bureau has used not only the data obtained from the supervisory examinations previously described but also data obtained through orders issued by the Bureau pursuant to section 1022(c)(4) of the Dodd-Frank Act, data obtained through civil investigative demands made by the Bureau pursuant to section 1052 of the Dodd-Frank Act, and data voluntarily supplied to the Bureau by several lenders. Using these additional

data sources, the Bureau in April and May 2016 published two research reports on how online payday lenders use access to consumers' bank accounts to collect loan payments and on consumer usage and default patterns on short-term vehicle title loans.

The Bureau also has engaged in consultation with Indian tribes regarding this rulemaking. The Bureau's Policy for Consultation with Tribal Governments provides that the Bureau "is committed to regular and meaningful consultation and collaboration with tribal officials, leading to meaningful dialogue with Indian tribes on Bureau policies that would be expressly directed to tribal governments or tribal members or that would have direct implications for Indian tribes."³⁶⁴ To date, the Bureau has held two formal consultation sessions related to this rulemaking. The first was held October 27, 2014, at the National Congress of American Indians 71st Annual Convention and Marketplace in Atlanta, Georgia, prior to the release of the SBREFA materials. At the first consultation session, tribal leaders provided input to the Bureau prior to the drafting of the proposals included in what would become the Small Business Review Panel Outline. A second consultation was held at the Bureau's headquarters on June 15, 2015, so that tribal leaders could respond to the proposals under consideration as set forth in the Small Business Review Panel Outline. All federally recognized tribes were invited to attend these consultations, which included open dialogue in which tribal leaders shared their views with senior Bureau leadership and staff about the potential impact of the rulemaking on tribes. The Bureau expects to engage in additional consultation following the release of the proposed rule, and specifically seeks comment on this Notice of Proposed Rulemaking from tribal governments.

The Bureau's outreach also has included meetings and calls with individual State Attorneys General, State financial regulators, and municipal governments, and with the organizations representing the officials charged with enforcing applicable Federal, State, and local laws. In particular, the Bureau, in developing the proposed registered information system requirements, consulted with State agencies from States that require lenders to provide information about certain covered loans to statewide databases

³⁶⁴ Bureau of Consumer Fin. Prot., Consumer Financial Protection Bureau Policy for Consultation with Tribal Governments, at 1, available at http://files.consumerfinance.gov/f/201304_cfpb_consultations.pdf.

and intends to continue to do so as appropriate.

As discussed in connection with section 1022 of the Dodd-Frank Act below, the Bureau has consulted with other Federal consumer protection and also Federal prudential regulators about these issues. The Bureau has provided other regulators with information about the proposals under consideration, sought their input, and received feedback that has assisted the Bureau in preparing this proposed rule.

In addition to these various forms of outreach, the Bureau's analysis has also been informed by supervisory examinations of a number of payday lenders, enforcement investigations of a number of different types of liquidity lenders, market monitoring activities, three additional research reports drawing on extensive loan-level data, and complaint information. Specifically, the Bureau has received, as of January 1, 2016, 36,200 consumer complaints relating to payday loans and approximately 10,000 more complaints relating to vehicle title and installment loan products that, in some cases, would be covered by the proposed rule.³⁶⁵ Of the 36,200 payday complaints, approximately 12,200 were identified by the consumer as payday complaints and 24,000 were identified as debt collection complaints related to a payday loan.³⁶⁶ The Bureau has also carefully reviewed the published literature with respect to small-dollar liquidity loans and a number of outside researchers have presented their research at seminars for Bureau staff.

B. Small Business Review Panel

In April 2015, the Bureau convened a Small Business Review Panel with the Chief Counsel for Advocacy of the SBA and the Administrator of the Office of Information and Regulatory Affairs within the Office of Management and Budget (OMB).³⁶⁷ As part of this process, the Bureau prepared an outline of the proposals then under

consideration and the alternatives considered (referred to above as the Small Business Review Panel Outline), which it posted on its Web site for review and comment by the general public as well as the small entities participating in the panel process.³⁶⁸

Prior to formally convening, the Panel participated in teleconferences with small groups of the small entity representatives (SERs) to introduce the Small Business Review Panel Outline and to obtain feedback. The Small Business Review Panel gathered information from representatives of 27 small entities, including small payday lenders, vehicle title lenders, installment lenders, banks, and credit unions. The meeting participants represented storefront and online lenders, in addition to State-licensed lenders and lenders affiliated with Indian tribes. The Small Business Review Panel held a full-day meeting on April 29, 2015, to discuss the proposals under consideration. The 27 small entities also were invited to submit written feedback, and 24 of them provided written comments. The Small Business Review Panel made findings and recommendations regarding the potential compliance costs and other impacts of those entities. These findings and recommendations are set forth in the Small Business Review Panel Report, which will be made part of the administrative record in this rulemaking.³⁶⁹ The Bureau has carefully considered these findings and recommendations in preparing this proposal as detailed below in the section-by-section analysis on various provisions and in parts VI and VII. The Bureau specifically seeks comment on this Notice of Proposed Rulemaking from small businesses.

As discussed above, the Bureau has continued to conduct extensive outreach and engagement with stakeholders on all sides since the SBREFA process concluded.

C. Consumer Testing

In developing this notice, the Bureau engaged a third-party vendor, Fors Marsh Group (FMG), to coordinate qualitative consumer testing for disclosures under consideration in this rulemaking. The Bureau developed several prototype disclosure forms to test with participants in one-on-one interviews. Three categories of forms were developed and tested: (1) Origination disclosures that informed consumers about limitations on their ability to receive additional short-term loans; (2) upcoming payment notices that alerted consumers about lenders' future attempts to withdraw money from consumers' accounts; and (3) expired authorization notices that alerted consumers that lenders would no longer be able to attempt to withdraw money from the consumers' accounts. Observations and feedback from the testing were incorporated into the model forms proposed by the Bureau.

Through this testing, the Bureau sought to observe how consumers would interact with and understand prototype forms developed by the Bureau. In late 2015, FMG facilitated two rounds of one-on-one interviews. Each interview lasted 60 minutes and included fourteen participants. The first round was conducted in September 2015 in New Orleans, Louisiana, and the second round was conducted in October 2015 in Kansas City, Missouri. In conjunction with the release of this notice, the Bureau is making available a report prepared by FMG on the consumer testing ("FMG Report").³⁷⁰ The testing and focus groups were conducted in accordance with OMB Control Number 3170-0022.

A total of 28 individuals participated in the interviews. Of these 28 participants, 20 self-identified as having used a small dollar loan within the past two years.

Highlights from individual interview findings. FMG asked participants questions to assess how well they understood the information on the forms.

For the origination forms, the questions focused on whether participants understood that their ability to rollover this loan or take out additional loans may be limited. Each participant reviewed one of two different prototype forms: either one for loans that would require an ability-to-

³⁶⁵ The Bureau has received nearly 9,700 complaints on installment loans and nearly 500 complaints on vehicle title loans.

³⁶⁶ The Bureau has taken a phased approach to accepting complaints from consumers. The Bureau began accepting installment loan complaints in March of 2012, payday loan complaints in November of 2013, and vehicle title loan complaints in July of 2014.

³⁶⁷ The Small Business Regulatory Enforcement Fairness Act of 1996 (SBREFA), as amended by section 1100G(a) of the Dodd-Frank Act, requires the Bureau to convene a Small Business Review Panel before proposing a rule that may have a substantial economic impact on a significant number of small entities. See Public Law 104-121, tit. II, 110 Stat. 847, 857 (1996) as amended by Public Law 110-28, sec. 8302 (2007), and Public Law 111-203, sec. 1100G (2010).

repay determination (ATR Form) or one for loans that would be offered under the conditional exemption for covered short-term loans (Alternative Loan Form). During Round 1, many participants for both form types recognized and valued information about the loan amount and due date; accordingly, that information was moved to the beginning of all the origination forms for Round 2. For the ATR Forms, few participants in Round 1 understood that the “30 days” language was describing a period when future borrowing may be restricted. Instead, several read the language as describing the loan term. In contrast, nearly all participants reviewing the Alternative Loan Form understood that it was attempting to convey that each successive loan they took out after the first in this series had to be smaller than the previous loan, and that after taking out three loans they would not be able to take out another for 30 days. Some participants also reviewed a version of this Alternative Loan Form for when consumers are taking out their third loan in a sequence. The majority of participants who viewed this notice understood it, acknowledging that they would have to wait until 30 days after the third loan was paid off to be considered for another similar loan.

During Round 2, participants reviewed two new versions of the ATR Form. One adjusted the “30 days” phrasing and the other completely removed the “30 days” language, replacing it with the phrase “shortly after this one.” The Alternative Loan Form was updated with similar rephrasing of the “30 days” language. To simplify the table, the “loan date” column was removed.

The results in Round 2 were similar to Round 1. Participants reviewing the ATR forms focused on the language notifying them they should not take out this loan if they’re unable to pay the full balance by the due date. Information about restrictions on future loans went largely unnoticed. The edits appeared to positively impact comprehension since no participants interpreted either form as providing information on their loan term. There did not seem to be a difference in comprehension between the group with the “30 days” version and the group with the “shortly” version. As in Round 1, participants who reviewed the Alternative Loan Form noticed and understood the schedule detailing maximum borrowable amounts. These participants understood that the purpose of the Alternative Loan Form was to inform them that any subsequent loans must be smaller.

Questions for the payment notices focused on participants’ ability to identify and understand information about the upcoming payment. Participants reviewed one of two payment notices: an Upcoming Withdrawal Notice or an Unusual Withdrawal Notice. Both forms provided details about the upcoming payment attempt and a payment breakdown table. The Unusual Withdrawal Notice also indicated that the withdrawal was unusual because the payment was higher than the previous withdrawal amount. To obtain feedback on participants’ likelihood to open notices delivered in an electronic manner, these notices were presented as a sequence to simulate an email message.

In Round 1, all participants, based on seeing the subject line in the email inbox, said that they would open the Upcoming Withdrawal email and read it. Nearly all participants said they would consider the email legitimate. They reported having no concerns about the email because they would have recognized the company name, and because it included details specific to their account along with the lender contact information. When shown the full Upcoming Withdrawal Notice, participants understood that the lender would be withdrawing \$40 from their account on a particular date. Several participants also pointed out that the notice described an interest-only payment. Round 1 results were similar for the Unusual Withdrawal Notice; all participants who viewed this notice said they would open the email, and all but one participant—who was deterred due to concerns with the appearance of the link’s URL—would click on the link leading to additional details. The majority of participants indicated that they would want to read the email right away, because the words “alert” and “unusual” would catch their attention, and would make them want to determine what was going on and why a different amount was being withdrawn.

For Round 2, the payment amount was increased because some participants found it too low and would not directly answer questions about what they would do if they could not afford payment. The payment breakdown tables were also adjusted to address feedback about distinguishing between principal, finance charges, and loan balance. The results for both the Upcoming Payment and Unusual Payment Notices were similar to Round 1 in that the majority of participants would open the email, thought it was

legitimate and from the lender, and understood the purpose.

For the consumer rights notice (referred to an “expired authorization notice” in the report), FMG asked questions about participant reactions to the notice, participant understanding of why the notice was being sent, and what participants might do in response to the notice information. As with the payment notices, these notices were presented as a sequence to simulate an email message.

In Round 1, participants generally understood that the lender had tried twice to withdraw money from their account and would not be able to make any additional attempts to withdraw payment. Most participants expressed disappointment with themselves for being in a position where they had two failed payments and interpreted the notice to be a reprimand from the lender.

For Round 2, the notice was edited to clarify that the lender was prohibited by Federal law from making additional withdrawals. For example, the email subject line was changed from “Willow Lending can no longer withdraw loan payments from your account” to “Willow Lending is no longer permitted to withdraw loan payments from your account.” Instead of simply saying “federal law prohibits us from trying to withdraw payment again,” language was added to both the email message and the full notice saying, “In order to protect your account, federal law prohibits us from trying to withdraw payment again.” More information about consumer rights and the CFPB was also added. Some participants in Round 2 still reacted negatively to this notice and viewed it as reflective of something they did wrong. However, several reacted more positively to this prototype and viewed the notice as protection.

To obtain feedback regarding consumer preferences on receiving notices through text message, participants were also presented with an image of a text of the consumer rights notice and asked how they would feel about getting this notice by text. Overall, the majority of participants in Round 1 (8 of 13) disliked the idea of receiving notices via text. One of the main concerns was privacy; many mentioned that they would be embarrassed if a text about their loan situation displayed on their phone screen while they were in a social setting. In Round 2, the text image was updated to match the new subject line of the consumer rights notice. The majority (10 of the 14) of participants had a negative reaction to the notification delivered via text message. Despite this, the majority of

participants said that they would still open the text message and view the link.

Most participants (25 out of 28) also listened to a mock voice message of a lender contacting the participant to obtain renewed payment authorization after two payment attempts had failed. In Round 1, most participants reported feeling somewhat intimidated by the voicemail message and were inclined to reauthorize payments or call back based on what they heard. Participants had a similar reaction to the voicemail message in Round 2.

IV. Legal Authority

The Bureau is issuing this proposed rule pursuant to its authority under the Dodd-Frank Act. The proposed rule relies on rulemaking and other authorities specifically granted to the Bureau by the Dodd-Frank Act, as discussed below.

A. Section 1031 of the Dodd-Frank Act

Section 1031(b)—The Bureau's Authority To Identify and Prevent UDAAPs

Section 1031(b) of the Dodd-Frank Act provides the Bureau with authority to prescribe rules to identify and prevent unfair, deceptive, and abusive acts or practices, or UDAAPs. Specifically, Dodd-Frank Act section 1031(b) authorizes the Bureau to prescribe rules "applicable to a covered person or service provider identifying as unlawful unfair, deceptive, or abusive acts or practices in connection with any transaction with a consumer for a consumer financial product or service, or the offering of a consumer financial product or service." Section 1031(b) of the Dodd-Frank Act further provides that, "Rules under this section may include requirements for the purpose of preventing such acts or practice."

Given similarities between the Dodd-Frank Act and the Federal Trade Commission Act (FTC Act) provisions relating to unfair and deceptive acts or practices, case law and Federal agency rulemakings relying on the FTC Act provisions inform the scope and meaning of the Bureau's rulemaking authority with respect to unfair and deceptive acts or practices under section 1031(b) of the Dodd-Frank Act.³⁷¹ Courts evaluating exercise of agency

³⁷¹ Section 18 of the FTC Act similarly authorizes the FTC to prescribe "rules which define with specificity acts or practices which are unfair or deceptive acts or practices in or affecting commerce" and provides that such rules "may include requirements prescribed for the purpose of preventing such acts or practices." 15 U.S.C. 57a(a)(1)(B). As discussed below, the Dodd-Frank Act, unlike the FTC Act, also permits the Bureau to prescribe rules identifying and preventing "abusive" acts or practices.

rulemaking authority under the FTC Act unfairness and deception standards have held that there must be a "reasonable relation" between the act or practice identified as unlawful and the remedy chosen by the agency.³⁷² The Bureau agrees with this approach and therefore believes that it is reasonable to interpret Dodd-Frank Act section 1031(b) to permit the imposition of requirements to prevent acts or practices that are identified by the Bureau as unfair or deceptive so long as the preventive requirements being imposed by the Bureau have a reasonable relation to the identified acts or practices. The Bureau likewise believes it is reasonable to interpret Dodd-Frank Act section 1031(b) to provide the same degree of discretion to the Bureau with respect to the imposition of requirements to prevent acts or practices that are identified by the Bureau as abusive. Throughout this proposal, the Bureau has relied on and applied this interpretation in proposing requirements to prevent acts or practices identified as unfair or abusive.

Section 1031(c)—Unfair Acts or Practices

Section 1031(c)(1) of the Dodd-Frank Act provides that the Bureau "shall have no authority under this section to declare an act or practice in connection with a transaction with a consumer for a consumer financial product or service, or the offering of a consumer financial product or service, to be unlawful on the grounds that such act or practice is unfair," unless the Bureau "has a reasonable basis" to conclude that: "(A) the act or practice causes or is likely to cause substantial injury to consumers which is not reasonably avoidable by consumers; and (B) such substantial injury is not outweighed by countervailing benefits to consumers or to competition."³⁷³ Section 1031(c)(2) of the Dodd-Frank Act provides that, "In determining whether an act or practice is unfair, the Bureau may consider established public policies as evidence to be considered with all other evidence. Such public policy considerations may not serve as a primary basis for such determination."³⁷⁴

The unfairness standard under section 1031(c) of the Dodd-Frank Act—

³⁷² See *Am. Fin. Servs. Ass'n v. FTC*, 767 F.2d 957, 988 (D.C. Cir. 1985) (*AFSA*) (holding that the FTC "has wide latitude for judgment and the courts will not interfere except where the remedy selected has no reasonable relation to the unlawful practices found to exist" (citing *Jacob Siegel Co. v. FTC*, 327 U.S. 608, 612-13 (1946)).

³⁷³ 12 U.S.C. 5531(c)(1).

³⁷⁴ 12 U.S.C. 5531(c)(2).

requiring primary consideration of the three elements of substantial injury, not reasonably avoidable by consumers, and countervailing benefits to consumers or to competition, and permitting secondary consideration of public policy—reflects the unfairness standard under the FTC Act.³⁷⁵ Section 5(n) of the FTC Act was amended in 1994 to incorporate the principles set forth in the FTC's December 17, 1980 "Commission Statement of Policy on the Scope of Consumer Unfairness Jurisdiction" (the FTC Policy Statement on Unfairness).³⁷⁶ The FTC Act unfairness standard, the FTC Policy Statement on Unfairness, FTC and other Federal agency rulemakings,³⁷⁷ and related case law inform the scope and meaning of the Bureau's authority under Dodd-Frank Act section 1031(b) to issue rules that identify and prevent acts or practices that the Bureau determines are unfair pursuant to Dodd-Frank Act section 1031(c).

Substantial Injury

The first element for a determination of unfairness under section 1031(c)(1) of the Dodd-Frank Act is that the act or practice causes or is likely to cause substantial injury to consumers. As discussed above, the FTC Act unfairness standard, the FTC Policy Statement on Unfairness, FTC and other Federal agency rulemakings, and related case law inform the meaning of the elements

³⁷⁵ Section 5(n) of the FTC Act, as amended in 1994, provides that, "The [FTC] shall have no authority . . . to declare unlawful an act or practice on the grounds that such act or practice is unfair unless the act or practice causes or is likely to cause substantial injury to consumers which is not reasonably avoidable by consumers themselves and not outweighed by countervailing benefits to consumers or to competition. In determining whether an act or practice is unfair, the [FTC] may consider established public policies as evidence to be considered with all other evidence. Such public policy considerations may not serve as a primary basis for such determination." 15 U.S.C. 45(n).

³⁷⁶ Letter from the FTC to Hon. Wendell Ford and Hon. John Danforth, Committee on Commerce, Science and Transportation, United States Senate, Commission Statement of Policy on the Scope of Consumer Unfairness Jurisdiction (December 17, 1980), reprinted in *In re Int'l Harvester Co.*, 104 F.T.C. 949, 1070 (1984) (*Int'l Harvester*). See also S. Rept. 103-130, at 12-13 (1993) (legislative history to FTC Act amendments indicating congressional intent to codify the principles of the FTC Policy Statement on Unfairness).

³⁷⁷ In addition to the FTC's rulemakings under unfairness authority, certain Federal prudential regulators have prescribed rules prohibiting unfair practices under section 18(f)(1) of the FTC Act and, in doing so, they applied the statutory elements consistent with the standards articulated by the FTC. The Federal Reserve Board, FDIC, and the OCC also issued guidance generally adopting these standards for purposes of enforcing the FTC Act's prohibition on unfair and deceptive acts or practices. See 74 FR 5498, 5502 (Jan. 29, 2009) (background discussion of legal authority for interagency Subprime Credit Card Practices rule).

of the unfairness standard under Dodd-Frank Act section 1031(c)(1). The FTC noted in the FTC Policy Statement on Unfairness that substantial injury ordinarily involves monetary harm.³⁷⁸ The FTC has stated that trivial or speculative harms are not cognizable under the test for substantial injury.³⁷⁹ The FTC also noted that an injury is “sufficiently substantial” if it consists of a small amount of harm to a large number of individuals or if it raises a significant risk of harm.³⁸⁰ The FTC has found that substantial injury also may involve a large amount of harm experienced by a small number of individuals.³⁸¹ The FTC has said that emotional impact and other more subjective types of harm ordinarily will not constitute substantial injury,³⁸² but the D.C. Circuit held that psychological harm can form part of the substantial injury along with financial harm.³⁸³

Not Reasonably Avoidable

The second element for a determination of unfairness under section 1031(c)(1) of the Dodd-Frank Act is that the substantial injury is not reasonably avoidable by consumers. As discussed above, the FTC Act unfairness standard, the FTC Policy Statement on Unfairness, FTC and other Federal agency rulemakings, and related case law inform the meaning of the elements of the unfairness standard under Dodd-Frank Act section 1031(c)(1). The FTC has provided that knowing the steps for avoiding injury is not enough for the injury to be reasonably avoidable; rather, the consumer must also understand and appreciate the necessity of taking those steps.³⁸⁴ As the FTC explained in the FTC’s Policy Statement on Unfairness, most unfairness matters

are brought to “halt some form of seller behavior that unreasonably creates or takes advantage of an obstacle to the free exercise of consumer decisionmaking.”³⁸⁵ The D.C. Circuit has noted that where such behavior exists, there is a “market failure” and the agency “may be required to take corrective action.”³⁸⁶ Reasonable avoidability also takes into account the costs of making a choice other than the one made and the availability of alternatives in the marketplace.³⁸⁷

Countervailing Benefits to Consumers or Competition

The third element for a determination of unfairness under section 1031(c)(1) of the Dodd-Frank Act is that the act or practice’s countervailing benefits to consumers or to competition do not outweigh the substantial consumer injury. As discussed above, the FTC Act unfairness standard, the FTC Policy Statement on Unfairness, FTC and other Federal agency rulemakings, and related case law inform the meaning of the elements of the unfairness standard under Dodd-Frank Act section 1031(c)(1). In applying the FTC Act’s unfairness standard, the FTC has stated that generally it is important to consider both the costs of imposing a remedy and any benefits that consumers enjoy as a result of the practice.³⁸⁸ Authorities addressing the FTC Act’s unfairness standard indicate that the

countervailing benefits test does not require a precise quantitative analysis of benefits and costs, as such an analysis may be unnecessary or, in some cases, impossible; rather, the agency is expected to gather and consider reasonably available evidence.³⁸⁹

Public Policy

As noted above, section 1031(c)(2) of the Dodd-Frank Act provides that, “In determining whether an act or practice is unfair, the Bureau may consider established public policies as evidence to be considered with all other evidence. Such public policy considerations may not serve as a primary basis for such determination.”³⁹⁰

Section 1031(d)—Abusive Acts or Practices

The Dodd-Frank Act, in section 1031(b), authorizes the Bureau to identify and prevent abusive acts and practices. The Bureau believes that Congress intended for the statutory phrase “abusive acts or practices” to encompass conduct by covered persons that is beyond what would be prohibited as unfair or deceptive acts or practices, although such conduct could overlap and thus satisfy the elements for more than one of the standards.³⁹¹

Under Dodd-Frank Act section 1031(d), the Bureau “shall have no

³⁷⁸ See FTC Policy Statement on Unfairness, *Int’l Harvester*, 104 F.T.C. at 1073. For example, in the Higher-Priced Mortgage Loan (HPML) Rule, the Federal Reserve Board concluded that a borrower who cannot afford to make the loan payments as well as payments for property taxes and homeowners insurance because the lender did not adequately assess the borrower’s repayment ability suffers substantial injury, due to the various costs associated with missing mortgage payments (e.g., large late fees, impairment of credit records, foreclosure related costs). See 73 FR 44522, 44541-42 (July 30, 2008).

³⁷⁹ See FTC Policy Statement on Unfairness, *Int’l Harvester*, 104 F.T.C. at 1073.

³⁸⁰ See FTC Policy Statement on Unfairness, *Int’l Harvester*, 104 F.T.C. at 1073 n.12.

³⁸¹ See *Int’l Harvester*, 104 F.T.C. at 1064.

³⁸² See FTC Policy Statement on Unfairness, *Int’l Harvester*, 104 F.T.C. at 1073.

³⁸³ See *AFSA*, 767 F.2d at 973-74, n.20 (discussing the potential psychological harm resulting from lenders’ taking of non-possessory security interests in household goods and associated threats of seizure, which was part of the FTC’s rationale for intervention in the Credit Practices Rule).

³⁸⁴ See *Int’l Harvester*, 104 F.T.C. at 1066.

³⁸⁵ FTC Policy Statement on Unfairness, *Int’l Harvester*, 104 F.T.C. at 1074.

³⁸⁶ *AFSA*, 767 F.2d at 976. The D.C. Circuit noted that Congress intended for the FTC to develop and refine the criteria for unfairness on a “progressive, incremental” basis. *Id.* at 978. The court upheld the FTC’s Credit Practices Rule by reasoning in part that “the fact that the [FTC’s] analysis applies predominantly to certain creditors dealing with a certain class of consumers (lower-income, higher-risk borrowers) does not, as the dissent suggests, undercut its validity. [There is] a market failure with respect to a particular category of credit transactions which is being exploited by the creditors involved to the detriment of the consumers involved.” *Id.* at 982 n. 29.

³⁸⁷ See FTC Policy Statement on Unfairness, *Int’l Harvester*, 104 F.T.C. at 1074 n. 19 (“In some senses any injury can be avoided—for example, by hiring independent experts to test all products in advance, or by private legal actions for damages—but these courses may be too expensive to be practicable for individual consumers to pursue.”); *AFSA*, 767 F.2d at 976-77 (reasoning that because of factors such as substantial similarity of contracts, “consumers have little ability or incentive to shop for a better contract”).

³⁸⁸ See FTC Policy Statement on Unfairness, *Int’l Harvester*, 104 F.T.C. at 1073-74 (noting that an unfair practice must be “injurious in its net effects” and that “[t]he Commission also takes account of the various costs that a remedy would entail. These include not only the costs to the parties directly before the agency, but also the burdens on society in general in the form of increased paperwork, increased regulatory burdens on the flow of information, reduced incentives to innovation and capital formation, and similar matters.”).

³⁸⁹ See S. Rept. 103-130, at 13 (1994) (legislative history for the 1994 amendments to the FTC Act noting that, “In determining whether a substantial consumer injury is outweighed by the countervailing benefits of a practice, the Committee does not intend that the FTC quantify the detrimental and beneficial effects of the practice in every case. In many instances, such a numerical benefit-cost analysis would be unnecessary; in other cases, it may be impossible. This section would require, however, that the FTC carefully evaluate the benefits and costs of each exercise of its unfairness authority, gathering and considering reasonably available evidence.”); *Pennsylvania Funeral Directors Ass’n, Inc. v. FTC*, 41 F.3d 81, 91 (3d Cir. 1994) (in upholding the FTC’s amendments to the Funeral Industry Practices Rule, the Third Circuit noted that “much of a cost-benefit analysis requires predictions and speculation”); *Int’l Harvester*, 104 F.T.C. at 1065 n. 59 (“In making these calculations we do not strive for an unrealistic degree of precision. . . . We assess the matter in a more general way, giving consumers the benefit of the doubt in close issues. . . . What is important . . . is that we retain an overall sense of the relationship between costs and benefits. We would not want to impose compliance costs of millions of dollars in order to prevent a bruised elbow.”).

³⁹⁰ 12 U.S.C. 5531(c)(2).

³⁹¹ See, e.g., S. Rep. No. 111-176, at 172 (Apr. 30, 2010) (“Current law prohibits unfair or deceptive acts or practices. The addition of ‘abusive’ will ensure that the Bureau is empowered to cover practices where providers unreasonably take advantage of consumers.”); Public Law 111-203, pmb. (listing, in the preamble to the Dodd-Frank Act, one of the purposes of the Act as “protect[ing] consumers from abusive financial services practices”).

authority . . . to declare an act or practice abusive in connection with the provision of a consumer financial product or service” unless the act or practice qualifies under at least one of several enumerated conditions. For example, under Dodd-Frank Act section 1031(d)(2)(A), an act or practice might “take[] unreasonable advantage of” a consumer’s “lack of understanding . . . of the material risks, costs, or conditions of the [consumer financial] product or service” (*i.e.*, the lack of understanding prong).³⁹² Under Dodd-Frank Act section 1031(d)(2)(B), an act or practice might “take[] unreasonable advantage of” the “inability of the consumer to protect the interests of the consumer in selecting or using a consumer financial product or service” (*i.e.*, the inability to protect prong).³⁹³ The Dodd-Frank Act does not further elaborate on the meaning of these terms. Rather, the statute left it to the Bureau to interpret and apply these standards.

Although the legislative history on the meaning of the Dodd-Frank Act abusiveness standard is fairly limited, it suggests that Congress was particularly concerned about the widespread practice of lenders making unaffordable loans to consumers. A primary focus was on unaffordable home mortgages.³⁹⁴ However, there is some indication that Congress intended the Bureau to use the authority under Dodd-Frank Act section 1031(d) to address payday lending through the Bureau’s rulemaking, supervisory, and enforcement authorities. For example, the Senate Committee on Banking, Housing, and Urban Affairs report on the Senate version of the legislation listed payday loans as one of several categories of consumer financial products and services other than mortgages where “consumers have long faced problems” because they lack “adequate federal rules and enforcement,” noting further that “[a]busive lending, high and hidden fees, unfair and deceptive practices, confusing disclosures, and other anti-consumer practices have been

a widespread feature in commonly available consumer financial products such as credit cards.”³⁹⁵ The same section of the Senate committee report included a description of the basic features of payday loans and the problems associated with them, specifically noting that many consumers are unable to repay the loans while meeting their other obligations and that many borrowers reborrow which results in a “perpetual debt treadmill.”³⁹⁶

B. Section 1032 of the Dodd-Frank Act

Dodd-Frank Act section 1032(a) provides that the Bureau may prescribe rules to ensure that the features of any consumer financial product or service, “both initially and over the term of the product or service,” are “fully, accurately, and effectively disclosed to consumers in a manner that permits consumers to understand the costs, benefits, and risks associated with the product or service, in light of the facts and circumstances.”³⁹⁷ The authority granted to the Bureau in section 1032(a) of the Dodd-Frank Act is broad, and empowers the Bureau to prescribe rules regarding the disclosure of the “features” of consumer financial products and services generally. Accordingly, the Bureau may prescribe rules containing disclosure requirements even if other Federal consumer financial laws do not specifically require disclosure of such features. Dodd-Frank Act section 1032(c) provides that, in prescribing rules pursuant to section 1032 of the Dodd-Frank Act, the Bureau “shall consider available evidence about consumer awareness, understanding of, and responses to disclosures or communications about the risks, costs, and benefits of consumer financial products or services.”³⁹⁸

Dodd-Frank Act section 1032(b)(1) provides that “any final rule prescribed by the Bureau under this section requiring disclosures may include a model form that may be used at the option of the covered person for provision of the required

disclosures.”³⁹⁹ Dodd-Frank Act section 1032(b)(2) provides that such model form “shall contain a clear and conspicuous disclosure that, at a minimum—(A) uses plain language comprehensible to consumers; (B) contains a clear format and design, such as an easily readable type font; and (C) succinctly explains the information that must be communicated to the consumer.”⁴⁰⁰ Dodd-Frank Act section 1032(b)(3) provides that any such model form “shall be validated through consumer testing.”⁴⁰¹ Dodd-Frank Act section 1032(d) provides that, “Any covered person that uses a model form included with a rule issued under this section shall be deemed to be in compliance with the disclosure requirements of this section with respect to such model form.”⁴⁰²

C. Other Authorities Under the Dodd-Frank Act

Section 1022(b)(1) of the Dodd-Frank Act provides that the Bureau’s director “may prescribe rules and issue orders and guidance, as may be necessary or appropriate to enable the Bureau to administer and carry out the purposes and objectives of the Federal consumer financial laws, and to prevent evasions thereof.”⁴⁰³ “Federal consumer financial law” includes rules prescribed under Title X of the Dodd-Frank Act,⁴⁰⁴ including sections 1031(b) through (d) and 1032.

Section 1022(b)(2) of the Dodd-Frank Act prescribes certain standards for rulemaking that the Bureau must follow in exercising its authority under section 1022(b)(1) of the Dodd-Frank Act.⁴⁰⁵ See part VI below for a discussion of the Bureau’s standards for rulemaking under Dodd-Frank Act section 1022(b)(2).

Section 1022(b)(3)(A) of the Dodd-Frank Act authorizes the Bureau to, by rule, “conditionally or unconditionally exempt any class of covered persons, service providers, or consumer financial products or services” from any provision of Title X or from any rule issued under Title X as the Bureau determines “necessary or appropriate to carry out the purposes and objectives” of Title X, “taking into consideration the factors” set forth in section 1022(b)(3)(B) of the Dodd-Frank Act.⁴⁰⁶ Section 1022(b)(3)(B) of the Dodd-Frank Act specifies three factors that the

³⁹² 12 U.S.C. 5531(d)(2)(A).

³⁹³ 12 U.S.C. 5531(d)(2)(B). The Dodd-Frank Act abusiveness standard also permits the Bureau to intervene under section 1031(d)(1) if the Bureau determines that an act or practice “materially interferes with a consumer’s ability to understand a term or condition of a consumer financial product or service,” 12 U.S.C. 5531(d)(1), and under section 1031(d)(2)(C) if an act or practice “takes unreasonable advantage of” the consumer’s “reasonable reliance” on the covered person to act in the consumer’s interests, 12 U.S.C. 5531(d)(2)(C).

³⁹⁴ While Congress sometimes described other products as abusive, it frequently applied the term to unaffordable mortgages. *See, e.g.*, S. Rept. No. 111-176, at 11 (noting that the “financial crisis was precipitated by the proliferation of poorly underwritten mortgages with abusive terms”).

³⁹⁵ *See* S. Rept. 111-176, at 17. In addition to credit cards, the Senate committee report listed overdraft, debt collection, payday loans, and auto dealer lending as the consumer financial products and services warranting concern. *Id.* at 17-23.

³⁹⁶ *Id.* at 20-21. *See also* 155 Cong. Rec. 31250 (Dec. 10, 2009) (during a colloquy on the House floor with the one of the authors of the Dodd-Frank Act, Representative Barney Frank, Representative Henry Waxman stated that “authority to pursue abusive practices helps ensure that the agency can address payday lending and other practices that can result in pyramiding debt for low income families.”).

⁴⁰⁶ 12 U.S.C. 5512(b)(3)(A).

Bureau shall, as appropriate, take into consideration in issuing such an exemption.⁴⁰⁷

Proposed §§ 1041.16 and 1041.17 would also be authorized by additional Dodd-Frank Act authorities, such as Dodd-Frank Act sections 1021(c)(3),⁴⁰⁸ 1022(c)(7),⁴⁰⁹ 1024(b)(1),⁴¹⁰ and 1024(b)(7).⁴¹¹ Additional description of the Dodd-Frank Act authorities on which the Bureau is relying for proposed §§ 1041.16 and 1041.17 is contained in the section-by-section analysis of proposed §§ 1041.16 and 1041.17.

D. Section 1041 of the Dodd-Frank Act

Section 1041(a)(1) of the Dodd-Frank Act provides that Title X of the Dodd-Frank Act, other than sections 1044 through 1048, “may not be construed as annulling, altering, or affecting, or exempting any person subject to the provisions of [Title X] from complying with,” the statutes, regulations, orders, or interpretations in effect in any State (sometimes hereinafter, State laws), “except to the extent that any such provision of law is inconsistent with the provisions of [Title X], and then only to the extent of the inconsistency.”⁴¹² Section 1041(a)(2) of the Dodd-Frank Act provides that, for purposes of section 1041, a statute, regulation, order, or interpretation in effect in any State is not inconsistent with the Title X provisions “if the protection that such statute, regulation, order, or interpretation affords to consumers is greater than the protection provided” under Title X.⁴¹³ Section 1041(a)(2) further provides that, “A determination regarding whether a statute, regulation, order, or interpretation in effect in any State is inconsistent with the provisions of [Title X] may be made by the Bureau on its own motion or in response to a nonfrivolous petition initiated by any interested person.”

The requirements of the proposed rule would set minimum standards at the Federal level for regulation of covered

loans. The Bureau believes that the requirements of the proposed rule would coexist with State laws that pertain to the making of loans that the proposed rule would treat as covered loans (hereinafter, applicable State laws). Consequently, any person subject to the proposed rule would be required to comply with both the requirements of the proposed rule and applicable State laws, except to the extent the applicable State laws are inconsistent with the requirements of the proposed rule.⁴¹⁴ This is consistent with the established framework of Federal and State laws in many other substantive areas, such as securities law, antitrust law, environmental law and the like.

As noted above, Dodd-Frank Act section 1041(a)(2) provides that State laws that afford greater consumer protections than provisions under Title X are not inconsistent with the provisions under Title X. As discussed in part II, different States have taken different approaches to regulating loans that would be covered loans, with some States electing to permit the making of such loans and other States choosing not to do so. The Bureau believes that the requirements of the proposed rule would coexist with these different approaches, which are reflected in applicable State laws.⁴¹⁵ The Bureau is aware of certain applicable State laws that the Bureau believes would afford greater protections to consumers than would the requirements of the proposed rule. For example, as described in part II, certain States have fee or interest rate caps (*i.e.*, usury limits) that payday lenders apparently find too low to sustain their business models. The Bureau believes that the fee and interest rate caps in these States would provide greater consumer protections than, and would not be inconsistent with, the requirements of the proposed rule.

⁴¹⁴ The Bureau also believes that the requirements of the proposed rule would coexist with applicable laws in cities and other localities, and the Bureau does not intend for the proposed rule to annul, alter, or affect, or exempt any person from complying with, the regulatory frameworks of cities and other localities to the extent those frameworks provide greater consumer protections or are otherwise not inconsistent with the requirements of the proposed rule.

⁴¹⁵ States have expressed concern that the identification of unfair and abusive acts or practices in this rulemaking may be construed to affect or limit provisions in State statutes or State case law. The Bureau is proposing to identify unfair and abusive acts or practices under the statutory definitions in sections 1031(c) and 1031(d) of the Dodd-Frank Act. This proposal and any rule that may be finalized are not intended to limit the further development of State laws protecting consumers from unfair or deceptive acts or practices as defined under State laws, or from similar conduct prohibited by State laws.

V. Section-by-Section Analysis

Subpart A—General

Section 1041.1 Authority and Purpose

Proposed § 1041.1 provides that the rule is issued pursuant to Title X of the Dodd-Frank Act (12 U.S.C. 5481, *et seq.*). It also provides that the purpose of proposed part 1041 (also referred to as “this part” or “this proposed part”) is to identify certain unfair and abusive acts or practices in connection with certain consumer credit transactions and to set forth requirements for preventing such acts or practices and to prescribe requirements to ensure that the features of those consumer credit transactions are fully, accurately, and effectively disclosed to consumers. It also notes the proposed part also prescribes processes and criteria for registration of information systems.

Section 1041.2 Definitions

Proposed § 1041.2 contains definitions of terms that are used across a number of sections in this rule. There are additional definitions in proposed §§ 1041.3, 1041.5, 1041.9, 1041.14, and 1041.17 of terms used in those respective individual sections.

In general, the Bureau is proposing to incorporate a number of defined terms under other statutes or regulations and related commentary, particularly Regulation Z and Regulation E as they implement TILA and EFTA, respectively. The Bureau believes that basing this proposal’s definitions on previously defined terms may minimize regulatory uncertainty and facilitate compliance, particularly where the other regulations are likely to apply to the same transactions in their own right. However, as discussed further below, the Bureau is in certain definitions proposing to expand or modify the existing definitions or the concepts enshrined in such definitions for purposes of this proposal to ensure that the rule has its intended scope of effect particularly as industry practices may evolve. As reflected below with regard to individual definitions, the Bureau solicits comment on the appropriateness of this general approach and whether alternative definitions in statute or regulation would be more useful for these purposes.

2(a) Definitions

2(a)(1) Account

Proposed § 1041.2(a)(1) would define account by cross-referencing the same term as defined in Regulation E, 12 CFR part 1005. Regulation E generally defines account to include demand deposit (checking), savings, or other

⁴⁰⁷ 12 U.S.C. 5512(b)(3)(B) (“(B) Factors.—In issuing an exemption, as permitted under subparagraph (A), the Bureau shall, as appropriate, take into consideration—(i) the total assets of the class of covered persons; (ii) the volume of transactions involving consumer financial products or services in which the class of covered persons engages; and (iii) existing provisions of law which are applicable to the consumer financial product or service and the extent to which such provisions provide consumers with adequate protections.”).

⁴⁰⁸ 12 U.S.C. 5511(c)(3).

⁴⁰⁹ 12 U.S.C. 5512(c)(7).

⁴¹⁰ 12 U.S.C. 5514(b)(1).

⁴¹¹ 12 U.S.C. 5514(b)(7).

⁴¹² 12 U.S.C. 5551(a)(1). Dodd-Frank Act section 1002(27) defines “State” to include any federally recognized Indian tribe. See 12 U.S.C. 5481(27).

⁴¹³ 12 U.S.C. 5551(a)(2).

consumer asset accounts (other than an occasional or incidental credit balance in a credit plan) held directly or indirectly by a financial institution and established primarily for personal, family, or household purposes.⁴¹⁶ The term account is used in proposed § 1041.3(c), which would provide that a loan is a covered loan if, among other requirements, the lender or service provider obtains repayment directly from a consumer's account. This term is also used in proposed § 1041.14, which would impose certain requirements when a lender seeks to obtain repayment for a covered loan directly from a consumer's account, and in proposed § 1041.15, which would require lenders to provide notices to consumers before attempting to withdraw payments from consumers' accounts. The Bureau believes that defining this term consistently with an existing regulation would reduce the risk of confusion among consumers, industry, and regulators. The Bureau believes the Regulation E definition is appropriate because that definition is broad enough to capture the types of transactions that may implicate the concerns addressed by this part. The Bureau solicits comment on whether the Regulation E definition of account is appropriate in the context of this part and whether any additional guidance on the definition is needed.

2(a)(2) Affiliate

Proposed § 1041.2(a)(2) would define affiliate by cross-referencing the same term as defined in the Dodd-Frank Act, 12 U.S.C. 5481(1). The Dodd-Frank Act defines affiliate as any person that controls, is controlled by, or is under common control with another person. Proposed §§ 1041.6 and 1041.10 would impose certain limitations on lenders making loans to consumers who have outstanding covered loans with an affiliate of the lender. The section-by-section analyses of proposed §§ 1041.6 and 1041.10 discuss in more detail the particular requirements related to affiliates.

The Bureau believes that defining this term consistently with the Dodd-Frank Act would reduce the risk of confusion among consumers, industry, and regulators. The Bureau solicits comment on whether the Dodd-Frank Act definition of affiliate is appropriate in the context of this part and whether any

additional guidance on the definition is needed.

2(a)(3) Closed-End Credit

Proposed § 1041.2(a)(3) would define closed-end credit as an extension of credit to a consumer that is not open-end credit under proposed § 1041.2(a)(14). This term is used in various parts of the rule where the Bureau is proposing to tailor provisions specifically for closed-end and open-end credit in light of their different structures and durations. Most notably, proposed § 1041.2(a)(18) would prescribe slightly different methods of calculating the total cost of credit of closed-end and open-end credit. Proposed § 1041.16(c) also would require lenders to report whether a covered loan is closed-end or open-end credit to registered information systems. The Bureau solicits comment on whether this definition of closed-end credit is appropriate in the context of proposed part 1041 and whether any additional guidance on the definition is needed.

2(a)(4) Consumer

Proposed § 1041.2(a)(4) would define consumer by cross-referencing the same term as defined in the Dodd-Frank Act, 12 U.S.C. 5481(4). The Dodd-Frank Act defines consumer as an individual or an agent, trustee, or representative acting on behalf of an individual. The term is used in numerous provisions across proposed part 1041 to refer to applicants for and borrowers of covered loans.

The Bureau believes that this definition, rather than the arguably narrower Regulation Z definition of consumer—which defines consumer as “a cardholder or natural person to whom consumer credit is offered or extended”—is appropriate to capture the types of transactions that may implicate the concerns addressed by this proposal. In particular, the Dodd-Frank Act definition expressly defines the term consumer to include agents and representatives of individuals rather than just individuals themselves. The Bureau believes that this definition may more comprehensively foreclose possible evasion of the specific consumer protections imposed by proposed part 1041 than would the Regulation Z definition. The Bureau solicits comment on whether the Dodd-Frank Act definition of consumer is appropriate in the context of proposed part 1041 and whether any additional guidance on the definition is needed.

2(a)(5) Consummation

Proposed § 1041.2(a)(5) would define consummation as the time a consumer becomes contractually obligated on a new loan, which is consistent with the definition of the term in Regulation Z § 1026.2(a)(13), or the time a consumer becomes contractually obligated on a modification of an existing loan that increases the amount of the loan. The term is used both in defining certain categories of covered loans and in defining the timing of certain proposed requirements. The time of consummation is important for the purposes of several proposed provisions. For example, under proposed § 1041.3(b)(1), whether a loan is a covered short-term loan would depend on whether the consumer is required to repay substantially all of the loan within 45 days of consummation. Under proposed § 1041.3(b)(3), the determination of whether a loan is subject to a total cost of credit exceeding 36 percent per annum would be made at the time of consummation. Pursuant to proposed §§ 1041.6 and 1041.10, certain limitations would potentially apply to lenders making covered loans based on the consummation dates of those loans. Pursuant to § 1041.15(f), lenders would have to furnish certain disclosures before a loan subject to the requirements of that section is consummated.

The Bureau believes that defining the term consistently with Regulation Z with respect to new loans would reduce the risk of confusion among consumers, industry, and regulators. The Bureau believes it is also necessary to define the term, with respect to loan modifications, in a way that would further the intent of proposed §§ 1041.3(b)(1), 1041.3(b)(2), 1041.5(b), and 1041.9(b), all of which would impose requirements on lenders at the time the loan amount increases. The Bureau believes defining these events as consummations would improve clarity for consumers, industry, and regulators. The above-referenced sections would impose no duties or limitations on lenders when a loan modification decreases the amount of the loan. Accordingly, in addition to incorporating Regulation Z commentary as to the general definition of consummation for new loans, proposed comment 2(a)(5)-2 explains the time at which certain modifications of existing loans are consummated. Proposed comment 2(a)(5)-2 explains that a modification is consummated if the modification increases the amount of the loan. Proposed comment 2(a)(5)-2 also explains that a cost-free repayment plan, or “off-ramp” as it is commonly

⁴¹⁶ Regulation E also specifically includes payroll card accounts and certain government benefit card accounts. The Bureau has proposed in a separate rulemaking to enumerate rules for a broader category of prepaid accounts. See 79 FR 77101 (Dec. 23, 2014).

known in the market, does not result in a consummation under proposed § 1041.2(a)(5). The Bureau solicits comment on whether this definition is appropriate in the context of proposed part 1041 and whether any additional guidance on the definition is needed.

The Bureau considered expressly defining the term “new loan” in order to clarify when lenders would need to make the ability-to-repay determinations prescribed in proposed §§ 1041.5 and 1041.9. The definition that the Bureau considered would have defined a new loan as a consumer-purpose loan made to a consumer that (a) is made to a consumer who is not indebted on an outstanding loan, (b) replaces an outstanding loan, or (c) modifies an outstanding loan, except when a repayment plan, or “off-ramp” extends the term of the loan and imposes no additional fees. The Bureau solicits comment on whether this approach would provide additional clarification, and if so, whether this particular definition of “new loan” would be appropriate.

2(a)(6) Covered Short-Term Loan

Proposed § 1041.3(b)(1) would describe covered short-term loans as loans in which the consumer is required to repay substantially the entire amount due under the loan within 45 days of consummation. Some provisions in proposed part 1041 would apply only to covered short-term loans described in proposed § 1041.3(b)(1). For example, proposed § 1041.5 prescribes the ability-to-repay determination that lenders are required to perform when making covered short-term loans. Proposed § 1041.6 imposes limitations on lenders making sequential covered short-term loans to consumers. The Bureau proposes to use a defined term for the loans described in § 1041.3(b)(1) for clarity. The Bureau solicits comment on whether this definition is appropriate in the context of proposed part 1041 and whether any additional guidance on the definition is needed.

2(a)(7) Covered Longer-Term Balloon-Payment Loan

Proposed § 1041.2(a)(7) would define covered longer-term balloon-payment loan as a loan described in proposed § 1041.3(b)(2) that requires the consumer to repay the loan in a single payment or repay the loan through at least one payment that is more than twice as large as any other payment under the loan. Proposed § 1041.9(b)(2) contains certain rules that lenders would have to follow when determining whether a consumer has the ability to repay a covered longer-term balloon-

payment loan. Moreover, some of the restrictions imposed in proposed § 1041.10 would apply to covered longer-term balloon-payment loans in certain situations.

The term covered longer-term balloon-payment loan would include loans that are repayable in a single payment notwithstanding the fact that a loan with a “balloon” payment is often understood in other contexts to mean a loan repayable in multiple payments with one payment substantially larger than the other payments. The Bureau believes that both structures pose similar risks to consumers, and is proposing to treat both longer-term single-payment loans and multi-payment loans with a balloon payment the same for the purposes of proposed §§ 1041.9 and 1041.10. Accordingly, the Bureau is proposing to use a single defined term for both loan types to improve the proposal’s readability.

Apart from including single-payment loans within the definition of covered longer-term balloon-payment loans, the term substantially tracks the definition of balloon payment contained in Regulation Z § 1026.32(d)(1), with one additional proviso. The Regulation Z definition requires the larger loan payment to be compared to other “regular periodic payments,” whereas proposed § 1041.2(a)(7) requires the larger loan payment to be compared to any other payment(s) under the loan, regardless of whether the payment is a “regular periodic payment.” Proposed comments 2(a)(7)-2 and 2(a)(7)-3 explain that “payment” in this context means a payment of principal or interest, and excludes certain charges such as late fees and payments accelerated upon the consumer’s default.

The Bureau solicits comment on whether this definition is appropriate in the context of this proposal and whether any additional guidance on the definition is needed. As discussed further in proposed § 1041.3(b)(2), the Bureau also seeks comment on whether longer-term single-payment loans and longer-term loans with balloon payments should be covered regardless of whether the loans are subject to a total cost of credit exceeding a rate of 36 percent per annum, or regardless of whether the lender or service provider obtains a leveraged payment mechanism or vehicle security in connection with the loan.

2(a)(8) Covered Longer-Term Loan

Some restrictions in proposed part 1041 would apply to covered longer-term loans described in proposed § 1041.3(b)(2). Proposed § 1041.3(b)(2) describes covered longer-term loans as

loans with a term of longer than 45 days, which are subject to a total cost of credit exceeding a rate of 36 percent per annum, and in which the lender or service provider obtains a leveraged payment mechanism or vehicle title. Some provisions in proposed part 1041 would apply only to covered longer-term loans described in proposed § 1041.3(b)(2). For example, proposed § 1041.9 prescribes the ability to repay determination that lenders are required to perform when making covered longer-term loans. Proposed § 1041.10 imposes limitations on lenders making covered longer-term loans to consumers in certain circumstances that may indicate the consumer lacks the ability to repay. The Bureau proposes to use a defined term for the loans described in proposed § 1041.3(b)(2) for clarity. The Bureau solicits comment on whether this definition is appropriate in the context of proposed part 1041 and whether any additional guidance on the definition is needed.

2(a)(9) Credit

Proposed § 1041.2(a)(9) would define credit by cross-referencing the same term as defined in Regulation Z, 12 CFR part 1026. Regulation Z defines credit as the right to defer payment of debt or to incur debt and defer its payment. This term is used in numerous places throughout this proposal to refer generically to the types of consumer financial products that would be subject to the requirements of proposed part 1041.

The Bureau believes that defining this term consistently with an existing regulation would reduce the risk of confusion among consumers, industry, and regulators. The Bureau also believes that the Regulation Z definition is appropriately broad so as to capture the various types of transaction structures that implicate the concerns addressed by proposed part 1041. The Bureau solicits comment on whether the Regulation Z definition of credit is appropriate in the context of proposed part 1041 and whether any additional guidance on the definition is needed.

2(a)(10) Electronic Fund Transfer

Proposed § 1041.2(a)(10) would define electronic fund transfer by cross-referencing the same term as defined in Regulation E, 12 CFR part 1005. Proposed § 1041.3(c) provides that a loan may be a covered longer-term loan if the lender or service provider obtains a leveraged payment mechanism, which can include the ability to withdraw payments from a consumer’s account through an electronic fund transfer. Proposed § 1041.14 would impose

limitations on lenders' use of various payment methods, including electronic fund transfers. The Bureau believes that defining this term consistently with an existing regulation would reduce the risk of confusion among consumers, industry, and regulators. The Bureau solicits comment on whether the Regulation E definition of electronic fund transfer is appropriate in the context of proposed part 1041 and whether any additional guidance on the definition is needed.

2(a)(11) Lender

Proposed § 1041.2(a)(11) would define lender as a person who regularly makes loans to consumers primarily for personal, family, or household purposes. This term is used throughout this proposal to refer to parties subject to the requirements of proposed part 1041. This proposed definition is broader than the general definition of creditor under Regulation Z in that, under this proposed definition, the credit that the lender extends need not be subject to a finance charge as that term is defined by Regulation Z, nor must it be payable by written agreement in more than four installments.

The Bureau is proposing a broader definition than in Regulation Z for many of the same reasons discussed in the section-by-section analyses of proposed §§ 1041.2(a)(14) and 1041.3(b)(2)(ii) for using the total cost of credit as a threshold for covering longer-term loans rather than the traditional definition of APR as defined by Regulation Z. In both cases, the Bureau is concerned that lenders might otherwise shift their fee structures to fall outside traditional Regulation Z concepts and thus outside the coverage of proposed part 1041. For example, the Bureau believes that some loans that otherwise would meet the requirements for coverage under proposed § 1041.3(b) could potentially be made without being subject to a finance charge as that term is defined by Regulation Z. If the Bureau adopted that particular Regulation Z requirement in the definition of lender, a person who regularly extended closed-end credit subject only to an application fee or open-end credit subject only to a participation fee would not be deemed to have imposed a finance charge. In addition, many of the loans that would be subject to coverage under proposed § 1041.3(b)(1) are repayable in a single payment, so those same lenders might also fall outside the Regulation Z trigger for loans payable in fewer than four installments. Thus, the Bureau is proposing to use a definition that is broader than the one contained in Regulation Z to ensure that proposed

part 1041 applies as intended. The Bureau solicits comment on whether there are any alternative approaches that might be more appropriate given the concerns set forth above.

At the same time, the Bureau recognizes that some newly formed companies are providing services that, in effect, allow consumers to draw on money they have earned but not yet been paid. Some of these services do not require the consumer to pay any fees or finance charges. Some rely instead on voluntary "tips" to sustain the business, while others are compensated through electronic fund transfers from the consumer's account. Some current or future services may use other business models. The Bureau is also aware of some newly formed companies providing financial management services to low- and moderate-income consumers which include features to smooth income. The Bureau solicits comments on whether such entities are, or should be, excluded from the definition of lender, and if so, whether the definition should be revised. For example, the Bureau solicits comment on whether companies that impose no charge on the consumer, or companies that charge a regular membership fee which is unrelated to the usage of credit, should be considered lenders under the rule.

The Bureau proposes to carry over from the Regulation Z definition of creditor the requirement that a person "regularly" makes loans to a consumer primarily for personal, family, or household purposes in order to be considered a lender under proposed part 1041. As proposed comment 2(a)(11)-1 explains, the test for determining whether a person regularly makes loans is the same as in Regulation Z, and thus depends on the overall number of loans originated, not just covered loans. The Bureau believes it is appropriate to exclude from the definition of lender persons who make loans for personal, family, or household purposes on an infrequent basis so that persons who only occasionally make loans would not be subject to the requirements of proposed part 1041. Such persons could include charitable, religious, or other community institutions that make loans very infrequently or individuals who occasionally make loans to family members.

Some stakeholders have suggested to the Bureau that the definition of lender should be narrowed so as to exclude financial institutions that predominantly make loans that would not be covered loans under the proposed rule. These stakeholders have

suggested that some financial institutions only make loans that would be covered loans as an accommodation to existing customers, and that providing such loans is such a small part of these institutions' overall business such that it would not be practical for the institutions to develop the required procedures for making covered loans. The Bureau solicits comment on whether to so narrow the definition of lender based on the quantity of covered loans an entity offers, and, if so, how to define such a de minimis test. The Bureau also solicits more general comment on whether this definition is appropriate in the context of proposed part 1041 and whether any additional guidance on the definition is needed.

2(a)(12) Loan Sequence or Sequence

Proposed § 1041.2(a)(12) would generally define a loan sequence or sequence as a series of consecutive or concurrent covered short-term loans in which each of the loans (other than the first loan) is made while the consumer currently has an outstanding covered short-term loan or within 30 days after the consumer ceased to have a covered short-term loan outstanding. Proposed § 1041.2(a)(12) defines both loan sequence and sequence the same because the terms are used interchangeably in various places throughout this proposal. Proposed § 1041.2(a)(12) also sets forth how a lender must determine a given loan's place within a sequence (for example, whether a loan is a first, second, or third loan in a sequence). Proposed § 1041.6 would also impose certain presumptions that lenders must take into account when making a second or third loan in a sequence, and would prohibit lenders from making a loan sequence with more than three covered short-term loans. Pursuant to proposed § 1041.6, a lender's extension of a non-covered bridge loan as defined in proposed § 1041.2(a)(13) could affect the calculation of time periods for purposes of determining whether a loan is within a loan sequence, as discussed in more detail in proposed comments 6(h)-1 and 6(h)-2.

The Bureau's rationale for proposing to define loan sequence in this manner is discussed in more detail in the section-by-section analysis of proposed §§ 1041.4 and 1041.6. The Bureau solicits comment on whether a definition of loan sequence or sequence based on a 30-day period is appropriate or whether longer or shorter periods would better address the Bureau's concerns about a consumer's inability to repay a covered loan causing the need

for a successive covered loan. The Bureau solicits comment on whether this definition is appropriate in the context of proposed part 1041 and whether any additional guidance on the definition is needed.

2(a)(13) Non-Covered Bridge Loan

Proposed § 1041.2(a)(13) would define the term non-covered bridge loan as a non-recourse pawn loan described in proposed § 1041.3(e)(5) that (a) is made within 30 days of the consumer having an outstanding covered short-term loan or outstanding covered longer-term balloon-payment loan made by the same lender or affiliate; and (b) the consumer is required to repay substantially the entire amount due within 90 days of its consummation. Although non-recourse pawn loans would be excluded from coverage under proposed § 1041.3(e)(5), the Bureau has provided rules in proposed §§ 1041.6(h) and § 1041.10(f) to prevent this from becoming a route for evading the rule.

Specifically, proposed §§ 1041.6 and 1041.10 would impose certain limitations on lenders making covered short-term loans and covered longer-term balloon-payment in some circumstances. The Bureau is concerned that if a lender made a non-covered bridge loan between covered loans, the non-covered bridge loan could mask the fact that the consumer's need for a covered short-term loan or covered longer-term balloon-payment loan reflected the spillover effects of a prior such covered loan, suggesting that the consumer did not have the ability to repay the prior loan and that the consumer may not have the ability to repay the new covered loan. If the consumer took out a covered short-term loan or covered longer-term balloon-payment loan immediately following the non-covered pawn loan, but more than 30 days after the last such covered loan, the pawn loan effectively would have "bridged" the gap in what was functionally a sequence of covered loans. The Bureau is concerned that a lender might be able to use such a "bridging" arrangement to evade the requirements of proposed §§ 1041.6 and 1041.10. To prevent evasions of this type, the Bureau is therefore proposing that the days on which a consumer has a non-covered bridge loan outstanding must not be considered in determining whether 30 days had elapsed between covered loans.

Many lenders offer both loans that would be covered and pawn loans; thus, the Bureau believes that pawn loans are the type of non-covered loan that most likely could be used to bridge covered short-term loans or covered longer-term

balloon-payment loans. Proposed § 1041.2(a)(13) would limit the definition of non-covered bridge loan to non-recourse pawn loans that consumers must repay within 90 days of consummation. The Bureau believes that loans with terms of longer than 90 days are less likely to be used as a bridge between covered short-term loans or covered longer-term balloon-payment loans.

The Bureau solicits comment on whether pawn loans can be used as a bridge between covered loans, and further solicits comment on whether other types of loans—including, specifically, balloon-payment loans with terms of longer than 45 days but that do not meet the requirements to be covered longer-term loans under proposed section 1041.3(b)(2)—are likely to be used as bridge loans and therefore should be added to the definition of "non-covered bridge loan." The Bureau also solicits more general comment on whether this definition is appropriate in the context of proposed part 1041 and whether any additional guidance on the definition is needed.

2(a)(14) Open-End Credit

Proposed § 1041.2(a)(14) would define open-end credit by cross-referencing the same term as defined in Regulation Z, 12 CFR part 1026, but without regard to whether the credit is consumer credit, as that term is defined in Regulation Z § 1026.2(a)(12), is extended by a creditor, as that term is defined in Regulation Z § 1026.2(a)(17), or is extended to a consumer, as that term is defined in Regulation Z § 1026.2(a)(11). In general, Regulation Z § 1026.2(a)(20) provides that open-end credit is consumer credit in which the creditor reasonably contemplates repeated transactions, the creditor may impose a finance charge from time to time on an outstanding unpaid balance, and the amount of credit that may be extended to the consumer during the term of the plan (up to any limit set by the creditor) is generally made available to the extent that any outstanding balance is repaid. For the purposes of defining open-end credit under proposed part 1041, the term credit, as defined in proposed § 1041.2(a)(9), would be substituted for the term consumer credit in the Regulation Z definition of open-end credit; the term lender, as defined in proposed § 1041.2(a)(11), would be substituted for the term creditor in the Regulation Z definition of open-end credit; and the term consumer, as defined in proposed § 1041.2(a)(4), would be substituted for the term consumer in the Regulation Z definition of open-end credit.

The term open-end credit is used in various parts of the rule where the Bureau is proposing to tailor requirements separately for closed-end and open-end credit in light of their different structures and durations. Most notably, proposed § 1041.2(a)(18) would require lenders to employ slightly different methods when calculating the total cost of credit of closed-end versus open-end loans. Proposed § 1041.16(c) also would require lenders to report whether a covered loan is a closed-end or open-end loan.

The Bureau believes that generally defining this term consistently across regulations would reduce the risk of confusion among consumers, industry, and regulators. With regard to the definition of "consumer," however, the Bureau believes that, for the reasons discussed above, it is more appropriate to incorporate the definition from the Dodd-Frank Act rather than the arguably narrower Regulation Z definition. Similarly, the Bureau believes that it is more appropriate to use the broader definition of "lender" contained in proposed § 2(a)(11) that the Regulation Z definition of "creditor."

The Bureau solicits comment on whether the Regulation Z definition of account is appropriate in the context of proposed part 1041 and whether any additional guidance on the definition is needed, particularly as to the substitution of the definitions for "consumer" and "lender" as described above.

2(a)(15) Outstanding Loan

Proposed § 1041.2(a)(15) would define outstanding loan as a loan that the consumer is legally obligated to repay so long as the consumer has made at least one payment on the loan within the previous 180 days. Under this proposed definition, a loan is an outstanding loan regardless of whether the loan is delinquent or the loan is subject to a repayment plan or other workout arrangement if the other elements of the definition are met. Under proposed § 1041.2(a)(12), a covered short-term loan would be considered to be within the same loan sequence as a previous such loan if it is made within 30 days of the consumer having the previous outstanding loan. Proposed §§ 1041.6 and 1041.7 would impose certain limitations on lenders making covered short-term loans within loan sequences, including a prohibition on making additional covered short-term loans for 30 days after the third loan in a sequence.

The Bureau believes that if the consumer has not made any payment on the loan for an extended period of time

it may be appropriate to stop considering the loan to be outstanding loan for the purposes of proposed §§ 1041.2(a)(11), 1041.6, 1041.7, 1041.10, 1041.11 and 1041.12. Because outstanding loans are counted as major financial obligations for purposes of underwriting and because treating a loan as outstanding would trigger certain restrictions on further borrowing by the consumer under the proposed rule, the Bureau has attempted to balance several considerations in crafting the proposed definition. One is whether it would be appropriate for very stale and effectively inactive debt to prevent the consumer from accessing credit, even if so much time has passed that it seems relatively unlikely that the new loan is a direct consequence of the unaffordability of the previous loan. Another is how to define very stale and effectively inactive debt for purposes of any cut-off, and to account for the risk that collections might later be revived or that lenders would intentionally exploit a cut-off in an attempt to encourage new borrowing by consumers.

The Bureau is proposing a 180-day threshold as striking an appropriate balance. The Bureau notes that this would generally align with the policy of the Federal Financial Institutions Examination Council, which generally requires depository institutions to charge-off open-end credit at 180 days of delinquency. Although that policy also requires that closed-end loans be charged off after 120 days, the Bureau believes that a uniform 180-day rule for both closed- and open-end loans may be more appropriate given the underlying policy considerations discussed above as well as for simplicity. Proposed comment 2(a)(15)-2 would clarify that a loan ceases to be an outstanding loan as of the earliest of the date the consumer repays the loan in full, the date the consumer is released from the legal obligation to repay, the date the loan is otherwise legally discharged, or the date that is 180 days following the last payment that the consumer has made on the loan. Additionally, proposed comment 2(a)(15)-2 would explain that any payment the consumer makes restarts the 180-day period, regardless of whether the payment is a scheduled payment or in a scheduled amount. Proposed comment 2(a)(15)-2 would further clarify that once a loan is no longer an outstanding loan, subsequent events cannot make the loan an outstanding loan. The Bureau is proposing this one-way valve to ease compliance burden on lenders and to reduce the risk of consumer confusion.

The Bureau solicits comment on whether 180 days is the most

appropriate period of time or whether a shorter or longer time period should be used. The Bureau solicits comment on whether a loan should be considered an outstanding loan if it has in fact been charged off by the lender prior to 180 days of delinquency. The Bureau solicits comment on whether a loan should be considered an outstanding loan if there has been activity on a loan more than 180 days after the consumer has made a payment, such as a collections lawsuit brought by the lender or a third-party. The Bureau also solicits comment on whether a loan should be considered an outstanding loan if there has been activity on the loan with the previous 180 days regardless of whether the consumer has made a payment on the loan within the previous 180 days. The Bureau further solicits comment on whether any additional guidance on this definition is needed.

2(a)(16) Prepayment Penalty

Proposed § 1041.2(a)(16) defines prepayment penalty as any charge imposed for paying all or part of the loan before the date on which the loan is due in full. Proposed §§ 1041.11(e) and 1041.12(f) would prohibit lenders from imposing prepayment penalties in connection with certain loans that are conditionally excluded from the ability-to-repay determination required under proposed §§ 1041.9 and 1041.10. This definition is similar to the definition of prepayment penalty in Regulation Z § 1026.32(b)(6), which generally defines prepayment penalty for closed-end transactions as a charge imposed for paying all or part of the transaction's principal before the date on which the principal is due. However, the definition of prepayment penalty in proposed § 1041.2(a)(16) does not restrict the definition of prepayment penalty to charges for paying down the loan principal early, but also includes charges for paying down non-principal amounts due under the loan. The Bureau believes that this broad definition of prepayment penalty is necessary to capture all situations in which a lender may attempt to penalize a consumer for repaying a loan more quickly than a lender would prefer. As proposed comment 2(a)(16)-1 explains, whether a charge is a prepayment penalty depends on the circumstances around the assessment of the charge. The Bureau solicits comment on whether this definition is appropriate in the context of proposed part 1041 and whether any additional guidance on the definition is needed.

2(a)(17) Service Provider

Proposed § 1041.2(a)(17) would define service provider by cross-referencing the same term as defined in the Dodd-Frank Act, 12 U.S.C. 5481(26). In general, the Dodd-Frank Act defines service provider as any person that provides a material service to a covered person in connection with the offering or provision of a consumer financial product or service. Proposed § 1041.3(c) and (d) would provide that a loan is covered under proposed part 1041 if a service provider obtains a leveraged payment mechanism or vehicle title and the other coverage criteria are otherwise met.

The definition of service provider and the provisions in proposed § 1041.3(c) and (d) are designed to reflect the fact that in some States, covered short-term loans and covered longer-term loans are extended to consumers through a multi-party transaction. In these transactions, one entity will fund the loan, while a separate entity, often called a credit access business or a credit services organization, will interact directly with, and obtain a fee or fees from, the consumer. This separate entity will often service the loan and guarantee the loan's performance to the party funding the loan. In the context of covered longer-term loans, the credit access business or credit services organization, and not the party funding the loan, will in many cases obtain the leveraged payment mechanism or vehicle security. In these cases, the credit access business or credit services organization is performing the responsibilities normally performed by a party funding the loan in jurisdictions where this particular business arrangement is not used. Despite the formal division of functions between the nominal lender and the credit access business, the loans produced by such arrangement are functionally the same as those covered loans issued by a single entity and appear to present the same set of consumer protection concerns. Accordingly, the Bureau believes it is appropriate to bring loans made under these arrangements within the scope of coverage of proposed part 1041.

The Bureau believes that defining the term service provider consistently with the Dodd-Frank Act would reduce the risk of confusion among consumers, industry, and regulators. The Bureau solicits comment on whether the Dodd-Frank Act definition of service provider is appropriate in the context of proposed part 1041 and whether any additional guidance on the definition is needed. More broadly, and as further discussed in proposed § 1041.3(c) and

(d), the Bureau solicits comment on whether the definition of service provider is sufficient to bring these loans within the coverage of proposed part 1041, or whether loans made through this or similar business arrangements should be covered using a different definition.

2(a)(18) Total Cost of Credit

Proposed § 1041.2(a)(18) would set forth the method by which lenders would calculate the total cost of credit for determining whether a loan would be a covered loan under proposed § 1041.3(b)(2). Proposed § 1041.2(a)(18) would generally define the total cost of credit as the total amount of charges associated with a loan expressed as a per annum rate, including various charges that do not meet the definition of finance charge under Regulation Z. The charges would be included even if they are paid to a party other than the lender. Under proposed § 1041.3(b)(2), a loan with a term of longer than 45 days must have a total cost of credit exceeding a rate of 36 percent per annum in order to be a covered loan.

The Bureau is proposing to use an all-in measure of the cost of credit rather than the definition of APR under Regulation Z for many of the same reasons discussed in § 1041.2(a)(11) for proposing a broader definition of lender than Regulation Z uses in defining creditor. In both cases, the Bureau is concerned that lenders might otherwise shift their fee structures to fall outside traditional Regulation Z concepts and outside of this proposal. Specifically, lenders may impose a wide range of charges in connection with a loan that are not included in the calculation of APR under Regulation Z. If these charges were not included in the calculation of the total cost of credit threshold for determining coverage under proposed part 1041, a lender would be able to avoid the threshold by shifting the costs of a loan by lowering the interest rate and imposing (or increasing) one or more fees that are not included in the calculation of APR under Regulation Z. To prevent this result, and more accurately capture the full financial impact of the credit on the consumer's finances, the Bureau proposes to include any application fee, any participation fee, any charge imposed in connection with credit insurance, and any fee for a credit-related ancillary product as charges that lenders must include in the total cost of credit.

Specifically, proposed § 1041.2(a)(18) would define the total cost of credit as the total amount of charges associated with a loan expressed as a per annum

rate, determined as specified in the regulation. Proposed § 1041.2(a)(18)(i) and related commentary describes each of the charges that must be included in the total cost of credit calculation. Proposed § 1041.2(a)(18)(ii) provides that, even if a charge set forth in proposed § 1041.2(a)(18)(i)(A) through (E) would be excluded from the finance charge under Regulation Z, that charge must nonetheless be included in the total cost of credit calculation.

Proposed § 1041.2(a)(18)(i)(A) and (B) provide that charges the consumer pays in connection with credit insurance and credit-related ancillary products and services must be included in the total cost of credit calculation to the extent the charges are incurred (regardless of when the charge is actually paid) at the same time as the consumer receives the entire amount of funds that the consumer is entitled to receive under the loan or within 72 hours thereafter. Proposed § 1041.2(a)(18)(i)(A) and (B) would impose the 72-hour provision to ensure that lenders could not evade coverage under proposed § 1041.3(b)(2)(ii) conditioning the timing of loan proceeds disbursement on whether the consumer purchases credit insurance or other credit-related ancillary products or services after consummation. The Bureau believes that the lender's leverage will have diminished by 72 hours after the consumer receives the entirety of the funds available under the loan, and thus it is less likely that any charge for credit insurance or other credit-related ancillary products and services that the consumer agrees to assume after that date is an attempt to avoid coverage under proposed § 1041.3(b)(2)(ii).

Proposed § 1041.2(a)(18)(iii) and related commentary would prescribe the rules for computing the total cost of credit based on those charges. Proposed § 1041.2(a)(18)(iii) contains two provisions for computing the total cost of credit, both of which track the methods already established in Regulation Z. First, for closed-end credit, proposed § 1041.2(a)(18)(iii)(A) would require a lender to follow the rules for calculating and disclosing the APR under Regulation Z, based on the charges required for the total cost of credit, as set forth in proposed § 1041.2(a)(18)(i). In general, the requirements for calculating the APR for closed-end credit under Regulation Z are found in § 1026.22(a)(1), and include the explanations and instructions for computing the APR set forth in appendix J to 12 CFR part 1026.

Second, for open-end credit, proposed § 1041.2(a)(18)(iii)(B) generally would require a lender to calculate the total

cost of credit using the methods prescribed in § 1026.14(c) and (d) of Regulation Z, which describe an "optional effective annual percentage rate" for certain open-end credit products. While Regulation Z provides that these calculation methods are optional, these calculation methods would be required to determine coverage of loans under proposed § 1041.3(b)(2) (though a lender may still choose not to disclose the optional effective annual percentage rate in accordance with Regulation Z). Section 1026.14(c) of Regulation Z provides for the methods of computing the APR under three scenarios: (1) When the finance charge is determined solely by applying one or more periodic rates; (2) when the finance charge is or includes a minimum, fixed, or other charge that is not due to application of a periodic rate, other than a charge with respect to a specific transaction; and (3) when the finance charge is or includes a charge relating to a specific transaction during the billing cycle.

This approach mirrors the approach taken by the Department of Defense in defining the MAPR in 32 CFR 232.4(c). The Bureau believes this measure both includes the necessary types of charges that reflect the actual cost of the loan to the consumer and is familiar to many lenders that must make the MAPR calculation, thus reducing the compliance challenges that would result from a new computation.

At the same time, the Bureau recognizes that the total cost of credit or MAPR is a relatively unfamiliar concept for many lenders compared to the APR, which is built into many State laws and which is the cost that will be disclosed to consumers under Regulation Z. The Bureau solicits comment on whether the trigger for coverage should be based upon the total cost of credit rather than the APR. If so, the Bureau solicits comment on whether the elements listed in proposed § 1041.2(a)(18) capture the total cost of credit to the consumer and should be included in the calculation required by proposed § 1041.2(a)(18) and whether there are any additional elements that should be included or any listed elements that should be excluded. For example, some stakeholders have suggested that the amounts paid for voluntary products purchased prior to consummation, or the portion of that amount paid to unaffiliated third parties, should be excluded from the definition of total cost of credit. The Bureau solicits comments on those suggestions.

The Bureau also solicits comment on whether there are operational issues with the use of the total cost of credit

calculation methodology for closed- or open-end loans that the Bureau should consider, and if so, whether there are any alternative methods for calculating the total cost of credit for these products that would address the operational issues. The Bureau further solicits comment on whether any additional guidance on this definition is needed.

Section 1041.3 Scope of Coverage; Exclusions

The primary purpose of proposed part 1041 is to identify and adopt rules to prevent unfair and abusive practices as defined in section 1031 of the Dodd-Frank Act in connection with certain consumer credit transactions. Based upon its research, outreach, and analysis of available data, the Bureau is proposing to identify such practices with respect to two categories of loans to which the Bureau proposes to apply this rule: (1) Consumer loans that have a duration of 45 days or less; and (2) consumer loans that have a duration of more than 45 days that have a total cost of credit above a certain threshold and that are either secured by the consumer's motor vehicle, as set forth in proposed § 1041.3(d), or are repayable directly from the consumer's income stream, as set forth in proposed § 1041.3(c).

As described below in the section-by-section analysis of proposed § 1041.4, the Bureau tentatively concludes that it is an unfair and abusive practice for a lender to make a covered short-term loan without making a reasonable determination that the consumer has the ability to repay the loan. The Bureau likewise tentatively concludes that it is an unfair and abusive practice for a lender to make a covered longer-term loan without making a reasonable determination of the consumer's ability to repay the loan. Accordingly, the Bureau proposes to apply the protections of proposed part 1041 to both categories of loans.

Proposed §§ 1041.5 and 1041.9 would require that, before making a covered loan, a lender must determine that the consumer has the ability to repay the loan. Proposed §§ 1041.6 and 1041.10 would impose certain limitations on repeat borrowing, depending on the type of covered loan. Proposed §§ 1041.7, 1041.11, and 1041.12 would provide for alternative requirements that would allow lenders to make covered loans, in certain limited situations, without first determining that the consumer has the ability to repay the loan. Proposed § 1041.14 would impose consumer protections related to repeated lender-initiated attempts to withdraw payments from consumers'

accounts in connection with covered loans. Proposed § 1041.15 would require lenders to provide notices to consumers before attempting to withdraw payments on covered loans from consumers' accounts. Proposed §§ 1041.16 and 1041.17 would require lenders to check and report borrowing history and loan information to certain information systems with respect to most covered loans. Proposed § 1041.18 would require lenders to keep certain records on the covered loans that they make. Finally, proposed § 1041.19 would prohibit actions taken to evade the requirements of proposed part 1041.

The Bureau is not proposing to extend coverage to several other types of loans and is specifically proposing to exclude, to the extent they would otherwise be covered under proposed § 1041.3, certain purchase money security interest loans, certain loans secured by real estate, credit cards, student loans, non-recourse pawn loans, and overdraft services and lines of credit. The Bureau likewise proposes not to cover loans that have a term of longer than 45 days if they are not secured by a leveraged payment mechanism or vehicle security, or loans that have a total cost of credit below a rate of 36 percent per annum.

By focusing this proposed rule on the types of loans described above, and by proposing to exclude certain types of loans that might otherwise meet the definition of a covered loan from the reach of the proposed rule, the Bureau does not mean to signal any conclusions as to whether it is an unfair or abusive practice to make any other types of loans, such as loans that are not covered by proposed part 1041, without assessing a consumer's ability to repay. Moreover, the proposed rule is not intended to supersede or limit protections imposed by other laws, such as the Military Lending Act and implementing regulations. The coverage limits in this proposal reflect the fact that these are the types of loans the Bureau has studied in depth to date and has chosen to address within the scope of this proposal. Indeed, the Bureau is issuing concurrently with this proposal a Request for Information (the Accompanying RFI) which solicits information and evidence to help assess whether there are other categories of loans for which lenders do not determine the consumer's ability to repay that may pose risks to consumers. The Bureau is also seeking comment in response to the Accompanying RFI as to whether there are additional lender practices with regard to covered loans that may warrant further action by the Bureau.

The Bureau notes that all "covered persons" within the meaning of the Dodd-Frank Act have a duty not to engage in unfair, deceptive, or abusive acts or practices. The Bureau may consider on a case-by-case basis, through its supervisory or enforcement activities, whether practices akin to those addressed here are unfair, deceptive, or abusive in connection with loans not covered by this proposal. The Bureau also may engage in future rulemaking with respect to other types of loans or practices on covered loans at a later date.

3(a) General

Proposed § 1041.3(a) would provide that proposed part 1041 applies to a lender that makes covered loans.

3(b) Covered Loans

Section 1031(b) of the Dodd-Frank Act empowers the Bureau to prescribe rules to identify and prevent unfair, deceptive, or abusive acts or practices associated with consumer financial products or services. Section 1002(5) of the Dodd-Frank Act defines such products or services as those offered or provided for use by consumers primarily for personal, family, or household purposes or, in certain circumstances, those delivered, offered, or provided in connection with a consumer financial product or service. Proposed § 1041.3(b) would provide generally that a covered loan means closed-end or open-end credit that is extended to a consumer primarily for personal, family, or household purposes that is not excluded by § 1041.3(e).

By specifying that the rule would apply only to loans that are extended to consumers primarily for personal, family, or household purposes, the Bureau intends to exclude loans that are made primarily for a business, commercial, or agricultural purpose. But a lender would violate proposed part 1041 if it extended a loan ostensibly for a business purpose and failed to comply with the requirements of proposed part 1041 if the loan in fact is primarily for personal, family, or household purposes. See the section-by-section analysis of proposed § 1041.19 for further discussion of evasion issues.

Proposed comment 3(b)-1 would clarify that whether a loan is covered is generally based on the loan terms at the time of consummation. Proposed comment 3(b)-2 clarifies that a loan could be a covered loan regardless of whether it is structured as open-end or closed-end credit. Proposed comment 3(b)-3 explains that the test for determining the primary purpose of a loan is the same as the test prescribed

by Regulation Z § 1026.3(a) and clarified by the related commentary in supplement I to part 1026. The Bureau believes that lenders are already familiar with the Regulation Z test and that it would be appropriate to apply that same test here to maintain consistency in interpretation across credit markets. Nevertheless, the related commentary in supplement I to part 1026, on which lenders are permitted to rely in interpreting proposed § 1041.3(b), does not discuss particular situations that may arise in the markets that would be covered by proposed part 1041. The Bureau solicits comment on whether the test for determining the primary purpose of a loan presents a risk of lender evasion, and whether additional clarification is needed on how to determine the primary purpose of a covered loan.

3(b)(1)

Proposed § 1041.3(b)(1) would bring within the scope of proposed part 1041 loans in which the consumer is required to repay substantially the entire amount due under the loan within 45 days of either consummation or the advance of loan proceeds. Loans of this type, as they exist in the market today, typically take the form of single-payment loans, including “payday” loans, vehicle title loans, and deposit advance products. However, coverage under proposed § 1041.3(b)(1) would not be limited to single-payment products, but rather would include any single-advance loan with a term of 45 days or less and any multi-advance loan where repayment is required within 45 days of a credit draw.⁴¹⁷ Under proposed § 1041.2(a)(6), this type of covered loan would be defined as a covered short-term loan.

Specifically, proposed § 1041.3(b)(1) prescribes different tests for determining whether a loan is a covered short-term loan based on whether or not the loan is closed-end credit that does not provide for multiple advances to consumers. For closed-end credit that does not provide for multiple advances to consumers, a loan would be a covered short-term loan if the consumer is required to repay substantially the entire amount of the loan within 45 days of consummation. For all other types of loans, a loan would not be a covered short-term loan if the consumer is required to repay substantially the entire amount of an advance within 45

days of the advance under the loan. As proposed comments 3(b)(1)-1 explains, a loan does not provide for multiple advances to a consumer if the loan provides for full disbursement of the loan proceeds only through disbursement on a single specific date. The Bureau believes that a different test to determine whether a loan is a covered short-term loan is appropriate for loans that provide for multiple advances to consumers because open-end credit and closed-end credit providing for multiple advances may be consummated long before the consumer incurs debt that must be repaid. If, for example, the consumer waited more than 45 days after consummation to draw on an open-end line, but the loan agreement required the consumer to repay the full amount of the draw within 45 days of the draw, the loan would not be practically different than a closed-end loan repayable within 45 days of consummation. The Bureau believes it is appropriate to treat the loans the same for the purposes of proposed § 1041.3(b)(1). The Bureau solicits comment on whether these differential coverage criteria for single-advance and multiple-advance loans are appropriate, particularly in light of unique or emerging loan structures that may pose special challenges or risks.

As described in part II, the terms of short-term loans are often tied to the date the consumer receives his or her paycheck or benefits payment. While pay periods typically vary from one week to one month, and expense cycles are typically one month, the Bureau is proposing 45 days as the upper bound for covered short-term loans in order to accommodate loans that are made shortly before a consumer’s monthly income is received and that extend beyond the immediate income payment to the next income payment. These circumstances could result in loans that are somewhat longer than a month in duration but nonetheless pose similar risks of harm to consumers as loans with a duration of a month or less.

The Bureau also considered proposing to define these short-term loans as loans that are substantially repayable within either 30 days of consummation or advance, 60 days of consummation or advance, or 90 days of consummation or advance. The Bureau is not proposing the 30-day period because, as described above, some loans for some consumers who are paid on a monthly basis can be slightly longer than 30 days, and yet still essentially constitute a one-pay-cycle, one-expense-cycle loan. The Bureau is not proposing either the 60-day or 90-day period because loans with those terms encompass multiple income

and expense cycles, and thus may present somewhat different risks to consumers, though such loans would be covered longer-term loans if they meet the criteria set forth in proposed § 1041.3(b)(2). The Bureau solicits comment on whether covered short-term loans should be defined to include all loans in which the consumer is required to repay substantially the entire amount due under the loan within 45 days of consummation or advance, or whether another loan term is more appropriate.

As discussed further below, the Bureau proposes to treat longer-term loans, as defined in proposed § 1041.3(b)(2), as covered loans only if the total cost of credit exceeds a rate of 36 percent per annum and if the lender or service provider obtains a leveraged payment mechanism or vehicle security as defined in proposed § 1041.3(c) and (d). The Bureau is not proposing similar limitations with respect to the definition of covered short-term loans because the evidence available to the Bureau suggests that the structure and short-term nature of these loans give rise to consumer harm even in the absence of costs above the 36 percent threshold or particular means of repayment.

Proposed comment 3(b)(1)-3 would explain that a determination of whether a loan is substantially repayable within 45 days requires assessment of the specific facts and circumstances of the loan. Proposed comment 3(b)(1)-4 provides guidance on determining whether loans that have alternative, ambiguous, or unusual payment schedules would fall within the definition. The key principle in determining whether a loan would be a covered short-term loan or a covered longer-term loan is whether, under applicable law, the consumer would be considered to be in breach of the terms of the loan agreement if the consumer failed to repay substantially the entire amount of the loan within 45 days of consummation. The Bureau solicits comment on whether the approach explained in proposed comment 3(b)(1)-3 appropriately delineates the distinction between the types of covered loans.

3(b)(2)

Proposed § 1041.3(b)(2) would bring within the scope of proposed part 1041 several types of loans for which, in contrast to loans covered under proposed § 1041.3(b)(1), the consumer is not required to repay substantially the entire amount of the loan or advance within 45 days of consummation or advance. Specifically, proposed § 1041.3(b)(2) would extend coverage to

⁴¹⁷ While application of the 45-day duration limit for covered short-term loans varies based on whether the loan is a single- or multiple-advance loan, the Bureau often uses the phrase “within 45 days of consummation” throughout this proposal as a short-hand way of referring to coverage criteria of both types of loans.

longer-term loans with a total cost of credit exceeding a rate of 36 percent per annum if the lender or service provider also obtains a leveraged payment mechanism as defined in proposed § 1041.3(c) or vehicle security as defined in proposed § 1041.3(d) in connection with the loan before, at the same time, or within 72 hours after the consumer receives the entire amount of funds that the consumer is entitled to receive. Under proposed § 1041.2(a)(8), this type of covered loan would be defined as a covered longer-term loan. Proposed § 1041.2(a)(7) would specifically define covered longer-term balloon-payment loan for purposes of certain provisions in proposed §§ 1041.6, 1041.9, and 1041.10.

As described in more detail in proposed § 1041.8, it appears to the Bureau to be an unfair and abusive practice for a lender to make covered longer-term loans without determining that the consumer has the ability to repay the loan. The Bureau discusses the thresholds that would trigger the definition of covered longer-term loan and seeks related comment below. The Bureau recognizes that the criteria set forth in proposed § 1041.3(b)(2) may encompass some loans that are not used for the same types of liquidity needs that have been the primary focus of the Bureau's study. For example, some lenders make unsecured loans to finance purchases of household durable goods or to enable consumers to consolidate preexisting debt. Such loans are typically for larger amounts or longer terms than, for example, a typical payday loan. On the other hand, larger and longer-term loans that have a higher cost, if secured by a leveraged payment mechanism or vehicle security, may pose enhanced risk to consumers in their own right, and an exclusion for larger or longer-term loans could provide an avenue for lender evasion of the consumer protections imposed by proposed part 1041. The Bureau also solicits comment on whether coverage under proposed § 1041.3(b)(2) should be limited by a maximum loan amount and, if so, what the appropriate amount would be. The Bureau further solicits comment on whether any such limitation should apply only with respect to fully amortizing loans in which payments are not timed to coincide with the consumer's paycheck or other expected receipt of income, and whether any other protective conditions, such as the absence of a prepayment penalty or restrictions on methods of collection in the event of a default, should accompany and such limitation.

As noted above, the Bureau is publishing an Accompanying RFI concurrent with this notice of proposed rulemaking soliciting information and evidence to help assess whether there are other categories of loans that are generally made without underwriting and as to which the failure to assess the consumer's ability to repay is unfair or abusive. Further, as the Accompanying RFI indicates, the Bureau may, in an individual supervisory or enforcement action, assess whether a lender's failure to make such an assessment is unfair or abusive. As reflected in the Accompanying RFI, the Bureau is particularly interested to seek information to determine whether loans involving a non-purchase money security in personal property or holding consumers' personal identification documents create the same lender incentives and increased risk of consumer harms as described below with regard to leveraged payment mechanisms and vehicle security.

3(b)(2)(i)

Proposed § 1041.3(b)(2)(i) would bring within the scope of proposed part 1041 the above-described longer-term loans only to the extent that they are subject to a total cost of credit, as defined in proposed § 1041.2(a)(18), exceeding a rate of 36 percent per annum. This total cost of credit demarcation would apply only to those types of loans listed in § 1041.3(b)(2); the types of loans listed in proposed § 1041.3(b)(1) would be covered even if their total cost of credit is below 36 percent per annum. The total cost of credit measure set forth in proposed § 1041.2(a)(18) includes a number of charges that are not included in the APR measure set forth in Regulation Z, 12 CFR 1026.4 in order to more fully reflect the true cost of the loan to the consumer.

Proposed § 1041.3(b)(2)(i) would bring within the scope of proposed part 1041 only longer-term loans with a total cost of credit exceeding a rate of 36 percent per annum in order to focus regulatory treatment on the segment of the longer-term credit market on which the Bureau has significant evidence of consumer harm. As explained in proposed comment 3(b)(2)-1, using a cost threshold excludes certain loans with a term of longer than 45 days and for which lenders may obtain a leveraged payment mechanism or vehicle security, but which the Bureau is not proposing to cover in this rulemaking. For example, the cost threshold would exclude from the scope of coverage low-cost signature loans even if they are repaid through the lender's access to the consumer's deposit account.

The Bureau's research has focused on loans that are typically priced with a total cost of credit exceeding a rate of 36 percent per annum. Further, the Bureau believes that as the cost of a loan increases, the risk to the consumer increases, especially where the lender obtains a leveraged payment mechanism or vehicle security. When higher-priced loans are coupled with the preferred payment position derived from a leveraged payment mechanism or vehicle security, the Bureau believes that lenders have a reduced incentive to underwrite carefully since the lender will have the ability to extract payments even from some consumers who cannot afford to repay and will in some instances be able to profit from the loan even if the consumer ultimately defaults. As discussed above in connection with proposed § 1041.2(a)(18), the Bureau believes that it may be more appropriate to use a total cost of credit threshold rather than traditional APR.

The Bureau recognizes that numerous State laws impose a 36 percent APR usury limit, meaning that it is illegal under those laws to charge an APR higher than 36 percent. That 36 percent APR ceiling reflects the judgment of those States that loans with rates above that limit are per se harmful to consumers and should be prohibited. Congress made a similar judgment in the Military Lending Act in creating a 36 percent all-in APR usury limit with respect to credit extended to servicemembers and their families. Congress, in section 1027(o) of the Dodd-Frank Act,⁴¹⁸ has determined that the Bureau is not to "establish a usury limit," and the Bureau respects that determination. The Bureau is not proposing to prohibit lenders from charging interest rates, APRs, or all-in costs above the demarcation. Rather, the Bureau is proposing to require that lenders make a reasonable assessment of consumers' ability to repay certain loans above the 36 percent demarcation, in light of evidence of consumer harms in the market for loans with this characteristic.

The Bureau believes for the reasons set forth above and in the section-by-section analysis of proposed § 1041.9, that it is appropriate to focus regulatory attention on the segment of longer-term lending that poses the greatest risk of causing the types of harms to consumers

⁴¹⁸ Section 1027(o) of the Dodd-Frank Act provides that "No provision of this title shall be construed as conferring authority on the Bureau to establish a usury limit applicable to an extension of credit offered or made by a covered person to a consumer, unless explicitly authorized by law." 12 U.S.C. 5517(o).

that this proposal is meant to address, and that price is an element in defining that segment. The Bureau also believes that setting the line of demarcation at 36 percent would facilitate compliance given its use in other contexts, such as the Military Lending Act. Such differential regulation does not implicate section 1027(o) of the Dodd-Frank Act. The Bureau believes that the prohibition on the Bureau “establish[ing] a usury limit” is reasonably interpreted not to prohibit such differential regulation given that the Bureau is not proposing to prohibit lenders from charging interest rates above a specified limit.

The Bureau recognizes that a number of States impose a usury threshold lower than 36 percent per annum for various types of covered loans. Like all State usury limits, and, indeed, like all State laws and regulations that provide additional protections to consumers over and above those contained in the proposed rule, those limits would not be affected by this rule. At the same time, the Bureau is conscious that other States have set other limits and notes that the total cost of credit threshold is not meant to restrict the ability of lenders to offer higher-cost loans. The total cost of credit threshold is intended solely to demarcate loans that—when they include certain other features such as a leveraged payment mechanism or vehicle security—pose an increased risk of causing the type of harms to consumers that this proposal is meant to address. The protections imposed by this proposal would operate as a floor across the country, while leaving State and local jurisdictions to adopt additional regulatory requirements (whether a usury limit or another form of protection) above that floor as they judge appropriate to protect consumers in their respective jurisdictions.

Thus, the Bureau believes that a total cost of credit exceeding 36 percent per annum provides a useful line of demarcation. The Bureau solicits comment on whether a total cost of credit of 36 percent per annum is an appropriate measurement for the purposes of proposed § 1041.3(b)(2)(i) or whether a lower or higher measure would be more appropriate. In the discussion of proposed § 1041.2(a)(18), the Bureau has solicited comment on the components of the total cost of credit metric and the tradeoffs involved in using this metric relative to annual percentage rate.

3(b)(2)(ii)

Proposed § 1041.3(b)(2)(ii) would bring within the scope of proposed part 1041 loans in which the lender or a

service provider obtains a leveraged payment mechanism, as defined by proposed § 1041.3(c), or vehicle security, as defined by proposed § 1041.3(d), before, at the same time, or within 72 hours after the consumer receives the entire amount of funds that the consumer is entitled to receive under the loan. A leveraged payment mechanism gives a lender the right to initiate a transfer of money from a consumer’s account to satisfy an obligation. The Bureau believes that loans in which the lender obtains a leveraged payment mechanism may pose an increased risk of harm to consumers, especially where payment schedules are structured so that payments are timed to coincide with expected income flows into the consumer’s account. As detailed in the section-by-section analyses of proposed §§ 1041.9 and 1041.13, the Bureau believes that the practice of extending higher-cost credit that has a leveraged payment mechanism or vehicle security without reasonably determining the consumer’s ability to repay the loan appears to constitute an unfair and abusive act or practice.

The loans that would be covered under the proposal vary widely as to the basis for leveraged payment mechanism as well as cost, structure, and level of underwriting. Through its outreach, the Bureau is aware that some stakeholders have expressed concern that certain loans that might be considered less risky for consumers would be swept into coverage by virtue of a lien against the consumer’s account granted to the depository lender by Federal statute. The Bureau is not proposing an exemption for select bases for leveraged payment mechanism but is proposing, as is set forth in §§ 1041.11 and 1041.12, conditional exemptions from certain requirements for covered loans made by any lender, including depositories, with certain features that would present less risk to consumers.

The proposed rule would not prevent a lender from obtaining a leveraged payment mechanism or vehicle security when originating a loan. The Bureau recognizes that consumers may find it a convenient or a useful form of financial management to authorize a lender to deduct loan payments automatically from a consumer’s account or paycheck. The proposal would not prevent a consumer from doing so. The Bureau also recognizes that obtaining a leveraged payment mechanism or vehicle security generally reduces the lender’s risk. The proposal would not prohibit a lender from doing so. Rather, the proposal would impose a duty on lenders to determine the consumer’s

ability to repay when a lender obtains a leveraged payment mechanism or vehicle security. As discussed above with regard to proposed § 1041.2(a)(17), the requirement would apply where either the lender or its service provider obtains a leveraged payment mechanism or vehicle security in order to assure comprehensive coverage.

The Bureau is not proposing to cover longer-term loans made without a leveraged payment mechanism or vehicle security in part because if a lender is not assured of obtaining a leveraged payment mechanism or vehicle security as of the time the lender makes the loan, the Bureau believes the lender has a greater incentive to determine the consumer’s ability to repay. If, however, the lender is essentially assured of obtaining a leveraged payment mechanism or vehicle security as of the time the lender makes the loan, the Bureau believes the lender has less of an incentive to determine the consumer’s ability to repay.

For this reason, as proposed comment 3(b)(2)(ii)-1 explains, a lender or service provider obtaining a leveraged payment mechanism or vehicle security would trigger coverage under proposed part 1041 only if the lender or service provider obtains the leveraged payment mechanism or vehicle security before, at the same time as, or within 72 hours after the consumer receives the entire amount of funds that the consumer is entitled to receive under the loan. A loan would not be covered under proposed § 1041.3(b)(2)(ii) if the lender or service provider obtains a leveraged payment mechanism or vehicle security more than 72 hours after the consumer receives the entire amount of funds that the consumer is entitled to receive under the loan.

The Bureau is proposing this 72-hour timeframe rather than focusing solely on obtaining leveraged payment mechanisms or vehicle security taken at consummation because the Bureau is concerned that lenders could otherwise consummate loans in reliance on the lenders’ ability to exert influence over the customer and extract a leveraged payment mechanism or vehicle security while the funds are being disbursed and shortly thereafter. As discussed below, the Bureau is concerned that if the lender is confident it can obtain a leveraged payment mechanism or a vehicle security interest, the lender is less likely to evaluate carefully whether the consumer can afford the loan. The Bureau believes that the lender’s leverage will ordinarily have diminished by 72 hours after the consumer receives the entirety of the

funds available under the loan and that the proposed 72-hour rule would help to ensure that the lender will engage in appropriate consideration of the consumer's ability to repay the loan. Accordingly, the Bureau believes that it is generally appropriate to use the relative timing of disbursement and leveraged payment mechanism or vehicle security authorization to determine whether a loan should be subject to the consumer protections imposed by proposed part 1041.

However, even with this general approach, the Bureau is concerned that lenders might seek to evade the intended scope of the rule if they were free to offer incentives or impose penalties on consumers after the 72-hour period in an effort to secure a leveraged payment mechanism or vehicle security. Accordingly, as described below in connection with the anti-evasion provisions proposed in § 1041.19, the Bureau is proposing comment 19(a)-2.i.B to state that it is potentially an evasion of proposed part 1041 for a lender to offer an incentive to a consumer or create a detriment for a consumer in order to induce the consumer to grant the lender a leveraged payment mechanism or vehicle title in connection with a longer-term loan with total cost of credit exceeding a rate of 36 percent per annum unless the lender determines that the consumer has the ability to repay.

Proposed comment 3(b)(2)(ii)-2 further explains how to determine whether a consumer has received the entirety of the loan proceeds. For closed-end loans, a consumer receives the entirety of the loan proceeds if the consumer can receive no further funds without consummating another loan. For open-end loans, a consumer receives the entirety of the loan proceeds if the consumer fully draws down the entire credit plan and can receive no further funds without replenishing the credit plan, increasing the amount of the credit plan, repaying the balance, or consummating another loan. Proposed comment 3(b)(2)(ii)-3 explains that a contract provision granting the lender or service provider a leveraged payment mechanism or vehicle security contingent on some future event is sufficient to bring the loan within the scope of coverage.

The approach taken in proposed § 1041.3(b)(2)(ii) differs from the approach considered in the Small Business Review Panel Outline. Under the approach in the Small Business Review Panel Outline, a loan with a term of more than 45 days would be covered if a lender obtained a leveraged payment mechanism or vehicle security

before the first payment was due on the loan. Upon further consideration, however, the Bureau believes that the approach in proposed § 1041.3(b)(2)(ii) is appropriate to ensure coverage of situations in which lenders obtain a leveraged payment mechanism or vehicle security in connection with a new extension on an open-end credit plan that was not a covered loan at original consummation, or prior to a modification or refinancing of an existing open- or closed-end credit plan that was not a covered loan at original consummation. The Bureau believes that this approach has the benefit of ensuring adequate consumer protections in origination situations in which lenders may not have an incentive to determine the consumer's ability to repay, while at the same time allowing for consumers to set up automatic repayment as a matter of convenience at a later date.

The Bureau solicits comment on the criteria for coverage set forth in proposed § 1041.3(b)(2)(ii), including whether the criteria should be limited to cover loans where the scheduled payments are timed to coincide with the consumer's expected inflow of income. In addition, the Bureau seeks comment on the basis on which, and the timing at which, a determination should be made as to whether a lender has secured a leveraged payment mechanism or vehicle security. For example, in outreach, some consumer advocates have suggested that a loan should be treated as a covered loan if the lender reasonably anticipates that it will obtain a leveraged payment mechanism or vehicle security at any time while the loan is outstanding based on the lender's experience with similar loans. The Bureau invites comments on the workability of such a test and, if adopted, where to draw the line to define the point at which the lender's prior success in obtaining a leveraged payment mechanism or vehicle security would trigger coverage for future loans.

The Bureau also notes that while consumers may elect to provide a leveraged payment mechanism post-consummation for their own convenience, it is more difficult to envision circumstances in which a consumer would choose to grant vehicle security post-consummation. One possible scenario would be that a consumer is having trouble repaying the loan and provides a security interest in the consumer's vehicle in exchange for a concession by the lender. The Bureau is concerned that a consumer who provides a vehicle security under such circumstances may face a significant risk of harm. The Bureau therefore

solicits comment on whether a loan with an all-in cost of credit above 36 percent should be deemed a covered loan if, at any time, the lender obtains vehicle security. However, given the limited circumstances in which a consumer would grant vehicle security after consummation, the Bureau also seeks comment on whether, for a loan with an all-in cost of credit above 36 percent, lenders should be prohibited from taking a security interest in a vehicle after consummation.

3(c) Leveraged Payment Mechanism

Proposed § 1041.3(c) would set forth three ways that a lender or a service provider could obtain a leveraged payment mechanism that would bring the loan within the proposed coverage of proposed part 1041. A lender would obtain a leveraged payment mechanism if the lender has the right to initiate a transfer of money from the consumer's account to repay the loan, if the lender has the contractual right to obtain payment from the consumer's employer or other payor of expected income, or if the lender requires the consumer to repay the loan through payroll deduction or deduction from another source of income. In all three cases, the consumer is required, under the terms of an agreement with the lender, to cede autonomy over the consumer's account or income stream in a way that the Bureau believes changes that lender's incentives to determine the consumer's ability to repay the loan and can exacerbate the harms the consumer experiences if the consumer does not have the ability to repay the loan and still meet the consumer's major financial obligations and basic living expenses. As explained in the section-by-section analysis of proposed §§ 1041.8 and 1041.9, the Bureau believes that it is an unfair and abusive practice for a lender to make such a loan without determining that the consumer has the ability to repay.

3(c)(1)

Proposed § 1041.3(c)(1) would generally provide that a lender or a service provider obtains a leveraged payment mechanism if it has the right to initiate a transfer of money, through any means, from a consumer's account (as defined in proposed § 1041.2(a)(1)) to satisfy an obligation on a loan. For example, this would occur with a post-dated check or preauthorization for recurring electronic fund transfers. However, the proposed regulation would not define leveraged payment mechanism to include situations in which the lender or service provider initiates a one-time electronic fund

transfer immediately after the consumer authorizes such transfer.

As proposed comment 3(c)(1)-1 explains, the key principle that makes a payment mechanism “leveraged” is whether the lender has the ability to “pull” funds from a consumer’s account without any intervening action or further assent by the consumer. In those cases, the lender’s ability to pull payments from the consumer’s account gives the lender the ability to time and initiate payments to coincide with expected income flows into the consumer’s account. This means that the lender may be able to continue to obtain payment (as long as the consumer receives income and maintains the account) even if the consumer does not have the ability to repay the loan while meeting his or her major financial obligations and basic living expenses. In contrast, a payment mechanism in which the consumer “pushes” funds from his or her account to the lender does not provide the lender leverage over the account in a way that changes the lender’s incentives to determine the consumer’s ability to repay the loan or exacerbates the harms the consumer experiences if the consumer does not have the ability to repay the loan.

Proposed comment 3(c)(1)-2 provides examples of the types of authorizations for lender-initiated transfers that constitute leveraged payment mechanisms. These include checks written by the consumer, authorizations for electronic fund transfers (other than immediate one-time transfers as discussed further below), authorizations to create or present remotely created checks, and authorizations for certain transfers by account-holding institutions (including a right of set-off). Proposed comment 3(c)(1)-3 explains that a lender does not obtain a leveraged payment mechanism if a consumer authorizes a third party to transfer money from the consumer’s account to a lender as long as the transfer is not made pursuant to an incentive or instruction from, or duty to, a lender or service provider. The Bureau solicits comment on whether this definition of leveraged payment mechanism appropriately captures payment methods that are likely to produce the risks to consumers identified by the Bureau in the section-by-section analysis of proposed § 1041.8.

As noted above, proposed § 1041.3(c)(1) would provide that a lender or service provider does not obtain a leveraged payment mechanism by initiating a one-time electronic fund transfer immediately after the consumer authorizes the transfer. This provision is

similar to what the Bureau is proposing in § 1041.15(b), which exempts lender from providing the payment notice when initiating a single immediate payment transfer at the consumer’s request, as that term is defined in § 1041.14(a)(2), and is also similar to what the Bureau is proposing in § 1041.14(d), which permits lenders to initiate a single immediate payment transfer at the consumer’s request even after the prohibition in proposed § 1041.14(b) on initiating further payment transfers has been triggered.

Accordingly, proposed comment 3(c)(1)-3 would clarify that if the loan agreement between the parties does not otherwise provide for the lender or service provider to initiate a transfer without further consumer action, the consumer may authorize a one-time transfer without causing the loan to be a covered loan. Proposed comment 3(c)(1)-3 further clarifies that the phrase “immediately” means that the lender initiates the transfer after the authorization with as little delay as possible, which in most circumstances will be within a few minutes.

The Bureau anticipates that scenarios involving authorizations for immediate one-time transfers will only arise in certain discrete situations. For closed-end loans, a lender is permitted to obtain a leveraged payment mechanism more than 72 hours after the consumer has received the entirety of the loan proceeds without the loan becoming a covered loan. Thus, in the closed-end context, this exception would only be relevant if the consumer was required to make a payment within 72 hours of receiving the loan proceeds—a situation which is unlikely to occur. However, the situation may be more likely to occur with open-end credit. Longer-term open-end can be covered loans if the lender obtains a leveraged payment mechanism within 72 hours of the consumer receiving the full amount of the funds which the consumer is entitled to receive under the loan. Thus, if a consumer only partially drew down the credit plan, but the consumer was required to make a payment, a one-time electronic fund transfer could trigger coverage without the one-time immediate transfer exception. The Bureau believes it is appropriate for these transfers not to trigger coverage because there is a reduced risk that such transfers will re-align lender incentives in a similar manner as other types of leveraged payment mechanisms.

The Bureau solicits comment on whether this exclusion from the definition of leveraged payment mechanism is appropriate and whether additional guidance is needed. The

Bureau also solicits comment on whether any additional exceptions to the general principle of proposed § 1041.3(c)(1) are appropriate.

3(c)(2)

Proposed § 1041.3(c)(2) would provide that a lender or a service provider obtains a leveraged payment mechanism if it has the contractual right to obtain payment directly from the consumer’s employer or other payor of income. This scenario typically involves a wage assignment, which, as described by the FTC, is “a contractual transfer by a debtor to a creditor of the right to receive wages directly from the debtor’s employer. To activate the assignment, the creditor simply submits it to the debtor’s employer, who then pays all or a percentage of debtor’s wages to the creditor.”⁴¹⁹ These arrangements are creatures of State law and can take various forms. For example, they can be used either as a method of making regular payments during the term of the loan or as a collections tool when borrowers default. Such arrangements are legal in some jurisdictions, but illegal in others.

As discussed further in Market Concerns—Short-Term Loans, the Bureau is concerned that where loan agreements provide for assignments of income, the lender incentives and potential consumer risks can be very similar to those presented by other forms of leveraged payment mechanism defined in proposed § 1041.3(c). In particular, a lender—as when it has the right to initiate transfers from a consumer’s account—can continue to obtain payment as long as the consumer receives income, even if the consumer does not have the ability to repay the loan while meeting her major financial obligations and basic living expenses. And—as when a lender has the right to initiate transfers from a consumer’s account—an assignment of income can change the lender’s incentives to determine the consumer’s ability to repay the loan and exacerbate the harms the consumer experiences if the consumer does not have the ability to repay the loan. Thus, the Bureau believes that loan agreements that provide for assignments of income may present the same risk of harm to consumers as other types of leveraged payment mechanisms. The Bureau seeks comment on the proposed definition and whether additional guidance is needed.

The Bureau recognizes that some consumers may find it a convenient or useful form of financial management to

⁴¹⁹ 49 FR 7740, 7755 (Mar. 1, 1984).

repay a loan through a revocable wage assignment. The proposed rule would not prevent a consumer from doing so. Rather, the proposed rule would impose a duty on lenders to determine the consumer's ability to repay when the lender or service provider has the right to obtain payment directly from the consumer's employer or other payor of income.

3(c)(3)

Proposed § 1041.3(c)(3) would provide that a lender or a service provider obtains a leveraged payment mechanism if the loan requires the consumer to repay through a payroll deduction or deduction from another source of income. As proposed comment 3(c)(3)-1 explains, a payroll deduction involves a direction by the consumer to the consumer's employer (or other payor of income) to pay a portion of the consumer's wages or other income to the lender or service provider, rather than a direction by the lender to the consumer's employer as in a wage assignment. The Bureau is concerned that if an agreement between the lender and consumer requires the consumer to have his or her employer or other payor of income pay the lender directly, the consumer would be in the same situation and face the same risk of harm as if the lender had the ability to initiate a transfer from the consumer's account or had a right to a wage assignment.

The Bureau recognizes that just as some consumers may find it a convenient or useful form of financial management to authorize a lender to deduct loan payments automatically from a consumer's account, so, too, may some consumers find it a convenient or useful form of financial management to authorize their employer to deduct loan payments automatically from the consumer's paycheck and remit the money to the lender. The proposed rule would not prevent a consumer from doing so. Rather, the proposed rule would impose a duty on lenders to determine the consumer's ability to repay only when a lender requires the consumer to authorize such payroll deduction as a condition of the loan thereby imposing a contractual obligation on the consumer to continue such payroll deduction during the term of the loan. The Bureau solicits comment on whether a lender should have a duty to determine the consumer's ability to repay only when the lender requires payroll deduction, or whether such a duty should also apply when the lender incentivizes payroll deduction.

3(d) Vehicle Security

Proposed § 1041.3(d) would provide that a lender or service provider obtains vehicle security if the lender or service provider obtains an interest in a consumer's motor vehicle, regardless of how the transaction is characterized under State law. Under proposed § 1041.3(d), a lender or service provider could obtain vehicle security regardless of whether the lender or service provider has perfected or recorded the interest. A lender or service provider also would obtain vehicle security under proposed § 1041.3(d) if the consumer pledges the vehicle to the lender or service provider in a pawn transaction and the consumer retains possession of the vehicle during the loan. In each case, a lender or service provider would obtain vehicle security under proposed § 1041.3(d) if the consumer is required, under the terms of an agreement with the lender or service provider, to grant an interest in the consumer's vehicle to the lender in the event that the consumer does not repay the loan.

However, as noted above and discussed further below, proposed § 1041.3(e) would exclude loans made solely and expressly for the purpose of financing a consumer's initial purchase of a motor vehicle in which the lender takes a security interest as a condition of the credit, as well as non-recourse pawn loans in which the lender has sole physical possession and use of the property for the entire term of the loan. Proposed comment 3(d)(1)-1 also clarifies that mechanic liens and other situations in which a party obtains a security interest in a consumer's motor vehicle for a reason that is unrelated to an extension of credit do not trigger coverage.

The Bureau believes that when a lender obtains vehicle security in connection with the consummation of a loan, the lender effectively achieves a preferred payment position similar to the position that a lender obtains with a leveraged payment mechanism. If the loan is unaffordable, the consumer will face the difficult choice of either defaulting on the loan and putting the consumer's automobile (and potentially the consumer's livelihood) at risk or repaying the loan even if doing so means defaulting on major financial obligations or foregoing basic living needs. As a result, the lender has limited incentive to assure that the consumer has the ability to repay the loan. For these reasons, the Bureau believes that it is appropriate to include within the definition of covered longer-term loans those loans for which the

lender or service provider obtains vehicle security before, at the same time as, or within 72 hours after the consumer receives all the funds the consumer is entitled to receive under the loan. However, as noted above, the Bureau solicits comment on whether a longer-term loan with an all-in cost of credit above 36% should be deemed a covered loan if, at any time, the lender obtains vehicle security.

3(d)(1)

Proposed § 1041.3(d)(1) would provide that any security interest that the lender or service provider obtains as a condition of the loan would constitute vehicle security for the purpose of determining coverage under proposed part 1041. The term security interest would include any security interest that the lender or service provider has in the consumer's vehicle, vehicle title, or vehicle registration. As proposed comment 3(d)(1)-1 clarifies, a party would not obtain vehicle security if that person obtains a security interest in the consumer's vehicle for a reason unrelated to the loan.

The security interest would not need to be perfected or recorded in order to trigger coverage under proposed § 1041.3(d)(1). The consumer may not be aware that the security interest is not perfected or recorded, nor would it matter in many cases. Perfection or recordation protects the lender's interest in the vehicle against claims asserted by other creditors, but does not necessarily affect whether the consumer's interest in the vehicle is at risk if the consumer does not have the ability to repay the loan. Even if the lender or service provider does not perfect or record its security interest, the security interest can still change a lender's incentives to determine the consumer's ability to repay the loan and exacerbate the harms the consumer experiences if the consumer does not have the ability to repay the loan.

3(d)(2)

Proposed § 1041.3(d)(2) would provide that pawn transactions generally would constitute vehicle security for the purpose of determining coverage under proposed part 1041 if the consumer pledges the vehicle in connection with the transaction and the consumer retains use of the vehicle during the term of the pawn agreement. However, pawn transactions would not trigger coverage if they fell within the scope of proposed § 1041.3(e)(5), which would exclude bona fide non-recourse pawn transactions where the lender obtains custody of the vehicle and there is no recourse against the consumer for

the balance due if the consumer is unable to repay the loan.

The proposed language is designed to account for the fact that, in response to laws in several jurisdictions, lenders have structured higher-cost, vehicle-secured loans as pawn agreements,⁴²⁰ though these “vehicle pawn” or “title pawn” loans are the functional equivalent of loans covered by proposed § 1041.3(d) in which the lender has vehicle security because the terms on which the loans are offered are similar. Further, the ramifications for both the lender and the consumer are similar in the event the consumer does not have the ability to repay the loan—the lender can repossess the consumer’s vehicle and sell it. And, as also discussed in the section-by-section analysis for proposed § 1041.3(e)(5), vehicle pawn and title pawn loans often do not require the consumer to relinquish physical control of the motor vehicle while the loan is outstanding, which is likely to make the threat of repossession a more powerful form of leverage should the consumer not repay the covered loan. Accordingly, the Bureau proposes to treat vehicle title pawn loans the same as vehicle security loans for the purposes of proposed part 1041.

3(e) Exclusions

Proposed § 1041.3(e) would exclude purchase money security interest loans extended solely for the purchase of a good, real estate secured loans, certain credit cards, student loans, non-recourse pawn loans in which the consumer does not possess the pledged collateral, and overdraft services and lines of credit. The Bureau believes that notwithstanding the potential term, cost of credit, repayment structure, or security of these loans, they arise in distinct markets that the Bureau believes may pose a somewhat different set of concerns for consumers. At the same time, as discussed further below, the Bureau is concerned that there may be a risk that these exclusions would create avenues for evasion of the proposed rule.

The Bureau solicits comment on whether any of these excluded types of loans should also be covered under proposed part 1041. The Bureau further solicits comment on whether there are reasons for excluding other types of products from coverage under proposed part 1041. As noted above, the Bureau is also soliciting in the Accompanying RFI information and additional evidence to support in further assessment of whether there are other

categories of loans for which lenders do not determine the consumer’s ability to repay that may pose risks to consumers. The Bureau emphasizes that it may determine in a particular supervisory or enforcement matter or in a subsequent rulemaking in light of evidence available at the time that the failure to assess ability to repay when making a loan excluded from coverage here may nonetheless be an unfair or abusive act or practice.

3(e)(1) Certain Purchase Money Security Interest Loans

Proposed § 1041.3(e)(1) would exclude from coverage under proposed part 1041 loans extended for the sole and express purpose of financing a consumer’s initial purchase of a good when the good being purchased secures the loan. Accordingly, loans made solely to finance the purchase of, for example, motor vehicles, televisions, household appliances, or furniture would not be subject to the consumer protections imposed by proposed part 1041 to the extent the loans are secured by the good being purchased. Proposed comment 3(e)(1)-1 explains the test for determining whether a loan is made solely for the purpose of financing a consumer’s initial purchase of a good. If the item financed is not a good or if the amount financed is greater than the cost of acquiring the good, the loan is not solely for the purpose of financing the initial purchase of the good. Proposed comment 3(e)(1)-1 further explains that refinances of credit extended for the purchase of a good do not fall within this exclusion and may be subject to the requirements of proposed part 1041.

Purchase money loans are typically treated differently than non-purchase money loans under the law. The FTC’s Credit Practices Rule generally prohibits consumer credit in which a lender takes a nonpossessory security interest in household goods but makes an exception for purchase money security interests.⁴²¹ The Federal Bankruptcy Code, the UCC, and some other State laws apply different standards to purchase money security interests. This differential treatment facilitates the financing of the initial purchase of relatively expensive goods, which many consumers would not be able to afford without a purchase money loan. At this time, the Bureau has not determined that purchase money loans pose similar risks to consumers as the loans covered by proposed part 1041. Accordingly, the Bureau is proposing not to cover such loans at this time. The Bureau solicits comment on this exclusion and whether

there are particular types of purchase money loans that pose sufficient risk to consumers to warrant coverage under this proposed rule.

3(e)(2) Real Estate Secured Credit

Proposed § 1041.3(e)(2) would exclude from coverage under proposed part 1041 loans that are secured by real property, or by personal property used as a dwelling, and in which the lender records or perfects the security interest. The Bureau believes that even without this exemption, very few real estate secured loans would meet the coverage criteria set forth in proposed § 1041.3(b). Nonetheless, the Bureau believes a categorical exclusion is appropriate. For the most part, these loans are already subject to Federal consumer protection laws, including, for most closed-end loans, ability-to-repay requirements under Regulation Z § 1026.43. The proposed requirement that the security interest in the real estate be recorded or perfected also strongly discourages attempts to use this exclusion for sham or evasive purposes. Recording or perfecting a security interest in real estate is not a cursory exercise for a lender—recording fees are often charged and documentation is required. As proposed comment 3(e)(2)-1 explains, if the lender does not record or otherwise perfect the security interest in the property during the term of the loan, the loan does not fall under this exclusion and may be subject to the requirements of proposed part 1041. The Bureau solicits comment on this exclusion and whether there are particular types of real-estate secured loans that pose sufficient risk to consumers to warrant coverage under the proposed rule.

3(e)(3) Credit Cards

Proposed § 1041.3(e)(3) would exclude from coverage under proposed part 1041 credit card accounts meeting the definition of “credit card account under an open-end (not home-secured) consumer credit plan” in Regulation Z § 1026.2(a)(15)(ii), rather than products meeting the more general definition of credit card accounts under Regulation Z § 1026.2(a)(15). By focusing on the narrower category, the exemption would apply only to credit card accounts that are subject to the Credit CARD Act of 2009, Public Law 111-24, 123 Stat. 1734 (2009) (CARD Act), which provides various heightened safeguards for consumers. These protections include a limitation that card issuers cannot open a credit card account or increase a credit line on a card account unless the card issuer considers the ability of the consumer to make the required payments under the terms of the

⁴²⁰ See, e.g., Ala. Code § 5-19A-1 through 5-19A-20; Ga. Code § 44-12-130 through 44-12-138.

⁴²¹ 16 CFR 444.2(a)(4).

account, as well as other protections such as limitations on fees during the first year after account opening, late fee restrictions, and a requirement that card issuers give consumers “a reasonable amount of time” to pay their bill.⁴²²

The Bureau believes that, even without this exemption, few traditional credit card accounts would meet the coverage criteria set forth in proposed § 1041.3(b) other than some secured credit card accounts which may have a total cost of credit above 36 percent and provide for a leveraged payment mechanism in the form of a right of set-off. These credit card accounts are subject to the CARD Act protections discussed above. The Bureau believes that potential consumer harms related to credit card accounts are more appropriately addressed by the CARD Act, implementing regulations, and other applicable law. At the same time, if the Bureau were to craft a broad general exemption for all credit cards as generally defined under Regulation Z, the Bureau would be concerned that a lender seeking to evade the requirements of the rule might seek to structure a product in a way designed to take advantage of this exclusion.

The Bureau has therefore proposed a narrower definition focusing only on those credit cards accounts that are subject to the full range of protections under the CARD Act and its implementing regulations. Among other requirements, the regulations imposing the CARD Act prescribe a different ability-to-repay standard that lenders must follow, and the Bureau believes that the combined consumer protections governing credit card accounts subject to the CARD Act are sufficient for that type of credit. To further mitigate potential consumer risk, the Bureau considered adding a requirement that to be eligible for this exclusion, a credit card would have to be either (i) accepted upon presentation by multiple unaffiliated merchants that participate in a widely-accepted payment network, or (ii) accepted upon presentation solely for the bona fide purchase of goods or services at a particular retail merchant or group of merchants. The Bureau solicits comments on whether to exclude credit cards and, if so, whether the criteria proposed to define the exclusion are appropriate, or whether additional criteria should be added to limit the potential evasion risk identified above.

3(e)(4) Student Loans

Proposed § 1041.3(e)(4) would exclude from coverage under proposed part 1041 loans made, insured, or guaranteed pursuant to a Federal student loan program, and private education loans. The Bureau believes that even without this exemption, very few student loans would meet the coverage criteria set forth in proposed § 1041.3(b). Nonetheless, the Bureau believes a categorical exclusion is appropriate. Federal student loans are provided to students or parents meeting eligibility criteria established by Federal law and regulation such that the protections afforded by this proposed rule would be unnecessary. Private student loans are sometimes made to students based upon their future potential ability to repay (as distinguished from their current ability), but are typically co-signed by a party with financial capacity. These loans raise discrete issues that may warrant Bureau attention at a future time, but the Bureau believes that they are not appropriately considered along with the types of loans at issue in this rulemaking. The Bureau continues to monitor the student loan servicing market for trends and developments, unfair, deceptive, or abusive practices, and to evaluate possible policy responses, including potential rulemaking. The Bureau solicits comment on whether this exclusion is appropriate.

3(e)(5) Non-Recourse Pawn Loans

Proposed § 1041.3(e)(5) generally would exclude from coverage under proposed part 1041 loans secured by pawned property in which the lender has sole physical possession and use of the pawned property for the entire term of loan, and for which the lender's sole recourse if the consumer does not redeem the pawned property is the retention and disposal of the property. Proposed comment 3(e)(5)-1 explains that if any consumer, including a co-signor or guarantor, is personally liable for the difference between the outstanding loan balance and the value of the pawned property, the loan does not fall under this exclusion and may be subject to the requirements of proposed part 1041. As discussed above in connection with proposed § 1041.2(a)(13) and below in connection with proposed §§ 1041.6, 1041.7, and 1041.10, however, a non-recourse pawn loan can, in certain circumstances, be a non-covered bridge loan that could impact restrictions on the lender with regard to a later covered short-term loans.

The Bureau believes that bona fide, non-recourse pawn loans generally pose somewhat different risks to consumers than loans covered under proposed part 1041. As described in part II, non-recourse pawn loans involve the consumer physically relinquishing control of the item securing the loan during the term of the loan. The Bureau believes that consumers may be more likely to understand and appreciate the risks associated with physically turning over an item to the lender when they are required to do so at consummation. Moreover, in most situations, the loss of a non-recourse pawned item over which the lender has sole physical possession during the term of the loan is less likely to affect the rest of the consumer's finances than is either a leveraged payment mechanism or vehicle security. For instance, a pawned item of this nature may be valuable to the consumer, but the consumer most likely does not rely on the pawned item for transportation to work or to pay other obligations. Otherwise, the consumer likely would not have pawned the item under these terms. Finally, because the loans are non-recourse, in the event that a consumer is unable to repay the loan, the lender must accept the pawned item as fully satisfying the debt, without further collections activity on any remaining debt obligation.

In all of these ways, pawn transactions appear to differ significantly from the secured loans that would be covered under proposed part 1041. While the loans described in proposed § 1041.3(e)(5) would not be covered loans, lenders may, as described in proposed §§ 1041.6, 1041.7, and 1041.10 be subject to restrictions on making covered loans shortly following certain non-recourse pawn loans that meet certain conditions. The Bureau solicits comment on this exclusion and whether these types of pawn loans should be subject to the consumer protections imposed by proposed part 1041.

3(e)(6) Overdraft Services and Overdraft Lines of Credit

Proposed § 1041.3(e)(6) would exclude from coverage under proposed part 1041 overdraft services on deposit accounts as defined in 12 CFR 1005.17(a), as well as payments of overdrafts pursuant to a line of credit subject to Regulation Z, 12 CFR part 1026. Overdraft services generally operate on a consumer's deposit account as a negative balance, where the consumer's bank processes and pays certain payment transactions for which the consumer lacks sufficient funds in the account and imposes a fee for the

⁴²² 15 U.S.C. 1665e; see also 12 CFR 1026.51(a); Supplement I to 12 CFR part 1026.

service as an alternative to either refusing to authorize the payment (in the case of most debit and ATM transactions and ACH payments initiated from the consumer's account) or rejecting the payment and charging a non-sufficient funds fee (in the case of other ACH payments as well as paper checks). Overdraft services have been exempted from regulation under Regulation Z under certain circumstances, and are subject to specific rules under EFTA⁴²³ and the Truth in Savings Act, and their respective implementing regulations.⁴²⁴ In contrast, overdraft lines of credit are separate open-end lines of credit under Regulation Z that have been linked to a consumer's deposit account to provide automatic credit draws to cover the processing of payments for which there are not sufficient funds in the deposit account.

As discussed above in part II, the Bureau is engaged in research and other activity in anticipation of a separate rulemaking regarding overdraft products and practices.⁴²⁵ Given that overdraft services and overdraft lines of credit involve complex overlays with rules regarding payment processing, deposit accounts, set-off rights, and other forms of depository account access, the Bureau believes that any discussion of whether additional regulatory protections are warranted for those two products should be reserved for that rulemaking. Accordingly, the Bureau is proposing to exempt both types of overdraft products from the scope of this rule, using definitional language in Regulation E to distinguish both overdraft services and overdraft lines of credit from other types of depository credit products. The Bureau solicits comment on whether additional guidance would be helpful to distinguish overdraft services and overdraft lines of credit from other products, whether that distinction is appropriate for purposes of this rulemaking, and whether the Bureau should factor particular product features or safeguards into the way it differentiates between depository credit products.

Subpart B—Short-Term Loans

In proposed § 1041.4, the Bureau proposes to identify an unfair and abusive act or practice with respect to the making of covered short-term loans pursuant to its authority to “prescribe rules . . . identifying as unlawful

unfair, deceptive, or abusive acts or practices.”⁴²⁶ In the Bureau's view, it appears to be both unfair and abusive for a lender to make such a loan without reasonably determining that the consumer has the ability to repay the loan. To avoid committing this unfair and abusive practice, a lender would have to reasonably determine that the consumer has the ability to repay the loan. Proposed §§ 1041.5 and 1041.6 would establish a set of requirements to prevent the unlawful practice by reasonably determining that the consumer has the ability to repay the loan. The Bureau is proposing the ability-to-repay requirements under its authority to prescribe rules for “the purpose of preventing [unfair and abusive] acts or practices.”⁴²⁷ Proposed § 1041.7 would rely on section 1022(b)(3) of the Dodd-Frank Act to exempt from the ability-to-repay requirements in proposed §§ 1041.5 and 1041.6, as well as from the prohibition in § 1041.4 certain covered short-term loans which satisfy a set of conditions designed to avoid the harms that can result from unaffordable loans.

Accordingly, lenders seeking to make covered short-term loans would have the choice, on a case by case basis, either to follow proposed §§ 1041.5 and 1041.6, or proposed § 1041.7.

The predicate for the proposed identification of an unfair and abusive act or practice in proposed § 1041.4—and thus for the prevention requirements contained in proposed §§ 1041.5 and 1041.6—is a set of preliminary findings with respect to the consumers who use storefront and online payday loans, single-payment auto title loans, and other short-term loans, and the impact on those consumers of the practice of making such loans without assessing the consumers' ability to repay.⁴²⁸ Those preliminary findings are set forth in the discussion below, hereinafter referred to as Market Concerns—Short-Term Loans. After laying out these preliminary findings, the Bureau sets forth, in the section-by-section analysis of proposed § 1041.4, its reasons for proposing to identify as unfair and abusive the practice described in proposed § 1041.4. The Bureau seeks comment on all

aspects of this subpart, including the intersection of the proposed interventions with existing State, tribal, and local laws and whether additional or alternative protections should be considered to address the core harms discussed below.

Market Concerns—Short-Term Loans

The Bureau is concerned that lending practices in the markets for storefront and online payday lending, single-payment vehicle title, and other short-term loans are causing harm to many consumers who use these products, including extended sequences of reborrowing, delinquency and defaults, and certain collateral harms from making unaffordable payments. This section reviews the available evidence with respect to the consumers who use payday and short-term auto title loans, their reasons for doing so, and the outcomes they experience. It also reviews the lender practices that cause these outcomes. The Bureau preliminarily finds:

- *Lower-income, lower-savings consumers.* Consumers who use these products tend to come from lower or moderate income households. They generally do not have any savings to fall back on, and they have very limited access to other sources of credit; indeed, typically they have sought unsuccessfully to obtain other, lower cost, credit before turning to a short-term loan.

- *Consumers in financial difficulty.* Some consumers turn to these products because they have experienced a sudden drop in income (“income shock”) or a large unexpected expense (“expense shock”). Other borrowers are in circumstances in which their expenses consistently outstrip their income. A sizable percentage of users report that they would have taken a loan on any terms offered.

- *Loans do not function as marketed.* Lenders market single-payment products as short-term loans designed to provide a bridge to the consumer's next payday or other income receipt. In practice, however, the amounts due consume such a large portion of the consumer's paycheck or other periodic income source as to be unaffordable for most consumers seeking to recover from an income or expense shock and even more so for consumers with a chronic income shortfall. Lenders actively encourage consumers either simply to pay the finance charges due and roll over the loan instead of repaying the loan in full (or effectively roll over the loan by returning to reborrow in the days after repaying the loan). Indeed, lenders are dependent upon such

⁴²⁶ 12 U.S.C. 5531(b).

⁴²⁷ *Id.*

⁴²⁸ The Bureau's analysis of this market is based primarily on research regarding payday loans, single-payment auto title loans, and deposit advance products. The Bureau is not aware of other substantial product offerings that would meet the definition of covered short-term loans, but as discussed below, believes any product structure involving a similarly short repayment term may pose similar risks to consumers.

⁴²³ 74 FR 59033 (Nov. 17, 2009).

⁴²⁴ 70 FR 29582 (May 24, 2005).

⁴²⁵ CFPB Study of Overdraft Programs White Paper; CFPB Data Point: Checking Account Overdraft.

reborrowing for a substantial portion of their revenue and would lose money if each borrower repaid the loan when due without reborrowing.

- *Very high reborrowing rates.* Not surprisingly, most borrowers find it necessary to reborrow when their loan comes due or shortly after repaying their loan, as other expenses come due. This reborrowing occurs both with payday loans and single-payment vehicle title loans. Fifty percent of all new storefront payday loans are followed by at least three more loans and 33 percent are followed by six more loans. For single-payment vehicle title loans over half (56 percent) of all new loans are followed by at least three more loans, and more than a third (36 percent) are followed by six or more loans. Twenty-one percent of payday loans made to borrowers paid weekly, bi-weekly, or semi-monthly are in loan sequences of 20 loans or more and over forty percent of loans made to borrowers paid monthly are in loan sequences of comparable durations (*i.e.*, 10 or more monthly loans).

- *Consumers do not expect lengthy loan sequences.* Consumers who take out a payday loan do not expect to reborrow to the extent that they do. This is especially true of those consumers who end up in extended cycles of indebtedness. Research shows that when taking out loans consumers are unable accurately to predict how long it will take them to get out of debt, and that this is even truer of consumers who have borrowed heavily in the recent past. Consumers' difficulty in this regard is based, in part, on the fact that such loans involve a basic mismatch between how they appear to function as short-term credit and how they are actually designed to function in long sequences of reborrowing. This disparity creates difficulties for consumers in estimating with any accuracy how long they will remain in debt and how much they will ultimately pay for the initial extension of credit. Research regarding consumer decision-making also helps explain why consumers end up reborrowing more than they expect. People under stress, including consumers in financial crisis, tend to become very focused on their immediate problems and think less about the future. Consumers also tend to underestimate their future expenses, and may be overly optimistic about their ability to recover from the shock they have experienced or to bring their expenses in line with their incomes.

- *Very high default rates.* Some consumers do succeed in repaying short-term loans without reborrowing, and others eventually repay the loan after reborrowing multiple times. But

research shows that approximately 20 percent of payday loan sequences and 33 percent of single-payment vehicle title loan sequences end up with the consumer defaulting. Consumers who are delinquent or who default can become subject to often aggressive and psychologically harmful debt collection efforts. In addition, 20 percent of single-payment vehicle title loan sequences end with borrowers losing their cars or trucks to repossession. Even borrowers who eventually pay off their loans may incur penalty fees, late fees, or overdraft fees along the way, and after repaying may find themselves struggling to pay other bills or meet their basic living expenses.

- *Harms occur despite existing regulation.* The research indicates that these harms from payday loans and other short-term loans persist despite existing regulatory frameworks. In particular, the Bureau is concerned that caps on the amount that a consumer can borrow, rollover limitations, and short cooling-off periods still appear to leave many consumers vulnerable to the specific harms discussed above relating to reborrowing, default, and collateral harms from making unaffordable payments.

The following discussion reviews the evidence underlying each of these preliminary findings.

a. Borrower Characteristics and Circumstances of Borrowing

Borrowers who take out payday and single-payment vehicle title loans are typically low-to-moderate income consumers who are looking for quick access to cash, who have little to no savings, who often have poor credit histories, and who have limited access to other forms of credit. The desire for immediate cash may be the result of an emergency expense or an unanticipated drop in income, but many who take out payday or vehicle title loans are consumers whose living expenses routinely exceed their income.

1. Borrower Characteristics

A number of studies have focused on the characteristics of payday borrowers. For instance, the FDIC and the U.S. Census Bureau have undertaken several special supplements to the Current Population Survey (CPS Supplement); the most recent available data come from 2013.⁴²⁹ The CPS supplement found that 46 percent of payday borrowers (including storefront and online borrowers) have a family income

⁴²⁹ 2013 FDIC National Survey of Unbanked and Underbanked Households: Appendices, at 83.

of under \$30,000.⁴³⁰ A study covering a mix of storefront and online payday borrowers similarly found that 49 percent had income of \$25,000 or less.⁴³¹ Other analyses of administrative data that include the income that borrowers reported to lenders are broadly consistent.⁴³² Additionally, the Bureau found in its analysis of confidential supervisory data that 18 percent of storefront borrowers relied on Social Security or some other form of government benefits or public assistance.⁴³³ The FDIC study further found that payday borrowers are disproportionately Hispanic or African-American (with borrowing rates two to three times higher respectively than for non-Hispanic whites). Female-headed households are more than twice as likely as married couples to be payday borrowers.⁴³⁴

The demographic profiles of vehicle title loan borrowers appear to be roughly comparable to the

⁴³⁰ *Id.*, at Appx. D-12a.

Prot., *Payday Loans and Deposit Advance Products: A White Paper of Initial Data Findings*, at 18 (2013) [hereinafter *CFPB Payday Loans and Deposit Advance Products White Paper*], http://files.consumerfinance.gov/f/201304_cfpb_payday-dap-whitepaper.pdf (reporting that based on confidential supervisory data of a number of storefront payday lenders, borrowers had a reported median annual income of \$22,476 at the time of application (not necessarily household income)). Similarly, data from several State regulatory agencies indicate that average incomes range from about \$31,000 (Delaware) to slightly over \$36,000 (Washington). For Washington, see Wash. Dep't of Fin. Insts., 2014 Payday Lending Report, at 6 (2014), available at <http://www.dfi.wa.gov/sites/default/files/reports/2014-payday-lending-report.pdf>; for Delaware, see Veritec Solutions, *State of Delaware Short-term Consumer Loan Program, Report on Delaware Short-term Consumer Loan Activity For the Year Ending December 31, 2014*, at 6 (2015), available at http://banking.delaware.gov/pdfs/annual/Short_Term_Consumer_Loan_Database_2014_Operations_Report.pdf. Research by nonPrime 101 found the median income for online payday borrowers to be \$30,000. nonPrime101, *Profiling Internet Small-Dollar Lending*, at 7 (2014), <https://www.nonprime101.com/wp-content/uploads/2013/10/Clarity-Services-Profiling-Internet-Small-Dollar-Lending.pdf>.

⁴³³ CFPB *Payday Loans and Deposit Advance Products White Paper*, at 18.

⁴³⁴ 2013 FDIC National Survey of Unbanked and Underbanked Households: Appendices, at Appx. D-12a.

demographics of payday borrowers.⁴³⁵ Calculations from the CPS Supplement indicate that 40 percent of vehicle title borrowers have annual family incomes under \$30,000.⁴³⁶ Another survey likewise found that 56 percent of title borrowers reported incomes below \$30,000, compared with 60 percent for payday borrowers.⁴³⁷ As with payday borrowers, data from the CPS Supplement show vehicle title borrowers to be disproportionately African-American or Hispanic, and more likely to live in female-headed households.

Similarly, a survey of borrowers in three States conducted by academic researchers found that vehicle title borrowers were disproportionately female and minority. Over 58 percent of title borrowers were female. African-Americans were over-represented among borrowers compared to their share of the States' population at large. Hispanic borrowers were over-represented in two of the three states; however, these borrowers were underrepresented in Texas, the State with the highest proportion of Hispanic residents in the study.⁴³⁸

Studies of payday borrowers' credit histories show both poor credit histories and recent credit-seeking activity. An academic paper that matched administrative data from one storefront payday lender to credit bureau data found that the median credit score for a payday applicant was in the bottom 15 percent of credit scores overall.⁴³⁹ The median applicant had one open credit card, but 80 percent of applicants had either no credit card or no credit available on a card. The average borrower had 5.2 credit inquiries on her credit report over the preceding 12

months before her initial application for a payday loan (three times the number for the general population), but obtained only 1.4 accounts on average. This suggests that borrowers made repeated but generally unsuccessful efforts to obtain additional other forms of credit first, and sought the payday loan as a "last resort." They may have credit cards but likely do not have unused credit, are often delinquent on one or more cards, and have often experienced multiple overdrafts and/or NSF's on their checking accounts.⁴⁴⁰ A recent report analyzing credit scores of borrowers from five large storefront payday lenders provides corroborative support, finding that the average borrower had a VantageScore 3.0⁴⁴¹ score of 532 and that over 85 percent of borrowers had a score below 600, indicating high credit risk.⁴⁴² By way of comparison, the national average Vantage Score is 669 and only 30 percent of consumers have a Vantage Score below 600.⁴⁴³

Reports using data from a specialty consumer reporting agency indicate that online borrowers have comparable credit scores to storefront borrowers (a mean VantageScore 3.0 score of 525 versus 532 for storefront).⁴⁴⁴ Another study based on the data from the same specialty consumer reporting agency and an accompanying survey of online small-dollar credit borrowers reports that 79 percent of those surveyed had been denied traditional credit in the past year due to having a low or no credit score, 62 percent had already sought assistance from family and friends, and 24 percent reported having negotiated with a creditor to whom they owed money.⁴⁴⁵ Moreover, heavy use of

online payday loans correlated with more strenuous credit-seeking: Compared to light (bottom quartile) users of online loans, heavy (top quartile) users were more likely to have been denied credit in the past year (87 percent of heavy users compared to 68 percent of light users).⁴⁴⁶

Other surveys of payday borrowers add to the picture of consumers in financial distress. For example, in a survey of payday borrowers published in 2009, fewer than half reported having any savings or reserve funds. Almost a third of borrowers (31.8 percent) reported monthly debt to income payments of 30 percent or higher, and more than a third (36.4 percent) of borrowers reported that they regularly spend all the income they receive.⁴⁴⁷

Similarly, a 2010 survey found that over 80 percent of payday borrowers reported making at least one late payment on a bill in the preceding three months, and approximately one quarter reported frequently paying bills late. Approximately half reported bouncing at least one check in the previous three months, and 30 percent reported doing so more than once.⁴⁴⁸

Likewise, a 2012 survey found that 58 percent of payday borrowers report that they struggled to pay their bills on time. More than a third (37 percent) said they would have taken out a loan on any terms offered. This figure rises to 46 percent when the respondent rated his or her financial situation as particularly poor.⁴⁴⁹

2. Circumstances of Borrowing

Several surveys have asked borrowers why they took out their loans or for what purpose they used the loan proceeds. These are challenging questions to study. Any survey that asks about past behavior or events runs some risk of recall errors. In addition, the fungibility of money makes this question more complicated. For example, a consumer who has an unexpected expense may not feel the effect fully until weeks later, depending on the timing of the unexpected expense relative to other expenses and the receipt of income. In that circumstance, a borrower may say either that she took

out the loan because of the unexpected expense, or that she took out the loan to cover regular expenses. Perhaps because of this difficulty, results across surveys are somewhat inconsistent, with one finding high levels of unexpected expenses, while others find that payday loans are used primarily to pay for regular expenses.

In a 2007 survey of payday borrowers, the most common reason cited for taking out a loan was “an unexpected expense that could not be postponed,” with 71 percent of respondents strongly agreeing with this reason and 16 percent somewhat agreeing.⁴⁵⁰

A 2012 survey of payday loan borrowers, on the other hand, found that 69 percent of respondents took their first payday loan to cover a recurring expense, such as utilities, rent, or credit card bills, and only 16 percent took their first loan for an unexpected expense.⁴⁵¹

Another 2012 survey of over 1,100 users of alternative small-dollar credit products, including pawn, payday, auto title, deposit advance products, and non-bank installment loans, asked separate questions about what borrowers used the loan proceeds for and what precipitated the loan. Responses were reported for “very short term” and “short term” credit; very short term referred to payday, pawn, and deposit advance products. Respondents could report up to three reasons for what precipitated the loan; the most common reason given for very short term borrowing (approximately 37 percent of respondents) was “I had a bill or payment due before my paycheck arrived,” which the authors of the report on the survey results interpret as a mismatch in the timing of income and expenses. Unexpected expenses were cited by 30 percent of very short term borrowers, and approximately 27 percent reported unexpected drops in income. Approximately 34 percent reported that their general living expenses were consistently more than their income. Respondents could also report up to three uses for the funds; the most common answers related to paying for routine expenses, with over 40 percent reporting the funds were used to “pay utility bills,” over 40 percent reporting the funds were used to pay “general living expenses,” and over 20 percent saying the funds were used to pay rent. Of all the reasons for

borrowing, consistent shortfalls in income relative to expenses was the response most highly correlated with consumers reporting repeated usage or rollovers.⁴⁵²

A recent survey of 768 online payday users drawn from a large administrative database of payday borrowers looked at similar questions, and compared the answers of heavy and light users of online loans.⁴⁵³ Based on borrowers’ self-reported borrowing history, borrowers were segmented into heavy users (users with borrowing frequency in the top quartile of the dataset) and light users (bottom quartile). Heavy users were much more likely to report that they “[i]n past three months, often or always ran out of money before the end of the month” (60 percent versus 34 percent). In addition, heavy users were nearly twice as likely as light users to state their primary reason for seeking their most recent payday loan as being to pay for “regular expenses such as utilities, car payment, credit card bill, or prescriptions” (49 percent versus 28 percent). Heavy users were less than half as likely as light users to state their reason as being to pay for an “unexpected expense or emergency” (21 percent versus 43 percent). Notably, 18 percent of heavy users gave as their primary reason for seeking a payday loan online that they “had a storefront loan, needed another [loan]” as compared to just over 1 percent of light users.

b. Lender Practices

The business model of lenders who make payday and single-payment vehicle title loans is predicated on the lenders’ ability to secure extensive reborrowing. As described in the Background section, the typical storefront payday loan has a principal amount of \$350, and the consumer pays a typical fee of 15 percent of the principal amount. That means that if a consumer takes out such a loan and repays the loan when it is due without reborrowing, the typical loan would produce roughly \$50 in revenue to the lender. Lenders would thus require a large number of “one-and-done” consumers to cover their overhead and acquisition costs and generate profits. However, because lenders are able to induce a large percentage of borrowers to repeatedly reborrow, lenders have built a model in which the typical store has, as discussed in part II, two or three employees serving around 500 customers per year. Online lenders do not have the same overhead costs, but

they have been willing to pay substantial acquisition costs to lead generators and to incur substantial fraud losses because of their ability to secure more than a single fee from their borrowers.

The Bureau uses the term “reborrow” to refer to situations in which consumers either roll over a loan (which means they pay a fee to defer payment of the principal for an additional period of time), or take out a new loan within a short period time following a previous loan. Reborrowing can occur concurrently with repayment in back-to-back transactions or can occur shortly thereafter. The Bureau believes that reborrowing often indicates that the previous loan was beyond the consumer’s ability to repay and meet the consumer’s other major financial obligations and basic living expenses. As discussed in more detail in the section-by-section analysis of proposed § 1041.6, the Bureau believes it is appropriate to consider loans to be reborrowings when the second loan is taken out within 30 days of the consumer being indebted on a previous loan. While the Bureau’s 2014 Data Point used a 14-day period and the Small Business Review Panel Outline used a 60-day period, the Bureau is using a 30-day period in this proposal to align with consumer expense cycles, which are typically a month in length. This is designed to account for the fact that where repaying a loan causes a shortfall, the consumer may seek to return during the same expense cycle to get funds to cover downstream expenses. Unless otherwise noted, this section, Market Concerns—Short-Term Loans, uses a 30-day period to determine whether a loan is part of a loan sequence.

The majority of lending revenue earned by storefront payday lenders and lenders that make single-payment vehicle title loans comes from borrowers who reborrow multiple times and become enmeshed in long loan sequences. Based on the Bureau’s data analysis, more than half of payday loans are in sequences that contain 10 loans or more.⁴⁵⁴ Looking just at loans made to borrowers who are paid weekly, bi-weekly, or semi-monthly, approximately 21 percent of loans are in sequences that are 20 loans or longer.

As discussed below, the Bureau believes that both the short term and the single-payment structure of these loans contributes to the long sequences the

⁴⁵² *Id.* at 18-20.

⁴⁵³ Hendra & Nunez.

⁴⁵⁴ This is true regardless of whether sequence is defined using either a 14-day, 30-day, or 60-day period to determine whether loans are within the same loan sequence.

borrowers take out. Various lender practices exacerbate the problem by marketing to borrowers who are particularly likely to wind up in long sequences of loans, by failing to screen out borrowers likely to wind up in long-term debt or to establish guardrails to avoid long-term indebtedness, and by actively encouraging borrowers to continue to roll over or reborrow.

1. Loan Structure

The single-payment structure and short duration of these loans makes them difficult to repay: within the space of a single income or expense cycle, a consumer with little to no savings cushion and who has borrowed to meet an unexpected expense or income shortfall, or who chronically runs short of funds, is unlikely to have the available cash needed to repay the full amount borrowed plus the finance charge on the loan when it is due and to cover other ongoing expenses. This is true for loans of a very short duration regardless of how the loan may be categorized. Loans of this type, as they exist in the market today, typically take the form of single-payment loans, including payday loans, and vehicle title loans, though other types of credit products are possible.⁴⁵⁵ The focus of the Bureau's research has been on payday and vehicle title loans, so the discussion in Market Concerns—Short-Term Loans centers on those types of products.

The size of single-payment loan repayment amounts (measured as loan principal plus finance charges owed) relative to the borrower's next paycheck gives some sense of how difficult repayment may be. The Bureau's storefront payday loan data shows that the average borrower being paid on a bi-weekly basis would need to devote 37 percent of her bi-weekly paycheck to repaying the loan. Single-payment vehicle title borrowers face an even greater challenge. In the data analyzed by the Bureau, the median borrower's

payment on a 30-day loan is equal to 49 percent of monthly income.⁴⁵⁶

2. Marketing

The general positioning of short-term products in marketing and advertising materials as a solution to an immediate liquidity challenge attracts consumers facing these problems, encouraging them to focus on short-term relief rather than the likelihood that they are taking on a new longer-term debt. Lenders position the purpose of the loan as being for use "until next payday" or to "tide over" the consumer until she receives her next paycheck.⁴⁵⁷ These types of product characterizations encourage unrealistic, overly optimistic thinking that repaying the loan will be easy, that the cash short-fall will not recur at the time the loan is due or shortly thereafter, and that the typical payday loan is experienced by consumers as a short-term obligation, all of which lessen the risk in the consumer's mind that the loan will become a long-term debt cycle. Indeed, one study reporting consumer focus group feedback noted that some participants reported that the marketing made it seem like payday loans were "a way to get a cash infusion without creating an additional bill."⁴⁵⁸

⁴⁵⁶ The data used for this calculation is described in *CFPB Data Point: Payday Lending*, at 10-15 and in *CFPB Report on Supplemental Findings*.

⁴⁵⁷ See, e.g., Speedy Cash, Can Anyone Get a Payday Loan?, <https://www.speedycash.com/faqs/payday-loans/can-anyone-get-a-payday-loan/> (last visited May 18, 2016) ("Payday loans may be able to help you bridge the gap to your next pay day."); Check Into Cash, FAQs & Policies, <https://checkintocash.com/faqs/in-store-cash-advance/> (last visited May 18, 2016) ("A cash advance is a short-term, small dollar advance that covers unexpected expenses until your next payday."); Cash America, Cash Advance/Short-term Loans, <http://www.cashamerica.com/LoanOptions/CashAdvances.aspx> (last visited May 18, 2016) (noting that "a short-term loan, payday advance or a deferred deposit transaction—can help tide you over until your next payday" and that "A single payday advance is typically for two to four weeks. However, borrowers often use these loans over a period of months, which can be expensive. Payday advances are not recommended as long-term financial solutions."); Cmty. Fin. Servcs. Ass'n of Am., Is A Payday Advance Appropriate For You?, <http://cfsaa.com/what-is-a-payday-advance/is-a-payday-advance-appropriate-for-you.aspx> (last visited May 18, 2016) (The national trade association representing storefront payday lenders analogizes a payday loan to "a cost-efficient 'financial tax' to get from one payday to another when a consumer is faced with a small, short-term cash need." The Web site elaborates that, "Just as a taxi is a convenient and valuable service for short distance transportation, a payday advance is a convenient and reasonably-priced service that should be used to meet small-dollar, short-term needs. A taxi service, however, is not economical for long-distance travel, and a payday advance is inappropriate when used as a long-term credit solution for ongoing budget management.").

⁴⁵⁸ Pew Charitable Trusts, *Payday Lending in America: How Borrowers Choose and Repay Payday Loans*, at 22 (2013), <http://www.pewtrusts.org/en/>

In addition to presenting loans as short-term solutions, rather than potentially long-term obligations, lender advertising often focuses on how quickly and easily consumers can obtain a loan. A recent academic paper reviewing the advertisements of Texas storefront and online payday and vehicle title lenders found that speed of getting a loan is the most frequently advertised feature in both online (100 percent) and storefront (50 percent) payday and title loans.⁴⁵⁹ Advertising that focuses on immediacy and speed may exploit borrowers' sense of urgency. Indeed, the names of many payday and vehicle title lenders include the words (in different spellings) "speedy," "cash," "easy," and "quick," emphasizing their rapid and simple loan funding.

3. Failure To Assess Ability To Repay

As discussed in part II, storefront payday, online payday, and vehicle title lenders generally gather some basic information about borrowers before making a loan. They normally collect income information, although that may just be self-reported or "stated" income. Payday lenders collect information to ensure the borrower has a checking account, and vehicle title lenders need information about the vehicle that will provide the security for the loan. Some lenders access consumer reports prepared by specialty consumer reporting agencies and engage in sophisticated screening of applicants, and at least some lenders turn down the majority of applicants to whom they have not previously made loans.

One of the primary purposes of this screening, however, is to avoid fraud and other "first payment defaults," not to ensure that borrowers will be able to repay the loan without reborrowing. These lenders generally do not obtain information about the borrower's existing obligations or living expenses and do not prevent those with expenses chronically exceeding income, or those

⁴⁵⁹ Jim Hawkins, *Using Advertisements to Diagnose Behavioral Market Failure in Payday Lending Markets*, 51 Wake Forest L. Rev. 57, 71 (2016). The next most advertised features in online content are simple application process and no credit check/bad credit OK (both at 97 percent). For storefront lenders, the ability to get a high loan amount was the second most highly advertised content.

⁴⁵⁵ In the past, a number of depository institutions have also offered deposit advance products. A small number of institutions still offer similar products. Like payday loans, deposit advances are typically structured as short-term loans. However, deposit advances do not have a pre-determined repayment date. Instead, deposit advance agreements typically stipulate that repayment will automatically be taken out of the borrower's next qualifying electronic deposit. Deposit advances are typically requested through online banking or over the phone, although at some institutions they may be requested at a branch. As described in more detail in the CFPB Payday Loans and Deposit Advance Products White Paper, the Bureau's research demonstrated similar borrowing patterns in both deposit advance products and payday loans. See *CFPB Payday Loans and Deposit Advance Products White Paper*, at 32-42.

who have suffered from an income or expense shock from which they need substantially more time to recover than the term of the loan, from taking on additional obligations in the form of payday or similar loans. Thus, lenders' failure to assess the borrower's ability to repay the loan permits those consumers who have the least ability to repay the loans, and consequently are the most likely to reborrow, to obtain them. Lending to borrowers who cannot repay their loans would generally not be profitable in a traditional lending market, but as described elsewhere in this section, the factors that funnel consumers into cycles of repeat reborrowing turn the traditional model on its head by creating incentives for lenders to actually want borrowers who cannot afford to repay and instead reborrow repeatedly. Although industry stakeholders have argued that lenders making short-term loans already take steps to assess "ability to repay" and will always do so out of economic self-interest, the Bureau believes that this refers narrowly to whether the consumer will default up front on the loan, rather than whether the consumer has the capacity to repay the loan without reborrowing and while meeting other financial obligations and basic living expenses. The fact that lenders often do not perform additional underwriting when borrowers are rolling over a loan or are returning to borrow again soon after repaying a prior loan further evidences that lenders do not see reborrowing as a sign of borrowers' financial distress or as an outcome to be avoided.

4. Encouraging Long Loan Sequences

After lenders attract borrowers in financial crisis, encourage them to think of the loans as a short-term solution, and fail to screen out those for whom the loans are likely to become a long-term debt cycle, lenders then actively encourage borrowers to reborrow and continue to be indebted rather than pay down or pay off their loans. Although storefront payday lenders typically take a post-dated check which could be presented in a manner timed to coincide with deposit of the borrower's paycheck or government benefits, lenders usually encourage or even require borrowers to come back to the store to redeem the check and pay in cash.⁴⁶⁰ When the

⁴⁶⁰ The Bureau believes from its experience in conducting examinations of storefront payday lenders and its outreach that cash repayments on payday and vehicle title loans are prevalent, even when borrowers provide post-dated checks or ACH authorizations for repayment. The Bureau has developed evidence from reviewing a number of payday lenders subject to supervisory examination

borrowers return, they are typically presented by lender employees with two salient options: Repay the loan in full, or pay a fee to roll over the loan (where permitted under State law). If the consumer does not return, the lender will proceed to attempt to collect by cashing the check. On a \$300 loan at a typical charge of \$15 per \$100 borrowed, the cost to defer the due date for another 14 days until the next payday is \$45, while repaying in full would cost \$345, which may leave the borrower with insufficient remaining income to cover expenses over the ensuing month and therefore prompt reborrowing. Requiring repayment in person gives staff at the stores the opportunity to frame for borrowers a choice between repaying in full or just paying the finance charge and to encourage them to choose the less immediately painful option of paying just the finance charge. Based on its experience from supervising payday lenders, the Bureau believes that store employees are generally incentivized to maximize a store's loan volume and understand that reborrowing is crucial to achieving that goal.⁴⁶¹

The Bureau's research shows that payday borrowers rarely reborrow a smaller amount than the initial loan, which would effectively amortize their loans by reducing the principal amount owed over time, thereby reducing their costs and the likelihood that they will need to take seven or ten loans out in a loan sequence. Lenders contribute to this outcome when they encourage borrowers to pay the minimum amount and roll over or reborrow the full amount of the earlier loan. In fact, as discussed in part II, some online payday loans automatically roll over at the end of the loan term unless the consumer takes affirmative action in advance of the due date such as notifying the lender in writing at least 3 days before the due date. Single-payment vehicle title borrowers, or at least those who ultimately repay rather than default, are more likely than payday borrowers to reduce the size of loans taken out in

in 2014 that the majority of them call each borrower a few days before payment is due to remind them to come to the store and pay the loan in cash. As an example, one storefront lender requires borrowers to come in to the store to repay. Its Web site states: "All payday loans must be repaid with either cash or money order. Upon payment, we will return your original check to you." Others give borrowers "appointment" or "reminder" cards to return to make a cash payment. In addition, vehicle title loans do not require a bank account as a condition of the loan, and borrowers without a checking account must return to storefront title locations to make payments.

⁴⁶¹ Most storefront lenders examined by the Bureau employ simple incentives that reward employees and store managers for loan volumes.

quick succession.⁴⁶² This may reflect the effects of State laws regulating vehicle title loans that require some reduction in loan size across a loan sequence. It may also be influenced by the larger median size of vehicle title loans, which is \$694, as compared to \$350 median loan size of payday loans.

Lenders also actively encourage borrowers who they know are struggling to repay their loans to roll over and continue to borrow. In supervisory examinations and in an enforcement action, the Bureau has found evidence that lenders maintain training materials that promote borrowing by struggling borrowers.⁴⁶³ In the enforcement matter, the Bureau found that if a borrower did not repay in full or pay to roll over the loan on time, personnel would initiate collections. Store personnel or collectors would then offer new loans as a source of relief from the collections activities. This "cycle of debt" was depicted graphically as part of the standard "loan process" in the company's new hire training manual. The Bureau is aware of similar practices in the vehicle title lending market, where store employees offer borrowers additional cash during courtesy calls and when calling about past-due accounts, and company training materials instruct employees to "turn collections calls into sales calls" and encourage delinquent borrowers to refinance to avoid default and repossession of their vehicles.

It also appears that lenders do little to affirmatively promote the use of "off ramps" or other alternative repayment options, when those are required by law to be available. Such alternative repayment plans could help at least some borrowers avoid lengthy cycles of reborrowing. By discouraging the use of repayment plans, lenders can make it more likely that such consumers will instead reborrow. Lenders that are members of one of the two national trade associations for storefront payday lenders have agreed to offer an extended payment plan to borrowers but only if the borrower makes a request at least one day prior to the date on which the loan is due.⁴⁶⁴ (The second national

trade association reports that its members provide an extended payment plan option but details on that option are not available.) In addition, about 20 States require payday lenders to offer repayment plans to borrowers who encounter difficulty in repaying payday loans. The usage rate of these repayment plans varies widely but in all cases is relatively low.⁴⁶⁵ One explanation for the low take-up rate on these repayment plans may be lender disparagement of the plans or lenders' failure to promote their availability.⁴⁶⁶ The Bureau's supervisory examinations uncovered evidence that one or more payday

⁴⁶⁵ Washington permits borrowers to request a no-cost installment repayment schedule prior to default. In 2014, 14 percent of payday loans were converted to installment loans. Wash. Dep't of Fin. Insts., 2014 Payday Lending Report, at 7 (2014), available at <http://www.dfi.wa.gov/sites/default/files/reports/2014-payday-lending-report.pdf>. Illinois allows payday loan borrowers to request a repayment plan with 26 days after default. Between 2006 and 2013, the total number of repayment plans requested was less than 1 percent of the total number of loans made in the same period. Ill. Dep't of Fin. & Prof'l Regulation, Illinois Trends Report All Consumer Loan Products Through December 2013, at 19, available at https://www.idfpr.com/dfi/ccd/pdfs/IL_Trends_Report%202013.pdf. In Colorado, in 2009, 21 percent of eligible loans were converted to repayment plans before statutory changes repealed the repayment plan. State of Colorado, 2009 Deferred Deposit Lenders Annual Report, at 2 (2009) (hereinafter Colorado 2009 Deferred Deposit Lenders Annual Report), available at http://www.coloradoattorneygeneral.gov/sites/default/files/content/uploads/cp/ConsumerCreditUnit/UCCC/AnnualReportComposites/2009_ddl_composite.pdf (last visited May 25, 2016). In Utah, six percent of borrowers entered into an extended payment plan. Utah Dep't of Fin. Insts., Report of the Commissioner of Financial Institutions, at 135, (2015) available at <http://dfi.utah.gov/wp-content/uploads/sites/29/2015/06/Annual1.pdf>. Florida law also requires lenders to extend the loan term on the outstanding loan by sixty days at no additional cost for borrowers who indicate that they are unable to repay the loan when due and agree to attend credit counseling. Although 84 percent of loans were made to borrowers with seven or more loans in 2014, fewer than 0.5 percent of all loans were granted a cost-free term extension. See Brandon Coleman & Delvin Davis, *Perfect Storm: Payday Lenders Harm Florida Consumers Despite State Law, Center for Responsible Lending*, at 4 (2016), http://www.responsiblelending.org/sites/default/files/nodes/files/research-publication/crl_perfect_storm_florida_mar2016_0.pdf.

⁴⁶⁶ Colorado's 2009 annual report of payday loan activity noted lenders' self-reporting of practices to restrict borrowers from obtaining the number of loans needed to be eligible for a repayment plan or imposing cooling-off periods on borrowers who elect to take a repayment plan. Colorado 2009 Deferred Deposit Lenders Annual Report. This evidence was from Colorado under the state's 2007 statute which required lenders to offer borrowers a no-cost repayment plan after the third balloon loan. The law was changed in 2010 to prohibit balloon loans, as discussed in part II.

lenders train employees not to mention repayment plans until after the employees have offered renewals, and only then to mention repayment plans if borrowers specifically ask about them.

5. Payment Mechanisms and Vehicle Title

Where lenders collect payments through post-dated checks, ACH authorizations, and/or obtain security interests in borrowers' vehicles, these mechanisms also can be used to encourage borrowers to reborrow to avoid negative consequences for their transportation or bank account. For example, consumers may feel significantly increased pressure to return to a storefront to roll over a payday or vehicle title loan that includes such features rather than risk suffering vehicle repossession or fees in connection with an attempt to deposit the consumer's post-dated check, such as an overdraft fee or an NSF fees from the bank and returned item fee from the lender if the check were to bounce. The pressure can be especially acute when the lender obtains vehicle security.

And in cases in which consumers do ultimately default on their loans, these mechanisms often increase the degree of harm suffered due to consumers losing their transportation, from account and lender fees, and sometimes from closure of their bank accounts. As discussed in more detail below in Market Concerns—Payments, in its research the Bureau has found that 36 percent of borrowers who took out online payday or payday installment loans and had at least one failed payment during an eighteen-month period had their checking accounts closed by the bank by the end of that period.⁴⁶⁷

c. Patterns of Lending and Extended Loan Sequences

The characteristics of the borrowers, the circumstances of borrowing, the structure of the short-term loans, and the practices of the lenders together lead to dramatic negative outcomes for many payday and vehicle title borrowers. There is strong evidence that a meaningful share of borrowers who take out payday and single-payment vehicle title loans end up with very long sequences of loans, and the loans made to borrowers with these negative outcomes make up a majority of all the loans made by these lenders.⁴⁶⁸

⁴⁶⁷ CFPB Online Payday Loan Payments, at 12.

⁴⁶⁸ In addition to the array of empirical evidence demonstrating this finding, industry stakeholders themselves have expressly or implicitly acknowledged the dependency of most storefront payday lenders' business models on repeat borrowing. A June 20, 2013 letter to the Bureau

Long loan sequences lead to very high total costs of borrowing. Each single-payment loan carries the same cost as the initial loan that the borrower took out. For a storefront borrower who takes out the average-sized payday loan of \$350 with a typical fee of \$15 per \$100, each reborrowing means paying fees of \$45. After just three reborrowings, the borrower will have paid \$140 simply to defer payment of the original principal amount by an additional six weeks to three months.

The cost of reborrowing for auto title borrowers is even more dramatic given the higher price and larger size of those loans. The Bureau's data indicates that the median loan size for single-payment vehicle title loans is \$694. One study found that the most common APR charged on the typical 30-day title loan is 300 percent, which equates to a rate \$25 per \$100 borrowed, which is a common State limit.⁴⁶⁹ A typical reborrowing thus means that the consumer pays a fee of around \$175. After just three reborrowings, a consumer will typically have paid about \$525 simply to defer payment of the original principal amount by three additional months.

Evidence for the prevalence of long sequences of payday and auto title loans comes from the Bureau's own work, from analysis by independent researchers and analysts commissioned by industry, and from statements by industry stakeholders. The Bureau has published several analyses of storefront payday loan borrowing.⁴⁷⁰ Two of these have focused on the length of loan sequences that borrowers take out. In these publications, the Bureau defined a loan sequence as a series of loans where each loan was taken out either on the day the prior loan was repaid or within

from an attorney for a national trade association representing storefront payday lenders asserted that, "[i]n any large, mature payday loan portfolio, loans to repeat borrowers generally constitute between 70 and 90 percent of the portfolio, and for some lenders, even more," and that "[t]he borrowers most likely to roll over a payday loan are, first, those who have already done so, and second, those who have had un-rolled-over loans in the immediately preceding loan period." Letter from Hilary B. Miller to Bureau of Consumer Fin. Prot. (June 20, 2013), available at http://files.consumerfinance.gov/f/201308_cfpb_cfsa-information-quality-act-petition-to-CFPB.pdf. The letter asserted challenges under the Information Quality Act to the Bureau's published White Paper (2013); see also Letter from Ron Borzekowski & B. Corey Stone, Jr., Bureau of Consumer Fin. Prot., to Hilary B. Miller (Aug. 19, 2013) (Bureau's response to the challenge).

⁴⁷⁰ See generally CFPB Data Point: Payday Lending; CFPB Payday Loans and Deposit Advance Products White Paper.

some number of days from when the loan was repaid. The Bureau's 2014 Data Point used a 14-day window to define a sequence of loans. That data has been further refined in the CFPB Report on Supplemental Findings and shows that when a borrower who is not currently in a loan sequence takes out a payday loan, borrowers wind up taking out at least four loans in a row before repaying 43 percent of the time, take out at least seven loans in a row before repaying 27 percent of the time, and take out at least 10 loans in a row before repaying 19 percent of the time.⁴⁷¹ In the CFPB Report on Supplemental Findings, the Bureau re-analyzed the data using 30-day and 60-day definitions of sequences. The results are similar, although using longer windows leads to longer sequences of more loans. Using the 30-day definition of a sequence, 50 percent of loan sequences contain at least four loans, 33 percent of sequences contain at least seven loans, and 24 percent of sequences contain at least 10 loans.⁴⁷² A borrower who takes out a fourth loan in a sequence has a 66 percent likelihood of taking out at least three more loans, of a total sequence length of seven loans, a 48 percent likelihood of taking out at least 6 more loans, for a total sequence length of 10 loans.⁴⁷³

These findings are mirrored in other analyses. During the SBREFA process, a SER submitted an analysis prepared by Charles River Associates (CRA) of loan data from several small storefront payday lenders.⁴⁷⁴ Using a 60-day sequence definition, CRA found

⁴⁷¹ Bureau of Consumer Fin. Prot., *Supplemental Findings on Payday Loans, Deposit Advance Products, and Vehicle Title Loans* (2016) (hereinafter CFPB Report on Supplemental Findings), available at http://files.consumerfinance.gov//documents/Supplemental_Report_060116.pdf.

⁴⁷² *Id.* In proposed § 1041.6 the Bureau is proposing some limitations on loans made within a sequence, and in proposed § 1041.2(a)(12), the Bureau is proposing to define a sequence to include loans made within 30 days of one another. The Bureau believes that this is a more appropriate definition of sequence than using either a shorter or longer time horizon for the reasons set forth in the section-by-section analyses of proposed §§ 1041.2(a)(12) and 1041.6. For these same reasons, the Bureau believes that the findings contained in the CFPB Report on Supplemental Findings and cited in text provide the most accurate quantification of the degree of harm resulting from cycles of indebtedness.

⁴⁷³ These figures are calculated simply by taking the share of sequences that are at least seven (or ten) loans long and dividing by the share of sequences that are at least four loans long.

⁴⁷⁴ Charles River Associates, *Economic Impact on Small Lenders of the Payday Lending Rules Under Consideration by the CFPB* (2015), <http://www.crai.com/publication/economic-impact-small-lenders-payday-lending-rules-under-consideration-cfpb>. The CRA analysis states that it used the same methodology as the Bureau.

patterns of borrowing very similar to those the Bureau found. Compared to the Bureau's results using a 60-day sequence definition, in the CRA analysis there were more loans where the borrower defaulted on the first loan or repaid without reborrowing (roughly 44 percent versus 25 percent), and fewer loans that had 11 or more loans in the sequence, but otherwise the patterns were nearly identical.⁴⁷⁵

Similarly, in an analysis funded by an industry research organization, researchers found a mean sequence length, using a 30-day sequence definition, of nearly seven loans.⁴⁷⁶ This is slightly higher than the mean 30-day sequence length in the Bureau's analysis (5.9 loans).

Analysis of a multi-lender, multi-year dataset by a research group affiliated with a specialty consumer reporting agency found that over a period of approximately four years the average borrower had at least one sequence of 9 loans; that 25 percent of borrowers had at least one loan sequence of 11 loans; and that 10 percent of borrowers had at least one loan sequence of 22 loans.⁴⁷⁷ Looking at these same borrowers for a period of 11 months—one month longer than the duration analyzed by the Bureau—the researchers found that on average the longest sequence these borrowers experienced over the 11 months was 5.3 loans, that 25 percent of borrowers had a sequence of at least 7 loans, and that 10 percent of borrowers had a sequence of at least 12 loans.⁴⁷⁸ This research group also identified a core of users with extremely persistent borrowing. They found that 30 percent of borrowers who took out a loan in the first month of the four-year period also

⁴⁷⁵ See generally CFPB Report on Supplemental Findings.

⁴⁷⁶ Marc Anthony Fusaro & Patricia J. Cirillo, *Do Payday Loans Trap Consumers in a Cycle of Debt?*, at 23 (2011), http://papers.ssrn.com/sol3/papers.cfm?abstract_id=1960776.

⁴⁷⁷ nonPrime 101, *Report 7B: Searching for Harm in Storefront Payday Lending*, at 22 (2016), <https://www.nonprime101.com/wp-content/uploads/2016/02/Report-7-B-Searching-for-Harm-in-Storefront-Payday-Lending-nonPrime101.pdf>. Sequences are defined based on the borrower pay period, with a loan taken out before a pay period has elapsed since the last loan was repaid being considered part of the same loan sequence.

⁴⁷⁸ *Id.* The researchers were able to link borrowers across the five lenders in their dataset and include within a sequence loans taking out from different lenders. Following borrowers across multiple lenders did not materially increase the average length of the longest sequence but did increase the length of sequences for the top decile by one to two loans. Compare *id.* at Table C-2 with *id.* at Table C-1. The author of the report focus on loan sequences where a borrower pays more in fees than the principal amount of the loan as sequences that cause consumer harm. The Bureau does not believe that this is the correct metric for determining whether a borrower has suffered harm.

took out a loan in the last month.⁴⁷⁹ The median time in debt for this group of extremely persistent borrowers was over 1,000 days, more than half of the four-year period. The median borrower in this group of extremely persistent borrowers had at least one loan sequence of 23 loans long or longer (nearly two years for borrowers paid monthly). Perhaps most alarming, nine percent of this group borrowed continuously for the entire period.⁴⁸⁰

The Bureau has also analyzed single-payment vehicle title loans using the same basic methodology.⁴⁸¹ Using a 30-day definition of loan sequences, the Bureau found that short-term (30-day) single-payment vehicle title loans had loan sequences that were similar to payday loans. More than half, 56 percent, of single-payment vehicle title sequences contained at least four loans; 36 percent contained seven or more loans; and 23 percent had 10 or more loans. Other sources on vehicle title lending are more limited than for payday lending, but are generally consistent. For instance, the Tennessee Department of Financial Institutions publishes a biennial report on 30-day single-payment vehicle title loans. The most recent report shows very similar results to those the Bureau found in its research, with 49 percent of borrowers taking out four or more loans in row, 35 percent taking out more than seven loans in a row, and 25 percent taking out more than 10 loans in a row.⁴⁸²

In addition to direct measures of the length of loan sequences, there is ample indirect evidence from the cumulative number of loans that borrowers take out that borrowers are often getting stuck in a long-term debt cycle. The Bureau has measured total borrowing by payday borrowers in two ways. In one study, the Bureau took a snapshot of borrowers in lenders' portfolios at a point in time (measured as borrowing in a particular month) and tracked them for an additional 11 months (for a total of 12 months) to assess overall loan use. This

study found that the median borrowing level was 10 loans over the course of a year, and more than half of the borrowers had loans outstanding for more than half of the year.⁴⁸³ In another study, the Bureau measured the total number of loans taken out by borrowers beginning new loan sequences. It found that these borrowers had lower total borrowing than borrowers who may have been mid-sequence at the beginning of the period, but the median number of loans for the new borrowers was six loans over a slightly shorter (11-month) time period.⁴⁸⁴ Research by others finds similar results, with average or median borrowing, using various data sources and various samples, of six to 13 loans per year.⁴⁸⁵

Given differences in the regulatory context and the overall nature of the market, less information is available on online lending than storefront lending. Borrowers who take out payday loans online are likely to change lenders more frequently than storefront borrowers, which makes measuring the duration of loan sequences much more challenging. The limited information that is available suggests that online borrowers take out fewer loans than storefront borrowers, but that borrowing is highly likely to be under-counted. A report commissioned by an online lender trade association, using data from three online lenders making single-payment payday loans, reported an average loan length of 20 days and average days in debt per year of 73 days.⁴⁸⁶ The report combines medians of each statistic across the three lenders, making interpretation difficult, but these findings suggest that

borrowers take out three to four loans per year at these lenders.

Additional analysis is available based on the records of a specialty consumer reporting agency. These show similar loans per borrower, 2.9, but over a multi-year period.⁴⁸⁷ These loans, however, are not primarily single-payment payday loans. A small number are installment loans, while most are “hybrid” loans that typically have a duration of roughly four pay cycles. In addition, this statistic likely understates usage because online lenders may not report all of the loans they make, and some may only report the first loan they make to a borrower. Borrowers may also be more likely to change lenders online, and many lenders do not report to the specialty consumer reporting agency that provided the data for the analysis, so that when borrowers change lenders it may often be the case that their subsequent loans are not in the data analyzed.

d. Consumer Expectations and Understanding of Loan Sequences

Extended sequences of loans raise concerns about the market for short-term loans. This concern is exacerbated by the available empirical evidence regarding consumer understanding of such loans, which strongly indicates that borrowers who take out long sequences of payday loans and vehicle title loans do not anticipate those long sequences.

Measuring consumers’ expectations about reborrowing is inherently challenging. When answering survey questions about loan repayment, there is the risk that borrowers may conflate repaying an individual loan with completing an extended sequence of borrowing. Asking borrowers retrospective questions about their expectations at the time they started borrowing is likely to suffer from recall problems, as people have difficulty remembering what they expected at some time in the past. The recall problem is likely to be compounded by respondents tending to want to avoid saying that they made a mistake. Asking about expectations for future borrowing may also be imperfect, as some consumers may not be thinking explicitly about how many times they will roll a loan over when taking out their first loan. Asking the question may cause people to think about it more than they otherwise would have.

Two studies have asked payday and vehicle title borrowers at the time they

took out their loans about their expectations about reborrowing, either the behavior of the average borrower or their own borrowing, and compared their responses with actual repayment behavior of the overall borrower population. One 2009 survey of payday borrowers found that over 40 percent of borrowers thought that the average borrower would have a loan outstanding for only two weeks. Another 25 percent responded with four weeks. Translating weeks into loans, the four-week response likely reflects borrowers who believe the average number of loans a borrower take out before repaying is one loan or two loans, depending on the mix of respondents paid bi-weekly or monthly. The report did not provide data on actual reborrowing, but based on analysis by the Bureau and others, this suggests that respondents were, on average, somewhat optimistic about reborrowing behavior.⁴⁸⁸ However, it is difficult to be certain that some survey respondents did not conflate the time loans are outstanding with the contract term of individual loans, because the researchers asked borrowers, “What’s your best guess of how long it takes the average person to pay back in full a \$300 payday loan?”, which some borrowers may have interpreted to refer to the specific loan being taken out, and not subsequent rollovers. Borrowers’ beliefs about their own reborrowing behavior could also vary from their beliefs about average borrowing behavior by others.

In a study of vehicle title borrowers, researchers surveyed borrowers about their expectations about how long it would take to repay the loan.⁴⁸⁹ The report did not have data on borrowing, but compared the responses with the distribution of repayment times reported by the Tennessee Department of Financial Institutions and found that

⁴⁸⁷ nonPrime 101, Report 7-A, “How Persistent in the Borrower-Lender Relationship in Payday Lending?”, at Table 1 (September 2015).

⁴⁸⁸ Marianne Bertrand & Adair Morse, *Information Disclosure, Cognitive Biases and Payday Borrowing and Payday Borrowing*, 66 J. Fin. 1865, 1866 (2011), available at <http://onlinelibrary.wiley.com/doi/10.1111/j.1540-6261.2011.01698.x/full>. Based on the Bureau’s analysis, approximately 50-55 percent of loan sequences, measured using a 14-day sequence definition, end after one or two loans, including sequences that end in default. See also CFPB *Data Point: Payday Lending*, at 11; CFPB *Report on Supplemental Findings*, at ch. 5. Using a relatively short reborrowing period seems more likely to match how respondents interpret the survey question, but that is speculative. Translating loans to weeks is complicated by the fact that loan terms vary depending on borrowers’ pay frequency; four weeks is two loans for a borrower paid bi-weekly, but only one loan for a borrower paid monthly.

⁴⁸⁹ Fritzdixon, *et al.*, at 1029-1030.

borrowers were slightly optimistic, on average, in their predictions.⁴⁹⁰

The two studies just described compared borrowers' predictions of average borrowing with overall average borrowing levels, which is only informative about how accurate borrowers' predictions are on average. A 2014 study by Columbia University Professor Ronald Mann⁴⁹¹ surveyed borrowers at the point at which they were borrowing about their expectations for repaying their loans and compared their responses with their subsequent actual borrowing behavior, using loan records to measure how accurate their predictions were. The results described in Mann's report, combined with subsequent analysis that Professor Mann shared with Bureau staff, show the following.⁴⁹²

First, borrowers are very poor at predicting long sequences of loans. Fewer borrowers expected to experience long sequences of loans than actually did experience long sequences. Only 10 percent of borrowers expected to be in debt for more than 70 days (five two-week loans), and only five percent expected to be in debt for more than 110 days (roughly eight two-week) loan, yet the actual numbers were substantially higher. Indeed, approximately 12 percent of borrowers remained in debt after 200 days (14 two-week loans).⁴⁹³ Borrowers who experienced long sequences of loans had not expected those long sequences when they made their initial borrowing decision; in fact they had not predicted that their sequences would be longer than borrowers overall. And while some borrowers did expect long sequences, those borrowers did not in fact actually have unusually long sequences; as Mann notes, "it appears that those who predict long borrowing periods are those

most likely to err substantially in their predictions."⁴⁹⁴

Second, Mann's analysis shows that many borrowers do not appear to learn from their past borrowing experience. Those who had borrowed the most in the past did not do a better job of predicting their future use; they were actually more likely to underestimate how long it would take them to repay fully. As Mann noted in his paper, "heavy users of the product tend to be those that understand least what is likely to happen to them."⁴⁹⁵

Finally, Mann found that borrowers' predictions about the need to reborrow at least once versus not at all were optimistic, with 60 percent of borrowers predicting they would not roll over or reborrow within one pay cycle and only 40 percent actually not doing so.

A trade association commissioned two surveys which suggest that consumers are able to predict their borrowing patterns.⁴⁹⁶ These surveys, which were very similar to each other, were of storefront payday borrowers who had recently repaid a loan and had not taken another loan within a specified period of time, and were conducted in 2013 and 2016. Of these borrowers, 94 to 96 percent reported that when they took out the loan they understood well or very well "how long it would take to completely repay the loan" and a similar percentage reported that they, in fact, were able to repay their loan in the amount of time they expected. These surveys suffers from the challenge of asking people to describe their expectations about borrowing at some time in the past, which may lead to recall problems, as described earlier. It is also unclear what the borrowers understood the phrase "completely repay" to mean—whether they took it to mean the specific loan they had recently repaid or the original loan that ultimately led to the loan they repaid. For these reasons, the Bureau does not believe that these studies undermine the evidence above indicating that consumers are generally not able to predict accurately the number of times that they will need to reborrow,

particularly with respect to long-term reborrowing.

There are several factors that may contribute to consumers' lack of understanding of the risk of reborrowing that will result from loans that prove unaffordable. As explained above in the section on lender practices, there is a mismatch between how these products are marketed and described by industry and how they operate in practice. Although lenders present the loans as a temporary bridge option, only a minority of payday loans are repaid without any reborrowing. These loans often produce lengthy cycles of rollovers or new loans taken out shortly after the prior loans are repaid. Not surprisingly, many borrowers are not able to tell when they take out the first loan how long their cycles will last and how much they will ultimately pay for the initial disbursement of cash. Even borrowers who believe they will be unable to repay the loan immediately—and therefore expect some amount of reborrowing—are generally unable to predict accurately how many times they will reborrow and at what cost. As noted above, this is especially true for borrowers who reborrow many times.

Moreover, research suggests that financial distress could also be a factor in borrowers' decision making. As discussed above, payday and vehicle title loan borrowers are often in financial distress at the time they take out the loans. Their long-term financial condition is typically very poor. For example, as described above, studies find that both storefront and online payday borrowers have little to no savings and very low credit scores, which is a sign of overall poor financial condition. They may have credit cards but likely do not have unused credit, are often delinquent on one or more cards, and have often experienced multiple overdrafts and/or NSF's on their checking accounts.⁴⁹⁷ They typically have tried and failed to obtain other forms of credit before turning to a payday lender or they otherwise may perceive that such other options would not be available to them and that there is no time to comparison shop when facing an imminent liquidity crisis.

Research has shown that when people are under pressure they tend to focus on

⁴⁹⁰ As noted above, the Bureau found that the reborrowing patterns in data analyzed by the Bureau are very similar to those reported by the Tennessee Department of Financial Institutions.

⁴⁹¹ Ronald Mann, *Assessing the Optimism of Payday Loan Borrowers*, 21 *Supreme Court Econ. Rev.* 105 (2014).

⁴⁹² The Bureau notes that Professor Mann draws different interpretations from his analysis than does the Bureau in certain instances, as explained below, and industry stakeholders, including SERs, have cited Mann's study as support for their criticism of the Small Business Review Panel Outline. Much of this criticism is based on Professor Mann's finding that that "about 60 percent of borrowers accurately predict how long it will take them finally to repay their payday loans." *Id.* at 105. The Bureau notes, however, that this was largely driven by the fact that many borrowers predicted that they would not remain in debt for longer than one or two loans, and in fact this was accurate for many borrowers.

the immediate problem they are confronting and discount other considerations, including the longer-term implications of their actions. Researchers sometimes refer to this phenomenon as “tunneling,” evoking the tunnel-vision decision making people can engage in. Consumers experiencing a financial crisis deciding on whether to take out a loan are a prime example of this behavior.⁴⁹⁸ Even when consumers are not facing a crisis, research shows that they tend to underestimate their near-term expenditures,⁴⁹⁹ and, when estimating how much financial “slack” they will have in the future, discount even the expenditures they do expect to incur.⁵⁰⁰ Finally, regardless of their financial situation, research suggests consumers may generally have unrealistic expectations about their future earnings, their future expenses, and their ability to save money to repay future obligations. Research documents that consumers in many contexts demonstrate “optimism bias” about future events and their own future performance.⁵⁰¹

Each of these behavioral biases, which are exacerbated when facing a financial crisis, contribute to consumers who are considering taking out a payday loan or single-payment vehicle title loan failing to assess accurately the likely duration of indebtedness, and, consequently, the total costs they will pay as a result of taking out the loan. Tunneling may

⁵⁰¹ The original work in the area of optimistic predictions about the future is in the area of predicting how long it will to complete certain tasks in the future. See, e.g., Daniel Kahneman & Amos Tversky, *Intuitive Prediction: Biases and Corrective Procedures*, 12 *TIMS Studies in Mgmt. Science* 313 (1979); Roger Buehler, Dale Griffin, & Michael Ross, *Exploring the “Planning Fallacy”: Why People Underestimate their Task Completion Times*, 67 *J. Personality & Soc. Psychol.* 366 (1994); Roger Buehler, Dale Griffin, & Michael Ross, *Inside the Planning Fallacy: The Causes and Consequences of Optimistic Time Prediction*, in *Heuristics and Biases: The Psychology of Intuitive Judgment*, at 250-70 (Thomas Gilovich, Dale Griffin, & Daniel Kahneman eds., 2002).

cause consumers not to focus sufficiently on the future implications of taking out a loan. To the extent that consumers do comprehend what will happen when the loan comes due, underestimation of future expenditures and optimism bias will cause them to misunderstand the likelihood of repeated reborrowing due to their belief that they are more likely to be able to repay the loan without defaulting or reborrowing than they actually are. And consumers who recognize at origination that they will have difficulty paying back the loan and that they may need to roll the loan over or reborrow may still underestimate the likelihood that they will wind up rolling over or reborrowing multiple times and the high cost of doing so.

Regardless of the underlying explanation, the empirical evidence indicates that borrowers do not expect to be in very long sequences and are overly optimistic about the likelihood that they will avoid rolling over or reborrowing their loans at all.

e. Delinquency and Default

In addition to the harm caused by unanticipated loan sequences, the Bureau is concerned that many borrowers suffer other harms from unaffordable loans in the form of the costs that come from being delinquent or defaulting on the loans. Many borrowers, when faced with unaffordable payments, will be late in making loan payments, and may ultimately cease making payments altogether and default on their loans.⁵⁰² They may take out multiple loans before defaulting—69 percent of payday loan sequences that end in default are multi-loan sequences in which the borrower has rolled over or reborrowed at least once before defaulting—either because they are simply delaying the inevitable or because their financial situation deteriorates over time to the point where they become delinquent and eventually default rather than continuing to pay additional reborrowing fees.

While the Bureau is not aware of any data directly measuring the number of late payments across the industry, studies of what happens when payments are so late that the lenders deposit the consumers’ original post-dated checks suggest that late payment rates are relatively high. For example, one study of payday borrowers in Texas found that in 10 percent of all loans, the

⁵⁰² This discussion uses the term “default” to refer to borrowers who do not repay their loans. Precise definitions will vary across analyses, depending on specific circumstances and data availability.

post-dated checks were deposited and bounced.⁵⁰³ Looking at the borrower level, the study found that half of all borrowers had a check deposited and bounce over the course of the year following their first payday loan.⁵⁰⁴ An analysis of data collected in North Dakota showed a lower, but still high, rate of lenders depositing checks that subsequently bounced or attempting to collect loan payment via an ACH payment request that failed. It showed that 39 percent of new borrowers experienced a failed loan payment of this type in the year following their first payday loans, and 46 percent did so in the first two years following their first payday loan.⁵⁰⁵ In a public filing, one large storefront payday lender reported a lower rate, 6.5 percent, of depositing checks, of which nearly two-thirds were returned for insufficient funds.⁵⁰⁶ In Bureau analysis of ACH payments initiated by online payday and payday installment lenders, 50 percent of online borrowers had at least one overdraft or non-sufficient funds transaction in connection with their loans over an 18 month period. These borrowers’ depository accounts incurred an average total of \$185 in fees.⁵⁰⁷

Bounced checks and failed ACH payments can be quite costly for borrowers. The median bank NSF fee is \$34,⁵⁰⁸ which is equivalent to the cost of a rollover on a \$300 storefront loan. If the lender makes repeated attempts to collect using these methods, this leads to repeated fees. The Bureau’s research indicates that when one attempt fails, online payday lenders make a second attempt to collect 75 percent of the time but are unsuccessful in 70 percent of

⁵⁰³ Skiba & Tobacman, at 6. The study did not separately report the percentage of loans on which the checks that were deposited were paid.

⁵⁰⁴ These results are limited to borrowers paid on a bi-weekly schedule.

those cases. The failure rate increases with each subsequent attempt.⁵⁰⁹

In addition to incurring NSF fees from a bank, in many cases when a check bounces the consumer can be charged a returned check fee by the lender; late fees are restricted in some but not all States.⁵¹⁰

Default can also be quite costly for borrowers. These costs vary with the type of loan and the channel through which the borrower took out the loan. As noted, default may come after a lender has made repeated attempts to collect from the borrower's deposit account, such that a borrower may ultimately find it necessary to close the account, or the borrower's bank or credit union may close the account if the balance is driven negative and the borrower is unable for an extended period of time to return the balance to positive. And borrowers of vehicle title loans stand to suffer the greatest harm from default, as it may lead to the repossession of their vehicle. In addition to the direct costs of the loss of an asset, this can seriously disrupt people's lives and put at risk their ability to remain employed.

Default rates on individual payday loans appear at first glance to be fairly low. This figure is three percent in the data the Bureau has analyzed.⁵¹¹ But because so many borrowers respond to the unaffordability of these loans by reborrowing in sequences of loans rather than by defaulting immediately, a more meaningful measure of default is the share of loan sequences that end in default. The Bureau's data show that, using a 30-day sequence definition, 20 percent of loan sequences end in default. A recent report based on a multi-lender dataset showed similar results, with a 3 percent loan-level default rate and a 16 percent sequence-level default rate.⁵¹²

⁵⁰⁹ CFPB *Online Payday Loan Payments*, at 3; see generally *Market Concerns—Payments*.

⁵¹⁰ Most States limit returned item fees on payday loans to a single fee of \$15-\$40; \$25 is the most common returned-item fee limit. Most States do not permit lenders to charge a late fee on a payday loan, although Delaware permits a late fee of five percent and several States' laws are silent on the question of late fees.

⁵¹¹ Default here is defined as a loan not being repaid as of the end of the period covered by the data or 30 days after the maturity date of the loan, whichever was later. The default rate was slightly higher, [four percent], for new loans that are not part of an existing loan sequence, which could reflect an intention by some borrowers to take out a loan and not repay, or the mechanical fact that borrowers with a high probability of defaulting for some other reason are less likely to have a long sequence of loans.

⁵¹² nonprime101, *Measure of Reduced Form Relationship between the Payment-Income Ratio and the Default Probability*, at 6 (2015), <https://www.nonprime101.com/wp-content/uploads/2015/>

Other researchers have found similarly high levels of default at the borrower level. One study of Texas borrowers found that 4.7 percent of loans were charged off, while 30 percent of borrowers had a loan charged off in their first year of borrowing.⁵¹³

Default rates on single-payment vehicle title loans are higher than those on storefront payday loans. In the data analyzed by the Bureau, the default rate on all vehicle title loans is 6 percent, and the sequence-level default rate is 33 percent.⁵¹⁴ The Bureau's research suggests that title lenders repossess a vehicle slightly more than half the time when a borrower defaults on a loan. In the data the Bureau has analyzed, three percent of all single-payment vehicle title loans lead to repossession, which represents approximately 50 percent of loans on which the borrower defaulted. At the sequence level, 20 percent of sequences end with repossession. In other words, one in five borrowers is unable to escape debt without losing their car.

Borrowers of all types of covered loans are also likely to be subject to collection efforts. The Bureau observed in its consumer complaint data that from November 2013 through December 2015 approximately 24,000 debt collection complaints had payday loan as the underlying debt. More than 10 percent of the complaints the Bureau has received about debt collection stem from payday loans.⁵¹⁵ These collections efforts can include harmful and harassing conduct such as repeated phone calls from collectors to the borrower's home or place of work, as well as in-person visits to consumers' homes and worksites. Some of this conduct, depending on facts and circumstances, may be illegal. Aggressive calling to the borrower's workplace can put at risk the borrower's employment and jeopardize future earnings. Many of these practices can cause psychological distress and anxiety in borrowers who are already under financial pressure. In addition, the Bureau's enforcement and supervisory examination processes have uncovered

02/Clarity-Services-Measure-of-Reduced-Form-Relationship-Final-21715rev.pdf. This analysis defines sequences based on the pay frequency of the borrower, so some loans that would be considered part of the same sequence using a 30-day definition are not considered part of the same sequence in this analysis.

⁵¹³ Skiba & Tobacman, at Table 2. Again, these results are limited to borrowers paid bi-weekly.

⁵¹⁵ Bureau of Consumer Fin. Prot., *Monthly Complaint Report*, at 12 (March 2016), http://files.consumerfinance.gov/f/201603_cfpb_monthly-complaint-report-vol-9.pdf.

evidence of numerous illegal collection practices by payday lenders. These include: Illegal third-party calls; false threats to add new fees; false threats of legal action or referral to a non-existent in-house "collections department"; and deceptive messages regarding non-existent "special promotions" to induce borrowers to return calls.⁵¹⁶

Even if a vehicle title borrower does not have her vehicle repossessed, the threat of repossession in itself may cause harm to borrowers. It may cause them to forgo other essential expenditures in order to make the payment and avoid repossession.⁵¹⁷ And there may be psychological harm in addition to the stress associated with the possible loss of a vehicle. Lenders recognize that consumers often have a "pride of ownership" in their vehicle and, as discussed above in part II, one or more lenders exceed their maximum loan amount guidelines and consider the vehicle's sentimental or use value to the consumer when assessing the amount of funds they will lend.

The potential impacts of the loss of a vehicle depend on the transportation needs of the borrower's household and the available transportation alternatives. According to two surveys of vehicle title loan borrowers, 15 percent of all borrowers report that they would have no way to get to work or school if they lost their vehicle to repossession.⁵¹⁸ More than one-third (35 percent) of borrowers pledge the title to the only working vehicle in the household (Pew 2015). Even those with a second vehicle or the ability to get rides from friends or take public transportation would presumably experience significant inconvenience or even hardship from the loss of a vehicle.

The Bureau analyzed online payday and payday installments lenders' attempts to withdraw payments from borrowers' deposit accounts, and found that six percent of payment attempts

⁵¹⁶ See Bureau of Consumer Fin. Prot., *Supervisory Highlight*, at 17-19 (Spring 2014), http://files.consumerfinance.gov/f/201405_cfpb_supervisory-highlights-spring-2014.pdf.

⁵¹⁷ As the D.C. Circuit observed of consumers loans secured by interests in household goods, "[c]onsumers threatened with the loss of their most basic possessions become desperate and peculiarly vulnerable to any suggested 'ways out.' As a result, 'creditors are in a prime position to urge debtors to take steps which may worsen their financial circumstances.' The consumer may default on other debts or agree to enter refinancing agreements which may reduce or defer monthly payments on a short-term basis but at the cost of increasing the consumer's total long-term debt obligation." *AFSA*, 767 F.2d at 974 (internal citation omitted).

⁵¹⁸ Fritzdixon, *et al.*, at 1029-1030; Pew Charitable Trusts, *Auto Title Loans: Market Practices and Borrowers' Experiences*, at 14 (2015), <http://www.pewtrusts.org/-/media/assets/2015/03/autotitleloansreport.pdf>.

that were not preceded by a failed payment attempt themselves fail.⁵¹⁹ An additional six percent succeed despite a lack of sufficient available funds in the borrower's account because the borrower's depository institution makes the payment as an overdraft, in which case the borrower was also likely charged a similar fee. Default rates are more difficult to determine, but 36 percent of checking accounts with failed online loan payments are subsequently closed. This provides a rough measure of default on these loans, but more importantly demonstrates the harm borrowers suffer in the process of defaulting on these loans.

The risk that they will default and the costs associated with default are likely to be under-appreciated by borrowers when obtaining a payday or vehicle title loan. Consumers are unlikely, when deciding whether to take out a loan, to be thinking about what will happen if they were to default or what it will take to avoid default. They may be overly focused on their immediate needs relative to the longer-term picture. The lender's marketing materials may have succeeded in convincing the consumer of the value of a loan to bridge until their next paycheck. Some of the remedies a lender might take, such as repeatedly attempting to collect from a borrower's checking account or using remotely created checks, may be unfamiliar to borrowers. Realizing that this is even a possibility would depend on the borrower investigating what would happen in the case of an event they do not expect to occur, such as a default.

f. Collateral Harms From Making Unaffordable Payments

In addition to the harms associated with delinquency and default, borrowers who take out these loans may experience other financial hardships as a result of making payments on unaffordable loans. These may arise if the borrower feels compelled to prioritize payment on the loan and does not wish to reborrow. This course may result in defaulting on other obligations or forgoing basic living expenses. If a lender has taken a security interest in the borrower's vehicle, for example, the borrower is likely to feel compelled to prioritize payments on the title loan

over other bills or crucial expenditures because of the leverage that the threat of repossession gives to the lender.

The repayment mechanisms for other short-term loans can also cause borrowers to lose control over their own finances. If a lender has the ability to withdraw payment directly from a borrower's checking account, especially when the lender is able to time the withdrawal to align with the borrower's payday or the day the borrower receives periodic income, the borrower may lose control over the order in which payments are made and may be unable to choose to make essential expenditures before repaying the loan.

The Bureau is not able to directly observe the harms borrowers suffer from making unaffordable payments. The rates of reborrowing and default on these loans indicate that many borrowers do struggle to repay these loans, and it is therefore reasonable to infer that many borrowers are suffering harms from making unaffordable payments particularly where a leveraged payment mechanism and vehicle security strongly incentivize consumers to prioritize short-term loans over other expenses.

g. Harms Remain Under Existing Regulatory Approaches

Based on Bureau analysis and outreach, the harms the Bureau perceives from payday loans, single-payment vehicle title loans, and other short-term loans persist in these markets despite existing regulatory frameworks. In particular, the Bureau believes that existing regulatory frameworks in those States that have authorized payday and/or vehicle title lending have still left many consumers vulnerable to the specific harms discussed above relating to reborrowing, default, and collateral harms from making unaffordable payments.

Several different factors have complicated State efforts to effectively apply their regulatory frameworks to payday loans and other short-term loans. For example, lenders may adjust their product offerings or their licensing status to avoid State law restrictions, such as by shifting from payday loans to vehicle title or installment loans or open-end credit or by obtaining licenses under State mortgage lending laws.⁵²⁰

⁵²⁰ As discussed in part II, payday lenders in Ohio began making loans under the State's Mortgage Loan Act and Credit Service Organization Act following the 2008 adoption of the Short-Term Lender Act, which limited interest and fees to 28 percent APR among other requirements, and a public referendum the same year voting down the reinstatement of the State's Check-Cashing Lender Law, under which payday lenders had been making loans at higher rates.

States also have faced challenges in applying their laws to certain online lenders, including lenders claiming tribal affiliation or offshore lenders.⁵²¹

As discussed above in part II, States have adopted a variety of different approaches for regulating payday loans and other short-term loans. For example, fourteen States and the District of Columbia have interest rate caps or other restrictions that, in effect, prohibit payday lending. Although consumers in these States may still be exposed to potential harms from short-term lending, such as online loans made by lenders that claim immunity from these State laws or from loans obtained in neighboring States, these provisions provide strong protections for consumers by substantially reducing their exposure to the harms from payday loans.

The 36 States that permit payday loans in some form have taken a variety of different approaches to regulating such loans. Some States have restrictions on rollovers or other reborrowing. Among other things, these restrictions may include caps on the total number of permissible loans in a given period, or cooling-off periods between loans. Some States prohibit a lender from making a payday loan to a borrower who already has an outstanding payday loan. Some States have adopted provisions with minimum income requirements. For example, some States provide that a payday loan cannot exceed a percentage (most commonly 25 percent) of a consumer's gross monthly income. Some State payday or vehicle title lending statutes require that the lender consider a consumer's ability to repay the loan, though none of them specify what steps lenders must take to determine whether the consumer has the ability to repay a loan. Some States require that consumers have the opportunity to repay a short-term loan through an extended payment plan over the course of a longer period of time. Additionally, some jurisdictions require lenders to provide specific disclosures to alert borrowers of potential risks.

While these provisions may have been designed to target some of the same or

⁵²¹ For example, a number of States have taken action against Western Sky Financial, a South Dakota-based online lender based on an Indian reservation and owned by a tribal member, online loan servicer CashCall, Inc., and related entities for evading State payday lending laws. A recent report summarizes these legal actions and advisory notices. See Diane Standaert & Brandon Coleman, *Ending the Cycle of Evasion: Effective State and Federal Payday Lending Enforcement* (2015), http://www.responsiblelending.org/payday-lending/research-analysis/crl_payday_enforcement_brief_nov2015.pdf.

⁵¹⁹ The bank's analysis includes both online and storefront lenders. Storefront lenders normally collect payment in cash and only deposit checks or submit ACH requests for payment when a borrower has failed to pay in person. These check presentments and ACH payment requests, where the borrower has already failed to make the agreed-upon payment, have a higher rate of insufficient funds.

similar potential harms identified above, these provisions do not appear to have had a significant impact on reducing reborrowing and other harms that confront consumers of short-term loans. In particular, as discussed above, the Bureau's primary concern for payday loans and other short-term loans is that many consumers end up reborrowing over and over again, turning what was ostensibly a short-term loan into a long-term cycle of debt. The Bureau's analysis of borrowing patterns in different States that permit payday loans indicates that most States have very similar rates of reborrowing, with about 80 percent of loans followed by another loan within 30 days, regardless of the restrictions that are in place.⁵²² In particular, laws that prevent direct rollovers of loans, as well as laws that impose short cooling-off periods between loans, such as Florida's prohibition on same-day reborrowing, have very little impact on reborrowing rates measured over periods longer than one day. The 30-day reborrowing rate in all States that prohibit rollovers is 80 percent, and in Florida the rate is 89 percent. Several States, however, do stand out as having substantially lower reborrowing rates than other States. These include Washington, which limits borrowers to no more than eight loans in a rolling 12-month period and has a 30-day reborrowing rate of 63 percent, and Virginia, which imposes a minimum loan length of two pay periods and imposes a 45-day cooling off period once a borrower has had [five] loans in a rolling six-month period, and has a 30-day reborrowing rate of 61 percent.

Likewise, the Bureau believes that disclosures are insufficient to adequately reduce the harm that consumers suffer when lenders do not determine consumers' ability to repay, for two primary reasons.⁵²³ First, disclosures do not address the underlying incentives in this market for lenders to encourage borrowers to reborrow and take out long sequences of loans. As discussed above, the prevailing business model in the short-term loan market involves lenders deriving a very high percentage of their revenues from long loan sequences. While enhanced disclosures would provide additional information to consumers, the Bureau believes that the loans would remain unaffordable for most consumers, lenders would have no greater incentive to underwrite more

rigorously, and lenders would remain dependent on long-term loan sequences for revenues.

Second, empirical evidence suggests that disclosures have only modest impacts on consumer borrowing patterns for short-term loans generally and negligible impacts on whether consumers reborrow. Evidence from a field trial of several disclosures designed specifically to warn of the risks of reborrowing and the costs of reborrowing showed that these disclosures had a marginal effect on the total volume of payday borrowing.⁵²⁴ Analysis by the Bureau of similar disclosures implemented by the State of Texas showed a reduction in loan volume of 13 percent after the disclosure requirement went into effect, relative to the loan volume changes for the study period in comparison States.⁵²⁵ The Bureau believes these findings confirm the limited magnitude of the impacts from the field trial. In addition, analysis by the Bureau of the impacts of the disclosures in Texas shows that the probability of reborrowing on a payday loan declined by only approximately 2 percent once the disclosure was put in place. Together, these findings indicate that high levels of reborrowing and long sequences of payday loans remain a significant source of consumer harm even after a disclosure regime is put into place. Further, as discussed above in *Market Concerns—Short-Term Loans*, the Bureau has observed that consumers have a very high probability of winding up in a very long sequence once they have taken out only a few loans in a row.⁵²⁶ The contrast of the very high likelihood that a consumer will wind up in a long-term debt cycle after taking out only a few loans with the near negligible impact of a disclosure on consumer reborrowing patterns provides further evidence of the insufficiency of disclosures to address what the Bureau believes are the core harms to consumers in this credit market.

During the SBREFA process, many of the SERs urged the Bureau to reconsider the proposals under consideration and

defer to existing regulation of these credit markets by the States or to model Federal regulation on the laws or regulations of certain States. In the Small Business Review Panel Report, the Panel recommended that the Bureau continue to consider whether regulations in place at the State level are sufficient to address concerns about unaffordable loan payments and that the Bureau consider whether existing State laws and regulations could provide a model for elements of the Federal regulation. The Bureau has examined State laws closely in connection with preparing the proposed rule, as discussed in part II. Moreover, based on the Bureau's data analysis as noted above, the regulatory frameworks in most States do not appear to have had a significant impact on reducing reborrowing and other harms that confront consumers of short-term loans. For these and the other reasons discussed in *Market Concerns—Short-Term Loans*, the Bureau believes that Federal intervention in these markets is warranted at this time.

Section 1041.4 Identification of Abusive and Unfair Practice—Short-Term Loans

In most consumer lending markets, it is standard practice for lenders to assess whether a consumer has the ability to repay a loan before making the loan. In certain markets, Federal law requires this.⁵²⁷ The Bureau has not determined whether, as a general rule, it is an unfair or abusive practice for any lender to make a loan without making such a determination. Nor is the Bureau proposing to resolve that question in this rulemaking. Rather, the focus of Subpart B of this proposed rule is on a specific set of loans which the Bureau has carefully studied, as discussed in more detail in part II and *Market Concerns—Short-Term Loans*. Based on the evidence described in part II and *Market Concerns—Short-Term Loans*, and pursuant to its authority under section 1031(b) of the Dodd-Frank Act,

⁵²⁴ Marianne Bertrand & Adair Morse, *Information Disclosure, Cognitive Biases and Payday Borrowing and Payday Borrowing*, 66 J. Fin. 1865 (2011), available at <http://onlinelibrary.wiley.com/doi/10.1111/j.1540-6261.2011.01698.x/full>.

⁵²⁵ See CFPB Report on Supplemental Findings, at 73.

⁵²⁶ As discussed above in this *Market Concerns—Short-Term Loans*, a borrower who takes out a fourth loan in a sequence has a 66 percent likelihood of taking out at least three more loans, for a total sequence length of seven loans, and a 57 percent likelihood of taking out at least six more loans, for a total sequence length of 10 loans.

⁵²⁷ See, e.g., Dodd-Frank Act section 1411, codified at 15 U.S.C. 1639c(a)(1); CARD Act, 15 U.S.C. 1665e; HPML Rule, 73 FR 44522, at 44543 (July 30, 2008). In addition, the OCC has issued numerous guidance documents about the potential for legal liability and reputational risk connected with lending that does not take account of borrowers' ability to repay. See OCC Advisory Letter 2003-3, *Avoiding Predatory and Abusive Lending Practices in Brokered and Purchased Loans* (Feb. 21, 2003), available at <http://www.occ.gov/static/news-issuances/memos-advisory-letters/2003-3-advisory-letter-2003-3.pdf>; FDIC, *Guidance on Supervisory Concerns and Expectations Regarding Deposit Advance Products*, 78 FR 70552 (Nov. 26, 2013); OCC, *Guidance on Supervisory Concerns and Expectations Regarding Deposit Advance Products*, 78 FR 70624 (Nov. 26, 2013).

⁵²² CFPB Report on Supplemental Findings, at ch. 4.

⁵²³ See also section-by-section analysis of proposed § 1041.7.

the Bureau is proposing in § 1041.4 to identify it as both an abusive and an unfair act or practice for a lender to make a covered short-term loan without reasonably determining that the consumer has the ability to repay the loan. “Ability to repay” in this context means that the consumer has the ability to repay the loan without reborrowing and while meeting the consumer’s major financial obligations and basic living expenses. The Bureau’s preliminary findings with regard to abusiveness and unfairness are discussed separately below. The Bureau is making these preliminary findings based on the specific evidence cited below in the section-by-section analysis of proposed § 1041.4, as well as the evidence discussed in part II and Market Concerns—Short-Term Loans.

Abusiveness

Under § 1031(d)(2)(A) and (B) of the Dodd-Frank Act, the Bureau may find an act or practice to be abusive in connection with a consumer financial product or service if the act or practice takes unreasonable advantage of (A) a lack of understanding on the part of the consumer of the material risks, costs, or conditions of the product or service or of (B) the inability of the consumer to protect the interests of the consumer in selecting or using a consumer financial product or service. It appears to the Bureau that consumers generally do not understand the material risks and costs of taking out a payday, vehicle title, or other short-term loan, and further lack the ability to protect their interests in selecting or using such loans. It also appears to the Bureau that lenders take unreasonable advantage of these consumer vulnerabilities by making loans of this type without reasonably determining that the consumer has the ability to repay the loan.

Consumers Lack an Understanding of Material Risks and Costs

As discussed in Market Concerns—Short-Term Loans, short-term payday and vehicle title loans can and frequently do lead to a number of negative consequences for consumers, which range from extensive reborrowing to defaulting to being unable to pay other obligations or basic living expenses as a result of making an unaffordable payment. All of these—including the direct costs that may be payable to lenders and the collateral consequences that may flow from the loans—are risks or costs of these loans, as the Bureau understands and reasonably interprets that phrase.

The Bureau recognizes that consumers who take out a payday,

vehicle title, or other short-term loan understand that they are incurring a debt which must be repaid within a prescribed period of time and that if they are unable to do so, they will either have to make other arrangements or suffer adverse consequences. The Bureau does not believe, however, that such a generalized understanding suffices to establish that consumers understand the material costs and risks of these products. Rather, the Bureau believes that it is reasonable to interpret “understanding” in this context to mean more than a mere awareness that it is within the realm of possibility that a particular negative consequence may follow or cost may be incurred as a result of using the product. For example, consumers may not understand that a risk is very likely to materialize or that—though relatively rare—the impact of a particular risk would be severe.

As discussed above in Market Concerns—Short-Term Loans, the single largest risk to a consumer of taking out a payday, vehicle title, or similar short-term loan is that the initial loan will lead to an extended cycle of indebtedness. This occurs in large part because the structure of the loan usually requires the consumer to make a lump-sum payment within a short period of time, typically two weeks, or a month, which would absorb such a large share of the consumer’s disposable income as to leave the consumer unable to pay the consumer’s major financial obligations and basic living expenses. Additionally, in States where it is permitted, lenders often offer borrowers the enticing, but ultimately costly, alternative of paying a smaller fee (such as 15 percent of the principal) and rolling over the loan or making back-to-back repayment and reborrowing transactions rather than repaying the loan in full—and many borrowers choose this option. Alternatively, borrowers may repay the loan in full when due but find it necessary to take out another loan a short time later because the large amount of cash needed to repay the first loan relative to their income leaves them without sufficient funds to meet their other obligations and expenses. This cycle of indebtedness affects a large segment of borrowers: As described in Market Concerns—Short-Term Loans, 50 percent of storefront payday loan sequences contain at least four loans. One-third contain seven loans or more, by which point consumers will have paid charges equal to 100 percent of the amount borrowed and still owe the full amount of the principal. Almost one-quarter of loan

sequences contain at least 10 loans in a row. And looking just at loans made to borrowers who are paid weekly, biweekly, or semi-monthly, 21 percent of loans are in sequences consisting of at least 20 loans. For loans made to borrowers who are paid monthly, 46 percent of loans are in sequences consisting of at least 10 loans.

The evidence summarized in Market Concerns—Short-Term Loans also shows that consumers who take out these loans typically appear not to understand when they first take out a loan how long they are likely to remain in debt and how costly that will be for them. Payday borrowers tend to overestimate their likelihood of repaying without reborrowing and underestimate the likelihood that they will end up in an extended loan sequence. For example, one study found that while 60 percent of borrowers predict they would not roll over or reborrow their payday loan, only 40 percent actually did not roll over or reborrow. The same study found that consumers who end up reborrowing numerous times—*i.e.*, the consumers who suffer the most harm—are particularly bad at predicting the number of times they will need to reborrow. Thus, many consumers who expected to be in debt only a short amount of time can find themselves in a months-long cycle of indebtedness, paying hundreds of dollars in fees above what they expected while struggling to repay the original loan amount.

The Bureau has observed similar outcomes for borrowers of single-payment vehicle title loans. For example, 83 percent of vehicle title loans being reborrowed on the same day that a previous loan was due, and 85 percent of vehicle title loans are reborrowed within 30 days of a previous vehicle title loan. Fifty-six percent of vehicle title loan sequences consist of more than three loans, 36 percent consist of at least seven loans, and almost one quarter—23 percent—consist of more than 10 loans. While there is no comparable research on the expectations of vehicle title borrowers, the Bureau believes that the research in the payday context can be extrapolated to these other products given the significant similarities in the product structures, the characteristics of the borrowers, and the outcomes borrowers experience, as detailed in part II and Market Concerns—Short-Term Loans.

Consumers are also exposed to other material risks and costs in connection with covered short-term loans. As discussed in more detail in Market Concerns—Short-Term Loans, the unaffordability of the payments for

many consumers creates a substantial risk of default. Indeed, 20 percent of payday loan sequences and 33 percent of title loan sequences end in default. And 69 percent of payday loan defaults occur in loan sequences in which the consumer reborrows at least once. For a payday borrower, the cost of default generally includes the cost of at least one, and often multiple, NSF fees assessed by the borrower's bank when the lender attempts to cash the borrower's postdated check or debit the consumer's account via ACH transfer and the attempt fails. NSFs are associated with a high rate of bank account closures. Defaults also often expose consumers to aggressive debt collection activities by the lender or a third-party debt collector. The consequences of default can be even more dire for a vehicle title borrower, including the loss of the consumer's vehicle—which is the result in 20 percent of single-payment vehicle title loan sequences.

The Bureau does not believe that many consumers who take out payday, vehicle title, or other short-term loans understand the magnitude of these additional risks—for example, that they have at least a one in five (or for auto title borrowers a one in three) chance of defaulting. Nor are payday borrowers likely to factor into their decision on whether to take out the loan the many collateral consequences of default, including expensive bank fees, aggressive collections, or the costs of having to get to work or otherwise from place to place if their vehicle is repossessed.

As discussed in Market Concerns—Short-Term Loans, several factors can impede consumers' understanding of the material risks and costs of payday, vehicle title, and other short-term loans. To begin with, there is a mismatch between how these loans are structured and how they operate in practice. Although the loans are presented as standalone short-term products, only a minority of payday loans are repaid without any reborrowing. These loans often instead produce lengthy cycles of rollovers or new loans taken out shortly after the prior loans are repaid. Empirical evidence shows that consumers are not able to accurately predict how many times they will reborrow, and thus are not able to tell when they take out the first loan how long their cycles will last and how much they will ultimately pay for the initial disbursement of loan proceeds. Even consumers who believe they will be unable to repay the loan immediately and therefore expect some amount of reborrowing are generally unable to

predict accurately how many times they will reborrow and at what cost. This is especially true for consumers who reborrow many times.

In addition, consumers in extreme financial distress tend to focus on their immediate liquidity needs rather than potential future costs in a way that makes them particularly susceptible to lender marketing, and payday and vehicle title lenders often emphasize the speed with which the lender will provide funds to the consumer.⁵²⁸ In fact, numerous lenders select company names that emphasize rapid loan funding. But there is a substantial disparity between how these loans are marketed by lenders and how they are actually experienced by many consumers. While covered short-term loans are marketed as short-duration loans intended for short-term or emergency use only,⁵²⁹ a substantial percentage of consumers do not repay the loan quickly and thus either default, or, in a majority of the cases, reborrow—often many times. Moreover, consumers who take out covered short-term loans may be overly optimistic about their future cash flow. Such incorrect expectations may lead consumers to misunderstand whether they will have the ability to repay the loan, or to expect that they will be able to repay it after reborrowing only a few times. These consumers may find themselves caught in a cycle of reborrowing that is both very costly and very difficult to escape.

Consumer Inability to Protect Interests

Under section 1031(d)(2)(B) of the Dodd-Frank Act, an act or practice is abusive if it takes unreasonable advantage of the inability of the consumer to protect the interests of the consumer in selecting or using a consumer financial product or service. Consumers who lack an understanding of the material risks and costs of a consumer financial product or service often will also lack the ability to protect their interests in selecting or using that consumer financial product or service. For instance, as discussed above, the Bureau believes that consumers are unlikely to be able to protect their interests in selecting or using payday, vehicle title, and other short-term loans

because they do not understand the material risks and costs associated with these products.

But it is reasonable to also conclude from the structure of section 1031(d), which separately declares it abusive to take unreasonable advantage of consumer lack of understanding or of consumers' inability to protect their interests in using or selecting a product or service that, in some circumstances, consumers may understand the risks and costs of a product, but nonetheless be unable to protect their interests in selecting or using the product. The Bureau believes that consumers who take out an initial payday loan, vehicle title loan, or other short-term loan may be unable to protect their interests in selecting or using such loans, given their immediate need for credit and their inability in the moment to search out or develop alternatives that would either enable them to avoid the need to borrow or to borrow on terms that are within their ability to repay.

As discussed in Market Concerns—Short-Term Loans, consumers who take out payday or short-term vehicle title loans typically have exhausted other sources of credit such as their credit card(s). In the months leading up to their liquidity shortfall, they typically have tried and failed to obtain other forms of credit. Their need is immediate. Moreover, consumers facing an immediate liquidity shortfall may believe that a short-term loan is their only choice; one study found that 37 percent of borrowers say they have been in such a difficult financial situation that they would take a payday loan on any terms offered.⁵³⁰ They may not have the time or other resources to seek out, develop, or take advantage of alternatives. These factors may place consumers in such a vulnerable position when seeking out and taking these loans that they are potentially unable to protect their interests.

The Bureau also believes that once consumers have commenced a loan sequence they may be unable to protect their interests in the selection or use of subsequent loans. After the initial loan in a sequence has been consummated, the consumer is legally obligated to repay the debt. Consumers who do not have the ability to repay that initial loan are faced with making a choice among three bad options: They can either default on the loan, skip or delay payments on major financial obligations or living expenses in order to repay the

⁵²⁸ In fact, during the SBREFA process for this rulemaking, numerous SERs commented that the Bureau's contemplated proposal would slow the loan origination process and thus negatively impact their business model.

⁵²⁹ For example, as noted in Market Concerns—Short-Term Loans, the Web site for a national trade association representing storefront payday lenders analogizes a payday loan to a "cost-efficient 'financial taxi' to get from one payday to another when a consumer is faced with a small, short-term cash need."

⁵³⁰ Pew Charitable Trusts, *How Borrowers Choose and Repay Payday Loans*, at 20 (2013), [http://www.pewtrusts.org/~media/assets/2013/02/20/pew_choosing_borrowing_payday_feb2013-1\).pdf](http://www.pewtrusts.org/~media/assets/2013/02/20/pew_choosing_borrowing_payday_feb2013-1).pdf).

loan, or, as is most often the case, take out another loan and soon face the same predicament again. At that point, at least some consumers may gain a fuller awareness of the risks and costs of this type of loan,⁵³¹ but by then it may be too late for the consumer to be able to protect her interests. Each of these choices results in increased costs to consumers—often very high and unexpected costs—which harm consumers' interests. An unaffordable first loan can thus ensnare consumers in a cycle of debt from which consumers have no reasonable means to extricate themselves, rendering them unable to protect their interests in selecting or using covered short-term loans.

Practice Takes Unreasonable Advantage of Consumer Vulnerabilities

Under section 1031(d)(2) of the Dodd-Frank Act, a practice is abusive if it takes unreasonable advantage of consumers' lack of understanding or inability to protect their interests. The Bureau believes that the lender practice of making covered short-term loans without determining that the consumer has the ability to repay may take unreasonable advantage both of consumers' lack of understanding of the material risks, costs, and conditions of such loans, and consumers' inability to protect their interests in selecting or using the loans.

The Bureau recognizes that in any transaction involving a consumer financial product or service there is likely to be some information asymmetry between the consumer and the financial institution. Often, the financial institution will have superior bargaining power as well. Section 1031(d) of the Dodd-Frank Act does not prohibit financial institutions from taking advantage of their superior knowledge or bargaining power to maximize their profit. Indeed, in a market economy, market participants with such advantages generally pursue their self-interests. However, section 1031 of the Dodd-Frank Act makes plain that there comes a point at which a financial institution's conduct in leveraging its superior information or bargaining power becomes unreasonable advantage-taking and thus is abusive.⁵³²

⁵³¹ However, the Mann study discussed in more detail in Market Concerns—Short-Term Loans suggests that consumers do not, in fact, gain a fuller awareness of the risks and costs of this type of loan the more they use the product. Mann, at 127.

⁵³² A covered person taking unreasonable advantage of one or more of the three consumer vulnerabilities identified in section 1031(d) of the Dodd-Frank Act in circumstances in which the covered person lacks such superior knowledge or bargaining power may still be an abusive act or practice.

The Dodd-Frank Act delegates to the Bureau the responsibility for determining when that line has been crossed. The Bureau believes that such determinations are best made with respect to any particular act or practice by taking into account all of the facts and circumstances that are relevant to assessing whether such an act or practice takes unreasonable advantage of consumers' lack of understanding or of consumers' inability to protect their interests. Several interrelated considerations lead the Bureau to believe that the practice of making payday, vehicle title, and other short-term loans without regard to the consumer's ability to repay may cross the line and take unreasonable advantage of consumers' lack of understanding and inability to protect their interests.

The Bureau first notes that the practice of making loans without regard to the consumer's ability to repay stands in stark contrast to the practice of lenders in virtually every other credit market, and upends traditional notions of responsible lending enshrined in safety-and-soundness principles as well as in a number of other laws.⁵³³ The general presupposition of credit markets is that the interests of lenders and borrowers are closely aligned: lenders succeed (*i.e.*, profit) only when consumers succeed (*i.e.*, repay their loan according to its terms). For example, lenders in other markets, including other subprime lenders, typically do not make loans without first making an assessment that consumers have the capacity to repay the loan according to the loan terms. Indeed, "capacity" is one of the traditional three "Cs" of lending and is often embodied in tests that look at debt as a proportion of the consumer's income or at the consumer's residual income after repaying the debt.

In the markets for payday, vehicle title, and similar short-term loans, however, lenders have built a business model that—unbeknownst to borrowers—*depends* upon the consumer's lack of capacity to repay such loans without needing to reborrow.

⁵³³ Dodd-Frank Act section 1411, codified at 15 U.S.C. 1639c(a)(1); CARD Act, 15 U.S.C. 1665e; HPML Rule, 73 FR 44522, 44543 (July 30, 2008); OCC Advisory Letter 2003-3, Avoiding Predatory and Abusive Lending Practices in Brokered and Purchased Loans (Feb. 21, 2003), available at <http://www.occ.gov/static/news-issuances/memos-advisory-letters/2003/advisory-letter-2003-3.pdf>; OCC, Guidance on Supervisory Concerns and Expectations Regarding Deposit Advance Products, 78 FR 70624 (Nov. 26, 2013); FDIC Guidance on Supervisory Concerns and Expectations Regarding Deposit Advance Products, 78 FR 70552 (Nov. 26, 2013).

As explained above, the costs of maintaining business operations (which include customer acquisition costs and overhead expenses) often exceed the revenue that could be generated from making individual short-term loans that are repaid without reborrowing. Thus, lenders' business model depends upon a substantial percentage of consumers not being able to repay their loans when due and, instead, taking out multiple additional loans in quick succession. Indeed, upwards of half of all payday and single-payment vehicle title loans are made to—and an even higher percentage of revenue is derived from—borrowers in a sequence of ten loans or more. This dependency on revenue from long-term debt cycles has been acknowledged by industry stakeholders. For example, as noted in Market Concerns—Short-Term Loans, an attorney for a national trade association representing storefront payday lenders asserted in a letter to the Bureau that, "[i]n any large, mature payday loan portfolio, loans to repeat borrowers generally constitute between 70 and 90 percent of the portfolio, and for some lenders, even more."

Also relevant in assessing whether the practice at issue here involves unreasonable advantage-taking is the vulnerability of the consumers seeking these types of loans. As discussed in Market Concerns—Short-Term Loans, payday and vehicle title borrowers—and by extension borrowers of similar short-term loans—generally have modest incomes, little or no savings, and have tried and failed to obtain other forms of credit. They generally turn to these products in times of need as a "last resort," and when the loan comes due and threatens to take a large portion of their income, their situation becomes, if anything, even more desperate.

In addition, the evidence described in Market Concerns—Short-Term Loans suggests that lenders engage in practices that further exacerbate the risks and costs to the interests of consumers. Lenders market these loans as being for use "until next payday" or to "tide over" consumers until they receive income, thus encouraging overly optimistic thinking about how the consumer is likely to use the product. Lender advertising also focuses on immediacy and speed, which may increase consumers' existing sense of urgency. Lenders make an initial short-term loan and then roll over or make new loans to consumers in close proximity to the prior loan, compounding the consumer's initial inability to repay. Lenders make this reborrowing option easy and salient to consumers in comparison to repayment

of the full loan principal. Moreover, lenders do not appear to encourage borrowers to reduce the outstanding principal over the course of a loan sequence, which would help consumers extricate themselves from the cycle of indebtedness more quickly and reduce their costs from reborrowing. Storefront lenders in particular encourage loan sequences because they encourage or require consumers to repay in person in an effort to frame the consumer's experience in a way to encourage reborrowing. Lenders often give financial incentives to employees to reward maximizing loan volume.

By not determining that consumers have the ability to repay their loans, lenders potentially take unreasonable advantage of a lack of understanding on the part of the consumer of the material risks of those loans and of the inability of the consumer to protect the interests of the consumer in selecting or using those loans.

Unfairness

Under section 1031(c)(1) of the Dodd-Frank Act, an act or practice is unfair if it causes or is likely to cause substantial injury to consumers which is not reasonably avoidably by consumers and such injury is not outweighed by countervailing benefits to consumers or to competition. Under section 1031(c)(2), the Bureau may consider established public policies as evidence in making this determination. The Bureau believes that it may be an unfair act or practice for a lender to make a covered short-term loan without reasonably determining that the consumer has the ability to repay the loan.

Practice Causes or Is Likely To Cause Substantial Injury

As noted in part IV, the Bureau's interpretation of the various prongs of the unfairness test is informed by the FTC Act, the FTC Policy Statement on Unfairness, and FTC and other Federal agency rulemakings and related case law.⁵³⁴ Under these authorities, as

⁵³⁴ Over the past several decades, the FTC and Federal banking regulators have promulgated a number of rules addressing acts or practices involving financial products or services that the agencies found to be unfair under the FTC Act (the 1994 amendments to which codified the FTC Policy Statement on Unfairness). For example, in the Credit Practices Rule, the FTC determined that certain features of consumer-credit transactions were unfair, including most wage assignments and security interests in household goods, pyramiding of late charges, and cosigner liability. 49 FR 7740 (Mar. 1, 1984) (codified at 16 CFR 444). The D.C. Circuit upheld the rule as a permissible exercise of unfairness authority. *AFSA*, 767 F.2d at 957. The Federal Reserve Board adopted a parallel rule applicable to banks in 1985. (The Federal Reserve

discussed in part IV, substantial injury may consist of a small amount of harm to a large number of individuals or a larger amount of harm to a smaller number of individuals. In this case, the practice at issue causes or is likely to cause *both*—a substantial number of consumers suffer a high degree of harm, and a large number of consumers suffer a lower but still meaningful degree of harm.

The Bureau believes that the practice of making a covered short-term loan without assessing the consumer's ability to repay may cause or be likely to cause substantial injury. When a loan is structured to require repayment within a short period of time, the payments may outstrip the consumer's ability to repay since the type of consumers who turn to these products cannot absorb large loan payments on top of their major financial obligations and basic living expenses. If a lender nonetheless makes such loans without determining that the loan payments are within the consumer's ability to repay, then it appears the lender's conduct causes or is likely to cause the injuries described below.

In the aggregate, the consumers who suffer the greatest injury are those consumers who have exceedingly long loan sequences. As discussed above in Market Concerns—Short-Term Loans, consumers who become trapped in long loan sequences pay substantial fees for reborrowing, and they usually do not reduce the principal amount owed when they reborrow. For example, roughly half of payday loan sequences consist of at least three rollovers, at which point, in a typical two-week loan, a storefront payday borrower will have paid over a period of eight weeks charges equal to 60 percent or more of the loan amount—and will still owe the

full amount borrowed. Roughly one-third of consumers roll over or renew their loan at least six times, which means that, after three and a half months with a typical two-week loan, the consumer will have paid to the lender a sum equal to 100 percent of the loan amount and made no progress in repaying the principal. Almost one-quarter of loan sequences consist of at least 10 loans in a row, and 50 percent of all loans are in sequences of 10 loans or more. And looking just at loans made to borrowers who are paid weekly, biweekly, or semi-monthly, approximately 21 percent of loans are in sequences consisting of at least 20 loans. For loans made to borrowers who are paid monthly, 42 percent of loans are in sequences consisting of at least 10 loans. In many instances, such consumers also incur bank penalty fees (such as NSF fees) and lender penalty fees (such as late fees and/or returned check fees) before rolling over a loan. Similarly, for vehicle title loans, the Bureau found that more than half, 56 percent, of single-payment vehicle title sequences consist of at least four loans in a row; over a third, 36 percent, consist of seven or more loans in a row; and 23 percent had 10 or more loans.

Moreover, consumers whose loan sequences are shorter may still suffer meaningful injury from reborrowing beyond expected levels, albeit to a lesser degree than those in longer sequences. Even a consumer who reborrows only once or twice—and, as described in Market Concerns—Short-Term Loans, 22 percent of payday and 23 percent of vehicle title loan sequences show this pattern—will still incur substantial costs related to reborrowing or rolling over the loans.

The injuries resulting from default on these loans also appear to be significant in magnitude. As described in section Market Concerns—Short-Term Loans, 20 percent of payday loan sequences end in default, while 33 percent of vehicle title sequences end in default. Because short-term loans (other than vehicle title loans) are usually accompanied by some means of payment collection—typically a postdated check for storefront payday loans and an authorization to submit electronic debits to the consumer's account for online payday loans—a default means that the lender was unable to secure payment despite using those tools. That means that a default is preceded by failed payment withdrawal attempts which generate bank fees (such as NSF fees), that can put the consumer's account at risk and lender fees (such as late fees or returned check fees) which add to the consumer's

Board's parallel rule was codified in Regulation AA, 12 CFR part 227, subpart B. Regulation AA has been repealed as of March 21, 2016, following the Dodd-Frank Act's elimination of the Federal Reserve Board's rule writing authority under the FTC Act. See 81 FR 8133 (Feb. 18, 2016). In 2009, in the HPML Rule, the Federal Reserve Board found that disregarding a consumer's repayment ability when extending a higher-priced mortgage loan or HOEPA loan, or failing to verify the consumer's income, assets, and obligations used to determine repayment ability, is an unfair practice. See 73 FR 44522 (July 30, 2008). The Federal Reserve Board relied on rulemaking authority pursuant to TILA section 129(l)(2), 15 U.S.C. 1639(l)(2), which incorporated the provisions of the Home Ownership and Equity Protection Act (HOEPA). The Federal Reserve Board interpreted the HOEPA unfairness standard to be informed by the FTC Act unfairness standard. See 73 FR 44522, 44529 (July 30, 2008). That same year, the Federal Reserve Board, the OTS, and the NCUA issued the interagency Subprime Credit Card Practices Rule, in which the agencies concluded that creditors were engaging in certain unfair practices in connection with consumer credit card accounts. See 74 FR 5498 (Jan. 29, 2009).

indebtedness. Additionally, as discussed in Market Concerns—Short-Term Loans, where lenders' attempts to extract money directly from the consumer's account fails, the lender often will resort to other collection techniques, some of which—such as repeated phone calls, in-person visits to homes and worksites, and lawsuits leading to wage garnishments—can inflict significant financial and psychological damage on consumers.⁵³⁵

For consumers with a short-term vehicle title loan, the injury from default can be even greater. In such cases lenders do not have access to the consumers' bank account but instead have the ability to repossess the consumer's vehicle. As discussed above, almost one in five vehicle title loan sequences end with the consumer's vehicle being repossessed. Consumers whose vehicles are repossessed may end up either wholly dependent upon public transportation, or family, or friends to get to work, to shop, or to attend to personal needs, or in many areas of the country without any effective means of transportation at all.

Moreover, the Bureau believes that many consumers, regardless of whether they ultimately manage to pay off the loan, suffer collateral consequences as they struggle to make payments that are beyond their ability to repay. For instance, they may be unable to meet their other major financial obligations or be forced to forgo basic living expenses as a result of prioritizing a loan payment and other loan charges—or having it prioritized for them by the lender's exercise of its leveraged payment mechanism.

Injury Not Reasonably Avoidable

As previously noted in part IV, under the FTC Act unfairness standard, the FTC Policy Statement on Unfairness, FTC and other Federal agency rulemakings, and related case law, which inform the Bureau's interpretation and application of the unfairness test, an injury is not reasonably avoidable where "some form of seller behavior . . . unreasonably creates or takes advantage of an obstacle to the free exercise of consumer decision-making,"⁵³⁶ or, put another way, unless consumers have reason to anticipate the injury and the means to avoid it. It appears that, in a significant proportion of cases, consumers are unable to reasonably avoid the

substantial injuries caused or likely to be caused by the identified practice. Prior to entering into a payday, vehicle title, or other short-term loan, consumers are unable to reasonably anticipate the likelihood and severity of injuries that frequently results from such loans, and after entering into the loan, consumers do not have the means to avoid the injuries that may result should the loan prove unaffordable.

As discussed above in Market Concerns—Short-Term Loans, a confluence of factors creates obstacles to the free exercise of consumers' decision-making, preventing them from reasonably avoiding injury caused by unaffordable short-term loans. Such loans involve a basic mismatch between how they appear to function as short term credit and how they are actually designed to function in long sequences of reborrowing. Lenders present short-term loans as short-term, liquidity-enhancing products that consumers can use to bridge an income shortfall until their next paycheck. But in practice, these loans often do not operate that way. The disparity between how these loans appear to function and how they actually function creates difficulties for consumers in estimating with any accuracy how long they will remain in debt and how much they will ultimately pay for the initial extension of credit. Consumer predictions are often overly optimistic, and consumers who experience long sequences of loans often do not expect those long sequences when they make their initial borrowing decision. As detailed in Market Concerns—Short-Term Loans, empirical evidence demonstrates that consumer predictions of how long the loan sequence will last tend to be inaccurate, with many consumers underestimating the length of their loan sequence. Consumers are particularly poor at predicting long sequences of loans, and many do not appear to improve the accuracy of their predictions as a result of past borrowing experience.⁵³⁷

Likewise, consumers are unable to reasonably anticipate the likelihood and severity of the consequences of being unable to repay the loan. The consequences include, for example, the risk of accumulating numerous penalty fees on their bank account and on their loan, and the risk that their vehicle will

be repossessed, leading to numerous direct and indirect costs. The typical consumer does not have the information to understand the frequency with which these adverse consequences do occur or the likelihood of such consequences befalling a typical consumer of such a loan.

In analyzing reasonable avoidability under the FTC Act unfairness standard, the Bureau notes that the FTC and other agencies have at times focused on factors such as the vulnerability of affected consumers,⁵³⁸ as well as those consumers' perception of the availability of alternative products.⁵³⁹ Likewise, the Bureau believes that the substantial injury from short-term loans may not be reasonably avoidable in part because of the consumers' precarious financial situation at the time they borrow and their reasonable belief that searching for alternatives will be fruitless and costly. As discussed in part Market Concerns—Short-Term Loans, consumers who take out payday or short-term vehicle title loans typically have tried and failed to obtain other forms of credit before turning to these

⁵³⁸ See, e.g., FTC Policy Statement on Unfairness, 104 FTC at 1074 (noting that the FTC may consider the "exercise [of] undue influence over highly susceptible classes of purchasers"); Mortgage Assistance Relief Services Rule, 75 FR 75092, 75117 (Dec. 1, 2010) (emphasizing the "financially distressed" condition of consumers "who often are desperate for any solution to their mortgage problems and thus are vulnerable to providers' purported solutions"); Telemarketing Sales Rule, 75 FR 48458, 48487 (Aug. 10, 2010) (concluding that injury from debt relief programs was not reasonably avoidable in part because "purchasers of debt relief services typically are in serious financial straits and thus are particularly vulnerable" to the "glowing claims" of service providers); Funeral Industry Practices Rule, 47 FR 42260, 42262 (Sept. 24, 1982) (citing characteristics which place the consumer in a disadvantaged bargaining position relative to the funeral director, leaving the consumer vulnerable to unfair and deceptive practices, and causing consumers to have little knowledge of legal requirements and available alternatives). The Funeral Industry Practices Rule and amendments were upheld in the Fourth and Third Circuits. See *Harry and Bryant Co. v. FTC*, 726 F.2d 993 (4th Cir. 1984); *Pennsylvania Funeral Directors Ass'n, Inc. v. FTC*, 41 F.3d 81 (3d Cir. 1994). In the Subprime Credit Card Practices Rule—in which three Federal banking regulators identified as unfair certain practices being routinely followed by credit card issuers—the Federal Reserve Board, OTS, and NCUA noted their concern that subprime credit cards "are typically marketed to vulnerable consumers whose credit histories or other characteristics prevent them from obtaining less expensive credit products." 74 FR 5498, 5539 (Jan. 29, 2009).

⁵³⁹ In the HPML Rule, the Federal Reserve Board discussed how subprime consumers "accept loans knowing they may have difficulty affording the payments because they reasonably believe a more affordable loan will not be available to them," how "taking more time to shop can be costly, especially for the borrower in a financial pinch," and how because of these factors "borrowers often make a reasoned decision to accept unfavorable terms." 73 FR 44522, 44542 (July 30, 2008).

⁵³⁵ As noted in part IV (Legal Authority), the D.C. Circuit held that psychological harm can form part of the substantial injury along with financial harm. See *AFSA*, 767 F.2d at 973-74, n.20.

⁵³⁶ FTC Policy Statement on Unfairness, 104 FTC at 1074.

⁵³⁷ As noted in Market Concerns—Short-Term Loans, it appears that some consumers are able to accurately predict that they will need to reborrow one or two times, but decide to take the loan out regardless of the additional cost of one or two additional loans. Accordingly, such costs do not count as substantial injury that is not reasonably avoidable.

loans as a “last resort.” Thus, based on their prior negative experience with attempting to obtain credit, they may reasonably perceive that alternative options would not be available. Consumers facing an imminent liquidity crisis may also reasonably believe that their situation is so dire that they do not have time to shop for alternatives and that doing so could prove costly.

Not only are consumers unable to reasonably anticipate potential harms before entering into a payday, vehicle title, or other short-term loan, once they have entered into a loan, they do not have the means to avoid the injuries should the loan prove unaffordable. Consumers who obtain a covered short-term loan beyond their ability to repay face three options: Either reborrow, default, or repay the loan but defer or skip payments on their major financial obligations and for basic living expenses. In other words, for a consumer facing an unaffordable payment, some form of substantial injury is almost inevitable regardless of what actions are taken by the consumer. And as discussed above, lenders engage in a variety of practices that further increase the degree of harm, for instance by encouraging additional reborrowing even among consumers who are already experiencing substantial difficulties and engaging in payment collection practices that are likely to cause consumers to incur substantial additional fees beyond what they already owe.

Injury Not Outweighed by Countervailing Benefits to Consumers or to Competition

As noted in part IV, the Bureau’s interpretation of the various prongs of the unfairness test is informed by the FTC Act, the FTC Policy Statement on Unfairness, and FTC and other Federal agency rulemakings and related case law. Under those authorities, it generally is appropriate for purposes of the countervailing benefits prong of the unfairness standard to consider both the costs of imposing a remedy and any benefits that consumers enjoy as a result of the practice, but the determination does not require a precise quantitative analysis of benefits and costs.

It appears to the Bureau that the current practice of making payday, vehicle title, and other short-term loans without determining that the consumer has the ability to repay does not result in benefits to consumers or competition that outweigh the substantial injury that consumers cannot reasonably avoid. As discussed above, the amount of injury that is caused by the unfair practice, in the aggregate, appears to be extremely

high. Although some individual consumers may be able to avoid the injury, as noted above, a significant number of consumers who end up in very long loan sequences can incur extremely severe financial injuries that were not reasonably avoidable. Moreover, some consumers whose short-term loans become short- to medium-length loan sequences incur various degrees of injury ranging from modest to severe depending on the particular consumer’s circumstances (such as the specific loan terms, whether and how much the consumer expected to reborrow, and the extent to which the consumer incurred collateral harms from making unaffordable payments). In addition, many borrowers also experience substantial injury that is not reasonably avoidable as a result of defaulting on a loan or repaying a loan but not being able to meet other obligations and expenses.

Against this very significant amount of harm, the Bureau must weigh several potential countervailing benefits to consumers or competition of the practice in assessing whether it is unfair. The Bureau believes it is helpful to divide consumers into several groups of different borrowing experiences when analyzing whether the practice of extending covered short-term loans without determining that the consumer has the ability to repay yields countervailing benefits to consumers.

The first group consists of borrowers who repay their loan without reborrowing. The Bureau refers to these borrowers as “repayers” for purposes of this countervailing benefits analysis. As discussed in Market Concerns—Short-Term Loans, 22 percent of payday loan sequences and 12 percent of vehicle title loan sequences end with the consumer repaying the initial loan in a sequence without reborrowing. Many of these consumers may reasonably be determined, before getting a loan, to have the ability to repay their loan, such that the ability-to-repay requirement in proposed § 1041.5 would not have a significant impact on their eligibility for this type of credit. At most, it would reduce somewhat the speed and convenience of applying for a loan under the current practice. Under the status quo, the median borrower lives five miles from the nearest payday store. Consumers generally can obtain payday loans simply by traveling to the store and showing a paystub and evidence of a checking account; online payday lenders may require even less. For vehicle title loans, all that is generally required is that the consumer owns their vehicle outright without any encumbrance.

As discussed in more detail in part VI, there could be a significant contraction in the number of payday stores if lenders were required to assess consumers’ ability to pay in the manner required by the proposal, but the Bureau projects that 93 to 95 percent of borrowers would not have to travel more than five additional miles. Lenders likely would require more information and documentation from the consumer. Indeed, under the proposed rule consumers may be required in certain circumstances to provide documentation of their income for a longer period of time than their last paystub and may be required to document their rental expenses. Consumers would also be required to complete a written statement with respect to their expected future income and major financial obligations.

Additionally, when a lender makes a loan without determining a consumer’s ability to repay, the lender can make the loan instantaneously upon obtaining a consumer’s paystub or vehicle title. In contrast, if lenders assessed consumers’ ability to repay, they might secure extrinsic data, such as a consumer report from a national consumer reporting agency, which could slow the process down. Indeed, under the proposed rule lenders would be required to review the consumer’s borrowing history using the lender’s own records and a report from a registered information system, and lenders would also be required to review a credit report from a national credit reporting agency. Using this information, along with verified income, lenders would have to project the consumer’s residual income.

As discussed below in the section-by-section analysis of proposed § 1041.5, the proposed rule has been designed to enable lenders to obtain electronic income verification, to use a model to estimate rental expenses, and to automate the process of securing additional information and assessing the consumer’s ability to repay. If the proposed ability-to-repay requirements are finalized, the Bureau anticipates that consumers who are able to demonstrate the ability to repay under proposed § 1041.5 would be able to obtain credit to a similar extent as they do in the current market. While the speed and convenience fostered by the current practice may be reduced for these consumers under the proposed rule’s requirements, the Bureau does not believe that the proposed requirements will be overly burdensome in this respect. As described in part VI, the Bureau estimates that the required ability-to-repay determination would

take essentially no time for a fully automated electronic system and between 15 and 20 minutes for a fully manual system.

While the Bureau believes that most repayers would be able to demonstrate the ability to repay under proposed § 1041.5, the Bureau recognizes that there is a sub-segment of repayers who could not demonstrate their ability to repay if required to do so by a lender. For them, the current lender practice of making loans without determining their ability to repay enables these consumers to obtain credit that, by hypothesis, may actually be within their ability to repay. The Bureau acknowledges that for this group of “false negatives” there may be significant benefits of being able to obtain covered loans without having to demonstrate their ability to repay in the way prescribed by proposed § 1041.5.

However, the Bureau believes that under the proposed rule lenders will generally be able to identify consumers who are able to repay and that the size of any residual “false negative” population will be small. This is especially true to the extent that this class of consumers is disproportionately drawn from the ranks of those whose need to borrow is driven by a temporary mismatch in the timing between their income and expenses rather than those who have experienced an income or expense shock or those with a chronic cash shortfall. It is very much in the interest of these borrowers to attempt to demonstrate their ability to repay in order to receive the loan and for the same reason lenders will have every incentive to err on the side of finding such an ability. Moreover, even if these consumers could not qualify for the loan they would have obtained absent an ability-to-pay requirement, they may still be able to get different credit within their demonstrable ability to repay, such as a smaller loan or a loan with a longer term.⁵⁴⁰ For these reasons, the Bureau does not believe that there would be a large false negative population if lenders made loans only to those with the ability to repay.

Finally, some of the repayers may not actually be able to afford the loan, but choose to repay it nonetheless, rather than reborrow or default—which may result in their incurring costs in connection with another obligation, such as a late fee on a utility bill. Such

repayers would not be able to obtain under proposed § 1041.5 the same loan that they would have obtained absent an ability-to-repay requirement, but any benefit they receive under the current practice would appear to be small, at most.

The second group consists of borrowers who eventually default on their loan, either on the first loan or later in a loan sequence after having reborrowed. The Bureau refers to these borrowers as “defaulters” for purposes of this countervailing benefits analysis. As discussed in Market Concerns—Short-Term Loans, borrowers of 20 percent of payday and 33 percent of vehicle title loan sequences fall within this group. For these consumers, the current lender practice of making loans without regard to their ability to repay may enable them to obtain what amounts to a temporary “reprieve” from their current situation. They can obtain some cash which may enable them to pay a current bill or current expense. However, for many consumers, the reprieve can be exceedingly short-lived: 31 percent of payday loan sequences that default are single loan sequences, and an additional 27 percent of loan sequences that default are two or three loans long (meaning that 58 percent of defaults occur in loan sequences that are one, two, or three loans long). Twenty-nine percent of single-payment vehicle title loan sequences that default are single loan sequences, and an additional 26 percent of loan sequences that default are two or three loans long.

These consumers thus are merely substituting a payday lender or vehicle title lender for a preexisting creditor, and in doing so, end up in a deeper hole by accruing finance charges, late fees, or other charges at a high rate. Vehicle title loans can have an even more dire consequence for defaulters: 20 percent have their vehicle repossessed. The Bureau thus does not believe that defaulters obtain benefits from the current lender practice of not determining ability to repay.⁵⁴¹

The final and largest group of consumers consists of those who neither default nor repay their loans without reborrowing but who, instead, reborrow before eventually repaying. The Bureau refers to consumers with such loan sequences as “reborrowers” for purposes of this countervailing benefits

discussion. These consumers represent 58 percent of payday loan sequences and 56 percent of auto title loan sequences. For these consumers, as for the defaulters, the practice of making loans without regard to their ability to repay enables them to obtain a temporary reprieve from their current situation. But for this group, that reprieve can come at a greater cost than initially expected, sometimes substantially greater.

Some reborrowers are able to end their borrowing after a relatively small number of additional loans; for example, approximately 22 percent of payday loan sequences and 23 percent of vehicle title loan sequences are repaid after the initial loan is reborrowed once or twice. But even among this group, many consumers do not anticipate before taking out a loan that they will need to reborrow. These consumers cannot reasonably avoid their injuries, and while their injuries may be somewhat less severe than the injuries suffered by consumers with extremely long loan sequences, their injuries can nonetheless be substantial, particularly in light of their already precarious finances. Conversely, some of these consumers may expect to reborrow and may accurately predict how many times they will have to reborrow. For consumers who accurately predict their reborrowing, the Bureau is not counting their reborrowing costs as substantial injury that should be placed on the “injury” side of the countervailing benefits scale.

While some reborrowers end their borrowing after a relatively small number of additional loans, a large percentage of reborrowers end up in significantly longer loan sequences. Of storefront payday loan sequences, for instance, one-third percent contain seven or more loans, meaning that consumers pay finance charges equal to or greater than 100 percent of the amount borrowed. About a quarter percent of loan sequences contain 10 or more loans in succession. For vehicle title borrowers, the picture is similarly dramatic: Only 23 percent of loan sequences taken out by vehicle title reborrowers are repaid after two or three successive loans whereas 23 percent of sequences are for 10 or more loans in succession. The Bureau does not believe any significant number of consumers anticipate such lengthy sequences.

Thus, the Bureau believes that the substantial injury suffered by the defaulters and reborrowers—the categories that represent the vast majority of overall short-term payday and vehicle title borrowers—dwarfs any benefits these groups of borrowers may

⁵⁴⁰ Moreover, consumers who cannot or do not want to attempt to demonstrate an ability to repay may be able to take out a loan under proposed § 1041.7. For the purpose of this countervailing benefits analysis, however, the Bureau is not relying on the fact that consumers who cannot demonstrate an ability to repay may be able to take out a loan under proposed § 1041.7.

⁵⁴¹ The Bureau recognizes that defaulters may not default because they lack the ability to repay, but the Bureau believes that the percentage of consumers who default despite having the ability to repay the loan is small. Moreover, any benefit such borrowers derive from the loan would not be diminished by proposed § 1041.5 precisely because they have the ability to repay the loans.

receive in terms of a temporary reprieve and also dwarfs the speed and convenience benefits that the repayers may experience. The Bureau acknowledges that any benefits derived by the aforementioned “false negatives” may be reduced under the proposed rule, but the Bureau believes that the benefits this relatively small group receives is outweighed by the substantial injuries to the defaulters and reborrowers as discussed above. Further, the Bureau believes that under the proposed intervention, many of these borrowers may find more sustainable options, such as underwritten credit on terms that are tailored to their budget and more affordable.

Turning to benefits of the practice for competition, the Bureau acknowledges, as discussed further in part II, that the current practice of lending without regard to consumers’ ability to repay has enabled the payday industry to build a business model in which 50 percent or more of the revenue comes from consumers who borrow 10 or more times in succession. This, in turn, has enabled a substantial number of firms to extend such loans from a substantial number of storefront locations. As discussed in part II, the Bureau estimates that the top ten storefront payday lenders control only about half of the market, and that there are 3,300 storefront payday lenders that are small entities as defined by the SBA. The Bureau also acknowledges that, as discussed above and further in part VI, the anticipated effect of limiting lenders to loans that consumers can afford to repay will be to substantially shrink the number of loans per consumer which may, in turn, result in a more highly concentrated markets in some geographic areas. Moreover, the current practice enables to lenders to avoid the procedural costs that the proposed rule would impose.

However, the Bureau does not believe the proposed rule will reduce the competitiveness of the payday or vehicle title markets. As discussed in part II, most States in which such lending takes place have established a maximum price for these loans. Although in any given State there are a large number of lenders making these loans, typically in close proximity to one another, research has shown that there is generally no meaningful price competition among these firms. Rather, in general, the firms currently charge the maximum price allowed in any given State. Lenders who operate in multiple States generally vary their prices from State to State to take advantage of whatever local law allows.

Thus, for example, lenders operating in Florida are permitted to charge \$10 per \$100 loaned,⁵⁴² and those same lenders, when lending in South Carolina, charge \$15 per \$100.⁵⁴³

In sum, it appears that the benefits of the identified unfair practice for consumers and competition do not outweigh the substantial, not reasonably avoidable injury caused or likely to be caused by the practice. On the contrary, it appears that the very significant injury caused by the practice outweighs the relatively modest benefits of the practice to consumers.

Consideration of Public Policy

Section 1031(c)(2) of the Dodd-Frank Act allows the Bureau to “consider established public policies as evidence to be considered with all other evidence” in determining whether a practice is unfair as long as the public policy considerations are not the primary basis of the determination. In addition to the evidence described above and in Market Concerns—Short-Term Loans, established public policy supports the proposed finding that it is an unfair act or practice for lenders to make covered short-term loans without determining that the consumer has the ability to repay.

Specifically, as noted above, several consumer financial statutes, regulations, and guidance documents require or recommend that covered lenders assess their customers’ ability to repay before extending credit. These include the Dodd-Frank Act with regard to closed-end mortgage loans,⁵⁴⁴ the CARD Act with regard to credit cards,⁵⁴⁵ guidance from the OCC on abusive lending practices,⁵⁴⁶ guidance from the FDIC on small dollar lending,⁵⁴⁷ and guidance

from the OCC⁵⁴⁸ and FDIC⁵⁴⁹ on deposit advance products. In addition, the Federal Reserve Board promulgated a rule requiring an ability-to-repay determination regarding higher priced mortgages, although that rule has since been superseded by the Dodd-Frank Act’s ability-to-repay requirement and its implementation regulations which apply generally to mortgages regardless of price.⁵⁵⁰ In short, Congress, State legislatures,⁵⁵¹ and other agencies have found consumer harm to result from lenders failing to determine that consumer have the ability to repay credit. These established policies support a finding that it is unfair for a lender to make covered short-term loans without determining that the consumer has the ability to repay, and evince public policy that supports the Bureau’s proposed imposition of the consumer protections in proposed part 1041. The Bureau gives weight to this policy and bases its proposed finding that the identified practice is unfair, in part, on this significant body of public policy.

The Bureau seeks comment on the evidence and proposed findings and conclusions in proposed § 1041.4 and Market Concerns—Short-Term Loans above. As discussed further below in connection with proposed § 1041.7, the Bureau also seeks comment on whether making loans with the types of consumer protections contained in proposed § 1041.7(b) through (e) should not be included in the practice identified in proposed § 1041.4.

Section 1041.5 Ability-To-Repay Determination Required

As discussed in the section-by-section analysis of § 1041.4 above, the Bureau has tentatively concluded that it is an unfair and abusive act or practice to

Ann. § 598D.100 (it is unfair practice to make home loan without determining ATR); Tex. Educ. Code Ann. § 52.321 (state board will set standards for student-loan applicants based in part on ATR).

make a covered short-term loan without reasonably determining that the consumer will have the ability to repay the loan. Section 1031(b) of the Dodd-Frank Act provides that the Bureau's rules may include requirements for the purpose of preventing unfair or abusive acts or practices. The Bureau is proposing to prevent the abusive and unfair practice by including in proposed §§ 1041.5 and 1041.6 minimum requirements for how a lender may reasonably determine that a consumer has the ability to repay a covered short-term loan.

Proposed § 1041.5 sets forth the prohibition against making a covered short-term loan (other than a loan that satisfies the protective conditions in proposed § 1041.7) without first making a reasonable determination that the consumer will have the ability to repay the covered short term loan according to its terms. It also, in combination with proposed § 1041.6, specifies minimum elements of a baseline methodology that would be required for determining a consumer's ability to repay, using a residual income analysis and an assessment of the consumer's prior borrowing history. In crafting the baseline ability-to-repay methodology established in proposed §§ 1041.5 and 1041.6, the Bureau is attempting to balance carefully several considerations, including the need for consumer protection, industry interests in regulatory certainty and manageable compliance burden, and preservation of access to credit.

Proposed § 1041.5 would generally require the lender to make a reasonable determination that a consumer will have sufficient income, after meeting major financial obligations, to make payments under a prospective covered short-term loan and to continue meeting basic living expenses. However, based on feedback from a wide range of stakeholders and its own internal analysis, as well as the Bureau's belief that consumer harm has resulted despite more general standards in State law, the Bureau believes that merely establishing such a general requirement would provide insufficient protection for consumers and insufficient certainty for lenders.

Many lenders have informed the Bureau that they conduct some type of underwriting on covered short-term loans and assert that it should be sufficient to meet the Bureau's standards. However, as discussed above, such underwriting often is designed to screen primarily for fraud and to assess whether the lender will be able to extract payments from the consumer. It typically makes no attempt to assess

whether the consumer might be forced to forgo basic necessities or to default on other obligations in order to repay the covered loan. Moreover, such underwriting essentially treats reborrowing as a neutral or positive outcome, rather than as a sign of the consumer's distress, because reborrowing does not present a risk of loss or decreased profitability to the lender. On the contrary, new fees from each reborrowing contribute to the lender's profitability. In the Bureau's experience, industry underwriting typically goes no further than to predict the consumer's *propensity* to repay rather than the consumer's *financial capacity* (i.e., ability) to repay consistent with the consumer's other obligations and need to cover basic living expenses. Such underwriting ignores the fact that repayment may force the consumer to miss other obligations or to be unable to cover basic living expenses.

The Bureau believes that to prevent the abusive and unfair practices that appear to be occurring in the market, it would be appropriate not only to require lenders to make a reasonable determination of a consumer's ability to repay before making a covered short term loan but also to specify minimum elements of a baseline methodology for evaluating consumers' individual financial situations, including their borrowing history. The baseline methodology is not intended to be a substitute for lender screening and underwriting methods, such as those designed to screen out fraud or predict and avoid other types of lender losses. Accordingly, lenders would be permitted to supplement the baseline methodology with other underwriting and screening methods.

The baseline methodology in proposed § 1041.5 rests on a residual income analysis—that is, an analysis of whether, given the consumer's projected income and major obligations, the consumer will have sufficient remaining (i.e., residual) income to cover the payments on the proposed loan and still meet basic living expenses. The Bureau recognizes that in other markets and under other regulatory regimes financial capacity is more typically measured by establishing a maximum debt-to-income (DTI) ratio.⁵⁵² DTI tests generally rest on the assumption that so long as a consumer's debt burden does not exceed

⁵⁵² For example, DTI is an important component of the Bureau's ability to repay regulation for mortgages in 12 CFR 1026.43. It is a factor that a creditor must consider in determining a consumer's ability to repay and also a component of the standards that a residential mortgage loan must meet to be a qualified mortgage under that regulation.

a certain threshold percentage of the consumer's income, the remaining share of income will be sufficient for a consumer to be able meet non-debt obligations and other expenses. However, for low- and moderate-income consumers, the Bureau believes that assumption is less likely to be true: A DTI ratio that might seem quite reasonable for the "average" consumer can be quite unmanageable for a consumer at the lower end of the income spectrum and the higher end of the debt burden range.⁵⁵³ Ultimately, whether a particular loan is affordable will depend upon how much money the consumer will have left after paying existing obligations and whether that amount is sufficient to cover the proposed new obligation while still meeting basic living expenses.

In addition, in contrast with other markets in which there are long-established norms for DTI levels that are consistent with sustainable indebtedness, the Bureau does not believe that there exist analogous norms for sustainable DTI levels for consumers taking covered short-term loans. Thus, the Bureau believes that residual income is a more direct test of ability to repay than DTI and a more appropriate test with respect to the types of products covered in this rulemaking and the types of consumers to whom these loans are made.

The Bureau has designed the residual income methodology requirements specified in proposed §§ 1041.5 and 1041.6 in an effort to ensure that ability-to-repay determinations can be made through scalable underwriting models. The Bureau is proposing that the most critical inputs into the determination rest on documentation but the Bureau's proposed methodology would allow for various means of documenting major financial obligations and also establishes alternatives to documentation where appropriate. It recognizes that rent, in particular, often cannot be readily documented and therefore would allow for estimation of rental expense. See the section-by-section analysis of § 1041.5(c)(3)(ii)(D), below. The Bureau's proposed

⁵⁵³ For example, under the Bureau's ability-to-repay requirements for residential mortgage loans, a qualified mortgage results in a DTI ratio of 43 percent or less. But for a consumer with a DTI ratio of 43 percent and low income, the 57 percent of income not consumed by payments under debt obligations is unlikely to indicate the same capacity to handle a new loan payment of a given dollar amount, compared to consumers with the same DTI and higher income. That is especially true if the low income consumer also faces significant non-debt expenses, such as high rent payments, that consume significant portions of the remaining 57 percent of her income.

methodology also would not mandate verification or detailed analysis of every individual consumer expenditure. The Bureau believes that such detailed analysis may not be the only method to prevent unaffordable loans and is concerned that it would substantially increase costs to lenders and borrowers. See the discussion of basic living expenses, below.

Finally, the Bureau's proposed methodology would not dictate a formulaic answer to whether, in a particular case, a consumer's residual income is sufficient to make a particular loan affordable. Instead, the proposed methodology would allow lenders to exercise discretion in arriving at a reasonable determination with respect to that question. Because this type of underwriting is so different from what many lenders currently engage in, the Bureau is particularly conscious of the need to leave room for lenders to innovate and refine their methods over time, including by building automated systems to assess a consumer's ability to repay so long as the basic elements are taken into account.

Proposed § 1041.5 outlines the methodology for assessing the consumer's residual income as part of the assessment of ability to repay. Proposed § 1041.5(a) would set forth definitions used throughout proposed §§ 1041.5 and 1041.6. Proposed § 1041.5(b) would establish the requirement for a lender to determine that a consumer will have the ability to repay a covered short-term loan and would set forth minimum standards for a reasonable determination that a consumer will have the ability to repay such a covered loan. The standards in proposed § 1041.5(b) would generally require a lender to determine that the consumer's income will be sufficient for the consumer to make payments under a covered short-term loan while accounting for the consumer's payments for major financial obligations and the consumer's basic living expenses. Proposed § 1041.5(c) would establish standards for verification and projections of a consumer's income and major financial obligations on which the lender would be required to base its determination under proposed § 1041.5. Proposed § 1041.6 would impose certain additional presumptions, prohibitions, and requirements where the consumer's reborrowing during the term of the loan or shortly after having a prior loan outstanding suggests that the prior loan was not affordable for the consumer, so that the consumer may have particular difficulty in repaying a new covered short-term loan with similar repayment terms.

In explaining the requirements of the various provisions of proposed § 1041.5, the Bureau is mindful that substantially all of the loans being made today which would fall within the definition of covered short-term loans are single-payment loans, either payday loans or single-payment vehicle title loans. The Bureau recognizes, however, that the definition of covered short-term loan could encompass loans with multiple payments and a term of 45 days or less, for example, a 30-day loan payable in two installments. Accordingly, in the discussion that follows, the Bureau generally refers to payments in the plural and uses phrases such as the "highest payment due." For most covered short-term loans the highest payment would be the only payment and the determinations required by proposed § 1041.5 would be made only for a single payment and the 30 days following such payment.

As an alternative to the proposed ability-to-repay requirement, the Bureau considered whether lenders should be required to provide disclosures to borrowers warning them of the costs and risks of reborrowing, default, and collateral harms from unaffordable payments associated with taking out covered short-term loans. However, the Bureau believes that such a disclosure remedy would be significantly less effective in preventing the consumer harms described above, for three reasons.

First, disclosures do not address the underlying incentives in this market for lenders to encourage borrowers to reborrow and take out long sequences of loans. As discussed in Market Concerns—Short-Term Loans, the prevailing business model involves lenders deriving a very high percentage of their revenues from long loan sequences. While enhanced disclosures would provide additional information to consumers, the loans would remain unaffordable for consumers, lenders would have no greater incentive to underwrite more rigorously, and lenders would remain dependent on long-term loan sequences for revenues.

Second, empirical evidence suggests that disclosures have only modest impacts on consumer borrowing patterns for short-term loans generally and negligible impacts on whether consumers reborrow. Evidence from a field trial of several disclosures designed specifically to warn of the risks of reborrowing and the costs of reborrowing showed that these disclosures had a marginal effect on the

total volume of payday borrowing.⁵⁵⁴ Further, the Bureau has analyzed the impacts of the change in law in Texas (effective January 1, 2012) requiring payday lenders and short-term vehicle title lenders to provide a new disclosure to prospective borrowers before each payday loan transaction.⁵⁵⁵ The Bureau observed that with respect to payday loan transactions, using the Bureau's supervisory data, there was an overall 13 percent decline in loan volume in Texas after the disclosure requirement went into effect, relative to the loan volume changes for the study period in comparison States.⁵⁵⁶ The Bureau's analysis of the impacts of the Texas disclosures also shows that the probability of reborrowing on a payday loan declined by approximately 2 percent once the disclosure was put in place.⁵⁵⁷ This finding indicates that high levels of reborrowing and long sequences of payday loans remain a significant source of consumer harm even with a disclosure regime in place.⁵⁵⁸ Further, as discussed in Market Concerns—Short-Term Loans, the Bureau has observed that borrowers have a very high probability of winding up in a very long sequence once they have taken out only a few loans in a row. The contrast of the extremely high likelihood that a consumer will wind up in a long-term debt cycle after taking out only a few loans with the near negligible impact of a disclosure on consumer reborrowing patterns provides further evidence of the insufficiency of disclosures to address what the Bureau believes are the core harms to consumers in this credit market.

Third, as discussed in part VI, the Bureau believes that behavioral factors make it likely that disclosures to consumers taking out covered short-term loans would be ineffective in warning consumers of the risks and preventing the harms that the Bureau seeks to address with the proposal. Due to the potential for tunneling in their decision-making and general optimism bias, as discussed in more detail in Market Concerns—Short-Term Loans,

⁵⁵⁴ Marianne Bertrand & Adair Morse, *Information Disclosure, Cognitive Biases and Payday Borrowing and Payday Borrowing*, 66 J. Fin. 1865, 1866 (2011), available at <http://onlinelibrary.wiley.com/doi/10.1111/j.1540-6261.2011.01698.x/full>.

⁵⁵⁵ See chapter 3 of the CFPB Report on Supplemental Findings.

⁵⁵⁶ See CFPB Report on Supplemental Findings, at 73.

⁵⁵⁷ See CFPB Report on Supplemental Findings, at 78-79.

⁵⁵⁸ The empirical data suggests that the modest loan volume reductions are primarily attributable to reductions in originations; once a borrower has taken out the initial loan, the disclosure has very little impact.

consumers are likely to dismiss warnings of possible negative outcomes as not applying to them, and to not focus on disclosures of the possible harms associated with outcomes—reborrowing and default—that they do not anticipate experiencing themselves. To the extent the borrowers have thought about the likelihood that they themselves will reborrow or default (or both) on a loan, a general warning about how often people reborrow or default (or both) is unlikely to cause them to revise their own expectations about the chances they themselves will reborrow or default (or both).

The Bureau requests comment on the appropriateness of all aspects of the proposed approach. For example, the Bureau requests comment on whether a simple prohibition on making covered short-term loans without determining ability to repay, without specifying the elements of a minimum baseline methodology, would provide adequate protection to consumers and clarity to industry about what would constitute compliance. Similarly, the Bureau requests comment on the adequacy of a less prescriptive requirement for lenders to “consider” specified factors, such as payment amount under a covered short-term loan, income, debt service payments, and borrowing history, rather than a requirement to determine that residual income is sufficient. (Such an approach could be similar to that of the Bureau’s ability-to-repay requirements for residential mortgage loans.) Specifically, the Bureau requests comment on whether there currently exist sufficient norms around the levels of such factors that are and are not consistent with a consumer’s ability to repay, such that a requirement for a lender to “consider” such factors would provide adequate consumer protection, as well as adequate certainty for lenders regarding what determinations of ability to repay would and would not reflect sufficient consideration of those factors.

Also during outreach, some stakeholders suggested that the Bureau should adopt underwriting rules of thumb—for example, a maximum payment-to-income (PTI) ratio—to either presumptively or conclusively demonstrate compliance with the rule. The Bureau solicits comment on whether the Bureau should define such rules of thumb and, if so, what metrics should be included in a final rule and what significance should be given to such metrics.

5(a) Definitions

Proposed § 1041.5(a) would provide definitions of several terms used in proposed § 1041.5 in assessing the

consumer’s financial situation and proposed § 1041.6 in assessing consumers’ borrowing history before determining whether a consumer has the ability to repay a new covered short-term loan. In particular, proposed § 1041.5(a) includes definitions for various categories of income and expenses that are used in proposed § 1041.5(b), which would establish the methodology that would generally be required for assessing consumers’ ability to repay covered short-term loans. The substantive requirements for making the calculations for each category of income and expenses, as well as the overall determination of a consumer’s ability to repay, are provided in proposed § 1041.5(b) and (c), and in their respective commentary. These proposed definitions are discussed in detail below.

5(a)(1) Basic Living Expenses

Proposed § 1041.5(a)(1) would define the basic living expenses component of the ability-to-repay determination that would be required in proposed § 1041.5(b). It would define basic living expenses as expenditures, other than payments for major financial obligations, that a consumer makes for goods and services necessary to maintain the consumer’s health, welfare, and ability to produce income, and the health and welfare of members of the consumer’s household who are financially dependent on the consumer. Proposed § 1041.5(b) would require the lender to reasonably determine a dollar amount that is sufficiently large so that the consumer would likely be able to make the loan payments and meet basic living expenses without having to default on major financial obligations or having to rely on new consumer credit during the applicable period.

Accordingly, the proposed definition of basic living expenses is a principle-based definition and does not provide a comprehensive list of the expenses for which a lender must account. Proposed comment 5(a)(1)-1 provides illustrative examples of expenses that would be covered by the definition. It provides that food and utilities are examples of goods and services that are necessary for maintaining health and welfare, and that transportation to and from a place of employment and daycare for dependent children, if applicable, are examples of goods and services that are necessary for maintaining the ability to produce income.

The Bureau recognizes that provision of a principle-based definition leaves some ambiguity about, for example, what types and amounts of goods and services are “necessary” for the stated

purposes. Lenders would have flexibility in how they determine dollar amounts that meet the proposed definition, provided that they do not rely on amounts that are so low that they are not reasonable for consumers to pay for the types and level of expenses in the definition.

The Bureau’s proposed methodology also would not mandate verification or detailed analysis of every individual consumer expenditure. In contrast to major financial obligations (see below), a consumer’s recent expenditures may not necessarily reflect the amounts a consumer needs for basic living expenses during the term of a prospective loan, and the Bureau is concerned that such a requirement could substantially increase costs for lenders and consumers while adding little protection for consumers.

The Bureau solicits comment on its principle-based approach to defining basic living expenses, including whether limitation of the definition to “necessary” expenses is appropriate, and whether an alternative, more prescriptive approach would be preferable. For example, the Bureau solicits comment on whether the definition should include, rather than expenses of the types and in amounts that are “necessary” for the purposes specified in the proposed definition, expenses of the types that are likely to recur through the term of the loan and in amounts below which a consumer cannot realistically reduce them. The Bureau also solicits comment on whether there are standards used in other contexts that could be relied upon by the Bureau. For example, the Bureau is aware that the Internal Revenue Service and bankruptcy courts have their own respective standards for calculating amounts an individual needs for expenses while making payments toward a delinquent tax liability or under a bankruptcy-related repayment plan.

5(a)(2) Major Financial Obligations

Proposed § 1041.5(a)(2) would define the major financial obligations component of the ability-to-repay determination specified in proposed § 1041.5(b). Proposed § 1041.5(b) would generally require a lender to determine that a consumer will have sufficient residual income, which is net income after subtracting amounts already committed for making payments for major financial obligations, to make payments under a prospective covered short term loan and to meet basic living expenses. Payments for major financial obligations would be subject to the consumer statement and verification

evidence provisions under proposed § 1041.5(c)(3).

Specifically, proposed § 1041.5(a)(2) would define the term to mean a consumer's housing expense, minimum payments and any delinquent amounts due under debt obligations (including outstanding covered loans), and court- or government agency-ordered child support obligations. Comment 5(a)(2)-1 would further clarify that housing expense includes the total periodic amount that the consumer applying for the loan is responsible for paying, such as the amount the consumer owes to a landlord for rent or to a creditor for a mortgage. It would provide that minimum payments under debt obligations include periodic payments for automobile loan payments, student loan payments, other covered loan payments, and minimum required credit card payments.

Expenses that the Bureau has included in the proposed definition are expenses that are typically recurring, that can be significant in the amount of a consumer's income that they consume, and that a consumer has little or no ability to change, reduce or eliminate in the short run, relative to their levels up until application for a covered short-term loan. The Bureau believes that the extent to which a particular consumer's net income is already committed to making such payments is highly relevant to determining whether that consumer has the ability to make payments under a prospective covered short-term loan. As a result, the Bureau believes that a lender should be required to inquire about such payments, that they should be subject to verification for accuracy and completeness to the extent feasible, and that a lender should not be permitted to rely on consumer income already committed to such payments in determining a consumer's ability to repay. Expenses included in the proposed definition are roughly analogous to those included in total monthly debt obligations for calculating monthly debt-to-income ratio and monthly residual income under the Bureau's ability-to-repay requirements for certain residential mortgage loans. (See 12 CFR 1026.43(c)(7)(i)(A).)

The Bureau has adjusted its approach to major financial obligations based on feedback from SERs and other industry stakeholders on the Small Business Review Panel Outline. In the SBREFA process, the Bureau stated that it was considering including within the category of major financial obligations "other legally required payments," such as alimony, and that the Bureau had considered an alternative approach that

would have included utility payments and regular medical expenses. However, the Bureau now believes that it would be unduly burdensome to require lenders to make individualized projections of a consumer's utility or medical expenses. With respect to alimony, the Bureau believes that relatively few consumers seeking covered loans have readily verifiable alimony obligations and that, accordingly, inquiring about alimony obligations would impose unnecessary burden. The Bureau also is not including a category of "other legally required payments" because the Bureau believes that category, which was included in the Small Business Review Panel Outline, would leave too much ambiguity about what other payments are covered. For further discussion of burden on small businesses associated with verification requirements, see the section-by-section analysis of proposed § 1041.5(c)(3), below.

The Bureau invites comment on whether the items included in the proposed definition of major financial obligations are appropriate, whether other items should be included and, if so, whether and how the items should be subject to verification. For example, the Bureau invites comment on whether there are other obligations that are typically recurring, significant, and not changeable by the consumer, such as, for example, alimony, daycare commitments, health insurance premiums (other than premiums deducted from a consumer's paycheck, which are already excluded from the proposed definition of net income), or unavoidable medical expenses. The Bureau likewise invites comment on whether there are types of payments to which a consumer may be contractually obligated, such as payments or portions of payments under contracts for telecommunication services, that a consumer is unable to reduce from their amounts as of consummation, such that the payments should be included in the definition of major financial obligations. The Bureau also invites comment on the inclusion in the proposed definition of delinquent amounts due, such as on the practicality of asking consumers about delinquent amounts due on major financial obligations, of comparing stated amounts to any delinquent amounts that may be included in verification evidence (e.g., in a national consumer report), and of accounting for such amounts in projecting a consumer's residual income during the term of the prospective loan. The Bureau also invites comment on whether the Bureau should specify

additional rules for addressing major financial obligations that are joint obligations of a consumer applying for a covered short-term loan (and of a consumer who is not applying for the loan), or whether the provision in proposed § 1041.5(c)(1) allowing lenders to consider consumer explanations and other evidence is sufficient.

5(a)(3) National Consumer Report

Proposed § 1041.5(a)(3) would define national consumer report to mean a consumer report, as defined in section 603(d) of the Fair Credit Reporting Act (FCRA), 15 U.S.C. 1681a(d), obtained from a consumer reporting agency that compiles and maintains files on consumers on a nationwide basis, as defined in section 603(p) of the Fair Credit Reporting Act, 15 U.S.C. 1681a(p). Proposed § 1041.5(c)(3)(ii) would require a lender to obtain a national consumer report as verification evidence for a consumer's required payments under debt obligations and required payments under court- or government agency-ordered child support obligations. Reports that meet the proposed definition are often referred to informally as a credit report or credit history from one of the three major credit reporting agencies or bureaus. A national consumer report may be furnished to a lender from a consumer reporting agency that is not a nationwide consumer reporting agency, such as a consumer reporting agency that is a reseller.

5(a)(4) Net Income

Proposed § 1041.5(a)(4) would define the net income component of the ability-to-repay determination calculation specified in proposed § 1041.5(b). Specifically, it would define the term as the total amount that a consumer receives after the payer deducts amounts for taxes, other obligations, and voluntary contributions that the consumer has directed the payer to deduct, but before deductions of any amounts for payments under a prospective covered short term loan or for any major financial obligation. Proposed § 1041.5(b) would generally require a lender to determine that a consumer will have sufficient residual income to make payments under a prospective covered short-term loan and to meet basic living expenses. Proposed § 1041.5(a)(6), discussed below, would define residual income as the sum of net income that the lender projects the consumer will receive during a period, minus the sum of amounts that the lender projects will be payable by the consumer for major financial obligations during the period. Net income would be

subject to the consumer statement and verification evidence provisions under proposed § 1041.5(c)(3).

The proposed definition is similar to what is commonly referred to as “take-home pay” but is phrased broadly to apply to income received from employment, government benefits, or other sources. It would exclude virtually all amounts deducted by the payer of the income, whether deductions are required or voluntary, such as voluntary insurance premiums or union dues. The Bureau believes that the total dollar amount that a consumer actually receives after all such deductions is the amount that is most instructive in determining a consumer’s ability to repay. Certain deductions (e.g., taxes) are beyond the consumer’s control. Other deductions may not be revocable, at least for a significant period of time, as a result of contractual obligations to which the consumer has entered. Even with respect to purely voluntary deductions, most consumers are unlikely to be able to reduce or eliminate such deductions, between consummation of a loan and the time when payments under the loan would fall due. The Bureau also believes that the net amount a consumer actually receives after all such deductions is likely to be the amount most readily known to consumers applying for a covered short-term loan (rather than, for example, periodic gross income) and is also the amount that is most readily verifiable by lenders through a variety of methods. The proposed definition would clarify, however, that net income is calculated before deductions of any amounts for payments under a prospective covered short-term loan or for any major financial obligation. The Bureau proposes the clarification to prevent double counting any such amounts when making the ability-to-repay determination.

The Bureau invites comment on the proposed definition of net income and whether further guidance would be helpful.

5(a)(5) Payment Under the Covered Short-Term Loan

Proposed § 1041.5(a)(5) would define payment under the covered short-term loan, which is a component of the ability-to-repay determination calculation specified in proposed § 1041.5(b). Proposed § 1041.5(b) would generally require a lender to determine that a consumer will have sufficient residual income to make payments under a covered short-term loan and to meet basic living expenses. Specifically, the definition of payment under the covered short-term loan in proposed

§ 1041.5(a)(5)(i) and (ii) would include all costs payable by the consumer at a particular time after consummation, regardless of how the costs are described in an agreement or whether they are payable to the lender or a third party. Proposed § 1041.5(a)(5)(iii) provides special rules for projecting payments under the covered short-term loan on lines of credit for purposes of the ability to repay test, since actual payments for lines of credit may vary depending on usage.

Proposed § 1041.5(a)(5)(i) would apply to all covered short-term loans. It would define payment under the covered short-term loan broadly to mean the combined dollar amount payable by the consumer in connection with the covered short-term loan at a particular time following consummation. Under proposed § 1041.5(b), the lender would be required to reasonably determine the payment amount under this proposed definition as of the time of consummation. The proposed definition would further provide that, for short-term loans with multiple payments, in calculating each payment under the covered loan, the lender must assume that the consumer has made preceding required payments and that the consumer has not taken any affirmative act to extend or restructure the repayment schedule or to suspend, cancel, or delay payment for any product, service, or membership provided in connection with the covered loan. Proposed § 1041.5(a)(5)(ii) would similarly apply to all covered short-term loans and would clarify that payment under the covered loan includes all principal, interest, charges, and fees.

The Bureau believes that a broad definition, such as the one proposed, is necessary to capture the full dollar amount payable by the consumer in connection with the covered short-term loan, including amounts for voluntary insurance or memberships and regardless of whether amounts are due to the lender or another person. It is the total dollar amount due at each particular time that is relevant to determining whether or not a consumer has the ability to repay the loan based on the consumer’s projected net income and payments for major financial obligations. The amount of the payment is what is important, not whether the components of the payment include principal, interest, fees, insurance premiums, or other charges. The Bureau recognizes, however, that under the terms of some covered short-term loans, a consumer may have options regarding how much the consumer must pay at any given time and that the consumer

may in some cases be able to select a different payment option. The proposed definition would include any amount payable by a consumer in the absence of any affirmative act by the consumer to extend or restructure the repayment schedule, or to suspend, cancel, or delay payment for any product, service, or membership provided in connection with the covered short-term loan. Proposed comment 5(a)(5)(i) and 5(a)(5)(ii)-1 includes three examples applying the proposed definition to scenarios in which the payment under the covered short-term loan includes several components, including voluntary fees owed to a person other than the lender, as well as scenarios in which the consumer has the option of making different payment amounts.

Proposed § 1041.5(a)(5)(iii) would include additional provisions for calculating the projected payment amount under a covered line of credit for purposes of assessing a consumer’s ability to repay the loan. As explained in proposed comment 5(a)(5)(iii)-1, such rules are necessary because the amount and timing of the consumer’s actual payments on a line of credit after consummation may depend on the consumer’s utilization of the credit (i.e., the amount the consumer has drawn down) or on amounts that the consumer has repaid prior to the payments in question. As a result, if the definition of payment under the covered short-term loan did not specify assumptions about consumer utilization and repayment under a line of credit, there would be uncertainty as to the amounts and timing of payments to which the ability-to-repay requirement applies. Proposed § 1041.5(a)(5)(iii) therefore would prescribe assumptions that a lender must make in calculating the payment under the covered short-term loan. It would require the lender to assume that the consumer will utilize the full amount of credit under the covered loan as soon as the credit is available to the consumer and that the consumer will make only minimum required payments under the covered loan. The lender would then apply the ability-to-repay determination to that assumed repayment schedule.

The Bureau believes these assumptions about a consumer’s utilization and repayment are important to ensure that the lender makes its ability-to-repay determination based on the most challenging loan payment that a consumer may face under the covered loan. They also reflect what the Bureau believes to be the likely borrowing and repayment behavior of many consumers who obtain covered loans with a line of credit. Such consumers are typically

facing an immediate liquidity need and, in light of the relatively high cost of credit, would normally seek a line of credit approximating the amount of the need. Assuming the lender does not provide a line of credit well in excess of the consumer's need, the consumer is then likely to draw down the full amount of the line of credit shortly after consummation. Liquidity-constrained consumers may make only minimum required payments under a line of credit and, if the terms of the covered loan provide for an end date, may then face having to repay the outstanding balance in one payment at a time specified under the terms of the covered short-term loan. It is such a payment that is likely to be the highest payment possible under the terms of the covered short-term loan and therefore the payment for which a consumer is least likely to have the ability to repay.

The Bureau invites comment on the proposed definition of payment under the covered short-term loan. Specifically, the Bureau invites comment on whether the provisions of proposed § 1041.5(a)(5) are sufficiently comprehensive and clear to allow for determination of payment amounts under covered short-term loans, especially for lines of credit.

5(a)(6) Residual Income

Proposed § 1041.5(a)(6) would define the residual income component of the ability-to-repay determination calculation specified in proposed § 1041.5(b). Specifically, it would define the term as the sum of net income that the lender projects the consumer obligated under the loan will receive during a period, minus the sum of amounts that the lender projects will be payable by the consumer for major financial obligations during the period, all of which projected amounts must be based on verification evidence, as provided under proposed § 1041.5(c). Proposed § 1041.5(b) would generally require a lender to determine that a consumer will have sufficient residual income to make payments under a covered short-term loan and to meet basic living expenses.

The proposed definition would ensure that a lender's ability-to-repay determination cannot rely on the amount of a consumer's net income that, as of the time a prospective loan would be consummated, is already committed to pay for major financial obligations during the applicable period. For example, a consumer's net income may be greater than the amount of a loan payment, so that the lender successfully obtains the loan payment from a consumer's deposit account once the

consumer's income is deposited into the account. But if the consumer is then left with insufficient funds to make payments for major financial obligations, such as a rent payment, then the consumer may be forced to choose between failing to pay rent when due, forgoing basic needs, or reborrowing.

5(b) Reasonable Determination Required

Proposed § 1041.5(b) would prohibit lenders from making covered short-term loans without first making a reasonable determination that the consumer will have the ability to repay the loan according to its terms, unless the loans are made in accordance with proposed § 1041.7. Specifically, proposed § 1041.5(b)(1) would require lenders to make a reasonable determination of ability to repay before making a new covered short-term loan, increasing the credit available under an existing loan, or before advancing additional credit under a covered line of credit if more than 180 days have expired since the last such determination. Proposed § 1041.5(b)(2) specifies minimum elements of a baseline methodology that would be required for determining a consumer's ability to repay, using a residual income analysis and an assessment of the consumer's prior borrowing history. It would require the assessment to be based on projections of the consumer's net income, major financial obligations, and basic living expenses that are made in accordance with proposed § 1041.5(c). It would require that, using such projections, the lender must reasonably conclude that the consumer's residual income will be sufficient for the consumer to make all payments under the loan and still meet basic living expenses during the term of the loan. It would further require that a lender must conclude that the consumer, after making the highest payment under the loan (typically, the last payment), will continue to be able to meet major financial obligations as they fall due and meet basic living expenses for a period of 30 additional days. Finally, proposed § 1041.5(b)(2) would require that, in situations in which the consumer's recent borrowing history suggests that she may have difficulty repaying a new loan as specified in proposed § 1041.6, a lender must satisfy the requirements in proposed § 1041.6 before extending credit.

5(b)(1)

Proposed § 1041.5(b)(1) would provide generally that, except as provided in § 1041.7, a lender must not

make a covered short-term loan or increase the credit available under a covered short-term loan unless the lender first makes a reasonable determination of ability to repay for the covered short-term loan. The provision would also impose a requirement to determine a consumer's ability to repay before advancing additional funds under a covered short-term loan that is a line of credit if such advance would occur more than 180 days after the date of a previous required determination.

Proposed § 1041.5(b)(1)(i) would provide that a lender is not required to make the determination when it makes a covered short-term loan under the conditions set forth in § 1041.7. The conditions that apply under § 1041.7 provide alternative protections from the harms caused by covered short-term loan payments that exceed a consumer's ability to repay, such that the Bureau is proposing to allow lenders to make such loans in accordance with the regulation without engaging in an ability-to-repay determination under §§ 1041.5 and 1041.6. (See the discussions of § 1041.7, below.)

The Bureau notes that proposed § 1041.5(b)(1) would require the ability-to-repay determination before a lender actually takes one of the triggering actions. The Bureau recognizes that lenders decline covered loan applications for a variety of reasons, including to prevent fraud, avoid possible losses, and to comply with State law or other regulatory requirements. Accordingly, the requirements of § 1041.5(b)(1) would not require a lender to make the ability-to-repay determination for every covered short-term loan application it receives, but rather only before taking one of the enumerated actions with respect to a covered short-term loan. Similarly, nothing in proposed § 1041.5(b)(1) would prohibit a lender from applying screening or underwriting approaches in addition to those required under proposed § 1041.5(b) prior to making a covered short-term loan.

Proposed § 1041.5(b)(1)(ii) would provide that, for a covered short-term loan that is a line of credit, a lender must not permit a consumer to obtain an advance under the line of credit more than 180 days after the date of a prior required determination, unless the lender first makes a new reasonable determination that the consumer will have the ability to repay the covered short-term loan. Under a line of credit, a consumer typically can obtain advances up to the maximum available credit at the consumer's discretion, often long after the covered loan was

consummated. Each time the consumer obtains an advance under a line of credit, the consumer becomes obligated to make a new payment or series of payments based on the terms of the covered loan. But when significant time has elapsed since the date of a lender's prior required determination, the facts on which the lender relied in determining the consumer's ability to repay may have changed significantly. During the Bureau's outreach to industry, the Small Dollar Roundtable urged the Bureau to require a lender to periodically make a new reasonable determination of ability to repay in connection with a covered loan that is a line of credit. The Bureau believes that the proposed requirement to make a new determination of ability to repay for a line of credit 180 days following a prior required determination appropriately balances the burden on lenders and the protective benefit for consumers.

Reasonable Determination

Proposed § 1041.5(b) would require a lender to make a reasonable determination that a consumer will be able to repay a covered short-term loan according to its terms. As discussed above and as reflected in the provisions of proposed § 1041.5(b), a consumer has the ability to repay a covered short-term loan according to its terms only if the consumer is able to make all payments under the covered loan as they fall due while also making payments under the consumer's major financial obligations as they fall due and continuing to meet basic living expenses without, as a result of making payments under the covered loan, having to reborrow.

Proposed comment 5(b)-1 provides an overview of the baseline methodology that would be required as part of a reasonable determination of a consumer's ability to repay in proposed §§ 1041.5(b)(2) and (c) and 1041.6.

Proposed comment 5(b)-2 would identify standards for evaluating whether a lender's ability-to-repay determinations under proposed § 1041.5 are reasonable. It would clarify minimum requirements of a reasonable ability-to-repay determination; identify assumptions that, if relied upon by the lender, render a determination not reasonable; and establish that the overall performance of a lender's covered short-term loans is evidence of whether the lender's determinations for those covered loans are reasonable.

The proposed standards would not impose bright line rules prohibiting covered short-term loans based on fixed mathematical ratios or similar distinctions. Moreover, the Bureau does

not anticipate that a lender would need to perform a manual analysis of each prospective loan to determine whether it meets all of the proposed standards. Instead, each lender would be required under proposed § 1041.18 to develop and implement policies and procedures for approving and making covered loans in compliance with the proposed standards and based on the types of covered loans that the lender makes. A lender would then apply its own policies and procedures to its underwriting decisions, which the Bureau anticipates could be largely automated for the majority of consumers and covered loans.

Minimum requirements. Proposed comment 5(b)-2.i would describe some of the specific respects in which a lender's determination must be reasonable. For example, it would note that the determination must include the applicable determinations provided in proposed § 1041.5(b)(2), be based on reasonable projections of a consumer's net income and major financial obligations in accordance with proposed § 1041.5(c), be based on reasonable estimates of a consumer's basic living expenses under proposed § 1041.5(b), and appropriately account for the possibility of volatility in a consumer's income and basic living expenses during the term of the loan under proposed § 1041.5(b)(2)(i). It would also have to be consistent with the lender's written policies and procedures required under proposed § 1041.18(b).

Proposed comment 5(b)-2.i would also provide that to be reasonable, a lender's ability-to-repay determination must be grounded in reasonable inferences and conclusions in light of information the lender is required to obtain or consider. As discussed above, each lender would be required under proposed § 1041.18 to develop policies and procedures for approving and making covered loans in compliance with the proposal. The policies and procedures would specify the conclusions that the lender makes based on information it obtains, and lenders would then be able to largely automate application of those policies and procedures for most consumers. For example, proposed § 1041.5(c) would require a lender to obtain verification evidence for a consumer's net income and payments for major financial obligations, but it would provide for lender discretion in resolving any ambiguities in the verification evidence to project what the consumer's net income and payments for major financial obligations will be following consummation of the covered short-term loan.

Finally, proposed comment 5(b)-2.i would provide that for a lender's ability-to-repay determination to be reasonable, the lender must appropriately account for information known by the lender, whether or not the lender is required to obtain the information under proposed § 1041.5, that indicates that the consumer may not have the ability to repay a covered short-term loan according to its terms. The provision would not require a lender to obtain information other than information specified in proposed § 1041.5. However, a lender might become aware of information that casts doubt on whether a particular consumer would have the ability to repay a particular prospective covered short-term loan. For example, proposed § 1041.5 would not require a lender to inquire about a consumer's individual transportation or medical expenses, and the lender's ability-to-repay method might comply with the proposed requirement to estimate consumers' basic living expenses by factoring into the estimate of basic living expenses a normal allowance for expenses of this type. But if the lender learned that a particular consumer had a transportation or recurring medical expense dramatically in excess of an amount the lender used in estimating basic living expenses for consumers generally, proposed comment 5(b)-2.i would clarify that the lender could not simply ignore that fact. Instead, it would have to consider the transportation or medical expense and then reach a reasonable determination that the expense does not negate the lender's otherwise reasonable ability-to-repay determination.

Similarly, in reviewing borrowing history records a lender might learn that the consumer completed a three-loan sequence of covered short-term loans made either under proposed §§ 1041.5 and 1041.6 or under proposed § 1041.7, waited for 30 days before seeking to reborrow as required by proposed § 1041.6 or proposed § 1041.7 and then sought to borrow on the first permissible day under those sections, and that this has been a recurring pattern for the consumer in the past. While the fact that the consumer on more than one occasion has sought a loan on the first possible day that the consumer is free to do so may be attributable to new needs that arose following the conclusion of each prior sequence, an alternative—and perhaps more likely explanation—is that the consumer's consistent need to borrow as soon as possible is attributable to spillover effects from having repaid the last loan sequence. In these circumstances, a lender's decision

that the consumer has the ability to repay a new loan of the same amount and on the same terms as the prior loans might not be reasonable if the lender did not take into account these circumstances.

The Bureau invites comments on the minimum requirements for making a reasonable determination of ability to repay, including whether additional specificity should be provided in the regulation text or in the commentary with respect to circumstances in which a lender is required to take into account information known by the lender.

Determinations that are not reasonable. Proposed comment 5(b)-2.ii would provide an example of an ability-to-repay determination that is not reasonable. The example is a determination that relies on an assumption that the consumer will obtain additional consumer credit to be able to make payments under the covered short-term loan, to make payments under major financial obligations, or to meet basic living expenses. The Bureau believes that a consumer whose net income would be sufficient to make payments under a prospective covered short-term loan, to make payments under major financial obligations, and to meet basic living expenses during the applicable period only if the consumer supplements that net income by borrowing additional consumer credit is a consumer who, by definition, lacks the ability to repay the prospective covered short-term loan. Although the Bureau believes this reasoning is clear, it is proposing the commentary example because some lenders have argued that the mere fact that a lender successfully secures repayment of the full amount due from a consumer's deposit account shows that the consumer had the ability to repay the loan, even if the consumer then immediately has to reborrow to meet the consumer's other obligations and expenses. Inclusion of the example in commentary would confirm that an ability-to-repay determination is not reasonable if it relies on an implicit assumption that a consumer will have the ability to repay a covered short-term loan for the reason that the consumer will obtain further consumer credit to make payments under major financial obligations or to meet basic living expenses.

The Bureau invites comment on whether it would be useful to articulate additional specific examples of ability-to-repay determinations that are not reasonable, and if so which specific examples should be listed. In this regard, the Bureau has considered whether there are any circumstances

under which basing an ability-to-repay determination for a covered short-term loan on assumed future borrowing or assumed future accumulation of savings would be reasonable, particularly in light of the nature of consumer circumstances when they take out such loans. The Bureau seeks comment on this question.

Performance of a lender's short-term covered loans as evidence. In determining whether a lender has complied with the requirements of proposed § 1041.5, there is a threshold question of whether the lender has carried out the required procedural steps, for example by obtaining consumer statements and verification evidence, projecting net income and payments under major financial obligations, and making determinations about the sufficiency of a consumer's residual income. In some cases, a lender might have carried out these steps but still have violated § 1041.5 by making determinations that are facially unreasonable, such as if a lender's determinations assume that a consumer needs amounts to meet basic living expenses that are clearly insufficient for that purpose.

In other cases the reasonableness or unreasonableness of a lender's determinations might be less clear. Accordingly, proposed comment 5(b)-2.iii would provide that evidence of whether a lender's determinations of ability to repay are reasonable may include the extent to which the lender's determinations subject to proposed § 1041.5 result in rates of delinquency, default, and reborrowing for covered short-term loans that are low, equal to, or high, including in comparison to the rates of other lenders making similar covered loans to similarly situated consumers.

As discussed above, the Bureau recognizes that the affordability of loan payments is not the only factor that affects whether a consumer repays a covered loan according to its terms without reborrowing. A particular consumer may obtain a covered loan with payments that are within the consumer's ability to repay at the time of consummation, but factors such as the consumer's continual opportunity to work, willingness to repay, and financial management may affect the performance of that consumer's loan. Similarly, a particular consumer may obtain a covered loan with payments that exceed the consumer's ability to repay at the time of consummation, but factors such as a lender's use of a leveraged payment mechanism, taking of vehicle security, and collection tactics, as well as the consumer's ability

to access informal credit from friends or relatives, might result in repayment of the loan without indicia of harm that are visible through observations of loan performance and reborrowing. However, if a lender's determinations subject to proposed § 1041.5 regularly result in rates of delinquency, default, or reborrowing that are significantly higher than those of other lenders making similar short-term covered loans to similarly situated consumers, that fact is evidence that the lender may be systematically underestimating amounts that consumers generally need for basic living expenses, or is in some other way overestimating consumers' ability to repay.

Proposed comment 5(b)-2.iii would not mean that a lender's compliance with the requirements of proposed § 1041.5 for a particular loan could be determined based on the performance of that loan. Nor would proposed comment 5(b)-2.iii mean that comparison of the performance of a lender's covered short-term loans with the performance of covered short-term loans of other lenders could be the sole basis for determining whether that lender's determinations of ability to repay comply or do not comply with the requirements of proposed § 1041.5. For example, one lender may have default rates that are much lower than the default rates of other lenders because it uses aggressive collection tactics, not because its determinations of ability to repay are reasonable. Similarly, the fact that one lender's default rates are similar to the default rates of other lenders does not necessarily indicate that the lenders' determinations of ability to repay are reasonable; the similar rates could also result from the fact that the lenders' respective determinations of ability to repay are similarly unreasonable. The Bureau believes, however, that such comparisons will provide important evidence that, considered along with other evidence, would facilitate evaluation of whether a lender's ability-to-repay determinations are reasonable.

For example, a lender may use estimates for a consumer's basic living expenses that initially appear unrealistically low, but if the lender's determinations otherwise comply with the requirements of proposed § 1041.5 and otherwise result in covered short-term loan performance that is materially better than that of peer lenders, the covered short-term loan performance may help show that the lender's determinations are reasonable. Similarly, an online lender might experience default rates significantly in excess of those of peer lenders, but other

evidence may show that the lender followed policies and procedures similar to those used by other lenders and that the high default rate resulted from a high number of fraudulent applications. On the other hand, if consumers experience systematically worse rates of delinquency, default, and reborrowing on covered short-term loans made by lender A, compared to the rates of other lenders making similar loans, that fact may be important evidence of whether that lender's estimates of basic living expenses are, in fact, unrealistically low and therefore whether the lender's ability-to-repay determinations are reasonable.

The Bureau invites comment on whether and, if so, how the performance of a lender's portfolio of covered short-term loans should be factored in to an assessment of whether the lender has complied with its obligations under the rule, including whether the Bureau should specify thresholds which presumptively or conclusively establish compliance or non-compliance and, if so, how such thresholds should be determined.

Payments Under the Covered Short-Term Loan

Proposed comment 5(b)-3 notes that a lender is responsible for calculating the timing and amount of all payments under the covered short-term loan. The timing and amount of all loan payments under the covered short-term loan are an essential component of the required reasonable determination of a consumer's ability to repay under proposed § 1041.5(b)(2)(i), (ii), and (iii). Calculation of the timing and amount of all payments under a covered loan is also necessary to determine which component determinations under proposed § 1041.5(b)(2)(i), (ii), and (iii) apply to a particular prospective covered loan. Proposed comment 5(b)-3 cross references the definition of payment under a covered short-term loan in proposed § 1041.5(a)(5), which includes requirements and assumptions that apply to a lender's calculation of the amount and timing of all payments under a covered short-term loan.

Basic Living Expenses

A lender's ability-to-repay determination under proposed § 1041.5(b) would be required to account for a consumer's need to meet basic living expenses during the applicable period while also making payments for major financial obligations and payments under a covered short-term loan. As discussed above, proposed § 1041.5(a)(1) would define basic living expenses as expenditures,

other than payments for major financial obligations, that the consumer must make for goods and services that are necessary to maintain the consumer's health, welfare, and ability to produce income, and the health and welfare of members of the consumer's household who are financially dependent on the consumer. If a lender's ability-to-repay determination did not account for a consumer's need to meet basic living expenses, and instead merely determined that a consumer's net income is sufficient to make payments for major financial obligations and for the covered short-term loan, the determination would greatly overestimate a consumer's ability to repay a covered short-term loan and would be unreasonable. Doing so would be the equivalent of determining, under the Bureau's ability-to-repay rule for residential mortgage loans, that a consumer has the ability to repay a mortgage from income even if that mortgage would result in a debt-to-income ratio of 100 percent. The Bureau believes there would be nearly universal consensus that such a determination would be unreasonable.

However, the Bureau recognizes that in contrast with payments under most major financial obligations, which the Bureau believes a lender can usually ascertain and verify for each consumer without unreasonable burden, it would be extremely challenging to determine a complete and accurate itemization of each consumer's basic living expenses. Moreover, a consumer may have somewhat greater ability to reduce in the short-run some expenditures that do not meet the Bureau's proposed definition of major financial obligations. For example, a consumer may be able for a period of time to reduce commuting expenses by ride sharing.

Accordingly, the Bureau is not proposing to prescribe a particular method that a lender would be required to use for estimating an amount of funds that a consumer requires to meet basic living expenses for an applicable period. Instead, proposed comment 5(b)-4 would provide the principle that whether a lender's method complies with the proposed § 1041.5 requirement for a lender to make a reasonable ability-to-repay determination depends on whether it is reasonably designed to determine whether a consumer would likely be able to make the loan payments and meet basic living expenses without defaulting on major financial obligations or having to rely on new consumer credit during the applicable period.

Proposed comment 5(b)-4 would provide a non-exhaustive list of

methods that may be reasonable ways to estimate basic living expenses. The first method is to set minimum percentages of income or dollar amounts based on a statistically valid survey of expenses of similarly situated consumers, taking into consideration the consumer's income, location, and household size. This example is based on a method that several lenders have told the Bureau they currently use in determining whether a consumer will have the ability to repay a loan and is consistent with the recommendations of the Small Dollar Roundtable. The Bureau notes that the Bureau of Labor Statistics conducts a periodic survey of consumer expenditures which may be useful for this purpose. The Bureau invites comment on whether the example should identify consideration of a consumer's income, location, and household size as an important aspect of the method.

The second method is to obtain additional reliable information about a consumer's expenses other than the information required to be obtained under proposed § 1041.5(c), to develop a reasonably accurate estimate of a consumer's basic living expenses. The example would not mean that a lender is required to obtain this information but would clarify that doing so may be one effective method of estimating a consumer's basic living expenses. The method described in the second example may be more convenient for smaller lenders or lenders with no experience working with statistically valid surveys of consumer expenses, as described in the first example.

The third example is any method that reliably predicts basic living expenses. The Bureau is proposing to include this broadly phrased example to clarify that lenders may use innovative and data-driven methods that reliably estimate consumers' basic living expenses, even if the methods are not as intuitive as the methods in the first two examples. The Bureau would expect to evaluate the reliability of such methods by taking into account the performance of the lender's covered short-term loans in absolute terms and relative to other lenders, as discussed in proposed comment 5(b)-3.iii.

Proposed comment 5(b)-4 would provide a non-exhaustive list of unreasonable methods of determining basic living expenses. The first example is a method that assumes that a consumer needs no or implausibly low amounts of funds to meet basic living expenses during the applicable period and that, accordingly, substantially all of a consumer's net income that is not required for payments for major

financial obligations is available for loan payments. The second example is a method of setting minimum percentages of income or dollar amounts that, when used in ability-to-repay determinations for covered short-term loans, have yielded high rates of default and reborrowing, in absolute terms or relative to rates of default and reborrowing of other lenders making covered short-term loans to similarly situated consumers.

The Bureau solicits comment on all aspects of the proposed requirements for estimating basic living expenses, including the methods identified as reasonable or unreasonable, whether additional methods should be specified, or whether the Bureau should provide either a more prescriptive method for estimating basic living expenses or a safe harbor methodology (and, if so, what that methodology should be). The Bureau also solicits comment on whether lenders should be required to ask consumers to identify, on a written questionnaire that lists common types of basic living expenses, how much they typically spend on each type of expense. The Bureau further solicits comment on whether and how lenders should be required to verify the completeness and correctness of the amounts the consumer lists and how a lender should be required to determine how much of the identified or verified expenditures is necessary or, under the alternative approach to defining basic living expenses discussed above, is recurring and not realistically reducible during the term of the prospective loan.

5(b)(2)

Proposed § 1041.5(b)(2) would set forth the Bureau's specific proposed methodology for making a reasonable determination of a consumer's ability to pay a covered short-term loan. Specifically, it would provide that a lender's determination of a consumer's ability to repay is reasonable only if, based on projections in accordance with proposed § 1041.5(c), the lender reasonably makes the applicable determinations provided in proposed §§ 1041.5(b)(2)(i), (ii), and (iii). Proposed § 1041.5(b)(2)(i) would require an assessment of the sufficiency of the consumer's residual income during the term of the loan, and proposed § 1041.5(b)(2)(ii) would require assessment of an additional period in light of the special harms associated with loans with short-term structures. Proposed § 1041.5(b)(2)(iii) would require compliance with additional requirements in proposed § 1041.6 in situations in which the consumer's borrowing history suggests that he or

she may have difficulty repaying additional credit.

5(b)(2)(i)

Proposed § 1041.5(b)(2)(i) would provide that for any covered short-term loan subject to the ability-to-repay requirement of proposed § 1041.5, a lender must reasonably conclude that the consumer's residual income will be sufficient for the consumer to make all payments under the covered short-term loan and to meet basic living expenses during the term of covered short-term loan. As defined in proposed § 1041.5(a)(6), residual income is the amount of a consumer's net income during a period that is not already committed to payments under major financial obligations during the period. If the payments for a covered short-term loan would consume so much of a consumer's residual income that the consumer would be unable to meet basic living expenses, then the consumer would likely suffer injury from default or reborrowing, or suffer collateral harms from unaffordable payments.

In proposing § 1041.5(b)(2)(i) the Bureau recognizes that, even when lenders determine at the time of consummation that consumers will have the ability to repay a covered short-term loan, some consumers may still face difficulty making payments under covered short-term loans because of changes that occur after consummation. For example, some consumers would experience unforeseen decreases in income or increases in expenses that would leave them unable to repay their loans. Thus, the fact that a consumer ended up in default is not, in and of itself, evidence that the lender failed to make a reasonable assessment of the consumer's ability to repay *ex ante*. Rather, proposed § 1041.5(b)(2)(i) looks to the facts as reasonably knowable prior to consummation and would mean that a lender is prohibited from making a covered short-term loan subject to proposed § 1041.5 if there is not a reasonable basis at consummation for concluding that the consumer will be able to make payments under the covered loan while also meeting the consumer's major financial obligations and meeting basic living expenses.

While some consumers may have so little (or no) residual income as to be unable to afford any loan, for other consumers the ability to repay will depend on the amount and timing of the required repayments. Thus, even if a lender concludes that there is not a reasonable basis for believing that a consumer can pay a particular prospective loan, proposed

§ 1041.5(b)(2)(i) would not prevent a lender from making a different covered loan with more affordable payments to such a consumer, provided that the more affordable payments would not consume so much of a consumer's residual income that the consumer would be unable to meet basic living expenses and provided further that the alternative loan is consistent with applicable State law.

Applicable Period for Residual Income

As discussed above, under proposed § 1041.5(b)(2)(i) a lender must reasonably conclude that the consumer's residual income will be sufficient for the consumer to make all payments under the covered short-term loan and to meet basic living expenses during the term of the covered short-term loan. To provide greater certainty, facilitate compliance, and reduce burden, the Bureau is proposing a comment to explain how lenders could comply with proposed § 1041.5(b)(2)(i).

Proposed comment 5(b)(2)(i)-1 would provide that a lender complies with the requirement in § 1041.5(b)(2)(i) if it reasonably determines that the consumer's projected residual income during the shorter of the term of the loan or the period ending 45 days after consummation of the loan will be greater than the sum of all payments under the covered short-term loan plus an amount the lender reasonably estimates will be needed for basic living expenses during the term of the covered short-term loan. The method of compliance would allow the lender to make one determination based on the sum of all payments that would be due during the term of the covered short-term loan, rather than having to make a separate determination for each respective payment and payment period in isolation, in cases where the short-term loan provide for multiple payments. However, the lender would have to make the determination for the actual term of the loan, accounting for residual income (*i.e.*, net income minus payments for major financial obligations) that would actually accrue during the shorter of the term of the loan or the period ending 45 days after consummation of the loan.

The Bureau believes that for a covered loan with short duration, a lender should make the determination based on net income the consumer will actually receive during the term of the loan and payments for major financial obligations that will actually be payable during the term of the covered short-term loan, rather than, for example, based on a monthly period that may or may not coincide with the loan term.

When a covered loan period is under 45 days, determining whether the consumer's residual income will be sufficient to make all payments and meet basic living expenses depends a great deal on, for example, how many paychecks the consumer will actually receive during the term of the loan and whether the consumer will also have to make no rent payment, one rent payment, or two rent payments during the term of the loan.

The Bureau is proposing to clarify that the determination must be based on residual income "during the shorter of the term of the loan or the period ending 45 days after consummation of the loan" because the definition of a covered short-term loan includes a loan under which the consumer is required to repay "substantially" the entire amount of the loan within 45 days of consummation. The clarification would ensure that, if an unsubstantial amount were due after 45 days following consummation, the lender could not rely on residual income projected to accrue after the forty-fifth day to determine that the consumer would have sufficient residual income as required under proposed § 1041.5(b)(2)(i). Proposed comment 5(b)(2)(i)-1.i includes an example applying the method of compliance to a covered short-term loan payable in one payment 16 days after the lender makes the covered short-term loan.

The Bureau invites comment on its proposed applicable time period for assessing residual income.

Sufficiency of Residual Income

As discussed above, under proposed § 1041.5(b)(2)(i) a lender must reasonably conclude that the consumer's residual income will be sufficient for the consumer to make all payments under the covered short-term loan and to meet basic living expenses during the shorter of the term of the loan or the period ending 45 days after consummation of the loan. Proposed comment 5(b)(2)(i)-2 would clarify what constitutes "sufficient" residual income for a covered short-term loan. For a covered short-term loans, comment 5(b)(2)(i)-2.i would provide that residual income is sufficient so long as it is greater than the sum of payments that would be due under the covered loan plus an amount the lender reasonably estimates will be needed for basic living expenses.

5(b)(2)(ii)

Proposed § 1041.5(b)(2)(ii) would provide that for a covered short-term loan subject to the ability-to-repay requirement of proposed § 1041.5, a

lender must reasonably conclude that the consumer will be able to make payments required for major financial obligations as they fall due, to make any remaining payments under the covered short-term loan, and to meet basic living expenses for 30 days after having made the highest payment under the covered short-term loan on its due date. Proposed comment 5(b)(2)(ii)-1 notes that a lender must include in its determination under proposed § 1041.5(b)(2)(ii) the amount and timing of net income that it projects the consumer will receive during the 30-day period following the highest payment, in accordance with proposed § 1041.5(c). Proposed comment 5(b)(2)(ii)-1 also includes an example of a covered short-term loan for which a lender could not make a reasonable determination that the consumer will have the ability to repay under proposed § 1041.5(b)(2)(ii).

The Bureau proposes to include the requirement in § 1041.5(b)(2)(ii) for covered short-term loans because the Bureau's research has found that these loan structures are particularly likely to result in reborrowing shortly after the consumer repays an earlier loan. As discussed above in Market Concerns—Short-Term Loans, when a covered loan's terms provide for it to be substantially repaid within 45 days following consummation the fact that the consumer must repay so much within such a short period of time makes it especially likely that the consumer will be left with insufficient funds to make subsequent payments under major financial obligations and to meet basic living expenses. The consumer may then end up falling behind on payments under major financial obligations, being unable to meet basic living expenses, or borrowing additional consumer credit. Such consumers may be particularly likely to borrow new consumer credit in the form of a new covered loan.

This shortfall in a consumer's funds is most likely to occur following the highest payment under the covered short-term loan (which is typically but not necessarily the final payment) and before the consumer's subsequent receipt of significant income. However, depending on regularity of a consumer's income payments and payment amounts, the point within a consumer's monthly expense cycle when the problematic covered short-term loan payment falls due, and the distribution of a consumer's expenses through the month, the resulting shortfall may not manifest until a consumer has attempted to meet all expenses in the consumer's monthly expense cycle, or

even longer. Indeed, many payday loan borrowers who repay a first loan and do not reborrow during the ensuing pay cycle (*i.e.*, within 14 days) nonetheless do find it necessary to reborrow before the end of the expense cycle (*i.e.*, within 30 days).

In the Small Business Review Panel Outline, the Bureau described a proposal to require lenders to determine that a consumer will have the ability to repay a covered short-term loan without needing to reborrow for 60 days, consistent with the proposal in the same document to treat a loan taken within 60 days of having a prior covered short-term loan outstanding as part of the same sequence. Several consumer advocates have argued that consumers may be able to juggle expenses and financial obligations for a time, so that an unaffordable loan may not result in reborrowing until after a 30-day period. For the reasons discussed further below in the section-by-section analyses of § 1041.6, the Bureau is now proposing a 30-day period for both purposes.

The Bureau believes that the incidence of reborrowing caused by such loan structures would be somewhat ameliorated simply by determining that a consumer will have residual income during the term of the loan that exceeds the sum of covered loan payments plus an amount necessary to meet basic living expenses during that period. But if the loan payments consume all of a consumer's residual income during the period beyond the amount needed to meet basic living expenses during the period, then the consumer will be left with insufficient funds to make payments under major financial obligations and meet basic living expenses after the end of that period, unless the consumer receives sufficient net income shortly after the end of that period and before the next set of expenses fall due. Often, though, the opposite is true: A lender schedules the due dates of loan payments under covered short-term loans so that the loan payment due date coincides with dates of the consumer's receipts of income. This practice maximizes the probability that the lender will timely receive the payment under the covered short-term loan, but it also means the term of the loan (as well as the relevant period for the lender's determination that the consumer's residual income will be sufficient under proposed § 1041.5(b)(2)(i)) ends on the date of the consumer's receipt of income, with the result that the time between the end of the loan term and the consumer's subsequent receipt of income is maximized.

Thus, even if a lender made a reasonable determination under proposed § 1041.5(b)(2)(i) that the consumer would have sufficient residual income during the loan term to make loan payments under the covered short-term loan and meet basic living expenses during the period, there would remain a significant risk that, as a result of an unaffordable highest payment (which may be the only payment, or the last of equal payments), the consumer would be forced to reborrow or suffer collateral harms from unaffordable payments. The example included in proposed comment 5(b)(2)(ii)-1 illustrates just such a result.

The Bureau invites comment on the necessity of the requirement in proposed § 1041.5(b)(2)(ii) to prevent consumer harms and on any alternatives that would adequately prevent consumer harm while reducing burden for lenders. The Bureau also invites comment on whether the 30-day period in proposed § 1041.5(b)(2)(ii) is the appropriate period of time to use or whether a shorter or longer period of time, such as the 60-day period described in the Small Business Review Panel Outline, would be appropriate. The Bureau also invites comment on whether the time period chosen should run from the date of the final payment, rather than the highest payment, in cases where the highest payment is other than the final payment.

5(b)(2)(iii)

Proposed § 1041.5(b)(2)(iii) would provide that for a covered short-term loan for which a presumption of unaffordability applies under proposed § 1041.6, the lender determine that the requirements of proposed § 1041.6 are satisfied. As discussed below, proposed § 1041.6 would apply certain presumptions, requirements, and prohibitions when the consumer's borrowing history indicates that he or she may have particular difficulty in repaying a new covered loan with certain payment amounts or structures.

5(c) Projecting Consumer Net Income and Payments for Major Financial Obligations

Proposed § 1041.5(c) provides requirements that would apply to a lender's projections of net income and major financial obligations, which in turn serve as the basis for the lender's reasonable determination of ability to repay. Specifically, it would establish requirements for obtaining information directly from a consumer as well as specified types of verification evidence. It would also provide requirements for reconciling ambiguities and

inconsistencies in the information and verification evidence.

5(c)(1) General

As discussed above, proposed § 1041.5(b)(2) would provide that a lender's determination of a consumer's ability to repay is reasonable only if the lender determines that the consumer will have sufficient residual income during the term of the loan and for a period thereafter to repay the loan and still meet basic living expenses. Proposed § 1041.5(b)(2) thus carries with it the requirement for a lender to make projections with respect to the consumer's net income and major financial obligations—the components of residual income—during the relevant period of time. And, proposed § 1041.5(b)(2) further provides that to be reasonable such projections must be made in accordance with proposed § 1041.5(c).

Proposed § 1041.5(c)(1) would provide that for a lender's projection of the amount and timing of net income or payments for major financial obligations to be reasonable, the lender must obtain both a written statement from the consumer as provided for in proposed § 1041.5(c)(3)(i), and verification evidence as provided for in proposed § 1041.5(c)(3)(ii), each of which are discussed below. Proposed § 1041.5(c)(1) further provides that for a lender's projection of the amount and timing of net income or payments for major financial obligations to be reasonable it may be based on a consumer's statement of the amount and timing only to the extent the stated amounts and timing are consistent with the verification evidence.

The Bureau believes verification of consumers' net income and payments for major financial obligations is an important component of the reasonable ability-to-repay determination. Consumers seeking a loan may be in financial distress and inclined to overestimate net income or to underestimate payments under major financial obligations to improve their chances of being approved. Lenders have an incentive to encourage such misestimates to the extent that as a result consumers find it necessary to reborrow. This result is especially likely if a consumer perceives that, for any given loan amount, lenders offer only one-size-fits-all loan repayment structure and will not offer an alternative loan with payments that are within the consumer's ability to repay. An ability-to-repay determination that is based on unrealistic factual assumptions will yield unrealistic and unreliable results, leading to the consumer harms

that the Bureau's proposal is intended to prevent.

Accordingly, proposed § 1041.5(c)(1) would permit a lender to base its projection of the amount and timing of a consumer's net income or payments under major financial obligations on a consumer's written statement of amounts and timing under proposed § 1041.5(c)(3)(i) only to the extent the stated amounts and timing are consistent with verification evidence of the type specified in proposed § 1041.5(c)(3)(ii). Proposed § 1041.5(c)(1) would further provide that in determining whether and the extent to which such stated amounts and timing are consistent with verification evidence, a lender may reasonably consider other reliable evidence the lender obtains from or about the consumer, including any explanations the lender obtains from the consumer. The Bureau believes the proposed approach would appropriately ensure that the projections of a consumer's net income and payments for major financial obligations will generally be supported by objective, third-party documentation or other records.

However, the proposed approach also recognizes that reasonably available verification evidence may sometimes contain ambiguous, out-of-date, or missing information. For example, the net income of consumers who seek covered loans may vary over time, such as for a consumer who is paid an hourly wage and whose work hours vary from week to week. In fact, a consumer is more likely to experience financial distress, which may be a consumer's reason for seeking a covered loan, immediately following a temporary decrease in net income from their more typical levels. Accordingly, the proposed approach would not require a lender to base its projections exclusively on the consumer's most recent net income receipt shown in the verification evidence. Instead, it allows the lender reasonable flexibility in the inferences the lender draws about, for example, a consumer's net income during the term of the covered loan, based on the consumer's net income payments shown in the verification evidence, including net income for periods earlier than the most recent net income receipt. At the same time, the proposed approach would not allow a lender to mechanically assume that a consumer's immediate past income as shown in the verification evidence will continue into the future if, for example, the lender has reason to believe that the consumer has been laid off or is no longer employed.

In this regard, the proposed approach recognizes that a consumer's own statements, explanations, and other evidence are important components of a reliable projection of future net income and payments for major financial obligations. Proposed comment 5(c)(1)-1 includes several examples applying the proposed provisions to various scenarios, illustrating reliance on consumer statements to the extent they are consistent with verification evidence and how a lender may reasonably consider consumer explanations to resolve ambiguities in the verification evidence. It includes examples of when a major financial obligation in a consumer report is greater than the amount stated by the consumer and of when a major financial obligation stated by the consumer does not appear in the consumer report at all.

The Bureau anticipates that lenders would develop policies and procedures, in accordance with proposed § 1041.18, for how they project consumer net income and payments for major financial obligations in compliance with proposed § 1041.5(c)(1) and that a lender's policies and procedures would reflect its business model and practices, including the particular methods it uses to obtain consumer statements and verification evidence. The Bureau believes that many lenders and vendors would develop methods of automating projections, so that for a typical consumer, relatively little labor would be required.

The Bureau invites comments on the proposed approach to verification and to making projections based upon verified evidence, including whether the Bureau should permit projections that vary from the most recent verification evidence and, if so, whether the Bureau should be more prescriptive with respect to the permissible range of such variances.

5(c)(2) Changes Not Supported by Verification Evidence

Proposed § 1041.5(c)(2) would provide an exception to the requirement in proposed § 1041.5(c)(1) that projections must be consistent with the verification evidence that a lender would be required to obtain under proposed 1041.5(c)(3)(ii). As discussed below, the required verification evidence will normally consist of third-party documentation or other reliable records of recent transactions or of payment amounts. Proposed § 1041.5(c)(2) would permit a lender to project a net income amount that is higher than an amount that would otherwise be supported under proposed § 1041.5(c)(1), or a payment amount

under a major financial obligation that is lower than an amount that would otherwise be supported under proposed § 1041.5(c)(1), only to the extent and for such portion of the term of the loan that the lender obtains a written statement from the payer of the income or the payee of the consumer's major financial obligation of the amount and timing of the new or changed net income or payment.

The exception would accommodate situations in which a consumer's net income or payment for a major financial obligation will differ from the amount supportable by the verification evidence. For example, a consumer who has been unemployed for an extended period of time but who just accepted a new job may not be able to provide the type of verification evidence of net income generally required under proposed § 1041.5(c)(3)(ii)(A). Proposed § 1041.5(c)(2) would permit a lender to project a net income amount based on, for example, an offer letter from the new employer stating the consumer's wage, work hours per week, and frequency of pay. The lender would be required to retain the statement in accordance with proposed § 1041.18.

The Bureau invites comments as to whether lenders should be permitted to rely on such evidence in projecting residual income.

5(c)(3) Evidence of Net Income and Payments for Major Financial Obligations

5(c)(3)(i) Consumer Statements

Proposed § 1041.5(c)(3)(i) would require a lender to obtain a consumer's written statement of the amount and timing of the consumer's net income, as well as of the amount and timing of payments required for categories of the consumer's major financial obligations (e.g., credit card payments, automobile loan payments, housing expense payments, child support payments, etc.). The lender would then use the statements as an input in projecting the consumer's net income and payments for major financial obligations during the term of the loan. The lender would also be required to retain the statements in accordance with proposed § 1041.18. As discussed above, the Bureau believes it is important to require lenders to obtain this information directly from consumers in addition to obtaining reasonably available verification evidence under proposed § 1041.5(c)(3)(ii) because the latter sources of information may sometimes contain ambiguous, out-of-date, or missing information. Accordingly, the Bureau believes that projections based

on both sources of information will be more reliable than either one standing alone.

Proposed comment 5(c)(3)(i)-1 clarifies that a consumer's written statement includes a statement the consumer writes on a paper application or enters into an electronic record, or an oral consumer statement that the lender records and retains or memorializes in writing and retains. It further clarifies that a lender complies with a requirement to obtain the consumer's statement by obtaining information sufficient for the lender to project the dates on which a payment will be received or paid through the period required under proposed § 1041.5(b)(2). Proposed comment 5(c)(3)(i)-1 includes the example that a lender's receipt of a consumer's statement that the consumer is required to pay rent every month on the first day of the month is sufficient for the lender to project when the consumer's rent payments are due. Proposed § 1041.5(c)(3)(i) would not specify any particular form or even particular questions or particular words that a lender must use to obtain the required consumer statements.

The Bureau invites comments on whether to require a lender to obtain a written statement from the consumer with respect to the consumer's income and major financial obligations, including whether the Bureau should establish any procedural requirements with respect to securing such a statement and the weight that should be given to such a statement. The Bureau also invites comments on whether a written memorialization by the lender of a consumer's oral statement should not be considered sufficient.

5(c)(3)(ii) Verification Evidence

Proposed § 1041.5(c)(3)(ii) would require a lender to obtain verification evidence for the amounts and timing of the consumer's net income and payments for major financial obligations for a period of time prior to consummation. It would specify the type of verification evidence required for net income and each component of major financial obligations. The proposed requirements are intended to provide reasonable assurance that the lender's projections of a consumer's net income and payments for major financial obligations are based on accurate and objective information, while also allowing lenders to adopt innovative, automated, and less burdensome methods of compliance.

5(c)(3)(ii)(A)

Proposed § 1041.5(c)(3)(ii)(A) would specify that for a consumer's net

income, the applicable verification evidence would be a reliable record (or records) of an income payment (or payments) covering sufficient history to support the lender's projection under proposed § 1041.5(c)(1). It would not specify a minimum look-back period or number of net income payments for which the lender must obtain verification evidence. The Bureau does not believe it is necessary or appropriate to require verification evidence covering a lookback period of a prescribed length. Rather, sufficiency of the history for which a lender obtains verification evidence may depend upon the source or type of income, the length of the prospective covered longer-term loan, and the consistency of the income shown in the verification evidence the lender initially obtains, if applicable. Lenders would be required to develop and maintain policies and procedures for establishing the sufficient history of net income payments in verification evidence, in accordance with proposed § 1041.18.

Proposed comment 5(c)(3)(ii)(A)-1 would clarify that a reliable transaction record includes a facially genuine original, photocopy, or image of a document produced by or on behalf of the payer of income, or an electronic or paper compilation of data included in such a document, stating the amount and date of the income paid to the consumer. It would further clarify that a reliable transaction record also includes a facially genuine original, photocopy, or image of an electronic or paper record of depository account transactions, prepaid account transactions (including transactions on a general purpose reloadable prepaid card account, a payroll card account, or a government benefits card account), or money services business check-cashing transactions showing the amount and date of a consumer's receipt of income.

The Bureau believes that the proposed requirement would be sufficiently flexible to provide lenders with multiple options for obtaining verification evidence for a consumer's net income. For example, a paper paystub would generally satisfy the requirement, as would a photograph of the paystub uploaded from a mobile phone to an online lender. In addition, the requirement would also be satisfied by use of a commercial service that collects payroll data from employers and provides it to creditors for purposes of verifying a consumer's employment and income. Proposed comment 5(c)(3)(ii)(A)-1 would also allow verification evidence in the form of electronic or paper bank account statements or records showing deposits

into the account, as well as electronic or paper records of deposits onto a prepaid card or of check-cashing transactions. Data derived from such sources, such as from account data aggregator services that obtain and categorize consumer deposit account and other account transaction data, would also generally satisfy the requirement. During outreach, service providers informed the Bureau that they currently provide such services to lenders.

Several SERs expressed concern during the SBREFA process that the Bureau's approach to income verification described in the Small Business Review Panel Outline was too burdensome and inflexible. Several other lender representatives expressed similar concerns during the Bureau's outreach to industry. Many perceived that the Bureau would require outmoded or burdensome methods of obtaining verification evidence, such as always requiring a consumer to submit a paper paystub or transmit it by facsimile (fax) to a lender. Others expressed concern about the Bureau requiring income verification at all, stating that many consumers are paid in cash and therefore have no employer-generated records of income.

The Bureau's proposed approach is intended to respond to many of these concerns by providing for a wide range of methods for obtaining verification evidence for a consumer's net income, including electronic methods that can be securely automated through third-party vendors with a consumer's consent. In developing this proposal, Bureau staff met with more than 30 lenders, nearly all of which stated they already use some method—though not necessarily the precise methods the Bureau is proposing—to verify consumers' income as a condition of making a covered loan. The Bureau's proposed approach thus would accommodate most of the methods they described and that the Bureau is aware of from other research and outreach. It is also intended to provide some accommodation for making covered loans to many consumers who are paid in cash. For example, under the Bureau's proposed approach, a lender may be able to obtain verification evidence of net income for a consumer who is paid in cash by using deposit account records (or data derived from deposit account transactions), if the consumer deposits income payments into a deposit account. Lenders often require consumers to have deposit accounts as a condition of obtaining a covered loan, so the Bureau believes that lenders would be able to obtain verification evidence for many

consumers who are paid in cash in this manner.

The Bureau recognizes that there are some consumers who receive a portion of their income in cash and also do not deposit their cash income into a deposit account or prepaid card account. For such consumers, a lender may not be able to obtain verification evidence for that portion of a consumer's net income, and therefore generally could not base its projections and ability-to-repay determinations on that portion of such consumers' income. The Bureau, however, does not believe it is appropriate to make an ability-to-repay determination for a covered loan based on income that cannot be reasonably substantiated through any verification evidence. When there is no verification evidence for a consumer's net income, the Bureau believes the risk is too great that projections of net income would be overstated and that payments under a covered short-term loan consequently would exceed the consumer's ability to repay, resulting in the harms targeted by this proposal.

For similar reasons, the Bureau is not proposing to permit the use of predictive models designed to estimate a consumer's income or to validate the reasonableness of a consumer's statement of her income. Given the risks associated with unaffordable short-term loans, the Bureau believes that such models—which the Bureau believes typically are used to estimate annual income—lack the precision required to reasonably project an individual consumer's net income for a short period of time.

The Bureau notes that it has received recommendations from the Small Dollar Roundtable, comprised of a number of lenders making loans the Bureau proposes to cover in this rulemaking and a number of consumer advocates, recommending that the Bureau require income verification.

The Bureau invites comment on the types of verification evidence permitted by the proposed rule and what, if any, other types of verification evidence should be permitted, especially types of verification evidence that would be at least as objective and reliable as the types provided for in proposed § 1041.5(c)(3)(ii)(A) and comment 5(c)(3)(ii)(A)-1. For example, the Bureau is aware of service providers who are seeking to develop methods to verify a consumer's stated income based upon extrinsic data about the consumer or the area in which the consumer lives. The Bureau invites comment on the reliability of such methods, their ability to provide information that is sufficiently current and granular to

address a consumer's stated income for a particular and short period of time, and, if they are able to do so, whether income amounts determined under such methods should be a permissible as a form of verification evidence. The Bureau also invites comments on whether the requirements for verification evidence should be relaxed for a consumer whose principal income is documented but who reports some amount of supplemental cash income and, if so, what approach would be appropriate to guard against the risk of consumers' overstating their income and obtaining an unaffordable loan.

5(c)(3)(ii)(B)

Proposed § 1041.5(c)(3)(ii)(B) would specify that for a consumer's required payments under debt obligations, the applicable verification evidence would be a national consumer report, the records of the lender and its affiliates, and a consumer report obtained from an information system currently registered pursuant to § 1041.17(c)(2) or § 1041.17(d)(2), if available. The Bureau believes that most typical consumer debt obligations other than covered loans would appear in a national consumer report. Many covered loans are not included in reports generated by the national consumer reporting agencies, so the lender would also be required to obtain, as verification evidence, a consumer report from a currently registered information system. As discussed above, proposed § 1041.5(c)(1) would permit a lender to base its projections on consumer statements of amounts and timing of payments for major financial obligations (including debt obligations) only to the extent the statements are consistent with the verification evidence. Proposed comment 5(c)(1)-1 includes examples applying that proposed requirement in scenarios when a major financial obligation shown in the verification evidence is greater than the amount stated by the consumer and of when a major financial obligation stated by the consumer does not appear in the verification evidence at all.

Proposed comment 5(c)(3)(ii)(B)-1 would clarify that the amount and timing of a payment required under a debt obligation are the amount the consumer must pay and the time by which the consumer must pay it to avoid delinquency under the debt obligation in the absence of any affirmative act by the consumer to extend, delay, or restructure the repayment schedule. The Bureau anticipates that in some cases, the national consumer report the lender obtains will not include a particular

debt obligation stated by the consumer, or that the national consumer report may include, for example, the payment amount under the debt obligation but not the timing of the payment. Similar anomalies could occur with covered loans and a consumer report obtained from a registered information system. To the extent the national consumer report and consumer report from a registered information system omit information for a payment under a debt obligation stated by the consumer, the lender would simply base its projections on the amount and timing stated by the consumer.

The Bureau notes that proposed § 1041.5(c)(3)(ii)(B) does not require a lender to obtain a credit report unless the lender is otherwise prepared to make a loan to a particular consumer. Because obtaining a credit report will add some cost, the Bureau expects that lenders will order such reports only after determining that the consumer otherwise satisfies the ability-to-repay test so as to avoid incurring these costs for applicants who would be declined without regard to the contents of the credit report. For the reasons previously discussed, the Bureau believes that verification evidence is critical to ensuring that consumers in fact have the ability to repay a loan, and that therefore the costs are justified to achieve the objectives of the proposal.

The Bureau invites comment on whether to require lenders to obtain credit reports from a national credit reporting agency and from a registered information system. In particular, and in accordance with the recommendation of the Small Business Review Panel, the Bureau invites comments on ways of reducing the operational burden for small businesses of verifying consumers' payments under major financial obligations.

5(c)(3)(ii)(C)

Proposed § 1041.5(c)(3)(ii)(C) would specify that for a consumer's required payments under court- or government agency-ordered child support obligations, the applicable verification evidence would be a national consumer report, which also serves as verification evidence for a consumer's required payments under debt obligations, in accordance with proposed § 1041.5(c)(3)(ii)(B). The Bureau anticipates that some required payments under court- or government agency-ordered child support obligations will not appear in a national consumer report. To the extent the national consumer report omits information for a required payment, the lender could simply base its projections on the

amount and timing stated by the consumer, if any. The Bureau intends this clarification to address concerns from some lenders, including from SERs, that a requirement to obtain verification evidence for payments under court- or government agency-ordered child support obligations from sources other than a national consumer report would be onerous and create great uncertainty.

5(c)(3)(ii)(D)

Proposed § 1041.5(c)(3)(ii)(D) would specify that for a consumer's housing expense (other than a payment for a debt obligation that appears on a national consumer report obtained by the lender), the applicable verification evidence would be either a reliable transaction record (or records) of recent housing expense payments or a lease, or an amount determined under a reliable method of estimating a consumer's housing expense based on the housing expenses of consumers with households in the locality of the consumer.

Proposed comment 5(c)(3)(ii)(D)-1 explains that the proposed provision means a lender would have three methods that it could choose from for complying with the requirement to obtain verification evidence for a consumer's housing expense. Proposed comment 5(c)(3)(ii)(D)-1.i explains that under the first method, which could be used for a consumer whose housing expense is a mortgage payment, the lender may obtain a national consumer report that includes the mortgage payment. A lender would be required to obtain a national consumer report as verification evidence of a consumer's payments under debt obligations generally, pursuant to proposed § 1041.5(c)(3)(ii)(B). A lender's compliance with that requirement would satisfy the requirement in proposed § 1041.5(c)(3)(ii)(D), provided the consumer's housing expense is a mortgage payment and that mortgage payment appears in the national consumer report the lender obtains.

Proposed comment 5(c)(3)(ii)(D)-1.ii explains that the second method is for the lender to obtain a reliable transaction record (or records) of recent housing expense payments or a rental or lease agreement. It clarifies that for purposes of this method, reliable transaction records include a facially genuine original, photocopy or image of a receipt, cancelled check, or money order, or an electronic or paper record of depository account transactions or prepaid account transactions (including transactions on a general purpose reloadable prepaid card account, a payroll card account, or a government

benefits card account), from which the lender can reasonably determine that a payment was for housing expense as well as the date and amount paid by the consumer. This method mirrors options a lender would have for obtaining verification evidence for net income. Accordingly, data derived from a record of depository account transactions or of prepaid account transactions, such as data from account data aggregator services that obtain and categorize consumer deposit account and other account transaction data, would also generally satisfy the requirement. Bureau staff have met with service providers that state that they currently provide services to lenders and are typically able to identify, for example, how much a particular consumer expends on housing expense as well as other categories of expenses.

Proposed comment 5(c)(3)(ii)(D)-1.iii explains that the third method is for a lender to use an amount determined under a reliable method of estimating a consumer's share of housing expense based on the individual or household housing expenses of similarly situated consumers with households in the locality of the consumer seeking a covered loan. Proposed comment 5(c)(3)(ii)(D)-1.iii provides, as an example, that a lender may use data from a statistical survey, such as the American Community Survey of the United States Census Bureau, to estimate individual or household housing expense in the locality (*e.g.*, in the same census tract) where the consumer resides. It provides that, alternatively, a lender may estimate individual or household housing expense based on housing expense and other data (*e.g.*, residence location) reported by applicants to the lender, provided that it periodically reviews the reasonableness of the estimates that it relies on using this method by comparing the estimates to statistical survey data or by another method reasonably designed to avoid systematic underestimation of consumers' shares of housing expense. It further explains that a lender may estimate a consumer's share of household expense based on estimated household housing expense by reasonably apportioning the estimated household housing expense by the number of persons sharing housing expense as stated by the consumer, or by another reasonable method.

Several SERs expressed concern during the SBREFA process that the Bureau's approach to housing expense verification described in the Small Business Review Panel Outline was burdensome and impracticable for many

consumers and lenders. Several lender representatives expressed similar concerns during the Bureau's outreach to industry. The Small Business Review Panel Outline referred to lender verification of a consumer's rent or mortgage payment using, for example, receipts, cancelled checks, a copy of a lease, and bank account records. But some SERs and other lender representatives stated many consumers would not have these types of documents readily available. Few consumers receive receipts or cancelled checks for rent or mortgage payments, they stated, and bank account statements may simply state the check number used to make a payment, providing no way of confirming the purpose or nature of the payment. Consumers with a lease would not typically have a copy of the lease with them when applying for a covered loan, they stated, and subsequently locating and transmitting or delivering a copy of the lease to a lender would be unduly burdensome, if not impracticable, for both consumers and lenders.

The Bureau believes that many consumers would have paper or electronic records that they could provide to a lender to establish their housing expense. In addition, as discussed above, information presented to the Bureau during outreach suggests that data aggregator services may be able to electronically and securely obtain and categorize, with a consumer's consent, the consumer's deposit account or other account transaction data to reliably identify housing expenses payments and other categories of expenses.

Nonetheless, the Bureau intends its proposal to be responsive to these concerns by providing lenders with multiple options for obtaining verification evidence for a consumer's housing expense, including by using estimates based on the housing expenses of similarly situated consumers with households in the locality of the consumer seeking a covered loan. The Bureau's proposal also is intended to facilitate automation of the methods of obtaining the verification evidence, making projections of a consumer's housing expense, and calculating the amounts for an ability-to-repay determination, such as residual income.

A related concern raised by SERs is that a consumer may be the person legally obligated to make a rent or mortgage payment but may receive contributions toward it from other household members, so that the payment the consumer makes, even if the consumer can produce a record of it,

is much greater than the consumer's own housing expense. Similarly, a consumer may make payments in cash to another person, who then makes the payment to a landlord or mortgage servicer covering the housing expenses of several residents. During outreach with industry, one lender stated that many of its consumers would find requests for documentation of housing expense to be especially intrusive or offensive, especially consumers with informal arrangements to pay rent for a room in someone else's home.

To address these concerns, the Bureau is proposing the option of estimating a consumer's housing expense based on the individual or apportioned household housing expenses of similarly situated consumers with households in the locality. The Bureau believes the proposed approach would address the concerns raised by SERs and other lenders while also reasonably accounting for the portion of a consumer's net income that is consumed by housing expenses and, therefore, not available for payments under a prospective loan. The Bureau notes that if the method the lender uses to obtain verification evidence of housing expense for a consumer—including the estimated method—indicates a higher housing expense amount than the amount in the consumer's statement under proposed § 1041.5(c)(3)(i), then proposed § 1041.5(c)(1) would generally require a lender to rely on the higher amount indicated by the verification evidence. Accordingly, a lender may prefer use one of the other two methods for obtaining verification evidence, especially if doing so would result in verification evidence indicating a housing expense equal to that in the consumer's written statement of housing expense.

The Bureau recognizes that in some cases the consumer's actual housing expense may be lower than the estimation methodology would suggest but may not be verifiable through documentation. For example, some consumers may live for a period of time rent-free with a friend or relative. However, the Bureau does not believe it is possible to accommodate such situations without permitting lenders to rely solely on the consumer's statement of housing expenses, and for the reasons previously discussed the Bureau believes that doing so would jeopardize the objectives of the proposal. The Bureau notes that the approach it is proposing is consistent with the recommendation of the Small Dollar Roundtable which recommended that the Bureau permit rent to be verified

through a “geographic market-specific . . . valid, reliable proxy.”

The Bureau invites comment on whether the proposed methods of obtaining verification evidence for housing expense are appropriate and adequate.

§ 1041.6 Additional Limitations on Lending—Covered Short-Term Loans Background

Proposed § 1041.6 would augment the basic ability-to-repay determination required by proposed § 1041.5 in circumstances in which the consumer’s recent borrowing history or current difficulty repaying an outstanding loan provides important evidence with respect to the consumer’s financial capacity to afford a new covered short-term loan. In these circumstances, proposed § 1041.6 would require the lender to factor this evidence into the ability-to-repay determination and, in certain instances, would prohibit a lender from making a new covered short-term loan under proposed § 1041.5 to the consumer for 30 days. The Bureau proposes the additional requirements in § 1041.6 for the same basic reason that it proposes § 1041.5: To prevent the unfair and abusive practice identified in proposed § 1041.4, and the consumer injury that results from it. The Bureau believes that these additional requirements may be needed in circumstances in which proposed § 1041.5 alone may not be sufficient to prevent a lender from making a covered short-term loan that the consumer might not have the ability to repay.

Proposed § 1041.6 would generally impose a presumption of unaffordability on continued lending where evidence suggests that the prior loan was not affordable for the consumer such that the consumer may have particular difficulty repaying a new covered short-term loan. Specifically, such a presumption would apply when a consumer seeks a covered short-term loan during the term of a covered short-term loan made under proposed § 1041.5 or a covered longer-term balloon-payment loan made under proposed § 1041.9 and for 30 days thereafter, or seeks to take out a covered short-term loan when there are indicia that an outstanding loan with the same lender or its affiliate is unaffordable for the consumer. Proposed § 1041.6 would also impose a mandatory cooling-off period prior to a lender making a fourth loan covered short-term loan in a sequence and would prohibit lenders from making a covered short-term loan under proposed § 1041.5 during the term of and for 30 days thereafter a

covered short-term loan made under proposed § 1041.7.

A central component of the preventive requirements in proposed § 1041.6 is the concept of a reborrowing period—a period following the payment date of a prior loan during which a consumer’s borrowing of a covered short-term loan is deemed evidence that the consumer is seeking additional credit because the prior loan was unaffordable. When consumers have the ability to repay a covered short-term loan, the loan should not cause consumers to have the need to reborrow shortly after repaying the loan. As discussed in Market Concerns—Short-Term Loans, however, the Bureau believes that the fact that covered short-term loans require repayment so quickly after consummation makes such loans more difficult for consumers to repay the loan consistent with their other major financial obligations and basic living expenses without needing to reborrow. Moreover, most covered short-term loans—including payday loans and short-term vehicle title loans—also require payment in a single lump sum, thus exacerbating the challenge of repaying the loan without needing to reborrow.

For these loans, the Bureau believes that the fact that a consumer returns to take out another covered short-term loan shortly after having a previous covered short-term loan outstanding frequently indicates that the consumer did not have the ability to repay the prior loan and meet the consumer’s other major financial obligations and basic living expenses. This also may provide strong evidence that the consumer will not be able to afford a new covered short-term loan. A second covered short-term loan shortly following a prior covered short-term loan may result from a financial shortfall caused by repayment of the prior loan.

Frequently, reborrowing occurs on the same day that a loan is due, either in the form of a rollover (where permitted by State law) or a new loan taken out on the same day that the prior loan was repaid. Some States require a cooling-off period between loans, typically 24 hours, and the Bureau has found that in those States, if consumers take out successive loans, they generally do so at the earliest time that is legally permitted.⁵⁵⁹ The Bureau interprets these data to indicate that these consumers could not afford to repay the full amount of the loan when due and

still meet their financial obligations and basic living expenses.

Whether a particular loan taken after a consumer has repaid a prior loan (and after the expiration of any mandated cooling-off period) is a reborrowing prompted by unaffordability of the prior payment is less facially evident. The fact that consumers may cite a particular income or expense shock is not dispositive since a prior unaffordable loan may be the reason that the consumer cannot absorb the new change. On balance, the Bureau believes that for new loans taken within a short period of time after a prior loan ceases to be outstanding, the most likely explanation is the unaffordability of the prior loan, *i.e.*, the fact that the size of the payment obligation on the prior loan left these consumers with insufficient income to make it through their monthly expense cycle.

To provide a structured process that accounts for the likelihood that the unaffordability of an existing or prior loan is driving reborrowing and that ensures a rigorous analysis of consumers’ individual circumstances, the Bureau believes that the most appropriate approach may be a presumptions framework rather than an open-ended inquiry. The Bureau is thus proposing to delineate a specific reborrowing period—*i.e.*, a period during which a new loan will be presumed to be a reborrowing.⁵⁶⁰

In determining the appropriate length of the reborrowing period, the Bureau considered several time periods. In particular, in addition to the 30-day period being proposed, the Bureau considered periods of 14, 45, 60, or 90 days in length. The Bureau also considered an option that would tie the length of the reborrowing period to the term of the preceding loan. In evaluating the alternative options for defining the reborrowing period (and in turn the loan

⁵⁶⁰ Reborrowing takes several forms in the market for covered short-term loans. As used throughout this proposal, reborrowing and the reborrowing period include any rollovers or renewals of a loan, as well as new extensions of credit. A loan may be a “rollover” if, at the end of a loan term, a consumer only pays a fee or finance charge in order to “roll over” a loan rather than repaying the loan. Similarly, the laws of some States permit a lender to “renew” a consumer’s outstanding loan with the payment of a finance charge. More generally, a consumer may repay a loan and then return to take out a new loan within a fairly short period of time. The Bureau thus considers rollovers, renewals, and reborrowing within a short period of time after repaying the prior loan to be functionally the same sort of transaction with regard to the presumptions of unaffordability—and other lending restrictions in proposed § 1041.6—and generally uses the term reborrowing to cover all three scenarios, along with concurrent borrowing by a consumer whether from the same lender or its affiliate or from different, unaffiliated lenders.

⁵⁵⁹ CFPB Report on Supplemental Findings, at ch. 4.

sequence definition), the Bureau sought to strike a balance between a reborrowing period that would be too short, thereby not capturing substantial numbers of subsequent loans that are in fact the result of the spillover effect of the unaffordability of the prior loan and inadequately preventing consumer injury, and a reborrowing period that would be too long, thereby covering substantial numbers of subsequent loans that are the result of a new need for credit, independent of such effects. This concept of a reborrowing period is intertwined with the definition of loan sequence. Under proposed § 1041.2(a)(12), loan sequence is defined as a series of consecutive or concurrent covered short-term loans in which each of the loans is made while the consumer currently has an outstanding covered short-term loan or within 30 days after the consumer ceased to have a covered short-term loan outstanding.

The Bureau's 2014 Data Point analyzed repeated borrowing on payday loans using a 14-day reborrowing period reflecting a bi-weekly pay cycle, the most common pay cycle for consumers in this market.⁵⁶¹ For the purposes of the 2014 Data Point, a loan was considered part of a sequence if it was made within 14 days of the prior loan. The Bureau adopted this approach in the Bureau's early research in order to obtain a relatively conservative measure of reborrowing activity relative to the most frequent date for the next receipt of income. However, the 14-day definition had certain disadvantages, including the fact that many consumers are paid on a monthly cycle, and a 14-day definition thus does not adequately reflect how different pay cycles can cause slightly different reborrowing patterns.

Upon further consideration of what benchmarks would sufficiently protect consumers from reborrowing harm, the Bureau turned to the typical consumer expense cycle, rather than the typical income cycle, as the most appropriate metric.⁵⁶² Consumer expense cycles are typically a month in length with housing expenses, utility payments, and other debt obligations generally paid on a monthly basis. Thus, where repaying a loan causes a shortfall, the consumer may seek to return during the same

expense cycle to get funds to cover downstream expenses.

The proposals under consideration in the Small Business Review Panel Outline relied on a 60-day reborrowing period based upon the premise that consumers for whom repayment of a loan was unaffordable may nonetheless be able to juggle their expenses for a period of time so that the spillover effects of the loan may not manifest until the second expense cycle following repayment. Upon additional analysis and extensive feedback from a broad range of stakeholders, the Bureau has now tentatively concluded that the 30-day definition incorporated into the Bureau's proposal may strike a more appropriate balance between competing considerations.

Because so many expenses are paid on a monthly basis, the Bureau believes that loans obtained during the same expense cycle are relatively likely to indicate that repayment of a prior loan may have caused a financial shortfall. Additionally, in analysis of supervisory data, the Bureau has found that a considerable segment of consumers who repay a loan without an immediate rollover or reborrowing nonetheless return within the ensuing 30 days to reborrow.⁵⁶³ Accordingly, if the consumer returns to take out another covered short-term loan—or, as described with regard to proposed § 1041.10, certain types of covered longer-term loans—within the same 30-day period, the Bureau believes that this pattern of reborrowing indicates that the prior loan was unaffordable and that the following loan may likewise be unaffordable.

On the other hand, the Bureau believes that for loans obtained more than 30 days after a prior loan, there is an increased possibility that the loan is prompted by a new need on the part of the borrower, not directly related to potential financial strain from repaying the prior loan. While a previous loan's unaffordability may cause some consumers to need to take out a new loan as many as 45 days or even 60 days later, the Bureau believes that the effects of the previous loan are more likely to dissipate once the consumer has completed a full expense cycle following the previous loan's conclusion. Accordingly, the Bureau believes that a 45-day or 60-day definition may be too broad. A reborrowing period which varies with the length of the preceding loan term would be operationally complex for lenders to implement and, for

consumers paid weekly or bi-weekly, may also be too narrow.

Accordingly, using this 30-day reborrowing window, the Bureau is proposing a presumption of unaffordability in situations in which the Bureau believes that the fact that the consumer is seeking to take out a new covered short-term loan during the term of, or shortly after repaying, a prior loan generally suggests that the new loan, like the prior loan, will exceed the consumer's ability to repay. The presumption is based on concerns that the prior loan may have triggered the need for the new loan because it exceeded the consumer's ability to repay, and that, absent a sufficient improvement of the consumer's financial capacity, the new loan will also be unaffordable for the consumer.

The presumption can be overcome, however, in circumstances that suggest that there is sufficient reason to believe that the consumer would, in fact, be able to afford the new loan even though he or she is seeking to reborrow during the term of or shortly after a prior loan. The Bureau recognizes, for example, that there may be situations in which the prior loan would have been affordable but for some unforeseen disruption in income that occurred during the prior expense cycle and which is not reasonably expected to recur during the term of the new loan. The Bureau also recognizes that there may be circumstances, albeit less common, in which even though the prior loan proved to be unaffordable, a new loan would be affordable because of a reasonably projected increase in net income or decrease in major financial obligations—for example, if the consumer has obtained a second job that will increase the consumer's residual income going forward or the consumer has moved since obtaining the prior loan and will have lower housing expenses going forward.

Proposed § 1041.6(b) through (d) define a set of circumstances in which the Bureau believes that a consumer's recent borrowing history makes it unlikely that the consumer can afford a new covered short-term loan, including concurrent loans.⁵⁶⁴ In such

⁵⁶⁴ The Bureau notes that the proposed ability-to-repay requirements do not prohibit a consumer from taking out a covered short-term loan when the consumer has one or more covered short-term loans outstanding, but instead account for the presence of concurrent loans in two ways: (1) A lender would be required to obtain verification evidence about required payments on debt obligations, which are defined under proposed § 1041.5(a)(2) to include outstanding covered loans, and (2) any concurrent loans would be counted as part of the loan sequence for purposes of applying the presumptions and prohibitions under proposed § 1041.6. This

⁵⁶¹ CFPB Data Point: Payday Lending, at 7.

⁵⁶² Researchers in an industry-funded study also concluded that "an entire billing cycle of most bills—rent, other loans, utilities, etc.—and at least one paycheck" is the "appropriate measurement" for purposes of determining whether a payday loan leads to a "cycle of debt." Marc Anthony Fusaro & Patricia J. Cirillo, *Do Payday Loans Trap Consumers in a Cycle of Debt*, (November 16, 2011), available at: http://papers.ssrn.com/sol3/papers.cfm?abstract_id=1960776.

⁵⁶³ CFPB Report on Supplemental Findings, at ch. 5.

circumstances, a consumer would be presumed to not have the ability to repay a covered short-term loan under proposed § 1041.5. Proposed § 1041.6(e) would define the additional determinations that a lender would be required to make in cases where the presumption applies in order for the lender's determination under proposed § 1041.5 that the consumer will have the ability to repay a new covered short-term loan to be reasonable despite the unaffordability of the prior loan.

The Bureau believes that it is extremely unlikely that a consumer who twice in succession returned to reborrow during the reborrowing period and who seeks to reborrow again within 30 days of having the third covered short-term loan outstanding would be able to afford another covered short-term loan. Because of lenders' strong incentives to facilitate reborrowing that is beyond the consumer's ability to repay, the Bureau believes it is appropriate, in proposed § 1041.6(f), to impose a mandatory 30-day cooling-off period after the third covered short-term loan in a sequence, during which time the lender cannot make a new covered short-term loan under proposed § 1041.5 to the consumer. This period would ensure that after three consecutive ability-to-repay determinations have proven inconsistent with the consumer's actual experience, the lender could not further worsen the consumer's financial situation by encouraging the consumer to take on additional unaffordable debt. Additionally, proposed § 1041.6(g) would prohibit a lender from combining sequences of covered short-term loans made under proposed § 1041.5 with loans made under the conditional exemption in proposed § 1041.7, as discussed further below.

The Bureau notes that this overall proposed approach is fairly similar to the framework included in the Small Business Review Panel Outline. There, the Bureau included a presumption of inability to repay for the second and third covered short-term loan and covered longer-term balloon-payment loan in a loan sequence and a mandatory cooling-off period following the third loan in a sequence. The Bureau considered a "changed circumstances" standard for overcoming the

approach differs from the conditional exemption for covered short-term loans under proposed § 1041.7 (*i.e.*, the alternative to the ability-to-repay requirements), which generally prohibits a Section 7 loan if the consumer has an outstanding covered loan. See the section-by-section analysis of proposed § 1041.7(c)(1) for further discussion, including explanation of the different approaches and notation of third party data regarding the prevalence of concurrent borrowing in this market.

presumption that would have required lenders to obtain and verify evidence of a change in consumer circumstances indicating that the consumer had the ability to repay the new loan according to its terms. The Bureau also, as noted above, included a 60-day reborrowing period (and corresponding definition of loan sequence) in the Small Business Review Panel Outline.

SERs and other stakeholders that offered feedback on the Outline urged the Bureau to provide greater flexibility with regard to using a presumptions framework to address concerns about repeated borrowing despite the contemplated requirement to determine ability to repay. The SERs and other stakeholders also urged the Bureau to provide greater clarity and flexibility in defining the circumstances that would permit a lender to overcome the presumption of unaffordability.

The Small Business Review Panel Report recommended that the Bureau request comment on whether a loan sequence could be defined with reference to a period shorter than the 60 days under consideration during the SBREFA process. The Small Business Review Panel Report further recommended that the Bureau consider additional approaches to regulation, including whether existing State laws and regulations could provide a model for elements of the Bureau's proposed interventions. In this regard, the Bureau notes that some States have cooling-off periods of one to seven days, as well as longer periods that apply after a longer sequence of loans. The Bureau's prior research has examined the effectiveness of these cooling-off periods⁵⁶⁵ and, in the CFPB Report on Supplemental Findings, the Bureau is publishing research showing how different definitions of loan sequence affect the number of loan sequences and the number of loans deemed to be part of a sequence.⁵⁶⁶ In the CFPB Report on Supplemental Findings, the Bureau is publishing additional analysis on the impacts of State cooling-off periods.⁵⁶⁷ The latter analysis is also discussed in Market Concerns—Short-Term Loans.

The Bureau has made a number of adjustments to the presumptions framework in response to this feedback. For instance, the Bureau is proposing a 30-day definition of loan sequence and 30-day cooling-off period rather than a 60-day definition of loan sequence and 60-day cooling-off period. The Bureau

⁵⁶⁵ See CFPB Data Point: Payday Lending, at 8.

5.

⁵⁶⁷ CFPB Report on Supplemental Findings, at ch.

4.

has also provided greater specificity and flexibility about when a presumption of unaffordability would apply, for example, by proposing certain exceptions to the presumption of unaffordability for a sequence of covered short-term loans. The proposal also would provide somewhat more flexibility about when a presumption of unaffordability could be overcome by permitting lenders to determine that there would be sufficient improvement in financial capacity for the new loan because of a one-time drop in income since obtaining the prior loan (or during the prior 30 days, as applicable). The Bureau has also continued to assess potential alternative approaches to the presumptions framework, discussed below.

The Bureau solicits comment on all aspects of the proposed presumptions of unaffordability and mandatory cooling-off periods, and other aspects of proposed § 1041.6, including the circumstances in which the presumptions apply (*e.g.*, the appropriate length of the reborrowing period and the appropriateness of other circumstances giving rise to the presumptions), the requirements for overcoming a presumption of unaffordability, and the circumstances in which a lender would be prohibited from making a covered short-term loan under proposed § 1041.5 during a 30-day cooling-off period or cooling-off period of a different length. In addition, and consistent with the recommendations of the Small Business Review Panel Report, the Bureau solicits comment on whether the 30-day reborrowing period is appropriate for the presumptions and prohibitions, or whether a longer or shorter period would better address the Bureau's concerns about repeat borrowing. The Bureau also seeks comment on whether lenders should be required to provide disclosures as part of the origination process for covered loans and, if so, whether an associated model form would be appropriate; on the specific elements of such disclosures; and on the burden and benefits to consumers and lenders of providing disclosures as described above.

Alternatives Considered

The Bureau has considered a number of alternative approaches to address reborrowing on covered short-term loans in circumstances indicating the consumer was unable to afford the prior loan.⁵⁶⁸ One possible approach would

⁵⁶⁸ In addition to the alternatives discussed, the Bureau tested draft disclosure forms in preparing

be to limit the overall number of covered short-term loans that a consumer could take within a specified period of time, rather than using the loan sequence and presumption concepts as part of the determination of consumers' ability to repay subsequent loans in a sequence and when and if a mandatory cooling-off period should apply. By imposing limits on reborrowing while avoiding the complexity of the presumptions, this approach could provide a more flexible way to protect consumers whose borrowing patterns suggest that they may not have the ability to repay their loans. This approach could, for example, limit the number of covered short-term loans to three within a 120-day period when the loan has a duration of 15 days or less. For loans with a longer duration, the applicable period of time correspondingly could be longer. However, depending on individual consumers' usage patterns, such an approach could also result in much longer cooling-off periods for individuals who borrow several times early in the designated period. Alternatively, a similar approach could impose a cooling-off period of varying lengths depending on the consumer's time in debt during a specified period.

The Bureau has also considered an alternative approach under which, instead of defining the circumstances in which a formal presumption of unaffordability applies and the determinations that a lender must make when such a presumption applies to a transaction, the Bureau would identify circumstances indicative of a consumer's inability to repay that would be relevant to whether a lender's determination under proposed § 1041.5 is reasonable. This approach would likely involve a number of examples of indicia requiring greater caution in

for the rulemaking. These are discussed in the FMG report and in part III above. Among other forms, the consumer testing obtained feedback on disclosure forms that provided information about certain restrictions on reborrowing covered short-term loans made under proposed § 1041.5. In particular, the forms explained to consumers that they might not be able to roll over or take out a new loan shortly after paying off the loan for which the consumer was applying. The forms also provided the loan payment date and amount due, along with a warning that consumers should not take out the loan if they could not pay it back by the payment date. During testing, participants were asked about the purpose of the form and whether they believed that their future ability to roll over or take out another loan would be limited. A few participants understood that borrowing would be restricted, but others had further questions about the restrictions and appeared to have difficulty understanding the restrictions. Based on these results, the Bureau is not proposing disclosures regarding the origination of loans under proposed § 1041.5 and the reborrowing restrictions under proposed § 1041.6.

underwriting and examples of countervailing factors that might support the reasonableness of a lender's determination that the consumer could repay a subsequent loan despite the presence of such indicia. This alternative approach would be less prescriptive than the proposed framework, and thus leave more discretion to lenders to make such a determination. However, it would also provide less certainty as to when a lender's particular ability-to-repay determination is reasonable.

In addition, the Bureau has considered whether there is a way to account for unusual expenses within the presumptions framework without creating an exception that would swallow the rule. In particular, the Bureau considered permitting lenders to overcome the presumptions of unaffordability in the event that the consumer provided evidence that the reason the consumer was struggling to repay the outstanding loan or was seeking to reborrow was due to a recent unusual and non-recurring expense. For example, under such an approach, a lender could overcome the presumption of unaffordability by finding that the reason the consumer was seeking a new covered short-term loan was as a result of an emergency car repair or furnace replacement or an unusual medical expense during the term of the prior loan or the reborrowing period, so long as the expense is not reasonably likely to recur during the period of the new loan. The Bureau considered including such circumstances as an additional example of sufficient improvement in financial capacity, as described with regard to proposed § 1041.6(e) below.

While such an addition could provide more flexibility to lenders and to consumers to overcome the presumptions of unaffordability, an unusual and non-recurring expense test would also present several challenges. To effectuate this test, the Bureau would need to define, in ways that lenders could implement, what would be a qualifying "unusual and non-recurring expense," a means of assessing whether a new loan was attributable to such an expense rather than to the unaffordability of the prior loan, and standards for how such an unusual and non-recurring expense could be documented (e.g., through transaction records). Such a test would have substantial implications for the way in which the ability-to-repay requirements in proposed § 1041.5 (and proposed § 1041.9 for covered longer-term loans) address the standards for basic living expenses and accounting for potential volatility over the term of a loan. Most

significantly, the Bureau is concerned that if a lender were permitted to overcome the presumption of unaffordability by finding that the consumer faced an unusual and non-recurring expense during repayment of the prior or outstanding loan, this justification would be invoked in cases in which the earlier loan had, in fact, been unaffordable. As discussed above, the fact that a consumer may cite a particular expense shock when seeking to reborrow does not necessarily mean that a recent prior loan was affordable; if a consumer, in fact, lacked the ability to repay the prior loan, it would be a substantial factor in why the consumer could not absorb the expense. Accordingly, the Bureau believes that it may be difficult to parse out causation and to differentiate between types of expense shocks and the reasonableness of lenders' ability-to-repay determinations where such shocks are asserted to have occurred.

In light of these competing considerations, the Bureau has chosen to propose the approach of supplementing the proposed § 1041.5 determination with formal presumptions. The Bureau is, however, broadly seeking comment on alternative approaches to addressing the issue of repeat borrowing in a more flexible manner, including the alternatives described above and on any other framework for assessing consumers' borrowing history as part of an overall determination of ability to repay. The Bureau specifically seeks comment on whether to apply a presumption of unaffordability or mandatory cooling-off period based on the total number of loans that a consumer has obtained or the total amount of time in which a consumer has been in debt during a specified period of time. The Bureau also solicits comment on the alternative of defining indicia of unaffordability, as described above. For such alternatives, the Bureau solicits comment on the appropriate time periods and on the manner in which such frameworks would address reborrowing on loans of different lengths. In addition, the Bureau specifically seeks comment on whether to permit lenders to overcome a presumption of unaffordability by finding that the consumer had experienced an unusual and non-recurring expense and, if so, on measures to address the challenges described above.

Legal Authority

As discussed in the section-by-section analysis of proposed § 1041.4 above, the Bureau believes that it may be an unfair and abusive practice to make a covered

short-term loan without determining that the consumer will have the ability to repay the loan. Accordingly, in order to prevent that unfair and abusive practice, proposed § 1041.5 would require lenders prior to making a covered short-term loan—other than a loan made under the conditional exemption to the ability-to-repay requirements in proposed § 1041.7—to make a reasonable determination that the consumer has sufficient income after meeting major financial obligations, to make payments under a prospective covered short-term loan and to continue meeting basic living expenses. Proposed § 1041.6 would augment the basic ability-to-repay determination required by proposed § 1041.5 in circumstances in which the consumer's recent borrowing history or current difficulty repaying an outstanding loan provides important evidence with respect to the consumer's financial capacity to afford a new covered short-term loan. The Bureau is proposing § 1041.6 based on the same source of authority that serves as the basis for proposed § 1041.5: The Bureau's authority under section 1031(b) of the Dodd-Frank Act, which provides that the Bureau's rules may include requirements for the purposes of preventing unfair, deceptive, or abusive acts or practices.⁵⁶⁹

As with proposed § 1041.5, the Bureau proposes the requirements in § 1041.6 to prevent the unfair and abusive practice identified in proposed § 1041.4, and the consumer injury that results from it. The Bureau believes that the additional requirements of proposed § 1041.6 may be needed in circumstances in which proposed § 1041.5 alone may not be sufficient to prevent a lender from making a covered short-term loan that would exacerbate the impact of an initial unaffordable loan. Accordingly, the Bureau believes that the requirements set forth in proposed § 1041.6 bear a reasonable relation to preventing the unfair and abusive practice identified in proposed § 1041.4. In addition, as further discussed in the section-by-section analysis of proposed § 1041.6(h), the Bureau proposes that provision pursuant to both the Bureau's authority under section 1031(b) of the Dodd-Frank Act and the Bureau's authority under section 1022(b)(1) of the Dodd-Frank Act to prevent evasions of the purposes and objectives of Federal consumer financial laws, including Bureau rules issued pursuant to rulemaking authority provided by Title X of the Dodd-Frank Act.⁵⁷⁰

6(a) Additional Limitations on Making a Covered Short-Term Loan Under § 1041.5

Proposed § 1041.6(a) would set forth the general additional limitations on making a covered short-term loan under proposed § 1041.5. Proposed § 1041.6(a) would provide that when a consumer is presumed not to have the ability to repay a covered short-term loan under proposed § 1041.6(b), (c), or (d), a lender's determination that the consumer will have the ability to repay the loan is not reasonable, unless the lender can overcome the presumption of unaffordability. Proposed § 1041.6(a) would further provide that a lender is prohibited from making a covered short-term loan to a consumer if the mandatory cooling-off periods in proposed § 1041.6(f) or (g) apply. In order to determine whether the presumptions and prohibitions in proposed § 1041.6 apply to a particular transaction, proposed § 1041.6(a)(2) would require a lender to obtain and review information about the consumer's borrowing history from its own records, the records of its affiliates, and a consumer report from an information system currently registered under proposed § 1041.17(c)(2) or (d)(2), if one is available.

The Bureau notes that, as drafted, the proposed presumptions and prohibitions in § 1041.6 would apply only to making specific additional covered short-term loans. The Bureau solicits comment on whether a presumption of unaffordability, mandatory cooling-off periods, or other additional limitations on lending also would be appropriate for transactions involving an increase in the credit available under an existing covered loan, making an advance on a line of credit under a covered short-term loan, or other circumstances that may evidence repeated borrowing. If such limitations would be appropriate, the Bureau requests comment on how they should be tailored in light of relevant considerations.

In this regard, the Bureau further notes that the presumptions of unaffordability depend on the definition of outstanding loan in proposed § 1041.2(a)(15) and therefore would not cover circumstances in which the consumer is more than 180 days delinquent on the prior loan. The Bureau solicits comment on whether additional requirements should apply to the ability-to-repay determination for a covered short-term loan in these circumstances; for instance, whether to generally prohibit lenders from making a new covered short-term loan to a

consumer for the purposes of satisfying a delinquent obligation on an existing loan with the same lender or its affiliate. In addition, the Bureau solicits comment on whether additional requirements should apply to covered short-term loans that are lines of credit; for instance, whether a presumption of unaffordability should apply at the time of the ability-to-repay determination required under § 1041.5(b)(1)(ii) for a consumer to obtain an advance under a line of credit more than 180 days after the date of a prior ability-to-repay determination.

The Bureau also solicits comment on the proposed standard in § 1041.6(a) and on any alternative approaches to the relationship between proposed § 1041.5 and proposed § 1041.6 that would prevent consumer harm while reducing the burden on lenders. In particular, the Bureau solicits comment on whether the formal presumption and prohibition approach in § 1041.6 is an appropriate supplement to the § 1041.5 determination.

6(a)(1) General

Proposed § 1041.6(a)(1) would provide that if a presumption of unaffordability applies, a lender's determination that the consumer will have the ability to repay a covered short-term loan is not reasonable unless the lender makes the additional determination set forth in proposed § 1041.6(e), and discussed in detail below, and the requirements set forth in proposed § 1041.5 are satisfied. Under proposed § 1041.6(e), a lender can make a covered short-term loan notwithstanding the presumption of unaffordability if the lender reasonably determines, based on reliable evidence, that there will be sufficient improvement in the consumer's financial capacity such that the consumer would have the ability to repay the new loan according to its terms despite the unaffordability of the prior loan. Proposed § 1041.6(a)(1) would further provide that a lender must not make a covered short-term loan under proposed § 1041.5 to a consumer during the mandatory cooling-off periods specified in proposed § 1041.6(f) and (g).

Proposed comment 6(a)(1)-1 clarifies that the presumptions and prohibitions would apply to making a covered short-term loan and are triggered, if applicable, at the time of consummation of the new covered short-term loan. Proposed comment 6(a)(1)-2 clarifies that the presumptions and prohibitions would apply to rollovers and renewals of a covered short-term loan when such transactions are permitted under State

⁵⁶⁹ 12 U.S.C. 5531(b).

⁵⁷⁰ 12 U.S.C. 5512(b)(1).

law. Proposed comment 6(a)(1)-3 clarifies that a lender's determination that a consumer will have the ability to repay a covered short-term loan is not reasonable within the meaning of proposed § 1041.5 if under proposed § 1041.6 the consumer is presumed to not have the ability to repay the loan and that presumption of unaffordability has not been overcome in the manner set forth in proposed § 1041.6(e). Thus, if proposed § 1041.6 prohibits a lender from making a covered short-term loan, then the lender must not make the loan, regardless of the lender's determination under proposed § 1041.5. Nothing in proposed § 1041.6 would displace the requirements of § 1041.5; on the contrary, the determination under proposed § 1041.6 would be, in effect, an additional component of the proposed § 1041.5 determination of ability to repay in situations in which the basic requirements of proposed § 1041.5 alone would be insufficient to prevent the unfair and abusive practice.

6(a)(2) Borrowing History Review

Proposed § 1041.6(a)(2) would require a lender to obtain and review information about a consumer's borrowing history from the records of the lender and its affiliates, and from a consumer report obtained from an information system currently registered pursuant to § 1041.17(c)(2) or (d)(2), if available, and to use this information to determine a potential loan's compliance with the requirements of proposed § 1041.6. Proposed comment 6(a)(2)-1 clarifies that a lender satisfies its obligation under § 1041.6(a)(2) to obtain a consumer report obtained from an information system currently registered pursuant to § 1041.17(c)(2) or (d)(2), if available, when it complies with the requirement in § 1041.5(c)(3)(ii)(B) to obtain this same consumer report. Proposed comment 6(a)(2)-2 clarifies that if no information systems currently registered pursuant to § 1041.17(c)(2) or (d)(2) are currently available, the lender is nonetheless required to obtain information about a consumer's borrowing history from the records of the lender and its affiliates.

Based on outreach to lenders, including feedback from SERs, the Bureau believes that lenders already generally review their own records for information about a consumer's history with the lender prior to making a new loan to the consumer. The Bureau understands that some lenders in the market for covered short-term loans also pull a consumer report from a specialty consumer reporting agency as part of standardized application screening,

though practices in this regard vary widely across the market.

As detailed below in the section-by-section analysis of proposed §§ 1041.16 and 1041.17, the Bureau believes that information regarding the consumer's borrowing history is important to facilitate reliable ability-to-repay determinations. If the consumer already has a relationship with a lender or its affiliates, the lender can obtain some historical information regarding borrowing history from its own records. However, without obtaining a report from an information system currently registered pursuant to § 1041.17(c)(2) or (d)(2), the lender will not know if its existing customers or new customers have obtained covered short-term loans or a prior covered longer-term balloon-payment loan from other lenders, as such information generally is not available in national consumer reports. Accordingly, the Bureau is proposing in § 1041.6(a)(2) to require lenders to obtain a report from an information system currently registered pursuant to § 1041.17(c)(2) or (d)(2), if one is available.

The section-by-section analysis of proposed § 1041.16 and 1041.17, and part VI below explain the Bureau's attempts to minimize burden in connection with furnishing information to and obtaining a consumer report from an information system currently registered pursuant to proposed § 1041.17(c)(2) or (d)(2). Specifically, the Bureau estimates that each report would cost approximately \$0.50. Consistent with the recommendations of the Small Business Review Panel Report, the Bureau requests comment on the cost to small entities of obtaining information about consumer borrowing history and on potential ways to further reduce the operational burden of obtaining this information.

6(b) Presumption of Unaffordability for Sequence of Covered Short-Term Loans Made Under § 1041.5

6(b)(1) Presumption

Proposed § 1041.6(b)(1) would provide that a consumer is presumed not to have the ability to repay a covered short-term loan under proposed § 1041.5 during the time period in which the consumer has a covered short-term loan made under proposed § 1041.5 outstanding and for 30 days thereafter. Proposed comment 6(b)(1)-1 clarifies that a lender cannot make a covered short-term loan under § 1041.5 during the time period in which the consumer has a covered short-term loan made under § 1041.5 outstanding and for 30 days thereafter unless the

exception to the presumption applies or the lender can overcome the presumption. A lender would be permitted to overcome the presumption of unaffordability in accordance with proposed § 1041.6(e) for the second and third loan in a sequence, as defined in proposed § 1041.2(a)(12); as noted in proposed comment 6(b)(1)-1, prior to the fourth covered short-term loan in a sequence, proposed § 1041.6(f) would impose a mandatory cooling-off period, as discussed further below.

Proposed § 1041.6(b)(1) would apply to situations in which, notwithstanding a lender's determination prior to consummating an earlier covered short-term loan that the consumer would have the ability to repay the loan according to its terms, the consumer seeks to take out a new covered short-term loan during the term of the prior loan or within 30 days thereafter.

As discussed above in the background to the section-by-section analysis of § 1041.6, the Bureau believes that when a consumer seeks to take out a new covered short-term loan during the term of or within 30 days of having a prior covered short-term loan outstanding, there is substantial reason for concern that the need to reborrow is caused by the unaffordability of the prior loan. The Bureau proposes to use the 30-day reborrowing period discussed above to define the circumstances in which a new loan would be considered a reborrowing. The Bureau believes that even in cases where the determination of ability to repay was reasonable based upon what was known at the time that the prior loan was originated, the fact that the consumer is seeking to reborrow in these circumstances is relevant in assessing whether a new and similar loan—or rollover or renewal of the existing loan—would be affordable for the consumer. For example, the reborrowing may indicate that the consumer's actual basic living expenses exceed what the lender projected for the purposes of § 1041.5 for the prior loan. In short, the Bureau believes that when a consumer seeks to take out a new covered short-term loan that would be part of a loan sequence, there is substantial reason to conduct a particularly careful review to determine whether the consumer can afford to repay the new covered short-term loan.

In addition, the fact that the consumer is seeking to reborrow in these circumstances may indicate that the initial determination of affordability was unreasonable when made. Indeed, the Bureau believes that if, with respect to a particular lender making covered short-term loans pursuant to proposed § 1041.5, a substantial percentage of

consumers returned within 30 days to obtain a second loan, that fact would provide evidence that the lender's determinations under proposed § 1041.5 were not reasonable. And this would be even more so the case where a substantial percentage of consumers returned within 30 days of the second loan to obtain a third loan.

Given these considerations, to prevent the unfair and abusive practice identified in proposed § 1041.4, proposed § 1041.6(b) would create a presumption of unaffordability for a covered short-term loan during the time period in which the consumer has a covered short-term loan made under § 1041.5 outstanding and for 30 days thereafter unless the exception in proposed § 1041.6(b)(2) applies. As a result of this presumption, it would not be reasonable for a lender to determine that the consumer will have the ability to repay the new covered short-term loan without taking into account the fact that the consumer did need to reborrow after obtaining a prior loan and making a reasonable determination that the consumer will be able to repay the new covered short-term loan without reborrowing. Proposed § 1041.6(e), discussed below, defines the elements for such a determination.

The Bureau solicits comment on the appropriateness of the proposed presumption to prevent the unfair and abusive practice and on any alternatives that would adequately prevent consumer harm while reducing the burden on lenders. In particular, the Bureau solicits comment on alternative approaches to preventing consumer harm from repeat borrowing on covered short-term loans, including other methods of supplementing the basic ability-to-repay determination required for a covered short-term loan shortly following a prior covered short-term loan.

The Bureau also solicits comment on whether there are other circumstances—such as a pattern of heavy usage of covered short-term loans that would not meet the proposed definition of a loan sequence or the overall length of time in which a consumer is in debt on covered short-term loans over a specified period of time—that would also warrant a presumption of unaffordability.

6(b)(2) Exception

Proposed § 1041.6(b)(2) would provide an exception to the presumption in proposed § 1041.6(b)(1) where the subsequent covered short-term loan would meet specific conditions. The conditions under either proposed § 1041.6(b)(2)(i)(A) or (B) must be met, along with the condition under

proposed § 1041.6(b)(2)(ii). First, under proposed § 1041.6(b)(2)(i)(A), the consumer must have paid the prior covered short-term loan in full and the amount that would be owed by the consumer for the new covered short-term loan could not exceed 50 percent of the amount that the consumer paid on the prior loan. Second, under proposed § 1041.6(b)(2)(i)(B), in the event of a rollover the consumer would not owe more on the new covered short-term loan (*i.e.*, the rollover) than the consumer paid on the prior covered short-term loan (*i.e.*, the outstanding loan that is being rolled over). Third, under proposed § 1041.6(b)(2)(ii), the new covered short-term loan would have to be repayable over a period that is at least as long as the period over which the consumer made payment or payments on the prior loan. Proposed comment 6(b)(2)-1 provides general clarification for the proposed provision.

The rationale for the presumption defined in proposed § 1041.6(b)(1) is generally that the consumer's need to reborrow in the specified circumstances evidences the unaffordability of the prior loan and thus warrants a presumption that the new loan will likewise be unaffordable for the consumer.

But when a consumer is seeking to reborrow no more than half of the amount that the consumer has already paid on the prior loan, including situations in which the consumer is seeking to roll over no more than the amount the consumer repays, the Bureau believes that the predicate for the presumption may no longer apply. For example, if a consumer paid off a prior \$400, 45-day duration loan and later returns within 30 days to request a new \$100, 45-day duration loan, the lender may be able to reasonably infer that such second \$100 loan would be affordable for the consumer, even if a second \$400 loan would not be. Given that result, assuming that the lender satisfies the requirements of proposed § 1041.5, the lender may be able to reasonably infer that the consumer will have the ability to repay the new loan for \$100. Thus, the Bureau believes that an exception to the presumption of unaffordability may be appropriate in this situation.

However, this is not the case when the amount owed on the new loan would be greater than 50 percent of the amount paid on the prior loan, the consumer would roll over an amount greater than he or she repays, or the term of the new loan would be shorter than the term of the prior loan. For example, if the consumer owes \$450 on a covered short-term loan, pays only

\$100 and seeks to roll over the remaining \$350, this result would not support an inference that the consumer will have the ability to repay \$350 for the new loan. Accordingly, the new loan would be subject to the presumption of unaffordability. Similarly, with the earlier example, the lender could not infer based on the payment of \$400 over 45 days that a consumer could afford \$200 in one week. Rather, the Bureau believes that it would be appropriate in such circumstances for the lender to go through the process to overcome the presumption in the manner set forth in proposed § 1041.6(e).

On the basis of the preceding considerations, the Bureau is proposing this exception to the presumption in proposed § 1041.6(b). The Bureau's rationale is the same for the circumstances in both proposed § 1041.6(b)(2)(i)(A) and (B); as explained below, the formula is slightly modified in order to account for the particular nature of the rollover transaction when permitted under applicable State law (termed a renewal in some States).

The Bureau solicits comment on the appropriateness of the proposed exception to the presumption of unaffordability and on any other circumstances that would also warrant an exception to the presumption. In particular, the Bureau solicits comment on the specific thresholds in proposed § 1041.6(b)(2)(i)(A) and (B). In addition, the Bureau solicits comment on the timing requirement in proposed § 1041.6(b)(2)(ii) and whether alternative formulations of the timing requirement would be appropriate; for instance, whether an exception should be available if the new covered short-term loan would be repayable over a period that is proportional to the prior payment history.

6(b)(2)(i)(A)

Proposed § 1041.6(b)(2)(i)(A) would set out the formula for transactions in which the consumer has paid off the prior loan in full and is then returning for a new covered short-term loan during the reborrowing period. Proposed § 1041.6(b)(2)(i)(A) would define paid in full to include the amount financed, charges included in the total cost of credit, and charges excluded from the total cost of credit such as late fees. Proposed § 1041.6(b)(2)(i)(A) would further specify that to be eligible for the exception, the consumer would not owe, in connection with the new covered short-term loan, more than 50 percent of the amount that the consumer paid on the prior covered short-term loan (including the amount financed

and charges included in the total cost of credit, but excluding any charges excluded from the total cost of credit such as late fees). Proposed comment 6(b)(2)(i)(A)-1 clarifies that a loan is considered paid in full whether or not the consumer's obligations were satisfied timely under the loan contract and also clarifies how late fees are treated for purposes of the exception requirements. Proposed comment 6(b)(2)(i)(A)-2 provides illustrative examples. The Bureau solicits comment on whether a consumer should be eligible for the exception under proposed § 1041.6(b)(2)(i)(A) when the prior loan was paid in full but the consumer had previously triggered late fees or otherwise was delinquent on payments for the prior loan, as such history of late payments could be a relevant consideration toward whether the consumer has the ability to repay a similarly-structured loan.

6(b)(2)(i)(B)

Proposed § 1041.6(b)(2)(i)(B) would set out the formula for transactions in which the consumer provides partial payment on a covered short-term loan and is seeking to roll over the remaining balance into a new covered short-term loan. Proposed § 1041.6(b)(2)(i)(B) would specify that to be eligible for the exception, the consumer would not owe more on the new covered short-term loan than the consumer paid on the prior covered short-term loan that is being rolled over (including the amount financed and charges included in the total cost of credit, but excluding any charges that are excluded from the total cost of credit such as late fees). Proposed comment 6(b)(2)(i)(B)-1 clarifies that rollovers are subject to applicable State law (sometimes called renewals) and cross-references proposed comment 6(a)(1)-2. Proposed comment 6(b)(2)(i)(B)-1 also clarifies that the prior covered short-term loan is the outstanding loan being rolled over, the new covered short-term loan is the rollover, and that for the conditions of § 1041.6(b)(2)(i)(B) to be satisfied, the consumer will repay at least 50 percent of the amount owed on the loan being rolled over. Proposed comment 6(b)(2)(i)(B)-2 provides an illustrative example.

As discussed above with regard to the reborrowing period, the Bureau considers rollovers and other forms of reborrowing within 30 days of the prior loan outstanding to be the same. Given the particular nature of the rollover transaction when permitted by State law, slightly different calculations are needed for the exception to effectuate this equal treatment.

6(b)(2)(ii)

Proposed § 1041.6(b)(2)(ii) would set forth the condition that the new covered short-term loan be repayable over a period that is at least as long as the period over which the consumer made payment or payments on the prior covered short-term loan. The Bureau believes that both the amount of the new loan and the duration of the new loan relative to the prior loan are important to determining whether there is a risk that the second loan would be unaffordable and thus whether a presumption should be applied. Absent this condition, situations could arise in which the 50 percent condition were satisfied but where the Bureau would still have concern about not applying the presumption. As noted above, from the fact that the consumer paid in full a \$450 loan with a term of 45 days, it does not follow that the consumer can afford a \$200 loan with a term of one week, even though \$200 is less than 50 percent of \$450. In that instance, the consumer would owe \$200 in only a week, which may be very difficult to repay.

6(c) Presumption of Unaffordability for a Covered Short-Term Loan Following a Covered Longer-Term Balloon-Payment Loan Made Under § 1041.9

Proposed § 1041.6(c) would provide that a consumer is presumed not to have the ability to repay a covered short-term loan under proposed § 1041.5 during the time period in which the consumer has a covered longer-term balloon-payment loan made under proposed § 1041.9 outstanding and for 30 days thereafter. The presumption in proposed § 1041.6(c) uses the same 30-day reborrowing period used in proposed § 1041.6(b) and discussed in the background to the section-by-section analysis of § 1041.6 to define when there is sufficient risk that the need for the new loan was triggered by the unaffordability of the prior loan and, as a result, warrants a presumption that the new loan would be unaffordable.

The Bureau believes that when a consumer seeks to take out a new covered short-term loan that would be part of a loan sequence, there is substantial reason for concern that the need to reborrow is being triggered by the unaffordability of the prior loan. Similarly, covered longer-term balloon-payment loans, by definition, require a large portion of the loan to be paid at one time. As discussed below in Market Concerns—Longer-Term Loans, the Bureau's research suggests that the fact that a consumer seeks to take out another covered longer-term balloon-

payment loan shortly after having a previous covered longer-term balloon-payment loan outstanding will frequently indicate that the consumer did not have the ability to repay the prior loan and meet the consumer's other major financial obligations and basic living expenses. The Bureau found that the approach of the balloon payment coming due is associated with significant reborrowing.⁵⁷¹ However, the need to reborrow caused by an unaffordable covered longer-term balloon is not necessarily limited to taking out a new loan of the same type. If the borrower takes out a new covered short-term loan in such circumstances, it also is a reborrowing. Accordingly, in order to prevent the unfair and abusive practice identified in proposed § 1041.4, the Bureau proposes a presumption of unaffordability for a covered short-term loan that would be concurrent with or shortly following a covered longer-term balloon-payment loan.

Unlike the presumption in § 1041.6(b), the Bureau does not propose an exception to the presumption based on the amount to be repaid on each loan. The rationale for that exception relies on the consumer repaying the new covered short-term loan over a period of time that is at least as long as the time that the consumer repaid the prior covered short-term loan. By definition, a covered longer-term balloon-payment loan has a longer duration than a covered short-term loan, so the circumstances for which the Bureau believes an exception is appropriate in § 1041.6(b)(2) would not be applicable to the transactions governed by proposed § 1041.6(c).

The Bureau solicits comment on the appropriateness of the proposed presumption to prevent the unfair and abusive practice and on any alternatives that would adequately prevent consumer harm while reducing the burden on lenders. The Bureau also solicits comment on whether proposed § 1041.6(c) and the provisions of proposed § 1041.6 more generally would adequately protect against the potential for lenders to make covered loans of different lengths (e.g., a covered short-term loan immediately followed by a 46-day covered longer-term balloon-payment loan) in order to avoid operation of the presumptions and prohibitions in proposed § 1041.6, and

⁵⁷¹ CFPB Report on Supplemental Findings, at ch. 1. The findings in the CFPB Report on Supplemental Findings refer to both "refinancing" and "reborrowing." Consistent with the Bureau's approach to defining reborrowing for the purposes of this proposal, both refinancing and reborrowing, as reported in the CFPB Report on Supplemental Findings, are considered reborrowing.

whether the Bureau should impose any additional lending restrictions to address this concern. Relatedly, the Bureau seeks comment on whether to impose a tolling requirement similar to that under proposed § 1041.6(h) that would apply where the lender or its affiliate are making, in close proximity, covered short-term loans and covered longer-term balloon-payment loans with a duration of 90 days or fewer. Further, the Bureau requests comment on whether additional provisions or commentary examples should be added to proposed § 1041.19, which would prohibit lender actions taken with the intent of evading the proposed rule, to address such concerns.

6(d) Presumption of Unaffordability for a Covered Short-Term Loan During an Unaffordable Outstanding Loan

While the Bureau's research suggests that reborrowing harms are most acute when consumers take out a series of covered short-term loans or covered longer-term balloon-payment loans, the Bureau also has concerns about other reborrowing scenarios. In particular, no matter the loan types involved, the Bureau is concerned about the potential for abuse when a lender or its affiliate offers to make a new loan to an existing customer in circumstances that suggest that the consumer may lack the ability to repay an outstanding loan. The Bureau believes that in addition to the robust residual income analysis that would be required by proposed § 1041.5, applying a presumption may be appropriate in order to specify in more detail how lenders should evaluate whether such consumers have the ability to repay a new loan in certain situations.

Accordingly, the Bureau is proposing to apply a presumption of unaffordability when a lender or its affiliate seeks to make a covered short-term loan to an existing consumer in which there are indicia that the consumer cannot afford an outstanding loan with that same lender or its affiliate. If the outstanding loan does not trigger the presumption of unaffordability in proposed § 1041.6(b) or (c) and is not subject to the prohibitions in § 1041.6(f) or (g), the presumption in proposed § 1041.6(d) would apply to a new covered short-term loan if, at the time of the lender's determination under § 1041.5, one or more of the indicia of unaffordability are present.

The triggering conditions would include a delinquency of more than seven days within the preceding 30 days, expressions by the consumer within the preceding 30 days that he or

she cannot afford the outstanding loan, certain circumstances indicating that the new loan is motivated by a desire to skip one or more payments on the outstanding loan, and certain circumstances indicating that the new loan is solely to obtain cash to cover upcoming payment or payments on the outstanding loan.

Unlike the presumptions applicable to covered longer-term loans in proposed § 1041.10(c), proposed § 1041.6(d) would not provide an exception to the presumption for cases in which the new loan would result in substantially smaller payments or would substantially lower the total cost of credit for the consumer relative to the outstanding loan. This distinction reflects the Bureau's concerns discussed in Market Concerns—Short-Term Loans about the unique risk of consumer injury posed by covered short-term loans because of the requirement that a covered short-term loan be repaid shortly after consummation.

The proposed regulatory text and commentary are very similar for § 1041.6(d) and for § 1041.10(c)(1): The main difference is that proposed § 1041.6(d) would apply where the new loan would be a covered short-term loan, whereas proposed § 1041.10(c)(1) would apply where the new loan would be a covered longer-term loan. A detailed explanation of each element of the presumption and of related commentary is provided below in the section-by-section analysis of proposed § 1041.10(c)(1); because of the similarity between the sections, the discussion is not repeated in this section-by-section analysis.

The Bureau believes that the analysis required by proposed § 1041.6(d) may provide greater protection to consumers and certainty to lenders than simply requiring that such transactions be analyzed under proposed § 1041.5 alone. Proposed § 1041.5 would require generally that the lender make a reasonable determination that the consumer will have the ability to repay the contemplated covered short-term loan, taking into account existing major financial obligations that would include the outstanding loan from the same lender or its affiliate. However, the presumption in proposed § 1041.6(d) would provide a more detailed roadmap as to when a new covered short-term loan would not meet the reasonable determination test.

The Bureau solicits comment on the appropriateness of the proposed presumption to prevent the unfair and abusive practice, on each of the particular circumstances indicating unaffordability as proposed in

§ 1041.6(d)(1) through (4), and on any alternatives that would adequately prevent consumer harm while reducing the burden on lenders. The Bureau also solicits comment on whether the specified conditions sufficiently capture circumstances in which consumers indicate distress in repaying an outstanding loan and on whether there are additional circumstances in which it may be appropriate to trigger the presumption of unaffordability. In particular, the Bureau solicits comment on whether to include a specific presumption of unaffordability in the event that the lender or its affiliate has recently contacted the consumer for collections purposes, received a returned check or payment attempt, or has an indication that the consumer's account lacks funds prior to making an attempt to collect payment. The Bureau also solicits comment on the timing elements of the proposed indications of unaffordability, such as whether to trigger the presumption after seven days of delinquency and whether to consider the prior 30 days, and on whether alternative timing conditions, such as considering the consumer's performance over the prior 60 days, would better prevent consumer harm. In addition, the Bureau solicits comment on whether the presumption should be modified in particular ways with regard to covered short-term loans that would not be appropriate for covered longer-term loans.

6(e) Overcoming the Presumption of Unaffordability

Proposed § 1041.6(e) would set forth the elements required for a lender to overcome the presumptions of unaffordability in proposed § 1041.6(b), (c), or (d). Proposed § 1041.6(e) would provide that a lender can overcome the presumption of unaffordability only if the lender reasonably determines, based on reliable evidence, that the consumer will have sufficient improvement in financial capacity such that the consumer will have the ability to repay the new loan according to its terms despite the unaffordability of the prior loan. Proposed § 1041.6(e) would require lenders to assess sufficient improvement in financial capacity by comparing the consumer's financial capacity during the period for which the lender is required to make an ability-to-repay determination for the new loan pursuant to § 1041.5(b)(2) to the consumer's financial capacity since obtaining the prior loan or, if the prior loan was not a covered short-term loan or covered longer-term balloon-payment loan, during the 30 days prior to the lender's determination.

The Bureau proposes several comments to clarify the requirements for a lender to overcome a presumption of unaffordability. Proposed comment 6(e)-1 clarifies that proposed § 1041.6(e) would permit the lender to overcome the presumption in limited circumstances evidencing a sufficient improvement in the consumer's financial capacity for the new loan relative to the prior loan or, in some circumstances, during the prior 30 days. Proposed comments 6(e)-2 and -3 provide illustrative examples of these circumstances. Proposed comment 6(e)-2 clarifies that a lender may overcome a presumption of unaffordability where there is reliable evidence that the need to reborrow is prompted by a decline in income since obtaining the prior loan (or, if the prior loan was not a covered short-term loan or covered longer-term balloon-payment loan, during the 30 days prior to the lender's determination) that is not reasonably expected to recur for the period during which the lender is underwriting the new covered short-term loan. Proposed comment 6(e)-3 clarifies that a lender may overcome a presumption of unaffordability where there is reliable evidence that the consumer's financial capacity has sufficiently improved since the prior loan (or, if the prior loan was not a covered short-term loan or covered longer-term balloon-payment loan, during the 30 days prior to the lender's determination) because of an increase in net income or a decrease in major financial obligations for the period during which the lender is underwriting the new covered short-term loan. Proposed comment 6(e)-4 clarifies that reliable evidence consists of verification evidence regarding the consumer's net income and major financial obligations sufficient to make the comparison required under § 1041.6(e). Proposed comment 6(e)-4 further clarifies that a self-certification by the consumer does not constitute reliable evidence unless the lender verifies the facts certified by the consumer through other reliable means.

With respect to comment 6(e)-2, the Bureau believes that if the reborrowing is prompted by a decline in income since obtaining the prior loan (or during the prior 30 days, as applicable) that is not reasonably expected to recur during the period for which the lender is underwriting the new covered short-term loan, the unaffordability of the prior loan, including difficulty repaying an outstanding loan, may not be probative as to the consumer's ability to repay a new covered short-term loan. Similarly, with respect to comment 6(e)-

3, the Bureau believes that permitting a lender to overcome the presumption of unaffordability in these circumstances would be appropriate because an increase in the consumer's expected net income or decrease in the consumer's expected payments on major financial obligations since obtaining the prior loan may materially impact the consumer's financial capacity such that a prior unaffordable loan, including difficulty repaying an outstanding loan, may not be probative as to the consumer's ability to repay a new covered short-term loan. The Bureau notes, however, that if, with respect to any given lender, a substantial percentage of consumers who obtain a loan pursuant to proposed § 1041.5 return for a new loan during the reborrowing period, that pattern may provide persuasive evidence that the lender's determinations to make initial loans were not consistent with the ability-to-repay determinations under proposed § 1041.5. As discussed above, the presumptions in proposed § 1041.6 supplement the basic ability-to-repay requirements in proposed § 1041.5 in certain circumstances where a consumer's recent borrowing indicates that a consumer would not have the ability to repay a new covered short-term loan. Accordingly, the procedure in proposed § 1041.6(e) for overcoming the presumption of unaffordability would address only the presumption; lenders would still need to determine ability to repay in accordance with proposed § 1041.5 before making the new covered short-term loan.

Under proposed § 1041.6(e), the same requirement would apply with respect to both the second and third covered short-term loan in a sequence subject to the presumption in proposed § 1041.6(b). However, the Bureau expects that if, with respect to any given lender, a substantial percentage of consumers who obtain a second loan in a sequence return for a third loan, that pattern may provide persuasive evidence that the lender's determinations to make second loans notwithstanding the presumption were not consistent with proposed § 1041.6(e) and the ability-to-repay determinations were not reasonable under proposed § 1041.5. The Bureau further expects that even when a lender determines that the presumption of unaffordability can be overcome pursuant to proposed § 1041.6(e) for the second loan in a sequence, it will be a relatively unusual case in which the consumer will encounter multiple rounds of unexpected income or major financial obligation disruptions such that the

lender will be able to reasonably determine that the consumer will have the ability to repay a third covered short-term loan notwithstanding the consumer's need to reborrow after each of the prior loans.

The Bureau recognizes that the standard in proposed § 1041.6(e) would permit a lender to overcome a presumption of unaffordability only in a narrow set of circumstances that are reflected in certain aspects of a consumer's financial capacity and can be verified through reliable evidence. As discussed above with regard to alternatives considered for proposed § 1041.6, the Bureau considered including an additional set of circumstances permitting lenders to overcome the presumptions of unaffordability in the event that the lender determined that the need to reborrow was prompted by an unusual and non-recurring expense rather than by the unaffordability of the prior loan. In light of the challenges with such an approach, described above, the Bureau elected instead to propose § 1041.6(e) without permitting an unusual and non-recurring expense to satisfy the conditions of the test. However, the Bureau solicits comment on including an unusual and non-recurring expense as a third circumstance in which lenders could overcome the presumptions of unaffordability.

The Bureau solicits comment on all aspects of the proposed standard for overcoming the presumptions of unaffordability. In particular, the Bureau solicits comment on the circumstances that would permit a lender to overcome a presumption of unaffordability; on whether other or additional circumstances should be included in the standard; and, if so, how to define such circumstances. In addition, the Bureau solicits comment on the appropriate time period for comparison of the consumer's financial capacity between the prior and prospective loans, including, specifically, the different requirements for prior loans of different types. The Bureau solicits comment on the types of information that lenders would be permitted to use as reliable evidence to make the determination in proposed § 1041.6(e).

The Bureau also solicits comment on any alternatives that would adequately prevent consumer injury while reducing the burden on lenders, including any additional circumstances that should be deemed sufficient to overcome a presumption of unaffordability. The Bureau also solicits comment on how to address unexpected and non-recurring increases in expenses, such as major

vehicle repairs or emergency appliance replacements, including on the alternative discussed above with regard to alternatives considered for proposed § 1041.6.

6(f) Prohibition on Loan Sequences of More Than Three Covered Short-Term Loans Made Under § 1041.5

Proposed § 1041.6(f) would prohibit lenders from making a covered short-term loan under proposed § 1041.5 to a consumer during the time period in which the consumer has a covered short-term loan made under proposed § 1041.5 outstanding and for 30 days thereafter if the new covered short-term loan would be the fourth loan in a sequence of covered short-term loans made under proposed § 1041.5.⁵⁷² Proposed comment 6(f)-1 clarifies that the prohibition in proposed § 1041.6(f) does not limit a lender's ability to make a covered longer-term loan under proposed § 1041.9, § 1041.11, or § 1041.12.

As discussed above, the ability-to-repay determination required by proposed § 1041.5 is intended to protect consumers from what the Bureau believes may be the unfair and abusive practice of making a covered short-term loan without making a reasonable determination of the consumer's ability to repay the loan. If a consumer who obtains such a loan seeks a second loan when, or shortly after, the payment on the first loan is due, that suggests that the prior loan payments were not affordable and triggered the new loan application, and that a new covered short-term loan will lead to the same result. The Bureau believes that if a consumer has obtained three covered short-term loans in quick succession and seeks to obtain yet another covered short-term loan when or shortly after payment on the last loan is due, the fourth loan will almost surely be unaffordable for the consumer.

The Bureau's research underscores the risk that consumers who reach the fourth loan in a sequence of covered short-term loans will wind up in a long cycle of debt. Most significantly, the Bureau found that 66 percent of loan sequences that reach a fourth loan end up having at least seven loans, and 47 percent of loan sequences that reach a fourth loan end up having at least 10

loans.⁵⁷³ For consumers paid weekly, bi-weekly, or semimonthly, 12 percent of loan sequences that reach a fourth loan end up having at least 20 loans during a 10-month period.⁵⁷⁴ And for loans taken out by consumers who are paid monthly, more than 40 percent of all loans to these borrowers were in sequences that, once begun, persisted for the rest of the year for which data were available.⁵⁷⁵

Further, the opportunity to overcome the presumption for the second and third loan in a sequence means that by the time that the mandatory cooling-off period in proposed § 1041.6(f) would apply, three prior ability-to-repay determinations will have proven inconsistent with the consumer's actual experience, including two determinations that the consumer had overcome the presumption of unaffordability. If the consumer continues reborrowing during the term of or shortly after repayment of each loan, the pattern suggests that the consumer's financial circumstances do not lend themselves to reliable determinations of ability to repay a covered short-term loan. After three loans in a sequence, the Bureau believes it would be all but impossible under the proposed framework for a lender to accurately determine that a fourth covered short-term loan in a sequence would be affordable for the consumer. The Bureau believes this is particularly the case because the presumption of unaffordability under proposed § 1041.6(b) would escalate the scrutiny for each subsequent loan in a three-loan sequence. The consumer keeps returning to reborrow in spite of a lender or lenders having determined on two prior occasions that the consumer's financial capacity had sufficiently improved to overcome the presumption of unaffordability, further evidencing a pattern of reborrowing that could spiral into a debt cycle.

In light of the data described above, the Bureau believes that by the time a consumer reaches the fourth loan in a sequence of covered short-term loans, the likelihood of the consumer returning for additional covered short-term loans within a short period of time warrants additional measures to mitigate the risk that the lender is not furthering a cycle of debt on unaffordable covered short-term loans. To prevent the unfair and abusive practice identified in proposed

§ 1041.4, the Bureau believes that it may be appropriate to impose a mandatory cooling-off period for 30 days following the third covered short-term loan in a sequence. Accordingly, proposed § 1041.6(f) would prohibit lenders from making a covered short-term loan under § 1041.5 during the time period in which the consumer has a covered short-term loan made under § 1041.5 outstanding and for 30 days thereafter if the new covered short-term loan would be the fourth loan in a sequence of covered short-term loans made under § 1041.5.

The Bureau believes that given the requirements set forth in proposed § 1041.5 to determine ability to repay before making an initial covered short-term loan (other than a loan made under the conditional exemption in proposed § 1041.7), and given the further requirements set forth in proposed § 1041.6(b) with respect to additional covered short-term loans in a sequence, few consumers will actually reach the point where they have obtained three covered short-term loans in a sequence and even fewer will reach that point and still need to reborrow. Such a three-loan sequence can occur only if the consumer turned out to not be able to afford a first loan, despite a lender's determination of ability to repay, and that the same occurred for the second and third loans as well, despite a second and third determination of ability to repay, including a determination that the presumption of unaffordability for the second loan and then the third loan could be overcome. However, to provide a backstop in the event that the consumer does obtain three covered short-term loans made under § 1041.5 within a short period of time proposed § 1041.6(f) would impose a prohibition on continued lending to protect consumers from further unaffordable loans. For consumers who reach that point, the Bureau believes that terminating a loan sequence after three loans may enable the consumer to escape from the cycle of indebtedness. At the same time, if any such consumers needed to continue to borrow, they could obtain a covered longer-term loan, provided that a lender reasonably determined that such a loan was within the consumer's ability to repay, pursuant to §§ 1041.9 and 1041.10, or a covered longer-term loan under either of the conditional exemptions in proposed §§ 1041.11 and 1041.12.

During the SBREFA process, the Bureau received substantial feedback about the proposal under consideration to impose a conclusive presumption of unaffordability following the third covered short-term loan in a sequence.

⁵⁷² Proposed § 1041.6(f) provides that it applies notwithstanding the presumption of unaffordability under proposed § 1041.6(b). If a covered short-term loan would be the fourth covered short-term loan in a sequence, then the prohibition in proposed § 1041.6(f) would apply, rather than the presumption under proposed § 1041.6(b).

⁵⁷³ Results calculated using data described in Chapter 5 of the CFPB Report on Supplemental Findings.

⁵⁷⁴ Results calculated using data described in Chapter 5 of the CFPB Report on Supplemental Findings.

⁵⁷⁵ CFPB Report on Supplemental Findings, at 32.

Most notably, many SERs provided feedback to the Bureau indicating that they rely heavily on consumers who regularly take out a chain of short-term loans and that the limit of three loans would cause a significant decrease in revenue and profit for their businesses. A study submitted by several of the SERs provides evidence to substantiate their claim. Similarly, as discussed further at Market Concerns—Short-Term Loans, the Bureau's examination of data obtained from larger lenders likewise indicates that a large percentage of the loan volume of payday lenders comes from consumers trapped in prolonged loan sequences.⁵⁷⁶

As explained with regard to proposed § 1041.6(b)(1) above, the Bureau believes that, even without the mandatory cooling-off period under proposed § 1041.6(f), there would be relatively few instances in which lenders could reasonably determine that a consumer had the ability to repay successive loans in a sequence. As discussed in part VI, the Bureau believes that the primary impact on loan volume and lender revenue from the ability-to-repay requirements would be the decline in initial covered short-term loans made under the ability-to-repay requirements. Moreover, the fact that the proposal would have such a disruptive impact on these lenders' current source of revenue does not, in the Bureau's view, detract from the appropriateness of these provisions to prevent the unfair and abusive practice that the Bureau has preliminarily identified. Indeed, the Bureau believes that the lenders' concern about the revenue impact of limiting extended cycles of reborrowing confirms the Bureau's reasons for believing that these provisions may be appropriate to prevent the unfair and abusive practice. The proposed cooling-off period would last 30 days for the same reason that the Bureau is using that time frame to draw the line as to when a new loan is likely the result of the unaffordability of the prior loan.

The Small Business Review Panel Report recommended that the Bureau request comment on whether permitting a sequence of more than three covered short-term loans would enable the Bureau to fulfill its stated objectives for the rulemaking while reducing the revenue impact on small entities. Conversely, during the SBREFA process and associated outreach following publication of the Small Business Review Panel Report, other stakeholders suggested that the mandatory cooling-off

period should apply in additional circumstances, such as based on a pattern of sustained usage of covered short-term loans or covered longer-term balloon-payment loans over a period of time, even if the usage pattern did not involve three-loan sequences.

The Bureau solicits comment on the necessity of the proposed prohibition and on any alternatives that would adequately prevent consumer harm while reducing the burden on lenders. In particular, the Bureau solicits comment on whether a presumption of unaffordability rather than a mandatory cooling-off period would be sufficient to prevent the targeted harms and, if so, whether such presumptions should be structured to match proposed § 1041.6(b) and (e), or should be tailored in some other way. Additionally, consistent with the Small Business Review Panel Report, the Bureau solicits comment on whether three loans is the appropriate threshold for the prohibition or whether permitting lenders to overcome the presumption of unaffordability for a greater number of loans before the mandatory cooling-off period would provide the intended consumer protection while mitigating the burden on lenders. The Bureau also solicits comment on whether the mandatory cooling-off period should extend for a period greater than 30 days or should apply in any other circumstances, such as based on the total number of covered short-term loans a consumer has obtained during a specified period of time or the number of days the consumer has been in debt during a specified period of time. Additionally, the Bureau solicits comment on whether there is a pattern of reborrowing on a mix of covered short-term loans and covered longer-term balloon-payment loans for which a mandatory cooling-off period would be appropriate and, if so, what refinements to the prohibition in proposed § 1041.6(f) would be appropriate for such an approach.

6(g) Prohibition on Making a Covered Short-Term Loan Under § 1041.5 Following a Covered Short-Term Loan Made Under § 1041.7

Proposed § 1041.6(g) would prohibit a lender from making a covered short-term loan under proposed § 1041.5 during the time period in which the consumer has a covered short-term loan made under proposed § 1041.7 outstanding and for 30 days thereafter. The proposed prohibition corresponds to the condition in proposed § 1041.7(c)(2) that would prohibit making a covered short-term loan under proposed § 1041.7 during the time

period in which the consumer has a covered short-term loan made under proposed § 1041.5 (or a covered longer-term balloon-payment loan made under proposed § 1041.9) outstanding and for 30 days thereafter. The Bureau is including this provision in proposed § 1041.6 for ease of reference for lenders so that they can look to a single provision of the rule for a list of prohibitions and presumptions that affect the making of covered short-term loans under proposed § 1041.5, but discusses the underlying rationale in additional detail in the section-by-section analysis for proposed § 1041.7(c)(2) below.

Proposed § 1041.7 sets forth numerous protective conditions for a covered short-term loan conditionally exempt from the ability-to-repay requirements of proposed §§ 1041.5 and 1041.6; these conditions are discussed in depth in connection with that section. As a parallel provision to proposed § 1041.7(c)(2), the Bureau proposes the prohibition in proposed § 1041.6(g) in order to prevent undermining the protections of proposed § 1041.7, most significantly, the principal reduction requirements of proposed § 1041.7(b)(1). As discussed with regard to that provision, the Bureau believes that the principal reduction requirements of proposed § 1041.7(b)(3) are an essential component of the proposed conditional exemption. Additionally, as discussed in the section-by-section analysis of proposed § 1041.7(c)(2), the Bureau believes that providing separate "paths" for making covered short-term loans under proposed § 1041.5 and proposed § 1041.7 would facilitate a more consistent framework for regulation in this market and make the rule simpler for both consumers and lenders.

The Bureau solicits comment on the necessity of the proposed prohibition and on any alternatives that would achieve the Bureau's objectives here while reducing the burden on lenders.

6(h) Determining Period Between Consecutive Covered Loans

Proposed § 1041.6(h) would define how a lender must determine the number of days between covered loans for the purposes of proposed § 1041.6(b), (c), (f), and (g). In particular, proposed § 1041.6(h) would specify that days on which a consumer had a non-covered bridge loan outstanding do not count toward the determination of time periods specified by proposed § 1041.6(b), (c), (f), and (g). Proposed comment 6(h)-1 clarifies that § 1041.6(h) would apply if the lender or its affiliate makes a non-covered bridge loan to a

⁵⁷⁶ CFPB Report on Supplemental Findings, at ch. 5.

consumer during the time period in which any covered short-term loan or covered longer-term balloon-payment loan made by a lender or its affiliate is outstanding and for 30 days thereafter. Proposed comment 6(h)-2 provides an example.

As discussed in more detail in the section-by-section of proposed § 1041.2(a)(13), defining non-covered bridge loan, the Bureau is concerned that there is some risk that lenders might seek to evade the proposed rule designed to prevent unfair and abusive practices by making certain types of loans that fall outside the scope of the proposed rule during the 30-day period following repayment of a covered short-term loan or covered longer-term balloon-payment loan. Since the due date of such a loan would be beyond that 30-day period, the lender would be free to make another covered short-term loan subsequent to the non-covered bridge loan without having to comply with proposed § 1041.6. Proposed § 1041.2(a)(13) would define non-covered bridge loan as a non-recourse pawn loan made within 30 days of an outstanding covered short-term loan and that the consumer is required to repay within 90 days of its consummation. The Bureau is seeking comment under that provision as to whether additional non-covered loans should be added to the definition.

As with all of the provisions of proposed § 1041.6, in proposing § 1041.6(g) and its accompanying commentary, the Bureau is relying on its authority to prevent unfair, deceptive, and abusive acts and practices under the Dodd-Frank Act.⁵⁷⁷ For purposes of proposed § 1041.6(g) in particular, the Bureau is also relying on its anti-evasion authority under section 1022(b)(1) of the Dodd-Frank Act. As discussed at part IV, Dodd-Frank Act section 1022(b)(1) provides that the Bureau's director may prescribe rules "as may be necessary or appropriate to enable the Bureau to administer and carry out the purposes and objectives of the Federal consumer financial laws, and to prevent evasions thereof."⁵⁷⁸ The Bureau believes that the requirements of proposed § 1041.6(g) would prevent evasions of the reborrowing restrictions under proposed § 1041.6 by not counting the days on which a non-covered bridge loan is outstanding toward the determination of whether a subsequent covered short-term loan made by the lender or its affiliate is part of the same loan sequence as the prior covered short-term loan, or is made within 30

days of the prior loan outstanding, as applicable. This would prevent evasion insofar as, in the absence of this proposed restriction, a lender or its affiliate could make a non-covered bridge loan to keep a consumer in debt on a non-covered bridge loan during the reborrowing period and so wait to make the new covered short-term loan more than 30 calendar days, but with fewer days without non-covered bridge loan, after the prior loan, which would evade the reborrowing restrictions in proposed § 1041.6. The Bureau is concerned that this type of circumvention of the reborrowing restrictions could lead to lenders making covered short-term loans that consumers do not have the ability to repay.

Accordingly, the Bureau proposes to exclude from the period of time between affected loans, those days on which a consumer has a non-covered bridge loan outstanding. The Bureau believes that defining the period of time between covered loans in this manner may be appropriate to prevent lenders from making covered short-term loans for which the consumer does not have the ability to repay.

The Bureau solicits comment on the appropriateness of the standard in proposed § 1041.6(h) and on any alternatives that would adequately prevent consumer harm while reducing burden on lenders.

Section 1041.7 Conditional Exemption for Certain Covered Short-Term Loans

For the reasons discussed below, the Bureau is proposing to exempt covered short-term loans under proposed § 1041.7 (also referred to herein as a Section 7 loan) from proposed §§ 1041.4, 1041.5, and 1041.6. Proposed § 1041.7 includes a number of screening and structural protections for consumers who are receiving loans not subject to the proposed ability-to-repay determination. These provisions would reduce the likelihood and magnitude of consumer harms from unaffordable payments on covered short-term loans, including addressing the common occurrence that such loans lead to sequences of reborrowing by consumers.

Background

Based on its own and outside research, the Bureau recognizes that, even without ability-to-repay assessments, some consumers repay a short-term loan when due without further reborrowing. These consumers avoid some, if not all, of the harms with which the Bureau is concerned. For example, as described in the CFPB Report on Supplemental Findings, approximately 22 percent of new

payday loan sequences do not result in any reborrowing within the ensuing 30 days.⁵⁷⁹ While the Bureau believes that most of these consumers would be able to demonstrate their ability to repay and thus continue to obtain loans under the Bureau's proposal, the Bureau recognizes that there may be a sub-segment of consumers for whom this is not true and who would be denied loans even though they could, in fact, afford the payment. These consumers, for example, may be paid, in whole or in part, in cash and may not deposit their wages into a transaction account, preventing verification of their income.

Some of these consumers may take out a payday loan, repay it on the contractual due date, and never again use a payday loan. Others may return on another occasion, when a new need arises, likely for another short sequence.⁵⁸⁰ Further, even among those who do reborrow, the Bureau's research indicates that about 16 percent of payday sequences ended with repayment within three loans, without either reborrowing within 30 days after the last payment or defaulting.⁵⁸¹

In addition, the Bureau's research suggests that even consumers who reborrow many times might have shorter loan sequences if they were offered the option of taking out smaller loans each time they returned to reborrow—instead of being presented only with the option of rolling over the loan (in States where it is permitted) or repaying the full amount of the loan plus the finance

⁵⁷⁹ CFPB Report on Supplemental Findings. The Bureau's finding may overstate the extent to which payday borrowers are able to avoid re-borrowing since the Bureau's study looks at borrowing from a single lender. A recent study which tracks borrowers across five large lenders who together make up 20 percent of the storefront payday market finds that 21 percent of borrowers switch lenders and that of those roughly two-thirds did so within 14 days of paying off a prior loan. See Clarity Services, Finding the Silver Lining in Regulatory Storm Clouds: Consumer Behavior and Borrowing Capacity in the New Payday Market at 4, 9 (2015) [hereinafter *Finding the Silver Lining in Regulatory Storm Clouds: Consumer Behavior and Borrowing Capacity in the New Payday Market*], available at <https://www.nonprime101.com/wp-content/uploads/2015/10/FISCA-10-15.pdf>.

⁵⁸⁰ The study described in the previous footnote, using data over a four-year time frame, found that 16 percent of borrowers took out one payday loan, repaid it on the contractual due date, and did not return again during the period reviewed; that the median borrower had 2 sequences over four years; and that the average borrower had 3.37 sequences. (This study defined sequence, as did the Bureau's 2014 Data Point, by using a 14-day time period.) *Finding the Silver Lining in Regulatory Storm Clouds: Consumer Behavior and Borrowing Capacity in the New Payday Market*, at 8, 14.

charge, which often leads to taking out another loan in the same amount.⁵⁸²

Finally, the Bureau recognizes that the verification and ability-to-repay requirements in proposed §§ 1041.5 and 1041.6 would impose compliance costs that some lenders, especially smaller lenders, may find difficult to absorb for covered short-term loans, particularly those relatively small in amount.

In light of these considerations, the Bureau believes that it would further the purposes and objectives of the Dodd-Frank Act, to provide a simpler alternative to the ability-to-repay requirements in proposed §§ 1041.5 and 1041.6 for covered short-term loans, but with robust alternative protections against the harms from loans with unaffordable payments. As described in more detail below, proposed § 1041.7 would permit lenders to extend consumers a sequence of up to three loans, in which the principal is reduced by one-third at each stage and certain other conditions are met, without following the ability-to-repay requirements specified in proposed §§ 1041.5 and 1041.6.
