

FEDERAL REGISTER

Vol. 81

Friday,

No. 156

August 12, 2016

Pages 53245–53906

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097-6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, Washington, DC 20402 is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see www.ofr.gov.

The seal of the National Archives and Records Administration authenticates the **Federal Register** as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at www.fdsys.gov, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 59, 1 (January 2, 1994) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, gpocusthelp.com.

The annual subscription price for the **Federal Register** paper edition is \$749 plus postage, or \$808, plus postage, for a combined **Federal Register**, **Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is \$165, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register**, including postage, is based on the number of pages: \$11 for an issue containing less than 200 pages; \$22 for an issue containing 200 to 400 pages; and \$33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for \$3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see bookstore.gpo.gov.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 81 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

Rules and Regulations

Federal Register

Vol. 81, No. 156

Friday, August 12, 2016

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 1150

[Document No. AMS-DA-14-0074]

National Dairy Promotion and Research Program; Amendments to the Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This final rule amends the Dairy Promotion and Research Order (Dairy Order). The amendment modifies the number of National Dairy Promotion and Research Board (Dairy Board) importer members. The total number of importer members would be reduced from 2 members to 1 member, and the domestic Dairy Board members would remain the same at 36. The Dairy Order requires that at least once every three years, after the initial appointment of importer members on the Dairy Board, the Secretary shall review the average volume of domestic production of dairy products compared to the average volume of imports of dairy products into the United States during the previous three years, and, on the basis of that review, if warranted, reapportion the importer representation on the Dairy Board to reflect the proportional shares of the United States market served by domestic production and imported dairy products.

DATES: *Effective Date:* August 12, 2016.

FOR FURTHER INFORMATION CONTACT: Whitney A. Rick, Director, Promotion, Research and Planning Division, AMS, USDA, 1400 Independence Ave. SW., Room 2958-S, Stop 0233, Washington, DC 20250-0233. Phone: (202) 720-6909. Email: Whitney.Rick@ams.usda.gov.

SUPPLEMENTARY INFORMATION: This final rule is issued pursuant to the Dairy

Production Stabilization Act (Dairy Act) of 1983 [7 U.S.C. 4501-4514], as amended.

Executive Order 12866

The Office of Management and Budget has waived the review process required by Executive Order 12866 for this action.

Executive Order 12988

This final rule has been reviewed under Executive Order 12988, Civil Justice Reform. This final rule is not intended to have a retroactive effect. In accordance with 7 U.S.C. 4512(a), this rule will not preempt or supersede any other program relating to dairy product promotion organized and operated under the laws of the United States or any State.

The Dairy Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under 7 U.S.C. 4509, any person subject to the Dairy Order may file with the Secretary of Agriculture (Secretary) a petition stating that the Dairy Order, any provision of the Dairy Order, or any obligation imposed in connection with the Dairy Order is not in accordance with the law and request a modification of the Dairy Order or to be exempted from the Dairy Order. Such person is afforded the opportunity for a hearing on the petition. After a hearing, the Secretary would rule on the petition. The Dairy Act provides that the district court of the United States in any district in which the person is an inhabitant or has his principal place of business, has jurisdiction to review the Secretary's ruling on the petition, provided a complaint is filed not later than 20 days after the date of the entry of the ruling.

Regulatory Flexibility Act

In accordance with the Regulatory Flexibility Act (5 U.S.C. 601-612), the Agricultural Marketing Service has considered the economic impact of this action on small entities and has certified that this final rule will not have a significant economic impact on a substantial number of small entities. The purpose of the Regulatory Flexibility Act is to fit regulatory actions to the scale of businesses subject to such actions so that small businesses will not be disproportionately burdened.

The Dairy Act authorizes a national program for dairy product promotion, research and nutrition education.

Congress found that it is in the public interest to authorize the establishment of an orderly procedure for financing (through assessment on all milk produced in the United States for commercial use and on imported dairy products) and carrying out a coordinated program of promotion designed to strengthen the dairy industry's position in the marketplace and to maintain and expand domestic and foreign markets and uses for fluid milk and dairy products.

The Small Business Administration [13 CFR 121.201] defines such entities with fewer than 500 employees as small businesses. According to 2013 data from the U.S. Census Bureau, 98.6 percent of these types of firms had fewer than 500 employees (<http://census.gov/econ/subs/>). According to the U.S. Customs and Border Protection (CBP), in 2014, approximately 1,400 importers paid assessments under Section 1150.152(b) of the Dairy Order. Although data is not available concerning the sizes of these firms, it is reasonable to assume that most of them would be considered small businesses. The most common classification for dairy product importers is Grocery and Related Product Merchant Wholesalers (North American Industry Classification System, category 4244).

The final rule amends the Dairy Order, Section 1150.131(c), by reducing the number of Dairy Board importer representatives from 2 members to 1 member.

The amendment should not have a significant economic impact on persons subject to the Dairy Order. The changes allow representation on the Dairy Board to better reflect the volume of dairy product imports into the United States.

Paperwork Reduction Act

In accordance with the Office of Management and Budget (OMB) regulation [5 CFR part 1320] which implements the Paperwork Reduction Act of 1995 [44 U.S.C. chapter 35], the information collection requirements and record keeping provisions imposed by the Dairy Order have been previously approved by OMB and assigned OMB Control No. 0581-0093. No relevant Federal rules have been identified that duplicate, overlap, or conflict with this rule.

Statement of Consideration

Upon publication of this rule, the Dairy Order is administered by a 37-member Dairy Board, 36 members representing 12 geographic regions within the United States and 1 member representing importers. The Dairy Order requires in Section 1150.131(f) that at least once every three years, after the initial appointment of importer representatives on the Dairy Board, the Secretary shall review the average volume of domestic production of dairy products compared to the average volume of imports of dairy products into the United States during the previous three years and, on the basis of that review, if warranted, reapportion the importer representation on the Dairy Board to reflect the proportional shares of the United States market served by domestic production and imported dairy products. This reapportionment review is the first conducted since importer members were appointed to the Dairy Board on November 2, 2011.

For initial representation of importers on the Dairy Board, the Dairy Act states “In making initial appointments to the Board of importer representatives, the

Secretary shall appoint 2 members who represent importers of dairy products and are subject to assessment under the order.” 7 U.S.C. 4504(b)(6)(A). For subsequent representation of importers, the Dairy Act goes on to state “At least once every 3 years after the initial appointment of importer representatives under subparagraph (A), the Secretary shall review the average volume of domestic production of dairy products compared to the average volume of imports of dairy products into the United States during the previous 3 years and, on the basis of that review, shall reapportion importer representation on the Board to reflect the proportional share of the United States market by domestic production and imported dairy products.” 7 U.S.C. 4504(b)(6)(B).

Section 1150.131(f) of the Dairy Order states the basis for the comparison of domestic production of dairy products to imported products should be estimated total milk solids. The calculation of total milk solids of imported dairy products for reapportionment purposes “shall be the same as the calculation of total milk

solids of imported dairy products for assessment purposes.” The reapportionment review was not conducted prior to 2015 because three full years’ worth of data was not available.

Using National Agricultural Statistical Service (NASS) Annual Dairy Products Summary data, the average U.S. milk total solids for domestic dairy products for 2012 to 2014 was 23,462 billion pounds annually. Based on the total milk solids number, each of the 36 domestic Dairy Board producer members would represent 652 million pounds of total milk solids (23,462 billion pounds divided by 36 producer members equals 652 million pounds per producer).

Using information received from CBP, the average total milk solids imported during 2012 to 2014 was 589 million pounds (589 million pounds divided by 1 importer member equals 589 million pounds per importer).

Accordingly, Table 1 summarizes, based on U.S. total solids and imported total solids, the adopted number of Dairy Board seats for domestic and importer members.

TABLE 1—DAIRY BOARD REPRESENTATION BASED ON U.S. TOTAL SOLIDS AND IMPORTED TOTAL SOLIDS

	Average total milk solids (lbs.)	Adopted number of board seats	Average total milk solids represented per board member (lbs.)
Domestic Producer	23,461,555,556	36	651,709,877
Importer	589,296,653	1	589,296,653

On April 1, 2016, a proposed rule was published in the **Federal Register** [81 FR 18802] inviting comments on proposed modifications to the number of importer representatives on the Dairy Board. Interested parties were provided 30 days to comment on the proposed amendment. USDA received three timely comments from industry organizations and an individual. Of those comments, two were opposed the rule and one did not address the merits of the proposed rule.

One commenter opposed reducing the number of importer members on the Dairy Board, recognizing that approximately 1,400 importers paid assessments under the Dairy Order in 2014. The commenter stated that due to the limits of the Dairy Tariff-Rate Import Quota Licensing Program placed on the volume of cheese imported into the U.S., increasing import volumes by any appreciable amount is impossible.

A second commenter also opposed the proposal to reduce Dairy Board

importer representation from two members to one member, and urged for the withdrawal of the proposed rule. The commenter recognized the Dairy Act requires importer representation to reflect the proportional share of the U.S. market by domestic production and imported dairy products. However, the commenter argued that increasing import volumes by any appreciable amount is impossible due to the limits placed on the volume of cheese imported into the U.S. by factors beyond the control of the market, namely quotas, tariffs and import licenses. The commenter also stated safeguard triggers require substantially higher tariffs if the triggers are breached and noted this occurred with butter in 2015 and may occur in the coming year with several cheeses. The commenter went on to state that the Trans-Pacific Partnership (TPP) and the Transatlantic Trade and Investment Partnership (TTIP) agreements are focused on the reduction, if not elimination of tariffs

and quotas. As a result, TPP and TTIP implementation would likely result in an increase in imported dairy products, including cheese, and would make the representation of importers on the Dairy Board even more meaningful.

As noted in the proposed rule, the Dairy Order requires and provides instruction on how to carry out a review to determine whether or not a reapportionment of importer members on the Dairy Board is warranted. Therefore, the proposed rule will not be withdrawn. Neither commenter disputed the method of nor the data used to conduct the reapportionment review. Similarly, an alternative process for conducting the review was not offered. Additionally, because the Secretary is required to review importer representation every three years, any increase in imported dairy products, cheese or otherwise, would be reflected in the calculations used to determine whether importer representation would increase, remain the same, or decrease.

This final rule adopts the proposed rule without change, and therefore Dairy Board importer representation is decreased from two importer members to one importer member.

Pursuant to 5 U.S.C. 553, it is found and determined that good cause exists for not postponing the effective date of this rule until 30 days after publication in the **Federal Register** because this rule should be in effect as soon as possible to appoint Dairy Board members for the 2016–2019 term.

List of Subjects in 7 CFR Part 1150

Dairy products, Milk, Promotion, Research.

For the reasons set forth in the preamble, 7 CFR part 1150 is amended as follows:

PART 1150—DAIRY PROMOTION PROGRAM

■ 1. The authority citation for 7 CFR part 1150 continues to read as follows:

Authority: 7 U.S.C. 4501–4514 and 7 U.S.C. 7401.

■ 2. In § 1150.131, paragraph (c) is revised to read as follows:

§ 1150.131 Establishment and membership.

* * * * *

(c) One member of the board shall be an importer who is subject to assessments under § 1150.152(b).

* * * * *

Dated: August 8, 2016.

Elanor Starmer,
Administrator.

National Poultry Improvement Plan and Auxiliary Provisions

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: We are amending the National Poultry Improvement Plan (NPIP), its auxiliary provisions, and the indemnity regulations for the control of H5 and H7 low pathogenic avian influenza. Specifically, we are clarifying who may participate in the NPIP, amending

participation requirements, amending definitions for *poultry* and *breeding stock*, amending the approval process for new diagnostic tests, and amending slaughter plant inspection and laboratory inspection and testing requirements. These changes will align the regulations with international standards and make them more transparent to Animal and Plant Health Inspection Service stakeholders and the general public. The changes in this final rule were voted on and approved by the voting delegates at the Plan's 2014 National Plan Conference.

DATES: Effective September 12, 2016.

FOR FURTHER INFORMATION CONTACT: Dr. Denise Brinson, DVM, Director, National Poultry Improvement Plan, VS, APHIS, USDA, 1506 Klondike Road, Suite 101, Conyers, GA 30094–5104; (770) 922–3496.

SUPPLEMENTARY INFORMATION:

Background

The National Poultry Improvement Plan (NPIP, also referred to below as “the Plan”) is a cooperative Federal-State-industry mechanism for controlling certain poultry diseases. The Plan consists of a variety of programs intended to prevent and control poultry diseases. Participation in all Plan programs is voluntary, but breeding flocks, hatcheries, and dealers must first qualify as “U.S. Pullorum-Typhoid Clean” as a condition for participating in the other Plan programs.

The Plan identifies States, flocks, hatcheries, dealers, and slaughter plants that meet certain disease control standards specified in the Plan's various programs. As a result, customers can buy poultry that has tested clean of certain diseases or that has been produced under disease-prevention conditions.

The regulations in 9 CFR parts 145, 146, and 147 (referred to below as the regulations) contain the provisions of the Plan. The Animal and Plant Health Inspection Service (APHIS, also referred to as “the Service”) of the U.S. Department of Agriculture (also referred to as “the Department”) amends these provisions from time to time to incorporate new scientific information and technologies within the Plan. In addition, the regulations in 9 CFR part 56 set out conditions for the payment of indemnity for costs associated with poultry that are infected with or exposed to H5/H7 low pathogenic avian influenza and provisions for a cooperative control program for the disease.

On March 24, 2016, we published in the **Federal Register** (81 FR 15652–

15660, Docket No. APHIS–2014–0101) a proposal¹ to amend the regulations by clarifying who may participate in the NPIP and amending participation requirements. In addition, we proposed to amend definitions of *poultry* and *breeding stock*, amend the approval process for new diagnostic tests, and amend slaughter plant inspection and laboratory inspection and testing requirements.

We solicited comments concerning our proposal for 60 days ending May 23, 2016. We received one comment by that date. It was from an individual. The issues raised by the commenter are discussed below.

In the March 2016 proposed rule, we proposed to amend the definition of *breeding flock* in § 56.1 to remove the word “chicks” and replace it with the word “progeny.” The commenter objected to this change, suggesting that many people would not know the meaning of the latter term and would find it confusing.

We are not making any changes to the final rule in response to this comment. As stated in the March 2016 proposed rule, the term “progeny” is more accurate than “chicks” in this context because it is more inclusive of both chicken and turkey flocks. Young turkeys are known as poults rather than chicks. In addition, as we noted in the proposed rule, the change in terminology also makes our definition of *breeding flock* in § 56.1 consistent with our definition of *multiplier breeding flock* in § 145.1.

The March 2016 proposed rule included a minor change to § 145.12, which contains requirements for the retention and examination of records for all flocks maintained primarily for hatching eggs. We proposed to specify, in paragraph (b) of that section, that records for all breeder flock hatcheries must be made available for annual examination by a State inspector. Historically, testing records were retained at the hatchery, which allowed for examination of the records during annual inspections, but that is no longer the case. Many commercial hatcheries now keep testing records at the corporate office or another site. Our proposed amendment to § 145.12 was intended to reflect this change in recordkeeping practices in the industry and also to allow flexibility in the regulations regarding who may make the records available to the State inspector.

The commenter objected to this proposed change, stating that the

¹ To view the proposed rule and the comment we received, go to <http://www.regulations.gov/#/docketDetail;D=APHIS-2014-0101>.

records should be kept at the hatchery with the flocks so that taxpayers do not have to incur additional costs due to the need for inspectors to travel to different locations.

We do not agree with this comment. As noted above, we are amending the regulations to reflect current practices in the industry. By allowing hatcheries the discretion to maintain records where they would most readily be accessible when needed, we are relieving a regulatory burden. The commenter provides no evidence to support the claim that having the records kept at sites other than the hatcheries will result in additional costs to taxpayers.

The commenter also stated that the proposed rule would have the effect of loosening testing standards, thereby increasing the risk of the spread of disease.

We did not propose to loosen existing testing standards, as the commenter claims. We proposed instead to make some editorial changes to § 145.14(b) to remove references to tests that are no longer being used, update terminology that is no longer current, and otherwise clarify the testing requirements in that section.

Finally, the commenter objected to our proposed changes to the slaughter plant inspection requirements in § 146.11.

We will not be making any changes to the final rule in response to this comment. The commenter did not offer a rationale for opposing the proposed amendments to § 146.11, which were intended to clarify our slaughter plant inspection requirements and remove language that conflicted with requirements set out elsewhere in part 146.

Miscellaneous

In this final rule, we are making one minor editorial change to correct an error in the regulatory text of the proposed rule.

Part 146 of the regulations contains the NPIP provisions for commercial poultry. Currently, the only disease addressed in this part is H5/H7 low pathogenic avian influenza; under part 146, table-egg layer flocks, meat-type chicken slaughter plants, meat-type turkey slaughter plants, and certain types of game birds and waterfowl may participate in U.S. H5/H7 Avian Influenza Monitored classifications.

Section 146.11 sets out the audit process for participating slaughter plants. Paragraph (b) states that flocks slaughtered at a slaughter plant will be considered to be not conforming to the required protocol of the classifications if there are no test results available, if the

flock was not tested within 21 days before slaughter, or if the test results for the flocks were not returned before slaughter. We intended to amend paragraph (b) to state that “a flock will be considered to be conforming to protocol if it meets the requirements as described in §§ 146.33(a), 146.43(a), 146.53(a).” However, we inadvertently referred to § 145.33(a) instead of § 146.33(a). In this final rule, we are correcting that error.

Therefore, for the reasons given in the proposed rule and in this document, we are adopting the proposed rule as a final rule, with the change discussed in this document.

Executive Order 12866 and Regulatory Flexibility Act

This final rule has been determined to be not significant for the purposes of Executive Order 12866 and, therefore, has not been reviewed by the Office of Management and Budget.

In accordance with the Regulatory Flexibility Act, we have analyzed the potential economic effects of this action on small entities. The analysis is summarized below. Copies of the full analysis are available on the *Regulations.gov* Web site (see footnote 1 in this document for a link to *Regulations.gov*) or by contacting the person listed under **FOR FURTHER INFORMATION CONTACT**.

We are amending the NPIP, its auxiliary provisions, and the indemnity regulations for the control of H5 and H7 low pathogenic avian influenza to align the regulations with international standards and make them more transparent to stakeholders and the general public. The changes in this final rule were voted on and approved by the voting delegates at the 2014 NPIP National Plan Conference.

The establishments that will be affected by the rule—principally entities engaged in poultry production and processing—are predominantly small by Small Business Administration standards. In those instances in which an addition to or modification of requirements could potentially result in a cost to certain entities, we do not expect the costs to be significant. NPIP membership is voluntary. The changes contained in this final rule were decided upon by the NPIP General Conference Committee on behalf of Plan members; that is, the changes were recognized by the poultry industry as being in their interest.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action will not

have a significant economic impact on a substantial number of small entities.

Executive Order 12372

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.025 and is subject to Executive Order 12372, which requires intergovernmental consultation with State and local officials. (See 2 CFR chapter IV.)

Executive Order 12988

This final rule has been reviewed under Executive Order 12988, Civil Justice Reform. This rule: (1) Preempts all State and local laws and regulations that are in conflict with this rule; (2) has no retroactive effect; and (3) does not require administrative proceedings before parties may file suit in court challenging this rule.

Paperwork Reduction Act

In accordance with section 3507(d) of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the information collection or recordkeeping requirements included in this final rule, which were filed under 0579–0445, have been submitted for approval to the Office of Management and Budget (OMB). When OMB notifies us of its decision, if approval is denied, we will publish a document in the **Federal Register** providing notice of what action we plan to take.

E-Government Act Compliance

The Animal and Plant Health Inspection Service is committed to compliance with the E-Government Act to promote the use of the Internet and other information technologies, to provide increased opportunities for citizen access to Government information and services, and for other purposes. For information pertinent to E-Government Act compliance related to this rule, please contact Ms. Kimberly Hardy, APHIS' Information Collection Coordinator, at (301) 851–2727.

List of Subjects

9 CFR Part 56

Animal diseases, Indemnity payments, Low pathogenic avian influenza, Poultry.

9 CFR Parts 145, 146, and 147

Animal diseases, Poultry and poultry products, Reporting and recordkeeping requirements.

Accordingly, we are amending 9 CFR parts 56, 145, 146, and 147 as follows:

PART 56—CONTROL OF H5/H7 LOW PATHOGENIC AVIAN INFLUENZA

■ 1. The authority citation for part 56 continues to read as follows:

Authority: 7 U.S.C. 8301–8317; 7 CFR 2.22, 2.80, and 371.4.

■ 2. Section 56.1 is amended by revising the definition of *breeding flock* to read as follows:

§ 56.1 Definitions.

* * * * *

Breeding flock. A flock that is composed of stock that has been developed for commercial egg or meat production and is maintained for the principal purpose of producing progeny for the ultimate production of eggs or meat for human consumption.

* * * * *

PART 145—NATIONAL POULTRY IMPROVEMENT PLAN FOR BREEDING POULTRY

■ 3. The authority citation for part 145 continues to read as follows:

Authority: 7 U.S.C. 8301–8317; 7 CFR 2.22, 2.80, and 371.4.

§ 145.2 [Amended]

■ 4. In § 145.2, paragraph (d) is amended by removing the reference “§ 145.3(d)” and adding the reference “§ 145.3(e)” in its place.

■ 5. Section 145.3 is amended as follows:

■ a. By redesignating paragraphs (a) through (f) as paragraphs (b) through (g), respectively.

■ b. By adding a new paragraph (a).
The addition reads as follows:

§ 145.3 Participation.

(a) The National Poultry Improvement Plan is a cooperative Federal-State-Industry program through which new or existing diagnostic technology can be effectively applied to improve poultry and poultry products by controlling or eliminating specific poultry diseases. The Plan consists of programs that identify States, flocks, hatcheries, dealers, and slaughter plants that meet specific disease control standards specified in the Plan. Participants shall maintain records to demonstrate that they adhere to the disease control programs in which they participate.

* * * * *

§ 145.12 [Amended]

■ 6. Section 145.12 is amended by adding, in paragraph (b), the words “made available to and” before the word “examined”.

■ 7. Section 145.14 is amended as follows:

■ a. By revising paragraph (a)(5).
■ b. By revising paragraph (b)(1).
The revisions read as follows:

§ 145.14 Testing.

* * * * *

(a) * * *
(5) The official blood test shall include the testing of a sample of blood from each bird in the flock: Provided, That under specified conditions (see applicable provisions of §§ 145.23, 145.33, 145.43, 145.53, 145.63, 145.73, 145.83, and 145.93) the testing of a portion or sample of the birds may be used in lieu of testing each bird.

* * * * *

(b) * * *
(1) The official tests for *M. gallisepticum*, *M. meleagridis*, and *M. synoviae* shall be the serum plate agglutination test, the hemagglutination inhibition (HI) test, the enzyme-linked immunosorbent assay (ELISA) test,³ or a molecular based test. The HI test or molecular based test shall be used to confirm the positive results of other serological screening tests. HI titers of 1:40 or more may be interpreted as suspicious, and final judgment must be based on further samplings and/or culture of reactors. Tests must be conducted in accordance with this paragraph (b) and in accordance with part 147 of this subchapter.

* * * * *

■ 8. In § 145.42, paragraph (b) is revised to read as follows:

§ 145.42 Participation.

* * * * *

(b) Hatching eggs should be nest clean. They may be fumigated in accordance with part 147 of this subchapter or otherwise sanitized.

* * * * *

■ 9. Section 145.53 is amended as follows:

■ a. By revising paragraphs (c)(1)(i), (c)(1)(ii) introductory text, and (c)(1)(ii)(A).

³ Procedures for the enzyme-linked immunosorbent assay (ELISA) test are set forth in the following publications:

A.A. Ansari, R.F. Taylor, T.S. Chang, “Application of Enzyme-Linked Immunosorbent Assay for Detecting Antibody to *Mycoplasma gallisepticum* Infections in Poultry,” *Avian Diseases*, Vol. 27, No. 1, pp. 21–35, January-March 1983; and

H.M. Opitz, J.B. Duplessis, and M.J. Cyr, “Indirect Micro-Enzyme-Linked Immunosorbent Assay for the Detection of Antibodies to *Mycoplasma synoviae* and *M. gallisepticum*,” *Avian Diseases*, Vol. 27, No. 3, pp. 773–786, July-September 1983; and

H.B. Ortmayer and R. Yamamoto, “*Mycoplasma Meleagridis* Antibody Detection by Enzyme-Linked Immunosorbent Assay (ELISA),” *Proceedings, 30th Western Poultry Disease Conference*, pp. 63–66, March 1981.

■ b. By revising paragraphs (d)(1)(i), (d)(1)(ii) introductory text, and (d)(1)(ii)(A).

The revisions read as follows:

§ 145.53 Terminology and classification; flocks and products.

* * * * *

(c) * * *
(1) * * *

(i) It is a flock in which all birds or a sample of at least 300 birds has been tested for *M. gallisepticum* as provided in § 145.14(b) when more than 4 months of age or upon reaching sexual maturity: *Provided*, That to retain this classification, a random sample of serum or egg yolk or a targeted bird sample of the choanal palatine cleft/fissure area using appropriate swabs from all the birds in the flock if the flock size is less than 30, but at least 30 birds, shall be tested at intervals of not more than 90 days: *And provided further*, That a sample comprised of less than 30 birds may be tested at any one time, with the approval of the Official State Agency and the concurrence of the Service, provided that a total of at least 30 birds, or all birds in the flock if flock size is less than 30, is tested within each 90-day period; or

(ii) It is a multiplier breeding flock which originated as U.S. *M. Gallisepticum* Clean baby poultry from primary breeding flocks and a random sample comprised of 50 percent of the birds in the flock, with a maximum of 200 birds and a minimum of 30 birds per flock or all birds in the flock if the flock size is less than 30 birds, has been tested for *M. gallisepticum* as provided in § 145.14(b) when more than 4 months of age or upon reaching sexual maturity: *Provided*, That to retain this classification, the flock shall be subjected to one of the following procedures:

(A) At intervals of not more than 90 days, a random sample of serum or egg yolk or a targeted bird sample of the choanal palatine cleft/fissure area using appropriate swabs from all the birds in the flock if flock size is less than 30, but at least 30 birds, shall be tested; or

* * * * *

(d) * * *
(1) * * *

(i) It is a flock in which all birds or a sample of at least 300 birds has been tested for *M. synoviae* as provided in § 145.14(b) when more than 4 months of age or upon reaching sexual maturity: *Provided*, That to retain this classification, a random sample of serum or egg yolk or a targeted bird sample of the choanal palatine cleft/fissure area using appropriate swabs (C.P. swabs) from all the birds in the

flock if flock size is less than 30, but at least 30 birds, shall be tested at intervals of not more than 90 days: *And provided further*, That a sample comprised of less than 30 birds may be tested at any one time with the approval of the Official State Agency and the concurrence of the Service, provided that a total of at least 30 birds is tested within each 90-day period; or

(ii) It is a multiplier breeding flock that originated as U.S. M. Synoviae Clean chicks from primary breeding flocks and from which a random sample comprised of 50 percent of the birds in the flock, with a maximum of 200 birds and a minimum of 30 birds per flock or all birds in the flock if the flock is less than 30 birds, has been tested for *M. synoviae* as provided in § 145.14(b) when more than 4 months of age or upon reaching sexual maturity: *Provided*, That to retain this classification, the flock shall be subjected to one of the following procedures:

(A) At intervals of not more than 90 days, a random sample of serum or egg yolk or a targeted bird sample of the choanal palantine cleft/fissure area using appropriate swabs from all the birds in the flock if the flock size is less than 30, but at least 30 birds shall be tested: *Provided*, That a sample of fewer than 30 birds may be tested at any one time with the approval of the Official State Agency and the concurrence of the Service, provided that a total of at least 30 birds, or the entire flock if flock size is less than 30, is tested each time and a total of at least 30 birds is tested within each 90-day period; or

■ 10. Section 145.83 is amended as follows:

■ a. By revising paragraph (f)(1)(i).

■ b. By removing paragraphs (f)(1)(ii) and (f)(1)(iii).

■ c. By redesignating paragraphs (f)(1)(iv) through (f)(1)(viii) as paragraphs (f)(1)(ii) through (f)(1)(vi).

■ d. In newly redesignated paragraphs (f)(1)(v) and (f)(1)(vi) by removing the words “(f)(1)(vi)” and adding the words “(f)(1)(iv)” in their place.

■ e. By revising paragraph (f)(3).
The revisions read as follows:

§ 145.83 Terminology and classification; flocks and products.

* * * * *

(f) * * *

(1) * * *

(i) Measures shall be implemented to control *Salmonella* challenge through feed, feed storage, and feed transport.

* * * * *

(3) In order for a hatchery to sell products of paragraphs (f)(1)(i) through

(f)(1)(vi) of this section, all products handled shall meet the requirements of the classification.

* * * * *

■ 11. In § 145.92, paragraph (b) is revised to read as follows:

§ 145.92 Participation.

* * * * *

(b) Hatching eggs produced by primary and multiplier breeding flocks should be nest clean. They may be fumigated in accordance with part 147 of this subchapter or otherwise sanitized.

* * * * *

§ 145.93 [Amended]

■ 12. In § 145.93, paragraph (c)(3) is amended by removing the number “30” and adding the number “11” in its place.

PART 146—NATIONAL POULTRY IMPROVEMENT PLAN FOR COMMERCIAL POULTRY

■ 13. The authority citation for part 146 continues to read as follows:

Authority: 7 U.S.C. 8301–8317; 7 CFR 2.22, 2.80, and 371.4.

■ 14. Section 146.1 is amended by revising the definition of *poultry* to read as follows:

§ 146.1 Definitions.

* * * * *

Poultry. Domesticated fowl, including chickens, turkeys, waterfowl, and game birds, except doves and pigeons, that are bred for the primary purpose of producing eggs or meat.

* * * * *

■ 15. Section 146.2 is amended by revising paragraph (c) to read as follows:

§ 146.2 Administration.

* * * * *

(c)(1) An Official State Agency may accept for participation a commercial table-egg layer pullet flock, commercial table-egg layer flock, or a commercial meat-type flock (including an affiliated flock) located in another participating State under a mutual understanding and agreement, in writing, between the two Official State Agencies regarding conditions of participation and supervision.

(2) An Official State Agency may accept for participation a commercial table-egg layer pullet flock, commercial table-egg layer flock, or a commercial meat-type flock (including an affiliated flock) located in a State that does not participate in the Plan under a mutual understanding and agreement, in writing, between the owner of the flock

and the Official State Agency regarding conditions of participation and supervision.

* * * * *

§ 146.3 [Amended]

■ 16. In § 146.3, paragraph (a) is amended by adding the words “commercial table-egg layer pullet flock,” before the words “table-egg producer”.

■ 17. In § 146.11, paragraph (b) is revised to read as follows:

§ 146.11 Inspections.

* * * * *

(b) A flock will be considered to be conforming to protocol if it meets the requirements as described in § 146.33(a), § 146.43(a), or § 146.53(a).

* * * * *

§ 146.51 [Amended]

■ 18. Section 146.51 is amended as follows:

■ a. In the definition of *commercial upland game birds* by removing the word “purpose” and adding in its place “purposes” and adding the words “eggs and/or” before the word “meat”.

■ b. In the definition of *commercial waterfowl*, by removing the word “purpose” and adding in its place “purposes” and adding the words “eggs and/or” before the word “meat”.

■ 19. Section 146.52 is amended by revising paragraphs (a) and (c) to read as follows:

§ 146.52 Participation.

(a) Participating commercial upland game bird slaughter plants, commercial waterfowl slaughter plants, raised-for-release upland game bird premises, raised-for-release waterfowl premises, and commercial upland game bird and commercial waterfowl producing eggs for human consumption premises shall comply with the applicable general provisions of subpart A of this part and the special provisions of this subpart E.

* * * * *

(c) Raised-for-release upland game bird premises, raised-for-release waterfowl premises, and commercial upland game bird and commercial waterfowl producing eggs for human consumption premises that raise fewer than 25,000 birds annually are exempt from the special provisions of this subpart E.

■ 20. Section 146.53 is amended as follows:

■ a. In paragraph (a) introductory text, by adding the words “or, in the case of egg-producing flocks, the regular surveillance of these flocks” after the words “participating slaughter plant”.

- b. By adding paragraphs (a)(4) and (a)(5).

The additions read as follows:

§ 146.53 Terminology and classification; slaughter plants and premises.

* * * * *

(a) * * *

(4) It is a commercial upland game bird or waterfowl flock that produces eggs for human consumption where a minimum of 11 birds per flock have been tested negative to the H5/H7 subtypes of avian influenza as provided in § 146.13(b) within 30 days of disposal or within a 12 month period.

(5) It is a commercial upland game bird or waterfowl flock that has an ongoing active and passive surveillance program for H5/H7 subtypes of avian influenza that is approved by the Official State Agency and the Service.

* * * * *

PART 147—AUXILIARY PROVISIONS ON NATIONAL POULTRY IMPROVEMENT PLAN

- 21. The authority citation for part 147 continues to read as follows:

Authority: 7 U.S.C. 8301–8317; 7 CFR 2.22, 2.80, and 371.4.

- 22. In § 147.52, paragraph (d) is revised to read as follows:

§ 147.52 Authorized laboratories.

* * * * *

(d) *State site visit.* The Official State Agency will conduct a site visit and recordkeeping audit at least once every 2 years. This will include, but may not be limited to, review of technician training records, check test proficiency, and test results. The information from the site visit and recordkeeping audit will be made available to the NPIP upon request.

* * * * *

- 23. Section 147.54 is revised to read as follows:

§ 147.54 Approval of diagnostic test kits not licensed by the Service.

(a) Diagnostic test kits that are not licensed by the Service (e.g., bacteriological culturing kits) may be approved through the following procedure:

(1) The sensitivity of the kit will be evaluated in at least three NPIP authorized laboratories by testing known positive samples, as determined by the official NPIP procedures found in the NPIP Program Standards or through other procedures approved by the Administrator. Field samples for which the presence or absence of the target organism or analyte has been determined by the current NPIP test

should be used, not spiked samples or pure cultures. Samples from a variety of field cases representing a range of low, medium, and high analyte concentrations should be used. In some cases it may be necessary to utilize samples from experimentally infected animals. Spiked samples (clinical sample matrix with a known amount of pure culture added) should only be used in the event that no other sample types are available. Pure cultures should never be used. Additionally, laboratories should be selected for their experience with testing for the target organism or analyte with the current NPIP approved test. If certain conditions or interfering substances are known to affect the performance of the kit, appropriate samples will be included so that the magnitude and significance of the effect(s) can be evaluated.

(2) The specificity of the kit will be evaluated in at least three NPIP authorized laboratories by testing known negative samples, as determined by tests conducted in accordance with the NPIP Program Standards or other procedures approved by the Administrator in accordance with § 147.53(d)(1). If certain conditions or interfering substances are known to affect the performance of the kit, appropriate samples will be included so that the magnitude and significance of the effect(s) can be evaluated.

(3) The kit will be provided to the cooperating laboratories in its final form and include the instructions for use. The cooperating laboratories must perform the assay exactly as stated in the supplied instructions. Each laboratory must test a panel of at least 25 known positive samples. In addition, each laboratory will be asked to test at least 50 known negative samples obtained from several sources, to provide a representative sampling of the general population. The cooperating laboratories must perform a current NPIP procedure or NPIP approved test on the samples alongside the test kit for comparison.

(4) Cooperating laboratories will submit to the kit manufacturer all raw data regarding the assay response. Each sample tested will be reported as positive or negative, and the official NPIP procedure used to classify the sample must be submitted in addition to the assay response value. A completed worksheet for diagnostic test evaluation is required to be submitted with the raw data and may be obtained by contacting the NPIP Senior Coordinator. Raw data and the completed worksheet for diagnostic test evaluation must be submitted to the NPIP Senior Coordinator 4 months prior to the next

scheduled General Conference Committee meeting, which is when approval will be sought.

(5) The findings of the cooperating laboratories will be evaluated by the NPIP Technical Committee, and the Technical Committee will make a majority recommendation whether to approve the test kit to the General Conference Committee at the next scheduled General Conference Committee meeting. If the Technical Committee recommends approval, the final approval will be granted in accordance with the procedures described in §§ 147.46, 147.47, and 147.48.

(6) Diagnostic test kits that are not licensed by the Service (e.g., bacteriological culturing kits) and that have been approved for use in the NPIP in accordance with this section are listed in the NPIP Program Standards.

(b) *Approved tests modification and removal.* (1) The specific data required for modifications of previously approved tests will be taken on a case-by-case basis by the technical committee.

(2) If the Technical Committee determines that only additional field data is needed at the time of submission for a modification of a previously approved test, allow for a conditional approval for 60 days for data collection side-by-side with a current test. The submitting party must provide complete protocol and study design, including criteria for pass/fail to the Technical Committee. The Technical Committee must review the data prior to final approval. This would only apply to the specific situation where a modified test needs additional field data with poultry to be approved.

(3) Approved diagnostic tests may be removed from the Plan by submission of a proposed change from a participant, Official State Agency, the Department, or other interested person or industry organization. The data in support of removing an approved test will be compiled and evaluated by the NPIP Technical Committee, and the Technical Committee will make a majority recommendation whether to remove the test kit to the General Conference Committee at the next scheduled General Conference Committee meeting. If the Technical Committee recommends removal, the final decision to remove the test will be granted in accordance with the procedures described in §§ 147.46, 147.47, and 147.48.

Done in Washington, DC, this 9th day of August 2016.

Jere L. Dick,

Acting Administrator, Animal and Plant Health Inspection Service.

[FR Doc. 2016-19245 Filed 8-11-16; 8:45 am]

BILLING CODE 3410-34-P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA-2016-5465; Directorate Identifier 2015-NM-041-AD; Amendment 39-18609; AD 2016-16-11]

RIN 2120-AA64

Airworthiness Directives; BAE Systems (Operations) Limited Airplanes

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: We are superseding Airworthiness Directive (AD) 2010-10-13, for all BAE Systems (Operations) Limited Model BAe 146 and Avro 146 series airplanes. AD 2010-10-13 required repetitive inspections of the wing fixed leading edge and front spar structure for corrosion and cracking, and repair if necessary. This new AD requires revised inspection procedures that terminate a previously approved inspection procedure. This AD was prompted by revised inspection procedures issued by the Design Approval Holder (DAH). We are issuing this AD to detect and correct corrosion and cracking of the wing fixed leading edge and front spar structure, which could result in reduced structural integrity of the airplane.

DATES: This AD is effective September 16, 2016.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of September 16, 2016.

The Director of the Federal Register approved the incorporation by reference of a certain other publication listed in this AD as of June 21, 2010 (75 FR 27419, May 17, 2010).

ADDRESSES: For service information identified in this final rule, contact BAE Systems (Operations) Limited, Customer Information Department, Prestwick International Airport, Ayrshire, KA9 2RW, Scotland, United Kingdom; telephone +44 1292 675207; fax +44 1292 675704; email RAPublications@baesystems.com; Internet <http://www.baesystems.com>;

www.baesystems.com/Businesses/RegionalAircraft/index.htm. You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425-227-1221. It is also available on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2016-5465.

Examining the AD Docket

You may examine the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2016-5465; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the regulatory evaluation, any comments received, and other information. The address for the Docket Office (telephone 800-647-5527) is Docket Management Facility, U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Todd Thompson, Aerospace Engineer, International Branch, ANM-116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057-3356; telephone 425-227-1175; fax 425-227-1149.

SUPPLEMENTARY INFORMATION:

Discussion

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 to supersede AD 2010-10-13, Amendment 39-16292 (75 FR 27419, May 17, 2010) (“AD 2010-10-13”). AD 2010-10-13 applied to all BAE Systems (Operations) Limited Model BAe 146 and Avro 146 series airplanes. The NPRM published in the **Federal Register** on April 20, 2016 (81 FR 23208) (“the NPRM”). The NPRM was prompted by revised inspection procedures issued by the DAH. The NPRM proposed to continue to require repetitive inspections of the wing fixed leading edge and front spar structure for corrosion and cracking, and repair if necessary. The NPRM also proposed to require revised inspection procedures that terminate a previously approved inspection procedure. We are issuing this AD to detect and correct corrosion and cracking of the wing fixed leading edge and front spar structure, which could result in reduced structural integrity of the airplane.

The European Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Union, has issued EASA Airworthiness Directive 2014-0047; corrected February 26, 2015 (referred to after this as the Mandatory Continuing Airworthiness Information, or “the MCAI”); to correct an unsafe condition. The MCAI states:

Corrosion of the wing fixed leading edge structure was detected on a BAe 146 aeroplane during removal of wing removable edge for a repair. The review of available scheduled tasks intended to detect environmental and fatigue deteriorations of the wing revealed that they may not have been sufficient to identify corrosion or fatigue damage in the affected structural area.

This condition, if not detected and corrected, could lead to degradation of the structural integrity of the wing.

To address this potential unsafe condition, EASA issued AD 2009-0014 [which corresponds to FAA AD 2010-10-13] to require repetitive inspections of fixed wing leading edge and front spar structure [for cracking and corrosion, and repair if necessary] in accordance with BAE Systems (Operations) Ltd Inspection Service Bulletin (ISB) ISB.57-072 which incorporated two possible inspection procedures, either method 1, a combination of a detailed visual inspection (DVI) and a visual inspection (VI) after removal of the outer fixed leading edge only, or method 2, a DVI only, after removal of the inner, centre and outer fixed leading edges.

Since that [EASA] AD was issued, BAE Systems (Operations) Ltd issued ISB.57-072 Revision 1 to correct a material reference number, Revision 2, which removed method 1 as an available inspection procedure to detect fatigue and environmental damage of the wing structure and Revision 3 to delete the requirement to install weights if the engines were removed when the leading edges were removed.

For the reasons described above, this [EASA] AD retains the requirements of EASA AD 2009-0014, which is superseded, but requires accomplishment of the [repetitive] inspections in accordance with updated inspection procedures, *i.e.* method 2 only.

This [EASA] AD is re-published to correct a typographical error in Table 1, restoring a compliance time as previously required by EASA AD 2009-0014.

The repetitive inspection interval for the detailed visual inspection for cracking and corrosion of the wing fixed leading edge and front spar structure is:

- 12 years or 36,000 flight cycles, whichever occurs earlier, for airplanes on which the enhanced corrosion protection has not been accomplished.
- 6 years or 36,000 flight cycles, whichever occurs earlier, for airplanes on which the enhanced corrosion protection has been accomplished.

You may examine the MCAI in the AD docket on the Internet at <http://www.regulations.gov> by searching for

and locating Docket No. FAA–2016–5465.

Comments

We gave the public the opportunity to participate in developing this AD. We received no comments on the NPRM or on the determination of the cost to the public.

Conclusion

We reviewed the available data and determined that air safety and the public interest require adopting this AD as proposed except for minor editorial changes. We have determined that these minor changes:

- Are consistent with the intent that was proposed in the NPRM for correcting the unsafe condition; and
- Do not add any additional burden upon the public than was already proposed in the NPRM.

Related Service Information Under 1 CFR Part 51

BAE Systems (Operations) Limited has issued Service Bulletin ISB.57–072, Revision 3, dated August 31, 2010. The service information describes procedures for inspection and repair for cracking and corrosion of the wing fixed leading edge and front spar structure. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Costs of Compliance

We estimate that this AD affects 4 airplanes of U.S. registry.

The actions required by AD 2010–10–13, and retained in this AD take about 12 work-hours per product, and 1 work-hour per product for reporting, at an average labor rate of \$85 per work-hour. Based on these figures, the estimated cost of the actions that are required by AD 2010–10–13 is \$1,105 per product.

The new requirements of this AD add no additional economic burden.

We have received no definitive data that would enable us to provide cost estimates for the on-condition actions specified in this AD.

Paperwork Reduction Act

A federal agency may not conduct or sponsor, and a person is not required to respond to, nor shall a person be subject to penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a current valid OMB control number. The control number for the collection of information required by this AD is 2120–0056. The

paperwork cost associated with this AD has been detailed in the Costs of Compliance section of this document and includes time for reviewing instructions, as well as completing and reviewing the collection of information. Therefore, all reporting associated with this AD is mandatory. Comments concerning the accuracy of this burden and suggestions for reducing the burden should be directed to the FAA at 800 Independence Ave. SW., Washington, DC 20591, ATTN: Information Collection Clearance Officer, AES–200.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. "Subtitle VII: Aviation Programs," describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in "Subtitle VII, Part A, Subpart III, Section 44701: General requirements." Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

1. Is not a "significant regulatory action" under Executive Order 12866;
2. Is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979);
3. Will not affect intrastate aviation in Alaska; and
4. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

- 2. The FAA amends § 39.13 by removing Airworthiness Directive (AD) 2010–10–13, Amendment 39–16292 (75 FR 27419, May 17, 2010), and adding the following new AD:

2016–16–11 BAE Systems (Operations)

Limited: Amendment 39–18609, Docket No. FAA–2016–5465; Directorate Identifier 2015–NM–041–AD.

(a) Effective Date

This AD is effective September 16, 2016.

(b) Affected ADs

This AD replaces AD 2010–10–13, Amendment 39–16292 (75 FR 27419, May 17, 2010) ("AD 2010–10–13").

(c) Applicability

This AD applies to BAE Systems (Operations) Limited Model BAe 146–100A, –200A, and –300A series airplanes; and Model Avro 146–RJ70A, 146–RJ85A, and 146–RJ100A airplanes; certificated in any category, all serial numbers.

(d) Subject

Air Transport Association (ATA) of America Code 57, Wings.

(e) Reason

This AD was prompted by revised inspection procedures issued by the Design Approval Holder. We are issuing this AD to detect and correct corrosion and cracking of the wing fixed leading edge and front spar structure, which could result in reduced structural integrity of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Retained Actions and Compliance, With Added Provision for Terminating Action

This paragraph restates the requirements of paragraph (f) of AD 2010–10–13, with an added provision for terminating action. Accomplishing the initial inspection required by paragraph (j) of this AD terminates the requirements of paragraph (g) of this AD.

(1) At the applicable time identified in paragraph (g)(1)(i), (g)(1)(ii), or (g)(1)(iii) of this AD: Perform a detailed visual inspection and visual inspection (Method 1) or a detailed visual inspection (Method 2) for cracking and corrosion of the wing fixed leading edge and front spar structure, in

accordance with paragraph 2.C. or 2.D., as applicable, of the Accomplishment Instructions of BAE Systems (Operations) Limited Inspection Service Bulletin ISB.57-072, Revision 1, dated September 25, 2008.

(i) For airplanes with less than 9 years since the date of issuance of the original airworthiness certificate or the date of issuance of the original export certificate of airworthiness as of the effective date of this AD: Within 18 months after June 21, 2010 (the effective date of AD 2010-10-13).

(ii) For airplanes with 9 years or more, but less than 15 years, since the date of issuance of the original airworthiness certificate or the date of issuance of the original export certificate of airworthiness as of June 21, 2010 (the effective date of AD 2010-10-13): Within 18 months after June 21, 2010, or within 16 years since the date of issuance of the original airworthiness certificate or the date of issuance of the original export certificate of airworthiness, whichever occurs first.

(iii) For airplanes with 15 years or more since the date of issuance of the original airworthiness certificate or the date of issuance of the original export certificate of airworthiness as of June 21, 2010 (the effective date of AD 2010-10-13): Within 6 months after June 21, 2010.

(2) After doing the initial inspection required by paragraph (g)(1) of this AD, at the applicable intervals specified in paragraph (g)(2)(i) or (g)(2)(ii) of this AD, accomplish the repetitive inspections of the wing fixed leading edge and front spar structure for cracking and corrosion in the "area of inspection" specified in table 1 of paragraph 1.D., "Compliance," of BAE Systems (Operations) Limited Inspection Service Bulletin ISB.57-072, Revision 1, dated September 25, 2008. Do the inspections in accordance with paragraph 2.C. (Method 1) or paragraph 2.D. (Method 2) of the Accomplishment Instructions of BAE SYSTEMS (Operations) Limited Inspection Service Bulletin ISB.57-072, Revision 1, dated September 25, 2008. Where previously applied, enhanced corrosion protection may then be re-applied, as an option, in accordance with paragraph 2.E. of the Accomplishment Instructions of BAE Systems (Operations) Limited Inspection Service Bulletin ISB.57-072, Revision 1, dated September 25, 2008. Perform the repetitive inspections at the times specified in paragraph (g)(2)(i) or (g)(2)(ii) of this AD, as applicable.

(i) For airplanes having enhanced corrosion protection that was applied during the previous inspection: Inspect at intervals not to exceed 144 months.

(ii) For airplanes not having enhanced corrosion protection that was applied during the previous inspection: Inspect at intervals not to exceed 72 months.

(3) After doing the initial inspection required by paragraph (g)(1) of this AD, at intervals not to exceed 36,000 flight cycles, accomplish fatigue inspections in accordance with paragraph 2.C. (Method 1) or paragraph 2.D. (Method 2) of the Accomplishment Instructions of BAE Systems (Operations) Limited Inspection Service Bulletin ISB.57-072, Revision 1, dated September 25, 2008.

(4) If any cracking or corrosion is found during any inspection required by paragraph (g) of this AD, before further flight, repair in accordance with the Accomplishment Instructions of BAE Systems (Operations) Limited Inspection Service Bulletin ISB.57-072, Revision 1, dated September 25, 2008.

(5) No repair terminates the inspection requirements of this AD.

(6) Actions done before June 21, 2010 (the effective date of AD 2010-10-13), in accordance with BAE Systems (Operations) Limited Inspection Service Bulletin ISB.57-072, dated February 22, 2008, are considered acceptable for compliance with the corresponding actions specified in this AD.

(7) Submit a report of the findings (both positive and negative) of the inspection required by paragraph (f)(1) of this AD to Customer Liaison, Customer Support (Building 37), BAE Systems (Operations) Limited, Prestwick International Airport, Ayrshire, KA9 2RW, Scotland; fax +44 (0) 1292 675432; email raengliaison@baesystems.com, at the applicable time specified in paragraphs (g)(7)(i) and (g)(7)(ii) of this AD. The report must include the inspection results, a description of any discrepancies found, the airplane serial number, and the number of landings and flight hours on the airplane.

(i) If the inspection was done on or after June 21, 2010 (the effective date of AD 2010-10-13): Submit the report within 30 days after the inspection.

(ii) If the inspection was done before June 21, 2010 (the effective date of AD 2010-10-13): Submit the report within 30 days after June 21, 2010.

(h) Retained Corrosion Protection Information, With No Changes

This paragraph restates the corrosion protection information in Note 2 of AD 2010-10-13, with no changes. At the discretion of the airplane owner/operator, corrosion protection may be embodied on those areas subject to a detailed visual inspection, in accordance with paragraph 2.E. or paragraph 2.F. of the Accomplishment Instructions of BAE Systems (Operations) Limited Inspection Service Bulletin ISB.57-072, Revision 1, dated September 25, 2008. Embodiment of enhanced corrosion protection in accordance with paragraph 2.E. of the Accomplishment Instructions of BAE Systems (Operations) Limited Inspection Service Bulletin ISB.57-072, Revision 1, dated September 25, 2008, allows the interval of the repetitive inspections (as required by paragraph (g)(2) of this AD) to be extended in the area(s) of application in accordance with paragraph (g)(2)(i) or (g)(2)(ii) of this AD, as applicable.

(i) Retained Inspection Information, With No Changes

This paragraph restates the inspection information in Note 3 of AD 2010-10-13, with no changes. The inspections required by this AD prevail over the Maintenance Review Board Report (MRBR), Maintenance Planning Document (MPD), Corrosion Prevention and Control Program (CPCP), and Supplemental Structural Inspection Document (SSID) inspections defined in paragraph 1.C.(3) of

BAE Systems (Operations) Limited Inspection Service Bulletin ISB.57-072, Revision 1, dated September 25, 2008.

(j) New Requirement of This AD: Repetitive Inspection

At the applicable time identified in paragraph (j)(1), (j)(2), or (j)(3) of this AD; or within 6 months after the effective date of this AD; whichever occurs later: Perform a detailed visual inspection for cracking and corrosion of the wing fixed leading edge and front spar structure, in accordance with paragraph 2.C. of the Accomplishment Instructions of BAE Systems (Operations) Limited Inspection Service Bulletin ISB.57-072, Revision 3, dated August 31, 2010. Repeat the inspection thereafter at the applicable intervals specified in paragraph 1.D.2. of BAE Systems (Operations) Limited Inspection Service Bulletin ISB.57-072, Revision 3, dated August 31, 2010. Accomplishing the initial inspection required by this paragraph terminates the requirements of paragraph (g) of this AD.

(1) For airplanes with less than 9 years since the date of issuance of the original airworthiness certificate or the date of issuance of the original export certificate of airworthiness as of June 21, 2010 (the effective date of AD 2010-10-13): Within 18 months after June 21, 2010, or within 9 years since the date of issuance of the original airworthiness certificate or the date of issuance of the original export certificate of airworthiness, whichever occurs later.

(2) For airplanes with 9 years or more, but less than 15 years, since the date of issuance of the original airworthiness certificate or the date of issuance of the original export certificate of airworthiness as of June 21, 2010 (the effective date of AD 2010-10-13): Within 18 months after June 21, 2010, or within 16 years since the date of issuance of the original airworthiness certificate or the date of issuance of the original export certificate of airworthiness, whichever occurs first.

(3) For airplanes with 15 years or more since the date of issuance of the original airworthiness certificate or the date of issuance of the original export certificate of airworthiness as of June 21, 2010 (the effective date of AD 2010-10-13): Within 6 months after June 21, 2010.

(k) New Requirement of This AD: Repair

If any crack or corrosion is found during any inspection required by paragraph (j) of this AD: Before further flight, repair using a method approved by the Manager, International Branch, ANM-116, Transport Airplane Directorate, FAA; or the European Aviation Safety Agency (EASA); or BAE Systems (Operations) Limited's EASA Design Organization Approval (DOA).

(l) No Provisions for Terminating Action

Accomplishment of any repair, as required by paragraph (k) of this AD, does not constitute terminating action for inspections required by this AD.

(m) Credit for Previous Actions

This paragraph provides credit for actions required by this AD, if those actions were performed before the effective date of this AD

using BAE Systems (Operations) Limited Inspection Service Bulletin ISB.57-072, dated February 22, 2008; or BAE Systems (Operations) Limited Inspection Service Bulletin ISB.57-072, Revision 1, dated September 25, 2008.

(n) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs)*: The Manager, International Branch, ANM-116, Transport Airplane Directorate, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the International Branch, send it to ATTN: Todd Thompson, Aerospace Engineer, International Branch, ANM-116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057-3356; telephone 425-227-1175; fax 425-227-1149. Information may be emailed to: 9-ANM-116-AMOC-REQUESTS@faa.gov. Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(2) *Contacting the Manufacturer*: As of the effective date of this AD, for any requirement in this AD to obtain corrective actions from a manufacturer, the action must be accomplished using a method approved by the Manager, International Branch, ANM-116, Transport Airplane Directorate, FAA; or the EASA; or BAE Systems (Operations) Limited's EASA DOA. If approved by the DOA, the approval must include the DOA-authorized signature.

(3) *Reporting Requirements*: A federal agency may not conduct or sponsor, and a person is not required to respond to, nor shall a person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a current valid OMB Control Number. The OMB Control Number for this information collection is 2120-0056. Public reporting for this collection of information is estimated to be approximately 5 minutes per response, including the time for reviewing instructions, completing and reviewing the collection of information. All responses to this collection of information are mandatory. Comments concerning the accuracy of this burden and suggestions for reducing the burden should be directed to the FAA at: 800 Independence Ave. SW., Washington, DC 20591, Attn: Information Collection Clearance Officer, AES-200.

(o) Related Information

(1) Refer to Mandatory Continuing Airworthiness Information (MCAI) EASA Airworthiness Directive 2014-004; corrected February 26, 2015; for related information. This MCAI may be found in the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2016-5465.

(2) Service information identified in this AD that is not incorporated by reference is available at the addresses specified in paragraphs (p)(5) and (p)(6) of this AD.

(p) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(3) The following service information was approved for IBR on September 16, 2016.

(i) BAE Systems (Operations) Limited Inspection Service Bulletin ISB.57-072, Revision 3, dated August 31, 2010.

(ii) Reserved.

(4) The following service information was approved for IBR on June 21, 2010 (75 FR 27419, May 17, 2010).

(i) BAE Systems (Operations) Limited Inspection Service Bulletin ISB.57-072, Revision 1, dated September 25, 2008.

(ii) Reserved.

(5) For service information identified in this AD, contact BAE Systems (Operations) Limited, Customer Information Department, Prestwick International Airport, Ayrshire, KA9 2RW, Scotland, United Kingdom; telephone +44 1292 675207; fax +44 1292 675704; email RAPublications@baesystems.com; Internet <http://www.baesystems.com/Businesses/RegionalAircraft/index.htm>.

(6) You may view this service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425-227-1221.

(7) You may view this service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202-741-6030, or go to: <http://www.archives.gov/federal-register/cfr/ibr-locations.html>.

Issued in Renton, Washington, on July 27, 2016.

Victor Wicklund,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA-2015-3989; Directorate Identifier 2014-NM-250-AD; Amendment 39-18600; AD 2016-16-02]

RIN 2120-AA64

Airworthiness Directives; Airbus Airplanes

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: We are adopting a new airworthiness directive (AD) for all Airbus Model A318, A319, A320, and A321 series airplanes. This AD was prompted by reports of premature aging of certain passenger chemical oxygen generators that resulted in the generators failing to activate. This AD requires an inspection to determine if certain passenger chemical oxygen generators are installed and replacement of affected passenger chemical oxygen generators. We are issuing this AD to prevent failure of the passenger chemical oxygen generator to activate and consequently not deliver oxygen during an emergency, possibly resulting in injury to the airplane occupants.

DATES: This AD is effective September 16, 2016.

The Director of the Federal Register approved the incorporation by reference of certain publications listed in this AD as of September 16, 2016.

ADDRESSES: For Airbus service information identified in this final rule, contact Airbus, Airworthiness Office—EIAS, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France; telephone: +33 5 61 93 36 96; fax: +33 5 61 93 44 51; email: account.airworth-eas@airbus.com; Internet: <http://www.airbus.com>. For B/E Aerospace service information identified in this final rule, contact B/E Aerospace Inc., 10800 Pflumm Road, Lenexa, KS 66215; telephone: 913-338-9800; fax: 913-469-8419; Internet: <http://beaerospace.com/home/globalsupport>. You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425-227-1221. It is also available on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2015-3989.

Examining the AD Docket

You may examine the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2015-3989; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Office (telephone: 800-647-5527) is Docket Management Facility, U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT:

Sanjay Ralhan, Aerospace Engineer, International Branch, ANM-116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057-3356; telephone: 425-227-1405; fax: 425-227-1149.

SUPPLEMENTARY INFORMATION:

Discussion

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to all Airbus Model A318, A319, A320, and A321 series airplanes. The NPRM published in the **Federal Register** on October 19, 2015 (80 FR 63136) (“the NPRM”). The NPRM was prompted by reports of premature aging of certain passenger chemical oxygen generators that resulted in the generators failing to activate. The NPRM proposed to require an inspection to determine if certain passenger chemical oxygen generators are installed and replacement of affected passenger chemical oxygen generators. We are issuing this AD to prevent failure of the passenger chemical oxygen generator to activate and consequently not deliver oxygen during an emergency, possibly resulting in injury to the airplane occupants.

The European Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Union, has issued EASA AD 2015-0117, dated June 24, 2015; corrected August 7, 2015 (referred to after this as the Mandatory Continuing Airworthiness Information, or “the MCAI”); to correct an unsafe condition for all Airbus Model A318, A319, A320, and A321 series airplanes. The MCAI states:

Reports have been received indicating premature ageing of certain chemical oxygen generators, Part Number (P/N) 117042-XX (XX representing any numerical value), manufactured by B/E Aerospace. Some

operators reported that when they tried to activate generators, some older units failed to activate. Given the number of failed units reported, all generators manufactured in 1999, 2000 and 2001 were considered unreliable.

This condition, if not corrected, could lead to failure of the generator to activate and consequently not deliver oxygen during an emergency, possibly resulting in injury to aeroplane occupants.

To address this potential unsafe condition, Airbus issued Alert Operators Transmission (AOT) A35N006-14, making reference to B/E Aerospace Service Information Letter (SIL) D1019-01 (currently at Revision 1) and B/E Aerospace Service Bulletin (SB) 117042-35-001.

Consequently, EASA issued AD * * * (later revised) to require identification and replacement of the affected oxygen generators.

Since EASA AD 2014-0275R1 was issued, and following new investigation results, EASA have decided to introduce a life limitation concerning all P/N 117042-XX chemical oxygen generators, manufactured by B/E Aerospace.

For the reason described above, this [EASA] AD retains the requirements of the EASA AD 2014-0275R1, which is superseded, expands the scope of the [EASA] AD to include chemical oxygen generators manufactured after 2001, and requires their removal from service before exceeding 10 years since date of manufacture.

This [EASA] AD is re-published to correct a template error, removing the word ‘Proposed’ and replacing the acronym ‘PAD’ with ‘AD’.

You may examine the MCAI in the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2015-3989.

Comments

We gave the public the opportunity to participate in developing this AD. The following presents the comments received on the NPRM (80 FR 63136, October 19, 2015) and the FAA’s response to each comment.

Requests To Extend Compliance Times

United Airlines (UAL) and Delta Air Lines, Inc. (DAL) requested an extension of the 30-day compliance time for the part number inspection. UAL stated that the time required for the part number inspection and the size of UAL’s fleet is prohibitive to meeting the 30-day compliance time and requested that we extend the initial compliance time to 24 months. DAL stated that the time required for the part number inspection and the size of DAL’s fleet is prohibitive to meeting the 30-day compliance time and requested that we extend the initial compliance time for the part number inspection to 90 days. DAL pointed out that a 90-day compliance time would

allow ample time to route airplanes and schedule the required work on the first group of affected airplanes.

We disagree with the requests to extend the 30-day compliance time for the part number inspection. The commenters did not provide any justification to substantiate how increasing the compliance time from 30 days to 90 days or 24 months would provide an acceptable level of safety. After considering all of the available information, we have determined that the compliance time, as proposed, represents an appropriate interval of time in which the required actions can be performed in a timely manner with the affected fleet, while still maintaining an adequate level of safety. In developing an appropriated compliance time, we considered the safety implications, parts availability, and normal maintenance schedules for timely accomplishment of the replacement, overall risk to the fleet, including the severity of the identified unsafe condition and the likelihood of the occurrence of the unsafe condition. However, under the provisions of paragraph (n)(1) of this AD, operators may apply for an extension of the compliance time by providing rationale explaining why a compliance time extension provides an acceptable level of safety. We have not changed this AD in this regard.

Request To Revise Cost Estimates

DAL requested that we revise the Costs of Compliance section provided in the NPRM. DAL pointed out that the cost estimate may not properly account for the number of products per airplane and that they believe the costs are significantly higher than the estimate included in the NPRM. DAL also provided revised cost estimates based on their fleet.

We partially agree with the request to revise the Costs of Compliance section. We disagree that the cost estimate should be revised based on airplane configuration, findings, and associated costs based only on the DAL fleet. The configuration of each airplane and inspection findings may vary among U.S. operators. We agree that the Costs of Compliance section provided in the NPRM might not have accurately represented the actual cost. After considering the data presented by DAL, we also agree that the number of work-hours required is higher than our previous estimate. The Costs of Compliance section of this final rule has been revised accordingly.

Request To Remove Reporting Requirement

UAL requested that we remove the reporting requirement in the proposed AD. UAL pointed out that reporting could expose operators to compliance risk. UAL also pointed out that they do not find any value in the information being requested by the reporting requirement. UAL stated that they will provide any feedback as requested.

We disagree with the request to remove the reporting requirement. We disagree that the information requested provides no value. Reporting is necessary for the airframe manufacturer to determine the extent of the unsafe condition and any necessary follow-up actions. We have not changed this AD in this regard.

Request To Reference Revised Service Information

Mr. Ricardo Erazo requested that we revise the AD to reference B/E Aerospace Service Bulletin 117042-35-001, Revision 004, dated October 13, 2015. Mr. Erazo did not provide rationale for this request.

We agree with the request to revise this AD to reference B/E Aerospace Service Bulletin 117042-35-001, Revision 004, dated October 13, 2015, and have revised this AD accordingly. B/E Aerospace Service Bulletin 117042-

35-001, Revision 004, dated October 13, 2015, clarifies references to additional service information. As a result, we have also added paragraph (m) to this AD, to give credit for actions accomplished before the effective date of this AD using B/E Aerospace Service Bulletin 117042-35-001, dated December 10, 2014; B/E Aerospace Service Bulletin 117042-35-001, Revision 001, dated April 9, 2015; B/E Aerospace Service Bulletin 117042-35-001, Revision 002, dated May 29, 2015; or B/E Aerospace Service Bulletin 117042-35-001, Revision 003, dated June 25, 2015.

Change to Service Information References

We have revised paragraphs (h) and (i) of this AD to refer to Airbus AOT A35N006-14, dated December 10, 2014, including Appendix 1, as an additional appropriate source of service information for the 15-minute passenger chemical oxygen generators.

Conclusion

We reviewed the relevant data, considered the comments received, and determined that air safety and the public interest require adopting this AD with the changes described previously and minor editorial changes. We have determined that these minor changes:

- Are consistent with the intent that was proposed in the NPRM for correcting the unsafe condition; and
- Do not add any additional burden upon the public than was already proposed in the NPRM.

We also determined that these changes will not increase the economic burden on any operator or increase the scope of this AD.

Related Service Information Under 1 CFR Part 51

We reviewed the following service information.

- Airbus AOT A35N006-14, dated December 10, 2014, including Appendix 1.
- B/E Aerospace Inc. Service Bulletin 117042-35-001, Revision 004, dated October 13, 2015.

This service information describes procedures to replace certain passenger chemical oxygen generators. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the ADDRESSES section.

Costs of Compliance

We estimate that this AD affects 953 airplanes of U.S. registry.

We estimate the following costs to comply with this AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Part number inspection	4 work-hours × \$85 per hour = \$340	\$0	\$340	\$324,020
Reporting	1 work-hour × \$85 per hour = \$85	0	85	81,005

We estimate the following costs to do any necessary replacements that would

be required based on the results of the required inspection. We have no way of

determining the number of airplanes that might need these replacements:

ON-CONDITION COSTS

Action	Labor cost	Parts cost	Cost per product
Replacement	Up to 25 work-hours × \$85 per hour = \$2,125	\$390	Up to \$2,515.

Paperwork Reduction Act

A federal agency may not conduct or sponsor, and a person is not required to respond to, nor shall a person be subject to penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a current valid OMB control number. The control number for the collection of information required by this AD is 2120-0056. The paperwork cost associated with this AD

has been detailed in the Costs of Compliance section of this document and includes time for reviewing instructions, as well as completing and reviewing the collection of information. Therefore, all reporting associated with this AD is mandatory. Comments concerning the accuracy of this burden and suggestions for reducing the burden should be directed to the FAA at 800 Independence Ave. SW., Washington, DC 20591, ATTN: Information Collection Clearance Officer, AES-200.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA’s authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. “Subtitle VII: Aviation Programs,” describes in more detail the scope of the Agency’s authority.

We are issuing this rulemaking under the authority described in “Subtitle VII, Part A, Subpart III, Section 44701: General requirements.” Under that

section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

1. Is not a “significant regulatory action” under Executive Order 12866;
2. Is not a “significant rule” under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979);
3. Will not affect intrastate aviation in Alaska; and
4. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

- 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

2016–16–02 Airbus: Amendment 39–18600. Docket No. FAA–2015–3989; Directorate Identifier 2014–NM–250–AD.

(a) Effective Date

This AD is effective September 16, 2016.

(b) Affected ADs

None.

(c) Applicability

This AD applies to the airplanes identified in paragraphs (c)(1), (c)(2), (c)(3), and (c)(4) of this AD; certificated in any category; all manufacturer serial numbers, except those that have embodied Airbus modification 33125 (gaseous system for all oxygen containers) in production.

- (1) Airbus Model A318–111, –112, –121, and –122 airplanes.
- (2) Airbus Model A319–111, –112, –113, –114, –115, –131, –132, and –133 airplanes.
- (3) Airbus Model A320–211, –212, –214, –231, –232, and –233 airplanes.
- (4) Airbus Model A321–111, –112, –131, –211, –212, –213, –231, and –232 airplanes.

(d) Subject

Air Transport Association (ATA) of America Code 35, Oxygen.

(e) Reason

This AD was prompted by reports of premature aging of certain passenger chemical oxygen generators that resulted in the generators failing to activate. We are issuing this AD to prevent failure of the passenger chemical oxygen generator to activate and consequently not deliver oxygen during an emergency, possibly resulting in injury to the airplane occupants.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Part Number Inspection

Within 30 days after the effective date of this AD: Do a one-time inspection of passenger chemical oxygen generators, part numbers (P/N) 117042–02 (15 minutes (min)—2 masks), 117042–03 (15 min—3 masks), 117042–04 (15 min—4 masks), 117042–22 (22 min—2 masks), 117042–23 (22 min—3 masks), and 117042–24 (22 min—4 masks) to determine the date of manufacture as specified in Airbus Alert Operators Transmission (AOT) A35N006–14, dated December 10, 2014, including Appendix 1. Refer to figures 1 and 2 to paragraph (g) of this AD for the location of the date. A review of airplane maintenance records is acceptable for the inspection required by this paragraph, provided the date of manufacture can be conclusively determined by that review.

Figure 1 to Paragraph (g) of this AD - Location of Date (MM-YY)

**Figure 2 to Paragraph (g) of this AD - MFG.DATE (06-02 = June 2002)
Example**

(h) Replacement of Passenger Chemical Oxygen Generators Manufactured in 1999, 2000, or 2001

If, during any inspection required by paragraph (g) of this AD, any passenger chemical oxygen generator having a date of manufacture in 1999, 2000, or 2001 is found: At the applicable time specified in paragraph (h)(1), (h)(2), or (h)(3) of this AD, remove and replace the affected passenger chemical oxygen generator with a serviceable unit, in accordance with Airbus AOT A35N006-14, dated December 10, 2014, including Appendix 1 (for 15-minute and 22-minute passenger chemical oxygen generators); or the Accomplishment Instructions of B/E Aerospace Service Bulletin 117042-35-001, Revision 004, dated October 13, 2015 (for 15-

minute passenger chemical oxygen generators).

(1) For passenger chemical oxygen generators that have a date of manufacture in 1999: Within 30 days after the effective date of this AD.

(2) For passenger chemical oxygen generators that have a date of manufacture in 2000: Within 6 months after the effective date of this AD.

(3) For passenger chemical oxygen generators that have a date of manufacture in 2001: Within 12 months after the effective date of this AD.

(i) Replacement of Passenger Chemical Oxygen Generators Manufactured in 2002 and Later

If, during any inspection required by paragraph (g) of this AD, any passenger

chemical oxygen generator having a date specified in table 1 to paragraph (i) of this AD is found: At the applicable time specified in table 1 to paragraph (i) of this AD, remove and replace the affected passenger chemical oxygen generator with a serviceable unit, in accordance with Airbus AOT A35N006-14, dated December 10, 2014, including Appendix 01, undated (for 15-minute and 22-minute passenger chemical oxygen generators); or the Accomplishment Instructions of B/E Aerospace Service Bulletin 117042-35-001, Revision 004, dated October 13, 2015 (for 15-minute passenger chemical oxygen generators).

TABLE 1 TO PARAGRAPH (i) OF THIS AD—REPLACEMENT COMPLIANCE TIMES

Year of manufacture	Compliance time
2002	Within 12 months after the effective date of this AD.
2003	Within 16 months after the effective date of this AD.
2004	Within 20 months after the effective date of this AD.
2005	Within 24 months after the effective date of this AD.
2006	Within 28 months after the effective date of this AD.

TABLE 1 TO PARAGRAPH (i) OF THIS AD—REPLACEMENT COMPLIANCE TIMES—Continued

Year of manufacture	Compliance time
2007	Within 32 months after the effective date of this AD.
2008	Within 36 months after the effective date of this AD.
2009	Before exceeding 10 years since date of manufacture of the passenger chemical oxygen generator.

(j) Definition of Serviceable

For the purpose of this AD, a serviceable unit is a passenger chemical oxygen generator having P/N 117042-XX with a manufacturing date not older than 10 years, or any other approved part number, provided that the generator has not exceeded the life limit established for that generator by the manufacturer.

(k) Reporting

At the applicable time specified in paragraph (k)(1) or (k)(2) of this AD, submit a report of the findings (both positive and negative) of the inspection required by paragraph (g) of this AD, in accordance with paragraph 7, "Reporting," of Airbus AOT A35N006-14, dated December 10, 2014, including Appendix 1. The report must include the information specified in Appendix 1 of Airbus AOT A35N006-14, dated December 10, 2014.

(1) If the inspection was done on or after the effective date of this AD: Submit the report within 30 days after the inspection.

(2) If the inspection was done before the effective date of this AD: Submit the report within 30 days after the effective date of this AD.

(l) Parts Installation Limitation

As of the effective date of this AD, no person may install a passenger chemical oxygen generator, unless it is determined, prior to installation, that the oxygen generator is a serviceable unit as specified in paragraph (j) of this AD.

(m) Credit for Previous Actions

This paragraph provides credit for actions required by paragraphs (h) and (i) of this AD, if those actions were performed before the effective date of this AD using the service information specified in paragraphs (m)(1), (m)(2), (m)(3), or (m)(4).

(1) B/E Aerospace Service Bulletin 117042-35-001, dated December 10, 2014.

(2) B/E Aerospace Service Bulletin 117042-35-001, Revision 001, dated April 9, 2015.

(3) B/E Aerospace Service Bulletin 117042-35-001, Revision 002, dated May 29, 2015.

(4) B/E Aerospace Service Bulletin 117042-35-001, Revision 003, dated June 25, 2015.

(n) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs)*: The Manager, International Branch, ANM-116, Transport Airplane Directorate, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19.

In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the International Branch, send it to ATTN: Sanjay Ralhan, Aerospace Engineer, International Branch, ANM-116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057-3356; telephone: 425-227-1405; fax: 425-227-1149. Information may be emailed to: 9-ANM-116-AMOC-REQUESTS@faa.gov. Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office. The AMOC approval letter must specifically reference this AD.

(2) *Contacting the Manufacturer*: For any requirement in this AD to obtain corrective actions from a manufacturer, the action must be accomplished using a method approved by the Manager, International Branch, ANM-116, Transport Airplane Directorate, FAA; or the European Aviation Safety Agency (EASA); or Airbus's EASA Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature.

(3) *Reporting Requirements*: A federal agency may not conduct or sponsor, and a person is not required to respond to, nor shall a person be subject to a penalty for failure to comply with, a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a current valid OMB Control Number. The OMB Control Number for this information collection is 2120-0056. Public reporting for this collection of information is estimated to be approximately 5 minutes per response, including the time for reviewing instructions, completing and reviewing the collection of information. All responses to this collection of information are mandatory. Comments concerning the accuracy of this burden and suggestions for reducing the burden should be directed to the FAA at: 800 Independence Ave. SW., Washington, DC 20591, Attn: Information Collection Clearance Officer, AES-200.

(o) Related Information

(1) Refer to Mandatory Continuing Airworthiness Information (MCAI) European Aviation Safety Agency (EASA) AD 2015-0117, dated June 24, 2015; corrected August 7, 2015; for related information. This MCAI may be found in the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2015-3989.

(2) Service information identified in this AD that is not incorporated by reference is

available at the addresses specified in paragraphs (p)(3) and (p)(4) of this AD.

(p) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(i) Airbus Alert Operators Transmission A35N006-14, dated December 10, 2014, including Appendix 01, undated.

(ii) B/E Aerospace Service Bulletin 117042-35-001, Revision 004, dated October 13, 2015.

(3) For Airbus service information identified in this AD, contact Airbus, Airworthiness Office—EIAS, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France; telephone: +33 5 61 93 36 96; fax: +33 5 61 93 44 51; email: account.airworth-eas@airbus.com; Internet: <http://www.airbus.com>. BILLING CODE 4910-13-P

DEPARTMENT OF TRANSPORTATION**Federal Aviation Administration****14 CFR Part 71**

[Docket No. FAA–2016–5456; Airspace
Docket No. 16–AGL–11]

**Establishment of Class E Airspace;
Linton, ND**

AGENCY: Federal Aviation
Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action establishes Class E en route domestic airspace in the Linton, ND, area. Controlled airspace is necessary at Linton Municipal Airport to facilitate vectoring of Instrument Flight Rules (IFR) aircraft under control of Minneapolis Air Route Traffic Control Center (ARTCC). This action enhances the safety and management of IFR operations within the National Airspace System (NAS).

DATES: Effective 0901 UTC, November 10, 2016. The Director of the Federal Register approves this incorporation by reference action under title 1, Code of Federal Regulations, part 51, subject to the annual revision of FAA Order 7400.9 and publication of conforming amendments.

ADDRESSES: FAA Order 7400.9Z, Airspace Designations and Reporting Points, and subsequent amendments can be viewed on line at <http://www.faa.gov/airtraffic/publications/>. For further information, you can contact the Airspace Policy Group, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone: 202–267–8783. The Order is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030, or go to http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html.

FAA Order 7400.9, Airspace Designations and Reporting Points, is published yearly and effective on September 15.

FOR FURTHER INFORMATION CONTACT: Raul Garza, Jr., Central Service Center, Operations Support Group, Federal Aviation Administration, Southwest Region, 10101 Hillwood Parkway, Fort Worth, TX 76177; telephone: (817) 222–5874.

SUPPLEMENTARY INFORMATION:**Authority for This Rulemaking**

The FAA’s authority to issue rules regarding aviation safety is found in

Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency’s authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it establishes controlled airspace at Linton Municipal Airport, Linton, ND.

History

On May 6, 2016, the FAA published in the **Federal Register** a notice of proposed rulemaking (NPRM) to establish Class E Airspace at Linton Municipal Airport, Linton, ND (81 FR 27356) Docket No. FAA–2016–5456. Interested parties were invited to participate in this rulemaking effort by submitting written comments on the proposal to the FAA. One comment in support of the proposal was received from the National Business Aviation Association.

Class E airspace designations are published in paragraph 6006 of FAA Order 7400.9Z dated August 6, 2015, and effective September 15, 2015, which is incorporated by reference in 14 CFR part 71.1. The Class E airspace designations listed in this document will be published subsequently in the Order.

Availability and Summary of Documents for Incorporation by Reference

This document amends FAA Order 7400.9Z, Airspace Designations and Reporting Points, dated August 6, 2015, and effective September 15, 2015. FAA Order 7400.9Z is publicly available as listed in the **ADDRESSES** section of this document. FAA Order 7400.9Z lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Rule

This amendment to Title 14, Code of Federal Regulations (14 CFR) part 71 establishes Class E airspace extending upward from 1,200 feet above the surface within a 125-mile radius of Linton Municipal Airport, Linton, ND, to facilitate vectoring of IFR aircraft under control of Minneapolis ARTCC. Controlled airspace is needed for the safety and management of IFR operations within the NAS.

Class E airspace designations are published in Paragraph 6006 of FAA Order 7400.9Z, dated August 6, 2015, and effective September 15, 2015, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designations listed in this document will be published subsequently in the Order.

Regulatory Notices and Analyses

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current, is non-controversial and unlikely to result in adverse or negative comments. It, therefore: (1) Is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that only affects air traffic procedures and air navigation, it is certified that this rule, when promulgated, does not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

The FAA has determined that this action qualifies for categorical exclusion under the National Environmental Policy Act in accordance with FAA Order 1050.1F, “Environmental Impacts: Policies and Procedures,” paragraph 5–6.5a. This airspace action is not expected to cause any potentially significant environmental impacts, and no extraordinary circumstances exists that warrant preparation of an environmental assessment.

Lists of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

Adoption of the Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g); 40103, 40113, 40120, E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order 7400.9Z, Airspace Designations and Reporting Points, dated August 6, 2015, effective September 15, 2015, is amended as follows:

Paragraph 6006 En Route Domestic Airspace Areas.

SUPPLEMENTARY INFORMATION:**Authority for This Rulemaking**

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it establishes controlled airspace at Platte Municipal Airport, Platte, SD.

History

On May 6, 2016, the FAA published in the **Federal Register** a notice of proposed rulemaking (NPRM) to establish Class E Airspace in the Platte, SD area. (81 FR 27355) Docket No. FAA-2016-5386. Interested parties were invited to participate in this rulemaking effort by submitting written comments on the proposal to the FAA. One comment in support of the proposal was received from the National Business Aviation Association.

Class E airspace designations are published in paragraph 6006 of FAA Order 7400.9Z dated August 6, 2015, and effective September 15, 2015, which is incorporated by reference in 14 CFR part 71.1. The Class E airspace designations listed in this document will be published subsequently in the Order.

Availability and Summary of Documents for Incorporation by Reference

This document amends FAA Order 7400.9Z, Airspace Designations and Reporting Points, dated August 6, 2015, and effective September 15, 2015. FAA Order 7400.9Z is publicly available as listed in the **ADDRESSES** section of this document. FAA Order 7400.9Z lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Rule

This amendment to Title 14, Code of Federal Regulations (14 CFR) part 71 establishes Class E airspace extending upward from 1,200 feet above the surface within a 75-mile radius of Platte Municipal Airport, Platte, SD, to facilitate vectoring of IFR aircraft under control of Minneapolis ARTCC. Controlled airspace is needed for the safety and management of IFR operations within the NAS.

Class E airspace designations are published in Paragraph 6006 of FAA Order 7400.9Z, dated August 6, 2015, and effective September 15, 2015, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designations listed in this document will be published subsequently in the Order.

Regulatory Notices and Analyses

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current, is non-controversial and unlikely to result in adverse or negative comments. It, therefore: (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that only affects air traffic procedures and air navigation, it is certified that this rule, when promulgated, does not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

The FAA has determined that this action qualifies for categorical exclusion under the National Environmental Policy Act in accordance with FAA Order 1050.1F, "Environmental Impacts: Policies and Procedures," paragraph 5-6.5a. This airspace action is not expected to cause any potentially

significant environmental impacts, and no extraordinary circumstances exists that warrant preparation of an environmental assessment.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it removes Class D airspace at North Air Force Auxiliary Field, North, SC.

History

On March 28, 2016, the FAA published in the **Federal Register** a notice of proposed rulemaking (NPRM) to remove Class D airspace at North Air Force Auxiliary Field, North, SC., (81

FR 17111) FAA 2016–1074. No comments were received.

Class D airspace designations are published in paragraphs 5000 of FAA Order 7400.9Z dated August 6, 2015, and effective September 15, 2015, which is incorporated by reference in 14 CFR part 71.1. The Class D airspace designations listed in this document will be published subsequently in the Order.

Availability and Summary of Documents for Incorporation by Reference

This document amends FAA Order 7400.9Z, Airspace Designations and Reporting Points, dated August 6, 2015, and effective September 15, 2015. FAA Order 7400.9Z is publicly available as listed in the **ADDRESSES** section of this document. FAA Order 7400.9Z lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Rule

This amendment to Title 14, Code of Federal Regulations (14 CFR) part 71 removes Class D airspace at North Air Force Auxiliary Field, North, SC. The air traffic control tower is no longer in use. Therefore, the Class D airspace area is no longer necessary.

Regulatory Notices and Analyses

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that only affects air traffic procedures and air navigation, it is certified that this rule, when promulgated, does not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

The FAA has determined that this action qualifies for categorical exclusion under the National Environmental Policy Act in accordance with FAA Order 1050.1F, "Environmental Impacts: Policies and Procedures," paragraph 5–6.5a. This airspace action is not expected to cause any potentially significant environmental impacts, and no extraordinary circumstances exist

that warrant preparation of an environmental assessment.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

Adoption of the Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for Part 71 continues to read as follows:

FOR FURTHER INFORMATION CONTACT:

Eileen A. Donovan, Deputy Director, 202–418–5096, edonovan@cftc.gov; M. Laura Astrada, Associate Director, 202–418–7622, lastrada@cftc.gov; or Parisa Abadi, Attorney-Advisor, 202–418–6620, pabadi@cftc.gov, in each case, at the Division of Clearing and Risk, Commodity Futures Trading Commission, Three Lafayette Centre, 1155 21st Street NW., Washington, DC 20581.

SUPPLEMENTARY INFORMATION: On June 2, 2016, the Commission published for public comment in the **Federal Register** a proposed order that would exempt Federal Reserve Banks that provide customer accounts and other services to certain designated financial market utilities registered with the Commission from Sections 4d and 22 of the CEA.¹ The proposed order would permit Federal Reserve Banks to hold money, securities, and property deposited into a customer account by certain designated financial market utilities in accordance with the standards to which Federal Reserve Banks are held.

In response to the request for public comment, CME Group Inc. noted that the proposed order would be inconsistent with Regulation

1.20(g)(4)(ii).² Commission Regulation 1.20(g)(4)(ii) requires that a DCO obtain from a Federal Reserve Bank acting as a depository for customer funds a written acknowledgment that the customer funds deposited therein are being held in accordance with Section 4d of the CEA; however, pursuant to the terms of the proposed order, the Federal Reserve Banks would be exempt from Section 4d. The Commission subsequently issued a final exemptive order that is substantively similar to the proposed order. In the **Federal Register** notice issuing the final exemptive order, the Commission noted that, in light of the comment, it had determined to repeal the written acknowledgment requirement with respect to customer accounts held with a Federal Reserve Bank³ in a separate **Federal Register** notice. The final exemptive order will render these provisions inapplicable, as the Federal Reserve Banks will not be held to the requirements of Section 4d of the CEA. Therefore, the Commission is amending Regulation 1.20 to remove the acknowledgment letter requirement for customer funds deposited by a DCO with a Federal Reserve Bank. The Commission welcomes any comments and/or questions regarding this amendment.

List of Subjects in 17 CFR Part 1

Brokers, Commodity futures, Consumer protection, Reporting and recordkeeping requirements.

For the reasons stated in the preamble, the Commodity Futures Trading Commission amends 17 CFR part 1 as follows:

PART 1—GENERAL REGULATIONS UNDER THE COMMODITY EXCHANGE ACT

■ 1. The authority citation for part 1 continues to read as follows:

Authority: 7 U.S.C. 1a, 2, 5, 6, 6a, 6b, 6c, 6d, 6e, 6f, 6g, 6h, 6i, 6k, 6l, 6m, 6n, 6o, 6p, 6r, 6s, 7, 7a–1, 7a–2, 7b, 7b–3, 8, 9, 10a, 12, 12a, 12c, 13a, 13a–1, 16, 16a, 19, 21, 23, and 24 (2012).

² 17 CFR 1.20(g)(4)(ii). Regulation 1.20(g)(4)(ii) provides that a DCO shall obtain from a Federal Reserve Bank only a written acknowledgment that: (A) The Federal Reserve Bank was informed that the customer funds deposited therein are those of customers and are being held in accordance with the provisions of section 4d of the Act and Commission regulations thereunder; and (B) The Federal Reserve Bank agrees to reply promptly and directly to any request from Commission staff for confirmation of account balances or provision of any other information regarding or related to an account. *Id.*

³ Specifically, the Commission is revising paragraphs (g)(4)(i) and (g)(4)(ii) of Regulation 1.20, and repealing paragraphs (g)(4)(i)(A) and (g)(4)(ii)(B) of Regulation 1.20.

¹ Notice of Proposed Order and Request for Comment on Proposal to Exempt, Pursuant to the Authority in Section 4(c) of the Commodity Exchange Act, the Federal Reserve Banks from Sections 4d and 22 of the Commodity Exchange Act, 81 FR 35337 (June 2, 2016).

■ 2. Amend § 1.20 by revising paragraphs (g)(4)(i) and (ii) to read as follows:

§ 1.20 Futures customer funds to be segregated and separately accounted for.

* * * * *

(g) * * *

(4) * * *

(i) A derivatives clearing organization must obtain a written acknowledgment from each depository prior to or contemporaneously with the opening of a futures customer funds account; *provided, however*, that a derivatives clearing organization is not required to obtain a written acknowledgment from a Federal Reserve Bank with which it has opened a futures customer funds account.

(ii) The written acknowledgment must be in the form as set out in appendix B to this part.

* * * * *

Issued in Washington, DC, on August 8, 2016, by the Commission.

Christopher J. Kirkpatrick,
Secretary of the Commission.

Note: The following appendices will not appear in the Code of Federal Regulations.

Appendices to Written Acknowledgment of Customer Funds From Federal Reserve Banks—Commission Voting Summary, Chairman’s Statement, and Commissioner’s Statement

Appendix 1—Commission Voting Summary

On this matter, Chairman Massad and Commissioners Bowen and Giancarlo voted in the affirmative. No Commissioner voted in the negative.

Appendix 2—Statement of Chairman Timothy G. Massad

Today, the Commission continues its work to ensure the resiliency of clearinghouses and protect customers in our markets. To provide the necessary context for these efforts, it is useful to look back at recent history.

Most participants in our markets will recall what happened at the beginning of the financial crisis in September 2008, when the Reserve Fund—a money market fund—“broke the buck” following the bankruptcy of Lehman Brothers. Redemptions were suspended and investors were not able to make withdrawals. As a result, many futures commission merchants (FCMs) were not able to access customer funds invested in the Reserve Fund. Absent relief by the CFTC, many would have been undercapitalized, potentially ending up in bankruptcy. In addition, clearinghouses could not liquidate investments in the Reserve Fund. And there could have easily been a widespread run on money market funds, but for the emergency actions taken by the U.S. government.

As a result of the crisis, as well as the collapse of MF Global, the CFTC and our self-regulatory organizations took a number of actions to better protect customer funds. We required customer funds to be strictly segregated and limited the ways they can be invested. We enhanced accounting and auditing procedures at FCMs, including by requiring daily verification from depositories of the amounts deposited by FCMs.

Today, CFTC rules require that customer funds be invested in highly liquid assets and be convertible into cash within one business day without a material discount in value. Our rules also require that clearinghouses invest initial margin deposits in a manner that allows them to promptly liquidate any such investment.

Over the last few years, the Securities and Exchange Commission (SEC) has also taken action in response to the lessons of the financial crisis, by adopting a number of measures to address the potential vulnerabilities of money market funds. One such recent reform, which takes effect in October of this year, sets forth the circumstances where prime money market funds are permitted, or in some circumstances required, to suspend redemptions in order to prevent the risk of investor runs.

While we recognize the benefit of the SEC’s new rule in preventing investor runs, a suspension of redemptions by a money market fund would mean investments in such funds are not accessible and cannot be promptly liquidated. Such an event could result in customers, FCMs, and clearinghouses being unable to access the funds necessary to satisfy margin obligations.

Therefore, CFTC staff is today providing guidance making clear that Commission rules prohibit a clearing member from investing customer funds, or a clearinghouse from investing amounts deposited as initial margin, in such money market funds.

Some industry participants have suggested we should interpret or revise our rules to permit investments of at least some customer monies in such money market funds unless and until redemptions are suspended. We have declined to do so, as it would be too late to protect customers at that point. Moreover, there are alternatives to prime funds, including certain government money markets funds or Treasury securities. In fact, investments in prime money market funds represent a relatively small portion of the total customer funds on deposit and the total initial margin deposits at clearinghouses. Some of our clearinghouses and FCMs do not have any investments in prime funds.

Staff has been careful not to be overly restrictive, and therefore has issued no-action relief to allow FCMs to invest certain “excess” proprietary funds held in customer accounts in these money market funds. That is, our existing rules require FCMs to deposit their own funds (*i.e.*, targeted residual interest) into customer accounts to make sure that there are sufficient funds in the segregated customer accounts to cover all obligations due to customers. FCMs frequently deposit an amount of their own funds that is in excess of the targeted residual interest amount required under our rules,

and that excess amount can be withdrawn at any time. Indeed, if an FCM should default, customers—and the system as a whole—are better off if excess funds are on deposit, and we do not wish to incentivize FCMs to withdraw such excess funds from the segregated account. Therefore, the no action relief makes clear that FCMs can continue to invest their own funds in excess of their targeted residual interest in such money market funds, even though they cannot invest the customer funds—or any proprietary funds they are required to deposit—in this manner.

Finally, the Commission is taking action today that will further ensure the safety of customer funds. We are issuing an order that will help make it possible for systemically important clearinghouses to deposit customer funds at Federal Reserve Banks. Our order makes clear that a Federal Reserve Bank that opens such an account would be subject to the same standards of liability that generally apply to it as a depository, rather than any potentially conflicting standard under the commodity laws.

Although Federal Reserve accounts for customer funds held by systemically important clearinghouses do not exist today, they are allowed under the Dodd-Frank Act, and we have been working with the Board of Governors to facilitate them. The two clearinghouses designated as systemically important in our markets have been approved to open Federal Reserve Bank accounts for their proprietary funds. We hope that with today’s action, accounts for customer funds can be opened soon. Doing so will help protect customer funds and enhance the resiliency of clearinghouses.

I thank the dedicated CFTC staff and my fellow Commissioners for their work on these matters.

Appendix 3—Concurring Statement of Commissioner Sharon Y. Bowen

I am pleased to concur with the two Commission actions: the “Order Exempting the Federal Reserve Banks from Sections 4d and 22 of the Commodity Exchange Act” and “Written Acknowledgment of Customer Funds from Federal Reserve Banks.” I have long believed that, in order to protect customer funds, we need to keep that money at our central bank. In the event of a major market event, I, and I believe the rest of the American people, would feel much better knowing that investors’ money is at the Federal Reserve instead of at multiple central counterparties. I am glad that our agency and the Federal Reserve have come to an agreement on an effective way to accomplish this.

I am similarly pleased with the Division of Clearing and Risk’s (DCR) “Staff Interpretation Regarding CFTC Part 39 In Light Of Revised SEC Rule 2a–7,” which clearly outlines the staff’s understanding that, given the limitations that the Securities and Exchange Commission (SEC) has imposed on redemptions for prime money market funds, that they are no longer considered Rule 1.25 assets. This is the correct interpretation. The key feature in a Rule 1.25 asset is that it must be available quickly in times of crisis or illiquidity. And

we know that funds are more likely to close the gates on redemptions when market dislocation happens. That is just the time when futures commission merchants (FCMs) and customers would need access to their money, and a multi-day delay can mean catastrophe for some businesses.

For that very reason, I have concerns about the Division of Swap Dealer and Intermediary Oversight's (DSIO) "No-Action Relief With Respect to CFTC Regulation 1.25 Regarding Money Market Funds." While the 4(c) exemption and the DCR interpretation are clearly customer protection initiatives, the DSIO no action letter is not. This no action letter would allow FCMs to keep money in segregated customer accounts that actually would not be readily available in a crisis. Thus, while it may appear that an FCM had considerable funds available to settle customer accounts during a market dislocation, in fact that would be only be an illusion; a portion of those funds could be locked down behind the prime money market funds' gates and therefore not actually be available when needed.

I do not think that the staff of the Commission should be supporting this kind of "window dressing"—giving the impression of greater security than there actually is. If the funds are not suitable investments for customer funds, then they are not suitable for the additional capital that the FCMs put in those accounts to protect against potential shortfalls. Having lived through bankruptcies, such as MF Global and Peregrine, I have a healthy respect for the importance of having strong clearing members with a large cushion of funds that can be accessed when needed. This no action letter undermines that effort. Given the importance of this topic to the general public, we should at least have asked for comments or even held a roundtable before making this change. I therefore hope to reexamine this subject in the near future.

[FR Doc. 2016-19211 Filed 8-11-16; 8:45 am]

BILLING CODE 6351-01-P

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

29 CFR Part 1926

[Docket No. OSHA-2007-0026]

RIN 1218-AB47

Confined Spaces in Construction; Approval of Collections of Information

AGENCY: Occupational Safety and Health Administration (OSHA), Department of Labor.

ACTION: Final rule.

SUMMARY: This rule is a technical amendment revising OSHA's regulations to reflect the approval by the Office of Management and Budget (OMB) of the collections of information

contained in OSHA's standard for Confined Spaces in Construction.

DATES: Effective August 12, 2016.

FOR FURTHER INFORMATION CONTACT: Todd Owen, OSHA, Directorate of Standards and Guidance, Room N-3609, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, DC 20210; telephone (202) 693-2222.

SUPPLEMENTARY INFORMATION: OSHA published a final rule for Confined Spaces in Construction on May 4, 2015 (80 FR 25365) to provide new protections to employees working in confined spaces in construction. This new subpart replaced OSHA's general training requirement for work in confined spaces (29 CFR 1926.21(b)(6)) with a comprehensive standard. The new standard includes a permit program designed to protect employees from exposure to many hazards associated with work in confined spaces, including atmospheric and physical hazards. Those requirements contained collections of information approved by OMB under control number 1218-0258, which OSHA publicized in the Federal Register document announcing the new rule (see 80 FR 22514-22517). This technical amendment codifies the OMB control number for the Confined Spaces in Construction standard into § 1926.5, which is the central section in which OSHA displays its approved collections under the Paperwork Reduction Act.

Additional opportunity for public comment on this rule is unnecessary because the public has already had the opportunity to comment on the collections of information and OMB has approved them. This revision of § 1926.5 is a purely technical step to increase public awareness of OMB's approval of the collections of information.

Authority and Signature

David Michaels, Ph.D., MPH, Assistant Secretary of Labor for Occupational Safety and Health, directed the preparation of this notice. The authority for this notice is the Paperwork Reduction Act of 1995 (44 U.S.C. 3506 et seq.) and Secretary of Labor's Order 1-2012 (77 FR 3912 (1/25/2012)).

List of Subjects in 29 CFR Part 1926

Occupational safety and health, Reporting and recordkeeping requirements.

Signed at Washington, DC, on August 2, 2016.

David Michaels,

Assistant Secretary of Labor for Occupational Safety and Health.

For the reasons stated in the preamble in this document, the Occupational Safety and Health Administration amends 29 CFR part 1926 as follows:

PART 1926—SAFETY AND HEALTH REGULATIONS FOR CONSTRUCTION

Subpart A—General

■ 1. The authority citation for part 1926, subpart A, continues to read as follows:

Authority: 40 U.S.C. 3701 et seq.; 29 U.S.C. 653, 655, 657; Secretary of Labor's Order No. 12-71 (36 FR 8754), 8-76 (41 FR 25059), 9-83 (48 FR 35736), 1-90 (55 FR 9033), 6-96 (62 FR 111), 3-2000 (65 FR 50017), 5-2002 (67 FR 65008), or 5-2007 (72 FR 31160), 5-2007 (72 FR 31160), 4-2010 (75 FR 55355), or 1-2012 (77 FR 3912), as applicable; and 29 CFR part 1911.

■ 2. Amend § 1926.5 by adding to the table, in the proper numerical sequence, the entries for "1926.1203," "1926.1204," "1926.1205," "1926.1206," "1926.1207," "1926.1208," "1926.1209," "1926.1210," "1926.1211," "1926.1212," and "1926.1213" to read as follows:

§ 1926.5 OMB control numbers under the Paperwork Reduction Act.

Table with 2 columns: 29 CFR Citation and OMB Control No. Rows include 1926.1203 through 1926.1213.

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 100

[Docket Number USCG–2016–0541]

RIN 1625–AA08

Special Local Regulation; Allegheny River Mile 0.0–1.5; Pittsburgh, PA

AGENCY: Coast Guard, DHS.

ACTION: Temporary final rule.

SUMMARY: The Coast Guard is establishing a special local regulation for all waters of the Allegheny River mile 0.0–1.5. This special local regulation is necessary to provide safety for the participants in the “Pittsburgh Triathlon and Adventure Race” marine event. This rulemaking prohibits persons and vessels from being in the special local regulated area unless authorized by the Captain of the Port Pittsburgh or a designated representative.

DATES: This rule is effective from 6 a.m. on August 13, 2016, through 9 a.m. on August 14, 2016.

ADDRESSES: To view documents mentioned in this preamble as being available in the docket, go to <http://www.regulations.gov>, type USCG–2016–0541 in the “SEARCH” box and click “SEARCH.” Click on Open Docket Folder on the line associated with this rule.

FOR FURTHER INFORMATION CONTACT: If you have questions on this rule, call or email MST1 Jennifer Haggins, Marine Safety Unit Pittsburgh, U.S. Coast Guard, at telephone 412–221–0807, email Jennifer.L.Haggins@uscg.mil.

SUPPLEMENTARY INFORMATION:

I. Table of Abbreviations

CFR Code of Federal Regulations
FR Federal Register
NPRM Notice of proposed rulemaking
§ Section
U.S.C. United States Code

II. Background Information and Regulatory History

This annually recurring event and special local regulation is currently listed as the “Friends of the Riverfront Inc./Pittsburgh Triathlon and Adventure Races” under 33 CFR 100.801, Table 1, line no. 21, scheduled for two days during the last two weekends in July or first weekend of August. This year the event sponsor changed the date to the second weekend of August, and informed the Coast Guard of this date change on June 6. The event will consist

of at least 400 swimmers and takes place on the Allegheny River. This temporary final rule reflects the date changes to the event. The Captain of the Port Pittsburgh (COTP) has determined that the special local regulation under 33 CFR 100.801 is still necessary to protect participants, spectators, and waterway users during this event.

The Coast Guard is issuing this temporary rule without prior notice and opportunity to comment pursuant to authority under section 4(a) of the Administrative Procedure Act (APA) (5 U.S.C. 553(b)). This provision authorizes an agency to issue a rule without prior notice and opportunity to comment when the agency for good cause finds that those procedures are “impracticable, unnecessary, or contrary to the public interest.” It is impracticable to publish an NPRM because we must establish this special local regulation by August 13, 2016.

We are issuing this rule, and under 5 U.S.C. 553(d)(3), the Coast Guard finds that good cause exists for making it effective less than 30 days after publication in the **Federal Register**. Delaying the effective date of this rule would be contrary to public interest because immediate action is needed to establish a special local regulation to protect participants of the “Pittsburgh Triathlon and Adventure Race” beginning on August 13, 2016 to August 14, 2016.

III. Legal Authority and Need for Rule

The Coast Guard is issuing this rule under authority in 33 U.S.C. 1233. The Captain of the Port Pittsburgh (COTP) has determined the need to protect participants during the “Pittsburgh Triathlon and Adventure Race” from 6 a.m. to 9 a.m. on August 13, 2016 and August 14, 2016. This rule is needed to protect personnel, vessels, and these navigable waters before, during, and after the scheduled event.

IV. Discussion of the Rule

The Captain of the Port Pittsburgh is establishing this special local regulated area from 6 a.m. to 9 a.m. on August 13, 2016 and August 14, 2016 for all waters of the Allegheny River mile 0.0–1.5. The duration of the special local regulated area is intended to ensure the safety of vessels, participants, spectators and other waterway users before, during, and after the scheduled event. No vessel or person is permitted to enter the special local regulated area without obtaining permission from the COTP or a designated representative. The regulatory text we are establishing appears at the end of this document.

V. Regulatory Analyses

We developed this rule after considering numerous statutes and Executive orders related to rulemaking. Below we summarize our analyses based on a number of these statutes and Executive orders, and we discuss First Amendment rights of protestors.

A. Regulatory Planning and Review

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This rule has not been designated a “significant regulatory action,” under Executive Order 12866. Accordingly, it has not been reviewed by the Office of Management and Budget.

This regulatory action determination is based on the size, location, duration, and time-of-day of the special local regulated area.

This special local regulation restricts transit on the Allegheny River from mile 0.0–1.5 for a short duration of 3 hours each day. Vessel traffic will be informed about the special local regulated area through local notices to mariners. Moreover, the Coast Guard will issue Broadcast Notices to Mariners via VHF–FM marine channel 16 about the area and the rule allows vessels to seek permission to transit the area.

B. Impact on Small Entities

The Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612, as amended, requires Federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term “small entities” comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities.

While some owners or operators of vessels intending to transit the special local regulated area may be small entities, for the reasons stated in section V.A above this rule will not have a significant economic impact on any vessel owner or operator.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121),

we want to assist small entities in understanding this rule. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1-888-REG-FAIR (1-888-734-3247). The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

C. Collection of Information

This rule will not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501-3520).

D. Federalism and Indian Tribal Governments

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this rule under that Order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132.

Also, this rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes. If you believe this rule has implications for federalism or Indian tribes, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section above.

E. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531-1538) requires

Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of \$100,000,000 (adjusted for inflation) or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

F. Environment

We have analyzed this rule under Department of Homeland Security Management Directive 023-01 and Commandant Instruction M16475.ID, which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (42 U.S.C. 4321-4370f), and have determined that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This rule involves special local regulated area that would prohibit entry to unauthorized vessels. It is categorically excluded from further review under paragraph 34(h) of Figure 2-1 of the Commandant Instruction. An environmental analysis checklist supporting this determination and a Categorical Exclusion Determination are available in the docket where indicated under **ADDRESSES**. We seek any comments or information that may lead to the discovery of a significant environmental impact from this rule.

G. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places or vessels.

List of Subjects in 33 CFR Part 100

Marine safety, Navigation (water), Reporting and recordkeeping requirements, and Waterways.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 100 as follows:

PART 100—SAFETY OF LIFE ON NAVIGABLE WATERWAYS

■ 1. The authority citation for part 100 continues to read as follows:

Authority: 33 U.S.C. 1233.

■ 2. Add § 100.35T08-0541 to read as follows:

§ 100.35T08-0541 Special Local Regulation; Allegheny River Mile 0.0 to 1.5, Pittsburgh, PA.

(a) *Location.* All waters of the Allegheny River beginning at mile marker 0.0 and ending at mile marker 1.5 at Pittsburgh, PA.

(b) *Periods of Enforcement.* This rule will be enforced from 6 a.m. to 9 a.m. on August 13, 2016 and August 14, 2016. The COTP or a designated representative will inform the public through broadcast notice to mariners of the enforcement period for the special local regulation.

(c) *Regulations.* (1) In accordance with the general regulations in § 100.801 of this part, entry into this area is prohibited unless authorized by the COTP or a designated representative.

(2) Persons or vessels requiring entry into or passage through the area must request permission from the COTP or a designated representative. The COTP representative may be contacted at 412-221-0807.

L. McClain, Jr.,

Commander, U.S. Coast Guard, Captain of the Port Pittsburgh.

[FR Doc. 2016-19138 Filed 8-11-16; 8:45 am]

BILLING CODE 9110-04-P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 117

[Docket No. USCG-2016-0752]

Drawbridge Operation Regulation; Rockaway Inlet, Queens, NY

AGENCY: Coast Guard, DHS.

ACTION: Notice of deviation from drawbridge regulation.

SUMMARY: The Coast Guard has issued a temporary deviation from the operating schedule that governs the Marine Parkway Bridge across the Rockaway Inlet, mile 3.0, at Queens, New York. This deviation is necessary to allow the bridge owner to replace span guide rollers, counterweight guide shoes and trunnion journal at the bridge.

DATES: This deviation is effective from 7 a.m. on October 17, 2016 to 5 p.m. on October 28, 2016.

ADDRESSES: The docket for this deviation, [USCG-2016-0752] is available at <http://www.regulations.gov>. Type the docket number in the "SEARCH" box and click "SEARCH". Click on Open Docket Folder on the line associated with this deviation.

FURTHER INFORMATION CONTACT: If you have questions on this temporary deviation, call or email Judy Leung-Yee, Project Officer, First Coast Guard District, telephone (212) 514-4330, email judy.k.leung-ye@uscg.mil.

SUPPLEMENTARY INFORMATION: The Marine Parkway Bridge, mile 3.0, across the Rockaway Inlet, has a vertical clearance in the closed position of 55 feet at mean high water and 59 feet at mean low water. The existing bridge operating regulations are found at 33 CFR 117.795(a).

The waterway is transited by commercial barge traffic of various sizes.

The bridge owner, MTA Bridges and Tunnels, requested a temporary deviation from the normal operating schedule to replace span guide rollers, counterweight guide shoes and trunnion journal at the bridge.

Under this temporary deviation, the Marine Parkway Bridge shall remain in the closed position from 7 a.m. on October 17, 2016 to 5 p.m. October 28, 2016.

Vessels able to pass under the bridge in the closed position may do so at anytime. The bridge will not be able to open for emergencies and there is no immediate alternate route for vessels to pass.

The Coast Guard will inform the users of the waterways through our Local Notice and Broadcast to Mariners of the change in operating schedule for the bridge so that vessel operations can arrange their transits to minimize any impact caused by the temporary deviation. The Coast Guard notified various companies of the commercial oil and barge vessels and they have no objections to the temporary deviation.

In accordance with 33 CFR 117.35(e), the drawbridge must return to its regular operating schedule immediately at the end of the effective period of this temporary deviation. This deviation from the operating regulations is authorized under 33 CFR 117.35.

Dated: August 9, 2016.

C.J. Bisignano,

Final Priority—Training of Interpreters for Individuals Who Are Deaf or Hard of Hearing and Individuals Who Are Deaf-Blind Program

AGENCY: Office of Special Education and Rehabilitative Services, Department of Education.

ACTION: Final priority.

SUMMARY: The Assistant Secretary for Special Education and Rehabilitative Services announces a final priority under the Training of Interpreters for Individuals Who Are Deaf or Hard of Hearing and Individuals Who Are Deaf-Blind Program. The Assistant Secretary may use this priority for competitions in fiscal year 2016 and later years. We take this action to provide training and technical assistance to better prepare novice interpreters to become highly qualified, nationally certified sign language interpreters.

DATES: This priority is effective September 12, 2016.

FOR FURTHER INFORMATION CONTACT: Kristen Rhinehart-Fernandez, U.S. Department of Education, 400 Maryland Avenue SW., Room 5062, Potomac Center Plaza (PCP), Washington, DC 20202-2800. Telephone: (202) 245-6103 or by email: Kristen.Rhinehart@ed.gov.

If you use a telecommunications device for the deaf (TDD) or a text telephone (TTY), call the Federal Relay Service (FRS), toll free, at 1-800-877-8339.

SUPPLEMENTARY INFORMATION:

Purpose of Program: Under the Rehabilitation Act of 1973 (Rehabilitation Act), as amended by the Workforce Innovation and Opportunity Act (WIOA), the Rehabilitation Services

Administration (RSA) makes grants to public and private nonprofit agencies and organizations, including institutions of higher education, to establish interpreter training programs or to provide financial assistance for ongoing interpreter training programs to train a sufficient number of qualified interpreters throughout the country. The grants are designed to train interpreters to effectively interpret and transliterate using spoken, visual, and tactile modes of communication; ensure the maintenance of the interpreting skills of qualified interpreters; and provide opportunities for interpreters to improve their skills in order to meet both the highest standards approved by certifying associations and the communication needs of individuals who are deaf or hard of hearing and individuals who are Deaf-blind.

Program Authority: 29 U.S.C. 772(f).

Applicable Program Regulations: 34 CFR part 396.

We published a notice of proposed priority (NPP) for this competition in the **Federal Register** on May 6, 2016 (81 FR 27375). That notice contained background information and our reasons for proposing the particular priority.

Public Comment: In response to our invitation in the notice of proposed priority, 25 parties submitted comments on the proposed priority.

We group major issues according to subject. Generally, we do not address technical and other minor changes, or suggested changes the law does not authorize us to make under the applicable statutory authority. In addition, we do not address general comments that raised concerns not directly related to the proposed priority.

Analysis of Comments and Changes: An analysis of the comments and of any changes in the priority since publication of the notice of proposed priority follows.

Specialty Training Supported Through This Priority

Comment: A number of commenters recommended continuing the specialty area training developed in prior grant cycles for deaf-blind interpreting, health care interpreting, legal interpreting, trilingual interpreting in American Sign Language (ASL)/English/Spanish, deaf self-advocacy training (DSAT), interpreting in a Vocational Rehabilitation (VR) setting, interpreting provided by deaf¹ interpreters, and

¹ As used in this notice, the word “deaf” refers to (1) “deaf” and “Deaf” people, *i.e.*, to the condition of deafness; (2) to “deaf, hard of hearing, and Deaf-Blind”; and (3) to individuals who are

video remote interpreting and video relay interpreting. The commenters stated that these specialty areas are growing or emerging practice areas and that prior grant cycles only laid the foundation for them. Therefore, commenters recommended the Department of Education (Department) support specialty training in eight specific areas that were funded in prior grant cycles.

First, commenters supported trilingual interpreting in ASL/English/Spanish and argued that there is still a critical need for more training for interpreters in Spanish-influenced settings. One commenter stated that existing training developed for ASL/English/Spanish is still in its very initial stages and, if continued, has the potential to develop model partnerships that could be replicated into a training process for other spoken languages.

Second, commenters supported continued funding for training for deaf-blind interpreting. They indicated that deaf-blind consumers are one of the least well-served groups and there continues to be a critical need to increase the number of interpreters skilled in this area. For example, one commenter shared that there is a new movement occurring within the deaf-blind community around the concept of "pro-tactile," which is altering the nature of communication, language, leadership, and interaction, and is one of the new areas in which interpreters need to be skilled to effectively work with individuals who are deaf-blind.

Finally, one commenter stated that the importance of accessible and advanced training for interpreters in healthcare and legal settings is underscored in a report entitled "Preparing Interpreters for Tomorrow: Report on a Study of Emerging Trends in Interpreting and Implications for Interpreter Education." This report was prepared by a current grantee under this program, the National Interpreter Education Center, Northeastern University, in January 2015. According to this report, interpreters and consumers continue to identify these two specialty areas as areas of priority training needs for interpreters.

Discussion: We agree that there continues to be a critical need for more training in some of the specialty areas funded in the 2010–2016 grant cycle and in earlier cycles. For example, the U.S. Department of Labor predicts that "employment of interpreters and translators is expected to grow 42 percent from 2010 to 2020 and the

demand for American Sign Language (ASL) interpreters is expected to grow rapidly. . . ." ² Therefore, we have concluded that applications may be submitted for specialty training areas developed in the 2010–2016 grant cycles for deaf-blind interpreting, health care interpreting, legal interpreting, trilingual interpreting in ASL/English/Spanish, interpreting in a Vocational Rehabilitation (VR) setting, interpreting provided by Deaf interpreters, and video remote interpreting and video relay interpreting.

Specific to trilingual interpreting, we also believe there may be parts of the country where multiple languages are spoken by deaf individuals. Therefore, we are permitting applicants to address multiple language combinations in their proposals.

However, we believe it would be an inefficient use of Federal resources to allocate funds to focus solely on replicating rather than scaling up or expanding existing training or to train interpreters where there is no need. Therefore, applicants proposing to provide training in existing specialty areas will be expected to describe how their proposed projects expand on, rather than replicate, existing training in these areas. Applications for training in existing specialty areas will also be expected to specify that they plan to serve areas of the country in which there are not enough interpreters to adequately meet the communication needs of deaf, hard-of-hearing, and deaf-blind consumers.

Changes: We revised Specialty Area 2: Trilingual interpreting that immediately follows the application requirements in the priority to allow applicants to submit proposals for trilingual interpreting in ASL/English/Spanish. We added language to the priority requiring applicants that propose to continue existing training in trilingual interpreting for English/Spanish/ASL to provide evidence to support the demand for trilingual interpreters in English/Spanish/ASL and, to the extent possible, specify areas of the country in which there are not enough trilingual English/Spanish/ASL interpreters to adequately meet the communication needs of Deaf, hard-of-hearing, and Deaf-blind consumers. We also added language that applicants proposing to continue existing training in ASL/English/Spanish without improvement,

update, or addition of new material will not be eligible for funding.

We added language to Specialty Area 2 to allow applicants to propose multiple language combinations in their proposals. As such, in this specialty area, we will require applicants to propose a framework that will be used to provide trilingual interpreter training and to develop separate modules for each language in order to ensure the training content appropriately addresses the cultural nuances of each language.

Additionally, we revised Specialty Area 3: Field-initiated projects to allow specialty area training for deaf-blind interpreting, health care interpreting, legal interpreting, interpreting in a Vocational Rehabilitation (VR) setting, interpreting provided by Deaf interpreters, and video remote interpreting and video relay interpreting. We added language requiring that applicants ensure that projects will improve, update, and develop new material for training in these specialty areas. We also added language requiring applicants to demonstrate the demand for interpreters in these specialty areas and, to the extent possible, specify areas of the country in which there are not enough interpreters to adequately meet the communication needs of deaf, hard-of-hearing, and deaf-blind consumers. Finally, we added language that applicants proposing to continue existing training in these areas without improvement, update, or addition of new material will not be eligible for funding.

Comments: A number of commenters recommended the Department continue to fund DSAT, which was funded from 2010 to 2016 and in prior grant cycles. Commenters stated that, while the DSAT curriculum is complete and available online, further efforts are necessary to increase training opportunities and ultimately reach more deaf individuals. Some of these commenters also described DSAT's ability to improve the advocacy skills of a deaf person by helping to understand the role of the interpreter, the right to be provided interpreting services, and the impact interpreting services have on obtaining, maintaining, and advancing in competitive integrated employment as well as in other situations. Several commenters argued that those who have gone through the training can more effectively advocate not only for themselves but also for other deaf consumers including those who have dysfluent language. A commenter stated that DSAT directly ties into enhanced employment outcomes and creates jobs for deaf individuals as trainers and

² Bureau of Labor Statistics, U.S. Department of Labor, *Occupational Outlook Handbook, 2012–13 Edition*, Interpreters and Translators, on the Internet at www.bls.gov/ooh/media-and-communication/interpreters-and-translators.htm (visited June 3, 2016).

educators in a variety of settings, including secondary and post-secondary education, community-based agencies, and private practice. Finally, a commenter stated that the DSAT curriculum filled a significant gap experienced by educators, VR counselors, and community agency personnel, such as staff from centers for independent living and community rehabilitation programs.

Discussion: We recognize and value DSAT for individuals who are deaf and hard of hearing and individuals who are deaf-blind, but the Department has determined not to continue funding for DSAT. We agree that it is important for deaf consumers to understand their basic legal rights and be equipped with knowledge and confidence in order to effectively communicate their preferred accommodations and make appropriate requests as they transition from secondary education to post-secondary settings and competitive integrated employment. For this program, however, every specialty area project must be focused specifically on interpreting, which DSAT is not. We believe that funding the specialty areas described in this notice will provide interpreters with critically needed skills.

There are other vehicles funded by the Department that protect and advocate for individuals with disabilities, many of which teach self-advocacy skills. For example, the Client Assistance Program (CAP) is designed to advise and inform clients, client applicants, and other individuals with disabilities of all the available services and benefits under the Rehabilitation Act of 1973, as amended, and of the services and benefits available to them under Title I of the Americans with Disabilities Act (ADA). In addition, CAP grantees may assist and advocate for clients and client applicants about projects, programs, and services provided under the Rehabilitation Act. In providing assistance and advocacy under Title I of the Rehabilitation Act, a CAP agency may provide assistance and advocacy about services directly related to employment for the client or client applicant.

The Department also funds Parent Training and Information Centers (PTI centers) authorized under the Individuals with Disabilities Education Act (IDEA). Each State has at least one PTI center to provide training and information to students with disabilities and their families about their rights and services under IDEA. In addition, RSA currently funds seven State and regional PTI centers under section 303(c) of the Rehabilitation Act. All of these PTI

centers provide training and information to enable individuals and their families to participate more effectively in meeting the vocational, independent living, and rehabilitation needs of such individuals.

Finally, the Centers for Independent Living authorized under title VII of the Rehabilitation Act and administered by the Department of Health and Human Services provide advocacy services for individuals with disabilities, and the modules developed on DSAT are among the tools they may use to teach deaf consumers to advocate for their rights. The existence of the programs described here, and their ability to use DSAT materials developed in previous grant cycles make it less necessary to continue to support DSAT through this competition.

We also believe that there is sufficient demand in the market for DSAT to sustain the curriculum without Federal investment. Since the DSAT curriculum was unveiled in 2010, more than 2,000 deaf, hard of hearing, and deaf-blind consumers have attended a DSAT consumer training and more than 250 deaf, hard of hearing, and deaf-blind individuals have been trained as DSAT trainers. In 2013, the DSAT curriculum was expanded to include deaf-blind-specific adaptations, and 10 deaf-blind individuals undertook a rigorous four-day deaf-blind self advocacy training (DBSAT) train the trainer course in preparation to provide future DBSAT to their peers.

We agree that the DSAT curriculum fills a significant gap experienced by educators, VR counselors, and community agency personnel, such as staff from centers for independent living and community rehabilitation programs. For example, as part of the Postsecondary Educational Programs Network (pepnet 2) Building State Capacity Summit, the team from Georgia recognized the value of the training materials and focused their five-year plan on improving self-advocacy and self-determination skills among deaf and hard of hearing high school and middle school students across the State. After piloting the project, they have worked closely with DSAT trainers to ensure that the curriculum addressed the needs of the population served. We expect that these and other strategies for using the existing DSAT materials will grow.

Change: None.

Comment: One commenter stated that the proposed priority is unnecessarily narrow and restrictive; needs greater input from more perspectives, especially those of the deaf communities to be served by the

funding; and should embrace creativity and innovation. The commenter maintained that, while the emphasis on evidence and data that the proposed priority encourages is important, more evidence to support the proposed priority would have been useful as well.

Discussion: We do not agree that the priority is narrow or restrictive. However, we agree that creativity, innovation, and input from multiple perspectives are important for this program. Accordingly, in addition to the specialty areas the Department specified in this priority, we are also seeking field-initiated projects. While only one report was cited as support in the background section of the notice of proposed priority for this program, we acknowledge there are other works of research in the field of interpreter training that are equally valid. Therefore, for each area of specialty training, applicants may consult and incorporate relevant studies and evidence into their proposals.

Change: None.

Eligibility Requirements

Comments: A few commenters recommended the Department change the requirement in the priority that prevents applicants from submitting different proposals under more than one specialty area.

Another commenter asked whether an application may focus on multiple specialty areas, such as dysfluent language competencies and trilingual interpreting. For example, the commenter stated that for many deaf refugees in the United States, ASL is their first readily accessible language, and it becomes their primary communication choice despite their recent acquisition of this language. These individuals could benefit from interpreters who trained as trilingual interpreters and are familiar with working with dysfluent individuals.

Discussion: We agree that applicants should be able to submit different proposals for different specialty areas. However, the proposed components of the project (*i.e.*, the competencies working interpreters must demonstrate in order to provide high-quality services in the identified specialty area, as well as the design, delivery of training, and evaluation) must be tailored to the specific specialty area. Applications proposing the same content for multiple specialty areas will not be considered.

We also agree that applicants may submit proposals that focus on more than one specialty area. We regard these combined proposals as field-initiated topics that should be submitted under Specialty Area 3.

However, as to the comment suggesting combining dysfluent language competencies and trilingual interpreting, we believe applicants could include trilingual interpreting as a secondary focus for working interpreters along with training in dysfluent language competencies. Applications for this combination should still be submitted under Specialty Area 1.

Changes: We revised the specialty areas that immediately follow the application requirements in the priority in order to allow applicants to submit different proposals under more than one specialty area and to allow applicants to submit proposals that combine areas of specialty training. We added language directing proposals combining areas of specialty training to be submitted under Specialty Area 3: Field-initiated topics.

Under Specialty Area 1, we added language allowing applicants to include trilingual interpreting as a secondary focus for working interpreters who may require both training as trilingual interpreters and gaining familiarity working with dysfluent individuals.

Comment: One commenter recommended removing the proposed eligibility requirement for applicants under “Specialty Area 3: Field-initiated topics” in order to allow topics focused on interpreting for pre-K to grade 12 students. The commenter suggested that one way to address the increase in providing services to deaf individuals with idiosyncratic and dysfluent language is to ensure that educational interpreters working in pre-K to grade 12 have the training and supports they need to effectively serve students.

Discussion: Programs that prepare working interpreters to work in pre-K to grade 12 are not eligible because the focus of this program is to prepare interpreters to work in VR settings. To that end, we chose to limit eligible applicants to those programs that provide training to interpreters in such settings. We acknowledge there is emphasis in the Workforce Innovation and Opportunity Act (WIOA) on providing services and support to transition-age youth. However, the Department has other resources to support programs preparing pre-K to grade 12 personnel. For example, the Department currently funds grant awards under the IDEA Personnel Preparation in Special Education, Early Intervention, and Related Services program to improve the quality and increase the number of personnel who are fully credentialed to serve children, including infants and toddlers, with disabilities, especially in areas of chronic personnel shortage, by

supporting projects that prepare special education, early intervention, and related services personnel at the baccalaureate, master’s, and specialist levels. More specifically, this program funds a specialty area to serve school-age children with low incidence disabilities by training personnel who serve children with low incidence disabilities, such as visual impairments, hearing impairments, and simultaneous visual and hearing impairments. Projects preparing educational interpreters are eligible under this focus area. For these reasons, we have chosen to limit applicants under this competition to those who train interpreters to work in VR settings.

Change: None.

Comments: Several commenters noted that the priority does not specify entities eligible to apply for funds, such as associate of the arts (AA) programs, associate in applied sciences (AAS) programs, baccalaureate degree ASL-English programs accredited by the Commission on Collegiate Interpreter Education (CCIE), and non-CCIE-accredited baccalaureate degree ASL-English programs. Many commenters recommended that eligible applicants be degree-granting institutions with a demonstrated track record of relationships with relevant stakeholders such as the National Association of the Deaf, Registry of Interpreters for the Deaf, Conference of Interpreter Trainings, and others, as appropriate.

Discussion: Under the statute authorizing this program (section 302(f)(1)(A) of the Rehabilitation Act of 1973, as amended), eligible applicants are States and public or nonprofit agencies and organizations, including American Indian tribes and institutions of higher education, which includes CCIE-accredited and non-CCIE-accredited baccalaureate degree ASL-English programs. We do not believe further clarification in the priority is needed.

As a technical matter, AA/AAS programs are eligible, but the focus of this program is to prepare working interpreters to work in VR settings. To that end, in order to be eligible, applicants must be able to provide training to working interpreters in such settings, and such applicants would typically be institutions granting baccalaureate degrees.

Change: None.

Working Interpreter

Comments: Several commenters recommended expanding the proposed definition of “working interpreter.” One commenter noted that there may be a number of certified, qualified deaf

interpreters who would otherwise be successful participants but do not possess a baccalaureate degree in ASL-English interpretation. Other commenters recommended aligning the definition of “working interpreter” with requirements established by the Registry of Interpreters for the Deaf (RID). One commenter indicated RID requires interpreters to possess a baccalaureate degree in order to be eligible for generalist certification, with certain limited exceptions. RID does not currently specify the type of degree a candidate must possess but instead recognizes that any baccalaureate degree represents a liberal arts education that sets a strong foundation of critical thinking and broad world view. Therefore, this commenter suggested the Department create an equivalency determination when the degree requirement would unnecessarily exclude underrepresented populations.

For example, the commenter stated that equivalent alternative criteria that could be allowable in lieu of the educational requirements might include life experience, years of professional experience, and years of education (credit hours) not totaling a formal degree. The commenter noted that RID also accepts continuing education credits in addition to these other requirements in order to satisfy the educational equivalency requirements.

Discussion: We agree that we should expand the definition of “working interpreter” to more closely align with RID requirements. This will avoid unnecessarily limiting the pool of qualified participants and promote participation within projects.

Change: We amended the definition of “working interpreter” in the first paragraph of the final priority to include interpreters with a baccalaureate degree in ASL-English who possess a minimum of three years of relevant experience as an interpreter or equivalence such as relevant professional experience and years of education (credit hours) not equivalent to a formal degree.

Credentials and Certifications

Comments: Some commenters indicated that the priority does not mention credentials that participants must achieve upon successful completion of the training program. One commenter recommended the Department consider other available national-level credentials that are equivalent to credentials awarded by the RID. Another commenter suggested the Department consider State-level certification or licensure, such as the Board for Evaluation of Interpreters (BEI), for certification or licensure to

offer interpreting services within the State. One commenter noted that the BEI testing options include basic, advanced, and master's level certification tests, as well as testing in legal interpreting, trilingual interpreting, a certified deaf interpreter test, and a soon-to-be-released medical interpreting test.

Discussion: The priority does not designate a specific certification as a desired outcome for this program, nor does it require participants to achieve a designated certification upon successful completion in the program. However, applicants may choose to award continuing education credits or college or master's level credits to participants in the training program and we encourage applicants to consider doing so.

We believe there is limited information available on the reliability and validity of assessments used by States to confer certifications and licensures. For example, in some cases, an individual pays a fee to receive a license to work as an interpreter in a State, regardless of skill or competency. In other cases, assessments, such as the BEI, are State specific, and there is no information about how the specific levels of skills and competencies they assess compare with the level of skills and competencies required to pass other State-level licensure tests.

Applicants may use national and State-level licensures and certifications, as applicable, to assess participant progress in competency and skill level. Any proposed instruments must be valid and reliable and the applicant must submit a rationale to support the use of each instrument. However, the Department does not consider it appropriate at this time to require all applicants to adopt specific national or State-level certifications or licensures.

Change: None.

Comment: One commenter stated that the priority requires trainers to be certified or recognized in the specialty area of training, but does not believe there is enough data to determine whether there are enough trainers in specialty areas to meet this requirement.

The commenter also does not believe there is data to indicate whether a sufficiently large pool of working interpreters that possess baccalaureate degrees in ASL-English and three years of interpreting experience who also possess competence in the proposed specialty training areas.

This commenter recommended the Department include flexibility on the qualifications of trainers, as well in the definition of "working interpreter."

Discussion: We believe the priority provides sufficient flexibility on the qualifications of trainers. Under paragraph (b)(2) of the requirements for this program, applicants may identify and partner with trainers who are either certified or recognized in the specialty area through formal or informal certification. If certification is not available in the specialty area, applicants may provide evidence of relevant training and experience (e.g., provide a portfolio that includes training verification, video samples, letters of support from consumers and employers, etc.).

As stated earlier, we have also amended the definition of "working interpreter" to include interpreters with a baccalaureate degree in ASL-English who possess a minimum of three years of relevant experience as an interpreter or equivalence such as relevant professional experience, and years of education (credit hours) not totaling a formal degree.

Change: None.

Project Requirements

Comment: One commenter asked the Department to clarify the baseline numbers against which "increased" numbers will be measured for project outcomes (i.e. an increase in the number of interpreters who are trained to work with deaf consumers who require specialized interpreting and an increase in the number of interpreters trained in specialty areas who obtain or advance in employment in the areas for which they were prepared).

Discussion: We intend for applicants to provide baseline data in their applications for the actual or estimated number of working interpreters currently trained in a specialty area. We acknowledge that baseline numbers may not be available to applicants proposing to develop training in topics that address new specialty areas. In those cases, we will accept zero as a baseline, provided that the applicants adequately explain the lack of data to establish a baseline. We also expect applicants to provide a target number of new working interpreters that will be trained in a specialty area.

Change: We added a new paragraph (a)(2) to the requirements to clarify baseline and target data that must be included in the application.

Comments: One commenter recommended that the Department clarify the purpose of the coordination and communication requirement in paragraph (c)(10)(iv)(B). For example, one commenter asked if this requirement allows applicants to interact with specific projects funded by

the Department, such as the IDEA Personnel Development to Improve Services and Results for Children with Disabilities Program, which can support projects focused on K-12 interpreting.

One commenter recommended interaction with other Department-funded projects and stated that dysfluent language evident in deaf adults can be traced, in part, to inadequate language models early in life. According to this commenter, coordination of interpreter education efforts between children and adults could be a key step to addressing dysfluency among future Deaf generations.

Discussion: We intended for the language in requirement (c)(10)(iv)(B) to mean that grantees would communicate, coordinate, and collaborate with other Department-funded projects for the purposes of exchanging relevant information such as outcome data and promising practices, as well as disseminating training material and products developed under this program. Applicants may also communicate, coordinate, and collaborate with other Department-funded projects for the purposes of informing, improving, and strengthening training developed under this program. The priority does not require formal relationships (e.g., memoranda of understanding) with other Department-funded projects.

We will not further specify how this communication, collaboration, or coordination will occur because we believe applicants are well suited to make this determination.

Change: None.

Comment: One commenter asked for clarification of the second paragraph under the proposed priority concerning whether pre-service training is an allowable project activity. The commenter suggested the Department consider allowing the development of content for pre-service training because it could have a positive long-term impact on the quality of interpreting.

Discussion: Pre-service training is not the focus of this priority. The priority states that applicants may develop a new training program or stand-alone modules that could also be incorporated into an existing baccalaureate degree ASL-English program. Applicants are expected to develop and deliver training of sufficient scope, intensity, and duration for working interpreters to achieve increased skill, knowledge, and competence in a specialty area. However, applicants may consider a variety of resources (such as available pre-service training material) that may inform, support, or strengthen the development of training for English-ASL

interpreter training in specialized areas. As a result of new training curricula established through this program, pre-service training modules could be developed as a “feeder” into existing baccalaureate degree ASL-English programs.

Change: None.

Comment: One commenter suggested that project timelines be proposed, but not required, in the priority. The commenter reasoned that the requirement to develop training materials and curricula in a single year and then implement them over the following four years is not unreasonable but noted that, with a focus on new specialty training areas, a complete curriculum could require two or more years to develop. The commenter also recommended that the timeline in each application be reviewed on its own merits. For example, an application to address training in a new specialty area may require more time, funding, and extended collaboration to fully develop a curriculum. On the other hand, an application that demonstrates the intention of building on, enhancing, or significantly revising a previously developed curriculum might be completed more quickly.

Discussion: We agree that an application to address training in a new specialty area may require more time to fully develop a curriculum. Therefore, if applicants determine additional time may be necessary to fully develop a curriculum and obtain input and feedback from key partners, relevant stakeholders, and consumers, they must provide adequate justification in their application.

Change: In the final priority we have added that applicants must provide adequate justification in their application if they determine additional time may be necessary to fully develop a curriculum and obtain input and feedback from key partners, relevant stakeholders, and consumers.

Administration of the Grants

Comment: One commenter suggested the Department award these projects as cooperative agreements rather than grants. Another commenter stated that implementing a cooperative agreement for this funding would be a positive strategy to monitor quality and achievement of proposed goals. This commenter further stated that providing transparent decision-making by RSA, with open and explicit rationales for funding choices and re-funding choices, is needed in order to insure that an evaluation is effectively conducted and that funds are awarded (or withheld) based on evidence of effective program

management. This commenter urged the Department to require transparent reporting by, and evaluation of, the grantee that is easily and quickly accessible and that encourages public input at every evaluation point, in order to help insure that such evaluation is incorporated and integrated throughout.

Discussion: The priority does not specify whether these projects would be awarded as cooperative agreements. The Department has flexibility to make this determination, and we will announce that decision in the notice inviting applications. As to the commenter’s recommendation that the Department involve the public in reporting by grantees and evaluation of the projects, the Department already has established processes and procedures for monitoring project performance. Further, the Notice Inviting Applications will specify annual and final reporting requirements and performance measures.

The Department is committed to transparency and will make available to the public abstracts of successful applications. Products produced as a result of these grants will be made available to the public through the National Clearinghouse of Rehabilitation Training Materials.

Change: None.

Final Priority: This notice contains one final priority.

Interpreter Training in Specialty Areas.

Final Priority: The purpose of this priority is to fund projects that provide training for English-American Sign Language (ASL) interpreter training in specialty areas. The training must be provided to working interpreters (*e.g.*, interpreters with a baccalaureate degree in ASL-English who possess a minimum of three years of relevant experience as an interpreter or equivalence such as relevant professional experience, and years of education (credit hours) not totaling a formal degree) who need to develop a new skill area or enhance an existing skill area. Within this final priority, the Assistant Secretary intends to fund training in the following specialty areas: (1) Interpreting for consumers with dysfluent language competencies (*e.g.*, individuals who use idiosyncratic signs or display limited first language competency in either spoken or sign language, due to delayed acquisition of the first language); (2) trilingual interpreting (*e.g.*, language fluency in first, second, and third languages with one of the three languages being ASL); and (3) field-initiated topics.

During the project, applicants must develop and deliver training of

sufficient scope, intensity, and duration for working interpreters to achieve increased skill, knowledge, and competence in a specialty area. Applicants may develop a new training program or stand-alone modules that could also be incorporated into an existing baccalaureate degree ASL-English program. The training program or modules must be developed by the end of the first year of the project period and delivered in years two, three, four, and five of the project period. Applicants must provide adequate justification in their application if they determine additional time may be necessary to fully develop a curriculum and obtain input and feedback from key partners, relevant stakeholders, and consumers.

The projects must be designed to achieve, at a minimum, the following outcomes:

- (a) An increase in the number of interpreters who are trained to work with deaf consumers who require specialized interpreting; and
- (b) An increase in the number of interpreters trained in specialty areas who obtain or advance in employment in the areas for which they were prepared.

To be considered for funding, applicants must meet the requirements contained in this final priority, which are as follows:

(a) Demonstrate, in the narrative section of the application under “Significance of the Project,” how the proposed project will address the need for sign language interpreters in a specialty area. To address this requirement, applicants must:

(1) Present applicable data demonstrating the need for interpreters in the specialty area for which training will be developed by the project in at least three distinct, noncontiguous geographic areas, which may include the U.S. Territories;

(2) Present baseline data for the number or estimated number of working interpreters currently trained in a specialty area. In the event that an applicant proposes training in a new specialty area that does not currently exist or for which there are no baseline data, the applicant should provide an adequate explanation of the lack of reliable data and may report zero as a baseline;

(3) Explain how the project will increase the number of working interpreters in a specialty area who demonstrate the necessary competencies to meet the communication needs of individuals who are deaf, hard of hearing, or deaf-blind. To meet this requirement, the applicant must—

(i) Identify competencies that working interpreters must demonstrate in order to provide high-quality services in the identified specialty area using practices that are promising or based on instruction supported by evidence and intervention, when available; and

(ii) Demonstrate that the identified competencies are based on practices that are promising or supported by evidence that will result in effectively meeting the communication needs of individuals who are deaf, hard of hearing, or deaf-blind.

(b) Demonstrate, in the narrative section of the application under "Quality of Project Design," how the proposed project will—

(1) Provide training in person or remotely to at least three distinct, noncontiguous geographic areas identified in paragraph (a)(1);

(2) Identify and partner with trainers who are certified and recognized in the specialty area through formal or informal certification to develop and deliver the training. If certification is not available in the specialty area, provide evidence of relevant training and experience (*e.g.*, provide a portfolio that includes training verification, video samples, letters of support from consumers and employers, etc.);

(3) Be based on current research and make use of practices that are promising or supported by evidence. To meet this requirement, the applicant must describe—

(i) How the proposed project will incorporate current research and practices that are promising or supported by evidence in the development and delivery of its products and services;

(ii) How the proposed project will engage working interpreters with different learning styles; and

(iii) How the proposed project will ensure that working interpreters interact with deaf individuals who have a range of communication skills, from those with limited language skills to those with high-level, professional language skills.

(c) In the narrative section of the application under "Quality of Project Services," the applicant must—

(1) Demonstrate how the project will ensure equal access and treatment for eligible project participants who are members of groups who have traditionally been underrepresented based on race, color, national origin, gender, age, or disability;

(2) Describe the criteria that will be used to identify high-quality applicants for participation in the program, including any pre-assessments that may be used to determine the skill,

knowledge base, and competence of the working interpreter;

(3) Describe the recruitment strategies the project will use to attract high-quality working interpreters, including specific strategies targeting high-quality participants from traditionally underrepresented groups (*e.g.*, individuals with disabilities and individuals living in remote areas);

(4) Describe how the project will ensure that all training activities and materials are fully accessible;

(5) Describe the approach that will be used to enable more working interpreters to participate in and successfully complete the training program, specifically participants who need to work while in the program, have child care or elder care considerations, or live in geographically isolated areas. The approach must emphasize innovative instructional delivery methods, such as distance learning or block scheduling (a type of academic scheduling that offers students fewer classes per day for longer periods of time), which would allow working interpreters to more easily participate in the program;

(6) Describe the approach that will be used to enable working interpreters to successfully complete the program or stand-alone modules, to include mentoring, monitoring, and accommodation support services;

(7) Describe how the project will incorporate practices that are promising and supported by evidence for adult learners;

(8) Demonstrate how the project is of sufficient scope, intensity, and duration to adequately prepare working interpreters in the identified specialty area of training. To address this requirement, the applicant must describe how—

(i) The components of the proposed project will support working interpreters' acquisition and enhancement of the competencies identified in paragraph (a)(2)(i);

(ii) The components of the project will allow working interpreters to apply their content knowledge in a practical setting;

(iii) The proposed project will provide working interpreters with ongoing guidance and feedback; and

(iv) The proposed project will provide ongoing induction opportunities and support working interpreters after completion of the specialty area program.

(9) Demonstrate how the proposed project will actively engage representation from consumers, consumer organizations, and service providers, especially vocational

rehabilitation (VR) agencies, interpreters, interpreter training programs, and individuals who are deaf and deaf-blind in the project, including project development, design, implementation, delivery of training, dissemination, sustainability planning, program evaluation, and other relevant areas as determined by the applicant;

(10) Describe how the project will conduct dissemination and coordination activities. To meet this requirement, the applicant must—

(i) Describe its plan for disseminating information to and coordinating with VR agencies, American Job Centers and other workforce partners regarding finding interpreters with the specialized interpreting skills needed; disseminating information to working interpreters about training available in the specialty area, and broadly disseminating successful strategies for preparing working interpreters in a specialty area;

(ii) Describe its strategy for disseminating products developed during the project period. To meet this requirement the applicant must—

(A) Develop and maintain a state-of-the-art archiving and dissemination system that is open and available to the public and provides a central location for later use of training materials, including curricula, audiovisual materials, Webinars, examples of emerging and promising practices, and any other relevant material;

(B) Provide a minimum of three Webinars or video conferences over the course of the project. Applicants may determine the audience, content, and goals of this activity. For instance, applicants may consider disseminating information to working interpreters not enrolled in the program about training in a specialty area, as well as interacting with interpreter educators about the curriculum or training module design, challenges, solutions, and results achieved.

Note: All products produced by the grantees must meet government- and industry-recognized standards for accessibility, including section 508 of the Rehabilitation Act.

(iii) Describe its approach for incorporating the use of information technology (IT) into all aspects of the project. The approach must include establishing and maintaining a state-of-the-art IT platform that is sufficient to support Webinars, teleconferences, video conferences, and other virtual methods of dissemination of information.

Note: In meeting the requirements mentioned in paragraphs (c)(10)(ii)(A) and

(B) and (c)(10)(iii) above, projects may either develop new platforms or systems or may modify existing platforms or systems, so long as the requirements of this priority are met.

(iv) Describe its approach for conducting coordination and collaboration activities. To meet this requirement, the applicant must—

(A) Establish a community of practice³ in the specialty area of training that focuses on project activities in this priority and acts as a vehicle for communication and exchange of information among participants in the program and other relevant stakeholders;

(B) Communicate, collaborate, and coordinate with other relevant Department-funded projects, as applicable;

(C) Maintain ongoing communication with the RSA project officer and other RSA staff as required; and

(D) Communicate, collaborate, and coordinate, as appropriate, with key staff in State VR agencies, such as the State Coordinators for the Deaf; State and local partner programs; consumer organizations and associations, including those that represent individuals who are deaf, hard of hearing, deaf-blind, and late deafened; and relevant RSA partner organizations and associations.

(d) In the narrative section of the application under “Quality of the Evaluation Plan,” include an evaluation plan for the project. To address this requirement, the evaluation plan must describe—

(1) An approach, using pre- and post-assessments, for assessing the level of knowledge, skills, and competencies gained among participants;

(2) An approach for assessing the application of knowledge, skills, and competencies after completion; and

(3) An approach for incorporating oral and written feedback from trainers, from deaf consumers, and any feedback from mentoring sessions conducted with the participants;

(4) Evaluation methodologies, including instruments, data collection methods, and analyses that will be used to evaluate the project;

(5) Measures of progress in implementation, including the extent to which the project’s activities and products have reached their target

populations; intended outcomes or results of the project’s activities in order to evaluate those activities; and how well the goals and objectives of the proposed project, as described in its logic model,⁴ have been met;

(6) How the evaluation plan will be implemented and revised, as needed, during the project. The applicant must designate at least one individual with sufficient dedicated time, experience in evaluation, and knowledge of the project to coordinate the design and implementation of the evaluation. For example, coordination with any identified partners in the application and RSA to make revisions post award to the logic model in order to reflect any changes or clarifications to the model and to the evaluation design and instrumentation with the logic model (e.g., designing instruments and developing quantitative or qualitative data collections that permit collecting of progress data and assessing project outcomes);

(7) The standards and targets for determining effectiveness of the project;

(8) How evaluation results will be used to examine the effectiveness of implementation and the progress toward achieving the intended outcomes; and

(9) How the methods of evaluation will produce quantitative and qualitative data that demonstrate whether the project activities achieved their intended outcomes.

(e) Demonstrate, in the narrative section of the application under “Adequacy of Project Resources,” how—

(1) The proposed project will encourage applications for employment with the project from persons who are members of groups that have historically been underrepresented based on race, color, national origin, gender, age, or disability;

(2) The proposed project personnel, consultants, and subcontractors have the qualifications and experience to provide training to working interpreters and to achieve the project’s intended outcomes;

(3) The applicant and any identified partners have adequate resources to carry out the proposed activities; and

(4) The proposed costs are reasonable in relation to the anticipated results and benefits;

(f) Demonstrate, in the narrative section of the application under “Quality of the Management Plan,” how—

⁴ A logic model communicates how the project will achieve its intended outcomes and provides a framework for both the formative and summative evaluations of the project.

(1) The proposed management plan will ensure that the project’s intended outcomes will be achieved on time and within budget. To address this requirement, the applicant must describe—

(i) Clearly defined responsibilities for key project personnel, consultants, and subcontractors, as applicable; and

(ii) Timelines and milestones for accomplishing the project tasks.

(2) Key project personnel and any consultants and subcontractors will be allocated to the project and how these allocations are appropriate and adequate to achieve the project’s intended outcomes, including an assurance that such personnel will have adequate availability to ensure timely communications with stakeholders and RSA;

(3) The proposed management plan will ensure that the products and services provided are of high quality; and

(4) The proposed project will benefit from a diversity of perspectives, especially relevant partners, groups, and organizations described throughout this notice, in its development and operation.

(g) Address the following application requirements. The applicant must—

(1) Include, in Appendix A, a logic model that depicts, at a minimum, the goals, activities, outputs, and intended outcomes of the proposed project;

(2) Include, in Appendix A, person-loading charts and timelines, as applicable, to illustrate the management plan described in the narrative; and

(3) Include, in the budget, attendance at a one-day intensive review meeting in Washington, DC, during the third quarter of the third year of the project period.

Specialty Areas

With this final priority, the Secretary intends to fund four national projects in the following specialty areas: (1) Interpreting for consumers with dysfluent language competencies (e.g., individuals who use idiosyncratic signs or display limited first language competency in either spoken or sign language, due to delayed acquisition of the first language); (2) trilingual interpreting (e.g., language fluency in first, second, and third languages with one of the three languages being ASL); and (3) field-initiated topics. Applicants must identify the specific focus area (1, 2, or 3) under which they are applying as part of the competition title on the application cover sheet (SF form 424, line 4).

Applicants may submit proposals under one or more specialty area.

³ A community of practice (CoP) is a group of people who work together to solve a persistent problem or to improve practice in an area that is important to them and who deepen their knowledge and expertise by interacting on an ongoing basis. CoPs exist in many forms, some large in scale that deal with complex problems, others small in scale that focus on a problem at a very specific level. For more information on communities of practice, see: www.tadnet.org/pages/510.

Applications proposing the same content for different specialty areas will not be considered.

Applicants may combine more than one specialty and these applications must be submitted under Specialty Area 3: Field-initiated topics.

Specialty Area 1: Interpreting for Consumers With Dysfluent Language Competencies

Interpreting for deaf and hard of hearing, and deaf-blind consumers with dysfluent language competencies include: (1) Those with limited, idiosyncratic, or differing levels of first and second language fluency in English and ASL; (2) those who have families using non-English spoken languages at home and have limited or no fluency in English and ASL; and (3) those with cognitive and physical disabilities that impact linguistic competencies. Under this specialty area, applicants may include trilingual interpreting as a secondary focus for working interpreters who may require both training as trilingual interpreters and gaining familiarity working with dysfluent individuals.

Specialty Area 2: Trilingual Interpreting

Trilingual interpreting is interpreting between three different languages; that is, two spoken languages such as English and Spanish, and ASL. This requires a working interpreter to be competent in three different languages and seamlessly facilitate communication between those languages in real time. RSA is seeking to fund similar projects in trilingual interpreting that includes languages that may be spoken in the United States. Applications may address multiple language combinations. In this instance, applicants must propose a framework that will be used to provide trilingual interpreter training. Applicants must develop separate modules for each language and ensure the training content appropriately addresses the cultural nuances of the language.

Applicants that choose to focus on trilingual interpreting in English/Spanish/ASL must propose to improve, update, and develop new material to support existing specialty training in this area. Applicants must describe in their application specific improvements, updates, and new material to be developed and provide rationale for why this is needed. Applicants must provide evidence to support the demand for trilingual interpreters in English/Spanish/ASL and, to the extent possible, specify areas of the country in which there are not enough trilingual English/Spanish/ASL interpreters to

adequately meet the communication needs of Deaf, hard-of-hearing, and Deaf-blind consumers.

Trilingual interpreting in English/Spanish/ASL that proposes only to continue existing training developed during the 2010–2016 grant cycle or earlier cycles is *not* eligible under this priority.

Specialty Area 3: Field-Initiated Topics

Field-initiated topics that address the needs of working interpreters to acquire specialized knowledge and competencies. These topics may address new specialty areas that require development of training modules of sufficient intensity, duration, and scope of sequence to warrant funding of an entire grant. Proposed topics may also replace training in an established specialty area that is no longer relevant. For instance, applicants may propose new or updated training, such as interpreting in a VR setting given reauthorization of the Rehabilitation Act, as amended, by WIOA. Applicants may also propose new subsets of training in established specialty areas. For instance, in health care interpreting, mental health might be one permissible subset of training because it has its own unique challenges and complexities in terms of setting and deaf consumer needs. In addition, applicants must provide sufficient evidence to demonstrate the need for the proposed new specialty training project or to show that an existing specialty training project is not adequately meeting the training needs of interpreters in order to better meet the linguistic and communication needs of deaf, hard-of-hearing, and deaf-blind consumers.

Applicants may also propose to enhance existing training developed in prior grant cycles for deaf-blind interpreting, health care interpreting, legal interpreting, interpreting in a VR setting, interpreting provided by Deaf interpreters, and video remote interpreting and video relay interpreting. In this instance, applicants must propose to improve, update, and develop new material to support existing specialty training in these areas. Applicants must describe in their application specific improvements, updates, and new material to be developed and provide rationale for why this is needed. Applicants must demonstrate the demand for interpreters in these existing specialty areas and, to the extent possible, specify areas of the country in which there are not enough trained interpreters to adequately meet the communication needs of deaf, hard-of-hearing, and deaf-blind consumers.

Applications that propose only to continue existing training in these areas are not eligible for funding. Additional field-initiated topics not eligible under this final priority include topics focusing on educational interpreting for pre-k-12 and deaf self-advocacy training.

Note: The Secretary intends to fund a total of four projects in FY 2016 that have been awarded at least eighty-percent of the maximum possible points, including at least one project from each of the three specialty areas. As a result, the Secretary may fund applications out of rank order.

Types of Priorities:

When inviting applications for a competition using one or more priorities, we designate the type of each priority as absolute, competitive preference, or invitational through a notice in the **Federal Register**. The effect of each type of priority follows:

Absolute priority: Under an absolute priority, we consider only applications that meet the priority (34 CFR 75.105(c)(3)).

Competitive preference priority: Under a competitive preference priority, we give competitive preference to an application by (1) awarding additional points, depending on the extent to which the application meets the priority (34 CFR 75.105(c)(2)(i)); or (2) selecting an application that meets the priority over an application of comparable merit that does not meet the priority (34 CFR 75.105(c)(2)(ii)).

Invitational priority: Under an invitational priority, we are particularly interested in applications that meet the priority. However, we do not give an application that meets the priority a preference over other applications (34 CFR 75.105(c)(1)).

This notice does not preclude us from proposing additional priorities, requirements, definitions, or selection criteria, subject to meeting applicable rulemaking requirements.

Note: This notice does *not* solicit applications. In any year in which we choose to use this priority, we invite applications through a notice in the **Federal Register**.

Paperwork Reduction Act of 1995

As part of its continuing effort to reduce paperwork and respondent burden, the Department provides the general public and Federal agencies with an opportunity to comment on proposed and continuing collections of information in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)). This helps ensure that the public understands the Department's collection instructions, respondents can provide the requested

data in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the Department can properly assess the impact of collection requirements on respondents.

This final priority contains information collection requirements that are approved by OMB under the National Interpreter Education program 1820-0018; this final priority does not affect the currently approved data collection.

Executive Orders 12866 and 13563

Regulatory Impact Analysis

Under Executive Order 12866, the Secretary must determine whether this regulatory action is “significant” and, therefore, subject to the requirements of the Executive order and subject to review by the Office of Management and Budget (OMB). Section 3(f) of Executive Order 12866 defines a “significant regulatory action” as an action likely to result in a rule that may—

(1) Have an annual effect on the economy of \$100 million or more, or adversely affect a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities in a material way (also referred to as an “economically significant” rule);

(2) Create serious inconsistency or otherwise interfere with an action taken or planned by another agency;

(3) Materially alter the budgetary impacts of entitlement grants, user fees, or loan programs or the rights and obligations of recipients thereof; or

(4) Raise novel legal or policy issues arising out of legal mandates, the President’s priorities, or the principles stated in the Executive order.

This final regulatory action is not a significant regulatory action subject to review by OMB under section 3(f) of Executive Order 12866.

We have also reviewed this final regulatory action under Executive Order 13563, which supplements and explicitly reaffirms the principles, structures, and definitions governing regulatory review established in Executive Order 12866. To the extent permitted by law, Executive Order 13563 requires that an agency—

(1) Propose or adopt regulations only upon a reasoned determination that their benefits justify their costs (recognizing that some benefits and costs are difficult to quantify);

(2) Tailor its regulations to impose the least burden on society, consistent with obtaining regulatory objectives and taking into account—among other things

and to the extent practicable—the costs of cumulative regulations;

(3) In choosing among alternative regulatory approaches, select those approaches that maximize net benefits (including potential economic, environmental, public health and safety, and other advantages; distributive impacts; and equity);

(4) To the extent feasible, specify performance objectives, rather than the behavior or manner of compliance a regulated entity must adopt; and

(5) Identify and assess available alternatives to direct regulation, including economic incentives—such as user fees or marketable permits—to encourage the desired behavior, or provide information that enables the public to make choices.

Executive Order 13563 also requires an agency “to use the best available techniques to quantify anticipated present and future benefits and costs as accurately as possible.” The Office of Information and Regulatory Affairs of OMB has emphasized that these techniques may include “identifying changing future compliance costs that might result from technological innovation or anticipated behavioral changes.”

We are issuing this final priority only on a reasoned determination that its benefits justify its costs. In choosing among alternative regulatory approaches, we selected those approaches that maximize net benefits. Based on the analysis that follows, the Department believes that this regulatory action is consistent with the principles in Executive Order 13563.

We also have determined that this regulatory action does not unduly interfere with State, local, and tribal governments in the exercise of their governmental functions.

In accordance with both Executive orders, the Department has assessed the potential costs and benefits, both quantitative and qualitative, of this regulatory action. The potential costs are those resulting from statutory requirements and those we have determined as necessary for administering the Department’s programs and activities.

Through this priority, training will be provided to working interpreters for English-ASL interpreter training in specialty areas. These activities will help interpreters to more effectively meet the communication needs of individuals who are deaf or hard of hearing and individuals who are Deaf-blind. The training ultimately will improve the quality of VR services and the competitive integrated employment outcomes achieved by individuals with

disabilities. This priority will promote the efficient and effective use of Federal funds.

Intergovernmental Review: This program is subject to Executive Order 12372 and the regulations in 34 CFR part 79. One of the objectives of the Executive order is to foster an intergovernmental partnership and strengthened federalism. The Executive order relies on processes developed by State and local governments for coordination and review of proposed Federal financial assistance.

This document provides early notification of our specific plans and actions for this program.

Accessible Format: Individuals with disabilities can obtain this document in an accessible format (e.g., braille, large print, audiotape, or compact disc) on request to the program contact person listed under **FOR FURTHER INFORMATION CONTACT**.

Electronic Access to This Document: The official version of this document is the document published in the **Federal Register**. Free Internet access to the official edition of the **Federal Register** and the Code of Federal Regulations is available via the Federal Digital System at: www.gpo.gov/fdsys. At this site, you can view this document, as well as all other documents of this Department published in the **Federal Register**, in text or Portable Document Format (PDF). To use PDF you must have Adobe Acrobat Reader, which is available free at the site.

You may also access documents of the Department published in the **Federal Register** by using the article search feature at: www.federalregister.gov. Specifically, through the advanced search feature at this site, you can limit your search to documents published by the Department.

Dated: August 9, 2016.

Sue Swenson,

Acting Assistant Secretary for Special Education and Rehabilitative Services.

[FR Doc. 2016-19273 Filed 8-11-16; 8:45 am]

BILLING CODE 4000-01-P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA-R09-OAR-2012-0959; FRL-9948-11-Region 9]

Revisions to the California State Implementation Plan, Sacramento Metropolitan Air Quality Management District

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is finalizing a partial approval and partial disapproval of revisions to the Sacramento Metropolitan Air Quality Management District (SMAQMD or District) portion of the California State Implementation Plan (SIP). This action was proposed in the **Federal Register** on January 15, 2016 and concerns the District’s demonstration regarding Reasonably Available Control Technology (RACT) requirements for the 1997 8-hour ozone National Ambient Air Quality Standard (NAAQS). Under authority of the Clean Air Act (CAA or the Act), this action directs California to correct RACT deficiencies in the SMAQMD portion of the California SIP.

DATES: This rule is effective on September 30, 2016.

ADDRESSES: The EPA has established docket number ¹ EPA–R09–OAR–2012–0959 for this action. Generally, documents in the docket for this action are available electronically at www.regulations.gov or in hard copy at EPA Region IX, 75 Hawthorne Street, San Francisco, California 94015–3901. While all documents in the docket are listed at www.regulations.gov, some information may be publicly available only at the hard copy location (e.g., copyrighted material, large maps), and some may not be publicly available in either location (e.g., Confidential Business Information (CBI)). To inspect the hard copy materials, please schedule an appointment during normal business

hours with the contact listed in the **FOR FURTHER INFORMATION CONTACT** section.

FOR FURTHER INFORMATION CONTACT: James Shears, EPA Region IX, (213) 244–1810, shears.james@epa.gov.

SUPPLEMENTARY INFORMATION: Throughout this document, “we,” “us” and “our” refer to the EPA.

Table of Contents

- I. Proposed Action
- II. Public Comments and EPA Responses
- III. Final Action and CAA Consequences
- IV. Statutory and Executive Order Reviews

I. Proposed Action

On January 15, 2016 (81 FR 2136), the EPA proposed to partially approve and partially disapprove the following documents that were submitted for incorporation into the California SIP:

Local agency	Document	Adopted	Submitted
SMAQMD	Reasonably Available Control Technology (RACT) as Applicable to the 8-hour Ozone Standard, dated October 26, 2006 (“2006 RACT SIP”).	10/26/06	7/11/07
SMAQMD	Reasonably Available Control Technology (RACT) Update as Applicable to the 8-Hour Ozone Standard, dated October 23, 2008 (“Updated RACT SIP”).	10/23/08	1/21/09

We proposed to approve the 2006 RACT SIP and Updated RACT SIP with the exception of Rule 455, Pharmaceutical Manufacturing, and the municipal waste landfill category as satisfying the RACT requirements of CAA section 182(b)(2) and (f).

Also under CAA section 110(k)(3), we proposed to disapprove those elements of the 2006 RACT SIP and Updated RACT SIP that pertain to Rule 455 and the municipal waste landfill category because we found that these elements did not meet all of the applicable CAA requirements. In particular, we found that Rule 455, Pharmaceuticals Manufacturing, (amended 11/29/83 and 9/5/96) lacks test methods, recordkeeping, and monitoring requirements that are necessary to support enforcement of the rule. See CAA section 110(a). We also found that the California SIP did not contain any provisions to implement RACT for volatile organic compounds (VOCs) at the Kiefer landfill, which is a major source of VOCs located within the Sacramento Metro area.

SMAQMD’s submittal also included a number of negative declarations. CAA Sections 182(b)(2) and (f) require that SIPs for ozone nonattainment areas classified as moderate or above implement RACT for any source covered by a Control Techniques Guidelines (CTG) document and any

major stationary source of VOCs or nitrogen oxides (NO_x). If an ozone nonattainment area does not have any stationary sources covered by a particular CTG, then the area may submit a negative declaration certifying that there are no such sources in the relevant nonattainment area in lieu of adopting RACT requirements for that category. We proposed approval of SMAQMD’s negative declarations because we determined that they complied with relevant CAA requirements.

Our proposed action contains more information on the basis for this rulemaking and on our evaluation of the 2006 RACT SIP and Updated RACT SIP.

II. Public Comments and EPA Responses

The EPA’s proposed action provided a 30-day public comment period. During this period, we received no comments.

III. Final Action and CAA Consequences

A. Final Action

For the reasons provided in our January 15, 2016 proposed rule, the EPA is partially approving and partially disapproving SMAQMD’s 2006 RACT SIP and Updated RACT SIP under CAA section 110(k)(3). In particular, we are approving all elements of the 2006 RACT SIP and Updated RACT SIP, with

the exception of elements pertaining to Rule 455, Pharmaceutical Manufacturing, and the municipal waste landfill category, as satisfying the RACT requirements of CAA section 182(b)(2) and (f). We are disapproving those elements of the 2006 RACT SIP and Updated RACT SIP that pertain to Rule 455 and the municipal waste landfill category because we have determined that they do not meet all of the applicable CAA requirements.

B. CAA Consequences of Final Partial Disapproval

The EPA is committed to working with the District and CARB to resolve the identified RACT deficiencies. We note that SMAQMD will not be required to submit a revised CAA section 182 RACT SIP demonstration for the 1997 8-hour ozone NAAQS if it submits for SIP approval, rules and/or permit provisions that implement RACT for the pharmaceutical manufacturing source category, as well as RACT for VOCs for the Kiefer landfill, and the EPA fully approves them into the SIP. On April 28, 2016, SMAQMD repealed Rule 455 and adopted amendments to Rule 464, Organic Chemical Manufacturing Operations to incorporate the pharmaceutical manufacturing requirements from Rule 455 along with other improvements to implement RACT into Rule 464. SMAQMD plans,

¹ Our proposal indicated that the docket number for this action was EPA–R09–2012–959. This final

action corrects the docket number to “0959” to conform to numbering convention.

in July 2016, to adopt the relevant portions of the Kiefer landfill permit into the SIP to implement RACT.

Because we are finalizing a partial disapproval of the 2006 RACT SIP and Updated RACT SIP, the EPA must promulgate a federal implementation plan (FIP) under section 110(c) unless we approve subsequent SIP revisions that correct the rule deficiencies within 24 months of the effective date of this action. In addition, sanctions will be imposed under CAA section 179 and 40 CFR 52.31, unless the EPA approves subsequent SIP revisions that correct the rule deficiencies or issues an interim final determination that submitted revisions correct the deficiencies within 18 months of the effective date of this action.

IV. Statutory and Executive Order Reviews

Additional information about these statutes and Executive Orders can be found at <http://www2.epa.gov/laws-regulations/laws-and-executive-orders>.

A. Executive Order 12866: Regulatory Planning and Review and Executive Order 13563: Improving Regulation and Regulatory Review

This action is not a significant regulatory action and was therefore not submitted to the Office of Management and Budget (OMB) for review.

B. Paperwork Reduction Act (PRA)

This action does not impose an information collection burden under the PRA because this action does not impose additional requirements beyond those imposed by state law.

C. Regulatory Flexibility Act (RFA)

I certify that this action will not have a significant economic impact on a substantial number of small entities under the RFA. This action will not impose any requirements on small entities beyond those imposed by state law.

D. Unfunded Mandates Reform Act (UMRA)

This action does not contain any unfunded mandate as described in UMRA, 2 U.S.C. 1531–1538, and does not significantly or uniquely affect small governments. This action does not impose additional requirements beyond those imposed by state law. Accordingly, no additional costs to State, local, or tribal governments, or to the private sector, will result from this action.

E. Executive Order 13132: Federalism

This action does not have federalism implications. It will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government.

F. Executive Order 13175: Coordination With Indian Tribal Governments

This action does not have tribal implications, as specified in Executive Order 13175, because the SIP is not approved to apply on any Indian reservation land or in any other area where the EPA or an Indian tribe has demonstrated that a tribe has jurisdiction, and will not impose substantial direct costs on tribal governments or preempt tribal law. Thus, Executive Order 13175 does not apply to this action.

G. Executive Order 13045: Protection of Children From Environmental Health Risks and Safety Risks

The EPA interprets Executive Order 13045 as applying only to those regulatory actions that concern environmental health or safety risks that the EPA has reason to believe may disproportionately affect children, per the definition of “covered regulatory action” in section 2–202 of the Executive Order. This action is not subject to Executive Order 13045 because it does not impose additional requirements beyond those imposed by state law.

H. Executive Order 13211: Actions That Significantly Affect Energy Supply, Distribution, or Use

This action is not subject to Executive Order 13211, because it is not a significant regulatory action under Executive Order 12866.

I. National Technology Transfer and Advancement Act (NTTAA)

Section 12(d) of the NTTAA directs the EPA to use voluntary consensus standards in its regulatory activities unless to do so would be inconsistent with applicable law or otherwise impractical. The EPA believes that this action is not subject to the requirements of section 12(d) of the NTTAA because application of those requirements would be inconsistent with the CAA.

J. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Population

The EPA lacks the discretionary authority to address environmental justice in this rulemaking.

K. Congressional Review Act (CRA)

This action is subject to the CRA, and the EPA will submit a rule report to each House of the Congress and to the Comptroller General of the United States. This action is not a “major rule” as defined by 5 U.S.C. 804(2).

L. Petitions for Judicial Review

Under CAA section 307(b)(1), petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by October 11, 2016. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements (see section 307(b)(2)).

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Nitrogen dioxide, Ozone, Reporting and recordkeeping requirements, Volatile organic compounds.

Dated: May 19, 2016.

Alexis Strauss,

Acting Regional Administrator, Region IX.

Part 52, Chapter I, Title 40 of the Code of Federal Regulations is amended as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

■ 1. The authority citation for Part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart F—California

■ 2. Section 52.220 is amended by adding paragraphs (c)(382)(ii)(C) and (c)(475) to read as follows:

§ 52.220 Identification of plan—in part.

* * * * *

(c) * * *
(382) * * *
(ii) * * *

(C) Sacramento Metropolitan Air Quality Management District.

(1) Reasonably Available Control Technology (RACT) as Applicable to the 8-Hour Ozone Standard, dated October 26, 2006, as adopted October 26, 2006, excluding the RACT determinations for:

(i) Pharmaceutical Products Manufacturing Source Category; and

(ii) Kiefer Landfill (RACT for volatile organic compounds).

* * * * *

(475) A new plan for the following AQMD was submitted January 21, 2009 by the Governor's designee.

(i) [Reserved]
(ii) Additional Material.
(A) Sacramento Metropolitan Air Quality Management District.

(1) Reasonably Available Control Technology (RACT) Update as Applicable to the 8-Hour Ozone Standard, dated October 23, 2008, adopted October 23, 2008.

* * * * *

■ 3. Section 52.222 is amended by adding paragraph (a)(2)(iv) to read as follows:

§ 52.222 Negative declarations.

(a) * * *

(2) * * *

(iv) *Negative declarations for Sacramento Metropolitan Air Quality Management District.*

BILLING CODE 6560-50-P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA-R06-OAR-2012-0985; FRL-9950-50-Region 6]

Approval and Promulgation of Air Quality Implementation Plans; Texas; Interstate Transport of Air Pollution for the 2008 Ozone National Ambient Air Quality Standards

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is disapproving the portion of a Texas State Implementation Plan (SIP) submittal pertaining to interstate transport of air pollution which will significantly contribute to nonattainment or interfere with maintenance of the 2008 ozone National Ambient Air Quality Standard (NAAQS) in other states. Disapproval establishes a 2-year deadline for the EPA to promulgate a Federal Implementation Plan (FIP) for Texas to address the Clean Air Act (CAA) interstate transport requirements pertaining to significant contribution to nonattainment and interference with maintenance of the 2008 ozone NAAQS in other states, unless the EPA approves a SIP that meets these requirements. Disapproval does not start a mandatory sanctions clock for Texas.

DATES: This rule is effective on September 12, 2016.

ADDRESSES: The EPA has established a docket for this action under Docket ID No. EPA-R06-OAR-2012-0985. All documents in the docket are listed on the <http://www.regulations.gov> Web site. Although listed in the index, some information is not publicly available, e.g., Confidential Business Information or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy. Publicly available docket materials are available either electronically through <http://www.regulations.gov> or in hard

copy at EPA Region 6, 1445 Ross Avenue, Suite 700, Dallas, Texas 75202-2733.

FOR FURTHER INFORMATION CONTACT: Carl Young, 214-665-6645, young.carl@epa.gov.

SUPPLEMENTARY INFORMATION:

Throughout this document, “we,” “us,” and “our” means the EPA.

I. Background

This rulemaking addresses an infrastructure SIP submittal from the state of Texas addressing, among other things, the requirements of CAA section 110(a)(2)(D)(i)(I), also known as the good neighbor provision (or interstate transport prongs 1 and 2), with respect to the 2008 ozone NAAQS. The background for this action is discussed in detail in our April 11, 2016 proposal (81 FR 21290). In that action we proposed to disapprove the portion of the December 13, 2012 Texas SIP submittal pertaining to CAA section 110(a)(2)(D)(i)(I) which requires that the State prohibit any emissions activity within the state from emitting air pollutants which will significantly contribute to nonattainment (prong 1) or interfere with maintenance (prong 2) of the 2008 ozone NAAQS in other states.¹ In proposing to disapprove the SIP submittal as to prongs 1 and 2 of the good neighbor provision, we noted several deficiencies in Texas’ submittal: (1) Texas limited its discussion of data only to areas designated nonattainment in states that are geographically closest to Texas (Arizona, Arkansas, Colorado, Illinois, Indiana, Louisiana, Mississippi, Missouri, Tennessee, and Wisconsin); and (2) Texas did not give the “interfere with maintenance” clause of CAA section 110(a)(2)(D)(i)(I) independent significance because its analysis did not attempt to evaluate the potential impact of Texas emissions on areas that are currently measuring clean data, but that may have issues maintaining that air quality.² Finally, the EPA explained that

¹ In a separate action, we disapproved the portion of the SIP submittal pertaining to the CAA section 110(a)(2)(D)(i)(II) requirement to address the interstate transport of air pollution which will interfere with other states’ programs for visibility protection (81 FR 296, January 5, 2016). We proposed to approve the other portions of the infrastructure SIP submittal on February 8, 2016 (81 FR 6483).

² In addition, the EPA cited at proposal certain technical information the agency had released in order to facilitate efforts to address interstate transport requirements for the 2008 ozone NAAQS, and that this information was used to support the proposed Cross-State Air Pollution Rule Update for the 2008 ozone NAAQS (CSAPR Update) (81 FR 21299, 21292). We noted that such information contradicts Texas’ conclusions that its SIP contained adequate provisions to meet the CAA interstate transport requirements with respect to the

Texas and other states could no longer rely on the implementation of the Clean Air Interstate Rule (CAIR) to satisfy emission reduction obligations with respect to the 2008 ozone NAAQS (81 FR 21290, 21294-5). The EPA is finalizing its proposed disapproval in this action.

We received three comments during the comment period on our proposed SIP disapproval. The comments were submitted by the State of Texas (Texas Commission on Environmental Quality “TCEQ”), Luminant (a Texas electricity producer) and a member of the public. A synopsis of the comments and our responses are provided below.

II. Response to Comments

Comment: Comments were received from a member of the public that was supportive of the EPA’s basis for its proposed action, but added that (1) the public can better understand how we are using the most current information if we clarify and explain how the projections and modeling discussed in the evaluation for our proposal are informed by recent ozone monitoring data, and (2) the commenter stated that the EPA took too long to propose action on the Texas SIP revision, noting that Texas would benefit from earlier review of its analysis by the EPA.

Response: We agree with the commenter’s conclusion that Texas’s SIP submittal was inadequate to address the statutory interstate transport requirements with respect to the 2008 ozone NAAQS. With respect to the commenter’s first concern, the projections and modeling released in the August 4, 2015 NODA and the proposed CSAPR Update, which we also recited in the EPA’s proposed action on the Texas SIP submittal. In our CSAPR Update proposal, we explained how the CSAPR Update Rule proposed to use recent ozone monitoring data to inform our evaluation of interstate transport (80 FR 75706, 75724). We proposed to identify as nonattainment receptors those monitoring sites that (1) measured ozone concentrations that exceed the NAAQS based on monitoring data from years 2012-2014, and (2) are projected to exceed the NAAQS in 2017

2008 ozone NAAQS. See Notice of Data Availability (NODA), 80 FR 46271, (August 4, 2015) and the proposed CSAPR Update, 80 FR 75706 (December 3, 2015). We also noted at proposal that the EPA technical information in the NODA and the proposed CSAPR Update accounted for the emission reductions resulting from controls listed in the SIP, implemented within the state, and nonetheless showed that Texas will contribute to downwind air quality problems. The CSAPR Update, however, is outside the scope of this action, and is irrelevant to the question of whether the Texas SIP should be disapproved.

based on an average design value.³ We proposed to identify maintenance receptors as those monitoring sites that have measured ozone concentrations that meet the NAAQS (clean data) based on monitoring data from years 2012–2014 and are projected to exceed the NAAQS in 2017 based on a maximum or average design value. We proposed this method of projecting from recent monitoring data to 2017 to identify maintenance receptors, since the monitoring sites of the proposed maintenance receptors currently meeting the NAAQS could be subject to conditions that may allow violations to reoccur and therefore may have future maintenance concerns. For more information about how the EPA identified 2017 nonattainment and maintenance receptors, please see pages 75723–75726 in the proposed CSAPR Update. (80 FR 75706). Today’s rulemaking does not address which monitoring sites are identified as nonattainment and maintenance receptors with respect to interstate transport for the 2008 ozone NAAQS. Such determination, including more recent ozone monitoring data which will inform that analysis, will be addressed in the EPA’s final CSAPR Update and are outside the scope of this final action. The EPA’s disapproval is based on the inadequacies in the analysis provided in Texas’s SIP submittal, as described in this document and in EPA’s proposed action on that SIP.

With respect to the timeliness of the EPA’s action on the Texas SIP submittal, CAA section 110(k)(2) requires the EPA to act on SIPs within one year after a submittal is determined to be complete. We determined that the Texas infrastructure SIP submittal, which includes transport, was complete on December 20, 2012. While the EPA generally agrees that prompt action on state SIP submittals can be beneficial to the states’ planning efforts, in this case, the D.C. Circuit’s decision in *North Carolina v. EPA*, 531 F.3d 896, 908–911 (D.C. Cir. 2008) provided the holding that states must give the “interfere with maintenance” clause of CAA section 110(a)(2)(D)(i)(I) independent significance, which Texas failed to do.

Comment: The TCEQ stated that it does not support the EPA’s proposed disapproval of the state’s interstate transport portion of its SIP submittal because the TCEQ’s interstate transport analysis adequately addresses the

requirements of CAA section 110(a)(2)(D)(i)(I). Specifically, TCEQ stated that the EPA failed to issue guidance in a timely manner for states to use in developing infrastructure and transport SIP revisions for the 2008 ozone NAAQS. TCEQ therefore contends that it is inappropriate for the EPA to conclude that the state’s analysis of ozone contributions to other areas is incomplete when the EPA did not provide timely guidance stating what would constitute a complete analysis. TCEQ explained that its SIP revision was submitted on December 13, 2012 in order to meet the January 4, 2013 deadline by which the EPA was court-ordered to issue findings of failure to submit infrastructure SIPs for the 2008 ozone NAAQS. TCEQ notes that the EPA did not issue infrastructure SIP guidance until September 13, 2013, eight months following the January 2013 deadline, which did not contain any information on what would constitute an adequate interstate transport analysis. TCEQ further notes that the EPA did not provide information to states regarding interstate transport for the 2008 ozone NAAQS until 2015, through information provided in a January 22, 2015 memo, an August 4, 2015 NODA, and the December 3, 2015 CSAPR Update proposal, which was well after the state’s SIP submittal. Therefore, as a result of the EPA’s lack of timely transport guidance for the 2008 ozone standard and subsequent NODA regarding 2017 nonattainment and maintenance receptor linkages and contributions, TCEQ contends that it was forced to expend effort and resources to develop its SIP revision without knowing how the EPA would evaluate Texas’ interstate transport obligation. Further, the EPA has routinely failed to issue timely guidance for SIP revisions and to even meet statutory SIP review deadlines in the CAA. As a result, the EPA has disrupted the SIP development process nationwide, undermining the states’ ability to submit sufficient SIP revisions.

Response: We disagree that Texas’ December 13, 2012 SIP submittal containing the state’s transport analysis adequately addressed the requirements of CAA section 110(a)(2)(D)(i)(I). Rather, the state’s analysis was deficient to address the statutory requirements, as detailed in the proposal and in more detail in this document. CAA section 110(a)(2)(D)(i)(I) requires that for a new or revised standard, each SIP must contain adequate provisions to prohibit any emissions activity within the state from emitting air pollutants that will

“contribute significantly to nonattainment” or “interfere with maintenance” of the applicable air quality standard in any other state—here being the 2008 ozone standard. (81 FR 21290–1, April 11, 2016). Texas submitted an analysis of monitoring data, wind patterns, emissions data and emissions controls and concluded that based on monitoring data, due to decreases in ozone design values and existing control measures, emissions from sources from within the state do not contribute significantly to nonattainment or interfere with maintenance of the 2008 ozone NAAQS in other states. We find that Texas’ analysis was not adequate because Texas limited its discussion of data only to areas designated nonattainment in states that are geographically closest to the state and we find this approach incomplete, (as detailed in our proposal), since the state did not consider other areas that were not formally designated as nonattainment. (81 FR 21292). Moreover, the state did not give the “interfere with maintenance” clause of CAA section 110(a)(2)(D)(i)(I) independent significance, consistent with the D.C. Circuit’s decision in *North Carolina v. EPA*, 531 F.3d 896, 908–911 (D.C. Cir. 2008), because its analysis did not attempt to evaluate the potential impact of Texas emissions on areas that are currently measuring clean data, but that may have issues maintaining that air quality. (81 FR 21292). As we noted at proposal the EPA’s most recent technical information demonstrates that emissions from Texas do impact air quality in other states relative to the 2008 ozone NAAQS. (81 FR 21292–3). With regard to the timelines of EPA guidance, in *EPA v. EME Homer City Generation, L.P.*, the Supreme Court clearly held that “nothing in the statute places the EPA under an obligation to provide specific metrics to States before they undertake to fulfill their good neighbor obligations.” 134 S. Ct. 1584, 1601 (2014).⁴ While we have taken a different approach in some prior rulemakings by providing states with an opportunity to submit a SIP after we quantified the states’ budgets (e.g., the

⁴ “Nothing in the Act differentiates the Good Neighbor Provision from the several other matters a State must address in its SIP. Rather, the statute speaks without reservation: Once a NAAQS has been issued, a State ‘shall’ propose a SIP within three years, § 7410(a)(1), and that SIP ‘shall’ include, among other components, provisions adequate to satisfy the Good Neighbor Provision, § 7410(a)(2).” *EPA v. EME Homer City Generation, L.P.*, 134 S. Ct. at 1600.

³ The design value for the 2008 ozone NAAQS is the 3-year average of the annual 4th highest daily maximum 8-hour ozone concentration at a monitoring site.

NO_xSIP Call and CAIR⁵), the CAA does not require such an approach. Regarding the commenter's contention that the EPA's alleged inability to review SIP submittals within the CAA timelines undermines the ability of states to submit sufficient SIPs, the State's ability to submit a sufficient SIP that meets the applicable requirements is unrelated to the EPA's timeline for review.

Comment: TCEQ and Luminant both state that the EPA's public notice on the proposed disapproval is not meaningful because they contend that the outcome was predetermined when the EPA proposed a FIP for Texas in the proposed CSAPR Update. They stated that at the time of the proposed FIP to update CSAPR, the EPA had taken no action on the previously submitted SIP submittal from Texas addressing interstate transport with respect to the 2008 ozone NAAQS. The commenters contend that the EPA should have evaluated the SIP submittal prior to proposing a CSAPR Update that included Texas. The commenters also stated that we had not satisfied the prerequisites of CAA section 110(c)(1) when we issued the proposed FIP for Texas in the proposed CSAPR Update. The commenters therefore contend that the proposed SIP disapproval is only a post hoc rationalization for the proposed CSAPR Update, and our approach is unlawful and impermissibly treads on cooperative federalism required under the CAA. Lastly, the commenters claim that had we reviewed the SIP revision before proposing the CSAPR Update for Texas, the state would have had the opportunity contemplated by the CAA to correct any problems with its SIP in a timely fashion and avoid the imposition of the FIP.

Response: We disagree with the commenters that the proposed disapproval was predetermined when the EPA issued the proposed CSAPR Update that included a FIP for Texas. Our proposal to disapprove the Texas SIP provided proper notice and an opportunity for public comment, as legally required, and provided distinct bases for the proposed disapproval. Importantly, the proposed disapproval of the Texas SIP allowed an opportunity for submittal of any information that could have changed our proposed views concerning (1) the adequacy of the SIP submittal, and (2) the effect of Texas emissions on ozone levels in downwind states as demonstrated in the modeling

and contribution information the EPA relied upon for its proposed disapproval. The EPA has not received any information demonstrating the identified inadequacies of the SIP submittal and the data showing the effect of Texas emissions in downwind states are inaccurate.

Whether the EPA appropriately proposed the CSAPR Update is outside the scope of this action, and is irrelevant to the question of whether the Texas SIP should be disapproved. The bases for the disapproval are further explained in both the proposal and this final action, and do not rely upon the proposed CSAPR Update. As described in the proposal and earlier in this document, whether or not the EPA had proposed the CSAPR Update, Texas' SIP submittal failed to include an analysis that appropriately evaluated the impact of state emissions on areas in other states, regardless of current nonattainment designations and considering the ability of areas currently measuring clean data to maintain that standard. These deficiencies are completely independent of any analysis conducted to support the CSAPR Update proposal.

Moreover, while the CSAPR Update proposal also relied upon the same modeling and contribution information to identify which states might be subject to a FIP in the final rulemaking, in the absence of an approvable SIP, the proposed disapproval of the Texas SIP did not rely upon the proposed findings in the CSAPR Update but rather cited, in addition to other deficiencies identified with the Texas SIP, technical data that was relevant to and informative for both proposals.

Our actions are consistent with CAA section 110(c) prerequisites in promulgating a FIP. In our December 3, 2015 **Federal Register** notice, we proposed to include Texas in the CSAPR Update (80 FR 75706). In that proposal we recognized that we could not promulgate a FIP for any state, including Texas, in the final CSAPR Update unless we found that the state had failed to make an approvable SIP submittal (80 FR 75719–20). A proposed rulemaking does not constitute a promulgation of a rule by the EPA, and therefore the proposed CSAPR Update does not constitute a "predetermined outcome" of EPA's review of Texas' SIP submittal, as the commenters describe, nor a promulgated FIP under CAA section 110(c). Were the EPA to finalize an approval of Texas' SIP, the EPA would not finalize the proposed inclusion of Texas in any final CSAPR Update. However, for the reasons described earlier, the EPA is finalizing its disapproval of Texas' SIP. However,

this final action does not promulgate a FIP nor make any final determination regarding whether and when the EPA will promulgate a FIP. The EPA will determine whether to issue a FIP in the context of the CSAPR Update in the rulemaking for that action, and thus any concerns regarding the EPA's authority to issue a FIP are appropriately raised only in the context of that rulemaking.

Finally, the EPA disagrees with the commenters' claim that had we reviewed the SIP revision before proposing the CSAPR Update for Texas, the state would have had the opportunity contemplated by the CAA to correct any problems with its SIP in a timely fashion in order to avoid the imposition of the FIP. Contrary to commenters' assertions, CAA does not contemplate that a state have an opportunity to correct deficiencies with its SIP either before the EPA takes action to act on the SIP or before the EPA imposes a FIP after disapproval of a SIP. CAA section 110(c) provides that the EPA "shall promulgate a [FIP] *at any time* within two years after" the EPA either finds that a state has failed to make a required submittal or disapproves a SIP, in whole or in part. As the Supreme Court confirmed in *EPA v. EME Homer City Generation, L.P.*, "EPA is not obliged to wait two years or postpone its action even a single day: The Act empowers the Agency to promulgate a FIP 'at any time' within the two-year limit." *EPA v. EME Homer City Generation, L.P.*, 134 S. Ct. 1584, 1600–01 (2014). The EPA notes, however, that states have the ability at any time, including before or after the imposition of a FIP, to submit an approvable SIP, which corrects any deficiency.

Comment: TCEQ commented that we inappropriately stated that it should have considered possible contributions to downwind areas that are not designated nonattainment but may nonetheless measure exceedances of the NAAQS. TCEQ further stated that we fail to mention how Texas might have accomplished this theoretical exercise particularly without EPA guidance on how to develop its transport SIP and considering the EPA relies on nationwide modeling to determine potential exceedances in areas that are attaining the NAAQS that is not made available to states prior to the statutory due dates for state transport SIPs. The TCEQ concedes that the EPA may now consider the CSAPR schema to be appropriate guidance for transport regulation, but contends that it is still not possible for states to effectively respond with timely transport SIPs. The commenter again notes that the EPA did

⁵ For information on the NO_x SIP call see 63 FR 57356 (October 27, 1998). For information on CAIR (the Clean Air Interstate Rule) see 70 FR 25162 (May 12, 2005).

not explain what type of transport analysis would be considered satisfactory when the EPA issued SIP guidance in 2013.

Response: Regardless of an air quality designation, any area may violate the NAAQS if upwind emissions affecting air quality are not adequately controlled. The EPA has routinely interpreted the obligation to prohibit emissions that “significantly contribute to nonattainment” of the NAAQS in downwind states to be independent of formal designations because exceedances can happen in any area.⁶ Nothing in the CAA limits States’ obligations under the good neighbor provision to downwind areas that have been formally designated nonattainment. To the contrary, CAA section 110(a)(2)(D)(i)(I) requires States to prohibit emissions that “will contribute significantly to nonattainment in . . . any other State.” (emphasis added). The future tense demonstrates that Congress intended this requirement to be forward-looking and apply to areas that will be in nonattainment regardless of formal designation. An area with air quality that is projected to exceed the NAAQS would be in nonattainment, and thus not meeting public health-based standards, regardless of whether it has been formally designated as a nonattainment area. An upwind state cannot be relieved of its obligation to address interstate transport of air pollution merely because of a lack of formal designation. Thus, Texas should have considered possible contributions to downwind areas that are not designated nonattainment but may nonetheless measure exceedances of the NAAQS in considering whether Texas emissions significantly contribute to nonattainment in another state.

With respect to the “interfere with maintenance” requirement, the court in

North Carolina v. EPA, (531 F.3d 896, D.C. Cir. 2008), was specifically concerned with areas not designated nonattainment when it rejected the view that “a state can never ‘interfere with maintenance’ unless the EPA determines that at one point it ‘contribute[d] significantly to nonattainment.’” 531 F.3d at 910. The court pointed out that areas barely attaining the standard due in part to emissions from upwind sources would have “no recourse” pursuant to such an interpretation. *Id.* Accordingly, and as described in the proposal, the court explained that the regulatory authority must give “independent significance” to the maintenance prong of CAA section 110(a)(2)(D)(i)(I) by separately identifying such downwind areas for purposes of defining states’ obligations pursuant to the good neighbor provision. Thus, Texas should have considered the potential impact of its emissions on areas that are currently measuring clean data, but may have issues maintaining that air quality.

Although the TCEQ questions how it could have completed such an analysis without explicit guidance from the EPA and before the EPA had conducted air quality modeling evaluating downwind air quality and contributions, as explained earlier, states bear the primary responsibility for demonstrating that their plans contain adequate provisions to address the statutory interstate transport provisions and the EPA is not required to issue guidance. In separate interstate transport actions, the EPA has reviewed and finalized action on interstate transport SIPs in states where air quality modeling was not available or where the total weight of evidence for finalizing action on the state’s SIP was not solely based on air quality modeling, according to these standards.⁷ As evidenced by these actions, consideration of monitoring data is one valid way to evaluate potential interstate transport impacts, but it does not absolve a state from evaluating its downwind impact regardless of formal

area designations and considering the requirements of both prongs of the good neighbor provision. As we noted above and as found by the Supreme Court in *EME Homer City Generation, L.P.*, the lack of guidance does not relieve either the states of the obligation to submit SIPs that address CAA section 110(a)(2)(D)(i)(I) nor the EPA of the obligation to review such SIPs consistent with the statutory requirements of the good neighbor provision. For the 2015 ozone NAAQS, we plan to provide information pertaining to interstate transport of air pollution later this year.⁸ Interstate transport SIPs for the 2015 ozone NAAQS are due October 26, 2018. We plan to continue our ongoing dialogue with states to assist in developing an appropriate transport SIP.

Comment: TCEQ and Luminant both state that in our CSAPR Update proposal the EPA did not give independent effect to both the “contribute significantly to nonattainment” and the “interfere with maintenance” requirements as nonattainment and maintenance receptors are treated exactly the same way as far as linkages to states are defined and emission budgets are set. Luminant also claims that the EPA would be in violation of the Supreme Court in *EME Homer City Generation, L.P.* if we impose the same “cost-effective controls” to address both interference with maintenance and significant contribution to nonattainment.

Further, the comments state that because some states are linked to receptors in marginal nonattainment areas, the EPA is requiring emissions reductions from upwind states, including Texas, to assist states that do not have make emission reductions or institute control strategies of their own. Further, the comments claim that we have failed to identify any balance between local controls in areas with potential maintenance problems and reductions that it is requiring of states upwind that it models as contributing at least 1% of the relevant NAAQS to these areas with modeled, not monitored, issues.

The commenters also disagree with the EPA’s finding that the Texas SIP submittal did not give independent significance to the CAA “interfere with

⁶ See, e.g., Clean Air Interstate Rule, 70 FR 25162, 25265 (May 12, 2005) (“As to impacts, CAA section 110(a)(2)(D) refers only to prevention of ‘nonattainment’ in other States, not to prevention of nonattainment in designated nonattainment areas or any similar formulation requiring that designations for downwind nonattainment areas must first have occurred.”); Cross-State Air Pollution Rule, 76 FR 48208, 48211 (Aug. 8, 2011) (evaluating nonattainment and maintenance concerns based on modeled projections); Brief for Respondents U.S. Environmental Protection Agency at 23–24, *EME Homer City Generation, L.P. v. EPA*, Case No. 11–1302 (D.C. Cir. Jan. 16, 2015), ECF No. 1532516 (defending the EPA’s identification of air quality problems in CSAPR independent of area designations). *Cf.* Final Response to Petition from New Jersey Regarding SO₂ Emissions From the Portland Generating Station, 76 FR 69052 (Nov. 7, 2011) (finding facility in violation of the prohibitions of CAA section 110(a)(2)(D)(i)(I) with respect to the 2010 SO₂ NAAQS prior to issuance of designations for that standard).

⁷ See, e.g., Air Quality State Implementation Plans; Approvals and Promulgations: Utah; Interstate Transport of Pollution for the 2006 PM_{2.5} NAAQS May 20, 2013 (78 FR 29314); Final Rule, 78 FR 48615 (August 9, 2013); Approval and Promulgation of Implementation Plans; State of California; Interstate Transport of Pollution; Significant Contribution to Nonattainment and Interference With Maintenance Requirements, Proposed Rule, 76 FR 146516, 14616–14626 (March 17, 2011); Final Rule, 76 FR 34872 (June 15, 2011); Approval and Promulgation of State Implementation Plans; State of Colorado; Interstate Transport of Pollution for the 2006 24-Hour PM_{2.5} NAAQS, Proposed Rule, 80 FR 27121, 27124–27125 (May 12, 2015); Final Rule, 80 FR 47862 (August 10, 2015).

⁸ See pages 6–7 of the attachment to the October 1, 2015 EPA memorandum “Implementing the 2015 Ozone National Ambient Air Quality Standards” from Janet McCabe, Acting Assistant Administrator, Office of Air and Radiation to Regional Administrators, Regions 1–10, https://www.epa.gov/sites/production/files/2015-10/documents/implementation_memo.pdf.

maintenance” requirement and contend that we have misconstrued that requirement by stating that TCEQ did not evaluate areas currently measuring clean data. Luminant contends that Texas’ SIP does give independent significance to the “interfere with maintenance” clause. TCEQ claims that the EPA has not promulgated a rule that identifies a required or recommended methodology for the EPA or states to give independent consideration to possible contributions that may interfere with maintenance in downwind areas, and contend that it is arbitrary and capricious for the EPA to propose disapproval for failure to meet a standard or requirement that did not exist at the time the statutory obligation matured.

Response: As described in the proposal, the EPA proposed disapproval in part because the Texas SIP submittal did not address the potential impact of Texas emissions on maintenance areas. Reiterating our position explained in the proposal, the D.C. Circuit in *North Carolina* explained that the regulatory authority must give “independent significance” to the maintenance prong of CAA section 110(a)(2)(D)(i)(I) by evaluating the impact of upwind state emissions on downwind areas that, while currently in attainment, are at risk of future nonattainment, considering historic variability. *North Carolina v. EPA*, 531 F.3d 896, 908–911 (D.C. Cir. 2008). While one commenter contends that Texas evaluated the interference with maintenance prong and concluded monitoring data do not suggest that emissions from Texas contribute significantly to nonattainment or interfere with maintenance of the 2008 ozone NAAQS for areas in any other state, nothing in Texas’ SIP submittal indicates that it performed any analysis to support its conclusion as the State limited its discussion of data only to certain areas designated nonattainment and did not consider whether those or any other areas might have trouble maintaining the standard even if they measured clean data. Thus, contrary to the commenter’s assertion, Texas did not give independent meaning to the interference with maintenance prong by evaluating the impact of upwind state emissions on downwind areas that, while currently in attainment, are at risk of future nonattainment, as required by the statute and as clarified by the D.C. Circuit in *North Carolina*.

The EPA disagrees with the commenter’s assertion that this standard or requirement did not exist at the time the statutory obligation to submit a transport SIP matured. At the time Texas was obligated to submit a SIP

addressing interstate transport requirements for the 2008 ozone NAAQS, CAA section 110(a)(2)(D)(i)(I) clearly required states to submit a plan containing adequate provisions prohibiting any source or other type of emissions activity within the state from emitting any air pollutant in amounts which will interfere with maintenance by any other state with respect to a particular NAAQS. This requirement has not changed since Texas’ obligation to submit a transport SIP matured, and contrary to commenter’s assertion, the EPA is not obligated to identify a required or recommended methodology for giving independent consideration to possible contributions that may interfere with maintenance in downwind areas prior to proposing action on a SIP addressing such statutory requirement. Nonetheless, the State’s SIP made no attempt to evaluate the maintenance prong with respect to the 2008 ozone NAAQS aside from its conclusory assertion that the requirements were satisfied.

To the extent the commenter has raised concerns with respect to the EPA’s interpretation and application of the CAA, including the “interfere with maintenance” clause, in the context of the CSAPR Update rulemaking, such comments are appropriately raised and addressed in that rulemaking. The EPA is not finalizing in this rule any determinations regarding the identification of specific downwind maintenance receptors, the magnitude of Texas’ contribution to those receptors, and the quantity of any emission reductions that might be necessary. Such determinations will be made in the context of the CSAPR Update rulemaking. To the extent that Luminant refers to the EPA’s approach as not compliant with the Supreme Court’s *EME Homer City Generation, L.P.* decision, this comment relates to the CSAPR Update rulemaking and not our action today. Thus, it is outside the scope of this action and would be more appropriately addressed in that separate rulemaking.

Comment: TCEQ claims that the EPA has not demonstrated that a contribution by upwind states of 1% of the NAAQS will interfere with maintenance in identified maintenance areas. Further the TCEQ contends that the EPA has not demonstrated that a 1% of the NAAQS contribution to modeled emissions in maintenance areas is appropriate for linking an upwind state to a maintenance monitor. Further, they contend that EPA has not demonstrated that the amount of reductions necessary to cure a contribution to nonattainment is also appropriate to ensure that an

upwind state is not interfering with maintenance. Lastly, TCEQ states that the 1% contribution threshold is arbitrary.

Response: The EPA explained in the CSAPR Update proposal its reasoning for why we believe it appropriate to use the same approach used in CSAPR to establish a 1% air screening threshold for the evaluation of interstate transport requirements for the 2008 ozone NAAQS, including the interference with maintenance requirement. 81 FR 21292–94. The commenter does not explain its allegations that the 1% threshold is arbitrary nor does the commenter explain how the EPA has not demonstrated this threshold is appropriate to show interference by upwind states with maintenance in identified maintenance areas.

Nonetheless, while the EPA cited the modeling conducted for the CSAPR Update as showing Texas may significantly contribute to nonattainment or interfere with maintenance of the 2008 ozone NAAQS in downwind states, we did not propose to make a specific finding of contribution or to quantify any specific emissions reduction obligation. We did not rely upon a 1% contribution threshold for this action. Rather, the evaluation of whether emissions from Texas significantly contribute to nonattainment or interfere with maintenance of the 2008 ozone NAAQS downwind, relying upon the use of a 1% contribution threshold, and if so what reductions are necessary to address that contribution, is being conducted in the context of the CSAPR Update rulemaking. Accordingly, this comment relates to the CSAPR Update rulemaking and not our action today. Thus, it is outside the scope of this action and would be more appropriately addressed in that separate rulemaking. The EPA will consider timely-submitted comments regarding the EPA’s air quality modeling and various associated legal and policy decisions in finalizing that rulemaking.

Comment: TCEQ stated that it supports the use of ambient air quality monitoring data as the only valid basis for making nonattainment designations and identifying nonattainment and maintenance receptors and that it does not support the use of modeling as the basis for designations or identifying either nonattainment or maintenance receptors for transport. TCEQ contends that using modeling for these actions could result in major capital expenditures for industry to fix something that may not be a real problem, and claims that to base these actions on modeling is inconsistent with

historical and present EPA policies. TCEQ also notes that the EPA does not redesignate an area to attainment when an area models attainment as part of an attainment demonstration, but rather uses monitoring data to verify attainment before redesignation.

Response: While the EPA does rely on ambient air quality monitoring data to make decisions on ozone nonattainment designations and redesignations, the EPA has routinely based its determination of receptors for purposes of evaluating interstate ozone transport on air quality modeling projections.⁹ This is because, regardless of designation, any area may violate the NAAQS if upwind emissions affecting air quality are not adequately controlled, and areas currently measuring clean data may still violate the NAAQS if conditions change such that attainment with the NAAQS can no longer be maintained. Thus, the means by which the EPA makes decisions with respect to area designations is not relevant to our identification of receptors that should be evaluated for interstate transport of air pollution. In *North Carolina v. EPA*, the D.C. Circuit concluded that the EPA's reliance on future projections to identify such receptors was a reasonable application of the statute. *North Carolina*, 531 F.3d at 914. Nonetheless, while the EPA has relied upon modeling to identify downwind air quality problems, the EPA has also stated that states may consider other types of data when evaluating interstate transport in developing their SIPs. See Memorandum from William T. Harnett to Regional Air Division Directors, Regions I–X, "Guidance on SIP Elements Required Under [CAA] Sections 110(a)(1) and (2) for the 2006 24-Hour Fine Particle (PM_{2.5}) National Ambient Air Quality Standards (NAAQS)", September 25, 2009.¹⁰ Indeed, as described earlier, the EPA has regularly evaluated interstate transport SIPs in western states, where modeling has not typically been available, considering monitored data in a manner that is consistent with the standards described in this document.

Comment: TCEQ stated that we failed to give comments on the adequacy of the State's interstate transport analysis during the State public comment period and that the lack of comments led the State to believe that the submitted analysis was adequate to show how

Texas contributes to other states' ozone concentrations.

Response: The EPA's authority and obligation under the Act is to review a SIP submittal and determine whether it meets the applicable requirements of the Act and regulations, regardless of whether we commented on a State's proposed SIP during its State rulemaking process. There is no requirement in the Act that the EPA must review, evaluate, and comment on a State's proposed SIP revision during the state rulemaking process, and no reasonable or legal basis for states to assume that the EPA's choosing to not provide comment on their analysis during the state public comment period constitutes the Agency's endorsement of such analysis.

Comment: Luminant stated that the EPA needs to revise the CSAPR ozone season NO_x budgets in accordance with the D.C. Circuit's remand in *EME Homer City Generation, L.P.* before the EPA can evaluate Texas' SIP submittal. See *EME Homer City Generation, L.P. v. EPA*, 795 F.3d 118 (D.C. Cir. 2015). Luminant stated that, by failing to issue new budgets for the 1997 ozone NAAQS, we are in violation of the D.C. Circuit's specific remand instructions. The commenter contends that the EPA cannot rationally evaluate Texas' SIP submittal until we comply with the court's remand. The commenter specifically contends that the EPA must replace the CSAPR budgets with lawful budgets that do not require more control than necessary to comply with the 1997 ozone NAAQS, and that otherwise, the EPA has no basis to disapprove the Texas SIP submittal. By failing to establish lawful budgets, the commenter claims that the EPA does not have the information necessary to evaluate additional reductions associated with Texas' plan to comply with the 2008 ozone NAAQS.

Response: The EPA has an independent statutory obligation to evaluate Texas' SIP submittal addressing the good neighbor provision with respect to the 2008 ozone NAAQS. The fact that the EPA has not yet completed its response to the D.C. Circuit's remand to address interstate transport with respect to the 1997 ozone NAAQS does not preclude either the state from addressing its own statutory obligation with respect to the 2008 ozone NAAQS pursuant to CAA section 110(a)(2)(D)(i)(I) or the EPA from fulfilling its statutory obligation to review the SIP submittal pursuant to CAA section 110(k). As noted earlier, the EPA has identified several deficiencies with the interstate transport analysis in the Texas SIP submittal that

are unrelated to the CSAPR rulemakings either with respect to the 1997 or 2008 ozone standards.

The EPA has proposed its intended response to address the D.C. Circuit's remand of the CSAPR ozone season NO_x budgets in the context of the CSAPR Update, which is expected to be finalized later this year. The commenter does not explain how the EPA's finalization of this action with respect to the 1997 ozone standard would aid in the state's evaluation of transport with respect to the 2008 ozone standard. Nonetheless, should the commenter have any concerns about the EPA's approach to addressing the court's remand, the appropriate venue for the EPA's evaluation of those concerns is in the context of the CSAPR Update rulemaking. Any concerns are outside the scope of this rulemaking.

Comment: Luminant stated that we must reopen the comment period for the CSAPR Update rulemaking. Luminant contends that comments previously submitted on the CSAPR Update proposal have limited utility because the EPA's rationale for disapproving Texas' SIP submittal was not known at the time those comments were submitted for that proposal.

Response: As noted earlier, the EPA has identified several deficiencies with the interstate transport analysis in the Texas SIP submittal that are unrelated to the CSAPR Update rulemaking. Moreover, any request to reopen the public comment period on the CSAPR Update is not appropriately raised in this rulemaking.

III. Final Action

For the reasons described in the proposal and in this final action, the EPA is disapproving a portion of the December 13, 2012 SIP submittal from Texas seeking to address the required infrastructure element under CAA section 110(a)(2)(D)(i)(I) with respect to the State's significant contribution to nonattainment or interference with maintenance of the 2008 ozone NAAQS in other states, known as prongs 1 and 2 of the good neighbor provision.

In a separate action, we disapproved the portion of the SIP submittal pertaining to the CAA section 110(a)(2)(D)(i)(II) requirement to address the interstate transport of air pollution which will interfere with other states' programs for visibility protection (81 FR 296, January 5, 2016). We proposed to approve the other portions of the infrastructure SIP submittal on February 8, 2016 (81 FR 6483). We expect to take final action on the other portions of the Texas infrastructure SIP at a later date.

⁹ See CSAPR (76 FR 48208, August 8, 2011), CAIR (70 FR 25162, May 12, 2005) and the NO_x SIP call (63 FR 57356, October 27, 1998).

¹⁰ [https://www3.epa.gov/ttn/naaqs/aqmguides/collection/cp2/20090925_harnett_section_110\(a\)_sip_2006_24-hr_pm2.5_naaqs.pdf](https://www3.epa.gov/ttn/naaqs/aqmguides/collection/cp2/20090925_harnett_section_110(a)_sip_2006_24-hr_pm2.5_naaqs.pdf).

Pursuant to CAA section 110(c)(1), this disapproval establishes a 2-year deadline for the EPA to promulgate a FIP for Texas to address the requirements of CAA section 110(a)(2)(D)(i) with respect to the 2008 ozone NAAQS unless Texas submits and we approve a SIP that meets these requirements. Disapproval does not start a mandatory sanctions clock for Texas pursuant to CAA section 179 because this action does not pertain to a part D plan for nonattainment areas required under CAA section 110(a)(2)(I) or a SIP call pursuant to CAA section 110(k)(5).

IV. Statutory and Executive Order Reviews

A. Executive Order 12866: Regulatory Planning and Review and Executive Order 13563: Improving Regulation and Regulatory Review

This final action is not a “significant regulatory action” and was therefore not submitted to the Office of Management and Budget for review.

B. Paperwork Reduction Act (PRA)

This final action does not impose an information collection burden under the PRA because it does not contain any information collection activities.

C. Regulatory Flexibility Act (RFA)

I certify that this action will not have a significant economic impact on a substantial number of small entities under the RFA. This action merely disapproves a SIP submittal as not meeting certain CAA requirements.

D. Unfunded Mandates Reform Act (UMRA)

This action does not contain any unfunded mandate as described in UMRA, 2 U.S.C. 1531–1538, and does not significantly or uniquely affect small governments. The action imposes no enforceable duty on any state, local or tribal governments or the private sector.

E. Executive Order 13132: Federalism

This action does not have federalism implications. It will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government.

F. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

This action does not have tribal implications as specified in Executive Order 13175. This action does not apply on any Indian reservation land, any other area where the EPA or an Indian

tribe has demonstrated that a tribe has jurisdiction, or non-reservation areas of Indian country. Thus, Executive Order 13175 does not apply to this action.

G. Executive Order 13045: Protection of Children From Environmental Health Risks and Safety Risks

The EPA interprets Executive Order 13045 as applying only to those regulatory actions that concern environmental health or safety risks that the EPA has reason to believe may disproportionately affect children, per the definition of “covered regulatory action” in section 2–202 of the Executive Order. This action is not subject to Executive Order 13045 because it merely disapproves a SIP submittal as not meeting certain CAA requirements.

H. Executive Order 13211: Actions That Significantly Affect Energy Supply, Distribution or Use

This action is not subject to Executive Order 13211, because it is not a significant regulatory action under Executive Order 12866.

I. National Technology Transfer and Advancement Act

This rulemaking does not involve technical standards.

J. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations

The EPA believes the human health or environmental risk addressed by this action will not have potential disproportionately high and adverse human health or environmental effects on minority, low-income or indigenous populations. This action merely disapproves a SIP submittal as not meeting certain CAA requirements.

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. The EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a “major rule” as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by October 11, 2016. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See CAA section 307(b)(2).)

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Ozone.

Dated: August 1, 2016.

Ron Curry,

Regional Administrator, Region 6.

40 CFR part 52 is amended as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

■ 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart SS—Texas

■ 2. Section 52.2275 is amended by adding paragraph (l) to read as follows:

§ 52.2275 Control strategy and regulations: Ozone.

* * * * *

(l) The portion of the SIP submitted on December 13, 2012 addressing Clean Air Act section 110(a)(2)(D)(i)(I) for the 2008 ozone NAAQS is disapproved.

[FR Doc. 2016–19151 Filed 8–11–16; 8:45 am]

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R10–OAR–2015–0397; FRL–9950–58–Region 10]

Approval and Promulgation of Implementation Plans; Idaho: Stationary Source Permitting Revisions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is approving, and incorporating by reference, revisions to

the Idaho State Implementation Plan (SIP) submitted on May 21, 2015. In the submission, Idaho revised stationary source permitting rules, including the addition of facility-wide emission limits and nonmetallic mineral processing plant regulations. Idaho also added an alternative method for stationary sources to comply with sulfur content of fuels limits, and updated provisions to account for changes to federal air quality regulations. The EPA is approving the submitted revisions, with the exception of certain provisions that are inappropriate for SIP approval.

DATES: This final rule is effective September 12, 2016.

ADDRESSES: The EPA has established a docket for this action under Docket ID No. EPA-R10-OAR-2015-0397. All documents in the docket are listed on the <http://www.regulations.gov> Web site. Although listed in the index, some information may not be publicly available, *i.e.*, Confidential Business Information or other information the disclosure of which is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and is publicly available only in hard copy form. Publicly available docket materials are available at <http://www.regulations.gov> or at EPA Region 10, Office of Air and Waste, 1200 Sixth Avenue, Seattle, Washington 98101. The EPA requests that you contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to schedule your inspection. The Regional Office's official hours of business are Monday through Friday, 8:30 to 4:30, excluding federal holidays.

FOR FURTHER INFORMATION CONTACT: Kristin Hall, Air Planning Unit, Office of Air and Waste (AWT-150), Environmental Protection Agency—Region 10, 1200 Sixth Ave., Seattle, WA 98101; telephone number: (206) 553-6357; email address: hall.kristin@epa.gov.

SUPPLEMENTARY INFORMATION:

Throughout this document wherever “we,” “us,” or “our” is used, it is intended to refer to the EPA.

Table of Contents

- I. Background
- II. Final Action
- III. Incorporation by Reference
- IV. Statutory and Executive Orders Review

I. Background

On May 21, 2015, Idaho submitted revisions to the Idaho State Implementation Plan. On June 19, 2016, the EPA proposed to approve the submitted revisions, with the exception of certain provisions that are

inappropriate for SIP approval (81 FR 37170). Please see our proposed rulemaking for further explanation and the basis for our finding. The public comment period for this proposal ended on July 11, 2016. We received no comments on the proposal.

II. Final Action

The EPA is approving, and incorporating by reference, the following revisions to the Idaho SIP submitted on May 21, 2015:

- IDAPA 58.01.01.006 *General Definitions*, except .49, .50, .51, .66, .67, .68.b, .116 (renumbered from .114), and .118 (renumbered from .116) (State effective 4/11/2014);
- IDAPA 58.01.01.011 *Definitions for the Purposes of Sections 790 through 799* (State effective 3/15/2002);
- IDAPA 58.01.01.107 *Incorporations by Reference*, except .03.f through .n, and with respect to .a, the incorporation by reference of 40 CFR 51.165 (State effective 4/11/2015);
- IDAPA 58.01.01.157 *Test Methods and Procedures* (State effective 4/11/2015);
- IDAPA 58.01.01.175 *Procedures and Requirements for Permits Establishing a Facility Emissions Cap* (State effective 4/11/2015);
- IDAPA 58.01.01.176 *Facility Emissions Cap*, except for provisions relating to hazardous air pollutants (State effective 4/11/2015);
- IDAPA 58.01.01.177 *Application Procedures* (State effective 4/11/2015);
- IDAPA 58.01.01.178 *Standard Contents of Permits Establishing a Facility Emissions Cap* (State effective 4/11/2015);
- IDAPA 58.01.01.179 *Procedures for Issuing Permits Establishing a Facility Emissions Cap* (State effective 4/11/2015);
- IDAPA 58.01.01.180 *Revisions to Permits Establishing a Facility Emissions Cap* (State effective 4/11/2015);
- IDAPA 58.01.01.181 *Notice and Record-Keeping of Estimates of Ambient Concentrations* (State effective 4/11/2015);
- IDAPA 58.01.01.201 *Permit to Construct Required* (State effective 4/11/2006);
- IDAPA 58.01.01.202 *Application Procedures* (State effective 4/11/2015);
- IDAPA 58.01.01.401 *Tier II Operating Permit*, except .01.a and .04, (State effective 4/11/2006);
- IDAPA 58.01.01.579 *Baselines for Prevention of Significant Deterioration* (State effective 4/11/2015);
- IDAPA 58.01.01.725 *Rules for Sulfur Content of Fuels* (State effective 4/11/2015);

- IDAPA 58.01.01.790 *Rules for the Control of Nonmetallic Mineral Processing Plants* (State effective 3/15/2002);
- IDAPA 58.01.01.791 *General Control Requirements*, (State effective 3/15/2002);
- IDAPA 58.01.01.793 *Emissions Standards for Nonmetallic Mineral Processing Plants not Subject to 40 CFR 60, Subpart OOO* (State effective 3/15/2002);
- IDAPA 58.01.01.794 *Permit Requirements*, except .04 (State effective 4/11/2015);
- IDAPA 58.01.01.795 *Permit by Rule Requirements* (State effective 3/15/2002);
- IDAPA 58.01.01.796 *Applicability* (State effective 3/15/2002);
- IDAPA 58.01.01.797 *Registration for Permit by Rule* (State effective 3/15/2002);
- IDAPA 58.01.01.798 *Electrical Generators* (State effective 3/15/2002); and
- IDAPA 58.01.01.799 *Nonmetallic Mineral Processing Plan Fugitive Dust Best Management Practice* (State effective 3/15/2002).

III. Incorporation by Reference

In this rule, the EPA is finalizing regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, the EPA is finalizing the incorporation by reference as described in the amendments to 40 CFR part 52 set forth below. These materials have been approved by the EPA for inclusion in the State Implementation Plan, have been incorporated by reference by the EPA into that plan, are fully federally-enforceable under sections 110 and 113 of the CAA as of the effective date of the final rulemaking of the EPA's approval, and will be incorporated by reference by the Director of the Federal Register in the next update to the SIP compilation.¹ The EPA has made, and will continue to make, these materials generally available through <http://www.regulations.gov> and/or at the EPA Region 10 Office (please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section of this preamble).

IV. Statutory and Executive Orders Review

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the CAA and applicable federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, the

¹ 62 FR 27968 (May 22, 1997).

EPA's role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this action merely approves state law as meeting federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104-4);
- does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because this action does not involve technical standards; and
- does not provide the EPA with the discretionary authority to address, as

appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where the EPA or an Indian Tribe has demonstrated that a Tribe has jurisdiction. In those areas of Indian country, the rule does not have Tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. The EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by October 11, 2016. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and

shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (*See* section 307(b)(2)).

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Particulate matter, Reporting and recordkeeping requirements, Sulfur oxides.

Authority: 42 U.S.C. 7401 *et seq.*

Dated: July 25, 2016.

Dennis J. McLerran,
Regional Administrator, Region 10.

For the reasons set forth in the preamble, 40 CFR part 52 is amended as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

- 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart N—Idaho

- 2. In § 52.670, the table in paragraph (c) is amended by:
 - a. Revising entries 006, 107, 157, 201, 202, 401, 579, and 725.
 - b. Adding entries 011, 175, 176, 177, 178, 179, 180, 181, 790, 791, 793, 794, 795, 796, 797, 798, and 799 in numerical order.

The revisions and additions read as follows:

§ 52.670 Identification of plan.

BILLING CODE 6560-50-P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA-R09-OAR-2015-0711; FRL-9949-84-Region 9]

Approval and Promulgation of Implementation Plans; California; San Joaquin Valley; Revisions to Motor Vehicle Emissions Budgets for Ozone and Particulate Matter

AGENCY: Environmental Protection Agency (EPA).
ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is taking final action to approve and conditionally approve revisions to the State of California’s State Implementation Plan (SIP) for the

San Joaquin Valley (SJV) area. The revisions consist of an update to the Motor Vehicle Emissions Budgets (“budgets”) for nitrogen oxides (NO_x) and volatile organic compounds (VOCs) for the 1997 8-hour ozone national ambient air quality standard (NAAQS or “standard”) for the SJV ozone nonattainment area and for NO_x and coarse particulate matter (PM₁₀) for the 1987 24-hour PM₁₀ standard for the SJV PM₁₀ maintenance area. The EPA is approving the SJV ozone revised budgets and conditionally approving the PM₁₀ budgets in accordance with the requirements of the Clean Air Act (CAA or “Act”) and the EPA’s regulations.

DATES: This rule is effective on September 30, 2016.

ADDRESSES: The EPA has established a docket for this action under Docket ID Number EPA-R09-OAR-2015-0711. All documents in the docket are listed on the <http://www.regulations.gov> Web site. Although listed in the index, some information is not publicly available, e.g., confidential business information or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available through <http://www.regulations.gov>, or please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section for additional availability information.

FOR FURTHER INFORMATION CONTACT: John Ungvarsky, Air Planning Office (AIR-2), U.S. Environmental Protection Agency, Region 9, (415) 972-3963, ungvarsky.john@epa.gov.

SUPPLEMENTARY INFORMATION: Throughout this document, “we,” “us” and “our” refer to the EPA.

Table of Contents

- I. Proposed Action
- II. Public Comments
- III. Final Action
- IV. Statutory and Executive Order Reviews

I. Proposed Action

On May 18, 2016 (81 FR 31212), the EPA proposed, under section 110(k)(3) of the Clean Air Act (CAA or “Act”), to approve a revision to the California SIP submitted by the California Air Resources Board (CARB) on November 13, 2015.¹ The SIP submittal revises budgets applicable to control strategy or maintenance plans for the SJV for the 1997 8-hour ozone standard, 2006 24-hour PM_{2.5} standard, and the 1987 24-hour PM₁₀ standard.² In our May 18, 2016 action, we proposed to approve revised budgets for the 1997 8-hour ozone standard and the 2006 24-hour PM_{2.5} standard. We also proposed to conditionally approve revised budgets for the 1987 24-hour PM₁₀ standard. CARB developed the revised budgets using EMFAC2014 and the travel activity projections provided by the SJV Metropolitan Planning Organizations (MPOs) consistent with the 2015 Federal Transportation Improvement Program (TIP). As such, the revised budgets reflect the most recent planning forecasts and are based on the most recent emission factor data and approved calculation methods.

The EPA previously approved the SJV budgets for the 1997 8-hour ozone standard and the 24-hour PM₁₀ standard. The ozone budgets were

¹ Letter, Richard W. Corey, Executive Officer, CARB to Jared Blumenfeld, Regional Administrator, EPA Region 9, November 13, 2015 with enclosures.

² For all three pollutants, the SJV nonattainment area includes all of seven counties, including Fresno, Kings, Madera, Merced, San Joaquin, Stanislaus, and Tulare counties, and the western half of Kern County. See the NAAQS-specific tables in 40 CFR 81.305.

included in the EPA’s approval of the SJV 2007 8-hour Ozone Plan (“2007 Ozone Plan”) at 77 FR 12652 (March 1, 2012), which established NO_x and VOC³ budgets for 2011, 2014, 2017, 2020, and 2023.⁴ The PM₁₀ budgets were included in the EPA’s approval of the 2007 PM₁₀ Maintenance Plan and Request for Redesignation (“2007 PM₁₀ Plan”) at 73 FR 66759 (November 12, 2008), which established direct PM₁₀ and NO_x budgets for 2005 and 2020.⁵ The SJV budgets for the 2006 24-hour PM_{2.5} standard were included in the EPA’s proposed approval of the SJV 2012 PM_{2.5} Plan (“2012 PM_{2.5} Plan”) at

80 FR 1816 (January 13, 2015). The EPA found the 2017 PM_{2.5} budgets in the SJV 2012 PM_{2.5} Plan to be adequate at 81 FR 22194 (April 15, 2016), establishing direct PM_{2.5} and NO_x budgets for 2017. As of May 2, 2016, these budgets must be used to determine conformity of transportation plans and TIPs to the control strategy plan for the SJV for the 2006 24-hour PM_{2.5} standard.⁶ In our May 18, 2016 proposed rule, we reviewed the revised budgets for the 1997 8-hour ozone standard in the November 13, 2015 submittal, evaluated them for compliance with statutory and regulatory requirements, and concluded that they meet all applicable

requirements. More specifically, under CAA section 110(k)(3), we proposed to approve the revised VOC and NO_x budgets in table 1 for 2017, 2020, and 2023 for the 1997 8-hour ozone standard. We determined that replacement of the current approved budgets with the revised VOC and NO_x budgets would not interfere with the approved RFP and attainment demonstrations for the 1997 8-hour ozone standard in the SJV and emissions changes in non-motor vehicle emissions categories do not change the overall conclusions of the 2007 Ozone Plan.

TABLE 1—SAN JOAQUIN VALLEY REVISED BUDGETS DEVELOPED FOR THE 1997 8-HOUR OZONE STANDARD USING EMFAC2014^{7 8}

County subarea	NO _x (tons per summer day)			VOC (tons per summer day)		
	2017	2020	2023	2017	2020	2023
Fresno	29.9	24.3	14.6	8.7	6.8	5.6
Kern (SJV)	26.8	22.4	12.9	6.9	5.7	4.8
Kings	5.5	4.7	2.7	1.4	1.1	0.9
Madera	5.5	4.5	2.7	2.0	1.6	1.3
Merced	10.3	8.5	5.1	2.7	2.1	1.7
San Joaquin	14.1	11.3	7.3	6.4	5.1	4.3
Stanislaus	11.3	9.2	5.8	4.1	3.2	2.7
Tulare	10.3	8.1	4.9	4.0	3.1	2.5

Second, under CAA section 110(k)(4), the EPA proposed to conditionally approve the revised direct PM₁₀ and NO_x budgets in table 2 for 2020 for the 24-hour PM₁₀ standard. We determined that, when combined with implementation of the contingency plan in the SIP-approved 2007 PM₁₀ Plan and fulfillment of the commitments in the State’s April 29, 2016 letter, the revised direct PM₁₀ and NO_x budgets will allow the SJV to continue to demonstrate maintenance of the 24-hour PM₁₀ standard. The contents of the State’s April 29, 2016 letter are described in detail in our proposed rule on pages 31220 and 31221. In our proposal, we

explained that if the conditional approval is finalized, CARB must adopt and submit the SIP revisions that it has committed to submit by June 1, 2017. The resulting impacts if CARB fails to comply with this commitment are explained below in section III of today’s action.

TABLE 2—SAN JOAQUIN VALLEY REVISED 2020 BUDGETS FOR THE PM₁₀ STANDARD DEVELOPED USING EMFAC2014^{9 10}

County sub-area	Direct PM ₁₀ (tons per annual day)	NO _x (tons per annual day)
Fresno	7.0	25.4

TABLE 2—SAN JOAQUIN VALLEY REVISED 2020 BUDGETS FOR THE PM₁₀ STANDARD DEVELOPED USING EMFAC2014^{9 10}—Continued

County sub-area	Direct PM ₁₀ (tons per annual day)	NO _x (tons per annual day)
Kern (SJV)	7.4	23.3
Kings	1.8	4.8
Madera	2.5	4.7
Merced	3.8	8.9
San Joaquin	4.6	11.9
Stanislaus	3.7	9.6
Tulare	3.4	8.4

³ California plans sometimes use the term Reactive Organic Gases (ROG) for VOC. These terms are essentially synonymous. For simplicity, we use the term VOC herein to mean either VOC or ROG.

⁴ The approved 2007 Ozone Plan includes the SJV 2007 Ozone Plan (as revised 2008 and 2011) and SJV-related portions of CARB’s 2007 State Strategy (revised 2009 and 2011).

⁵ The approved SIP includes the 2007 PM₁₀ Maintenance Plan and Request for Redesignation, September 20, 2007, and technical corrections by CARB to the 2020 budgets for Merced, San Joaquin, Stanislaus and Tulare counties in the 2007 PM₁₀ Plan. See May 13, 2008 letter to Wayne Nastro from James N. Goldstene.

⁶ Also see letter, Elizabeth J. Adams, Deputy Director, Air Division, EPA Region 9, to Richard W.

Corey, Executive Officer, CARB, April 1, 2016 with enclosures.

⁷ The county-specific budgets are set forth in attachment A to CARB Resolution 15–50. Attachment A constitutes the SIP revision adopted by CARB on October 22, 2015 and submitted on November 13, 2015. CARB provided information and analysis supporting the SIP revision in a staff report titled *Updated Transportation Conformity Budgets for the San Joaquin Valley Ozone, PM_{2.5}, and PM₁₀ State Implementation Plans*, release date September 21, 2015.

⁸ CARB calculated the revised budgets for the SJV plans by taking the sum of the county-by-county emissions results from EMFAC and rounding the SJV-wide total up to the nearest whole ton for NO_x and to the nearest tenth of a ton for VOC and PM₁₀; then re-allocating to the individual counties based

on the ratio of each county’s contribution to the total; and then rounding each county’s emissions to the nearest tenth of a ton using the conventional rounding method.

⁹ The county-specific budgets are set forth in attachment A to CARB Resolution 15–50. Attachment A constitutes the SIP revision adopted by CARB on October 22, 2015 and submitted on November 13, 2015. CARB provided information and analysis supporting the SIP revision in a staff report titled *Updated Transportation Conformity Budgets for the San Joaquin Valley Ozone, PM_{2.5}, and PM₁₀ State Implementation Plans*, release date September 21, 2015.

¹⁰ CARB calculated the revised budgets for the SJV plans by taking the sum of the county-by-county emissions results from EMFAC and

Third, the EPA also proposed to approve the revised direct PM_{2.5} and NO_x budgets for 2017 for the 2006 24-hour PM_{2.5} standard. We determined that: (1) Replacement of the current adequate budgets with the revised budgets would be consistent with our separate proposal finding that the 2012 PM_{2.5} Plan demonstrates RFP for year 2017; (2) emissions changes in non-motor vehicle emissions categories do not change the overall conclusion of the 2012 PM_{2.5} Plan; and (3) the revised budgets meet the adequacy criteria in 40 CFR 93.118(e)(4)(i)–(vi). Because the EPA has yet to finalize its approval of 2012 PM_{2.5} Plan, we are not able to finalize, in today's action, our approval of the revised direct PM_{2.5} and NO_x budgets for 2017 in CARB's submittal dated November 13, 2015 for the 2006 24-hour PM_{2.5} standard. The EPA expects to take final action on the revised PM_{2.5} budgets for 2017 as part of its final action on the 2012 PM_{2.5} Plan for the 2006 24-hour PM_{2.5} standard.

Lastly, on the effective date of today's action, the previously-approved budgets for the 1997 8-hour ozone standard and the 1987 24-hour PM₁₀ standard would no longer be applicable for transportation conformity purposes, and the SJV MPOs and the U.S. Department of Transportation (DOT) must use the revised budgets for future transportation conformity determinations.

Please see our May 18, 2016 proposed rule for more information concerning the background for this action and for a more detailed discussion of the rationale for approval of the revised budgets.

II. Public Comments

Our May 18, 2016 proposed rule provided a 30-day public comment period, which closed on June 17, 2016. We received no comments on our proposal during this period.

III. Final Action

For the reasons discussed in the May 18, 2016 proposed rule and summarized above, the EPA is approving, or conditionally approving, revised motor vehicle emissions budgets submitted on November 13, 2015 by CARB for the SJV area as a revision to the California SIP. More specifically, the EPA is approving, under CAA section 110(k)(3), revised VOC and NO_x budgets shown in table 1 above for 2017, 2020, and 2023 for the

rounding the SJV-wide total up to the nearest whole ton for NO_x and to the nearest tenth of a ton for VOC and PM₁₀; then re-allocating to the individual counties based on the ratio of each county's contribution to the total; and then rounding each county's emissions to the nearest tenth of a ton using the conventional rounding method.

1997 8-hour ozone standard. The EPA is conditionally approving, under CAA section 110(k)(4), the revised direct PM₁₀ and NO_x budgets shown in table 2 above for 2020 for the 24-hour PM₁₀ standard. CARB must adopt and submit the SIP revisions that it has committed to submit by June 1, 2017, as described in their April 29, 2016 letter. If CARB fails to comply with this commitment, the conditional approval will convert to a disapproval. Disapproval of the revised budgets for the 2007 PM₁₀ Plan would reinstate the existing approved budgets as the budgets that must be used in transportation plan and TIP conformity determinations after the effective date of the disapproval. See 40 CFR 93.109(c)(1).¹¹

IV. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, the EPA's role is to approve State choices, provided that they meet the criteria of the CAA. Accordingly, this action merely approves revisions to motor vehicle emission budgets as meeting Federal requirements and does not impose additional requirements beyond those imposed by State law. For that reason, this action:

- Is not a "significant regulatory action" subject to review by the Office of Management and Budget under Executive Order 12866 (58 FR 51735, October 4, 1993);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have Federalism implications as specified in Executive

¹¹ Because the submittal of the revised budgets is not a required submittal, disapproval would not trigger sanctions under CAA section 179(a)(2) but would nonetheless trigger a two-year clock for a federal implementation plan under CAA section 110(c). Disapproval would not trigger a transportation conformity freeze because the disapproval does not affect a control strategy implementation plan as defined in the transportation conformity rule. See 40 CFR 93.101 and 93.120(a).

Order 13132 (64 FR 43255, August 10, 1999);

- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and
- Does not provide the EPA with the discretionary authority to address disproportionate human health or environmental effects with practical, appropriate, and legally permissible methods under Executive Order 12898 (59 FR 7629, February 16, 1994).

Executive Order 13175, entitled "Consultation and Coordination with Indian Tribal Governments" (65 FR 67249, November 9, 2000), requires the EPA to develop an accountable process to ensure "meaningful and timely input by tribal officials in the development of regulatory policies that have tribal implications." "Policies that have Tribal implications" is defined in the Executive Order to include regulations that have "substantial direct effects on one or more Indian tribes, on the relationship between the Federal government and the Indian tribes, or on the distribution of power and responsibilities between the Federal government and Indian Tribes."

Eight Indian tribes are located within the boundaries of the SJV air quality planning area for the 1997 8-hour ozone standard and 24-hour PM₁₀ standard: The Big Sandy Rancheria of Mono Indians of California, the Cold Springs Rancheria of Mono Indians of California, the North Fork Rancheria of Mono Indians of California, the Picayune Rancheria of Chukchansi Indians of California, the Santa Rosa Rancheria of the Tachi Yokut Tribe, the Table Mountain Rancheria of California, the Tejon Indian Tribe, and the Tule River Indian Tribe of the Tule River Reservation.

The EPA's approval into the SIP of the SJV revised budgets submitted by CARB would not have tribal implications because the SIP is not approved to apply on any Indian reservation land or in any other area where the EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the SIP approvals do not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65

FR 67249, November 9, 2000). Therefore, the EPA has concluded that the action will not have tribal implications for the purposes of Executive Order 13175, and will not impose substantial direct costs upon the tribes, nor will it preempt Tribal law. We note that none of the tribes located in the SJV has requested eligibility to administer programs under the CAA.

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. The EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by October 11, 2016. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (*See* section 307(b)(2)).

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental regulations, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, Sulfur dioxide, Volatile organic compounds.

Authority: 42 U.S.C. 7401 *et seq.*

Dated: July 8, 2016.

Alexis Strauss,

Acting Regional Administrator, EPA Region 9.

Chapter I, title 40 of the Code of Federal Regulations is amended as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

■ 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart F—California

■ 2. Section 52.220 is amended by adding paragraph (c)(476) to read as follows:

§ 52.220 Identification of plan—in part.

* * * * *

(c) * * *

(476) The following revision was submitted on November 13, 2015 by the Governor's designee.

(i) [Reserved]

(ii) Additional materials.

(A) California Air Resources Board.

(1) Attachment A to Resolution 15–50, "Updates to the Transportation Conformity Budgets for the San Joaquin Valley 2007 PM₁₀, 2007 Ozone and 2012 PM_{2.5} SIPs," Table A–1 (Updated Transportation Conformity Budgets for the 2008 Ozone Plan (Tons per summer day) and Table A–3 (Updated Transportation Conformity Budgets for the 2008 PM₁₀ Maintenance Plan (Tons per annual day)).

* * * * *

■ 3. Subpart F is amended by adding § 52.248 to read as follows:

§ 52.248 Identification of plan—conditional approval.

The EPA is conditionally approving a California State Implementation Plan (SIP) revision submitted on November 13, 2015 updating the motor vehicle emissions budgets for nitrogen oxides (NO_x) and coarse particulate matter (PM₁₀) for the 1987 24-hour PM₁₀ standard for the San Joaquin Valley PM₁₀ maintenance area. The conditional approval is based on a commitment from the State to submit a SIP revision that demonstrates full implementation of the contingency provisions of the 2007 PM₁₀ Maintenance Plan and Request for Redesignation (September 20, 2007). If the State fails to meet its commitment by June 1, 2017, the approval is treated as a disapproval.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R05–OAR–2015–0724; FRL–9950–52–Region 5]

Air Plan Approval; Indiana; Abengoa Bioenergy of Indiana, Commissioner's Order

AGENCY: Environmental Protection Agency (EPA).

ACTION: Direct final rule.

SUMMARY: The Environmental Protection Agency (EPA) is approving a revision to the Indiana State Implementation Plan (SIP) submitted by the Indiana Department of Environmental Management (IDEM) on October 16, 2015. The submittal consists of an order issued by the Commissioner of IDEM (Commissioner's Order No. 2015–01) approving alternative control technology requirements for Abengoa Bioenergy of Indiana (Abengoa). These requirements include the use of a carbon adsorption/absorption hydrocarbon vapor recovery system with a minimum overall control efficiency of 98% to control volatile organic compound (VOC) emissions from the ethanol loading racks at Abengoa. A continuous emissions monitoring system (CEMS) must be used to monitor the carbon adsorption/absorption hydrocarbon vapor recovery system for breakthrough of VOC emissions. For the reasons discussed below, EPA is approving this submittal as a revision to Indiana's SIP.

DATES: This direct final rule will be effective October 11, 2016, unless EPA receives adverse comments by September 12, 2016. If adverse comments are received, EPA will publish a timely withdrawal of the direct final rule in the **Federal Register** informing the public that the rule will not take effect.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R05–OAR–2015–0724, at <http://www.regulations.gov> or via email to aburano.douglas@epa.gov. For comments submitted at [Regulations.gov](http://www.Regulations.gov), follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from [Regulations.gov](http://www.Regulations.gov). For either manner of submission, EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be

accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.* on the web, cloud, or other file sharing system). For additional submission methods, please contact the person identified in the “For Further Information Contact” section. For the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit <http://www2.epa.gov/dockets/commenting-epa-dockets>.

FOR FURTHER INFORMATION CONTACT:

Jenny Liljegren, Physical Scientist, Attainment Planning and Maintenance Section, Air Programs Branch (AR-18), Environmental Protection Agency, Region 5, 77 West Jackson Boulevard, Chicago, Illinois 60604, (312) 886-6832, Liljegren.Jennifer@epa.gov.

SUPPLEMENTARY INFORMATION:

Throughout this document whenever “we,” “us,” or “our” is used, we mean EPA. This supplementary information section is arranged as follows:

- I. What SIP revision is Indiana requesting and why?
- II. What action is EPA taking and why?
- III. Incorporation by Reference.
- IV. Statutory and Executive Order Reviews.

I. What SIP revision is Indiana requesting and why?

IDEM requested on October 16, 2015, that EPA approve as a revision to the SIP alternative control technology requirements for Abengoa. These requirements include the use of a carbon adsorption/absorption hydrocarbon vapor recovery system with a minimum overall control efficiency of 98% to control VOC emissions from the ethanol loading racks at Abengoa. A CEMS must be used to monitor the carbon adsorption/absorption hydrocarbon vapor recovery system for breakthrough of VOC emissions. These requirements are contained in Commissioner’s Order No. 2015-01 issued by the IDEM Commissioner on September 8, 2015.

In Abengoa’s initial construction and operating permit issued by IDEM, the ethanol loading racks were subject to the statewide case-by-case Best Available Control Technology (statewide BACT) determination required under SIP-approved Title 326 Article 8 Rule 1-6 of the Indiana Administrative Code (326 IAC 8-1-6). The statewide BACT for Abengoa’s ethanol loading racks was determined to

be enclosed flares with a minimum overall control efficiency of 98%. Since then, Abengoa has modified its plant design, including the ethanol loading racks, and is now subject to a newer SIP-approved state rule, 326 IAC 8-5-6, Fuel Grade Ethanol Production at Dry Mills, which created an industry-specific statewide BACT standard and which replaced the statewide case-by-case BACT rule (326 IAC 8-1-6) for fuel grade ethanol production dry mills that have no wet milling operations. EPA approved this rule into the SIP on February 20, 2008 (73 FR 9201).

The three VOC control options under 326 IAC 8-5-6 are: (1) A thermal oxidizer with a minimum overall control efficiency of 98% or resulting in a VOC concentration of not more than ten (10) parts per million (ppm), (2) a wet scrubber with a minimum overall control efficiency of 98% or resulting in a VOC concentration of not more than twenty (20) ppm, and (3) an enclosed flare with a minimum overall control efficiency of 98%. The VOC control options under 326 IAC 8-5-6 do not include a carbon adsorption/absorption hydrocarbon vapor recovery system. Abengoa has opted to use a carbon adsorption/absorption hydrocarbon vapor recovery system rather than one of the VOC control options under 326 IAC 8-5-6. However, like the VOC control options under 326 IAC 8-5-6, Abengoa’s carbon adsorption/absorption system has a minimum overall control efficiency of 98%. IDEM considers the system Reasonably Available Control Technology (RACT) under SIP rule 326 IAC 8-1-5 (Petition for a site-specific reasonably available control technology (RACT) plan).

As a result, pursuant to 326 IAC 8-1-5, Indiana has issued Commissioner’s Order No. 2015-01 approving Abengoa’s use of this system as an alternative site-specific RACT in lieu of the industry-specific statewide BACT options under 326 IAC 8-5-6. The carbon adsorption/absorption system will control VOC emissions at a minimum overall control efficiency of 98%, which is the same level of control of the industry-specific BACT options under 326 IAC 8-5-6; therefore, there will be no relaxation of the emission reduction requirements at Abengoa as a result of this SIP revision. As an added benefit, Abengoa’s use of the carbon adsorption/absorption system is expected to result in fewer criteria air pollutant emissions, since, unlike enclosed flares, carbon adsorption/absorption does not involve the combustion of natural gas.

It should be noted that Condition #3 of the “Conditions of Approval” in Commissioner’s Order 2015-01 states:

“The overall efficiency for the carbon adsorption/absorption hydrocarbon vapor recovery system (C-2101), including the capture efficiency and adsorption/absorption efficiency, shall be at least 98%. The Petitioner shall demonstrate compliance using methods approved by the department. Testing shall be conducted in accordance with the provisions of 326 IAC 3-6 (Source Sampling Procedures)”. IDEM has confirmed in an email to EPA dated June 6, 2016, that this provision requires testing using EPA Method 25 (40 CFR part 60, appendix A-7).

II. What action is EPA taking and why?

EPA is approving the requirements in Commissioner’s Order No. 2015-01 as a revision to the Indiana SIP. This is based on EPA’s finding that the 98% minimum overall control efficiency adsorption/absorption system with a CEMS qualifies as alternative site-specific RACT under 326 IAC 8-1-5 of the Indiana SIP for Abengoa’s ethanol loading racks. EPA also finds that this system constitutes statewide BACT under 326 IAC 8-1-6 of the Indiana SIP in lieu of the industry-specific statewide BACT options under 326 IAC 8-5-6 of the Indiana SIP. There will be no relaxation of the emission reduction requirements at Abengoa as a result of this SIP revision. Since this is not a relaxation, section 110(l) of the Clean Air Act (CAA) is satisfied and no backsliding is occurring as a result of this SIP revision. As an added benefit, Abengoa’s use of the carbon adsorption/absorption system is expected to result in fewer criteria air pollutant emissions, since, unlike enclosed flares, carbon adsorption/absorption does not involve the combustion of natural gas.

We are publishing this action without prior proposal because we view this as a noncontroversial amendment and anticipate no adverse comments. However, in the proposed rules section of this **Federal Register** publication, we are publishing a separate document that will serve as the proposal to approve the state plan if relevant adverse written comments are filed. This rule will be effective October 11, 2016 without further notice unless we receive relevant adverse written comments by September 12, 2016. If we receive such comments, we will withdraw this action before the effective date by publishing a subsequent document that will withdraw the final action. All public comments received will then be addressed in a subsequent final rule based on the proposed action. EPA will not institute a second comment period. Any parties interested in commenting on this action should do so at this time.

Please note that if EPA receives adverse comment on an amendment, paragraph, or section of this rule and if that provision may be severed from the remainder of the rule, EPA may adopt as final those provisions of the rule that are not the subject of an adverse comment. If we do not receive any comments, this action will be effective October 11, 2016.

III. Incorporation by Reference

In this rule, EPA is finalizing regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, EPA is finalizing the incorporation by reference of the Indiana Regulations described in the amendments to 40 CFR part 52 set forth below. Therefore, these materials have been approved by EPA for inclusion in the State implementation plan, have been incorporated by reference by EPA into that plan, are fully federally enforceable under sections 110 and 113 of the CAA as of the effective date of the final rulemaking of EPA's approval, and will be incorporated by reference by the Director of the Federal Register in the next update to the SIP compilation.¹ EPA has made, and will continue to make, these documents generally available through www.regulations.gov and/or at the EPA Region 5 Office (please contact the person identified in the "For Further Information Contact" section of this preamble for more information).

IV. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the CAA and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);

- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);

- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);

- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104-4);

- Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);

- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);

- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);

- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and

- Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United

States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by October 11, 2016. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. Parties with objections to this direct final rule are encouraged to file a comment in response to the parallel notice of proposed rulemaking for this action published in the proposed rules section of today's **Federal Register**, rather than file an immediate petition for judicial review of this direct final rule, so that EPA can withdraw this direct final rule and address the comment in the proposed rulemaking. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Reporting and recordkeeping requirements, Volatile organic compounds.

Dated: August 1, 2016.

Robert A. Kaplan,

Acting Regional Administrator, Region 5.

40 CFR part 52 is amended as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

■ 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

■ 2. In § 52.770 the table in paragraph (d) is amended by adding a new entry for "Abengoa Bioenergy of Indiana" to the end of the table, to read as follows:

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA-R09-OAR-2015-0489; FRL-9950-19-Region 9]

Revision to the California State Implementation Plan; San Joaquin Valley; Demonstration of Creditable Emission Reductions From Economic Incentive Programs

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is finalizing a limited approval and limited disapproval of a demonstration of creditable emission reductions submitted by California for approval into the San Joaquin Valley (SJV) portion of the California State Implementation Plan (SIP). This SIP submittal demonstrates that certain state incentive funding programs have achieved specified amounts of reductions in emissions of nitrogen oxides (NO_x) and fine particulate matter (PM_{2.5}) in the SJV area by 2014. The effect of this action would be to approve specific amounts of emission reductions for credit toward an emission reduction commitment in the California SIP. We are approving these emission reductions under the Clean Air Act (CAA or the Act).

DATES: This rule is effective on September 30, 2016.

ADDRESSES: The EPA has established docket number EPA-R09-OAR-2015-0489 for this action. Generally, documents in the docket for this action are available electronically at <http://www.regulations.gov> or in hard copy at EPA Region IX, 75 Hawthorne Street, San Francisco, California 94105-3901. While all documents in the docket are listed at <http://www.regulations.gov>, some information may be publicly available only at the hard copy location (e.g., copyrighted material, large maps, multi-volume reports), and some may

not be available in either location (e.g., confidential business information (CBI)). To inspect the hard copy materials, please schedule an appointment during normal business hours with the contact listed in the **FOR FURTHER INFORMATION CONTACT** section.

FOR FURTHER INFORMATION CONTACT: Idalia Pérez, EPA Region IX, (415) 972 3248, Perez.Idalia@epa.gov.

SUPPLEMENTARY INFORMATION: Throughout this document, “we,” “us” and “our” refer to the EPA.

Table of Contents

- I. Proposed Action
- II. Public Comments and EPA Responses
- III. EPA Action
- IV. Statutory and Executive Order Reviews

I. Proposed Action

On August 24, 2015 (80 FR 51147), the EPA proposed to approve the “Report on Reductions Achieved from Incentive-based Emission Reduction Measures in the San Joaquin Valley” (Emission Reduction Report) and, based on California’s documentation therein of actions taken by grantees in accordance with the identified incentive program guidelines, to approve 7.8 tpd of NO_x emission reductions and 0.2 tpd of PM_{2.5} emission reductions for credit toward the State’s 2014 emission reduction commitments in its 2008 plan to provide for attainment of the 1997 PM_{2.5} National Ambient Air Quality Standards (NAAQS) in the San Joaquin Valley (hereafter “2008 PM_{2.5} Plan”).¹ The California Air Resources Board (CARB) adopted the Emission Reduction Report on October 24, 2014 and submitted it to EPA as a revision to the California SIP on November 17, 2014. We proposed to approve the Emission Reduction Report based on a determination that it satisfied the applicable CAA requirements. Our proposed action contains more information on the Emission Reduction Report and our evaluation.

¹ The 2014 emission reduction commitments are codified at 40 CFR 52.220(c)(356)(ii)(B)(2) and 52.220(c)(392)(ii)(A)(2). 76 FR 69896, 69926 (November 9, 2011).

II. Public Comments and EPA Responses

The EPA’s proposed action provided a 30-day public comment period. During this period, we received comments from Adenike Adeyeye, Earthjustice, by email dated and received September 16, 2015. The comments and our responses are summarized below.

Comment 1: Earthjustice asserts that the emission reductions identified in the Emission Reduction Report are not enforceable by the public and therefore should not be approved into the SIP. According to Earthjustice, the Carl Moyer program allows air districts to enter into emission reduction agreements with grant recipients, with CARB added to contracts as a third party with enforcement rights, but does not enable the public to enforce these emission reduction agreements entered into among CARB, the air district, and the grant recipient. Earthjustice argues that the EPA’s enforceability criteria require that citizens have access to all emissions-related information obtained from participating sources and be able to file suit against a responsible entity for violations, and that the Emission Reduction Report does not meet these criteria.

Response 1: We agree with the commenter’s statement that the public cannot enforce the agreements entered into among CARB, an air district and a grant recipient but disagree with the commenter’s suggestion that this renders the Emission Reduction Report inconsistent with the EPA’s enforceability criteria. This Emission Reduction Report was submitted to demonstrate that a portion of the emission reductions required under a previously approved SIP commitment have in fact been achieved—not to satisfy a future emission reduction requirement—and thus it does not need to provide a citizen enforcement mechanism.

As we explained in our proposed rule, where a state relies on a discretionary economic incentive program (EIP) or other voluntary measure to satisfy an attainment planning requirement under the CAA (e.g., to demonstrate that specific amounts of emission reductions will occur by a future milestone date),

the state must take responsibility for assuring that SIP emission reduction requirements are met through an enforceable commitment, which becomes federally enforceable upon approval into the SIP. 80 FR 51147, 51150. Thus, had CARB submitted the Emission Reduction Report to satisfy a future emission reduction requirement under the CAA, an enforceable state commitment to assure that the required emission reductions occur would be necessary to satisfy the Act's enforceability requirements. The purpose of the Emission Reduction Report, however, is to demonstrate that a portion of the emission reductions required under a previously-approved SIP commitment have in fact been achieved, not to satisfy a future emission reduction requirement. *See id.* at 51150–51151. Accordingly, it is not necessary to require the State to submit, as part of this particular SIP submission, additional commitments to achieve future emission reductions.

The EPA evaluated the Emission Reduction Report in accordance with the Agency's guidance on discretionary EIPs. *See* 80 FR 51147, 51149–50 (citing, *inter alia*, U.S. EPA, "Improving Air Quality with Economic Incentive Programs," January 2001 (hereafter "2001 EIP Guidance")). A discretionary EIP uses market-based strategies to encourage the reduction of emissions from stationary, area, and/or mobile sources in an efficient manner. *See* 2001 EIP Guidance at 3. To qualify for approval as a discretionary EIP, emission reductions or actions leading to reductions must be enforceable either by the State or by the EPA, and the State must be directly responsible for ensuring that program elements are implemented. *See id.* at 157–158 (states may use the 2001 EIP Guidance where "[a]ctions and/or emission reductions by identifiable sources are enforceable by [the State] and/or by the EPA").

A "financial mechanism EIP" is an EIP that indirectly reduces emissions by increasing costs for high emitting activities—*e.g.*, through subsidies targeted at promoting pollution-reducing activities or products. *See* 2001 EIP Guidance at 119–122. The EPA has identified several attributes that may make subsidy financial mechanism EIPs successful, including: (1) The relevant governmental body possesses legal authority to provide subsidies; (2) the subsidies address activities reasonably related to actual emissions or potential emissions; (3) where projected emission reductions are based on changes in behavior, methods for verifying that such reductions have taken place to the degree projected are

generally accepted as unbiased and trustworthy; and (4) if needed, adequate penalty provisions are in place to ensure that the subsidy is used as expected. *See* 2001 EIP Guidance at 27 ("Attributes That Make Subsidy Financial Mechanism EIPs Successful").

As explained further in Response 2 below, the portions of the Proposition 1B: Goods Movement Emission Reduction Program (Prop 1B program) and Carl Moyer Memorial Air Quality Standards Attainment Program (Carl Moyer Program) guidelines discussed in the Emission Reduction Report are consistent with the EPA's recommendations for "financial mechanism EIPs" in the 2001 EIP Guidance. First, CARB and the District are directly responsible for ensuring that the Prop 1B program and Carl Moyer Program are implemented in accordance with State law. *See* 2010 Prop 1B guidelines at 1–4 ("Overview") and 2011 Carl Moyer Program Guidelines at Chapter 1 ("Program Overview"). Second, the incentive programs discussed in the Emission Reduction Report address actions reasonably related to actual air pollutant emissions, *e.g.*, by requiring grant recipients to purchase and operate newer, cleaner vehicles or equipment in place of older, more-polluting vehicles or equipment, subject to detailed contract requirements. Third, the relevant portions of the 2008 and 2010 Prop 1B guidelines and the 2005, 2008 and 2011 Carl Moyer Program Guidelines establish a number of methods for verifying that projected emission reductions have taken place through compliance with the terms and conditions of each funding contract. Finally, under the applicable guidelines, actions by grantees that lead to emission reductions are directly enforceable by the State and/or the District—*e.g.*, CARB and/or the District may assess fiscal penalties and take certain corrective actions where contract violations are identified. Consistent with the EPA's recommendations for "financial mechanism EIPs," these provisions in the 2008 and 2010 Prop 1B guidelines and the 2005, 2008 and 2011 Carl Moyer Program Guidelines are adequate to ensure that program funds are used as expected—*i.e.*, to reduce emissions from higher-polluting vehicles and equipment by replacing them with newer, lower-polluting equipment and vehicles. Based on our more detailed evaluations of 11 randomly selected projects from among those listed in the Emission Reduction Report, we find that the projects identified in the Emission Reduction Report were implemented as

required under the applicable program guidelines and achieved the emission reductions projected for those projects, with the exception of one source category. *See* Response 2.

In sum, although an enforceable state commitment would ordinarily be necessary for a SIP submission that relies on a discretionary EIP to satisfy CAA enforceability requirements, such a commitment is not necessary in this case because the Emission Reduction Report was not submitted to satisfy a future emission reduction requirement and, instead, demonstrates only that certain Prop 1B program and Carl Moyer Program incentive projects achieved specified amounts of emission reductions in the past. The portions of the Prop 1B program and Carl Moyer Program guidelines that apply to the identified incentive projects ensure that program funds are used as expected and that the EPA and citizens have access to all emissions-related information obtained from participating sources. Based on our review of the available project records for a subset of the projects identified in the Emission Reduction Report, we find that the identified projects achieved the necessary emission reductions, with the exception of one source category discussed further below. Therefore, it is not necessary for the Emission Reduction Report to provide a mechanism for citizen suits against a responsible entity.

Comment 2: Earthjustice argues that, based on the information presented in the Emission Reduction Report, citizens cannot even obtain the information necessary to quantify and verify emission reductions. For example, Earthjustice states that the total project life for each stationary and portable farm engine funded through the Carl Moyer program varies from two years to ten years and that project life varies, in part, because emission reductions cannot be counted as surplus after the compliance date for a regulation applicable to that project. Earthjustice states that CARB is required to ensure that emission reductions from projects are no longer counted as SIP-creditable emission reductions after that compliance date but argues that "[n]either EPA nor the public has any way of knowing whether or not these projects were counted during only the years in which they were surplus because CARB does not provide enough information to determine a project's compliance date."

According to Earthjustice, to determine whether the stationary and portable farm engine projects were counted only for the years during which

they could be considered surplus, one would need to know: What type of engine was used as a replacement; the horsepower of the engine used as a replacement; tier of the original agricultural engine; and fleetwide particulate matter (PM) levels.

Response 2: We disagree with the commenter's claim that citizens cannot obtain the information necessary to quantify and verify emission reductions. As we explained in the technical support document supporting our proposed rule and as explained in further detail below, the emission reductions identified in the Emission Reduction Report can be independently verified and the public has access to emissions-related information due to several requirements in the 2008 and 2010 Prop 1B guidelines and the 2005, 2008 and 2011 Carl Moyer Program guidelines. See U.S. EPA Region 9, Air Division, "Technical Support Document for EPA's Notice of Proposed Rulemaking for the California State Implementation Plan, Report on Reductions Achieved from Incentive-Based Emission Reduction Measures in the San Joaquin Valley," August 2015 ("Proposal TSD") at 7–15. We discuss the relevant guideline provisions in more detail below.

First, actions required of grantees under the applicable portions of the Prop 1B and Carl Moyer Program guidelines are independently verifiable through (1) pre-project and post-project on-site inspections (with photographic documentation) that the District and/or CARB must carry out pursuant to the applicable guidelines, and (2) documents that each grantee is required to maintain and/or submit to the District in accordance with detailed contract provisions. See generally 2008 Prop 1B guidelines at Section III.D ("Local Agency Project Implementation Requirements"), Section IV ("General Equipment Project Requirements"), and Appendix A, Section C ("Recordkeeping Requirements") and Section D ("Annual Reporting Requirements"); 2010 Prop 1B guidelines at Section IV.A ("Project Implementation Requirements"), Section VI ("General Equipment Project Requirements"), and Appendix A, Section F ("Recordkeeping Requirements") and Section G ("Annual Reporting Requirements"); 2005 Carl Moyer Guidelines, Part I, Chapter 2 ("Administration of the Carl Moyer Program"); 2008 Carl Moyer Guidelines, Part III ("Program Administration") and 2011 Carl Moyer Program Guidelines, Part I, Chapter 3 ("Program Administration").

For example, the 2008 and 2010 Prop 1B guidelines require, among other

things, that (1) all project applications include documentation of current equipment and activity information (e.g. engine make, model, horsepower and fuel type, annual vehicle miles of travel (VMT) in California, and estimated percentage of annual VMT in trade corridors); (2) that the District conduct a "pre-inspection" of each application deemed eligible for funding, to verify information regarding the baseline engine, vehicle, or equipment; (3) that the District conduct a "post-inspection" of each funded project to record, among other things, identifiers and specifications for the new engine/equipment (e.g., Vehicle Identification Numbers (VIN) for new trucks, serial numbers for new engines), and verification that the new engine/equipment is operational and consistent with the old/replaced equipment, where applicable; and (4) that the District's pre-inspection and post-inspection project files include photographic documentation of each piece of equipment being inspected, including an engine serial number, visible distinguishing identification (e.g., a license plate), and a full view of the equipment. See 2008 Prop 1B guidelines at Section III.D.8 ("Equipment project pre-inspections"), Section III.D.14 ("Equipment project post-inspections"), Section IV.D ("Equipment Project Application Requirements") and Appendix A, Section F ("Application Information"); 2010 Prop 1B guidelines at Section IV.A.10 ("Equipment project pre-inspections"), Section IV.A.16 ("Equipment project post-inspections"), Section VI.D ("Equipment Project Application Requirements") and Appendix A, Section F ("Application Information"); see also Proposal TSD at 14–15.

Similarly, the 2005, 2008 and 2011 Carl Moyer Program Guidelines require, among other things, that (1) all project applications include documentation of existing engine usage in previous years (e.g. miles traveled, hours operated, or fuel consumed per year); (2) that the District conduct a "pre-inspection" of each application deemed eligible for funding, to verify information regarding the baseline engine, vehicle, or equipment; (3) that the District conduct a "post-inspection" of each funded project to record, among other things, information regarding the new engines, vehicles/equipment, and retrofit devices as needed to provide a basis for emission calculations and to ensure contract enforceability; and (4) that the District's pre-inspection and post-project files include photographic documentation of the engine, vehicle, or

equipment information, including a legible serial number and/or other identifying markings. See 2005 Carl Moyer Program Guidelines, Part I, Chapter 2 at Section V.D ("Project Applications"), Section IX.A ("Pre-Inspection"), and Section IX.B ("Post-Inspection"); 2008 Carl Moyer Program Guidelines, Part III, Part II at Section 26 ("Minimum Project Application Requirements"), Section 30 ("Project Pre-Inspections"), and Section 31 ("Post-Inspection"); 2011 Carl Moyer Program Guidelines, Part I, Chapter 3, at Section W ("Minimum Project Application Requirements"), Section AA ("Project Pre-Inspection"), and Section BB ("Project Post-Inspection"); see also Proposal TSD at 8–9.

Second, the applicable portions of the 2008 and 2010 Prop 1B guidelines and the 2005, 2008 and 2011 Carl Moyer Program guidelines specifically define the required elements of each contract and the types of actions that constitute violations of such contracts. For example, under the 2008 and 2010 Prop 1B guidelines, each equipment project contract must include: (1) A unique "tracking number"; (2) the equipment owner's contact information; (3) the original application submitted by the equipment owner; (4) requirements for the equipment owner to submit reports to the local agency annually or biennially; (5) the equipment owner's agreement to allow ongoing evaluations and audits of equipment and documentation by the District, CARB, or their designated representative(s); and (6) requirements for the equipment owner to retain all records pertaining to the program (i.e., invoices, contracts, and correspondence) for at least two years after the equipment project ends or three years after final payment, whichever is later. See 2008 Prop 1B guidelines at Section III.D.10 ("Equipment project contracts") and 2010 Prop 1B guidelines at Section IV.A.11 ("Equipment project contracts"); see also Proposal TSD at 14–15. Additionally, under the same guidelines, the following actions (among others) are specifically identified as contract violations: (1) Failure to meet the terms and conditions of an executed equipment project contract, including equipment operating conditions and geographic restrictions; (2) failure to allow for an electronic monitoring device or tampering with an installed device or data; (3) insufficient, incomplete, or faulty equipment project documentation; and (4) failure to provide required documentation or reports in a timely manner. See 2008 Prop 1B guidelines at Section IV.G

(“Equipment Project Non-Performance”) and 2010 Prop 1B guidelines at VI.I (“Equipment Project Non-Performance”); *see also* Proposal TSD at 14–15.

Similarly, under the 2005, 2008 and 2011 Carl Moyer Program Guidelines, each equipment project contract must include: (1) The name and contact information of the grantee; (2) specified timeframes for “project completion” (the date the project post-inspection confirms that the project has become operational) and “project implementation” (the project life used in the project cost-effectiveness calculation); (3) detailed information on both baseline and new vehicles, equipment, and/or engines, including documentation adequate to establish historical annual usage; (4) requirements for the grantee to maintain the vehicle, equipment and/or engine according to the manufacturer’s specifications for the life of the project; (5) annual reporting requirements; (6) a provision authorizing the District, CARB, and their designees to conduct fiscal audits and to inspect the project engine, vehicle, and/or equipment and associated records during the contract term, and (7) requirements to maintain and retain project records for at least two years after contract expiration or three years after final project payment, whichever is later. *See* 2005 Carl Moyer Program Guidelines, Part I, Chapter 2 at Section VIII (“Minimum Contract Requirements”); 2008 Carl Moyer Program Guidelines, Part III, Part III at Section 29 (“Minimum Contract Requirements”); and 2011 Carl Moyer Program Guidelines, Part I, Chapter 3 at Section Z (“Minimum Contract Requirements”). Additionally, the 2011 Carl Moyer Program Guidelines explicitly require that each contract “specify that by executing the contract, the grantee understands and agrees to operate the vehicle, equipment, and/or engine according to the terms of the contract” and describe the potential repercussions to the grantee for non-compliance with contract requirements.

See 2011 Carl Moyer Program Guidelines, Part I, Chapter 3 at Section Z.11 (“Repercussions for Non-Performance”) and Section FF (“Nonperforming Projects”); *see also* 2005 Carl Moyer Program Guidelines, Part I, Chapter 2 at Section VIII.G (“Repercussions for Nonperformance”); and 2008 Carl Moyer Program Guidelines, Part III, Part III at Section 35 (“Nonperforming Projects”). The 2011 Carl Moyer Program Guidelines also specifically identify types of actions on the part of the District that CARB may treat as violations of program requirements—*e.g.*, misuse of Carl Moyer Program funds and insufficient, incomplete, or inaccurate project documentation. *See* 2011 Carl Moyer Program Guidelines at Section U (“Program Non-Performance”).

Third, the applicable portions of the Prop 1B guidelines and Carl Moyer Program guidelines require that all grantees submit specific types of project records to the District and also require the District to maintain such records for specified periods of time. Specifically, as discussed above, under the 2008 Prop 1B guidelines, the 2010 Prop 1B guidelines, and the 2005, 2008 and 2011 Carl Moyer Program guidelines, each contract executed by the District must require the grantee to maintain project records for at least two years after contract expiration or three years after final project payment, whichever is later, and to submit annual or biennial reports to the District. *See* 2008 Prop 1B guidelines at Section III.D.10 (“Equipment project contracts”), 2010 Prop 1B guidelines at Section IV.A.11 (“Equipment project contracts”), 2005 Carl Moyer Program Guidelines, Part I, Chapter 2 at Section VIII (“Minimum Contract Requirements”); 2008 Carl Moyer Program Guidelines, Part III, Part III at Section 29 (“Minimum Contract Requirements”); and 2011 Carl Moyer Program Guidelines, Part I, Chapter 3 at Section Z (“Minimum Contract Requirements”); *see also* Proposal TSD at 8–9 and 14–15. Additionally, the 2008 Prop 1B guidelines require the

District to retain all “program records” (*e.g.*, invoices, contracts, and correspondence) for at least two years after the project ends or three years after final payment, whichever is later. *See* 2008 Prop 1B guidelines, Chapter II, Section D.10.b (“General Program provisions”). The 2010 Prop 1B guidelines require the District to retain “program records” for 35 years after the bond issuance date providing the funds for the grant, or to send all records to CARB by the end date of the grant agreement. *See* 2010 Prop 1B guidelines, Chapter II, Section E.10.b (“General Program provisions”). Under the Carl Moyer Program Guidelines, the District must keep each “project file” for a minimum of two years after the end of the contract term or a minimum of three years after final payment, whichever is later. *See* 2011 Carl Moyer Program Guidelines, Chapter 3, Section V (“ARB Audit of Air Districts”) at 3–25. A “project file” generally includes a copy of the application, a completed pre- and post-inspection form, and the annual reports submitted by the grantee. *See id.* at Section X.6, Section AA.4, Section BB.1.(G), and Section DD.3. These requirements of the Carl Moyer Program and Prop 1B guidelines ensure that grantees submit, and that the District maintains, project documents sufficient for the EPA and the public to verify the emission reductions attributed to these projects in the Emission Reduction Report.

To demonstrate how the public can quantify and verify the emission reductions identified in the Emission Reduction Report, we randomly selected 0.5% of the projects in Appendix H of the Emission Reduction Report and requested that CARB provide to us the information necessary to verify the emission reduction calculations for these projects. From Appendix H.1, which lists the Carl Moyer projects included in the Emission Reduction Report, we randomly selected the projects identified in Table 1.

TABLE 1—SELECTION OF CARL MOYER PROJECTS FROM THE EMISSION REDUCTION REPORT

Project No.	Carl Moyer Guideline year	Source category	Technology	Post inspection date	Project life	2014 NO _x (tpy)	2014 PM _{2.5} (tpy)
G-0014-A	2008	Off-Road Equipment—Construction.	Retrofit	12/28/10	5	0.000	0.018
S-1301	2005	Off-Road Equipment—Mobile Agricultural.	Repower	10/16/09 08/17/09	7 7	2.610 4.040	0.092 0.120
C-2570	2005	Stationary and Portable Agricultural Engines.	Repower	01/12/10 01/12/10	10 5	9.880 7.070	0.331 0.129

TABLE 1—SELECTION OF CARL MOYER PROJECTS FROM THE EMISSION REDUCTION REPORT—Continued

Project No.	Carl Moyer Guideline year	Source category	Technology	Post inspection date	Project life	2014 NO _x (tpy)	2014 PM _{2.5} (tpy)
C-14205	2011	Stationary and Portable Agricultural Engines.	Repower	04/25/14	10	1.570	0.055

From Appendix H.2, which lists the Prop 1B Heavy Duty Diesel Truck

Replacement projects included in the Emission Reduction Report, we

randomly selected the projects identified in Table 2.

TABLE 2—SELECTION OF PROP 1B PROJECTS FROM THE EMISSION REDUCTION REPORT

Equipment project ID	Prop 1B Guideline year	Contract term	Post-inspection date	2014 NO _x (lbs/yr)	2014 PM _{2.5} (lbs/yr)
G08GMCT1_03079	2010	5	01/02/13	10281.31771	229.6259777
G08GMCT1_00642	2010	5	08/21/12	1724.9954	164.035448

G07GMCT3_00377	2008	5	03/04/11	2909.28645	92.691702

We independently calculated the emission reductions for the selected projects using additional project information submitted by CARB at our request and found that the emission reduction calculations for all of the selected projects were replicable, with the exception of one project that was erroneously included in the Emission Reduction Report and accounted for 0 reductions. See U.S. EPA Region 9, Memorandum to File dated April 26, 2016, “Sample emission reduction calculations for selected Carl Moyer and Prop 1B projects,” Docket No. EPA-R09-OAR-2015-0489 and references therein. Additionally, at our request, CARB submitted the project application, grant agreement and documentation of destruction for one Carl Moyer Program project (Project Number C-2570, Stationary and Portable Agricultural Engines, Repower, 2005 Carl Moyer Guidelines) and one Prop 1B Program project (Equipment Project ID G07GMCT3_01246, Heavy Duty Diesel Truck Replacement, 2008 Prop 1B Guidelines). See email dated April 19, 2016, from Sylvia Vanderspek (CARB) to Jeanhee Hong (USEPA Region 9), including attachments. We evaluated the information contained in these project records to verify CARB’s emission reduction calculations in the Emission Reduction Report.

For Carl Moyer project C-2570, the project application contains information about the existing and new engine (including engine make, model year, horsepower, and tier), engine function and type (e.g., stationary or portable),

the project life, the hours of operation, and percentage of usage in the San Joaquin Valley. See San Joaquin Unified Valley Air Pollution Control District (SJVUAPCD), Application C-2570, Heavy-Duty Engine Program Agricultural Pump Engine Component, Diesel Engine to Electric Motor Repower Option (“Carl Moyer Application C-2570”) at section 2, section 3 and accompanying table (“For Internal Use Only”).² The project agreement, which is the contract between the grantee and the SJVUAPCD, includes a description of the engines, a requirement to destroy the existing engine, the duration of the terms of the agreement, annual reporting requirements, a noncompliance provision for reporting, and provisions concerning District audits. See SJVUAPCD, Agreement C-2570, Heavy-Duty Engine Emission Reduction Incentive Program Funding Agreement (Electric Agricultural Pump Motor Repower), July 30, 2009 (“Carl Moyer Agreement C-2570”) at section 2, section 3, section 5, section 6, and section 21. Finally, pre- and post-inspection monitoring reports for project C-2570 include photographic evidence of engine information and destruction of the old engine. See Heavy-Duty Program Monitoring Report, pre-inspection and post inspection, project number C-2570 (“Carl Moyer Monitoring Reports C-2570”). Consistent with the requirements of the 2005 Carl Moyer Program guidelines at

² Personal information has been redacted from each document for privacy reasons.

Part I, chapter 2, sections V.D, VIII, and IX, these project records contain all of the information necessary to verify whether project C-2570 was implemented as required and achieved the emission reductions calculated for this project.

Similarly, for Prop 1B project G07GMCT3_01246, the project application contains information about the existing and new engine (including engine make, model year, gross vehicle weight rating (GVWR), Vehicle Identification Number (VIN), and horsepower), the annual vehicle-miles-traveled (VMT) for both the existing and new engine, and percentage of usage in the San Joaquin Valley. See SJVUAPCD, Application P-0442,³ Proposition 1B: Good Movement Emission Reduction Program Component, Truck Replacement (“Prop 1B Application G07GMCT3_01246”) at sections 2-4.⁴ The project agreement, which is the contract between the grantee and the SJVUAPCD, includes a description of the existing and new engines, a requirement to destroy the existing engine, the duration of the terms of the

³ These project documents are labeled with the District-only identification number “P-0442.” According to CARB, the Goods Movement Online Database (GMOD) includes both the District identifier (P-0442) and the CARB Equipment Project ID (G07GMCT3_01246). See email dated May 9, 2016, from Austin Hicks (CARB) to Idalia Pérez (USEPA Region 9), RE: “Prop 1B Application I Numbers” and Memorandum dated May 2, 2016, from Idalia Pérez (USEPA Region 9) to File, RE: “Call with ARB regarding questions on Prop 1B documentation.”

⁴ Personal information has been redacted from each document for privacy reasons.

agreement, annual reporting requirements, nonperformance provisions, and provisions concerning District audits. See SJVUAPCD, Agreement P-0442-A, Proposition 1B: Goods Movement Emission Reduction Program Funding Agreement (Truck Replacement), March 16, 2010 (“Prop 1B Agreement G07GMCT3_01246”) at sections 2, 3, 5, 6.F, 7, 12, and 23. Finally, post-inspection monitoring reports for project G07GMCT3_01246 include photographic evidence of engine information and destruction of the old engine. See Proposition 1B Program Truck Replacement Option, Exist (Old) Truck Post-Monitoring Inspection, Project Number P-0442-A (“Prop 1B Monitoring Reports G07GMCT3_01246”). Consistent with the requirements of the 2008 Prop 1B Guidelines at sections III.D.10, III.D.14, IV.D and Appendix A, Section F, these project records contain all of the information necessary to verify whether Project G07GMCT3_01246 was implemented as required and achieved the emission reductions calculated for this project.

Any member of the public can obtain project-related documents maintained by the State and/or District by submitting a request for such documents under the California Public Records Act. See Ca. Gov’t Code §§ 6250–6276.48. Accordingly, the EPA and citizens can obtain the information necessary to quantify and verify the emission reductions identified in the Emission Reduction Report.

We also disagree with Earthjustice’s assertion that there is no way to verify whether the emission reductions attributed to the projects identified in the Emission Reduction Report are “surplus” to existing requirements. As an initial matter, we note that both the Carl Moyer Program guidelines and the Prop 1B guidelines generally require that funded projects achieve emission reductions not required by any federal, state or local regulation or other legal mandate. See 2005 Carl Moyer Guidelines, Part I, Section VIII.D; 2008 Carl Moyer Guidelines, Part III, Section (27)(i); 2011 Carl Moyer Guidelines, Part 1, Chapter 2; 2008 Prop 1B Guidelines, Section III.B.1 at 47; and 2010 Prop 1B Guidelines, Section III.B.1 at 57.

Earthjustice highlights “stationary and portable farm engines” as a source category for which the project life varies from two to ten years and claims that there is no way to know whether or not these projects were counted for only the years in which their emission reductions were surplus. We assume the commenter intended to refer to the “Stationary and Portable Agricultural Engines” source category under the Carl Moyer Program. Two of the Carl Moyer projects that we randomly selected for evaluation (identified in Table 1) are within this source category (project numbers C-2570 and C-14205). According to CARB, these two projects were of the equipment type “Stationary Agricultural Irrigation Pump.” See email dated November 12, 2015, from Sylvia Vanderspek (CARB) to Andrew

Steckel (USEPA Region 9). These engines are subject to CARB’s Airborne Toxic Control Measure (ATCM) for Stationary Compression Ignition (CI) Engines in title 17, sections 93115–93115.15 of the California Code of Regulations (17 CCR §§ 93115–93115.15) (hereafter “Stationary Engine ATCM”). Table 7 of the Stationary Engine ATCM provides a summary of requirements for in-use noncertified stationary diesel-fueled engines used in agricultural operations and Table 8 of the Stationary Engine ATCM provides a summary of requirements for certified in-use Tier 1 and Tier 2 engines used in agricultural operations. See 17 CCR § 93115.8, Table 7 and Table 8.

The emission reductions attributed to project C-14205 and project C-2570 engine #1 during the January 1–December 31, 2014 timeframe were surplus to the requirements of the Stationary Engine ATCM because they occurred before the earliest ATCM compliance deadline applicable to these engines, which was December 31, 2014. The emission reductions attributed to project C-2570 engine #2 during the January 1–December 31, 2014 timeframe, however, were not entirely surplus because that engine was required to comply with the Stationary Engine ATCM’s NO_x and PM_{2.5} emission limits for in-use noncertified stationary diesel-fueled engines used in agricultural operations by December 31, 2010.⁵ See Table 3.

TABLE 3—STATIONARY ENGINE ATCM COMPLIANCE DEADLINES APPLICABLE TO CARL MOYER PROGRAM PROJECTS C-2570 AND C-14205

Project No.	Equipment identifier	Fuel type	Horsepower	Existing engine certification	Deadline for compliance with stationary engine ATCM ⁶	New engine	Project life	Post inspection date
C-2570	1	Diesel	385	Tier 1 Standard	Later of 12/31/14 or 12 years after the date of initial installation.	Electric	10	01/12/10
C-2570	2	Diesel	420	Uncontrolled (uncertified).	12/31/10	Electric	5	01/12/10
C-14205	1	Diesel	335	Tier 3 Standard	N/A	Electric	10	04/25/14

Source: Email dated December 3, 2015 from Austin Hicks (CARB) to Andrew Steckel (USEPA Region 9), RE: “Additional information request to support final action on ARB Incentive Report,” including attachments.

Given this information, we have assumed conservatively that all emission reductions attributed to Carl Moyer Program projects in the “Stationary and Portable Agricultural

Engines” source category in the Emission Reduction Report are not surplus and, therefore, are not creditable for SIP purposes at this time. Stationary and portable agricultural engine projects account for 2.829 tpd of the NO_x

emission reductions and 0.066 tpd of the direct PM_{2.5} emission reductions identified in the Emission Reduction Report as shown in Table 4. See Emission Reduction Report, Appendix H1 at pp. 8–29.

⁵ Because the existing uncertified engine for project C-2570 engine #2 was replaced with an electric unit, this project did achieve some surplus

emission reductions beyond those required by the Stationary Engine ATCM.

⁶ See 17 CCR § 93115.8, Table 7 and Table 8.

TABLE 4—EMISSION REDUCTIONS FROM CARL MOYER STATIONARY AND PORTABLE AGRICULTURAL ENGINE REPOWER PROJECTS

Carl Moyer guideline year	2014 NO _x (tpd)	2014 PM _{2.5} (tpd)
2005	2.675	0.063
2008	0.132	0.002
2011	0.022	0.001
Total Reductions	2.829	0.066

Source: Emission Reduction Report, Appendix H1 at pp. 27–29.

We are therefore subtracting these amounts from the total amounts of NO_x and direct PM_{2.5} emission reductions identified in the Emission Reduction Report (7.8 tpd of NO_x emission reductions and 0.2 tpd direct PM_{2.5} emission reductions), and crediting the Emission Reduction Report with only 4.971 tpd of NO_x emission reductions and 0.134 tpd of direct PM_{2.5} emission reductions toward the State's 2014 emission reduction commitment in the 2008 PM_{2.5} Plan.

Earthjustice argues that in order to determine whether these projects were counted only for the years during which they could be considered surplus, one would need to know the type of engine that was used as a replacement; the horsepower of the engine used as a replacement; the tier of the original agricultural engine; and fleetwide particulate matter (“PM”) levels. We agree that information about the type of engine that was used as a replacement, the horsepower of the new engine, and the tier of the original agricultural engine is necessary to determine whether the emission reductions attributed to a particular Carl Moyer project are surplus. As explained above, project documents that the District is required to maintain under the Carl Moyer and Prop 1B program guidelines, which CARB submitted to the EPA at our request, identify all of this information. With respect to fleetwide PM levels, we note that this information is not necessary to determine the ATCM compliance date applicable to a stationary agricultural engine, because the requirements of the Stationary Engine ATCM do not vary based on fleetwide PM levels. *See generally* 17 CCR §§ 93115–93115.15. Carl Moyer projects C–2570 and C–14205 are stationary agricultural engines subject to the Stationary Engine ATCM. *See* email dated November 12, 2015, from Sylvia Vanderspek (CARB) to Andrew Steckel (USEPA Region 9). Thus, information about fleetwide PM levels is not necessary to determine whether these projects achieved surplus emission reductions. We agree with Earthjustice

that information concerning fleetwide PM levels is necessary to determine certain compliance dates under the ATCM for diesel particulate matter from portable engines. *See* 17 CCR § 93116.3. To the extent the commenter intended to argue that this information is necessary to determine whether a Carl Moyer project for a portable engine will achieve emission reductions that are surplus to existing requirements, we understand that CARB would provide such information upon request under the California Public Records Act and that the public can, therefore, verify whether the emission reductions attributed to any such project are surplus.

Based on these reviews, we find that the Emission Reduction Report contains information adequate to enable the EPA and citizens to obtain emissions-related information necessary to quantify and verify the emission reductions attributed to the identified Carl Moyer Program and Prop 1B projects.

Comment 3: Earthjustice states that incentive programs should not “be approved into the SIP as a replacement for emission reductions from regulations without fulfilling the four fundamental integrity elements” and urges the EPA to require that emission reductions be enforceable and quantifiable before approving them into the SIP.

Response 3: This action does not incorporate any portion of the Prop 1B program or Carl Moyer Program, or any related guidelines, into the SIP. To the extent Earthjustice intended to state that the EPA should not approve emission reductions from the projects identified in the Emission Reduction Report for credit toward a SIP commitment unless the applicable incentive programs satisfy the EPA's integrity elements, we agree. As explained in our proposed rule and further in Responses 1 and 2 above, the portions of the Prop 1B program and Carl Moyer Program guidelines that apply to the projects identified in the Emission Reduction Report adequately address the EPA's recommended integrity elements for discretionary EIPs. Based on our review

of project-specific documentation submitted by CARB at our request, however, we have found that the emission reductions attributed to one Carl Moyer Program project within the “Stationary and Portable Agricultural Engines” category were not entirely surplus to existing requirements and, therefore, are not creditable for SIP purposes at this time, or until properly adjusted to account for existing regulations. As a result, we have conservatively assumed that all of the Stationary and Portable Agricultural Engine Carl Moyer projects identified in the Emission Reduction Report are not SIP-creditable and subtracted the emission reductions attributed to these projects from the total amounts of NO_x and direct PM_{2.5} emission reductions identified in the Emission Reduction Report. *See* Response 2. We find that, with this one exception, the Carl Moyer Program and Prop 1B projects identified in the Emission Reduction Report have achieved the NO_x and PM_{2.5} emission reductions attributed to them in the Emission Reduction Report. We are therefore approving 4.971 tpd of NO_x emission reductions and 0.134 tpd of PM_{2.5} emission reductions for credit toward the State's 2014 emission reduction commitment in the 2008 PM_{2.5} Plan.

III. EPA Action

Under sections 110(k)(3) and 301(a) of the Act, the EPA is finalizing a limited approval and limited disapproval of the Emission Reduction Report and crediting the incentive projects identified therein with 4.971 tpd of NO_x reductions and 0.134 tpd of PM_{2.5} reductions toward the State's 2014 emission reduction commitments in the 2008 PM_{2.5} Plan. We are finalizing a limited approval of the Emission Reduction Report because it largely satisfies the applicable CAA requirements. We are simultaneously finalizing a limited disapproval of the Emission Reduction Report because the demonstration therein concerning the Carl Moyer Stationary and Portable Agricultural Engines source category

does not satisfy CAA requirements for SIP credit. Our reasons for disapproving the submitted demonstration on this basis are explained in our responses to comments above.

This limited disapproval does not trigger any sanctions clocks under CAA section 179(a) because the Emission Reduction Report was not submitted to address a requirement of part D, title I of the Act or in response to a finding of substantial inadequacy as described in CAA section 110(k)(5) (*i.e.*, a “SIP Call”). The limited disapproval also does not trigger any obligation on the EPA to promulgate a federal implementation plan (FIP) because the disapproval does not create any deficiency in the SIP that must be corrected.

IV. Statutory and Executive Order Reviews

Additional information about these statutes and Executive Orders can be found at <http://www2.epa.gov/laws-regulations/laws-and-executive-orders>.

A. Executive Order 12866: Regulatory Planning and Review and Executive Order 13563: Improving Regulation and Regulatory Review

This action is not a significant regulatory action and was therefore not submitted to the Office of Management and Budget (OMB) for review.

B. Paperwork Reduction Act (PRA)

This action does not impose an information collection burden under the PRA because this action does not impose additional requirements beyond those imposed by state law.

C. Regulatory Flexibility Act (RFA)

I certify that this action will not have a significant economic impact on a substantial number of small entities under the RFA. This action will not impose any requirements on small entities beyond those imposed by state law.

D. Unfunded Mandates Reform Act (UMRA)

This action does not contain any unfunded mandate as described in UMRA, 2 U.S.C. 1531–1538, and does not significantly or uniquely affect small governments. This action does not impose additional requirements beyond those imposed by state law. Accordingly, no additional costs to State, local, or tribal governments, or to the private sector, will result from this action.

E. Executive Order 13132: Federalism

This action does not have federalism implications. It will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government.

F. Executive Order 13175: Coordination With Indian Tribal Governments

This action does not have tribal implications, as specified in Executive Order 13175, because the SIP is not approved to apply on any Indian reservation land or in any other area where the EPA or an Indian tribe has demonstrated that a tribe has jurisdiction, and will not impose substantial direct costs on tribal governments or preempt tribal law. Thus, Executive Order 13175 does not apply to this action.

G. Executive Order 13045: Protection of Children From Environmental Health Risks and Safety Risks

The EPA interprets Executive Order 13045 as applying only to those regulatory actions that concern environmental health or safety risks that the EPA has reason to believe may disproportionately affect children, per the definition of “covered regulatory action” in section 2–202 of the Executive Order. This action is not subject to Executive Order 13045 because it does not impose additional requirements beyond those imposed by state law.

H. Executive Order 13211: Actions That Significantly Affect Energy Supply, Distribution, or Use

This action is not subject to Executive Order 13211, because it is not a significant regulatory action under Executive Order 12866.

I. National Technology Transfer and Advancement Act (NTTAA)

Section 12(d) of the NTTAA directs the EPA to use voluntary consensus standards in its regulatory activities unless to do so would be inconsistent with applicable law or otherwise impractical. The EPA believes that this action is not subject to the requirements of section 12(d) of the NTTAA because application of those requirements would be inconsistent with the CAA.

J. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Population

The EPA lacks the discretionary authority to address environmental justice in this rulemaking.

K. Congressional Review Act (CRA)

This action is subject to the CRA, and the EPA will submit a rule report to each House of the Congress and to the Comptroller General of the United States. This action is not a “major rule” as defined by 5 U.S.C. 804(2).

L. Petitions for Judicial Review

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by October 11, 2016. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements (see section 307(b)(2)).

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Nitrogen dioxide, Particulate matter, Reporting and recordkeeping requirements.

Dated: July 21, 2016.

Alexis Strauss,

Acting Regional Administrator, Region IX.

Part 52, Chapter I, Title 40 of the Code of Federal Regulations is amended as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

■ 1. The authority citation for Part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart F—California

■ 2. Section 52.220 is amended by adding paragraph (c)(477) to read as follows:

§ 52.220 Identification of plan.

* * * * *

(c) * * *

(477) The following plan revision was submitted on November 17, 2014 by the Governor’s designee.

(i) [Reserved]

(ii) *Additional Material*.

(A) California Air Resources Board.

(1) “Report on Reductions Achieved from Incentive-based Emission Reduction Measures in the San Joaquin Valley,” adopted on October 24, 2014, including appendices F–H.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R06–OAR–2013–0464; FRL–9950–49–Region 6]

Approval and Promulgation of Air Quality Implementation Plans; Louisiana; Interstate Transport of Air Pollution for the 2008 Ozone National Ambient Air Quality Standards

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is disapproving the portion of a Louisiana State Implementation Plan (SIP) submittal pertaining to interstate transport of air pollution which will significantly contribute to nonattainment or interfere with maintenance of the 2008 ozone National Ambient Air Quality Standards (NAAQS) in other states. Disapproval will establish a 2-year deadline, under Clean Air Act (CAA) Section 110(c), for the EPA to promulgate a Federal Implementation Plan (FIP) for Louisiana to address the CAA interstate transport requirements pertaining to significant contribution to nonattainment and interference with maintenance of the 2008 ozone NAAQS in other states, unless the EPA approves a SIP that meets these requirements. Disapproval does not start a mandatory sanctions clock for Louisiana.

DATES: This rule is effective on September 12, 2016.

ADDRESSES: The EPA has established a docket for this action under Docket ID No. EPA–R06–OAR–2013–0464. All documents in the docket are listed on the <http://www.regulations.gov> Web site. Although listed in the index, some information is not publicly available, e.g., Confidential Business Information or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy. Publicly available docket materials are available either electronically through

<http://www.regulations.gov> or in hard copy at EPA Region 6, 1445 Ross Avenue, Suite 700, Dallas, Texas 75202–2733.

FOR FURTHER INFORMATION CONTACT:

Sherry Fuerst 214–665–6454, fuerst.sherry@epa.gov.

SUPPLEMENTARY INFORMATION:

Throughout this document, “we,” “us,” and “our” means the EPA.

I. Background

This rulemaking addresses an infrastructure SIP submittal from the State of Louisiana addressing, among other things, the requirements of CAA section 110(a)(2)(D)(i)(I), also known as the good neighbor provision, with respect to the 2008 ozone NAAQS. The background for this action is discussed in detail in our June 7, 2016 proposal (81 FR 36496). In that action we proposed to disapprove the portion of the June 4, 2013 Louisiana SIP submittal pertaining to CAA 110(a)(2)(D)(i)(I) which requires that the State prohibit the interstate transport of air pollution which will significantly contribute to nonattainment or interfere with maintenance of the 2008 ozone NAAQS in other states.

In proposing to disapprove the State’s SIP submittal as to the good neighbor provision, we noted two specific deficiencies in the Louisiana submission. First, Louisiana cited the State’s approved Clean Air Interstate Rule (CAIR) SIP as support for its conclusion that the State satisfied its section 110(a)(2)(D)(i)(I) obligation with respect to the 2008 ozone NAAQS. However, as explained in our proposal, CAIR was invalidated by the D.C. Circuit in *North Carolina v. EPA*, 531 F.3d 896 (2008). Even if Louisiana could rely on its CAIR SIP the modeling and rulemaking conducted for both CAIR, or its successor, the Cross-State Air Pollution Rule (CSAPR), 76 FR 48208 (August 8, 2011) addressed the 1997 ozone NAAQS, not the more stringent 2008 ozone NAAQS at issue in this action. Because the Louisiana submittal addressed by this action concerns the State’s interstate transport obligations for a different and more stringent standard (the 2008 ozone NAAQS), we stated it is not sufficient to merely cite to older EPA or state implemented programs as evidence of compliance with the current 2008 ozone NAAQS. Second, the State’s submittal lacked any technical analysis evaluating or demonstrating whether emissions in Louisiana impacts air quality in another state. As such, we proposed that the submittal did not provide us with a basis to agree with the State’s

conclusion that the State already has adequate provisions in the SIP to address CAA section 110(a)(2)(D)(i)(I) requirements for the 2008 ozone NAAQS. We did not receive any comments regarding our proposal.

II. Final Action

EPA is disapproving a portion of a June 4, 2013 SIP submittal from Louisiana pertaining to interstate transport of air pollution which will significantly contribute to nonattainment or interfere with maintenance of the 2008 ozone NAAQS in other states. Disapproval will establish a 2-year deadline, under the CAA Section 110(c), for the EPA to promulgate a FIP for Louisiana to address the CAA interstate transport requirements pertaining to significant contribution to nonattainment and interference with maintenance of the 2008 ozone NAAQS in other states, unless the EPA approves a SIP that meets these requirements. Disapproval does not start a mandatory sanctions clock for Louisiana pursuant to CAA section 179 because this action does not pertain to a part D plan for nonattainment areas required under CAA section 110(a)(2)(I) or a SIP call pursuant to CAA section 110(k)(5).

III. Statutory and Executive Order Reviews

A. Executive Order 12866: Regulatory Planning and Review and Executive Order 13563: Improving Regulation and Regulatory Review

This final action is not a “significant regulatory action” because it is not categorized as “significant” under section 3(f) of Executive Order 12866 and therefore was not submitted to the Office of Management and Budget for review.

B. Paperwork Reduction Act (PRA)

This final action does not impose an information collection burden under the PRA because it does not contain any information collection activities.

C. Regulatory Flexibility Act (RFA)

I certify that this action will not have a significant economic impact on a substantial number of small entities under the RFA. This action merely disapprove a SIP submission as not meeting the CAA.

D. Unfunded Mandates Reform Act (UMRA)

This action does not contain any unfunded mandate as described in UMRA, 2 U.S.C. 1531–1538, and does not significantly or uniquely affect small governments. The action imposes no

enforceable duty on any state, local or tribal governments or the private sector.

E. Executive Order 13132: Federalism

This action does not have federalism implications. It will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government.

F. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

This action does not have tribal implications as specified in Executive Order 13175. This action does not apply on any Indian reservation land, any other area where EPA or an Indian tribe has demonstrated that a tribe has jurisdiction, or non-reservation areas of Indian country. Thus, Executive Order 13175 does not apply to this action.

G. Executive Order 13045: Protection of Children From Environmental Health Risks and Safety Risks

The EPA interprets Executive Order 13045 as applying only to those regulatory actions that concern environmental health or safety risks that the EPA has reason to believe may disproportionately affect children, per the definition of “covered regulatory action” in section 2–202 of the Executive Order. This action is not subject to Executive Order 13045 because it merely disapproves a SIP submission as not meeting the CAA.

H. Executive Order 13211: Actions That Significantly Affect Energy Supply, Distribution or Use

This action is not subject to Executive Order 13211, because it is not a significant regulatory action under Executive Order 12866.

I. National Technology Transfer and Advancement Act

This rulemaking does not involve technical standards.

J. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations

EPA believes the human health or environmental risk addressed by this action will not have potential disproportionately high and adverse human health or environmental effects on minority, low-income or indigenous populations. This action merely disapproves a SIP submission as not meeting the CAA.

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. The EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a “major rule” as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by October 11, 2016. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, and Ozone.

Dated: July 29, 2016.

Ron Curry,
Regional Administrator, Region 6.

40 CFR part 52 is amended as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

- 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart T—Louisiana

- 2. Section 52.996 is revised to read as follows:

§ 52.996 Disapprovals.

(a) The portion of the SIP submitted on June 4, 2013 addressing Clean Air Act section 110(a)(2)(D)(i)(I) for the 2008 ozone NAAQS is disapproved.

(b) [Reserved]

[FR Doc. 2016–19148 Filed 8–11–16; 8:45 am]

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R05–OAR–2014–0704; FRL–9950–54–Region 5]

Wisconsin; Approval/Disapproval of Interstate Transport Requirements for the 2008 Ozone NAAQS

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is partially approving and partially disapproving elements of State Implementation Plan (SIP) submission from Wisconsin regarding the infrastructure requirements of section 110 of the Clean Air Act (CAA) for the 2008 ozone National Ambient Air Quality Standards (NAAQS). The infrastructure requirements are designed to ensure that the structural components of each state’s air quality management program are adequate to meet the state’s responsibilities under the CAA. This action pertains specifically to infrastructure requirements concerning interstate transport provisions for which Wisconsin made a SIP submission that, among other things, certified that the existing SIP was sufficient to meet the interstate transport requirements for the 2008 ozone NAAQS.

DATES: This final rule is effective on September 12, 2016.

ADDRESSES: EPA has established a docket for this action under Docket ID No. EPA–R05–OAR–2014–0704. All documents in the docket are listed on the www.regulations.gov Web site. Although listed in the index, some information is not publicly available, *i.e.*, Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available either through www.regulations.gov or please contact the person identified in the “For Further Information Contact” section for additional availability information.

FOR FURTHER INFORMATION CONTACT: Sarah Arra, Environmental Scientist, Attainment Planning and Maintenance Section, Air Programs Branch (AR–18)), Environmental Protection Agency, Region 5, 77 West Jackson Boulevard, Chicago, Illinois 60604, (312) 886–9401, arra.sarah@epa.gov.

SUPPLEMENTARY INFORMATION:

Throughout this document whenever

“we,” “us,” or “our” is used, we mean EPA. This supplementary information section is arranged as follows:

- I. What is the background of this SIP submission?
- II. What action did EPA propose on the SIP submission?
- III. What is our response to comments received on the proposed rulemaking?
- IV. What action is EPA taking?
- V. Statutory and Executive Order Reviews.

I. What is the background of this SIP submission?

This rulemaking addresses CAA section 110(a)(2)(D)(i) requirements in an infrastructure SIP submission addressing the applicable infrastructure requirements with respect to the 2008 ozone NAAQS, submitted by the Wisconsin Department of Natural Resources (WDNR) on June 20, 2013, and clarified in a letter dated January 28, 2015.

The requirement for states to make a SIP submission of this type arises out of CAA section 110(a)(1). Pursuant to section 110(a)(1), states must make SIP submissions “within 3 years (or such shorter period as the Administrator may prescribe) after the promulgation of a national primary ambient air quality standard (or any revision thereof),” and these SIP submissions are to provide for the “implementation, maintenance, and enforcement” of such NAAQS. The statute directly imposes on states the duty to make these SIP submissions, and the requirement to make the submissions is not conditioned upon EPA’s taking any action other than promulgating a new or revised NAAQS.

Section 110(a)(2) includes a list of specific elements that “[e]ach such plan” submission must address. EPA commonly refers to such state plans as “infrastructure SIPs.”

This rulemaking takes action on two CAA section 110(a)(2)(D)(i) requirements which apply to these submissions. In particular, section 110(a)(2)(D)(i)(I) requires SIPs to include provisions prohibiting any source or other type of emissions activity in one state from contributing significantly to nonattainment of the NAAQS (“prong one”), or interfering with maintenance of the NAAQS (“prong two”), by any another state. Section 110(a)(2)(D)(i)(II) requires that infrastructure SIPs include provisions prohibiting any source or other type of emissions activity in one state from interfering with measures required to prevent significant deterioration (PSD) of air quality (“prong three”) and to protect visibility (“prong four”) in another state. This rulemaking addresses prongs one and two of this CAA section. The majority

of the other infrastructure elements were approved in rulemakings on September 11, 2015 (80 FR 54725).

II. What action did EPA propose on the SIP submission?

The proposed rulemaking associated with today’s final action was published on March 16, 2016 (81 FR 14025). In that action, EPA proposed to disapprove the Wisconsin SIP for the prong two requirement because the WDNR SIP submission did not provide an adequate technical analysis demonstrating that the state’s SIP contained adequate provisions prohibiting emissions that will significantly contribute to nonattainment or interfere with the 2008 ozone NAAQS in any other state and because EPA’s most recent modeling indicated that emissions from Wisconsin were projected to contribute to projected downwind maintenance receptors in another state. EPA also proposed to approve the Wisconsin SIP for the prong one requirement because, although WDNR did not provide information or analyses explaining why existing SIP provisions are adequate to prevent significant contribution to nonattainment in downwind states, EPA’s independent modeling presented in the Notice of Data Availability and the Cross-State Air Pollution Update Rule indicated that Wisconsin emissions were not linked to any projected downwind nonattainment receptors. Therefore, EPA proposed to find that the Wisconsin SIP had adequate provisions to prevent such significant contribution to nonattainment for the 2008 ozone standard.

III. What is our response to comments received on the proposed rulemaking?

During the comment period, which ended on April 15, 2016, EPA did not receive any comments on the Wisconsin portion of the proposed notice. Comments pertaining to Ohio and Indiana are addressed in a June 15, 2016 rulemaking (81 FR 38957).

IV. What action is EPA taking?

EPA, as proposed, is approving prong one and disapproving prong two of a required infrastructure element with respect to CAA section 110(a)(2)(D)(i), interstate transport, for the 2008 ozone NAAQS. The approval is based on the June 20, 2013 SIP submission in which Wisconsin certified that the current SIP is sufficient to meet the CAA requirements. The disapproval portion of this action triggers an obligation under CAA section 110(c) for EPA to promulgate a Federal Implementation Plan (FIP) no later than two years from

the effective date of this disapproval, if EPA has not approved a SIP revision or revisions addressing the deficiencies identified in this action. The disapproval in this action is not tied to attainment planning requirements and therefore does not start any sanction clocks.

V. Statutory and Executive Order Reviews.

A. Executive Order 12866: Regulatory Planning and Review and Executive Order 13563: Improving Regulation and Regulatory Review

This action is not a significant regulatory action and was therefore not submitted to the Office of Management and Budget (OMB) for review.

B. Paperwork Reduction Act (PRA)

This rule does not impose an information collection burden under the provisions of the PRA.

C. Regulatory Flexibility Act (RFA)

The Administrator certifies that this rule will not have a significant economic impact on a substantial number of small entities under the RFA. In making this determination, the impact of concern is any significant adverse economic impact on small entities. An agency may certify that a rule will not have a significant economic impact on a substantial number of small entities if the rule relieves regulatory burden, has no net burden or otherwise has a positive economic effect on the small entities subject to the rule. This action merely proposes to disapprove state law as not meeting Federal requirements and imposes no additional requirements beyond those imposed by state law.

D. Unfunded Mandates Reform Act (UMRA)

This action does not contain any unfunded mandate as described in UMRA, 2 U.S.C. 1531–1538, and does not significantly or uniquely affect small governments. The action imposes no enforceable duty on any state, local or tribal governments or the private sector.

E. Executive Order 13132: Federalism

This action does not have federalism implications. It will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government.

F. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

This action does not have tribal implications as specified in Executive Order 13175. It will not have substantial direct effects on tribal governments. Thus, Executive Order 13175 does not apply to this rule.

G. Executive Order 13045: Protection of Children From Environmental Health Risks and Safety Risks

This action is not subject to Executive Order 13045 because it is not economically significant as defined in Executive Order 12866, and because EPA does not believe the environmental health or safety risks addressed by this action present a disproportionate risk to children because it proposes to disapprove a state rule.

H. Executive Order 13211: Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution or Use

This action is not subject to Executive Order 13211, because it is not a significant regulatory action under Executive Order 12866.

I. National Technology Transfer and Advancement Act (NTTAA)

This rulemaking does not involve technical standards.

J. Executive Order 12898: Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations

EPA believes the human health or environmental risk addressed by this action will not have potential disproportionately high and adverse human health or environmental effects on minority, low-income or indigenous populations.

Congressional Review Act

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**.

This action is not a “major rule” as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by October 11, 2016. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Ozone.

Dated: August 1, 2016.

Robert A. Kaplan,

Acting Regional Administrator, Region 5.

40 CFR part 52 is amended as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

■ 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

■ 2. Section 52.2591 is amended by revising paragraph (g) to read as follows:

§ 52.2591 Section 110(a)(2) infrastructure requirements.

* * * * *

(g) Approval—In a June 20, 2013, submission with a January 28, 2015, clarification, Wisconsin certified that the state has satisfied the infrastructure SIP requirements of section 110(a)(2)(A) through (H), and (J) through (M) for the 2008 ozone NAAQS. For 110(a)(2)(D)(i)(I), we are approving prong one and disapproving prong two. We are not taking action on the prevention of significant deterioration requirements related to section 110(a)(2)(C), (D)(i)(II), and (J) and the state board requirements of (E)(ii). We will address these requirements in a separate action.

* * * * *

[FR Doc. 2016–19025 Filed 8–11–16; 8:45 am]

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 300

[EPA–HQ–SFUND–2000–0006; FRL–9950–62–Region 2]

National Oil and Hazardous Substances Pollution Contingency Plan; National Priorities List: Deletion of the Jackson Steel Superfund Site

AGENCY: Environmental Protection Agency (EPA).

ACTION: Direct final rule.

SUMMARY: The Jackson Steel Superfund site (Site), located in the Village of Mineola, Nassau County, New York, contains a building formerly used as a metal-forming facility. The Site is bordered to the north by commercial spaces and single-family dwellings, to the east by a two-story apartment complex, to the south by a daycare center and to the west by an office building and restaurant.

The Environmental Protection Agency (EPA) Region 2 is publishing this direct final Notice of Deletion (NOD) of the Site from the National Priorities List (NPL). The NPL, promulgated pursuant to Section 105 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980, as amended, is an appendix of the National Oil and Hazardous Substances Pollution Contingency Plan (NCP). This direct final deletion is being published by EPA with the concurrence of the State of New York, through the New York State Department of Environmental Conservation (NYSDEC), because EPA has determined that all appropriate response actions under CERCLA have been completed at the Site and that the soil on the Site and the groundwater beneath the Site no longer pose a threat to public health or the environment. Because elevated concentrations of volatile organic compounds (VOCs) are present under the slab of the vacant Jackson Steel building and the occupied daycare center, operation and maintenance of the subslab vapor intrusion mitigation systems under the daycare center, periodic vapor intrusion monitoring, and five-year reviews will continue. The deletion does not preclude future actions under Superfund.

DATES: This direct final deletion will be effective September 26, 2016 unless EPA receives adverse comments by September 12, 2016. If adverse comments are received, EPA will publish a timely withdrawal of this direct final NOD in the **Federal**

Register, informing the public that the deletion will not take effect.

ADDRESSES: Submit your comments, identified by Docket ID no. EPA-HQ-SFUND-2000-0006, by one of the following methods:

- *Web site:* <http://www.regulations.gov>.

Follow the on-line instructions for submitting comments.

- *Email:* singerman.joel@epa.gov.

- *Fax:* To the attention of Joel

Singerman at 212-637-3966.

- *Mail:* To the attention of Joel

Singerman, Chief, Central New York Remediation Section, Emergency and Remedial Response Division, U.S. Environmental Protection Agency, Region 2, 290 Broadway, 20th Floor, New York, NY 10007-1866.

- *Hand Delivery:* Superfund Records Center, 290 Broadway, 18th Floor, New York, NY 10007-1866 (telephone: 212-637-4308). Such deliveries are only accepted during the Record Center's normal hours of operation (Monday to Friday from 9:00 a.m. to 5:00 p.m.). Special arrangements should be made for deliveries of boxed information.

Instructions: Direct your comments to Docket ID no. EPA-HQ-SFUND-2000-0006. EPA's policy is that all comments received will be included in the Docket without change and may be made available online at <http://www.regulations.gov>,

including any personal information provided, unless the comment includes information claimed to be confidential business information (CBI) or other information for which disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through <http://www.regulations.gov> or via email. The <http://www.regulations.gov> Web site is an "anonymous access" system, which means EPA will not know your identity or contact information unless you provide it in the body of your comments. If you send comments to EPA via email, your email address will be included as part of the comment that is placed in the Docket and made available on the Web site. If you submit electronic comments, EPA recommends that you include your name and other contact information in the body of your comments and with any disks or CD-ROMs that you submit. If EPA cannot read your comments because of technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comments fully. Electronic files should avoid the use of special characters and any form of encryption and should be free of any defects or viruses.

Docket: All documents in the Docket are listed in the <http://www.regulations.gov> index. Although listed in the index, some information is not publicly available, e.g., CBI or other information for which disclosure is restricted by statute. Certain other material, such as copyrighted material, will be publicly available only in hard copy. Publicly-available Docket materials can be obtained either electronically at <http://www.regulations.gov> or in hard copy at: U.S. Environmental Protection Agency, Region 2, Superfund Records Center, 290 Broadway, 18th Floor, New York, NY 10007-1866. *Phone:* 212-637-4308. *Hours:* Monday to Friday: 9:00 a.m. to 5:00 p.m.

Town of North Hempstead, 200 Plandome Road, Manhasset, NY 11030. *Phone:* (516) 489-5000. *Hours:* Monday-Friday, 8:15 a.m.-4:00 p.m.

Garden City Public Library, 60 Seventh Street, Garden City, NY 11530. *Phone:* (516) 742-8405. *Hours:* Monday-Thursday: 9:30 a.m.-9:00 p.m.; Friday and Saturday: 9:30 a.m.-5:00 p.m.; Sat: 9:30 a.m.-5:00 p.m. and Sunday: 1:00 p.m.-5:00 p.m.

Village of Mineola Hall, 155 Washington Avenue, Mineola, NY 11501. *Phone:* (516) 746-0750. *Hours:* Monday-Friday 8:30 a.m.-4:30 p.m.

FOR FURTHER INFORMATION CONTACT: Joel Singerman, Chief, Central New York Remediation Section, by mail at Emergency and Remedial Response Division, U.S. Environmental Protection Agency, Region 2, 290 Broadway, 20th Floor, New York, NY 10007-1866; telephone at 212-637-4258; fax at 212-637-3966; or email at singerman.joel@epa.gov.

- I. Introduction
- II. NPL Deletion Criteria
- III. Deletion Procedures
- IV. Basis for Site Deletion
- V. Deletion Action

I. Introduction

EPA Region 2 is publishing this direct final NOD of the Site from the NPL. The NPL constitutes Appendix B of 40 CFR part 300, which is the NCP, which EPA promulgated pursuant to Section 105 of CERCLA, as amended. EPA maintains the NPL as the list of releases that appear to present a significant risk to public health, welfare, or the environment. The releases on the NPL may be the subject of remedial actions financed by the Hazardous Substance Superfund (Fund). As described in Section 300.425(e)(3) of the NCP, a site deleted from the NPL remains eligible for Fund-financed remedial action if

future conditions at the site warrant such actions.

Section II of this document explains the criteria for deleting sites from the NPL. Section III discusses procedures that EPA is using for this action. Section IV discusses the Site and demonstrates how it meets the deletion criteria. Section V discusses EPA's action to delete the Site from the NPL unless adverse comments are received during the public comment period.

II. NPL Deletion Criteria

The NCP establishes the criteria that EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate. In making such a determination pursuant to 40 CFR 300.425(e), EPA will consider, in consultation with the State, whether any of the following criteria have been met:

- i. Responsible parties or other parties have implemented all appropriate response actions required;
- ii. all appropriate Fund-financed responses under CERCLA have been implemented, and no further action by responsible parties is appropriate; or
- iii. the remedial investigation (RI) has shown that the release of hazardous substances poses no significant threat to public health or the environment and, therefore, taking of remedial measures is not appropriate.

Pursuant to CERCLA Section 121(c) and the NCP, EPA conducts five-year reviews to ensure the continued protectiveness of remedial actions where hazardous substances, pollutants, or contaminants remain at a site above levels that allow for unlimited use and unrestricted exposure. EPA conducts such five-year reviews even if a site is deleted from the NPL. EPA may initiate further action to ensure continued protectiveness at a deleted site if new information becomes available that indicates it is appropriate. Whenever there is a significant release from a site deleted from the NPL, the deleted site may be restored to the NPL without application of the hazard ranking system.

III. Deletion Procedures

The following procedures apply to the deletion of the Site:

(1) EPA consulted with the State of New York prior to developing this direct final NOD and the NOID also published today in the "Proposed Rules" section of the **Federal Register**.

(2) EPA has provided the State with 30 working days for review of this notice and the parallel NOID prior to their publication today, and the State,

through NYSDEC, has concurred on the deletion of the Site from the NPL.

(3) Concurrent with the publication of this direct final NOD, a notice of the availability of the parallel NOID is being published in a major local newspaper, the *Mineola American*. The newspaper notice announces the 30-day public comment period concerning the NOID of the Site from the NPL.

(4) EPA placed copies of documents supporting the proposed deletion in the Deletion Docket and made these items available for public inspection and copying at the Site information repositories identified above.

(5) If adverse comments are received within the 30-day public comment period on this deletion action, EPA will publish a timely notice of withdrawal of this direct final NOD before its effective date and will prepare a response to comments. If appropriate, EPA may continue with the deletion process based on the NOID and the comments already received.

The NPL is designed primarily for informational purposes and to assist EPA's management of sites. Section 300.425(e)(3) of the NCP states that the deletion of a site from the NPL does not preclude eligibility for further response actions should future conditions warrant such actions.

IV. Basis for Site Deletion

The following information provides the Agency's rationale for deleting the Site from the NPL.

Site Background and History

The 1.5-acre Site (CERCLIS ID NYD001344456) contains a one-story, 43,000-square-foot building formerly used as a metal-forming facility and an approximately 10,000-square foot paved parking area. It is bordered to the north by commercial spaces and single-family dwellings, to the east by a two-story apartment complex, to the south by a daycare center, and to the west by an office building and restaurant.

The property was used from the mid-1970s until 1991 as a "roll form metal shapes" manufacturing facility. Degreasers, including tetrachloroethylene (PCE), trichloroethylene, and 1,1,1-trichloroethane, were used at the facility until 1985. Sludges from degreasing equipment were stored in drums and in an on-property 275-gallon tank.

The analytical results from samples collected by the Nassau County Department of Health (NCHD) in the early 1990s from within, around, and below three on-property dry wells indicated the presence of VOCs at depths down to 40 feet below the

ground surface. VOCs were also detected in groundwater samples collected from monitoring wells located downgradient of the dry wells.

Dumping of wastes into the dry wells and spills and leaks from drums storing various chemicals during the facility's operations are the likely sources of the contamination that was found at the Site.

The Site was proposed for listing on the NPL on October 22, 1999 (40 CFR part 300 [FRL-6462-2]). The Site was listed on the NPL on February 4, 2000 (40 CFR part 300 [FRL-6532-7]).

Following the commencement of RI-related field work in October 2001, because of concerns about the proximity of the Site to the daycare center, NCHD performed air sampling inside the daycare center building. The air samples detected PCE at levels below the New York State Department of Health's (NYSDOH's) guideline for indoor PCE exposure. Given the sensitivity of the population exposed (preschool children), NCHD collected additional samples in December 2001. At that time, indoor testing was also conducted inside the Jackson Steel building and the restaurant located adjacent to the Site. The results indicated that PCE levels in the indoor air of several rooms in the daycare center were above NYSDOH's guideline for PCE. As a result, in January 2002, a subslab depressurization system (*i.e.*, vapor intrusion mitigation system) was installed by EPA. In addition, a ventilation system was installed by the daycare center's contractor. Samples collected to assess the effectiveness of the implemented measures showed that the PCE levels in the air were significantly below NYSDOH's guideline and below EPA's acceptable noncancer risk levels. Because elevated PCE levels were also detected in a billiards club that shared common walls with the Site building and the daycare center, EPA installed a vapor intrusion mitigation system under the concrete slab of this building, as well. The billiards club was subsequently occupied as a retail store, and recently the daycare center (the Learn and Play Daycare Center) expanded to occupy this space, as well. The vapor intrusion mitigation systems were replaced by the property owner's contractor in May 2016.

The results of the RI, which was completed in 2002, indicated that VOCs, semi-volatile organic compounds, pesticides, and metals contamination were present in the surface soil, and VOC contamination was present at several subsurface soil locations. In addition, contamination was found in a

trench and sumps located inside the building and dry wells located under the parking lot at the Site.

Groundwater from the three hydrogeologic units underlying the site—the Upper Glacial Aquifer (upper aquifer), Magothy Confining Bed (a low permeability, clay layer separating the upper and deep aquifers), and the Magothy Aquifer (deep aquifer)—were also sampled. VOC contamination above state and federal standards was detected both in the Upper Glacial Aquifer and Magothy Aquifer.

Based upon the results of the RI and a feasibility study, in September 2004, EPA selected a remedy for the Site in a Record of Decision (ROD). The ROD outlined the following remedial action objectives (RAOs):

- Minimize or eliminate contaminant migration from contaminated soils and dry wells to the groundwater;
- minimize or eliminate any contaminant migration from contaminated soils and groundwater to indoor air;
- restore groundwater to levels which meet state and federal standards within a reasonable time frame;
- mitigate the migration of the affected groundwater; and
- reduce or eliminate any direct contact, ingestion, or inhalation threat associated with contaminated soils, soil vapor, contaminated surfaces in the on-property building, and groundwater.

The selected remedy includes the following actions:

- Decontamination of the Jackson Steel building floor;
- in-situ soil vapor extraction (ISVE) to treat the contaminated subsurface soil;
- excavation and off-Site disposal of the contaminated surface soil and contaminated material in on-Site sumps, a trench, and dry wells;
- in-situ chemical oxidation (ISCO) to treat the contaminated groundwater in the Upper Glacial Aquifer;
- extraction and treatment of the contaminated groundwater in the deep aquifer if confirmatory groundwater sampling indicates that the Site is a principal source of the groundwater contamination to the aquifer underlying the Site;
- if it is determined that the Site is a principal source of the groundwater contamination to the deep aquifer underlying the Site, the selected remedy would be expanded, as necessary, to include off-property groundwater contamination; and
- long-term groundwater monitoring.

The soil cleanup objectives were established pursuant to New York State Technical and Administrative Guidance

Memorandum (TAGM) No. 94–HWR–4046 objectives (Division Technical and Administrative Guidance Memorandum: Determination of Soil Cleanup Objectives and Cleanup Levels, Division of Hazardous Waste Remediation, January 24, 1994). As dictated by the TAGM objectives, the soil cleanup levels selected in the ROD were the more stringent cleanup level between a human-health protection value and a value based on protection of groundwater. The groundwater cleanup goals were the more stringent of the state or federal promulgated standards. EPA and New York State Department of Health promulgated health-based, protective Maximum Contaminant Levels (MCLs) that are enforceable standards for various drinking water contaminants. MCLs ensure that drinking water does not pose either a short- or long-term health risk.

The building decontamination and the excavation of the contaminated surface soil and the contaminated material in the building sumps and trench and in the dry wells and their disposal were performed from 2005 to 2006. A total of 170 cubic yards of material was excavated and disposed of at an EPA-approved off-Site facility.

Groundwater ISCO injections were performed between July and December 2005. Approximately, 15,000 gallons of iron-catalyzed sodium persulfate (with small amounts of buffering agents) and 600 gallons of hydrogen peroxide were injected into the aquifer through a network of 20 injection wells to treat the contamination in the Upper Glacial Aquifer.

After a successful pilot test, an ISVE system consisting of nine ISVE wells and 11 vapor monitoring probes began operating in 2005.

A supplemental groundwater investigation was conducted from 2005 to 2006 to determine the source of the Magothy Aquifer contamination underneath the Site and to establish whether there was a relationship between the contamination at the Site and the VOC contamination detected in nearby Village of Mineola Supply Well #4. Based on the results of the investigation, it was concluded that the Site was not a current source of contamination in the Magothy Aquifer. Therefore, EPA decided not to implement the Magothy Aquifer groundwater remedy. An Explanation of Significant Differences (ESD) was issued in 2007, documenting this decision.

While the cleanup objectives for the Upper Glacial Aquifer and soil were met in 2006 and 2008, respectively, EPA continued to operate the ISVE system until 2013 because VOC vapors were

still being recovered from underneath the Jackson Steel building. The operation of the ISVE system was discontinued when the levels of vapor removal became too low for the system to continue to be efficient.

The aboveground ISVE infrastructure was removed by EPA in June 2013. From March to April 19, 2016, the groundwater monitoring wells, ISVE wells, vapor monitoring wells, ISCO injection wells, and ISCO monitoring wells, were decommissioned.

Although EPA successfully remediated the soil and the groundwater aquifer immediately underlying the Site, residual levels of VOCs remain. VOCs, even at low levels, can migrate as vapors through the soil into buildings. This process, which is called vapor intrusion, can result in unacceptable human exposures to VOCs inside occupied buildings. This pathway is currently incomplete at the Site, because the building on the site is currently unoccupied, and subslab vapor intrusion mitigation systems prevent the migration of vapors into an adjacent occupied building.

Because the residual levels of VOCs are expected to dissipate slowly, EPA concluded that preventing human exposure to VOCs at the occupied building will be needed for a number of years to ensure the protectiveness of the remedy. Therefore, the existing vapor intrusion mitigation systems will need to continue to operate, and additional actions, from monitoring to the installation of an additional vapor mitigation system, may be needed should the currently unoccupied building be occupied or replaced with another structure in the future. EPA determined that institutional controls (ICs) (*i.e.*, property use restrictions) requiring the continued operation of the subslab vapor intrusion mitigation systems were needed. In addition, EPA determined that ICs requiring vapor intrusion sampling and/or mitigative measures were needed should the unoccupied Jackson Steel building be occupied or replaced with another structure in the future.

EPA issued an ESD on June 20, 2016, documenting its determination to incorporate into the remedy ICs to prevent exposure through vapor intrusion. The ICs will remain in place until the residual VOCs fully dissipate in the subsurface. EPA noted in the ESD that a Vapor Intrusion Management Plan (VIMP) and Institutional Control Implementation and Assurance Plan (ICIAP) would be prepared to ensure that the ICs were appropriately implemented and maintained. In addition, in the ESD EPA noted that it

would communicate directly with the Village of Mineola Superintendent of Buildings, requesting that EPA and NYSDEC be notified if the existing building is to be refurbished and used for human occupancy or demolished and a new structure constructed. The correspondence would also request that the Village not issue a Certificate of Occupancy until necessary vapor intrusion-related actions identified by EPA and NYSDEC are carried out.

A VIMP and ICIAP were completed on June 20, 2016.

On June 20, 2016, EPA sent a letter to the Village of Mineola Superintendent of Buildings, requesting that EPA and NYSDEC be notified if the existing building is to be refurbished and used for human occupancy or demolished and a new structure constructed and requested that the Village not issue a Certificate of Occupancy until necessary vapor intrusion-related actions identified by EPA and NYSDEC are carried out. Periodic reminders will be issued to the Village to help ensure the effectiveness of this measure.

On July 27, 2016, notices were placed on the deed of the two parcels occupied by the daycare center and the parcel occupied by the Jackson Steel building. The notice on the deed of the daycare center requires that the subslab vapor intrusion mitigation systems be operated as long as elevated levels of vapors remain under the buildings on the property and the buildings are occupied. The notice on the deed of the Jackson Steel building alerts any potential purchaser, lessee, or other user of the property that EPA and NYSDEC must be notified if and when a determination is made that the existing building will be refurbished and used for human occupancy or demolished and a new structure constructed. EPA intends to effect an environmental easement on the Jackson Steel property in the future once a new owner takes control of the property.

Five-Year Review

It is the policy of EPA to conduct five-year reviews when remedial activities, including monitoring, will continue for more than five years. A five-year review that is required by policy is triggered by the date of the approval of the Preliminary Close-Out Report, which documents that EPA has determined that construction at a site has been completed. For this Site, the Preliminary Close-Out Report was approved on August 30, 2007.

The first five-year review was completed in August 2012. The review concluded that the remedy was functioning as intended in the decision

documents and was protecting human health and the environment.

Subsequent to the 2012 five-year review, EPA determined that ICs were necessary to ensure the protectiveness of the remedy, as discussed above. Five-year reviews will be conducted as long as residual VOC levels remain that perpetuate the vapor intrusion concerns described in this ESD. The next five-year review will be conducted by August 2017.

Community Involvement

Public participation activities for the Site have been satisfied as required pursuant to CERCLA Sections 113(k) and 117, 42 U.S.C. 9613(k) and 9617. As part of the remedy selection process, the public was invited to comment on the proposed remedy. All other documents and information that EPA relied on or considered in recommending this deletion are available for the public to review at the information repositories identified above.

Determination That the Site Meets the Criteria for Deletion From the NCP

All of the cleanup requirements for the Site have been met, as described in the September 2006 groundwater Interim Groundwater Remedial Action Report, September 2008 soil Remedial Action Report, August 2007 Preliminary Close-Out Report, July 2016 Final Close-Out Report, and 2012 Five-Year Review report. The State of New York, in a July 29, 2016 letter, concurred with the proposed deletion of the Site from the NPL.

The NCP specifies that EPA may delete a site from the NPL if “all appropriate Fund-financed response under CERCLA has been implemented, and no further response action by responsible parties is appropriate.” 40 CFR 300.425(e)(1)(ii). EPA, with the concurrence of the State of New York, through NYSDEC, believes that this criterion for the deletion of the Site has been met in that that the soil on the Site and the groundwater beneath the Site no longer pose a threat to public health or the environment. Consequently, EPA is deleting the Site from the NPL. Documents supporting this action are available in the deletion docket at <http://www.regulations.gov> and at the Site information repositories.

V. Deletion Action

EPA, with the concurrence of the State of New York through NYSDEC, has determined that other than the ongoing operation and maintenance of the vapor intrusion mitigation systems at the daycare center, periodic vapor intrusion monitoring, insuring that the

ICs are in place and effective, and five-year reviews, all appropriate responses under CERCLA have been completed at the Site. The soil and groundwater immediately underlying the Site no longer pose a threat to public health or the environment. Therefore, EPA is deleting the Site from the NPL. Periodic vapor intrusion monitoring and five-year reviews will still be required for the Site. The deletion does not preclude future action under CERCLA. Because EPA considers this action to be noncontroversial and routine, EPA is taking this action without prior publication. This action will be effective September 26, 2016 unless EPA receives adverse comments by September 12, 2016. If adverse comments are received within the 30-day public comment period of this action, EPA will publish a timely withdrawal of this direct final NOD before the effective date of the deletion and the deletion will not take effect. EPA will prepare a response to comments and continue with the deletion process on the basis of the NOID and the comments received. In such a case, there will be no additional opportunity to comment.

List of Subjects in 40 CFR Part 300

Environmental protection, Air pollution control, Chemicals, Hazardous waste, Hazardous substances, Intergovernmental relations, Penalties, Reporting and recordkeeping requirements, Superfund, Water pollution control, Water supply.

Dated: August 2, 2016.

Judith A. Enck,

Regional Administrator, EPA, Region 2.

For the reasons set out in this document, 40 CFR part 300 is amended as follows:

PART 300—NATIONAL OIL AND HAZARDOUS SUBSTANCES POLLUTION CONTINGENCY PLAN

■ 1. The authority citation for part 300 continues to read as follows:

Authority: 33 U.S.C. 1321(c)(2); 42 U.S.C. 9601–9675; E.O. 12777, 56 FR 54757, 3 CFR 1991 Comp., p. 351; E.O. 12580, 52 FR 2923, 3 CFR 1987 Comp., p. 193.

■ 2. Table 1 of Appendix B to part 300 is amended by removing “Jackson Steel,” “Mineola/North Hempstead,” “NY.”

BILLING CODE 6560–50–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

[Docket No. FWS–R8–ES–2015–0170; FFXES11130000–156–FF08E00000]

RIN 1018–BA71

Endangered and Threatened Wildlife and Plants; Removing the San Miguel Island Fox, Santa Rosa Island Fox, and Santa Cruz Island Fox From the Federal List of Endangered and Threatened Wildlife, and Reclassifying the Santa Catalina Island Fox From Endangered to Threatened

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), are removing the San Miguel Island fox (*Urocyon littoralis littoralis*), Santa Rosa Island fox (*U. l. santarosae*), and Santa Cruz Island fox (*U. l. santacruzae*) from the Federal List of Endangered and Threatened Wildlife and are reclassifying the Santa Catalina Island fox (*U. l. catalinae*) from an endangered species to a threatened species. This action is based on a thorough review of the best available scientific and commercial information, which indicates that the threats to the San Miguel Island fox, Santa Rosa Island fox, and Santa Cruz Island fox have been eliminated or reduced to the point that each of the subspecies no longer meets the definition of an endangered species or a threatened species under the Endangered Species Act of 1973, as amended (Act), and that the threats to the Santa Catalina Island fox have been reduced to the point that the subspecies can be reclassified as a threatened species. We also announce the availability of a final post-delisting monitoring plan for the San Miguel Island fox, Santa Rosa Island fox, and Santa Cruz Island fox.

DATES: This rule is effective September 12, 2016.

ADDRESSES: This final rule is available on the Internet at <http://www.regulations.gov> and at the Ventura Fish and Wildlife Office’s Web site at <http://www.fws.gov/Ventura/>. Comments, materials, and supporting documentation considered in this rulemaking are available on the Internet at <http://www.regulations.gov> at Docket No. FWS–R8–ES–2015–0170, and are available for public inspection by appointment, during normal business hours at: U.S. Fish and Wildlife Service,

Ventura Fish and Wildlife Office, 2493 Portola Road, Suite B, Ventura, CA 93003; by telephone 805-644-1766; or by facsimile 805-644-3958. The post-delisting monitoring plan for the San Miguel Island fox, Santa Rosa Island fox, and Santa Cruz Island fox is available on our Endangered Species Program's national Web site (<http://endangered.fws.gov>) and on the Internet at <http://www.regulations.gov> at Docket No. FWS-R8-ES-2015-0170.

FOR FURTHER INFORMATION CONTACT:

Stephen P. Henry, Field Supervisor, U.S. Fish and Wildlife Service, Ventura Fish and Wildlife Office, 2493 Portola Road, Suite B, Ventura, CA 93003; telephone 805-644-1766; facsimile 805-644-3958. If you use a telecommunications device for the deaf (TDD), call the Federal Information Relay Service (FIRS) at 800-877-8339.

SUPPLEMENTARY INFORMATION:

Previous Federal Actions

On December 10, 2001, we published a proposal to list four subspecies of island foxes as endangered species (66 FR 63654). Please refer to this proposed rule for information on Federal actions prior to December 10, 2001. On March 5, 2004, we published a final rule listing the four subspecies of island foxes as endangered species (69 FR 10335). Please refer to the final Recovery Plan for Four Subspecies of Island Fox (*Urocyon littoralis*) (Service 2015, entire) for a detailed description of Federal actions concerning this species. We did not designate critical habitat for the four subspecies of island fox, as explained in our November 9, 2005, final critical habitat determination (70 FR 67924).

We published a notice announcing the initiation of a review of the status of the San Miguel Island fox, Santa Rosa Island fox, Santa Cruz Island fox, and Santa Catalina Island fox under section 4(c)(2) of the Act (16 U.S.C. 1531 *et seq.*) on March 9, 2015 (80 FR 12521), with the notice announcing the availability of the final recovery plan. On February 16, 2016, we published in the **Federal Register** a status review and proposed rule (81 FR 7723) to remove the San Miguel Island fox, Santa Rosa Island fox, and the Santa Cruz Island fox from the Federal List of Endangered and Threatened Wildlife, and to reclassify the Santa Catalina Island fox from an endangered species to a threatened species.

Background

Please refer to the final Recovery Plan for Four Subspecies of Island Fox (*Urocyon littoralis*) (Service 2015,

entire) for a summary of background information on island fox taxonomy, life history, and distribution. We prepared the Recovery Plan by working with a Recovery Team that included public agency representatives, landowners, conservancies, zoological institutions, nonprofits, and academics. The Recovery Plan includes discussion of the following: species description and taxonomy, habitat use, social organization, reproduction, distribution and abundance, threats to the subspecies, and recovery strategies.

Range of the Species

The island fox (*Urocyon littoralis*), a diminutive relative of the gray fox (*U. cinereoargenteus*), is endemic to the California Channel Islands. Island foxes inhabit the six largest of the eight Channel Islands (San Miguel Island, Santa Rosa Island, Santa Cruz Island, Santa Catalina Island, San Nicolas Island, and San Clemente Island) and are recognized as distinct subspecies on each of the six islands. Both morphologic and genetic distinctions support the classification of separate subspecies of island foxes for each island (Collins 1993, entire; Gilbert *et al.* 1990, entire; Goldstein *et al.* 1999, entire; Wayne *et al.* 1991a, entire). We recognize the range of each subspecies to be the island that it inhabits. Islands inhabited by island foxes are owned by four major landowners: the National Park Service (NPS), the U.S. Navy, The Nature Conservancy (TNC), and the Santa Catalina Island Conservancy (CIC), all of whom have management authority for wildlife on their lands. NPS and TNC manage San Miguel Island, Santa Rosa Island, and Santa Cruz Island; in this rule, we reference these three islands as the northern Channel Islands CIC manages the majority of fox habitat on Santa Catalina Island, except the City of Avalon. Santa Catalina Island is the only island with a permanent human population. Human use of the three northern Channel Islands is restricted to visitors and NPS and TNC staff.

Summary of Changes From the Proposed Rule

We did not make substantive changes in this final rule based on the comments that we received during the public comment period, but we added text to clarify some information presented in the proposed rule, added new information to the climate change analysis, and revised population data to reflect information updated since the publication of the proposed rule. For example, peer reviewers recommended we include information about genetic

variability present in the current island fox populations and new information about climate change. This information and other clarifications are incorporated into the final rule where appropriate, including in the Summary of Comments and Recommendations, below.

Recovery and Recovery Plan Implementation

Section 4(f) of the Act directs us to develop and implement recovery plans for the conservation and survival of endangered and threatened species unless we determine that such a plan will not promote the conservation of the species. We published a notice announcing the availability of the final recovery plan for the San Miguel Island fox, Santa Rosa Island fox, Santa Cruz Island fox, and Santa Catalina Island fox on March 9, 2015 (80 FR 12521).

The recovery plan (Service 2015, pp. 47-53) includes the recovery goals, recovery objectives, and recovery criteria that we outline below to reclassify the island fox subspecies from endangered species to threatened species and to remove island fox subspecies from the List of Endangered and Threatened Wildlife. Please see the February 16, 2016, proposed rule (81 FR 7723) for a detailed discussion of the recovery goal, objectives, and criteria and how they apply to the status of the San Miguel Island fox, Santa Rosa Island fox, Santa Cruz Island fox, and Santa Catalina Island fox. The objectives and progress toward these objectives (measured by explicit criteria) are summarized below.

Recovery Objectives

Recovery objectives identify mechanisms for measuring progress toward and achieving the recovery goal of delisting for each subspecies.

Recovery Objective 1: Each federally listed subspecies of island fox exhibits demographic characteristics consistent with long-term viability.

Recovery Objective 2: Land managers are able to respond in a timely fashion to predation by nesting golden eagles (*Aquila chrysaetos*) or significant predation rates by transient golden eagles, to potential or incipient disease outbreaks, and to other identified threats using the best available technology.

In order for any one of the four listed subspecies of island fox to be considered for downlisting from endangered to threatened status, recovery objective 1 should be met for that subspecies. In order for any one of the four listed subspecies of island fox to be considered for delisting, recovery

objectives 1 and 2 should be met for that subspecies.

Island fox recovery criteria are measurable standards for determining whether a subspecies has achieved its recovery objectives and may be considered for downlisting or delisting. Island fox recovery criteria in the recovery plan (Service 2015, pp. 50–55) are organized by factors under section 4(a)(1) of the Act to demonstrate how criteria indicate threats under that factor have been ameliorated. The following is a summary of the recovery criteria.

To address recovery objective 1, the subspecies must be protected from other natural or manmade factors known to affect their continued existence. This is accomplished when the following has occurred:

E/1: An island fox subspecies has no more than 5 percent risk of quasi-extinction over a 50-year period as determined by use of the population viability graphing/analysis tool found in appendix 2 of the recovery plan (Service 2015, pp. 131–136).

To address recovery objective 2, the magnitude and imminence of disease and predation threats must be reduced. This is accomplished when the following has occurred:

C/1: Golden eagle predation (applies only to the northern Channel Islands): The rate of golden eagle predation is reduced and maintained at a level no longer considered a threat to island fox recovery through development of a golden eagle management strategy, and the golden eagle prey base of mule deer (*Odocoileus hemionus*) and Roosevelt elk (*Cervus canadensis roosevelti*) is removed from Santa Rosa Island.

C/2: Disease: A disease management strategy is developed, approved, and implemented that includes vaccination recommendations and a monitoring program that provides for timely detection of a potential epidemic, and an associated emergency response strategy as recommended by the appropriate subject-matter experts.

Population monitoring has been implemented for each listed subspecies, and population viability analyses using the graphing/analysis tool found in appendix 2 of the recovery plan (Service 2015, pp. 131–136) indicate all subspecies have an acceptably small risk of extinction. The extinction risk has been less than 5 percent since 2008 for San Miguel, Santa Cruz, and Santa Catalina Islands, and since 2011 for Santa Rosa Island. As of 2015, island fox populations had increased to greater than 700 individuals on San Miguel Island, greater than 1,200 on Santa Rosa Island (Guglielmino and Coonan 2016, pp. 12, 18), greater than 2,100 on Santa

Cruz Island (Boser 2016a, pers. comm.), and greater than 1,800 on Santa Catalina Island (King and Duncan 2016, p. 10). All populations with the exception of Santa Rosa Island are at or above their pre-decline population estimates (Coonan 2015a, pers. comm.; King and Duncan 2014, pp. 1, 10). On San Miguel Island, low reproductive effort coupled with declining survival suggests that the San Miguel Island subspecies has reached carrying capacity (the maximum population size of a species that the habitat can support) (Coonan 2015a, p. 8). We conclude, based on population viability analyses, that recovery objective 1 is achieved for all four island fox subspecies. Detailed results of the graphing/analysis tool through 2015 can be found in the supplementary material “Results of graphing/analysis tool to assess island fox recovery criterion E/1” (derived from Guglielmino and Coonan 2016, pp. 17, 22; Boser 2016b, pers. comm.; King and Duncan 2016, p. 13) on the Internet at <http://www.regulations.gov> at Docket No. FWS–R8–ES–2015–0170.

To ensure that land managers are able to respond in a timely fashion to predation by golden eagles, a final golden eagle management strategy has been approved (NPS 2015a, entire), and is being implemented by NPS and TNC. The strategy outlines actions, many of which have already been implemented by NPS and TNC, including: Complete removal of all golden eagles; ongoing prevention of golden eagle nesting; and removal of all nonnative golden eagle prey, including deer and elk from Santa Rosa Island.

To ensure that land managers are able to respond in a timely fashion to a potential or incipient disease outbreak, the epidemic response plans for northern Channel Islands foxes (Hudgens *et al.* 2013, entire) and Santa Catalina Island foxes (Hudgens *et al.* 2014, entire) are currently implemented by NPS, TNC, and CIC. These plans provide direction for monitoring, vaccination for canine distemper virus and rabies annually to a subset of each island fox population, and response if mortality is detected. Additionally, NPS and TNC are committed through signed conservation management agreements (CMAs) to monitor and conduct other management actions for detecting and appropriately responding to predation by golden eagles or a potential disease outbreak in the future, as recommended in the golden eagle management strategy and epidemic response plans (Service and NPS 2015; Service and TNC 2015). The golden eagle management strategy and epidemic response plans are found on the Internet at <http://>

www.regulations.gov at Docket No. FWS–R8–ES–2015–0170 and on our Endangered Species Program’s national Web site (<http://endangered.fws.gov>).

With the golden eagle management strategy in place, complete removal of golden eagles and their nonnative prey-base from the northern Channel Islands (San Miguel, Santa Rosa, and Santa Cruz Islands), development and implementation of an epidemic response plan, and population levels consistent with long-term viability, recovery objectives 1 and 2, and the associated recovery criteria, are met for the San Miguel, Santa Rosa, and Santa Cruz Island foxes. With population levels consistent with long-term viability, recovery objective 1 is met for the Santa Catalina Island fox. However, objective 2 has not been met for the Santa Catalina Island fox because currently there are no assurances that current monitoring and management actions will continue in the future, and, because Santa Catalina Island has an elevated risk compared to the northern Channel Islands of introduced pathogens from the mainland, a disease outbreak could occur without detection or appropriate response to mediate the threat to the subspecies.

Summary of Factors Affecting the Species

Section 4 of the Act and its implementing regulations (50 CFR part 424) set forth the procedures for listing species, reclassifying species, or removing species from listed status. “Species” is defined by the Act as including any species or subspecies of fish or wildlife or plants, and any distinct population segment of any species of vertebrate fish or wildlife which interbreeds when mature (16 U.S.C. 1532(16)). A species may be determined to be an endangered species or threatened species because of any one or a combination of the five factors described in section 4(a)(1) of the Act: (A) The present or threatened destruction, modification, or curtailment of its habitat or range; (B) overutilization for commercial, recreational, scientific, or educational purposes; (C) disease or predation; (D) the inadequacy of existing regulatory mechanisms; or (E) other natural or human-made factors affecting its continued existence. A species may be reclassified or delisted on the same basis.

A recovered species is one that no longer meets the Act’s definition of an endangered species or a threatened species. Determining whether a species is recovered requires consideration of whether the species is endangered or

threatened because of the five categories of threats specified in section 4(a)(1) of the Act. For species that are already listed as endangered or threatened species, this analysis of threats is an evaluation of both the threats currently facing the species and the threats that are reasonably likely to affect the species in the foreseeable future following the delisting or downlisting and the removal or reduction of the Act's protections.

A species is an "endangered species" for purposes of the Act if it is in danger of extinction throughout all or a significant portion of its range and is a "threatened species" if it is likely to become an endangered species within the foreseeable future throughout all or a significant portion of its range. The Act does not define the term "foreseeable future." The population viability analyses used to determine the risk of quasi-extinction (the population level below which extinction is likely due to demographic or genetic effects), which we define as a population size of less than or equal to 30 individuals for each subspecies, estimates risk over a 50-year period (Bakker *et al.* 2009, entire; Service 2015, p. 52). Therefore, we estimate 50 years to be the timeframe in which, given the amount and substance of the best available data, we can anticipate events or effects, or reliably extrapolate threat trends, concerning the future as it relates to the status of the four subspecies of island fox (San Miguel, Santa Rosa, Santa Cruz, and Santa Catalina Island foxes). Consequently, we have assessed the threats discussed in this rule with reference to this 50-year foreseeable future timeframe.

The word "range" in the significant portion of its range phrase in the definition of endangered species and threatened species refers to the range in which a species currently exists. For the purposes of this analysis, we first evaluate the status of each subspecies throughout its range, which we consider to be the island that any given island fox subspecies inhabits. We then consider whether any of the subspecies are in danger of extinction or likely to become so in any significant portion of their ranges.

Primary threats to island foxes identified in the March 5, 2004, listing rule (69 FR 10335) include predation by golden eagles, disease, and stochastic risks to small populations and lack of genetic variability. Since the listing, impacts of feral cat aggression, poisoning, and entrapment on Santa Catalina Island, and fire, drought, and global climate change for all four islands were identified as possible new threats.

A thorough analysis and discussion of the current status of the San Miguel, Santa Rosa, Santa Cruz, and Santa Catalina Island foxes are found in the recovery plan (Service 2015, pp. 21–29) and proposed rule to remove the San Miguel Island fox, Santa Rosa Island fox, and the Santa Cruz Island fox from the Federal List of Endangered and Threatened Wildlife, and to reclassify the Santa Catalina Island fox from an endangered species to a threatened species (81 FR 7723; February 16, 2016). The following sections provide a summary of the past, current, and potential future threats impacting the San Miguel, Santa Rosa, Santa Cruz, and Santa Catalina Island foxes.

Factor A: Present or Threatened Destruction, Modification, or Curtailment of Habitat or Range

At the time of listing in 2004, habitat modification by nonnative grazing animals (*i.e.*, feral sheep, goats, rabbits, cattle, horses, Roosevelt elk, mule deer, and pigs) and nonnative plant invasion was identified as a threat under Factor A impacting island foxes (69 FR 10335; March 5, 2004). The impacts of nonnative herbivores and nonnative plants resulted in conversion of native coastal sage scrub, chaparral, and oak woodlands to annual grasses. Annual grasslands constitute less preferred habitat for island foxes (Laughrin 1977, p. 22; Roemer and Wayne 2003, pp. 1,256–1,257) and do not provide cover from predators such as golden eagles (Roemer 1999, pp. 99, 190–191). Annual grasslands also offer fewer food resources to foxes, and the seeds of annual grasses can become lodged in the eyes of island foxes, causing damage or temporary blindness (Laughrin 1977, p. 41).

Eradication programs on all islands have greatly reduced the number of nonnative herbivores on the islands and therefore the magnitude of impacts to the habitat and island foxes (Laughrin 1973, p. 14; Schoenherr *et al.* 1999, pp. 191–194; Parkes *et al.* 2010, p. 636; Jones *et al.* 2016, p. 2). Currently, impacts to island fox habitats are primarily attributed to continued modification by nonnative plant species, resulting in lower vegetation diversity, less diverse habitat structure, and reduced food availability.

NPS guidance supports the continued management of island fox habitat to benefit northern Channel Islands subspecies of island foxes. Title 54 of the U.S. Code, section 100101, paragraph (a), states that the NPS "shall promote and regulate the use of the National Park System . . . to conserve the scenery, natural and historic objects,

and wild life in the System units and to provide for the enjoyment of the scenery, natural and historic objects, and wild life in such manner and by such means as will leave them unimpaired for the enjoyment of future generations." Specifically, in its management plan, Channel Islands National Park identified restoration and maintenance of natural ecosystems and processes as a priority; NPS staff would continue to eradicate, where feasible, nonnative flora and fauna from the islands.

The majority of island fox habitat on all four islands is currently in some form of conservation ownership and management by NPS, TNC, or CIC. Therefore, we expect that habitat loss as a result of conversion due to development would be rare or limited. However, there is the potential for some development on privately owned lands that are not in conservation ownership. The island fox, as the species *Urocyon littoralis* (incorporating all six subspecies), is listed as threatened under the California Endangered Species Act (CESA), which provides a level of protection from possession or intentional killing of individual animals. CESA may also authorize take incidental to otherwise lawful activities, such as development on the privately owned TNC-managed lands on Santa Cruz Island and privately owned lands on Santa Catalina Island. For habitat conversion resulting from authorized development projects, minimization and mitigation of impacts resulting from authorized take are required under CESA and the environmental review process under the California Environmental Quality Act. Santa Catalina Island foxes are most likely to be impacted by the potential for land-use change on non-conserved lands, including development and recreational activities. CESA contributes to the conservation of the species by providing a mechanism to reduce or regulate some individual sources of mortality and to review and permit development projects that may impact island foxes and their habitat on private lands.

While past and ongoing effects of habitat modification by nonnative grazing animals (*i.e.*, feral sheep, cattle, Roosevelt elk, mule deer, and pigs), nonnative plant invasion, and land-use change on non-conserved lands may continue to have some negative effects on island foxes, nonnative animals and plants no longer result in significant habitat impacts that could affect the island fox subspecies at either the population or rangewide scales that we would consider a current threat to any of the subspecies of island fox.

Additionally, given planned continued management by NPS and other land owners, we do not anticipate that nonnative animals and plants will have significant habitat impacts in the future.

Factor B: Overutilization for Commercial, Recreational, Scientific, or Educational Purposes

As stated in the listing rule (69 FR 10335; March 5, 2004), although island foxes were used in the past for their pelts by Native Americans (Collins 1991, p. 215), these activities no longer occur. Research scientists are currently engaged in recovery activities via Service-issued section 10(a)(1)(A) recovery permits. Researchers conducting studies on NPS property must have a valid Research and Collecting Permit through NPS. The State of California requires a Scientific Collecting Permit and Memorandum of Understanding to collect, capture, mark, or salvage species listed as threatened under CESA for scientific and educational purposes (Fish and Game Code section 1002; and title 14, sections 650 and 670.7). Currently, none of the four subspecies is being threatened by overutilization for any purposes, and we expect, even without the protections of the Act, research activities to be managed by the State and by land management agencies to ensure that such activities do not result in overutilization in the future.

Factor C: Disease or Predation

For Santa Catalina Island fox at the time of listing, a canine distemper virus (CDV) epidemic was considered the primary threat (69 FR 10335; March 5, 2004) to the subspecies. The listing rule also expressed some concern regarding the potential impacts of canine adenovirus and canine parvovirus. For the northern Channel Islands foxes (San Miguel, Santa Rosa, and Santa Cruz Island foxes) at the time of listing, golden eagle predation was the primary threat (69 FR 10335; March 5, 2004), but potential for disease was also a concern, particularly given the small population sizes at the time.

Disease

Santa Catalina Island: In the past, disease severely impacted the island fox population on Santa Catalina Island. The eastern subpopulation of the Santa Catalina Island fox was estimated to be 1,342 in 1990 (Roemer *et al.* 1994, p. 393). Subsequent surveys conducted in 1999 and 2000 indicated the eastern island fox subpopulation had declined by over 90 percent in 10 years due to CDV (Timm *et al.* 2000, p. 17), likely transmitted from a raccoon that arrived

from the mainland (Timm *et al.* 2009, p. 339). After a captive-rearing and augmentation program was initiated, the eastern and western subpopulations were estimated to have reached 219 and 141 foxes in 2004, respectively (Schmidt *et al.* 2005, p. 11; King and Duncan 2011, p. 19). Population estimates have since greatly increased on Santa Catalina Island, surpassing the estimate from 1990, reaching a total of 1,812 individuals island-wide in 2015 (King and Duncan 2016, p. 10).

In 2014, a final epidemic response plan was approved and is being implemented by CIC to detect and facilitate appropriate response to a potential future disease outbreak for Santa Catalina Island foxes (Hudgens *et al.* 2014, entire). CIC annually monitors sentinel foxes (unvaccinated, radio-collared foxes whose death will be detected by monitoring) inhabiting many areas of the island to facilitate early detection of a potential epidemic (King and Duncan 2011, p. 15). Island foxes have been and continue to be vaccinated against CDV and rabies (King 2015, pers. comm.). However, production of the CDV vaccine was discontinued and was not available in 2013. CIC vaccinated for both CDV and rabies in 2013 and 2014 with the last of the vaccine (King and Duncan 2015, pp. 13, 23). A new product was made available in 2015 (King and Duncan 2016, p. 9); however, the new vaccine does not appear to be as effective against CDV, and the authors suggest this is not an adequate replacement (King and Duncan 2016, p. 23). While foxes have been vaccinated and we expect vaccinations to continue as effective vaccines become available, efficacy and availability of vaccines will require ongoing evaluation by the Island Fox Conservation Working Group as part of implementing the epidemic response plan. The Island Fox Conservation Working Group is a multi-disciplinary group of experts, originally convened by NPS in 1999, to evaluate available island fox status information and develop strategies to recover the island fox populations to viable levels (Service 2015, p. 6).

In addition, ear tumor prevalence in the Santa Catalina Island fox population remains an actively managed source of mortality (Vickers *et al.* 2011, pp. 9–10). This cancer can have an aggressive clinical course, with local invasion, tissue damage, and metastasis, leading to death (Munson *et al.* 2009, p. 1). Ear inflammation correlated with cancer incidence in Santa Catalina Island foxes is triggered by ear mite infestations (Munson *et al.* 2009, pp. 3–4), and the severity can be reduced through

aracacide application (Vickers *et al.* 2011, pp. 9–10). Treatment with aracacide is now standard practice by CIC during trapping of Santa Catalina Island foxes (King and Duncan 2011, p. 3).

While CIC is currently implementing ongoing monitoring and management, at this time there is no assurance of continued funding for long-term monitoring and management that could detect a novel disease outbreak and facilitate threat abatement, as recommended in the epidemic response plan. Lack of assurances for long-term monitoring and management for Santa Catalina Island fox is of particular concern because the island has a permanent human population, experiences heavy visitation, and has many points of access. The presence of a permanent human population on the island poses a greater risk of disease introduction than that for the northern Channel Islands. CIC manages the majority of fox habitat on the island but does not manage the City of Avalon, and, therefore, CIC does not control all potential avenues for introduction of possible disease vectors. Santa Catalina Island currently allows visitors and residents to own and transport pets, including domestic dogs and cats, to and from the island (King and Duncan 2011, p. 15), and dogs are frequently observed off-leash (Anderson 2012, pers. obs.; King 2012a, p. 1; Vissman and Anderson 2013 and 2014, pers. obs.; King 2015, p. 22). Transport of domestic and wild animals to and from Santa Catalina Island and their presence on the island increases the risk to island foxes of another disease outbreak. Additionally, with unrestricted access to the island by residents and visitors, there is the possibility of inadvertently transporting other animals that could carry disease; to date, four stowaway raccoons have been removed from the island, but a fifth observed in 2010 was not captured (King and Duncan 2011, p. 15). There is no quarantine period for transported pets, and proof of current vaccination is only required by the City of Avalon when licensing dogs (rabies only), and for CIC employees and lessees with pets living in company-owned housing (King and Duncan 2011, p. 15). Because access to the island by potentially unvaccinated or incompletely vaccinated domestic animals is not controlled or managed, there is a higher risk of disease introduction for Santa Catalina Island than for the three northern Channel Islands.

CIC manages the majority of fox habitat on the island (but not the City of Avalon) and implements measures

intended to control introduction of disease. CIC regulations require all nonnative animals entering CIC property be licensed; they also require that all dogs and cats entering CIC property be vaccinated against distemper and rabies, and be leashed at all times (CIC 2015, <http://www.catalinaconservancy.org>). However, enforcement of CIC regulations is labor-intensive and costly, because the island is large, there are many remote coves and beaches where private boats can anchor, and CIC does not have the funding or staff to patrol these areas regularly. CIC also conducts outreach and education of local authorities and the public to promote efforts to reduce the risk of disease introduction. However, because of unrestricted transport of domestic animals to the island, the City of Avalon's limited vaccination requirements, and limited enforcement ability of CIC, current measures to control introduction of diseases by domestic animals and stowaway wildlife on Santa Catalina Island, while providing some protection, are limited.

Northern Channel Islands: Disease does not appear to be a significant mortality factor on the northern Channel Islands. Dogs and other pets are not permitted on the northern Channel Islands to reduce the risk of an introduced disease. Dogs are occasionally illegally brought onto the islands, but transport of domestic animals to the northern Channel Islands is much more limited than on Santa Catalina Island. Channel Islands National Park General Management Plan prohibits pets from all Park islands, except for guide dogs for visually impaired persons (NPS 2015b, pp. 468, 487).

In 2013, a final epidemic response plan was approved and is being implemented by NPS and TNC to detect and facilitate appropriate response to a potential disease outbreak for the northern Channel Islands (Hudgens *et al.* 2013, entire). Infection by parasites continues to be suspected as the cause of mortality in several island foxes, but is not considered a significant mortality factor (Coonan *et al.* 2005b, p. 38; Coonan 2014, p. 6). Sentinel foxes are also monitored on the northern Channel Islands to facilitate early detection of a potential epidemic (Hudgens *et al.* 2013, entire), and foxes have been and continue to be vaccinated against CDV and rabies. Efficacy and availability of vaccines will require ongoing evaluation by the Island Fox Conservation Working Group as part of implementing the epidemic response plan. Also, the NPS identified island foxes as an ecosystem

element in the Mediterranean Coast Network Vital Signs Monitoring Plan, for which they will conduct long-term annual population monitoring as part of NPS's long-term ecological monitoring program, regardless of the island fox's status under the Act (Cameron *et al.* 2005, p. 3–3). Both NPS and TNC have committed through signed CMAs (Service and NPS 2015; Service and TNC 2015) to carrying out monitoring and management actions in the future as recommended in the epidemic response plan for northern Channel Island foxes (Hudgens *et al.* 2013, entire).

In summary, the possibility exists for domestic or wild animals carrying a disease or parasite to migrate or be transported to all the Channel Islands. The possibility is greater for Santa Catalina Island due to a permanent human population, heavy visitation, and many points of access. On all islands, an epidemic response plan is approved and being implemented (Hudgens *et al.* 2013 and 2014, entire), which includes that a subset of foxes are vaccinated when vaccines are available and monitored to detect and respond to a potential disease outbreak (Coonan 2010, pp. 24–29; see appendices 3 and 4 in recovery plan (Service 2015)). NPS and TNC have committed (Service and NPS 2015; Service and TNC 2015) to carrying out monitoring and management actions in the future as recommended in the epidemic response plan for northern Channel Island foxes (Hudgens *et al.* 2013, entire); therefore, we consider the potential threat of disease adequately controlled for the San Miguel, Santa Rosa, and Santa Cruz Island foxes now and in the future. We do not at this time have the assurance of continued implementation of the epidemic response plan on Santa Catalina Island. Disease was the main threat to Santa Catalina Island foxes at the time of listing in 2004, and given the increased risk of disease introduction and the lack of assurance for continued implementation of the epidemic response plan to detect and mitigate for future disease outbreaks, we still consider potential disease outbreaks to be a threat to the Santa Catalina Island fox now and in the future.

Predation

As identified in the 2004 listing rule, golden eagle predation was the primary cause for the decline of the northern Channel Islands fox subspecies and the primary reason for listing the species as endangered under the Act (69 FR 10335; March 5, 2004). Before golden eagles started using the northern Channel Islands in the 1990s, the only known predator of island foxes was the red-

tailed hawk (*Buteo jamaicensis*), which preyed only occasionally on young island foxes (Laughlin 1973, pp. 10–11; Moore and Collins 1995, p. 4). Because of the lack of predators, island foxes did not evolve vigilance and were easy targets for golden eagles (Roemer *et al.* 2001, p. 316). Colonization of the northern Channel Islands by golden eagles was likely a combination of two factors: (1) Introduction of nonnative mammals on the northern Channel Islands, resulting in a historically unprecedented prey base for golden eagles (69 FR 10335, March 5, 2004, p. 10338); and (2) an open ecological niche created by the extirpation of bald eagles (*Haliaeetus leucocephalus*) from the islands as a result of dichlorodiphenyltrichloroethane (DDT) poisoning (Service 2004, p. 10343).

In the 2004 listing rule, the Federal Bald and Golden Eagle Protection Act (BGEPA; 16 U.S.C. 668–668d) and the California Fish and Game Code, section 3511, were thought to have delayed or precluded the implementation of needed recovery actions for island foxes. The protections afforded to golden eagles by the BGEPA were thought to limit lethal management alternatives to protect island foxes. The California Fish and Game Code, section 3511, deemed golden eagles a fully protected species, which did not allow any take to be authorized. In 2003, California amended this law to allow authorization of the take of fully protected species for scientific research, including research on recovery for other imperiled species (Senate Bill 412).

To address the unprecedented number of golden eagles and the effects they were having on island foxes, in August 1999, NPS and TNC initiated a nonlethal golden eagle removal program to protect island foxes on the northern Channel Islands. Between November 1999 and July 2006, 44 golden eagles, including 22 adults or near adults, were removed from Santa Rosa and Santa Cruz Islands and released in northeastern California (Latta *et al.* 2005, p. 348; Coonan *et al.* 2010, pp. 59–61). There has been no record of breeding golden eagles on the northern Channel Islands since that time.

To ensure that golden eagles would be less likely to attempt to establish territories again on Santa Rosa and Santa Cruz Islands, TNC and NPS initiated a program in 2005 and 2011, respectively, to remove nonnative animals from those islands (Macdonald and Walker 2007, p. 20). The last known feral pig was removed from Santa Cruz Island in January 2007 (Parkes *et al.* 2010, p. 636). Nonnative mule deer and elk were removed from Santa Rosa

Island as part of an agreement with the former owners of the island. All elk and all but a few deer were removed by 2015, resulting in an island that was essentially ungulate-free for the first time in over 150 years (Coonan 2015b, pers. comm.).

The 2004 listing rule also identified the extirpation of bald eagles from the Channel Islands as a likely contributor to the colonization of the northern Channel Islands by golden eagles. Bald eagles aggressively defend their territories from golden eagles (69 FR 10335, March 5, 2004, pp. 10343–10344), and their presence on the islands likely would have discouraged dispersing golden eagles from establishing residence. Prior to listing, NPS, the Institute for Wildlife Studies, and TNC were actively engaged in the Montrose Settlements Restoration Program to reintroduce bald eagles to the Channel Islands, including Santa Catalina Island. The success of bald eagle reintroduction on the Channel Islands continues, with approximately 50 total resident bald eagles on the islands (Montrose Settlements Restoration Program 2015, p. 1).

In summary, although golden eagle predation of island foxes may occasionally occur (Coonan *et al.* 2014a, p. 374), predation has been extensively reduced and is no longer resulting in significant impacts at the population scale. This reduction in predation by golden eagles is in direct response to the extensive removal of golden eagles from the northern Channel Islands, golden eagle prey being removed successfully from Santa Rosa and Santa Cruz Islands, and the successful reintroduction of bald eagles.

Summary of Factor C

To reduce the threat of disease, a subset of each island fox subspecies is protected from CDV and rabies through preventative vaccinations when available and through monitoring as recommended in epidemic response plans to detect and facilitate appropriate responses in the event of an epidemic. NPS and TNC are committed through signed conservation management agreements (CMAs) to monitor and conduct other management actions for detecting and appropriately responding to a potential disease outbreak in the future, as recommended in the epidemic response plans (Service and NPS 2015; Service and TNC 2015). Therefore, the best available data indicate potential disease outbreaks are no longer a threat to the Santa Rosa Island fox, San Miguel Island fox, and Santa Cruz Island fox now and in the future.

Mortality due to disease was the primary reason for the decline and listing of Santa Catalina Island foxes. Currently, the epidemic response plan is being implemented on Santa Catalina Island, but the potential for an epidemic remains on Santa Catalina Island because of heavy visitation, many points of access, and few controls for pets and stowaway wild animals that could carry disease. In addition, there is no assurance of continued implementation of the epidemic response plan in the future on Santa Catalina Island to detect and mitigate for future disease outbreaks, and the new CDV vaccine may not be adequate. Efficacy and availability of vaccines will require ongoing evaluation by the Island Fox Conservation Working Group as part of implementing the epidemic response plan. Overall, the best available data indicate potential disease outbreaks to be a threat to the Santa Catalina Island fox now and in the future.

Mortality due to golden eagle predation was the primary reason for the decline and listing of northern Channel Islands foxes (San Miguel, Santa Rosa, and Santa Cruz Island foxes). This threat has been substantially reduced by measures including the complete removal of golden eagles, eradication of golden eagles' nonnative prey, and reintroduction of bald eagles. Additionally, NPS and TNC are committed through signed CMAs to monitor and conduct other management actions for detecting and appropriately responding to predation by golden eagles in the future, as recommended in the golden eagle management strategy (Service and NPS 2015; Service and TNC 2015). Thus, given the recent golden eagle and prey-base eradication efforts and reintroduction of bald eagles to prevent golden eagle presence in the future, along with ongoing management commitments, we no longer consider predation by golden eagles to be a threat resulting in significant impacts at the population scale (*e.g.*, result in a population decline) on the northern Channel Islands now or in the future.

Factor D: The Inadequacy of Existing Regulatory Mechanisms

Under this factor, we examine whether existing regulatory mechanisms are inadequate to address the threats to the four island fox subspecies discussed under other factors. Section 4(b)(1)(A) of the Act requires the Service to take into account "those efforts, if any, being made by any State or foreign nation, or any political subdivision of a State or foreign nation, to protect such species." In relation to Factor D under the Act, we

interpret this language to require us to consider relevant Federal, State, and Tribal laws, regulations, and other such mechanisms that may minimize any of the threats we describe in the threats analyses under the other four factors, or otherwise enhance conservation of the species. We give strongest weight to statutes and their implementing regulations and to management direction that stems from those laws and regulations; an example would be State governmental actions enforced under a State statute or constitution, or Federal action under statute.

For currently listed species, we consider the adequacy of existing regulatory mechanisms to address threats to the species absent the protections of the Act. Therefore, we examine whether other regulatory mechanisms would remain in place if the species were delisted, and the extent to which those mechanisms will continue to help ensure that future threats will be reduced or minimized.

In our discussion under Factors A, B, C, and E, we evaluated the significance of the threat as mitigated by any such conservation efforts and existing regulatory mechanisms. Where threats exist, we analyze under Factor D the extent to which existing regulatory mechanisms are inadequate to address the specific threats to the species. Regulatory mechanisms, if they exist, may reduce or eliminate the impacts from one or more identified threats.

As noted in our discussion under the other factors, conservation measures and existing regulatory mechanisms (such as continued implementation of the epidemic response plan and golden eagle management strategy) have reduced the primary threats of disease and predation by golden eagles on the northern Channel Islands and will continue to be controlled through appropriate management. Other previously identified threats affecting the San Miguel Island fox, Santa Rosa Island fox, Santa Cruz Island fox, and Santa Catalina Island fox, such as habitat modification by nonnative grazing animals and nonnative plant invasion and habitat conversion (Factor A), have been and are continuing to be controlled through appropriate management, and we anticipate that these efforts will continue in the future. Other sources of mortality are assessed under Factor E and found to not exert significant impacts on island foxes at either the population or rangewide scales, now or in the future. Consequently, we find that conservation measures along with existing regulatory mechanisms are adequate to address these specific threats.

The remaining threat to island fox on Santa Catalina Island is the potential for a disease epidemic because of heavy visitation, many points of access, and few controls for pets and stowaway wild animals that could carry disease. In addition, we do not have the assurance of continued implementation of the epidemic response plan in the future on Santa Catalina Island to detect and mitigate for future disease outbreaks. Therefore, under Factor C, we still consider potential disease outbreaks to be a threat to the Santa Catalina Island fox at this time and in the future. Consequently, our analysis here examines how existing regulatory mechanisms address this remaining identified threat to the Santa Catalina Island fox.

There are currently no regulations restricting transport of domestic animals to the island, and limited vaccination requirements for domestic animals owned by City of Avalon residents, thus providing the potential for introduction of disease to the island. CIC manages the majority of fox habitat on Santa Catalina Island, but not the City of Avalon; CIC regulations require all nonnative animals entering CIC property be licensed and that all dogs and cats be vaccinated against distemper and rabies (CIC 2015, entire). Reduction of the risk of disease introduction also occurs through CIC outreach and education of local authorities and the public. However, enforcement of CIC regulations is labor-intensive and costly because the island is large with many remote coves and beaches where private boats can anchor, and CIC does not have the funding or staff to patrol these areas regularly. Therefore, current measures to control introduction of diseases by domestic animals and stowaway wildlife on Santa Catalina Island, while providing some protection, are limited and thus do not fully address the threat of disease to Santa Catalina Island fox (see Factor C discussion, above).

Summary of Factor D

In summary, we have discussed that the threats previously facing the three northern Channel Islands subspecies of island fox have been removed or reduced and are being adequately managed; however, disease remains a threat to the Santa Catalina Island fox. In examining how existing regulatory mechanisms address this identified threat, we find current measures to control introduction of diseases by domestic animals and stowaway wildlife on Santa Catalina Island, while providing some protection, are limited in addressing the threat of potential disease outbreaks to Santa Catalina

Island fox. Therefore, we still consider potential disease outbreaks to be a threat to the Santa Catalina Island fox now and in the future under Factor C, noting that this threat is not addressed by existing regulatory mechanisms.

Factor E: Other Natural or Manmade Factors Affecting Its Continued Existence

The 2004 listing rule identified stochastic risks to small populations and lack of genetic variability as threats to all four island fox subspecies under Factor E (69 FR 10335; March 5, 2004). Road mortalities were also discussed under Factor E in the 2004 listing rule. Since the time of listing, the impacts of feral cat aggression, poisoning, and entrapment on Santa Catalina Island, as well as fire, drought, and global climate change for all four islands, have been identified as possible new threats.

Small Population Size

Island endemics, such as island foxes, have a high extinction risk due to isolation and small total population sizes relative to mainland subspecies (MacArthur and Wilson 1967, entire), both of which make them more vulnerable, especially to stochastic events such as drought and wildfire (Miller *et al.* 2001, entire; Kohlman *et al.* 2005, entire). Each island fox subspecies is a single breeding population, with San Miguel Island being the smallest population, which makes their populations inherently small and thus they may become more vulnerable to extinction when the size of a breeding population declines. In addition to small population size and the associated increased probability of extinction, lower and reduced genetic variation may make an island species less adapted to existing pressures and less capable of adaptation to new threats. Thus, small population size and low genetic diversity can have synergistic effects with respect to population decline. During the period when the island fox populations were at their lowest, they were extremely vulnerable to extinction from stochastic events. The populations have now increased substantially, returning to historical population levels, and the threat of extinction from demographic stochasticity has accordingly been reduced.

Genetic diversity in island fox populations is considered low due to the population bottlenecks they experienced during past extreme, low population numbers (Gilbert *et al.* 1990; Wayne *et al.* 1991; Goldstein *et al.* 1999; Gray *et al.* 2001, p. 8; Gray 2002, entire; Aguilar *et al.* 2004; Funk *et al.* 2016, p.

11; Wayne *et al.* 2016, p. 4). This low genetic diversity could compromise the ability of island foxes to respond to future environmental change. This lack of variability could be attributed either to extensive inbreeding or to bottlenecks resulting from low population densities (Funk *et al.* 2016, p. 11). However, island foxes have apparently existed for thousands of years with low effective population sizes (the number of individuals that can contribute genes equally to the next generation; low is defined as 150 to 1,000) and low genetic variability (Wayne *et al.* 1991a, p. 1,858; 1991b, entire). While additional genetic diversity was lost during the recent declines, island foxes appear to be tolerant of low genetic variation, occasional bottlenecks, and higher inbreeding because there is little evidence of inbreeding depression in island foxes (Coonan *et al.* 2010, pp. 13–15). Therefore, we do not consider reduced genetic diversity to be causing population-level effects at this time or expect it to in the future.

Motor Vehicles

The fearlessness of island foxes, coupled with relatively high vehicle traffic on Santa Catalina Island, results in multiple fox collisions each year. On the northern Channel Islands, vehicle use is limited, restricted to only land management personnel and researchers, and is expected to remain limited into the future. On Santa Catalina Island, 10 of the 21 fox mortalities in 2015 were caused by vehicle strikes (King and Duncan 2016, p. 18). The island-wide 25 mile per hour speed limit (CIC 2015, no page number) likely minimizes the number of vehicle strike mortalities that would otherwise occur. Even with current mortality of island foxes caused by various factors including vehicle strikes, the Santa Catalina Island fox population showed significant growth between 2002 and 2015, and has hovered around 1,800 individual foxes for the past 3 years. Given island fox population growth over the past 13 years during a time when the number of vehicles on the road has increased, we do not expect the population effect from vehicle mortality to increase in the future. Additionally, there is less than a 5 percent chance of the Santa Catalina Island fox subspecies going extinct given current and expected future conditions (King and Duncan 2016, pp. 12–13; Service 2015, pp. 167–168). Therefore, even though vehicle strikes remain the primary human-caused source of individual mortality on this island, mortality by motor vehicles is not considered a threat resulting in

significant impacts at either the population or rangewide scales on Santa Catalina Island at this time or in the future.

Interactions With Feral Cats and Domestic Dogs

Feral cats and domestic dogs occur on Santa Catalina Island and may negatively affect foxes through interactions including direct aggression and competition for food and habitat resources (Laughrin 1978, pp. 5–6; Kovach and Dow 1981, p. 443). Direct aggression between Santa Catalina Island foxes and cats has been documented in the wild, primarily near public coves and campgrounds that provide food and shelter for feral cats (Guttilla 2007, p. 9). Researchers have routinely captured foxes that have severe injuries consistent with cat encounters (Guttilla 2007, p. 9). Aggressive exclusion of foxes by feral cats has also been observed. When cats move into fox habitat, foxes are no longer observed; when cats are no longer resident, foxes move back in to occupy the area (King 2013c, pers. comm.; Anderson 2013, pers. obs.).

In the 2004 listing rule (69 FR 10335; March 5, 2004), we noted that California's Food and Agricultural Code 31752.5 prohibited lethal control of feral cats unless cats are held for a minimum of 6 days, which was thought to prevent CIC from taking steps to eradicate feral cats on Santa Catalina Island. In 2008, a Feral Animal Task Force was convened by the City of Avalon, with representatives of CIC and other island stakeholders, to address feral and free-ranging cats in the city and on the rest of the island, and most importantly, to draft legislation for consideration by the City Council for approval and incorporation into City ordinance. This task force is not currently active, however, and progress has stalled in initiating new feral cat control measures and enacting new legislation (King 2016, pers. comm.). Currently, the CIC practice regarding feral cats is consistent with that of the Catalina Island Humane Society: animals trapped accidentally during fox-trapping/monitoring are examined, and, if free from incurable and contagious disease, are spayed or neutered and released. Animals found to test positive for Feline Leukemia or Feline Immunodeficiency are humanely euthanized. Younger cats including kittens may be adopted from the Catalina Island Humane Society (CIC 2016, <http://www.catalinaconservancy.org>). Although competition and other negative interactions with feral cats can affect individual foxes, they are not

currently resulting in significant impacts at either the population or rangewide scales.

Instances of fox mortality from domestic dog attacks have been observed over the past decade (Gaffney 2011, p. 1; Munson and Gaffney 2011, p. 1; King and Duncan 2011, pp. 12–13; King and Duncan 2012, p. 14; King 2012a, p. 1; 2012b, p. 1; King 2015, p. 1). While mortality due to domestic dog attacks has been reported, it is limited in effect to individual foxes, and does not have significant impacts to island fox at either the population or rangewide scales now nor do we anticipate that it will in the future.

We do not anticipate an increase in the number of feral cats and domestic dogs on Santa Catalina Island in the future. Because growth of the Santa Catalina Island fox population over the past 13 years occurred during a time when feral cats and foxes and domestic dogs and foxes have been interacting, we do not expect that interactions with feral cats or domestic dogs will result in negative population effects in the future. Overall, given the lack of significant impacts at either the population or rangewide scales, interactions with feral cats and domestic dogs are not considered a threat to the Santa Catalina Island fox now or in the future.

Poisoning and Entrapment

Other impacts to Santa Catalina Island foxes resulting from human interaction include mortality from poisoning and entrapment (Duncan and King 2012, p. 4; King and Duncan 2015, pp. 18, 20; Vickers 2012a, p. 2; Vickers 2012b, p. 1; King and Duncan 2015, p. 18). A Santa Catalina Island fox died in 2012 from rodenticide poisoning (Duncan and King 2012, p. 4), another was euthanized because of poisoning in 2014 (King and Duncan 2015, p. 18), and a third was sickened in 2014 by insecticide poisoning (King and Duncan 2015, p. 20). Entrapment of foxes may occur in areas where development projects are ongoing. Examples include: Two foxes falling into a power line pole construction pit (CIC 2009, <http://www.catalinaconservancy.org>); one fox drowning due to entanglement in a food container (Vickers 2012a p. 2); one fox death from being trapped in a recycling barrel (Vickers 2012b, p. 1); and two fox deaths in 2014 from drowning in water or sediment containers (King and Duncan 2015, p. 18). Types of human-caused harm other than vehicle strikes and domestic dog attacks in urbanized areas are varied, but they do not have a population-level impact at this time or in the future. Given the low numbers of foxes affected by poisoning or

entrapment and the past and current population growth, we do not expect the population effect from poisoning or entrapment to increase in the future. Therefore, at this time, the best available information indicates neither poisoning nor entrapment is resulting in significant impacts at either the population or rangewide scales, and there is no indication that poisoning or entrapment on Santa Catalina Island will increase in the future.

Fire

On the northern Channel Islands, the frequency and intensity of wildland fire is less than on the adjacent mainland, because there are fewer ignition sources on the islands, and the typical maritime fog moisture inhibits fire spread. Natural lightning-strike fires are extremely rare; only three fires between 1836 and 1986 on the Channel Islands were started by lightning (Carroll *et al.* 1993, p. 77). On the northern Channel Islands, there are far fewer human-started fires than on the mainland or on Santa Catalina Island, as there are no permanent human occupants on the northern Channel Islands. Because of this, island foxes on the northern Channel Islands have experienced few large wildland fire events. The recent removal of nonnative grazers may increase fuel loads and thus the likelihood of larger fires; however, historically consistent cool and foggy conditions will continue to limit wildland fire spread, including in the future. Additionally, NPS adheres to a policy of total suppression on the Channel Islands, due to resource concerns (Kirkpatrick 2006, entire), reducing the chance that wildland fires will become large.

Though not identified as a threat at the time of listing, Santa Catalina Island regularly experiences wildfires (CIC 2011) that could reduce food availability, alter the habitat, or directly result in the loss of individual foxes (Service 2004, p. 10347). Duncan and King's (2009, p. 384) findings indicate fire seasonality has an influence on fox survival; fires that occur when pups are young and most dependent on adults for mobility are most damaging. However, in general, the best available data indicate that neither the 2006 Empire Fire nor the 2007 Island Fire had significant effects to island fox at the population level (Duncan and King 2009, p. 384).

In summary, wildfires are infrequent on the northern Channel Islands and more frequent on Santa Catalina Island. On all islands, while wildfire can result in mortality of individuals, especially juveniles depending on when the fires

occur, the best available data indicate that wildfire does not pose significant impacts to the island fox at either the population or rangewide scales currently. In addition, there is no indication that fire frequency will increase in the future on the northern Channel Islands. On Santa Catalina Island, even given an increase in fire frequency since 1999, the island fox population has continued to increase (CIC 2016, <http://www.catalinaconservancy.org>). Therefore, we do not anticipate wildfire posing a significant population-level impact in the future.

Drought

The Channel Islands, as well as the rest of southern California, are currently in the midst of a drought that began in 2012, and, as of mid-April 2016, has not abated (United States Drought Monitor 2016, entire). Island foxes have endured many droughts during their 10,000-year persistence on the islands (California Department of Water Resources 2015, entire). Deep multi-year droughts have occurred on the Channel Islands about once every 2 decades since 1900 (Coonan 2015, unpubl. data). General drought conditions in the late 1920s and early 1930s, combined with overgrazing, denuded most vegetation, particularly on San Miguel Island, creating massive sand barrens, remnants of which are still evident today (Johnson 1980, entire). Even so, island foxes survived this period of soil erosion and episodic landscape stripping.

The current drought is the first opportunity to study the effect of drought on island foxes, since foxes have recovered to historic numbers. On San Miguel Island, average adult weights declined in 2013 and 2014, to the lowest ever recorded, and fox reproduction was negligible in 2013 and 2014 (Coonan *et al.* 2014, p. 28; Coonan 2015b, p. 7; Coonan 2015, unpubl. data). During this time, mortality also increased, and many fox carcasses were emaciated (Coonan 2014, pp. 6–7). However, San Miguel Island fox numbers have remained at or above pre-decline levels (Friends of the Island Fox 2015, p. 3). On Santa Catalina Island, data indicate that decreasing precipitation may result in a reproductive decline; however, adults' weights were not similarly affected during this time (King and Duncan 2015, pp. 21–22). These effects were not seen on neighboring Santa Rosa Island, where foxes are not yet at carrying capacity or pre-decline levels. Fox weights increased on Santa Rosa Island in the drought years, reproduction was higher, and foxes had higher body

condition scores than on San Miguel Island (Coonan 2015b, pp. 7–8). It is apparent that one response of island foxes to drought is to curtail reproduction, especially if the population is at carrying capacity (Coonan *et al.* 2010, p. 28; Coonan 2015a, pp. 6, 13). Given the past demonstrated ability of island foxes to survive pervasive drought, current healthy population numbers, and apparent ability to respond to drought by shifting resource allocation, we do not consider drought to be a threat to island foxes at this time or in the future.

Global Climate Change

Our analyses under the Act include consideration of ongoing and projected changes in climate. Scientific measurements spanning several decades demonstrate that changes in climate are occurring, and that the rate of change has increased since the 1950s. Examples include warming of the global climate system, and substantial increases in precipitation in some regions of the world and decreases in other regions (*e.g.*, Solomon *et al.* 2007, pp. 35–54, 82–85; IPCC 2013b, pp. 3–29; IPCC 2014, pp. 1–32). Results of scientific analyses presented by the Intergovernmental Panel on Climate Change (IPCC) show that most of the observed increase in global average temperature since the mid-20th century cannot be explained by natural variability in climate and is “very likely” (defined by the IPCC as 90 percent or higher probability) due to the observed increase in greenhouse gas (GHG) concentrations in the atmosphere as a result of human activities, particularly carbon dioxide emissions from use of fossil fuels (Solomon *et al.* 2007, pp. 21–35; IPCC 2013b, pp. 11–12 and figures SPM.4 and SPM.5). Further confirmation of the role of GHGs comes from analyses by Huber and Knutti (2011, p. 4), who concluded it is extremely likely that approximately 75 percent of global warming since 1950 has been caused by human activities.

Various changes in climate may have direct or indirect effects on species. These effects may be positive, neutral, or negative, and they may change over time, depending on the species and other relevant considerations, such as threats in combination and interactions of climate with other variables (for example, habitat fragmentation) (IPCC 2014, pp. 4–11). Identifying likely effects often involves aspects of climate change vulnerability analysis. Vulnerability refers to the degree to which a species (or system) is susceptible to, and unable to cope with, adverse effects of climate change,

including climate variability and extremes. Vulnerability is a function of the type, magnitude, and rate of climate change and variation to which a species is exposed, its sensitivity, and its adaptive capacity (Glick *et al.* 2011, pp. 19–22; IPCC 2014, p. 5). There is no single method for conducting such analyses that applies to all situations (Glick *et al.* 2011, p. 3). We use our expert judgment and appropriate analytical approaches to weigh relevant information, including uncertainty, in our consideration of the best scientific information available regarding various aspects of climate change.

Statewide and regional probabilistic estimates of temperature and precipitation changes for California and the greater Los Angeles region were evaluated by Pierce *et al.* (2013, entire) and Sun *et al.* (2015, entire) using dynamic downscaled simulations. Pierce *et al.* (2013, p. 854) found that, averaging across all models and downscaling methods, the warmest Julys are likely to be far warmer than historical temperatures for California. Projections for changes in precipitation by the 2060s were less certain; they showed weak overall annual mean decreases in precipitation in the southern part of the State, but with an increase in summer rain (Pierce *et al.* 2013, p. 855). Sun *et al.* (2015, p. 4,625) found that temperatures in the greater Los Angeles region for two future time periods, midcentury (2041–60) and end of century (2081–2100), will almost certainly be outside the interannual variability range seen in the baseline (1981–2000), particularly during the summer and fall. However, in each scenario and time period, the coastal areas warm less than inland areas due to generally lower warming over the ocean and the land-sea breeze circulation, which introduces a marine influence in the coastal zone (Sun *et al.* 2015, pp. 4,621–4,622). This suggests that the Channel Islands, along with the mainland's highest elevations and a narrow swath near the coast, may be somewhat buffered from the more extreme effects of a warming climate.

Probably the most potentially vulnerable aspect of island fox biology to climate change is indirect effects from affected invertebrates that are parasites and disease vectors. Invertebrates, because they are exothermic (cold-blooded), are particularly responsive to the effects of a warming climate that typically speeds development and enhances survival. For disease vectors such as mosquitos, survival may occur where it was previously too cold during the coolest nights of the year for overwintering. Invertebrates are also

particularly well-suited to adapt to a changing climate because they have short generation times and a high reproductive output (Parmesan 2006, pp. 654–656). The warming climate typically has resulted in increased abundance and expanded ranges of parasites such as nematodes and ticks, as well as diseases they transmit (Parmesan 2006, pp. 650–651; Studer *et al.* 2010, p. 11). Climate change also produces ecological perturbations that result in altered parasite transmission dynamics, increasing the potential for host switching (Brooks and Hoberg 2007, p. 571). Moller's (2010, p. 1,158) analysis of parasites on avian hosts over a 37-year period suggests climate change predictions for parasite effects should be made with caution, but that climate can alter the composition of the parasite community and may cause changes in the virulence of parasites (Moller 2010, p. 1,158). Climate change may change and could potentially increase the parasites and disease vectors to which island foxes are exposed. However, we anticipate ongoing monitoring and management will detect any increase or changes in parasites or disease vectors that affect the population health of island foxes.

Considering that island foxes are opportunistic feeders, and climate warming could increase the subspecies' insect prey base abundance, it is possible climate change could positively affect food quantity and quality. For example, increased consumption of insect species by mice associated with a warmer, drier climate on South African islands has been documented (Chown and Smith 1993, pp. 508–509). In addition, because island foxes have shown relative plasticity with regard to utilizing nonnative insects (Cypher *et al.* 2011, p. 13), most invasions of nonnative potential prey species are not likely to negatively affect island fox food resources. The only potential negative effect of climate change on the insect prey base of island foxes would be if increased storm intensity and frequency reduced prey abundance, as Roemer (1999, p. 187) hypothesized occurred on Santa Cruz Island in the mid-1990s.

Global climate change has the potential to negatively and positively affect island fox populations. There is still uncertainty associated with predictions relative to the timing, location, and magnitude of future climate changes. Probably the most vulnerable aspect of island fox biology to climate change is indirect effects to the fox from affected invertebrates. Given the indications that the Channel Islands may be somewhat buffered from

the more extreme effects of a warming climate and past demonstrated ability of island foxes to survive pervasive drought, current healthy population numbers, and the apparent ability of foxes to respond to changes in precipitation by shifting resource allocation, we do not consider changes in temperature or precipitation projected due to climate change to be a threat to island foxes at this time or in the future. While we cannot accurately predict the effects of climate change on island fox subspecies, because the foxes are generalists and exhibit plasticity with regards to prey and habitat use, we do not expect negative effects of such magnitude that would result in significant impacts at either the population or rangewide scales (*e.g.*, cause major declines). We anticipate ongoing monitoring and management will detect any significant changes in population health and allow for management responses, including possible relisting.

Summary of Factor E

In summary, during the period when populations were at their lowest, the four subspecies of Channel Island foxes were extremely vulnerable to extinction from stochastic events. The populations have now increased substantially and the likelihood of extinction has accordingly been reduced. The combined effects of interactions with feral cats and domestic dogs, motor vehicle collisions, mortality due to wildfire, and other human-caused mortalities result in the deaths of multiple individuals throughout Santa Catalina Island on an annual basis, but they do not constitute a combined threat to the relatively large population at this time nor do we anticipate that they will in the future. Given the past demonstrated ability of island foxes to survive pervasive drought, their current healthy population numbers, and their apparent ability to respond to drought by shifting resource allocation, we do not consider drought to be a threat to island foxes at this time or in the future. While we cannot accurately predict the effects of climate change on island fox subspecies because the foxes are generalists and exhibit plasticity with regards to prey, habitat use, and resource allocation, we do not consider climate change to be a threat to island foxes now nor in the future.

Overall Summary of Factors Affecting Island Foxes

At time of listing in 2004 (69 FR 10335; March 5, 2004), predation by golden eagles was the primary threat to San Miguel, Santa Rosa, and Santa Cruz

Island foxes, and disease was the primary threat to the Santa Catalina Island fox. The threat of predation by golden eagles on the northern Channel Islands has been significantly reduced since the time of listing. This reduction in predation by golden eagles is in direct response to the extensive removal of golden eagles from the northern Channel Islands, golden eagle prey being removed successfully from Santa Rosa and Santa Cruz Islands, and the successful reintroduction of bald eagles.

Potential disease outbreaks continue to pose a threat to Santa Catalina Island foxes due to relatively uncontrolled movement of vectors from the mainland that carry diseases for which the population may not be vaccinated. The primary measures in place on all islands to reduce the threat of disease are vaccination of a subset of the fox population for CDV and rabies, and monitoring of population sentinels to detect the start of another epidemic and respond appropriately to mitigate the outbreak. While disease is currently controlled on Santa Catalina Island, we do not have assurance that monitoring and management of Santa Catalina Island foxes necessary to detect and mitigate an epidemic in Santa Catalina Island foxes will continue in the future.

During the period when the island fox populations were at their lowest, they were extremely vulnerable to extinction from stochastic events. There will always be some inherent risk of extinction due to stochastic events because each island fox subspecies is a single breeding population. However, the populations have now increased substantially, show stable or increasing trends, and are returning to historical population levels, and the threat of extinction from demographic stochasticity has accordingly been reduced.

Mortality due to motor vehicle strikes, habitat loss, feral cats, and domestic dogs results in loss of individuals, but these mortality factors are not resulting in significant impacts to island foxes at either the population or rangewide scales as documented by current population numbers and trends. When population numbers are healthy, island foxes respond to drought by shifting resource allocation; therefore, we do not consider drought to be a threat to island foxes at this time or in the future. The impacts of climate change are hard to predict. Some effects to island fox populations could be negative while others could be positive. Predicting likely future climate scenarios and understanding the complex effects of climate change are high priorities for island fox conservation planning.

Climate change is not considered a threat now or in the future because of the past demonstrated ability of island foxes to survive pervasive drought, their current healthy population numbers, the indication that the Channel Islands may be somewhat buffered from the more extreme effects of a warming climate, and the apparent ability of foxes to respond to changes in precipitation by shifting resource allocation.

When mortality mechanisms or other stressors occur together, one may exacerbate the effects of another, causing effects not accounted for when stressors are analyzed individually. Synergistic or cumulative effects may be observed in a short amount of time or may not be noticeable for years into the future, and could affect the long-term viability of island fox populations. For example, if a stressor hinders island fox survival and reproduction or affects the availability of habitat that supports island foxes, then the number of individuals the following year(s) will be reduced, increasing vulnerability to stochastic events like a disease epidemic or wildfire. The combined effects of interactions with feral cats and domestic dogs, motor vehicle collisions, mortality due to wildfire, and other human-caused mortalities result in the deaths of multiple individuals throughout Santa Catalina Island on an annual basis, but they do not constitute a combined threat to the relatively large population at this time nor do we anticipate that they will in the future. Another example is San Miguel Island where there have been combined effects of low reproductive output, dry climate, parasites, and low genetic variability. However, population estimates for the total San Miguel Island fox population likely represents carrying capacity for the island (Coonan 2014, p. 8), which has resulted in a general decline in reproductive effort as the population has increased. In addition, according to population viability analyses the San Miguel Island fox subspecies is at acceptably low risk of extinction (Guglielmino and Coonan 2016, p. 17) indicating that low reproductive output, dry climate, parasites, and low genetic variability do not constitute a combined threat to the population at this time nor do we anticipate that they will in the future. In conducting this analysis, we have considered whether the individual stressors identified for each island, considered in combination, result in a threat to the species. The combination of low mortality and robust population growth puts each island fox subspecies at acceptably low risk of extinction, according to population viability

analyses. While synergistic or cumulative effects may occur when mortality mechanisms or other stressors occur together, given the robust populations and ongoing management and monitoring, these effects do not pose significant impacts to San Miguel, Santa Rosa, and Santa Cruz Island foxes at either the population or rangewide scales at this time nor do we anticipate that they will in the future. Synergistic or cumulative effects do not pose significant impacts to Santa Catalina Island fox at either the population or rangewide scales at this time given the robust populations and current ongoing management and monitoring, but could in the future if there are lapses in monitoring and management in the future.

Determination

An assessment of the need for a species' protection under the Act is based on whether a species is in danger of extinction or likely to become so because of any of five factors: (A) The present or threatened destruction, modification, or curtailment of its habitat or range; (B) overutilization for commercial, recreational, scientific, or educational purposes; (C) disease or predation; (D) the inadequacy of existing regulatory mechanisms; or (E) other natural or human-made factors affecting its continued existence. As required by section 4(a)(1) of the Act, we conducted a review of the status of these species and assessed the five factors to evaluate whether the San Miguel, Santa Rosa, Santa Cruz, and Santa Catalina Island foxes are in danger of extinction, or likely to become so in the foreseeable future throughout all or a significant portion of their ranges. We examined the best scientific and commercial information available regarding the past, present, and future threats faced by these subspecies. We also consulted with species experts and land management staff with NPS, TNC, and CIC, who are actively managing for the conservation of island foxes.

In considering what factors might constitute threats, we must look beyond the mere exposure of the species to the factor to determine whether the exposure causes actual impacts to the species. If there is exposure to a factor, but no response, or only a positive response, that factor is not a threat. If there is exposure and the species responds negatively, the factor may be a threat and we then attempt to determine how significant the threat is. If the threat is significant, it may drive, or contribute to, the risk of extinction of the species such that the species warrants listing as an endangered

species or threatened species as those terms are defined by the Act. This determination does not necessarily require empirical proof of a threat. The combination of exposure and some corroborating evidence of how the species is likely impacted could suffice. The mere identification of factors that could impact a species negatively is not sufficient to compel a finding that listing is appropriate; we require evidence that these factors are operative threats that act on the species to the point that the species meets the definition of an endangered species or threatened species under the Act.

At the time of listing in 2004 (69 FR 10335; March 5, 2004), the Santa Catalina Island fox experienced a devastating CDV epidemic that resulted in an almost complete loss of the eastern subpopulation, which made up the majority of the island population. The precipitous decline of the northern Channel Island foxes (San Miguel, Santa Rosa, and Santa Cruz Island foxes) that led to their listing as endangered species was the result of depredation by golden eagles, facilitated by the presence of a nonnative, mammalian prey-base on the northern Channel Islands.

As a result of concerted management efforts, golden eagle predation has been reduced to such a degree that it is no longer considered a threat to the northern island subspecies. Additional management efforts, including captive breeding and ongoing vaccinations for disease, have contributed to the substantial increase of all island fox populations. Although golden eagles will most likely continue to occasionally occur on the islands as transients, the removal of the nonnative prey-base and the constant presence of bald eagles are permanent, long-term deterrents to golden eagles establishing breeding territories and remaining on the northern Channel Islands. Ongoing management and monitoring are designed to detect any reemergence of threats and to take corrective actions should any threats be detected.

Northern Channel Islands Subspecies

Based on the information presented in this final rule and the proposed rule (81 FR 7723; February 16, 2016), the recovery criteria in the recovery plan have been achieved and the recovery objectives identified in the recovery plan have been met for the three northern Channel Island subspecies of island fox. San Miguel, Santa Rosa, and Santa Cruz Island fox abundance has increased steadily to the point where the number of individuals is again within the range of historical population estimates, save Santa Rosa Island where

numbers are returning to historical population levels. Population viability analyses strongly indicate that the northern Channel Island foxes have an acceptably small risk of extinction and current population levels are consistent with long-term viability. Additionally, the primary threat (golden eagles) to northern Channel Island foxes has been controlled, and ongoing management and monitoring are in place to ensure that threats continue to be managed in the future. This information indicates that these three subspecies are no longer at immediate risk of extinction, nor are they likely to experience reemergence of threats and associated population declines in the future. We, therefore, conclude that the San Miguel, Santa Rosa, and Santa Cruz Island foxes are no longer experiencing significant impacts at either the population or rangewide scales. Thus, these island fox subspecies are no longer in danger of extinction throughout all of their ranges, nor are they likely to become so within the foreseeable future.

Significant Portion of the Range

Having determined that the San Miguel, Santa Rosa, and Santa Cruz Island foxes are not in danger of extinction, or likely to become so, throughout all of their ranges, we next consider whether there are any significant portions of their ranges in which the island foxes are in danger of extinction or likely to become so. Under the Act and our implementing regulations, a species may warrant listing if it is an endangered species or a threatened species. The Act defines “endangered species” as any species which is “in danger of extinction throughout all or a significant portion of its range,” and “threatened species” as any species which is “likely to become an endangered species within the foreseeable future throughout all or a significant portion of its range.” The term “species” includes “any subspecies of fish or wildlife or plants, and any distinct population segment [DPS] of any species of vertebrate fish or wildlife which interbreeds when mature.” On July 1, 2014, we published a final policy interpreting the phrase “significant portion of its range” (SPR) (79 FR 37578). The final policy states that (1) if a species is found to be endangered or threatened throughout a significant portion of its range, the entire species is listed as an endangered species or a threatened species, respectively, and the Act’s protections apply to all individuals of the species wherever found; (2) a portion of the range of a species is “significant” if the species is not currently endangered or

threatened throughout all of its range, but the portion’s contribution to the viability of the species is so important that, without the members in that portion, the species would be in danger of extinction, or likely to become so in the foreseeable future, throughout all of its range; (3) the range of a species is considered to be the general geographical area within which that species can be found at the time the Service or the National Marine Fisheries Service makes any particular status determination; and (4) if a vertebrate species is endangered or threatened throughout an SPR, and the population in that significant portion is a valid DPS, we will list the DPS rather than the entire taxonomic species or subspecies.

The SPR policy is applied to all status determinations, including analyses for the purposes of making listing, delisting, and reclassification determinations. The procedure for analyzing whether any portion is an SPR is similar, regardless of the type of status determination we are making. The first step in our analysis of the status of a species is to determine its status throughout all of its range. If we determine that the species is in danger of extinction, or likely to become so in the foreseeable future, throughout all of its range, we list the species as an endangered (or threatened) species and no SPR analysis will be required. Because we are reclassifying the listing status of the Santa Catalina Island fox as a threatened species under the Act (see *Santa Catalina Island Fox*, below), we are not conducting an SPR analysis for this subspecies. If the species is neither endangered nor threatened throughout all of its range, we determine whether the species is endangered or threatened throughout a significant portion of its range. If it is, we list the species as an endangered species or a threatened species, respectively; if it is not, we conclude that the species is neither an endangered species nor a threatened species.

When we conduct an SPR analysis, we first identify any portions of the species’ range that warrant further consideration. The range of a species can theoretically be divided into portions in an infinite number of ways. However, there is no purpose to analyzing portions of the range that are not reasonably likely to be significant and either endangered or threatened. To identify only those portions that warrant further consideration, we determine whether there is substantial information indicating that (1) the portions may be significant and (2) the species may be in danger of extinction in those portions or likely to become so within the

foreseeable future. We emphasize that answering these questions in the affirmative is not a determination that the species is endangered or threatened throughout a significant portion of its range—rather, it is a step in determining whether a more detailed analysis of the issue is required. In practice, a key part of this analysis is whether the threats are geographically concentrated in some way. If the threats to the species are affecting it uniformly throughout its range, no portion is likely to warrant further consideration. Moreover, if any concentration of threats apply only to portions of the range that clearly do not meet the biologically based definition of “significant” (*i.e.*, the loss of that portion clearly would not be expected to increase the vulnerability to extinction of the entire species), those portions will not warrant further consideration.

If we identify any portions that may be both (1) significant and (2) endangered or threatened, we engage in a more detailed analysis. As discussed above, to determine whether a portion of the range of a species is significant, we consider whether, under a hypothetical scenario, the portion’s contribution to the viability of the species is so important that, without the members in that portion, the species would be in danger of extinction or likely to become so in the foreseeable future throughout all of its range. This analysis considers the contribution of that portion to the viability of the species based on the conservation biology principles of redundancy, resiliency, and representation. (These concepts can similarly be expressed in terms of abundance, spatial distribution, productivity, and diversity.) The identification of an SPR does not create a presumption, prejudgment, or other determination as to whether the species in that identified SPR is in danger of extinction or likely to become so. We must go through a separate analysis to determine whether the species is in danger of extinction or likely to become so in the SPR. To determine whether a species is endangered or threatened throughout an SPR, we will use the same standards and methodology that we use to determine if a species is endangered or threatened throughout its range.

Depending on the biology of the species, its range, and the threats it faces, it may be more efficient to address either the significance question first, or the status question first. Thus, if we determine that a portion of the range is not “significant,” we do not need to determine whether the species is endangered or threatened there; if we determine that the species is not

endangered or threatened in a portion of its range, we do not need to determine if that portion is “significant.”

Applying the process described above, we evaluated the respective ranges of the San Miguel Island fox, Santa Rosa Island fox, and Santa Cruz Island fox to determine if any area could be considered a significant portion of any one of the subspecies’ ranges. As mentioned above, one way to identify portions for further analyses is to identify areas that may be significant, such as any natural divisions within the range that might be of individual biological or conservation importance to the species. We conducted our review based on examination of the recovery plan (Service 2015; entire) and other relevant and more recent information on the biology and life history of the northern Channel Island foxes. Because each of the three northern Channel Island fox subspecies is a narrow endemic where the foxes on each island constitute a single population, we determined that there are no natural divisions or separate areas of the range of each subspecies that contribute separately to the conservation of that particular subspecies. In other words, for each subspecies of island fox, there is only one biologically defined portion, and there are no notably separate or distinct portions that contribute independently to the conservation (*i.e.*, to the redundancy, resiliency, and representation) of the species. We also examined whether any portions might be endangered or threatened by examining whether threats might be geographically concentrated in some way. Although some of the factors we evaluated under Summary of Factors Affecting the Species, above, may continue to affect each of the subspecies, the factors affecting island foxes generally occur at similarly low levels throughout each of their ranges. The entire population of each subspecies is equally affected by threats and by the amelioration of such threats throughout their ranges. Based on our evaluation of the biology of the subspecies and current and potential threats to the island foxes, we conclude that no portion of the ranges of the three subspecies of the northern Channel Islands foxes warrants further consideration to determine if it is significant. In other words, threats have been sufficiently ameliorated, and all individuals and all portions of the range of each subspecies interact to such an extent that it is not reasonable to conclude that any portion of the range can have a different status than any other portion.

We have carefully assessed the best scientific and commercial data available and determined that the San Miguel Island fox, Santa Rosa Island fox, and Santa Cruz Island fox are no longer in danger of extinction throughout all or significant portions of their ranges, nor are they likely to become so within the foreseeable future. As a consequence of this determination, we are removing the San Miguel, Santa Rosa, and Santa Cruz Island fox from the Federal List of Endangered and Threatened Wildlife.

Santa Catalina Island Fox

The Santa Catalina Island fox exhibits demographic characteristics consistent with long-term viability. The population has continued to increase over the past 11 years, reaching an estimated high of 1,852 individuals in 2013 (King and Duncan 2015, p. 11), then dropping slightly to 1,812 in 2015 (King and Duncan 2016, p. 10). Population viability analysis indicates the Santa Catalina Island fox population has an acceptably small risk of extinction—less than 5 percent since 2008. With population levels consistent with long-term viability, the intent of recovery objective 1 has been met for the Santa Catalina Island fox. However, objective 2 has not been met because we do not have assurance that the monitoring and management as prescribed in the epidemic response plan for Santa Catalina Island foxes will be funded and implemented in the future to ensure that the threat of disease continues to be managed. While population levels are currently consistent with long-term viability (indicating that the subspecies is no longer currently in danger of extinction), lack of adequate control of potential vectors along with lack of assured long-term monitoring could allow for lapses in management and monitoring and reemergence of disease that may cause epidemics and population declines before they can be detected and acted upon. We coordinated with CIC to determine their ability to enter into an agreement to provide assurances for long-term funding and a commitment for long-term implementation of the epidemic response plan. Though we do not have assurances of long-term funding that would allow them to commit to long-term implementation of the epidemic response plan, we recognize that CIC’s efforts have significantly contributed to a reduction of impacts to the Santa Catalina Island fox and its habitat. As a result, we have determined that the Santa Catalina Island fox is no longer in danger of extinction throughout all of its range, but instead is threatened with becoming endangered in the foreseeable

future throughout all of its range. Therefore, we are reclassifying the status of the Santa Catalina Island fox from an endangered species to a threatened species. Because we have determined the Santa Catalina Island fox is likely to become an endangered species in the foreseeable future throughout all of its range, no portion of its range can be significant for purposes of the definitions of endangered species or threatened species (see 79 FR 37578; July 1, 2014) (also see Significant Portion of the Range, above).

Critical Habitat

Section 4(a)(3)(A) of the Act, as amended, and implementing regulations (50 CFR 424.12) require that we designate critical habitat, to the maximum extent prudent and determinable, at the time a species is listed as endangered or threatened.

On November 9, 2005 (70 FR 67924), we determined that habitat on Santa Catalina Island (as well as the other three islands occupied by the island fox described herein) did not meet the definition of critical habitat under the Act. We made this determination based on the island fox being a generalist in all aspects of its life history. We stated that foxes are opportunistic omnivores that eat a wide variety of plants and animals in whatever habitat they use, and as such, they use all habitat available on each of the islands (70 FR 67927). We were not aware at that time nor are we aware currently of any existing or anticipated threats to Santa Catalina Island habitats that would likely affect the Santa Catalina Island fox. Accordingly, we continue to conclude that there is no information to support a conclusion that any specific habitat on Santa Catalina Island is essential to the conservation of the Santa Catalina Island fox. Thus, we do not find any habitat on Santa Catalina Island that meets the definition of critical habitat in section 3(5)(A) of the Act. Because there continues to be no habitat that meets the definition of critical habitat for the Santa Catalina Island fox, there is none to designate.

Effects of This Rule

This final rule revises 50 CFR 17.11(h) by removing the San Miguel Island fox, Santa Rosa Island fox, and Santa Cruz Island fox from the Federal List of Endangered and Threatened Wildlife. The prohibitions and conservation measures provided by the Act, particularly through sections 7 and 9, no longer apply to these subspecies. Federal agencies are no longer required to consult with the Service under section 7 of the Act in to ensure that any

action they authorize, fund, or carry out is not likely to jeopardize the continued existence of these subspecies.

This rule also revises 50 CFR 17.11(h) to reclassify the Santa Catalina Island fox from an endangered species to a threatened species on the Federal List of Endangered and Threatened Wildlife. However, this reclassification does not change the protection afforded to this subspecies under the Act. Anyone taking, attempting to take, or otherwise possessing this species, or parts thereof, in violation of section 9 of the Act or its implementing regulations, is subject to a penalty under section 11 of the Act. Pursuant to section 7 of the Act, Federal agencies must ensure that any actions they authorize, fund, or carry out are not likely to jeopardize the continued existence of the Santa Catalina Island fox. Whenever a species is listed as threatened, the Act allows promulgation of special rules under section 4(d) that modify the standard protections for threatened species found under section 9 of the Act and Service regulations at 50 CFR 17.31 (for wildlife) and 17.71 (for plants), when it is deemed necessary and advisable to provide for the conservation of the species. No special section 4(d) rules are proposed, or anticipated to be proposed, for Santa Catalina Island fox, because there is currently no conservation need to do so for this subspecies. Recovery actions directed at Santa Catalina Island fox will continue to be implemented, as funding allows, as outlined in the recovery plan for this species (Service 2015, entire).

Future Conservation Measures

Section 4(g)(1) of the Act requires us, in cooperation with the States, to implement a monitoring program for not less than 5 years for all species that have been recovered and delisted. The purpose of this post-delisting monitoring (PDM) is to verify that a species remains secure from risk of extinction after the protections of the Act are removed, by developing a program that detects the failure of any delisted species to sustain itself. If, at any time during the monitoring period, data indicate that protective status under the Act should be reinstated, we can initiate listing procedures, including, if appropriate, emergency listing under section 4(b)(7) of the Act.

Post-Delisting Monitoring Plan

NPS and TNC have agreed to partner with us in the implementation of the post-delisting monitoring for the northern Channel Island foxes. The post-delisting monitoring is designed to verify that San Miguel, Santa Rosa, and

Santa Cruz Island foxes remain secure from risk of extinction after their removal from the Federal List of Endangered and Threatened Wildlife by detecting changes in population trend and mortality/survival. Post-delisting monitoring for the northern Channel Island fox subspecies will be conducted as recommended in the epidemic response plan for northern Channel Island foxes (Hudgens *et al.* 2013, entire) and golden eagle management strategy (NPS 2015a, entire). These documents are available on the Internet at <https://www.regulations.gov> at Docket No. FWS-R8-ES-2015-0170, and the Ventura Fish and Wildlife Office's Web site at <http://www.fws.gov/Ventura/>.

Although the Act has a minimum post-delisting monitoring requirement of 5 years, the post-delisting monitoring plan for northern Channel Island foxes includes a 10-year monitoring period to account for environmental variability (for example, extended drought) that may affect fox populations and to document the range of population fluctuation as fox populations reach carrying capacity. If a decline in abundance is observed or a substantial new threat arises, post-delisting monitoring may be extended or modified as described below.

Island foxes will be monitored for both population size and trend, and for annual survival and cause-specific mortality, as specified by the epidemic response plan for northern Channel island foxes (Hudgens *et al.* 2013, entire) and the golden eagle management strategy (NPS 2015a, entire). Monitoring as recommended in these plans is currently being implemented. Population size and trend are estimated using capture-mark-recapture data from trapping foxes on grids (Rubin *et al.* 2007, p. 2–1; Coonan 2014, p. 2). Such monitoring has been implemented for island foxes since the late 1980s. The monitoring provides a continuous record of population fluctuation, including decline and recovery, upon which population viability analysis was used to develop island fox demographic recovery objectives (Bakker and Doak 2009, entire; Bakker *et al.* 2009, entire).

Annual survival and cause-specific mortality of island foxes will be monitored, as they are now, via tracking of radio-collared foxes. Mortality checks will be conducted weekly on radio-collared foxes, and necropsies will be conducted on fox carcasses to determine the cause of mortality. A sample of at least 40 radio-collared foxes is maintained on each island, as that is the number of monitored foxes determined to be necessary to detect an annual

predation rate of 2.5 percent (Rubin *et al.* 2007, p. 2–20). This level of radio-telemetry monitoring is part of the epidemic response plan and the golden eagle management strategy for island foxes on the northern Channel Islands (Hudgens *et al.* 2013, pp. 7–11).

In cooperation with NPS and TNC, we will annually review the results of monitoring, which include annual estimated adult population size, annual adult survival, and identified causes of mortality. If there are apparent sharp declines in population size or survival, or if the information indicates the appearance of significant mortality causes, the data will be reviewed by the Island Fox Conservation Working Group for evaluation and assessment of threat level. Monitoring results may also reach thresholds which precipitate increased monitoring or implementation of management actions, as specified in the epidemic response plan and golden eagle management strategy. At the end of the 10-year post-delisting monitoring period, NPS, TNC, and the Service will determine whether monitoring should continue beyond the 10-year monitoring period.

Summary of Comments and Recommendations

In the proposed rule published on February 16, 2016 (81 FR 7723) in the **Federal Register**, we requested that all interested parties submit written comments on the proposal by April 18, 2016. We also contacted appropriate Federal and State agencies, Tribal entities, scientific experts and organizations, and other interested parties and invited them to comment on the proposal. We did not receive any requests for a public hearing. All substantive information provided during comment periods has either been incorporated directly into this final determination or is addressed below.

Peer Reviewer Comments

In accordance with our peer review policy published on July 1, 1994 (59 FR 34270), we solicited expert opinion from three knowledgeable individuals with scientific expertise that included familiarity with the island fox and its habitat, biological needs, and threats. We received responses from all three of the peer reviewers.

We reviewed all comments we received from the peer reviewers for substantive issues and new information regarding the status of the island fox. The peer reviewers generally concurred with our methods and conclusions, and provided new information and suggestions to improve the final rule. This information has been incorporated

into the final rule as appropriate. The peer reviewer comments are addressed in the following summary.

Comments From Peer Reviewers

(1) *Comment:* Two peer reviewers requested further mention of lack of genetic diversity as an important consideration for island foxes. They stated that numerous studies have now shown that island fox populations lack genetic variation, an outcome of long-term small population sizes and bottlenecks, coupled with the pervasive effects of genetic drift. The peer reviewers stated that although the threats to island fox populations on the northern Channel Islands have either been reduced or addressed and the populations have recovered to approximately historic levels, the various subspecies lack genetic variation, which could compromise their ability to respond to future environmental change if managers do not respond to a potential decline in a timely manner.

Our Response: We included the relevant scientific information presented by the peer reviewers related to lack of genetic variation in this final rule. We anticipate that ongoing monitoring and management as described in signed CMAs with NPS and TNC (Service and NPS 2015; Service and TNC 2015) will detect any significant changes in population health and allow for management responses, including possible relisting. If a decline is detected, we will act in concert with NPS and TNC in an expedient manner to uncover the agent of the decline and implement timely recovery actions as laid out in the golden eagle management strategy and epidemic response plans (Hudgens *et al.* 2013, entire; NPS 2015a, entire).

(2) *Comment:* One peer reviewer requested more information about evaluation of recovery objective 1 and recovery criteria E/1. In particular, the peer reviewer asked if demographic characteristics included measures of genetic characteristics, as the same standards should not apply to populations that have lost much of their genetic variation.

Our Response: Recovery objective 1 is that each federally listed subspecies of island fox exhibits demographic characteristics consistent with long-term viability. Recovery objective 1 is achieved when recovery criteria E/1 is met: an island fox subspecies has no more than 5 percent risk of quasi-extinction over a 50-year period; recovery criteria E/1 has been met. Recovery criteria E/1 is evaluated for each species using population viability

models presented in Bakker *et al.* (2009) and appendix 2 of the recovery plan (Service 2015, pp. 135–140) that incorporate demographic information for each subspecies of island fox, which are influenced by genetics and the environment. Genetic variation is not one of the demographic characters that is measured, although we recognize that genetic variation has an influence on demographic characters.

(3) *Comment:* One peer reviewer asked how the quasi-extinction number of 30 individuals was derived. The peer reviewer asserted that if extreme bottleneck events have occurred, it is highly possible that quasi-extinction levels of 30 individuals are not appropriate, and numbers this low could essentially extirpate any genetic variation left in the population.

Our Response: Because short- to medium-term risk analysis is most important for island fox management, Bakker *et al.* (2009) ran each simulation for 50 years and used a quasi-extinction threshold of 30 foxes, set by the Service's island fox Recovery Team to further account for unidentified biological and sociopolitical uncertainties (Bakker *et al.* 2009, p. 92). We concur with the quasi-extinction level determined by the scientists on the island fox Recovery Team. However, we note that monitoring and management is designed to intervene well before a species would reach a quasi-extinction threshold. Quasi-extinction is not the threshold for action; rather, triggers for action would be if monitoring results indicate a sharp decline in population size or survival or the appearance of a significant mortality source. The intent is to avoid the quasi-extinction threshold by a wide margin by managing for a low risk of reaching such a threshold over a fairly long period of time.

(4) *Comment:* One peer reviewer asked what it would take to delist the Santa Catalina Island subspecies.

Our Response: The best available scientific data for Santa Catalina Island suggest that while Santa Catalina Island fox populations have increased to self-sustaining levels, potential disease epidemic remains an ongoing threat. Once disease and disease risk are controlled and managed to the point they are no longer a threat to the subspecies, and assuming no other stressors are resulting in significant impacts at either the population or rangewide scales, the Santa Catalina Island fox could be removed from the Federal List of Endangered and Threatened Wildlife (that is, delisted). Controlling the threat of disease would include assurances of long-term

implementation of the epidemic response plan for Santa Catalina Island, which is currently being implemented by CIC. We coordinated with CIC to determine their ability to enter into an agreement to provide assurances, and they indicated they are currently unable to provide assurances for long-term funding and management. Though we do not have assurances of long-term funding that would allow them to commit to long-term implementation of the epidemic response plan, we recognize that CIC's efforts have significantly contributed to a reduction of impacts to the Santa Catalina Island fox and its habitat.

Public Comments

We requested written comments from the public on the proposed rule. To that end, we specifically sought comments concerning: (1) Additional information on the distribution, population size, and population trends of the San Miguel, Santa Rosa, Santa Cruz, and Santa Catalina Island foxes; (2) relevant information concerning any current or likely future threats (or lack thereof) to the island foxes; (3) current or planned activities within the range of the island foxes and their possible impacts; (4) regional climate change models and whether they are reliable and credible to use in assessing the effects of climate change on the island foxes and their habitats; and (5) our draft post-delisting monitoring plan.

During the open comment period, which closed on April 18, 2016, we received 10 comment letters from organizations or individuals directly addressing the proposed removal of the San Miguel, Santa Rosa, and Santa Cruz Island fox from the Federal List of Endangered and Threatened Wildlife, or reclassification of the Santa Catalina Island fox from an endangered to a threatened species. Seven of these letters opposed the proposal, and three provided support. Two of these letters provided substantive comments (beyond a succinct expression of agreement or opposition) on the proposed rule, one of which supported and one of which opposed our proposal. Substantive information has been incorporated into the final rule as appropriate. The public comments are addressed in the following summary.

Comments From the Public

(5) *Comment:* One commenter suggested we conduct a more detailed analysis of the effects of global climate change and that we hold public meetings to develop a response plan for climate change.

Our Response: We incorporated additional information into the climate change discussion in this rule based on new information that was provided by the peer reviewers. While we cannot accurately predict the effects of climate change on island fox subspecies, because the foxes are generalists and exhibit plasticity with regards to prey and habitat use, we do not expect negative effects of such magnitude that would result in significant impacts at either the population or rangewide scales (e.g., cause major population declines). However, we anticipate ongoing monitoring and management will detect any significant changes in population health and allow for management responses, including possible relisting; therefore, public meetings to develop a response plan were not planned.

(6) *Comment:* One commenter expressed concern that if the northern Channel Islands subspecies are delisted, the disease and predator management programs may potentially be defunded.

Our Response: The post-delisting monitoring is designed to verify that northern Channel Island foxes remain secure from risk of extinction after their removal from the Federal List of Endangered and Threatened Wildlife by detecting changes in population trend and mortality/survival. Post-delisting monitoring for the northern Channel Island fox subspecies will be conducted as recommended in the epidemic response plan for northern Channel Island foxes (Hudgens *et al.* 2013, entire) and golden eagle management strategy (NPS 2015a, entire). Funding and implementation of post-delisting monitoring is assured for 10 years by signed CMAs between the Service, NPS, and TNC (Service and NPS 2015; Service and TNC 2015). At the end of the 10-year post-delisting monitoring period, the Service, NPS, and TNC will determine whether monitoring should continue beyond the 10-year monitoring period. In addition, NPS identified island foxes as an ecosystem element for which they will conduct long-term annual population monitoring as part of Channel Island National Park's long-term ecological monitoring program, regardless of their status under the Act.

(7) *Comment:* One commenter stated that the San Miguel Island fox population declined from 581 individuals in 2011 (Coonan and Guglielmino 2011, p. 14) to 538 individuals in 2012 (Coonan 2013, p. 10), despite the high number of pups caught and low number of known mortalities. The commenter questioned the 2015 data presented in the proposed rule, which indicate that the San Miguel

Island population rose by approximately 200 from 2014, despite less than a quarter of the number of captured pups compared to 2012 and more than triple the number of known mortalities. The commenter also pointed out that Santa Rosa Island foxes have yet to meet their carrying capacity, and so, given that population's limited size, delisting is inappropriate at this time.

Our Response: The population estimates presented in this rule for the San Miguel Island fox are based on the best available scientific information as reported to the Service by NPS. San Miguel Island fox population estimates for the total population (both adults and juveniles) reveal that the subspecies has hovered around at least 550 foxes since 2010, and this likely represents carrying capacity for that island (Coonan 2014, p. 8). This is supported by the general decline in reproductive effort as the population has increased. On the San Miguel Island monitoring grids, only three pups were caught in 2013 and 2014, and only seven were caught in 2015, compared to 32 caught in 2012 (Guglielmino and Coonan 2016, p. 13). The low reproductive output is likely due both to high fox density and extended drought. Even given this, the overall combination of low mortality and robust population growth continues to put the San Miguel Island fox subspecies at acceptably low risk of extinction, according to population viability analyses (Guglielmino and Coonan 2016, p. 17). The San Miguel population reached this level of acceptable extinction risk in 2009, and even recent mortality due to drought has not moved the population away from acceptable extinction risk.

Santa Rosa Island foxes have likely not reached carrying capacity. Carrying capacity is not a threshold for recovery or for healthy populations; rather, carrying capacity is the maximum number of individuals that the habitat can support. Most populations function below that threshold and still exhibit demographic characteristics for healthy, stable populations. Populations do not need to be at carrying capacity to have stable or increasing demographics consistent with long-term viability. On Santa Rosa Island, significant mortality during the early phase of reintroduction and again in 2010 prevented the Santa Rosa subspecies from attaining the level of biological recovery that the San Miguel and Santa Cruz Islands subspecies had attained by 2013. However, the predicted extinction risk (over the next 50 years) has been less than 5 percent since 2011 for Santa Rosa Island (Guglielmino and Coonan 2016, p. 22). As of 2015, all Roosevelt elk and

mule deer have been removed from Santa Rosa Island, and the island fox population has increased to greater than 1,200 foxes (Coonan 2015b, pers. comm.; Guglielmino and Coonan 2016, p. 18). With the golden eagle management strategy in place, complete removal of golden eagles and their nonnative prey-base from the northern Channel Islands, development and implementation of an epidemic response plan, and population levels consistent with long-term viability, the intent of recovery objectives 1 and 2, and the associated recovery criteria, are met for the San Miguel, Santa Rosa, and Santa Cruz Island foxes.

(8) *Comment:* One commenter presented information on Acanthocephalan parasites, which affect the gut of island foxes. The commenter stated that Acanthocephalans have been identified as a factor in the deaths of over 20 island foxes since 2013. In addition, the commenter pointed out that most of the foxes on San Miguel Island have become increasingly underweight and probably infected. The commenter expressed that the effect this parasite could have on the San Miguel population of island foxes is significant and there is too little information on this significant issue to proceed with the proposed delisting.

Our Response: In 2013, necropsies of five radio-collared San Miguel Island foxes revealed substantial, and in several cases massive, parasitism by an unidentified Acanthocephalan (spiny-headed) parasite in the intestines (Coonan *et al.* 2014b, pp. 11, 12). Six of the 16 mortalities in 2014 through June 2015 had infection by an Acanthocephalan parasite, as did five in 2013 (Coonan 2015b, pp. 7, 8). The parasite burdens were associated with one or a combination of colitis, enteritis, and emaciation, and likely contributed to mortality of the individuals, but have not yet been determined as the cause of mortality (Coonan 2015b, p. 2). In 2015, the Island Fox Health Working Group discussed the impact of Acanthocephalans to island foxes on San Miguel Island and determined that no specific management action or treatment is recommended at this time, as cases are continuing, but do not appear to be increasing or causing a population decline (Coonan 2015b, p. 15). Continued monitoring of mortality causes will determine whether the parasite is a significant mortality source for San Miguel foxes, and requires management. Thus, at this time, the best available data indicate that although potential impacts from Acanthocephalan parasites may be impacting San Miguel Island fox

individuals, there are no significant impacts at the population scale such that this parasite would be considered a threat to the subspecies. We anticipate that ongoing monitoring and management as described in signed CMAs with NPS and TNC (Service and NPS 2015; Service and TNC 2015) will detect any significant changes in population health and allow for management responses, including listing in the future if warranted.

(9) *Comment:* One commenter presented information that the San Miguel Island fox population is aging and that there are problems in reproduction or survival of pups. Information was presented by the commenter that 73 percent of the collared foxes are 4 to 10 years old, while 47 percent are 6 to 10 years old. Only 27 percent of these foxes are young animals of 1 to 3 years old, which reflects 3 consecutive years of poor recruitment for the population, signifying poor birth years or poor pup survival. The commenter stated that such an age structure puts this population at risk, particularly given the small size of the population, dry climate, parasite issue, and low genetic diversity among the San Miguel Island foxes.

Our Response: Population estimates for the total San Miguel Island fox population (both adults and juveniles) reveal that it has hovered around 550 foxes since 2010, and this likely represents carrying capacity for the island (Coonan 2014, p. 8). This is supported by the general decline in reproductive effort as the population has increased. During annual monitoring efforts, only three pups were caught in 2013 and 2014, and only seven were caught in 2015, compared to 32 caught in 2012 (Guglielmino and Coonan 2016, p. 13). The low reproductive output is likely due both to high fox density and extended drought, and is to be expected as the population hovers around carrying capacity and

responds to extended drought. This does not in and of itself constitute a threat to the San Miguel Island fox population, and low reproductive effort has not been identified as a current threat to any island fox population.

The combination of low mortality and the population at likely carrying capacity (*i.e.*, 550 foxes since 2010 (Coonan 2014, p. 8)) puts the San Miguel Island fox subspecies at acceptably low risk of extinction, according to population viability analyses (Guglielmino and Coonan 2016, p. 17). We anticipate that ongoing monitoring and management as described in signed CMAs with NPS and TNC (Service and NPS 2015; Service and TNC 2015) will detect any significant changes in population health and allow for management responses, including listing in the future if warranted. If a significant decline is detected, we will act in concert with NPS and TNC in an expedient manner to uncover the agent of the decline and implement timely recovery actions as laid out in the golden eagle management strategy and epidemic response plans (Hudgens *et al.* 2013, entire; NPS 2015a, entire).

Required Determinations

National Environmental Policy Act (42 U.S.C. 4321 et seq.)

We have determined that environmental assessments and environmental impact statements, as defined under the authority of the National Environmental Policy Act, need not be prepared in connection with listing, delisting, or reclassification of a species as an endangered or threatened species under the Endangered Species Act. We published a notice outlining our reasons for this determination in the **Federal Register** on October 25, 1983 (48 FR 49244).

References Cited

A complete list of references cited in this rulemaking is available on the

Internet at <http://www.regulations.gov> under Docket No. FWS-R8-ES-2015-0170 or upon request from the Ventura Fish and Wildlife Office (see **FOR FURTHER INFORMATION CONTACT**).

Authors

The primary authors of this final rule are staff members of the Ventura Fish and Wildlife Office in Ventura, California, in coordination with the Pacific Southwest Regional Office in Sacramento, California, and the Carlsbad Fish and Wildlife Office in Carlsbad, California.

List of Subjects in 50 CFR Part 17

Endangered and threatened species, Exports, Imports, Reporting and recordkeeping requirements, Transportation.

Regulation Promulgation

Accordingly, we amend part 17, subchapter B of chapter I, title 50 of the Code of Federal Regulations, as set forth below:

PART 17—ENDANGERED AND THREATENED WILDLIFE AND PLANTS

■ 1. The authority citation for part 17 continues to read as follows:

Authority: 16 U.S.C. 1361–1407; 1531–1544; 4201–4245, unless otherwise noted.

■ 2. Amend § 17.11(h), the List of Endangered and Threatened Wildlife, under MAMMALS, by:

■ a. Removing the entries for “Fox, San Miguel Island”, “Fox, Santa Cruz Island”, and “Fox, Santa Rosa Island”; and

■ b. Revising the entry for “Fox, Santa Catalina Island”.

The revision reads as follows:

§ 17.11 Endangered and threatened wildlife.

7 CFR Part 319

[Docket No. APHIS-2015-0091]

RIN 0579-AE24

Importation of Orchids in Growing Media From the Republic of Korea Into the Continental United States

AGENCY: Animal and Plant Health Inspection Service, Department of Agriculture.

ACTION: Proposed rule.

SUMMARY: We are proposing to amend the regulations governing the importation of plants for planting to add orchid plants of the genera *Phalaenopsis* and *Cymbidium* from the Republic of Korea to the list of plants that may be imported into the continental United States in an approved growing medium, subject to specified growing, inspection, and certification requirements. We are taking this action in response to a request from the Republic of Korea and after determining that the plants could be imported under certain conditions, without resulting in the introduction into, or the dissemination within, the United States of a plant pest or noxious weed.

DATES: We will consider all comments that we receive on or before October 11, 2016.

ADDRESSES: You may submit comments by either of the following methods:

- *Federal eRulemaking Portal:* Go to <http://www.regulations.gov/>

- *Postal Mail/Commercial Delivery:* Send your comment to Docket No. APHIS-2015-0091, Regulatory Analysis and Development, PPD, APHIS, Station 3A-03.8, 4700 River Road, Unit 118, Riverdale, MD 20737-1238.

Supporting documents and any comments we receive on this docket may be viewed at <http://www.regulations.gov/>

#!/docketDetail;D=APHIS-2015-0091 or in our reading room, which is located in Room 1141 of the USDA South Building, 14th Street and Independence Avenue SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 799-7039 before coming.

FOR FURTHER INFORMATION CONTACT: Mr. William Aley, Senior Regulatory Specialist, Plants for Planting Policy, PPQ, APHIS, 4700 River Road, Unit 133, Riverdale, MD 20737; (301) 851-2130.

SUPPLEMENTARY INFORMATION:

Background

The regulations in 7 CFR part 319 prohibit or restrict the importation into the United States of certain plants and plant products into the United States to prevent the introduction of plant pests and noxious weeds. The regulations in “Subpart—Plants for Planting,” §§ 319.37 through 319.37-14 (referred to below as the regulations) contain, among other things, prohibitions and restrictions on the importation of plants, plant parts, and seeds for propagation.

Paragraph (a) of § 319.37-8 of the regulations requires, with certain exceptions, that plants offered for importation into the United States be free of sand, soil, earth, and other growing media. This requirement is intended to help prevent the introduction of plant pests that might be present in the growing media; the exceptions to the requirement take into account factors that mitigate that plant pest risk. Those exceptions, which are found in paragraphs (b) through (e) of § 319.37-8, consider either the origin of the plants and growing media (paragraph (b)), the nature of the growing media (paragraphs (c) and (d)), or the use of a combination of growing conditions, approved media, inspections, and other requirements (paragraph (e)).

Paragraph (e) of § 319.37-8 provides conditions under which certain plants established in growing media may be imported into the United States. In addition to specifying the types of plants that may be imported, § 319.37-8(e) also:

- Specifies the types of growing media that may be used;
- Requires plants to be grown in accordance with written agreements

between the Animal and Plant Health Inspection Service (APHIS) and the national plant protection organization (NPPO) of the country where the plants are grown and between the foreign NPPO and the grower;

- Requires the plants to be rooted and grown in a greenhouse that meets certain requirements for pest exclusion and that is used only for plants being grown in compliance with § 319.37-8(e);

- Restricts the source of the seeds or parent plants used to produce the plants, and requires grow-out or treatment of parent plants imported into the exporting country from another country;

- Specifies the sources of water that may be used on the plants, the height of the benches on which the plants must be grown, and the conditions under which the plants must be stored and packaged; and

- Requires that the plants be inspected in the greenhouse and found free of evidence of plant pests no more than 30 days prior to the exportation of the plants.

A phytosanitary certificate issued by the NPPO of the country in which the plants were grown that declares that the above conditions have been met, must accompany the plants at the time of importation. These conditions have been used successfully to mitigate the risk of pest introduction associated with the importation into the United States of approved plants established in growing media.

Currently, orchid plants of the genera *Cymbidium* and *Phalaenopsis* may only be imported into the United States from the Republic of Korea as bare root plants, in accordance with § 319.37-2. The NPPO of the Republic of Korea has requested that importation into the United States of those plants in growing media be allowed under the provisions of § 319.37-8.

The regulations in § 319.37-8(g) provide that requests such as the one made by the NPPO of the Republic of Korea be evaluated by APHIS using a pest risk assessment (PRA) that uses specific pest risk evaluation standards that are based on pest risk analysis guidelines established by the International Plant Protection Convention of the United Nations' Food and Agriculture Organization. Such analyses are conducted to determine the

plant pest risks associated with each requested plant article and to determine whether or not APHIS should propose to allow the requested plant article established in growing media to be imported into the United States. In accordance with § 319.37–8(g), APHIS has conducted the required PRA, which can be viewed online on the *Regulations.gov* Web site or in our reading room (see **ADDRESSES** above for instructions for accessing *Regulations.gov*).

In the PRA, titled “Importation of *Cymbidium* spp. and *Phalaenopsis* spp. Orchid Plants in Approved Growing Media from Republic of Korea into the Continental United States,” APHIS identified that six quarantine pests present in the Republic of Korea could potentially follow the import pathway:

Moths

- *Spodoptera litura* (Fabricius)
- *Dichromothrips smithi* (Zimmermann)
- *Thrips palmi* (Karny)
- *Pseudococcus dendrobiorum* (Williams)

Slug

- *Deroceras varians* (Adams)

Fungi

- *Colletotrichum boninense* (Moriwaki)

The PRA identified *P. dendrobiorum* as having a medium pest risk potential of following the pathway on *Cymbidium* spp. and *Phalaenopsis* plants from the Republic of Korea. The remaining five plant pests (*S. litura*, *D. smithi*, *T. palmi*, *D. varians*, and *C. boninense*) were rated as having a high pest risk potential.

However, the PRA acknowledged that the risk presented by these plant pests is consistent with pests associated with any propagative orchid materials. Further, it is important to note that those plant pest risks are present in the absence of the mitigative effects of the requirements in § 319.37–8(e), which are designed to establish and maintain a pest-free production environment and ensure the use of pest-free seeds or parent plants. Given that, the risk management document (RMD) concluded that the safeguards in § 319.37–8(e) would allow the safe importation of *Cymbidium* spp. and *Phalaenopsis* spp. plants from the Republic of Korea provided that the plants are established in an approved growing medium and meet all other applicable conditions of § 319.37–8(e). Based on the findings of the PRA and RMD, we have determined that the application of the measures required under § 319.37–8(e) will prevent the

introduction or dissemination of plant pests into the United States.

Accordingly, we are proposing to amend the regulations in § 319.37–8(e) by adding *Cymbidium* spp. and *Phalaenopsis* spp. plants from the Republic of Korea to the list of plants established in an approved growing medium that may be imported into the United States. The plants would have to be produced, handled, and imported in accordance with the requirements of § 319.37–8(e) and be accompanied at the time of importation by a phytosanitary certificate issued by the NPPO of the Republic of Korea that declares that those requirements have been met.

Executive Order 12866 and Regulatory Flexibility Act

This proposed rule has been determined to be not significant for the purposes of Executive Order 12866 and, therefore, has not been reviewed by the Office of Management and Budget.

In accordance with the Regulatory Flexibility Act, we have analyzed the potential economic effects of this action on small entities. The analysis is summarized below. Copies of the full analysis are available by contacting the person listed under **FOR FURTHER INFORMATION CONTACT** or on the *Regulations.gov* Web site (see **ADDRESSES** above for instructions for accessing *Regulations.gov*).

Orchids are the single largest group of potted flowering plants sold in the United States, comprising about \$266 million of the \$788 million in 2014 sales for this industry. In 2014, *Phalaenopsis* spp. comprised 57 percent of orchid sales. Although *Cymbidium* spp. are popular in other parts of the world, the quantity of potted *Cymbidium* spp. sold in the United States is small when compared to other varieties of orchids.

The proposed rule would enable Korean exporters to provide higher-valued, mature potted plants directly to wholesalers and retailers. However, such a scenario is considered unlikely, given the technical challenges and marketing costs incurred when shipping finished plants in pots. A more likely scenario is for the Republic of Korea to export immature plants as bare root plants or in approved growing media to U.S. nurseries to grow and sell as finished plants.

The United States imported more than 6,760 metric tons (MT) of live orchids valued at about \$83 million in 2014, with Taiwan supplying almost 84 percent. The Republic of Korea expects to export to the United States from 2 to 5 million *Phalaenopsis* plants and about 1 million *Cymbidium* plants per year in approved growing media. This

combined number of plants, 3 to 6 million, is estimated to equal more than 2,000 MT to 4,000 MT per year. This amount seems disproportionate to the Republic of Korea's history of orchid exports worldwide, which have declined from 2,936 MT in 2010 to 806 MT in 2014. The Republic of Korea exported only 1.3 MT of bare-rooted orchid plants to the United States in 2014.

We expect the quantity of orchids in approved growing media imported from the Republic of Korea will also be limited because of the U.S. market's competitive environment. Import levels would depend on the ability of Korean producers and exporters to cover their production, transportation, and marketing costs given U.S. market prices. U.S. nurseries that purchased the Korean orchids in approved growing media would benefit from their improved quality and reduced production time in comparison to bare-rooted plants. The proposed rule would increase competition for U.S. producers and importers of immature *Phalaenopsis* spp. and *Cymbidium* spp. plants.

U.S. orchid producers numbered 158 in 2012. Of those producers, it is unknown how many are small entities. Given the relatively small quantity of orchid plants in approved growing media that we expect to be imported from the Republic of Korea, the Administrator of the Animal and Plant Health Inspection Service has determined that this action, if promulgated, will not have a significant economic impact on a substantial number of small entities.

Executive Order 12988

This proposed rule has been reviewed under Executive Order 12988, Civil Justice Reform. If this proposed rule is adopted: (1) All State and local laws and regulations that are inconsistent with this rule will be preempted; (2) no retroactive effect will be given to this rule; and (3) administrative proceedings will not be required before parties may file suit in court challenging this rule.

National Environmental Policy Act

To provide the public with documentation of APHIS' review and analysis of any potential environmental impacts associated with the proposed importation of *Phalaenopsis* spp. and *Cymbidium* spp. orchid varieties from the Republic of Korea into the continental United States, we have prepared an environmental assessment. The environmental assessment was prepared in accordance with: (1) The National Environmental Policy Act of

1969 (NEPA), as amended (42 U.S.C. 4321 *et seq.*), (2) regulations of the Council on Environmental Quality for implementing the procedural provisions of NEPA (40 CFR parts 1500–1508), (3) United States Department of Agriculture (USDA) regulations implementing NEPA (7 CFR part 1b), and (4) APHIS' NEPA Implementing Procedures (7 CFR part 372).

The environmental assessment may be viewed on the *Regulations.gov* Web site or in our reading room. Comments on the environmental assessment can be submitted following the instructions under **ADDRESSES**. (A link to *Regulations.gov* and information on the location and hours of the reading room are provided under the heading **ADDRESSES** at the beginning of this proposed rule.) In addition, copies may be obtained by calling or writing to the individual listed under **FOR FURTHER INFORMATION CONTACT**.

Paperwork Reduction Act

In accordance with section 3507(d) of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), reporting and recordkeeping requirements included in this proposed rule have been submitted for approval to the Office of Management and Budget (OMB). Please send comments on the Information Collection Request (ICR) to OMB's Office of Information and Regulatory Affairs via email to oir_submissions@omb.eop.gov, Attention: Desk Officer for APHIS, Washington, DC 20503. Please state that your comments refer to Docket No. APHIS–2015–0091. Please send a copy of your comments to the USDA using one of the methods described under **ADDRESSES** at the beginning of this document.

APHIS is proposing to amend the regulations governing the importation of plants for planting to add orchid plants of the genera *Phalaenopsis* and *Cymbidium* from the Republic of Korea to the list of plants that can be imported into the continental United States in an approved growing medium, subject to specified growing, inspection, and certification requirements. APHIS is taking this action after determining that the plants could be imported under certain conditions, without resulting in the introduction into, or the dissemination within, the United States of a plant pest or noxious weed.

Adding orchid plants of the genera *Phalaenopsis* and *Cymbidium* from the Republic of Korea to the list of plants that can be imported into the continental United States in growing media will require information collection activities, such as

phytosanitary certificates, written agreements, and inspections.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning these information collection activities. APHIS needs this outside input to help accomplish the following:

(1) Evaluate whether the information collection is necessary for the proper performance of our agency's functions, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of burden of the information collection, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the information collection on those who are to respond, (such as through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission or responses).

Estimate of burden: Public reporting burden for this collection of information is estimated to average 0.56 hours per response.

Respondents: Importers, shippers, and the NPPO of the Republic of Korea.

Estimated number of respondents: 3.

Estimated number of responses per respondent: 139.

Estimated annual number of responses: 416.

Estimated total annual burden on respondents: 232.

(Due to rounding, the total annual burden hours may not equal the product of the annual number of responses multiplied by the average reporting burden per response.)

A copy of the information collection may be viewed on the *Regulations.gov* Web site or in our reading room. (A link to *Regulations.gov* and information on the location and hours of the reading room are provided under the heading **ADDRESSES** at the beginning of this proposed rule.) Copies can also be obtained from Ms. Kimberly Hardy, APHIS' Information Collection Coordinator, at (301) 851–2727. APHIS will respond to any ICR-related comments in the final rule. All comments will also become a matter of public record.

E-Government Act Compliance

APHIS is committed to compliance with the E-Government Act to promote the use of the Internet and other information technologies, to provide increased opportunities for citizen access to Government information and

services, and for other purposes. For information pertinent to E-Government Act compliance related to this proposed rule, please contact Ms. Kimberly Hardy, APHIS' Information Collection Coordinator, at (301) 851–2727.

List of Subjects in 7 CFR Part 319

Coffee, Cotton, Fruits, Imports, Logs, Nursery stock, Plant diseases and pests, Quarantine, Reporting and recordkeeping requirements, Rice, Vegetables.

Accordingly, we propose to amend 7 CFR part 319 as follows:

PART 319—FOREIGN QUARANTINE NOTICES

■ 1. The authority citation for part 319 continues to read as follows:

Authority: 7 U.S.C. 450, 7701–7772, and 7781–7786; 21 U.S.C. 136 and 136a; 7 CFR 2.22, 2.80, and 371.3.

■ 2. In § 319.37–8, paragraph (e) is amended as follows:

■ a. In the introductory text, by adding a new entry for “*Cymbidium* spp, from the Republic of Korea” in alphabetical order and revising the entry for *Phalaenopsis* spp.; and

■ b. By revising paragraph (e)(2)(xiii).

The addition and revisions read as follows:

§ 319.37–8 Growing media.

* * * * *

(e) * * *

Cymbidium spp. from the Republic of Korea

* * * * *

Phalaenopsis spp. from Taiwan, the People's Republic of China, and the Republic of Korea.

* * * * *

(2) * * *

(xiii) Plants for planting of *Phalaenopsis* spp. from the People's Republic of China and *Phalaenopsis* spp. and *Cymbidium* spp. from the Republic of Korea may only be imported into the continental United States, and may not be imported or moved into Hawaii or the territories of the United States.

* * * * *

Done in Washington, DC, this 9th day of August 2016.

Jere L. Dick,

Acting Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410–34–P

DEPARTMENT OF ENERGY**10 CFR Part 820**

[Docket No. EA–RM–16–PRDNA]

RIN 1992–AA52

Procedural Rules for DOE Nuclear Activities

AGENCY: Office of Enterprise Assessments, Office of Enforcement, Office of Nuclear Safety Enforcement, Department of Energy.

ACTION: Notice of proposed rulemaking.

SUMMARY: The U.S. Department of Energy (DOE) is proposing to amend its Procedural Rules for DOE Nuclear Activities to clarify that the Department may assess civil penalties against certain contractors and subcontractors for violations of the prohibition against retaliating against an employee who reports violations of law, mismanagement, waste, abuse, or dangerous/unsafe workplace conditions, among other protected activities, concerning nuclear safety (referred to as “whistleblowers”). Specifically, this proposed rule would clarify that the prohibition against whistleblower retaliation is a DOE Nuclear Safety Requirement to the extent that it concerns nuclear safety. The proposed rule would also explain the circumstances under which DOE would investigate alleged violations of this prohibition. The proposed rule would also delineate which DOE regulations are DOE Nuclear Safety Requirements.

DATES: DOE will accept comments, data, and information regarding this notice of proposed rulemaking (NOPR) submitted on or before September 12, 2016.

ADDRESSES: Any comments submitted must identify the NOPR for Procedural Rules for DOE Nuclear Activities and provide docket number EA–RM–16–PRDNA and/or regulatory information number (RIN) 1992–AA52. Comments may be submitted using any of the following methods:

1. *Federal eRulemaking Portal:* www.regulations.gov. Follow the instructions for submitting comments.
2. *Email:* part820rulemaking@hq.doe.gov. Include the docket number and/or RIN in the subject line of the message. Submit electronic comments in Microsoft Word, or PDF file format, and avoid the use of special characters or any form of encryption.
3. *Postal Mail:* EA–10/Germantown Building, U.S. Department of Energy, 1000 Independence Avenue SW., Washington, DC 20585–1290. If possible, please submit all items on a

CD, in which case it is not necessary to include printed copies.

As a result of potential delays in the receipt and processing of mail sent through the U.S. Postal Service, DOE encourages respondents to submit comments electronically to ensure timely receipt.

For detailed instructions on submitting comments and additional information on the rulemaking process, see section III of this document (Public Participation).

Docket: The docket, which includes **Federal Register** notices, public meeting attendee lists and transcripts, comments received, and other supporting documents/materials, is available for review at <http://www.regulations.gov>. All documents in the docket are listed in the www.regulations.gov index. However, some documents listed in the index may not be publicly available, such as those containing information that is exempt from public disclosure. A link to the docket Web page can be found at: <http://energy.gov/ea/office-enterprise-assessments>. This Web page will contain a link to the docket for this proposed rulemaking on the www.regulations.gov site. The www.regulations.gov Web page contains simple instructions on how to access all documents, including public comments, in the docket. See section III for further information on how to submit comments through www.regulations.gov.

FOR FURTHER INFORMATION CONTACT:

Steven Simonson, U.S. Department of Energy, Office of Enterprise Assessments/Germantown Building, 1000 Independence Ave. SW., Washington, DC 20585–1290. Phone: (301) 903–2816. Email: Steven.Simonson@hq.doe.gov.

K.C. Michaels, U.S. Department of Energy, Office of the General Counsel, 1000 Independence Ave. SW., Washington, DC 20585–0121. Phone: (202) 586–3430. Email: Kenneth.Michaels@hq.doe.gov.

SUPPLEMENTARY INFORMATION:**Table of Contents**

- I. Authority and Background
- II. Discussion of Proposed Amendment
- III. Public Participation
- IV. Procedural Issues and Regulatory Review

I. Authority and Background

Pursuant to the Atomic Energy Act of 1954 (AEA) (42 U.S.C. 2011 *et seq.*), DOE has issued regulations governing nuclear safety management (at 10 CFR part 830) and occupational radiation protection (at 10 CFR part 835). Section 234A of the AEA (42 U.S.C. 2282a) authorizes DOE to impose civil

penalties for violations of these regulations. Specifically, section 234A authorizes civil penalties against contractors, subcontractors, and suppliers that are covered by an indemnification agreement under section 170.d. of the AEA (42 U.S.C. 2210(d)) (commonly known as the Price-Anderson Act) that violate DOE rules, regulations, or orders “related to nuclear safety.” DOE has issued Procedural Rules for DOE Nuclear Activities at 10 CFR part 820 (part 820), which establishes a process for imposing civil penalties under section 234A.

Separate from part 820, DOE has also issued regulations at 10 CFR part 708 (part 708) that prohibit a contractor or subcontractor from retaliating against employees for reporting violations of law, mismanagement, waste, abuse, or dangerous/unsafe workplace conditions, participating in proceedings, or refusing to participate in an activity that may constitute a violation of law or cause a reasonable fear of injury (referred to as “whistleblowers”). These regulations establish an affirmative duty on the part of contractors not to retaliate against whistleblowers; and establish a process for an employee alleging retaliation to file a claim for reinstatement, transfer-preference, back-pay, and legal fees among other forms of relief.

DOE is proposing to amend part 820 to clarify that DOE may impose civil penalties against a contractor or subcontractor for violating the prohibition against whistleblower retaliation found in part 708, to the extent it concerns nuclear safety. The proposed rule would not alter the existing procedures for imposing civil penalties, but would establish requirements specific to whistleblower retaliation concerning nuclear safety. The proposed rule would also provide, in the text of part 820, a list of all other DOE Nuclear Safety Requirements.

II. Discussion of Proposed Amendment*A. What are DOE Nuclear Safety Requirements and when may DOE impose civil penalties?*

The current version of part 820 includes a definition for “DOE Nuclear Safety Requirements,” and it states that DOE has authority to impose civil penalties for violations of any DOE Nuclear Safety Requirement set forth in the Code of Federal Regulations, Compliance Orders issued under subpart C to part 820, and any program, plan, or other provision required to implement one of these rules or orders.¹

¹ The use of the word “order” in this context refers to Compliance Orders issued under subpart

The rule does not identify the particular rules and regulations that DOE regards as DOE Nuclear Safety Requirements.

DOE proposes to amend part 820 to update the definition of DOE Nuclear Safety Requirements, to add a new section to part 820, and to amend the guidance in appendix A to part 820—General Statement of Enforcement Policy. In particular, DOE proposes that the following are enforceable DOE Nuclear Safety Requirements to the extent they concern nuclear safety:

10 CFR part 830 (nuclear safety management);

10 CFR part 835 (occupational radiation protection);

10 CFR 820.11 (information accuracy requirements);

Compliance Orders issued pursuant to 10 CFR part 820, subpart C;

10 CFR 708.43 (duty of contractors not to retaliate against whistleblowers).

The lack of a definitive list of regulations included in the definition of DOE nuclear safety requirements in the text of part 820 has led to a question regarding the scope of DOE's authority to issue civil penalties for violations of these regulations, particularly the prohibition against whistleblower retaliation in part 708. To address this question, DOE proposes to amend part 820 to clarify that part 830, part 835, § 820.11, Compliance Orders issued pursuant to subpart C to part 820, and § 708.43 as it concerns nuclear safety each represent DOE Nuclear Safety Requirements and that DOE may assess civil penalties for violations of these rules. This amendment is consistent with the original intent in promulgating part 820, as evidenced by appendix A of this part, the preambles to previous rulemakings (e.g. 58 FR 43680, 43681 (Aug. 17, 1993)).

DOE considers each of these provisions to be a DOE Nuclear Safety Requirement and has previously exercised enforcement activity on the basis of violations of these regulations. Parts 830 and 835 both have a clear connection to nuclear safety in that each regulation directly and explicitly governs the conduct of persons whose conduct may affect nuclear safety. Further, part 830 states explicitly that the requirements of part 830 are DOE Nuclear Safety Requirements and 10 CFR 830.5 provides that violations of part 830 may be enforced through civil penalties in accordance with part 820.

Compliance Orders issued pursuant to subpart C to part 820 and § 820.11 also have a clear connection to nuclear safety. Subpart C allows the Secretary of

Energy to order any person involved in a DOE nuclear activity to remediate a situation that violates or potentially violates the AEA, another statute relating to a DOE nuclear activity, or a DOE Nuclear Safety Requirement. Because the underlying violations would involve nuclear safety, Compliance Orders issued under subpart C govern conduct that relates to and may affect nuclear safety. Section 820.11 requires that information pertaining to a nuclear activity that is provided to or maintained for inspection by DOE must be complete and accurate in all respects and prohibits any person involved in a nuclear activity from concealing or destroying information concerning a violation of a DOE Nuclear Safety Requirement. If information regarding a nuclear activity is incomplete or inaccurate, this impedes DOE's ability to conclude that a contractor is adhering to proper safety precautions. Likewise, if a person willfully destroys information regarding a safety violation, it becomes less likely that the violation will be rectified.

Section 708.43 establishes an affirmative duty on the part of DOE contractors (including subcontractors) not to retaliate against whistleblowers. Section 708.36 provides various forms of relief to whistleblower employees. Providing this relief is important, but the Department also has a strong interest in preventing whistleblower retaliation and ensuring that workers feel free to raise important safety concerns. DOE and its contractors rely to a significant extent on workers to bring attention to unsafe conditions. If workers witness any retaliation against an employee for raising a potential nuclear safety issue, it may contribute to a chilled work environment in which workers do not feel free to report such issues. Accordingly, § 708.43, as it applies to activities at DOE nuclear facilities that concern nuclear safety, constitutes a DOE Nuclear Safety Requirement.

B. What is the effect of administrative and judicial whistleblower proceedings on DOE's enforcement process?

An employee alleging retaliation by a DOE contractor or subcontractor has several different mechanisms to file a claim for relief, including filing a claim pursuant to part 708, with the DOE Office of the Inspector General, with the Department of Labor under 29 CFR part 24, or in federal or state court. For most of these mechanisms, a contractor employee may seek a "make whole" remedy including reinstatement, transfer-preference, back-pay, and legal fees, among other forms of

compensation. DOE considers the imposition of civil penalties for whistleblower retaliation as a complementary process to these proceedings. Relief to contractor employees who have been found to suffer retaliation is important, but DOE also has a separate and strong interest in deterring future whistleblower retaliation in connection with nuclear safety issues. A "make whole" remedy to the employee may not be sufficiently punitive to deter future retaliation against whistleblowers. In these situations, separate enforcement with the possibility of imposing civil penalties would allow DOE to craft a remedy that is specifically designed to address these safety concerns.

As a matter of regulatory concern, DOE recognizes that conducting enforcement proceedings concerning retaliation in parallel with administrative or judicial proceedings may lead to conflicting results. DOE's current enforcement policy explains that DOE will generally await the completion of an administrative proceeding before deciding whether to take action. DOE proposes to codify this policy into the regulatory text with respect to proceedings before DOE under part 708, the DOE Office of the Inspector General under 41 U.S.C. 4705 or 4712, the Department of Labor under 29 CFR part 24, or a federal or state court. Specifically, DOE proposes that it will not take any action under part 820 with respect to alleged retaliation until after the deadlines have passed for filing a claim under part 708 or 29 CFR part 24—i.e. 180 days after the alleged violation occurs.² If an administrative or judicial proceeding is filed after DOE has already initiated any action under part 820, DOE will immediately suspend its activities under part 820 until the issuance of a final decision in the proceeding—including the exhaustion of appeals. In such instances, DOE will not take any action under part 820 until sixty days after a final decision in an administrative or judicial proceeding finds that a retaliation occurred.

DOE proposes that it will generally exercise enforcement discretion that is consistent with the final decision of an

² For a part 708 claim, the employee must file within 90 days after the employee knew or reasonably should have known about the alleged retaliation. For a claim under 29 CFR part 24, the employee must file within 180 days of an alleged violation prohibited by section 211 of the Energy Reorganization Act of 1974 (42 U.S.C. 5851). There is a three-year deadline for filing a complaint with the Inspector General under 41 U.S.C. 4712, but there is no explicit deadline under 41 U.S.C. 4705. Statutes of limitations before federal and state courts vary.

agency or court. If a final decision finds that retaliation occurred, DOE will consider whether that retaliation constitutes a violation of § 708.43, and if so, whether to take action under part 820. On the other hand, if a final decision finds that no retaliation occurred, DOE will not take any further action under part 820 with respect to the alleged retaliation unless DOE becomes aware of significant new information that was not available in the prior proceeding.

DOE is aware that the various statutory and regulatory prohibitions against whistleblower retaliation are not identical. Section 708.43 prohibits retaliation against an employee who engages in one of a number of specified activities. It is conceivable that a contractor could retaliate against an employee for an action that is not protected under § 708.43, but that is protected under a different statutory or regulatory prohibition. Therefore, in the event that a final decision finds that a prohibited retaliation has taken place, DOE will make a determination of whether that retaliation also constitutes a violation of § 708.43 before pursuing remedial measures under part 820 against the contractor.

C. What is DOE's enforcement policy regarding whistleblower retaliation?

Section XIII to appendix A to part 820 currently sets forth DOE's Whistleblower Enforcement Policy. As mentioned in this preamble, this appendix is a general statement of policy and is not binding on DOE or its contractors. In addition to codifying DOE's existing policy to await the completion of administrative proceedings, as described in this preamble, DOE also proposes to codify two other statements of the enforcement policy into a new section of part 820 governing whistleblower enforcement. Specifically, DOE proposes to codify paragraphs d and e of section XIII, which provide that DOE may collect information gathered during administrative proceedings and give appropriate weight to that information in DOE's enforcement process, respectively. DOE also proposes to codify paragraph k of section XIII, which provides that the commencement of an administrative or judicial proceeding regarding an alleged retaliation does not prevent DOE from investigating violations of DOE Nuclear Safety Requirements other than § 708.43.

Under this NOPR, DOE is also proposing amendments to section XIII of appendix A to conform with the

proposed changes to the regulatory text of part 820.

III. Public Participation

DOE will accept comments, data, and information regarding this proposed rule submitted on or before the date provided in the **DATES** section at the beginning of this proposed rule. Interested parties may submit comments, data, and other information using any of the methods described in the **ADDRESSES** section at the beginning of this proposed rule. Please refer to specific proposed rule provisions, if possible.

If you submit information that you believe to be exempt by law from public disclosure, you should submit one complete copy marked "confidential," and one copy marked "non-confidential" with the information believed to be confidential deleted. DOE is responsible for the final determination with regard to disclosure or nondisclosure of the information and for treating it accordingly under the DOE Freedom of Information regulations at 10 CFR 1004.11. Factors of interest to DOE when evaluating requests to treat submitted information as confidential include: (1) A description of the items; (2) whether and why such items are customarily treated as confidential within the industry; (3) whether the information is generally known or available from other sources; (4) whether the information has previously been made available to others without obligation concerning its confidentiality; (5) an explanation of the competitive injury to the submitting person that would result from public disclosure; (6) when such information might lose its confidential character due to the passage of time; and (7) why disclosure of the information would be contrary to the public interest.

It is DOE's policy that all comments may be included in the public docket, without change and as received, including any personal information provided in the comments (except information deemed to be exempt from public disclosure).

DOE has determined that this rulemaking does not raise the kinds of substantial issues or impacts that, pursuant to 42 U.S.C. 7191, would require DOE to provide an opportunity for oral presentation of views, data and arguments. Therefore, DOE has not scheduled a public hearing on these proposed amendments to part 820.

IV. Procedural Issues and Regulatory Review

A. Review Under Executive Order 12866

This notice of proposed rulemaking has been determined not to be a significant regulatory action under Executive Order 12866, "Regulatory Planning and Review," 58 FR 51735 (Oct. 4, 1993). Accordingly, this notice of proposed rulemaking was not subject to review by the Office of Information and Regulatory Affairs of the Office of Management and Budget.

B. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires preparation of an initial regulatory flexibility analysis for any rule that by law must be proposed for public comment, unless the agency certifies that the rule, if promulgated, will not have a significant economic impact on a substantial number of small entities. As required by Executive Order 13272, "Proper Consideration of Small Entities in Agency Rulemaking," 67 FR 53461 (Aug. 16, 2002), DOE published procedures and policies on February 19, 2003, to ensure that the potential impacts of its rules on small entities are properly considered during the rulemaking process. 68 FR 7990. DOE has made its procedures and policies available on the Office of the General Counsel's Web site (<http://energy.gov/gc/office-general-counsel>).

DOE has reviewed this proposed rule under the provisions of the Regulatory Flexibility Act and the procedures and policies published on February 19, 2003. The proposed rule would amend DOE's Procedural Rules for DOE Nuclear Activities to clarify that DOE may assess civil penalties against certain contractors and subcontractors for violations of the prohibition against retaliating against whistleblowers. While the amended part 820 would expose small entities that are contractors and subcontractors to potential liability for civil penalties, DOE does not expect that a substantial number of these entities will violate a DOE Nuclear Safety Requirement resulting in the imposition of a civil penalty. On this basis, DOE certifies that this proposed rule would not have a significant economic impact on a substantial number of small entities. Accordingly, DOE has not prepared a regulatory flexibility analysis for this rulemaking. DOE's certification and supporting statement of factual basis will be provided to the Chief Counsel for Advocacy of the Small Business Administration pursuant to 5 U.S.C. 605(b).

C. Paperwork Reduction Act

This proposed rule would not impose new information or record keeping requirements. Accordingly, OMB clearance is not required under the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.*

D. National Environmental Policy Act

DOE has determined that this proposed rule is covered under the Categorical Exclusion in DOE's National Environmental Policy Act regulations at paragraph A.5 of appendix A to subpart D, 10 CFR part 1021, which applies to rulemaking that interprets or amends an existing rule or regulation without changing the environmental effect of the rule or regulation that is being amended. The proposed rule would amend DOE's regulations on civil penalties with respect to certain DOE contractors and subcontractors in order to clarify that civil penalties are available for violations of the prohibition against whistleblower retaliation found in § 708.43 that concern nuclear safety. These proposed amendments are procedural and would not change the environmental effect of part 820. Accordingly, neither an environmental assessment nor an environmental impact statement is required.

E. Unfunded Mandates Reform Act of 1995

Title II of the Unfunded Mandates Reform Act of 1995, 2 U.S.C. 1531 *et seq.*, requires each Federal agency, to the extent permitted by law, to prepare a detailed assessment of the effects of any Federal mandate in an agency rule that may result in costs to State, local, or tribal governments, or to the private sector, of \$100 million or more (adjusted annually for inflation) in any one year. 2 U.S.C. 1532. While the proposed rule may expose DOE contractors and subcontractors to potential liability for civil penalties for retaliating against a whistleblower in connection with a protected activity relating to nuclear safety, DOE does not expect that these civil penalties will approach \$100 million in any single year. Therefore, the requirements of Title II of the Unfunded Mandates Reform Act of 1995 do not apply.

F. Treasury and General Government Appropriations Act, 1999

Section 654 of the Treasury and General Government Appropriations Act, 1999, 5 U.S.C. 601 note, requires Federal agencies to issue a Family Policymaking Assessment for any proposed rule that may affect family wellbeing. While this proposed rule would apply to individuals who may be

members of a family, the rule would not have any impact on the autonomy or integrity of the family as an institution. Accordingly, DOE has concluded that it is not necessary to prepare a Family Policymaking Assessment.

G. Executive Order 13132

Executive Order 13132, "Federalism," 64 FR 43255 (Aug. 4, 1999), imposes certain requirements on agencies formulating and implementing policies or regulations that preempt State law or that have federalism implications. Agencies are required to examine the constitutional and statutory authority supporting any action that would limit the policymaking discretion of the States and carefully assess the necessity for such actions. DOE has examined this proposed rule and has determined that it would not preempt State law and would not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. No further action is required by Executive Order 13132.

H. Executive Order 12988

With respect to the review of existing regulations and the promulgation of new regulations, section 3(a) of Executive Order 12988, "Civil Justice Reform," 61 FR 4729 (Feb. 7, 1996), imposes on Executive agencies the general duty to adhere to the following requirements: (1) Eliminate drafting errors and ambiguity; (2) write regulations to minimize litigation; and (3) provide a clear legal standard for affected conduct rather than a general standard and promote simplification and burden reduction. With regard to the review required by section 3(a), section 3(b) of Executive Order 12988 specifically requires that Executive agencies make every reasonable effort to ensure that the regulation: (1) Clearly specifies the preemptive effect, if any; (2) clearly specifies any effect on existing Federal law or regulation; (3) provides a clear legal standard for affected conduct while promoting simplification and burden reduction; (4) specifies the retroactive effect, if any; (5) adequately defines key terms; and (6) addresses other important issues affecting clarity and general draftsmanship under any guidelines issued by the Attorney General. Section 3(c) of Executive Order 12988 requires Executive agencies to review regulations in light of applicable standards in section 3(a) and section 3(b) to determine whether they are met or it is unreasonable to meet one or more of

them. DOE has completed the required review and determined that, to the extent permitted by law, this proposed rule meets the relevant standards of Executive Order 12988.

I. Treasury and General Government Appropriations Act, 2001

The Treasury and General Government Appropriations Act, 2001, 44 U.S.C. 3516 note, provides for agencies to review most disseminations of information to the public under guidelines established by each agency pursuant to general guidelines issued by OMB. OMB's guidelines were published at 67 FR 8452 (Feb. 22, 2002), and DOE's guidelines were published at 67 FR 62446 (Oct. 7, 2002). DOE has reviewed this notice of proposed rulemaking under the OMB and DOE guidelines and has concluded that it is consistent with applicable policies in those guidelines.

J. Executive Order 13211

Executive Order 13211, "Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use," 66 FR 28355 (May 22, 2001), requires Federal agencies to prepare and submit to the Office of Information and Regulatory Affairs (OIRA) a Statement of Energy Effects for any proposed significant energy action. A "significant energy action" is defined as any action by an agency that promulgates or is expected to lead to promulgation of a final rule, and that: (1) Is a significant regulatory action under Executive Order 12866, or any successor order; and (2) is likely to have a significant adverse effect on the supply, distribution, or use of energy, or (3) is designated by the Administrator of OIRA as a significant energy action. For any proposed significant energy action, the agency must give a detailed statement of any adverse effects on energy supply, distribution, or use should the proposal be implemented, and of reasonable alternatives to the action and their expected benefits on energy supply, distribution, and use. This regulatory action has been determined to not be a significant regulatory action, and it would not have an adverse effect on the supply, distribution, or use of energy. Thus, this action is not a significant energy action. Accordingly, DOE has not prepared a Statement of Energy Effects.

K. Approval of the Office of the Secretary

The Secretary of Energy has approved the publication of this proposed rule.

List of Subjects in 10 CFR Part 820

Administrative practice and procedure, Enforcement, Government contracts, Nuclear safety, Penalties, Whistleblowing.

Issued in Washington, DC, on August 5, 2016.

Glenn S. Podonsky,

Director, Office of Enterprise Assessments.

For the reasons stated in the preamble, DOE hereby proposes to amend part 820 of chapter III of title 10 of the Code of Federal Regulations as set forth below:

PART 820—PROCEDURAL RULES FOR DOE NUCLEAR ACTIVITIES

■ 1. The authority citation for part 820 continues to read as follows:

Authority: 42 U.S.C. 2201; 2282(a); 7191; 28 U.S.C. 2461 note; 50 U.S.C. 2410.

■ 2. Section 820.2 is amended by revising the definition for “DOE Nuclear Safety Requirements” to read as follows:

§ 820.2 Definitions.

* * * * *

DOE Nuclear Safety Requirements means the set of rules, regulations, orders, and other requirements relating to nuclear safety adopted by DOE to govern the conduct of persons in connection with any DOE nuclear activity and includes any program, plan, or other provision required to implement these rules, regulations, orders, or other requirements. DOE Nuclear Safety Requirements include the following, to the extent that subject activities concern nuclear safety:

- (i) 10 CFR part 830;
- (ii) 10 CFR part 835;
- (iii) 10 CFR 820.11;
- (iv) Compliance Orders issued pursuant to 10 CFR part 820, subpart C; and

- (v) 10 CFR 708.43.

* * * * *

■ 3. Section 820.14 is added to subpart A to read as follows:

§ 820.14 Whistleblower protection.

(a) *Covered acts.* An act of retaliation (as defined in 10 CFR 708.2) by a DOE contractor, prohibited by 10 CFR 708.43, that results from a DOE contractor employee’s involvement in an activity listed in 10 CFR 708.5(a) through (c) may constitute a violation of a DOE Nuclear Safety Requirement if it concerns nuclear safety.

(b) *Commencement of investigation.* The Director may not initiate an investigation or take any other action under this part with respect to an alleged act of retaliation by a DOE

contractor until 180 days after an alleged violation of 10 CFR 708.43 occurs.

(c) *Administrative or judicial proceedings.* The Director shall immediately suspend any ongoing activities under this part and suspend any time limits under this part when an administrative or judicial proceeding commences based on the same alleged act of retaliation. While an administrative or judicial proceeding, including appeals, is pending, the Director may not exercise any authority under this part based on an alleged violation of 10 CFR 708.43, including issuing enforcement letters, subpoenas, orders to compel attendance, Consent Orders, Preliminary Notices of Violation, or Final Notices of Violation. Once such a proceeding commences, the Director shall not conduct any activities under this part until sixty days after a final decision of an agency or court finds that a retaliation occurred.

(d) *Final decision.* For the purposes of this section, a final decision of an agency or court includes any of the following:

- (1) A final agency decision pursuant to 10 CFR part 708;
- (2) A final decision or order of the Secretary of Labor pursuant to 29 CFR part 24;
- (3) A decision by the Secretary upon a report by the Inspector General;
- (4) A decision by a federal or state court.

(e) *Evidentiary record.* If a final decision of an agency or court finds that retaliation occurred, the Director may obtain and use information collected as part of those proceedings. The Director has discretion to give appropriate weight to information obtained from these proceedings and to initiate and conduct further investigation if the Director deems necessary, particularly with regard to the relationship between the retaliation and nuclear safety.

(f) *Underlying nuclear safety requirements.* Notwithstanding the commencement of an administrative or judicial proceeding based on an alleged act of retaliation, this section shall not prevent the Director from taking any action consistent with this part regarding compliance with DOE Nuclear Safety Requirements other than 10 CFR 708.43.

■ 4. Section 820.20 is amended by revising paragraphs (a) and (b) to read as follows:

§ 820.20 Purpose and scope.

(a) *Purpose.* This subpart establishes the procedures for investigating the nature and extent of violations of DOE Nuclear Safety Requirements, for

determining whether a violation of DOE Nuclear Safety Requirements has occurred, for imposing an appropriate remedy, and for adjudicating the assessment of a civil penalty.

(b) *Basis for civil penalties.* DOE may assess civil penalties against any person subject to the provisions of this part who has entered into an agreement of indemnification under 42 U.S.C. 2210(d) (or any subcontractor or supplier thereto), unless exempted from civil penalties as provided in paragraph (c) of this section, on the basis of a violation of a DOE Nuclear Safety Requirement.

* * * * *

■ 5. Appendix A to part 820 is amended by revising section XIII to read as follows:

Appendix A to Part 820—General Statement of Enforcement Policy

* * * * *

XIII. Whistleblower Enforcement Policy

a. DOE contractors may not retaliate against any employee because the employee has taken any actions listed in 10 CFR 708.5(a) through (c), including disclosing information, participating in proceedings, or refusing to participate in certain activities. DOE contractor employees may seek relief for allegations of retaliation through one of several mechanisms, including filing a complaint with DOE pursuant to 10 CFR part 708 (part 708), the Department of Labor (DOL) under sec. 211 of the Energy Reorganization Act (sec. 211), implemented in 29 CFR part 24, or the DOE Inspector General (IG).

b. An act of retaliation by a DOE contractor, prohibited by 10 CFR 708.43, that results from a DOE contractor employee’s involvement in an activity listed in 10 CFR 708.5(a) through (c), may constitute a violation of a DOE Nuclear Safety Requirement under 10 CFR part 820 if it concerns nuclear safety. To avoid the potential for inconsistency with one of the mechanisms available to an aggrieved DOE contractor employee alleging retaliation referenced in section XIII.a, the Director will not take any action under this part with respect to an alleged violation of 10 CFR 708.43 until a request for relief under one of these mechanisms, if any, has been fully adjudicated, including appeals. With respect to an alleged retaliation, the Director will generally only take action that is consistent with the findings of a final decision of an agency or court. If a final decision finds that retaliation occurred, the Department will consider whether that retaliation constitutes a violation of § 708.43, and if so, whether to take action under part 820. If a final decision finds that no retaliation occurred, the Director will generally not take any action under part 820 with respect to the alleged retaliation absent significant new information that was not available in the prior proceeding.

c. DOE encourages its contractors to cooperate in resolving whistleblower

complaints raised by contractor employees in a prompt and equitable manner. Accordingly, in considering what remedy is appropriate for an act of retaliation concerning nuclear safety, the Director will take into account the extent to which a contractor cooperated in proceedings for remedial relief.

d. In considering what remedy is appropriate for an act of retaliation concerning nuclear safety, the Director will also consider the egregiousness of the particular case including the level of management involved in the alleged retaliation and the specificity of the acts of retaliation.

e. When the Director undertakes an investigation of an allegation of DOE contractor retaliation against an employee under part 820, the Director will apprise persons interviewed and interested parties that the investigative activity is being taken pursuant to the nuclear safety procedures of part 820 and not pursuant to the procedures of part 708.

[FR Doc. 2016-19103 Filed 8-11-16; 8:45 am]

BILLING CODE 6450-01-P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Docket No. FAA-2014-1068; Airspace Docket No. 14-AWP-12]

Proposed Amendment of Class E Airspace, Kahului, HI

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action proposes to modify Class E airspace designated as an extension to a Class C surface area, and modify Class E airspace extending upward from 700 feet above the surface at Kahului Airport, Kahului, HI. Due to changes to the available instrument flight procedures since the last review and advances in Global Positioning System (GPS) mapping accuracy, the FAA found airspace modifications are necessary to ensure the safety and management of Instrument Flight Rules (IFR) operations at the airport with a minimum amount of airspace restriction.

DATES: Comments must be received on or before September 26, 2016.

ADDRESSES: FAA Order 7400.9Z, Airspace Designations and Reporting Points, and subsequent amendments can be viewed online at http://www.faa.gov/air_traffic/publications/. For further information, you can contact the U.S. Department of Transportation, Docket Operations, 1200 New Jersey Avenue SE., West Bldg. Ground Floor Rm. W12-

140, Washington, DC 20590; Telephone: 1-800-647-5527, or 202-366-9826. The Order is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of FAA Order 7400.9Z at NARA, call 202-741-6030, or go to http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html.

FAA Order 7400.9, Airspace Designations and Reporting Points, is published yearly and effective on September 15.

FOR FURTHER INFORMATION CONTACT: Tom Clark, Federal Aviation Administration, Operations Support Group, Western Service Center, 1601 Lind Avenue SW., Renton, WA 98057; telephone (425) 203-4511.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would amend Class E airspace at Kahului Airport, Kahului, HI.

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments, as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal. Communications should identify both docket numbers and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. FAA-2014-1068; Airspace Docket No. 14-AWP-12." The postcard

will be date/time stamped and returned to the commenter.

Availability of NPRMs

An electronic copy of this document and other recently published rulemaking documents may be accessed and downloaded through the Internet at <http://www.regulations.gov>.

You may review the public docket containing the proposal, any comments received, and any final disposition in person in the Dockets Office (see the **ADDRESSES** section for the address and phone number) between 9:00 a.m. and 5:00 p.m., Monday through Friday, except federal holidays. An informal docket may also be examined during normal business hours at the Northwest Mountain Regional Office of the Federal Aviation Administration, Air Traffic Organization, Western Service Center, Operations Support Group, 1601 Lind Avenue SW., Renton, WA 98057.

Availability and Summary of Documents Proposed for Incorporation by Reference

This document proposes to amend FAA Order 7400.9Z, Airspace Designations and Reporting Points, dated August 6, 2015, and effective September 15, 2015. FAA Order 7400.9Z is publicly available as listed in the **ADDRESSES** section of this document. FAA Order 7400.9Z lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Proposal

The FAA is proposing an amendment to Title 14 Code of Federal Regulations (14 CFR) Part 71 to modify the Kahului Airport, Kahului, HI, Class E airspace area designated as an extension to a Class C surface area. The current Class E surface area airspace extension to the north is not required and to the south is longer than required to support IFR operations to/from the airport. The proposed Class E surface airspace includes that area within 3 miles each side of the airport 203° bearing extending from the airport 5-mile radius to 7 miles southwest of the airport.

This proposal would also modify the Class E airspace area extending upward from 700 feet above the surface by excluding that area extending beyond 12 miles from the coast, and would slightly expand the airspace northeast of the airport to within 3.6 miles each side of the 038° bearing from the airport extending from the 5-mile radius to 11.7 miles northeast of the airport. The airspace area would otherwise remain the same, except as noted above. The expanded Class E airspace area is necessary to contain IFR arrival

operations descending below 1,500 feet above the surface, and IFR departure operations below 1,200 feet above the surface.

This proposal would also remove reference to the Maui VORTAC from the airspace legal descriptions for the Class E3 airspace area designated as an extension to the Class C surface area, and the Class E5 airspace area extending upward from 700 feet above the surface. Changes to the available instrument flight procedures since the last review, advances in GPS mapping accuracy, and a reliance on precise geographic coordinates to define airport and airspace reference points have made the proposed airspace redesign necessary for the safety and management of Instrument Flight Rules (IFR) operations.

Class E airspace designations are published in paragraphs 6003, and 6005, respectively, of FAA Order 7400.9Z, dated August 6, 2015, and effective September 15, 2015, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designations listed in this document will be published subsequently in the Order.

Regulatory Notices and Analyses

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current, is non-controversial and unlikely to result in adverse or negative comments. It, therefore: (1) Is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, would not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, “Environmental Impacts: Policies and Procedures” prior to any FAA final regulatory action.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order 7400.9Z, Airspace Designations and Reporting Points, dated August 6, 2015, and effective September 15, 2015, is amended as follows:

Paragraph 6003 Class E Airspace Areas Designated as an Extension to a Class C Surface Area.

* * * * *

AWP HI E3 Kahului, HI [Modified]

Kahului Airport, HI

(Lat. 20°53'55" N., long. 156°25'50" W.)

That airspace extending upward from the surface within 3 miles each side of the Kahului Airport 203° bearing extending from the 5-mile radius of the airport to 7 miles southwest of the airport. This Class E airspace area is effective during the specific dates and times established in advance by a Notice to Airmen. The effective date and time will thereafter be continuously published in the Pacific Chart Supplement.

Paragraph 6005 Class E Airspace Areas Extending Upward From 700 Feet or More Above the Surface of the Earth.

BILLING CODE 4910–13–P

COMMODITY FUTURES TRADING COMMISSION

17 CFR Part 3

RIN 3038–AE49

Chief Compliance Officer Annual Report Requirements for Futures Commission Merchants, Swap Dealers, and Major Swap Participants; Amendments to Filing Dates

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Commodity Futures Trading Commission (“Commission” or “CFTC”) is proposing to amend certain provisions of its regulations concerning Chief Compliance Officers (“Proposal”). The regulation that is the subject of the Proposal addresses chief compliance officers (“CCOs”) of futures commission merchants (“FCMs”), swap dealers (“SDs”), and major swap participants (“MSPs”) (collectively, “Registrants”). The proposed amendments would: Codify existing no-action relief regarding the timing of when a Registrant must furnish its CCO annual report to the Commission; clarify filing requirements for Registrants located in a jurisdiction for which the Commission has issued a comparability determination; and delegate to the Director of the Division of Swap Dealer and Intermediary Oversight (“DSIO”) authority to grant extensions to the CCO annual report filing deadline.

DATES: Comments must be received on or before September 12, 2016.

ADDRESSES: You may submit comments, identified by RIN 3038–AE49, by any of the following methods:

- *CFTC Web site:* <http://comments.cftc.gov>. Follow the instructions for submitting comments through the Comments Online process on the Web site.

- *Mail:* Send to Christopher Kirkpatrick, Secretary of the Commission, Commodity Futures Trading Commission, Three Lafayette Centre, 1155 21st Street NW., Washington, DC 20581.

- *Hand Delivery/Courier:* Same as Mail, above.

• *Federal eRulemaking Portal*: <http://www.regulations.gov>. Follow the instructions for submitting comments.

Please submit your comments using only one of these methods.

All comments must be submitted in English, or if not, accompanied by an English translation. Comments will be posted as received to <http://www.cftc.gov>. You should submit only information that you wish to make available publicly. If you wish the Commission to consider information that is exempt from disclosure under the Freedom of Information Act (“FOIA”),¹ a petition for confidential treatment of the exempt information may be submitted according to the procedures set forth in § 145.9 of the Commission’s regulations.²

The Commission reserves the right, but shall have no obligation, to review, pre-screen, filter, redact, refuse or remove any or all of your submission from www.cftc.gov that it may deem to be inappropriate for publication, such as obscene language. All submissions that have been redacted or removed that contain comments on the merits of the rulemaking will be retained in the public comment file and will be considered as required under the Administrative Procedure Act and other applicable laws, and may be accessible under the FOIA.

Geraghty, Special Counsel, 202–418–5634, pgeraghty@cftc.gov, Division of Swap Dealer and Intermediary Oversight, Commodity Futures Trading Commission, Three Lafayette Centre, 1155 21st Street NW., Washington, DC 20581.

SUPPLEMENTARY INFORMATION:

I. Background

A. Commission Requirements for Submission of CCO Annual Reports

Section 4s(k)(3) of the Commodity Exchange Act (“CEA”) requires CCOs for SDs and MSPs, in accordance with rules prescribed by the Commission, to prepare and sign an annual report (“CCO Annual Report”) describing, among other things, the SD’s or MSP’s compliance with the CEA and CFTC

regulations.³ CEA section 4s(k)(3)(B) requires the CCO Annual Report to accompany each appropriate financial report of the SD or MSP required to be furnished to the Commission.⁴ CEA section 4d(d) requires CCOs of FCMs to “perform such duties and responsibilities” as are established by Commission regulation or rules of a registered futures association.⁵

Regulations 3.3(e) and (f) codify the duty to prepare and furnish to the Commission a CCO Annual Report for all Registrants.⁶ Regulation 3.3(e) requires the CCO Annual Report to cover the most recently completed fiscal year of the Registrant and specifies certain reporting elements for Registrants in describing their compliance with the CEA and Commission regulations. Regulation 3.3(f)(1) requires the furnishing of the CCO Annual Report to the board or senior officer prior to its submission to the Commission. Regulation 3.3(f)(2) currently requires the CCO Annual Report to be furnished to the Commission electronically not more than 60 days after a Registrant’s fiscal year-end.

B. Regulation 3.3(f)(2) Implementation Experience

Since the adoption of the 60-day filing requirement, DSIO has continuously provided no-action relief for CCO Annual Reports submitted to the Commission within 90 days of a Registrant’s fiscal year-end.⁷ The no-action letter currently in effect, CFTC Staff Letter No. 15–15, responds to a request for relief on behalf of FCM and SD firms, which stated that having an

additional 30 days to file the CCO Annual Report allows each Registrant to conduct a more substantive and complete review of its compliance program.⁸

Recently, the U.S. Securities and Exchange Commission (“SEC”) adopted final rules corresponding to Regulation 3.3, and implementing a provision of Title VII of the Dodd-Frank Act the text of which is effectively identical to CEA section 4s(k)(3)(B).⁹ The SEC’s corresponding rule requires that the equivalent chief compliance officer annual report for security-based swap dealers and major security-based swap participants be submitted to the SEC within 30 days following the deadline for filing each entity’s annual financial report.¹⁰

C. Application of Regulation 3.3(f)(2) to Entities Located in Certain Non-U.S. Jurisdictions

In December 2013, the Commission issued comparability determinations deeming an SD or MSP located in Canada, the European Union, Hong Kong, Japan, or Switzerland (“Substituted Compliance Registrants”) to be in compliance with Regulation 3.3(e) if it complies with the applicable corresponding regulation in its home jurisdiction.¹¹ Specifically, a Substituted Compliance Registrant may elect to furnish the Commission with the comparable annual reporting information (hereinafter, “Comparable Annual Report”) specified under the standards of its home jurisdiction. However, the Commission did not provide a comparability determination with respect to Regulation 3.3(f) regarding the timing of when the

Comparable Annual Report must be furnished to the CFTC.¹²

II. The Proposal

A Proposed Amendments to Regulation 3.3(f)(2)

The Commission is proposing to codify the current no-action relief by amending Regulation 3.3(f)(2). The amendments would permit an FCM to furnish its CCO Annual Report to the Commission not more than 30 days after submission of the Form 1–FR–FCM¹³ or Financial Operational Combined Uniform Single Report (“FOCUS Report”). The Proposal would also permit an SD or MSP to furnish its CCO Annual Report to the Commission not more than 90 days after its fiscal year-end until such time as the Commission adopts and implements rules establishing the time for filing the annual financial condition report required under CEA section 4s(f). The Commission has proposed, but not yet adopted, a financial condition report requirement comprised of an annual audited financial report for SDs and MSPs.¹⁴ Once the Commission adopts and implements a financial condition report rule, like FCMs, an SD or MSP will have up to 30 days after the submission of its annual financial condition report to submit the CCO Annual Report to the Commission.

Regulation 3.3(e) requires a broad and detailed assessment of each Registrant’s compliance program over the preceding year as well as a discussion of planned changes and remedial steps to be taken for non-compliance matters. The Commission believes that providing up to 30 days after a Registrant’s applicable financial reports are due would provide Registrants an appropriate amount of time to complete the in-depth review and analyses required by Regulation 3.3(e). As a policy matter, the Commission recognizes that the periodic self-evaluation that underlies each CCO Annual Report is a critical step in promoting an active and robust compliance culture within firms.

In codifying the relief provided in CFTC Staff Letter No. 15–15, the Commission is clarifying that the statutory requirement for an SD or MSP’s CCO Annual Report to “accompany each appropriate financial report” allows for the CCO Annual

Report to be furnished to the Commission not more than 30 days after the submission of a Registrant’s annual financial report.¹⁵ The Commission recognizes the separate and distinct nature and purposes of the two reports, and believes that allowing Registrants to submit their CCO Annual Reports not more than 30 days after their financial reports are due satisfies the statutory requirement that the CCO Annual Report “accompany” the other financial report. This is also consistent with the SEC’s approach in its corresponding rule for delivery of chief compliance officer annual reports by security-based swap dealers and major security-based swap participants.¹⁶

B. Registrants Located in Substituted Compliance Jurisdictions

The Commission is also proposing to amend Regulation 3.3(f) to address the timing of the filing requirement for Comparable Annual Reports. If the requirements of the Substituted Compliance Registrant’s home jurisdiction identify a specific date by which the Comparable Annual Reports must be completed, then the Commission is proposing that Comparable Annual Reports may be furnished to the Commission electronically up to 15 days after the date on which the Comparable Annual Report must be completed.¹⁷ The additional 15 days would allow time for translation of the report text into English. If the Substituted Compliance Registrant’s home jurisdiction does not establish a specifically identifiable completion date, then the Substituted Compliance Registrant must comply with the standard time frames provided in Regulation 3.3(f), as amended. A specifically identifiable completion date would be a date that can be clearly identified such as a specific calendar

date or a set number of days after the Substituted Compliance Registrant’s fiscal year-end. A home jurisdiction requirement to complete the Comparable Annual Report only if some event occurs or upon request, or which does not specify a deadline, is not considered comparable to the Commission’s annual delivery requirement.

C. Proposed Amendments Regarding a Delegation From the Commission to the Division

Pursuant to Regulation 3.3(f)(5), Registrants may request from the Commission an extension of time to furnish their CCO Annual Reports if the failure to timely furnish the report could not be avoided absent “unreasonable effort or expense.” The rule provides the Commission with discretion in granting such extensions. To expedite review and consideration of requests for extensions, the Commission is proposing to delegate to the Director of DSIO, or such other employee(s) that the Director may designate, the authority to grant extensions of time subject to the same standard set forth in Regulation 3.3(f)(5). The Commission notes that the exercise of such delegated authority would need to be consistent with Regulation 3.3(f)(5) and therefore would be limited to unique facts and circumstances that clearly demonstrate that the inability to timely furnish the report to the Commission could not have been eliminated absent unreasonable effort or expense. The Commission believes that such delegation is prudent given that the decision to provide an extension requires consideration of specific facts and circumstances and often this consideration needs to occur within a relatively short period of time. As is the case with existing delegations to staff, the Commission would continue to reserve the right to perform the functions described in Regulation 3.3(f)(5) itself at any time.¹⁸

The Commission requests comment on the appropriateness of the proposed delegation and whether additional procedural detail is necessary.

D. Request for Comment

The Commission seeks comments regarding the following matters:

- Given the current filing requirements for the Form 1–FR–FCM and FOCUS Reports, and the anticipated

¹⁸ In addition, notwithstanding any such delegation, in any case in which a Commission employee delegated authority under this section believes it is appropriate, the employee may submit the question to the Commission for its consideration.

¹⁵ The Proposal would remove the obligation of Registrants to file their CCO Annual Reports “simultaneously” with the applicable FCM financial report or financial condition report.

¹⁶ In the adopting release, the SEC addresses the statutory language that links the filing of the CCO Annual Report with the filing of appropriate financial reports by stating, “The Commission is interpreting ‘accompany’ in Section 15F(k)(3)(B)(i) to mean follow within 30 days.” 81 FR 29959, 30059, n.1238.

¹⁷ While each of the jurisdictions that have been granted a comparability determination with respect to Regulation 3.3(e) requires Substituted Compliance Registrants to produce and complete comparable annual reporting information, there is variation among the foreign jurisdictions as to whether and/or when a Comparable Annual Report must be furnished to the home regulator. Therefore, the Commission is using the date on which the Comparable Annual Report must be completed as the benchmark for determining when the Comparable Annual Report must be furnished to the Commission.

¹² See note 11, *supra*.

¹³ The proposed amendment also makes a technical correction in Regulation 3.3(f)(2) by correcting the cross reference to the Commission regulation that requires the filing of Form 1–FR–FCM to Regulation 1.10(b)(1)(ii).

¹⁴ See Capital Requirements of Swap Dealers and Major Swap Participants, 76 FR 27802, 27838 (proposed May 12, 2011).

filing requirements for the financial condition report, is it appropriate to permit FCMs, SDs, and MSPs an additional 30-days to furnish their CCO Annual Report to the Commission? Are there any practical or policy reasons for not permitting the additional 30 days?

- Does codifying the relief granted in CFTC Staff Letter No. 15–15 sufficiently address Registrants' concerns?
- Should the Commission provide any further clarification of the requirements of Regulation 3.3(f) as they apply to entities located in jurisdictions for which comparability determinations have been issued?

III. Related Matters

A. Regulatory Flexibility Act

The Regulatory Flexibility Act¹⁹ (“RFA”) requires that agencies consider whether the rules they propose will have a significant economic impact on a substantial number of small entities and, if so, provide a regulatory flexibility analysis reflecting the impact. Section 3.3(f)(2), as proposed, amends the filing deadline for CCO Annual Reports of FCMs, SDs, and MSPs and clarifies the filing deadline for Comparable Annual Reports. The proposed amendments would affect FCMs, SDs, and MSPs that are required to be registered with the Commission. The Commission has previously established certain definitions of “small entities” to be used in evaluating the impact of its regulations on small entities in accordance with the RFA, and has previously determined that FCMs, SDs, and MSPs are not small entities for purposes of the RFA.²⁰ Therefore, the Commission believes that the amendments to Regulation 3.3 would not have a significant economic impact on a substantial number of small entities. Accordingly, the Chairman, on behalf of the Commission, hereby certifies, pursuant to 5 U.S.C. 605(b), that the proposed amendments will not have a significant economic impact on a substantial number of small entities.

B. Paperwork Reduction Act

The Paperwork Reduction Act of 1995 (“PRA”)²¹ provides that a federal agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it

displays a currently valid control number issued by the Office of Management and Budget (“OMB”). The collection of information related to this proposed rule is OMB control number 3038–0080—Annual Report for Chief Compliance Officer of Registrants. The Commission believes that this proposed rule will not impose any new information collection requirements that require approval of OMB under the PRA. As a general matter, the proposed rule would allow Registrants up to 90 days after the end of their fiscal years, and certain Substituted Compliance Registrants with up to 15 days after the date on which the Comparable Annual Report must be completed under the requirements of their home jurisdiction, to file the CCO Annual Report and Comparable Annual Reports, respectively. As such, this proposed rule does not, by itself, impose any new burden or any new information collection requirements in addition to those that already exist in connection with the preparation and delivery of the CCO Annual Report pursuant to part 3 of the Commission’s regulations.

C. Cost-Benefit Considerations

1. Background

As discussed above, the Commission is proposing amendments to the filing requirements for CCO Annual Reports in Regulation 3.3 that would: (1) Increase the amount of time registrants have to file their CCO Annual Reports with the Commission; and (2) clarify the filing requirements for Comparable Annual Reports. The baseline for this cost and benefit consideration is existing Regulation 3.3. Although CFTC Staff Letter No. 15–15, as discussed above, currently offers no-action relief that is substantially similar to the relief that the proposed amendments would grant Registrants, as a no-action letter, it only represents the position of the issuing Division or Office and cannot bind the Commission or other Commission staff.²² Consequently, the Commission believes that CFTC Staff Letter No. 15–15 should not set or affect the baseline against which the Commission considers the costs and benefits of the proposal.

2. Costs

The Commission received no comments during the rulemaking process for Regulation 3.3 regarding costs associated with the timing of the filing deadline for the CCO Annual Report. The proposed amendment does not change the report contents or

require any additional actions to be taken by Registrants. The additional 30 days (or up to 15 days after the date on which a Comparable Annual Report must be completed under applicable home jurisdiction standards that allow more time) provided by the proposal lengthens the time before senior management or the board of the Registrants and the Commission may receive the CCO Annual Reports. The additional time to furnish the reports should not materially impact regulatory oversight given that the purpose of the reports is to provide a status update for the Registrant’s compliance activities over the course of the preceding fiscal year and planned changes for the coming year. The reports generally do not serve to address crisis situations for which immediacy is critical. Therefore, the additional time allowed will not materially impact the usefulness of the information in the reports.²³ The Commission has no other information available to it that would indicate that changing the filing deadline would measurably change the cost to prepare the CCO Annual Reports. Accordingly, the Commission preliminarily believes that the proposal would not impose any additional costs on any other market participants, the markets themselves, or the general public. The Commission invites comment regarding the nature of, and the extent to which, costs associated with the CCO Annual Reports could change as a result of the adoption of the proposal and, to the extent they can be quantified, monetary and other numerical estimates thereof.

3. Benefits

The Commission believes that the proposal would provide relief for Registrants from time pressures in preparing and filing their CCO Annual Reports. The additional time provided will allow Registrants to more carefully complete their internal processes used to develop the broad variety of information needed for the reports resulting in more accurate and complete reports. The Commission invites comment regarding the nature and extent of these and any other benefits that could result from adoption of the proposal—including benefits to other market participants, the market itself, or the general public—and, to the extent they can be quantified, monetary and other numerical estimates thereof.

¹⁹ 5 U.S.C. 601 *et seq.*

²⁰ See Policy Statement and Establishment of Definitions of “Small Entities” for Purposes of the Regulatory Flexibility Act, 47 FR 18618, 18619 (Apr. 30, 1982) (FCMs); Further Definition of “Swap Dealer,” “Security-Based Swap Dealer,” “Major Swap Participant,” “Major Security-Based Swap Participant” and “Eligible Contract Participant,” 77 FR 30596, 30701 (May 23, 2012) (SDs and MSPs).

²¹ 44 U.S.C. 3501 *et seq.*

²² See 17 CFR 140.99(a)(2). See also CFTC Staff Letter No. 15–15 at 4.

²³ The CCO Annual Report must contain a description of material non-compliance events that occurred over the review period. However, reporting on those events in the CCO Annual Report provides transparency regarding the effectiveness of the implementation of the compliance program over the preceding year for management and the CFTC.

4. Section 15(a) Factors

Section 15(a) of the CEA requires the Commission to consider the costs and benefits of its actions before promulgating a regulation under the CEA or issuing certain orders.²⁴ Section 15(a) further specifies that the costs and benefits shall be evaluated in light of five broad areas of market and public concern: (1) Protection of market participants and the public; (2) efficiency, competitiveness, and financial integrity of futures markets; (3) price discovery; (4) sound risk management practices; and (5) other public interest considerations. The Commission considers the costs and benefits resulting from its discretionary determinations with respect to the section 15(a) factors.

a. Protection of Market Participants and the Public

The Commission recognizes that there are trade-offs between reducing regulatory burdens and ensuring that the Commission has sufficient, timely information to fulfill its regulatory mission. The proposed amendments to Regulation 3.3 are intended to reduce some of the regulatory burdens on Registrants. While the amendment will delay the time by which the Commission will receive the CCO Annual Reports, the delay is relatively short given that the information in the reports looks back over the entire year-long reporting period and identifies planned improvements for the coming year. Accordingly, the Commission preliminarily believes that the short delay will not affect the protection of market participants and the public.

b. Efficiency, Competitiveness, and Financial Integrity of Markets

The Commission believes that the proposed amendments to Regulation 3.3 could improve allocational efficiency for participants in the market by reducing the burden of preparing the CCO Annual Report in a shorter time-frame, thereby allowing them to allocate compliance resources more efficiently over the report preparation period. The Commission preliminarily believes that the proposed amendments to Regulation 3.3 will not have any market efficiency, competitiveness, or market integrity impacts because the reports address internal compliance programs of each Registrant and are not publicly available.

c. Price Discovery

The Commission preliminarily believes that the proposed amendments

to Regulation 3.3 would not impact on price discovery. Given the fact that the proposed amendments affect only the timing of when the CCO Annual Reports are filed with the Commission and the CCO Annual Reports generally would not contain trade information or be available to the public, the proposed amendments would not affect price discovery.

d. Sound Risk Management Practices

The Commission preliminarily believes that the proposed amendments would not have a meaningful effect on the risk management practices of Registrants. While the CCO Annual Reports may discuss certain risk management aspects related to the compliance programs of the Registrants, the proposal would only amend the timing of delivery of the reports to the Commission, not the contents of the reports. As described above under subsection 4.a, the short delay in delivery of the reports provided for by the proposal is not significant given the nature of the information included in the report and allowing additional time to prepare the CCO Annual Reports might allow the Registrants to prepare better reports that more effectively address the information contained therein.

e. Other Public Interest Considerations

The Commission has not identified any other public interest considerations for this rulemaking.

5. Request for Comment

The Commission invites comment on all aspects of its preliminary consideration of the costs and benefits associated with the proposal and the five factors the Commission is required to consider under CEA section 15(a). In addressing these areas and any other aspect of the Commission's preliminary cost-benefit considerations, the Commission encourages commenters to submit any data or other information they may have quantifying and/or qualifying the costs and benefits of the proposal.

List of Subjects in 17 CFR Part 3

Administrative practice and procedure, Brokers, Commodity futures, Major swap participants, Reporting and recordkeeping requirements, Swap dealers.

For the reasons stated in the preamble, the Commodity Futures Trading Commission proposes to amend 17 CFR part 3 as follows:

PART 3—REGISTRATION

■ 1. The authority citation for part 3 is revised to read as follows:

Authority: 5 U.S.C. 552, 552b; 7 U.S.C. 1a, 2, 6a, 6b, 6b–1, 6c, 6d, 6e, 6f, 6g, 6h, 6i, 6k, 6m, 6n, 6o, 6p, 6s, 8, 9, 9a, 12, 12a, 13b, 13c, 16a, 18, 19, 21, 23, as amended by Title VII of the Dodd-Frank Wall Street Reform and Consumer Protection Act, Pub. L. 111–203, 124 Stat. 1376 (Jul. 21, 2010).

■ 2. Amend § 3.3 as follows:

- a. Revise paragraph (f)(2); and
- b. Add paragraph (h).

The revision and addition to read as follows:

§ 3.3 Chief compliance officer.

* * * * *

(f) * * *

(2)(i) Except as provided in paragraph (f)(2)(ii) of this section, the annual report shall be furnished electronically to the Commission not more than 30 days after the submission of Form 1–FR–FCM, as required under § 1.10(b)(1)(ii) of this chapter, the Financial and Operational Combined Uniform Single Report, as required under § 1.10(h) of this chapter, or the financial condition report, as required under section 4s(f) of the Act, as applicable. Until such time as the Commission adopts and implements a regulation establishing the time for filing the financial condition report, a swap dealer or major swap participant shall furnish the annual report electronically to the Commission not more than 90 days after the end of its fiscal year.

(ii) The annual report of a swap dealer or major swap participant that is eligible to comply with a substituted compliance regime for paragraph (e) of this section pursuant to a comparability determination of the Commission may be furnished to the Commission electronically up to 15 days after the date on which the comparable annual report must be completed under the requirements of the applicable substituted compliance regime. If the substituted compliance regime does not specify a date by which the comparable annual report must be completed, then the annual report shall be furnished to the Commission by the date specified in paragraph (f)(2)(i) of this section.

* * * * *

(h) *Delegation of Authority.* The Commission hereby delegates to the Director of the Division of Swap Dealer and Intermediary Oversight, or such other employee or employees as the Director may designate from time to time, the authority to grant extensions of time, as set forth in paragraph (f)(5) of this section. Notwithstanding such

²⁴ 7 U.S.C. 19(a).

delegation, in any case in which a Commission employee delegated authority under this paragraph believes it appropriate, he or she may submit to the Commission for its consideration the question of whether an extension of time should be granted. The delegation of authority in this paragraph shall not prohibit the Commission, at its election, from exercising the authority set forth in paragraph (f)(5) of this section.

Issued in Washington, DC, on August 8, 2016, by the Commission.

Christopher J. Kirkpatrick,
Secretary of the Commission.

Note: The following appendix will not appear in the Code of Federal Regulations.

Appendix to Chief Compliance Officer Annual Report Requirements for Futures Commission Merchants, Swap Dealers, and Major Swap Participants; Amendments to Filing Dates—Commission Voting Summary

On this matter, Chairman Massad and Commissioners Bowen and Giancarlo voted in the affirmative. No Commissioner voted in the negative.

BILLING CODE 6351–01–P

DEPARTMENT OF THE INTERIOR

Bureau of Safety and Environmental Enforcement

30 CFR Part 250

[Docket ID: BSEE–2016–0004; 16XE1700DX EEEE500000 EX1SF0000.DAQ000]

RIN 1014–AA32

Oil and Gas and Sulfur Operations in the Outer Continental Shelf—Decommissioning Costs for Pipelines

AGENCY: Bureau of Safety and Environmental Enforcement, Department of the Interior.

ACTION: Proposed rule.

SUMMARY: The Bureau of Safety and Environmental Enforcement (BSEE) proposes to amend the regulations requiring lessees and owners of operating rights to submit summaries of actual decommissioning expenditures incurred for certain decommissioning activities related to oil and gas and sulfur operations on the Outer Continental Shelf (OCS). The proposed rule would expand the scope of the current regulations to require lessees, owners of operating rights, and right-of-way (ROW) holders to submit summaries of actual expenditures incurred for pipeline decommissioning activities.

DATES: Submit comments by September 12, 2016. BSEE may not fully consider comments received after this date. You may submit comments to the Office of Management and Budget (OMB) on the information collection burden in this proposed rule by September 12, 2016.

ADDRESSES: You may submit comments on this proposed rulemaking by any of the following methods. Please use the Regulation Identifier Number (RIN) 1014–AA32 as an identifier in your message. BSEE may post all submitted comments on a public Web site.

1. Submit comments electronically via the Federal eRulemaking Portal: <http://www.regulations.gov>. In the entry titled “Enter Keyword or ID,” enter BSEE–2016–0004, then click “Search.” Follow the instructions to submit public comments and view supporting and related materials available for this proposed rulemaking.

2. Mail or hand-carry comments to the Department of the Interior (DOI); Bureau of Safety and Environmental Enforcement; Attention: Regulations and Standards Branch; 45600 Woodland Road, Sterling, VA 20166, VAE–ORP. Please reference “Decommissioning Costs for Pipelines, 1014–AA32” in your comments and include your name and return address.

3. Comments on the information collection contained in this proposed rule should be submitted separately from those on the substance of the proposed rule. Send comments on the information collection burden in this proposed rule to: OMB, Interior Desk Officer 1014–AA32, 202–395–5806 (fax); or email: OIRA_submission@omb.eop.gov. Please send a copy of your comments to BSEE using one of the methods previously described.

FOR FURTHER INFORMATION CONTACT: Betty Cox, Regulatory Analyst, Regulations and Standards Branch, Betty.Cox@bsee.gov, (703) 787–1616.

SUPPLEMENTARY INFORMATION:

BSEE’s Functions and Authority

BSEE promotes safety, protects the environment, and conserves natural resources through vigorous regulatory oversight and enforcement of certain activities on the OCS. BSEE derives its authority primarily from the Outer Continental Shelf Lands Act (OCSLA), 43 U.S.C. 1331–1356a. Congress enacted OCSLA in 1953, codifying Federal control over the OCS and authorizing the Secretary of the Interior (Secretary) to regulate oil and natural gas exploration, development, and production operations on the OCS. The Secretary has authorized BSEE to perform certain of these functions,

including overseeing decommissioning. (See 30 CFR 250.101; 30 CFR part 250, subpart Q.) To carry out its responsibilities, BSEE regulates exploration, development, and production of oil and natural gas to enhance safety and environmental protection in a way that reflects advancements in technology and new information. BSEE also conducts onsite inspections to ensure compliance with regulations, lease terms, and approved plans or permits. Detailed information concerning BSEE’s regulations and guidance for the offshore industry may be found on BSEE’s Web site at: www.bsee.gov/Regulations-and-Guidance/index.

Public Participation and Availability of Comments

BSEE encourages you to participate in this proposed rulemaking by submitting written comments, as discussed in the **ADDRESSES** and **DATES** sections of this proposed rule. This proposed rule provides 30 days for public comment for the following reasons. The need for submission of actual decommissioning cost information for plugging wells, removing platforms, and clearing of sites was explained in a proposed rule published on May 27, 2009 (74 FR 25177) and a final rule published on December 4, 2015 (80 FR75806). That final rule addressed and responded to all of the relevant comments submitted on the proposed rule. This proposed rule would extend the existing requirements for submitting summaries of actual decommissioning costs (30 CFR 250.1704(i) and (j)) to pipelines. The reasons for this proposed rule, as discussed in the Background and Purpose of Proposed Amendment sections of this notice are effectively the same for pipelines as the reasons discussed in the December 4, 2016 rule for the reporting of decommissioning costs for other facilities. BSEE does not expect that public comments on this proposed rule are likely to raise any significant issues that were not raised in the earlier decommissioning cost reporting rulemaking. Moreover, the affected stakeholders in the oil and gas industry are already familiar with the terms and requirements of the existing decommissioning cost reporting rule, which would apply without change to pipelines under this proposed rule. Accordingly, BSEE has determined that 30 days provides a reasonable and adequate opportunity for the public to comment on this proposed rule.

Before including your address, phone number, email address, or other personal identifying information in your comment on this proposed rule,

however, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Background

Among its responsibilities, BSEE regulates certain types of oil and gas pipelines used on the OCS. (See 30 CFR 250.1000–250.1019.) In general, BSEE regulates pipelines or pipeline segments on the OCS that are operated by oil and gas producers, as opposed to pipelines operated by transporters. Specifically, BSEE regulates producer-operated pipelines that: (1) Extend upstream (generally seaward) from each point on the OCS at which operating responsibility transfers from a producing operator to a transporting operator; (2) extend upstream (generally seaward) from the last valve (including associated safety equipment) on the last OCS production facility and that do not connect to a transporter-operated pipeline on the OCS before crossing into State waters; or (3) connect production facilities on the OCS. (See § 250.1001.) BSEE also regulates transporter-operated pipelines that DOI and the U.S. Department of Transportation (DOT) have agreed are to be regulated as DOI pipelines as well as all other OCS pipelines not subject to DOT regulation.¹ (See *id.*)

Pipelines regulated by BSEE generally fall within two categories: (1) “lease term” pipelines (*i.e.*, pipelines owned and operated by a lessee or operator and located entirely within the boundaries of a single lease, unitized leases, or the contiguous leases of that lessee or operator); or (2) ROW pipelines (*i.e.*, OCS pipelines owned and operated by an entity other than the lessee or operator of the lease(s), unit, or contiguous leases in which the pipeline is contained, as well as pipelines that cross unleased areas).² Among other things, BSEE approves the installation, modification, and decommissioning of all lease term and ROW pipelines, and the modification or relinquishment of all pipeline ROW grants on the OCS. BSEE’s regulations for decommissioning

pipelines are found at 30 CFR 250.1700 through 250.1704 and 250.1750 through 250.1754.

As of August 1, 2016, BSEE regulates 4,842 active pipeline segments³ (totaling approximately 20,837 miles) and 1,553 out-of-service pipeline segments (totaling approximately 2,249 miles). In addition, BSEE has regulatory authority over 8,832 decommissioned pipeline segments, as well as 825 pipeline segments that have been approved for decommissioning.

BSEE’s requirements for decommissioning a pipeline are found at §§ 250.1750–250.1754. Pursuant to § 250.1751, requirements for decommissioning a pipeline in place include: pigging (to remove any residual hydrocarbons from the pipeline), unless the Regional Supervisor determines that pigging is not practical; flushing and filling the pipeline with seawater; cutting and plugging the ends of the pipeline; and burying the ends at least 3 feet below the seafloor or covering the ends with protective concrete mats, if required by the Regional Supervisor. Section 250.1751(g) also requires removal of all valves and other fittings that could unduly interfere with other uses of the OCS.

In addition, under § 250.1754, BSEE has the authority to require that lessees, owners of operating rights, and ROW holders remove pipelines previously decommissioned in place if and when the Regional Supervisor determines that the pipeline is an obstruction.

BSEE’s requirements for decommissioning by removing all or part of a pipeline are found at § 250.1752 and include, in part, pigging and flushing the pipeline (unless the Regional Supervisor determines that pigging is not practical) before removal.

Purpose of Proposed Amendment

In 2009, BSEE’s predecessor agency, the Minerals Management Service (MMS), proposed new reporting requirements related to lease term pipelines when MMS approves a lease assignment. (See 74 FR 25177 (May 27, 2009).) MMS also proposed to require the submission of information on expenditures for decommissioning of wells, platforms and other facilities and for site clearance. (See *id.*)

In a final rule published on December 4, 2015, BSEE amended its regulations to require lessees and owners of operating rights to submit summaries of actual decommissioning expenditures for certain required decommissioning activities within 120 days after

completion of each such activity. (See 80 FR 75806.) Specifically, the final rule required reporting of summaries of expenditures for plugging wells, removing platforms and other facilities, and clearing obstructions from sites. In addition, the final rule authorized BSEE to require additional supporting information regarding specific decommissioning costs on a case-by-case basis. The final rule was codified at 30 CFR 250.1704(h) and (i).

Effective July 28, 2016, BSEE’s Well Control final rule revised paragraph (g) in § 250.1704, added a new paragraph (h), and redesignated existing paragraphs (h) and (i) as paragraphs (i) and (j), respectively. (See 81 FR 25888 (April 29, 2016).) The Well Control rule did not, however, affect the substance of those decommissioning cost reporting provisions.

On April 27, 2016, BSEE issued a Notice to Lessees and Operators (NTL), No. 2016–N03, *Reporting Requirements for Decommissioning Expenditures on the OCS*, providing guidance and clarification regarding the submission of the decommissioning cost summaries required by § 250.1704(i).

BSEE did not include reporting of expenditures for pipeline decommissioning in the December 2015 final rule because the 2009 proposed rule did not expressly refer to pipeline decommissioning expenditures. BSEE has determined, however, that accurate information about expenditures incurred for pipeline decommissioning activities is needed to better estimate future decommissioning costs for those activities.

As BSEE explained in the December 2015 final rule, with regard to expenditures for other types of decommissioning activities under § 250.1704(i), summaries of actual decommissioning expenditures will help BSEE better estimate future decommissioning costs. (See 80 FR 75806.) For the same reason, summaries of actual pipeline decommissioning expenditures will help BSEE better estimate future decommissioning costs. In addition, BSEE will share its decommissioning cost estimates with the Bureau of Ocean Energy Management (BOEM) for use in setting necessary financial assurance levels to (1) minimize the possibility that the government will incur future financial liability for decommissioning pipelines where the responsible party has failed to carry out the required decommissioning; and (2) enhance the accuracy of financial assurance requirements necessary to cover future decommissioning liabilities.

¹ BSEE-regulated pipelines are also referred to as “DOI pipelines.” See 30 CFR 250.1001. Pipelines subject to DOT regulations are commonly referred to as “DOT pipelines,” see *id.*, and are regulated by the DOT Pipeline and Hazardous Materials Safety Administration (PHMSA).

² ROW pipelines also include all DOI pipelines not defined as lease term pipelines. See 30 CFR 250.1001 for definitions of lease term pipelines and ROW pipelines.

³ BSEE assigns pipeline segment numbers as specific pipeline identifiers.

Accordingly, BSEE proposes to expand the scope of § 250.1704(i) to require that lessees, owners of operating rights, and pipeline ROW holders submit certified summaries of actual expenditures for decommissioning of pipelines.⁴ This proposal would also authorize Regional Supervisors, under § 250.1704(j), to require the submission of additional information, on a case-by-case basis, to support summaries of pipeline decommissioning expenditures submitted under § 250.1704(i). This proposal rule would not otherwise revise the existing decommissioning cost reporting provisions.

Procedural Matters

Regulatory Planning and Review (Executive Orders 12866 and 13563)

Executive Order (E.O.) 12866 provides that OMB, Office of Information and Regulatory Affairs (OIRA), will review all significant rules. BSEE has determined that this proposed rule would not be a significant regulatory action as defined by section 3(f) of E.O. 12866 because:

- It is not expected to have an annual effect on the economy of \$100 million or more;
- It would not adversely affect in a material way the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities;
- It would not create a serious inconsistency or otherwise interfere with an action taken or planned by another agency;
- It would not materially alter the budgetary impact of entitlements, grants, user fees, or loan programs, or the rights or obligations of their recipients; and
- It would not raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in E.O. 12866.

Accordingly, BSEE has not prepared an economic analysis beyond the analysis required under the Paperwork Reduction Act, and OIRA has not reviewed this proposed rule.

E.O. 13563 reaffirms the principles of E.O. 12866 while calling for improvements in the Nation's regulatory system to promote predictability, to reduce uncertainty, and to use the best, most innovative, and least burdensome tools for achieving regulatory ends. E.O. 13563 directs agencies to consider

regulatory approaches that reduce burdens and maintain flexibility and freedom of choice for the public where these approaches are relevant, feasible, and consistent with regulatory objectives. It also emphasizes that regulations must be based on the best available science and that the rulemaking process must allow for public participation and an open exchange of ideas. BSEE developed this proposed rule in a manner consistent with these requirements.

Regulatory Flexibility Act (RFA)

BSEE certifies that this proposed rule would not have a significant economic effect on a substantial number of small entities under the RFA (5 U.S.C. 601 *et seq.*). This proposed rule would potentially affect offshore lessees, owners of operating rights and other operators, and pipeline ROW holders who perform decommissioning activities under 30 CFR part 250, subpart Q. In the December 2015 final rule, using the Small Business Administration's North American Industry Classification System (NAICS) codes 211111 (Crude Petroleum and Natural Gas Extraction) and 213111 (Drilling Oil and Gas Wells), we estimated that a substantial number, about 90 of the 130 active companies potentially affected by that rule (*i.e.*, lessees and operators), would be considered small entities. (*See* 80 FR 75808.) However, we concluded that the final rule would not have a significant economic effect on those small entities because the cost of requiring decommissioning cost summaries is not significant. (*See id.*)

This proposed rule could affect some additional companies (*i.e.*, ROW holders that were not covered by the December 2015 final rule as lessees or owners of operating rights) that would be required to submit pipeline decommissioning cost summaries. Using more recent information than was available to us when we published the December 2015 final rule, we estimate that the proposal to require reporting of pipeline decommissioning costs could affect approximately 111 lessees, owners of operating rights, and ROW holders that currently own or control DOI pipelines, including many companies already covered by the December 2015 final rule. Of these 111 potentially affected entities, we estimate that a substantial number (66 companies) are small entities. Therefore, this proposed rule would affect a substantial number of small entities.

However, the proposed rule would not impose significant economic impacts on the potentially affected

small entities. The proposed requirement to submit pipeline decommissioning cost summaries would not result in significant additional costs or burdens for any affected entity. As indicated in the Paperwork Reduction Act section of this document, the annual burden of the proposed rule is estimated to be only 500 hours in total for all affected entities (whether or not small) to prepare and submit their pipeline decommissioning summaries. Accordingly, since the changes reflected in the proposed rule would not have a significant economic effect on a substantial number of small entities, the RFA does not require BSEE to prepare a regulatory flexibility analysis for this proposed rule.

Small Business Regulatory Enforcement Fairness Act (SBREFA)

This proposed rule is not a major rule under the SBREFA (5 U.S.C. 804(2)). This rule would not:

- Have an annual effect on the economy of \$100 million or more;
- Cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or
- Have significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of U.S.-based enterprises to compete with foreign-based enterprises.

Your comments are important. The Small Business and Agriculture Regulatory Enforcement Ombudsman and 10 Regional Fairness Boards were established to receive comments from small businesses about Federal agency enforcement actions. The Ombudsman will annually evaluate the enforcement activities and rate each agency's responsiveness to small business. If you wish to comment on the actions of BSEE, call 1-888-734-3247. You may comment to the Small Business Administration (SBA) without fear of retaliation. Allegations of discrimination/retaliation filed with the SBA will be investigated for appropriate action.

Unfunded Mandates Reform Act of 1995

This proposed rule would not impose an unfunded mandate on State, Tribal, or local governments or the private sector of more than \$100 million per year. The proposed rule also would not have a significant or unique effect on State, Tribal, or local governments or the private sector. Thus, a statement containing the information required by

⁴ BSEE recognizes that a designated operator may submit the required summary of decommissioning costs on behalf of a lessee.

the Unfunded Mandates Reform Act (2 U.S.C. 1531 *et seq.*) is not required.

Takings Implication Assessment (E.O. 12630)

Under the criteria in E.O. 12630, this proposed rule would not effect a taking or otherwise have takings implications. This proposed rule is not a governmental action capable of interference with constitutionally protected property rights. Therefore, a Takings Implication Assessment is not required.

Federalism (E.O. 13132)

Under the criteria in E.O. 13132, this proposed rule would not have federalism implications. This proposed rule would not have a substantial direct effect on the States or the relationship between the Federal and State governments. To the extent that State and local governments have a role in OCS activities, this proposed rule would not affect that role. Accordingly, a federalism summary impact statement is not required.

Civil Justice Reform (E.O. 12988)

This proposed rule complies with the requirements of E.O. 12988, *Civil Justice Reform* (February 7, 1996). Specifically, this rule:

- Meets the criteria of section 3(a) of E.O. 12988 requiring that all regulations be reviewed to eliminate drafting errors and ambiguity and be written to minimize litigation; and
- Meets the criteria of section 3(b)(2) of E.O. 12988 requiring that all regulations be written in clear language and contain clear legal standards.

Consultation With Indian Tribal Governments (E.O. 13175)

We have evaluated this proposed rule under the Department’s tribal

consultation policy and under the criteria in E.O. 13175 and have determined that it would have no substantial direct effects on federally recognized Indian tribes. As a result, consultation under the Department’s tribal consultation policy is not required.

Paperwork Reduction Act (PRA)

This proposed rule contains an information collection (IC) that will be submitted to the OMB for review and approval under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*). As part of our continuing effort to reduce paperwork and respondent burdens, BSEE invites the public and other Federal agencies to comment on any aspect of the reporting and recordkeeping burden. If you wish to comment on the IC aspects of this proposed rule, you may send your comments directly to OMB and send a copy of your comments to the Regulations and Standards Branch (for more information, see the **DATES** and **ADDRESSES** section of this document). Please refer to *Decommissioning Costs for Pipelines*, 1014-AA32, in your comments. BSEE specifically requests comments concerning the need for the information, its practical utility, the accuracy of the agency’s burden estimate, and ways to minimize the burden. You may obtain a copy of the supporting statement for the new collection of information by contacting the Bureau’s Information Collection Clearance Officer at (703) 787-1607. To see a copy of the entire IC request submitted to OMB, go to <http://www.reginfo.gov> (select Information Collection Review, Currently Under Review).

The title of the collection of information for this proposed rule is 30 CFR part 250, subpart Q,

Decommissioning Costs for Pipelines. As with the other decommissioning expenditure information currently required to be submitted to BSEE under § 250.1704(i), summaries of actual pipeline decommissioning expenditures will help BSEE to better estimate future decommissioning costs for OCS pipelines. BOEM will then use BSEE’s future pipeline decommissioning cost estimates to set necessary financial assurance levels to minimize or eliminate the possibility that the government will incur liability for future pipeline decommissioning.

Potential respondents comprise Federal OCS oil, gas, and sulfur lessees, owners of operating rights, and pipeline ROW holders. Responses to this collection are mandatory. The frequency of response is on occasion. The IC does not include questions of a sensitive nature. BSEE will protect confidential commercial and proprietary information according to FOIA (5 U.S.C. 552) and its implementing regulations (43 CFR part 2), and 30 CFR 250.197 (*Data and information to be made available to the public or for limited inspection*), and 30 CFR part 252 (*OCS Oil and Gas Information Program*).

Once the requirements of this proposed rulemaking have been codified, BSEE will consolidate these additional burden hours into the primary collection for 30 CFR part 250, subpart Q, under OMB Control Number 1014-0010 (expiration 10/31/16; 29,437 burden hours and \$2,152,644 non-hour cost burdens). There are no non-hour cost burdens associated with this proposed rulemaking. The following table is a breakdown of the burden estimate:

BURDEN TABLE

Citation 30 CFR 250	Reporting and recordkeeping requirements	Hour burden	Average number of annual responses	Annual burden hours
250.1704(i)	Submit to the Regional Supervisor a complete summary of expenditures incurred within 120 days after completion of each decommissioning activity (including permanently plugging any well, removal of any platform or facility, decommissioning of pipelines, etc.).	1	500 pipeline summaries ..	500
250.1704(i)	Submit certified statement attesting to accuracy of the summary for expenditures incurred.	Exempt from the PRA under 5 CFR 1320.3(i)(1).		0
Total	500 responses	500

An agency may not conduct or sponsor and you are not required to

respond to, a collection of information

unless it displays a currently valid OMB control number.

National Environmental Policy Act of 1969 (NEPA)

This proposed rule meets the criteria set forth in 516 Departmental Manual (DM) 15.4C(1) for a categorical exclusion because it involves modification of existing regulations, the impacts of which would be limited to administrative or economic effects with minimal environmental impacts.

We have also analyzed this proposed rule to determine if it meets any of the extraordinary circumstances set forth in 43 CFR 46.215 that would require an environmental assessment or an environmental impact statement for actions otherwise eligible for a categorical exclusion. We have concluded that this proposed rule would not meet any of the criteria for extraordinary circumstances.

Data Quality Act

In developing this proposed rule, we did not conduct or use a study, experiment, or survey requiring peer review under the Data Quality Act (44 U.S.C. 3516 *et seq.*,

Public Law 106–554, app. C § 515, 114 Stat. 2763, 2763A–153–154).

Effects on the Nation’s Energy Supply (E.O. 13211)

This proposed rule would not be a significant energy action under E.O. 13211 because:

- It is not a significant regulatory action under E.O. 12866;
- It is not likely to have a significant adverse effect on the supply, distribution or use of energy; and
- It has not been designated as a significant energy action by the Administrator of OIRA.

Clarity of This Regulation (E.O. 12866 and E.O. 12988)

We are required by E.O. 12866 and E.O. 12988, and by the Presidential Memorandum of June 1, 1998, to write all rules in plain language. This means that each rule we publish must:

- Be logically organized;
- Use the active voice to address readers directly;
- Use clear language rather than jargon;
- Be divided into short sections and sentences; and
- Use lists and tables wherever possible.

If you feel that we have not met these requirements, send us comments by one of the methods listed in the **ADDRESSES** section. To better help us meet these requirements, your comments should be as specific as possible. For example, you should tell us the numbers of the sections or paragraphs that you find unclear, which sections or sentences are too long, and the sections where you feel lists or tables would be useful.

List of Subjects in 30 CFR Part 250

Administrative practice and procedure, Continental Shelf, Environmental impact statements, Environmental protection, Government contracts, Investigations, Oil and gas exploration, Penalties, Reporting and recordkeeping requirements, Sulfur.

Janice M. Schneider,

Assistant Secretary, Land and Minerals Management.

For the reasons stated in the preamble, BSEE proposes to amend 30 CFR part 250 as follows:

PART 250—OIL AND GAS AND SULFUR OPERATIONS IN THE OUTER CONTINENTAL SHELF

- 1. The authority citation for part 250 continues to read as follows:

Authority: 30 U.S.C. 1751, 31 U.S.C. 9701, 33 U.S.C. 1321(j)(1)(C), 43 U.S.C. 1334.

- 2. Amend § 250.1704 by revising paragraphs (i) and (j) in the table to read as follows:

§ 250.1704 What decommissioning applications and reports must I submit and when must I submit them?

* * * * *

Decommissioning applications and reports	When to submit	Instructions
<p>(i) A certified summary of expenditures for permanently plugging any well, removal of any platform or other facility, clearance of any site after wells have been plugged or platforms or facilities removed, and decommissioning of pipelines.</p>	<p>Within 120 days after completion of each decommissioning activity specified in this paragraph.</p>	<p>Submit to the Regional Supervisor a complete summary of expenditures actually incurred for each decommissioning activity (including, but not limited to, the use of rigs, vessels, equipment, supplies and materials; transportation of any kind; personnel; and services). Include in, or attach to, the summary a certified statement by an authorized representative of your company attesting to the truth, accuracy and completeness of the summary. The Regional Supervisor may provide specific instructions or guidance regarding how to submit the certified summary.</p>
<p>(j) If requested by the Regional Supervisor, additional information in support of any decommissioning activity expenditures included in a summary submitted under paragraph (i) of this section.</p>	<p>Within a reasonable time as determined by the Regional Supervisor.</p>	<p>The Regional Supervisor will review the summary and may provide specific instructions or guidance regarding the submission of additional information (including, but not limited to, copies of contracts and invoices), if requested, to complete or otherwise support the summary.</p>

BILLING CODE 4310-VH-P

DEPARTMENT OF VETERANS AFFAIRS**38 CFR Part 4**

RIN 2900-AP27

Schedule for Rating Disabilities; Skin Conditions**AGENCY:** Department of Veterans Affairs.**ACTION:** Proposed rule.

SUMMARY: The Department of Veterans Affairs (VA) proposes to amend the portion of the VA Schedule for Rating Disabilities (VASRD or Rating Schedule) that addresses skin conditions. The purpose of these changes is to incorporate medical advances that have occurred since the last review, update current medical terminology, and provide clear evaluation criteria. The proposed rule reflects advances in medical knowledge, recommendations from the Skin Disorders Work Group, which is comprised of subject matter experts from both the Veterans Benefits Administration and the Veterans Health Administration, and comments from experts and the public gathered as part of a public forum. The public forum, focusing on revisions to the skin conditions section of the VASRD, was held in January 2012.

DATES: *Comment Date:* Comments must be received by VA on or before October 11, 2016.

Applicability Date: The provisions of this rulemaking shall apply to all applications for benefits that are received by VA or that are pending before the agency of original jurisdiction on or after the effective date of the final rule. The Secretary does not intend for the provisions of this rulemaking to apply to claims that have been certified for appeal to the Board of Veterans' Appeals or are pending before the Board of Veterans' Appeals, the United States Court of Appeals for Veterans Claims, or the United States Court of Appeals for the Federal Circuit.

ADDRESSES: Written comments may be submitted through www.Regulations.gov; by mail or hand-delivery to Director, Regulation Policy and Management (02REG), Department of Veterans Affairs, 810 Vermont Avenue NW., Room 1068, Washington, DC 20420; or by fax to (202) 273-9026. (This is not a toll free number.) Comments should indicate that they are submitted in response to "RIN 2900-AP27-Schedule for Rating Disabilities;

Skin Conditions." Copies of comments received will be available for public inspection in the Office of Regulation Policy and Management, Room 1068, between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday (except holidays). Please call (202) 461-4902 for an appointment. (This is not a toll free number.) In addition, during the comment period, comments may be viewed online through the Federal Docket Management System (FDMS) at www.Regulations.gov.

FOR FURTHER INFORMATION CONTACT: Gary Reynolds, M.D., Regulations Staff (211C), Compensation Service, Veterans Benefits Administration, Department of Veterans Affairs, 810 Vermont Avenue NW., Washington, DC 20420, (202) 461-9700. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: The National Defense Authorization Act For Fiscal Year 2004, sec. 1501-07, Public Law 108-136, 117 Stat. 1392, established the Veterans' Disability Benefits Commission (Commission). Section 1502 of Public Law 108-136 mandated the Commission to study ways to improve the disability compensation system for disabled military veterans. The Commission consulted with the Institute of Medicine (IOM) to review the medical aspects of the current disability compensation policies for veterans. In 2007, the IOM released its report titled, "A 21st Century System for Evaluating Veterans for Disability Benefits."

The IOM Report was notable in several respects. The IOM observed, in part, that the VASRD was inadequate at times because it contained obsolete information and did not sufficiently integrate current and accepted diagnostic procedures. In addition, the IOM observed that the current body system organization of the VASRD does not reflect current knowledge of the relationships between conditions and comorbidities. Institute of Medicine, Committee on Medical Evaluation of Veterans for Disability Compensation, "A 21st Century System for Evaluating Veterans for Disability Benefits," 113 (Michael McGeary et al. eds. 2007).

Following release of the IOM report, VA created a Skin Disorders Work Group (Work Group). The goals adopted by the Work Group were to: 1) improve and update the criteria that VA uses to assign levels of disability after service connection is granted; 2) improve the level of fairness in adjudication of benefits related to service connected disabilities of Veterans; and 3) invite public participation. The Work Group was led by co-chairs from the Veterans Health Administration (VHA) and

Veterans Benefits Administration (VBA). The workgroup was comprised of subject matter experts (SMEs) from within VA, DoD, and medical academia. In addition, members from several Veterans Service Organizations (VSOs) were invited to participate as representatives from the public. The Work Group held a public forum in New York City during January 2012, where several SMEs gave presentations focused on their particular area(s) of expertise.

After the public forum, the Work Group met periodically to continue the revision efforts. Participants from VBA, VHA, medical academia, and VSO representatives continued work within their areas of expertise. The regulation drafting phase began in September 2013, and continues through the publication of this proposed rule. The rule VA proposes is consistent with updating and improving criteria by using validated severity ratings specific to the skin for each of the disability rating levels. As discussed in more detail below, the newly adopted classifications are derived from current medical practice.

Schedule of Ratings—Skin Conditions**General Rating Formula for Skin Disorders**

Section 4.118 currently lists 30 diagnostic codes (DCs) encompassing conditions involving injury or disease of the skin. VA proposes to revise these codes, through addition, removal, or other revisions, to reflect current medical science, terminology, and functional impairment.

VA would delete the current introductory paragraph to § 4.118. VA added the current paragraph to explain the applicability of the 2008 amendments to § 4.118, DCs 7800, 7801, 7802, 7804, and 7805. This rulemaking would make further amendments and would render outdated the current introductory paragraph. VA would add an applicability date paragraph to the dates section to explain this rulemaking's applicability. The existing provisions in § 4.118 concerning review of ratings and effective dates merely reflect generally applicable principles that need not be restated in the rating schedule.

VA would add a new introductory paragraph to state that, for the purposes of § 4.118, systemic therapy is treatment that is administered through any route (orally, injection, suppository, intranasally) other than the skin, and topical therapy is treatment that is administered through the skin. On March 1, 2016, the United States Court

of Appeals for Veterans Claims (Veterans Court) found it “unambiguous” that the “use of a topical corticosteroid is systemic therapy within the meaning of Diagnostic Code 7806.” *Johnson v. McDonald*, 27 Vet. App. 497, 502, 504 (2016). Under this holding, repeated localized application of topical corticosteroid could entitle a veteran to a disability rating as high as sixty percent, even if the affected area is very small. *Johnson* creates a dramatic disconnect between the severity of the veteran’s disability and the corresponding rating. Therefore, VA is amending § 4.118 to clearly provide that VA does not intend for treatment administered through the skin (topical therapy) to constitute systemic therapy. VA notes that it is possible for topical treatments to have systemic effects if administered on a large enough scale. However, in these situations, a veteran can obtain a higher rating due to the percentage of the body affected, not the mode of administration for his or her treatment. For example, if more than 40 percent of a veteran’s body is covered in eczema and a veteran treats all affected areas with topical corticosteroid, the veteran will be entitled to a 60 percent rating due to the percentage of the body affected, not because he is taking systemic therapy.

VA proposes a General Rating Formula to evaluate several of the skin disorders: dermatitis or eczema (DC 7806), discoid lupus erythematosus (DC 7809), dermatophytosis (DC 7813), bullous disorders (DC 7815), psoriasis (DC 7816), infections of the skin not listed elsewhere (DC 7820), cutaneous manifestations of collagen-vascular diseases not listed elsewhere (DC 7821), papulosquamous disorders not listed elsewhere (DC 7822), and diseases of keratinization (DC 7824). Individually, each of the above referenced conditions involves similar superficial components of the skin. The severity of impairment for each condition increases as more skin is involved. All of the conditions have treatments which are applied directly to the skin, as well as taken systemically (e.g., by mouth). There are still more similarities with regard to which treatments are used, treatment dosages given, treatment routes of administration, and treatment duration. As a result, VA concluded it would be more efficient to rate under the same formula, rather than to prescribe individual rating criteria.

Similar to how these DCs are currently evaluated, this General Rating Formula accounts for percentages of areas affected, both of the entire body and exposed areas, as well as the level

of treatment required. The percentage evaluations assigned under the General Rating Formula mirror the percentage evaluations currently assigned for these DCs. Specifically, VA proposes a 60 percent evaluation when at least one of the following is present: More than 40 percent of the entire body or more than 40 percent of exposed areas affected, or; Constant or near-constant systemic therapy including, but not limited to, corticosteroids, phototherapy, retinoids, biologics, photochemotherapy, PUVA or other immunosuppressive drugs required per 12-month period. VA proposes a 30 percent evaluation when at least one of the following is present: 20 to 40 percent of the entire body or 20 to 40 percent of exposed areas affected, or; Systemic therapy including, but not limited to, corticosteroids, phototherapy, retinoids, biologics, photochemotherapy, PUVA or other immunosuppressive drugs required for a total duration of six weeks or more, but not constantly, per 12-month period. VA proposes a 10 percent evaluation when at least one of the following is present: At least 5 percent, but less than 20 percent of the entire body affected, or; At least 5 percent, but less than 20 percent of exposed areas affected, or; Intermittent systemic therapy including, but not limited to, corticosteroids, phototherapy, retinoids, biologics, photochemotherapy, PUVA or other immunosuppressive drugs required for a total duration of less than six weeks per 12-month period. VA proposes a zero percent evaluation when no more than topical therapy is required per 12-month period and at least one of the following is present: Less than 5 percent of the entire body affected, or; Less than 5 percent of exposed areas affected.

Additionally, VA proposes to maintain the current rating instruction for DCs 7806, 7809, 7813–7816, and 7820–7822 which allows for evaluation under disfigurement of the head, face, or neck (DC 7800) or scars (DCs 7801, 7802, 7804, or 7805), depending upon the predominant disability, in lieu of using the General Rating Formula. This rating instruction does not apply to current or new DC 7824, and therefore, VA proposes to add a clarifying sentence to that effect to this instruction.

As for the expanded list of systemic therapies identified in the General Rating Formula, VA notes that the current VASRD lists only “corticosteroids or other immunosuppressive drugs” as examples of systemic therapy. However, since the last review and update of the schedule of disability ratings for the skin, a number of new systemic therapies have

surfaced that are used to treat the conditions covered under the General Rating Formula. These include phototherapy, retinoids, biologics, photochemotherapy, and PUVA (e.g., ultraviolet therapy). See, e.g., Jennifer D. Peterson, MD, et al., “A Comprehensive Management Guide for Atopic Dermatitis,” 18:6 *Dermatology Nursing*, 531–42 (2006); “Psoriasis Medications,” WebMD, <http://www.webmd.com/skin-problems-and-treatments/psoriasis/psoriasis-medications> (last visited Aug. 25, 2015). To ensure consistent evaluation of these conditions, VA proposes to add these systemic therapies to the list of enumerated treatments.

In addition to creating the General Rating Formula and applying it to DCs 7806, 7809, 7813, 7815, 7816, 7820, 7821, 7822, and 7824, VA proposes to amend certain individual DCs within § 4.118. The particular changes affecting each DC immediately follow.

Diagnostic Codes 7801 and 7802

Each of these DCs pertains to types of scars which are, in part, characterized as “nonlinear.” To broaden application of these DCs, VA proposes to remove the reference to “nonlinear” from each DC title. In addition, VA proposes to include a more descriptive reference to whether the scar involves underlying soft tissue damage in place of the current terms “superficial” and “deep”—to assist rating personnel. This latter proposed change eliminates the need for current note (1) in each DC, as well as the last sentence in note (2) in each DC; therefore, VA proposes removal of those items.

Currently, if a scar runs in two or more separate areas of the body, note (2) for DCs 7801 and 7802 is intended to allow for the assignment of a separate evaluation for each affected zone and then to combine those evaluations under 38 CFR 4.25. See 73 FR 54708, 54709, Sept. 23, 2008. Although VA has been applying note (2) in this way, VA finds that the note could be written more clearly. Therefore, VA proposes to rewrite note (2) in a clearer and more concise manner and to add a new note (1) to be placed under both DCs 7801 and 7802 that would define the zones of the body. Specifically, note (1) would define the six zones of the body as each extremity, the anterior trunk, and the posterior trunk. VA also proposes to move the statement that the midaxillary line is what divides the anterior and posterior trunk from note (2) to note (1).

Additionally, VA proposes to add language to note (2) to allow for an alternative evaluation. Specifically, VA proposes to allow for a single evaluation

under DCs 7801 and 7802 if adding the entire affected zones of the body together would result in a higher evaluation. VA proposes this additional evaluation method in order to accurately reflect the level of disability present. In some circumstances, combining the scars from different zones under § 4.25 results in a lower compensation level than if the total scar area was added together without regard to the zone involved. For example, under DC 7801, if there is a single scar of 6 square inches total equally affecting both the anterior and posterior trunk, a compensable rating would not be warranted because the area affecting each zone would be less than 6 square inches total (e.g., 3 square inches on the anterior trunk and 3 square inches on the posterior trunk). However, when adding these scar segments together to consider the total square area (6 square inches), a 10 percent evaluation would be warranted. Similarly, under DC 7802, there may be scars in separate zones that are not each 144 square inches, but which add up to 144 square inches total. For example, a veteran may have a 100 square inch scar on the anterior trunk and a 100 square inch scar on the posterior trunk, which would not warrant a compensable rating under DC 7802. However, an evaluation of 10 percent would be warranted by adding the affected zones together for both scars, as they total to 200 square inches together.

Diagnostic Code 7803

This DC was deleted in October 2008. See 73 FR at 54710. However, several criteria reference this code. VA proposes to delete any and all references to DC 7803.

Diagnostic Code 7805

VA proposes to remove the reference to “linear” scars from DC 7805. The result of this change is that this DC applies to both linear and non-linear scars. As discussed above, VA proposes to remove the reference to “nonlinear” scars from DCs 7801 and 7802, expanding application of these codes to linear scars. Thus, the reference to linear scars should be removed from DC 7805 to avoid confusion by rating personnel.

Diagnostic Codes 7809 and 7821

VA proposes to retitle both DC 7809 and DC 7821 using current medical terminology. Current DC 7809 refers to “Discoid lupus erythematosus or subacute cutaneous lupus erythematosus.” VA proposes to remove the listed condition “subacute cutaneous lupus erythematosus” from

DC 7809 and add it to DC 7821. The proposed DC 7809 will read as “Discoid lupus erythematosus. Current DC 7809 also provides that a rating under DC 7809 should not be combined with a rating under DC 6350. In order to maintain this provision, we would add a note to DC 7809. The rationale for transferring subacute cutaneous lupus erythematosus from DC 7809 to DC 7821 is that subacute cutaneous lupus erythematosus is a distinctly different condition which is more analogous to collagen-vascular diseases not listed elsewhere (e.g., DC 7821) than it is to discoid lupus erythematosus. See Jean L. Bologna, John L. Jorizzo, et al. eds., “Dermatology,” 618–20 (3d ed. 2012). The proposed DC 7821 will read as “Cutaneous manifestations of collagen-vascular diseases not listed elsewhere (including scleroderma, calcinosis cutis, subacute cutaneous lupus erythematosus, and dermatomyositis).” There is no change in the evaluation criteria; both conditions would be rated under the General Rating Formula.

Diagnostic Code 7813

Current DC 7813 describes a number of variations of dermatophytosis, including tinea corporis, tinea capitis, tinea pedis, tinea barbae, tinea unguium, and tinea cruris. To update this DC title with current medical terminology, VA proposes to add “tinea versicolor” to this list as well as a parenthetical for tinea unguium—onychomycosis as these are also common variations of dermatophytosis seen in the veteran population. Id. at 1251–84. As previously discussed above, VA intends to rate conditions covered by DC 7813 under the General Rating Formula, which provides for similar evaluation criteria as are currently in effect.

Diagnostic Codes 7815 and 7816

Current medical practice indicates conditions rated under DC 7815 (bullous disorders) and DC 7816 (psoriasis) can affect additional areas beyond the skin (bullous disorders can affect mucosa of the ocular, oral, gastrointestinal, respiratory, and genitourinary tracts; psoriasis can affect oral mucosa, nails and the joints). Id. at 142, 148–55, 472–73, 482, and 487–89. Therefore, in addition to rating these conditions under the General Rating Formula, VA proposes a note for each of these DCs. The note to DC 7815 would instruct the rater to rate complications and residuals of mucosal involvement (ocular, oral, gastrointestinal, respiratory, and genitourinary) separately under the appropriate diagnostic code. The note to DC 7816

would instruct the rater to rate complications such as psoriatic arthritis and other clinical manifestations (oral mucosa, nails) under the appropriate diagnostic code.

Diagnostic Code 7817

VA proposes to retitle DC 7817, currently “Exfoliative dermatitis (erythroderma),” as “Erythroderma.” Erythroderma is the nomenclature being used in current medical practice. Id. at 171–81. In addition, it proposes to update the rating criteria to reflect up-to-date medical understanding of this condition. VA would also slightly reorganize the presentation of criteria for ease of field use. Currently, this condition is evaluated based upon level of involvement of the skin, presence of systemic manifestations, and the level of treatment required. VA does not propose any changes to the level of involvement of the skin, presence of systemic manifestations, or the level of treatment required. However, similar to the changes proposed in the General Rating Formula, the new rating criteria for DC 7817 would reflect additional systemic treatments appropriate for this condition. Currently, DC 7817 includes corticosteroids, immunosuppressive retinoids, PUVA (psoralen with long-wave ultraviolet-A light) or UVB (ultraviolet-B light) treatments, or electron beam therapy. VA proposes to add biologics to this list as several biological therapies have been approved for treatment of skin disorders in recent years. See M. Viguier, et al., “Efficacy and Safety of Biologics in Erythrodermic Psoriasis,” *The British J. of Dermatology* 167(2): 417–23 (2012). VA proposes that inclusion of this type of systemic therapy in the rating criteria would ensure consistent and accurate evaluations.

In addition to expanding the list of systemic therapies listed, VA proposes to include a criterion which considers an individual’s level of response to treatment for both the 60 percent and 100 percent evaluations. Under the new criteria, VA would provide a 100 percent rating when the veteran is not currently undergoing treatment due to a documented history of treatment failure with 2 or more treatment regimens and a 60 percent rating when the veteran is not currently undergoing treatment due to a documented history of treatment failure with 1 treatment regimen. Historically, there have been a significant number of veterans with this disorder who fail to respond to treatment (frequently, the condition is related to an underlying malignancy that is not treated successfully, hence the treatment failure).

To assist rating personnel in applying the new rating criteria, VA proposes to add a note to DC 7817 which defines “treatment failure.” Modeled after a formula developed to study the efficacy of treatment in erythrodermic cutaneous T-cell lymphoma, VA proposes to define “treatment failure” as either disease progression or less than a 25 percent reduction in the extent and severity of disease after four weeks of prescribed therapy, as documented by medical records. See Zackheim HS, Kashani-Sabet M, et al., “Low-dose methotrexate to treat erythrodermic cutaneous T-cell lymphoma: Results in twenty-nine patients,” *J. Am. Acad. of Dermatology* 34(4):626–31 (1996); see also Bolognia, supra at 181 (erythroderma usually improves within two to six weeks of initiation).

Diagnostic Code 7822

VA proposes to update the description in this code to reflect current medical practice. Specifically, the condition mycosis fungoides is added to the list of papulosquamous disorders. See Bolognia, 2019–2027. Currently, mycosis fungoides is not listed in the rating schedule and has caused confusion among VA rating specialists on how to account for this condition, leaving VA rating specialists to invoke § 4.20, analogous ratings. This approach could lead to inconsistent ratings for this condition. Therefore, adding mycosis fungoides under DC 7822 would eliminate the need for an analogous rating and provide a consistent basis for evaluating this condition.

Diagnostic Code 7825

Chronic urticaria, also known as chronic hives, is defined as continuous urticaria at least twice per week off treatment for a period of six weeks or more. See Bolognia at 295. It can be caused by a number of mechanisms (physical stimulus, or touch; autoimmune causes; pseudoallergenic, infection-related; vasculitis-related; and, idiopathic, or unknown). Id. at 296. Chronic urticaria is currently evaluated based on the frequency of “episodes” or “debilitating episodes” and type of treatment. Regarding “episodes” or “debilitating episodes,” VA believes this term is non-specific and not helpful to rating personnel in evaluating this condition. Therefore, VA proposes to replace this term with “documented urticarial attacks.” Furthermore, VA proposes to revise all of the rating criteria to indicate both a minimum specified frequency of documented urticarial attacks within a 12 month period and the type of treatment

required. VA proposes this approach to the criteria to introduce greater objectivity within the evaluation criteria based on current medical practice. VA acknowledges that an urticarial attack generally results in debilitation; however, this change makes it clear that the acute period of debilitation must be related to the service-connected skin disease itself rather than another condition.

Regarding the current 30 percent and 60 percent criteria, VA proposes to include examples of common “immunosuppressive therapy,” to include, but not limited to, cyclosporine or steroids. See Bolognia, supra at 300–05. For clarity and consistency, VA would replace the phrase occurring “at least four times during the past 12-month period” in the 30 and 60 percent criteria with “four or more times per 12-month period.”

VA also proposes to add two new sets of criteria under the 10 percent evaluation; the revised criteria would allow a 10 percent evaluation to be assigned in more circumstances based upon an individual’s level of response to treatment. A 10 percent evaluation would be assigned if there are recurrent documented urticarial attacks occurring one to three times during the past 12-month period and intermittent systemic immunosuppressive therapy is required for control. VA would also assign a 10 percent evaluation if there are recurrent documented urticarial attacks occurring four or more times during the past 12-month period and treatment with antihistamines or sympathomimetics (including, but not limited to an epipen or intramuscular epinephrine) is required or, if there are no recurrent documented urticarial attacks, but continuous systemic immunosuppressive therapy medication is required for control (including, but not limited to, cyclosporine, steroids). VA also proposes to reorganize how the various criteria are presented for ease of field use.

VA believes that a 10 percent evaluation is appropriate in each of these cases because the treatment measures may impose slight disability upon the individual. For example, long term treatment with antihistamines can result in drowsiness (even the non-sedating kinds) and autonomic nervous system dysfunction (e.g., urinary retention). Id. at 303. Similarly, continuous use of systemic medications may result in disabling effects, such as drowsiness with doxepin or weight gain, and increased risk of diabetes with long-term steroid use. See Manuchair Ebadi, “Desk Reference of Clinical Pharmacology,” 101, 113, 329, and 582

(2d ed. 2008); see also “Chronic hives (urticaria),” Mayo Clinic (Sept. 17, 2011), <http://www.mayoclinic.org/diseases-conditions/chronic-hives/basics/treatment/con-20031634> (last visited Apr. 23, 2014).

Diagnostic Code 7826

Similar to DC 7825, VA proposes to update the criteria under current DC 7826, “Vasculitis, primary cutaneous.” First, VA proposes to replace the term “debilitating episodes,” which is a non-specific term not defined in the VASRD with the term “documented vasculitic episodes.” This change in terminology is more consistent with current medical practice. Next, VA proposes to modify the criteria to specify the minimum frequency of documented vasculitic episodes, the type of treatment required and the effectiveness of that treatment. In turn, increased disability would be reflected in objective terms (e.g., increased frequency of vasculitic episodes, more intensive treatment or lack of treatment effectiveness). VA also proposes to reorganize how the various criteria are presented for ease of field use. These modifications incorporate current medical knowledge, enhance objectivity and are easier for rating personnel to utilize.

For the 60 percent level of compensation, VA proposes to remove the phrase “occurring at least four times during the past 12 month period” and replace the term “recurrent” with “persistent” and the term “despite” with the phrase “refractory to.” The phrase removal and term replacements are to more clearly differentiate between the 60 percent and 30 percent compensation levels. For the 30 percent evaluation, VA proposes to replace the phrase “. . . at least four times during the past 12-month period . . .” with the phrase “four or more times per 12-month period” to clearly delineate the minimal frequency requirement and ease of field use. For the 10 percent evaluation, VA proposes to replace the phrase “one to three times during the past 12-month period” with “one to three times per 12-month period” for ease of field use. Additionally for the 10 percent evaluation, VA proposes to add that the absence of recurrent documented vasculitic episodes but requiring continuous systemic medication for control would also warrant compensation. This proposed revision allows a 10 percent evaluation to be assigned in more circumstances, namely, when the disorder is controlled through the use of systemic medications, but there may be slight disabling effects as a result of such medication. See Ebadi, supra; see also

“Vasculitis,” Mayo Clinic (Oct. 8, 2011), <http://www.mayoclinic.org/diseases-conditions/vasculitis/basics/treatment/con-20026049> (last visited Apr. 23, 2014).

Diagnostic Code 7827

VA proposes to revise and update the criteria for DC 7827, “Erythema multiforme; Toxic epidermal necrolysis.” First, each evaluation level would reference the presence of mucosal (leading to impaired mastication, that is, chewing), palmar (leading to impaired handgrip), or plantar involvement (leading to impaired ambulation, that is, walking). See Bologna, supra at 320, 322, and 326–32. The mucosal, palmar, and/or plantar findings would be restricted to the past 12-month period for all evaluation levels. For clarity and consistency, VA would replace the phrase occurring “at least four times during the past 12-month period” in the 30 and 60 percent criteria with “four or more times per 12-month period.” For a 60 percent evaluation, recurrent mucosal, palmar, or plantar involvement impairing mastication, use of hands, or ambulation occurring four or more times per 12-month period despite ongoing immunosuppressive therapy would be required. For a 30 percent evaluation, recurrent mucosal, palmar, or plantar involvement not impairing mastication, use of hands, or ambulation occurring four or more times per 12-month period, and requiring intermittent systemic therapy would be required.

A 10 percent evaluation would be assigned for the following circumstances: (1) One to three episodes of mucosal, palmar, or plantar involvement not impairing mastication, use of hands, or ambulation occurring per 12-month period AND requiring intermittent systemic therapy, or (2) without recurrent episodes, but requiring continuous systemic medication for control. This allows a 10 percent evaluation to be assigned in more circumstances, based upon the level of response to treatment. Lastly, VA proposes to add a note at the end of DC 7827 defining, for the purposes of DC 7827 only, that systemic therapy may consist of one or more of the following treatment agents: Immunosuppressives, antihistamines, or sympathomimetics. See Ebadi, supra; see also Victor Cohen, PharmD, et al., “Toxic Epidermal Necrolysis Treatment & Management,” MEDSCAPE REFERENCE (Mar. 3, 2014), <http://emedicine.medscape.com/article/229698-treatment#a1156> (last visited Apr. 23, 2014).

Diagnostic Code 7828

VA proposes to update DC 7828, “Acne,” by removing the reference to “superficial cysts” in the zero percent rating criteria. This update is proposed based upon current medical terminology as the term “superficial cysts” is no longer used in the medical community. See Bologna, supra at 547–50 and 555–58.

Diagnostic Code 7829

Current DC 7829 instructs rating personnel to evaluate chloracne based, in part, on either the presence of deep or superficial acne. The current evaluation criteria instructs that either a 10 or 30 percent evaluation should be assigned depending upon whether more or less than 40 percent of the face and neck are involved; VA does not propose changes to these criteria. However, a 10 percent evaluation is also assigned when there is “deep acne other than on the face and neck.” VA proposes to clarify that a 10 percent evaluation should only be assigned when deep acne affects non-intertriginous areas of the body other than the face and neck or less than 40 percent of the face and neck. Intertriginous areas of the body include the axilla of the arm, the anogenital region, and skin folds of the breast or between digits. Samuel T. Selden, MD, “Intertrigo,” Medscape Reference (Mar. 27, 2012), <http://emedicine.medscape.com/article/1087691-overview> (last visited Apr. 23, 2014). Deep acne affecting these areas of the body results in greater functional impairment to the individual because these represent more sensitive areas of the body. Therefore, VA proposes to assign a higher 20 percent evaluation when deep acne affects the intertriginous areas of the body.

Additionally, for reasons previously discussed in DC 7828, VA proposes to remove the term “superficial cysts” from the rating criteria under the zero percent evaluation. See Bologna, supra at 547–50 and 555–58.

Technical Amendments

VA also proposes several technical amendments. We would update Appendix A, B, and C of part 4 to reflect the above noted proposed amendments.

Executive Orders 12866 and 13563

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, when regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, and other advantages;

distributive impacts; and equity). Executive Order 13563 (Improving Regulation and Regulatory Review) emphasizes the importance of quantifying both costs and benefits, reducing costs, harmonizing rules, and promoting flexibility. Executive Order 12866 (Regulatory Planning and Review) defines a “significant regulatory action,” requiring review by the Office of Management and Budget (OMB), unless OMB waives such review, as “any regulatory action that is likely to result in a rule that may: (1) Have an annual effect on the economy of \$100 million or more or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities; (2) Create a serious inconsistency or otherwise interfere with an action taken or planned by another agency; (3) Materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof; or (4) Raise novel legal or policy issues arising out of legal mandates, the President’s priorities, or the principles set forth in the Executive Order.”

The economic, interagency, budgetary, legal, and policy implications of this regulatory action have been examined, and it has been determined not to be a significant regulatory action under Executive Order 12866. VA’s impact analysis can be found as a supporting document at <http://www.regulations.gov>, usually within 48 hours after the rulemaking document is published. Additionally, a copy of the rulemaking and its impact analysis are available on VA’s Web site at <http://www.va.gov/orpm/>, by following the link for “VA Regulations Published From FY 2004 Through Fiscal Year to Date.”

Regulatory Flexibility Act

The Secretary hereby certifies that this proposed rule would not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (5 U.S.C. 601–612). This proposed rule would directly affect only individuals and would not directly affect small entities. Therefore, pursuant to 5 U.S.C. 605(b), this rulemaking is exempt from the initial and final regulatory flexibility analysis requirements of sections 603 and 604.

Unfunded Mandates

The Unfunded Mandates Reform Act of 1995 requires, at 2 U.S.C. 1532, that agencies prepare an assessment of

anticipated costs and benefits before issuing any rule that may result in the expenditure by State, local, and tribal governments, in the aggregate, or by the private sector, of \$100 million or more (adjusted annually for inflation) in any one year. This proposed rule would have no such effect on State, local, and tribal governments, or on the private sector.

Paperwork Reduction Act

This proposed rule contains no provisions constituting a collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3521).

Catalog of Federal Domestic Assistance

The Catalog of Federal Domestic Assistance numbers and titles for the programs affected by this document are 64.104, Pension for Non-Service-Connected Disability for Veterans; 64.109, Veterans Compensation for Service-Connected Disability; and 64.110, Veterans Dependency and Indemnity Compensation for Service-Connected Death.

Signing Authority

The Secretary of Veterans Affairs, or designee, approved this document and

authorized the undersigned to sign and submit the document to the Office of the Federal Register for publication electronically as an official document of the Department of Veterans Affairs. Gina S. Farrisee, Deputy Chief of Staff, Department of Veterans Affairs, approved this document on August 1, 2016, for publication.

List of Subjects in 38 CFR Part 4

Disability benefits, Pensions, Veterans.

Dated: August 1, 2016.

Jeffrey Martin,

Office Program Manager, Office of Regulation Policy & Management, Office of the Secretary, Department of Veterans Affairs.

For the reasons set out in the preamble, the Department of Veterans Affairs proposes to amend 38 CFR part 4, subpart B as follows:

PART 4—SCHEDULE FOR RATING DISABILITIES

Subpart B—Disability Ratings

1. The authority citation for part 4 continues to read as follows:

Authority: 38 U.S.C. 1155, unless otherwise noted.

2. Amend § 4.118 by:

a. Revising the introductory paragraph;

b. Revising the entries for diagnostic codes 7801, 7802, and 7805;

c. Adding an entry for “General Rating Formula For The Skin For DCs 7806, 7809, 7813–7816, 7820–7822, And 7824”, to appear after the entry for diagnostic code 7805;

d. Revising entries for diagnostic codes 7806, 7809, 7813, 7815, 7816, 7817, 7820, 7821, 7822, 7824, 7825, 7826, 7827, 7828, and 7829.

The revisions and additions read as follows:

§ 4.118 Schedule of ratings—skin.

For the purposes of this section, systemic therapy is treatment that is administered through any route (orally, injection, suppository, intranasally) other than the skin. For the purposes of this section, topical therapy is treatment that is administered through the skin.

Table with 2 columns: Diagnostic Code and Rating. Rows include 7801 (Burn scar(s) or scar(s) due to other causes, not of the head, face, or neck, that are associated with underlying soft tissue damage) with sub-entries for area sizes and notes, 7802 (Burn scar(s) or scar(s) due to other causes, not of the head, face, or neck, that are not associated with underlying soft tissue damage) with sub-entries for area sizes and notes, and 7805 (Scars, other; and other effects of scars evaluated under diagnostic codes 7800, 7801, 7802, and 7804). The table also includes the General Rating Formula For The Skin For DCs 7806, 7809, 7813–7816, 7820–7822, And 7824 with sub-entries for percentage of body affected.

	Rating
Systemic therapy including, but not limited to, corticosteroids, phototherapy, retinoids, biologics, photochemotherapy, PUVA or other immunosuppressive drugs required for a total duration of six weeks or more, but not constantly, per 12-month period.	
At least one of the following At least 5 percent, but less than 20 percent of the entire body affected, or; At least 5 percent, but less than 20 percent of exposed areas affected, or; Intermittent systemic therapy including, but not limited to, corticosteroids, phototherapy, retinoids, biologics, photochemotherapy, PUVA or other immunosuppressive drugs required for a total duration of less than six weeks per 12-month period.	10
No more than topical therapy required per 12-month period and at least one of the following Less than 5 percent of the entire body affected, or; Less than 5 percent of exposed areas affected.	0
Or rate as disfigurement of the head, face or neck (DC 7800) or scars (DCs 7801, 7802, 7804, or 7805), depending upon the predominant disability. This rating instruction does not apply to DC 7824.	
7806 Dermatitis or eczema. Evaluate under the General Rating Formula for the Skin.	
* * * * *	
7809 Discoid lupus erythematosus. Evaluate under the General Rating Formula for the Skin. <i>Note:</i> Do not combine with ratings under DC 6350.	
* * * * *	
7813 Dermatophytosis (ringworm: of body, tinea corporis; of head, tinea capitis; of feet, tinea pedis; of beard area, tinea barbae; of nails, tinea unguium (onychomycosis); of inguinal area (jock itch), tinea cruris; tinea versicolor) Evaluate under the General Rating Formula for the Skin.	
7815 Bullous disorders (including pemphigus vulgaris, pemphigus foliaceus, bullous pemphigoid, dermatitis herpetiformis, epidermolysis bullosa acquisita, benign chronic familial pemphigus (Hailey-Hailey), and porphyria cutanea tarda). Evaluate under the General Rating Formula for the Skin. <i>Note:</i> Rate complications and residuals of mucosal involvement (ocular, oral, gastrointestinal, respiratory, and genitourinary) separately under the appropriate diagnostic code.	
7816 Psoriasis. Evaluate under the General Rating Formula for the Skin. <i>Note:</i> Rate complications such as psoriatic arthritis and other clinical manifestations (oral mucosa, nails) under the appropriate diagnostic code.	
7817 Erythroderma: Generalized involvement of the skin with systemic manifestations (such as fever, weight loss, and hypoproteinemia) AND one of the following: Constant or near-constant systemic therapy such as therapeutic doses of corticosteroids, immunosuppressive retinoids, PUVA (psoralen with long-wave ultraviolet-A light); UVB (ultraviolet-B light) treatments, biologics, or electron beam therapy required per 12-month period, or No current treatment due to a documented history of treatment failure with 2 or more treatment regimens	100
Generalized involvement of the skin without systemic manifestations and one of the following: Constant or near-constant systemic therapy such as therapeutic doses of corticosteroids, immunosuppressive retinoids, PUVA (psoralen with long-wave ultraviolet-A light); UVB (ultraviolet-B light) treatments, biologics, or electron beam therapy required per 12-month period, or No current treatment due to a documented history of treatment failure with 1 treatment regimen	60
Any extent of involvement of the skin, and any of the following therapies required for a total duration of six weeks or more, but not constantly, per 12-month period: Systemic therapy such as therapeutic doses of corticosteroids, immunosuppressive retinoids, PUVA (psoralen with long-wave ultraviolet-A light) or UVB (ultraviolet-B light) treatments, biologics, or electron beam therapy	30
Any extent of involvement of the skin, and any of the following therapies required for a total duration of less than six weeks per 12-month period: Systemic therapy such as therapeutic doses of corticosteroids, immunosuppressive retinoids, PUVA (psoralen with long-wave ultraviolet-A light) or UVB (ultraviolet-B light) treatments, biologics, or electron beam therapy	10
Any extent of involvement of the skin, and; no more than topical therapy required per 12-month period	0
<i>Note:</i> Treatment failure is defined as either disease progression, or less than a 25 percent reduction in the extent and severity of disease after four weeks of prescribed therapy, as documented by medical records.	
* * * * *	
7820 Infections of the skin not listed elsewhere (including bacterial, fungal, viral, treponemal and parasitic diseases). Evaluate under the General Rating Formula for the Skin.	
7821 Cutaneous manifestations of collagen-vascular diseases not listed elsewhere (including scleroderma, calcinosis cutis, subacute cutaneous lupus erythematosus, and dermatomyositis). Evaluate under the General Rating Formula for the Skin.	
7822 Papulosquamous disorders not listed elsewhere (including lichen planus, large or small plaque parapsoriasis, pityriasis lichenoides et varioliformis acuta (PLEVA), lymphomatoid papulosus, mycosis fungoides, and pityriasis rubra pilaris (PRP)). Evaluate under the General Rating Formula for the Skin.	
* * * * *	
7824 Diseases of keratinization (including ichthyoses, Darier's disease, and palmoplantar keratoderma). Evaluate under the General Rating Formula for the Skin.	
7825 Urticaria: Recurrent documented urticarial attacks occurring four or more times per 12-month period despite continuous immunosuppressive therapy (including, but not limited to, cyclosporine and steroids)	60

	Rating
Recurrent documented urticarial attacks occurring four or more times per 12-month period and requiring intermittent systemic immunosuppressive therapy (including, but not limited to, cyclosporine and steroids) for control	30
At least one of the following	10
Recurrent documented urticarial attacks occurring one to three times per 12-month period, and requiring intermittent systemic immunosuppressive therapy for control, or	
Recurrent documented urticarial attacks occurring four or more times per 12-month period, and requiring treatment with antihistamines or sympathomimetics (including, but not limited to an epipen or intramuscular epinephrine), or	
Without recurrent documented urticarial attacks, but requiring continuous systemic immunosuppressive therapy medication (including, but not limited to, cyclosporine and steroids) for control.	
7826 Vasculitis, primary cutaneous:	
Persistent documented vasculitis episodes refractory to continuous immunosuppressive therapy	60
All of the following	30
Recurrent documented vasculitic episodes occurring four or more times per 12-month period, and	
Requiring intermittent systemic immunosuppressive therapy for control.	
At least one of the following	10
Recurrent documented vasculitic episodes occurring one to three times per 12-month period, and requiring intermittent systemic immunosuppressive therapy for control, or	
Without recurrent documented vasculitic episodes but requiring continuous systemic medication for control.	
Or rate as disfigurement of the head, face, or neck (DC 7800) or scars (DC's 7801, 7802, 7804, or 7805), depending upon the predominant disability.	
7827 Erythema multiforme; Toxic epidermal necrolysis:	
Recurrent mucosal, palmar, or plantar involvement impairing mastication, use of hands, or ambulation occurring four or more times per 12-month period despite ongoing immunosuppressive therapy	60
All of the following	30
Recurrent mucosal, palmar, or plantar involvement not impairing mastication, use of hands, or ambulation occurring four or more times per 12-month period, and	
Requiring intermittent systemic therapy.	
At least one of the following	10
One to three episodes of mucosal, palmar, or plantar involvement not impairing mastication, use of hands, or ambulation occurring per 12-month period AND requiring intermittent systemic therapy, or	
Without recurrent episodes, but requiring continuous systemic medication for control.	
Or rate as disfigurement of the head, face, or neck (DC 7800) or scars (DC's 7801, 7802, 7804, or 7805), depending upon the predominant disability.	
Note: For the purposes of this DC only, systemic therapy may consist of one or more of the following treatment agents: Immunosuppressives, antihistamines, or sympathomimetics.	
7828 Acne:	
Deep acne (deep inflamed nodules and pus-filled cysts) affecting 40 percent or more of the face and neck	30
Deep acne (deep inflamed nodules and pus-filled cysts) affecting less than 40 percent of the face and neck, or; deep acne other than on the face and neck	10
Superficial acne (comedones, papules, pustules) of any extent	0
Or rate as disfigurement of the head, face, or neck (DC 7800) or scars (DC's 7801, 7802, 7804, or 7805), depending upon the predominant disability.	
7829 Chloracne:	
Deep acne (deep inflamed nodules and pus-filled cysts) affecting 40 percent or more of the face and neck	30
Deep acne (deep inflamed nodules and pus-filled cysts) affecting the intertriginous areas (the axilla of the arm, the anogenital region, skin folds of the breasts or between digits)	20
Deep acne (deep inflamed nodules and pus-filled cysts) affecting less than 40 percent of the face and neck; or, deep acne affecting non-intertriginous areas of the body (other than the face and neck)	10
Superficial acne (comedones, papules, pustules) of any extent	0
Or rate as disfigurement of the head, face, or neck (DC 7800) or scars (DC's 7801, 7802, 7804, or 7805), depending upon the predominant disability.	

(Authority: 38 U.S.C. 1155)

■ 3. Amend appendix A to part 4, under the entry Sec. 4.118, by:

- a. Revising the entries for diagnostic codes 7801, 7802, 7805, 7806, 7809, 7813, 7815, 7816, and 7817;
- b. Removing the entry for 7820–7833;
- c. Adding entries for diagnostic codes 7820, 7821, 7822, 7823, 7824, 7825,

7826, 7827, 7828, 7829, 7830, 7831, 7832, and 7833.

The revisions and additions read as follows:

APPENDIX A TO PART 4—TABLE OF AMENDMENTS AND EFFECTIVE DATES SINCE 1946

Section	Diagnostic Code No.

■ 4. Amend appendix B to part 4, under the center heading The Skin., by revising the entries for diagnostic codes 7801, 7802, 7805, 7809, 7813, 7817, 7821, and 7822 to read as follows:

APPENDIX B TO PART 4—NUMERICAL INDEX OF DISABILITIES

Diagnostic Code No.							
*	*	*	*	*	*	*	*
THE SKIN							
7801	Burn scar(s) or scar(s) due to other causes, not of the head, face, or neck that are associated with underlying soft tissue damage.					
7802	Burn scar(s) or scar(s) due to other causes, not of the head, face, or neck that are not associated with underlying soft tissue damage.					
*	*	*	*	*	*	*	*
7805	Scars, other; and other effects of scars evaluated under diagnostic codes 7800, 7801, 7802, and 7804.					
*	*	*	*	*	*	*	*
7809	Discoid lupus erythematosus.					
*	*	*	*	*	*	*	*
7813	Dermatophytosis.					

APPENDIX B TO PART 4—NUMERICAL INDEX OF DISABILITIES—Continued

Diagnostic Code No.	
7817	Erythroderma.
7821	Cutaneous manifestations of collagen-vascular diseases not listed elsewhere (including scleroderma, calcinosis cutis, subacute cutaneous lupus erythematosus, and dermatomyositis).
7822	Papulosquamous disorders not listed elsewhere.

- 5. Amend appendix C to part 4 by:
 - a. Removing the entry “Cutaneous manifestations of collagen-vascular diseases” and add in its place an entry for “Cutaneous manifestations of collagen-vascular diseases not listed elsewhere (including scleroderma, calcinosis cutis, subacute cutaneous lupus erythematosus, and dermatomyositis)”;
 - b. Adding in alphabetical order entries for “Discoid lupus erythematosus”, and “Erythroderma”; and
 - c. Revising the entries under “Scars.”
- The additions and revisions read as follows:

APPENDIX C TO PART 4—ALPHABETICAL INDEX OF DISABILITIES

	Diagnostic Code No.
Cutaneous manifestations of collagen-vascular diseases not listed elsewhere (including scleroderma, calcinosis cutis, subacute cutaneous lupus erythematosus, and dermatomyositis)	7821
Discoid lupus erythematosus	7809
Erythroderma	7817
Scars:	
Burn scar(s) of the head, face, or neck; scar(s) of the head, face, or neck due to other causes; or other disfigurement of the head, face, or neck	7800
Burn scar(s) or scar(s) due to other causes, not of the head, face, or neck that are associated with underlying soft tissue damage	7801
Burn scar(s) or scar(s) due to other causes, not of the head, face, or neck that are not associated with underlying soft tissue damage	7802
Retina	6011
Scars, other; and other effects of scars evaluated under diagnostic codes 7800, 7801, 7802, and 7804	7805
Unstable or painful	7804

BILLING CODE 8320-01-P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA-R10-OAR-2016-0394, FRL-9950-55-Region 10]

Approval and Promulgation of Implementation Plans; Washington: Updates to Incorporation by Reference and Miscellaneous Revisions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) proposes to approve State Implementation Plan revisions submitted by the Washington State Department of Ecology (Ecology) on July 11, 2016. The revisions update the incorporation by reference of Federal provisions cited in Ecology’s general air quality regulations. The revisions also reflect changes to the primary and secondary National Ambient Air Quality Standards (NAAQS) for ozone, promulgated since Ecology’s last update. Ecology also made minor corrections to typographical errors and

non-substantive edits for clarity, such as standardizing the citation format.

DATES: Comments must be received on or before September 12, 2016.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA-R10-OAR-2016-0394 at <http://www.regulations.gov>. Follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from *Regulations.gov*. The EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is

restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.* on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit <http://www2.epa.gov/dockets/commenting-epa-dockets>.

FOR FURTHER INFORMATION CONTACT: Jeff Hunt, Air Planning Unit, Office of Air and Waste (AWT-150), Environmental Protection Agency, Region 10, 1200 Sixth Ave, Suite 900, Seattle, WA 98101; telephone number: (206) 553-0256; email address: hunt.jeff@epa.gov.

SUPPLEMENTARY INFORMATION: Throughout this document wherever “we,” “us,” or “our” is used, it is intended to refer to the EPA.

Table of Contents

- I. Background
- II. Analysis of Rule Updates
- III. Proposed Action
- IV. Incorporation by Reference
- V. Statutory and Executive Order Reviews

I. Background

Section 110 of the Clean Air Act (CAA) governs the process by which a state submits air quality requirements to the EPA for approval into the State Implementation Plan (SIP). The SIP is a state’s plan to implement, maintain and enforce the NAAQS. Ecology’s general air quality regulations are set forth at Chapter 173-400 of the Washington Administrative Code (WAC). The EPA last approved changes to Chapter 173-400 WAC on April 29, 2015, which incorporates by reference certain Federal regulations, as of July 1, 2012 (80 FR 23721). Washington also adopts and implements changes to the NAAQS under Chapter 173-476 WAC, which the EPA last approved on March 4, 2014 (79 FR 12078). On July 11, 2016, Washington submitted a request to update Chapters 173-400 and 173-476 WAC in the SIP, with revised Federal citations as of January 1, 2016.

II. Analysis of Rule Updates

Chapter 173-400 WAC

In order to streamline updates to Chapter 173-400 WAC and the Washington SIP, Ecology created a new section, WAC 173-400-025 *Adoption of Federal Rules*, which states, “Federal rules mentioned in this rule are adopted as they exist on January 1, 2016. Adopted or adopted by reference means the federal rule applies as if it was copied into this rule.” As part of this process, Ecology modified other sections of Chapter 173-400 WAC to remove citations to specific Federal regulation adoption dates, in order to rely on WAC 173-400-025. Ecology also corrected minor typographical errors, standardized references, and consistently formatted Federal citations. A redline/strikeout of the changes is included in the State’s submittal, contained in the docket for this action. We reviewed these changes and are proposing to approve the revisions.

One outcome of Ecology’s update to Chapter 173-400 WAC relates to the Prevention of Significant Deterioration (PSD) permitting program for major stationary sources in attainment and unclassifiable areas. The Washington SIP, at WAC 173-400-720(4)(a)(vi), generally incorporates by reference the Federal PSD regulations contained in 40 CFR 52.21, with certain exceptions (80 FR 23721, April 29, 2015). As part of our April 29, 2015 final action on WAC 173-400-720(4)(a)(vi) we excluded the incorporation by reference of 40 CFR 52.21(b)(49)(v), 40 CFR 52.21(i)(5)(i), and 40 CFR 52.21(k)(2), as the Federal rules existed on July 1, 2012. These citations relate to Federal greenhouse gas, and fine particulate matter significant monitoring concentration and significant impact level provisions vacated by Federal courts after July 1, 2012 (see our proposed rulemaking for a full discussion, 80 FR 838, January 7, 2015, at page 842). After the court vacated the provisions, the EPA removed the provisions from 40 CFR 52.21 on December 9, 2013 (78 FR 73698) and August 19, 2015 (80 FR 50199). Ecology’s revised incorporation by reference of these Federal regulations as of January 1, 2016, captures the EPA’s removal of the vacated provisions. We are proposing to fully approve WAC 173-400-720(4)(a)(vi) because it meets current Federal requirements and is consistent with the court decisions. All

other exceptions to our approval of Chapter 173-400 WAC remain unchanged since our April 29, 2015 final action.

Ecology also requested that the EPA update the Chapter 173-400 WAC citations for the Benton Clean Air Agency (BCAA) jurisdiction consistent with the exceptions noted in our November 17, 2015 final approval (80 FR 71695). As discussed in the proposed rulemaking for that action, BCAA does not implement WAC provisions related to the PSD program under WAC 173-400-116 and 173-400-700 through 173-400-750 (80 FR 55280, September 15, 2015, at page 55283). Also, as described in the proposed rulemaking for that action, BCAA local requirements contained in Regulation I, section 4.02 apply in lieu of the WAC provisions contained in WAC 173-400-040(4), WAC 173-400-040(9)(a), and WAC 173-400-040(9)(b). The EPA is therefore proposing to approve the update to Chapter 173-400 WAC for BCAA’s jurisdiction consistent with the exceptions noted above. The EPA is also proposing to revise the visibility protection Federal Implementation Plan contained in 40 CFR 52.2498 to reflect the approval of WAC 173-400-117 *Special Protection Requirements for Federal Class I Areas* for sources within BCAA’s jurisdiction.

Chapter 173-476 WAC

The EPA last approved changes to Chapter 173-476 WAC on March 4, 2014, which contained all promulgated Federal NAAQS in existence at that time (79 FR 12078). In 2015, the EPA revised 40 CFR part 50 to include revised primary and secondary 8-hour ambient air quality standards for ozone at 0.070 parts per million (80 FR 65292, Oct. 26, 2015). Ecology’s revision to Chapter 173-476 includes this update to the ozone standards and the interpretation method contained in 40 CFR part 50, Appendix U. We are proposing to approve the revisions to Chapter 173-476 WAC as meeting current Federal requirements.

III. Proposed Action

We are proposing to approve and incorporate by reference in the Washington SIP at 40 CFR 52.2470(c) the following revisions to Chapters 173-400 and 173-476 WAC as shown in the table below.

State citation	Title/subject	State effective date	Explanations
40 CFR 52.2470(c), TABLE 1—REGULATIONS APPROVED STATEWIDE			
Washington Administrative Code, Chapter 173–476—Ambient Air Quality Standards			
173–476–020	Applicability	07/01/16	
173–476–150	Ambient Air Quality Standard for Ozone	07/01/16	
173–476–900	Appendix A. Table of Standards	07/01/16	
40 CFR 52.2470(c), TABLE 2—ADDITIONAL REGULATIONS APPROVED FOR WASHINGTON DEPARTMENT OF ECOLOGY (ECOLOGY) DIRECT JURISDICTION			
Washington Administrative Code, Chapter 173–400—General Regulations for Air Pollution Sources			
173–400–025	Adoption of Federal Rules	07/01/16	
173–400–040	General Standards for maximum Emissions	07/01/16	Except: 173–400–040(2)(c); 173–400–040(2)(d); 173–400–040(3); 173–400–040(5); 173–400–040(7), second paragraph.
173–400–050	Emission Standards for Combustion and Incineration Units.	07/01/16	Except: 173–400–050(2) and 173–400–050(4) through (6).
173–400–060	Emission Standards for General Process Units	07/01/16	
173–400–070	Emission Standards for Certain Source Categories ..	07/01/16	Except: 173–400–070(7); 173–400–070(8).
173–400–105	Records, Monitoring, and Reporting	07/01/16	
173–400–111	Processing Notice of Construction Applications for Sources, Stationary Sources and Portable Sources.	07/01/16	Except: 173–400–111(3)(h); The part of 173–400–111(8)(a)(v) that says, • “and 173–460–040,”; 173–400–111(9).
173–400–116	Increment Protection	07/01/16	
173–400–171	Public Notice and Opportunity for Public Comment ...	07/01/16	Except: The part of 173–400–171(3)(b) that says, • “or any increase in emissions of a toxic air pollutant above the acceptable source impact level for that toxic air pollutant as regulated under chapter 173–460 WAC”; 173–400–171(12).
173–400–710	Definitions	07/01/16	
173–400–720	Prevention of Significant Deterioration (PSD)	07/01/16	Except: 173–400–720(4)(a)(i through iv) and 173–400–720(4)(b)(iii)(C).
173–400–730	Prevention of Significant Deterioration Application Processing Procedures.	07/01/16	
173–400–740	PSD Permitting Public Involvement Requirements	07/01/16	
173–400–810	Major Stationary Source and Major Modification Definitions.	07/01/16	
173–400–830	Permitting Requirements	07/01/16	
173–400–840	Emission Offset Requirements	07/01/16	
173–400–850	Actual Emissions Plantwide Applicability Limitation (PAL).	07/01/16	
40 CFR 52.2470(c), TABLE 4—ADDITIONAL REGULATIONS APPROVED FOR BENTON CLEAN AIR AGENCY (BCAA) JURISDICTION			
173–400–025	Adoption of Federal Rules	07/01/16	
173–400–040	General Standards for Maximum Emissions	07/01/16	Except: 173–400–040(2)(c); 173–400–040(2)(d); 173–400–040(3); 173–400–040(4); 173–400–040(5); 173–400–040(7), second paragraph; 173–400–040(9)(a); 173–400–040(9)(b).
173–400–050	Emission Standards for Combustion and Incineration Units.	07/01/16	Except: 173–400–050(2) and 173–400–050(4) through (6).
173–400–060	Emission Standards for General Process Units	07/01/16	
173–400–070	Emission Standards for Certain Source Categories ..	07/01/16	Except: 173–400–070(7); 173–400–070(8).
173–400–105	Records, Monitoring, and Reporting	07/01/16	
173–400–111	Processing Notice of Construction Applications for Sources, Stationary Sources and Portable Sources.	07/01/16	Except: 173–400–111(3)(h); The part of 173–400–111(8)(a)(v) that says, • “and 173–460–040,”; 173–400–111(9).
173–400–171	Public Notice and Opportunity for Public Comment ...	07/01/16	Except: The part of 173–400–171(3)(b) that says, • “or any increase in emissions of a toxic air pollutant above the acceptable source impact level for that toxic air pollutant as regulated under chapter 173–460 WAC”; 173–400–171(12).
173–400–810	Major Stationary Source and Major Modification Definitions.	07/01/16	
173–400–830	Permitting Requirements	07/01/16	
173–400–840	Emission Offset Requirements	07/01/16	
173–400–850	Actual Emissions Plantwide Applicability Limitation (PAL).	07/01/16	

We are also proposing to approve, but not incorporate by reference, the revised version of WAC 173–400–260 *Conflict of Interest*, state effective July 1, 2016. Consistent with prior actions on the Washington SIP, the EPA reviews and approves state and local clean air agency submissions to ensure they provide adequate enforcement authority and other general authority to implement and enforce the SIP. However, regulations describing such agency enforcement and other general authority are typically not incorporated by reference so as to avoid potential conflict with the EPA's independent authorities. Therefore, we propose to approve, WAC 173–400–260 into the Washington SIP, but not incorporate the provision by reference.

IV. Incorporation by Reference

In this rule, the EPA is proposing to include in a final EPA rule regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, the EPA is proposing to incorporate by reference the regulations in the table in section III above. The EPA has made, and will continue to make, these materials generally available through www.regulations.gov and/or at the EPA Region 10 Office (please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section of this preamble for more information).

V. Statutory and Executive Order Reviews

Under the Clean Air Act, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, the EPA's role is to approve state choices, provided that they meet the criteria of the Clean Air Act. Accordingly, this proposed action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this proposed action:

- Is not a "significant regulatory action" subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities

under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);

- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the Clean Air Act; and
- Does not provide the EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

The SIP is not approved to apply on any Indian reservation land in Washington except as specifically noted below and is also not approved to apply in any other area where the EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000). Washington's SIP is approved to apply on non-trust land within the exterior boundaries of the Puyallup Indian Reservation, also known as the 1873 Survey Area. Under the *Puyallup Tribe of Indians Settlement Act of 1989*, 25 U.S.C. 1773, Congress explicitly provided state and local agencies in Washington authority over activities on non-trust lands within the 1873 Survey Area. Consistent with EPA policy, the EPA provided a consultation opportunity to the Puyallup Tribe in a letter dated July 13, 2016.

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Carbon monoxide, Incorporation by reference, Intergovernmental relations, Lead, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, Sulfur oxides, Volatile organic compounds.

Authority: 42 U.S.C. 7401 *et seq.*

Dated: August 1, 2016.

Approval and Promulgation of State Implementation Plan Revisions to Primary Air Quality Standards, Minor Source Baseline Date, Incorporation by Reference, and 2008 Ozone NAAQS Infrastructure Requirements for CAA Section 110(a)(2)(C) and (D)(i)(II); Wyoming

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing to approve State Implementation Plan (SIP) revisions submitted by the State of Wyoming on May 28, 2015 and November 6, 2015. The amendments update the version of the Code of Federal Regulations (CFR) incorporated by reference into the rules of the State of Wyoming for Chapter 2, Section 12; Chapter 3, General Emission Standards, Section 9; and Chapter 6, Prevention of Significant Deterioration, Section 4. The May 28, 2015 submittal updates a citation to a **Federal Register** article (*i.e.*, **Federal Register** notice) under the definition of "tpy CO₂ equivalent emissions (CO_{2e})," and lists a new minor source baseline date for fine particulate. The State also proposes to update the primary air quality standards for particulate matter (PM_{2.5}) to reflect federal updates that went into effect in January 2013. The updated primary PM_{2.5} standard is 12 micrograms per cubic meter (µg/m³) annual arithmetic mean concentration, which is lowered from its previous level of 15 µg/m³. The EPA is also proposing approval of portions of the State's February 6, 2014 2008 ozone National Ambient Air Quality Standards (NAAQS) infrastructure certification regarding prevention of significant deterioration (PSD) and the good neighbor provision. The EPA is not taking action on the Chapter 6, Permitting Requirements, Section 14 portion of the May 24, 2012 submittal because it has been superseded by a November 6, 2015 submittal (81 FR 35271). The EPA is not

taking action on a May 24, 2012 submittal or a March 8, 2013 submittal because they have been superseded by the May 28, 2015 submittal.

DATES: Written comments must be received on or before September 12, 2016.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA-R08-OAR-2016-0366, at <http://www.regulations.gov>. Follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from *Regulations.gov*. The EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.*, on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit <http://www2.epa.gov/dockets/commenting-epa-dockets>.

FOR FURTHER INFORMATION CONTACT: Jody Ostendorf, Air Program, U.S. Environmental Protection Agency (EPA), Region 8, Mail Code 8P-AR, 1595 Wynkoop Street, Denver, Colorado 80202-1129, (303) 312-7814, ostendorf.jody@epa.gov.

SUPPLEMENTARY INFORMATION:

I. General Information

What should I consider as I prepare my comments for the EPA?

1. *Submitting Confidential Business Information (CBI).* Do not submit CBI to the EPA through <http://www.regulations.gov> or email. Clearly mark the part or all of the information that you claim to be CBI. For CBI information on a disk or CD ROM that you mail to the EPA, mark the outside of the disk or CD ROM as CBI and then identify electronically within the disk or CD ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the

public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for preparing your comments.* When submitting comments, remember to:

- Identify the rulemaking by docket number and other identifying information (subject heading, **Federal Register** volume, date, and page number);
- Follow directions and organize your comments;
- Explain why you agree or disagree;
- Suggest alternatives and substitute language for your requested changes;
- Describe any assumptions and provide any technical information and/or data that you used;
- If you estimate potential costs or burdens, explain how you arrived at your estimate in sufficient detail to allow for it to be reproduced;
- Provide specific examples to illustrate your concerns, and suggest alternatives;
- Explain your views as clearly as possible, avoiding the use of profanity or personal threats; and,
- Make sure to submit your comments by the comment period deadline identified.

II. Analysis of the State Submittals

In this proposed rulemaking, we are proposing to approve three submittals into Wyoming's SIP.

May 28, 2015 Submittals

The first May 28, 2015 submittal updates Chapter 3, General Emission Standards, Section 9, Incorporation by reference, to adopt by reference the July 1, 2013 Code of Federal Regulations. This submittal supersedes previously submitted updates to Section 9, Incorporation by reference. The EPA proposes to approve this submittal.

The second May 28, 2015 submittal updates Chapter 6, Section 4, Prevention of significant deterioration (PSD) program. The submittal updates a citation to a **Federal Register** article (*i.e.*, **Federal Register** notice) under the definition of "tpy CO₂ equivalent emissions (CO₂e)." The article is available for public inspection and can be obtained online at <http://www.gpo.gov/fdsys/pkg/FR-2013-11-29/pdf/2013-27996.pdf> or at a cost from the Department of Environmental Quality, Division of Air Quality, Cheyenne Office. Contact information for the Cheyenne Office can be obtained at: <http://deq.state.wy.us>. The EPA is proposing to approve this update.

The submittal also lists a new minor source baseline date of December 12,

2012 for fine particulate for Sweetwater County. On October 20, 2010, the EPA published a final rulemaking titled "Prevention of Significant Deterioration (PSD) for PM_{2.5}—Increments, Significant Impact Levels (SILs) and Significant Monitoring Concentration" (75 FR 64864). This rulemaking revised 40 CFR 51.166(b)(14)(ii) (Definition of Minor Source Baseline Date) to add a trigger date of October 20, 2011 for PM_{2.5}. A minor source baseline date means the earliest date after the trigger date on which a major stationary source or a major modification subject to 40 CFR 52.21, or 40 CFR 51.166, submits a complete permit application under the relevant PSD regulations. The EPA is proposing to approve Sweetwater County's minor source baseline date of December 12, 2012.

The submittal also proposed to update Chapter 6, Section 14, Incorporation by reference, to adopt by reference from the July 1, 2013 CFR. This submittal and previously submitted updates to Section 14, Incorporation by reference have been superseded by a November 6, 2015 rulemaking (81 FR 35271). The EPA is not acting on any updates to Chapter 6, Section 14, Incorporation by reference.

November 6, 2015 Submittal

The November 6, 2015 submittal proposes to revise Chapter 2, Section 2, Ambient standards for particulate matter, which establishes standards of ambient air quality for particulate matter as necessary to protect public health and welfare. This revision updates the primary ambient air quality standards for PM_{2.5} to reflect federal updates that went into effect in January 2013. The updated primary PM_{2.5} standard is 12 µg/m³ annual arithmetic mean concentration, which is lowered from its previous level of 15 µg/m³. The EPA proposes to approve this revision.

The submittal also proposes to update Chapter 12, Incorporation by reference, to adopt by reference the July 1, 2014 CFR. This submittal supersedes previously submitted updates to the Chapter 12, Incorporation by reference. The EPA proposes to approve this submittal.

February 6, 2014, 2008 Ozone NAAQS Infrastructure Certification

On March 12, 2008, the EPA promulgated a new NAAQS for ozone, revising the levels of the primary and secondary 8-hour ozone standards from 0.08 parts per million (ppm) to 0.075 ppm (73 FR 16436, March 27, 2008).

Under Sections 110(a)(1) and (2) of the CAA, states are required to submit infrastructure SIPs to ensure their SIPs provide for implementation,

maintenance and enforcement of the NAAQS. These submissions must contain any revisions needed for meeting the applicable SIP requirements of Section 110(a)(2), or certifications that their existing SIP already meet those requirements. The EPA is acting upon the certification from Wyoming that addresses the infrastructure requirements of CAA Sections 110(a)(1) and 110(a)(2)(C) and (D)(i)(II) prong 3 for the 2008 ozone NAAQS. The requirement for states to make a SIP submission of this type arises out of CAA Section 110(a)(1). Pursuant to Section 110(a)(1), states must make SIP submissions “within three years (or such shorter period as the Administrator may prescribe) after the promulgation of a national primary ambient air quality standard (or any revision thereof),” of such NAAQS. The statute directly imposes on states the duty to make these SIP submissions, and the requirement to make the submissions is not conditioned upon the EPA taking any action other than promulgating a new or revised NAAQS.

The list of required elements provided in Section 110(a)(2) contains a wide variety of disparate provisions, some of which pertain to required legal authority, substantive program provisions, and both authority and substantive programs. The EPA does not believe that an action on a state’s infrastructure SIP submission is necessarily the appropriate type of action to address possible deficiencies in a state’s existing SIP. These issues include: (i) Existing provisions related to excess emissions from sources during periods of startup, shutdown, or malfunction (SSM) that may be contrary to the CAA and the EPA’s policies addressing such excess emissions; (ii) existing provisions related to “director’s variance” or “director’s discretion” that may be contrary to the CAA because they purport to allow revisions to SIP-approved emissions limits while limiting public process or not requiring further approval by the EPA; and (iii) existing provisions for PSD programs that may be inconsistent with current requirements of the EPA’s “Final NSR Improvement Rule,” 67 FR 80186, Dec. 31, 2002, as amended by 72 FR 32526, June 13, 2007 (“NSR Reform”).

CAA Section 110(a)(1) provides the procedural and timing requirements for SIP submissions after a new or revised NAAQS is promulgated. Section 110(a)(2) lists specific elements the SIP must contain or satisfy. Two elements identified in section 110(a)(2) are not governed by the three year submission deadline of Section 110(a)(1) and are therefore not addressed in this action.

These elements relate to part D of Title I of the CAA, and submissions to satisfy them are not due within three years after promulgation of a new or revised NAAQS, but rather are due at the same time nonattainment area plan requirements are due under Section 172. The two elements are: (1) Section 110(a)(2)(C) to the extent it refers to permit programs (known as “nonattainment NSR”) required under part D; and (2) Section 110(a)(2)(I), pertaining to the nonattainment planning requirements of part D. As a result, this action does not address infrastructure elements related to the nonattainment NSR portion of Section 110(a)(2)(C) or related to 110(a)(2)(I). Furthermore, the EPA interprets the CAA Section 110(a)(2)(J) provision on visibility as not being triggered by a new NAAQS because the visibility requirements in part C, title 1 of the CAA are not changed by a new NAAQS.

In this action, the EPA is addressing 110(a)(2)(C), programs for enforcement of control measures and for construction or modification of stationary sources, and 110(a)(2)(D)(i)(II) element 3 for the 2008 ozone NAAQS. The EPA is addressing all other elements for the 2008 ozone NAAQS in a separate rulemaking.

The Wyoming Department of Environmental Quality (Department or WDEQ) submitted certification of Wyoming’s infrastructure SIP for the 2008 ozone NAAQS on February 6, 2014. Wyoming’s infrastructure certification demonstrates how the State, where applicable, has plans in place that meet the requirements of Section 110 for the 2008 ozone NAAQS. The Wyoming Air Quality Standards and Regulations (WAQSR) referenced in the State’s submittal are publicly available at <http://soswy.state.wy.us/Rules/default.aspx>. Air pollution control regulations and statutes that have been previously approved by the EPA and incorporated into the Wyoming SIP can be found at 40 CFR 52.2620.

1. *Program for enforcement of control measures*: Section 110(a)(2)(C) requires SIPs to “include a program to provide for the enforcement of the measures described in subparagraph (A), and regulation of the modification and construction of any stationary source within the areas covered by the plan as necessary to assure that [NAAQS] are achieved, including a permit program as required in parts C and D.”

To generally meet the requirements of Section 110(a)(2)(C), the State is required to have SIP-approved PSD, nonattainment NSR, and minor NSR permitting programs that are adequate to

implement the 2008 ozone NAAQS. As explained elsewhere in this action, the EPA is not evaluating nonattainment related provisions, such as the nonattainment NSR program required by part D of the Act. The EPA is evaluating the State’s PSD program as required by part C of the Act, and the State’s minor NSR program as required by Section 110(a)(2)(C).

Enforcement of Control Measures Requirement

Wyoming’s Rule (02) II, Legal Authority, which the EPA approved into Wyoming’s SIP,¹ allows the State to enforce applicable laws, regulations, and standards; to seek injunctive relief; and to provide authority to prevent construction, modification, or operation of any stationary source at any location where emissions from such source will prevent the attainment or maintenance of a national standard or interfere with prevention of significant deterioration requirements.

PSD Requirements

With respect to Element (C), the EPA interprets the CAA to require each state to make an infrastructure SIP submission for a new or revised NAAQS demonstrating that the air agency has a complete PSD permitting program meeting the current requirements for all regulated NSR pollutants. The requirements of Element D(i)(II) may also be satisfied by demonstrating the air agency has a complete PSD permitting program that correctly addresses all regulated NSR pollutants. Wyoming has shown that it currently has a PSD program in place that covers all regulated NSR pollutants, including greenhouse gases (GHGs).

On July 25, 2011 (76 FR 44265), we approved a revision to the Wyoming PSD program that addressed the PSD requirements of the Phase 2 Ozone Implementation Rule promulgated on November 29, 2005 (70 FR 71612). As a result, the approved Wyoming PSD program meets the current requirements for ozone.

With respect to GHG’s, on June 23, 2014, the United States Supreme Court addressed the application of PSD permitting requirements to GHG emissions. *Utility Air Regulatory Group v. Environmental Protection Agency*, 134 S.Ct. 2427 (2014). The Supreme Court held that the EPA may not treat GHGs as an air pollutant for purposes of determining whether a source is a major source required to obtain a PSD permit.

¹ See 40 CFR 52.2620(e), Rule No. (02) II; 41 FR 36652 (Aug. 31, 1976) (approving Wyoming’s revisions to its SIP).

The Court also held that the EPA could continue to require that PSD permits, otherwise required based on emissions of pollutants other than GHGs (anyway sources) contain limitations on GHG emissions based on the application of Best Available Control Technology (BACT).

In accordance with the Supreme Court decision, on April 10, 2015, the U.S. Court of Appeals for the District of Columbia Circuit (the D.C. Circuit) in *Coalition for Responsible Regulation v. EPA*, 606 F. App'x. 6, at *7–8 (D.C. Cir. April 10, 2015), issued an amended judgment vacating the regulations that implemented Step 2 of the EPA's PSD and Title V Greenhouse Gas Tailoring Rule, but not the regulations that implement Step 1 of that rule. Step 1 of the Tailoring Rule covers sources that are required to obtain a PSD permit based on emissions of pollutants other than GHGs. Step 2 applied to sources that emitted only GHGs above the thresholds triggering the requirement to obtain a PSD permit. The amended judgment preserves, without the need for additional rulemaking by the EPA, the application of the BACT requirement to GHG emissions from Step 1 or "anyway" sources.² With respect to Step 2 sources, the D.C. Circuit's amended judgment vacated the regulations at issue in the litigation, including 40 CFR 51.166(b)(48)(v), "to the extent they require a stationary source to obtain a PSD permit if greenhouse gases are the only pollutant (i) that the source emits or has the potential to emit above the applicable major source thresholds, or (ii) for which there is a significant emission increase from a modification."

The EPA is planning to take additional steps to revise the federal PSD rules in light of the Supreme Court and subsequent D.C. Circuit opinion. Some states have begun to revise their existing SIP-approved PSD programs in light of these court decisions, and some states may prefer not to initiate this process until they have more information about the planned revisions to the EPA's PSD regulations. The EPA is not expecting states to have revised their PSD programs in anticipation of the EPA's planned actions to revise its PSD program rules in response to the court decisions.

At present, the EPA has determined that Wyoming's SIP is sufficient to satisfy Elements (C) and (D)(i)(II) prong 3 with respect to GHGs. This is because the PSD permitting program previously approved by the EPA into the SIP

continues to require that PSD permits issued to "anyway sources" contain limitations on GHG emissions based on the application of BACT. The EPA most recently approved revisions to Wyoming's PSD program on December 6, 2013 (78 FR 73445). The approved Utah PSD permitting program still contains some provisions regarding Step 2 sources that are no longer necessary in light of the Supreme Court decision and D.C. Circuit amended judgment. Nevertheless, the presence of these provisions in the previously-approved plan does not render the infrastructure SIP submission inadequate to satisfy Elements (C) and (D)(i)(II). The SIP contains the PSD requirements for applying the BACT requirement to greenhouse gas emissions from "anyway sources" that are necessary at this time. The application of those requirements is not impeded by the presence of other previously-approved provisions regarding the permitting of Step 2 sources. Accordingly, the Supreme Court decision and subsequent D.C. Circuit judgment do not prevent the EPA's approval of Wyoming's infrastructure SIP as to the requirements of Elements (C) and (D)(i)(II) prong 3.

Finally, we evaluate the PSD program with respect to current requirements for PM_{2.5}. In particular, on May 16, 2008, the EPA promulgated the rule, "Implementation of the New Source Review Program for Particulate Matter Less Than 2.5 Micrometers (PM_{2.5})" (73 FR 28321) (2008 Implementation Rule). On October 20, 2010 the EPA promulgated the rule, "Prevention of Significant Deterioration (PSD) for Particulate Matter Less Than 2.5 Micrometers (PM_{2.5})—Increments, Significant Impact Levels (SILs) and Significant Monitoring Concentration (SMC)" (75 FR 64864). The EPA regards adoption of these PM_{2.5} rules as a necessary requirement when assessing a PSD program for the purposes of Element (C).

On January 4, 2013, the U.S. Court of Appeals, in *Natural Resources Defense Council v. EPA*, 706 F.3d 428 (D.C. Cir.), issued a judgment that remanded the EPA's 2007 and 2008 rules implementing the 1997 PM_{2.5} NAAQS. The court ordered the EPA to "repromulgate these rules pursuant to Subpart 4 consistent with this opinion." *Id.* at 437. Subpart 4 of part D, Title 1 of the CAA establishes additional provisions for particulate matter nonattainment areas.

The 2008 Implementation Rule addressed by *Natural Resources Defense Council*, "Implementation of New Source Review (NSR) Program for Particulate Matter Less Than 2.5

Micrometers (PM_{2.5})," (73 FR 28321, May 16, 2008), promulgated NSR requirements for implementation of PM_{2.5} in nonattainment areas (nonattainment NSR) and attainment/unclassifiable areas (PSD). As the requirements of Subpart 4 only pertain to nonattainment areas, the EPA does not consider the portions of the 2008 Implementation Rule that address requirements for PM_{2.5} attainment and unclassifiable areas to be affected by the court's opinion. Moreover, the EPA does not anticipate the need to revise any PSD requirements promulgated in the 2008 Implementation Rule in order to comply with the court's decision. Accordingly, the EPA's proposed approval of Wyoming's infrastructure SIP as to Elements (C) or (D)(i)(II) prong 3 with respect to the PSD requirements promulgated by the 2008 Implementation rule does not conflict with the court's opinion.

The court's decision with respect to the nonattainment NSR requirements promulgated by the 2008 Implementation Rule also does not affect the EPA's action on the present infrastructure action. The EPA interprets the Act to exclude nonattainment area requirements, including requirements associated with a nonattainment NSR program, from infrastructure SIP submissions due three years after adoption or revision of a NAAQS. Instead, these elements are typically referred to as nonattainment SIP or attainment plan elements, which would be due by the dates statutorily prescribed under subpart 2 through 5 under part D, extending as far as 10 years following designations for some elements.

The second PSD requirement for PM_{2.5} is contained in the EPA's October 20, 2010 rule, "Prevention of Significant Deterioration (PSD) for Particulate Matter Less Than 2.5 Micrometers (PM_{2.5})—Increments, Significant Impact Levels (SILs) and Significant Monitoring Concentration (SMC)" (75 FR 64864). The EPA regards adoption of the PM_{2.5} increments as a necessary requirement when assessing a PSD program for the purposes of Element (C). On July 25, 2011 (76 FR 44265), the EPA approved SIP revisions that revised Wyoming's PSD program which incorporated the 2008 Implementation Rule. The EPA approved revisions to reflect the 2010 PM_{2.5} Increment Rule on December 6, 2013 (78 FR 73445). Therefore, Wyoming's SIP approved PSD program meets current requirements for PM_{2.5}. As a result, the EPA is proposing to approve Wyoming's infrastructure SIP for the 2008 ozone NAAQS with respect to the requirement in Section

² See 77 FR 41066 (July 12, 2012) (rulemaking for definition of "anyway" sources).

110(a)(2)(C) to include a permit program in the SIP as required by part C of the Act.

Minor NSR

The State has a SIP-approved minor NSR program, adopted under Section 110(a)(2)(C) of the Act. The minor NSR program is found in Chapter 6, Section 2 of the WAQSR. The EPA previously approved Wyoming's minor NSR program into the SIP (at that time as Chapter 1, Section 21), and has subsequently approved revisions to the program, and at those times there were no objections to the provisions of this program. (See, for example, 47 FR 5892, February 9, 1982). Since then, the State and the EPA have relied on the State's existing minor NSR program to assure that new and modified sources not captured by the major NSR permitting program do not interfere with attainment and maintenance of the NAAQS.

The EPA is proposing to approve Wyoming's infrastructure SIP for the 2008 ozone NAAQS with respect to the general requirement in Section 110(a)(2)(C) to include a program in the SIP that regulates the enforcement, modification, and construction of any stationary source as necessary to assure that the NAAQS are achieved.

2. *Interstate Transport*: CAA Section 110(a)(2)(D)(i)(I) requires SIPs to include provisions prohibiting any source or other type of emissions activity in one state from emitting any air pollutant in amounts that will contribute significantly to nonattainment, or interfere with maintenance, of the NAAQS in another state (known as the "good neighbor" provision). The two provisions of this section are referred to as prong 1 (significant contribution to nonattainment) and prong 2 (interfere with maintenance). Section 110(a)(2)(D)(i)(II) requires SIPs to contain adequate provisions to prohibit emissions that will interfere with measures required to be included in the applicable implementation plan for any other state under part C to prevent significant deterioration of air quality (prong 3) or to protect visibility (prong 4). In this action, the EPA is addressing prong 3 with regard to the 2008 ozone NAAQS. The EPA will address all other transport prongs in a separate rulemaking.

With regard to the PSD portion of CAA Section 110(a)(2)(D)(i)(II), this requirement may be met by a state's confirmation in an infrastructure SIP submission that new major sources and major modifications in the state are subject to a comprehensive EPA approved PSD permitting program in

the SIP that applies to all regulated new source review (NSR) pollutants and that satisfies the requirements of the EPA's PSD implementation rules.³ As noted in the discussion for infrastructure Element (C) earlier in this notice, the EPA is proposing to approve CAA Section 110(a)(2) Element (C) for Utah's infrastructure SIP for the 2008 ozone NAAQS with respect to PSD requirements. As discussed in detail in that section, Wyoming's SIP meets the current PSD-related requirements of Section 110(a)(2)(C).

In-state sources not subject to PSD for a particular NAAQS because they are in a nonattainment area for that standard may also have the potential to interfere with PSD in an attainment or unclassifiable area of another state.⁴ One way a state may satisfy prong 3 with respect to these sources is by citing an air agency's EPA-approved nonattainment NSR provisions addressing any pollutants for which the state has designated nonattainment areas. Wyoming has a SIP-approved nonattainment NSR program which ensures regulation of major sources and major modifications in nonattainment areas, and therefore satisfies prong 3 with regard to this requirement.⁵

The EPA is proposing to approve the infrastructure SIP submission with regard to the requirements of prong 3 of Section 110(a)(2)(D)(i)(II) for the 2008 Ozone NAAQS.

III. What action is the EPA taking today?

The EPA is proposing to approve State Implementation Plan (SIP) revisions submitted by the State of Wyoming on May 28, 2015 and November 6, 2015. The amendments update the version of the CFR incorporated by reference into the rules of the State of Wyoming for Chapter 2, Ambient Standards for Particulate Matter, Section 12; and Chapter 3, General Emission Standards, Section 9. The EPA is also proposing to approve updates to a citation to a **Federal Register** article (*i.e.*, **Federal Register** notice) under the definition of "typical CO₂ equivalent emissions (CO₂e)," and a new minor source baseline date for fine particulate for Sweetwater County of December 12, 2012 into WAQSR Chapter 6, Section 4. The EPA proposes to approve an update to the primary air quality standards for particulate matter (PM)_{2.5} that reflects federal updates that

went into effect in January 2013 into WAQSR Chapter 2, Section 2. The EPA proposes to approve infrastructure elements (C) and (D)(i)(II) prong for the 2008 ozone NAAQS from the State's February 6, 2014 certification. Finally, the EPA is not taking action on the Chapter 6, Permitting Requirements, Section 14 portion of the May 24, 2012 submittal, the March 8, 2013 submittal, or the May 28, 2015 submittal because they have been superseded by a November 6, 2015 submittal (81 FR 35271).

IV. Incorporation by Reference

In this rule, the EPA is proposing to include in a final EPA rule regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, the EPA is proposing to incorporate by reference the Administrative Rules of Wyoming pertaining to General Emission Standards, Prevention of Significant Deterioration and Ambient Standards for PM_{2.5}, as discussed in Section II. The EPA has made, and will continue to make, these documents generally available electronically through www.regulations.gov and/or at the EPA Region 8 Office (please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section of this preamble for more information).

V. Statutory and Executive Order Reviews

Under the Clean Air Act, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the Clean Air Act. Accordingly, this action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);

³ See EPA's "Guidance on Infrastructure State Implementation Plan (SIP) Elements under Clean Air Act Sections 110(a)(1) and (2)," September 13, 2013, at 31.

⁴ *Id.* at 31.

⁵ See WAQSR Chapter 6, Section 13.

- does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the Clean Air Act; and
- does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Carbon monoxide, Incorporation by reference, Intergovernmental relations, Lead, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, Sulfur oxides, Volatile organic compounds.

Authority: 42 U.S.C. 7401 *et seq.*

Dated: July 28, 2016.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R08–OAR–2016–0016; FRL–9950–37–Region 8]

Approval and Promulgation of Air Quality Implementation Plans; State of Colorado; Motor Vehicle Inspection and Maintenance, Clean Screen Program and the Low Emitter Index, On-Board Diagnostics, and Associated Revisions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing approval of three State Implementation Plan (SIP) revisions submitted by the State of Colorado. The revisions involve amendments to Colorado’s Regulation Number 11 “Motor Vehicle Emissions Inspection Program.” The revisions address the implementation of the Low Emitter Index component of Regulation No. 11’s Clean Screen Program, the implementation of the On-Board Diagnostics component of Regulation No. 11, and several other associated revisions. The EPA is proposing approval of these SIP revisions in accordance with the requirements of section 110 of the Clean Air Act (CAA).

DATES: Written comments must be received on or before September 12, 2016.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R08–OAR–2016–0016 at <http://www.regulations.gov>. Follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from www.regulations.gov. The EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.*, on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on

making effective comments, please visit <http://www2.epa.gov/dockets/commenting-epa-dockets>.

FOR FURTHER INFORMATION CONTACT: Tim Russ, Air Program, EPA, Region 8, Mailcode 8P–AR, 1595 Wynkoop, Denver, Colorado 80202–1129, (303) 312–6479, russ.tim@epa.gov.

- VI. EPA’s Evaluation of the State’s 2013 Revisions to Part A, Part C, Appendix A, and Appendix B
- VII. Conclusion
- VIII. Consideration of Section 110(l) of the Clean Air Act
- IX. Proposed Action
- X. Incorporation by Reference
- XI. Statutory and Executive Order Reviews

I. General Information

What should I consider as I prepare my comments for the EPA?

1. Submitting Confidential Business Information (CBI). Do not submit CBI to the EPA through <http://www.regulations.gov> or email. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD ROM that you mail to the EPA, mark the outside of the disk or CD ROM as CBI and then identify electronically within the disk or CD ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for preparing your comments.* When submitting comments, remember to:

- Identify the rulemaking by docket number and other identifying information (subject heading, **Federal Register** volume, date, and page number);
- Follow directions and organize your comments;
 - Explain why you agree or disagree;
 - Suggest alternatives and substitute language for your requested changes;

- Describe any assumptions and provide any technical information and/or data that you used;

- If you estimate potential costs or burdens, explain how you arrived at your estimate in

- sufficient detail to allow for it to be reproduced;

- Provide specific examples to illustrate your concerns, and suggest alternatives;

- Explain your views as clearly as possible, avoiding the use of profanity or personal threats; and,

- Make sure to submit your comments by the comment period deadline identified.

II. Background

In this action, the EPA is proposing approval of SIP revisions to Regulation No. 11 contained in three submittals from Colorado. The State's submittals were dated June 11, 2008, March 15, 2013, and March 3, 2014. Much of the content of the revisions involved minor updates to several sections of Regulation No. 11 and deletion of obsolete language. The following background discussion involves those revisions of greater significance:

a.) Colorado's 2007 Revisions to Regulation No. 11 for the Implementation of the Low Emitter Index (LEI) Portion of the Clean Screen Program Contained in Regulation No. 11

Colorado's Regulation No. 11 (hereafter "Reg. No. 11") addresses the implementation of the State's motor vehicle inspection and maintenance (I/M) program. The I/M program consists of an "enhanced" component that utilizes a dynamometer-based EPA IM240 test for 1982 and newer light-duty gasoline vehicles¹ and a two-speed idle test (TSI)² for 1981 and older light-duty gasoline vehicles. To improve motorist convenience and reduce program implementation costs, the State also administers a remote sensing-based "Clean Screen" program component of the I/M program. Remote sensing is a method for measuring vehicle emissions, while simultaneously photographing the license plate, when a

vehicle passes through infrared or ultraviolet beams of light. Owners of vehicles meeting the Clean Screen criteria are notified by the County Clerk that their vehicles have passed the motor vehicle inspection process and are exempt from their next regularly scheduled IM240 test.

The Clean Screen program component of Colorado's Reg. No. 11 was originally approved, for implementation in the Metro-Denver area, with the EPA's approval of the original Denver carbon monoxide (CO) redesignation to attainment and the maintenance plan (see: 66 FR 64751, December 14, 2001). The Clean Screen criteria that was approved in 2001 by the EPA (see: 66 FR 64751, December 14, 2001) required two valid passing remote sensing readings on different days or from different sensors, that met the applicable emissions reading requirements in Part F of Reg. No. 11, within a twelve-month period in order to clean-screen a vehicle.

Colorado revised Reg. No. 11 to expand the definition and requirements for a "clean-screened vehicle" to also include vehicles identified as low emitting vehicles in the state-determined Low Emitting Index (LEI) which have one passing remote sensing reading, prior to the vehicle's registration renewal date. As part of the LEI process, the Colorado Department of Public Health and Environment (CDPHE), Air Pollution Control Division (hereinafter, the "Division") develops an LEI on or before July 1st of each year. The LEI is based on a tabulation of the previous calendar year's IM240 inspection program results for specific make, model, and model year vehicles that passed IM240 vehicle inspections the previous year at a minimum rate of a 98%.

By a letter dated June 11, 2008, the Governor of Colorado submitted the above 2007 Reg. No. 11 LEI revisions and other minor revisions involving changes/additions to the definitions in Reg. No. 11 and the addition of Attachment 1 to the Technical Specifications in Appendix A. These SIP revisions are discussed in further detail below in section IV.

b.) Colorado's 2012 Revisions to Regulation No. 11 for the Implementation of the On-Board Diagnostics Test Requirements Contained in Regulation No. 11 and the Seven Model Year I/M Test Exemption

As noted above, Colorado's Reg. No. 11 addresses the implementation of a motor vehicle I/M program that consists of an "enhanced" component IM240 test for 1982 and newer light-duty

vehicles and a TSI test for 1981 and older light-duty gas vehicles. In addition, and beginning in January 2015, Colorado also began implementing an On-Board Diagnostics (OBD) test for certain model year vehicles. An OBD I/M test essentially means the electronic retrieval, by connecting to the computer port data link connector (DLC) in the vehicle with an OBD test analyzer, of information from a vehicle's computer system. The electronic information retrieved addresses items such as stored readiness status, diagnostic trouble codes (DTC), malfunction indicator light (MIL) illumination and other data from a vehicle's OBD system. Electronically interrogating a vehicle's OBD system allows for the determination of whether any emission related DTCs are present and if the MIL is commanded on. Should these aspects of an OBD test be present, that would indicate the existence of an emissions related malfunction with the vehicle being tested.

In addition, Colorado also extended the Reg. No. 11 exemption from I/M testing for new vehicles from four years to seven years. This revision was based on Colorado's gathering of emissions testing information over a period of several years which demonstrated that historically new and newer vehicles typically did not fail the IM240 or OBD emissions test within the first seven years of the vehicle's life.

By a letter dated March 15, 2013, the Governor of Colorado submitted the above 2012 Reg. No. 11 OBD test requirements, the seven year test exemption, and other minor revisions. These SIP revisions are discussed in further detail below in section V.

c.) Colorado's 2013 Revisions to Regulation No. 11, Appendix A, Incorporation by Reference of Technical Materials, the Addition of New Technical Information/Requirements, and Minor Revisions to Appendix B

Colorado further revised Reg. No. 11 by updating Appendix A and Appendix B to remove text and incorporate by reference certain Attachments to Appendix A, to add new language to Appendix A, and to add new language and remove obsolete language in Appendix B.

Appendix A was revised to remove the text of three technical document attachments and to note that the documents are available at CDPHE's Emissions Technical Center Procedures Manual. The technical documents are incorporated by reference into Reg. No. 11, Appendix A. The technical documents that are incorporated by

¹ See 40 CFR part 51, subpart S for a complete description of EPA's IM240 test. The IM240 test is essentially an enhanced motor vehicle emissions test to measure mass tailpipe emissions while the vehicle follows a computer generated driving cycle trace for 240 seconds and while the vehicle is on a dynamometer.

² See 40 CFR part 51, subpart S for a complete description of EPA's two-speed idle test. The two-speed idle test essentially measures the mass tailpipe emissions of a stationary vehicle; one reading is at a normal idle of approximately 700 to 800 engine revolutions per minute (RPM) and one reading at 2,500 RPM.

reference into Reg. No. 11 are: Attachment I “PDF 1000 Scanner,” Attachment II “Thermal Transfer Printer,” and Attachment III “Colorado Automobile Dealers Transient Mode Test Analyzer System.” Appendix A was also revised by adding Attachment V “Specifications for Colorado On-Board Diagnostic (OBD) Stand-Alone Analyzer.”

Appendix B, which is entitled “Standards and Specifications for Calibration/Span Gas Suppliers,” was revised with updated language in Section 1 “Definitions,” Section 2 “Basic & Enhanced Idle Air Program/Technical Requirements,” Section 3, “Calibration/Span Gas Approval & Labeling,” Section 4 “Cylinder Tracking & Recall,” Section 5 “Enhanced IM & IG 240 Air Program/Technical Requirements,” Section 6 “Colorado Approval Process,” and Section 7 “Blender Facility Requirements & Documentation.” Obsolete language was also removed from Appendix B.

By a letter dated March 3, 2014, the Governor of Colorado submitted the above 2013 Reg. No. 11 revisions to Appendix A and Appendix B. These SIP revisions are discussed in further detail below in section VI.

III. What was the State’s process?

Section 110(a)(2) of the CAA requires that a state provide reasonable notice and public hearing before adopting a SIP revision and submitting it to us.

a.) *The State’s June 11, 2008 SIP Submittal*

On June 21, 2007 the Colorado Air Quality Control Commission (AQCC) conducted a public hearing to consider the adoption of revisions and additions to the Colorado SIP. The revisions affecting the SIP involved Reg. No. 11, the Clean Screen sections of Reg. No. 11, the LEI portion of the Clean Screen program, and associated revisions. After reviewing written comments, dated April 17, 2007, received from Rocky Mountain Clean Air Action and after conducting a public hearing, the AQCC adopted the proposed revisions to Reg. No. 11 on June 21, 2007. The SIP revisions became State effective on August 30, 2007.

We evaluated the State’s June 11, 2008 submittal for Reg. No. 11 of the SIP and determined that the State met the requirements for reasonable notice and public hearing under section 110(a)(2) of the CAA. By a letter dated October 14, 2008, we advised James B. Martin, Executive Director of the CDPHE, that the SIP revisions submittal was deemed to have met the minimum

“completeness” criteria found in 40 CFR part 51, Appendix V.

b.) *The State’s March 15, 2013 SIP Submittal*

On December 20, 2012, the AQCC conducted a public hearing to consider the adoption of revisions and additions to the Colorado SIP. The revisions affecting the SIP involved Reg. No. 11, the OBD program, the seven model year exemption from I/M testing, and associated revisions. After reviewing one supportive email written comment, dated December 16, 2012, received from Bob Armott and after conducting a public hearing, the AQCC adopted the proposed revisions to Reg. No. 11 on December 20, 2012. The SIP revisions became State effective on February 15, 2013.

We evaluated the State’s March 15, 2013 submittal for Reg. No. 11 of the SIP and determined that the State met the requirements for reasonable notice and public hearing under section 110(a)(2) of the CAA. By operation of law under section 110(k)(1)(B) of the CAA, the State’s March 15, 2013 submittal was deemed complete on September 15, 2013.

c.) *The State’s March 3, 2014 SIP Submittal*

On November 21, 2013, the AQCC conducted a public hearing to consider the adoption of revisions and additions to the Colorado SIP. The revisions affecting the SIP included updating Appendix A and Appendix B to Reg. No. 11 to remove text, incorporate by reference certain Attachments to Appendix A, to add new language to Appendix A, and to add new language and remove obsolete language in Appendix B. After conducting a public hearing, which did not have any public comments, the AQCC adopted the proposed revisions to Reg. No. 11 on November 21, 2013. The SIP revisions became State effective on December 30, 2013.

We evaluated the State’s March 3, 2014 submittal for Reg. No. 11 of the SIP and determined that the State met the requirements for reasonable notice and public hearing under section 110(a)(2) of the CAA. By operation of law under section 110(k)(1)(B) of the CAA, the State’s March 3, 2014 submittal was deemed complete on September 3, 2014.

IV. EPA’s Evaluation of the State’s 2007 Revisions to the Low Emitter Index, Part A, Part C, Part F, and Appendix A

a.) *Evaluation of the Clean Screen Program and LEI Component*

We approved the Clean Screen program component of Colorado’s Reg.

No. 11, for implementation in the Metro-Denver area with our approval of the original Denver carbon monoxide (CO) redesignation to attainment and the associated maintenance plan (see: 66 FR 64751, December 14, 2001).

Additional discussion of the Clean Screen program was provided in our August 22, 2001 proposed rule (66 FR 44097). In evaluating the Clean Screen program for the maintenance plan, the State used EPA’s MOBILE5b motor vehicle emissions calculation model and the MOBILE model’s remote sensing program credit utility dated 1996³ and revised in 1998.⁴ Further discussion is also provided in the State’s Technical Support Document (TSD) for the 2001 CO redesignation to attainment, which is part of the EPA’s final rule hard copy docket, and is also available from the State on-line at: http://www.colorado.gov/airquality/tech_doc_repository.aspx?action=open&file=codenfnl.pdf.

For the Reg. No. 11 revisions that we approved on December 14, 2001, the State used the above tools and other data to evaluate the Clean Screen program for its implementation in the Metro-Denver area. Based on this evaluation and the review of information for the additional implementation of a Clean Screen program in Fort Collins (located in Larimer County, Colorado) and Greeley (located in Weld County, Colorado), the state concluded there would be an approximate 4% disbenefit for CO emissions and a 7% disbenefit for hydrocarbon (HC) emissions if it was assumed that 35% of the eligible vehicles were clean-screened.⁵

We note that the version of Reg. No. 11 that the EPA approved on December 14, 2001 included the Clean Screen criteria which required an eligible vehicle for inspection to have at least two consecutive passing remote sensing emissions readings performed on different days, or at different approved Clean Screen inspection sites, prior to its registration renewal date.

With the 2007 Reg. No. 11 revisions, the AQCC adopted modifications as proposed by the Division that expanded the Clean Screen criteria to also include vehicles with one passing remote sensing reading prior to its registration

³ “User Guide and Description For Interim Remote Sensing Program Utility,” EPA/AA/AMD/EIG/96-01, dated September, 1996.

⁴ “Program User Guide for Interim Vehicle Clean Screening Credit Utility,” Draft Report, EPA420-P-98-007, dated May, 1998.

⁵ “Revised Final Economic Impact Analysis for Inspection and Maintenance per C.R.S. 25-110.5(4)(I), Cost Effectiveness Economic Impact Analysis, 2/1/99.”

date and that the vehicle is identified as a low emitter on the LEI. To address the LEI criteria of this revised Clean Screen process, the Division develops a low emitting vehicle index on or before July 1st of each year based on a tabulation of the previous calendar year's IM240 inspection program results for specified make, model and model year vehicles. This LEI is comprised of specific make, model and model year vehicles that passed IM240 vehicle inspections the previous year at a minimum of a 98% rate. However, in developing the LEI,

the Division may use passing criteria greater than 98% if necessary to ensure that the use of the LEI is equivalent or better than the use of a second remote sensing measurement in terms of air quality benefits. This process is more fully detailed in the CPDHE May, 2007 document entitled "Development and Evaluation of Colorado's Low Emitter Index."

To assess the State's Clean Screen program and its LEI component, the EPA reviewed the available CDPHE Clean Screen annual reports for 2009,⁶

2011,⁷ 2012,⁸ and 2013.⁹ The annual reports detailed the overall effectiveness of the Clean Screen program and also contained the results of the random 2% sampling for the LEI component. This sampling procedure involved retaining 2% of the vehicles which had been shown to pass one measurement with RSD equipment and been on the LEI index, and then requiring them to take an IM240 test for comparison. The data, including fleet coverage and emissions reduction retention, are presented below in Tables 1 and 2:

TABLE 1—TOTAL VEHICLES INSPECTED AND VEHICLES CLEAN-SCREENED

Year of clean screen report	Total vehicles inspected	Vehicles that were clean-screened	Percent of total vehicles that were clean-screened (%)
2009	899,646	199,344	22.0
2011	1,156,949	246,768	21.3
2012	1,150,562	248,224	21.6
2013	1,184,875	233,760	19.7

TABLE 2—ESTIMATED CLEAN SCREEN DISBENEFIT—BASED ON RETAINED EMISSION REDUCTIONS

Year of clean screen report	Retained HC emission reductions (%)	Retained CO emission reductions (%)	Retained NO _x * emission reductions (%)
2009	94.6	98.1	92.9
2011	96.1	98.1	97.3
2012	94.8	97.1	93.9
2013	97.3	96.7	97.6
Average Clean Screen Disbenefit	4.3	2.5	4.6

* Nitrogen Oxides.

The data from the State's Clean Screen reports, as excerpted and presented in the above tables, demonstrate that the disbenefit from the Clean Screen program and its LEI component continue to be within the original estimates from the Reg. No. 11 revisions that we approved on December 14, 2001. Although those original 2001 disbenefit estimates (4% for CO, 7% for HC, and assuming 35% clean-screened vehicles) were prepared with then current tools, the Clean Screen program and LEI component continue to perform within those estimates. Also, from the above four years of Clean Screen annual reports that we evaluated, the State's Reg. No. 11 revisions original estimate of 35% of

the fleet being clean-screened has not been achieved. Based on the four referenced Clean Screen reports, we note that 22% or less of the eligible vehicles have been clean-screened. Therefore, the actual emission reduction disbenefit has been less than predicted, as more vehicles have then been required to go through the IM240 test.

b.) The Sections of Reg. No. 11 That Were Revised With the State's June 11, 2008 Submittal Were as Follows:

1.) *Part A, section II:* Modify definition number 15 "Clean Screened Vehicle" to reflect the addition of the LEI; modify definition number 17 "Colorado '4'" to clarify the use of the BAR 90 test analyzer systems for use after 1994; and add a new definition

"Low Emitting Vehicle Index." Renummer definitions number 18 and higher.

2.) *Part C, section XII:* Modify section XIIA.3 regarding the requirements and procedures to clean screen an eligible vehicle and add section XIIE.4 regarding low emitting vehicles and the LEI.

3.) *Part F, section VI:* Renummer section VI.B as VI.C; add new section VI.B.1 which requires the development of the LEI each year; add new section VI.B.2 which establishes the 98% minimum passing criteria for the LEI; and add new section VI.B.3 which allows the Division to use a greater than 98% passing criteria if needed to equate to a second RSD reading.

4.) *Appendix A, Technical Specifications, Attachment 1:* Sections

⁶ "The Colorado Remote Sensing Program January–December, 2009," Colorado Department of Public Health and Environment, July, 2010.

⁷ "The Colorado Remote Sensing Program January–December, 2011," Colorado Department of Public Health and Environment, November, 2012.

⁸ "The Colorado Remote Sensing Program January–December, 2012," Colorado Department of Public Health and Environment, December, 2013.

⁹ "The Colorado Remote Sensing Program January–December, 2013," Colorado Department of Public Health and Environment, September, 2014.

of Attachment 1 of the Technical Specifications contain the specifications for the PDF 1000 Scanner; some sections were unreadable and a full, retyped PDF 1000 Scanner section was provided.

5.) *Appendix A, Technical Specifications, Attachment 2:* Sections of Attachment 2 of the Technical Specifications contain the specifications for the Thermal Transfer Printer; some sections were unreadable and a full, retyped Thermal Transfer Printer section was provided.

The EPA notes that Part F, section III.A.2 of Reg. No. 11 was also provided with the State's June 11, 2008 submittal. This section contains IM240 test light duty vehicle emissions cutpoints for 1996 and newer vehicles (all in grams per mile). The CO, HC, and NO_x entries for calendar year 2006 are incorrect as the State had previously provided an August 8, 2006 SIP revision submittal to remove these 2006 cutpoints (*i.e.*, HC 0.6, CO 10.0, and NO_x 1.5). The EPA approved the removal of these 2006 cutpoints on December 20, 2012 (77 FR 75388).

V. EPA's Evaluation of the State's 2012 Revisions to the On-Board Diagnostics Test, the Seven Model Year Emissions Test Exemption, the Gas Cap Retest, Part A, Part B, Part C, Part F, and Part G

a.) Evaluation of the OBD Test Provisions

As we noted above, beginning in January 2015, Colorado began implementing an OBD test for certain model year vehicles. An OBD I/M test essentially means the electronic retrieval, by connecting to the computer port DLC in the vehicle with an OBD test analyzer, of information from a vehicle's computer system addressing items such as stored readiness status,

DTCs, MIL illumination and other information from a vehicle's OBD system. Electronically interrogating a vehicle's OBD system allows for the determination if any emission related DTCs are present and if the MIL is commanded on. Should these aspects of an OBD test be present, that would indicate the existence of an emissions related malfunction with the vehicle being tested. More detailed information on OBD I/M testing is found in 40 CFR 85, Subpart W and at the EPA's Office of Transportation and Air Quality (OTAQ) Web site at: <http://www3.epa.gov/obd/regtech/inspection.htm>. In addition, further information is provided in the EPA's OBD rulemaking actions of April 5, 2001 (66 FR 18156), December 20, 2005 (70 FR 75403), and the EPA's document addressing performing OBD system checks as part of an I/M program.¹⁰

The EPA has reviewed the OBD information in the State's Administrative documentation with its March 15, 2013 submittal, the OBD I/M test procedures contained in the Reg. No. 11 revisions to Part A, Part B, Part C, and Part F, all as detailed further below, and has concluded these revisions meet the requirements of 40 CFR 85, Subpart W for OBD I/M testing and the above cited EPA final rules.

We note the Colorado OBD test provisions that were adopted in 2012 are applicable to a portion of the vehicles that are subject to an I/M test. The Reg. No. 11 revisions of 2012 also increased the new vehicle model year exemption from four to seven years, required OBD testing for the next four years (two inspection cycles for the 8th through 11th years), and required I/M 240 testing to commence with the third inspection cycle. In addition, the Reg. No. 11 revisions of 2012 allowed OBD

testing for OBD equipped vehicles that were otherwise hard to test with the IM240 procedures (for example, too short of a wheelbase for the dynamometer treadmills, vehicles with very large or small wheel/tire combinations, and certain all-wheel-drive vehicles with very sensitive traction control systems), eliminated the visual inspection for 1996 and newer vehicles (because of OBD testing), and required a full emissions retest for vehicles initially failing the gas cap test. The 2012 Reg. No. 11 revisions retained other aspects of the I/M program including the use of Clean Screen technology to clean screen vehicles and annual TSI testing for 1981 and older vehicles.

In consideration of the OBD testing component of the I/M program and the extension from four years to seven years to exempt new vehicles from I/M testing (discussed further below), the State prepared an estimated emissions benefit for the implementation of both the OBD testing and extended test exemption for seven years. This estimated emissions benefit information is contained in the Administrative Documentation, that is part of the State's March 15, 2013 SIP submittal, and is provided in the section entitled "SIP Emission Reduction Equivalency Demonstration." The information notes that the Division conducted modeling of the 2012 revisions using the then current I/M program, as implemented in the seven Metro-Denver counties area, and the new program (OBD plus the seven-year testing exemption) as fully implemented in 2017. The year 2017 was selected as that would reflect the full completion of a two-year OBD inspection cycle on applicable vehicles. The Division's results are provided below in Table 3:

TABLE 3—SEVEN COUNTY METRO-DENVER AREA I/M PROGRAM ESTIMATED REDUCTIONS IN 2017

	TGH*	NO _x	CO
Current I/M Program	6.008 tpd**	4.849 tpd	68.843 tpd.
Revised I/M Program	6.052	5.004	64.916.

*Total Gaseous Hydrocarbons.
**tons per day (tpd).

As shown in Table 3 above, implementation of the Reg. No. 11 provisions of the OBD component and the seven-year exemption from I/M testing were estimated to result in a small increase in CO emissions and a

slight reduction in ozone precursor emissions (NO_x and TGH).

The EPA has evaluated this negligible increase in estimated CO emissions and has concluded it will not have a detrimental effect on the most recently-

approved revised Metro-Denver CO maintenance plan (72 FR 46148, August 17, 2007).¹¹ Our evaluation considered the negligible increase in CO emissions of four tpd to the CO mobile sources emission inventory data in the Metro-

¹⁰ "Performing Onboard Diagnostic System Checks as Part of a Vehicle Inspection and Maintenance Program," EPA-420-R-01-015, dated June, 2001.

¹¹ "Approval and Promulgation of Air Quality Implementation Plans; State of Colorado; Revised Denver and Longmont Carbon Monoxide

Maintenance Plans, and Approval of Related Revisions," 72 FR 46148, dated August 17, 2007.

Denver maintenance plan for the projected 2015 mobile source CO emissions of 1,416 tpd and the maintenance plan's final maintenance year of 2021 projected mobile source CO emissions of 1,372.10 tpd. The four tpd emissions would be 0.28% of the 2015 CO mobile source emissions and 0.29% of the 2021 CO mobile source emissions. In addition, we also reviewed state-certified and EPA-reviewed ambient CO air quality monitoring data that are located in the EPA's Air Quality System (AQS) database. We reviewed data from 2007 through 2015. We did not find any exceedances or violations of the CO National Ambient Air Quality Standards (NAAQS). Therefore, the Metro-Denver CO maintenance area continues to demonstrate maintenance of the CO NAAQS.

We do note that the slight reduction in ozone precursor emissions of NO_x and TGH will be beneficial as the Metro-Denver/North Front Range (NFR) 2008 8-hour ozone NAAQS nonattainment area continues to work towards attainment of that NAAQS. Additional information regarding the Metro-Denver/NFR ozone nonattainment area and its status can be found in the EPA's 2008 ozone NAAQS proposed SIP Requirements rule (80 FR 51992, August 27, 2015)¹² and final rule (81 FR 26697, May 4, 2016).¹³

b.) Evaluation of the Extension of the I/M Test Exemption From Four to Seven Years

Included with the March 15, 2013 Reg. No. 11 SIP revision submittal were revised provisions to increase the I/M test exemption for newer vehicles from the EPA-approved four-year exemption to seven years. Additional information and rationale were provided by the Division in the "Air Quality Control Commission Regulation Number 11 Motor Vehicle Emissions Detailed Issue Statement" which was part of the SIP submittal's Administrative Documentation.

The Division's AQCC issue statement noted that the revision to Reg. No. 11, to increase new vehicle model year exemptions from four years to seven years, was allowed by Colorado law which authorizes the AQCC to extend

the duration for which new vehicles are exempt from I/M testing; 42-4-310(1)(a)(II)(C) and 42-4-306(8)(b), Colorado Revised Statute (C.R.S.)

The Division noted that the revision to extend the new vehicle model year exemption results in an overall cost savings and increased convenience to the public for tests not performed. In addition, the Division stated that the population of vehicles in this age group, and their vehicle miles traveled, are relatively high; however, since they are relatively new vehicles, their emissions are lower than those of older vehicles.

The Division concluded that increasing the duration of the new vehicle exemption increases emissions from the entire fleet. However, the EPA notes that with this particular revision to Reg. No. 11, the State simultaneously included revisions to Reg. No. 11 to initiate OBD testing requirements for applicable vehicles. As discussed above and as presented in Table 3 above, the net result of the implementation of both the seven-year extended exemption for I/M test and OBD testing showed a negligible increase of CO emissions and a slight decrease in NO_x and TGH emissions. Based on our above analysis of the Metro-Denver CO maintenance plan and relevant ambient CO air quality monitoring data, the EPA finds that the increase in the new vehicle seven-year I/M test exemption will not have an adverse effect on the approved revised Metro-Denver CO maintenance plan (72 FR 46148, August 17, 2007). We also find that the emissions from the revised seven-year I/M test exemption are offset by the additional reduction in ozone precursor emissions of NO_x and TGH realized through the State's implementation of OBD testing that covers the Metro-Denver/NFR 2008 8-hour ozone NAAQS nonattainment area.

c.) Gas Cap Full Retest Clarification and Other Minor Non-Substantive Revisions

There was a clarification to the gas cap test requirements and several other minor revisions included with the March 15, 2013 Reg. No. 11 SIP revision submittal.

The state revised Reg. No. 11 to clarify that, in accordance with federal law, a full I/M retest is required after a test failure due to the lack of a gas cap or a faulty gas cap. The EPA notes that missing or malfunctioning gas caps automatically cause a test failure and require replacement of the cap and then a full emissions retest. The full retest is necessary because the gas cap seals and pressurizes the entire fuel evaporative emissions control system. If other components of the evaporative system are functional, there will be no effect on

tailpipe emissions; however, if other elements of the evaporative system are faulty replacing a faulty or missing gas cap can trigger a tailpipe emissions failure. In addition, the inclusion or replacement of a malfunctioning gas cap will reduce emissions of volatile organic compounds (VOC) from a vehicle's fuel tank. This is a beneficial as VOCs are a precursor emission to the formation of ground level ozone.

The Reg. No. 11 revisions also include several 'housekeeping' items including: Correcting typographical and grammatical errors; deleting obsolete language and implementation dates; removing titles and text that were inadvertently left unchanged from prior Reg. No. 11 changes; and renumbering and recodifications according to adopted language additions and deletions.

d.) The Sections of Reg. No. 11 That Were Revised With the State's March 15, 2013 Submittal Were as Follows:

1.) *Part A, section I:* Minor wording changes to add new language and remove obsolete language in sections I.B, I.C.3, I.C.3.a, I.C.3.b, I.C.3.c, I.C.4, I.C.7, I.C.7.c, I.C.8, and I.C.9.b.

Part A, section II: A new definition number 20 was added entitled "Colorado On-Board Diagnostic (OBD) Test Analyzer System;" a new definition number 22 was added entitled "Diagnostic Trouble Code (DTC);" and, definitions number 23 to 43 were renumbered. A new definition number 44 was added and entitled "On-Board Diagnostics II (OBD or OBDII) Test" and definitions numbered 45 to 52 were renumbered.

Part A, section IV: Section IV. D was removed which involved obsolete language and section IV.E was renumbered IV.D and also had obsolete language removed.

2.) *Part B, section IX:* Section IX was added and is entitled "Approval of the Colorado On-Board Diagnostic (OBD) Test Analyzer System. Also, Part B, section X was added and is entitled "The Colorado On-Board Diagnostic (OBD) Test Analyzer System."

3.) *Part C, title:* The title was modified by adding "On-Board Diagnostics (OBD)."

Part C, section I.C.3: This involved minor language changes to clarify data transmission and analyzer requirements.

Part C, section II.A: This section was renumbered from II.A through II.F to instead become II.A.1 through II.A.11. Minor clarification language was added along with revised references to sections in Part C.

Part C, section II.G: This section was renumbered to II.B and clarifying

¹² "Determinations of Attainment by the Attainment Date, Extensions of the Attainment Date, and Reclassification of Several Areas Classified as Marginal for the 2008 Ozone National Ambient Air Quality Standards," 80 FR 51992, dated August 27, 2015.

¹³ "Determinations of Attainment by the Attainment Date, Extensions of the Attainment Date, and Reclassification of Several Areas Classified as Marginal for the 2008 Ozone National Ambient Air Quality Standards," 81 FR 26697, dated May 4, 2016.

language was added regarding OBD testing. Sections II.G.1 through II.G.6 were renumbered II.B.1 through II.B.6. Section II.B.4 had clarifying language added regarding applicable vehicles that were unable to be tested with the IM240 test would then be OBD tested.

Part C, section II.C: A new section II.C (II.C.1 through II.C.9) was added which specifies which vehicles are to be OBD tested and the requirements and testing procedures for an OBD test.

Part C, section III.A: This section had clarifying language added and sections III.B and III.C were removed as they addressed the model year 1996 and newer visual inspection procedures. The remaining applicable portions of section III.C were then renumbered III.B. Sections III.D and III.E were renumbered to III.C and III.D.

Part C, section IV: A new section IV was added which addressed the requirements for applicable vehicles (1996 through those vehicles that had reached their 11th model year of age) to be evaluated with and OBD test.

Part C, prior section IV: The existing section IV was renumbered section V and also modified with clarifying language regarding the requirement for a full retest of vehicles which previously had a missing or malfunctioning gas cap.

Part C, section VIII.A.2: A new section VIII.A.2 was added which states that vehicles in their model years seven through 10 need to meet the OBD passing criteria in Part F, section VII. Sections VIII.A.2 through VIII.A.4 were renumbered VIII.A.3 through VIII.A.5.

Part C, sections VIII.B.1, VIII.B.2, and VIII.B.3: These sections had minor wording changes and deletion of obsolete language.

Part C, sections VIII.D.A through VIII.D.E: These sections were renumbered VIII.D.1 through VIII.D.5.

Part C, sections IX.G and X.A: These sections had minor clarifying language added.

4.) *Part F, section V*: This section was entitled "Visible Smoke."

Part F, section VII: A new section VII was added (sections VII.A through VII.F) which stated the required OBD diagnostic inspection test passing criteria.

5.) *Part G*: This part had previously contained obsolete high-emitting vehicle identification pilot project language which was removed and Part G was retitled "Reserved."

VI. EPA's Evaluation of the State's 2013 Revisions to Part A, Part C, Appendix A, and Appendix B

In 2013, the AQCC adopted several minor changes to Reg. No. 11. These

revisions were subsequently submitted to the EPA on March 3, 2014. The sections of Reg. No. 11 that were revised with the State's March 3, 2014 submittal were as follows:

a.) *Part A, section I.C.3.c*: This section was revised to clarify that the seven year new vehicle exemption, which excused vehicles from an I/M test for seven years and was previously adopted by the AQCC in December 2012, would take effect on January 1, 2015. Also, this exemption would apply retroactively to existing vehicles in their fourth, fifth, and sixth years of service.

b.) *Part A, sections I.C.8, I.C.9, and I.C.10*: These sections were revised to clarify ambiguous, contradictory and obsolete Reg. No. 11 language concerning the issuance of and duration periods for "Verification of Emissions Test" exemption windshield stickers issued by motor vehicle dealers. Part A, section I.C.8 was further clarified to note that vehicles in their fourth, fifth, and sixth years of service would have the seven year exemption applied retroactively.

c.) *Part A, section I.C.3 and Part C, sections III and IV*: These sections were revised to clarify that the seven-year new vehicle exemption from I/M testing, OBD testing requirements and procedures, and other changes made to Reg. No. 11 by the AQCC in December 2012, would go into effect January 1, 2015. In addition, the I/M visual inspection procedures for 1996 and newer vehicles would be retained through December 2014.

d.) *Part C, section C VIII.B.3*: This section was revised to codify in Reg. No. 11 the vehicle emissions repair cost waiver amount of \$715. The AQCC has previously directed the Division to change the amount from \$450 to \$715 in November 2002, which was done. However, at that time, the AQCC had declined to note the changed repair amount in the text of Reg. No. 11.

e.) *Part C, section VIII.D.4*: This section was revised regarding the qualifying criteria for an economic hardship waiver for a vehicle failing its emissions test. Section VIII.D.4 was further revised to allow the economic hardship waiver to apply to households owning two vehicles rather than restricting hardship waivers to households owning only one vehicle.

f.) *Appendix A of Reg. No. 11* was revised as follows:

1.) Appendix A was revised to remove the text of three technical document attachments and to note that the documents are available at CDPHE's Emissions Technical Center Procedures Manual. The technical documents are incorporated by reference into Reg. No.

11. Appendix A. The technical documents that are incorporated by reference into Reg. No. 11 are: Attachment I "PDF 1000 Scanner," Attachment II "Thermal Transfer Printer," and Attachment III "Colorado Automobile Dealers Transient Mode Test Analyzer System."

2.) Updated Attachment IV, entitled "Colorado Department of Public Health and Environment Specification for Colorado 97 Analyzer," to reflect technological changes to data specifications, communications protocols, and forms generation.

3.) Included a new Attachment V "Test Analyzer Specification for On-board Diagnostics" for licensed fleets who self-inspect their own vehicles. Note: Part B section X required this Test Analyzer Specification to be in place by December 31, 2013.

g.) *Appendix B of Reg. No. 11* was revised as follows:

1.) Attachment II; the "Calibration Span Gas" labels were updated to reflect the current version of the State-official labels.

h.) Overall revised formatting and other non-substantive changes were made throughout Reg. No. 11.

VII. Conclusion

Our review of the State's Reg. No. 11 revisions, as presented above in sections IV, V, and VI, involved: 1.) The Low Emitter Index (LEI) and Clean Screen program components, 2.) The On-Board Diagnostics (OBD) I/M testing program component, 3.) The seven model-year exemption from I/M testing provisions, 4.) The requirement for a full I/M retest after the replacement of a missing or malfunctioning gas cap, 5.) New definitions, clarification language, and removal of obsolete language, 6.) Numerous revisions to Reg. No. 11 Parts A, B, C, F, G, Appendix A, and Appendix B, and 7.) Overall formatting, correction of typographic errors and other non-substantive changes. Based on our review and evaluation discussion presented above, we have determined that the Reg. No. 11 SIP revisions, submitted by the State in letters dated June 11, 2008, March 15, 2013 and March 3, 2014 sufficiently address applicable provisions in 40 CFR 51, Subpart S, 40 CFR 85, Subpart W, and applicable EPA guidance for I/M programs and that our approval is warranted.

VIII. Consideration of Section 110(1) of the Clean Air Act

Section 110(1) of the CAA states that a SIP revision cannot be approved if the revision would interfere with any applicable requirement concerning

attainment and reasonable further progress towards attainment of a NAAQS or any other applicable requirement of the CAA. The only portions of the Reg. No. 11 revisions that we described above which we believe require further consideration with regard to section 110(l) of the CAA are the revisions to the Clean Screen program to add the LEI component and the seven-year I/M test exemption.

For the LEI component of the Clean Screen program, we noted above that with our December 14, 2001 approval of the Metro-Denver CO maintenance plan and implementation of the Clean Screen program as adopted at that time, the State concluded there would be an approximate 4% disbenefit for CO emissions and a 7% disbenefit for HC emissions if it was assumed that 35% of the eligible vehicles were clean-screened. Our further evaluation of the LEI component of the Clean Screen program, as discussed above in section IV, involved the review of the State's Clean Screen annual reports for 2009, 2011, 2012 and 2013. The annual reports detailed the overall effectiveness of the Clean Screen program and also contained the results of the random 2% sampling for the LEI component. The data from the State's Clean Screen reports demonstrate that the disbenefit from the Clean Screen program, including its LEI component, continue to be within the original estimates from the Reg. No. 11 revisions that we approved on December 14, 2001. Although those original 2001 disbenefit estimates (4% for CO, 7% for HC, and 35% vehicles being clean-screened) were prepared with then current tools, the Clean Screen program and LEI component continue to perform within those estimates. Also, from the above four years of Clean Screen annual reports that we evaluated, the State's Reg. No. 11 revisions original estimate of 35% of the fleet being clean-screened has not been achieved. Based on the four referenced Clean Screen reports, we note that 22% or less of the eligible vehicles have been clean-screened. Therefore, the actual emissions reduction disbenefit has been less than predicted as more vehicles have then been required to go through the IM240 test.

With regard to the seven-year new vehicle exemption from I/M testing, as explained above in section V, we noted that with the implementation of the Reg. No. 11 provisions of the combination of the OBD testing component and the seven-year exemption from I/M testing there was estimated to be a small increase in CO emissions and a minor reduction in ozone precursor emissions

(NO_x and TGH). As noted above, the EPA evaluated this small increase in estimated CO emissions and has concluded it will not have a detrimental effect on the approved revised Metro-Denver CO maintenance plan (72 FR 46148, August 17, 2007). Our evaluation considered the negligible increase in CO emissions of approximately four tons per day as compared to the CO mobile sources emission inventory data in the Metro-Denver CO maintenance plan. As we noted above, the maintenance plan's estimated 2015 mobile source CO emissions are 1,416 tpd and the estimated 2021 (last year of the maintenance plan) mobile source CO emissions are 1,372.10 tpd. Therefore, the four tpd increase would be 0.28% of the 2015 mobile source CO emissions and the 0.29% of the 2021 mobile source CO emissions. We also reviewed available state-certified and EPA-reviewed ambient CO air quality monitoring data from the EPA's AQS database from 2007 through 2015. These data show no exceedance or violation of the CO NAAQS. We further noted that the minor increase in reductions of ozone precursor emissions of NO_x and TGH will be beneficial as the Metro-Denver/NFR 2008 8-hour ozone NAAQS nonattainment area continues to work towards attainment of that NAAQS.

With respect to other NAAQS that have the potential to be affected by our proposed approval of the above Reg. No. 11 revisions, we note that the Metro-Denver area is designated "unclassifiable/attainment" for the 1-hour NO₂ NAAQS¹⁴ and the annual and 24-hour PM_{2.5} NAAQS¹⁵ (see: 40 CFR 81.306). We reviewed available state-certified and EPA-reviewed ambient air quality monitoring data for the 1-hour NO₂ NAAQS, and the annual and 24-hour PM_{2.5} NAAQS. Our review involved EPA's AQS database and relevant data from 2007 through 2015. The data demonstrate continued attainment of the 1-hour NO₂ and PM_{2.5} annual and 24-hour NAAQS in the Metro-Denver area.

In addition to the above, we have determined the revisions to Reg. No. 11 contained in all three SIP revision submittals involving the language changes necessary to implement the LEI and Clean Screen program components, the OBD I/M testing program component, the seven model-year exemption from I/M testing provisions, the requirement for a full I/M retest after

¹⁴ 1-hour NO₂ NAAQS: 75 FR 6474, February 9, 2010.

¹⁵ PM_{2.5} NAAQS: Annual NAAQS (78 FR 3086, January 15, 2013); 2006 24-hour NAAQS (71 FR 61144, October 17, 2006).

the replacement of a missing or malfunctioning gas cap, new definitions, clarification language, removal of obsolete language, numerous minor revisions to Parts A, B, C, F, G, Appendix A and Appendix B of Reg. No. 11, overall formatting, correction of typographic errors and other non-substantive changes do not affect emissions and therefore do not have CAA section 110(l) implications.

In view of the above, the EPA proposes to find that the revisions to Colorado's Reg. No. 11 that are contained in the State's SIP submittals dated June 11, 2008, March 15, 2013 and March 3, 2014 will not interfere with attainment, reasonable further progress, or any other applicable requirement of the CAA.

IX. Proposed Action

The EPA is proposing approval of the June 11, 2008 submitted SIP revisions to Colorado's Regulation Number 11, Part A, Part C, Part F, and Appendix A. The EPA notes that Part F, section III.A.2 was also provided with the State's June 11, 2008 submittal. This section contains IM240 test light duty vehicle emissions cutpoints for 1996 and newer vehicles (all in grams per mile). The CO, HC, and NO_x entries for calendar year 2006 are incorrect as the State had previously provided an August 8, 2006 SIP revision submittal to remove these 2006 cutpoints (*i.e.*, HC 0.6, CO 10.0, and NO_x 1.5). EPA approved the removal of these 2006 cutpoints on December 20, 2012 (77 FR 75388).

In addition, the EPA is proposing approval of the March 15, 2013 submitted SIP revisions to Regulation Number 11, Part A, Part B, Part C, Part F, and Part G. Finally, the EPA is proposing approval of the March 3, 2014 submitted SIP revisions to Regulation Number 11, Part A, Part C, Appendix A, and Appendix B.

X. Incorporation by Reference

In this rule, the EPA is proposing to include in a final EPA rule regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, the EPA is proposing to incorporate by reference Colorado Air Quality Control Commission, Regulation Number 11 as discussed in section IX of this preamble. The EPA has made, and will continue to make, these documents generally available electronically through www.regulations.gov and/or at the EPA Region 8 Office (please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section of this preamble for more information).

XI. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable federal regulations [42 U.S.C. 7410(k), 40 CFR 52.02(a)]. Thus, in reviewing SIP submissions, the EPA's role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this proposed action merely approves some state law as meeting federal requirements and disapproves other state law because it does not meet federal requirements; this proposed action does not impose additional requirements beyond those imposed by state law. For that reason, this proposed action:

- Is not a "significant regulatory action" subject to review by the Office of Management and Budget under Executive Order 12866 (58 FR 51735, Oct. 4, 1993);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104-4);
- Does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, Aug. 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and,
- Does not provide the EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, Feb. 16, 1994).

The SIP is not approved to apply on any Indian reservation land or in any other area where the EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian Country, the rule does not have tribal

implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Carbon monoxide, Incorporation by reference, Intergovernmental relations, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, and Volatile organic compounds.

Authority: 42 U.S.C. 7401 *et seq.*

Dated: July 26, 2016.

[EPA-R05-OAR-2015-0724; FRL-9950-51-Region 5]

Air Plan Approval; Indiana; Abengoa Bioenergy of Indiana, Commissioner's Order

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing to approve a revision to the Indiana State Implementation Plan (SIP) submitted by the Indiana Department of Environmental Management (IDEM) on October 16, 2015. The submittal consists of an order issued by the Commissioner of IDEM (Commissioner's Order No. 2015-01) approving alternative control technology requirements for Abengoa Bioenergy of Indiana (Abengoa). These requirements include the use of a carbon adsorption/absorption hydrocarbon vapor recovery system with a minimum overall control efficiency of 98% to control volatile organic compound (VOC) emissions from the ethanol loading racks at Abengoa. A continuous emissions monitoring system (CEMS) must be used to monitor the carbon adsorption/absorption hydrocarbon vapor recovery system for breakthrough of VOC emissions.

DATES: Comments must be received on or before September 12, 2016.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA-R05-OAR-2015-0724, at [http://](http://www.regulations.gov)

www.regulations.gov or via email to aburano.douglas@epa.gov. For comments submitted at [Regulations.gov](http://www.regulations.gov), follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from [Regulations.gov](http://www.regulations.gov). For either manner of submission, EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.* on the web, cloud, or other file sharing system). For additional submission methods, please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section. For the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit <http://www2.epa.gov/dockets/commenting-epa-dockets>.

FOR FURTHER INFORMATION CONTACT: Jenny Liljegren, Physical Scientist, Attainment Planning and Maintenance Section, Air Programs Branch (AR-18J), Environmental Protection Agency, Region 5, 77 West Jackson Boulevard, Chicago, Illinois 60604, (312) 886-6832, Liljegren.Jennifer@epa.gov.

SUPPLEMENTARY INFORMATION: In the Final Rules section of this **Federal Register**, EPA is approving the State's SIP submittal as a direct final rule without prior proposal because the Agency views this as a noncontroversial submittal and anticipates no adverse comments. A detailed rationale for the approval is set forth in the direct final rule. If no adverse comments are received in response to this rule, no further activity is contemplated. If EPA receives adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on this proposed rule. EPA will not institute a second comment period. Any parties interested in commenting on this action should do so at this time. Please note that if EPA receives adverse comment on an amendment, paragraph, or section of this rule and if that provision may be severed from the remainder of the rule, EPA may adopt as final those provisions of the rule that are not the subject of an adverse

comment. For additional information, see the direct final rule which is located in the Rules section of this **Federal Register**.

Dated: August 1, 2016.

Robert A. Kaplan,

Acting Regional Administrator, Region 5.

Receipt of Several Pesticide Petitions Filed for Residues of Pesticide Chemicals in or on Various Commodities

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of filing of petitions and request for comment.

SUMMARY: This document announces the Agency's receipt of several initial filings of pesticide petitions requesting the establishment or modification of regulations for residues of pesticide chemicals in or on various commodities.

DATES: Comments must be received on or before September 12, 2016.

ADDRESSES: Submit your comments, identified by docket identification (ID) number and the pesticide petition number (PP) of interest as shown in the body of this document, by one of the following methods:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the online instructions for submitting comments.

Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

- *Mail:* OPP Docket, Environmental Protection Agency Docket Center (EPA/DC), (28221T), 1200 Pennsylvania Ave. NW., Washington, DC 20460-0001.

- *Hand Delivery:* To make special arrangements for hand delivery or delivery of boxed information, please follow the instructions at <http://www.epa.gov/dockets/contacts.html>. Additional instructions on commenting or visiting the docket, along with more information about dockets generally, is available at <http://www.epa.gov/dockets>.

FOR FURTHER INFORMATION CONTACT: Susan Lewis, Registration Division (7505P), Office of Pesticide Programs, Environmental Protection Agency, 1200

Pennsylvania Ave. NW., Washington, DC 20460-0001; main telephone number: (703) 305-7090; email address: RDfRNNotices@epa.gov.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this action apply to me?

You may be potentially affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. The following list of North American Industrial Classification System (NAICS) codes is not intended to be exhaustive, but rather provides a guide to help readers determine whether this document applies to them. Potentially affected entities may include:

- Crop production (NAICS code 111).
- Animal production (NAICS code 112).
- Food manufacturing (NAICS code 311).
- Pesticide manufacturing (NAICS code 32532).

If you have any questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT** for the division listed at the end of the pesticide petition summary of interest.

B. What should I consider as I prepare my comments for EPA?

1. *Submitting CBI.* Do not submit this information to EPA through regulations.gov or email. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD-ROM that you mail to EPA, mark the outside of the disk or CD-ROM as CBI and then identify electronically within the disk or CD-ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for preparing your comments.* When preparing and submitting your comments, see the commenting tips at <http://www.epa.gov/dockets/comments.html>.

3. *Environmental justice.* EPA seeks to achieve environmental justice, the fair treatment and meaningful involvement of any group, including minority and/or low-income populations, in the development, implementation, and enforcement of environmental laws,

regulations, and policies. To help address potential environmental justice issues, the Agency seeks information on any groups or segments of the population who, as a result of their location, cultural practices, or other factors, may have atypical or disproportionately high and adverse human health impacts or environmental effects from exposure to the pesticides discussed in this document, compared to the general population.

II. What action is the agency taking?

EPA is announcing its receipt of several pesticide petitions filed under section 408 of the Federal Food, Drug, and Cosmetic Act (FFDCA), 21 U.S.C. 346a, requesting the establishment or modification of regulations in 40 CFR part 180 for residues of pesticide chemicals in or on various food commodities. The Agency is taking public comment on the requests before responding to the petitioners. EPA is not proposing any particular action at this time. EPA has determined that the pesticide petitions described in this document contain the data or information prescribed in FFDCA section 408(d)(2), 21 U.S.C. 346a(d)(2); however, EPA has not fully evaluated the sufficiency of the submitted data at this time or whether the data support granting of the pesticide petitions. After considering the public comments, EPA intends to evaluate whether and what action may be warranted. Additional data may be needed before EPA can make a final determination on these pesticide petitions.

Pursuant to 40 CFR 180.7(f), a summary of each of the petitions that are the subject of this document, prepared by the petitioner, is included in a docket EPA has created for each rulemaking. The docket for each of the petitions is available at <http://www.regulations.gov>.

As specified in FFDCA section 408(d)(3), 21 U.S.C. 346a(d)(3), EPA is publishing notice of the petition so that the public has an opportunity to comment on this request for the establishment or modification of regulations for residues of pesticides in or on food commodities. Further information on the petition may be obtained through the petition summary referenced in this unit.

1. *PP 6F8443.* (EPA-HQ-OPP-2015-0561). ISK Biosciences Corporation, 7470 Auburn Road, Suite A, Concord, Ohio, 44077, requests to establish a tolerance for residues of the combined residues of the insecticide flonicamid [N-(cyanomethyl)-4-trifluoromethyl]-3-pyridinecarboxamide (CA) or N-cyanomethyl-4-

trifluoromethylnicotinamide (IUPAC)] and its metabolites, TFNA [4-trifluoromethylnicotinic acid], TFNA-AM [4-trifluoromethylnicotinamide] and TFNG [N(4-trifluoromethylnicotinoyl)-glycine] in or on the raw agricultural commodity crop group 10–10, citrus at 1.5 parts per million (ppm). Adequate enforcement methodology is available to enforce the tolerance expression for flonicamid and its metabolites in/on appropriate raw agricultural commodities and processed commodities are available for the established and proposed tolerances. *Contact:* Carmen Rodia, (703) 306–0327, rodia.carmen@epa.gov.

2. *PP 6E8466.* (EPA–HQ–OPP–2016–0029). Gowan Company, P.O. Box 5569, Yuma, AZ 85366–5569, requests to establish an import tolerance for residues of fenazaquin, [3-[2-[4-(1,1-dimethylethyl) phenyl] ethoxy] quinazoline] in/on the raw agricultural commodity for tea at 9 ppm and pineapple at 0.2 ppm. The analytical method for the analysis of fenazaquin in/on tea was conducted by GC–MS in selected ion monitoring mode. The analytical method used for the determination of fenazaquin in or on pineapple was conducted by UPLC employing mass spectrometric detection (LC–MS/MS). *Contact:* Carmen Rodia, (703) 306–0327, rodia.carmen@epa.gov.

3. *PP 6F8468.* (EPA–HQ–OPP–2016–0416). BASF Corporation, 26 Davis Drive, P.O. Box 13528, Research Triangle Park, NC 27709–3528, requests to establish a tolerance for residues of the insecticide afidopyropen, [(3S,4R,4aR,6S, 6aS, 12R,12aS,12bS)-3-(cyclopropanecarbonyloxy)-6,12-dihydroxy-4,6a,12b-trimethyl-11-oxo-9-(pyridin-3-yl)-1,2,3,4,4a,5,6,6a,12a,12b-decahydro-11H,12H-benzo[f]pyrano[4,3-b]chromen-4-yl]methyl cyclopropanecarboxylate, its metabolites, and degradates, in or on the raw agricultural commodities almond hulls at 0.15 ppm; apple, wet pomace at 0.05 ppm; citrus oil at 0.3 ppm; cotton, gin byproducts at 2 ppm; cotton, undelinted seed at 0.1 ppm; fruit, citrus, group 10–10 at 0.15 ppm; fruit, pome, group 11–10 at 0.03 ppm; fruit, stone, group 12–12 at 0.03 ppm; nut, tree, group 14–12 at 0.01 ppm; plum, prune at 0.06 ppm; soybean, aspirated fractions at 0.4 ppm; soybean, forage at label restriction ppm; soybean, hay at label restriction ppm; soybean, seed at 0.01 ppm; vegetable, brassica, head and stem group 5–13 at 0.5 ppm; vegetable, cucurbit, group 9 at 0.7 ppm; vegetable, fruiting, group 8–10 at 0.15 ppm; vegetable, leaf petioles, subgroup 22B at 3 ppm; vegetable, leafy, subgroup 4–13A at 2 ppm; vegetable leafy, subgroup 4–

13B at 5 ppm; and vegetable tuberous and corm, subgroup 1C at 0.01 ppm.

An independently validated analytical method has been submitted for analyzing residues of parent afidopyropen (BAS 440 I) plus metabolite M440I007 with appropriate sensitivity in all crop and processed commodities. An independently validated analytical method has been submitted for analyzing residues of parent afidopyropen (BAS 440 I) plus metabolite M440I001, M440I003, and M440I060 in animal meat, fat and liver and egg and for BAS 440 I and metabolites M440I001, M440I005, and M440I060 in milk with appropriate sensitivity in the event tolerances are established. A multi-residue method using modified AOAC Official method 2007.01 for the determination of residues of afidopyropen (BAS 440 I) and metabolite M440I007 in plant matrices was successfully validated. *Contact:* Carmen Rodia, (703) 306–0327, rodia.carmen@epa.gov.

4. *PP 6E8463.* (EPA–HQ–OPP–2007–0099). Nichino America, Inc., 4550 New Linden Hill Road, Suite 501, Wilmington, DE 19808–2951, requests to establish an import tolerance for residues of flubendiamide, N²-[1,1-dimethyl-2-(methylsulfonyl)ethyl-3-iodo-N¹-[2-methyl-4-[1,2,2,2-tetrafluoro-1-(trifluoromethyl)ethyl]phenyl]-1,2-benzenedicarboxamide, in/on the processed commodity dried tea at 60 ppm. Independently validated, analytical methods for crop matrices have been submitted for measuring flubendiamide. Typically, plant matrices samples are extracted, concentrated, and quantified by LC/MS/MS using deuterated internal standards. *Contact:* Carmen Rodia, (703) 306–0327, rodia.carmen@epa.gov.

Authority: 21 U.S.C. 346a.

Dated: August 5, 2016.

National Oil and Hazardous Substances Pollution Contingency Plan; National Priorities List: Deletion of the Jackson Steel Superfund Site

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule; notice of intent for deletion.

SUMMARY: The Environmental Protection Agency (EPA), Region 2, is issuing this Notice of Intent to Delete (NOID) the Jackson Steel Site, located in the Village of Mineola, Nassau County, New York, from the National Priorities List (NPL) and requests public comments on this proposed action. The NPL, promulgated pursuant to Section 105 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) of 1980, as amended, is an appendix of the National Oil and Hazardous Substances Pollution Contingency Plan. EPA and the State of New York, through the New York State Department of Environmental Conservation (NYSDEC), have determined that other than the ongoing operation and maintenance of the vapor intrusion mitigation systems at the daycare center, periodic vapor intrusion monitoring, ensuring that the institutional controls are in place and effective, and five-year reviews, all appropriate response actions under CERCLA have been completed at the Site and that the soil on the Site and the groundwater beneath the Site no longer pose a threat to public health or the environment.

DATES: Comments must be received by *September 12, 2016*.

ADDRESSES: Submit your comments, identified by Docket ID no. EPA–HQ–SFUND–2000–0006, by mail to Joel Singerman, Chief, Central New York Remediation Section, Emergency and Remedial Response Division, U.S. Environmental Protection Agency, Region 2, 290 Broadway, 20th Floor, New York, NY, 10007–1866. Comments may also be submitted electronically or through hand delivery/courier by following the detailed instructions in the “Addresses” section of the direct final rule located in the rules section of this **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Joel Singerman at the address noted in the **ADDRESSES** section; by telephone at 212–

637-4258; or by email at singerman.joel@epa.gov.

SUPPLEMENTARY INFORMATION: In the “Rules and Regulations” Section of today’s **Federal Register**, EPA is publishing a direct final Notice of Deletion (NOD) of the Site without a prior NOID because EPA views this as a noncontroversial revision and anticipates no adverse comment. EPA has explained its reasons for this deletion in the preamble to the direct final NOD. If EPA receives no adverse comment(s) on this deletion action, EPA will proceed with the deletion without further action on this NOID. If EPA receives adverse comment(s), EPA will withdraw the direct final NOD, and it will not take effect. EPA will, as appropriate, address all public comments in a subsequent final NOD based on this NOID. EPA will not institute a second comment period on this NOID. Any parties interested in commenting must do so at this time.

For additional information, see the direct final NOD, which is located in the “Rules” section of this **Federal Register**.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

42 CFR Part 10

RIN 0906-AA90

340B Drug Pricing Program; Administrative Dispute Resolution

AGENCY: Health Resources and Services Administration, HHS.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Health Resources and Services Administration (HRSA) implements section 340B of the Public Health Service Act (PHSA), which is referred to as the “340B Drug Pricing Program” or the “340B Program.” This proposed rule will apply to all drug

manufacturers and covered entities that participate in the 340B Program. The proposed rule sets forth the requirements and procedures for the 340B Program’s administrative dispute resolution process.

DATES: Submit written comments on or before October 11, 2016.

ADDRESSES: You may submit comments, identified by the Regulatory Information Number (RIN) 0906-AA90, by any of the following methods. Please submit your comments in only one of these ways to minimize the receipt of duplicate submissions.

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow instructions for submitting comments. This is the preferred method for the submission of comments.

- *Email:* 340BNPRMADR@hrsa.gov. Include 0906-AA90 in the subject line of the message.

- *Regular, express, or overnight mail:* CAPT Krista Pedley, Director, Office of Pharmacy Affairs (OPA), Healthcare Systems Bureau (HSB), HRSA, 5600 Fishers Lane, Mail Stop 08W05A, Rockville, MD 20857. Please allow sufficient time for mailed comments to be received before the close of the comment period.

All submitted comments will be available to the public in their entirety. All comments received may be posted without change to <http://www.regulations.gov>, including any personally identifiable or confidential business information that is included in a comment.

FOR FURTHER INFORMATION CONTACT:

CAPT Krista Pedley, Director, OPA, HSB HRSA, 5600 Fishers Lane, Mail Stop 08W05A, Rockville, MD 20857, or by telephone at 301-594-4353.

SUPPLEMENTARY INFORMATION: The President encourages Federal agencies through Executive Order 13563 to develop balanced regulations by encouraging broad public participation in the regulatory process and an open exchange of ideas. Accordingly, the Department of Health and Human Services (HHS or the Department) urges all interested parties to examine this regulatory proposal carefully and to share your views with us, including any data to support your positions. If you have questions before submitting comments, please see the **FOR FURTHER INFORMATION CONTACT** field above for the name and contact information of the subject-matter expert involved in the development of this proposal. We will consider all written comments received during the comment period before issuing a final rule.

If you are a person with a disability and/or a user of assistive technology who has difficulty accessing this document, please contact HRSA’s Regulations Officer at: Room 13N82, 5600 Fishers Lane, Rockville, MD 20857; or by telephone at 301-443-1785, to obtain this information in an accessible format. This is not a toll free telephone number.

Please visit <http://www.HHS.gov/regulations> for more information on HHS rulemaking and opportunities to comment on proposed and existing rules.

I. Background

Section 602 of Public Law 102-585, the “Veterans Health Care Act of 1992,” enacted section 340B of the PHSA entitled “Limitation on Prices of Drugs Purchased by Covered Entities,” which was codified at 42 U.S.C. 256b. The 340B Program permits covered entities “to stretch scarce Federal resources as far as possible, reaching more eligible patients and providing more comprehensive services.” H.R. REP. No. 102-384(II), at 12 (1992). The Secretary of the HHS delegated the authority to operate section 340B of the PHSA to the Administrator of HRSA. Pursuant to this delegation of authority, HRSA established and administers the 340B Program. Operationally, the 340B Program is housed within HRSA’s Healthcare Systems Bureau (HSB), Office of Pharmacy Affairs (OPA). Eligible covered entity types are defined in section 340B(a)(4) of the PHSA, as amended. Section 340B of the PHSA instructs HHS to enter into pharmaceutical pricing agreements (PPA) with manufacturers of covered outpatient drugs. Manufacturers are required by section 1927(a)(5)(A) of the Social Security Act to enter into agreements with the Secretary of HHS that comply with section 340B of the PHSA if they participate in the Medicaid Drug Rebate Program. When a drug manufacturer signs a PPA, it agrees that the prices charged for covered outpatient drugs to covered entities will not exceed defined 340B ceiling prices, which are based on quarterly pricing data reported by manufacturers to the Centers for Medicare & Medicaid Services (CMS).

Section 7102 of the Patient Protection and Affordable Care Act (Pub. L. 111-148), as amended by section 2302 of the Health Care and Education Reconciliation Act (Pub. L. 111-152), hereinafter referred to as the “Affordable Care Act,” added section 340B(d)(3) of the PHSA, which requires the Secretary of HHS (or the Secretary) to promulgate a regulation establishing

and implementing a binding administrative dispute resolution (ADR) process for certain disputes arising under the 340B Program. The purpose of the ADR process is to resolve (1) claims by covered entities that they have been overcharged for covered outpatient drugs by manufacturers; and (2) claims by manufacturers, after a manufacturer has conducted an audit as authorized by section 340B(a)(5)(C) of the PHSA, that a covered entity has violated the prohibition on diversion to ineligible patients or duplicate discounts. The 340B ADR process is not intended to be a trial-like proceeding governed by formal review of evidence and procedure. Rather, it is an administrative process that is designed to assist covered entities and manufacturers in resolving disputes regarding overcharging, duplicate discounts, or diversion. Historically, HHS has encouraged manufacturers and covered entities to work with each other to attempt to resolve disputes in good faith. The ADR process as proposed in this rule is not intended to replace these good faith efforts, but should be considered as a last resort in the event good faith efforts to resolve disputes have not been successful. In addition, covered entities and manufacturers should carefully evaluate whether the ADR process is appropriate for de minimis claims given the investment of the time and resources required of the parties involved.

In 2010, HHS issued an advanced notice of proposed rulemaking (ANPRM) that requested comments on the development of an ADR process (75 FR 57233, September 20, 2010). The ANPRM specifically requested comments on: (1) Administrative procedures, (2) existing models, (3) threshold requirements, (4) hearings, (5) decision-making officials or bodies, (6) appropriate appeals procedures, (7) deadlines, (8) discovery procedures, (9) manufacturer audits, (10) consolidation of manufacturer claims, (11) covered entity consolidation of claims; (12) claims by organizations representing covered entities, and (13) integration of dispute resolution with other 340B requirements added by the Affordable Care Act. HHS received 14 comments on the ANPRM. The comments received were considered in the development of this proposed rule.

HHS encourages all stakeholders to provide written comments on this NPRM. This proposed regulation, when finalized, will replace the 340B Program's guidelines on the informal dispute resolution process developed to resolve disputes between covered entities and manufacturers, which was

published on December 12, 1996 (61 FR 65406).

II. Summary of the Proposed Regulations

The proposed revisions to 42 CFR part 10 are described according to the applicable section of the regulations. The United States District Court for the District of Columbia vacated the 340B Program Regulations at 42 CFR part 10 relating to Orphan Drugs (subpart C). (*PhRMA v. HHS*, No. 13–01501 (D.D.C. May 23, 2014)). This NPRM proposes to add new definitions to § 10.3 and retitle and replace the language in subpart C as set forth below.

§ 10.3 Definitions.

HHS is proposing to add the following definitions: “Administrative Dispute Resolution Process,” “Administrative Dispute Resolution Panel (340B ADR Panel),” “claim,” and “consolidated claim.”

Subpart C—Administrative Dispute Resolution

§ 10.20 340B Administrative Dispute Resolution Panel

(a) Members of the 340B ADR Panel. As required by section 340B(d)(3)(B)(i), regulations promulgated by the Secretary shall designate or establish a decision-making official or body within HHS to review and make a binding decision for claims filed by covered entities and manufacturers. HHS proposes to establish a decision-making body (referred to as the “340B ADR Panel” or “Panel”) to review and resolve such claims.

The proposed 340B ADR Panel will ensure an unbiased and fair review of the claims, and reduce the individual burden associated with having a single decision-making official who is solely responsible for reviewing and resolving claims. The proposed 340B ADR Panel will include three members, chosen from a roster of eligible individuals alternating from claim to claim, and one ex-officio, non-voting member chosen from the staff of OPA to facilitate the review and resolution of claims within a reasonable time frame. The proposed roster of eligible individuals will be comprised of Federal employees (e.g., employees of CMS or the U.S. Department of Veterans Affairs) with demonstrated expertise or familiarity with the 340B Program. The ADR panel will not be compensated.

HHS proposes that for each filed claim that is reviewed, HSB will review the qualifications of individuals on the 340B ADR Panel roster and select those with expertise or familiarity with the

appropriate aspects of the 340B Program. HHS also proposes that individuals serving on a 340B ADR Panel may be removed for cause. For example, if it is determined prior to or during the course of a Panel member's review of a claim that there is a conflict of interest, as described in subsection (b), with respect to that claim, the Panel member will be removed from the Panel and replaced by another individual from the 340B ADR Panel roster.

HHS is soliciting specific comments on the proposed size and composition of the 340B ADR Panel, in particular whether the 340B ADR Panel should be comprised of a set number of voting members to maintain consistency and transparency across each claim that is reviewed, whether HHS should retain the flexibility to appoint a requisite number of voting members based on the complexity of the claim and other factors, and whether the 340B ADR Panel should include at least one OPA staff member as a voting member or whether the inclusion of an OPA staff member as an ex-officio, non-voting member is sufficient to ensure adherence to 340B policies and procedures.

(b) Conflicts of interest.

To ensure fairness and objectiveness, HHS proposes that each 340B ADR Panel member be screened prior to reviewing a claim and not allowed to conduct a review if any conflicts of interest exist. For example, the individual would not review a claim if he or she has a conflict of interest with respect to the parties involved in the claim or the subject matter of the claim. HHS proposes that individuals be screened for conflicts of interest in accordance with U.S. Office of Government Ethics policies and procedures applicable to Federal employees. Conflicts of interest may include the following: (1) Financial interest; (2) family or close relation to a party involved; and (3) current or former business or employment relation to a party. The specific procedures for screening members of the panel prior to their service on the 340B ADR Panel will be detailed in future guidance.

(c) Duties of the 340B ADR Panel.

In subsection (c), HHS proposes that once the 340B ADR Panel receives the claim, the 340B ADR Panel will consider all documentation provided by the parties and may request additional information or clarification from any party involved with the claim. HHS also proposes that the 340B ADR Panel review claims in a session closed to the parties involved, including any associations or organizations, or legal counsel representing the parties.

In this subsection, HHS also proposes that the 340B ADR Panel may consult with subject matter experts within OPA regarding 340B program requirements while reviewing a claim. The 340B ADR Panel will provide a final decision only with respect to the claim. HHS proposes that the 340B ADR Panel's final decision must represent the decision of a majority of the Panel members but need not be unanimous.

§ 10.21 Claims

(a) Claims permitted.

Section 7102 of the Affordable Care Act added section 340B(d)(3) of the PHSA, which instructs the Secretary to establish and implement a binding ADR process to resolve certain 340B Program statutory violations. Section 340B(d)(3)(A) of the PHSA specifies that the ADR process is to be used to resolve: (1) Claims by covered entities that they have been overcharged by manufacturers for drugs purchased under this section and (2) claims by manufacturers, after a manufacturer has conducted an audit of a covered entity, as authorized by section 340B(a)(5)(C) of the PHSA, that a covered entity has violated the prohibitions against duplicate discounts and diversion (sections 340B(a)(5)(A) and (B) of the PHSA).

(b) Requirements for filing a claim.

In subsection (b), HHS proposes that the covered entity and the manufacturer meet certain requirements for filing a claim. These proposed requirements will ensure that a claim of the type specified in section 340B(d)(3)(A) of the PHSA is the subject of the dispute.

The Department is proposing that covered entities and manufacturers file a written claim, based on the facts available, to HSB within 3 years of the date of the sale (or payment) at issue in the alleged violation and that any claim not filed within 3 years shall be time barred. The proposed requirement that a claim be filed within 3 years is consistent with the record retention expectations for the 340B Program and will ensure that covered entities and manufacturers have access to relevant records needed to review and respond to claims. This proposal ensures documents must be submitted with each claim to verify that the alleged violation is not time barred. This proposed requirement will prevent a party from asserting a claim that is stale. HHS requests public comment concerning the 3 year limitation on claims submission.

HHS is also proposing that once a claim is submitted and the opposing party has been notified of the claim, any file, document, or record associated with a claim be maintained by the

covered entity and/or manufacturer until the 340B ADR Panel's final agency decision is issued.

Covered Entity Claims

In section 10.21(b)(2), HHS proposes that to be eligible for the ADR process, each claim filed by a covered entity must include documents sufficient to demonstrate a covered entity's claim that it has been overcharged by a manufacturer, along with any such documentation as may be requested by HSB to evaluate the veracity of the claim. Such documentation may include: (1) A 340B purchasing account invoice which shows the purchase price by national drug code (NDC), less any taxes and fees; (2) the 340B ceiling price for the drug during the quarter(s) corresponding to the time period(s) of the claim; and (3) documentation of the attempts made to purchase the drug via a 340B account at the ceiling price, which resulted in the instance of overcharging. HHS believes that these documents are readily available to a covered entity through the usual course of business and should not be overly burdensome to produce, however HHS requests public comment on the feasibility of producing the documentation as proposed. HHS may also request that the covered entity provide it with a written summary of attempts to work in good faith to resolve the instance of overcharging with the manufacturer at issue.

Pursuant to section 340B(d)(1)(B) of the PHSA, HHS is developing a system to verify the ceiling price of a 340B drug and allow covered entities to access and verify the ceiling price. Until such system is developed, HHS has access to ceiling price data and will ensure that the 340B ADR panel will also have access as they evaluate any particular claim. Covered entities will be able to access ceiling price information through this system, which may lessen the burden in submitting the information accompanying a claim.

Manufacturer Claims

In section 10.21(b)(3), HHS proposes that to be eligible for the 340B ADR process, each claim filed by a manufacturer must include documents sufficient to demonstrate a manufacturer's claim that a covered entity has violated the prohibition on diversion and/or duplicate discount, along with any such documentation as may be requested by HSB to evaluate the veracity of the claim. Such documentation may include: (1) A final audit report which indicates that the manufacturer audited the covered entity for compliance with the prohibition on

diversion (section 340B(a)(5)(B) of the PHSA) and/or duplicate discounts (section 340B(a)(5)(A) of the PHSA) and (2) the covered entity's written response to the manufacturer's audit finding(s). HHS may also request that the manufacturer submit a written summary of attempts to work in good faith to resolve the claim with the covered entity.

(c) Consolidation of claims.

In subsection (c), HHS proposes that, if requested, covered entities or manufacturers may be permitted to consolidate their individual claims. Section 340B(d)(3)(B)(vi) of the PHSA permits "multiple covered entities to jointly assert claims of overcharges by the same manufacturer for the same drug or drugs in one administrative proceeding. . . ." HHS proposes that for consolidated claims, the claim must list each covered entity and include documentation and/or information from each covered entity demonstrating that the covered entity meets all of the requirements for filing a claim with HHS and that a letter requesting consolidation of claims must also accompany the claim and must document that each covered entity consents to the consolidation of the claim.

Pursuant to section 340B(d)(3)(B)(vi) of the PHSA, consolidated claims are also permitted on behalf of covered entities by associations or organizations representing their interests. Therefore, HHS proposes that the covered entities must be members of the association or the organization representing them and that each covered entity must meet the requirements listed in subsection (b) for filing a claim with HSB. The proposed consolidated claim must assert overcharging by the same manufacturer for the same drug(s), and the organization or association will be responsible for filing the claim. HHS also proposes requiring that a letter requesting consolidation of claims must accompany the claim and must document that each covered entity consents to the organization or association asserting a claim on its behalf.

Similarly, at the request of two or more manufacturers, section 340B(d)(3)(B)(v) of the PHSA permits the consolidation of claims brought by more than one manufacturer against the same covered entity if consolidation is consistent with the statutory goals of fairness and economy of resources. This NPRM proposes that the claim must list each manufacturer and include documentation and/or information from each manufacturer demonstrating that the manufacturer meets the

requirements listed in subsection (b) for filing a claim with HSB. HHS also proposes that a letter requesting consolidation of claims must be submitted with the claim and must document that each manufacturer consents to the consolidation of the claims. The statutory authority for implementing the 340B ADR process does not permit consolidated claims on behalf of manufacturers by associations or organizations representing their interests. Therefore, HHS is not proposing this option in this NPRM.

With regard to the consolidation of claims by manufacturers against a covered entity, HHS is seeking specific comment on the grounds under which consolidation would be consistent with the statutory goals of fairness and economy of resources, as required by section 340B(d)(3)(B)(v) of the PHSA. In addition, while HHS is proposing, as required by the 340B statute, an ADR process that allows manufacturers to consolidate claims against a covered entity, we recognize the operational challenges presented by the statutory requirement for a manufacturer to first audit the covered entity. HHS is, therefore, seeking comment on how manufacturers requesting a consolidated claim against a covered entity can satisfy the audit requirement.

(d) Deadlines and procedures for filing a claim.

In subsection (d), HHS proposes that covered entities and manufacturers file a claim with HSB demonstrating that they satisfy the requirements described in subsection (b) and that the party filing a claim must send written notice to the opposing party regarding the claim within 3 business days of submitting the claim and the party must submit confirmation of the opposing party's receipt or acknowledgement of receipt within 3 business days. HHS also proposes that the written notice to the opposing party must include a summary of the documents submitted as part of the claim.

HHS proposes that HSB will review the information submitted as part of the claim to verify that the requirements for filing a claim have been met. HSB would contact the initiating party once the claim has been received and may request additional information before accepting a claim for review by the 340B ADR Panel. If additional information is requested, the party filing the claim will have 20 business days of receipt of the request to respond. Claims will not move forward for review by the 340B ADR Panel if the initiating party does not respond to the request for additional information or if a party files a claim for any purpose other than those specified

in the statute (*i.e.*, overcharging, duplicate discount, or diversion), or if the alleged violation occurred more than 3 years before the date of filing the claim.

HHS proposes that HSB will make a determination as to whether all requirements are met and provide written notice to all parties within 20 business days after receiving the claim and any subsequently requested information, which will be transmitted via both hard copy and email. If HSB determines the claim includes all necessary documentation and meets the requirements for filing a claim, the claim will be forwarded to the 340B ADR Panel for review. HSB would provide additional information on the 340B ADR process to all parties at that time, including contact information for requested follow-up communications and an approximate timeframe for the 340B ADR Panel's review.

HHS proposes that if the claim does not move forward for review by the ADR Panel, written notice will be sent by HSB to the parties involved that includes the basis for the decision and will advise the party that they may revise and refile the claim if the party has new information to support the alleged statutory violation.

(e) Responding to a submitted claim.

In subsection (e), HHS proposes that once the parties have been notified by HSB that the claim has met the requirements in subsection (b) and will move forward for review by the 340B ADR Panel, the opposing party will have 20 business days to submit a written response to the allegation to the 340B ADR Panel and the party who filed the claim. Subsequent requests for information regarding the claim would be made by the 340B ADR Panel as needed, and the 340B ADR Panel will consider any additional information that was provided by the parties involved. However, if an opposing party does not respond to a request for information from HSB or the 340B ADR Panel or otherwise elects not to participate in the 340B ADR process, the 340B ADR Panel will make a decision on the claim based on the information submitted in the claim.

§ 10.22 Covered entity information requests.

Pursuant to section 340B(d)(3)(B)(iii) of the PHSA, regulations promulgated by the Secretary for the 340B ADR process will establish procedures by which a covered entity may discover or obtain information and documents from manufacturers and third parties relevant to a claim that the covered entity has been overcharged by the manufacturer.

This NPRM proposes that such covered entity information requests be facilitated by the 340B ADR Panel. HHS proposes that a covered entity must submit a written request for information to the 340B ADR Panel no later than 20 business days after the entity was notified by HSB that the claim would move forward for the ADR Panel's review. The 340B ADR Panel will review the information/document request to ensure that it is reasonable and within the scope of the asserted claim. The 340B ADR Panel will notify the covered entity in writing if any request is deemed reasonable and within the scope of the asserted claim and permit the covered entity to submit a revised information/document request, if it is not.

In this section, HHS proposes that the 340B ADR Panel will consider relevant factors, such as the scope of the information/document request, whether there are consolidated claims, or the involvement of one or more third parties in distributing drugs on behalf of the manufacturer and that once reviewed, the 340B ADR Panel will submit the information/document request to the manufacturer, which must respond within 20 business days.

HHS also proposes that the manufacturer must fully respond in writing to the information request and submit its response to the 340B ADR Panel by the stated deadline and that the manufacturer is responsible for obtaining relevant information/documents from wholesalers or other third parties that may facilitate sales or distribution of its drugs to covered entities. HHS proposes that if a manufacturer anticipates it will not be able to fully respond by the deadline, the manufacturer may request one extension in writing within 15 business days. The extension request that is submitted to the 340B ADR Panel must include any available information, the reason why the deadline is not feasible, and outline a proposed timeline for fully responding to the information request. The 340B ADR Panel will review the extension request and notify both the manufacturer and the covered entity in writing as to whether the request for an extension is granted and the date of the new deadline. If a manufacturer does not respond to a request for information from HSB or the 340B ADR Panel, HHS proposes that the 340B ADR Panel will make a decision on the claim based on the information submitted in the claim package that moved forward for review.

§ 10.23 Final agency decision

In § 10.23, HHS proposes that the 340B ADR Panel review the documents submitted by the parties and determine if there is adequate support to conclude that a violation as described in subsection (a)(1) or (2) of § 10.21 has occurred. The 340B ADR Panel will prepare a draft agency decision letter, which includes the 340B ADR Panel's findings and conclusions regarding the alleged violation. HHS is proposing a process whereby the 340B ADR Panel's draft agency decision letter will be sent to all parties, and the parties involved will have 20 business days to respond to the 340 ADR Panel. HHS is seeking specific comments on this process and whether this proposed process will facilitate or hinder the fair, efficient, and timely resolution of claims.

HHS also proposes that once the parties have reviewed and submitted comments to the draft agency decision letter, the 340B ADR Panel will prepare and submit its final agency decision letter to all parties in the dispute, which may incorporate rebuttals from the parties that were considered by the 340B ADR Panel to help inform the final agency decision. The final agency decision made by 340B ADR Panel will conclude the administrative resolution process; however, HHS proposes that the final agency decision letter also be submitted to HSB to take enforcement action or apply sanctions, as appropriate. For example, if the 340B ADR Panel makes a decision that a covered entity has violated the prohibition against diversion, HSB may require, as a sanction, that the covered entity repay the affected manufacturer. If the 340B ADR Panel makes a decision that a manufacturer overcharged a covered entity, HSB may require, as a sanction, that the manufacturer refund or issue a credit to the affected covered entity. In both cases, HSB will work with the party in violation on any remedy and corrective action.

HHS proposes that the 340B ADR Panel's final agency decision letter will be binding upon the parties involved, unless invalidated by an order of a court of competent jurisdiction in accordance with section 340B(d)(3)(C) of the PHSA. HHS may, at its sole discretion, publish a summary of the claims that have gone through the 340B ADR process on the HRSA Web site, including the names of the parties and the nature of the 340B ADR Panel's findings (*e.g.*, overcharging, duplicate discount, or diversion). HHS will consider issuing future subregulatory guidance on this topic as necessary.

III. Regulatory Impact Analysis

HHS has examined the effects of this proposed rule as required by Executive Order 12866 on Regulatory Planning and Review (September 30, 1993), Executive Order 13563 on Improving Regulation and Regulatory Review (January 8, 2011), the Regulatory Flexibility Act (September 19, 1980, Pub. L. 96–354), the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4), and Executive Order 13132 on Federalism (August 4, 1999).

Executive Orders 12866 and 13563

Executive Orders 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 is supplemental to and reaffirms the principles, structures, and definitions governing regulatory review as established in Executive Order 12866, emphasizing the importance of quantifying both costs and benefits, of reducing costs, harmonizing rules, and promoting flexibility. Section 3(f) of Executive Order 12866 defines a “significant regulatory action” as an action that is likely to result in a rule: (1) Having an annual effect on the economy of \$100 million or more in any one year, or adversely and materially affecting a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities (also referred to as “economically significant”); (2) creating a serious inconsistency or otherwise interfering with an action taken or planned by another agency; (3) materially altering the budgetary impacts of entitlement grants, user fees, or loan programs or the rights and obligations of recipients thereof; or (4) raising novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in the Executive Order. A regulatory impact analysis must be prepared for major rules with economically significant effects (\$100 million or more in any one year), and a “significant” regulatory action is subject to review by the Office of Management and Budget (OMB).

This proposed rule is not likely to have economic impacts of \$100 million or more in any one year; therefore, it has not been designated an “economically significant” rule under section 3(f)(1) of

Executive Order 12866. This proposed rule creates a framework for the Department to resolve certain disputed claims regarding manufacturers overcharging covered entities and disputed claims of diversion and duplicate discounts by covered entities audited by manufacturers under the 340B Program. HHS does not anticipate the introduction of an administrative dispute resolution process to result in significant economic impacts.

The Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) (RFA) and the Small Business Regulatory Enforcement and Fairness Act of 1996, which amended the RFA, require HHS to analyze options for regulatory relief of small businesses. If a rule has a significant economic effect on a substantial number of small entities, HHS must specifically consider the economic effect of the rule on small entities and analyze regulatory options that could lessen the impact of the rule. HHS will use an RFA threshold of at least a 3 percent impact on at least 5 percent of small entities.

The proposed rule would affect drug manufacturers (North American Industry Classification System code 325412: Pharmaceutical Preparation Manufacturing). The small business size standard for drug manufacturers is 750 employees. Approximately 600 drug manufacturers participate in the 340B Program. While it is possible to estimate the impact of the proposed rule on the industry as a whole, the data necessary to project changes for specific manufacturers or groups of manufacturers is not available, as HRSA does not collect the information necessary to assess the size of an individual manufacturer that participates in the 340B Program. The proposed rule would also affect health care providers. For purposes of the RFA, HHS considers all health care providers to be small entities either by virtue of meeting the Small Business Administration (SBA) size standard for a small business, or for being a nonprofit organization that is not dominant in its market. The current SBA size standard for health care providers ranges from annual receipts of \$7 million to \$35.5 million. As of July 1, 2016, over 12,000 covered entities participate in the 340B Program, which represent safety-net healthcare providers across the country.

The proposed rule introduces an administrative mechanism to review claims by manufacturers that covered entities have violated certain statutory obligations and claims by covered entities that have been overcharged for

covered outpatient drugs by manufacturers. The documentation required as part of this administrative process are documents that manufacturers and covered entities are already required to maintain as part of their participation in the 340B Program. HHS expects that this documentation would be sufficiently available prior to submitting a claim. Therefore, the collection of this information would not result in an economic impact or create additional administrative burden on these businesses.

HHS believes the proposed administrative dispute resolution process will provide a cost-efficient option for resolving claims that would otherwise remain unresolved or require litigation. The proposed rule provides an option to consolidate claims by similar situated entities, and covered entities may have claims asserted on their behalf by associations or organizations which could reduce costs. HHS has determined, and the Secretary certifies that this final rule will not have a significant economic impact on a substantial number of small health care providers or a significant impact on the operations of a substantial number of small manufacturers; therefore we are not preparing an analysis of impact for the purposes of the RFA. HHS estimates that the economic impact on small entities and small manufacturers will be minimal and less than 3 percent. HHS welcomes comments concerning the impact of this proposed rule on small manufacturers and small health care providers.

Unfunded Mandates Reform Act

Section 202(a) of the Unfunded Mandates Reform Act of 1995 requires that agencies prepare a written statement, which includes an assessment of anticipated costs and benefits, before proposing “any rule that includes any Federal mandate that may result in the expenditure by State, local, and Tribal governments, in the aggregate, or by the private sector, of \$100 million or more (adjusted annually for inflation) in any one year.” In 2014, that threshold level was approximately \$155 million. HHS does not expect this proposed rule to exceed the threshold.

Executive Order 13132—Federalism

HHS has reviewed this proposed rule in accordance with Executive Order 13132 regarding federalism, and has determined that it does not have “federalism implications.” This proposed rule would not “have substantial direct effects on the States, or on the relationship between the national government and the States, or

on the distribution of power and responsibilities among the various levels of government.” The proposals in this notice of proposed rulemaking, if implemented, would not adversely affect the following family elements: family safety, family stability, marital commitment; parental rights in the education, nurture, and supervision of their children; family functioning, disposable income, or poverty; or the behavior and personal responsibility of youth, as determined under section 654(c) of the Treasury and General Government Appropriations Act of 1999. HHS invites additional comments on the impact of this proposed rule from affected stakeholders.

Paperwork Reduction Act

The Paperwork Reduction Act of 1995 (44 U.S.C. 3507(d)) requires that OMB approve all collections of information by a Federal agency from the public before they can be implemented. This proposed rule will not have a significant impact on the current reporting and recordkeeping burden for manufacturers or covered entities under the 340B Program. Based on current experience with the informal ADR process offered by the 340B Program, there have only been four requests for informal dispute resolution since the inception of the Program. Of the four dispute resolution requests, two were terminated by HRSA due to non-participation by one of the parties, another was dismissed due to lack of sufficient evidence, and the last was terminated because the parties disputed the existence of any attempt of good faith resolution. The relatively small number is attributed to the success of parties’ attempts to resolve issues in good faith. Due to this very small number of informal dispute resolution requests, there has been very limited experience to date with dispute resolution record keeping. Changes proposed in this rulemaking would not result in significant reporting or recordkeeping burden. Comments are welcome on the accuracy of this statement.

Dated: May 24, 2016.

James Macrae,

Acting Administrator, Health Resources and Services Administration.

Approved: June 7, 2016.

Sylvia M. Burwell,

Secretary, Department of Health and Human Services.

List of Subjects in 42 CFR Part 10

Biologics, Business and industry, Diseases, Drugs, Health, Health care, Health facilities, Hospitals, 340B drug pricing program.

For the reasons set forth in the preamble, the Department of Health and Human Services proposes to amend 42 CFR part 10 as follows:

PART 10—340B DRUG PRICING PROGRAM

- 1. The authority citation for part 10 is revised to read as follows:

Authority: Sec. 340B of the Public Health Service Act (42 U.S.C. 256b), as amended.

- 2. Amend § 10.3 by adding definitions for “Administrative Dispute Resolution (ADR) process,” “Administrative Dispute Resolution Panel (340B ADR Panel),” “Claim”, and “Consolidated claim” to read as follows:

§ 10.3 Definitions.

* * * * *

Administrative Dispute Resolution (ADR) process means a process used to resolve claims by covered entities that may have been overcharged for 340B drugs purchased by manufacturers, and claims by manufacturers of 340B drugs, after a manufacturer has conducted an audit of a covered entity, that a covered entity may have violated the prohibitions against duplicate discounts or diversion.

Administrative Dispute Resolution Panel (340B ADR Panel) means a decision-making body within the Department that reviews and makes a binding decision for claims brought under the ADR Process.

* * * * *

Claim means an allegation made by or on behalf of a covered entity or by a manufacturer for purposes of the ADR Process.

Consolidated claim means the submittal of joint claims by covered entities (or their membership organization or association) or manufacturers to the 340B ADR Panel asserting the same allegation against the same party.

* * * * *

- 3. Revise subpart C to read as follows:

Subpart C—Administrative Dispute Resolution

Sec.

10.20 Administrative Dispute Resolution Panel.

10.21 Claims.

10.22 Covered entity information requests.

10.23 Final agency decision.

§ 10.20 Administrative Dispute Resolution Panel.

The Secretary shall establish a decision-making body known as the Administrative Dispute Resolution Panel (340B ADR Panel) to review and make a binding final agency decision

regarding claims filed by covered entities and manufacturers.

(a) *Members of the 340B ADR Panel.*

(1) The Health Resources and Services Administration (HRSA) shall:

(A) Select three voting members of the 340B ADR Panel from a roster of eligible individuals and one ex-officio, non-voting member from the staff of HRSA's Office of Pharmacy Affairs (OPA);

(B) Alternate the individuals on the 340B ADR Panel for each claim;

(C) Remove an individual from the 340B ADR Panel for cause; and

(D) Appoint replacement members should an individual be unable to complete his or her duties.

(2) No member of the 340B ADR Panel may have a conflict of interest, as defined in subsection (b) of this section.

(b) *Conflicts of interest.* All members of the 340B ADR Panel will be screened for conflicts of interest prior to reviewing a claim. Conflicts of interest may include:

(1) Financial interest in a party involved, a subsidiary of a party involved, or in the claim before the 340B ADR Panel;

(2) Family or close relation to a party involved; and

(3) Current or former business or employment relation to a party.

(c) *Duties of the 340B ADR Panel.* The 340B ADR Panel will:

(1) Review and evaluate documents or information submitted by covered entities and manufacturers;

(2) Request additional information or clarification of an issue from any or all parties to make a final decision;

(3) Evaluate a claim in a separate session from the parties involved;

(4) Consult with OPA regarding any inquiries or concerns while reviewing a claim; and

(5) Make a final agency decision on each claim that will be communicated to HRSA for appropriate enforcement.

§ 10.21 Claims.

(a) *Claims permitted.* The ADR process is limited to the following:

(1) Claims by a covered entity that it has been overcharged, as defined in § 10.11(b), by a manufacturer for a covered outpatient drug; and

(2) Claims by a manufacturer, after it has conducted an audit of a covered entity pursuant to section 340B(a)(5)(C) of the PHSA, that the covered entity has violated section 340B(a)(5)(A) of the PHSA, regarding the prohibition of duplicate discounts, or section 340B(a)(5)(B) of the PHSA, regarding the prohibition of the resale or transfer of covered outpatient drugs to a person who is not a patient of the covered entity.

(b) *Requirements for filing a claim.* (1) A covered entity or manufacturer must file a claim for administrative dispute resolution in writing to HRSA within 3 years of the date of the alleged violation. Any file, document, or record associated with the claim that is the subject of a dispute must be maintained by the covered entity and manufacturer until the final agency decision letter is issued by the 340B ADR Panel.

(2) A covered entity filing a claim described in paragraph (a)(1) of this section must provide documents sufficient to demonstrate its claim that it has been overcharged by a manufacturer, along with any such other documentation as may be requested by HRSA.

(3) A manufacturer filing a claim under paragraph (a)(2) of this section must provide documents sufficient to demonstrate its claim that a covered entity has violated the prohibition on diversion and/or duplicate discount, along with any such documentation as may be requested by HRSA.

(c) *Consolidation of claims.* (1) Two or more covered entities may jointly file claims of overcharges by the same manufacturer for the same drug or drugs if each covered entity that could file a claim against the manufacturer consents to the jointly filed claim, and meets the minimum requirements, including submission of the required documentation, described in paragraph (b) of this section.

(2) An association or organization may file claims of overcharges by the same manufacturer for the same drug or drugs on behalf of multiple covered entities if each covered entity represented could file a claim against the manufacturer, is a member of the association or organization, meets the requirements described in paragraph (b) of this section, including submission of the required documentation, and each covered entity has agreed to representation by the association or organization on its behalf.

(3) A manufacturer or manufacturers may request to consolidate claims brought by more than one manufacturer against the same covered entity if each manufacturer could individually file a claim against the covered entity, consents to the jointly filed claim, meets the requirements described in paragraph (b) of this section for that claim, and the 340B ADR Panel determines that such consolidation is appropriate and consistent with the goals of fairness and economy of resources. The 340B ADR Panel will not permit joint claims filed on behalf of manufacturers by associations or organizations representing their interests.

(d) *Deadlines and procedures for filing a claim.* (1) Covered entities and manufacturers must file claims in writing to HRSA. A claim must include all of the requirements in paragraph (b) of this section. Additional information to substantiate a claim may be submitted.

(2) The party filing the claim must notify the opposing party in writing within 3 business days of the date the claim was filed and must provide documentation of such notification to HRSA. The written notice to the opposing party must include a summary of the documents submitted as part of the claim.

(3) HRSA will review all information submitted by the party filing the claim and will make a determination as to whether all requirements are met and provide written notice to all parties within 20 business days after receiving the claim and any subsequently requested information.

(A) *Claims that move forward for review.* If HRSA finds that the party filing the claim submitted all required documentation and thereby meets the requirements described in paragraph (b) of this section, written notification will be sent to both the manufacturer and covered entity advising that the claim will be forwarded to the 340B ADR Panel for review.

(B) *Claims that do not move forward for review.* If HRSA finds that the claim does not meet the requirements described in paragraph (b) of this section, written notification will be sent to both the manufacturer and covered entity detailing the reasons that the claim did not move forward. A claim will not move forward for review by the 340B ADR Panel if the claim does not meet the requirements in paragraph (b) of this section. That same claim may only be resubmitted if new information is presented to support the alleged statutory violation.

(e) *Responding to a submitted claim.* Upon receipt of notification that a claim will move forward to the 340B ADR Panel for review, the party in alleged violation will have 20 business days to submit a written response to the 340B ADR Panel. If an opposing party does not respond to a request for information from HRSA or the 340B ADR Panel, or elects not to participate in the 340B ADR process, the 340B ADR Panel will make a decision on the claim based on the information submitted in the claim. The 340B ADR Panel will consider any additional information that was provided by the parties involved.

§ 10.22 Covered entity information requests.

(a) A covered entity must submit a written request for additional information necessary to support its claim to the 340B ADR Panel within 20 business days of the claim acceptance date. The 340B ADR Panel will review the information request and notify the covered entity if the information request is beyond the scope of the claim and will permit the covered entity to resubmit a revised information request if necessary.

(b) The 340B ADR Panel will submit the covered entity's information request to the manufacturer who must respond to the request within 20 business days.

(c) The manufacturer must fully respond, in writing, to an information request from the 340B ADR Panel by the response deadline.

(1) A manufacturer is responsible for obtaining relevant information from any wholesaler or other third party that may facilitate the sale or distribution of its drugs to covered entities.

(2) If a manufacturer anticipates that it will not be able to respond to the information request by the deadline, it can request one extension by notifying the 340B ADR Panel in writing within 15 business days of receipt of the request.

(3) A request to extend the deadline must include the reason why the current deadline is not feasible and must outline the proposed timeline for fully responding to the information request.

(4) The 340B ADR Panel may approve or disapprove the request for an extension of time and will notify all parties in writing of its decision.

§ 10.23 Final agency decision.

(a) The 340B ADR Panel will review documents submitted by the parties and determine if there is adequate support to conclude that a violation as described in paragraph (a)(1) or (2) of § 10.21 has occurred.

(1) The 340B ADR Panel will prepare a draft agency decision letter based on its review and evaluation of all documents submitted by the parties, including documents provided as required in paragraph (b) of § 10.21, information requests in support of a claim, and responses to a claim.

(2) The draft agency decision letter will be sent to all parties and will include the 340B ADR Panel's preliminary findings regarding the alleged violation.

(3) All parties will have 20 business days to respond to the 340B ADR Panel's draft agency decision letter.

(b) The 340B ADR Panel will review the responses of all parties in producing the final agency decision letter.

(1) The final agency decision letter will represent the decision of a majority of the 340B ADR Panel's findings regarding the claim and discuss the findings supporting the decision.

(2) The 340B ADR Panel will submit the binding final agency decision letter to all parties, and to HRSA, as necessary, for appropriate enforcement action.

BILLING CODE 4165-15-P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 97

[WT Docket No. 16-239; FCC 16-96]

Amateur Radio Service Rules To Permit Greater Flexibility in Data Communications

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: In this document, the Federal Communications Commission (Commission) seeks comment on proposed amendments regarding technical standards applicable to data communications that may be transmitted in the Amateur Radio Service. Specifically, we propose to remove limitations on the symbol rate (also known as the baud rate) applicable to data emissions in certain amateur bands. We believe that this rule change will allow amateur service licensees to use modern digital emissions, thereby better fulfilling the purposes of the amateur service and enhancing its usefulness.

DATES: Submit comments on or before October 11, 2016, and reply comments are due on or before November 10, 2016.

ADDRESSES: You may submit comments, identified by WT Docket No. 16-239, by any of the following methods:

- *Federal Communications Commission's Web site:* <http://apps.fcc.gov/ecfs/>. Follow the instructions for submitting comments.
- *Mail:* Federal Communications Commission, 445 12th Street SW., Washington, DC 20554.
- *People with Disabilities:* Contact the FCC to request reasonable accommodations (accessible format documents, sign language interpreters, CART, etc.) by email: FCC504@fcc.gov or phone: 202-418-0530 or TTY: 202-418-0432.

FOR FURTHER INFORMATION CONTACT: Scot Stone, Scot.Stone@fcc.gov, Wireless Telecommunications Bureau, (202) 418-0638, or TTY (202) 418-7233.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Notice of Proposed Rulemaking (NPRM), adopted July 27, 2016 and released July 28, 2016. The full text of this document is available for public inspection and copying during regular business hours in the FCC Reference Center, Federal Communications Commission, 445 12th Street SW., Room CY-A257, Washington, DC 20554. The complete text may be purchased from the Commission's copy contractor, 445 12th Street, SW., Room CY-B402, Washington, DC 20554. This document will also be available via ECFS at <http://fjallfoss.fcc.gov/ecfs/>. Documents will be available electronically in ASCII, Microsoft Word, and/or Adobe Acrobat. Alternative formats are available for people with disabilities (Braille, large print, electronic files, audio format) by sending an email to fcc504@fcc.gov or calling the Commission's Consumer and Governmental Affairs Bureau at (202) 418-0530 (voice), (202) 418-0432 (TTY).

I. Introduction

1. In the *NPRM*, we propose, in response to a petition for rulemaking filed by the American Radio Relay League, Inc. (ARRL), to amend part 97 of the Commission's rules regarding technical standards applicable to data communications that may be transmitted in the Amateur Radio Service. Specifically, we propose to remove limitations on the symbol rate (also known as baud rate)—the rate at which the carrier waveform amplitude, frequency, and/or phase is varied to transmit information—applicable to data emissions in certain amateur bands. We believe that this rule change will allow amateur service licensees to use modern digital emissions, thereby better fulfilling the purposes of the amateur service and enhancing its usefulness.

II. Background

2. The limitations on radioteletype (RTTY) and data transmissions below 450 MHz vary depending on the frequency band, and on whether the digital code used to encode the signal being transmitted is one of the codes specified in section 97.309(a) of the Commission's rules—Baudot, AMTOR, and ASCII (the "specified digital codes"). Section 97.307(f) limits the symbol rate for the specified digital codes, and the bandwidth for unspecified digital codes, as follows:

The specified digital codes may be used with a symbol rate not exceeding 300 bauds for frequencies below 28 MHz (except the 60 meter (5.3305–5.4064 MHz) band), and 1200 bauds in the 10 meter (28–29.7 MHz) band; in the 6 meter (50–54 MHz) and 2 meter (144–148 MHz) bands, the specified digital codes may be used with a symbol rate not exceeding 19.6 kilobauds, and unspecified digital codes may be used with a bandwidth not exceeding 20 kilohertz; in the 1.25 meter (219–225 MHz) and 70 centimeter (420–450 MHz) bands, the specified digital codes may be used with a symbol rate not exceeding 56 kilobauds, and unspecified digital codes may be used with a bandwidth not exceeding 100 kilohertz. An amateur station transmitting a RTTY or data emission using one of the specified digital codes may use any technique whose technical characteristics have been documented publicly, such as CLOVER, G-TOR, or PACTOR, for the purpose of facilitating communications.

III. Discussion

3. *Symbol rate limit.* We tentatively agree with ARRL that the baud rate limits should be eliminated, and propose to amend part 97 accordingly. As ARRL notes, digital emissions were “in their early stages and experimentation with them was limited” at that time, and “the state of the art in HF digital communications has advanced substantially” since then. Indeed, the Commission observed in 1993 that “as technology progresses the rules may become unnecessarily restrictive, particularly with regard to the permissible baud rate.” For example, ARRL points out that PACTOR 3, which has a data rate of up to 3600 bits per second and a symbol rate of 100 bauds, is permitted in the HF bands; but PACTOR 4, which is capable of a data rate of 5800 bits per second without occupying any more spectrum, is prohibited at HF by the current rules because it has a symbol rate of 1800 bauds. Thus, ARRL argues, the current baud rate limits permit, if not actually encourage, inefficient spectrum utilization.

4. Many commenters agree that the baud rate restriction should be eliminated, and we seek comment on the reasons supporting such a view. For example, one commenter states that “part of the purpose of the amateur radio service is the advancement of radio and communications technology. Denying the ability to research and implement higher symbol rates directly contradicts the very purpose for amateur radio.” Another commenter notes that

“[t]he rest of the amateur radio operators in the world do not have this restrictive symbol rate requirement that is in the current part 97” and eliminating this restriction will allow the Emergency Communications Community to “benefit by being better able to meet its mission.” Many commenters cite permitting PACTOR 4 at HF as a reason for changing the rule, particularly to facilitate more efficient transmission of emergency communications. Other commenters, however, are concerned that facilitating faster data throughput will actually increase congestion by encouraging the transmission of larger amounts of data and new types of content.

5. We tentatively agree that a baud rate restriction has become unnecessary due to advances in modulation techniques, and no longer serves a useful purpose. Our rules do not impose a symbol rate limit on data emissions in any other amateur bands or in any other radio service. In addition, removing the baud rate restriction could encourage individuals to more fully utilize the amateur service in experimentation and could promote innovation, more efficient use of the radio spectrum currently allocated to the amateur service, and the ability of the amateur service to support public safety efforts in the event of an emergency. Facilitating the ability of the amateur service to transmit and experiment with technologies currently used in consumer and commercial products furthers this goal. Consequently, we propose to remove the baud rate limits in section 97.307(f). We seek comment on this proposal. In particular, we seek comment on whether eliminating the baud rate limits would improve amateur communications, or would instead increase congestion. Regarding the likelihood that eliminating the baud rate limitation would increase congestion, we seek comment on whether the costs of such an increase are outweighed by the benefits that are likely to flow from the elimination of the limits, and whether there are ways to mitigate these costs without losing the benefits of the proposed initiative. More generally, we seek comment on whether there are other costs and benefits to the proposal and, when weighing all the factors, whether the benefits of the proposal outweigh its costs. Commenters opposed to eliminating the baud rate limits should also explain whether their concerns relate to all of the bands at issue, or only certain spectrum.

6. We decline, however, to propose to add a 2.8 kilohertz bandwidth limitation for RTTY and data emissions in the MF/HF bands as requested by the ARRL

Petition. ARRL cites the 60 meter band as precedent for imposing a 2.8 kilohertz bandwidth limitation on data emissions, which ARRL states “would accommodate the HF data emissions that are in common use today.” The commenters who support eliminating the baud rate restriction also generally agree with the ARRL’s requested 2.8 kilohertz bandwidth limitation, but others who support eliminating the baud rate restriction favor a narrower bandwidth limitation in order to protect low-bandwidth modes of communication.

7. After reviewing the record, we tentatively conclude that a specific bandwidth limitation for RTTY and data emissions in the MF/HF bands is not necessary. We note that only the digital codes specified in section 97.309(a) may be used for MF/HF data emissions, and our rules do not impose any specific bandwidth limitation on use of the specified digital codes in any frequency band other than the 60 meter band. The 60 meter band cited by ARRL is a special case, however, given that amateur operators are permitted to operate only on specific frequencies rather than across the entire band, and are permitted to use only particular data and RTTY emission designators, in order to protect primary Federal voice operations in the band. Section 97.307(a) of the Commission’s rules already provides that no amateur station transmission shall occupy more bandwidth than necessary for the information rate and emission type being transmitted, in accordance with good amateur practice, and section 97.307(c) already prohibits interference from spurious emissions (*i.e.*, emissions outside the necessary bandwidth). The methods to be used in calculating the necessary bandwidth of various emissions are specified in section 2.202 of the Commission’s rules. We tentatively conclude that such rules are sufficient to help protect against inefficient use or other abuse of the spectrum identified by commenters, and will accomplish ARRL’s stated reason for proposing a bandwidth limitation of facilitating sharing among amateur licensees.

8. We also observe that while a 2.8 kilohertz bandwidth limitation would accommodate HF data emissions that are in common use today, such a limitation could, at the same time, undermine the goal—fundamental to the amateur service—of encouraging advances in technology if amateur radio operators were thereby prevented from stepping beyond today’s radio science. Imposing a maximum bandwidth would result in a loss of flexibility to develop

and improve technologies as licensees' operating interests change and new technologies are developed. We seek comment on these tentative conclusions.

9. While we tentatively conclude that a specific bandwidth limitation for RTTY and data emissions in the MF/HF bands is not necessary, we nonetheless request comment on whether we should establish emission bandwidth standards for amateur service MF/HF RTTY and data emissions. Commenters favoring such action should address what the maximum bandwidth should be, the basis for the particular limitation the commenter proposes, and whether the limit should apply across the bands or only in particular subbands. Commenters should explain the grounds for departing from the generally applicable standards.

IV. Conclusion

10. In summary, we believe that the public interest may be served by revising the amateur service rules to eliminate the current baud rate limitations for data emissions consistent with ARRL's Petition to allow amateur service licensees to use modern digital emissions, thereby furthering the purposes of the amateur service and enhancing the usefulness of the service. We do not, however, propose a bandwidth limitation for data emissions in the MF and HF bands to replace the baud rate limitations, because the rules' current approach for limiting bandwidth use by amateur stations using one of the specified digital codes to encode the signal being transmitted appears sufficient to ensure that general access to the band by licensees in the amateur service does not become unduly impaired.

V. Procedural Matters

11. *Initial Regulatory Flexibility Certification.* The Regulatory Flexibility Act (RFA) requires an initial regulatory flexibility analysis to be prepared for notice and comment rulemaking

proceedings, unless the agency certifies that "the rule will not, if promulgated, have a significant economic impact on a substantial number of small entities." The RFA generally defines the term "small entity" as having the same meaning as the terms "small business," "small organization," and "small governmental jurisdiction." In addition, the term "small business" has the same meaning as the term "small business concern" under the Small Business Act. A "small business concern" is one which: (1) Is independently owned and operated; (2) is not dominant in its field of operation; and (3) satisfies any additional criteria established by the Small Business Administration (SBA).

12. In the NPRM, we propose to amend the amateur service rules to change a technical rule applicable to data emissions that an amateur radio operator may use in his or her communications with other amateur radio operators. Because "small entities," as defined in the Regulatory Flexibility Act, do not include a "person" as the term is used in this proceeding or an individual, the proposed rules do not apply to "small entities." Rather, they apply exclusively to individuals who hold certain Commission authorizations. Therefore, we certify that the proposal in this NPRM, if adopted, will not have a significant economic impact on a substantial number of small entities.

13. *Paperwork Reduction Analysis.* This document does not contain proposed information collection(s) subject to the Paperwork Reduction Act of 1995 (PRA), Public Law 104-13. In addition, therefore, it does not contain any new or modified information collection burden for small business concerns with fewer than 25 employees, pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107-198, see 44 U.S.C. 3506(c)(4).

VI. Ordering Clauses

14. *It is ordered* that, pursuant to Sections 4(i), 303(r), and 403 of the

Communications Act of 1934, as amended, 47 U.S.C. 154(i), 303(r), and 403, that this Notice of Proposed Rulemaking is *hereby adopted*.

15. *It is further ordered* that, pursuant to section 1.407 of the Commission's rules, 47 CFR 1.407, the Petition for Rulemaking, RM-11708, filed by the American Radio Relay League, Inc., on November 15, 2013 is *granted* to the extent indicated herein, and is otherwise *denied*.

16. *It is further ordered* that the Commission's Consumer and Governmental Affairs Bureau, Reference Information Center, shall send a copy of this Notice of Proposed Rulemaking, including the Initial Regulatory Flexibility Certification, to the Chief Counsel for Advocacy of the Small Business Administration.

List of Subjects in 47 CFR Part 97

Radio.
Federal Communications Commission.
Gloria J Miles,
Federal Register Liaison Officer, Office of the Secretary.

Proposed Rules

For the reasons discussed in the preamble, the Federal Communications Commission proposes to amend 47 CFR part 97 as follows:

PART 97—AMATEUR RADIO SERVICE

■ 1. The authority citation for part 97 continues to read as follows:

Authority: 48 Stat. 1066, 1082, as amended; 47 U.S.C. 154, 303. Interpret or apply 48 Stat. 1064-1068, 1081-1105, as amended; 47 U.S.C. 151-155, 301-609, unless otherwise noted.

■ 2. Section 97.305 is amended by revising the entry for 28.0-28.3 MHz in the table in paragraph (c) to read as follows:

§ 97.305 Authorized emission types.

* * * * *
(c) * * *

Wavelength band	Frequencies	Emission types authorized	Standards see § 97.307(f), paragraph:
HF:			
10 m	28.0-28.3 MHz	RTTY, data	(3).

■ 3. Section 97.307 is amended by revising paragraph (f)(3), removing and reserving paragraph (f)(4), and revising paragraphs (f)(5) and (6) to read as follows:

§ 97.307 Emission standards.

* * * * *

(f) * * *

(3) Only an RTTY or data emission using a specified digital code listed in § 97.309(a) of this part may be transmitted.

(4) [Reserved]

(5) An RTTY, data or multiplexed emission using a specified digital code listed in § 97.309(a) of this part may be transmitted. An RTTY, data or multiplexed emission using an unspecified digital code under the limitations listed in § 97.309(b) of this part also may be transmitted, provided the bandwidth does not exceed 20 kHz.

(6) An RTTY, data or multiplexed emission using a specified digital code listed in § 97.309(a) of this part may be transmitted. An RTTY, data or multiplexed emission using an unspecified digital code under the limitations listed in § 97.309(b) of this part also may be transmitted, provided the bandwidth does not exceed 100 kHz.

BILLING CODE 6712-01-P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 20

[Docket No. FWS-HQ-MB-2016-0051; FF09M21200-156-FXMB1231099BPP0]

RIN 1018-BB40

Migratory Bird Hunting; Supplemental Proposals for Migratory Game Bird Hunting Regulations for the 2017-18 Hunting Season; Notice of Meetings

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule; supplemental.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), proposed in an earlier document this year to establish annual hunting regulations for certain migratory game birds for the 2017-18 hunting season. This supplement to that proposed rule provides the regulatory alternatives for the 2017-18 duck hunting seasons, announces the Service Migratory Bird Regulations Committee (SRC) and Flyway Council meetings, and provides Flyway Council recommendations resulting from their March meetings.

DATES: *Comments:* We will accept comments on this proposed rule and any subsequent proposed rules resulting from upcoming SRC meetings until January 15, 2017.

Meetings: The SRC will meet to consider and develop proposed regulations for the 2017-18 migratory game bird hunting seasons on October 25-26, 2016. Meetings on both days will commence at approximately 8:30 a.m.

ADDRESSES: You may submit comments on the proposals by one of the following methods:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the instructions for submitting comments on Docket No. FWS-HQ-MB-2016-0051.

- *U.S. mail or hand-delivery:* Public Comments Processing, Attn: FWS-HQ-MB-2016-0051; Division of Policy, Performance, and Management Programs; U.S. Fish and Wildlife Service, MS: BPHC; 5275 Leesburg Pike, Falls Church, VA 22041.

We will not accept emailed or faxed comments. We will post all comments on <http://www.regulations.gov>. This generally means that your entire submission—including any personal identifying information—will be posted on the Web site. See the Public Comments section, below, for more information.

Meetings: The October 25-26, 2016, SRC meeting will be at the U.S. Fish and Wildlife Service, 5600 American Boulevard, Bloomington, MN 55437.

FOR FURTHER INFORMATION CONTACT: Ron W. Kokel at: Division of Migratory Bird Management, U.S. Fish and Wildlife Service, Department of the Interior, MS: MB, 5275 Leesburg Pike, Falls Church, VA 22041; (703) 358-1714.

SUPPLEMENTARY INFORMATION:

New Process for the Annual Migratory Game Bird Hunting Regulations

As part of the Department of the Interior's retrospective regulatory review, we developed a schedule for migratory game bird hunting regulations that is more efficient and provides hunting season dates much earlier than was possible under the old process. The new process makes planning much easier for the States and all parties interested in migratory bird hunting. Beginning last year with the development of the 2016-17 hunting seasons, we are using a new schedule for establishing our annual migratory game bird hunting regulations. We combine the previously used early- and late-season regulatory processes into a single process, and make decisions for harvest management based on

predictions derived from long-term biological information and established harvest strategies to establish migratory bird hunting seasons much earlier than the system we used for many years. Under the new process, we develop proposed hunting season frameworks for a given year in the fall of the prior year. We then finalize those frameworks a few months later, thereby enabling the State agencies to select and publish their season dates in early summer. We provided a detailed overview of the new process in the June 10, 2016, **Federal Register** (81 FR 38050). This proposed rule is the second in a series of proposed and final rules for the establishment of the 2017-18 hunting seasons.

Service Migratory Bird Regulations Committee Meetings

The SRC will meet October 25-26, 2016, to review information on the current status of migratory game birds and develop 2017-18 migratory game bird regulations recommendations for these species. In accordance with Departmental policy, these meetings are open to public observation. You may submit written comments to the Service on the matters discussed.

Announcement of Flyway Council Meetings

Service representatives will be present at the individual meetings of the four Flyway Councils this August, September, and October. Although agendas are not yet available, these meetings usually commence at 8 a.m. on the days indicated.

Atlantic Flyway Council: October 6-7, 2016, Hyatt Regency, 225 East Coastline Drive, Jacksonville, FL.

Mississippi Flyway Council: August 25-26, 2016, Hyatt Regency, 311 South 4th Street, Louisville, KY.

Central Flyway Council: September 22-23, 2016, Sheraton Steamboat Resort, 2200 Village Inn Court, Steamboat Springs, CO.

Pacific Flyway Council: September 30, 2016, Sun Valley Resort, 1 Sun Valley Road, Sun Valley, ID.

Regulatory Schedule for 2017-18

On June 10, 2016, we published a proposal to amend title 50 of the Code of Federal Regulations (CFR) at part 20 (81 FR 38050). The proposal provided a background and overview of the migratory bird hunting regulations process, and addressed the establishment of seasons, limits, and other regulations for hunting migratory game birds under §§ 20.101 through 20.107, 20.109, and 20.110 of subpart K. This document is the second in a series

of proposed, supplemental, and final rules for migratory game bird hunting regulations. We will publish additional supplemental proposals for public comment in the **Federal Register** as population, habitat, harvest, and other information become available. Major steps in the 2017–18 regulatory cycle relating to open public meetings and **Federal Register** notifications were illustrated in the diagram at the end of the June 10, 2016, proposed rule (81 FR 38050).

All sections of this and subsequent documents outlining hunting frameworks and guidelines are organized under the numbered headings set forth in the June 10, 2016, proposed rule (81 FR 38050). Later sections of this and subsequent documents will refer only to numbered items requiring your attention. Therefore, it is important to note that we will omit those items requiring no attention, and remaining numbered items will be discontinuous, thereby making the list appear incomplete.

The regulatory alternatives for the 2017–18 duck hunting seasons are contained at the end of this document. We plan to publish proposed season frameworks in mid-December 2016. We plan to publish final season frameworks in late February 2017.

Review of Public Comments

This proposed rulemaking describes recommended changes or specific preliminary proposals that vary from the 2016–17 regulations and issues requiring discussion, action, or the attention of the States or tribes. We will publish responses to all proposals and written comments when we develop final frameworks for the 2017–18 season. We seek additional information and comments on this supplemental proposed rule.

New proposals and modifications to previously described proposals are discussed below. Wherever possible, they are discussed under headings corresponding to the numbered items identified in the June 10, 2016, proposed rule (81 FR 38050). Only those categories requiring your attention or for which we received Flyway Council recommendations are discussed below.

1. Ducks

Duck harvest management categories are: (A) General Harvest Strategy; (B) Regulatory Alternatives, including specification of framework dates, season length, and bag limits; (C) Zones and Split Seasons; and (D) Special Seasons/Species Management.

A. General Harvest Strategy

Council Recommendations: The Mississippi Flyway Council recommended that regulation changes be restricted to one step per year, both when restricting as well as liberalizing hunting regulations.

Service Response: As we stated in the June 10, 2016, proposed rule (81 FR 38050), we intend to continue use of Adaptive Harvest Management (AHM) to help determine appropriate duck-hunting regulations for the 2017–18 season. AHM is a tool that permits sound resource decisions in the face of uncertain regulatory impacts, as well as providing a mechanism for reducing that uncertainty over time. The current AHM protocol is used to evaluate four alternative regulatory levels based on the population status of mallards and their breeding habitat (*i.e.*, abundance of ponds). Special hunting restrictions are enacted for certain species, such as canvasbacks, black ducks, scaup, and pintails.

Regarding the Mississippi Flyway Council recommendation to limit regulatory changes to one step per year, we recognize the longstanding interest by the Council to impose a one-step constraint on regulatory changes. We note that the Central and Mississippi Flyways have worked with Service staff over the past 2 years to re-visit the AHM protocol for managing harvest of mid-continent mallards (*i.e.*, “double-looping”). This effort has included a discussion of appropriate management objectives, regulatory packages, and management of non-mallard stocks. We continue to believe that these discussions are the appropriate venue to discuss what role, if any, a one-step constraint might play in management of waterfowl in the Central and Mississippi Flyways. Such discussions should include the potential impact of a one-step constraint on the frequency of when the liberal, moderate, and restrictive packages would be recommended. On a final note, while we recognize the Council’s concern about potentially communicating a large regulatory change to hunters, we have concerns about the appropriateness of a one-step constraint in situations when the status of the waterfowl resource may warrant such a measure. We look forward to continued work with the Flyway Councils on this issue.

B. Regulatory Alternatives

Council Recommendations: The Mississippi and Central Flyway Councils recommended that regulatory alternatives for duck hunting seasons remain the same as those used in 2016–

17. The Mississippi Flyway Council further recommended changing the framework closing date to January 31 during “moderate” and “liberal” seasons.

Service Response: As we stated in a final rule published earlier this year (81 FR 17302, March 28, 2016), we do not support the Council’s recommendation to extend the duck season framework closing date to January 31 at this time. We note that the current framework opening and closing dates were developed through a cooperative effort between all four Flyway Councils and that framework dates are only one of several components that comprise the regulatory packages utilized in AHM. Regulatory packages also consider season length, daily bag limits, and shooting hours. We believe the current regulatory packages in the Atlantic and Mississippi Flyways should remain unchanged until revisions to the AHM protocols have been completed. Those efforts will include examination of duck harvest management objectives, model updates, and revisions to regulatory packages, including framework dates. We prefer that the issue of framework dates and any other component of the regulatory packages be addressed through this cooperative process and would prefer a comprehensive approach to revising regulatory packages rather than making incremental changes.

Thus, the regulatory alternatives proposed in the June 10, 2016, **Federal Register** (81 FR 38050) will be used for the 2017–18 hunting season (see accompanying table at the end of this document for specific information). In 2005, the AHM regulatory alternatives were modified to consist only of the maximum season lengths, framework dates, and bag limits for total ducks and mallards. Restrictions for certain species within these frameworks that are not covered by existing harvest strategies will be addressed in the proposed frameworks rule in early December. For those species with specific harvest strategies (pintails, black ducks, and scaup), those strategies will again be used for the 2017–18 hunting season.

D. Special Seasons/Species Management

iv. Canvasbacks

Council Recommendations: The Central Flyway Council recommends a 2-bird canvasback daily bag when populations are above 480,000, a 1-bird daily bag limit when between 460,000–480,000, and a closed season when below 460,000.

16. Mourning Doves

Council Recommendations: The Atlantic and Mississippi Flyway Councils recommended that the framework closing date for mourning doves in the Eastern Management Unit be moved from January 15 to January 31 for the 2017–18 hunting season.

Public Comments

The Department of the Interior's policy is, whenever practicable, to afford the public an opportunity to participate in the rulemaking process. Accordingly, we invite interested persons to submit written comments, suggestions, or recommendations regarding the proposed regulations. Before promulgation of final migratory game bird hunting regulations, we will take into consideration all comments we receive. Such comments, and any additional information we receive, may lead to final regulations that differ from these proposals.

You may submit your comments and materials concerning the proposed rule by one of the methods listed in **ADDRESSES**. We will not accept comments sent by email or fax or to an address not listed in **ADDRESSES**. Finally, we will not consider hand-delivered comments that we do not receive, or mailed comments that are not postmarked, by the date specified in

DATES. We will post all comments in their entirety—including your personal identifying information—on <http://www.regulations.gov>. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so. Comments and materials we receive, as well as supporting documentation we used in preparing the proposed rule, will be available for public inspection on <http://www.regulations.gov>, or by appointment, during normal business hours, at the U.S. Fish and Wildlife Service, Division of Migratory Bird Management, 5275 Leesburg Pike, Falls Church, VA.

We will consider, but possibly may not respond in detail to, each comment. As in the past, we will summarize all comments we receive during the comment period and respond to them after the closing date in any final rules.

Required Determinations

Based on our most current data, we are affirming our required

determinations made in the June 10, 2016, proposed rule (81 FR 38050); for descriptions of our actions to ensure compliance with the following statutes and Executive Orders, see that document:

- National Environmental Policy Act;
 - Endangered Species Act;
 - Regulatory Flexibility Act;
 - Small Business Regulatory Enforcement Fairness Act;
 - Paperwork Reduction Act;
 - Unfunded Mandates Reform Act;
- and
- Executive Orders 12630, 12866, 12988, 13132, 13175, 13211, and 13563.

List of Subjects in 50 CFR Part 20

Exports, Hunting, Imports, Reporting and recordkeeping requirements, Transportation, Wildlife.

Authority

The rules that eventually will be promulgated for the 2017–18 hunting season are authorized under 16 U.S.C. 703–711, 16 U.S.C. 712, and 16 U.S.C. 742 a–j.

Dated: August 2, 2016.

Karen Hyun,

Acting Principal Deputy Assistant Secretary for Fish and Wildlife and Parks.

REGULATORY ALTERNATIVES FOR DUCK HUNTING DURING THE 2017-18 SEASON

	ATLANTIC FLYWAY			MISSISSIPPI FLYWAY			CENTRAL FLYWAY (a)			PACIFIC FLYWAY (b)(c)

- (a) In the High Plains Mallard Management Unit, all regulations would be the same as the remainder of the Central Flyway, with the exception of season length. Additional days would be allowed under the various alternatives as follows: restrictive - 12, moderate and liberal - 23. Under all alternatives, additional days must be on or after the Saturday nearest December 10.
- (b) In the Columbia Basin Mallard Management Unit, all regulations would be the same as the remainder of the Pacific Flyway, with the exception of season length. Under all alternatives except the liberal alternative, an additional 7 days would be allowed.
- (c) In Alaska, framework dates, bag limits, and season length would be different from the remainder of the Pacific Flyway. The bag limit (depending on the area) would be 5-8 under the restrictive alternative, and 7-10 under the moderate and liberal alternatives. Under all alternatives, season length would be 107 days and framework dates would be Sep. 1 - Jan. 26.

Statement of Principles on Industrial Hemp

AGENCY: Office of the Secretary, USDA; Drug Enforcement Administration, DOJ; Food and Drug Administration, HHS.

ACTION: Notice

SUMMARY: The U.S. Department of Agriculture, in consultation with the U.S. Drug Enforcement Administration and the U.S. Food and Drug Administration, has developed a *Statement of Principles on Industrial Hemp* to inform the public how Federal law applies to activities associated with industrial hemp that is grown and cultivated in accordance with Section 7606 of the Agricultural Act of 2014. The purpose of this notice is to set forth the statement in its entirety.

DATES: This Statement of Principles is applicable August 12, 2016.

FOR FURTHER INFORMATION CONTACT: Michael Poe, Telephone Number: (202) 720-3257.

SUPPLEMENTARY INFORMATION:

1. Statement of Principles

With publication of this notice, the U.S. Department of Agriculture (USDA) issues, with the concurrence of the U.S. Drug Enforcement Administration (DEA) and the U.S. Food and Drug Administration (FDA), the following Statement of Principles regarding the applicability of Federal laws to activities associated with growing and cultivating industrial hemp:

Section 7606 of the Agricultural Act of 2014 legalized the growing and cultivating of industrial hemp for research purposes in States where such growth and cultivation is legal under State law, notwithstanding existing Federal statutes that would otherwise criminalize such conduct. The statutorily sanctioned conduct, however, was limited to growth and cultivation by an institution of higher education or State department of agriculture for purposes of agricultural or other academic research or under the auspices of a State agricultural pilot program for the growth, cultivation, or marketing of industrial hemp.

Section 7606 authorized State departments of agriculture to promulgate regulations to carry out these pilot programs but did not provide a specific delegation to the U.S. Department of Agriculture (USDA) or any other agency to implement the program. As well, the statute left open many questions regarding the continuing application of Federal drug control statutes to the growth, cultivation, manufacture, and distribution of industrial hemp products, as well as the extent to which growth by private parties and sale of industrial hemp products are permissible. Section 7606 did not remove industrial hemp from the controlled substances list. Therefore, Federal law continues to restrict hemp-related activities, to the extent that those activities have not been legalized under section 7606.

USDA, having consulted with and received concurrence from the U.S. Drug Enforcement Administration (DEA) and the U.S. Food and Drug Administration (FDA), therefore, is issuing this statement of principles to inform the public regarding how Federal law applies to activities involving industrial hemp so that individuals, institutions, and States that wish to participate in industrial hemp agricultural pilot programs can do so in accordance with Federal law.

- The growth and cultivation of industrial hemp may only take place in accordance with an agricultural pilot program to study the growth, cultivation, or marketing of industrial hemp established by a State department of agriculture or State agency responsible for agriculture in a State

where the production of industrial hemp is otherwise legal under State law.

- The State agricultural pilot program must provide for State registration and certification of sites used for growing or cultivating industrial hemp. Although registration and certification is not further defined, it is recommended that such registration should include the name of the authorized manufacturer, the period of licensure or other time period during which such person is authorized by the State to manufacture industrial hemp, and the location, including Global Positioning System coordinates, where such person is authorized to manufacture industrial hemp.

- Only State departments of agriculture, and persons licensed, registered, or otherwise authorized by them to conduct research under an agricultural pilot program in accordance with section 7606, and institutions of higher education (as defined in section 101 of the Higher Education Act of 1965 (20 U.S.C. 1001)), or persons employed by or under a production contract or lease with them to conduct such research, may grow or cultivate industrial hemp as part of the agricultural pilot program.

- The term “industrial hemp” includes the plant *Cannabis sativa* L. and any part or derivative of such plant, including seeds of such plant, whether growing or not, that is used exclusively for industrial purposes (fiber and seed) with a tetrahydrocannabinols concentration of not more than 0.3 percent on a dry weight basis. The term “tetrahydrocannabinols” includes all isomers, acids, salts, and salts of isomers of tetrahydrocannabinols.

- For purposes of marketing research by institutions of higher education or State departments of agriculture (including distribution of marketing materials), but not for the purpose of general commercial activity, industrial hemp products may be sold in a State with an agricultural pilot program or among States with agricultural pilot programs but may not be sold in States where such sale is prohibited. Industrial hemp plants and seeds may not be transported across State lines.

- Section 7606 specifically authorized certain entities to “grow or cultivate” industrial hemp but did not eliminate the requirement under the Controlled Substances Import and

Export Act that the importation of viable cannabis seeds must be carried out by persons registered with the DEA to do so. In addition, any USDA phytosanitary requirements that normally would apply to the importation of plant material will apply to the importation of industrial hemp seed.

- Section 7606 did not amend the Federal Food, Drug, and Cosmetic Act. For example, section 7606 did not alter the approval process for new drug applications, the requirements for the conduct of clinical or nonclinical research, the oversight of marketing claims, or any other authorities of the FDA as they are set forth in that Act.

- The Federal Government does not construe section 7606 to alter the requirements of the Controlled Substances Act (CSA) that apply to the manufacture, distribution, and dispensing of drug products containing controlled substances. Manufacturers, distributors, dispensers of drug products derived from cannabis plants, as well as those conducting research with such drug products, must continue to adhere to the CSA requirements.

- Institutions of higher education and other participants authorized to carry out agricultural pilot programs under section 7606 may be able to participate in USDA research or other programs to the extent otherwise eligible for participation in those programs.

2. Regulatory Requirements

This Statement of Principles does not establish any binding legal requirements. It is, therefore, exempt from notice and comment rulemaking requirements under the Administrative Procedure Act pursuant to 5 U.S.C. 553(b). Because no notice of proposed rulemaking is required, the Regulatory Flexibility Act does not require an initial or final regulatory flexibility analysis. 5 U.S.C. 603(a), 604(a). USDA has determined that this Statement of Principles does not impose any new or revise any existing recordkeeping, reporting, or disclosure requirements on covered entities or members of the public that would be collections of information requiring OMB approval under the Paperwork Reduction Act, 44 U.S.C. 3501, *et seq.*

BILLING CODE 3410-01-P

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. APHIS-2016-0043]

Okanagan Specialty Fruits, Inc.; Availability of Preliminary Finding of No Significant Impact, Preliminary Plant Pest Risk Similarity Assessment, and Preliminary Determination for an Extension of a Determination of Nonregulated Status for Non-Browning Arctic® Apple Event NF872 Apple

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice.

SUMMARY: We are advising the public that the Animal and Plant Health Inspection Service has reached a preliminary decision to extend our determination of nonregulated status of Okanagan Specialty Fruits' (OSF) GS784 and GD743 apples to OSF NF872 'Arctic® Fuji apple'. OSF's NF872 apple has been genetically engineered for enzymatic browning resistance using the same mode of action as GS784 and GD743 apples. We are making available for public comment our preliminary determination, preliminary plant pest risk similarity assessment, and preliminary finding of no significant impact for the proposed determination of nonregulated status.

DATES: We will consider all comments that we receive on or before September 12, 2016.

ADDRESSES: You may submit comments by either of the following methods:

- Federal eRulemaking Portal:* Go to <http://www.regulations.gov/#!docketDetail;D=APHIS-2016-0043>.

- Postal Mail/Commercial Delivery:* Send your comment to Docket No. APHIS-2016-0043, Regulatory Analysis and Development, PPD, APHIS, Station 3A-03.8, 4700 River Road Unit 118, Riverdale, MD 20737-1238.

The Okanagan Specialty Fruits extension request, our preliminary determination, preliminary plant pest risk similarity assessment, preliminary finding of no significant impact, and any comments we receive on this docket may be viewed at <http://www.regulations.gov/#!docketDetail;D=APHIS-2016-0043> or in our reading room, which is located in

room 1141 of the USDA South Building, 14th Street and Independence Avenue SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 799-7039 before coming.

Supporting documents and any comments we received regarding our determination of nonregulated status of the antecedent organisms (apple events GD743 and GS784), can be found at <http://www.regulations.gov/#!docketDetail;D=APHIS-2012-0025>. Supporting documents may also be found on the APHIS Web site for NF872 'Arctic® Fuji apple' (the organism under evaluation) under APHIS Petition Number 16-004-01p, and the antecedent organisms (apple events GD743 and GS784) under APHIS Petition Number 10-161-01p.

FOR FURTHER INFORMATION CONTACT: Dr. John Turner, Director, Biotechnology Risk Analysis Programs, Biotechnology Regulatory Services, APHIS, 4700 River Road Unit 147, Riverdale, MD 20737-1236; (301) 851-3954, email: john.t.turner@aphis.usda.gov. To obtain copies of the supporting documents, contact Ms. Cindy Eck at (301) 851-3885, email: cynthia.a.eck@aphis.usda.gov.

SUPPLEMENTARY INFORMATION: Under the authority of the plant pest provisions of the Plant Protection Act (PPA) (7 U.S.C. 7701 *et seq.*), the regulations in 7 CFR part 340, "Introduction of Organisms and Products Altered or Produced Through Genetic Engineering Which Are Plant Pests or Which There Is Reason to Believe Are Plant Pests," regulate, among other things, the introduction (importation, interstate movement, or release into the environment) of organisms and products altered or produced through genetic engineering that are plant pests or that there is reason to believe are plant pests. Such genetically engineered organisms and products are considered "regulated articles."

The regulations in § 340.6(a) provide that any person may submit a petition to the Animal and Plant Health Inspection Service (APHIS) seeking a determination that an article should not be regulated under 7 CFR part 340. Further, the regulations in § 340.6(e)(2) provide that a person may request that APHIS extend a determination of nonregulated status to other organisms. Such a request must include information to establish the similarity of the antecedent organism and the regulated article in question.

In a notice¹ published in the **Federal Register** on November 8, 2013 (78 FR 67100, Docket No. APHIS–2012–0025), APHIS announced our determination of nonregulated status of apples (*Malus domestica*) designated as events GD743 and GS784, which have been genetically engineered to resist browning. APHIS has received a request for an extension of a determination of nonregulated status of GD743 and GS784 apples to Arctic® apple event NF872 (hereinafter NF872 apple) (APHIS Petition Number 16–004–01p) from Okanagan Specialty Fruits, Inc. (hereinafter referred to as OSF), of British Columbia, Canada. In the extension request, OSF named the two previously deregulated apple events as antecedents. Like the antecedents, NF872 apple is genetically engineered to be resistant to enzymatic browning. In its request, OSF stated that NF872 apple was produced by transforming an additional variety of apple using the same DNA and method that was used for the antecedent apples and, based on the similarity, is unlikely to pose a plant pest risk. Therefore, the request stated that NF872 apple should not be a regulated article under APHIS' regulations in 7 CFR part 340.

As described in the extension request, NF872 apple has been genetically engineered through the insertion of genetic elements from apples. APHIS has previously assessed the risks associated with the insertion of these same genetic elements into apples and concluded that the resulting organisms did not pose a plant pest risk. Based on the information in the request, we have concluded that NF872 apple is similar to the antecedent apples. NF872 apple is currently regulated under 7 CFR part 340.

As part of our decisionmaking process regarding a genetically engineered organism's regulatory status, APHIS evaluates the plant pest risk of the article. In section 403 of the PPA, "plant pest" is defined as any living stage of any of the following that can directly or indirectly injure, cause damage to, or cause disease in any plant product: A protozoan, a nonhuman animal, a parasitic plant, a bacterium, a fungus, a virus or viroid, an infectious agent or other pathogen, or any article similar to or allied with any of the foregoing.

APHIS completed a plant pest risk assessment (PPRA) for the antecedent organisms in which we concluded that the GD743 and GS784 apples are unlikely to present a plant pest risk.

NF872 apple expresses the same resistance to enzymatic browning as the antecedent apples. Therefore, based on our PPRA for the antecedents and the similarity between NF872 apple and the antecedents, APHIS has concluded that NF872 apple is unlikely to pose a plant pest risk. APHIS also prepared a plant pest risk similarity assessment (PPRSA) to compare NF872 to the antecedents. As described in the PPRSA, the NF872 apple was obtained using a polyphenol oxidase (PPO) suppression construct designed to reduce the expression of four apple genes coding for PPO proteins. The PPO suppression construct used in the NF872 apple event is the same construct used in the antecedent apple events GD743 and GS784, and APHIS has concluded that the PPO suppression construct used in GD743 and GS784 is unlikely to affect the plant pest risk of NF872. Furthermore, APHIS has previously reviewed the potential impacts on nontarget organisms beneficial to agriculture and concluded that it is unlikely that NF872 apple will have an adverse effect on nontarget organisms. Therefore, based on our PPRA for GD743 apple and GS784 apple and the similarity between GD743 apple, GS784 apple, and NF872 apple as described in the PPRSA, APHIS has concluded that the PPO suppression construct used to obtain the NF872 apple is unlikely to pose a plant pest risk and that NF872 apple is unlikely to pose a different plant pest risk than GD743 apple and GS784 apple.

The environmental assessment (EA) for the antecedent organisms was prepared using data submitted by OSF, a review of other scientific data, and field tests conducted under APHIS oversight. The EA was prepared to provide the APHIS decisionmaker with a review and analysis of any potential environmental impacts associated with the proposed determination of nonregulated status of the antecedent apples. The EA was prepared in accordance with (1) the National Environmental Policy Act of 1969 (NEPA), as amended (42 U.S.C. 4321 *et seq.*); (2) regulations of the Council on Environmental Quality for implementing the procedural provisions of NEPA (40 CFR parts 1500–1508); (3) USDA regulations implementing NEPA (7 CFR part 1b); and (4) APHIS' NEPA Implementing Procedures (7 CFR part 372).

Based on the similarity of NF872 apple to the antecedent apples, APHIS has prepared a preliminary finding of no significant impact (FONSI) on NF872 apple using the EA prepared for GD743 and GS784 apples. APHIS considered

the following alternatives: (1) Take no action, *i.e.*, APHIS would not change the regulatory status of NF872 apple and it would continue to be a regulated article, or (2) make a determination of nonregulated status of NF872 apple. APHIS' preferred alternative is to make a determination of nonregulated status of NF872 apple.

APHIS has carefully examined the existing NEPA documentation completed for GD743 and GS784 apples and has concluded that OSF's request to extend a determination of nonregulated status to NF872 apple encompasses the same scope of environmental analysis as the antecedent apples.

Based on APHIS' analysis of information submitted by OSF, references provided in the extension request, peer-reviewed publications, information analyzed in the EA, and the similarity of NF872 apple to the antecedent organisms, APHIS has determined that NF872 apple is unlikely to pose a plant pest risk. We have therefore reached a preliminary decision to approve the request to extend the determination of nonregulated status of GD743 and GS784 apples to NF872 apple, whereby NF872 apple would no longer be subject to our regulations governing the introduction of certain genetically engineered organisms.

Paragraph (e) of § 340.6 provides that APHIS will publish a notice in the **Federal Register** announcing all preliminary decisions to extend determinations of nonregulated status for 30 days before the decisions become final and effective. In accordance with § 340.6(e) of the regulations, we are publishing this notice to inform the public of our preliminary decision to extend the determination of nonregulated status of the antecedent apples to NF872 apple.

APHIS will accept written comments on the preliminary FONSI regarding a determination of nonregulated status of NF872 apple for a period of 30 days from the date this notice is published in the **Federal Register**. The preliminary FONSI, as well as the extension request, supporting documents, and our preliminary determination for NF872 apple, are available for public review as indicated under **ADDRESSES** and **FOR FURTHER INFORMATION CONTACT** above. Copies of these documents may also be obtained by contacting the person listed under **FOR FURTHER INFORMATION CONTACT**.

After the comment period closes, APHIS will review all written comments received during the comment period and any other relevant information. All comments will be available for public review. After reviewing and evaluating

¹ To view the notice, our determination, supporting documents, and the comments we have received, go to <http://www.regulations.gov/#/docketDetail;D=APHIS-2012-0025>.

the comments, if APHIS determines that no substantive information has been received that would warrant APHIS altering its preliminary regulatory determination or FONSI, our preliminary regulatory determination will become final and effective upon notification of the public through an announcement on our Web site at http://www.aphis.usda.gov/biotechnology/petitions_table_pending.shtml. APHIS will also furnish a response to the petitioner regarding our final regulatory determination. No further **Federal Register** notice will be published announcing the final regulatory determination regarding NF872 apple.

Authority: 7 U.S.C. 7701–7772 and 7781–7786; 31 U.S.C. 9701; 7 CFR 2.22, 2.80, and 371.3.

Done in Washington, DC, this 8th day of August 2016.

Kevin Shea,

Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410–34–P

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. APHIS–2016–0031]

Environmental Impact Statement; Fruit Fly Eradication Program

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice of intent to prepare an environmental impact statement.

SUMMARY: We are advising the public that the Animal and Plant Health Inspection Service plans to prepare an updated environmental impact statement to analyze the effects of a program to eradicate exotic fruit fly species from wherever they might occur in the United States, including Hawaii, Guam, American Samoa, Puerto Rico, and the U.S. Virgin Islands. This notice identifies potential issues and alternatives that will be studied in the environmental impact statement, and requests public comments to further delineate the scope of the alternatives and environmental impacts and issues.

DATES: We will consider all comments that we receive on or before September 26, 2016.

ADDRESSES: You may submit comments by either of the following methods:

- *Federal eRulemaking Portal:* Go to <http://www.regulations.gov/#!docketDetail;D=APHIS-2016-0031>.
- *Postal Mail/Commercial Delivery:* Send your comment to Docket No.

APHIS–2016–0031, Regulatory Analysis and Development, PPD, APHIS, Station 3A–03.8, 4700 River Road, Unit 118, Riverdale, MD 20737–1238.

Supporting documents and any comments we receive on this docket may be viewed at <http://www.regulations.gov/#!docketDetail;D=APHIS-2016-0031> or in our reading room, which is located in Room 1141 of the USDA South Building, 14th Street and Independence Avenue SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 799–7039 before coming.

FOR FURTHER INFORMATION CONTACT: For questions related to the Fruit Fly Eradication Program, contact Mr. John C. Stewart, APHIS National Fruit Fly Eradication Program Manager, Center for Plant Health Science and Technology, PPQ, APHIS, 1730 Varsity Drive, Suite 400, Raleigh NC 27606, John.C.Stewart@aphis.usda.gov; (919) 855–7426. For questions related to the environmental impact statement, contact Dr. Jim Warren, Environmental Protection Specialist, Environmental and Risk Analysis Services, PPD, APHIS, 4700 River Road, Unit 149, Riverdale, MD 20737; Jim.E.Warren@aphis.usda.gov; (202) 316–3216.

SUPPLEMENTARY INFORMATION:

Background

Non-native (exotic) fruit flies in the family Tephritidae have a wide host range, including more than 400 species of fruit and vegetables. Introduction of these pest species into the United States causes economic losses from destruction and spoiling of host commodities by larvae, costs associated with implementing control measures, environmental impacts due to increased pesticide usage if fruit flies become established, and loss of market share due to restrictions on shipment of host commodities. Three species pose the greatest risk to United States agriculture: the Mediterranean fruit fly (Medfly), *Ceratitis capitata*; the Oriental fruit fly (OFF), *Bactrocera dorsalis*; and the Mexican fruit fly (Mexfly), *Anastrepha ludens*.

Currently, Medfly is established in Hawaii where it was first detected in 1910. Although Medfly has been periodically introduced to the United States mainland since 1929, successful eradication programs have prevented it from becoming an established pest in the continental United States. OFF was introduced into Hawaii in the 1940s and has since become established there.

Although OFF is not established in the continental United States, new infestations have been detected on an almost annual basis since it was first detected in California in 1960. The Mexfly has been introduced repeatedly to Texas and eradicated since its first introduction in 1927. The risk of introduction along the Mexican and U.S. border continues to increase as the rate of infestations in Mexico increases annually.

The regulations in “Subpart—Fruit Flies” (7 CFR 301.32 through 301.32–10, referred to below as the regulations), restrict the movement of certain regulated articles from quarantined areas in order to prevent the spread of fruit flies to noninfested areas of the United States. Within the quarantined areas, Animal and Plant Health Inspection Service (APHIS) works with State and local officials to eradicate fruit flies, after which the quarantine can be removed.

Current efforts to eradicate infestations include chemical and nonchemical control measures. Chemical options may include applications of insecticides and/or the use of detection and control attractants that can be applied using various methods. Nonchemical control methods include sterile insect technique (SIT) and host removal from areas in and around the detection sites.

Under the provisions of the National Environmental Policy Act of 1969 (NEPA), as amended (42 U.S.C 4321 *et seq.*), Federal agencies must examine the potential environmental effects of the proposed Federal actions and alternatives. A final environmental impact statement (EIS) was prepared in 2001 to examine the environmental effects of the fruit fly cooperative control program. Since the publication of the 2001 EIS, there have been scientific and technological advances in the field. As a result, we are planning to prepare a new EIS to analyze and examine the environmental effects of control alternatives available to the agency, including a no action alternative. It will be used for planning and decisionmaking and to inform the public about the environmental effects of APHIS’ fruit fly eradication activities. It will also provide an overview of APHIS activities to which we can tier site-specific analyses and environmental assessments if new fruit fly infestations are discovered in the United States.

We are requesting public comment to help us identify or confirm potential alternatives and environmental issues that should be examined in the EIS, as well as comments that identify other

issues that should be examined in the EIS.

The EIS will be prepared in accordance with: (1) NEPA, (2) regulations of the Council on Environmental Quality for implementing the procedural provisions of NEPA (40 CFR parts 1500–1508), (3) USDA regulations implementing NEPA (7 CFR part 1b), and (4) APHIS' NEPA Implementing Procedures (7 CFR part 372).

We have identified four alternatives for further examination in the EIS:

No action. Under this alternative, APHIS would maintain the program that was described in the 2001 EIS and Record of Decision. This alternative includes methods to exclude, detect, prevent, and control (both nonchemical and chemical) fruit fly infestations. This alternative represents the baseline against which a proposed action may be compared.

No eradication alternative. Under this alternative, APHIS would not control or cooperate with other governmental entities to eradicate exotic fruit flies. Any control efforts would be the responsibility of State and local governments, growers or grower groups, and individual citizens.

Quarantine and commodity treatment and certification. This alternative combines a Federal quarantine with commodity treatment and certification, as stipulated under the regulations. Regulated commodities harvested within the quarantined area would not be allowed to move unless treated with prescribed applications and certified for movement outside the area. Nonchemical treatment and host certification methods that may be used in this alternative include cold treatment, vapor heat treatment, and irradiation treatment. Regulatory certification chemical treatments may include fumigation with methyl bromide.

Integrated pest management approach. Under this alternative, APHIS would use methods to exclude, detect, prevent, and control fruit fly infestations. This alternative would update the information and technologies that were analyzed in the 2001 EIS. These methods could be used individually or in combination with other methods. In an integrated approach, program managers would make management decisions in such a way as to protect human health, nontarget species (endangered and threatened species), sensitive areas, and other components of the environment within the potential program area.

Program eradication efforts may employ any or a combination of the

following: No action, regulatory quarantine treatment and control of host materials and regulated articles, host survey for evidence of breeding fruit flies, host removal, eradication chemical applications, mass trapping to delimit the infestation and monitor posttreatment populations, and use of SIT.

We have identified the following potential environmental impacts or issues for further examination in the EIS:

- Effects on wildlife, including consideration of migratory bird species and changes in native wildlife habitat and populations, and federally listed endangered and threatened species;
- Effects on soil, air, and water quality;
- Effects on human health and safety;
- Effects on cultural and historic resources; and
- Effects on economic resources.

We welcome comments on the proposed action, and on other alternatives and environmental impacts, or issues that should be considered for further examination in the EIS.

All comments on this notice will be carefully considered in developing the final scope of the EIS. Upon completion of the draft EIS, a notice announcing its availability and an invitation to comment on it will be published in the **Federal Register**.

Done in Washington, DC, this 8th day of August 2016.

Kevin Shea,

Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410–34–P

DEPARTMENT OF AGRICULTURE

Forest Service

Flathead Resource Advisory Committee

AGENCY: Forest Service, USDA.

ACTION: Notice of meeting.

SUMMARY: The Flathead Resource Advisory Committee (RAC) will meet in Kalispell, Montana. The committee is authorized under the Secure Rural Schools and Community Self-Determination Act (the Act) and operates in compliance with the Federal Advisory Committee Act. The purpose of the committee is to improve collaborative relationships and to provide advice and recommendations to the Forest Service concerning projects and funding consistent with Title II of the Act. RAC information can be found

at the following Web site: <http://www.fs.usda.gov/main/flathead/workingtogether/advisorycommittees>.

DATES: The meeting will be held on September 12, 2016, at 6:00 p.m.

All RAC meetings are subject to cancellation. For status of meeting prior to attendance, please contact the person listed under **FOR FURTHER INFORMATION CONTACT**.

ADDRESSES: The meeting will be held at Flathead National Forest Supervisor's Office, 650 Wolfpack Way, Kalispell, Montana.

Written comments may be submitted as described under **SUPPLEMENTARY INFORMATION**. All comments, including names and addresses when provided, are placed in the record and are available for public inspection and copying. The public may inspect comments received at the Flathead National Forest Supervisor's Office, 650 Wolfpack Way, Kalispell, Montana. Please call ahead at 406–758–5252 to facilitate entry into the building.

FOR FURTHER INFORMATION CONTACT: Janette Turk, Designated Federal Official by phone at 406–758–5252, or by email at jturk@fs.fed.us.

Individuals who use telecommunication devices for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8:00 a.m. and 8:00 p.m., Eastern Standard Time, Monday through Friday.

SUPPLEMENTARY INFORMATION: The purpose of the meeting is to hear a presentation of project proposals for RAC consideration.

The meeting is open to the public. The agenda will include time for people to make oral statements of three minutes or less. Individuals wishing to make an oral statement should request in writing by September 7, 2016, to be scheduled on the agenda. Anyone who would like to bring related matters to the attention of the committee may file written statements with the committee staff before or after the meeting. Written comments and requests for time to make oral comments must be sent to Janette Turk, Designated Federal Official, Flathead National Forest Supervisor's Office, 650 Wolfpack Way, Kalispell, Montana; or by email to jturk@fs.fed.us, or via facsimile to 406–758–5379.

Meeting Accommodations: If you are a person requiring reasonable accommodation, please make requests in advance for sign language interpreting, assistive listening devices, or other reasonable accommodation. For access to the facility or proceedings, please contact the person listed in the section titled **FOR FURTHER INFORMATION**

CONTACT. All reasonable accommodation requests are managed on a case by case basis.

Dated: August 8, 2016.

Chip Weber,

Forest Supervisor.

BILLING CODE 3411-15-P

DEPARTMENT OF AGRICULTURE

Forest Service

Southwest Mississippi Resource Advisory Committee

AGENCY: Forest Service, USDA.

ACTION: Notice of meeting.

SUMMARY: The Southwest Mississippi Resource Advisory Committee (RAC) will meet in Meadville, Mississippi. The committee is authorized under the Secure Rural Schools and Community Self-Determination Act (the Act) and operates in compliance with the Federal Advisory Committee Act. The purpose of the committee is to improve collaborative relationships and to provide advice and recommendations to the Forest Service concerning projects and funding consistent with Title II of the Act. RAC information can be found at the following Web site: <http://www.fs.usda.gov/main/r8/recreation/racs>.

DATE: The meeting will be held on September 15, 2016, at 6 p.m.

All RAC meetings are subject to cancellation. For status of meeting prior to attendance, please contact the person listed under **FOR FURTHER INFORMATION CONTACT**.

ADDRESSES: The meeting will be held at the Franklin County Public Library, 106 First Street, Meadville, Mississippi.

Written comments may be submitted as described under **SUPPLEMENTARY INFORMATION**. All comments, including names and addresses when provided, are placed in the record and are available for public inspection and copying. The public may inspect comments received at the Homochitto National Forest, 1200 Highway 184 East, Meadville, Mississippi. Please call ahead to facilitate entry into the building.

FOR FURTHER INFORMATION CONTACT: Bruce Prud'homme, Designated Federal Officer, by phone at 601-384-5876, ext.17 or via email at bprudhomme@fs.fed.us.

Individuals who use telecommunication devices for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1-800-877-8339

between 8:00 a.m. and 8:00 p.m., Eastern Standard Time, Monday through Friday.

SUPPLEMENTARY INFORMATION: The purpose of the meeting is to:

1. Welcome new members,
2. Nominate new chairperson,
3. Provide updates on the RAC (Information Sharing),
4. Discuss funding availability for projects, and
5. Discuss and recommend new projects.

The meeting is open to the public.

The agenda will include time for people to make oral statements of three minutes or less. Individuals wishing to make an oral statement should request in writing by September 7, 2016, to be scheduled on the agenda. Anyone who would like to bring related matters to the attention of the committee may file written statements with the committee staff before or after the meeting. Written comments and requests for time to make oral comments must be sent to Bill Meriwether, RAC Coordinator, 1200 Highway 184 East, Meadville, Mississippi 39653; or by email to bdmeriwether@fs.fed.us, or via facsimile to 601-384-2172.

Meeting Accommodations: If you are a person requiring reasonable accommodation, please make requests in advance for sign language interpreting, assistive listening devices, or other reasonable accommodation. For access to the facility or proceedings, please contact the person listed in the section titled **FOR FURTHER INFORMATION CONTACT**. All reasonable accommodation requests are managed on a case by case basis.

Dated: August 1, 2016.

BILLING CODE 3411-15-P

DEPARTMENT OF AGRICULTURE

National Agricultural Statistics Service

Submission for OMB Review; Comment Request

August 9, 2016.

The Department of Agriculture has submitted the following information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104-13. Comments are requested regarding (1) whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information to be collected; (4) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical or other technological collection techniques or other forms of information technology.

Comments regarding this information collection received by September 12, 2016 will be considered. Written comments should be addressed to: Desk Officer for Agriculture, Office of Information and Regulatory Affairs, Office of Management and Budget (OMB), New Executive Office Building, 725-17th Street NW., Washington, DC 20503. Commenters are encouraged to submit their comments to OMB via email to: OIRA_Submission@omb.eop.gov or fax (202) 395-5806 and to Departmental Clearance Office, USDA, OCIO, Mail Stop 7602, Washington, DC 20250-7602. Copies of

the submission(s) may be obtained by calling (202) 720-8681.

An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

National Agricultural Statistics Service

Title: Fruits, Nut, and Specialty Crops.

OMB Control Number: 0535-0039.

Summary of Collection: The primary function of the National Agricultural Statistics Service (NASS) is to prepare and issue current official state and national estimates of crop and livestock production. Estimates of fruit, tree nuts, and specialty crops are an integral part of this program. These estimates support the NASS strategic plan to cover all agricultural cash receipts. The authority to collect these data activities is granted under U.S. Code title 7, Section 2204(a). Information is collected on a voluntary basis from growers, processors, and handlers through surveys.

Need and Use of the Information: Data reported on fruit, nut, specialty crops and Hawaii tropical crops are used by NASS to estimate acreage, yield, production, price, utilization, and value of citrus and non-citrus fruits and nuts and other specialty crops in States with significant commercial production. These estimates are essential to farmers, processors, and handlers in making production and marketing decisions. Estimates from these inquiries are used by market order administrators in their determination of expected supplies of crop under federal and state market orders as well as competitive fruits and nuts.

Description of Respondents: Farms; Business or other for-profit.

Number of Respondents: 84,045.

Frequency of Responses: Reporting: On occasion; Annually; Quarterly; Semi-annually; Monthly.

Total Burden Hours: 36,816.

Charlene Parker,

Departmental Information Collection Clearance Officer.

COMMISSION ON CIVIL RIGHTS

Sunshine Act Meeting Notice

AGENCY: United States Commission on Civil Rights.

ACTION: Notice of Commission Business Meeting.

DATES: Friday, August 19, 2016, at 10:00 a.m. EST.

ADDRESSES: National Place Building, 1331 Pennsylvania Ave. NW., 11th Floor, Suite 1150, Washington, DC 20245 (Entrance on F Street NW.).

FOR FURTHER INFORMATION CONTACT: Brian Walch, Communications and Public Engagement Director. Telephone: (202) 376-8371; TTY: (202) 376-8116; Email: publicaffairs@usccr.gov.

SUPPLEMENTARY INFORMATION: This business meeting is open to the public. If you would like to listen to the business meeting, please contact the above for the call-in information.

Hearing-impaired persons who will attend the briefing and require the services of a sign language interpreter should contact Juanda Smith at (202) 376-8105 or at signlanguage@usccr.gov at least seven business days before the scheduled date of the meeting.

Meeting Agenda

I. Approval of Agenda

II. Business Meeting

A. Program Planning

- Discussion and vote on Commission statement concerning recent settlement requiring Texas to issue birth certificates to U.S. citizen children of undocumented immigrants.
- Discussion and vote on Commission statement commemorating the first Asian American Member of Congress, Dalip Singh Saund.
- Discussion and vote on Commission statement concerning the 100th Anniversary of the first female elected to Congress.
- Discussion and vote on Commission Press Release on USCCR Report on Peaceful Coexistence.
- Discussion and vote on Commission Press Release on Selection of Women in Prison as topic for 2017 Statutory Enforcement report.
- Discussion and vote on Commission statement concerning U.S. Supreme Court's decision in *G.G. v. Gloucester County School Board*.
- Discussion and vote on a letter to the Department of Education and Department of Justice Re: The Oklahoma State Advisory Committee's Report "Civil Rights and the School-to-Prison Pipeline in Oklahoma."

- B. State Advisory Committees
- Presentation by North Carolina State Advisory Committee (SAC) Chair Matty Lazo-Chadderton on Civil Rights and Environmental Justice in North Carolina.
 - State Advisory Committee Appointments
 - North Carolina
 - Kansas
 - District of Columbia
 - Ohio
- C. Management and Operations
- Discussion and Vote on Commission 2017 Business Meeting Calendar.
 - Discussion on 2017 Commemoration of 60th Anniversary of USCCR.
 - Staff Director's Report.
- III. Adjourn Meeting

Dated: August 9, 2016.

Brian Walch,

Director of Communications & Public Engagement, U.S. Commission on Civil Rights.

BILLING CODE 6335-01-P

DEPARTMENT OF COMMERCE

National Telecommunications and Information Administration

First Responder Network Authority

[Docket Number: 160728668-6668-01]

RIN 0660-XC028

Notice of Availability of a Draft Programmatic Environmental Impact Statement for the Central Region of the Nationwide Public Safety Broadband Network and Notice of Public Meetings

AGENCY: First Responder Network Authority, National Telecommunications and Information Administration, U.S. Department of Commerce.

ACTION: Announcement of availability of a draft programmatic environmental impact statement and of public meetings.

SUMMARY: The First Responder Network Authority ("FirstNet") announces the availability of the Draft Programmatic Environmental Impact Statement for the Central Region ("Draft PEIS"). FirstNet also announces a series of public meetings to be held throughout the Central Region to receive comments on the Draft PEIS. The Draft PEIS evaluates the potential environmental impacts of the proposed nationwide public safety broadband network in the Central Region, composed of Colorado, Illinois,

Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Montana, Nebraska, North Dakota, Ohio, South Dakota, Utah, Wisconsin, and Wyoming.

DATES: Submit comments on the Draft PEIS for the Central Region on or before October 11, 2016. FirstNet will also hold public meetings in each of the 16 states. See **SUPPLEMENTARY INFORMATION** section for meeting dates.

ADDRESSES: At any time during the public comment period, members of the public, public agencies, and other interested parties are encouraged to submit written comments, questions, and concerns about the project for FirstNet's consideration or to attend any of the public meetings. Written comments may be submitted electronically via www.regulations.gov, FIRSTNET-2016-0003, or by mail to Genevieve Walker, Director of Environmental Compliance, First Responder Network Authority, National Telecommunications and Information Administration, U.S. Department of Commerce, 12201 Sunrise Valley Drive, M/S 243, Reston, VA 20192. Comments received will be made a part of the public record and may be posted to FirstNet's Web site (www.firstnet.gov) without change. Comments should be machine readable and should not be copy-protected. All personally identifiable information (e.g., name, address) voluntarily submitted by the commenter may be publicly accessible. Do not submit confidential business information or otherwise sensitive or protected information. The Draft PEIS is available for download from www.regulations.gov, FIRSTNET-2016-0003. A CD containing the electronic files of this document is also available at public libraries (see Chapter 24 of the Draft PEIS for the complete distribution list). See **SUPPLEMENTARY INFORMATION** section for public meeting addresses.

Background

The Middle Class Tax Relief and Job Creation Act of 2012 (Pub. L. 112–96, Title VI, 126 Stat. 156 (codified at 47 U.S.C. 1401 *et seq.*)) (the “Act”) created and authorized FirstNet to take all actions necessary to ensure the building, deployment, and operation of an interoperable, nationwide public safety broadband network (“NPSBN”) based on a single, national network architecture. The Act meets a longstanding and critical national infrastructure need, to create a single, nationwide network that will, for the first time, allow police officers, fire fighters, emergency medical service professionals, and other public safety entities to effectively communicate with each other across agencies and jurisdictions. The NPSBN is intended to enhance the ability of the public safety community to perform more reliably, effectively, and safely; increase situational awareness during an emergency; and improve the ability of the public safety community to effectively engage in those critical activities.

The National Environmental Policy Act of 1969 (42 U.S.C. 4321–4347) (“NEPA”) requires federal agencies to undertake an assessment of environmental effects of their proposed actions prior to making a final decision and implementing the action. NEPA requirements apply to any federal project, decision, or action that may have a significant impact on the quality of the human environment. NEPA also establishes the Council on Environmental Quality (“CEQ”), which issued regulations implementing the procedural provisions of NEPA (see 40 CFR parts 1500–1508). Among other considerations, CEQ regulations at 40 CFR 1508.28 recommend the use of *tiering* from a “broader environmental impact statement (such as a national program or policy statements) with subsequent narrower statements or environmental analysis (such as regional or basin wide statements or ultimately site-specific statements) incorporating by reference the general discussions and concentrating solely on the issues specific to the statement subsequently prepared.”

Due to the geographic scope of FirstNet (all 50 states, the District of Columbia, and five territories) and the diversity of ecosystems potentially traversed by the project, FirstNet has elected to prepare five regional PEISs. The five PEISs were divided into the East, Central, West, South, and Non-Contiguous Regions. The Central Region consists of Colorado, Illinois, Indiana,

Iowa, Kansas, Michigan, Minnesota, Missouri, Montana, Nebraska, North Dakota, Ohio, South Dakota, Utah, Wisconsin, and Wyoming. The Draft PEIS analyzes potential impacts of the deployment and operation of the NPSBN on the natural and human environment in the Central Region, in accordance with FirstNet’s responsibilities under NEPA.

Next Steps

All comments received by the public and any interested stakeholders will be evaluated and considered by FirstNet during the preparation of the Final PEIS. Once a PEIS is completed and a Record of Decision (ROD) is signed, FirstNet will evaluate site-specific documentation, as network design is developed, to determine if the proposed project has been adequately evaluated in the PEIS or warrants a Categorical Exclusion, an Environmental Assessment, or an Environmental Impact Statement.

Dated: August 9, 2016.

Genevieve Walker,

Director of Environmental Compliance, First Responder Network Authority.

International Trade Administration

[A–475–818]

Certain Pasta From Italy: Preliminary Results of Antidumping Duty Administrative Review; 2014–2015

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: In response to requests from interested parties, the Department of Commerce (the Department) is conducting an administrative review of the antidumping duty order on certain pasta (pasta) from Italy, covering the period July 1, 2014, through June 30, 2015. The initiation of the instant review covered 31 companies, and we have partially rescinded the review with respect to nine companies, as discussed below. Thus, this review covers two mandatory respondents, Industria Alimentare Colavita S.p.A. (Indalco) and Liguori Pastificio Dal 1820 (Liguori), and 19 non-selected companies. We preliminarily determine that Indalco and Liguori made sales of subject merchandise at less than normal value during the period of review (POR). Interested parties are invited to comment on these preliminary results.

DATES: Effective August 12, 2016.

FOR FURTHER INFORMATION CONTACT: Joy Zhang or George McMahon, AD/CVD Operations, Office III, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482–1168 or (202) 482–1167, respectively.

Background

On September 2, 2015, the Department published a notice of initiation of an administrative review of the antidumping order on pasta from Italy.¹ On December 24, 2015, the Department rescinded the instant review, in part, with respect to La Molisana SpA., Pasta Lenzi S.r.L., Pastificio Andalini S.p.A., Azienda Agricola Casina Rossa di De Laurentiis Nicola, Pastificio Bolognese di Angelo R. Dicuonzo, I Sapori dell’Arca S.r.l., La Romagna S.r.l., Ser.com.snc, and Vero Lucano S.r.l.²

As explained in the memorandum from the Acting Assistant Secretary for Enforcement and Compliance, the Department exercised its discretion to toll all administrative deadlines due to a closure of the Federal Government. As a result, the revised deadline for the preliminary results of this review was April 7, 2016.³ On March 17, 2016, the Department extended the deadline for the preliminary results to August 5, 2016.

Scope of the Order

Imports covered by the order are shipments of certain non-egg dry pasta. The merchandise subject to review is currently classifiable under items 1901.90.90.95 and 1902.19.20 of the Harmonized Tariff Schedule of the United States (HTSUS). Although the HTSUS subheadings are provided for convenience and customs purposes, the written description of the merchandise subject to the order is dispositive.⁴

¹ See *Initiation of Antidumping and Countervailing Duty Administrative Reviews*, 80 FR 53106 (September 2, 2015) (*Initiation Notice*).

² See *Certain Pasta From Italy: Notice of Partial Rescission of Antidumping Duty Administrative Review*, 80 FR 80320 (December 24, 2015).

³ See Memorandum to the Record from Ron Lorentzen, Acting Assistant Secretary for Enforcement & Compliance, regarding “Tolling of Administrative Deadlines As a Result of the Government Closure During Snowstorm ‘Jonas,’” dated January 27, 2016. If the new deadline falls on a non-business day, in accordance with the Department’s practice, the deadline will become the next business day.

⁴ For a full description of the scope of the order, see the “Decision Memorandum for the Preliminary Results of Antidumping Duty Administrative Review: Certain Pasta From Italy; 2014–2015,” from Christian Marsh, Deputy Assistant Secretary for

Methodology

The Department is conducting this review in accordance with section 751(a)(2) of the Tariff Act of 1930, as amended (the Act). Constructed export price or export price is calculated in accordance with section 772 of the Act. Normal value is calculated in accordance with section 773 of the Act. For a full description of the methodology underlying our preliminary results, see Preliminary Decision Memorandum dated concurrently with this notice and hereby adopted by this notice. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at <http://access.trade.gov> and is available to all parties in the Central Records Unit, room B8024 of the main Department of Commerce building. In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly on the internet at <http://enforcement.trade.gov/frn/index.html>. The signed Preliminary Decision Memorandum and the electronic version of the Preliminary Decision Memorandum are identical in content.

Preliminary Results of the Review

As a result of this review, the Department calculated a weighted-average dumping margin of 2.14 percent for Indalco and 5.74 percent for Liguori for the period July 1, 2014, through June 30, 2015. Therefore, in accordance with section 735(c)(5)(A) of the Act, the Department assigned the weighted-average of these two calculated weighted-average dumping margins, 3.19 percent, to the 19 non-selected companies in these preliminary results, as referenced below.⁵

Antidumping and Countervailing Duty Operations, to Ronald Lorentzen, Acting Assistant Secretary for Enforcement and Compliance, dated concurrently with this notice (Preliminary Decision Memorandum).

⁵ The rate applied to the non-selected companies is a weighted-average percentage margin calculated based on the publicly-ranged U.S. volumes of the two reviewed companies with an affirmative dumping margin, for the period July 1, 2014, through June 30, 2015. See Memorandum to the File titled, "Certain Pasta From Italy: Margin for Respondents Not Selected for Individual Examination," dated concurrently with this notice.

Producer and/or exporter	Weighted-average dumping margin (percent)
Industria Alimentare Colavita S.p.A. (Indalco)	2.14
Liguori Pastificio Dal 1820 (Liguori) ⁶	5.74
Agritalia S.r.L. (Agritalia)	3.19
Atar S.r.L. (Atar)	3.19
Corticella Molini e Pastifici S.p.A. (Corticella)	3.19
Delverde Industrie Alimentari S.p.A. (Delverde)	3.19
Domenico Paone fu Erasmo S.p.A. (Domenico)	3.19
F. Divella S.p.A. (F. Divella)	3.19
La Fabbrica della Pasta di Gagnano S.a.s. di Antonio Moccia (La Fabbrica)	3.19
Molino e Pastificio Tomasello S.r.L. (Tomasello)	3.19
P.A.P SNC DI Paziienza G.B. & C. (P.A.P)	3.19
Pasta Zara S.p.A. (Pasta Zara) ..	3.19
Pastificio Carmine Russo S.p.A. (Carmine)	3.19
Pastificio DiMartino Gaetano & F. Ili S.r.L. (DiMartino)	3.19
Pastificio Fabianelli S.p.A. (Fabianelli)	3.19
Pastificio Felicetti S.r.L. (Felicetti)	3.19
Pastificio Labor S.r.L. (Labor)	3.19
Pastificio Riscossa F. Ili Mastromauro S.p.A. (AKA Pastificio Riscossa F. Ili. Mastromauro S.r.L.) (Riscossa)	3.19
Poiatti S.p.A. (Poiatti)	3.19
Premiato Pastificio Afreltra S.r. L. (Premiato)	3.19
Rustichella d'Abruzzo S.p.A. (Rustichella)	3.19

Assessment Rate

Upon issuance of the final results, the Department shall determine, and CBP shall assess, antidumping duties on all

⁶ The Department previously found that Liguori and PAM are affiliated and calculated a margin for the consolidated entity. See, e.g., *Notice of Preliminary Results And Partial Rescission Of Antidumping Duty Administrative Review And Intent To Revoke The Antidumping Duty Order In Part*, 66 FR 34414 (June 28, 2001) unchanged in *Notice of Final Results of Antidumping Duty Administrative Review, Partial Rescission of Antidumping Duty Administrative Review and Revocation of Antidumping Duty Order in Part: Certain Pasta From Italy*, 67 FR 300 (January 3, 2002). In the instant review, Liguori reported that PAM ceased its operations as of October 24, 2014, and that PAM did not make any sales of subject merchandise to the United States during the POR. See Liguori's Section A questionnaire response dated December 4, 2015 at 2. We intend to follow-up with Customs and Border Protection (CBP) concerning Liguori's statement subsequent to these preliminary results and to allow interested parties an opportunity to comment on any information received from CBP. Therefore, for purposes of these preliminary results, we have preliminarily assigned PAM the same rate as Liguori, rather than making a preliminary no shipments determination with respect to PAM.

appropriate entries covered by this review. If the weighted-average dumping margin for Indalco or Liguori is not zero or *de minimis* (i.e., less than 0.5 percent), we will calculate importer-specific *ad valorem* antidumping duty assessment rates based on the ratio of the total amount of dumping calculated for the importer's examined sales to the total entered value of those same sales in accordance with 19 CFR 351.212(b)(1). We will instruct CBP to assess antidumping duties on all appropriate entries covered by this review when the importer-specific assessment rate calculated in the final results of this review is not zero or *de minimis*. Where either the respondent's weighted-average dumping margin is zero or *de minimis*, or an importer-specific assessment rate is zero or *de minimis*, we will instruct CBP to liquidate the appropriate entries without regard to antidumping duties. The final results of this review shall be the basis for the assessment of antidumping duties on entries of merchandise covered by the final results of this review where applicable.

In accordance with the Department's "automatic assessment" practice, for entries of subject merchandise during the POR produced by each respondent for which they did not know that their merchandise was destined for the United States, we will instruct CBP to liquidate unreviewed entries at the all-others rate if there is no rate for the intermediate company(ies) involved in the transaction.

We intend to issue instructions to CBP 15 days after publication of the final results of this review.

Cash Deposit Requirements

The following cash deposit requirements will be effective upon publication of the notice of final results of administrative review for all shipments of subject merchandise entered, or withdrawn from warehouse, for consumption on or after the publication of the final results of this administrative review, as provided by section 751(a)(2) of the Act: (1) The cash deposit rate for respondents noted above will be the rate established in the final results of this administrative review; (2) for merchandise exported by producers or exporters not covered in this administrative review but covered in a prior segment of the proceeding, the cash deposit rate will continue to be the company-specific rate published for the most recently completed segment of this proceeding; (3) if the exporter is not a firm covered in this review, a prior review, or the original investigation, but the producer is, the cash deposit rate

will be the rate established for the most recently completed segment of this proceeding for the producer of the subject merchandise; and (4) the cash deposit rate for all other producers or exporters will continue to be 15.45 percent, the all-others rate established in the antidumping investigation as modified by the section 129 determination.⁷ These cash deposit requirements, when imposed, shall remain in effect until further notice.

Disclosure and Public Comment

The Department will disclose to parties to this proceeding the calculations performed in reaching the preliminary results within five days of the date of publication of these preliminary results.⁸ Pursuant to 19 CFR 351.309(c), interested parties may submit cases briefs not later than 30 days after the date of publication of this notice. Rebuttal briefs, limited to issues raised in the case briefs, may be filed not later than five days after the date for filing case briefs.⁹ Parties who submit comments are requested to submit: (1) A statement of the issue; (2) a brief summary of the argument; and (3) a table of authorities. All briefs must be filed electronically using ACCESS. An electronically filed document must be received successfully in its entirety by the Department's electronic records system, ACCESS.

Interested parties who wish to request a hearing must submit a written request to the Assistant Secretary for Enforcement and Compliance, U.S. Department of Commerce, using Enforcement and Compliance's ACCESS system within 30 days of publication of this notice.¹⁰ Requests should contain the party's name, address, and telephone number, the number of participants, and a list of the issues to be discussed. If a request for a hearing is made, we will inform parties of the scheduled date for the hearing which will be held at the U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230, at a time and location to be determined.¹¹ Parties should confirm by telephone the date, time, and location of the hearing.

Unless the deadline is extended pursuant to section 751(a)(2)(B)(iv) of the Act, the Department will issue the

final results of this administrative review, including the results of our analysis of the issues raised by the parties in their case briefs, within 120 days after issuance of these preliminary results.

Notification to Importers

This notice serves as a preliminary reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and increase the subsequent assessment of the antidumping duties by the amount of antidumping duties reimbursed.

These preliminary results of review are issued and published in accordance with sections 751(a)(1) and 777(i)(1) of the Act.

Dated: August 5, 2016.

Ronald Lorentzen,

Acting Assistant Secretary for Enforcement and Compliance.

International Trade Administration

[A-602-809]

Certain Hot-Rolled Steel Flat Products From Australia: Final Determination of Sales at Less Than Fair Value

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce determines that certain hot-rolled steel flat products from Australia are being, or are likely to be, sold in the United States at less than fair value. The period of investigation is July 1, 2014, through June 30, 2015. The final estimated weighted-average dumping margins are listed below in the "Final Determination" section of this notice.

DATES: Effective August 12, 2016.

FOR FURTHER INFORMATION CONTACT: Frances Veith, AD/CVD Operations, Office V, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482-4295.

SUPPLEMENTARY INFORMATION:

Background

The Department of Commerce (the "Department") published the preliminary determination on March 22, 2016.¹ A summary of the events that occurred since the Department published the *Preliminary Determination*, as well as a full discussion of the issues raised by parties for this final determination, may be found in the final Issues and Decision Memorandum.²

Scope of the Investigation

The products covered by this investigation are certain hot-rolled steel flat products ("hot-rolled steel") from Australia. For a full description of the scope of this investigation, see the "Scope of the Investigation," in Appendix II of this notice.

¹ See *Certain Hot-Rolled Steel Flat Products from Australia: Preliminary Determination of Sales at Less Than Fair Value and Postponement of Final Determination*, 81 FR 15241 (March 22, 2016) ("Preliminary Determination") and accompanying Preliminary Decision Memorandum.

² See Memorandum from Christian Marsh, Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, to Ronald K. Lorentzen, Acting Assistant Secretary for Enforcement and Compliance, "Issues and Decision Memorandum for the Final Affirmative Determination in the Antidumping Duty Investigation of Certain Hot-Rolled Steel Flat Products from Australia," ("Issues and Decision Memorandum"), dated concurrently with this determination and hereby adopted by this notice.

⁷ See *Implementation of the Findings of the WTO Panel in US—Zeroing (EC): Notice of Determinations Under Section 129 of the Uruguay Round Agreements Act and Revocations and Partial Revocations of Certain Antidumping Duty Orders*, 72 FR 25261 (May 4, 2007).

⁸ See 19 CFR 351.224(b).

⁹ See 19 CFR 351.309(d).

¹⁰ See 19 CFR 351.310(c).

¹¹ See 19 CFR 351.310.

Analysis of Comments Received

All issues raised in the case and rebuttal briefs by parties in this investigation are addressed in the Issues and Decision Memorandum, which is hereby adopted by this notice.³ A list of the issues raised is attached to this notice as Appendix I. The Issues and Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System ("ACCESS"). ACCESS is available to registered users at <https://access.trade.gov> and it is available to all parties in the Central Records Unit, Room B-8024 of the main Department of Commerce building. In addition, a complete version of the Issues and Decision Memorandum can be accessed directly at <http://enforcement.trade.gov/frn/>. The signed and electronic versions of the Final Issues and Decision Memorandum are identical in content.

Verification

As provided in section 782(i) of the Tariff Act of 1930, as amended ("the Act"), in April and May 2016, the Department verified the sales and cost data reported by the mandatory respondents BlueScope Steel Ltd. ("BlueScope"). We used standard verification procedures, including an examination of relevant accounting and production records, and original source documents provided by BlueScope.

Changes to the Margin Calculations Since the Preliminary Determination

Based on our analysis of comments received and our findings at verification, we made certain changes to the margin calculations for BlueScope. For a discussion of these changes, see the Issues and Decision Memorandum. We have also revised the all-others rate.

Single Entity Treatment

For the reasons set forth in the Preliminary Decision Memorandum and in accordance with 19 CFR 351.401(f) and the Department's practice, we are continuing to treat BlueScope Steel Ltd., BlueScope Steel (AIS) Pty Ltd., and BlueScope Steel Distribution Pty Ltd. as a single entity, BlueScope, for the purposes of this final determination.⁴

All-Others Rate

Consistent with sections 735(c)(1)(B)(i)(II) and 735(c)(5) of the Act, the Department also calculated an estimated all-others rate. Section

735(c)(5)(A) of the Act provides that the estimated all-others rate shall be an amount equal to the weighted average of the estimated weighted-average dumping margins established for exporters and producers individually investigated, excluding any zero and *de minimis* margins, and any margins determined entirely under section 776 of the Act. Where the rates for investigated companies are zero or *de minimis*, or based entirely on facts otherwise available, section 735(c)(5)(B) of the Act instructs the Department to establish an "all others" rate using "any reasonable method."

BlueScope is the only respondent for which the Department calculated a company-specific rate. Therefore, for purposes of determining the "all others" rate and pursuant to section 735(d)(5)(A) of the Act, we are using the dumping margin calculated for BlueScope, as referenced in the "Final Determination" section below.

Final Determination

The Department determines that the following weighted-average dumping margins exist:

Exporter/producer	Weighted-average dumping margin (percent)
BlueScope Steel Ltd., BlueScope Steel (AIS) Pty Ltd., and BlueScope Steel Distribution Pty Ltd	29.37
All Others	29.37

Disclosure

We intend to disclose to parties in this proceeding the calculations performed for this final determination within five days of the date of public announcement of our final determination, in accordance with 19 CFR 351.224(b).

Continuation of Suspension of Liquidation

In accordance with section 735(c)(1)(B) of the Act, we are directing U.S. Customs and Border Protection ("CBP") to continue to suspend liquidation of all entries of hot-rolled steel from Australia, as described in the Scope of the Investigation in Appendix II, entered, or withdrawn from warehouse, for consumption on or after March 22, 2016, the date of publication in the **Federal Register** of the affirmative *Preliminary Determination*.

International Trade Commission ("ITC") Notification

In accordance with section 735(d) of the Act, we are notifying the ITC of our affirmative final determination of sales at less than fair value ("LTFV"). Because the final determination in this proceeding is affirmative, in accordance with section 735(b)(2) of the Act, the ITC will make its final determination as to whether the domestic industry in the United States is materially injured, or threatened with material injury, by reason of imports of hot-rolled steel from Australia no later than 45 days after our final determination. If the ITC determines that material injury or threat of material injury does not exist, the proceeding will be terminated and all cash deposits will be refunded. If the ITC determines that such injury does exist, the Department will issue an antidumping duty order directing CBP to assess, upon further instruction by the Department, antidumping duties on all imports of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the effective date of the suspension of liquidation.

Notification Regarding Administrative Protective Orders ("APO")

This notice serves as a reminder to parties subject to APO of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely notification of the return or destruction of APO materials, or conversion to judicial protective order, is hereby requested. Failure to comply with the regulations and the terms of an APO is a violation subject to sanction.

This determination is issued and published in accordance with sections 735(d) and 777(i)(1) of the Act, and 19 CFR 351.210(c).

Dated: August 4, 2016.

Ronald K. Lorentzen,

Acting Assistant Secretary for Enforcement and Compliance.

Scope of the Investigation

The products covered by this investigation are certain hot-rolled, flat-rolled steel products, with or without patterns in relief, and whether or not annealed, painted, varnished, or coated with plastics or other non-metallic substances. The products covered do not include those that are clad, plated, or coated with metal. The products covered include coils that have a width or other lateral measurement (“width”) of 12.7 mm or greater, regardless of thickness, and regardless of form of coil (e.g., in successively superimposed layers, spirally oscillating, etc.). The products covered also include products not in coils (e.g., in straight lengths) of a thickness of less than 4.75 mm and a width that is 12.7 mm or greater and that measures at least 10 times the thickness. The products described above may be rectangular, square, circular, or other shape and include products of either rectangular or non-rectangular cross-section where such cross-section is achieved subsequent to the rolling process, i.e., products which have been “worked after rolling” (e.g., products which have been beveled or rounded at the edges). For purposes of the width and thickness requirements referenced above:

(1) Where the nominal and actual measurements vary, a product is within the scope if application of either the nominal or actual measurement would place it within the scope based on the definitions set forth above unless the resulting measurement makes the product covered by the existing antidumping⁵ or countervailing duty⁶ orders on Certain Cut-To-Length Carbon-Quality Steel Plate Products From the Republic of Korea (A–580–836; C–580–837), and

(2) where the width and thickness vary for a specific product (e.g., the thickness of certain products with non-rectangular cross-section, the width of certain products with non-rectangular shape, etc.), the measurement at its greatest width or thickness applies.

Steel products included in the scope of this investigation are products in which: (1) Iron

⁵ Notice of Amendment of Final Determinations of Sales at Less Than Fair Value and Antidumping Duty Orders: Certain Cut-To-Length Carbon-Quality Steel Plate Products From France, India, Indonesia, Italy, Japan and the Republic of Korea, 65 FR 6585 (February 10, 2000).

⁶ Notice of Amended Final Determinations: Certain Cut-to-Length Carbon-Quality Steel Plate From India and the Republic of Korea; and Notice of Countervailing Duty Orders: Certain Cut-To-Length Carbon-Quality Steel Plate From France, India, Indonesia, Italy, and the Republic of Korea, 65 FR 6587 (February 10, 2000).

predominates, by weight, over each of the other contained elements; (2) the carbon content is 2 percent or less, by weight; and (3) none of the elements listed below exceeds the quantity, by weight, respectively indicated:

- 2.50 percent of manganese, or
- 3.30 percent of silicon, or
- 1.50 percent of copper, or
- 1.50 percent of aluminum, or
- 1.25 percent of chromium, or
- 0.30 percent of cobalt, or
- 0.40 percent of lead, or
- 2.00 percent of nickel, or
- 0.30 percent of tungsten, or
- 0.80 percent of molybdenum, or
- 0.10 percent of niobium, or
- 0.30 percent of vanadium, or
- 0.30 percent of zirconium.

Unless specifically excluded, products are included in this scope regardless of levels of boron and titanium.

For example, specifically included in this scope are vacuum degassed, fully stabilized (commonly referred to as interstitial-free (IF)) steels, high strength low alloy (HSLA) steels, the substrate for motor lamination steels, Advanced High Strength Steels (AHSS), and Ultra High Strength Steels (UHSS). IF steels are recognized as low carbon steels with micro-alloying levels of elements such as titanium and/or niobium added to stabilize carbon and nitrogen elements. HSLA steels are recognized as steels with micro-alloying levels of elements such as chromium, copper, niobium, titanium, vanadium, and molybdenum. The substrate for motor lamination steels contains micro-alloying levels of elements such as silicon and aluminum. AHSS and UHSS are considered high tensile strength and high elongation steels, although AHSS and UHSS are covered whether or not they are high tensile strength or high elongation steels.

Subject merchandise includes hot-rolled steel that has been further processed in a third country, including but not limited to pickling, oiling, levelling, annealing, tempering, temper rolling, skin passing, painting, varnishing, trimming, cutting, punching, and/or slitting, or any other processing that would not otherwise remove the merchandise from the scope of the investigation if performed in the country of manufacture of the hot-rolled steel.

All products that meet the written physical description, and in which the chemistry quantities do not exceed any one of the noted element levels listed above, are within the scope of this investigation unless specifically excluded. The following products are outside of and/or specifically excluded from the scope of this investigation:

- Universal mill plates (i.e., hot-rolled, flat-rolled products not in coils that have been rolled on four faces or in a closed box pass, of a width exceeding 150 mm but not exceeding 1250 mm, of a thickness not less than 4.0 mm, and without patterns in relief);
- Products that have been cold-rolled (cold-reduced) after hot-rolling;⁷

⁷ For purposes of this scope exclusion, rolling operations such as a skin pass, levelling, temper rolling or other minor rolling operations after the hot-rolling process for purposes of surface finish,

- Ball bearing steels;⁸
- Tool steels;⁹ and
- Silico-manganese steels;¹⁰

The products subject to this investigation are currently classified in the Harmonized Tariff Schedule of the United States (HTSUS) under item numbers: 7208.10.1500, 7208.10.3000, 7208.10.6000, 7208.25.3000, 7208.25.6000, 7208.26.0030, 7208.26.0060, 7208.27.0030, 7208.27.0060, 7208.36.0030, 7208.36.0060, 7208.37.0030, 7208.37.0060, 7208.38.0015, 7208.38.0030, 7208.38.0090, 7208.39.0015, 7208.39.0030, 7208.39.0090, 7208.40.6030, 7208.40.6060, 7208.53.0000, 7208.54.0000, 7208.90.0000, 7210.70.3000, 7211.14.0030, 7211.14.0090, 7211.19.1500, 7211.19.2000, 7211.19.3000, 7211.19.4500, 7211.19.6000, 7211.19.7530, 7211.19.7560, 7211.19.7590, 7225.11.0000, 7225.19.0000, 7225.30.3050, 7225.30.7000, 7225.40.7000, 7225.99.0090, 7226.11.1000, 7226.11.9030, 7226.11.9060, 7226.19.1000, 7226.19.9000, 7226.91.5000, 7226.91.7000, and 7226.91.8000. The products subject to the investigation may also enter under the following HTSUS numbers: 7210.90.9000, 7211.90.0000, 7212.40.1000, 7212.40.5000, 7212.50.0000, 7214.91.0015, 7214.91.0060, 7214.91.0090, 7214.99.0060, 7214.99.0075, 7214.99.0090, 7215.90.5000, 7226.99.0180, and 7228.60.6000.

The HTSUS subheadings above are provided for convenience and U.S. Customs purposes only. The written description of the scope of the investigation is dispositive.

[FR Doc. 2016–19375 Filed 8–11–16; 8:45 am]

BILLING CODE 3510–DS–P

flatness, shape control, or gauge control do not constitute cold-rolling sufficient to meet this exclusion.

⁸ Ball bearing steels are defined as steels which contain, in addition to iron, each of the following elements by weight in the amount specified: (i) Not less than 0.95 nor more than 1.13 percent of carbon; (ii) not less than 0.22 nor more than 0.48 percent of manganese; (iii) none, or not more than 0.03 percent of sulfur; (iv) none, or not more than 0.03 percent of phosphorus; (v) not less than 0.18 nor more than 0.37 percent of silicon; (vi) not less than 1.25 nor more than 1.65 percent of chromium; (vii) none, or not more than 0.28 percent of nickel; (viii) none, or not more than 0.38 percent of copper; and (ix) none, or not more than 0.09 percent of molybdenum.

⁹ Tool steels are defined as steels which contain the following combinations of elements in the quantity by weight respectively indicated: (i) More than 1.2 percent carbon and more than 10.5 percent chromium; or (ii) not less than 0.3 percent carbon and 1.25 percent or more but less than 10.5 percent chromium; or (iii) not less than 0.85 percent carbon and 1 percent to 1.8 percent, inclusive, manganese; or (iv) 0.9 percent to 1.2 percent, inclusive, chromium and 0.9 percent to 1.4 percent, inclusive, molybdenum; or (v) not less than 0.5 percent carbon and not less than 3.5 percent molybdenum; or (vi) not less than 0.5 percent carbon and not less than 5.5 percent tungsten.

¹⁰ Silico-manganese steel is defined as steels containing by weight: (i) Not more than 0.7 percent of carbon; (ii) 0.5 percent or more but not more than 1.9 percent of manganese, and (iii) 0.6 percent or more but not more than 2.3 percent of silicon.

DEPARTMENT OF COMMERCE**International Trade Administration**

[A–588–874]

Certain Hot-Rolled Steel Flat Products From Japan: Final Determination of Sales at Less Than Fair Value and Final Affirmative Determination of Critical Circumstances

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (the Department) determines that certain hot-rolled steel flat products (hot-rolled steel) from Japan are being, or are likely to be, sold in the United States at less than fair value (LTFV). The period of investigation (POI) is July 1, 2014, through June 30, 2015. The final dumping margins of sales at LTFV are listed below in the “Final Determination” section of this notice.

DATES: Effective August 12, 2016.

FOR FURTHER INFORMATION CONTACT:

Myrna Lobo or Jun Jack Zhao, AD/CVD Operations, Office VII, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482–2371 or (202) 482–1396, respectively.

SUPPLEMENTARY INFORMATION:**Background**

On March 22, 2016, the Department published the *Preliminary Determination* of this antidumping duty (AD) investigation.¹ A summary of the events that occurred since the Department published the *Preliminary Determination*, as well as a full discussion of the issues raised by parties for this final determination, may be found in the Final Issues and Decision Memorandum.²

Scope of the Investigation

The products covered by this investigation are hot-rolled steel flat

products from Japan. For a full description of the scope of this investigation, see the “Scope of the Investigation,” in Appendix I of this notice.

Scope Comments

In the Preliminary Scope Decision Memorandum,³ the Department set aside a period of time for parties to address scope issues in case briefs or other written comments on scope issues.

In the *Preliminary Determination*, we did not modify the scope language as it appeared in the *Initiation Notice*.⁴ No interested parties submitted scope comments, except for Nippon Steel & Sumitomo Metal Corporation/Nippon Steel & Sumikin Bussan Corporation (collectively, the Nippon Group) in its case brief and petitioner United States Steel Corporation in its rebuttal brief. These comments are addressed in the Final Issues and Decision Memorandum. The scope of this investigation remains unchanged for this final determination.

Analysis of Comments Received

All issues raised in the case and rebuttal briefs by parties in this investigation are addressed in the Final Issues and Decision Memorandum, which is hereby adopted by this notice.⁵ A list of the issues raised is attached to this notice as Appendix II. The Final Issues and Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance’s Antidumping and Countervailing Duty Centralized Electronic Service System (“ACCESS”). ACCESS is available to registered users at <https://access.trade.gov> and it is available to all parties in the Central Records Unit, Room B–8024 of the main Department of Commerce building. In addition, a complete version of the Final Issues and Decision Memorandum can be accessed directly at <http://enforcement.trade.gov/frn/index.html>. The signed and electronic versions of

the Final Issues and Decision Memorandum are identical in content.

Verification

As provided in section 782(i) of the Tariff Act of 1930, as amended (the Act), in March, April, and May 2016, the Department verified the sales and cost data reported by the mandatory respondents and their affiliates Nippon Steel & Sumitomo Metal Corporation/Nippon Steel & Sumikin Bussan Corporation (collectively, the Nippon Group) and JFE Steel Corporation/JFE Shoji Trade Corporation (collectively, the JFE Group). We used standard verification procedures, including an examination of relevant accounting and production records, and original source documents provided by respondents.

Changes Since the Preliminary Determination

Based on our analysis of the comments received and our findings at verification, we made certain changes to the margin calculations for the Nippon Group and the JFE Group. For a discussion of these changes, see the Final Issues and Decision Memorandum. We have also revised the all-others rate consistent with the methodology described below.

All-Others Rate

Consistent with sections 735(c)(1)(B)(i)(II) and 735(c)(5) of the Act, the Department also calculated an estimated all-others rate. Section 735(c)(5)(A) of the Act provides that the estimated all-others rate shall be an amount equal to the weighted average of the estimated weighted-average dumping margins established for exporters and producers individually investigated, excluding any zero and *de minimis* margins, and any margins determined entirely under section 776 of the Act. We calculated weighted-average dumping margins for the Nippon Group and the JFE Group, that are above *de minimis* and which are not based on total facts available. Therefore, we calculated the all-others rate using a weighted-average of the dumping margins calculated for the mandatory respondents using each company’s publicly-ranged values for the merchandise under consideration.⁶

⁶ With two respondents, we would normally calculate (A) a weighted-average of the dumping margins calculated for the mandatory respondents; (B) a simple average of the dumping margins calculated for the mandatory respondents; and (C) a weighted-average of the dumping margins calculated for the mandatory respondents using each company’s publicly-ranged values for the merchandise under consideration. We would compare (B) and (C) to (A) and select the rate closest

² See Memorandum from Christian Marsh, Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, to Ronald K. Lorentzen, Acting Assistant Secretary for Enforcement and Compliance, “Issues and Decision Memorandum for the Final Affirmative Determination in the Antidumping Duty Investigation of Certain Hot-Rolled Steel Flat Products from Japan,” (Final Issues and Decision Memorandum), dated concurrently with this determination and hereby adopted by this notice.

³ See Memorandum to Christian Marsh, Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, “Certain Hot-Rolled Steel Products From Australia, Brazil, Japan, the Netherlands, the Republic of Korea, Turkey, and the United Kingdom: Scope Comments Decision Memorandum for the Preliminary Determinations” dated March 14, 2016 (Preliminary Scope Decision Memorandum).

⁴ See Preliminary Decision Memorandum at page 5. See also *Certain Hot-Rolled Steel Flat Products From Australia, Brazil, Japan, the Republic of Korea, the Netherlands, The Republic of Turkey, and the United Kingdom: Initiation of Less-Than-Fair-Value Investigations*, 80 FR 54261, 54262 (September 9, 2015) (*Initiation Notice*).

⁵ See Final Issues and Decision Memorandum.

Final Determination

The Department determines that the final weighted-average dumping margins are as follows:

Exporter/producer	Weighted-average dumping margins (percent)
Nippon Steel & Sumitomo Metal Corporation/Nippon Steel & Sumikin Bussan Corporation ..	4.99
JFE Steel Corporation/JFE Shoji Trade Corporation	7.51
All-Others	5.58

Final Affirmative Determination of Critical Circumstances, in Part

Prior to the *Preliminary Determination*, the Department found that critical circumstances exist with respect to imports of hot-rolled steel from Japan produced or exported by the Nippon Group and the JFE Group and that critical circumstances did not exist with respect to all-other producers/exporters.⁷ As discussed in the Final Issues and Decision Memorandum, in accordance with section 735(a)(3) of the Act, we no longer find critical circumstances with respect to the JFE Group, and we now find that critical circumstances exist with respect to all-other producers/exporters. We continue to find that critical circumstances exist with respect to the Nippon Group.⁸

Disclosure

We intend to disclose the calculations performed to interested parties within five days of the public announcement of this final determination in accordance with 19 CFR 351.224(b).

Continuation of Suspension of Liquidation

Pursuant to section 735(c)(1)(B) of the Act, the Department will instruct U.S. Customs and Border Protection (CBP) to continue to suspend liquidation of all

entries of hot-rolled steel from Japan, which were entered, or withdrawn from warehouse, for consumption on or after December 23, 2015 (for those entities for which we found critical circumstances exist) or on or after March 22, 2016, the date of publication in the **Federal Register** of the affirmative *Preliminary Determination* (for all entities for which we did not find critical circumstances exist). Because we find in this final determination that critical circumstances exist for all-other producers/exporters, we will instruct CBP to suspend liquidation of all such entries on or after December 23, 2015 (which is 90 days prior to the publication of the *Preliminary Determination*) consistent with section 735(c)(4)(B) of the Act and require cash deposits. Further, because we find critical circumstances do not exist for the JFE Group, we will terminate the retroactive suspension of liquidation ordered at the *Preliminary Determination* and release any cash deposits that were required during that period, consistent with section 735(c)(3) of the Act.

Further, pursuant to section 735(c)(1)(B)(ii) of the Act, CBP shall require a cash deposit equal to the estimated amount by which the normal value exceeds the U.S. price, as follows: (1) For the exporter/producer listed in the table above, the cash deposit rate will be equal to the weighted average dumping margin which the Department determined in this final determination; (2) if the exporter is not a firm identified in this investigation but the producer is, the rate will be the rate established for the producer of the subject merchandise; (3) the rate for all other producers or exporters will be 5.58 percent, as discussed in the “All-Others Rate” section, above. These instructions suspending liquidation will remain in effect until further notice.

U.S. International Trade Commission Notification

In accordance with section 735(d) of the Act, we will notify the U.S. International Trade Commission (ITC) of the final affirmative determination of sales at LTFV. Because the final determination in this proceeding is affirmative, in accordance with section 735(b)(2) of the Act, the ITC will make its final determination as to whether the domestic industry in the United States is materially injured, or threatened with material injury, by reason of imports of hot-rolled steel from Japan no later than 45 days after our final determination. If the ITC determines that material injury or threat of material injury does not exist, the proceeding will be terminated

and all cash deposits will be refunded. If the ITC determines that such injury does exist, the Department will issue an antidumping duty order directing CBP to assess, upon further instruction by the Department, antidumping duties on all imports of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the effective date of the suspension of liquidation, as discussed above in the “Continuation of Suspension of Liquidation” section.

Notification Regarding Administrative Protective Orders

This notice serves as a reminder to parties subject to an administrative protective order (APO) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely notification of the return or destruction of APO materials, or conversion to judicial protective order, is hereby requested. Failure to comply with the regulations and the terms of an APO is a violation subject to sanction.

This determination and this notice are issued and published pursuant to sections 735(d) and 777(i)(1) of the Act.

Dated: August 4, 2016.

Ronald K. Lorentzen,

Acting Assistant Secretary for Enforcement and Compliance.

Appendix I—Scope of the Investigation

The products covered by this investigation are certain hot-rolled, flat-rolled steel products, with or without patterns in relief, and whether or not annealed, painted, varnished, or coated with plastics or other non-metallic substances. The products covered do not include those that are clad, plated, or coated with metal. The products covered include coils that have a width or other lateral measurement (“width”) of 12.7 mm or greater, regardless of thickness, and regardless of form of coil (*e.g.*, in successively superimposed layers, spirally oscillating, etc.). The products covered also include products not in coils (*e.g.*, in straight lengths) of a thickness of less than 4.75 mm and a width that is 12.7 mm or greater and that measures at least 10 times the thickness. The products described above may be rectangular, square, circular, or other shape and include products of either rectangular or non-rectangular cross-section where such cross-section is achieved subsequent to the rolling process, *i.e.*, products which have been “worked after rolling” (*e.g.*, products which have been beveled or rounded at the edges). For purposes of the width and thickness requirements referenced above:

(1) Where the nominal and actual measurements vary, a product is within the scope if application of either the nominal or actual measurement would place it within the scope based on the definitions set forth above unless the resulting measurement makes the product covered by the existing

to (A) as the most appropriate rate for all other companies. See *Ball Bearings and Parts Thereof From France, Germany, Italy, Japan, and the United Kingdom: Final Results of Antidumping Duty Administrative Reviews, Final Results of Changed-Circumstances Review, and Revocation of an Order in Part*, 75 FR 53661, 53663 (September 1, 2010). See Memorandum to the File, “Hot-Rolled Steel Flat Products from Japan: Calculation of the Margin for All Others Rate for the Final Determination,” dated August 4, 2016.

⁷ See *Antidumping Duty Investigations of Certain Hot-Rolled Steel Flat Products From Australia, Brazil, Japan, and the Netherlands and Countervailing Duty Investigation of Certain Hot-Rolled Steel Flat Products from Brazil: Preliminary Determinations of Critical Circumstances*, 80 FR 76444 (December 9, 2015).

⁸ For a full description of the methodology and results of our analysis, see the Final Issues and Decision Memorandum.

antidumping⁹ or countervailing duty¹⁰ orders on Certain Cut-To-Length Carbon-Quality Steel Plate Products From the Republic of Korea (A-580-836; C-580-837), and

(2) Where the width and thickness vary for a specific product (e.g., the thickness of certain products with non-rectangular cross-section, the width of certain products with non-rectangular shape, etc.), the measurement at its greatest width or thickness applies.

Steel products included in the scope of this investigation are products in which: (1) Iron predominates, by weight, over each of the other contained elements; (2) the carbon content is 2 percent or less, by weight; and (3) none of the elements listed below exceeds the quantity, by weight, respectively indicated:

- 2.50 percent of manganese, or
- 3.30 percent of silicon, or
- 1.50 percent of copper, or
- 1.50 percent of aluminum, or
- 1.25 percent of chromium, or
- 0.30 percent of cobalt, or
- 0.40 percent of lead, or
- 2.00 percent of nickel, or
- 0.30 percent of tungsten, or
- 0.80 percent of molybdenum, or
- 0.10 percent of niobium, or
- 0.30 percent of vanadium, or
- 0.30 percent of zirconium.

Unless specifically excluded, products are included in this scope regardless of levels of boron and titanium.

For example, specifically included in this scope are vacuum degassed, fully stabilized (commonly referred to as interstitial-free (IF)) steels, high strength low alloy (HSLA) steels, the substrate for motor lamination steels, Advanced High Strength Steels (AHSS), and Ultra High Strength Steels (UHSS). IF steels are recognized as low carbon steels with micro-alloying levels of elements such as titanium and/or niobium added to stabilize carbon and nitrogen elements. HSLA steels are recognized as steels with micro-alloying levels of elements such as chromium, copper, niobium, titanium, vanadium, and molybdenum. The substrate for motor lamination steels contains micro-alloying levels of elements such as silicon and aluminum. AHSS and UHSS are considered high tensile strength and high elongation steels, although AHSS and UHSS are covered whether or not they are high tensile strength or high elongation steels.

Subject merchandise includes hot-rolled steel that has been further processed in a third country, including but not limited to pickling, oiling, levelling, annealing, tempering, temper rolling, skin passing,

painting, varnishing, trimming, cutting, punching, and/or slitting, or any other processing that would not otherwise remove the merchandise from the scope of the investigation if performed in the country of manufacture of the hot-rolled steel.

All products that meet the written physical description, and in which the chemistry quantities do not exceed any one of the noted element levels listed above, are within the scope of this investigation unless specifically excluded. The following products are outside of and/or specifically excluded from the scope of this investigation:

- Universal mill plates (i.e., hot-rolled, flat-rolled products not in coils that have been rolled on four faces or in a closed box pass, of a width exceeding 150 mm but not exceeding 1250 mm, of a thickness not less than 4.0 mm, and without patterns in relief);
- Products that have been cold-rolled (cold-reduced) after hot-rolling;¹¹
- Ball bearing steels;¹²
- Tool steels;¹³ and
- Silico-manganese steels;¹⁴

The products subject to this investigation are currently classified in the Harmonized Tariff Schedule of the United States (HTSUS) under item numbers: 7208.10.1500, 7208.10.3000, 7208.10.6000, 7208.25.3000, 7208.25.6000, 7208.26.0030, 7208.26.0060, 7208.27.0030, 7208.27.0060, 7208.36.0030, 7208.36.0060, 7208.37.0030, 7208.37.0060, 7208.38.0015, 7208.38.0030, 7208.38.0090, 7208.39.0015, 7208.39.0030, 7208.39.0090, 7208.40.6030, 7208.40.6060, 7208.53.0000, 7208.54.0000, 7208.90.0000, 7210.70.3000, 7211.14.0030, 7211.14.0090, 7211.19.1500, 7211.19.2000, 7211.19.3000, 7211.19.4500,

¹¹ For purposes of this scope exclusion, rolling operations such as a skin pass, levelling, temper rolling or other minor rolling operations after the hot-rolling process for purposes of surface finish, flatness, shape control, or gauge control do not constitute cold-rolling sufficient to meet this exclusion.

¹² Ball bearing steels are defined as steels which contain, in addition to iron, each of the following elements by weight in the amount specified: (i) Not less than 0.95 nor more than 1.13 percent of carbon; (ii) not less than 0.22 nor more than 0.48 percent of manganese; (iii) none, or not more than 0.03 percent of sulfur; (iv) none, or not more than 0.03 percent of phosphorus; (v) not less than 0.18 nor more than 0.37 percent of silicon; (vi) not less than 1.25 nor more than 1.65 percent of chromium; (vii) none, or not more than 0.28 percent of nickel; (viii) none, or not more than 0.38 percent of copper; and (ix) none, or not more than 0.09 percent of molybdenum.

¹³ Tool steels are defined as steels which contain the following combinations of elements in the quantity by weight respectively indicated: (i) More than 1.2 percent carbon and more than 10.5 percent chromium; or (ii) not less than 0.3 percent carbon and 1.25 percent or more but less than 10.5 percent chromium; or (iii) not less than 0.85 percent carbon and 1 percent to 1.8 percent, inclusive, manganese; or (iv) 0.9 percent to 1.2 percent, inclusive, chromium and 0.9 percent to 1.4 percent, inclusive, molybdenum; or (v) not less than 0.5 percent carbon and not less than 3.5 percent molybdenum; or (vi) not less than 0.5 percent carbon and not less than 5.5 percent tungsten.

¹⁴ Silico-manganese steel is defined as steels containing by weight: (i) Not more than 0.7 percent of carbon; (ii) 0.5 percent or more but not more than 1.9 percent of manganese, and (iii) 0.6 percent or more but not more than 2.3 percent of silicon.

7211.19.6000, 7211.19.7530, 7211.19.7560, 7211.19.7590, 7225.11.0000, 7225.19.0000, 7225.30.3050, 7225.30.7000, 7225.40.7000, 7225.99.0090, 7226.11.1000, 7226.11.9030, 7226.11.9060, 7226.19.1000, 7226.19.9000, 7226.91.5000, 7226.91.7000, and 7226.91.8000. The products subject to the investigation may also enter under the following HTSUS numbers: 7210.90.9000, 7211.90.0000, 7212.40.1000, 7212.40.5000, 7212.50.0000, 7214.91.0015, 7214.91.0060, 7214.91.0090, 7214.99.0060, 7214.99.0075, 7214.99.0090, 7215.90.5000, 7226.99.0180, and 7228.60.6000.

The HTSUS subheadings above are provided for convenience and U.S. Customs and Border Protection purposes only. The written description of the scope of the investigation is dispositive.

Certain Cut-to-Length Carbon Steel Plate From the People's Republic of China: Preliminary Results of Antidumping Administrative Review, Preliminary Determination of No Shipments, in Part, and Partial Rescission; 2014-2015

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

DATES: Effective August 12, 2016.

SUMMARY: The Department of Commerce ("Department") is conducting an administrative review of the antidumping duty order on certain cut-to-length carbon steel plate ("CTL plate") from the People's Republic of China ("PRC") covering the period of review ("POR") November 1, 2014, through October 31, 2015. We preliminarily find that of the two companies under review, one made no shipments of subject merchandise during the POR and the other company has not demonstrated its eligibility for separate rate status, and, thus, is part of the PRC-wide entity. Interested parties are invited to comment on these preliminary results.

FOR FURTHER INFORMATION CONTACT: Jonathan Hill, AD/CVD Operations, Office IV, Enforcement & Compliance, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482-3518.

SUPPLEMENTARY INFORMATION:

Background

After initiating this review,¹ the Department issued an antidumping duty questionnaire to Hunan Valin Xiangtan Iron and Steel Co., Ltd. ("Hunan Valin"), which notified the Department that it would not respond to the questionnaire. The other respondent, Wuyang Iron & Steel Co., Ltd. ("Wuyang Steel") reported that it made no exports, sales, or entries during the POR. All review requests were timely withdrawn for the other 14 companies for which this review was initiated. For a complete description of the events that followed the initiation of this administrative review, see the

¹ See *Initiation of Antidumping and Countervailing Duty Administrative Reviews*, 81 FR 739 (January 7, 2016) ("Initiation Notice").

Preliminary Decision Memorandum hereby adopted by, this notice.²

The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System ("ACCESS"). ACCESS is available to registered users at <http://access.trade.gov> and in the Central Records Unit, room B8024 of the main Department of Commerce building. In addition, a complete version of the Preliminary Results Decision Memorandum can be accessed directly on the Internet at <http://enforcement.trade.gov/frn/index.html>. The signed and the electronic versions of the Preliminary Decision Memorandum are identical in content.

The Department has exercised its discretion to toll all administrative deadlines due to the closure of the Federal Government because of Snowstorm "Jonas". Thus, all of the deadlines in this segment of the proceeding have been extended by four business days. The revised deadline for the preliminary results of review is now August 5, 2016.³

Scope of the Order

The product covered by the order is certain cut-to-length carbon steel plate from the PRC.⁴ This merchandise is currently classified in the Harmonized Tariff Schedule of the United States ("HTSUS") under item numbers 7208.40.3030, 7208.40.3060, 7208.51.0030, 7208.51.0045, 7208.51.0060, 7208.52.0000, 7208.53.0000, 7208.90.0000, 7210.70.3000, 7212.40.5000, and 7212.50.0000. Although the HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope of the order is dispositive.

Partial Rescission

Pursuant to 19 CFR 351.213(d)(1), the Department will rescind an

² See the memorandum from Christian Marsh, Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations to Ronald K. Lorentzen, Acting Assistant Secretary for Enforcement and Compliance "Decision Memorandum for the Preliminary Results of the Antidumping Duty Administrative Review of Certain Cut-to-Length Carbon Steel Plate from the People's Republic of China," dated concurrently with this notice ("Preliminary Decision Memorandum").

³ See Memorandum to the Record from Ron Lorentzen, Acting Assistant Secretary for Enforcement & Compliance, regarding "Tolling of Administrative Deadlines as a Result of the Government Closure during Snowstorm Jonas," dated January 27, 2016.

⁴ For a complete description of the scope of the order see Preliminary Decision Memorandum.

administrative review, in whole or in part, if a party that requested the review withdraws its request within 90 days of the date of publication of the notice of initiation of the requested review. Nucor Corporation (“Petitioner”), the only party to request a review of the companies listed below, withdrew its request for an administrative review of these 14 companies within 90 days of the date of publication of *Initiation Notice*.⁵ Accordingly, the Department is rescinding this review, in part, with respect to the following companies, in accordance with 19 CFR 351.213(d)(1):⁶ Fujitrans Corporation
Guangzhou Metals and Minerals Imp. & Exp. Ltd.
Guardian Shanghai
Hong Kong Shengyu Trading Co. Ltd.
Hong Kong Zhong Yuan Industrial Co., Ltd.
Jiangyin Xingcheng Plastic Chemical Co., Ltd.
Jiangyin Xingcheng Special Steel Works Co., Ltd.
Ningbo Jiangdong Trusty Import and Export Co., Ltd.
Shanghai Ruyi Import and Export Co., Ltd.
Shanxi Taigang Stainless Steel Co., Ltd.
Shenzhen Wins Technology Co., Ltd.
UBI Logistics China Limited
Wuxi Philloy Machinery Co., Ltd.
Xiamen C&D Paper & Pulp Co., Ltd.

Methodology

The Department is conducting this review in accordance with section 751(a)(1)(B) of the Tariff Act of 1930, as amended (“the Act”). For a full discussion of the decisions taken in these preliminary results, *see* the Preliminary Decision Memorandum.

Preliminary Results of Review

As noted above, Hunan Valin did not respond to the Department’s antidumping duty questionnaire. Therefore, the Department preliminarily determines that Hunan Valin has not demonstrated its eligibility for separate

rate status and is part of the PRC-wide entity.⁷ The PRC-wide entity rate is 128.59 percent.⁸

Preliminary Determination of No Shipments

Wuyang Steel submitted a timely-filed certification that it had no exports, sales, or entries of subject merchandise during the POR.⁹ A query of U.S. Customs and Border Protection (“CBP”) data did not show any POR entries of subject merchandise from Wuyang Steel.¹⁰ In addition, CBP did not identify any entries of subject merchandise from Wuyang Steel during the POR in response to an inquiry from the Department asking CBP for such information.¹¹ Based on the foregoing, the Department preliminarily determines that Wuyang Steel did not have any reviewable transactions during the POR. For additional information regarding this determination, *see* the Preliminary Decision Memorandum.

Consistent with its practice in NME cases, the Department is not rescinding this administrative review for Wuyang Steel, but intends to complete the review and issue appropriate instructions to CBP based on the final results of the review.

Public Comment

Interested parties are invited to comment on the preliminary results and may submit case briefs and/or written comments, filed electronically using ACCESS, within 30 days of the date of publication of this notice, pursuant to 19 CFR 351.309(c)(1)(ii). Rebuttal briefs, limited to issues raised in the case briefs, will be due five days after the due date for case briefs, pursuant to 19 CFR 351.309(d). Parties who submit case or rebuttal briefs in this review are requested to submit with each argument a statement of the issue, a summary of the argument not to exceed five pages, and a table of statutes, regulations, and cases cited, in accordance with 19 CFR 351.309(c)(2).

⁷ *See* Preliminary Decision Memorandum.

⁸ *See Final Determination of Sales at Less Than Fair Value: Certain Cut-to-Length Carbon Steel Plate From the People’s Republic of China*, 62 FR 61964 (November 20, 1997). Because no party requested a review of the PRC-wide entity in this segment of the proceeding, the entity’s rate is not subject to change. *See Change in Practice in NME Reviews*.

⁹ *See* Letter from Wuyang Steel to the Secretary of Commerce “*Administrative Review of Certain Cut-to-Length Carbon Steel Plate from China: Wuyang Iron & Steel’s No Shipment Certification*,” dated January 15, 2016.

¹⁰ *See* letter from Howard Smith, Program Manager, AD/CVD Operations, Office IV, Enforcement & Compliance to interested parties dated January 21, 2016.

¹¹ *See* CBP Message Number 6155301 dated June 3, 2016.

Pursuant to 19 CFR 351.310(c), interested parties, who wish to request a hearing must submit a written request to the Assistant Secretary for Enforcement and Compliance, U.S. Department of Commerce, filed electronically using ACCESS. Electronically filed case briefs/written comments and hearing requests must be received successfully in their entirety by the Department’s electronic records system, ACCESS, by 5:00 p.m. Eastern Time, within 30 days after the date of publication of this notice.¹² Hearing requests should contain: (1) The party’s name, address and telephone number; (2) the number of participants; and (3) a list of issues to be discussed. Issues raised in the hearing will be limited to those issues raised in the respective case briefs. If a request for a hearing is made, parties will be notified of the time and date of the hearing which will be held at the U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington DC 20230.

Unless extended, the Department intends to issue the final results of this administrative review, including the results of its analysis of the issues raised in any written briefs, not later than 120 days after the date of publication of this notice, pursuant to section 751(a)(3)(A) of the Act.

Assessment Rates

Upon issuance of the final results of this review, the Department will determine, and CBP shall assess, antidumping duties on all appropriate entries covered by this review.¹³ The Department intends to issue assessment instructions to CBP 15 days after the publication date of the final results of this review. The Department intends to instruct CBP to liquidate any entries of subject merchandise from Hunan Valin at 128.59 percent (the PRC-wide rate). Additionally, pursuant to the Department’s practice in NME cases, if we continue to determine that Wuyang Steel had no shipments of subject merchandise, any suspended entries of subject merchandise during the POR from Wuyang Steel will be liquidated at the PRC-wide rate.¹⁴

For companies for which the review has been rescinded, the Department will instruct CBP to assess antidumping duties on entries of subject merchandise at rates equal to the cash deposit of estimated antidumping duties required at the time of entry, or withdrawal from

¹² *See* 19 CFR 351.310(c).

¹³ *See* 19 CFR 351.212(b)(1).

¹⁴ For a full discussion of this practice, *see Non-Market Economy Antidumping Proceedings: Assessment of Antidumping Duties*, 76 FR 65694 (October 24, 2011).

⁵ *See* Letter from Petitioner to the Secretary of Commerce “*Certain Cut-To-Length Carbon Steel Plate from the People’s Republic of China: Withdrawal of Request for Administrative Review*,” dated April 6, 2016.

⁶ As stated in *Change in Practice in NME Reviews*, the Department will no longer consider the non-market economy (“NME”) entity as an exporter conditionally subject to administrative reviews. *See Antidumping Proceedings: Announcement of Change in Department Practice for Respondent Selection in Antidumping Duty Proceedings and Conditional Review of the Nonmarket Economy Entity in NME Antidumping Duty Proceedings*, 78 FR 65963 (November 4, 2013) (“*Change in Practice in NME Reviews*”). The PRC-wide entity is not subject to this administrative review because no interested party requested a review of the entity. *See Initiation Notice*.

warehouse, for consumption, in accordance with 19 CFR 351.212(c)(1)(i).

Cash Deposit Requirements

The following cash deposit requirements will be effective upon publication of the final results of this administrative review for all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the publication date of the final results of review, as provided by section 751(a)(2)(C) of the Act: (1) For previously investigated or reviewed PRC and non-PRC exporters which are not under review in this segment of the proceeding but which have separate rates, the cash deposit rate will continue to be the exporter-specific rate published for the most recent period; (2) for all PRC exporters of subject merchandise that have not been granted a separate rate, including Hunan Valin, the cash deposit rate will be the PRC-wide rate of 128.59 percent; and (3) for all non-PRC exporters of subject merchandise which have not received their own rate, the cash deposit rate will be the rate applicable to the PRC exporter(s) that supplied that non-PRC exporter. These deposit requirements, when imposed, shall remain in effect until further notice.

Notification to Importers

This notice also serves as a preliminary reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Department's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

We are issuing and publishing these results in accordance with sections 751(a)(1) and 777(i)(1) of the Act and 19 CFR 351.213(d)(4) and 351.221(b)(4).

Dated: August 5, 2016.

Ronald K. Lorentzen,

Acting Assistant Secretary for Enforcement and Compliance.

Solid Urea From the Russian Federation: Preliminary Results of Antidumping Duty Administrative and New Shipper Reviews and Rescission of Administrative Review, in Part; 2014-2015

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (the Department) is conducting an administrative review and new shipper review of the antidumping duty order on solid urea from the Russian Federation (Russia). The period of review (POR) is July 1, 2014, through June 30, 2015. The Department preliminarily finds that MCC EuroChem and Joint Stock Company PhosAgro-Cherepovets (PhosAgro) have not made sales of subject merchandise in the United States at prices below normal value. Interested parties are invited to comment on these preliminary results.

DATES: Effective August 12, 2016.

FOR FURTHER INFORMATION CONTACT:

Michael Romani or Andre Gziryan, AD/CVD Operations, Office I, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482-0198 or (202) 482-2201, respectively.

SUPPLEMENTARY INFORMATION:

Scope of the Order

The merchandise subject to the order is solid urea, a high-nitrogen content fertilizer which is produced by reacting ammonia with carbon dioxide. The product is currently classified under the Harmonized Tariff Schedules of the United States (HTSUS) item number 3102.10.0010. Previously such merchandise was classified under item number 480.3000 and 3102.10.0000 of the HTSUS. Although the HTSUS subheading is provided for convenience and customs purposes, the written description of the merchandise subject to the order is dispositive.

Rescission of Administrative Review in Part

We are rescinding the administrative review in part with respect to PhosAgro.¹

Methodology

The Department conducted these reviews in accordance with section 751(a)(2) of the Tariff Act of 1930, as amended (the Act). Export and constructed export price are calculated in accordance with section 772(a) and 772(b) of the Act respectively. Normal value is calculated in accordance with section 773(c) of the Act.

For a full description of the methodology underlying our conclusions, see Preliminary Decision Memorandum.² The Preliminary Decision Memorandum is a public document and is made available to the public *via* Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at <https://access.trade.gov>, and to all parties in the Central Records Unit, located at room B8024 of the main Department of Commerce building. In addition, a complete version of the Preliminary Decision Memorandum can be found at <http://enforcement.trade.gov/frn/index.html>. A list of the topics discussed in the Preliminary Decision Memorandum is attached as an Appendix to this notice.

Preliminary Results of the Administrative Review

As a result of this administrative review, we preliminarily determine that a weighted-average dumping margin of 0.00 percent exists for MCC EuroChem³ for the period July 1, 2014, through June 30, 2015.

¹ See Preliminary Decision Memorandum at 3 for more details on this rescission in part. As noted in the Preliminary Decision Memorandum, we will not issue assessment instructions as a result of the rescission of the administrative review with respect to Phos Agro, given the ongoing new shipper review. *Id.* n.13.

² See memorandum from Gary Taverman, Associate Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, to Ronald K. Lorentzen, Acting Assistant Secretary for Enforcement and Compliance, "Decision Memorandum for Preliminary Results of Antidumping Duty Administrative and New Shipper Review: Solid Urea from the Russian Federation," dated concurrently with this notice (Preliminary Decision Memorandum), which is hereby adopted by this notice.

³ OJSC Nevinnomysskiy Azot, and OJSC NAK Azot (*a.k.a.*, Novomoskovskiy Azot, OJSC) are producing subsidiaries of MCC EuroChem.

Preliminary Results of the New Shipper Review

As a result of this new shipper review, we preliminarily determine that a weighted-average dumping margin of 0.00 percent exists for merchandise produced and exported by Joint Stock Company PhosAgro-Cherepovets for the period July 1, 2014, through June 30, 2015.

Disclosure and Public Comment

We intend to disclose the calculations performed for these preliminary results to the parties within five days after the date of publication of this notice.⁴ Pursuant to 19 CFR 351.309(c), interested parties may submit cases briefs not later than 30 days after the date of publication of this notice. Rebuttal briefs, limited to issues raised in case briefs, may be filed no later than five days after the time limit for filing the case briefs.⁵ Parties who submit case briefs or rebuttal briefs in this proceeding are encouraged to submit with each argument: (1) A statement of the issue; (2) a brief summary of the argument; and (3) a table of authorities.⁶

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing, must submit a written request to the Assistant Secretary for Enforcement and Compliance, filed electronically via ACCESS. An electronically filed document must be received successfully in its entirety by the Department's electronic records system, ACCESS, by 5:00 p.m. Eastern Time within 30 days after the date of publication of this notice.⁷ Requests should contain (1) the party's name, address, and telephone number; (2) the number of participants; and (3) a list of issues to be discussed. Issues raised in the hearing will be limited to those raised in the respective case briefs.

Unless the deadline is extended pursuant to section 751(a)(2)(B)(iv) of the Act, the Department will issue the final results of these reviews, including the results of its analysis of issues raised by parties in their comments, within 120 days after the publication of these preliminary results, pursuant to section 751(a)(3)(A) of the Act and 19 CFR 351.213(h).

Assessment Rates

If a respondent's weighted-average dumping margin is above *de minimis* (i.e., 0.50 percent) in the final results of these reviews, the Department will calculate an importer-specific

assessment rate on the basis of the ratio of the total amount of dumping calculated for each importer's examined sales and, where possible, the total entered value of sales, in accordance with 19 CFR 351.212(b)(1).⁸ If the respondent's weighted-average dumping margin continues to be zero or *de minimis* in the final results of review, we will instruct U.S. Customs and Border Protection (CBP) not to assess duties on any of its entries in accordance with the *Final Modification for Reviews*.⁹

For entries of subject merchandise during the POR produced by MCC EuroChem or PhosAgro for which it did not know its merchandise was destined for the United States, we will instruct CBP to liquidate unreviewed entries at the all-others rate of 64.93 percent¹⁰ if there is no rate for the intermediate company(ies) involved in the transaction.

We intend to issue instructions to CBP 15 days after publication of the final results of these reviews.

Cash Deposit Requirements

The following deposit requirements will be effective upon publication of the notice of final results of these reviews for all shipments of solid urea from Russia entered, or withdrawn from warehouse, for consumption on or after the date of publication as provided by section 751(a)(2) of the Act: (1) The cash deposit rate with respect to the administrative review respondent, MCC EuroChem, will be the rate established in the final results of this administrative review; (2) for merchandise exported by manufacturers or exporters not covered in these reviews but covered in a prior segment of the proceeding, the cash deposit rate will continue to be the company-specific rate published for the most recently completed segment of this proceeding; (3) if the exporter is not a firm covered in these reviews, a prior review, or the original investigation but the manufacturer is, the cash deposit rate will be the rate established for the manufacturer of the merchandise for the most recently completed segment of this proceeding; (4) the cash deposit rate for

⁸ In these preliminary results, the Department applied the assessment rate calculation method adopted in *Antidumping Proceedings: Calculation of the Weighted-Average Dumping Margin and Assessment Rate in Certain Antidumping Duty Proceedings; Final Modification*, 77 FR 8101 (February 14, 2012) (*Final Modification for Reviews*).

⁹ See *Final Modification for Reviews*, 77 FR at 8102.

¹⁰ The all-others rate established in *Urea From the Union of Soviet Socialist Republics; Final Determination of Sales at Less Than Fair Value*, 52 FR 19557 (May 26, 1987).

all other manufacturers or exporters will continue to be 64.93 percent.¹¹

With respect to PhosAgro, the new shipper respondent, the Department established a combination cash deposit rate for this company consistent with its practice as follows: (1) For subject merchandise produced and exported by PhosAgro, the cash deposit rate will be the rate established for PhosAgro in the final results of the new shipper review; (2) for subject merchandise exported by PhosAgro, but not produced by PhosAgro, the cash deposit rate will be the rate for the all-others established in the less-than-fair-value investigation; and (3) for subject merchandise produced by PhosAgro but not exported by PhosAgro, the cash deposit rate will be the rate applicable to the exporter.

These cash deposit requirements, when imposed, shall remain in effect until further notice.

Notification to Importers

This notice serves as a preliminary reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

We are issuing and publishing the preliminary results of these reviews in accordance with sections 751(a)(1), 751(a)(2)(B) and 777(i) of the Act and 19 CFR 351.213, 351.214 and 351.221(b)(4).

Dated: August 5, 2016.

Ronald K. Lorentzen,
Acting Assistant Secretary for Enforcement and Compliance.

Countervailing Duty Investigation of Certain Hot-Rolled Steel Flat Products From Brazil: Final Affirmative Determination, and Final Determination of Critical Circumstances, in Part

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (the Department) determines that countervailable subsidies are being provided to producers and exporters of certain hot-rolled steel flat products (hot-rolled steel, or HRS) from Brazil. For information on the estimated subsidy rates, see the “Final Determination” section of this notice. The period of investigation is January 1, 2014, through December 31, 2014.

DATES: Effective August 12, 2016.

FOR FURTHER INFORMATION CONTACT: Sergio Balbontin, Nicholas Czajkowski, or Lana Nigro, AD/CVD Operations, Office I, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482-6478, (202) 482-1395, and (202) 482-1779, respectively.

SUPPLEMENTARY INFORMATION:

Background

The Department published the *Preliminary Determination* on January 15, 2016.¹ A summary of the events that occurred since the Department published the *Preliminary Determination*, as well as a full discussion of the issues raised by parties for this final determination, may be found in the Issues and Decision Memorandum.² The Issues and Decision

¹ See *Countervailing Duty Investigation of Certain Hot-Rolled Steel Flat Products From Brazil: Preliminary Affirmative Determination and Alignment of Final Determination With Final Antidumping Duty Determination*, 81 FR 2168 (January 15, 2016) (*Preliminary Determination*) and accompanying Preliminary Decision Memorandum (PDM).

² See Memorandum from Christian Marsh, Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, to Ronald K. Lorentzen, Acting Assistant Secretary for Enforcement and Compliance, “Issues and Decision Memorandum for the Final Determination in the Countervailing Duty Investigation of Certain Hot-

Memorandum is a public document and is on file electronically *via* Enforcement and Compliance’s Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at <http://access.trade.gov>, and is available to all parties in the Central Records Unit, Room B8024 of the main Department of Commerce building. In addition, a complete version of the Issues and Decision Memorandum can be accessed directly at <http://enforcement.trade.gov/frn/>. The signed Issues and Decision Memorandum and the electronic version are identical in content.

Scope Comments

In accordance with the Preliminary Scope Determination,³ the Department set aside a period of time for parties to address scope issues in case briefs or other written comments on scope issues.

In the *Preliminary Determination*, we did not modify the scope language as it appeared in the *Initiation Notice*.⁴ No interested party submitted scope comments in case or rebuttal briefs; therefore, the scope of this investigation remains unchanged for this final determination.

Scope of the Investigation

The products covered by this investigation are certain hot-rolled steel flat products from Brazil. For a complete description of the scope of this investigation, see the “Scope of the Investigation,” attached to this notice at Appendix I.

Analysis of Subsidy Programs and Comments Received

The subsidy programs under investigation and the issues raised in the case and rebuttal briefs by parties in this investigation are discussed in the Issues and Decision Memorandum. A list of the issues that parties raised, and to which we have responded in the Issues and Decision Memorandum, is attached to this notice at Appendix II.

Use of Adverse Facts Available

In making this final determination, the Department relied, in part, on facts

“Rolled Steel Flat Products from Brazil,” dated concurrently with this determination (Issues and Decision Memorandum) and hereby adopted by this notice.

³ See Memorandum to Christian Marsh, Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, “Certain Hot-Rolled Steel Products from Australia, Brazil, Japan, the Netherlands, the Republic of Korea, Turkey and the United Kingdom: Scope Comments Decision Memorandum for the Preliminary Determinations,” dated March 14, 2016.

⁴ See *Preliminary Determination* PDM at “Scope Comments.”

available and, because the Government of Brazil and the respondent companies did not act to the best of their abilities in responding to the Department’s requests for information, we drew an adverse inference where appropriate in selecting from among the facts otherwise available.⁵ Specifically, we applied facts available, with adverse inferences, for the Reduction of Tax on Industrialized Products for Machines and Equipment, the BNDES FINAME Loan program, and the Ex-Tarifário program, in accordance with section 776(a) and (b) of the Act. For further information, see the section “Use of Adverse Facts Available” in the accompanying Issues and Decision Memorandum.

Changes Since the Preliminary Determination

Based on our analysis of the comments received from parties, and the minor corrections presented and additional items discovered at verification, we made certain changes to the respondents’ subsidy rate calculations. For a discussion of these changes, see the Issues and Decision Memorandum.

Final Affirmative Determination of Critical Circumstances, in Part

On October 23, 2015, the petitioner filed a timely critical circumstances allegation pursuant to section 703(e)(1) of the Act and 19 CFR 351.206(c)(1), alleging that critical circumstances exist with respect to imports of hot-rolled steel from Brazil.⁶ We preliminarily determined that critical circumstances existed with respect to CSN and Usiminas, but not for all others companies.⁷ Based on additional import data that became available since the *Preliminary Determination of Critical Circumstances*, we are departing from our preliminary finding. For this final determination, in accordance with section 705(a) of the Act, we find that critical circumstances exist with respect to CSN but that critical circumstances do not exist with respect to Usiminas and all other producers and exporters of

⁵ See sections 776(a) and (b) of the Tariff Act of 1930, as amended (the Act).

⁶ See letter from the Petitioner, “Certain Hot-Rolled Steel Flat Products From Australia, Brazil, Japan and the Netherlands—Critical Circumstances Allegations,” dated October 23, 2015.

⁷ See *Antidumping Duty Investigations of Certain Hot-Rolled Steel Flat Products From Australia, Brazil, Japan, and the Netherlands and Countervailing Duty Investigation of Certain Hot-Rolled Steel Flat Products From Brazil: Preliminary Determinations of Critical Circumstances*, 80 FR 76444 (December 9, 2015) (*Preliminary Determination of Critical Circumstances*).

hot-rolled steel from Brazil.⁸ For a complete discussion, see the “Critical Circumstances” section of the Issues and Decision Memorandum.

Final Determination

In accordance with section 705(c)(1)(B)(i) of the Act, we calculated a rate for Usiminas and CSN, the exporters/producers of subject merchandise selected for individual examination in this investigation.

In accordance with sections 705(c)(1)(B)(i)(I) and 705(c)(5)(A) of the Act, for companies not individually investigated, we apply an “all others” rate, which is normally calculated by weighting the subsidy rates of the individual companies selected as mandatory respondents by those companies’ exports of the subject merchandise to the United States. Under section 705(c)(5)(A)(i) of the Act, the all-others rate excludes zero and *de minimis* rates calculated for the exporters and producers individually investigated as well as any rates based entirely on facts otherwise available, pursuant to section 776 of the Act. Neither of the respondents’ rates was zero or *de minimis* or based entirely on facts otherwise available. Notwithstanding the language of section 705(c)(5)(A)(i) of the Act, we did not calculate the “all-others” rate by weight averaging the rates of the two individually investigated respondents using their actual export sales data, because doing so risks disclosure of proprietary information. Instead, we calculated the all-others rate using the simple average of the respondents’ calculated rates.⁹ The estimated countervailable subsidy rates are as follows:

Company	Subsidy rate (percent)
Companhia Siderurgica Nacional (CSN)	11.30
Usinas Siderurgicas de Minas Gerais S.A. (Usiminas)	11.09
All Others	11.20

⁸ See Issues and Decision Memorandum; see also Memorandum “Calculations for Final Determination of Critical Circumstances in the Countervailing Duty Investigation of Certain Hot-Rolled Steel Flat Products from Brazil,” dated concurrently with this notice.

⁹ See Memorandum to Dana S. Mermelstein, Program Manager, AD/CVD Operations, Office I, “Final Affirmative Countervailing Duty Determination: Hot-Rolled Steel Flat Products from Brazil; Calculation of the All Others Rate for the Final Determination in the Countervailing Duty Investigation of Hot-Rolled Steel Flat Products from Brazil,” dated concurrently with this notice.

Suspension of Liquidation

As a result of our *Preliminary Determination* and pursuant to section 703(d) of the Act, we instructed U.S. Customs and Border Protection (CBP) to suspend liquidation of all entries of hot-rolled steel from Brazil, that were entered, or withdrawn from warehouse, for consumption on or after October 17, 2015, for CSN and Usiminas, for which we found critical circumstances exist, and on or after January 15, 2016, the date of the publication of the *Preliminary Determination* in the **Federal Register**, for all other exporters. In accordance with section 703(d) of the Act, we instructed CBP to discontinue the suspension of liquidation for countervailing duty (CVD) purposes for subject merchandise entered, or withdrawn from warehouse, on or after May 14, 2016, but to continue the suspension of liquidation of all entries from October 17, 2015, or January 15, 2016, as applicable, through May 14, 2016. As a result of our negative critical circumstances determination for Usiminas, we will instruct CBP to discontinue the suspension of liquidation, and to liquidate, without regard to countervailing duties, subject merchandise exported by Usiminas and entered, or withdrawn from warehouse, on or after October 17, 2015 and before January 15, 2016.

If the U.S. International Trade Commission (ITC) issues a final affirmative injury determination, we will issue a CVD order and will reinstate the suspension of liquidation under section 706(a) of the Act and will require a cash deposit of estimated CVDs for such entries of subject merchandise in the amounts indicated above. If the ITC determines that material injury, or threat of material injury, does not exist, this proceeding will be terminated and all estimated duties deposited or securities posted as a result of the suspension of liquidation will be refunded or canceled.

ITC Notification

In accordance with section 705(d) of the Act, we will notify the ITC of our determination. In addition, we are making available to the ITC all non-privileged and non-proprietary information related to this investigation. We will allow the ITC access to all privileged and business proprietary information in our files, provided the ITC confirms that it will not disclose such information, either publicly or under an administrative protective order (APO), without the written consent of the Assistant Secretary for Enforcement and Compliance.

Notification Regarding Administrative Protective Orders

In the event that the ITC issues a final negative injury determination, this notice will serve as the only reminder to parties subject to an APO of their responsibility concerning the destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely written notification of the return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a violation which is subject to sanction.

This determination is issued and published pursuant to sections 705(d) and 777(i) of the Act and 19 CFR 351.201(c).

Dated: August 4, 2016.

Ronald K. Lorentzen,

Acting Assistant Secretary for Enforcement and Compliance.

Appendix I—Scope of the Investigation

The products covered by this investigation are certain hot-rolled, flat-rolled steel products, with or without patterns in relief, and whether or not annealed, painted, varnished, or coated with plastics or other non-metallic substances. The products covered do not include those that are clad, plated, or coated with metal. The products covered include coils that have a width or other lateral measurement (“width”) of 12.7 mm or greater, regardless of thickness, and regardless of form of coil (e.g., in successively superimposed layers, spirally oscillating, etc.). The products covered also include products not in coils (e.g., in straight lengths) of a thickness of less than 4.75 mm and a width that is 12.7 mm or greater and that measures at least 10 times the thickness. The products described above may be rectangular, square, circular, or other shape and include products of either rectangular or non-rectangular cross-section where such cross-section is achieved subsequent to the rolling process, *i.e.*, products which have been “worked after rolling” (e.g., products which have been beveled or rounded at the edges). For purposes of the width and thickness requirements referenced above:

(1) Where the nominal and actual measurements vary, a product is within the scope if application of either the nominal or actual measurement would place it within the scope based on the definitions set forth above unless the resulting measurement makes the product covered by the existing antidumping¹ or countervailing duty² orders

¹ *Notice of Amendment of Final Determinations of Sales at Less Than Fair Value and Antidumping Duty Orders: Certain Cut-To-Length Carbon-Quality Steel Plate Products From France, India, Indonesia, Italy, Japan and the Republic of Korea*, 65 FR 6585 (February 10, 2000).

² *Notice of Amended Final Determinations: Certain Cut-to-Length Carbon-Quality Steel Plate*

on Certain Cut-To-Length Carbon-Quality Steel Plate Products From the Republic of Korea (A-580-836; C-580-837), and

(2) Where the width and thickness vary for a specific product (e.g., the thickness of certain products with non-rectangular cross-section, the width of certain products with non-rectangular shape, etc.), the measurement at its greatest width or thickness applies.

Steel products included in the scope of this investigation are products in which: (1) Iron predominates, by weight, over each of the other contained elements; (2) the carbon content is 2 percent or less, by weight; and (3) none of the elements listed below exceeds the quantity, by weight, respectively indicated:

- 2.50 percent of manganese, or
- 3.30 percent of silicon, or
- 1.50 percent of copper, or
- 1.50 percent of aluminum, or
- 1.25 percent of chromium, or
- 0.30 percent of cobalt, or
- 0.40 percent of lead, or
- 2.00 percent of nickel, or
- 0.30 percent of tungsten, or
- 0.80 percent of molybdenum, or
- 0.10 percent of niobium, or
- 0.30 percent of vanadium, or
- 0.30 percent of zirconium.

Unless specifically excluded, products are included in this scope regardless of levels of boron and titanium.

For example, specifically included in this scope are vacuum degassed, fully stabilized (commonly referred to as interstitial-free (IF)) steels, high strength low alloy (HSLA) steels, the substrate for motor lamination steels, Advanced High Strength Steels (AHSS), and Ultra High Strength Steels (UHSS). IF steels are recognized as low carbon steels with micro-alloying levels of elements such as titanium and/or niobium added to stabilize carbon and nitrogen elements. HSLA steels are recognized as steels with micro-alloying levels of elements such as chromium, copper, niobium, titanium, vanadium, and molybdenum. The substrate for motor lamination steels contains micro-alloying levels of elements such as silicon and aluminum. AHSS and UHSS are considered high tensile strength and high elongation steels, although AHSS and UHSS are covered whether or not they are high tensile strength or high elongation steels.

Subject merchandise includes hot-rolled steel that has been further processed in a third country, including but not limited to pickling, oiling, levelling, annealing, tempering, temper rolling, skin passing, painting, varnishing, trimming, cutting, punching, and/or slitting, or any other processing that would not otherwise remove the merchandise from the scope of the investigation if performed in the country of manufacture of the hot-rolled steel.

All products that meet the written physical description, and in which the chemistry quantities do not exceed any one of the noted element levels listed above, are within the

From India and the Republic of Korea; and Notice of Countervailing Duty Orders: Certain Cut-To-Length Carbon-Quality Steel Plate From France, India, Indonesia, Italy, and the Republic of Korea, 65 FR 6587 (February 10, 2000).

scope of this investigation unless specifically excluded. The following products are outside of and/or specifically excluded from the scope of this investigation:

- Universal mill plates (i.e., hot-rolled, flat-rolled products not in coils that have been rolled on four faces or in a closed box pass, of a width exceeding 150 mm but not exceeding 1250 mm, of a thickness not less than 4.0 mm, and without patterns in relief);
- Products that have been cold-rolled (cold-reduced) after hot-rolling;³
- Ball bearing steels;⁴
- Tool steels;⁵ and
- Silico-manganese steels;⁶

The products subject to this investigation are currently classified in the Harmonized Tariff Schedule of the United States (HTSUS) under item numbers: 7208.10.1500, 7208.10.3000, 7208.10.6000, 7208.25.3000, 7208.25.6000, 7208.26.0030, 7208.26.0060, 7208.27.0030, 7208.27.0060, 7208.36.0030, 7208.36.0060, 7208.37.0030, 7208.37.0060, 7208.38.0015, 7208.38.0030, 7208.38.0090, 7208.39.0015, 7208.39.0030, 7208.39.0090, 7208.40.6030, 7208.40.6060, 7208.53.0000, 7208.54.0000, 7208.90.0000, 7210.70.3000, 7211.14.0030, 7211.14.0090, 7211.19.1500, 7211.19.2000, 7211.19.3000, 7211.19.4500, 7211.19.6000, 7211.19.7530, 7211.19.7560, 7211.19.7590, 7225.11.0000, 7225.19.0000, 7225.30.3050, 7225.30.7000, 7225.40.7000, 7225.99.0090, 7226.11.1000, 7226.11.9030, 7226.11.9060, 7226.19.1000, 7226.19.9000, 7226.91.5000, 7226.91.7000, and 7226.91.8000. The products subject to the investigation may also enter under the following HTSUS numbers: 7210.90.9000, 7211.90.0000, 7212.40.1000, 7212.40.5000,

³ For purposes of this scope exclusion, rolling operations such as a skin pass, levelling, temper rolling or other minor rolling operations after the hot-rolling process for purposes of surface finish, flatness, shape control, or gauge control do not constitute cold-rolling sufficient to meet this exclusion.

⁴ Ball bearing steels are defined as steels which contain, in addition to iron, each of the following elements by weight in the amount specified: (i) Not less than 0.95 nor more than 1.13 percent of carbon; (ii) not less than 0.22 nor more than 0.48 percent of manganese; (iii) none, or not more than 0.03 percent of sulfur; (iv) none, or not more than 0.03 percent of phosphorus; (v) not less than 0.18 nor more than 0.37 percent of silicon; (vi) not less than 1.25 nor more than 1.65 percent of chromium; (vii) none, or not more than 0.28 percent of nickel; (viii) none, or not more than 0.38 percent of copper; and (ix) none, or not more than 0.09 percent of molybdenum.

⁵ Tool steels are defined as steels which contain the following combinations of elements in the quantity by weight respectively indicated: (i) More than 1.2 percent carbon and more than 10.5 percent chromium; or (ii) not less than 0.3 percent carbon and 1.25 percent or more but less than 10.5 percent chromium; or (iii) not less than 0.85 percent carbon and 1 percent to 1.8 percent, inclusive, manganese; or (iv) 0.9 percent to 1.2 percent, inclusive, chromium and 0.9 percent to 1.4 percent, inclusive, molybdenum; or (v) not less than 0.5 percent carbon and not less than 3.5 percent molybdenum; or (vi) not less than 0.5 percent carbon and not less than 5.5 percent tungsten.

⁶ Silico-manganese steel is defined as steels containing by weight: (i) Not more than 0.7 percent of carbon; (ii) 0.5 percent or more but not more than 1.9 percent of manganese, and (iii) 0.6 percent or more but not more than 2.3 percent of silicon.

7212.50.0000, 7214.91.0015, 7214.91.0060, 7214.91.0090, 7214.99.0060, 7214.99.0075, 7214.99.0090, 7215.90.5000, 7226.99.0180, and 7228.60.6000.

The HTSUS subheadings above are provided for convenience and U.S. Customs purposes only. The written description of the scope of the investigation is dispositive.

Certain Hot-Rolled Steel Flat Products From the Republic of Korea: Final Determination of Sales at Less Than Fair Value

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (Department) determines that certain hot-rolled steel flat products (hot-rolled steel) from the Republic of Korea (Korea) are being, or are likely to be, sold in the United States at less than fair value (LTFV). The period of investigation (POI) is July 1, 2014, through June 30, 2015. The final estimated weighted-average dumping margins are listed below in the "Final Determination" section of this notice.

DATES: Effective August 12, 2016.

FOR FURTHER INFORMATION CONTACT: Javier Barrientos or Matthew Renkey, AD/CVD Operations, Office V, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 482-2243 or (202) 482-2312, respectively.

SUPPLEMENTARY INFORMATION:

Background

The Department published the preliminary determination on March 22, 2016.¹ A summary of the events that occurred since the Department

¹ See *Certain Hot-Rolled Steel Flat Products from the Republic of Korea: Affirmative Preliminary Determination of Sales at Less than Fair Value and Postponement of Final Determination*, 81 FR 15228 (March 22, 2016) (*Preliminary Determination*), and accompanying Preliminary Decision Memorandum.

published the *Preliminary Determination*, as well as a full discussion of the issues raised by parties for this final determination, may be found in the Final Issues and Decision Memorandum.²

Also, as explained in the memorandum from the Acting Assistant Secretary for Enforcement and Compliance, the Department exercised its authority to toll all administrative deadlines due to the closure of the Federal Government.³ As a consequence, all deadlines in this segment of the proceeding have been extended by four business days.

Scope of the Investigation

The products covered by this investigation are certain hot-rolled steel flat products from Korea. For a complete description of the scope of this investigation, see the "Scope of the Investigation," in Appendix II of this notice.

Analysis of Comments Received

All issues raised in the case and rebuttal briefs by parties in this investigation are addressed in the Final Issues and Decision Memorandum, which is hereby adopted by this notice.⁴ A list of the issues raised is attached to this notice as Appendix I. The Final Issues and Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at <https://access.trade.gov> and it is available to all parties in the Central Records Unit, room B-8024 of the main Department of Commerce building. In addition, a complete version of the Final Issues and Decision Memorandum can be accessed directly at <http://enforcement.trade.gov/frn/index.html>. The signed and electronic versions of the Final Issues and Decision Memorandum are identical in content.

² See Memorandum from Christian Marsh, Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, to Ronald K. Lorentzen, Acting Assistant Secretary for Enforcement and Compliance, "Issues and Decision Memorandum for the Final Affirmative Determination in the Antidumping Duty Investigation of Certain Hot-Rolled Steel Flat Products from the Republic of Korea," (Final Issues and Decision Memorandum), dated concurrently with this determination and hereby adopted by this notice.

³ See Memorandum to the File from Ron Lorentzen, Acting A/S for Enforcement & Compliance, "Tolling of Administrative Deadlines As a Result of the Government Closure During Snowstorm Jonas," dated January 27, 2016.

⁴ See Final Issues and Decision Memorandum.

Verification

As provided in section 782(i) of the Act, in January, April, and June 2016, the Department verified the sales, cost, and further manufacturing data reported by the mandatory respondents Hyundai Steel Company and POSCO,⁵ pursuant to section 782(i) of the Act. We used standard verification procedures, including an examination of relevant accounting and production records, and original source documents provided by respondents.

Use of Adverse Facts Available

In making this final determination, the Department relied, in part, on facts available for both POSCO and Hyundai Steel Company. Furthermore, because Hyundai Steel Company did not act to the best of its ability in responding to certain of the Department's requests for information, we drew an adverse inference where appropriate in selecting from among the facts otherwise available.⁶ For further information, see the accompanying Final Issues and Decision Memorandum.

Changes to the Margin Calculations Since the Preliminary Determination

Based on our analysis of the comments received and our findings at verification, we made certain changes to the margin calculations for Hyundai Steel Company and POSCO. For a discussion of these changes, see the Final Issues and Decision Memorandum. We have also revised the all-others rate in accordance with the methodology described below.

All-Others Rate

Consistent with sections 735(c)(1)(B)(i)(II) and 735(c)(5) of the Act, the Department also calculated an estimated all-others rate. Section 735(c)(5)(A) of the Act provides that the estimated all-others rate shall be an amount equal to the weighted average of the estimated weighted-average dumping margins established for exporters and producers individually investigated, excluding any zero and *de minimis* margins, and any margins determined entirely under section 776 of the Act. Where the rates for investigated companies are zero or *de minimis*, or based entirely on facts otherwise available, section 735(c)(5)(B) of the Act instructs the Department to establish an "all others" rate using "any reasonable method."

⁵ We are continuing to collapse the mandatory respondent POSCO and Daewoo International Corporation (DWI), and henceforward refer to the collapsed entity as "POSCO." See *Preliminary Determination*, 81 FR at 15229.

⁶ See sections 776(a) and (b) of the Act.

In this investigation, we calculated weighted-average dumping margins for Hyundai Steel Company and POSCO that are above *de minimis* and which are not based on total facts available. Accordingly, for the final determination,

consistent with the Act and the Department's practice, the Department calculated the margin for the all-others rate using the ranged total sales values reported by POSCO and Hyundai Steel

from the public versions of their submissions.⁷

Final Determination Margins

The Department determines that the following estimated weighted-average dumping margins exist:

Exporter/Manufacturer	Weighted-average dumping margins (percent)	Cash deposit rate (percent)
Hyundai Steel Company	9.49	9.49
POSCO	3.89	0.00
All Others	5.55	5.55

Disclosure

We intend to disclose to parties in this proceeding the calculations performed for this final determination within five days of the date of public announcement of our final determination, in accordance with 19 CFR 351.224(b).

Continuation of Suspension of Liquidation

Pursuant to section 735(c)(1)(B) of the Act, the Department will instruct U.S. Customs and Border Protection (CBP) to continue to suspend liquidation of all entries of hot-rolled steel from Korea, which were entered, or withdrawn from warehouse, for consumption on or after March 22, 2016 (the date of publication of the affirmative *Preliminary Determination*).

Where the product under investigation is also subject to a concurrent countervailing duty investigation, we instruct CBP to require a cash deposit less the amount of the countervailing duty determined to constitute any export subsidies. Because of the affirmative final determination in the countervailing duty investigation, suspension of liquidation will be ordered in that investigation, and so long as suspension of liquidation continues under this antidumping duty investigation, the cash deposit rates for this antidumping duty investigation will be the rates identified in the cash deposit rate column in the rate chart, above. In the event that a countervailing duty order is issued and suspension of liquidation continues in the companion countervailing duty investigation on hot-rolled steel from the Korea, the Department will continue to instruct CBP to require cash deposits adjusted by

the amount of export subsidies, as appropriate. These adjustments are reflected in the final column of the rate chart, above.

International Trade Commission Notification

In accordance with section 735(d) of the Act, we will notify the U.S. International Trade Commission (ITC) of the final affirmative determination of sales at LTFV. Because the final determination in this proceeding is affirmative, in accordance with section 735(b)(2) of the Act, the ITC will make its final determination as to whether the domestic industry in the United States is materially injured, or threatened with material injury, by reason of imports of hot-rolled steel from Korea no later than 45 days after our final determination. If the ITC determines that material injury or threat of material injury does not exist, the proceeding will be terminated and all cash deposits will be refunded. If the ITC determines that such injury does exist, the Department will issue an antidumping duty order directing CBP to assess, upon further instruction by the Department, antidumping duties on all imports of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the effective date of the suspension of liquidation.

Notification Regarding Administrative Protective Orders (APOs)

This notice serves as a reminder to parties subject to APO of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely notification of the return or destruction of APO materials, or conversion to judicial protective order, is hereby

requested. Failure to comply with the regulations and the terms of an APO is a violation subject to sanction.

This determination and notice are issued and published pursuant to sections 735(d) and 777(i)(1) of the Act.

Dated: August 4, 2016.

Ronald K. Lorentzen,

Acting Assistant Secretary for Enforcement and Compliance.

⁷ See Memorandum to the File, "Investigation of Certain Hot-Rolled Steel Flat Products from the Republic of Korea, All-Others Rate Calculation," dated August 4, 2016. We note that it is the Department's practice to calculate (A) a weighted-average of the dumping margins calculated for the mandatory respondents; (B) a simple average of the

dumping margins calculated for the mandatory respondents; and (C) a weighted-average of the dumping margins calculated for the mandatory respondents using each company's publicly-ranged values for the merchandise under consideration. We would compare (B) and (C) to (A) and select the rate closest to (A) as the most appropriate rate for all

other companies. See *Ball Bearings and Parts Thereof From France, Germany, Italy, Japan, and the United Kingdom: Final Results of Antidumping Duty Administrative Reviews, Final Results of Changed-Circumstances Review, and Revocation of an Order in Part*, 75 FR 53661, 53663 (September 1, 2010).

VIII. Recommendation

Appendix II—Scope of the Investigation

The products covered by this investigation are certain hot-rolled, flat-rolled steel products, with or without patterns in relief, and whether or not annealed, painted, varnished, or coated with plastics or other non-metallic substances. The products covered do not include those that are clad, plated, or coated with metal. The products covered include coils that have a width or other lateral measurement (width) of 12.7 mm or greater, regardless of thickness, and regardless of form of coil (*e.g.*, in successively superimposed layers, spirally oscillating, *etc.*). The products covered also include products not in coils (*e.g.*, in straight lengths) of a thickness of less than 4.75 mm and a width that is 12.7 mm or greater and that measures at least 10 times the thickness. The products described above may be rectangular, square, circular, or other shape and include products of either rectangular or non-rectangular cross-section where such cross-section is achieved subsequent to the rolling process, *i.e.*, products which have been “worked after rolling” (*e.g.*, products which have been beveled or rounded at the edges). For purposes of the width and thickness requirements referenced above:

(1) Where the nominal and actual measurements vary, a product is within the scope if application of either the nominal or actual measurement would place it within the scope based on the definitions set forth above unless the resulting measurement makes the product covered by the existing antidumping⁸ or countervailing duty⁹ orders on Certain Cut-To-Length Carbon-Quality Steel Plate Products From the Republic of Korea (A-580-836; C-580-837), and

(2) where the width and thickness vary for a specific product (*e.g.*, the thickness of certain products with non-rectangular cross-section, the width of certain products with non-rectangular shape, *etc.*), the measurement at its greatest width or thickness applies.

Steel products included in the scope of this investigation are products in which: (1) iron predominates, by weight, over each of the other contained elements; (2) the carbon content is 2 percent or less, by weight; and (3) none of the elements listed below exceeds the quantity, by weight, respectively indicated:

- 2.50 percent of manganese, or
- 3.30 percent of silicon, or
- 1.50 percent of copper, or
- 1.50 percent of aluminum, or
- 1.25 percent of chromium, or
- 0.30 percent of cobalt, or

- 0.40 percent of lead, or
- 2.00 percent of nickel, or
- 0.30 percent of tungsten, or
- 0.80 percent of molybdenum, or
- 0.10 percent of niobium, or
- 0.30 percent of vanadium, or
- 0.30 percent of zirconium.

Unless specifically excluded, products are included in this scope regardless of levels of boron and titanium.

For example, specifically included in this scope are vacuum degassed, fully stabilized (commonly referred to as interstitial-free (IF)) steels, high strength low alloy (HSLA) steels, the substrate for motor lamination steels, Advanced High Strength Steels (AHSS), and Ultra High Strength Steels (UHSS). IF steels are recognized as low carbon steels with micro-alloying levels of elements such as titanium and/or niobium added to stabilize carbon and nitrogen elements. HSLA steels are recognized as steels with micro-alloying levels of elements such as chromium, copper, niobium, titanium, vanadium, and molybdenum. The substrate for motor lamination steels contains micro-alloying levels of elements such as silicon and aluminum. AHSS and UHSS are considered high tensile strength and high elongation steels, although AHSS and UHSS are covered whether or not they are high tensile strength or high elongation steels.

Subject merchandise includes hot-rolled steel that has been further processed in a third country, including but not limited to pickling, oiling, levelling, annealing, tempering, temper rolling, skin passing, painting, varnishing, trimming, cutting, punching, and/or slitting, or any other processing that would not otherwise remove the merchandise from the scope of the investigation if performed in the country of manufacture of the hot-rolled steel.

All products that meet the written physical description, and in which the chemistry quantities do not exceed any one of the noted element levels listed above, are within the scope of this investigation unless specifically excluded. The following products are outside of and/or specifically excluded from the scope of this investigation:

- Universal mill plates (*i.e.*, hot-rolled, flat-rolled products not in coils that have been rolled on four faces or in a closed box pass, of a width exceeding 150 mm but not exceeding 1250 mm, of a thickness not less than 4.0 mm, and without patterns in relief);
- Products that have been cold-rolled (cold-reduced) after hot-rolling;¹⁰
- Ball bearing steels;¹¹

¹⁰For purposes of this scope exclusion, rolling operations such as a skin pass, levelling, temper rolling or other minor rolling operations after the hot-rolling process for purposes of surface finish, flatness, shape control, or gauge control do not constitute cold-rolling sufficient to meet this exclusion.

¹¹Ball bearing steels are defined as steels which contain, in addition to iron, each of the following elements by weight in the amount specified: (i) Not less than 0.95 nor more than 1.13 percent of carbon; (ii) not less than 0.22 nor more than 0.48 percent of manganese; (iii) none, or not more than 0.03 percent of sulfur; (iv) none, or not more than 0.03 percent of phosphorus; (v) not less than 0.18 nor more than 0.37 percent of silicon; (vi) not less than 1.25 nor more than 1.65 percent of chromium; (vii)

- Tool steels;¹² and
- Silico-manganese steels;¹³

The products subject to this investigation are currently classified in the Harmonized Tariff Schedule of the United States (HTSUS) under item numbers: 7208.10.1500, 7208.10.3000, 7208.10.6000, 7208.25.3000, 7208.25.6000, 7208.26.0030, 7208.26.0060, 7208.27.0030, 7208.27.0060, 7208.36.0030, 7208.36.0060, 7208.37.0030, 7208.37.0060, 7208.38.0015, 7208.38.0030, 7208.38.0090, 7208.39.0015, 7208.39.0030, 7208.39.0090, 7208.40.6030, 7208.40.6060, 7208.53.0000, 7208.54.0000, 7208.90.0000, 7210.70.3000, 7211.14.0030, 7211.14.0090, 7211.19.1500, 7211.19.2000, 7211.19.3000, 7211.19.4500, 7211.19.6000, 7211.19.7530, 7211.19.7560, 7211.19.7590, 7225.11.0000, 7225.19.0000, 7225.30.3050, 7225.30.7000, 7225.40.7000, 7225.99.0090, 7226.11.1000, 7226.11.9030, 7226.11.9060, 7226.19.1000, 7226.19.9000, 7226.91.5000, 7226.91.7000, and 7226.91.8000. The products subject to the investigation may also enter under the following HTSUS numbers: 7210.90.9000, 7211.90.0000, 7212.40.1000, 7212.40.5000, 7212.50.0000, 7214.91.0015, 7214.91.0060, 7214.91.0090, 7214.99.0060, 7214.99.0075, 7214.99.0090, 7215.90.5000, 7226.99.0180, and 7228.60.6000.

The HTSUS subheadings above are provided for convenience and U.S. Customs purposes only. The written description of the scope of the investigation is dispositive.

DEPARTMENT OF COMMERCE

[International Trade Administration
[A-421-813]]

Certain Hot-Rolled Steel Flat Products From the Netherlands: Final Determination of Sales at Less Than Fair Value and Negative Final Determination of Critical Circumstances

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

none, or not more than 0.28 percent of nickel; (viii) none, or not more than 0.38 percent of copper; and (ix) none, or not more than 0.09 percent of molybdenum.

¹²Tool steels are defined as steels which contain the following combinations of elements in the quantity by weight respectively indicated: (i) More than 1.2 percent carbon and more than 10.5 percent chromium; or (ii) not less than 0.3 percent carbon and 1.25 percent or more but less than 10.5 percent chromium; or (iii) not less than 0.85 percent carbon and 1 percent to 1.8 percent, inclusive, manganese; or (iv) 0.9 percent to 1.2 percent, inclusive, chromium and 0.9 percent to 1.4 percent, inclusive, molybdenum; or (v) not less than 0.5 percent carbon and not less than 3.5 percent molybdenum; or (vi) not less than 0.5 percent carbon and not less than 5.5 percent tungsten.

¹³Silico-manganese steel is defined as steels containing by weight: (i) Not more than 0.7 percent of carbon; (ii) 0.5 percent or more but not more than 1.9 percent of manganese, and (iii) 0.6 percent or more but not more than 2.3 percent of silicon.

⁸Notice of Amendment of Final Determinations of Sales at Less Than Fair Value and Antidumping Duty Orders: Certain Cut-To-Length Carbon-Quality Steel Plate Products From France, India, Indonesia, Italy, Japan and the Republic of Korea, 65 FR 6585 (February 10, 2000).

⁹Notice of Amended Final Determinations: Certain Cut-to-Length Carbon-Quality Steel Plate From India and the Republic of Korea; and Notice of Countervailing Duty Orders: Certain Cut-To-Length Carbon-Quality Steel Plate From France, India, Indonesia, Italy, and the Republic of Korea, 65 FR 6587 (February 10, 2000).

SUMMARY: The Department of Commerce (the Department) determines that imports of certain hot-rolled steel flat products (hot-rolled steel) from the Netherlands are being, or are likely to be, sold in the United States at less than fair value (LTFV). The period of investigation (POI) is July 1, 2014, through June 30, 2015. The final dumping margins of sales at LTFV are listed in the “Final Determination” section of this notice.

DATES: Effective August 12, 2016.

FOR FURTHER INFORMATION CONTACT: Dmitry Vladimirov, AD/CVD Operations, Office I, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482-0665.

SUPPLEMENTARY INFORMATION:

Background

On March 22, 2016, the Department published the *Preliminary Determination* of this antidumping duty (AD) investigation.¹ The following events occurred since the *Preliminary Determination* was issued. In June 2016, AK Steel Corporation (one of the petitioners)² and Tata Steel IJmuiden B.V. (TSIJ) submitted case briefs³ and rebuttal briefs.⁴ A hearing was held on June 24, 2016.

Scope of the Investigation

The products covered by this investigation are certain hot-rolled steel flat products from the Netherlands. For a complete description of the scope of this investigation, see the “Scope of the Investigation,” in Appendix I of this notice.

Scope Comments

In the Preliminary Scope Decision Memorandum,⁵ the Department set

¹ See *Certain Hot-Rolled Steel Flat Products from the Netherlands: Affirmative Preliminary Determination of Sales at Less Than Fair Value, Postponement of Final Determination and Extension of Provisional Measures*, 81 FR 15225 (March 22, 2016) (*Preliminary Determination*).

² AK Steel Corporation (AK Steel), ArcelorMittal USA LLC, Nucor Corporation, SSAB Enterprises, LLC, Steel Dynamics, Inc., and United States Steel Corporation (collectively, the petitioners).

³ See Letter from AK Steel Corporation, “Certain Hot-Rolled Steel Flat Products From The Netherlands: Petitioner’s Case Brief” (June 9, 2016); and Letter from TSIJ, “Certain Hot-Rolled Steel Flat Products From The Netherlands: Case Brief of Tata Steel IJmuiden BV” (June 9, 2016).

⁴ See Letter from AK Steel Corporation “Certain Hot-Rolled Steel Flat Products From The Netherlands: Petitioner’s Rebuttal Brief” (June 20, 2016).

⁵ See Memorandum to Christian Marsh, Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, “Certain Hot-

aside a period of time for parties to address scope issues in case briefs or other written comments on scope issues. In the *Preliminary Determination*, we did not modify the scope language as it appeared in the *Initiation Notice*.⁶ No interested parties submitted scope comments in case or rebuttal briefs; therefore, the scope of this investigation remains unchanged for this final determination.

Analysis of the Comments Received

All issues raised in the case and rebuttal briefs by parties in this investigation are addressed in the Issues and Decision Memorandum, which is hereby adopted by this notice.⁷ A list of the issues raised is attached to this notice as Appendix II. The Issues and Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance’s Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at <https://access.trade.gov> and it is available to all parties in the Central Records Unit, room B-8024 of the main Department of Commerce building. In addition, a complete version of the Issues and Decision Memorandum can be accessed directly on the Internet at <http://enforcement.trade.gov/frn/index.html>. The signed and electronic versions of the Issues and Decision Memorandum are identical in content.

Verification

As provided in section 782(i) of the Tariff Act of 1930, as amended (the Act), in March and April 2016, the Department verified the sales and cost

Rolled Steel Products From Australia, Brazil, Japan, the Netherlands, the Republic of Korea, Turkey, and the United Kingdom: Scope Comments Decision Memorandum for the Preliminary Determinations” dated March 14, 2016 (Preliminary Scope Decision Memorandum).

⁶ See *Preliminary Determination* and accompanying Memorandum from Christian Marsh, Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, to Paul Piquado, Assistant Secretary for Enforcement and Compliance, entitled “Decision Memorandum for the Preliminary Determination in the Less-Than-Fair-Value Investigation of Certain Hot-Rolled Steel Flat Products from the Netherlands” at page 4. See also *Certain Hot-Rolled Steel Flat Products From Australia, Brazil, Japan, the Republic of Korea, the Netherlands, The Republic of Turkey, and the United Kingdom: Initiation of Less-Than-Fair-Value Investigations*, 80 FR 54261, 54262 (September 9, 2015) (*Initiation Notice*).

⁷ See Memorandum from Deputy Assistant Secretary Christian Marsh to Acting Assistant Secretary Ronald K. Lorentzen entitled, “Issues and Decision Memorandum for the Final Affirmative Determination in the Less than Fair Value Investigation of Certain Hot-Rolled Steel Flat Products from the Netherlands,” dated concurrently with this notice (Issues and Decision Memorandum).

data reported by the mandatory respondent. We used standard verification procedures, including an examination of relevant accounting and production records, and original source documents provided by TSIJ.⁸

Changes Since the Preliminary Determination

Based on our analysis of the comments received, pre-verification corrections, and our findings at verification, we made certain changes to the margin calculations for TSIJ. For a discussion of these changes, see the “Margin Calculations” and “Comparisons to Fair Value” sections of the Issues and Decision Memorandum. We have also revised the all-others rate

All-Others Rate

Section 735(c)(5)(A) of the Act provides that the estimated all-others rate shall be an amount equal to the weighted-average of the estimated weighted-average dumping margins established for exporters and producers individually investigated excluding any zero or *de minimis* margins, and margins determined entirely under section 776 of the Act. The Department calculated a company-specific rate for TSIJ that is not zero, *de minimis* or determined entirely under section 776 of the Act. Therefore, for purposes of determining the “all-others” rate and pursuant to section 735(c)(5)(A) of the Act, we are using the weighted-average dumping margin calculated for TSIJ as the estimated weighted-average dumping margin assigned to all other producers and exporters of the merchandise under consideration.

Final Determination

The Department determines that the final weighted-average dumping margins are as follows:

Exporter/Producer	Weighted-average margin (percent)
Tata Steel IJmuiden B.V.	3.73
All-Others	3.73

Final Negative Determination of Critical Circumstances

On December 9, 2015, the Department preliminarily found that critical

⁸ See Memorandum to the File entitled “Verification of the Sales Response of Tata Steel IJmuiden B.V. in the Less-Than-Fair-Value Investigation of Certain Hot-Rolled Steel Flat Products from the Netherlands,” dated April 13, 2016, and Memorandum to the File entitled “Verification of the Cost Response of Tata Steel IJmuiden BV in the Investigation of Certain Hot-Rolled Steel Flat Products from the Netherlands,” dated June 1, 2016.

circumstances do not exist for imports of hot-rolled steel from the Netherlands.⁹ Based on the final dumping margin we established for TSIJ and “all others,” we are not modifying our preliminary finding for the final determination. For a complete discussion of this issue, see the “Critical Circumstances” section of the Issues and Decision Memorandum.

Disclosure

We intend to disclose the calculations performed to interested parties within five days after the public announcement of this final determination in accordance with 19 CFR 351.224(b).

Continuation of Suspension of Liquidation

In accordance with section 735(c)(1)(B) of the Act, the Department will instruct U.S. Customs and Border Protection (CBP) to continue to suspend liquidation of all entries of hot-rolled steel from the Netherlands, as described in Appendix I of this notice, which were entered, or withdrawn from warehouse, for consumption on or after March 22, 2016, the date of publication of the *Preliminary Determination* of this investigation in the **Federal Register**.

Further, pursuant to section 735(c)(1)(B)(ii) of the Act, CBP shall require a cash deposit equal to the estimated amount by which normal value exceeds U.S. price, as follows: (1) For the exporter/producer listed in the table above, the cash deposit rate will be equal to the weighted-average dumping margin which the Department determined in this final determination; the cash deposit rate for the mandatory respondent listed above will be equal to the estimated weighted-average dumping margin determined in this final determination; (2) if the exporter is not a firm identified in this investigation but the producer is, then the cash deposit rate will be equal to the estimated weighted-average dumping margin established for the producer of the subject merchandise; (3) the cash deposit rate for all other producers or exporters will be 3.73 percent, as discussed in the “All Others Rate” section, above. These instructions suspending liquidation will remain in effect until further notice.

⁹ See *Antidumping Duty Investigations of Certain Hot-Rolled Steel Flat Products From Australia, Brazil, Japan, and the Netherlands and Countervailing Duty Investigation of Certain Hot-Rolled Steel Flat Products From Brazil: Preliminary Determinations of Critical Circumstances*, 80 FR 76444, 76446–47 (December 9, 2015).

U.S. International Trade Commission Notification

In accordance with section 735(d) of the Act, we will notify the U.S. International Trade Commission (ITC) of the final affirmative determination of sales at LTFV. Because the final determination in this proceeding is affirmative, in accordance with section 735(b)(2) of the Act, the ITC will make its final determination as to whether the domestic industry in the United States is materially injured, or threatened with material injury, by reason of imports of hot-rolled steel from the Netherlands no later than 45 days after our final determination. If the ITC determines that material injury or threat of material injury does exist, the Department will issue an antidumping duty order directing CBP to assess, upon further instruction by the Department, antidumping duties on all imports of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the effective date of the suspension of liquidation, as discussed above in the “Continuation of Suspension of Liquidation” section. If the ITC determines that material injury or threat of material injury does not exist, the proceeding will be terminated and all cash deposits will be refunded.

Notification Regarding Administrative Protective Orders

This notice serves as a reminder to parties subject to an administrative protective order (APO) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305. Timely notification of the destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and the terms of an APO is subject to sanction.

This determination is issued and published pursuant to sections 735(d) and 777(i)(l) of the Act.

Dated: August 4, 2016.

Ronald K. Lorentzen,

Acting Assistant Secretary for Enforcement and Compliance.

Appendix I

Scope of the Investigation

The products covered by this investigation are certain hot-rolled, flat-rolled steel products, with or without patterns in relief, and whether or not annealed, painted, varnished, or coated with plastics or other non-metallic substances. The products covered do not include those that are clad, plated, or coated with metal. The products covered include coils that have a width or other lateral measurement (“width”) of 12.7

mm or greater, regardless of thickness, and regardless of form of coil (*e.g.*, in successively superimposed layers, spirally oscillating, *etc.*). The products covered also include products not in coils (*e.g.*, in straight lengths) of a thickness of less than 4.75 mm and a width that is 12.7 mm or greater and that measures at least 10 times the thickness. The products described above may be rectangular, square, circular, or other shape and include products of either rectangular or non-rectangular cross-section where such cross-section is achieved subsequent to the rolling process, *i.e.*, products which have been “worked after rolling” (*e.g.*, products which have been beveled or rounded at the edges). For purposes of the width and thickness requirements referenced above:

(1) Where the nominal and actual measurements vary, a product is within the scope if application of either the nominal or actual measurement would place it within the scope based on the definitions set forth above unless the resulting measurement makes the product covered by the existing antidumping¹⁰ or countervailing duty¹¹ orders on Certain Cut-To-Length Carbon-Quality Steel Plate Products From the Republic of Korea (A–580–836; C–580–837), and

(2) where the width and thickness vary for a specific product (*e.g.*, the thickness of certain products with non-rectangular cross-section, the width of certain products with non-rectangular shape, *etc.*), the measurement at its greatest width or thickness applies.

Steel products included in the scope of this investigation are products in which: (1) iron predominates, by weight, over each of the other contained elements; (2) the carbon content is 2 percent or less, by weight; and (3) none of the elements listed below exceeds the quantity, by weight, respectively indicated:

- 2.50 percent of manganese, or
- 3.30 percent of silicon, or
- 1.50 percent of copper, or
- 1.50 percent of aluminum, or
- 1.25 percent of chromium, or
- 0.30 percent of cobalt, or
- 0.40 percent of lead, or
- 2.00 percent of nickel, or
- 0.30 percent of tungsten, or
- 0.80 percent of molybdenum, or
- 0.10 percent of niobium, or
- 0.30 percent of vanadium, or
- 0.30 percent of zirconium.

Unless specifically excluded, products are included in this scope regardless of levels of boron and titanium.

For example, specifically included in this scope are vacuum degassed, fully stabilized

¹⁰ *Notice of Amendment of Final Determinations of Sales at Less Than Fair Value and Antidumping Duty Orders: Certain Cut-To-Length Carbon-Quality Steel Plate Products From France, India, Indonesia, Italy, Japan and the Republic of Korea*, 65 FR 6585 (February 10, 2000).

¹¹ *Notice of Amended Final Determinations: Certain Cut-to-Length Carbon-Quality Steel Plate From India and the Republic of Korea; and Notice of Countervailing Duty Orders: Certain Cut-To-Length Carbon-Quality Steel Plate From France, India, Indonesia, Italy, and the Republic of Korea*, 65 FR 6587 (February 10, 2000).

(commonly referred to as interstitial-free (IF) steels, high strength low alloy (HSLA) steels, the substrate for motor lamination steels, Advanced High Strength Steels (AHSS), and Ultra High Strength Steels (UHSS). IF steels are recognized as low carbon steels with micro-alloying levels of elements such as titanium and/or niobium added to stabilize carbon and nitrogen elements. HSLA steels are recognized as steels with micro-alloying levels of elements such as chromium, copper, niobium, titanium, vanadium, and molybdenum. The substrate for motor lamination steels contains micro-alloying levels of elements such as silicon and aluminum. AHSS and UHSS are considered high tensile strength and high elongation steels, although AHSS and UHSS are covered whether or not they are high tensile strength or high elongation steels.

Subject merchandise includes hot-rolled steel that has been further processed in a third country, including but not limited to pickling, oiling, levelling, annealing, tempering, temper rolling, skin passing, painting, varnishing, trimming, cutting, punching, and/or slitting, or any other processing that would not otherwise remove the merchandise from the scope of the investigation if performed in the country of manufacture of the hot-rolled steel.

All products that meet the written physical description, and in which the chemistry quantities do not exceed any one of the noted element levels listed above, are within the scope of this investigation unless specifically excluded. The following products are outside of and/or specifically excluded from the scope of this investigation:

- Universal mill plates (*i.e.*, hot-rolled, flat-rolled products not in coils that have been rolled on four faces or in a closed box pass, of a width exceeding 150 mm but not exceeding 1250 mm, of a thickness not less than 4.0 mm, and without patterns in relief);

- Products that have been cold-rolled (cold-reduced) after hot-rolling;¹²

- Ball bearing steels;¹³

¹² For purposes of this scope exclusion, rolling operations such as a skin pass, levelling, temper rolling or other minor rolling operations after the hot-rolling process for purposes of surface finish, flatness, shape control, or gauge control do not constitute cold-rolling sufficient to meet this exclusion.

¹³ Ball bearing steels are defined as steels which contain, in addition to iron, each of the following elements by weight in the amount specified: (i) Not less than 0.95 nor more than 1.13 percent of carbon; (ii) not less than 0.22 nor more than 0.48 percent

- Tool steels;¹⁴ and
- Silico-manganese steels;¹⁵

The products subject to this investigation are currently classified in the Harmonized Tariff Schedule of the United States (HTSUS) under item numbers: 7208.10.1500, 7208.10.3000, 7208.10.6000, 7208.25.3000, 7208.25.6000, 7208.26.0030, 7208.26.0060, 7208.27.0030, 7208.27.0060, 7208.36.0030, 7208.36.0060, 7208.37.0030, 7208.37.0060, 7208.38.0015, 7208.38.0030, 7208.38.0090, 7208.39.0015, 7208.39.0030, 7208.39.0090, 7208.40.6030, 7208.40.6060, 7208.53.0000, 7208.54.0000, 7208.90.0000, 7210.70.3000, 7211.14.0030, 7211.14.0090, 7211.19.1500, 7211.19.2000, 7211.19.3000, 7211.19.4500, 7211.19.6000, 7211.19.7530, 7211.19.7560, 7211.19.7590, 7225.11.0000, 7225.19.0000, 7225.30.3050, 7225.30.7000, 7225.40.7000, 7225.99.0090, 7226.11.1000, 7226.11.9030, 7226.11.9060, 7226.19.1000, 7226.19.9000, 7226.91.5000, 7226.91.7000, and 7226.91.8000. The products subject to the investigation may also enter under the following HTSUS numbers: 7210.90.9000, 7211.90.0000, 7212.40.1000, 7212.40.5000, 7212.50.0000, 7214.91.0015, 7214.91.0060, 7214.91.0090, 7214.99.0060, 7214.99.0075, 7214.99.0090, 7215.90.5000, 7226.99.0180, and 7228.60.6000.

The HTSUS subheadings above are provided for convenience and U.S. Customs purposes only. The written description of the scope of the investigation is dispositive.

of manganese; (iii) none, or not more than 0.03 percent of sulfur; (iv) none, or not more than 0.03 percent of phosphorus; (v) not less than 0.18 nor more than 0.37 percent of silicon; (vi) not less than 1.25 nor more than 1.65 percent of chromium; (vii) none, or not more than 0.28 percent of nickel; (viii) none, or not more than 0.38 percent of copper; and (ix) none, or not more than 0.09 percent of molybdenum.

¹⁴ Tool steels are defined as steels which contain the following combinations of elements in the quantity by weight respectively indicated: (i) More than 1.2 percent carbon and more than 10.5 percent chromium; or (ii) not less than 0.3 percent carbon and 1.25 percent or more but less than 10.5 percent chromium; or (iii) not less than 0.85 percent carbon and 1 percent to 1.8 percent, inclusive, manganese; or (iv) 0.9 percent to 1.2 percent, inclusive, chromium and 0.9 percent to 1.4 percent, inclusive, molybdenum; or (v) not less than 0.5 percent carbon and not less than 3.5 percent molybdenum; or (vi) not less than 0.5 percent carbon and not less than 5.5 percent tungsten.

¹⁵ Silico-manganese steel is defined as steels containing by weight: (i) Not more than 0.7 percent of carbon; (ii) 0.5 percent or more but not more than 1.9 percent of manganese, and (iii) 0.6 percent or more but not more than 2.3 percent of silicon.

DEPARTMENT OF COMMERCE

International Trade Administration

[A-351-845]

Certain Hot-Rolled Steel Flat Products From Brazil: Final Determination of Sales at Less Than Fair Value and Final Affirmative Determination of Critical Circumstances, in Part

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (the Department) determines that certain hot-rolled steel flat products (hot-rolled steel) from Brazil are being, or are likely to be, sold in the United States at less than fair value (LTFV). The period of investigation (POI) is July 1, 2014, through June 30, 2015. The final dumping margins of sales at LTFV are listed below in the "Final Determination" section of this notice.

DATES: Effective August 12, 2016.

FOR FURTHER INFORMATION CONTACT: Peter Zukowski, AD/CVD Operations, Office I, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482-0189.

SUPPLEMENTARY INFORMATION:**Background**

On March 22, 2016, the Department published the *Preliminary Determination* of this antidumping duty (AD) investigation.¹ The following events occurred since the *Preliminary Determination* was issued. In March 2016, the Department received supplemental cost responses and revised sales and cost files from Companhia Siderurgica Nacional (CSN), a mandatory respondent in this investigation. In June 2016, SSAB Enterprises, LLC, and Steel Dynamics, Inc.,² and CSN submitted case briefs³ and rebuttal briefs.⁴

Scope of the Investigation

The products covered by this investigation are certain hot-rolled steel flat products from Brazil. For a complete description of the scope of this investigation, see the “Scope of the Investigation,” in Appendix I of this notice.

Scope Comments

In accordance with the Preliminary Scope Determination,⁵ the Department set aside a period of time for parties to address scope issues in case briefs or other written comments on scope issues. No interested parties submitted scope comments in case or rebuttal briefs; therefore, the scope of this investigation remains unchanged for this final determination.

¹ See *Certain Hot-Rolled Steel Flat Products From Brazil: Affirmative Preliminary Determination of Sales at Less Than Fair Value, Postponement of Final Determination and Extension of Provisional Measures*, 81 FR 15235 (March 22, 2016) (*Preliminary Determination*).

² The petitioners in this case are AK Steel Corporation (AK Steel), ArcelorMittal USA LLC, Nucor Corporation, SSAB Enterprises, LLC, Steel Dynamics, Inc., and United States Steel Corporation (collectively, the petitioners). SSAB Enterprises, LLC and Steel Dynamics, Inc., submitted case and rebuttal briefs on behalf of all of the petitioners.

³ See Letter from SSAB Enterprises, LLC, and Steel Dynamics, Inc., “Certain Hot-Rolled Steel Flat Products From Brazil: Petitioners’ Case Brief” (June 17, 2016); Letter from CSN, “Certain Cold-Rolled Steel Flat Products from Brazil and Certain Hot-Rolled Steel Flat Products from Brazil: CSN’s Case Brief” (June 17, 2016).

⁴ See Letter from SSAB Enterprises, LLC, and Steel Dynamics, Inc., “Certain Hot-Rolled Steel Flat Products From Brazil: Petitioners’ Rebuttal Brief” (June 22, 2016); Letter from CSN, “Certain Hot-Rolled Steel Flat Products from Brazil: CSN’s Rebuttal Brief” (June 22, 2016).

⁵ See Memorandum to Christian Marsh, Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, “Certain Hot-Rolled Steel Products From Australia, Brazil, Japan, the Netherlands, the Republic of Korea, Turkey, and the United Kingdom: Scope Comments Decision Memorandum for the Preliminary Determinations” dated March 14, 2016 (*Preliminary Scope Decision Memorandum*).

Analysis of Comments Received

All issues raised in the case and rebuttal briefs by parties in this investigation are addressed in the Issues and Decision Memorandum, which is hereby adopted by this notice.⁶ A list of the issues raised is attached to this notice as Appendix II. The Issues and Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance’s Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at <https://access.trade.gov> and it is available to all parties in the Central Records Unit, room B-8024 of the main Department of Commerce building. In addition, a complete version of the Issues and Decision Memorandum can be accessed directly at <http://enforcement.trade.gov/frn/index.html>. The signed and electronic versions of the Issues and Decision Memorandum are identical in content.

Verification

As provided in section 782(i) of the Tariff Act of 1930, as amended (the Act), in April and May 2016, the Department verified the sales and cost data reported by CSN, pursuant to section 782(i) of the Act. We used standard verification procedures, including an examination of relevant accounting and production records, and original source documents provided by the respondent.⁷

Use of Adverse Facts Available

The Department found in the *Preliminary Determination* that Usiminas Siderurgicas de Minas Gerais S.A. (Usiminas) withheld requested information, significantly impeded the proceeding, and did not cooperate to the best of its ability in responding to the

⁶ See Memorandum to Ronald K. Lorentzen, Acting Assistant Secretary for Enforcement and Compliance, from Christian Marsh, Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations “Issues and Decision Memorandum for the Final Determination of the Antidumping Duty Investigation of Certain Hot-Rolled Steel Flat Products from Brazil” (August 4, 2016) (*Issues and Decision Memorandum*).

⁷ See Memoranda to the File: “Certain Hot-Rolled Steel Flat Products from Brazil: Sales Verification Report for Companhia Siderurgica Nacional,” dated May 20, 2016; “Certain Hot-Rolled Steel Flat Products from Brazil: Sales Verification Report for Companhia Siderurgica Nacional LLC USA,” dated June 2, 2016; “Verification of the Further Manufacturing Response of Companhia Siderurgica Nacional S.A. in the Antidumping Duty Investigation of Hot-Rolled Steel Flat Products from Brazil,” dated June 3, 2016; and “Verification of the Cost of Production Response of Companhia Siderurgica Nacional S.A. in the Antidumping Duty Investigation of Certain Hot-Rolled Steel Flat Products from Brazil,” dated June 8, 2016.

Department’s requests for information.⁸ Therefore, in accordance with sections 776(a)(2)(A) and (C) of the Act, 776(b) of the Act, and 19 CFR 351.308(a), the Department preliminarily determined the weighted-average dumping margin for Usiminas based on facts otherwise available with an adverse inference and preliminarily selected 34.28 percent as the adverse facts-available dumping margin for Usiminas, which is the highest margin alleged in the petition.⁹ This rate was assigned to Usiminas because Usiminas failed to respond to sections B, C, and D of the Department’s questionnaire in this investigation.¹⁰

The Department received no comments regarding its preliminary application of the adverse facts-available dumping margin to Usiminas. For the final determination, the Department has not altered its analysis or its decision to apply the adverse facts-available dumping margin to Usiminas.

Changes Since the Preliminary Determination

Based on CSN’s supplemental cost responses and revised sales and cost files, our findings at verification and our analysis of the comments received, we made certain changes to the margin calculations for CSN. For a discussion of these changes, see the “Margin Calculations” and “Comparisons to Fair Value” sections of the Issues and Decision Memorandum. We have also revised the all-others rate.

All-Others Rate

Section 735(c)(5)(A) of the Act provides that the estimated all-others rate shall be an amount equal to the weighted average of the estimated weighted-average dumping margins established for exporters and producers individually investigated, excluding any zero and *de minimis* margins, and any margins determined entirely under section 776 of the Act. For purposes of this final determination, we are assigning 33.14 percent as the “all-others” rate, which is based on the estimated dumping margin calculated for CSN, the only mandatory respondent for which we calculated a dumping margin.¹¹

⁸ See *Preliminary Determination*.

⁹ *Id.* See also Memorandum to the File entitled, “Certain Hot-Rolled Steel Flat Products from Brazil: Corroboration of a Rate Based on Adverse Facts Available,” dated March 14, 2016.

¹⁰ *Id.*

¹¹ See Memorandum to the File, “Antidumping Duty Investigation of Certain Hot-Rolled Steel Flat Products from Brazil: Calculation of All-Others Rate” (*All-Others Rate Memorandum*), dated August 4, 2016.

Final Determination

The Department determines that the final weighted-average dumping margins are as follows:

Exporter/Producer	Weighted-average margin (percent)	Cash deposit rate (percent)
Companhia Siderurgica Nacional	33.14	29.07
Usiminas Siderurgicas de Minas Gerais S.A. (Usiminas)	34.28	30.51
All-Others	33.14	29.07

Disclosure

We intend to disclose the calculations performed to interested parties within five days of the public announcement of this final determination in accordance with 19 CFR 351.224(b).

Final Affirmative Determination of Critical Circumstances, in Part

On December 9, 2015, the Department found that critical circumstances existed for merchandise exported by CSN and Usiminas, but not for “all others.”¹² Based on the final sales data submitted by CSN and further analysis following the *Preliminary Determination of Critical Circumstances*, we are modifying our findings for the final determination, in part. For the final determination with respect to CSN, our analysis of the reported monthly shipment data demonstrates that shipments of hot-rolled steel by CSN during the comparison period increased by less than 15 percent over shipments during the base period, and thus, we find that critical circumstances do not exist for CSN. As discussed in the “Use of Adverse Facts Available” section above, Usiminas did not cooperate with this investigation. Thus, we based our critical circumstances determination with respect to Usiminas on AFA and find that critical circumstances exist with respect to it. For all others, we determined that the imports during the comparison period increased less than 15 percent over imports during the base period and, accordingly, that critical circumstances do not exist with respect to all other producers and exporters of hot-rolled steel from Brazil. For a complete discussion of this issue, see the “Final Determination of Critical

Circumstances” section of the Issues and Decision Memorandum.

Continuation of Suspension of Liquidation

In accordance with section 735(c)(1)(B) of the Act, the Department will instruct U.S. Customs and Border Protection (CBP) to continue to suspend liquidation of all appropriate entries of hot-rolled steel from Brazil, as described in Appendix I of this notice, which were entered, or withdrawn from warehouse, for consumption on or after March 22, 2016, the date of publication of the *Preliminary Determination* of this investigation in the **Federal Register**. Because of our affirmative determination of critical circumstances for Usiminas, in accordance with section 735(a)(3) and (c)(4)(C) of the Act, suspension of liquidation of hot-rolled steel from Brazil, shall continue to apply, for Usiminas, to unliquidated entries of merchandise entered, or withdrawn from warehouse, for consumption on or after the date which is 90 days before the publication of the *Preliminary Determination*. Because we find in this final determination that critical circumstances do not exist for CSN and for exporters not individually examined and subject to the all-others rate, consistent with section 735(c)(3) of the Act, we will instruct CBP to terminate the suspension of liquidation of entries, and to liquidate without regard to antidumping duties, entries of hot-rolled steel exported by CSN and all other companies, and entered, or withdrawn from warehouse for consumption on or after December 23, 2015, and before March 22, 2016.

Further, the Department will instruct CBP to require a cash deposit equal to the estimated amount by which the normal value exceeds the U.S. price as shown above, adjusted where appropriate for export subsidies found in the final determination of the companion countervailing duty investigation. Consistent with our longstanding practice, where the product under investigation is also

subject to a concurrent countervailing duty investigation, we instruct CBP to require a cash deposit equal to the amount by which the NV exceeds the U.S. price, less the amount of the countervailing duty determined to constitute any export subsidies.¹³ Therefore, in the event that a countervailing duty order is issued and suspension of liquidation is resumed in the companion countervailing duty investigation on hot-rolled steel flat products from Brazil the Department will instruct CBP to require cash deposits adjusted by the amount of export subsidies, as appropriate. These adjustments are reflected in the final column of the rate chart, above.¹⁴ Until such suspension of liquidation is resumed in the companion countervailing duty investigation, and so long as suspension of liquidation continues under this antidumping duty investigation, the cash deposit rates for this antidumping duty investigation will be the rates identified in the weighted-average margin column in the rate chart, above.

International Trade Commission Notification

In accordance with section 735(d) of the Act, we will notify the International Trade Commission (ITC) of the final affirmative determination of sales at LTFV. Because the final determination in this proceeding is affirmative, in accordance with section 735(b)(2) of the Act, the ITC will make its final determination as to whether the domestic industry in the United States is materially injured, or threatened with

¹³ See, e.g., *Welded Line Pipe From the Republic of Turkey: Final Determination of Sales at Less Than Fair Value*, 80 FR 61362 (October 13, 2015) and *Notice of Final Determination of Sales at Less Than Fair Value and Negative Critical Circumstances Determination: Bottom Mount Combination Refrigerator-Freezers From the Republic of Korea*, 77 FR 17413 (March 26, 2012).

¹⁴ See *Countervailing Duty Investigation of Certain Hot-Rolled Steel Flat Products from Brazil: Final Affirmative Determination, and Final Determination of Critical Circumstances, in Part*, dated August 4, 2016; see also the All-Others Rate Memorandum dated concurrently with this notice.

¹² See “Antidumping Duty Investigations of Certain Hot-Rolled Steel Flat Products From Australia, Brazil, Japan, and the Netherlands and Countervailing Duty Investigation of Certain Hot-Rolled Steel Flat Products From Brazil: Preliminary Determinations of Critical Circumstances”, 80 FR 76444 (December 9, 2015) (*Preliminary Determination of Critical Circumstances*).

material injury, by reason of imports of hot-rolled steel from Brazil no later than 45 days after our final determination. If the ITC determines that material injury or threat of material injury does not exist, the proceeding will be terminated and all cash deposits will be refunded. If the ITC determines that such injury does exist, the Department will issue an antidumping duty order directing CBP to assess, upon further instruction by the Department, antidumping duties on all imports of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the effective date of the suspension of liquidation.

Notification Regarding Administrative Protective Orders

This notice serves as a reminder to parties subject to an Administrative Protective Order (APO) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely notification of the return or destruction of APO materials, or conversion to judicial protective order, is hereby requested. Failure to comply with the regulations and the terms of an APO is a violation subject to sanction.

This determination and this notice are issued and published pursuant to sections 735(d) and 777(i)(1) of the Act.

Dated: August 4, 2016.

Ronald K. Lorentzen,

Acting Assistant Secretary for Enforcement and Compliance.

Appendix I—Scope of the Investigation

The products covered by this investigation are certain hot-rolled, flat-rolled steel products, with or without patterns in relief, and whether or not annealed, painted, varnished, or coated with plastics or other non-metallic substances. The products covered do not include those that are clad, plated, or coated with metal. The products covered include coils that have a width or other lateral measurement (“width”) of 12.7 mm or greater, regardless of thickness, and regardless of form of coil (*e.g.*, in successively superimposed layers, spirally oscillating, etc.). The products covered also include products not in coils (*e.g.*, in straight lengths) of a thickness of less than 4.75 mm and a width that is 12.7 mm or greater and that measures at least 10 times the thickness. The products described above may be rectangular, square, circular, or other shape and include products of either rectangular or non-rectangular cross-section where such cross-section is achieved subsequent to the rolling process, *i.e.*, products which have been “worked after rolling” (*e.g.*, products which have been beveled or rounded at the edges). For purposes of the width and thickness requirements referenced above:

(1) Where the nominal and actual measurements vary, a product is within the

scope if application of either the nominal or actual measurement would place it within the scope based on the definitions set forth above unless the resulting measurement makes the product covered by the existing antidumping¹⁵ or countervailing duty¹⁶ orders on Certain Cut-To-Length Carbon-Quality Steel Plate Products From the Republic of Korea (A–580–836; C–580–837), and

(2) where the width and thickness vary for a specific product (*e.g.*, the thickness of certain products with non-rectangular cross-section, the width of certain products with non-rectangular shape, etc.), the measurement at its greatest width or thickness applies.

Steel products included in the scope of this investigation are products in which: (1) Iron predominates, by weight, over each of the other contained elements; (2) the carbon content is 2 percent or less, by weight; and (3) none of the elements listed below exceeds the quantity, by weight, respectively indicated:

- 2.50 percent of manganese, or
- 3.30 percent of silicon, or
- 1.50 percent of copper, or
- 1.50 percent of aluminum, or
- 1.25 percent of chromium, or
- 0.30 percent of cobalt, or
- 0.40 percent of lead, or
- 2.00 percent of nickel, or
- 0.30 percent of tungsten, or
- 0.80 percent of molybdenum, or
- 0.10 percent of niobium, or
- 0.30 percent of vanadium, or
- 0.30 percent of zirconium.

Unless specifically excluded, products are included in this scope regardless of levels of boron and titanium.

For example, specifically included in this scope are vacuum degassed, fully stabilized (commonly referred to as interstitial-free (IF)) steels, high strength low alloy (HSLA) steels, the substrate for motor lamination steels, Advanced High Strength Steels (AHSS), and Ultra High Strength Steels (UHSS). IF steels are recognized as low carbon steels with micro-alloying levels of elements such as titanium and/or niobium added to stabilize carbon and nitrogen elements. HSLA steels are recognized as steels with micro-alloying levels of elements such as chromium, copper, niobium, titanium, vanadium, and molybdenum. The substrate for motor lamination steels contains micro-alloying levels of elements such as silicon and aluminum. AHSS and UHSS are considered high tensile strength and high elongation steels, although AHSS and UHSS are covered whether or not they are high tensile strength or high elongation steels.

¹⁵ *Notice of Amendment of Final Determinations of Sales at Less Than Fair Value and Antidumping Duty Orders: Certain Cut-To-Length Carbon-Quality Steel Plate Products From France, India, Indonesia, Italy, Japan and the Republic of Korea*, 65 FR 6585 (February 10, 2000).

¹⁶ *Notice of Amended Final Determinations: Certain Cut-to-Length Carbon-Quality Steel Plate From India and the Republic of Korea; and Notice of Countervailing Duty Orders: Certain Cut-To-Length Carbon-Quality Steel Plate From France, India, Indonesia, Italy, and the Republic of Korea*, 65 FR 6587 (February 10, 2000).

Subject merchandise includes hot-rolled steel that has been further processed in a third country, including but not limited to pickling, oiling, levelling, annealing, tempering, temper rolling, skin passing, painting, varnishing, trimming, cutting, punching, and/or slitting, or any other processing that would not otherwise remove the merchandise from the scope of the investigation if performed in the country of manufacture of the hot-rolled steel.

All products that meet the written physical description, and in which the chemistry quantities do not exceed any one of the noted element levels listed above, are within the scope of this investigation unless specifically excluded. The following products are outside of and/or specifically excluded from the scope of this investigation:

- Universal mill plates (*i.e.*, hot-rolled, flat-rolled products not in coils that have been rolled on four faces or in a closed box pass, of a width exceeding 150 mm but not exceeding 1250 mm, of a thickness not less than 4.0 mm, and without patterns in relief);

- Products that have been cold-rolled (cold-reduced) after hot-rolling;¹⁷

- Ball bearing steels;¹⁸

- Tool steels;¹⁹ and

- Silico-manganese steels;²⁰

The products subject to this investigation are currently classified in the Harmonized Tariff Schedule of the United States (HTSUS) under item numbers: 7208.10.1500, 7208.10.3000, 7208.10.6000, 7208.25.3000, 7208.25.6000, 7208.26.0030, 7208.26.0060, 7208.27.0030, 7208.27.0060, 7208.36.0030, 7208.36.0060, 7208.37.0030, 7208.37.0060, 7208.38.0015, 7208.38.0030, 7208.38.0090,

¹⁷ For purposes of this scope exclusion, rolling operations such as a skin pass, levelling, temper rolling or other minor rolling operations after the hot-rolling process for purposes of surface finish, flatness, shape control, or gauge control do not constitute cold-rolling sufficient to meet this exclusion.

¹⁸ Ball bearing steels are defined as steels which contain, in addition to iron, each of the following elements by weight in the amount specified: (i) Not less than 0.95 nor more than 1.13 percent of carbon; (ii) not less than 0.22 nor more than 0.48 percent of manganese; (iii) none, or not more than 0.03 percent of sulfur; (iv) none, or not more than 0.03 percent of phosphorus; (v) not less than 0.18 nor more than 0.37 percent of silicon; (vi) not less than 1.25 nor more than 1.65 percent of chromium; (vii) none, or not more than 0.28 percent of nickel; (viii) none, or not more than 0.38 percent of copper; and (ix) none, or not more than 0.09 percent of molybdenum.

¹⁹ Tool steels are defined as steels which contain the following combinations of elements in the quantity by weight respectively indicated: (i) More than 1.2 percent carbon and more than 10.5 percent chromium; or (ii) not less than 0.3 percent carbon and 1.25 percent or more but less than 10.5 percent chromium; or (iii) not less than 0.85 percent carbon and 1 percent to 1.8 percent, inclusive, manganese; or (iv) 0.9 percent to 1.2 percent, inclusive, chromium and 0.9 percent to 1.4 percent, inclusive, molybdenum; or (v) not less than 0.5 percent carbon and not less than 3.5 percent molybdenum; or (vi) not less than 0.5 percent carbon and not less than 5.5 percent tungsten.

²⁰ Silico-manganese steel is defined as steels containing by weight: (i) Not more than 0.7 percent of carbon; (ii) 0.5 percent or more but not more than 1.9 percent of manganese, and (iii) 0.6 percent or more but not more than 2.3 percent of silicon.

7208.39.0015, 7208.39.0030, 7208.39.0090, 7208.40.6030, 7208.40.6060, 7208.53.0000, 7208.54.0000, 7208.90.0000, 7210.70.3000, 7211.14.0030, 7211.14.0090, 7211.19.1500, 7211.19.2000, 7211.19.3000, 7211.19.4500, 7211.19.6000, 7211.19.7530, 7211.19.7560, 7211.19.7590, 7225.11.0000, 7225.19.0000, 7225.30.3050, 7225.30.7000, 7225.40.7000, 7225.99.0090, 7226.11.1000, 7226.11.9030, 7226.11.9060, 7226.19.1000, 7226.19.9000, 7226.91.5000, 7226.91.7000, and 7226.91.8000. The products subject to the investigation may also enter under the following HTSUS numbers: 7210.90.9000, 7211.90.0000, 7212.40.1000, 7212.40.5000, 7212.50.0000, 7214.91.0015, 7214.91.0060, 7214.91.0090, 7214.99.0060, 7214.99.0075, 7214.99.0090, 7215.90.5000, 7226.99.0180, and 7228.60.6000.

The HTSUS subheadings above are provided for convenience and U.S. Customs purposes only. The written description of the scope of the investigation is dispositive.

International Trade Administration

[A-489-826]

Certain Hot-Rolled Steel Flat Products From the Republic of Turkey: Final Determination of Sales at Less Than Fair Value

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (the Department) determines that imports of certain hot-rolled steel flat products (hot-rolled steel) from the Republic of Turkey (Turkey) are being, or are likely to be, sold in the United

States at less than fair value (LTFV). The period of investigation (POI) is July 1, 2014, through June 30, 2015. The final dumping margins of sales at LTFV are listed below in the "Final Determination" section of this notice.

DATES: Effective August 12, 2016.

FOR FURTHER INFORMATION CONTACT: Toni Page or Alexander Cipolla, AD/CVD Operations, Office VII, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482-1398 or (202) 482-4956, respectively.

SUPPLEMENTARY INFORMATION:

Background

On March 22, 2016, the Department published the *Preliminary Determination* of this antidumping duty (AD) investigation.¹ The following events occurred since the *Preliminary Determination* was issued.

The Department received case and rebuttal briefs from Petitioners, Erdemir, and Colakoglu between June 7 and June 20, 2016.² A hearing was held on June 23, 2016.³

Scope of the Investigation

The products covered by this investigation are hot-rolled steel flat products from Turkey. For a full description of the scope of this investigation, see the "Scope of the Investigation," in Appendix I of this notice.

Scope Comments

In the *Preliminary Scope Decision Memorandum*,⁴ the Department set aside a period of time for parties to address scope issues in case briefs or other written comments on scope issues.

In the *Preliminary Determination*, we did not modify the scope language as it

appeared in the *Initiation Notice*.⁵ No interested parties submitted scope comments in case or rebuttal briefs; therefore, the scope of this investigation remains unchanged for this final determination.

Analysis of Comments Received

All issues raised in the case and rebuttal briefs by parties in this investigation are addressed in the Final Issues and Decision Memorandum, which is hereby adopted by this notice.⁶ A list of the issues raised is attached to this notice as Appendix II. The Final Issues and Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at <https://access.trade.gov> and it is available to all parties in the Central Records Unit, Room B-8024 of the main Department of Commerce building. In addition, a complete version of the Final Issues and Decision Memorandum can be accessed directly at <http://enforcement.trade.gov/frn/index.html>. The signed and electronic versions of the Final Issues and Decision Memorandum are identical in content.

Verification

As provided in section 782(i) of the Tariff Act of 1930, as amended (the Act), in March, April, and May 2016, the Department verified the sales and cost data reported by the mandatory respondents Colakoglu Metalurji A.S. (Colakoglu), Colakoglu Dis Ticaret A.S. (COTAS), and Medtrade Incorporated (Medtrade) (collectively, Colakoglu) and Eregli Demir ve Celik Fabrikalari T.A.S. (Erdemir) and Iskenderun Demir Ve Celik (Iskenderun) (collectively, Erdemir). We used standard verification procedures, including an examination of

¹ See *Certain Hot-Rolled Steel Flat Products From the Republic of Turkey: Affirmative Preliminary Determination of Sales at Less Than Fair Value and Postponement of Final Determination*, 81 FR 15231 (March 22, 2016) (*Preliminary Determination*) and accompanying Preliminary Decision Memorandum.

² See the "Table of Authorities" in the Final Issues and Decision Memorandum for a complete list of case and rebuttal briefs filed.

³ See "Transcript of Hearing in the Antidumping Duty Investigation of Certain Hot-Rolled Steel Flat Products from the Republic of Turkey" (June 30, 2016).

⁴ See Memorandum to Christian Marsh, Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, "Certain Hot-Rolled Steel Products From Australia, Brazil, Japan, the Netherlands, the Republic of Korea, Turkey, and the United Kingdom: Scope Comments Decision Memorandum for the Preliminary Determinations," dated March 14, 2016 (*Preliminary Scope Decision Memorandum*).

⁵ See *Preliminary Determination* and accompanying Memorandum from Christian Marsh, Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, to Paul Piquado, Assistant Secretary for Enforcement and Compliance, entitled "Decision Memorandum for the Preliminary Determination in the Less-Than-Fair-Value Investigation of Certain Hot-Rolled Steel Flat Products from the Republic of Turkey" at page 5. See also *Certain Hot-Rolled Steel Flat Products From Australia, Brazil, Japan, the Republic of Korea, the Netherlands, The Republic of Turkey, and the United Kingdom: Initiation of Less-Than-Fair-Value Investigations*, 80 FR 54261, 54262 (September 9, 2015) (*Initiation Notice*).

⁶ See Memorandum to Ronald K. Lorentzen, Acting Assistant Secretary for Enforcement and Compliance, entitled "Issues and Decision Memorandum for the Final Determination in the Antidumping Duty Investigation of Certain Hot-Rolled Steel Flat Products from the Republic of Turkey," dated August 4, 2016 (*Final Issues and Decision Memorandum*).

relevant accounting and production records, and original source documents provided by respondents.⁷

Changes Since the Preliminary Determination

Based on our analysis of the comments received and our findings at verification, we made certain changes to the margin calculations for Colakoglu and Erdemir. For a discussion of these changes, see the Final Issues and Decision Memorandum. We have also revised the all-others rate.

All-Others Rate

Section 735(c)(5)(A) of the Act provides that the estimated all-others rate shall be an amount equal to the weighted-average of the estimated weighted-average dumping margins established for exporters and producers individually investigated excluding any zero or *de minimis* margins, and margins determined entirely under section 776 of the Act. Where the rates for investigated companies are zero or *de minimis*, or based entirely on facts otherwise available, section 735(c)(5)(B) of the Act instructs the Department to establish an “all others” rate using “any reasonable method.”

In this investigation, we calculated weighted-average dumping margins for Colakoglu and Erdemir, that are above *de minimis* and which are not based entirely on facts available. We calculated the all-others rate using a weighted-average of the dumping margins calculated for the mandatory respondents using each company’s publicly-ranged values for the merchandise under consideration.⁸

Final Determination

The Department determines that the final weighted-average dumping margins are as follows:

Exporter/producer	Weighted-average margin (percent)	Cash deposit rate (percent)
Colakoglu Metalurji A.S./Colakoglu Dis Ticaret A.S. ⁹	7.15	7.15
Eregli Demir ve Celik Fabrikalari T.A.S./Iskenderun Demir Ve Celik ¹⁰	3.66	3.65
All-Others	6.67	6.67

Disclosure

We intend to disclose the calculations performed to interested parties within five days of the public announcement of this final determination in accordance with 19 CFR 351.224(b).

Continuation of Suspension of Liquidation

Pursuant to section 735(c)(1)(B) of the Act, the Department will instruct U.S. Customs and Border Protection (CBP) to continue to suspend liquidation of all entries of hot-rolled steel from Turkey, as described in Appendix I of this notice, which were entered, or withdrawn from warehouse, for consumption on or after March 22, 2016, the date of publication of the

Preliminary Determination of this investigation in the **Federal Register**. We also will instruct CBP to require a cash deposit equal to the weighted-average amount by which normal value exceeds U.S. price, as indicated in the table above, adjusted, where appropriate, for export subsidies.

As noted above, where the product under investigation is also subject to a concurrent countervailing duty investigation, we instruct CBP to require a cash deposit less the amount of the countervailing duty determined to constitute any export subsidies. Therefore, in the event that a countervailing duty order is issued and suspension of liquidation is resumed in the companion countervailing duty

investigation on hot-rolled steel from Turkey, the Department will instruct CBP to require cash deposits adjusted by the amount of export subsidies, as appropriate.¹¹ These adjustments are reflected in the “Cash Deposit Rate” column of the rate chart, above. Until such suspension of liquidation is resumed in the companion countervailing duty investigation, and so long as suspension of liquidation continues under this antidumping duty investigation, the cash deposit rates for this antidumping duty investigation will be the rates identified in the weighted-average margin column in the rate chart, above.

⁷ See Memorandum to the File, “Verification of the Sales Response of Colakoglu Metalurji A.S. (Metalurji), Colakoglu Dis Ticaret A.S. (COTAS), and Medtrade Incorporated (Medtrade) in the Antidumping Duty Investigation of Hot-Rolled Steel Flat Products from the Republic of Turkey,” (June 1, 2016) (Colakoglu Sales Verification Report); see also Memorandum to the File, “Verification of the U.S. Sales Responses of Colakoglu Metalurji A.S. (Metalurji), Colakoglu Dis Ticaret A.S. (COTAS), and Medtrade Incorporated (Medtrade) in the Antidumping Duty Investigation of Hot-Rolled Steel Flat Products from the Republic of Turkey,” (June 1, 2016) (Colakoglu CEP Sales Verification Report); see also Memorandum to the File, “Verification of the Cost Response of Colakoglu Metalurji A.S. and its Affiliates in the Antidumping Duty Investigation of Hot-Rolled Steel Flat Product from Turkey,” (June 1, 2016) (Colakoglu Cost Verification Report); see also Memorandum to the File, “Verification of the Sales Response of Eregli Demir ve Celik Fabrikalari T.A.S. in the Antidumping Investigation of Hot Rolled Steel Flat Products from Turkey,” (May 31, 2016) (Erdemir Sales Verification Report); see also Memorandum to the File, “Verification of the Cost Response of Eregli Demir ve Celik

Fabrikalari T.A.S. and its affiliates Iskenderun Demir Ve Celik,” (May 30, 2016) (Erdemir Cost Verification Report).
⁸ With two respondents, we normally calculate (A) a weighted-average of the dumping margins calculated for the mandatory respondents; (B) a simple average of the dumping margins calculated for the mandatory respondents; and (C) a weighted-average of the dumping margins calculated for the mandatory respondents using each company’s publicly-ranged values for the merchandise under consideration. We would compare (B) and (C) to (A) and select the rate closest to (A) as the most appropriate rate for all other companies. See *Ball Bearings and Parts Thereof From France, Germany, Italy, Japan, and the United Kingdom: Final Results of Antidumping Duty Administrative Reviews, Final Results of Changed-Circumstances Review, and Revocation of an Order in Part*, 75 FR 53661, 53663 (September 1, 2010). As complete publicly ranged sales data was available, we based the all-others rate on the publicly ranged sales data of the mandatory respondents. For a complete BPI explanation, please see Memorandum to the File, entitled “Antidumping Duty Investigation of Hot-Rolled Steel Flat Products from the Republic of

Turkey: Final Determination Calculation for the ‘All-Others’ Rate,” dated August 4, 2016 (All-Others Calculation Memorandum).
⁹ As in the *Preliminary Determination*, the Department continues to find that Colakoglu Metalurji A.S. and Colakoglu Dis Ticaret A.S. are a single entity. See “the ‘Affiliation and Collapsing’” section of the Preliminary Decision Memorandum.
¹⁰ As in the *Preliminary Determination*, the Department continues to find that Eregli Demir ve Celik Fabrikalari T.A.S. and Iskenderun Demir Ve Celik are a single entity. See the “Affiliation and Collapsing” section of the Preliminary Decision Memorandum.
¹¹ See Memorandum to Thomas Gilgunn, Program Manager for AD/CVD Operations Office VII, entitled “Investigation of Certain Hot-Rolled Steel Flat Products from the Republic of Turkey: Final Analysis Memorandum for Eregli Demir ve Celik Fabrikalari T.A.S. and its Affiliates,” dated August 4, 2016. (Erdemir Final Calculation Memorandum) in the “Adjustments to the Margin Program” section.

U.S. International Trade Commission Notification

In accordance with section 735(d) of the Act, we will notify the U.S. International Trade Commission (ITC) of the final affirmative determination of sales at LTFV. Because the final determination in this proceeding is affirmative, in accordance with section 735(b)(2) of the Act, the ITC will make its final determination as to whether the domestic industry in the United States is materially injured, or threatened with material injury, by reason of imports of hot-rolled steel from Turkey no later than 45 days after our final determination. If the ITC determines that material injury or threat of material injury does not exist, the proceeding will be terminated and all cash deposits will be refunded. If the ITC determines that such injury does exist, the Department will issue an antidumping duty order directing CBP to assess, upon further instruction by the Department, antidumping duties on all imports of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the effective date of the suspension of liquidation as discussed in the "Continuation of Suspension of Liquidation" section.

Notification Regarding Administrative Protective Orders

This notice serves as a reminder to parties subject to an administrative protective order (APO) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely notification of the return or destruction of APO materials, or conversion to judicial protective order, is hereby requested. Failure to comply with the regulations and the terms of an APO is a violation subject to sanction.

This determination and this notice are issued and published pursuant to sections 735(d) and 777(i)(1) of the Act.

Dated: August 4, 2016.

Ronald K. Lorentzen,

Acting Assistant Secretary for Enforcement and Compliance.

Appendix I

Scope of the Investigation

The products covered by this investigation are certain hot-rolled, flat-rolled steel products, with or without patterns in relief, and whether or not annealed, painted, varnished, or coated with plastics or other non-metallic substances. The products covered do not include those that are clad, plated, or coated with metal. The products covered include coils that have a width or other lateral measurement ("width") of 12.7 mm or greater, regardless of thickness, and

regardless of form of coil (e.g., in successively superimposed layers, spirally oscillating, etc.). The products covered also include products not in coils (e.g., in straight lengths) of a thickness of less than 4.75 mm and a width that is 12.7 mm or greater and that measures at least 10 times the thickness. The products described above may be rectangular, square, circular, or other shape and include products of either rectangular or non-rectangular cross-section where such cross-section is achieved subsequent to the rolling process, i.e., products which have been "worked after rolling" (e.g., products which have been beveled or rounded at the edges). For purposes of the width and thickness requirements referenced above:

(1) Where the nominal and actual measurements vary, a product is within the scope if application of either the nominal or actual measurement would place it within the scope based on the definitions set forth above unless the resulting measurement makes the product covered by the existing antidumping¹² or countervailing duty¹³ orders on Certain Cut-To-Length Carbon-Quality Steel Plate Products From the Republic of Korea (A-580-836; C-580-837), and

(2) where the width and thickness vary for a specific product (e.g., the thickness of certain products with non-rectangular cross-section, the width of certain products with non-rectangular shape, etc.), the measurement at its greatest width or thickness applies.

Steel products included in the scope of this investigation are products in which: (1) Iron predominates, by weight, over each of the other contained elements; (2) the carbon content is 2 percent or less, by weight; and (3) none of the elements listed below exceeds the quantity, by weight, respectively indicated:

- 2.50 percent of manganese, or
- 3.30 percent of silicon, or
- 1.50 percent of copper, or
- 1.50 percent of aluminum, or
- 1.25 percent of chromium, or
- 0.30 percent of cobalt, or
- 0.40 percent of lead, or
- 2.00 percent of nickel, or
- 0.30 percent of tungsten, or
- 0.80 percent of molybdenum, or
- 0.10 percent of niobium, or
- 0.30 percent of vanadium, or
- 0.30 percent of zirconium.

Unless specifically excluded, products are included in this scope regardless of levels of boron and titanium.

For example, specifically included in this scope are vacuum degassed, fully stabilized (commonly referred to as interstitial-free (IF))

¹² See *Notice of Amendment of Final Determinations of Sales at Less Than Fair Value and Antidumping Duty Orders: Certain Cut-To-Length Carbon-Quality Steel Plate Products From France, India, Indonesia, Italy, Japan and the Republic of Korea*, 65 FR 6585 (February 10, 2000).

¹³ See *Notice of Amended Final Determinations: Certain Cut-to-Length Carbon-Quality Steel Plate From India and the Republic of Korea; and Notice of Countervailing Duty Orders: Certain Cut-To-Length Carbon-Quality Steel Plate From France, India, Indonesia, Italy, and the Republic of Korea*, 65 FR 6587 (February 10, 2000).

steels, high strength low alloy (HSLA) steels, the substrate for motor lamination steels, Advanced High Strength Steels (AHSS), and Ultra High Strength Steels (UHSS). IF steels are recognized as low carbon steels with micro-alloying levels of elements such as titanium and/or niobium added to stabilize carbon and nitrogen elements. HSLA steels are recognized as steels with micro-alloying levels of elements such as chromium, copper, niobium, titanium, vanadium, and molybdenum. The substrate for motor lamination steels contains micro-alloying levels of elements such as silicon and aluminum. AHSS and UHSS are considered high tensile strength and high elongation steels, although AHSS and UHSS are covered whether or not they are high tensile strength or high elongation steels.

Subject merchandise includes hot-rolled steel that has been further processed in a third country, including but not limited to pickling, oiling, levelling, annealing, tempering, temper rolling, skin passing, painting, varnishing, trimming, cutting, punching, and/or slitting, or any other processing that would not otherwise remove the merchandise from the scope of the investigation if performed in the country of manufacture of the hot-rolled steel.

All products that meet the written physical description, and in which the chemistry quantities do not exceed any one of the noted element levels listed above, are within the scope of this investigation unless specifically excluded. The following products are outside of and/or specifically excluded from the scope of this investigation:

- Universal mill plates (i.e., hot-rolled, flat-rolled products not in coils that have been rolled on four faces or in a closed box pass, of a width exceeding 150 mm but not exceeding 1250 mm, of a thickness not less than 4.0 mm, and without patterns in relief);
- Products that have been cold-rolled (cold-reduced) after hot-rolling;¹⁴
- Ball bearing steels;¹⁵
- Tool steels;¹⁶ and

¹⁴ For purposes of this scope exclusion, rolling operations such as a skin pass, levelling, temper rolling or other minor rolling operations after the hot-rolling process for purposes of surface finish, flatness, shape control, or gauge control do not constitute cold-rolling sufficient to meet this exclusion.

¹⁵ Ball bearing steels are defined as steels which contain, in addition to iron, each of the following elements by weight in the amount specified: (i) Not less than 0.95 nor more than 1.13 percent of carbon; (ii) not less than 0.22 nor more than 0.48 percent of manganese; (iii) none, or not more than 0.03 percent of sulfur; (iv) none, or not more than 0.03 percent of phosphorus; (v) not less than 0.18 nor more than 0.37 percent of silicon; (vi) not less than 1.25 nor more than 1.65 percent of chromium; (vii) none, or not more than 0.28 percent of nickel; (viii) none, or not more than 0.38 percent of copper; and (ix) none, or not more than 0.09 percent of molybdenum.

¹⁶ Tool steels are defined as steels which contain the following combinations of elements in the quantity by weight respectively indicated: (i) More than 1.2 percent carbon and more than 10.5 percent chromium; or (ii) not less than 0.3 percent carbon and 1.25 percent or more but less than 10.5 percent chromium; or (iii) not less than 0.85 percent carbon and 1 percent to 1.8 percent, inclusive, manganese; or (iv) 0.9 percent to 1.2 percent, inclusive,

• Silico-manganese steels;¹⁷

The products subject to this investigation are currently classified in the Harmonized Tariff Schedule of the United States (HTSUS) under item numbers: 7208.10.1500, 7208.10.3000, 7208.10.6000, 7208.25.3000, 7208.25.6000, 7208.26.0030, 7208.26.0060, 7208.27.0030, 7208.27.0060, 7208.36.0030, 7208.36.0060, 7208.37.0030, 7208.37.0060, 7208.38.0015, 7208.38.0030, 7208.38.0090, 7208.39.0015, 7208.39.0030, 7208.39.0090, 7208.40.6030, 7208.40.6060, 7208.53.0000, 7208.54.0000, 7208.90.0000, 7210.70.3000, 7211.14.0030, 7211.14.0090, 7211.19.1500, 7211.19.2000, 7211.19.3000, 7211.19.4500, 7211.19.6000, 7211.19.7530, 7211.19.7560, 7211.19.7590, 7225.11.0000, 7225.19.0000, 7225.30.3050, 7225.30.7000, 7225.40.7000, 7225.99.0090, 7226.11.1000, 7226.11.9030, 7226.11.9060, 7226.19.1000, 7226.19.9000, 7226.91.5000, 7226.91.7000, and 7226.91.8000. The products subject to the investigation may also enter under the following HTSUS numbers: 7210.90.9000, 7211.90.0000, 7212.40.1000, 7212.40.5000, 7212.50.0000, 7214.91.0015, 7214.91.0060, 7214.91.0090, 7214.99.0060, 7214.99.0075, 7214.99.0090, 7215.90.5000, 7226.99.0180, and 7228.60.6000.

The HTSUS subheadings above are provided for convenience and U.S. Customs and Border Protection purposes only. The written description of the scope of the investigation is dispositive.

BILLING CODE 3510-DS-P

DEPARTMENT OF COMMERCE

International Trade Administration

[A-570-920]

Lightweight Thermal Paper From the People's Republic of China: Preliminary Results of Antidumping Duty Administrative Review; 2014-2015

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce ("Department") is conducting an administrative review of the antidumping duty order on lightweight thermal paper ("LWTP") from the People's Republic of China ("PRC"). The period of review ("POR") is November 1, 2014, through October 31, 2015. The review covers two exporters of subject merchandise: Jaan Huey Co. Ltd. ("Jaan Huey") and Shanghai Hanhong Paper Co., Ltd. and Hanhong Paper Co. Ltd (together, "Hanhong"). Because neither respondent participated in this review, the Department preliminarily finds that Jaan Huey and Hanhong have not demonstrated eligibility for a separate rate in this segment of the proceeding, and therefore, for the preliminary results, we are treating both as part of the PRC-wide entity. Interested parties are invited to comment on these preliminary results.

DATES: Effective August 12, 2016.

FOR FURTHER INFORMATION CONTACT: Keith Haynes, AD/CVD Operations, Office III, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482-5139.

SUPPLEMENTARY INFORMATION:

Background

On January 7, 2016, the Department initiated the seventh administrative review of the antidumping duty order on LWTP from the PRC.¹ On February 2, 2016, the Department issued

¹ See *Initiation of Antidumping and Countervailing Duty Administrative Reviews*, 81 FR 736 (January 7, 2016) ("Initiation Notice").

antidumping questionnaires to Jaan Huey and Hanhong. On February 16, 2016, Jaan Huey notified the Department that it would not be participating in this administrative review.² The Hanhong companies did not respond to the Department's request for information.

Scope of the Order

The merchandise covered by this review includes certain lightweight thermal paper, which is thermal paper with a basis weight of 70 grams per square meter (g/m²) (with a tolerance of ± 4.0 g/m²) or less; irrespective of dimensions;³ with or without a base coat⁴ on one or both sides; with thermal active coating(s)⁵ on one or both sides that is a mixture of the dye and the developer that react and form an image when heat is applied; with or without a top coat;⁶ and without an adhesive backing. Certain lightweight thermal paper is typically (but not exclusively) used in point-of-sale applications such as ATM receipts, credit card receipts, gas pump receipts, and retail store receipts. The merchandise subject to this review may be classified in the Harmonized Tariff Schedule of the United States ("HTSUS") under subheadings 3703.10.60, 4811.59.20, 4811.90.8040, 4811.90.9090, 4820.10.20, 4823.40.00, 4811.90.8030, 4811.90.8050, 4811.90.9030, and 4811.90.9050.^{7 8}

² See letter from Jaan Huey, "Notice of Non-Participation in ADD Review: Annual Antidumping Administrative Review of Lightweight Thermal Paper from the People's Republic of China," dated February 16, 2016.

³ LWTP is typically produced in jumbo rolls that are slit to the specifications of the converting equipment and then converted into finished slit rolls. Both jumbo and converted rolls (as well as LWTP in any other form, presentation, or dimension) are covered by the scope of these orders.

⁴ A base coat, when applied, is typically made of clay and/or latex and like materials and is intended to cover the rough surface of the paper substrate and to provide insulating value.

⁵ A thermal active coating is typically made of sensitizer, dye, and co-reactant.

⁶ A top coat, when applied, is typically made of polyvinyl acetone, polyvinyl alcohol, and/or like materials and is intended to provide environmental protection, an improved surface for press printing, and/or wear protection for the thermal print head.

⁷ HTSUS subheading 4811.90.8000 was a classification used for LWTP until January 1, 2007. Effective that date, subheading 4811.90.8000 was replaced with 4811.90.8020 (for gift wrap, a non-subject product) and 4811.90.8040 (for "other" including LWTP). HTSUS subheading 4811.90.9000 was a classification for LWTP until July 1, 2005. Effective that date, subheading 4811.90.9000 was replaced with 4811.90.9010 (for tissue paper, a non-subject product) and 4811.90.9090 (for "other," including LWTP).

⁸ As of January 1, 2009, the International Trade Commission deleted HTSUS subheadings 4811.90.8040 and 4811.90.9090 and added HTSUS subheadings 4811.90.8030, 4811.90.8050,

Continued

Although HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope of these orders is dispositive.

Non-Market Economy Country

The Department considers the PRC to be a nonmarket economy (“NME”) country.⁹ In accordance with section 771(18)(C)(i) of the Tariff Act of 1930, as amended (“the Act”), any determination that a foreign country is an NME country shall remain in effect until revoked by the administering authority. Therefore, we continue to treat the PRC as an NME country for purposes of these preliminary results.

Application of Separate Rates in NME Proceedings

In the *Initiation Notice*, the Department notified parties of the application process by which exporters may obtain separate rate status in an NME proceeding.¹⁰ It is the Department’s policy to assign all exporters of the merchandise subject to review in NME countries a single rate unless an exporter can affirmatively demonstrate an absence of government control, both in law (*de jure*) and in fact (*de facto*), with respect to exports. To establish whether a company is sufficiently independent to be entitled to a separate, company-specific rate, the Department analyzes each exporting entity in an NME country under the test established in *Sparklers*,¹¹ as further developed by *Silicon Carbide*.¹² However, if the Department determines that a company is wholly foreign-owned, then an analysis of the *de jure* and *de facto* criteria is not necessary to determine whether it is independent from government control.¹³

4811.90.9030, and 4811.90.9050 to the *Harmonized Tariff Schedule of the United States (2009)*. See *Harmonized Tariff Schedule of the United States (2009)*, available at <www.usitc.gov>. These HTSUS subheadings were added to the scope of the order in LWTP’s LTFV investigation.

⁹ See, e.g., *Certain Kitchen Appliance Shelving and Racks from the People’s Republic of China: Preliminary Results of the First Administrative Review, Preliminary Rescission, in Part, and Extension of Time Limits for the Final Results*, 76 FR 62765, 62767–68 (October 11, 2011), unchanged in *Certain Kitchen Appliance Shelving and Racks from the People’s Republic of China: Final Results and Partial Rescission of First Antidumping Duty Administrative Review*, 77 FR 21734 (April 11, 2012).

¹⁰ See *Initiation Notice*.

¹¹ See *Final Determination of Sales at Less Than Fair Value: Sparklers from the People’s Republic of China*, 56 FR 20588 (May 6, 1991) (“*Sparklers*”).

¹² See *Notice of Final Determination of Sales at Less Than Fair Value: Silicon Carbide from the People’s Republic of China*, 59 FR 22585 (May 2, 1994) (“*Silicon Carbide*”).

¹³ See, e.g., *Final Results of Antidumping Duty Administrative Review: Petroleum Wax Candles*

Methodology

The Department is conducting this review in accordance with section 751 of the Act. Neither mandatory respondent cooperated to the best of its ability because neither provided a response to the Department’s questionnaire. Further, neither respondent submitted a separate rate application or certification to demonstrate eligibility to receive a separate rate. Thus, the Department preliminarily determines that the application of adverse facts available (“AFA”) is warranted for these preliminary results, in accordance with section 776 of the Act and 19 CFR 351.308 and, because neither demonstrated eligibility for a separate rate, we are treating the mandatory respondents as part of the PRC-wide entity.

PRC-Wide Entity

The Department’s change in policy regarding conditional review of the PRC-wide entity applies to this administrative review.¹⁴ Under this policy, the PRC-wide entity will not be under review unless a party specifically requests, or the Department self-initiates, a review of the entity. Because no party requested a review of the PRC-wide entity in this review, the entity is not under review, and the entity’s rate is not subject to change (*i.e.*, 115.29 percent).¹⁵

Preliminary Results of Review

The preliminary weighted-average antidumping duty margin percentage is as follows:

Producer and/or exporter	Weighted-average dumping margin (percent)
PRC-Wide Entity	115.29

Public Comment and Opportunity To Request a Hearing

Interested parties may submit case briefs within 30 days after the date of publication of these preliminary results of review in the **Federal Register**.¹⁶

from the *People’s Republic of China*, 72 FR 52355, 52356 (September 13, 2007).

¹⁴ See *Antidumping Proceedings: Announcement of Change in Department Practice for Respondent Selection in Antidumping Duty Proceedings and Conditional Review of the Nonmarket Economy Entity in NME Antidumping Duty Proceedings*, 78 FR 65963 (November 4, 2013).

¹⁵ See “*Lightweight Thermal Paper from the People’s Republic of China: Final Determination of Sales at Less Than Fair Value*,” 73 FR 57329 (Oct 2, 2008).

¹⁶ See 19 CFR 351.309(c)(1)(ii).

Rebuttals to case briefs must be limited to issues raised in the case briefs and must be filed within five days following the time limit for filing case briefs.¹⁷ Parties who submit arguments are requested to submit with the argument (a) a statement of the issue, (b) a brief summary of the argument, and (c) a table of authorities.¹⁸ Parties submitting briefs should do so pursuant to the Department’s electronic filing system, ACCESS.¹⁹

Any interested party may request a hearing within 30 days of publication of this notice.²⁰ Hearing requests should contain the following information: (1) The party’s name, address, and telephone number; (2) the number of participants; and (3) a list of the issues to be discussed. Oral presentations will be limited to issues raised in the briefs. If a request for a hearing is made, parties will be notified of the time and date for the hearing to be held at the U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230.²¹

The Department intends to issue the final results of this administrative review, which will include the results of our analysis of all issues raised in the case briefs, within 120 days of publication of these preliminary results in the **Federal Register**, pursuant to section 751(a)(3)(A) of the Act.

Assessment Rates

Upon issuance of the final results, the Department will determine, and CBP shall assess, antidumping duties on all appropriate entries covered by this review. The Department intends to issue assessment instructions to CBP 15 days after the publication date of the final results of this review.

Cash Deposit Requirements

The following cash deposit requirements will be effective upon publication of the final results of this administrative review for all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the publication date, as provided for by section 751(a)(2)(C) of the Act: (1) For previously investigated or reviewed PRC and non-PRC exporters who are not under review in this segment of the proceeding but who have separate rates, the cash deposit rate will continue to be the exporter-specific rate published for the most recent period; (2) for all PRC

¹⁷ See 19 CFR 351.309(d)(1)–(2).

¹⁸ See 19 CFR 351.309(c)(2), (d)(2).

¹⁹ See 19 CFR 351.303 (for general filing requirements).

²⁰ See 19 CFR 351.310(c).

²¹ See 19 CFR 351.310(d).

exporters of subject merchandise that have not been found to be entitled to a separate rate, the cash deposit rate will be the PRC-wide rate of 115.29 percent; and (3) for all non-PRC exporters of subject merchandise which have not received their own rate, the cash deposit rate will be the rate applicable to the PRC exporter(s) that supplied that non-PRC exporter. These deposit requirements, when imposed, shall remain in effect until further notice.

Notification to Importers

This notice also serves as a preliminary reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

This administrative review and notice are in accordance with sections 751(a)(1) and 777(i) of the Act and 19 CFR 351.213.

Dated: August 5, 2016.

Ronald K. Lorentzen,

Acting Assistant Secretary for Enforcement and Compliance.

DEPARTMENT OF COMMERCE

International Trade Administration

[A-821-811]

Ammonium Nitrate From the Russian Federation: Final Results of Sunset Review and Revocation of Antidumping Duty Order

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: On July 1, 2016, the Department of Commerce (the Department) initiated the second sunset review of the antidumping duty order on ammonium nitrate from the Russian Federation (Russia). Because no domestic interested party filed a notice of intent to participate in response to the notice of initiation, the Department is revoking the antidumping duty order on ammonium nitrate from Russia.

DATES: Effective August 20, 2016.

FOR FURTHER INFORMATION CONTACT: David Crespo at (202) 482-3693, AD/CVD Operations, Office II, Enforcement and Compliance, International Trade

Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230.

SUPPLEMENTARY INFORMATION:

Background

On April 27, 2011, the Department terminated the agreement suspending the antidumping duty investigation and issued an antidumping duty order on ammonium nitrate from Russia.¹ On July 1, 2016, the Department initiated a sunset review of the antidumping duty Order pursuant to section 751(c) of the Tariff Act of 1930, as amended ("the Act").² We received no notice of intent to participate in response to the *Initiation Notice* from domestic interested parties by the applicable deadline.³ As a result, the Department concludes that no domestic party intends to participate in this sunset review.⁴ On July 21, 2016, we notified the International Trade Commission, in writing, that we intend to revoke the Order.⁵

Scope of the Order

The scope of this order includes solid, fertilizer grade ammonium nitrate products, whether prilled, granular, or in other solid form, with or without additives or coating, and with a bulk density equal to or greater than 53 pounds per cubic foot. Specifically excluded from this scope is solid ammonium nitrate with a bulk density less than 53 pounds per cubic foot (commonly referred to as industrial or explosive grade ammonium nitrate). The merchandise subject to this order is classified in the Harmonized Tariff Schedule of the United States (HTSUS) at subheadings 3102.30.00.00 and 3102.290000. Although the HTSUS subheadings are provided for convenience and customs purposes, the written description of the merchandise within the scope is dispositive.

Revocation

Pursuant to section 751(c)(3)(A) of the Act and 19 CFR 351.218(d)(1)(iii)(B)(3), if no domestic interested party files a notice of intent to participate, the Department shall issue a final determination revoking the order within 90 days of the initiation of the review. Because no domestic interested party filed a notice of intent to participate in

¹ See *Termination of the Suspension Agreement on Solid Fertilizer Grade Ammonium Nitrate From the Russian Federation and Notice of Antidumping Duty Order*; 76 FR 23569 (April 27, 2011) (*Order*).

² See *Initiation of Five-Year ("Sunset") Review*; 81 FR 43185 (July 1, 2016) (*Initiation Notice*).

³ See 19 CFR 351.218(d)(1)(i).

⁴ See 19 CFR 351.218(d)(1)(iii)(A).

⁵ See 19 CFR 351.218(d)(1)(iii)(B)(2).

this sunset review, the Department finds that no domestic interested party is participating in this sunset review. Therefore, we are revoking the *Order*. The effective date of revocation is August 20, 2016, the fifth anniversary of the date of publication in the **Federal Register** of the *Continuation of the Order*.⁶

Pursuant to section 751(c)(3)(A) of the Act and 19 CFR 351.222(i)(2)(i), the Department intends to issue instructions to U.S. Customs and Border Protection to terminate the suspension of liquidation of entries of the merchandise subject to the order which were entered, or withdrawn from warehouse, for consumption on or after August 20, 2016. Entries of subject merchandise prior to August 20, 2016, will continue to be subject to the suspension of liquidation and requirements for deposits of estimated antidumping duties. The Department will conduct administrative reviews of the order with respect to subject merchandise entered prior to the effective date of revocation in response to appropriately filed requests for review.

These final results of the five-year (sunset) review and notice of revocation of the antidumping duty order are published in accordance with sections 751(c) and 777(i)(1) of the Act.

Dated: August 5, 2016.

Ronald K. Lorentzen,

Acting Assistant Secretary for Enforcement and Compliance.

International Trade Administration

[C-489-827]

Countervailing Duty Investigation of Certain Hot-Rolled Steel Flat Products From the Republic of Turkey: Final Affirmative Determination

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (the Department) determines that countervailable subsidies are being provided to producers and exporters of certain hot-rolled steel flat products (hot-rolled steel) from the Republic of Turkey (Turkey). For information on the estimated subsidy rates, see the "Final

⁶ See 19 CFR 351.222(i)(2); see also *Continuation of Antidumping Duty Order on Solid Fertilizer Grade Ammonium Nitrate From the Russian Federation*, 76 FR 49449 (August 20, 2011).

Determination” section of this notice. The period of investigation is January 1, 2014, through December 31, 2014.

DATES: Effective August 12, 2016.

FOR FURTHER INFORMATION CONTACT: Emily Halle or Gene Calvert, AD/CVD Operations, Office VII, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone (202) 482-0176 or (202) 482-3586, respectively.

SUPPLEMENTARY INFORMATION:

Background

The Department published the *Preliminary Determination* on January 15, 2016.¹ A summary of the events that occurred since the Department published the *Preliminary Determination*, as well as a full discussion of the issues raised by parties for this final determination, may be found in the Issues and Decision Memorandum.² The Issues and Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance’s Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at <http://access.trade.gov>, and is available to all parties in the Central Records Unit, Room B8024 of the main Department of Commerce building. In addition, a complete version of the Issues and Decision Memorandum can be accessed directly at <http://enforcement.trade.gov/frn/>. The signed Issues and Decision Memorandum and the electronic version are identical in content.

Scope Comments

In accordance with the Preliminary Scope Determination,³ the Department set aside a period of time for parties to

¹ See *Countervailing Duty Investigation of Certain Hot-Rolled Steel Flat Products from the Republic of Turkey: Preliminary Negative Countervailing Duty Determination and Alignment of Final Determination with Final Antidumping Duty Determination*, 81 FR 2166 (January 15, 2016) (*Preliminary Determination*).

² See Memorandum, “Issues and Decision Memorandum for the Final Determination in the Countervailing Duty Investigation of Certain Hot-Rolled Steel Flat Products from the Republic of Turkey,” (Issues and Decision Memorandum), dated concurrently with this determination and hereby adopted by this notice.

³ See Memorandum, “Certain Hot-Rolled Steel Products from Australia, Brazil, Japan, the Netherlands, the Republic of Korea, Turkey and the United Kingdom: Scope Comments Decision Memorandum for the Preliminary Determinations,” (March 14, 2016) (*Preliminary Scope Determination*).

address scope issues in case briefs or other written comments on scope issues.

In the *Preliminary Determination*, we did not modify the scope language as it appeared in the *Initiation Notice*.⁴ No interested party submitted scope comments in case or rebuttal briefs; therefore, the scope of this investigation remains unchanged for this final determination.

Scope of the Investigation

The products covered by this investigation are hot-rolled steel from Turkey. For a complete description of the scope of this investigation, see the “Scope of the Investigation,” in Appendix I of this notice.

Analysis of Subsidy Programs and Comments Received

The subsidy programs under investigation and the issues raised in the case and rebuttal briefs by parties in this investigation are discussed in the Issues and Decision Memorandum. A list of the issues that parties raised, and to which we responded in the Issues and Decision Memorandum, is attached to this notice at Appendix II.

Use of Adverse Facts Available

The Department, in making these findings, relied, in part, on facts available and, because one or more respondents failed to cooperate by not acting to the best of their ability, we made adverse inferences.⁵ For the final determination, we are basing the countervailing duty (CVD) rate for Eregli Demir ve Celik Fabrikalari T.A.S. (Erdemir), in part, on facts otherwise available, pursuant to sections 776(a)(2)(A), (C) and (D) of the Tariff Act of 1930, as amended (the Act). Further, because the Government of Turkey did not cooperate to the best of its ability in this investigation, we also determine that an adverse inference is warranted, pursuant to section 776(b) of the Act. For further information, see the section “Use of Facts Otherwise Available and Adverse Inferences,” in the Issues and Decision Memorandum.

Changes Since the Preliminary Determination

Based on our review and analysis of the comments received from parties, and minor corrections presented at verification, we made certain changes to the respondents’ subsidy rate calculations set forth in the *Preliminary Determination*. For a discussion of these changes, see the Issues and Decision

⁴ See *Preliminary Determination* and accompanying Preliminary Decision Memorandum at “Scope Comments.”

⁵ See Sections 776(a) and (b) of the Act.

Memorandum and the Final Analysis Memoranda.⁶

Final Determination

In accordance with section 705(c)(1)(B)(i)(I) of the Act, we determined a countervailable subsidy rate for each individually investigated exporters/producers of the subject merchandise (*i.e.*, Erdemir and Colakoglu Dis Ticaret A.S.). Section 705(c)(5)(A)(i) of the Act states that for companies not individually investigated, we will determine an “all others” rate equal to the weighted average of the countervailable subsidy rates established for exporters and producers individually investigated, excluding any *de minimis* countervailable subsidy rates and rates determined entirely by adverse facts available. In this investigation, the only non-*de minimis* rate is the rate calculated for Erdemir. Consequently, the rate calculated for Erdemir is assigned as the “all others” rate.

We determine the estimated net countervailable subsidy rates are as follows.

Company	Subsidy rate
Colakoglu Dis Ticaret A.S.	0.34 percent (<i>de minimis</i>).
Eregli Demir ve Celik Fabrikalari T.A.S..	6.01 percent <i>ad valorem</i> .
All-Others	6.01 percent <i>ad valorem</i> .

Disclosure

We intend to disclose to parties in this proceeding the calculations performed for this final determination within five days of the date of public announcement of our final determination, in accordance with 19 CFR 351.224(b).

Suspension of Liquidation

Because the *Preliminary Determination* was negative, we did not instruct U.S. Customs and Border Protection (CBP) to suspend entries of subject merchandise. In accordance with sections 705(c)(1)(C) of the Act, we are now directing CBP to suspend liquidation of and to require the posting of a cash deposit on all imports of the subject merchandise from Turkey, other than those produced and exported by Colakoglu Dis Ticaret A.S. because its rate is *de minimis*, that are entered, or withdrawn from warehouse, for

⁶ See Issues and Decision Memorandum; see also Memoranda, “Final Determination Analysis for Colakoglu Dis Ticaret A.S.,” and “Final Determination Analysis for Eregli Demir ve Celik Fabrikalari T.A.S.,” both dated concurrently with this determination and hereby adopted by this notice.

consumption on or after the date of publication of this notice in the **Federal Register**. The suspension of liquidation will remain in effect until further notice. In addition, pursuant to section 705(c)(1)(B)(ii) of the Act, we are directing CBP to require a cash deposit for such entries of merchandise in the amount indicated above.

As our final determination is affirmative and our preliminary determination was negative, in accordance with section 705(b)(3) of the Act, the U.S. International Trade Commission (ITC) will determine within 75 days whether the domestic industry in the United States is materially injured, or threatened with material injury, by reason of imports or sales (or the likelihood of sales) for importation of the subject merchandise. We will issue a CVD order if the ITC issues a final affirmative injury determination. If the ITC determines that material injury, or threat of material injury, does not exist, this proceeding will be terminated and all estimated duties deposited or securities posted as a result of the suspension of liquidation will be refunded or canceled.

ITC Notification

In accordance with section 705(d) of the Act, we will notify the ITC of our determination. In addition, we are making available to the ITC all non-privileged and non-proprietary information related to this investigation. We will allow the ITC access to all privileged and business proprietary information in our files, provided the ITC confirms that it will not disclose such information, either publicly or under an administrative protective order (APO), without the written consent of the Assistant Secretary for Enforcement and Compliance.

Notification Regarding Administrative Protective Orders

In the event the ITC issues a final negative injury determination, this notice serves as the only reminder to parties subject to APO of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely written notification of the return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a violation that is subject to sanction.

This determination is issued and published pursuant to sections 705(d) and 777(i) of the Act and 19 CFR 351.210(c).

Dated: August 4, 2016.

Ronald K. Lorentzen,

Acting Assistant Secretary for Enforcement and Compliance.

Appendix I

Scope of the Investigation

The products covered by this investigation are certain hot-rolled, flat-rolled steel products, with or without patterns in relief, and whether or not annealed, painted, varnished, or coated with plastics or other non-metallic substances. The products covered do not include those that are clad, plated, or coated with metal. The products covered include coils that have a width or other lateral measurement ("width") of 12.7 mm or greater, regardless of thickness, and regardless of form of coil (*e.g.*, in successively superimposed layers, spirally oscillating, etc.). The products covered also include products not in coils (*e.g.*, in straight lengths) of a thickness of less than 4.75 mm and a width that is 12.7 mm or greater and that measures at least 10 times the thickness. The products described above may be rectangular, square, circular, or other shape and include products of either rectangular or non-rectangular cross-section where such cross-section is achieved subsequent to the rolling process, *i.e.*, products which have been "worked after rolling" (*e.g.*, products which have been beveled or rounded at the edges). For purposes of the width and thickness requirements referenced above:

(1) Where the nominal and actual measurements vary, a product is within the scope if application of either the nominal or actual measurement would place it within the scope based on the definitions set forth above unless the resulting measurement makes the product covered by the existing antidumping⁷ or countervailing duty⁸ orders on Certain Cut-To-Length Carbon-Quality Steel Plate Products From the Republic of Korea (A-580-836; C-580-837), and

(2) where the width and thickness vary for a specific product (*e.g.*, the thickness of certain products with non-rectangular cross-section, the width of certain products with non-rectangular shape, etc.), the measurement at its greatest width or thickness applies.

Steel products included in the scope of this investigation are products in which: (1) Iron predominates, by weight, over each of the other contained elements; (2) the carbon content is 2 percent or less, by weight; and (3) none of the elements listed below exceeds the quantity, by weight, respectively indicated:

- 2.50 percent of manganese, or

⁷ *Notice of Amendment of Final Determinations of Sales at Less Than Fair Value and Antidumping Duty Orders: Certain Cut-To-Length Carbon-Quality Steel Plate Products From France, India, Indonesia, Italy, Japan and the Republic of Korea*, 65 FR 6585 (February 10, 2000).

⁸ *Notice of Amended Final Determinations: Certain Cut-to-Length Carbon-Quality Steel Plate From India and the Republic of Korea; and Notice of Countervailing Duty Orders: Certain Cut-To-Length Carbon-Quality Steel Plate From France, India, Indonesia, Italy, and the Republic of Korea*, 65 FR 6587 (February 10, 2000).

- 3.30 percent of silicon, or
- 1.50 percent of copper, or
- 1.50 percent of aluminum, or
- 1.25 percent of chromium, or
- 0.30 percent of cobalt, or
- 0.40 percent of lead, or
- 2.00 percent of nickel, or
- 0.30 percent of tungsten, or
- 0.80 percent of molybdenum, or
- 0.10 percent of niobium, or
- 0.30 percent of vanadium, or
- 0.30 percent of zirconium.

Unless specifically excluded, products are included in this scope regardless of levels of boron and titanium.

For example, specifically included in this scope are vacuum degassed, fully stabilized (commonly referred to as interstitial-free (IF)) steels, high strength low alloy (HSLA) steels, the substrate for motor lamination steels, Advanced High Strength Steels (AHSS), and Ultra High Strength Steels (UHSS). IF steels are recognized as low carbon steels with micro-alloying levels of elements such as titanium and/or niobium added to stabilize carbon and nitrogen elements. HSLA steels are recognized as steels with micro-alloying levels of elements such as chromium, copper, niobium, titanium, vanadium, and molybdenum. The substrate for motor lamination steels contains micro-alloying levels of elements such as silicon and aluminum. AHSS and UHSS are considered high tensile strength and high elongation steels, although AHSS and UHSS are covered whether or not they are high tensile strength or high elongation steels.

Subject merchandise includes hot-rolled steel that has been further processed in a third country, including but not limited to pickling, oiling, levelling, annealing, tempering, temper rolling, skin passing, painting, varnishing, trimming, cutting, punching, and/or slitting, or any other processing that would not otherwise remove the merchandise from the scope of the investigation if performed in the country of manufacture of the hot-rolled steel.

All products that meet the written physical description, and in which the chemistry quantities do not exceed any one of the noted element levels listed above, are within the scope of this investigation unless specifically excluded. The following products are outside of and/or specifically excluded from the scope of this investigation:

- Universal mill plates (*i.e.*, hot-rolled, flat-rolled products not in coils that have been rolled on four faces or in a closed box pass, of a width exceeding 150 mm but not exceeding 1250 mm, of a thickness not less than 4.0 mm, and without patterns in relief);
- Products that have been cold-rolled (cold-reduced) after hot-rolling;⁹
- Ball bearing steels;¹⁰

⁹ For purposes of this scope exclusion, rolling operations such as a skin pass, levelling, temper rolling or other minor rolling operations after the hot-rolling process for purposes of surface finish, flatness, shape control, or gauge control do not constitute cold-rolling sufficient to meet this exclusion.

¹⁰ Ball bearing steels are defined as steels which contain, in addition to iron, each of the following elements by weight in the amount specified: (i) Not

- Tool steels;¹¹ and
- Silico-manganese steels;¹²

The products subject to this investigation are currently classified in the Harmonized Tariff Schedule of the United States (HTSUS) under item numbers: 7208.10.1500, 7208.10.3000, 7208.10.6000, 7208.25.3000, 7208.25.6000, 7208.26.0030, 7208.26.0060, 7208.27.0030, 7208.27.0060, 7208.36.0030, 7208.36.0060, 7208.37.0030, 7208.37.0060, 7208.38.0015, 7208.38.0030, 7208.38.0090, 7208.39.0015, 7208.39.0030, 7208.39.0090, 7208.40.6030, 7208.40.6060, 7208.53.0000, 7208.54.0000, 7208.90.0000, 7210.70.3000, 7211.14.0030, 7211.14.0090, 7211.19.1500, 7211.19.2000, 7211.19.3000, 7211.19.4500, 7211.19.6000, 7211.19.7530, 7211.19.7560, 7211.19.7590, 7225.11.0000, 7225.19.0000, 7225.30.3050, 7225.30.7000, 7225.40.7000, 7225.99.0090, 7226.11.1000, 7226.11.9030, 7226.11.9060, 7226.19.1000, 7226.19.9000, 7226.91.5000, 7226.91.7000, and 7226.91.8000. The products subject to the investigation may also enter under the following HTSUS numbers: 7210.90.9000, 7211.90.0000, 7212.40.1000, 7212.40.5000, 7212.50.0000, 7214.91.0015, 7214.91.0060, 7214.91.0090, 7214.99.0060, 7214.99.0075, 7214.99.0090, 7215.90.5000, 7226.99.0180, and 7228.60.6000.

The HTSUS subheadings above are provided for convenience and U.S. Customs and Border Protection purposes only. The written description of the scope of the investigation is dispositive.

DEPARTMENT OF COMMERCE

International Trade Administration

[A-412-825]

Certain Hot-Rolled Steel Flat Products From the United Kingdom: Final Determination of Sales at Less Than Fair Value

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (the Department) determines that imports of certain hot-rolled steel flat products (hot-rolled steel) from the United Kingdom are being, or are likely to be, sold in the United States at less than fair value (LTFV). The period of investigation (POI) is July 1, 2014, through June 30, 2015. The final dumping margins of sales at LTFV are listed below in the "Final Determination" section of this notice.

DATES: Effective August 12, 2016.

FOR FURTHER INFORMATION CONTACT: Catherine Cartsos, AD/CVD Operations, Office I, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482-1757.

SUPPLEMENTARY INFORMATION:

Background

On March 22, 2016, the Department published the *Preliminary Determination* of this antidumping duty (AD) investigation.¹ The following

¹ See *Certain Hot-Rolled Steel Flat Products From the United Kingdom: Affirmative Preliminary Determination of Sales at Less Than Fair Value, Postponement of Final Determination and Extension of Provisional Measures*, 81 FR 15244 (March 22, 2016) (*Preliminary Determination*).

events occurred since the *Preliminary Determination* was issued.

In March 2016, the Department received supplemental cost responses and revised sales files from Tata Steel UK Ltd. (TSUK), the sole mandatory respondent in this investigation.²

In June 2016, AK Steel (one of the petitioners),³ and TSUK submitted case briefs⁴ and rebuttal briefs.⁵ A hearing was held on June 21, 2016.

Scope of the Investigation

The products covered by this investigation are certain hot-rolled steel flat products from the United Kingdom. For a complete description of the scope of this investigation, see the "Scope of the Investigation," in Appendix I of this notice.

Scope Comments

In the Preliminary Scope Decision Memorandum,⁶ the Department set aside a period of time for parties to address scope issues in case briefs or other written comments on scope issues.

In the *Preliminary Determination*, we did not modify the scope language as it appeared in the *Initiation Notice*.⁷ No

² See Letter from TSUK, "Antidumping Duty Investigation of Certain Hot-Rolled Steel Flat Products from the United Kingdom: TSUK's Section D Second Supplemental Questionnaire Response" (March 22, 2016). See also Letter from TSUK, "Antidumping Duty Investigation of Certain Hot-Rolled Steel Flat Products from the United Kingdom: TSUK's Submission of Revised Sales Files Due to Minor Corrections Presented at Sales Verification" (March 25, 2016).

³ AK Steel Corporation (AK Steel), ArcelorMittal USA LLC, Nucor Corporation, SSAB Enterprises, LLC, Steel Dynamics, Inc., and United States Steel Corporation (collectively, the petitioners).

⁴ See Letter from the petitioners, "Certain Hot-Rolled Steel Flat Products From The United Kingdom/Petitioner's Case Brief" (June 8, 2016); and Letter from TSUK, "Antidumping Duty Investigation of Certain Hot-Rolled Steel Flat Products from the United Kingdom: Case Brief of Tata Steel UK Ltd. and Tata Steel International (Americas) Inc." (June 8, 2016).

⁵ See Letter from the petitioners, "Certain Hot-Rolled Steel Flat Products From The United Kingdom/Petitioner's Rebuttal Brief" (June 13, 2016); and Letter from TSUK, "Antidumping Duty Investigation of Certain Hot-Rolled Steel Flat Products from the United Kingdom: Rebuttal Brief of Tata Steel UK Ltd. and Tata Steel International (Americas) Inc." (June 13, 2016).

⁶ See Memorandum to Christian Marsh, Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, "Certain Hot-Rolled Steel Products From Australia, Brazil, Japan, the Netherlands, the Republic of Korea, Turkey, and the United Kingdom: Scope Comments Decision Memorandum for the Preliminary Determinations," dated March 14, 2016 (Preliminary Scope Decision Memorandum).

⁷ See *Preliminary Determination* and accompanying Memorandum from Christian Marsh, Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, to Paul Piquado, Assistant Secretary for Enforcement and Compliance, entitled "Decision Memorandum for the Preliminary Determination in the Less-Than-

interested parties submitted scope comments in case or rebuttal briefs; therefore, the scope of this investigation remains unchanged for this final determination.

Analysis of Comments Received

All issues raised in the case and rebuttal briefs by parties in this investigation are addressed in the Issues and Decision Memorandum, which is hereby adopted by this notice.⁸ A list of the issues raised is attached to this notice as Appendix II. The Issues and Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at <https://access.trade.gov> and it is available to all parties in the Central Records Unit, room B-8024 of the main Department of Commerce building. In addition, a complete version of the Issues and Decision Memorandum can be accessed directly at <http://enforcement.trade.gov/frn/index.html>. The signed and electronic versions of the Issues and Decision Memorandum are identical in content.

Verification

As provided in section 782(i) of the Tariff Act of 1930, as amended (the Act), in March and April 2016, the Department verified the sales and cost data reported by the mandatory respondent. We used standard verification procedures, including an examination of relevant accounting and production records, and original source documents provided by the respondent.⁹

Fair-Value Investigation of Certain Hot-Rolled Steel Flat Products from the United Kingdom" at page 4. See also *Certain Hot-Rolled Steel Flat Products From Australia, Brazil, Japan, the Republic of Korea, the Netherlands, The Republic of Turkey, and the United Kingdom: Initiation of Less-Than-Fair-Value Investigations*, 80 FR 54261, 54262 (September 9, 2015) (*Initiation Notice*).

⁸ See Memorandum to Ronald K. Lorentzen, Acting Assistant Secretary for Enforcement and Compliance, from Christian Marsh, Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations "Issues and Decision Memorandum for the Final Determination of the Antidumping Duty Investigation of Certain Hot-Rolled Steel Flat Products from the United Kingdom" (August 4, 2016) (Issues and Decision Memorandum).

⁹ See Memorandum to the File entitled "Certain Hot-Rolled Steel Flat Products from the United Kingdom: Home-Market and Export-Price Sales Verification of Tata Steel UK Ltd.," dated April 12, 2016, Memorandum to the File entitled "Certain Hot-Rolled Steel Flat Products from the United Kingdom: Constructed-Export-Price Sales Verification of Tata Steel UK Ltd.," dated May 18, 2016, and Memorandum to the File entitled "Verification of the Cost Response of Tata Steel UK

Changes Since the Preliminary Determination

Based on our analysis of the comments received and our findings at verification, we made certain changes to the margin calculations for TSUK. For a discussion of these changes, see the "Margin Calculations" and "Comparisons to Fair Value" sections of the Issues and Decision Memorandum. We have also revised the all-others rate.

All-Others Rate

Section 735(c)(5)(A) of the Act provides that the estimated all-others rate shall be an amount equal to the weighted-average of the estimated weighted-average dumping margins established for exporters and producers individually investigated excluding any zero or *de minimis* margins, and margins determined entirely under section 776 of the Act. We calculated a company-specific rate for Tata Steel UK Ltd. that is not zero, *de minimis* or determined entirely under section 776 of the Act. Therefore, for purposes of determining the "all-others" rate and pursuant to section 735(c)(5)(A) of the Act, we are using the weighted-average dumping margin calculated for Tata Steel UK Ltd. as the estimated weighted-average dumping margin assigned to all other producers and exporters of the merchandise under consideration.

Final Determination

The Department determines that the final weighted-average dumping margins are as follows:

Exporter/producer	Weighted-average margin (percent)
Tata Steel UK Ltd.	33.06
All-Others	33.06

Disclosure

We intend to disclose the calculations performed to interested parties within five days of the public announcement of this final determination in accordance with 19 CFR 351.224(b).

Continuation of Suspension of Liquidation

In accordance with section 735(c)(1)(B) of the Act, the Department will instruct U.S. Customs and Border Protection (CBP) to continue to suspend liquidation of all appropriate entries of hot-rolled steel from the United Kingdom, as described in Appendix I of this notice, which were entered, or

Ltd. in the Antidumping Duty Investigation of Certain Hot-Rolled Steel Flat Products from the United Kingdom," dated May 31, 2016.

withdrawn from warehouse, for consumption on or after March 22, 2016, the date of publication of the *Preliminary Determination* of this investigation in the **Federal Register**.

Further, pursuant to section 735(c)(1)(B)(ii) of the Act, CBP shall require a cash deposit equal to the estimated amount by which the normal value exceeds the U.S. price, as follows: (1) For the exporter/producer listed in the table above, the cash deposit rate will be equal to the weighted average dumping margin which the Department determined in this final determination; (2) if the exporter is not a firm identified in this investigation but the producer is, the rate will be the rate established for the producer of the subject merchandise; (3) the rate for all other producers or exporters will be 33.06 percent, as discussed in the "All Others Rate" section, above. These instructions suspending liquidation will remain in effect until further notice.

U.S. International Trade Commission Notification

In accordance with section 735(d) of the Act, we will notify the U.S. International Trade Commission (ITC) of the final affirmative determination of sales at LTFV. Because the final determination in this proceeding is affirmative, in accordance with section 735(b)(2) of the Act, the ITC will make its final determination as to whether the domestic industry in the United States is materially injured, or threatened with material injury, by reason of imports of hot-rolled steel from the United Kingdom no later than 45 days after our final determination. If the ITC determines that material injury or threat of material injury does not exist, the proceeding will be terminated and all cash deposits will be refunded. If the ITC determines that such injury does exist, the Department will issue an antidumping duty order directing CBP to assess, upon further instruction by the Department, antidumping duties on all imports of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the effective date of the suspension of liquidation, as discussed above in the "Continuation of Suspension of Liquidation" section. If the ITC determines that material injury or threat of material injury does not exist, the proceeding will be terminated and all cash deposits will be refunded.

Notification Regarding Administrative Protective Orders

This notice serves as a reminder to parties subject to an administrative protective order (APO) of their responsibility concerning the

disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely notification of the return or destruction of APO materials, or conversion to judicial protective order, is hereby requested. Failure to comply with the regulations and the terms of an APO is a violation subject to sanction.

This determination and this notice are issued and published pursuant to sections 735(d) and 777(i)(1) of the Act.

Dated: August 4, 2016.

Ronald K. Lorentzen,

Acting Assistant Secretary for Enforcement and Compliance.

Appendix I

Scope of the Investigation

The products covered by this investigation are certain hot-rolled, flat-rolled steel products, with or without patterns in relief, and whether or not annealed, painted, varnished, or coated with plastics or other non-metallic substances. The products covered do not include those that are clad, plated, or coated with metal. The products covered include coils that have a width or other lateral measurement (“width”) of 12.7 mm or greater, regardless of thickness, and regardless of form of coil (e.g., in successively superimposed layers, spirally oscillating, etc.). The products covered also include products not in coils (e.g., in straight lengths) of a thickness of less than 4.75 mm and a width that is 12.7 mm or greater and that measures at least 10 times the thickness. The products described above may be rectangular, square, circular, or other shape and include products of either rectangular or non-rectangular cross-section where such cross-section is achieved subsequent to the rolling process, i.e., products which have been “worked after rolling” (e.g., products which have been beveled or rounded at the edges). For purposes of the width and thickness requirements referenced above:

(1) Where the nominal and actual measurements vary, a product is within the scope if application of either the nominal or actual measurement would place it within the scope based on the definitions set forth above unless the resulting measurement makes the product covered by the existing antidumping¹⁰ or countervailing duty¹¹ orders on Certain Cut-To-Length Carbon-Quality Steel Plate Products From the Republic of Korea (A-580-836; C-580-837), and

(2) where the width and thickness vary for a specific product (e.g., the thickness of

certain products with non-rectangular cross-section, the width of certain products with non-rectangular shape, etc.), the measurement at its greatest width or thickness applies.

Steel products included in the scope of this investigation are products in which: (1) Iron predominates, by weight, over each of the other contained elements; (2) the carbon content is 2 percent or less, by weight; and (3) none of the elements listed below exceeds the quantity, by weight, respectively indicated:

- 2.50 percent of manganese, or
- 3.30 percent of silicon, or
- 1.50 percent of copper, or
- 1.50 percent of aluminum, or
- 1.25 percent of chromium, or
- 0.30 percent of cobalt, or
- 0.40 percent of lead, or
- 2.00 percent of nickel, or
- 0.30 percent of tungsten, or
- 0.80 percent of molybdenum, or
- 0.10 percent of niobium, or
- 0.30 percent of vanadium, or
- 0.30 percent of zirconium.

Unless specifically excluded, products are included in this scope regardless of levels of boron and titanium.

For example, specifically included in this scope are vacuum degassed, fully stabilized (commonly referred to as interstitial-free (IF)) steels, high strength low alloy (HSLA) steels, the substrate for motor lamination steels, Advanced High Strength Steels (AHSS), and Ultra High Strength Steels (UHSS). IF steels are recognized as low carbon steels with micro-alloying levels of elements such as titanium and/or niobium added to stabilize carbon and nitrogen elements. HSLA steels are recognized as steels with micro-alloying levels of elements such as chromium, copper, niobium, titanium, vanadium, and molybdenum. The substrate for motor lamination steels contains micro-alloying levels of elements such as silicon and aluminum. AHSS and UHSS are considered high tensile strength and high elongation steels, although AHSS and UHSS are covered whether or not they are high tensile strength or high elongation steels.

Subject merchandise includes hot-rolled steel that has been further processed in a third country, including but not limited to pickling, oiling, levelling, annealing, tempering, temper rolling, skin passing, painting, varnishing, trimming, cutting, punching, and/or slitting, or any other processing that would not otherwise remove the merchandise from the scope of the investigation if performed in the country of manufacture of the hot-rolled steel.

All products that meet the written physical description, and in which the chemistry quantities do not exceed any one of the noted element levels listed above, are within the scope of this investigation unless specifically excluded. The following products are outside of and/or specifically excluded from the scope of this investigation:

- Universal mill plates (i.e., hot-rolled, flat-rolled products not in coils that have been rolled on four faces or in a closed box pass, of a width exceeding 150 mm but not exceeding 1250 mm, of a thickness not less than 4.0 mm, and without patterns in relief);

- Products that have been cold-rolled (cold-reduced) after hot-rolling;¹²
- Ball bearing steels;¹³
- Tool steels;¹⁴ and
- Silico-manganese steels;¹⁵

The products subject to this investigation are currently classified in the Harmonized Tariff Schedule of the United States (HTSUS) under item numbers: 7208.10.1500, 7208.10.3000, 7208.10.6000, 7208.25.3000, 7208.25.6000, 7208.26.0030, 7208.26.0060, 7208.27.0030, 7208.27.0060, 7208.36.0030, 7208.36.0060, 7208.37.0030, 7208.37.0060, 7208.38.0015, 7208.38.0030, 7208.38.0090, 7208.39.0015, 7208.39.0030, 7208.39.0090, 7208.40.6030, 7208.40.6060, 7208.53.0000, 7208.54.0000, 7208.90.0000, 7210.70.3000, 7211.14.0030, 7211.14.0090, 7211.19.1500, 7211.19.2000, 7211.19.3000, 7211.19.4500, 7211.19.6000, 7211.19.7530, 7211.19.7560, 7211.19.7590, 7225.11.0000, 7225.19.0000, 7225.30.3050, 7225.30.7000, 7225.40.7000, 7225.99.0090, 7226.11.1000, 7226.11.9030, 7226.11.9060, 7226.19.1000, 7226.19.9000, 7226.91.5000, 7226.91.7000, and 7226.91.8000. The products subject to the investigation may also enter under the following HTSUS numbers: 7210.90.9000, 7211.90.0000, 7212.40.1000, 7212.40.5000, 7212.50.0000, 7214.91.0015, 7214.91.0060, 7214.91.0090, 7214.99.0060, 7214.99.0075, 7214.99.0090, 7215.90.5000, 7226.99.0180, and 7228.60.6000.

The HTSUS subheadings above are provided for convenience and U.S. Customs purposes only. The written description of the scope of the investigation is dispositive.

¹² For purposes of this scope exclusion, rolling operations such as a skin pass, levelling, temper rolling or other minor rolling operations after the hot-rolling process for purposes of surface finish, flatness, shape control, or gauge control do not constitute cold-rolling sufficient to meet this exclusion.

¹³ Ball bearing steels are defined as steels which contain, in addition to iron, each of the following elements by weight in the amount specified: (i) Not less than 0.95 nor more than 1.13 percent of carbon; (ii) not less than 0.22 nor more than 0.48 percent of manganese; (iii) none, or not more than 0.03 percent of sulfur; (iv) none, or not more than 0.03 percent of phosphorus; (v) not less than 0.18 nor more than 0.37 percent of silicon; (vi) not less than 1.25 nor more than 1.65 percent of chromium; (vii) none, or not more than 0.28 percent of nickel; (viii) none, or not more than 0.38 percent of copper; and (ix) none, or not more than 0.09 percent of molybdenum.

¹⁴ Tool steels are defined as steels which contain the following combinations of elements in the quantity by weight respectively indicated: (i) More than 1.2 percent carbon and more than 10.5 percent chromium; or (ii) not less than 0.3 percent carbon and 1.25 percent or more but less than 10.5 percent chromium; or (iii) not less than 0.85 percent carbon and 1 percent to 1.8 percent, inclusive, manganese; or (iv) 0.9 percent to 1.2 percent, inclusive, chromium and 0.9 percent to 1.4 percent, inclusive, molybdenum; or (v) not less than 0.5 percent carbon and not less than 3.5 percent molybdenum; or (vi) not less than 0.5 percent carbon and not less than 5.5 percent tungsten.

¹⁵ Silico-manganese steel is defined as steels containing by weight: (i) Not more than 0.7 percent of carbon; (ii) 0.5 percent or more but not more than 1.9 percent of manganese, and (iii) 0.6 percent or more but not more than 2.3 percent of silicon.

DEPARTMENT OF COMMERCE**International Trade Administration**

[C-580-884]

Countervailing Duty Investigation of Certain Hot-Rolled Steel Flat Products From the Republic of Korea: Final Affirmative Determination

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (the Department) determines that countervailable subsidies are being provided to producers/exporters of certain hot-rolled steel flat products (hot-rolled steel) from the Republic of Korea (Korea). For information on the subsidy rates, see the “Final Determination” section of this notice. The period of investigation is January 1, 2014, through December 31, 2014.

DATES: Effective August 12, 2016.

FOR FURTHER INFORMATION CONTACT: Katie Marksberry, AD/CVD Operations, Office V, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone (202) 482-7906.

SUPPLEMENTARY INFORMATION:**Background**

The Department published the *Preliminary Determination* on January 15, 2016.¹ A summary of events that

¹ See *Countervailing Duty Investigation of Certain Hot-Rolled Steel Flat Products From the Republic of Korea: Preliminary Negative Determination and Alignment of Final Determination With Final Antidumping Duty Determination*, 81 FR 2172

occurred since the Department published the *Preliminary Determination*, as well as a full discussion of the issues raised by parties for this final determination, may be found in the Issues and Decision Memorandum.² The Issues and Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance’s Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at <http://access.trade.gov>, and is available to all parties in the Central Records Unit, Room B8024, of the main Department of Commerce building. In addition, a complete version of the Issues and Decision Memorandum can be accessed directly at <http://enforcement.trade.gov/frn/>. The signed Issues and Decision Memorandum and the electronic version are identical in content.

Scope of the Investigation

The products covered by this investigation are hot-rolled steel flat products from Korea. For a complete description of the scope of this investigation, see the “Scope of the Investigation,” in Appendix II of this notice.

Analysis of Subsidy Programs and Comments Received

The subsidy programs under investigation and the issues raised in the case and rebuttal briefs by parties in this investigation are discussed in the Issues and Decision Memorandum. A list of the issues that parties raised, and to which we responded in the Issues and Decision Memorandum, is attached to this notice as Appendix I.

Use of Adverse Facts Available

In making this final determination, the Department relied, in part, on facts available and, because POSCO and Hyundai Steel Co., Ltd. (Hyundai Steel) did not act to the best of their ability in responding to the Department’s requests for information, we drew an adverse inference where appropriate in selecting from among the facts otherwise available.³ Specifically, we find that the application of adverse facts available is warranted for POSCO for its failure to report certain cross-owned input

(January 15, 2016) (*Preliminary Determination*), and accompanying Preliminary Decision Memorandum (PDM).

² See Memorandum to Paul Piquado, “Issues and Decision Memorandum for the Final Determination in the Countervailing Duty Investigation of Certain Hot-Rolled Steel Flat Products from the Republic of Korea,” dated August 4, 2016 (Issues and Decision Memorandum).

³ See sections 776(a) and (b) of the Act.

suppliers, and facilities located in a foreign economic zone (FEZ). We are also applying adverse facts available to POSCO’s affiliated trading company, Daewoo International Corporation (DWI)⁴ for certain loans presented at verification. Further, we find that the application of adverse facts available is warranted for Hyundai Steel for its failure to report its location in an FEZ. For further information, see the section “Use of Facts Otherwise Available and Adverse Inferences” in the accompanying Issues and Decision Memorandum.

Changes Since the Preliminary Determination

Based on our analysis of the comments received from parties and the minor corrections presented, and additional items discovered at verification, we made certain changes to the respondents’ subsidy rate calculations. For a discussion of these changes, see the Issues and Decision Memorandum.

Final Determination

In accordance with section 705(c)(1)(B)(i) of the Act, we calculated a rate for POSCO and Hyundai Steel, the two exporters/producers of subject merchandise selected for individual examination in this investigation.

In accordance with sections 705(c)(1)(B)(i)(I) and 705(c)(5)(A) of the Act, for companies not individually investigated, we apply an “all-others” rate, which is normally calculated by weighting the subsidy rates of the individual companies selected as respondents with those companies’ export sales of the subject merchandise to the United States. Under section 705(c)(5)(A)(i) of the Act, the all-others rate should exclude zero and *de minimis* rates calculated for the exporters and producers individually investigated, and any rates determined entirely under section 776 of the Act. Therefore, we have excluded the rate calculated for POSCO because it was determined entirely under section 776 of the Act. Thus, for the “all-others” rate, we applied the rate calculated for Hyundai Steel.

Company	Subsidy rate (percent)
POSCO	57.04
Hyundai Steel Co., Ltd.	3.89
All-Others	3.89

⁴ POSCO reported at verification that DWI changed its name to POSCO Daewoo Corporation (PDC) in March 2016. See IDM at 6.

Disclosure

We intend to disclose to parties in this proceeding the calculations performed for this final determination within five days of the date of public announcement of our final determination, in accordance with 19 CFR 351.224(b).

Suspension of Liquidation

In the *Preliminary Determination*, the total net countervailable subsidy rates for the individually examined respondents were *de minimis* and, therefore, we did not suspend liquidation of entries of certain hot-rolled steel flat products from the Republic of Korea. However, as the estimated subsidy rates for the examined companies are above *de minimis* in this final determination, we are directing U.S. Customs and Border Protection (CBP) to suspend liquidation of entries of hot-rolled steel from Korea that are entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**, and to require a cash deposit for such entries of merchandise in the amounts indicated above. The suspension of liquidation will remain in effect until further notice.

If the U.S. International Trade Commission (ITC) issues a final affirmative injury determination, we will issue a CVD order and instruct CBP to require a cash deposit of estimated CVDs for such entries of subject merchandise in the amounts indicated above. If the ITC determines that material injury, or threat of material injury, does not exist, this proceeding will be terminated and all estimated duties deposited or securities posted as a result of the suspension of liquidation will be refunded or canceled.

International Trade Commission Notification

In accordance with section 705(d) of the Act, we will notify the ITC of our determination. In addition, we are making available to the ITC all non-privileged and non-proprietary information related to this investigation. We will allow the ITC access to all privileged and business proprietary information in our files, provided the ITC confirms that it will not disclose such information, either publicly or under an administrative protective order (APO), without the written consent of the Assistant Secretary of Enforcement and Compliance.

Notification Regarding Administrative Protective Orders (APOs)

In the event the ITC issues a final negative injury determination, this

notice will serve as the only reminder to parties subject to an APO of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely written notification of the return or destruction of APO materials or conversion to judicial protective order, is hereby requested. Failure to comply with the regulations and terms of an APO is a violation subject to sanction.

This determination and notice are issued and published pursuant to sections 705(d) and 777(i) of the Act and 19 CFR 351.210(c).

Dated: August 4, 2016.

Ronald K. Lorentzen,

Acting Assistant Secretary for Enforcement and Compliance.

- VI. Benchmarks and Discount Rates
- VII. Use of Facts Otherwise Available And Adverse Inferences
- VIII. Analysis of Programs
- IX. Analysis of Comments
 - Comment 1: Whether the Department Should Apply Adverse Facts Available (AFA) to the Provision of Electricity for Less Than Adequate Remuneration (LTAR)
 - Comment 2: Whether the Department Should Find That the Provision of Electricity for LTAR is a Countervailable Subsidy
 - Comment 3: Whether the Department Should Use Other Submitted Data to Measure the Adequacy of Remuneration of Electricity
 - Comment 4: Whether the Department Should Find the Provision of Natural Gas for LTAR Countervailable
 - Comment 5: Application of AFA to POSCO and Treatment of POSCO's Unreported Affiliates
 - Comment 6: Whether To Apply AFA to POSCO Global Research and Development (R&D) Center
 - Comment 7: Whether To Apply AFA to Certain Loans Submitted at Verification
 - Comment 8: Whether To Apply AFA to Hyundai Steel for Use of Certain Foreign Economic Zones (FEZs)
 - Comment 9: The Department Improperly Countervailed Property Tax Exemptions Received by the Pohang Plant Under RSTA 78
 - Comment 10: The Department's Methodology for Attributing RSTA Article 22 Benefits Received by Hyundai Corporation to Hyundai Steel Was Incorrect
 - Comment 11: Whether Hyundai Steel Should Have Reported Additional ITIPA Grants

Comment 12: Whether Hyundai Steel Should Have Provided a Questionnaire Response for Hyundai Green Power
X. Recommendation

Appendix II—Scope of the Investigation

The products covered by this investigation are certain hot-rolled, flat-rolled steel products, with or without patterns in relief, and whether or not annealed, painted, varnished, or coated with plastics or other non-metallic substances. The products covered do not include those that are clad, plated, or coated with metal. The products covered include coils that have a width or other lateral measurement ("width") of 12.7 mm or greater, regardless of thickness, and regardless of form of coil (*e.g.*, in successively superimposed layers, spirally oscillating, etc.). The products covered also include products not in coils (*e.g.*, in straight lengths) of a thickness of less than 4.75 mm and a width that is 12.7 mm or greater and that measures at least 10 times the thickness. The products described above may be rectangular, square, circular, or other shape and include products of either rectangular or non-rectangular cross-section where such cross-section is achieved subsequent to the rolling process, *i.e.*, products which have been "worked after rolling" (*e.g.*, products which have been beveled or rounded at the edges). For purposes of the width and thickness requirements referenced above:

(1) Where the nominal and actual measurements vary, a product is within the scope if application of either the nominal or actual measurement would place it within the scope based on the definitions set forth above unless the resulting measurement makes the product covered by the existing antidumping⁵ or countervailing duty⁶ orders on Certain Cut-To-Length Carbon-Quality Steel Plate Products From the Republic of Korea (A-580-836; C-580-837), and

(2) where the width and thickness vary for a specific product (*e.g.*, the thickness of certain products with non-rectangular cross-section, the width of certain products with non-rectangular shape, etc.), the measurement at its greatest width or thickness applies.

Steel products included in the scope of this investigation are products in which: (1) Iron predominates, by weight, over each of the other contained elements; (2) the carbon content is 2 percent or less, by weight; and (3) none of the elements listed below exceeds the quantity, by weight, respectively indicated:

- 2.50 percent of manganese, or
- 3.30 percent of silicon, or
- 1.50 percent of copper, or

⁵ See *Notice of Amendment of Final Determinations of Sales at Less Than Fair Value and Antidumping Duty Orders: Certain Cut-To-Length Carbon-Quality Steel Plate Products From France, India, Indonesia, Italy, Japan and the Republic of Korea*, 65 FR 6585 (February 10, 2000).

⁶ See *Notice of Amended Final Determinations: Certain Cut-to-Length Carbon-Quality Steel Plate From India and the Republic of Korea; and Notice of Countervailing Duty Orders: Certain Cut-To-Length Carbon-Quality Steel Plate From France, India, Indonesia, Italy, and the Republic of Korea*, 65 FR 6587 (February 10, 2000).

- 1.50 percent of aluminum, or
- 1.25 percent of chromium, or
- 0.30 percent of cobalt, or
- 0.40 percent of lead, or
- 2.00 percent of nickel, or
- 0.30 percent of tungsten, or
- 0.80 percent of molybdenum, or
- 0.10 percent of niobium, or
- 0.30 percent of vanadium, or
- 0.30 percent of zirconium.

Unless specifically excluded, products are included in this scope regardless of levels of boron and titanium.

For example, specifically included in this scope are vacuum degassed, fully stabilized (commonly referred to as interstitial-free (IF)) steels, high strength low alloy (HSLA) steels, the substrate for motor lamination steels, Advanced High Strength Steels (AHSS), and Ultra High Strength Steels (UHSS). IF steels are recognized as low carbon steels with micro-alloying levels of elements such as titanium and/or niobium added to stabilize carbon and nitrogen elements. HSLA steels are recognized as steels with micro-alloying levels of elements such as chromium, copper, niobium, titanium, vanadium, and molybdenum. The substrate for motor lamination steels contains micro-alloying levels of elements such as silicon and aluminum. AHSS and UHSS are considered high tensile strength and high elongation steels, although AHSS and UHSS are covered whether or not they are high tensile strength or high elongation steels.

Subject merchandise includes hot-rolled steel that has been further processed in a third country, including but not limited to pickling, oiling, levelling, annealing, tempering, temper rolling, skin passing, painting, varnishing, trimming, cutting, punching, and/or slitting, or any other processing that would not otherwise remove the merchandise from the scope of the investigations if performed in the country of manufacture of the hot-rolled steel.

All products that meet the written physical description, and in which the chemistry quantities do not exceed any one of the noted element levels listed above, are within the scope of these investigations unless specifically excluded. The following products are outside of and/or specifically excluded from the scope of this investigation:

- Universal mill plates (*i.e.*, hot-rolled, flat-rolled products not in coils that have been rolled on four faces or in a closed box pass, of a width exceeding 150 mm but not exceeding 1250 mm, of a thickness not less than 4.0 mm, and without patterns in relief);
- Products that have been cold-rolled (cold-reduced) after hot-rolling;⁷
- Ball bearing steels;⁸

⁷ For purposes of this scope exclusion, rolling operations such as a skin pass, levelling, temper rolling or other minor rolling operations after the hot-rolling process for purposes of surface finish, flatness, shape control, or gauge control do not constitute cold-rolling sufficient to meet this exclusion.

⁸ Ball bearing steels are defined as steels which contain, in addition to iron, each of the following elements by weight in the amount specified: (i) Not less than 0.95 nor more than 1.13 percent of carbon; (ii) not less than 0.22 nor more than 0.48 percent of manganese; (iii) none, or not more than 0.03

- Tool steels;⁹ and
- Silico-manganese steels;¹⁰

The products subject to this investigation are currently classified in the Harmonized Tariff Schedule of the United States (“HTSUS”) under item numbers:

7208.10.1500, 7208.10.3000, 7208.10.6000, 7208.25.3000, 7208.25.6000, 7208.26.0030, 7208.26.0060, 7208.27.0030, 7208.27.0060, 7208.36.0030, 7208.36.0060, 7208.37.0030, 7208.37.0060, 7208.38.0015, 7208.38.0030, 7208.38.0090, 7208.39.0015, 7208.39.0030, 7208.39.0090, 7208.40.6030, 7208.40.6060, 7208.53.0000, 7208.54.0000, 7208.90.0000, 7210.70.3000, 7211.14.0030, 7211.14.0090, 7211.19.1500, 7211.19.2000, 7211.19.3000, 7211.19.4500, 7211.19.6000, 7211.19.7530, 7211.19.7560, 7211.19.7590, 7225.11.0000, 7225.19.0000, 7225.30.3050, 7225.30.7000, 7225.40.7000, 7225.99.0090, 7226.11.1000, 7226.11.9030, 7226.11.9060, 7226.19.1000, 7226.19.9000, 7226.91.5000, 7226.91.7000, and 7226.91.8000. The products subject to the investigation may also enter under the following HTSUS numbers: 7210.90.9000, 7211.90.0000, 7212.40.1000, 7212.40.5000, 7212.50.0000, 7214.91.0015, 7214.91.0060, 7214.91.0090, 7214.99.0060, 7214.99.0075, 7214.99.0090, 7215.90.5000, 7226.99.0180, and 7228.60.6000.

The HTSUS subheadings above are provided for convenience and U.S. Customs purposes only. The written description of the scope of the investigation is dispositive.

[FR Doc. 2016–19377 Filed 8–11–16; 8:45 am]

BILLING CODE 3510–DS–P

percent of sulfur; (iv) none, or not more than 0.03 percent of phosphorus; (v) not less than 0.18 nor more than 0.37 percent of silicon; (vi) not less than 1.25 nor more than 1.65 percent of chromium; (vii) none, or not more than 0.28 percent of nickel; (viii) none, or not more than 0.38 percent of copper; and (ix) none, or not more than 0.09 percent of molybdenum.

⁹ Tool steels are defined as steels which contain the following combinations of elements in the quantity by weight respectively indicated: (i) More than 1.2 percent carbon and more than 10.5 percent chromium; or (ii) not less than 0.3 percent carbon and 1.25 percent or more but less than 10.5 percent chromium; or (iii) not less than 0.85 percent carbon and 1 percent to 1.8 percent, inclusive, manganese; or (iv) 0.9 percent to 1.2 percent, inclusive, chromium and 0.9 percent to 1.4 percent, inclusive, molybdenum; or (v) not less than 0.5 percent carbon and not less than 3.5 percent molybdenum; or (vi) not less than 0.5 percent carbon and not less than 5.5 percent tungsten.

¹⁰ Silico-manganese steel is defined as steels containing by weight: (i) Not more than 0.7 percent of carbon; (ii) 0.5 percent or more but not more than 1.9 percent of manganese, and (iii) 0.6 percent or more but not more than 2.3 percent of silicon.

DEPARTMENT OF COMMERCE

International Trade Administration

[A–583–837]

Polyethylene Terephthalate Film, Sheet, and Strip From Taiwan: Preliminary Results of Antidumping Duty Administrative Review and Preliminary Determination of No Shipments; 2014–2015

AGENCY: Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce.

SUMMARY: The Department of Commerce (the Department) is conducting an administrative review of the antidumping duty order on polyethylene terephthalate film, sheet, and strip (PET Film) from Taiwan. The period of review (POR) is July 1, 2014, through June 30, 2015. This review covers respondents Nan Ya Plastics Corporation (Nan Ya) and Shinkong Materials Technology Corporation (SMTC), producers and exporters of PET Film from Taiwan. The Department preliminarily determines that sales of subject merchandise have not been made below normal value (NV) by Nan Ya, and that SMTC had no shipments during the POR. Interested parties are invited to comment on these preliminary results.

DATES: Effective August 12, 2016.

FOR FURTHER INFORMATION CONTACT: Jacqueline Arrowsmith at (202) 482–5255; AD/CVD Operations, Office VII, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230.

SUPPLEMENTARY INFORMATION:

Scope of the Order

The merchandise subject to the order is PET Film. The PET Film subject to the order is currently classifiable under subheading 3920.62.00.90 of the Harmonized Tariff Schedule of the United States.¹ The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance’s Antidumping and Countervailing Duty

¹ A full description of the scope of the order is contained in the memorandum from Christian Marsh, Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, to Ronald K. Lorentzen, Acting Assistant Secretary for Enforcement and Compliance, “Decision Memorandum for Preliminary Results of Antidumping Duty Administrative Review and Preliminary Determination of No Shipments: Polyethylene Terephthalate Film, Sheet, and Strip from Taiwan; 2014–2015” (Preliminary Decision Memorandum), which is hereby adopted by this notice.

Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at <http://access.trade.gov> and is available to all parties in the Central Records Unit in room B8024 of the main Commerce building. In addition, a complete version of the Decision Memorandum can be accessed directly on the Internet at <http://enforcement.trade.gov/frn/index.html>. The signed and electronic versions of the Decision Memorandum are identical in content.

Methodology

The Department is conducting this review in accordance with section 751(a)(2) of the Tariff Act of 1930, as amended (the Act). Export price is calculated in accordance with section 772 of the Act. NV is calculated in accordance with section 773 of the Act.

For a full description of the methodology underlying our conclusions, see the Preliminary Decision Memorandum.

Preliminary Determination of No Shipments

Based on our analysis of U.S. Customs and Border Protection (CBP) information and information provided by SMTC,² we preliminarily determine that SMTC had no shipments of the subject merchandise, and, therefore, no reviewable transactions, during the POR.

Preliminary Results of Review

As a result of this review, we preliminarily determine the following weighted-average dumping margin for the period July 1, 2014, through June 30, 2015.

Manufacturer/exporter	Weighted-average dumping margin (percent)
Nan Ya Plastics Corporation	0.00

Disclosure and Public Comment

The Department intends to disclose to interested parties the calculations performed in connection with these

² In the *Preliminary Results* for the 2008–2009 antidumping duty administrative review, we determined that for the purposes of calculating an antidumping margin, SMTC, and its parent company Shinkong Synthetic Fibers Corporation (SSFC), should be treated as a single entity. See *Polyethylene Terephthalate Film, Sheet and Strip from Taiwan: Preliminary Results of Antidumping Duty Administrative Review*, 75 FR 49902 (August 16, 2010), (unchanged in the *Final Results* for the 2008–2009 antidumping duty administrative review (*Polyethylene Terephthalate Film, Sheet and Strip from Taiwan: Final Results of Antidumping Duty Administrative Review*, 76 FR 9745 (February 22, 2011))).

preliminary results within five days of the date of publication of this notice.³ Pursuant to 19 CFR 351.309(c), interested parties may submit case briefs no later than 30 days after the date of publication of this notice.⁴ Rebuttal briefs, limited to issues raised in the case briefs, may be filed not later than five days after the date for filing case briefs.⁵ Parties who submit case briefs or rebuttal briefs in this proceeding are encouraged to submit with each argument: (1) A statement of the issue; (2) a brief summary of the argument; and (3) a table of authorities.⁶ Case and rebuttal briefs should be filed using ACCESS.⁷ In order to be properly filed, ACCESS must successfully receive an electronically-filed document in its entirety by 5 p.m. Eastern Time.

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing, or to participate if one is requested, must submit a written request to the Assistant Secretary for Enforcement and Compliance, filed electronically via ACCESS, within 30 days after the date of publication of this notice.⁸ Requests should contain: (1) The party's name, address, and telephone number; (2) the number of participants; and (3) a list of issues to be discussed. Issues raised in the hearing will be limited to those raised in the respective case briefs.

Unless extended, the Department intends to issue the final results of this administrative review, including the results of its analysis of the issues raised in any written briefs, not later than 120 days after the date of publication of this notice, pursuant to section 751(a)(3)(A) of the Act and 19 CFR 351.213(h).

Assessment Rates

Upon completion of the administrative review, the Department shall determine, and CBP shall assess, antidumping duties on all appropriate entries in accordance with 19 CFR 351.212(b)(1). If Nan Ya's weighted-average dumping margin is not zero or *de minimis* (i.e., less than 0.5 percent) in the final results of this review, we will calculate importer-specific assessment rates on the basis of the ratio of the total amount of dumping calculated for the importer's examined sales and the total entered value of the sales in accordance with 19 CFR 351.212(b)(1). We will instruct CBP to assess antidumping duties on all

appropriate entries covered by this review when the importer-specific assessment rate calculated in the final results of this review is above *de minimis*. Where the respondent's weighted-average dumping margin is zero or *de minimis*, or an importer-specific assessment rate is zero or *de minimis*, we will instruct CBP to liquidate the appropriate entries without regard to antidumping duties. The final results of this review shall be the basis for the assessment of antidumping duties on entries of merchandise covered by the final results of this review and for future deposits of estimated duties, where applicable.

Consistent with the Department's "automatic assessment" regulation for entries this clarification will apply to entries of subject merchandise during the POR produced by Nan Ya for which it did not know that its merchandise was destined for the United States.⁹ Furthermore, this clarification applies to all POR entries entered under the case number for SMTC if we continue to make a final determination of no shipments of subject merchandise because it certified that it made no POR shipments of subject merchandise for which it had knowledge of the U.S. destination. In such instances, we will instruct CBP to liquidate unreviewed entries at the all-others rate of 2.40 percent¹⁰ if there is no rate for the intermediary company(ies) involved in the transaction.¹¹

We intend to issue instructions to CBP 15 days after the date of publication of the final results of this review.

Cash Deposit Requirements

The following deposit requirements will be effective for all shipments of PET Film from Taiwan entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of this administrative review, as provided for by section 751(a)(2)(C) of the Act: (1) The cash deposit rate for the company under review will be the rate established in the final results of this

⁹ See *Antidumping and Countervailing Duty Proceedings: Assessment of Antidumping Duties*, 68 FR 23954 (May 6, 2003) (*Assessment Policy Notice*). See also *Brass Sheet and Strip From Germany: Final Results of Antidumping Duty Administrative Review and Final Determination of No Shipments; 2013–2014*, 80 FR 61369 (October 13, 2015).

¹⁰ See *Notice of Amended Final Antidumping Duty Determination of Sales at Less Than Fair Value and Antidumping Duty Order: Polyethylene Terephthalate Film, Sheet, and Strip (PET Film) from Taiwan*, 67 FR 44174 (July 1, 2002), as amended in 67 FR 46566 (July 15, 2002) (*PET Film from Taiwan Amended Final Determination*).

¹¹ For a full discussion of this clarification, see *Assessment Policy Notice*.

³ See 19 CFR 351.224(b).

⁴ See 19 CFR 351.309(c)(ii).

⁵ See 19 CFR 351.309(d).

⁶ See 19 CFR 351.309(c)(2) and (d)(2).

⁷ See 19 CFR 351.303.

⁸ See 19 CFR 351.310(c).

review (except, if the rate is zero or *de minimis*, no cash deposit will be required); (2) for previously reviewed or investigated companies not listed above, the cash deposit rate will continue to be the company-specific rate published for the most recent period; (3) if the exporter is not a firm covered in this review, a prior review, or the less-than-fair-value investigation, but the manufacturer is, the cash deposit rate will be the rate established for the most recent period for the manufacturer of the merchandise; and (4) the cash deposit rate for all other manufacturers or exporters is 2.40 percent.¹² These cash deposit requirements, when imposed, shall remain in effect until further notice.

Notification to Interested Parties

This notice also serves as a preliminary reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

We are issuing and publishing these results in accordance with sections 751(a)(1) and 777(i)(1) of the Act and 19 CFR 351.213(h)(1).

Dated: August 5, 2016.

Ronald K. Lorentzen,

Acting Assistant Secretary for Enforcement and Compliance.

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648–XE451

Takes of Marine Mammals Incidental to Specified Activities; Marine Geophysical Survey in the Southeast Pacific Ocean, 2016–2017

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Department of Commerce.

ACTION: Notice; issuance of an incidental harassment authorization.

SUMMARY: In accordance with the regulations implementing the Marine Mammal Protection Act (MMPA) as amended, notification is hereby given that NMFS has issued an incidental harassment authorization (IHA) to Lamont-Doherty Earth Observatory (Lamont-Doherty) in collaboration with the National Science Foundation (NSF), to incidentally take, by level B harassment, 44 species of marine mammals, and to incidentally take, by Level A harassment, 26 species of marine mammals, during three marine geophysical (seismic) surveys in the southeast Pacific Ocean.

DATES: This Authorization is effective from August 1, 2016, through July 31, 2017.

FOR FURTHER INFORMATION CONTACT: Jordan Carduner, NMFS, Office of Protected Resources, NMFS (301) 427–8401.

SUPPLEMENTARY INFORMATION:

Background

Section 101(a)(5)(D) of the Marine Mammal Protection Act of 1972, as amended (MMPA; 16 U.S.C. 1361 *et seq.*) directs the Secretary of Commerce to allow, upon request, the incidental, but not intentional, taking of small numbers of marine mammals of a species or population stock, by U.S. citizens who engage in a specified activity (other than commercial fishing) within a specified geographical region if, after NMFS provides a notice of a proposed authorization to the public for review and comment: (1) NMFS makes certain findings; and (2) the taking is limited to harassment.

An Authorization shall be granted for the incidental taking of small numbers of marine mammals if NMFS finds that the taking will have a negligible impact on the species or stock(s), and will not have an unmitigable adverse impact on the availability of the species or stock(s) for subsistence uses (where relevant).

The Authorization must also set forth the permissible methods of taking; other means of effecting the least practicable adverse impact on the species or stock and its habitat (*i.e.*, mitigation); and requirements pertaining to the monitoring and reporting of such taking. NMFS has defined “negligible impact” in 50 CFR 216.103 as “an impact resulting from the specified activity that cannot be reasonably expected to, and is not reasonably likely to, adversely affect the species or stock through effects on annual rates of recruitment or survival.”

Except with respect to certain activities not pertinent here, the MMPA defines “harassment” as: Any act of pursuit, torment, or annoyance which (i) has the potential to injure a marine mammal or marine mammal stock in the wild [Level A harassment]; or (ii) has the potential to disturb a marine mammal or marine mammal stock in the wild by causing disruption of behavioral patterns, including, but not limited to, migration, breathing, nursing, breeding, feeding, or sheltering [Level B harassment].

Summary of Request

On January 19, 2016, NMFS received an application from Lamont-Doherty requesting that NMFS issue an Authorization for the take of marine mammals, incidental to Oregon State University (OSU) and University of Texas (UT) conducting seismic surveys in the southeast Pacific Ocean, in the latter half of 2016 and/or the first half of 2017. NMFS considered the application and supporting materials adequate and complete on March 21, 2016.

Lamont-Doherty plans to conduct three two-dimensional (2-D) surveys on the R/V *Marcus G. Langseth* (*Langseth*), a vessel owned by NSF and operated on its behalf by Columbia University's Lamont-Doherty Earth Observatory primarily in international waters of the southeast Pacific Ocean, with a small portion of the surveys occurring within the territorial waters of Chile, which extend to nautical 12 miles (mi) (19.3 kilometers (km)) from the coast. NMFS cannot authorize the incidental take of marine mammals in the territorial seas of foreign nations, as the MMPA does not apply in those waters. However, as part of the analysis supporting our determination under the MMPA that the activity would have a negligible impact on the affected species, we must consider the level of incidental take as a result of the activity in the entire activity area (including both territorial seas and high seas).

Increased underwater sound generated during the operation of the

¹² See *PET Film from Taiwan Amended Final Determination*.

seismic airgun array is the only aspect of the activity that is likely to result in the take of marine mammals. We anticipate that take, by Level B harassment, of 44 species of marine mammals could result from the specified activity. Although unlikely, NMFS also anticipates that a small amount of take by Level A harassment of 26 species of marine mammals could occur during the planned surveys.

Description of the Specified Activity

Lamont-Doherty plans to use one source vessel, the *Langseth*, with an array of 36 airguns as the energy source with a total volume of approximately 6,600 cubic inches (in³). The receiving system would consist of up to 64 ocean bottom seismometers and a single hydrophone streamer between 8 and 15 km (4.9 and 9.3 mi) in length. In addition to the operations of the airgun array, a multibeam echosounder (MBES) and a sub-bottom profiler (SBP) would also be operated continuously throughout the proposed surveys. A total of approximately 9,633 km (5,986 mi) of transect lines would be surveyed in the southeast Pacific Ocean.

A detailed description of Lamont-Doherty's planned seismic surveys is provided in the **Federal Register** notice for the proposed IHA (81 FR 23117; April 19, 2016). Since that time, no changes have been made to the planned activities. Therefore, a detailed description is not provided here. Please refer to that **Federal Register** notice for the description of the specific activity.

Comments and Responses

NMFS published a notice of receipt of Lamont-Doherty's application and proposed Authorization in the **Federal Register** on April 19, 2016 (81 FR 23117). During the 30-day public comment period, NMFS received comment letters from the Marine Mammal Commission (Commission) and from the Marcus Langseth Science Oversight Committee, as well as one comment from a member of the general public. NMFS has posted the comments online at: <http://www.nmfs.noaa.gov/pr/permits/incidental>.

NMFS addresses any comments specific to Lamont-Doherty's application related to the statutory and regulatory requirements or findings that NMFS must make under the MMPA in order to issue an Authorization. The following is a summary of the public comments and NMFS's responses.

Modeling Exclusion and Buffer Zones

Comment 1: The Commission expressed concerns regarding Lamont-Doherty's method to estimate exclusion

and buffer zones. The Commission stated that the model is not the best available science because it assumes the following: Spherical spreading, constant sound speed, and no bottom interactions for surveys in deep water. In light of their concerns, the Commission recommended that NMFS require Lamont-Doherty to re-estimate the exclusion and buffer zones incorporating site-specific environmental (including sound speed profiles, bathymetry, and sediment characteristics) and operational (including number/type/spacing of airguns, tow depth, source level/operating pressure, and operational volume) parameters into their model.

Response: NMFS acknowledges the Commission's concerns about Lamont-Doherty's current modeling approach for estimating exclusion and buffer zones and also acknowledges that Lamont-Doherty did not incorporate site-specific sound speed profiles, bathymetry, and sediment characteristics of the research area in the current approach to estimate those zones for this planned seismic survey.

Lamont-Doherty's application (LGL, 2016) and the NSF's draft environmental analysis (NSF, 2016) describe the approach to establishing mitigation exclusion and buffer zones. In summary, Lamont-Doherty acquired field measurements for several array configurations at shallow, intermediate, and deep-water depths during acoustic verification studies conducted in the northern Gulf of Mexico in 2007 and 2008 (Tolstoy *et al.*, 2009). Based on the empirical data from those studies, Lamont-Doherty developed a sound propagation modeling approach that predicts received sound levels as a function of distance from a particular airgun array configuration in deep water. For this survey, Lamont-Doherty developed the exclusion and buffer zones for the airgun array based on the empirically-derived measurements from the Gulf of Mexico calibration survey (Appendix H of NSF's 2011 PEIS). For deep water (≤ 1000 m), Lamont-Doherty used the deep-water radii obtained from model results down to a maximum water depth of 2000 m (Figure 2 and 3 in Appendix H of NSF's 2011 PEIS; the radii for intermediate water depths (100–1000 m) were derived from the deep-water ones by applying a correction factor (multiplication) of 1.5, such that observed levels at very near offsets fall below the corrected mitigation curve (Fig. 16 in Appendix H of the NSF's 2011 PEIS); the shallow-water radii were obtained by scaling the empirically derived measurements from the Gulf of Mexico calibration survey to

account for the differences in tow depth between the calibration survey (6 m) and the proposed surveys (9 and 12 m).

In 2015, Lamont-Doherty explored the question of whether the Gulf of Mexico calibration data adequately informs the model to predict exclusion isopleths in other areas by conducting a retrospective sound power analysis of one of the lines acquired during Lamont-Doherty's seismic survey offshore New Jersey in 2014 (Crone, 2015). NMFS presented a comparison of the predicted radii (*i.e.*, modeled exclusion zones) with radii based on in situ measurements (*i.e.*, the upper bound [95th percentile] of the cross-line prediction) in a previous notice of issued Authorization for Lamont-Doherty (see Table 1, 80 FR 27635, May 14, 2015).

Briefly, Crone's (2015) analysis, specific to the survey site offshore New Jersey, confirmed that in-situ, site specific measurements and estimates of the 160- and 180-dB isopleths collected by the *Langseth's* hydrophone streamer in shallow water were smaller than the modeled (*i.e.*, predicted) exclusion and buffer zones proposed for use in two seismic surveys conducted offshore New Jersey in shallow water in 2014 and 2015. In that particular case, Crone's (2015) results showed that Lamont-Doherty's modeled exclusion (180-dB) and buffer (160-dB) zones were approximately 28 and 33 percent smaller, respectively, than the in situ, site-specific measurements, thus confirming that Lamont-Doherty's model was conservative in that case, as emphasized by Lamont-Doherty in its application and in supporting environmental documentation. The following is a summary of two additional analyses of in-situ data that support Lamont-Doherty's use of the modeled exclusion and buffer zones in this particular case.

In 2010, Lamont-Doherty assessed the accuracy of their modeling approach by comparing the sound levels of the field measurements acquired in the Gulf of Mexico study to their model predictions (Diebold *et al.*, 2010). They reported that the observed sound levels from the field measurements fell almost entirely below the predicted mitigation radii curve for deep water (greater than 1,000 m; 3280.8 ft) (Diebold *et al.*, 2010).

In 2012, Lamont-Doherty used a similar process to model exclusion and buffer zones for a shallow-water seismic survey in the northeast Pacific Ocean offshore Washington State in 2012. Lamont-Doherty conducted the shallow-water survey using the same airgun configuration planned for this seismic survey (*i.e.*, 6,600 in³) and recorded the

received sound levels on both the shelf and slope off Washington State using the *Langseth's* 8 km hydrophone streamer. Crone *et al.* (2014) analyzed those received sound levels from the 2012 survey and confirmed that in-situ, site specific measurements and estimates of the 160-dB and 180-dB isopleths collected by the *Langseth's* hydrophone streamer in shallow water were two to three times smaller than Lamont-Doherty's modeling approach had predicted. While the results confirmed bathymetry's role in sound propagation, Crone *et al.* (2014) were able to confirm that the empirical measurements from the Gulf of Mexico calibration survey (the same measurements used to inform Lamont-Doherty's modeling approach for the planned seismic survey in the southeast Pacific Ocean) overestimated the size of the exclusion and buffer zones for the shallow-water 2012 survey off Washington State and were thus precautionary, in that particular case.

The model Lamont-Doherty currently uses does not allow for the consideration of environmental and site-specific parameters as requested by the Commission. NMFS continues to work with Lamont-Doherty and the NSF to address the issue of incorporating site-specific information to further inform the analysis and development of mitigation measures in oceanic and coastal areas for future seismic surveys with Lamont-Doherty. However, Lamont-Doherty's current modeling approach (supported by the three data points discussed previously) represents the best available information for NMFS to reach determinations for the Authorization. As described earlier, the comparisons of Lamont-Doherty's model results and the field data collected in the Gulf of Mexico, offshore Washington State, and offshore New Jersey illustrate a degree of conservativeness built into Lamont-Doherty's model for deep water, which NMFS expects to offset some of the limitations of the model to capture the variability resulting from site-specific factors. Based upon the best available information (*i.e.*, the three data points, two of which are peer-reviewed, discussed in this response), NMFS finds that the exclusion and buffer zone calculations are appropriate for use in this particular survey.

Lamont-Doherty has conveyed to NMFS that additional modeling efforts to refine the process and conduct comparative analysis may be possible with the availability of research funds and other resources. Obtaining research funds is typically accomplished through a competitive process, including those submitted to U.S. Federal agencies. The

use of models for calculating buffer and exclusion zone radii and for developing take estimates is not a requirement of the MMPA incidental take authorization process. Furthermore, NMFS does not provide specific guidance on model parameters nor prescribe a specific model for applicants as part of the MMPA incidental take authorization process at this time. There is a level of variability not only with parameters in the models, but also the uncertainty associated with data used in models, and therefore, the quality of the model results submitted by applicants. NMFS considers this variability when evaluating applications and the take estimates and mitigation measures that the model informs. NMFS takes into consideration the model used, and its results, in determining the potential impacts to marine mammals; however, it is just one component of the analysis during the MMPA authorization process as NMFS also takes into consideration other factors associated with the activity (*e.g.*, geographic location, duration of activities, context, sound source intensity, etc.).

Uncertainty in Density Estimates

Comment 2: The Commission expressed concern regarding uncertainty in the representativeness of the marine mammal density data and the assumptions used to calculate estimated takes. The Commission recommended that NMFS adjust density estimates using some measure of uncertainty when available density data originate from different geographic areas, temporal scales, and seasons, especially for actions which will occur outside the U.S. Exclusive Economic Zone (EEZ) where site- and species-specific density estimates tend to be scant, such as Lamont-Doherty's planned survey.

Response: NMFS believes that, in the absence of site-specific marine mammal density data in the region of Lamont-Doherty's planned survey, the best available information was used to estimate marine mammal density data for the project area and to calculate estimated takes. However, NMFS acknowledges that the lack of site- and species-specific density data for certain geographic areas presents inherent challenges in estimating takes, and agrees with the Commission's recommendation that a systematic approach to incorporating uncertainty in density estimates when available density data originate from different geographic areas, temporal scales, and seasons is warranted. NMFS is actively working to develop a systematic process for the use of density estimates in authorizations when uncertainties in

density data exist as a result of geographic differences, temporal differences, or accuracy of data, and to encourage applicants for incidental take authorization to utilize this process when it is complete. NMFS looks forward to developing this process in collaboration with the Commission.

Monitoring and Reporting

Comment 3: The Commission indicated that monitoring and reporting requirements should provide a reasonably accurate assessment of the types of taking and the numbers of animals taken by the proposed activity. They recommend that NMFS and Lamont-Doherty incorporate an accounting for animals at the surface but not detected [*i.e.*, $g(0)$ values] and for animals present but underwater and not available for sighting [*i.e.*, $f(0)$ values] into monitoring efforts. In light of the Commission's previous comments, they recommend that NMFS consult with the funding agency (*i.e.*, the NSF) and individual applicants (*e.g.*, Lamont-Doherty and other related entities) to develop, validate, and implement a monitoring program that provides a scientifically sound, reasonably accurate assessment of the types of marine mammal takes and the actual numbers of marine mammals taken, accounting for applicable $g(0)$ and $f(0)$ values, based in part on monitoring data collected during geophysical surveys.

Response: NMFS agrees with the Commission's recommendation to improve the post-survey reporting requirements for NSF and Lamont-Doherty by accounting for takes using applicable $g(0)$ and $f(0)$ values. In December 2015, NMFS met with Commission representatives to discuss ways to develop and validate a monitoring program that provides a scientifically sound, reasonably accurate assessment of the types of marine mammal takes and the actual numbers of marine mammals taken. In July 2016, NMFS solicited input from the Commission regarding methodology for determining applicable $g(0)$ and $f(0)$ values. Based on this input, NMFS has included a requirement in the issued IHA that Lamont-Doherty must provide an estimate of the number (by species) of marine mammals that may have been exposed (based on modeling results and accounting for animals at the surface but not detected [*i.e.*, $g(0)$ values] and for animals present but underwater and not available for sighting [*i.e.*, $f(0)$ values]) to the seismic activity at received levels greater than or equal to 160 dB re: 1 μ Pa and/or 180 dB re: 1 μ Pa for cetaceans and 190-dB re: 1 μ Pa for pinnipeds. NMFS will provide the methodology for

determining the applicable f(0) and g(0) values to Lamont-Doherty.

The comment letter from the Marcus Langseth Science Oversight Committee affirmed that there is significant support from the Committee for the IHA to be issued for the proposed activity and for the survey to be conducted. NMFS received one additional comment from a private citizen that expressed concern that the project would result in the deaths of marine mammals and that the application should be denied on the grounds that it would cost taxpayers too much money; NMFS considered this

comment, however, no deaths of marine mammals are anticipated as a result of the project as described below, and NMFS does not have the ability to deny applications for authorization to incidentally take marine mammals based on an applicant's funding sources.

Description of Marine Mammals in the Area of the Specified Activity

Table 1 in this notice provides the following: All marine mammal species with possible or confirmed occurrence in the planned activity area; information on those species' regulatory status under

the MMPA and the Endangered Species Act of 1973 (16 U.S.C. 1531 *et seq.*); abundance; local occurrence and range; and seasonality in the planned activity area. Based on the best available information, NMFS expects that there may be a potential for certain cetacean and pinniped species to occur within the survey area (*i.e.*, potentially be taken) and have included additional information for these species in Table 1 of this notice. NMFS will carry forward analyses on the species listed in Table 1 later in this document.

TABLE 1—GENERAL INFORMATION ON MARINE MAMMALS THAT COULD POTENTIALLY OCCUR IN THE THREE PLANNED SURVEY AREAS WITHIN THE SOUTHEAST PACIFIC OCEAN

Species	Regulatory status ^{1 2}	Species abundance ³	Local occurrence	Habitat
Antarctic minke whale (<i>Balaenoptera bonaerensis</i>).	MMPA—NC; ESA—NL	515,000	North—Rare; Central/South—Uncommon.	Coastal, pelagic.
Blue whale (<i>B. musculus</i>)	MMPA—D; ESA—EN ..	4 10,000	North—Common; Central/South—Common.	Coastal, shelf, pelagic.
Bryde's whale (<i>Balaenoptera edeni</i>)	MMPA—NC; ESA—NL	5 43,633	North—Common; Central/South—Common.	Coastal, pelagic.
Common minke whale (<i>B. acutorostrata</i>)	MMPA—NC; ESA—NL	515,000	North—Rare; Central/South—Uncommon.	Coastal, pelagic.
Fin whale (<i>B. physalus</i>)	MMPA—D; ESA—EN ..	22,000	North—Rare; Central/South—Common.	Shelf, slope, pelagic.
Humpback whale (<i>Megaptera novaengliae</i>)	MMPA—D; ESA—EN ..	42,000	North—Common; Central/South—Common.	Coastal, shelf, pelagic.
Pygmy right whale (<i>Caperea marginata</i>)	MMPA—NC; ESA—NL	Unknown	North—Unknown; Central/South—Rare.	Coastal, oceanic.
Sei whale (<i>B. borealis</i>)	MMPA—D; ESA—EN ..	10,000	North—Uncommon; Central/South—Uncommon.	Pelagic.
Southern right whale (<i>Eubalaena australis</i>)	MMPA—D; ESA—EN ..	12,000	North—Rare; Central/South—Rare.	Coastal, oceanic.
Sperm whale (<i>Physeter macrocephalus</i>)	MMPA—D; ESA—EN ..	6 355,000	North—Common; Central/South—Common.	Pelagic, deep seas.
Dwarf sperm whale (<i>Kogia sima</i>)	MMPA—NC; ESA—NL	7 170,309	North—Rare; Central/South—Rare.	Shelf, pelagic.
Pygmy sperm whale (<i>K. breviceps</i>)	MMPA—NC; ESA—NL	7 170,309	North—Rare; Central/South—Rare.	Shelf, pelagic.
Andrew's beaked whale (<i>Mesoplodon bowdoini</i>)	MMPA—NC; ESA—NL	8 25,300	North—Unknown; Central/South—Rare.	Pelagic.
Blainville's beaked whale (<i>M. densirostris</i>)	MMPA—NC; ESA—NL	8 25,300	North—Uncommon; Central/South—Uncommon.	Pelagic.
Cuvier's beaked whale (<i>Ziphius cavirostris</i>)	MMPA—NC; ESA—NL	8 20,000	North—Uncommon; Central/South—Uncommon.	Slope, pelagic.
Gray's beaked whale (<i>M. grayi</i>)	MMPA—NC; ESA—NL	8 25,300	North—Rare; Central/South—Rare.	Pelagic.
Hector's beaked whale (<i>M. hectori</i>)	MMPA—NC; ESA—NL	8 25,300	North—Unknown; Central/South—Rare.	Pelagic.
Pygmy beaked whale (<i>Mesoplodon peruvianus</i>)	MMPA—NC; ESA—NL	8 25,300	North—Rare; Central/South—Rare.	Pelagic.
Shepherd's beaked whale (<i>Tasmacetus shepherdi</i>).	MMPA—NC; ESA—NL	8 25,300	North—Unknown; Central/South—Rare.	Pelagic.
Spade-toothed whale (<i>Mesoplodon traversii</i>)	MMPA—NC; ESA—NL	8 25,300	North—Unknown; Central/South—Rare.	Pelagic.
Strap-toothed beaked whale (<i>M. layardii</i>)	MMPA—NC; ESA—NL	8 25,300	North—Unknown; Central/South—Rare.	Pelagic.
Southern bottlenose whale (<i>Hyperoodon planifrons</i>).	MMPA—NC; ESA—NL	9 72,000	North—Unknown; Central/South—Uncommon.	Pelagic.
Chilean dolphin (<i>Cephalorhynchus eutropia</i>)	MMPA—NC; ESA—NL	10,000	North—Unknown; Central/South—Uncommon.	Coastal.

TABLE 1—GENERAL INFORMATION ON MARINE MAMMALS THAT COULD POTENTIALLY OCCUR IN THE THREE PLANNED SURVEY AREAS WITHIN THE SOUTHEAST PACIFIC OCEAN—Continued

Species	Regulatory status ^{1,2}	Species abundance ³	Local occurrence	Habitat
Rough-toothed dolphin (<i>Steno bredanensis</i>)	MMPA—NC; ESA—NL	¹⁰ 107,633	North—Rare; Central/South—Unknown.	Oceanic.
Common bottlenose dolphin (<i>Tursiops truncatus</i>)	MMPA—NC; ESA—NL	¹⁰ 335,834	North—Abundant; Central/South—Common.	Coastal, pelagic, shelf.
Striped dolphin (<i>S. coeruleoalba</i>)	MMPA—NC; ESA—NL	¹⁰ 964,362	North—Abundant; Central/South—Common.	Shelf edge, pelagic.
Short-beaked common dolphin (<i>Delphinus delphis</i>).	MMPA—NC; ESA—NL	¹¹ 1,766,551	North—Abundant; Central/South—Abundant.	Coastal, shelf.
Long-beaked common dolphin (<i>Delphinus capensis</i>).	MMPA—NC; ESA—NL	¹² 144,000	North—Uncommon; Central/South—Unknown.	Coastal, shelf.
Dusky dolphin (<i>Lagenorhynchus obscurus</i>)	MMPA—NC; ESA—NL	¹³ 25,880	North—Abundant; Central/South—Abundant.	Shelf, slope.
Peale's dolphin (<i>Lagenorhynchus australis</i>)	MMPA—NC; ESA—NL	Unknown	North—Unknown; Central/South—Uncommon.	Coastal.
Hourglass dolphin (<i>Lagenorhynchus cruciger</i>)	MMPA—NC; ESA—NL	¹⁴ 144,300	North—Unknown; Central/South—Rare.	Pelagic.
Southern right whale dolphin (<i>Lissodelphis peronii</i>).	MMPA—NC; ESA—NL	Unknown	North—Uncommon; Central/South—Common.	Pelagic.
Risso's dolphin (<i>Grampus griseus</i>)	MMPA—NC; ESA—NL	¹⁰ 110,457	North—Common; Central/South—Uncommon.	Shelf, slope.
Pygmy killer whale (<i>Feresa attenuate</i>)	MMPA—NC; ESA—NL	⁸ 38,900	North—Rare; Central/South—Uncommon.	Oceanic, pantropical.
False killer whale (<i>Pseudorca crassidens</i>)	MMPA—NC; ESA—NL	⁸ 39,800	North—Uncommon; Central/South—Rare.	Pelagic.
Killer whale (<i>Orcinus orca</i>)	MMPA—NC; ESA—NL	50,000	North—Rare; Central/South—Rare.	Coastal, shelf, pelagic.
Long-finned pilot whale (<i>Globicephala melas</i>)	MMPA—NC; ESA—NL	¹⁵ 200,000	North—Rare; Central/South—Rare.	Coastal, pelagic.
Short-finned pilot whale (<i>Globicephala macrorhynchus</i>).	MMPA—NC; ESA—NL	¹⁶ 589,315	North—Rare; Central/South—Rare.	Coastal, pelagic.
Burmeister's porpoise (<i>Phocoena spinipinnis</i>)	MMPA—NC; ESA—NL	Unknown	North—Coastal; Central/South—Coastal.	Coastal.
Juan Fernandez fur seal (<i>Arctocephalus philippii</i>).	MMPA—NC; ESA—NL	¹⁷ 32,278	North—Rare; Central/South—Rare.	Coastal, pelagic.
South American fur seal (<i>Arctocephalus australis</i>).	MMPA—NC; ESA—NL	250,000	North—Rare; Central/South—Rare.	Coastal, shelf, slope.
South American sea lion (<i>Otaria byronia</i>)	MMPA—NC; ESA—NL	¹⁸ 397,771	North—Abundant; Central/South—Abundant.	Coastal, shelf.
Southern elephant seal (<i>Mirounga leonina</i>)	MMPA—NC; ESA—NL	¹⁹ 640,000	North—Abundant; Central/South—Abundant.	Coastal, pelagic.

NMFS refers the public to Lamont-Doherty's application and NSF's environmental analysis (available online at: <http://www.nmfs.noaa.gov/pr/sars/species.htm>) for further information on the biology and local distribution of these species. Please also refer to NMFS's Web site (<http://www.nmfs.noaa.gov/pr/permits/incidental/>) for generalized species accounts.

Potential Effects of the Specified Activities on Marine Mammals

Operating active acoustic sources, such as airgun arrays, has the potential for adverse effects on marine mammals. The **Federal Register** notice for the proposed IHA (81 FR 23117; April 19, 2016) provided a discussion of the effects of anthropogenic noise on marine mammals as well as a detailed description of the potential effects of Lamont-Doherty's activities on marine mammals. Therefore that information is not repeated here; please refer to the **Federal Register** notice for the proposed IHA (81 FR 23117; April 19, 2016) for that information. During 10 nm of transit that may occur between surveys (described in the **Federal Register** notice for the proposed IHA (81 FR 23117; April 19, 2016)) the operation of the MBES and SBP may occur independent of airgun operation. The operation of the MBES and SBP in the absence of airgun use was not explicitly described in the **Federal Register** notice for the proposed IHA (81 FR 23117; April 19, 2016); though it comprises a very small portion of the total anticipated effects of this action, it has now been included for consideration in the analyses. The "Estimated Take by Incidental Harassment" section later in this document will include a quantitative analysis of the number of individuals that NMFS expects to be taken by this activity. The "Negligible Impact Analysis" section will include the analysis of how this specific activity would impact marine mammals and will consider the content of this section, the "Estimated Take by Incidental Harassment" section, the "Mitigation Measures" section, and the "Anticipated Effects on Marine Mammal Habitat" section to draw conclusions regarding the likely impacts of this activity on the reproductive success or survivorship of individuals and from that on the affected marine mammal populations or stocks.

Anticipated Effects on Marine Mammal Habitat

The primary potential impacts to marine mammal habitat and other marine species from Lamont-Doherty's

planned activities are associated with elevated sound levels produced by airguns. The impacts of Lamont-Doherty's planned activities on fish and other marine life specifically related to acoustic activities are expected to be temporary in nature, negligible, and would not result in substantial impact to these species or to their role in the ecosystem. NMFS does not anticipate that the planned activity would have any habitat-related effects that could cause significant or long-term consequences for individual marine mammals or their populations. The potential effects of Lamont-Doherty's planned activities on marine mammal habitat and other marine species are discussed in detail in the **Federal Register** notice for the proposed IHA (81 FR 23117; April 19, 2016), therefore that information is not repeated here; please refer to that **Federal Register** notice for that information.

Mitigation Measures

In order to issue an Incidental Harassment Authorization under section 101(a)(5)(D) of the MMPA, NMFS must set forth the permissible methods of taking pursuant to such activity, and other means of effecting the least practicable adverse impact on such species or stock and its habitat, paying particular attention to rookeries, mating grounds, and areas of similar significance, and on the availability of such species or stock for taking for certain subsistence uses (where relevant).

Lamont-Doherty has reviewed the following source documents and has incorporated a suite of mitigation measures into their project description:

- (1) Protocols used during previous Lamont-Doherty and NSF-funded seismic research cruises as approved by us and detailed in the NSF's 2011 PEIS and 2016 draft environmental analysis;
- (2) Previous IHA applications and authorizations that NMFS has approved and authorized; and
- (3) Recommended best practices in Richardson *et al.* (1995), Pierson *et al.* (1998), and Weir and Dolman (2007).

To reduce the potential for disturbance from acoustic stimuli associated with the activities, Lamont-Doherty, and/or its designees plan to implement the following mitigation measures for marine mammals:

- (1) Vessel-based visual mitigation monitoring;
- (2) Exclusion zones;
- (3) Power down procedures;
- (4) Shutdown procedures;
- (5) Ramp-up procedures; and
- (6) Speed and course alterations.

NMFS reviewed Lamont-Doherty's mitigation measures and developed the following additional mitigation measures to effect the least practicable adverse impact on marine mammals:

- (1) Expanded power down procedures for concentrations of six or more whales that do not appear to be traveling (*e.g.*, feeding, socializing, etc.).

Vessel-Based Visual Mitigation Monitoring

Lamont-Doherty would position observers aboard the seismic source vessel to watch for marine mammals near the vessel during daytime airgun operations and during any start-ups at night. Observers would also watch for marine mammals near the seismic vessel for at least 30 minutes prior to the start of airgun operations after an extended shutdown (*i.e.*, greater than approximately eight minutes for this planned cruise). When feasible, the observers would conduct observations during daytime periods when the seismic system is not operating for comparison of sighting rates and behavior with and without airgun operations and between acquisition periods. Based on the observations, the *Langseth* would power down or shutdown the airguns when marine mammals are observed within or about to enter a designated exclusion zone for cetaceans or pinnipeds.

During seismic operations, at least four protected species observers would be aboard the *Langseth*. Lamont-Doherty would appoint the observers with NMFS's concurrence, and they would conduct observations during ongoing daytime operations and nighttime ramp-ups of the airgun array. During the majority of seismic operations, two observers would be on duty from the observation tower to monitor marine mammals near the seismic vessel. Using two observers would increase the effectiveness of detecting animals near the source vessel. However, during mealtimes and bathroom breaks, it is sometimes difficult to have two observers on effort, but at least one observer would be on watch during bathroom breaks and mealtimes. Observers would be on duty in shifts of no longer than four hours in duration.

Two observers on the *Langseth* would also be on visual watch during all nighttime ramp-ups of the seismic airguns. A third observer would monitor the passive acoustic monitoring equipment 24 hours a day to detect vocalizing marine mammals present in the action area. In summary, a typical daytime cruise would have scheduled two observers (visual) on duty from the observation tower, and an observer

(acoustic) on the passive acoustic monitoring system. Before the start of the seismic survey, Lamont-Doherty would instruct the vessel's crew to assist in detecting marine mammals and implementing mitigation requirements.

The *Langseth* is a suitable platform for marine mammal observations. When stationed on the observation platform, the eye level would be approximately 21.5 m (70.5 ft) above sea level, and the observer would have a good view around the entire vessel. During daytime, the observers would scan the area around the vessel systematically with reticle binoculars (e.g., 7 x 50 Fujinon), Big-eye binoculars (25 x 150), and with the naked eye. During darkness, night vision devices would be available (ITT F500 Series Generation 3 binocular-image intensifier or equivalent), when required. Laser range-

finding binoculars (Leica LRF 1200 laser rangefinder or equivalent) would be available to assist with distance estimation. They are useful in training observers to estimate distances visually, but are generally not useful in measuring distances to animals directly. The user measures distances to animals with the reticles in the binoculars.

Lamont-Doherty would immediately power down or shutdown the airguns when observers see marine mammals within or about to enter the designated exclusion zone. The observer(s) would continue to maintain watch to determine when the animal(s) are outside the exclusion zone by visual confirmation. Airgun operations would not resume until the observer has confirmed that the animal has left the zone, or if not observed after 15 minutes for species with shorter dive durations

(small odontocetes and pinnipeds) or 30 minutes for species with longer dive durations (mysticetes and large odontocetes, including sperm, pygmy sperm, dwarf sperm, killer, and beaked whales).

Mitigation Exclusion Zones

Lamont-Doherty would use safety radii to designate exclusion zones and to estimate take for marine mammals. Table 2 shows the distances at which one would expect to receive sound levels (160-, 180-, and 190-dB,) from the airgun array and a single airgun. If the protected species visual observer detects marine mammal(s) within or about to enter the appropriate exclusion zone, the *Langseth* crew would immediately power down the airgun array, or perform a shutdown if necessary (see Shutdown Procedures).

TABLE 2—PREDICTED DISTANCES TO WHICH SOUND LEVELS GREATER THAN OR EQUAL TO 160 re: 1 µPa COULD BE RECEIVED DURING THE PLANNED SURVEY AREAS WITHIN THE SOUTHEAST PACIFIC OCEAN

Source and volume (in ³)	Tow depth (m)	Water depth (m)	Predicted RMS distances ¹ (m)		
			190 dB	180 dB	160 dB
Single Bolt airgun (40 in ³)	9 or 12	<100	≥ 100	≥ 100	1,041
		100 to 1,000	100	100	647
		>1,000	100	100	431
36-Airgun Array (6,600 in ³)	9	<100	591	2,060	22,580
		100 to 1,000	429	1,391	8,670
		>1,000	286	927	5,780
36-Airgun Array (6,600 in ³)	12	<100	710	2,480	27,130
		100 to 1,000	522	1,674	10,362
		>1,000	348	1,116	6,908

¹ Predicted distances based on information presented in Lamont-Doherty's application.

² NMFS required Lamont-Doherty to expand the exclusion zone for the mitigation airgun to 100 m (328 ft) in shallow water.

The 180- or 190-dB level shutdown criteria are applicable to cetaceans and pinnipeds, respectively, as specified by NMFS (2000). Lamont-Doherty used these levels to establish the exclusion zones as presented in their application.

Lamont-Doherty used a process to develop and confirm the conservativeness of the mitigation radii for a shallow-water seismic survey in the northeast Pacific Ocean offshore Washington in 2012. Crone *et al.* (2014) analyzed the received sound levels from the 2012 survey and reported that the actual distances to received levels that would constitute the exclusion and buffer zones were two to three times smaller than what Lamont-Doherty's modeling approach had predicted. While these results confirm the role that bathymetry plays in propagation, they also confirm that empirical measurements from the Gulf of Mexico survey likely over-estimated the size of the exclusion zones for the 2012 shallow-water seismic surveys in

Washington. NMFS reviewed this information in consideration of how these data reflect on the accuracy of Lamont-Doherty's current modeling approach and we have concluded that the modeling of RMS distances likely results in predicted distances to acoustic thresholds (Table 2) that are conservative, *i.e.*, if actual distances to received sound levels deviate from distances predicted via modeling, actual distances are expected to be lesser, not greater, than predicted distances.

Power-Down Procedures

A power down involves decreasing the number of airguns in use such that the radius of the 180-dB or 190-dB exclusion zone is smaller to the extent that marine mammals are no longer within or about to enter the exclusion zone. A power down of the airgun array can also occur when the vessel is moving from one seismic line to another. During a power down for mitigation, the *Langseth* would operate

one airgun (40 in³). The continued operation of one airgun would alert marine mammals to the presence of the seismic vessel in the area. A shutdown occurs when the *Langseth* suspends all airgun activity.

If the observer detects a marine mammal outside the exclusion zone and the animal is likely to enter the zone, the crew would power down the airguns to reduce the size of the 180-dB or 190-dB exclusion zone before the animal enters that zone. Likewise, if a marine mammal is already within the zone after detection, the crew would power down the airguns immediately. During a power down of the airgun array, the crew would operate a single 40-in³ airgun which has a smaller exclusion zone. If the observer detects a marine mammal within or near the smaller exclusion zone around the airgun (Table 2), the crew would shut down the single airgun (see next section).

Resuming Airgun Operations After a Power Down

Following a power-down, the *Langseth* crew would not resume full airgun activity until the marine mammal has cleared the 180-dB or 190-dB exclusion zone. The observers would consider the animal to have cleared the exclusion zone if:

- The observer has visually observed the animal leave the exclusion zone; or
- An observer has not sighted the animal within the exclusion zone for 15 minutes for species with shorter dive durations (*i.e.*, small odontocetes or pinnipeds), or 30 minutes for species with longer dive durations (*i.e.*, mysticetes and large odontocetes, including sperm, pygmy sperm, dwarf sperm, and beaked whales); or

The *Langseth* crew would resume operating the airguns at full power after 15 minutes of sighting any species with short dive durations (*i.e.*, small odontocetes or pinnipeds). Likewise, the crew would resume airgun operations at full power after 30 minutes of sighting any species with longer dive durations (*i.e.*, mysticetes and large odontocetes, including sperm, pygmy sperm, dwarf sperm, and beaked whales).

NMFS estimates that the *Langseth* would transit outside the original 180-dB or 190-dB exclusion zone after an eight-minute wait period. This period is based on the average speed of the *Langseth* while operating the airguns (8.5 km/h; 5.3 mph). Because the vessel has transited away from the vicinity of the original sighting during the eight-minute period, implementing ramp-up procedures for the full array after an extended power down (*i.e.*, transiting for an additional 35 minutes from the location of initial sighting) would not meaningfully increase the effectiveness of observing marine mammals approaching or entering the exclusion zone for the full source level and would not further minimize the potential for take. The *Langseth's* observers are continually monitoring the exclusion zone for the full source level while the mitigation airgun is firing. On average, observers can observe to the horizon (10 km; 6.2 mi) from the height of the *Langseth's* observation deck and should be able to say with a reasonable degree of confidence whether a marine mammal would be encountered within this distance before resuming airgun operations at full power.

Shutdown Procedures

The *Langseth* crew would shut down the operating airgun(s) if they see a marine mammal within or approaching the exclusion zone for the single airgun.

The crew would implement a shutdown:

- (1) If an animal enters the exclusion zone of the single airgun after the crew has initiated a power down; or
- (2) If an observer sees the animal is initially within the exclusion zone of the single airgun when more than one airgun (typically the full airgun array) is operating.

Resuming Airgun Operations After a Shutdown

Following a shutdown in excess of eight minutes, the *Langseth* crew would initiate a ramp-up with the smallest airgun in the array (40-in³). The crew would turn on additional airguns in a sequence such that the source level of the array would increase in steps not exceeding 6 dB per five-minute period over a total duration of approximately 30 minutes. During ramp-up, the observers would monitor the exclusion zone, and if a marine mammal were observed, the *Langseth* crew would implement a power down or shutdown as though the full airgun array were operational.

During periods of active seismic operations, there are occasions when the *Langseth* crew would need to temporarily shut down the airguns due to equipment failure or for maintenance. In this case, if the airguns are inactive longer than eight minutes, the crew would follow ramp-up procedures for a shutdown described earlier and the observers would monitor the full exclusion zone and would implement a power down or shutdown if necessary.

If the full exclusion zone is not visible to the observer for at least 30 minutes prior to the start of operations in either daylight or nighttime, the *Langseth* crew would not commence ramp-up unless at least one airgun (40-in³ or similar) has been operating during the interruption of seismic survey operations. Given these provisions, it is likely that the vessel's crew would not ramp up the airgun array from a complete shutdown at night or in thick fog, because the outer part of the zone for that array would not be visible during those conditions.

If one airgun has operated during a power down period, ramp-up to full power would be permissible at night or in poor visibility, on the assumption that marine mammals would be alerted to the approaching seismic vessel by the sounds from the single airgun and could move away. The vessel's crew would not initiate a ramp-up of the airguns if an observer sees the marine mammal within or near the applicable exclusion zones during the day or close to the vessel at night.

Ramp-Up Procedures

Ramp-up of an airgun array provides a gradual increase in sound levels, and involves a step-wise increase in the number and total volume of airguns firing until the full volume of the airgun array is achieved. The purpose of a ramp-up is to "warn" marine mammals in the vicinity of the airguns, and to provide the time for them to leave the area and thus avoid any potential injury or impairment of their hearing abilities. Lamont-Doherty would follow a ramp-up procedure when the airgun array begins operating after an 8 minute period without airgun operations or when shut down has exceeded that period. Lamont-Doherty has used similar waiting periods (approximately eight to 10 minutes) during previous seismic surveys.

Ramp-up would begin with the smallest airgun in the array (40 in³). The crew would add airguns in a sequence such that the source level of the array would increase in steps not exceeding six dB per five minute period over a total duration of approximately 30 to 35 minutes. During ramp-up, the observers would monitor the exclusion zone, and if marine mammals are sighted, Lamont-Doherty would implement a power-down or shutdown as though the full airgun array were operational.

If the complete exclusion zone has not been visible for at least 30 minutes prior to the start of operations in either daylight or nighttime, Lamont-Doherty would not commence the ramp-up unless at least one airgun (40 in³ or similar) has been operating during the interruption of seismic survey operations. Given these provisions, it is likely that the crew would not ramp up the airgun array from a complete shutdown at night or in thick fog, because the outer part of the exclusion zone for that array would not be visible during those conditions. If one airgun has operated during a power-down period, ramp-up to full power would be permissible at night or in poor visibility, on the assumption that marine mammals would be alerted to the approaching seismic vessel by the sounds from the single airgun and could move away. Lamont-Doherty would not initiate a ramp-up of the airguns if an observer sights a marine mammal within or near the applicable exclusion zones. NMFS refers the reader to Figure 1, which presents a flowchart representing the ramp-up, power down, and shutdown protocols described in this notice.

Figure 1. Ramp-up, power down, and shut-down procedures for the *Langseth*.

¹ Ramp-Up Procedures

For a given survey, Lamont-Doherty would calculate a specified period based on the 180-dB exclusion zone radius in relation to the average planned speed of the *Langseth* while surveying. Lamont-Doherty has used similar periods (8-10 minutes) for previous surveys. Ramp up will not occur if a marine mammal or sea turtle has not cleared the exclusion zone for the full array.

Date: November 2015

Special Procedures for Concentrations of Large Whales

The *Langseth* would avoid exposing concentrations of large whales to sounds

greater than 160 dB re: 1 µPa within the 160-dB zone and would power down the array, if necessary. For purposes of this survey, a concentration or group of

whales would consist of six or more individuals visually sighted that do not appear to be traveling (e.g., feeding, socializing, etc.).

Speed and Course Alterations

If, during seismic data collection, Lamont-Doherty detects a marine mammal outside the exclusion zone that appears likely to enter the exclusion zone based on the animal's position and direction of travel, the *Langseth* would change speed and/or direction if this does not compromise operational safety. Due to the limited maneuverability of the primary survey vessel, altering speed, and/or course can result in an extended period of time to realign the *Langseth* to the transect line. However, if the animal(s) appear likely to enter the exclusion zone, the *Langseth* would undertake further mitigation actions, including a power down or shutdown of the airguns.

Mitigation Conclusions

NMFS has carefully evaluated Lamont-Doherty's mitigation measures in the context of ensuring that we prescribe the means of effecting the least practicable impact on the affected marine mammal species and stocks and their habitat. Our evaluation of potential measures included consideration of the following factors in relation to one another:

- The manner in which, and the degree to which, the successful implementation of the measure is expected to minimize adverse impacts to marine mammals;
- The proven or likely efficacy of the specific measure to minimize adverse impacts as planned; and
- The practicability of the measure for applicant implementation.

Any mitigation measure(s) prescribed by NMFS should be able to accomplish, have a reasonable likelihood of accomplishing (based on current science), or contribute to the accomplishment of one or more of the general goals listed here:

1. Avoidance or minimization of injury or death of marine mammals wherever possible (goals 2, 3, and 4 may contribute to this goal).
2. A reduction in the numbers of marine mammals (total number or number at biologically important time or location) exposed to airgun operations that we expect to result in the take of marine mammals (this goal may contribute to 1, above, or to reducing harassment takes only).
3. A reduction in the number of times (total number or number at biologically important time or location) individuals would be exposed to airgun operations that we expect to result in the take of marine mammals (this goal may contribute to 1, above, or to reducing harassment takes only).

4. A reduction in the intensity of exposures (either total number or number at biologically important time or location) to airgun operations that we expect to result in the take of marine mammals (this goal may contribute to a, above, or to reducing the severity of harassment takes only).

5. Avoidance or minimization of adverse effects to marine mammal habitat, paying special attention to the food base, activities that block or limit passage to or from biologically important areas, permanent destruction of habitat, or temporary destruction/disturbance of habitat during a biologically important time.

6. For monitoring directly related to mitigation—an increase in the probability of detecting marine mammals, thus allowing for more effective implementation of the mitigation.

Based on the evaluation of Lamont-Doherty's planned measures, as well as other measures developed by NMFS (*i.e.*, special procedures for concentrations of large whales), NMFS has determined that the planned mitigation measures provide the means of effecting the least practicable impact on marine mammal species or stocks and their habitat, paying particular attention to rookeries, mating grounds, and areas of similar significance.

Monitoring Measures

In order to issue an Incidental Harassment Authorization for an activity, section 101(a)(5)(D) of the MMPA states that NMFS must set forth "requirements pertaining to the monitoring and reporting of such taking." The MMPA implementing regulations at 50 CFR 216.104 (a)(13) indicate that requests for Authorizations must include the suggested means of accomplishing the necessary monitoring and reporting that will result in increased knowledge of the species and of the level of taking or impacts on populations of marine mammals that we expect to be present in the action area.

Monitoring measures prescribed by NMFS should accomplish one or more of the following general goals:

1. An increase in the probability of detecting marine mammals, both within the mitigation zone (thus allowing for more effective implementation of the mitigation) and during other times and locations, in order to generate more data to contribute to the analyses mentioned later;
2. An increase in our understanding of how many marine mammals would be affected by seismic airguns and other active acoustic sources and the likelihood of associating those

exposures with specific adverse effects, such as behavioral harassment, temporary or permanent threshold shift;

3. An increase in our understanding of how marine mammals respond to stimuli that we expect to result in take and how those anticipated adverse effects on individuals (in different ways and to varying degrees) may impact the population, species, or stock (specifically through effects on annual rates of recruitment or survival) through any of the following methods:

- a. Behavioral observations in the presence of stimuli compared to observations in the absence of stimuli (*i.e.*, to be able to accurately predict received level, distance from source, and other pertinent information);
- b. Physiological measurements in the presence of stimuli compared to observations in the absence of stimuli (*i.e.*, to be able to accurately predict received level, distance from source, and other pertinent information);
- c. Distribution and/or abundance comparisons in times or areas with concentrated stimuli versus times or areas without stimuli;

4. An increased knowledge of the affected species; and

5. An increase in our understanding of the effectiveness of certain mitigation and monitoring measures.

Lamont-Doherty plans to conduct marine mammal monitoring during the planned project to supplement the mitigation measures that include real-time monitoring (see "Vessel-based Visual Mitigation Monitoring" above), and to satisfy the monitoring requirements of the Authorization.

Vessel-Based Passive Acoustic Monitoring

Passive acoustic monitoring would complement the visual mitigation monitoring program, when practicable. Visual monitoring typically is not effective during periods of poor visibility or at night, and even with good visibility, is unable to detect marine mammals when they are below the surface or beyond visual range. Passive acoustic monitoring can improve detection, identification, and localization of cetaceans when used in conjunction with visual observations. The passive acoustic monitoring would serve to alert visual observers (if on duty) when vocalizing cetaceans are detected. It is only useful when marine mammals call, but it can be effective either by day or by night, and does not depend on good visibility. The acoustic observer would monitor the system in real time so that he/she can advise the visual observers if they acoustically detect cetaceans.

The passive acoustic monitoring system consists of hardware (*i.e.*, hydrophones) and software. The “wet end” of the system consists of a towed hydrophone array connected to the vessel by a tow cable. The tow cable is 250 m (820.2 ft) long and the hydrophones are fitted in the last 10 m (32.8 ft) of cable. A depth gauge, attached to the free end of the cable, typically towed at depths less than 20 m (65.6 ft). The *Langseth* crew would deploy the array from a winch located on the back deck. A deck cable would connect the tow cable to the electronics unit in the main computer lab where the acoustic station, signal conditioning, and processing system would be located. The Pamguard software amplifies, digitizes, and then processes the acoustic signals received by the hydrophones. The system can detect marine mammal vocalizations at frequencies up to 250 kHz.

One acoustic observer, an expert bioacoustician with primary responsibility for the passive acoustic monitoring system would be aboard the *Langseth* in addition to the other visual observers who would rotate monitoring duties. The acoustic observer would monitor the towed hydrophones 24 hours per day during airgun operations and during most periods when the *Langseth* is underway while the airguns are not operating. However, passive acoustic monitoring may not be possible if damage occurs to both the primary and back-up hydrophone arrays during operations. The primary passive acoustic monitoring streamer on the *Langseth* is a digital hydrophone streamer. Should the digital streamer fail, back-up systems should include an analog spare streamer and a hull-mounted hydrophone.

One acoustic observer would monitor the acoustic detection system by listening to the signals from two channels via headphones and/or speakers and watching the real-time spectrographic display for frequency ranges produced by cetaceans. The observer monitoring the acoustical data would be on shift for one to six hours at a time. The other observers would rotate as an acoustic observer, although the expert acoustician would be on passive acoustic monitoring duty more frequently.

When the acoustic observer detects a vocalization while visual observations are in progress, the acoustic observer on duty would contact the visual observer immediately, to alert him/her to the presence of cetaceans (if they have not already been seen), so that the vessel's crew can initiate a power down or shutdown, if required. The observer

would enter the information regarding the call into a database. Data entry would include an acoustic encounter identification number, whether it was linked with a visual sighting, date, time when first and last heard and whenever any additional information was recorded, position and water depth when first detected, bearing if determinable, species or species group (*e.g.*, unidentified dolphin, sperm whale), types and nature of sounds heard (*e.g.*, clicks, continuous, sporadic, whistles, creaks, burst pulses, strength of signal, etc.), and any other notable information. Acousticians record the acoustic detection for further analysis.

Observer Data and Documentation

Observers would record data to estimate the numbers of marine mammals exposed to various received sound levels and to document apparent disturbance reactions or lack thereof. They would use the data to help better understand the impacts of the activity on marine mammals and to estimate numbers of animals potentially ‘taken’ by harassment (as defined in the MMPA). They will also provide information needed to order a power down or shut down of the airguns when a marine mammal is within or near the exclusion zone.

When an observer makes a sighting, they will record the following information:

1. Species, group size, age/size/sex categories (if determinable), behavior when first sighted and after initial sighting, heading (if consistent), bearing and distance from seismic vessel, sighting cue, apparent reaction to the airguns or vessel (*e.g.*, none, avoidance, approach, paralleling, etc.), and behavioral pace.

2. Time, location, heading, speed, activity of the vessel, sea state, visibility, and sun glare.

3. The observer will record the data listed under (2) at the start and end of each observation watch, and during a watch whenever there is a change in one or more of the variables.

4. Observers will record all observations and power downs or shutdowns in a standardized format and will enter data into an electronic database. The observers will verify the accuracy of the data entry by computerized data validity checks during data entry and by subsequent manual checking of the database. These procedures will allow the preparation of initial summaries of data during and shortly after the field program, and will facilitate transfer of the data to statistical, graphical, and other

programs for further processing and archiving.

Results from the vessel-based observations will provide:

1. The basis for real-time mitigation (airgun power down or shutdown).
2. Information needed to estimate the number of marine mammals potentially taken by harassment, which Lamont-Doherty must report to the Office of Protected Resources.
3. Data on the occurrence, distribution, and activities of marine mammals and turtles in the area where Lamont-Doherty would conduct the seismic study.
4. Information to compare the distance and distribution of marine mammals and turtles relative to the source vessel at times with and without seismic activity.
5. Data on the behavior and movement patterns of marine mammals detected during non-active and active seismic operations.

Reporting Measures

Lamont-Doherty will submit a report to NMFS and to NSF within 90 days after the end of the cruise. The report will describe the operations conducted and sightings of marine mammals near the operations. The report will provide full documentation of methods, results, and interpretation pertaining to all monitoring. The 90-day report will summarize the dates and locations of seismic operations, and all marine mammal sightings (dates, times, locations, activities, associated seismic survey activities).

The report will also include estimates of the number and nature of exposures that occurred above the harassment threshold based on the observations and in consideration of the detectability of the marine mammal species observed (*e.g.*, in consideration of factors such as $g(0)$ or $f(0)$). Lamont-Doherty must provide an estimate of the number (by species) of marine mammals that may have been exposed (based on modeling results and accounting for animals at the surface but not detected [*i.e.*, $g(0)$ values] and for animals present but underwater and not available for sighting [*i.e.*, $f(0)$ values]) to the seismic activity at received levels greater than or equal to 160 dB re: 1 μ Pa and/or 180 dB re: 1 μ Pa for cetaceans and 190-dB re: 1 μ Pa for pinnipeds. NMFS includes this requirement for post-survey exposure estimates in acknowledgement of the uncertainty inherent in the pre-survey take estimates, and these post-survey corrections are intended to provide a relative qualitative sense of the accuracy of the pre-survey take estimates based on the marine mammals actually

observed during the survey and the factors described above. However, it is important to note that these corrections, while helpful in utilizing the most appropriate surrogate numbers, will utilize values determined by species behavior in other areas (f(0)) and detection probabilities calculated for different observers in different environmental conditions (g(0)). Additionally, correction factors of this nature are likely more effective over more extensive targeted marine mammal survey efforts, whereas for a shorter survey such as the one considered here, the patchiness of marine mammal occurrence makes quantitative accuracy less likely. Therefore, while the corrected post-survey exposure estimates certainly improve upon exposure assumptions based solely on observation, and may appropriately be used to qualitatively inform future take estimates, they should not be construed as an indicator that the corrected number of marine mammals equates to the number of marine mammals definitively taken during the survey.

In the unanticipated event that the specified activity clearly causes the take of a marine mammal in a manner not permitted by the authorization (if issued), such as an injury, serious injury, or mortality (e.g., ship-strike, gear interaction, and/or entanglement), Lamont-Doherty shall immediately cease the specified activities and immediately report the take to the Chief Permits and Conservation Division, Office of Protected Resources, NMFS. The report must include the following information:

- Time, date, and location (latitude/longitude) of the incident;
- Name and type of vessel involved;
- Vessel's speed during and leading up to the incident;
- Description of the incident;
- Status of all sound source use in the 24 hours preceding the incident;
- Water depth;

- Environmental conditions (e.g., wind speed and direction, Beaufort sea state, cloud cover, and visibility);
- Description of all marine mammal observations in the 24 hours preceding the incident;
- Species identification or description of the animal(s) involved;
- Fate of the animal(s); and
- Photographs or video footage of the animal(s) (if equipment is available).

Lamont-Doherty shall not resume its activities until NMFS is able to review the circumstances of the prohibited take. NMFS would work with Lamont-Doherty to determine what is necessary to minimize the likelihood of further prohibited take and ensure MMPA compliance. Lamont-Doherty may not resume their activities until notified by NMFS via letter, email, or telephone.

In the event that Lamont-Doherty discovers an injured or dead marine mammal, and the lead visual observer determines that the cause of the injury or death is unknown and the death is relatively recent (i.e., in less than a moderate state of decomposition as we describe in the next paragraph), Lamont-Doherty will immediately report the incident to the Chief Permits and Conservation Division, Office of Protected Resources, NMFS. The report must include the same information identified in the paragraph above this section. Activities may continue while NMFS reviews the circumstances of the incident. NMFS would work with Lamont-Doherty to determine whether modifications in the activities are appropriate.

In the event that Lamont-Doherty discovers an injured or dead marine mammal, and the lead visual observer determines that the injury or death is not associated with or related to the authorized activities (e.g., previously wounded animal, carcass with moderate to advanced decomposition, or scavenger damage), Lamont-Doherty would report the incident to the Chief

Permits and Conservation Division, Office of Protected Resources, NMFS, within 24 hours of the discovery. Lamont-Doherty would provide photographs or video footage (if available) or other documentation of the stranded animal sighting to NMFS.

Estimated Take by Incidental Harassment

Except with respect to certain activities not pertinent here, section 3(18) of the MMPA defines "harassment" as: any act of pursuit, torment, or annoyance which (i) has the potential to injure a marine mammal or marine mammal stock in the wild [Level A harassment]; or (ii) has the potential to disturb a marine mammal or marine mammal stock in the wild by causing disruption of behavioral patterns, including, but not limited to, migration, breathing, nursing, breeding, feeding, or sheltering [Level B harassment].

Acoustic stimuli (i.e., increased underwater sound) generated during the operation of the airgun array may have the potential to result in the behavioral disturbance of some marine mammals and may have an even smaller potential to result in permanent threshold shift (non-lethal injury) of some marine mammals. NMFS expects that the mitigation and monitoring measures would minimize the possibility of injurious or lethal takes. However, NMFS cannot discount the possibility (albeit small) that exposure to sound from the planned survey could result in non-lethal injury (Level A harassment). Thus, NMFS authorizes take by Level B harassment and Level A harassment resulting from the operation of the sound sources for the planned seismic survey based upon the current acoustic exposure criteria shown in Table 3, subject to the limitations in take described in Tables 4–7 later in this notice.

TABLE 3—NMFS'S CURRENT ACOUSTIC EXPOSURE CRITERIA

Criterion	Criterion definition	Threshold
Level A Harassment (Injury)	Permanent Threshold Shift (PTS) (Any level above that which is known to cause TTS).	180 dB re 1 microPa-m (cetaceans)/190 dB re 1 microPa-m (pinnipeds) root mean square (rms).
Level B Harassment	Behavioral Disruption (for impulse noises)	160 dB re 1 microPa-m (rms).

NMFS's practice is to apply the 160 dB re: 1 μPa received level threshold for underwater impulse sound levels to predict whether behavioral disturbance that rises to the level of Level B harassment is likely to occur. NMFS's practice is to apply the 180 dB or 190 dB re: 1 μPa (for cetaceans and

pinnipeds, respectively) received level threshold for underwater impulse sound levels to predict whether permanent threshold shift (auditory injury), which we consider as harassment (Level A), is likely to occur.

Acknowledging Uncertainties in Estimating Take

Given the many uncertainties in predicting the quantity and types of impacts of sound on marine mammals, it is common practice for us to estimate how many animals are likely to be present within a particular distance of a

given activity, or exposed to a particular level of sound. We use this information to predict how many animals potentially could be taken. In practice, depending on the amount of information available to characterize daily and seasonal movement and distribution of affected marine mammals, distinguishing between the numbers of individuals harassed and the instances of harassment can be difficult to parse. Moreover, when one considers the duration of the activity, in the absence of information to predict the degree to which individual animals are likely exposed repeatedly on subsequent days, one assumption is that entirely new animals could be exposed every day, which results in a take estimate that in some circumstances overestimates the number of individuals harassed.

The following sections describe Lamont-Doherty's and NMFS's methods to estimate take by incidental harassment. We base these estimates on the number of marine mammals that are estimated to be exposed to seismic airgun sound levels above the Level B harassment threshold of 160 dB during a total of approximately 9,633 km (5,986 mi) of transect lines in the southeast Pacific Ocean.

Density Estimates: Lamont-Doherty was unable to identify any systematic aircraft- or ship-based surveys conducted for marine mammals in waters of the southeast Pacific Ocean offshore Chile. Lamont-Doherty used densities from NMFS Southwest Fisheries Science Center (SWFSC) cruises (Ferguson and Barlow, 2001, 2003; Barlow 2003, 2010; Forney, 2007) in the California Current, which is similar to the Humboldt Current Coastal area in which the planned surveys are located. Both are eastern boundary currents that feature narrow continental shelves, upwelling, high productivity, and fluctuating fishery resources (sardines and anchovies). The densities used were survey effort-weighted means for the locations (blocks or states). In cases where multiple density estimates existed for an area, Lamont-Doherty used the highest density range (summer/fall) for each species within the survey area. We refer the reader to Lamont-Doherty's application for detailed information on how Lamont-Doherty calculated densities for marine mammals from the SWFSC cruises.

For blue whales in the southern survey area, NMFS used the density (9.56/km²) reported by Galletti Vernazzani *et al.* (2012) for approximately four days of the planned southern survey to account for potential survey operations occurring near a

known foraging area between 39° S and 44° S. For the remaining 31 days of the planned survey, NMFS used the density estimate presented in Lamont-Doherty's application (2.07/km²). NMFS considers Lamont-Doherty's approach to calculating densities for the remaining marine mammal species in the survey areas as the best available information. We present the estimated densities (when available) in Tables 4, 5, and 6 in this notice.

Modeled Number of Instances of Exposures: Lamont-Doherty will conduct the planned seismic surveys offshore Chile in the southeast Pacific Ocean and presented NMFS with estimates of the anticipated numbers of instances that marine mammals could be exposed to sound levels greater than or equal to 160, 180, and 190 dB re: 1 μ Pa during the planned seismic survey (outside the Chilean territorial sea) in Tables 3, 4, and 5 in their application. NMFS independently reviewed these estimates and presents revised estimates of the anticipated numbers of instances that marine mammals could be exposed to sound levels greater than or equal to 160, 180, and 190 dB re: 1 μ Pa during the planned seismic survey (outside the Chilean territorial sea) in Tables 4, 5, and 6 in this notice. Table 7 presents the total numbers of instances of take that NMFS authorizes. As described above, NMFS cannot authorize the incidental take of marine mammals in the territorial seas of foreign nations, as the MMPA does not apply in those waters; therefore the total numbers of instances of take that NMFS authorizes represents only the takes predicted to occur outside of the Chilean territorial sea (Table 7).

Take Estimate Method for Species with Density Information: Briefly, we take the estimated density of marine mammals within an area (animals/km²) and multiply that number by the daily ensonified area (km²). The product (rounded) is the number of instance of take within one day. We then multiply the number of instances of take within one day by the number of survey days (plus 25 percent contingency). The result is an estimate of the potential number of instances that marine mammals could be exposed to airgun sounds above the Level B harassment threshold (*i.e.*, the 160 dB ensonified area minus the 180/190-dB ensonified area) and the Level A harassment threshold (*i.e.*, the 180/190-dB ensonified area only) over the duration of each planned survey.

There is some uncertainty about the representativeness of the estimated density data and the assumptions used in their calculations. Oceanographic

conditions, including occasional El Niño and La Niña events, influence the distribution and numbers of marine mammals present in the eastern tropical Pacific Ocean, resulting in considerable year-to-year variation in the distribution and abundance of many marine mammal species. Thus, for some species, the densities derived from past surveys may not be representative of the densities that would be encountered during the planned seismic surveys. However, the approach used is based on the best available data.

In many cases, this estimate of instances of exposures is likely an overestimate of the number of individuals that are taken, because it assumes 100 percent turnover in the area every day, (*i.e.*, that each new day results in takes of entirely new individuals with no repeat takes of the same individuals over the three periods (northern: 35 days; central: 6 days; and southern: 34 days) including contingency. It is difficult to quantify to what degree this method overestimates the number of individuals potentially taken. Except as described later for a few specific species, NMFS uses this number of instances as the estimate of individuals (and authorized take).

Take Estimates for Species with Less than One Instance of Exposure: Using the approach described earlier, the model generated instances of take for some species that were less than one over the 75 total survey days. Those species include: Bryde's, dwarf sperm, killer, and sei whale. NMFS used data based on dedicated survey sighting information from the Atlantic Marine Assessment Program for Protected Species (AMAPPS) surveys in 2010, 2011, and 2013 (AMAPPS, 2010, 2011, 2013) to estimate take and assumed that Lamont-Doherty could potentially encounter one group of each species during the planned seismic survey. NMFS believes it is reasonable to use the average (mean) group size (weighted by effort and rounded up) from the AMAPPS surveys for Bryde's whale (2), dwarf sperm whale (2), killer whale (4), and sei whale (3) to derive a reasonable estimate of take for eruptive occurrences of each these species only once for each survey.

Take Estimates for Species with No Density Information: Density information for the southern right whale, pygmy right whale, Antarctic minke whale, sei whale, dwarf sperm whale, Shephard's beaked whale, pygmy beaked whale, southern bottlenose whale, hourglass dolphin, pygmy killer whale, false killer whale; short-finned pilot whale, Juan Fernandez fur seal, and southern

elephant seal in the southeast Pacific Ocean is data poor or non-existent. When density estimates were not available for a particular survey leg, NMFS used data based on dedicated survey sighting information from the Atlantic Marine Assessment Program for Protected Species (AMAPPS) surveys in 2010, 2011, and 2013 (AMAPPS, 2010, 2011, 2013) and from Santora (2012) to estimate mean group size and take for these species. NMFS assumed that Lamont-Doherty could potentially encounter one group of each species each day during the seismic survey. NMFS believes it is reasonable to use the average (mean) group size (weighted by effort and rounded up) for each species multiplied by the number of survey days to derive an estimate of take from potential encounters.

¹ The Level A estimates are overestimates of predicted impacts to marine mammals as the estimates do not take into consideration the required mitigation measures for shutdowns or power downs if a marine mammal is likely to enter the 180 or 190 dB exclusion zone while the airguns are active.

² Authorized Level A and B takes (used by NMFS as proxy for number of individuals exposed) expressed as the percent of the population listed in Table 1 in this notice. Unknown = Abundance size not available.

Lamont-Doherty did not estimate any additional take from sound sources other than airguns. NMFS does not expect the sound levels produced by the echosounder and sub-bottom profiler to exceed the sound levels produced by the airguns. During the estimated 10 nm of transit that is expected to occur between the three planned survey locations, the use of the MBES and SBP may occur independent of seismic airgun operation. This use of the MBES and SBP in the absence of airgun use was not explicitly described in the **Federal Register** notice for the proposed IHA (81 FR 23117; April 19, 2016). While sound from MBES and SBP has the potential to result in harassment of marine mammals, any potential for takes that could occur as a result of the MBES and SBP within those 10 nm of transit, which would equate to a total of

approximately two hours of transit time based on a vessel speed of approximately 4.5 kt (5.1 mph), would be de minimis, based on the fact that the use of these sources may occur for only a portion of the 10 nm of transit, resulting in a relatively brief amount of time that these sources would potentially be operating in the absence of airgun operation. Additionally, as the take estimate methodology (see Estimated Take by Incidental Harassment) includes a 25 percent contingency for equipment failures, resurveys, or other operational needs, any takes that could potentially occur as a result of the MBES and SBP in the absence of airgun operations would be accounted for in this 25 percent contingency.

As described above, NMFS considers the probability for entanglement of

marine mammals to be so low as to be discountable, because of the vessel speed and the monitoring efforts onboard the survey vessel. Therefore, NMFS does not authorize additional takes for entanglement.

As described above, the *Langseth* will operate at a relatively slow speed (typically 4.6 knots [8.5 km/h; 5.3 mph]) when conducting the survey. Protected species observers would monitor for marine mammals, which would trigger mitigation measures, including vessel avoidance where safe. Therefore, NMFS does not anticipate nor do we authorize takes of marine mammals as a result of vessel strike.

There is no evidence that the planned survey activities could result in serious injury or mortality within the specified geographic area for the requested Authorization. The required mitigation

and monitoring measures would minimize any potential risk for serious injury or mortality.

Analysis and Determinations

Negligible Impact

Negligible impact is “an impact resulting from the specified activity that cannot be reasonably expected to, and is not reasonably likely to, adversely affect the species or stock through effects on annual rates of recruitment or survival” (50 CFR 216.103). The lack of likely adverse effects on annual rates of recruitment or survival (*i.e.*, population level effects) forms the basis of a negligible impact finding. Thus, an estimate of the number of takes, alone, is not enough information on which to base an impact determination. In addition to considering estimates of the number of marine mammals that might be “taken” through behavioral harassment, NMFS must consider other factors, such as the likely nature of any responses (their intensity, duration, etc.), the context of any responses (critical reproductive time or location, migration, etc.), as well as the number and nature of estimated Level A harassment takes, the number of estimated mortalities, effects on habitat, and the status of the species.

In making a negligible impact determination, NMFS considers:

- The number of anticipated injuries, serious injuries, or mortalities;
- The number, nature, and intensity, and duration of harassment; and
- The context in which the takes occur (*e.g.*, impacts to times or areas of significance);
- The status of stock or species of marine mammals (*i.e.*, depleted, not depleted, decreasing, increasing, stable, impact relative to the size of the population);
- Impacts on habitat affecting rates of recruitment/survival; and
- The effectiveness of monitoring and mitigation measures to reduce the number or severity of incidental takes.

To avoid repetition, our analysis applies to all the species listed in Table 7, given that NMFS expects the anticipated effects of the seismic airguns to be similar in nature. Where there are meaningful differences between species or stocks, or groups of species, in anticipated individual responses to activities, impact of expected take on the population due to differences in population status, or impacts on habitat, NMFS has identified species-specific factors to inform the analysis.

Given the required mitigation and related monitoring, NMFS does not anticipate that serious injury or

mortality would occur as a result of Lamont-Doherty’s seismic survey in the southeast Pacific Ocean. Thus NMFS does not authorize any mortality. NMFS’s predicted estimates for Level A harassment take for some species are likely overestimates of the injury that will occur, as NMFS expects that successful implementation of the mitigation measures would avoid Level A take in some instances. Also, NMFS expects that some individuals would avoid the source at levels expected to result in injury, given sufficient notice of the *Langseth’s* approach due to the vessel’s relatively low speed when conducting seismic surveys. Though NMFS expects that Level A harassment is unlikely to occur at the numbers authorized, is difficult to quantify the degree to which the mitigation and avoidance will reduce the number of animals that might incur PTS, therefore we authorize, include in our analyses, the modeled number of Level A takes, which does not take the mitigation or avoidance into consideration. However, because of the constant movement of the *Langseth* and of the animals, as well as the fact that the vessel is not expected to remain in any one area in which individuals would be expected to concentrate for any extended amount of time (*i.e.*, since the duration of exposure to loud sounds will be relatively short), we anticipate that any PTS that may be incurred in marine mammals would be in the form of only a small degree of permanent threshold shift, and not total deafness, that would not be likely to affect the fitness of any individuals.

Of the marine mammal species under our jurisdiction that are known to occur or likely to occur in the study area, the following species are listed as endangered under the ESA: Blue, fin, humpback, sei, Southern right, and sperm whales. The other marine mammal species that may be taken by harassment during Lamont-Doherty’s seismic survey program are not listed as threatened or endangered under the ESA.

Cetaceans. Odontocete reactions to seismic energy pulses are usually thought to be limited to shorter distances from the airgun(s) than are those of mysticetes, in part because odontocete low-frequency hearing is assumed to be less sensitive to the low frequency signals of these airguns than that of mysticetes. NMFS generally expects cetaceans to move away from a noise source that is annoying prior to its becoming potentially injurious, and this expectation is expected to hold true in the case of the planned activities, especially given the relatively slow travel speed of the *Langseth* while

seismic surveys are being conducted (4.5 kt; 5.1 mph). The relatively slow ship speed is expected to provide cetaceans with sufficient notice of the oncoming vessel and thus sufficient opportunity to avoid the seismic sound source before it reaches a level that would be potentially injurious to the animal. However, as described above, Level A takes for a small group of cetacean species are authorized.

Potential impacts to marine mammal habitat were discussed previously in this document (see the “Anticipated Effects on Habitat” section). Although some disturbance is possible to food sources of marine mammals, the impacts are anticipated to be minor enough as to not affect the feeding success of any individuals long-term. Regarding direct effects on cetacean feeding, based on the fact that the action footprint does not include any areas recognized specifically for higher value feeding habitat, the mobile and ephemeral nature of most prey sources, and the size of the southeast Pacific Ocean where feeding by marine mammals occurs versus the localized area of the marine survey activities, any missed feeding opportunities in the direct project area are expected to be minor based on the fact that other equally valuable feeding opportunities likely exist nearby.

Taking into account the planned mitigation measures, effects on cetaceans are generally expected to be restricted to avoidance of a limited area around the survey operation and short-term changes in behavior, falling within the MMPA definition of “Level B harassment.” Animals are not expected to permanently abandon any area that is surveyed, and based on the best available information, any behaviors that are interrupted during the activity are expected to resume once the activity ceases. For example, as described above, gray whales have continued to migrate annually along the west coast of North America with substantial increases in the population over recent years, despite intermittent seismic exploration in that area for decades (Appendix A in Malme *et al.*, 1984; Richardson *et al.*, 1995; Allen and Angliss, 2014). Similarly, bowhead whales have continued to travel to the eastern Beaufort Sea each summer, and their numbers have increased notably, despite seismic exploration in their summer and autumn range for many years (Richardson *et al.*, 1987; Allen and Angliss, 2014). The history of coexistence between seismic surveys and baleen whales suggests that brief exposures to sound pulses from any single seismic survey are unlikely to

result in prolonged effects. Only a small portion of marine mammal habitat will be affected at any time, and other areas within the southeast Pacific Ocean would be available for necessary biological functions. Overall, the consequences of behavioral modification are not expected to affect cetacean growth, survival, and/or reproduction, and therefore are not expected to be biologically significant.

Pinnipeds. Generally speaking, pinnipeds may react to a sound source in a number of ways depending on their experience with the sound source and what activity they are engaged in at the time of the exposure, with behavioral responses to sound ranging from a mild orienting response, or a shifting of attention, to flight and panic. However, research and monitoring observations from activities similar to those planned have shown that pinnipeds in the water are generally tolerant of anthropogenic noise and activity. Visual monitoring from seismic vessels has shown only slight (if any) avoidance of airguns by pinnipeds and only slight (if any) changes in behavior (Harris *et al.*, 2001; Moulton and Lawson, 2002). During foraging trips, extralimital pinnipeds may not react at all to the sound from the survey or may alert, ignore the stimulus, change their behavior, or avoid the immediate area by swimming away or diving. Behavioral effects to sound are generally more likely to occur at higher received levels (*i.e.*, within a few kilometers of a sound source). However, the slow speed of the *Langseth* while conducting seismic surveys (approximately 4.5 kt; 5.1 mph) is expected to provide ample opportunity for pinnipeds to avoid and keep some distance between themselves and the loudest sources of sound associated with the planned activities. Additionally, underwater sound from the planned survey would not be audible at pinniped haulouts or rookeries, therefore the consequences of behavioral responses in these areas are expected to be minimal. Overall, the consequences of behavioral modification are not expected to affect pinniped growth, survival, and/or reproduction, and therefore are not expected to be biologically significant.

Many animals perform vital functions, such as feeding, resting, traveling, and socializing, on a diel cycle (*i.e.*, 24 hour cycle). Behavioral reactions to noise exposure (such as disruption of critical life functions, displacement, or avoidance of important habitat) are more likely to be significant if they last more than one diel cycle or recur on subsequent days (Southall *et al.*, 2007). While NMFS anticipates that the

seismic operations would occur on consecutive days, the estimated duration of the survey would last no more than 75 days but would increase sound levels in the marine environment in a relatively small area surrounding the vessel (compared to the range of most of the marine mammals within the survey area), which is constantly travelling over distances, and some animals may only be exposed to and harassed by sound for less than a day.

For reasons stated previously in this document and based on the following factors, Lamont-Doherty's planned activities are not likely to cause long-term behavioral disturbance, serious injury, or death, or other effects that would be expected to adversely affect reproduction or survival of any individuals. They include:

- The anticipated impacts of Lamont-Doherty's survey activities on marine mammals are temporary behavioral changes due, primarily, to avoidance of the area around the seismic vessel;
- The likelihood that, given the constant movement of boat and animals and the nature of the survey design (not concentrated in areas of high marine mammal concentration), any PTS that is incurred would be of a low level;
- The availability of alternate areas of similar habitat value for marine mammals to temporarily vacate the survey area during the operation of the airgun(s) to avoid acoustic harassment;
- The expectation that the seismic survey would have no more than a temporary and minimal adverse effect on any fish or invertebrate species that serve as prey species for marine mammals, and therefore consider the potential impacts to marine mammal habitat minimal.

Tables 4–7 in this document describe the number of Level A and Level B harassment takes that we anticipate as a result of the planned survey activities outside Chile's territorial sea (12 nm). Lamont-Doherty would conduct the planned seismic survey within the EEZ and territorial waters of Chile. The planned survey would occur primarily on the high seas, with a small portion occurring within Chile's territorial sea. As described above, NMFS does not have authority to authorize the incidental take of marine mammals in the territorial seas of foreign nations, because the MMPA does not apply in those waters. However, as part of the analysis supporting our determination under the MMPA that the activity would have a negligible impact on the affected species, we must consider the incidental take expected to occur as a result of the activity in the entire

activity area, including both territorial seas and high seas.

Based on NMFS's analysis, the area within the planned northern survey predicted to be ensonified to the Level B harassment threshold (160 dB re: 1 μ Pa) within Chilean territorial seas accounts for approximately 19 percent of the total area (including high seas and Chilean territorial seas combined) predicted to be ensonified to the Level B harassment threshold; for the planned central survey, the area predicted to be ensonified to the Level B harassment threshold within territorial seas accounts for approximately three percent of the total area predicted to be ensonified to the Level B harassment threshold in that entire survey area; and for the planned southern survey, the area predicted to be ensonified to the Level B harassment threshold within territorial seas accounts for approximately 24 percent of the total area predicted to be ensonified to the Level B harassment threshold in that entire survey area (Table 8).

We expect the impacts of Lamont-Doherty's survey activities, including the impacts of takes that are expected to occur within the territorial sea, to include temporary behavioral changes due, primarily, to avoidance of the area around the seismic vessel, with the potential for a small degree of PTS in a limited number of animals. Effects on marine mammals are generally expected to be restricted to avoidance of a limited area around the survey operation and short-term changes in behavior, falling within the MMPA definition of "Level B harassment." The slow speed of the *Langseth* while conducting seismic surveys (approximately 4.5 kt; 5.1 mph) is expected to provide ample opportunity for pinnipeds and cetaceans to avoid and keep some distance between themselves and the loudest sources of sound associated with the planned activities, both within and outside the territorial sea. Additionally, underwater sound from the planned survey, including the portions of the survey planned within the territorial sea, would not be audible at pinniped haulouts or rookeries, therefore the consequences of behavioral responses in these areas are expected to be minimal. Overall, taking into account the takes expected to occur within the territorial sea as well as those expected to occur outside the territorial sea that NMFS authorizes, the consequences of behavioral modification are not expected to affect growth, survival, and/or reproduction of cetaceans or pinnipeds, and therefore are not expected to be biologically significant.

Marine mammals are not expected to permanently abandon any area that is surveyed, including areas within territorial seas, and based on the best available information, any behaviors that are interrupted during the activity are expected to resume once the activity ceases. Although some disturbance is possible to food sources of marine mammals within territorial seas, the impacts to those marine mammals are anticipated to be minor enough as to not affect the feeding success of any individuals long-term. Any missed feeding opportunities in the project area within territorial seas are expected to be minor based on the fact that other equally valuable feeding opportunities likely exist nearby. The portions of the seismic surveys that will occur within territorial seas would have no more than a temporary and minimal adverse effect

on any fish or invertebrate species that serve as prey species for marine mammals, and therefore we believe the potential impacts to marine mammal habitat will be minimal.

As is the case for surveys outside territorial seas as described above, due to constant movement of the *Langseth* and of the animals, as well as the fact that the vessel is not expected to remain in any one area in which individuals would be expected to concentrate for any extended amount of time (*i.e.*, since the duration of exposure to loud sounds will be relatively short), we anticipate that any PTS that may be incurred in marine mammals within the territorial sea would be in the form of only a small degree of permanent threshold shift, and not total deafness, that would not be likely to affect the fitness of any individuals. There is no evidence that

the planned survey activities, either outside or within the territorial sea, could result in serious injury or mortality of marine mammals, and as described above NMFS expects that individuals would avoid the source at levels expected to result in injury, given sufficient notice of the *Langseth's* approach due to the vessel's relatively low speed when conducting seismic surveys.

For the reasons described above, the takes that would occur within the territorial sea, while not authorized by NMFS, do not alter our determinations above with respect to the relative likelihood of the activity to cause long-term behavioral disturbance, serious injury, or death, or other effects that would be expected to adversely affect reproduction or survival of any individual marine mammals.

TABLE 8—AREAS PREDICTED TO BE ENSONIFIED TO LEVEL B HARASSMENT THRESHOLD INSIDE AND OUTSIDE CHILEAN TERRITORIAL SEAS, AND PERCENT INCREASE IN ENSONIFIED AREA PREDICTED IN TERRITORIAL SEAS VERSUS ENSONIFIED AREA PREDICTED OUTSIDE TERRITORIAL SEAS

Planned survey location	Total area ensonified to Level B harassment threshold (160 dB re: 1 μPa)	Area ensonified to Level B harassment threshold (160 dB re: 1 μPa) outside territorial seas (percentage of total ensonified area in survey location)	Area ensonified to Level B harassment threshold (160 dB re: 1 μPa) inside territorial seas (percentage of total ensonified area in survey location)	Percent increase in ensonified area when territorial sea is included in survey area
Northern	61,295 km ²	49,645 km ² (81%)	11,650 km ² (19%)	23%
Central	10,593 km ²	10,315 km ² (97.4%)	278 km ² (2.6%)	3
Southern	76,449 km ²	58,117 km ² (76%)	18,332 km ² (24%)	32

Required mitigation measures, such as special shutdowns for large whales, vessel speed, course alteration, and visual monitoring would be implemented to help reduce impacts to marine mammals. Based on the analysis herein of the likely effects of the specified activity on marine mammals and their habitat, and taking into consideration the implementation of the monitoring and mitigation measures, NMFS finds that Lamont-Doherty's planned seismic survey would have a negligible impact on the affected marine mammal species or stocks.

Small Numbers

As described previously, NMFS estimates that Lamont-Doherty's activities could potentially affect, by Level B harassment, 44 species of marine mammals under our jurisdiction. NMFS estimates that Lamont-Doherty's activities could potentially affect, by Level A harassment, up to 26 species of marine mammals under our jurisdiction.

For each species, the numbers of take authorized are small relative to the population sizes: Less than 18 percent for South American sea lion, less than

15 percent for the dusky dolphin, less than 11.5 percent for Chilean dolphin, and less than 5 percent for all other species (Table 7). As described above, NMFS cannot authorize the incidental take of marine mammals in the territorial seas of foreign nations, but must consider the level of incidental take as a result of the activity in the entire activity area (including both territorial seas and high seas) as part of the analysis supporting our determination under the MMPA that the activity would have a negligible impact on the affected species. We assume for the purposes of our analysis that the take predicted to occur within the Chilean territorial sea will account for approximately a 23 percent increase in the northern survey area; a 3 percent increase in the central survey area; and a 32 percent increase in the southern survey area, compared to the total number of incidental takes predicted to occur outside of the Chilean territorial sea (Table 7 and Table 8). Accounting for these additional takes, the total takes predicted to result from the planned survey (including both the takes

authorized by NMFS and the takes not authorized by NMFS but predicted to occur within the Chilean territorial sea) are still small relative to the population sizes, with no more than 22 percent taken for any marine mammal species.

NMFS is not aware of reliable abundance estimates for four species of marine mammals (Burmeister's porpoise, Peale's dolphin, pygmy right whale, and southern right whale dolphin) for which incidental take is authorized. Therefore we rely on the best available information on these species to make determinations as to whether the authorized take numbers represent small numbers of the total populations of these species.

The Burmeister's porpoise is distributed from the Atlantic Ocean in southern Brazil to the Pacific Ocean in northern Peru (Reyes 2009). While there are no quantitative data on abundance, the best available information suggest the species is assumed to be numerous throughout South American coastal waters (Brownell Jr. and Clapham 1999), with groups estimated at approximately 150 individuals observed off of Peru (Van Waerebeek *et al.* 2002). In addition

the species is typically found shoreward of the 60 m isobath (Hammond *et al.* 2012), suggesting that the number of authorized takes is likely conservative as the species is unlikely to be encountered throughout the full survey area. The species' wide distribution and apparent abundance suggest the number of authorized takes represents a small number of individuals relative to the species' total abundance.

Peale's dolphin is a coastal species that is known to inhabit waters very near to shore, commonly within or shoreward of kelp beds, while in the waters of southern Chile and Tierra del Fuego they appear to prefer channels, fjords and deep bays (Goodall 2009). Their apparent habitat preference for waters very near to shore suggests that the number of authorized takes is likely very conservative as the species is unlikely to be encountered throughout much of the survey area. While no abundance estimate exists for the species, Peale's dolphin is reportedly the most common cetacean found around the coast of the Falkland Islands and Chile (Brownell Jr. *et al.* 1999). The combination of the species' apparent abundance and the species' apparent preference for habitats that would not be surveyed by Lamont-Doherty suggests the number of authorized takes represents a small number of individuals relative to the species' total abundance.

The full distribution of the southern right whale dolphin is not known, but the species appears to be circumpolar and fairly common throughout its range. Survey data and stranding and fishery interaction data in northern Chile suggest that the species may be one of the most common cetaceans in the region (Van Waerebeek *et al.* 1991). The species' apparent abundance and its broad distribution suggest the number of authorized takes represents a small number of individuals relative to the species' total abundance.

The pygmy right whale has a circumpolar distribution, between about 30° and 55°S, with records from southern South America as well as Africa, Australia and New Zealand (Kemper 2009). There are no estimates of abundance for the species, but judging by the number of strandings in Australia and New Zealand, it is likely to be reasonably common in that region (Kemper 2009), with aggregations of up to approximately 80 individuals reported (Matsuoka 1996). The species' apparent abundance and its broad distribution suggest the number of authorized takes would represent a small number of individuals relative to the species' total abundance.

NMFS finds that the incidental take associated with Lamont-Doherty's planned seismic survey would be limited to small numbers relative to the affected species or stocks.

Impact on Availability of Affected Species or Stock for Taking for Subsistence Uses

There are no relevant subsistence uses of marine mammals implicated by this action.

Endangered Species Act (ESA)

There are six marine mammal species listed as endangered under the Endangered Species Act that may occur in the survey area. Under section 7 of the ESA, NSF initiated formal consultation with the NMFS Office of Protected Resources (OPR) Endangered Species Act Interagency Cooperation Division on the planned seismic survey. We (the NMFS Office of Protected Resources, Permits and Conservation Division) also consulted internally under section 7 of the ESA with the NMFS OPR Endangered Species Act Interagency Cooperation Division on the issuance of an Authorization under section 101(a)(5)(D) of the MMPA.

In July, 2016, the NMFS OPR Endangered Species Act Interagency Cooperation Division issued a Biological Opinion with an Incidental Take Statement to us and to the NSF, which concluded that the issuance of the Authorization and the conduct of the seismic survey were not likely to jeopardize the continued existence of blue, fin, humpback, sei, Southern right and sperm whales. The Biological Opinion also concluded that the issuance of the Authorization and the conduct of the seismic survey would not affect designated critical habitat for these species.

National Environmental Policy Act (NEPA)

NSF prepared an environmental analysis titled, "*Environmental Analysis of a Marine Geophysical Survey by the R/V Marcus G. Langseth in the Southeast Pacific Ocean, 2016/2017*". NMFS independently evaluated the environmental analysis and prepared an Environmental Assessment (EA) titled, "*Proposed Issuance of an Incidental Harassment Authorization to Lamont-Doherty Earth Observatory to Take Marine Mammals by Harassment Incidental to a Marine Geophysical Survey in the Southeast Pacific Ocean, 2016/2017*". NMFS and NSF provided relevant environmental information to the public through the **Federal Register** notice for the proposed IHA (81 FR 23117; April 19, 2016) and considered

public comments received prior to finalizing our EA and deciding whether or not to issue a Finding of No Significant Impact (FONSI). NMFS concluded that issuance of an IHA to Lamont-Doherty would not significantly affect the quality of the human environment and prepared and issued a FONSI in accordance with NEPA and NOAA Administrative Order 216-6. NMFS's EA and FONSI for this activity are available on our Web site at: <http://www.nmfs.noaa.gov/pr/permits/incidental>.

Authorization

NMFS has issued an Authorization to Lamont-Doherty for the potential harassment of small numbers of 44 marine mammal species incidental to conducting a seismic survey in the Southeast Pacific Ocean, between August 1, 2016 and July 31, 2017, provided the previously mentioned mitigation, monitoring and reporting measures.

Dated: August 8, 2016.

Donna Wieting,

*Director, Office of Protected Resources,
National Marine Fisheries Service.*

BILLING CODE 3510-22-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648-XE799

New England Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; public meeting.

SUMMARY: The New England Fishery Management Council (Council) is scheduling a joint public meeting of its Monkfish Committee on Thursday, September 1, 2016 to consider actions affecting New England fisheries in the exclusive economic zone (EEZ). Recommendations from this group will be brought to the full Council for formal consideration and action, if appropriate. **DATES:** This meeting will be held on Thursday, September 1, 2016 at 9:30 a.m.

ADDRESSES:

Meeting address: The meeting will be held at the Radisson Airport Hotel, 2081 Post Road, Warwick, RI 02886; telephone: (401) 739-3000; fax: (401) 732-9309.

Council address: New England Fishery Management Council, 50 Water Street, Mill 2, Newburyport, MA 01950.

FOR FURTHER INFORMATION CONTACT:

Thomas A. Nies, Executive Director, New England Fishery Management Council; telephone: (978) 465-0492.

SUPPLEMENTARY INFORMATION: The Monkfish Committee will meet to

receive a report on the 2016 operational assessment. The Committee will discuss the Scientific and Statistical Committee recommendations for Allowable Biological Catch (ABC) for FYs 2017-19, the potential range of alternatives for the specifications package, and priorities for 2017. There will be a closed session to review advisory panel applications. The Committee will discuss other business, as needed.

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Act, provided the public has been notified of the Council's intent to take final action to address the emergency.

Special Accommodations

This meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Thomas A. Nies, Executive Director, at 978-465-0492, at least 5 days prior to the meeting date.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: August 9, 2016.

Tracey L. Thompson,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648-XE730

Pacific Island Fisheries; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; public meeting.

SUMMARY: NMFS announces a Western Pacific Stock Assessment Review of the

report "Stock Assessment of the Coral Reef Fishes of Hawaii, 2016." The report contains single-species stock assessments for 28 species of reef-associated fish stocks around the main Hawaiian islands. A panel of three independent experts will review the stock assessment and report their findings.

DATES: See the **SUPPLEMENTARY INFORMATION** section for meeting dates and times.

ADDRESSES: The meeting will be held in Suite 1701, Finance Factors Building, 1164 Bishop St., Honolulu, HI 96813.

FOR FURTHER INFORMATION CONTACT: Matt Dunlap, NMFS Pacific Islands Regional Office, (808) 725-5177 or matthew.dunlap@noaa.gov.

SUPPLEMENTARY INFORMATION:

The meeting schedule and agenda are as follows (8:30 a.m.-5 p.m. every day):

Monday, August 29, 2016

- Introductions
- Background information
- Objectives and Terms of Reference
- Fishery Operation
- Management
- Presentation of stock assessments (Nadon)

Tuesday, August 30, 2016

- Presentation and review of stock assessments (Nadon and Panel)

Wednesday, August 31, 2016

- Continue review of stock assessments (Nadon and Panel)

Thursday, September 1, 2016

- Continue review of stock assessments
- Public comment period
- Panel discussion (closed)

Friday, September 2, 2016

- Panel discussions (morning, closed)
- Present results of review and recommendations (afternoon, open)
- Adjourn

The agenda order may change. The meeting will run as late as necessary to complete scheduled business. Although non-emergency issues that are not contained in this agenda may come up at the meeting for discussion, those issues may not be the subject of formal action during the meeting. Action will be restricted to those issues specifically listed in this notice, and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.

Special Accommodations

This meeting is physically accessible to people with disabilities. Make direct requests for sign language interpretation or other auxiliary aids to Matt Dunlap, (808) 725-5177 or matthew.dunlap@noaa.gov, at least 5 days prior to the meeting date.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: August 9, 2016.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648-XE798

New England Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; public meeting.

SUMMARY: The New England Fishery Management Council (Council) is scheduling a public meeting of its Groundfish Advisory Panel to consider actions affecting New England fisheries in the exclusive economic zone (EEZ). Recommendations from this group will be brought to the full Council for formal consideration and action, if appropriate.

DATES: This meeting will be held on Tuesday, August 30, 2016 at 10 a.m.

ADDRESSES: The meeting will be held at the DoubleTree by Hilton, 50 Ferncroft Road, Danvers, MA 01950; phone: (978) 777-2500; fax: (978) 750-7911.

Council address: New England Fishery Management Council, 50 Water Street, Mill 2, Newburyport, MA 01950.

FOR FURTHER INFORMATION CONTACT: Thomas A. Nies, Executive Director, New England Fishery Management Council; telephone: (978) 465-0492.

SUPPLEMENTARY INFORMATION:

Agenda

The Advisory Panel will review the draft alternatives for Framework Adjustment 56 (specifications and management measures) and make recommendations to the Groundfish Committee. They will discuss and summarize recent market and fishery information regarding groundfish stocks—focusing on those with assessments this year (*i.e.*, Eastern

Georges Bank cod, Eastern Georges Bank haddock, Georges Bank yellowtail flounder, and witch flounder). The Panel will also discuss the Plan Development Team's draft white paper on monitoring strategies and make recommendations to the Groundfish Committee. They will discuss and summarize perspectives on the 2010–11 dockside monitoring program. They will also discuss make recommendations to the Groundfish Committee on priorities for 2017. Other business will be discussed as necessary.

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during these meetings. Action will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Act, provided the public has been notified of the Council's intent to take final action to address the emergency.

Special Accommodations

This meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Thomas A. Nies, Executive Director, at (978) 465-0492, at least 5 days prior to the meeting date.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: August 9, 2016.

Tracey L. Thompson,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

BILLING CODE 3510-22-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Submission for OMB Review; Comment Request

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: National Oceanic and Atmospheric Administration (NOAA).

Title: Paperwork Submissions Under the Coastal Zone Management Act Federal Consistency Requirements.

OMB Control Number: 0648-0411.

Form Number(s): None.

Type of Request: Regular (extension of a currently approved information collection).

Number of Respondents: 2,334.

Average Hours per Response:

Applications/certifications and state preparation of objection or concurrence letters, 8 hours each; state requests for review of unlisted activities, 4 hours; public notices, 1 hours; remedial action and supplemental review, 6 hours; listing notices, 1 hour; interstate listing notices, 30 hours; mediation, 2 hours; appeals to the Secretary of Commerce, 210 hours.

Burden Hours: 35,799.

Needs and Uses: This request is for extension of a currently approved information collection.

A number of paperwork submissions are required by the Coastal Zone Management Act (CZMA) federal consistency provision, 16 U.S.C. 1456, and by NOAA to provide a reasonable, efficient and predictable means of complying with CZMA requirements. The requirements are detailed in 15 CFR part 930. The information will be used by coastal states with federally-approved Coastal Zone Management Programs to determine if Federal agency activities, Federal license or permit activities, and Federal assistance activities that affect a state's coastal zone are consistent with the states' programs. Information will also be used by NOAA and the Secretary of Commerce for appeals to the Secretary by non-federal applicants regarding State CZMA objections to federal license or permit activities.

Affected Public: State, local or tribal government; business or other for-profit organizations; individuals or households.

Frequency: On occasion.

Respondent's Obligation: Required to obtain or retain benefits.

This information collection request may be viewed at reginfo.gov. Follow the instructions to view Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to OIRA_Submission@omb.eop.gov or fax to (202) 395-5806.

Dated: August 8, 2016.

Sarah Brabson,

NOAA PRA Clearance Officer.

BILLING CODE 3510-08-P

DEPARTMENT OF COMMERCE

National Telecommunications and Information Administration

BroadbandUSA Webinar Series

AGENCY: National Telecommunications and Information Administration, U.S. Department of Commerce.

ACTION: Notice of Open Meetings—Monthly Webinars.

SUMMARY: The National Telecommunications and Information Administration (NTIA), as part of its BroadbandUSA program, will host a series of webinars on a monthly basis to engage the public and stakeholders with information to accelerate broadband access, improve digital inclusion, strengthen broadband policies, and support local community priorities. The webinar series will provide an ongoing source of information on the range of topics and issues being addressed by BroadbandUSA, including best practices for improving broadband deployment, digital literacy, and e-government.

The webinars will be held on the third Wednesday of every month, beginning August 17, 2016 and continuing through January 19, 2017. Details on specific webinar topics and webinar registration information will be posted on the BroadbandUSA Web site <http://www2.ntia.doc.gov/> under *Events*. Powerpoint slides and transcripts of the webinars will be posted on the Web site within seven days following the live webinar.

DATES: BroadbandUSA will hold the webinars from 2:00 p.m. to 3:00 p.m. Eastern Time on the third Wednesday of every month, beginning August 17, 2016 and continuing through January 18, 2017.

ADDRESSES: This is a virtual meeting. NTIA will post the registration information on its BroadbandUSA Web site <http://www2.ntia.doc.gov/> under *Events*.

FOR FURTHER INFORMATION CONTACT:

Lynn Chadwick, National Telecommunications and Information Administration, U.S. Department of Commerce, Room 4627, 1401 Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482-8338; email: lchadwick@ntia.doc.gov. Please direct media inquiries to NTIA's Office of Public Affairs, (202) 482-7002; email press@ntia.doc.gov.

SUPPLEMENTARY INFORMATION: NTIA's BroadbandUSA program provides expert advice and field-proven tools for assessing broadband adoption, planning new infrastructure, and engaging a wide

range of partners in broadband projects. BroadbandUSA convenes workshops on a regular basis to bring stakeholders together to discuss ways to improve broadband policies, share best practices, and connect communities to other federal agencies and funding sources for the purpose of expanding broadband infrastructure and adoption throughout America's communities. Experts from NTIA's BroadbandUSA program are available to provide technical assistance and to connect communities with additional resources, such as best practices, guides and program models.

NTIA's BroadbandUSA team is developing tools to support communities working to expand broadband access, adoption, and use. These webinars are among the tools BroadbandUSA uses to provide broadband information to the public, stakeholders, tribal, local, and state governments, and federal programs. Other tools include publications, workshops, meetings and co-hosted events with stakeholder organizations and agencies.

Participants are welcome to view one or many webinars. General questions and comments are welcome at any time during webinars via email to BroadbandUSA@ntia.doc.gov. The webinars are open to the public and press. Pre-registration is recommended. NTIA asks registrants to provide their first and last names and email addresses for both registration purposes and to receive any updates on BroadbandUSA or via email at BroadbandUSA@ntia.doc.gov. Meeting agendas and relevant documents, including information on how to register for one or more webinars, will be also available on NTIA's Web site at <http://www2.ntia.doc.gov/WEBINARS>. Individuals requiring accommodations should review the transcript and Powerpoint slides from the webinar posted at the BroadbandUSA Web site, <http://www2.ntia.doc.gov/> within seven days following the live webinar.

Dated: August 8, 2016.

Milton Brown,

Deputy Chief Counsel, National Telecommunications and Information Administration.

BILLING CODE 3510-60-P

COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

Procurement List; Proposed Deletions

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Proposed deletions from the Procurement List.

SUMMARY: The Committee is proposing to delete products and services from the Procurement List that were previously furnished by nonprofit agencies employing persons who are blind or have other severe disabilities.

DATES: Comments must be received on or before September 11, 2016.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, 1401 S. Clark Street, Suite 715, Arlington, Virginia, 22202-4149.

FOR FURTHER INFORMATION CONTACT: Barry S. Lineback, Telephone: (703) 603-7740, Fax: (703) 603-0655, or email CMTEFedReg@AbilityOne.gov.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 8503 (a)(2) and 41 CFR 51-2.3. Its purpose is to provide interested persons an opportunity to submit comments on the proposed actions.

Deletions

The following products and services are proposed for deletion from the Procurement List:

Products

NSN(s)—Product Name(s): 2540-01-071-2051—Cover, Cushion Assembly

Mandatory Source(s) of Supply: Pioneer Vocational/Industrial Services, Inc., Danville, KY

Contracting Activity: Defense Logistics Agency Land and Maritime

NSN(s)—Product Name(s):

7530-01-071-9792—Paper, Bond, Dual Purpose, Opaque Buff, 8.5" x 11"

7530-01-148-1766—Paper, Xerographic, Dual Purpose, Buff, 8.5" x 11"

Mandatory Source(s) of Supply: Louisiana Association for the Blind, Shreveport, LA

Contracting Activity: General Services Administration, New York, NY

NSN(s)—Product Name(s): 6540-01-131-7919—Case, Spectacles

Mandatory Source(s) of Supply: Dallas Lighthouse for the Blind, Inc., Dallas, TX

Contracting Activity: Defense Logistics Agency Troop Support

Services

Service Types:

Administrative Service

Laundry Service

Food Service Attendant Service

Mandatory for: Department of Veterans

Affairs, James A. Quillen VA Medical Center, Mountain Home, TN
Mandatory Source(s) of Supply: Dawn of Hope, Inc., Johnson City, TN
Contracting Activity: Department of Veterans Affairs

Barry S. Lineback,

Director, Business Operations.

BILLING CODE 6353-01-P

COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

Procurement List; Additions and Deletions

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Additions to and Deletions from the Procurement List.

SUMMARY: This action adds products and services to the Procurement List that will be furnished by nonprofit agencies employing persons who are blind or have other severe disabilities, and deletes services from the Procurement List previously furnished by such agencies.

DATES: Effective on September 11, 2016.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, 1401 S. Clark Street, Suite 715, Arlington, Virginia 22202-4149.

FOR FURTHER INFORMATION CONTACT: Barry S. Lineback, Telephone: (703) 603-7740, Fax: (703) 603-0655, or email CMTEFedReg@AbilityOne.gov.

SUPPLEMENTARY INFORMATION:

Additions

On 6/17/2016 (81 FR 39630) and 7/8/2016 (81 FR 44597), the Committee for Purchase From People Who Are Blind or Severely Disabled published notices of proposed additions to the Procurement List.

After consideration of the material presented to it concerning capability of qualified nonprofit agencies to provide the products and services and impact of the additions on the current or most recent contractors, the Committee has determined that the products and services listed below are suitable for procurement by the Federal Government under 41 U.S.C. 8501-8506 and 41 CFR 51-2.4.

Regulatory Flexibility Act Certification

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the products and services to the Government.

2. The action will result in authorizing small entities to furnish the products and services to the Government.

3. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 8501–8506) in connection with the products and services proposed for addition to the Procurement List.

End of Certification

Accordingly, the following products and services are added to the Procurement List:

Products

NSN(s)—Product Name(s): MR 753—Pillow, Jumbo

Mandatory for: Military commissaries and exchanges in accordance with the Code of Federal Regulations, Chapter 51, 51–6.4.

Mandatory Source(s) of Supply: Georgia Industries for the Blind, Bainbridge, GA

Contracting Activity: Defense Commissary Agency

Distribution: C-List

NSN(s)—Product Name(s)

7930–00–NIB–0578—Disinfectant 256 Cleaner, Neutral, Concentrated, High Dilution

7930–00–NIB–0579—Disinfectant PD–128 Cleaner, Intermediate, Broad Spectrum, Concentrated

8125–00–NIB–0031—Spray Bottle, High Dilution 256 Neutral Disinfectant, 32 oz. Bottle

8125–00–NIB–0032—Spray Bottle, PD–128 Disinfectant Cleaner, 32 oz. Bottle

Mandatory for: Department of Veterans Affairs

Mandatory Source of Supply: VisionCorps, Lancaster, PA

Contracting Activity: Department of Veterans Affairs, Strategic Acquisition Center, Fredericksburg, VA

Distribution: C-List

Services

Service Type: Janitorial Service

Mandatory for: USDA APHIS, Luis Munoz Marin Airport, Terminal A & D, 150 Central Sector, Carolina, PR

Mandatory Source(s) of Supply: The Corporate Source, Inc., New York, NY

Contracting Activity: Dept of Agriculture, USDA APHIS MRPBS, Animal and Plant Health Inspection Service, Minneapolis, MN

Service Type: Mailroom Operation Service

Mandatory for: US Air Force, Postal Service Center, Tyndall Air Force Base, Tyndall Air Force, FL

Mandatory Source(s) of Supply: VersAbility, Resources, Inc., Hampton, VA

Contracting Activity: Dept of the Air Force, FA4890 ACC AMIC, Newport News, VA

Deletions

On 7/8/2016 (81 FR 44597), the Committee for Purchase From People Who Are Blind or Severely Disabled published notice of proposed deletions from the Procurement List.

After consideration of the relevant matter presented, the Committee has determined that the services listed below are no longer suitable for procurement by the Federal Government under 41 U.S.C. 8501–8506 and 41 CFR 51–2.4.

Regulatory Flexibility Act Certification

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in additional reporting, recordkeeping or other compliance requirements for small entities.

2. The action may result in authorizing small entities to furnish the services to the Government.

3. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 8501–8506) in connection with the services deleted from the Procurement List.

End of Certification

Accordingly, the following services are deleted from the Procurement List:

Services

Service Type: Order Processing Service

Mandatory for: McGuire Air Force Base, McGuire AFB, NJ

Mandatory Source(s) of Supply: Bestwork Industries for the Blind, Inc., Cherry Hill, NJ

Contracting Activity: Dept of the Air Force, FA7014 AFDW PK

Service Type: Operation of Postal Service Center Service

Mandatory for: Luke Air Force Base, Glendale, AZ

Mandatory Source(s) of Supply: Arizona Industries for the Blind, Phoenix, AZ

Contracting Activity: Dept of the Air Force, FA7014 AFDW PK

Service Type: Telephone Switchboard Operations Service

Mandatory for: Barksdale Air Force Base, Shreveport, LA

Mandatory Source(s) of Supply: Louisiana Association for the Blind, Shreveport, LA

Contracting Activity: Dept of the Air Force, FA7014 AFDW PK

Service Type: Embroidery of USAF Service Name Tapes & Emboss of Plastic Name Tags Base

Mandatory for: Lackland Air Force Base, San

Antonio, TX

Mandatory Source(s) of Supply: Delaware Division for the Visually Impaired, New Castle, DE

Contracting Activity: Dept of the Air Force, FA7014 AFDW PK

Barry S. Lineback,

Director, Business Operations.

COMMODITY FUTURES TRADING COMMISSION

Order Exempting the Federal Reserve Banks From Sections 4d and 22 of the Commodity Exchange Act

AGENCY: Commodity Futures Trading Commission.

ACTION: Order.

SUMMARY: The Commodity Futures Trading Commission (“CFTC” or “Commission”) is issuing an order to exempt Federal Reserve Banks that provide customer accounts and other services to registered derivatives clearing organizations that are designated financial market utilities from Sections 4d and 22 of the Commodity Exchange Act (“CEA”).

DATES: *Effective Date:* August 8, 2016.

FOR FURTHER INFORMATION CONTACT: Eileen A. Donovan, Deputy Director, 202–418–5096, edonovan@cftc.gov; M. Laura Astrada, Associate Director, 202–418–7622, lastrada@cftc.gov; or Parisa Abadi, Attorney-Advisor, 202–418–6620, pabadi@cftc.gov, in each case, at the Division of Clearing and Risk, Commodity Futures Trading Commission, Three Lafayette Centre, 1155 21st Street, NW., Washington, DC 20581; or Joe Opron, Special Counsel, 312–596–0653, jopron@cftc.gov, Division of Clearing and Risk, Commodity Futures Trading Commission, 525 West Monroe Street, Suite 1100, Chicago, IL 60661.

- VI. Order of Exemption

I. Introduction

On June 2, 2016, the Commission published in the **Federal Register** a notice and request for public comment regarding a proposed Commission order that would exempt, pursuant to Section 4(c) of the CEA,¹ Federal Reserve Banks that provide customer accounts and other services to systemically important derivatives clearing organizations (“SIDCOs”)² from Sections 4d and 22 of the CEA (the “Proposal”).³ After consideration of the comments and for the reasons set forth in the Proposal and in this release, the Commission is issuing an order that exempts, subject to certain conditions, Federal Reserve Banks that provide customer accounts and other services to designated financial market utilities (“FMUs”) that are registered derivatives clearing organizations (“Designated FMUs”)⁴ from Sections 4d and 22 of the CEA. The exemption enables Federal Reserve Banks to maintain customer accounts for Designated FMUs in accordance with the standards set forth in the relevant Federal Reserve Bank governing documents, as specified below.

II. Background

A. Designation of FMUs Under Title VIII of the Dodd-Frank Wall Street Reform and Consumer Protection Act

Title VIII of the Dodd-Frank Wall Street Reform and Consumer Protection Act (“Dodd-Frank Act”) was enacted to mitigate risk in the financial system and promote financial stability.⁵ Accordingly, Section 804 of the Dodd-Frank Act requires the Financial Stability Oversight Council (“Council”) to designate those FMUs that the

Council determines are, or are likely to become, systemically important.⁶ An FMU includes “any person that manages or operates a multilateral system for the purpose of transferring, clearing, or settling payments, securities, or other financial transactions among financial institutions or between financial institutions and the person.”⁷

On July 18, 2012, the Council designated eight FMUs as systemically important under Title VIII.⁸ Two of these systemically important FMUs, Chicago Mercantile Exchange, Inc. (“CME”) and ICE Clear Credit LLC (“ICC”), are SIDCOs (and therefore, Designated FMUs). In addition, the Options Clearing Corporation (“OCC”), which is a registered derivatives clearing organization (“DCO”) but not a SIDCO, is a Designated FMU. OCC was designated in its capacity as a securities clearing agency; the Securities and Exchange Commission is its Supervisory Agency.

B. Access to Federal Reserve Bank Accounts and Services

Section 806(a) of the Dodd-Frank Act permits the Board to authorize a Federal Reserve Bank to establish and maintain an account for a Designated FMU and provide to the Designated FMU the services listed in Section 11A(b) of the Federal Reserve Act, subject to any applicable rules, orders, standards, or guidelines prescribed by the Board.⁹ In adopting regulations pursuant to Section 806(a) of the Dodd-Frank Act, the Board noted that the “terms and conditions for access to Federal Reserve Bank accounts and services are intended

to facilitate the use of [Federal] Reserve Bank accounts and services by a designated FMU in order to reduce settlement risk and strengthen settlement processes, while limiting the risk presented by the designated FMU to the [Federal] Reserve Banks.”¹⁰ Accordingly, the Board “expects that [Federal] Reserve Banks would provide services that are consistent with a designated FMU’s need for safe and sound settlement processes under account and service agreements generally consistent with the provisions of existing [Federal] Reserve Bank operating circulars for such services.”¹¹ Highlighting the importance of Federal Reserve Bank operating circulars in this regard, the Board further requires that designated FMUs be in compliance with existing operating circulars.¹²

C. Proposed Order

The proposed Commission order would, subject to certain terms and conditions, exempt Federal Reserve Banks that provide customer accounts and other services to SIDCOs from Sections 4d and 22 of the CEA. In the Proposal, the Commission emphasized the importance of protecting customers and safeguarding customer funds, and highlighted the critical role that SIDCOs play in the financial markets. The Commission recognized that the failure of a SIDCO or a disruption to the operations of a SIDCO could threaten the stability of the U.S. financial system. As a result, the Commission determined that reducing SIDCOs’ credit and liquidity risks would better protect market participants and the public, and would serve to promote the integrity of the financial markets. The Commission explained that because Federal Reserve Banks are the source of liquidity with regard to U.S. dollar deposits, a SIDCO would face much lower credit and liquidity risk with a deposit at a Federal Reserve Bank than it would with a deposit at a commercial bank.

With respect to protecting customers and safeguarding customer funds, the Commission explained that under Section 4d of the CEA, a depository will be held liable for an improper transfer of customer funds by an FCM or DCO if it knew or should have known that the transfer was improper.¹³ The

⁶ See Section 804(a) of the Dodd-Frank Act. The term systemically important means a situation where the failure of or a disruption to the functioning of a financial market utility could create, or increase, the risk of significant liquidity or credit problems spreading among financial institutions or markets and thereby threaten the stability of the financial system of the United States. Section 803(9) of the Dodd-Frank Act; *see also* Authority to Designate Financial Market Utilities as Systemically Important, 76 FR 44763, 44774 (July 27, 2011).

⁷ Section 803(6)(A) of the Dodd-Frank Act.

⁸ See Press Release, Financial Stability Oversight Council, Financial Stability Oversight Council Makes First Designations in Effort to Protect Against Future Financial Crises (July 18, 2012), available at <http://www.treasury.gov/press-center/press-releases/Pages/tg1645.aspx>.

⁹ The services listed in Section 11A(b) of the Federal Reserve Act include wire transfers, settlement, and securities safekeeping, as well as services regarding currency and coin, check clearing and collection, and automated clearing house transactions. See 12 U.S.C. 248a(b). Section 806(a) of the Dodd-Frank Act also permits the Board to authorize a Federal Reserve Bank to establish deposit accounts under the first undesignated paragraph of Section 13 of the Federal Reserve Act, 12 U.S.C. 342.

¹⁰ Financial Market Utilities (Regulation HH), 78 FR 14024, 14025 (Mar. 4, 2013).

¹¹ *Id.*

¹² See 12 CFR 234.5(b)(2) (setting forth rules to govern Federal Reserve Bank accounts held by designated FMUs).

¹³ See 81 FR at 35339. Further, the Commission requires a DCO to obtain from each depository with which it deposits customer funds a written acknowledgment that the customer funds are being

¹ 17 U.S.C. 6(c).

² Under Commission Regulation 39.2, a SIDCO is defined as a financial market utility that is a registered derivatives clearing organization under Section 5b of the CEA, which is currently designated by the Financial Stability Oversight Council to be systemically important, and for which the Commission acts as the Supervisory Agency pursuant to Section 803(8) of the Dodd-Frank Wall Street Reform and Consumer Protection Act. See 17 CFR 39.2. See also Section 803(8)(A) of the Dodd-Frank Act, which defines the term Supervisory Agency as the Federal agency that has primary jurisdiction over a designated financial market utility under Federal banking, securities, or commodity futures laws. Section 803(8)(A) of the Dodd-Frank Act, Pub. L. 111–203, 124 Stat. 1376 (2010).

³ Notice of Proposed Order and Request for Comment on Proposal to Exempt, Pursuant to the Authority in Section 4(c) of the Commodity Exchange Act, the Federal Reserve Banks from Sections 4d and 22 of the Commodity Exchange Act, 81 FR 35337 (June 2, 2016).

⁴ For the avoidance of doubt, the term “Designated FMU” includes the more narrow term “SIDCO.”

⁵ See Section 802(b) of the Dodd-Frank Act.

Commission noted, however, that as this standard of liability was developed, the unique nature of the Federal Reserve Banks was not taken into account.¹⁴ The accounts and financial services provided by Federal Reserve Banks are governed by account agreements, operating circulars issued by Federal Reserve Banks for each service, the Federal Reserve Act, and Federal Reserve regulations and policies, and, with respect to book-entry securities services, the regulations of the domestic issuer of the securities or the issuer's regulator ("Federal Reserve Bank Governing Documents").¹⁵ In the Proposal, the Commission explained that the Federal Reserve Bank Governing Documents limit a Federal Reserve Bank's liability in maintaining an account or acting on such an instruction to actual damages that are incurred solely by the account holder and that are proximately caused by the Federal Reserve Bank's failure to exercise ordinary care or act in good faith in accordance with the Federal Reserve Bank Governing Documents. The Commission found the standard of liability as set forth in the Federal Reserve Bank Governing Documents to be appropriate in the context of Federal Reserve Banks, as this standard has been developed to more appropriately reflect the unique nature of the Federal Reserve Banks. Notably, the Commission argued that the Board has prescribed detailed rules and standards that govern account services provided to SIDCOs by the Federal Reserve Banks, which have been carefully developed to provide clarity surrounding the provision of Federal Reserve financial services and to promote consistency in the treatment of deposit accounts at the Federal Reserve Banks for the benefit of the U.S. financial system.¹⁶

The Commission noted its concern that exposing the Federal Reserve Banks to the standard of liability set forth in Section 4d of the CEA, as well as to potential third-party claims under Section 22 of the CEA,¹⁷ could disrupt

held in accordance with Section 4d of the CEA to ensure that the depository has been informed that the deposited funds are those of customers.

¹⁴ See *id.* at 35340–35342.

¹⁵ The operating circulars of the Federal Reserve Banks began having uniform terms and conditions across Federal Reserve Bank districts as of January 2, 1998.

¹⁶ In fact, SIDCOs have established proprietary accounts with one or more Federal Reserve Banks that are governed by the Federal Reserve Bank Governing Documents.

¹⁷ In the Proposal, the Commission explained that Section 22 of the CEA provides for private rights of action for damages against persons who violate the CEA, or persons who willfully aid, abet, counsel, induce, or procure the commission of a violation of the CEA. See 81 FR at 35342; see also

these goals and ultimately harm the U.S. financial system and, by extension, U.S. taxpayers. Accordingly, the Commission proposed that a Federal Reserve Bank acting as a depository for SIDCO customer funds or otherwise providing account services to a SIDCO would continue to be held to the standard of liability set forth in the Federal Reserve Bank Governing Documents.

However, the Commission reiterated the importance of the segregation requirements set forth in Section 4d of the CEA to make sure that customer funds are used only for the purpose of margining, securing, or guaranteeing their futures contracts and options on futures contracts, and cleared swaps. Therefore, as a condition to the proposed order, customer funds held at a Federal Reserve Bank would continue to be required to be segregated from the funds deposited in the SIDCO's proprietary account. In addition, Federal Reserve Banks would be required to reply promptly and directly to any request for confirmation of account balances or provision of any other information regarding or related to the customer account(s) of a SIDCO that are established pursuant to the CEA from the director of the Division of Clearing and Risk of the Commission, or any successor division, or such director's designees.

The Commission further noted that Title VIII of the Dodd-Frank Act permits a Federal Reserve Bank to have access to confidential supervisory information with respect to a SIDCO. The Commission recognized, however, that the fact that Board supervisory staff may have access to confidential supervisory information about a SIDCO could create the false perception that Federal Reserve Bank staff responsible for managing the SIDCO's account and financial services would gain special knowledge about the SIDCO. As a result, the Commission recognized that a Federal Reserve Bank acting as a depository for customer funds could face greater scrutiny than a commercial bank acting as such. Therefore, the proposed order included a statement recognizing that, pursuant

7 U.S.C. 25. The Commission noted that under the Federal Reserve Bank Governing Documents, the Federal Reserve Banks are currently insulated from third-party claims. While the Commission continues to believe that private claims empower injured parties to seek compensation for damages where the Commission lacks the resources to do so on their behalf, and the prospect of such claims serves the public interest in deterring misconduct, the Commission has determined that, for the reasons discussed herein and in the Proposal, exempting the Federal Reserve Banks from liability under Section 22 of the CEA would also serve the public interest.

to the Wall Policy,¹⁸ information obtained by the Board supervisory staff during the course of supervising SIDCOs or any counterparty to a SIDCO will not be attributed by the Commission to any Federal Reserve Bank providing accounts and financial services to SIDCO account holders.

III. Public Comments

In response to its request for public comment on the Proposal, the Commission received six comment letters.¹⁹ All six letters expressly supported the issuance of an order exempting the Federal Reserve Banks from Sections 4d and 22 of the CEA, citing such benefits as mitigating systemic risk in the clearing and settlement system, reducing credit and liquidity risks for Designated FMUs, and enhancing the protection of customer funds.

Specifically, ICC agreed that holding SIDCO customer funds at a Federal Reserve Bank would decrease the SIDCO's credit, liquidity, and operational risks. ICC also agreed that "the existing limitations on how Federal Reserve Banks hold assets provide adequate protections to account holders," and "such protections are consistent with the customer protection initiatives of the CEA."²⁰ ICC and the International Swaps and Derivatives Association, Inc. ("ISDA") both noted that the use of a Federal Reserve Bank as a depository for SIDCO customer funds would help to reduce systemic risk by reducing interconnectedness in the financial system. ISDA observed that such interconnectedness is particularly present when one firm simultaneously acts as a custodial bank, settlement bank, and/or clearing member with

¹⁸ As discussed in greater detail in the Proposal, Board staff has represented that it has a long-standing "Wall Policy" that generally prohibits, subject to the limitations contained therein, the sharing of confidential supervisory information with Federal Reserve Bank account services staff, and requires that care be exercised to avoid actual or apparent conflict between a Federal Reserve Bank's role as a provider of financial services and its role as a regulator, supervisor, and lender. See 81 FR at 35341; see also Federal Reserve's Key Policies for the Provision of Financial Services: Standards Related to Priced-Service Activities of the Federal Reserve Banks (1984), available at http://www.federalreserve.gov/paymentssystem/pfs_standards.htm.

¹⁹ Letters were submitted by CME, ICC, and OCC (each of which is a Designated FMU), Minneapolis Grain Exchange, Inc. (which is a DCO), American Council of Life Insurers, and the International Swaps and Derivatives Association, Inc. The Commission also received one non-substantive comment. All comments referred to herein are available on the Commission's Web site, at <http://comments.cftc.gov/PublicComments/CommentList.aspx?id=1703>.

²⁰ ICC Comment Letter at 2 (July 1, 2016).

respect to one central counterparty.²¹ ISDA believes that reducing this interconnectedness would positively impact SIDCO resilience during a market disruption and promote safety and soundness in the cleared derivatives markets by decreasing contagion risk. Furthermore, in ISDA's view, customer accounts at Federal Reserve Banks would only benefit derivatives customers and promote safety and soundness in the cleared derivatives markets. ISDA believes that the strict limitations on how the Federal Reserve Banks hold deposits adequately protect customers without the additional safeguards provided under Sections 4d and 22 of the CEA.

The Commission requested comments regarding whether the proposed exemption should be expanded to include not just SIDCOs but all Designated FMUs (in other words, all registered DCOs that have been designated as systemically important by the Council, regardless of whether the Commission is the DCO's Supervisory Agency). In response, OCC requested that the Commission expand the exemption.²² As previously noted, OCC is currently designated by the Council to be systemically important; however, it is not a SIDCO, as the Securities and Exchange Commission is its Supervisory Agency. OCC commented that Section 806(a) of the Dodd-Frank Act supports Federal Reserve Banks acting as depositories for all Designated FMUs and not just SIDCOs. OCC argued that denying it the opportunity to deposit segregated customer funds in a Federal Reserve Bank account would undermine one of the purposes of Title VIII and would place OCC at an unjustified competitive disadvantage with respect to other Designated FMUs. ISDA also urged the Commission to expand the exemption to include customer accounts at a Federal Reserve Bank established by Designated FMUs given the benefits associated with holding customer accounts with a Federal Reserve Bank.

Minneapolis Grain Exchange, Inc. ("MGEX") requested that the Commission expand the exemption to include customer accounts held at Federal Reserve Banks by Subpart C DCOs.²³ MGEX stated that limiting access to Federal Reserve Bank services and accounts to SIDCOs creates a

competitive disadvantage to those DCOs that have not been designated as systemically important because such DCOs would not have access to these credit and liquidity risk reducing opportunities afforded to SIDCOs.²⁴ MGEX commented that this disadvantage may be more pronounced for Subpart C DCOs because they are held to the same standards as SIDCOs but do not have access to accounts at the Federal Reserve Banks.²⁵ MGEX recognized, however, that this is due to the "restrictive wording" of Section 806(a) of the Dodd-Frank Act, which specifically limits access to Federal Reserve Bank accounts to Designated FMUs, and the Commission cannot simply grant Subpart C DCOs permission to have accounts at a Federal Reserve Bank.²⁶ MGEX requested that the Commission use alternative language in the exemptive order, so as not to be SIDCO-specific, in the event that Federal Reserve Banks are subsequently permitted to maintain accounts for Subpart C DCOs in the future.

CME supported the exemption, but noted that it would be inconsistent with Commission Regulation 1.20(g)(4)(ii), which requires that a DCO obtain from a Federal Reserve Bank acting as a depository for customer funds a written acknowledgment that the customer funds are being held in accordance with Section 4d of the CEA.²⁷ CME noted, however, that pursuant to the terms of the exemptive order, the Federal Reserve Banks would be exempt from Section 4d.²⁸ CME suggested that the exemptive order and Commission Regulation 1.20(g)(4)(ii) be harmonized.

In addition, CME commented that, as a SIDCO account holder, it would need multiple Federal Reserve Bank accounts in order to comply with the segregation requirements set forth in the exemptive order.²⁹ CME stated that, under the

²⁴ MGEX Comment Letter at 1 (July 5, 2016).

²⁵ SIDCOs and Subpart C DCOs are required to comply with the requirements set forth in Subpart C of Part 39 of the Commission's regulations, as well as the requirements applicable to all DCOs, which are set forth in Subparts A and B of Part 39. Subpart C, together with the provisions in Subparts A and B, establish domestic regulations that are consistent with the Principles for Financial Market Infrastructures. As a result, SIDCOs and Subpart C DCOs are considered qualified central counterparties for purposes of the Basel capital requirements for central counterparties. *See, e.g.*, Derivatives Clearing Organizations and International Standards, 78 FR 72476 (Dec. 2, 2013) (discussing the regulatory framework for SIDCOs and Subpart C DCOs and providing further background on qualified central counterparties).

²⁶ MGEX Comment Letter at 2 (July 5, 2016).

²⁷ 17 CFR 1.20(g)(4)(ii).

²⁸ CME Comment Letter at 3 (July 1, 2016).

²⁹ As a condition to the exemptive order, the Federal Reserve Banks are required to segregate

Federal Reserve Banks' Operating Circular 1, a financial institution may maintain only one Master Account with a Federal Reserve Bank, although the Federal Reserve Bank may, in its discretion, allow multiple Master Accounts in certain situations. CME noted that this may require a Federal Reserve Bank to exercise its discretion under its standard policies and operating circulars to permit the use of multiple Master Accounts for SIDCO account holders.

CME also stated that account agreements between the Federal Reserve Banks and depository institution account holders typically include certain set-off rights and liens in favor of the Federal Reserve Banks. In this regard, CME commented that Federal Reserve Bank account agreements may need to be tailored in order to provide comfort to SIDCO clearing members, and customers of SIDCO clearing members, that their margin deposits are "bankruptcy remote" from the SIDCO under applicable bank capital requirements.³⁰ Similarly, American Council of Life Insurers ("ACLI") requested that the Commission clarify "for the benefit of public customers who are the ultimate beneficiaries of segregated accounts at commercial or federal banks, that customer segregated funds (*i.e.*, initial margin) shall never be used for any other purpose under any circumstances, even the most exigent."³¹

IV. Findings and Conclusions

After careful review and consideration of the comments, and for the reasons cited herein and set forth in the Proposal, the Commission has determined that the requirements of Section 4(c) of the CEA have been met with respect to exempting Federal Reserve Banks that provide customer accounts and other services to Designated FMUs from Sections 4d and 22 of the CEA. The Commission is therefore issuing an order granting the exemption essentially as proposed. However, the Commission is making minor technical clarifications to the language of the order, and is expanding the exemption to include those customer accounts that are established pursuant to the CEA and that are held at Federal Reserve Banks by Designated FMUs. The Commission agrees with OCC and ISDA that Section 806(a) of the Dodd-Frank Act supports Federal

customer funds deposited by a Designated FMU from the proprietary funds deposited by a Designated FMU.

³⁰ CME Comment Letter at 4 (July 1, 2016).

³¹ ACLI Comment Letter at 2 (July 5, 2016).

²¹ ISDA Comment Letter at 2 (July 5, 2016).

²² OCC Comment Letter at 1 (July 5, 2016).

²³ A Subpart C DCO is a DCO registered with the Commission pursuant to Section 5b of the CEA that is not a SIDCO and has elected to become subject to the requirements of Subpart C of Part 39 of the Commission's regulations. 17 CFR 39.2. MGEX has made this election and is therefore a Subpart C DCO.

Reserve Banks acting as depositories for all Designated FMUs, not just SIDCOs.

The Commission notes MGEX's request that the Commission expand the exemption to include customer accounts held at Federal Reserve Banks by any Subpart C DCO. However, the Commission further notes that Subpart C DCOs are not currently eligible for Federal Reserve Bank accounts.³² Accordingly, the Commission is declining to expand the exemption to include customer accounts held at Federal Reserve Banks by Subpart C DCOs. As MGEX acknowledges, the Commission does not have the authority to direct the Federal Reserve Banks to provide accounts and services to Subpart C DCOs. If, in the future, a registered DCO that is not a Designated FMU is able to establish an account at a Federal Reserve Bank, the Commission may reconsider the scope of the exemption at that time.

In response to CME's comment that the exemption would be inconsistent with the acknowledgement letter requirements in Commission Regulation 1.20(g)(4)(ii),³³ the Commission agrees and has determined to repeal this requirement³⁴ in a separate **Federal Register** notice. The exemptive order will render these provisions inapplicable, as the Federal Reserve Banks that provide customer accounts and other services to Designated FMUs would be exempt from Section 4d of the CEA.

In addition, CME commented that, as a SIDCO account holder, it would need multiple Federal Reserve Bank accounts in order to comply with the segregation requirements set forth in the exemptive

order.³⁵ CME noted that obtaining multiple Master Accounts may require a Federal Reserve Bank to exercise its discretion under its standard policies and operating circulars. The Commission agrees that this issue would appear to be within the scope of the Federal Reserve's authority and not the Commission's.

CME also noted that account agreements between the Federal Reserve Banks and depository institution account holders typically include certain set-off rights and liens in favor of the Federal Reserve Banks. CME argued that Federal Reserve Bank account agreements may need to be revised to make sure customer margin deposits are "bankruptcy remote" from the SIDCO under applicable bank capital requirements.³⁶ Similarly, ACLI argued that the interests of customers in their segregated funds should never be subordinated for the benefit of any other party. The Commission agrees that a Designated FMU cannot grant security interests in, rights of set-off against, or other rights in customer collateral. Therefore, the Commission believes that a Designated FMU's account agreement must be free from any rights of set-off or liens on customer funds.

The exemptive order applies to all Federal Reserve Banks that provide customer accounts and other services to Designated FMUs. It requires that all money, securities, and property deposited into a customer account established pursuant to the CEA by a Designated FMU with a Federal Reserve Bank must be separately accounted for and not commingled with the money, securities, and property deposited into the account of any other person, including a proprietary account of the Designated FMU depositing such funds.³⁷ In addition, Federal Reserve

Banks must reply promptly and directly to any request for confirmation of account balances or provision of any other information regarding or related to the customer account(s) of a Designated FMU that are established pursuant to the CEA from the director of the Division of Clearing and Risk of the Commission, or any successor division, or such director's designees.

In light of the foregoing, the Commission believes the exemption would promote responsible economic and financial innovation and fair competition, and is consistent with the "public interest," as that term is used in Section 4(c) of the CEA.

V. Related Matters

A. Regulatory Flexibility Act

The Regulatory Flexibility Act ("RFA")³⁸ requires federal agencies, in promulgating rules, to consider whether those rules will have a significant economic impact on a substantial number of small entities and, if so, provide a regulatory flexibility analysis respecting the impact. The Commission believes that the exemptive order will not have a significant economic impact on a substantial number of small entities. The exemption will impact Designated FMUs and Federal Reserve Banks. The Commission has previously established certain definitions of "small entities" to be used by the Commission in evaluating the impact of its actions on small entities in accordance with the RFA.³⁹ The Commission has previously determined that DCOs, including Designated FMUs, are not small entities for purposes of the RFA.⁴⁰ Similarly, the Commission believes that Federal Reserve Banks are not small entities for purposes of the RFA.

Accordingly, the Commission does not expect the exemption to have a significant impact on a substantial number of small entities. Therefore, the Chairman, on behalf of the Commission, hereby certifies, pursuant to 5 U.S.C. 605(b), that the exemption would not have a significant economic impact on a substantial number of small entities.

B. Paperwork Reduction Act

The purposes of the Paperwork Reduction Act of 1995 ("PRA")⁴¹ are,

Reserve Banks can meet this standard so long as the customer funds are held in a separate account and the funds in the customer account are not used to pay or secure the obligations arising out of any other account.

³⁸ 5 U.S.C. 601 *et seq.*

³⁹ See 47 FR 18618, 18618–21 (Apr. 30, 1982).

⁴⁰ See New Regulatory Framework for Clearing Organizations, 66 FR 45604, 45609 (Aug. 29, 2001).

⁴¹ 44 U.S.C. 3501 *et seq.*

³² Federal Reserve Banks serve only account holders authorized by statute, such as depository institutions and the U.S. government. *See, e.g.,* Federal Reserve Bank of Richmond, Consumer Issues and Information, available at <https://www.richmondfed.org/faqs/consumer/> (last visited Feb. 26, 2016) (stating that "Federal Reserve Banks are not authorized to open accounts for individuals; rather, only depository institutions and certain other financial entities may open an account at a Federal Reserve Bank"); *see also* Section 806(a) of the Dodd-Frank Act (authorizing accounts at a Federal Reserve Bank for designated FMUs).

³³ 17 CFR 1.20(g)(4)(ii). Under Commission Regulation 1.20(g)(4)(ii), a DCO must obtain from a Federal Reserve Bank acting as a depository for customer funds a written acknowledgement that (A) The Federal Reserve Bank was informed that the customer funds deposited therein are those of customers and are being held in accordance with the provisions of section 4d of the CEA and Commission regulations thereunder; and (B) The Federal Reserve Bank agrees to reply promptly and directly to any request from Commission staff for confirmation of account balances or provision of any other information regarding or related to an account. *Id.*

³⁴ Specifically, the Commission is revising paragraphs (g)(4)(i) and (g)(4)(ii), and repealing paragraphs (g)(4)(ii)(A) and (g)(4)(ii)(B).

³⁵ As a condition to the exemptive order, the Federal Reserve Banks are required to segregate customer funds deposited by a Designated FMU from the proprietary funds deposited by a Designated FMU.

³⁶ CME Comment Letter at 4 (July 1, 2016).

³⁷ The Commission is slightly modifying the language from the proposed order so that the exemptive order makes clear that customer funds deposited by a Designated FMU may not be commingled with funds held in any other account at the Federal Reserve Banks, including the Designated FMU's proprietary account. This language is included in the order because, despite the exemption for the Federal Reserve Banks, a Designated FMU is still subject to the requirements of Section 4d of the CEA and Commission Regulation 1.20, which require a DCO to separately account for and segregate customer funds. Specifically, the Commission is changing the phrase "separately accounted for and segregated from" in the proposed order to "separately accounted for and not commingled with" to more closely mirror the language used in Section 4d. For purposes of this exemption, customer funds held by the Federal

among other things, to minimize the paperwork burden to the private sector, ensure that any collection of information by a government agency is put to the greatest possible uses, and minimize duplicative information collections across the government. The PRA applies to all information, regardless of form or format, whenever the government is obtaining, causing to be obtained or soliciting information, and requires disclosure to third parties or the public, of facts or opinions, when the information collection calls for answers to identical questions posed to, or identical reporting or recordkeeping requirements imposed on, ten or more persons. The PRA would not apply in this case given that the exemption would not impose any new recordkeeping or information collection requirements, or other collections of information on ten or more persons that require approval of the Office of Management and Budget.

C. Cost and Benefit Considerations

1. Summary of Comments on the Costs and Benefits of the Proposed Order

The Commission requested comments on the costs and benefits associated with the proposed order. The Commission requested but received no comments providing data or other information to enable the Commission to better quantify the expected costs and benefits attributable to this exemption. In terms of qualitative cost and benefit comments, OCC stated that Section 806(a) of the Dodd-Frank Act supports Federal Reserve Banks acting as depositories for all Designated FMUs and not just SIDCOs. OCC commented that limiting the exemption to SIDCO customer accounts would place OCC at a competitive disadvantage because, although OCC is a Designated FMU, it is not a SIDCO. In addition, OCC argued that denying OCC the opportunity to deposit customer funds at a Federal Reserve Bank would undermine the purpose of Title VIII of the Dodd-Frank Act.

MGEX also supported the proposed exemption, but noted that DCOs that are not designated as systemically important would not have the same access to the credit and liquidity risk reducing opportunities afforded to SIDCOs with access to Federal Reserve Bank accounts. MGEX stated that limiting access to Federal Reserve Bank accounts to SIDCOs would create a competitive disadvantage to those DCOs that are not designated as systemically important, particularly Subpart C DCOs. MGEX recognized that the Commission cannot grant Subpart C DCOs

permission to have accounts at a Federal Reserve Bank. However, MGEX argued that the Commission should expand the exemption to cover customer accounts maintained by Federal Reserve Banks for Subpart C DCOs in the event that Federal Reserve Banks are subsequently permitted to maintain accounts for Subpart C DCOs.

ICC commented that accounts at Federal Reserve Banks would reduce credit, operational, and liquidity risks that are associated with traditional deposit accounts. ISDA and ICC further noted that such accounts may reduce interconnectedness in the cleared derivatives market. CME commented that migrating a portion of the eligible assets it has on deposit from clearing members to a Federal Reserve Bank may have a number of positive effects on its clearing members and their customers. ACLI stated that the proposed order would reduce overall systemic risk that could arise from liquidity and other risks on commercial banks where SIDCOs currently deposit their customer funds.

In the discussion that follows, the Commission considers the costs and benefits of the exemptive order to the public and market participants. It also considers the costs and benefits of the exemption in light of the public interest factors enumerated in Section 15(a) of the CEA.

2. Costs

This order is exemptive and provides the Federal Reserve Banks relief from certain of the requirements in the CEA and attendant Commission regulations. As with any exemptive rule or order, the exemption in the order is permissive, meaning that the Federal Reserve Banks are not required to rely on it. In addition, Designated FMUs are not required to deposit customer funds with a Federal Reserve Bank. Accordingly, the Commission assumes that interested parties would rely on the exemption only if the anticipated benefits warrant the costs of the exemption.

The exemptive order would exempt the Federal Reserve Banks from Sections 4d and 22 of the CEA. All of the commenters generally supported issuing this exemption. However, two commenters raised the possibility that the proposed order could place them at a competitive disadvantage. First, as discussed above, OCC argued that, under Title VIII of the Dodd-Frank Act, a Federal Reserve Bank may be permitted to maintain an account for a Designated FMU. OCC argued that, as a result, it would be placed at a competitive disadvantage with respect to SIDCOs. The Commission agrees that

Title VIII of the Dodd-Frank Act permits Federal Reserve Banks to maintain accounts for, and provide services to, Designated FMUs, and not just SIDCOs. Accordingly, and as discussed above, the Commission has determined to expand the exemption to include customer accounts held at Federal Reserve Banks by Designated FMUs generally, for purposes of consistency with Title VIII.

Second, MGEX argued that it would be placed at a competitive disadvantage with respect to SIDCOs because, as a Subpart C DCO, MGEX is held to the same standards as SIDCOs under the Commission's regulations, but is not afforded the same opportunity to hold customer accounts at a Federal Reserve Bank. The Commission has declined to expand the exemption to include customer accounts held at Federal Reserve Banks by Subpart C DCOs. Under Title VIII, the Board may authorize a Federal Reserve Bank to maintain accounts only for Designated FMUs. As MGEX recognizes, the Commission does not have the authority to authorize a Federal Reserve Bank to maintain accounts for Subpart C DCOs. Accordingly, the competitive disadvantage identified by MGEX cannot be remedied by the Commission by expanding the scope of the exemption. Moreover, the Commission does not believe it would be appropriate to expand the scope of the exemption based on the theoretical possibility that Federal Reserve Banks may one day be permitted to provide accounts to Subpart C DCOs. In the event that a Federal Reserve Bank is authorized to maintain an account for other registered DCOs, the Commission may reconsider the scope of the exemptive relief at that time.

3. Benefits

The exemption will benefit market participants by facilitating Designated FMUs' use of Federal Reserve Banks as depositories for customer funds. Whereas commercial banks present credit and liquidity risks to a Designated FMU, its FCM clearing members, and the FCMs' customers, the Federal Reserve Banks are substantially insulated from such risks. As discussed in greater detail above, Title VIII of the Dodd-Frank Act was enacted to mitigate systemic risk in the financial system and to promote financial stability, in part, through an enhanced supervisory framework for Designated FMUs. In addition to this framework, Title VIII, and more specifically, Section 806(a) of the Dodd-Frank Act, permits the Board to authorize a Federal Reserve Bank to establish and maintain an account for a

Designated FMU and provide to the Designated FMU certain financial services. By enacting Title VIII in general, and Section 806(a) in particular, Congress recognized the importance of reducing systemic risk and providing Designated FMUs with a potential safeguard during an extraordinary liquidity event. The exemption would therefore help promote Congress' goal of better preparing the U.S. financial system for potential future liquidity events.⁴² Commenters generally agreed that the exemption would benefit market participants by enhancing the protection of customer funds. Commenters noted that accounts at Federal Reserve Banks would decrease a SIDCO's credit, liquidity and operational risk, and reduce interconnectedness in the cleared derivatives market.

Moreover, the Federal Reserve Banks' standard of liability, as set forth in the Federal Reserve Bank Governing Documents, is better suited for the Federal Reserve Banks than Section 4d of the CEA, which was designed to govern customer funds deposited with a commercial bank, trust company, or DCO. Unlike commercial banks, Federal Reserve Banks do not operate for profit and serve only account holders authorized by statute, such as depository institutions and the U.S. government. Indeed, each year they return to the U.S. Department of Treasury all earnings in excess of Federal Reserve Bank operating and other expenses, such as litigation expenses. By exempting the Federal Reserve Banks from certain potential enforcement actions and private suits, the exemption would reduce the Federal Reserve Banks' exposure to litigation. Because the Federal Reserve Banks return their earnings to the U.S. Department of Treasury's general fund, U.S. taxpayers could benefit from the exemption. Therefore, the Commission believes that it is appropriate to apply the Federal Reserve Banks' standard of liability in order to facilitate the use of these accounts.

⁴² A Designated FMU's access to Federal Reserve Bank deposit accounts is also consistent with the international standards set forth in the Principles for Financial Market Infrastructures, which acknowledge the protections afforded by central banks from such credit and liquidity risks. *See, e.g.*, CPSS-IOSCO, Principles for Financial Market Infrastructures, ¶ 3.9.3 (noting that "[c]entral banks have the lowest credit risk and are the source of liquidity with regard to their currency of issue"); *see also* Principles for Financial Market Infrastructures, Key Consideration 8 (specifying that a financial market infrastructure "with access to central bank accounts, payment services, or securities services should use these services, where practical, to enhance its management of liquidity risk").

4. Section 15(a) Factors

Section 15(a) of the CEA requires the Commission to consider the costs and benefits of its action before issuing an order under the CEA.⁴³ By its terms, Section 15(a) does not require the Commission to quantify the costs and benefits of an order or to determine whether the benefits of the order outweigh its costs. Rather, Section 15(a) simply requires the Commission to "consider the costs and benefits" of its action.

Section 15(a) of the CEA further specifies that costs and benefits shall be evaluated in light of five broad areas of market and public concern: (1) Protection of market participants and the public; (2) efficiency, competitiveness, and financial integrity of futures markets; (3) price discovery; (4) sound risk management practices; and (5) other public interest considerations. The Commission may in its discretion give greater weight to any one of the five enumerated areas and could in its discretion determine that, notwithstanding its costs, a particular order is necessary or appropriate to protect the public interest or to effectuate any of the provisions or to accomplish any of the purposes of the CEA.

a. Protection of Market Participants and the Public

The exemption would serve to facilitate Designated FMUs' use of Federal Reserve Banks as depositories for customer funds. Because the Federal Reserve System is the nation's central bank, such accounts would provide Designated FMUs with the lowest possible credit risk in the event of a market disruption. Moreover, as Federal Reserve Banks are the source of liquidity with regard to U.S. dollar deposits, Designated FMUs with access to a deposit account at a Federal Reserve Bank would also be better equipped to handle a liquidity event. Since Designated FMUs have been so designated because of their importance to the broader financial system, reducing these risks would protect market participants and the public.

b. Efficiency, Competitiveness, and Financial Integrity

A temporary or permanent disruption to the operations of a Designated FMU could cause widespread and significant damage to the financial integrity of derivatives markets as a whole. Therefore, by facilitating a Designated FMU's use of Federal Reserve Banks as depositories for customer funds, the

exemption would reduce liquidity and credit risk to the Designated FMU, which would, in turn, promote the financial integrity of the derivatives markets.

As noted above, two commenters raised concerns that the exemptive order may result in a competitive disadvantage. The Commission has addressed the concern of one commenter (OCC) by expanding the exemption to include customer accounts held at Federal Reserve Banks by Designated FMUs generally. On the other hand, the Commission does not have the authority to take action to address the concerns of the other commenter (MGEX).

The Commission does not anticipate the exemption will have a significant impact on the efficiency of the derivatives markets.

c. Price Discovery

The Commission does not anticipate the exemption will have an impact on the price discovery process.

d. Sound Risk Management Practices

The Commission believes that establishing segregated customer accounts for Designated FMUs and enabling Designated FMUs to access related services at a Federal Reserve Bank would improve a Designated FMU's ability to manage liquidity risk and protect customer funds. Additionally, the Commission believes that the availability of a Federal Reserve Bank account could allow a Designated FMU to reduce its concentration risk by adding an additional creditworthy depository in which to diversify funds. Accordingly, the exemption promotes sound risk management practices.

The Commission further notes that, notwithstanding the exemption from Section 4d of the CEA, the Federal Reserve Banks are still required to segregate customer funds deposited by a Designated FMU from the proprietary funds deposited by a Designated FMU and to adhere to the longstanding standards of liability that govern the Federal Reserve Banks.

e. Other Public Interest Considerations

The Commission believes that facilitating a Designated FMU's access to Federal Reserve Bank accounts will promote the public interest by bolstering a Designated FMU's ability to conduct settlements with a high degree of confidence under a wide range of stress scenarios, thereby increasing the likelihood of the Designated FMU being able to provide its customers with access to their funds in times of market distress.

⁴³ 7 U.S.C. 19(a).

VI. Order of Exemption

After considering the above factors and the comment letters received in response to the request for comments, the Commission has determined to issue the following:

Order

Pursuant to Title VIII of the Dodd-Frank Wall Street Reform and Consumer Protection Act (“Dodd-Frank Act”), the Financial Stability Oversight Council (“Council”) is required to designate those financial market utilities (“FMUs”) that the Council determines are, or are likely to become, systemically important. A derivatives clearing organization registered with the Commodity Futures Trading Commission (“Commission”) and designated by the Council as systemically important is referred to herein as a “Designated FMU”. Under Section 806(a) of the Dodd-Frank Act, the Board of Governors (“Board”) of the Federal Reserve System is permitted to authorize a Federal Reserve Bank to establish and maintain a deposit account for, among others, a Designated FMU and provide certain services to the Designated FMU, subject to any applicable rules, orders, standards, or guidelines prescribed by the Board.

Designated FMUs are required to hold funds belonging to customers of their clearing members in accounts subject to Section 4d of the Commodity Exchange Act (“CEA”). In addition, Section 22 of the CEA would provide for private rights of action for damages against persons who violate Section 4d, or persons who willfully aid, abet, counsel, induce, or procure the commission of a violation of Section 4d. However, the Commission understands that deposit accounts maintained by any Federal Reserve Bank would be governed by applicable account agreements, operating circulars issued by Federal Reserve Banks for each service, the Federal Reserve Act, and Federal Reserve regulations and policies, and, with respect to book-entry securities services, the regulations of the domestic issuer of the securities or the issuer’s regulator (“Federal Reserve Bank Governing Documents”). The Federal Reserve Bank Governing Documents, as may be amended from time to time, include, but are not limited to, Federal Reserve Bank Operating Circular No. 6 (governing funds transfers through the Fedwire Funds Service); Federal Reserve Bank Operating Circular No. 7 (governing the maintenance of and transfer services for book-entry securities accounts); 12 CFR part 210, subpart B (governing funds transfers

through the Fedwire Funds Service); and 31 CFR part 357, subpart B (setting forth the U.S. Department of the Treasury’s regulations governing book-entry treasury bonds, notes, and bills).

The Commission understands that under the Federal Reserve Bank Governing Documents, a Federal Reserve Bank has no requirement or obligation to inquire as to the legitimacy or accuracy of the instructions, or the transactions related to those instructions, or compliance by the Designated FMU with its obligations under the CEA. To the extent that liability may accrue under the Federal Reserve Bank Governing Documents, the Commission understands that the Federal Reserve Bank may be held liable only for actual damages that are (i) incurred solely by the Designated FMU account holder, and (ii) proximately caused by the Federal Reserve Bank’s failure to exercise ordinary care or act in good faith in accordance with the Federal Reserve Bank Governing Documents. The Commission is issuing an exemption to the Federal Reserve Banks in order to facilitate Federal Reserve Banks’ ability to establish customer accounts for Designated FMUs.

Therefore, *it is ordered*, pursuant to Section 4(c) of the CEA, 7 U.S.C. 6(c), that the Federal Reserve Banks are granted an exemption from Sections 4d and 22 of the CEA, subject to the terms and conditions specified herein:

1. Segregation. Money, securities, and property deposited into a customer account established pursuant to the CEA by a Designated FMU with a Federal Reserve Bank shall be separately accounted for and not commingled with the money, securities, and property deposited into the account of any other person, including a proprietary account of the Designated FMU depositing such funds.

2. Information Requests. Federal Reserve Banks must reply promptly and directly to any request for confirmation of account balances or provision of any other information regarding or related to the customer account(s) of a Designated FMU that are established pursuant to the CEA from the director of the Division of Clearing and Risk of the Commission, or any successor division, or such director’s designees.

3. Applicability to Federal Reserve Banks. Subject to the conditions contained herein, the order applies to all Federal Reserve Banks that provide customer accounts and other services to Designated FMUs. In addition, pursuant to the Federal Reserve’s Key Policies for the Provision of Financial Services: Standards Related to Priced-Service

Activities of the Federal Reserve Banks, information obtained by the Board of Governors of the Federal Reserve System or its designees during the course of supervising Designated FMUs, pursuant to Title VIII of the Dodd-Frank Act, or any counterparty to a Designated FMU under any authority, shall not be attributed by the Commission to any Federal Reserve Bank providing accounts and financial services to Designated FMU account holders.

4. Reservation of Rights. This order is based upon the analysis set forth above. Any material change in law or circumstances pursuant to which this order is granted might require the Commission to reconsider its finding that the exemption contained herein is appropriate and/or consistent with the public interest and purposes of the CEA. Further, the Commission reserves the right, in its discretion, to revisit any of the terms and conditions of the relief provided herein, including but not limited to, making a determination that certain entities described herein should be subject to the Commission’s full jurisdiction, and to condition, suspend, terminate, or otherwise modify or restrict the exemption granted in this order, as appropriate, upon its own motion.

Issued in Washington, DC, on August 8, 2016, by the Commission.

Christopher J. Kirkpatrick,
Secretary of the Commission.

Appendices to Order Exempting the Federal Reserve Banks From Sections 4d and 22 of the Commodity Exchange Act—Commission Voting Summary, Chairman’s Statement, and Commissioner’s Statement

Appendix 1—Commission Voting Summary

On this matter, Chairman Massad and Commissioners Bowen and Giancarlo voted in the affirmative. No Commissioner voted in the negative.

Appendix 2—Statement of Chairman Timothy G. Massad

Today, the Commission continues its work to ensure the resiliency of clearinghouses and protect customers in our markets. To provide the necessary context for these efforts, it is useful to look back at recent history.

Most participants in our markets will recall what happened at the beginning of the financial crisis in September 2008, when the Reserve Fund—a money market fund—“broke the buck” following the bankruptcy of Lehman Brothers. Redemptions were suspended and investors were not able to make withdrawals. As a result, many futures commission merchants (FCMs) were not able to access customer funds invested in the Reserve Fund. Absent relief by the CFTC, many would have been undercapitalized,

potentially ending up in bankruptcy. In addition, clearinghouses could not liquidate investments in the Reserve Fund. And there could have easily been a widespread run on money market funds, but for the emergency actions taken by the U.S. government.

As a result of the crisis, as well as the collapse of MF Global, the CFTC and our self-regulatory organizations took a number of actions to better protect customer funds. We required customer funds to be strictly segregated and limited the ways they can be invested. We enhanced accounting and auditing procedures at FCMs, including by requiring daily verification from depositories of the amounts deposited by FCMs.

Today, CFTC rules require that customer funds be invested in highly liquid assets and be convertible into cash within one business day without a material discount in value. Our rules also require that clearinghouses invest initial margin deposits in a manner that allows them to promptly liquidate any such investment.

Over the last few years, the Securities and Exchange Commission (SEC) has also taken action in response to the lessons of the financial crisis, by adopting a number of measures to address the potential vulnerabilities of money market funds. One such recent reform, which takes effect in October of this year, sets forth the circumstances where prime money market funds are permitted, or in some circumstances required, to suspend redemptions in order to prevent the risk of investor runs.

While we recognize the benefit of the SEC's new rule in preventing investor runs, a suspension of redemptions by a money market fund would mean investments in such funds are not accessible and cannot be promptly liquidated. Such an event could result in customers, FCMs, and clearinghouses being unable to access the funds necessary to satisfy margin obligations.

Therefore, CFTC staff is today providing guidance making clear that Commission rules prohibit a clearing member from investing customer funds, or a clearinghouse from investing amounts deposited as initial margin, in such money market funds.

Some industry participants have suggested we should interpret or revise our rules to permit investments of at least some customer monies in such money market funds unless and until redemptions are suspended. We have declined to do so, as it would be too late to protect customers at that point. Moreover, there are alternatives to prime funds, including certain government money markets funds or Treasury securities. In fact, investments in prime money market funds represent a relatively small portion of the total customer funds on deposit and the total initial margin deposits at clearinghouses. Some of our clearinghouses and FCMs do not have any investments in prime funds.

Staff has been careful not to be overly restrictive, and therefore has issued no-action relief to allow FCMs to invest certain "excess" proprietary funds held in customer accounts in these money market funds. That is, our existing rules require FCMs to deposit their own funds (*i.e.*, targeted residual interest) into customer accounts to make sure

that there are sufficient funds in the segregated customer accounts to cover all obligations due to customers. FCMs frequently deposit an amount of their own funds that is in excess of the targeted residual interest amount required under our rules, and that excess amount can be withdrawn at any time. Indeed, if an FCM should default, customers—and the system as a whole—are better off if excess funds are on deposit, and we do not wish to incentivize FCMs to withdraw such excess funds from the segregated account. Therefore, the no action relief makes clear that FCMs can continue to invest their own funds in excess of their targeted residual interest in such money market funds, even though they cannot invest the customer funds—or any proprietary funds they are required to deposit—in this manner.

Finally, the Commission is taking action today that will further ensure the safety of customer funds. We are issuing an order that will help make it possible for systemically important clearinghouses to deposit customer funds at Federal Reserve Banks. Our order makes clear that a Federal Reserve Bank that opens such an account would be subject to the same standards of liability that generally apply to it as a depository, rather than any potentially conflicting standard under the commodity laws.

Although Federal Reserve accounts for customer funds held by systemically important clearinghouses do not exist today, they are allowed under the Dodd-Frank Act, and we have been working with the Board of Governors to facilitate them. The two clearinghouses designated as systemically important in our markets have been approved to open Federal Reserve Bank accounts for their proprietary funds. We hope that with today's action, accounts for customer funds can be opened soon. Doing so will help protect customer funds and enhance the resiliency of clearinghouses.

I thank the dedicated CFTC staff and my fellow Commissioners for their work on these matters.

Appendix 3—Concurring Statement of Commissioner Sharon Y. Bowen

I am pleased to concur with the two Commission actions: The "Order Exempting the Federal Reserve Banks from Sections 4d and 22 of the Commodity Exchange Act" and "Written Acknowledgment of Customer Funds from Federal Reserve Banks." I have long believed that, in order to protect customer funds, we need to keep that money at our central bank. In the event of a major market event, I, and I believe the rest of the American people, would feel much better knowing that investors' money is at the Federal Reserve instead of at multiple central counterparties. I am glad that our agency and the Federal Reserve have come to an agreement on an effective way to accomplish this.

I am similarly pleased with the Division of Clearing and Risk's (DCR) "Staff Interpretation Regarding CFTC Part 39 In Light Of Revised SEC Rule 2a-7," which clearly outlines the staff's understanding that, given the limitations that the Securities and Exchange Commission (SEC) has

imposed on redemptions for prime money market funds, that they are no longer considered Rule 1.25 assets. This is the correct interpretation. The key feature in a Rule 1.25 asset is that it must be available quickly in times of crisis or illiquidity. And we know that funds are more likely to close the gates on redemptions when market dislocation happens. That is just the time when futures commission merchants (FCMs) and customers would need access to their money, and a multi-day delay can mean catastrophe for some businesses.

For that very reason, I have concerns about the Division of Swap Dealer and Intermediary Oversight's (DSIO) "No-Action Relief With Respect to CFTC Regulation 1.25 Regarding Money Market Funds." While the 4(c) exemption and the DCR interpretation are clearly customer protection initiatives, the DSIO no action letter is not. This no action letter would allow FCMs to keep money in segregated customer accounts that actually would not be readily available in a crisis. Thus, while it may appear that an FCM had considerable funds available to settle customer accounts during a market dislocation, in fact that would be only be an illusion; a portion of those funds could be locked down behind the prime money market funds' gates and therefore not actually be available when needed.

I do not think that the staff of the Commission should be supporting this kind of "window dressing"—giving the impression of greater security than there actually is. If the funds are not suitable investments for customer funds, then they are not suitable for the additional capital that the FCMs put in those accounts to protect against potential shortfalls. Having lived through bankruptcies, such as MF Global and Peregrine, I have a healthy respect for the importance of having strong clearing members with a large cushion of funds that can be accessed when needed. This no action letter undermines that effort. Given the importance of this topic to the general public, we should at least have asked for comments or even held a roundtable before making this change. I therefore hope to reexamine this subject in the near future.

[FR Doc. 2016-19210 Filed 8-11-16; 8:45 am]

BILLING CODE 6351-01-P

DEPARTMENT OF EDUCATION

Applications for New Awards; Training of Interpreters for Individuals Who Are Deaf or Hard of Hearing and Individuals Who Are Deaf-Blind Program; Correction

Catalog of Federal Domestic Assistance (CFDA) Number: 84.160C.

AGENCY: Office of Special Education and Rehabilitative Services, Department of Education.

ACTION: Notice; correction.

SUMMARY: On July 25, 2016, we published in the **Federal Register** (81 FR 48409) a notice inviting

applications (NIA) for new awards for fiscal year (FY) 2016 for the Training of Interpreters for Individuals Who Are Deaf or Hard of Hearing and Individuals Who Are Deaf-blind program. That notice incorrectly stated that match in the amount of 10 percent was required in order for applicants to meet the required cost match. This document corrects the error.

FOR FURTHER INFORMATION CONTACT:

Kristen Rhinehart-Fernandez, U.S. Department of Education, 400 Maryland Avenue SW., Room 5062, Potomac Center Plaza, Washington, DC 20202–2800. Telephone: (202) 245–6103 or by email: Kristen.Rhinehart@ed.gov.

If you use a telecommunications device for the deaf (TDD) or a text telephone (TTY), call the Federal Relay Service, toll free, at 1–800–877–8339.

SUPPLEMENTARY INFORMATION: This document corrects the percentage of the required cost match. All other requirements and conditions stated in the NIA remain the same.

Corrections

In the **Federal Register** of July 25, 2016 (81 FR 48409), on page 48409, in the third column, we revise the section “2. Cost Sharing or Matching” to read as follows: “2. *Cost Sharing or Matching:* The Commissioner may award grants to public or private nonprofit agencies or organizations to pay part of the costs for interpreter training programs (section 302(f)(1)(A) of the Rehabilitation Act of 1973). Therefore, in order to be considered for funding, applicants must identify in the application budget and budget narrative a percentage of match towards the total cost of the project. It is up to the applicant to determine an appropriate percentage for the match contribution. To calculate match, applicants may use the match-calculator available at: <https://rsa.ed.gov/match-calculator.cfm>.”

Program Authority: 29 U.S.C. 772(f).

Accessible Format: Individuals with disabilities can obtain this document and a copy of the application package in an accessible format (e.g., braille, large print, audiotope, or compact disc) on request to the program contact person listed under **FOR FURTHER INFORMATION CONTACT**.

Electronic Access to This Document: The official version of this document is the document published in the **Federal Register**. Free Internet access to the official edition of the **Federal Register** and the Code of Federal Regulations is available via the Federal Digital System at: www.gpo.gov/fdsys. At this site you can view this document, as well as all other documents of this Department

published in the **Federal Register**, in text or Portable Document Format (PDF). To use PDF you must have Adobe Acrobat Reader, which is available free at the site.

You may also access documents of the Department published in the **Federal Register** by using the article search feature at: www.federalregister.gov. Specifically, through the advanced search feature at this site, you can limit your search to documents published by the Department.

Dated: August 9, 2016.

Sue Swenson,

Acting Assistant Secretary for Special Education and Rehabilitative Services.

BILLING CODE 4000–01–P

DEPARTMENT OF EDUCATION

Applications for New Awards; Training of Interpreters for Individuals Who Are Deaf or Hard of Hearing and Individuals Who Are Deaf-Blind Program

AGENCY: Office of Special Education and Rehabilitative Services, Department of Education.

ACTION: Notice.

Overview Information

Training of Interpreters for Individuals Who Are Deaf or Hard of Hearing and Individuals Who Are Deaf-Blind Program Notice inviting applications for new awards for fiscal year (FY) 2016.

Catalog of Federal Domestic Assistance (CFDA) Number: 84.160D.

DATES

Applications Available: August 12, 2016.

Deadline for Transmittal of Applications: September 12, 2016.

Full Text of Announcement

I. Funding Opportunity Description

Purpose of Program: Under the Rehabilitation Act of 1973 (Rehabilitation Act), as amended by the Workforce Innovation and Opportunity Act, the Rehabilitation Services Administration (RSA) makes grants to public and private nonprofit agencies and organizations, including institutions of higher education (IHE), to establish interpreter training programs or to provide financial assistance for ongoing interpreter training programs to train a sufficient number of qualified interpreters throughout the country. The grants are designed to train interpreters to effectively interpret and transliterate

using spoken, visual, and tactile modes of communication; ensure the maintenance of the interpreting skills of qualified interpreters; and provide opportunities for interpreters to improve their skills in order to meet both the highest standards approved by certifying associations and the communication needs of individuals who are deaf or hard of hearing and individuals who are deaf-blind.

Priority: This priority is from the notice of final priority for this program (NFP) published elsewhere in this issue of the **Federal Register**.

Absolute Priority: For FY 2016, this priority is an absolute priority. Under 34 CFR 75.105(c)(3), we consider only applications that meet this priority.

This priority is:

Interpreter Training in Specialized Areas

Program Authority: 29 U.S.C. 772(f).

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 75, 77, 79, 81, 82, 84, 86, and 99. (b) The Office of Management and Budget Guidelines to Agencies on Governmentwide Debarment and Suspension (Nonprocurement) in 2 CFR part 180, as adopted and amended as regulations of the Department in 2 CFR part 3485. (c) The Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards in 2 CFR part 200, as adopted and amended as regulations of the Department in 2 CFR part 3474. (d) The regulations for this program in 34 CFR part 396. (e) The NFP.

Note: The regulations in 34 CFR part 79 apply to all applicants except federally recognized American Indian tribes.

Note: The regulations in 34 CFR part 86 apply to institutions of higher education only.

II. Award Information

Type of Award: Discretionary grants.

Estimated Available Funds: \$1,600,000.

Contingent upon availability of funds and the quality of applications, we may make additional awards in FY 2017 and FY 2018 from the list of unfunded applications from this competition.

Estimated Range of Awards: \$375,000–\$400,000.

Estimated Average Size of Awards: \$385,000.

Maximum Award Amount: We will reject any application that proposes a budget exceeding \$400,000 for a single budget period of 12 months.

Estimated Number of Awards: 4.

Note: The Department is not bound by any estimates in this notice.

Note: Under 34 CFR 75.562(c), an indirect cost reimbursement on a training grant is limited to the recipient's actual indirect costs, as determined by its negotiated indirect cost rate agreement, or eight percent of a modified total direct cost base, whichever amount is less. Indirect costs in excess of the limit may not be charged directly, used to satisfy matching or cost-sharing requirements, or charged to another Federal award.

Project Period: Up to 60 months.

Continuing the Fourth and Fifth Years of the Project: In deciding whether to continue funding the Training of Interpreters for Individuals Who Are Deaf or Hard of Hearing and Individuals Who Are Deaf-Blind program for the fourth and fifth years, the Department will conduct a one-day intensive review meeting during the third quarter of the third year of the project period. Specific details of this review and evaluation criteria will be determined post-award.

III. Eligibility Information

1. *Eligible Applicants:* States and public or nonprofit agencies and organizations, including American Indian tribes and IHEs.

2. *Cost Sharing or Matching:* The Commissioner may award grants to public or private nonprofit agencies or organizations to pay part of the costs for interpreter training programs (section 302(f)(1)(A) of the Rehabilitation Act of 1973). Therefore, in order to be considered for funding, applicants must identify in the application budget and budget narrative a percentage of match towards the total cost of the project. It is up to the applicant to determine an appropriate percentage for the match contribution. To calculate match, applicants may use the match-calculator available at: <https://rsa.ed.gov/match-calculator.cfm>.

IV. Application and Submission Information

1. *Address to Request Application Package:* You can obtain an application package via the Internet or from the Education Publications Center (ED Pubs). To obtain a copy via the Internet, use the following address: www.ed.gov/fund/grant/apply/grantapps/index.html. To obtain a copy from ED Pubs, write, fax, or call: ED Pubs, U.S. Department of Education, P.O. Box 22207, Alexandria, VA 22304. Telephone, toll free: 1-877-433-7827. FAX: (703) 605-6794. If you use a telecommunications device for the deaf (TDD) or a text telephone (TTY), call, toll free: 1-877-576-7734.

You can contact ED Pubs at its Web site, also: www.EDPubs.gov or at its email address: edpubs@inet.ed.gov.

If you request an application package from ED Pubs, be sure to identify this program or competition as follows: CFDA number 84.160D.

Individuals with disabilities can obtain a copy of the application package in an accessible format (e.g., braille, large print, audiotape, or compact disc) by contacting the person or team listed under *Accessible Format* in section VIII of this notice.

2. *Content and Form of Application Submission:* Requirements concerning the content and form of an application, together with the forms you must submit, are in the application package for this competition.

Page Limit: The application narrative (Part III of the application) is where you, the applicant, address the selection criteria that reviewers use to evaluate your application. Because of the limited time available to review applications and make a recommendation for funding, we strongly encourage applicants to limit the application narrative to no more than 45 pages, using the following standards:

- A "page" is 8.5" x 11", on one side only, with 1" margins at the top, bottom, and both sides.
- Double space (no more than three lines per vertical inch) all text in the application narrative, including titles, headings, footnotes, quotations, references, and captions, as well as all text in charts, tables, figures, and graphs.
- Use a font that is either 12 point or larger or no smaller than 10 pitch (characters per inch).
- Use one of the following fonts: Times New Roman, Courier, Courier New, or Arial. An application submitted in any other font (including Times Roman or Arial Narrow) will not be accepted.

In addition to the page-limit guidance on the application narrative section, we recommend that you adhere to the following page limits, using the standards listed above: (1) The abstract should be no more than one page, (2) the resumes of key personnel should be no more than two pages per person, and (3) a bibliography should be no more than three pages. Appendix A must include: (1) A logic model; and (2) person-loading charts and timelines. There are no page limits or standards for materials in Appendix A. The only optional materials that will be accepted are letters of support. Please note that our reviewers are not required to read optional materials.

Please note that any funded applicant's application abstract will be made available to the public.

3. *Submission Dates and Times:*

Applications Available: August 12, 2016.

Date of Pre-Application

Teleconference: Interested parties are invited to submit questions to the following email address: TSPDgrants@ed.gov. In the subject line of the email, please insert the text "CFDA 84.160D". Interested parties are invited to participate in a pre-application teleconference with staff from the Department on August 18, 2016 at 11:30 a.m. Eastern Time. The teleconference number is: 888-843-6165, and the passcode is: 7905685. For further information about the pre-application teleconference, contact the person listed under **FOR FURTHER INFORMATION CONTACT** in section VII of this notice.

Deadline for Transmittal of

Applications: September 12, 2016.

Applications for grants under this competition must be submitted electronically using the *Grants.gov* Apply site (*Grants.gov*). For information (including dates and times) about how to submit your application electronically, or in paper format by mail or hand delivery if you qualify for an exception to the electronic submission requirement, please refer to *Other Submission Requirements* in section IV of this notice.

We do not consider an application that does not comply with the deadline requirements.

Individuals with disabilities who need an accommodation or auxiliary aid in connection with the application process should contact the person listed under **FOR FURTHER INFORMATION CONTACT** in section VII of this notice. If the Department provides an accommodation or auxiliary aid to an individual with a disability in connection with the application process, the individual's application remains subject to all other requirements and limitations in this notice.

4. *Intergovernmental Review:* This competition is subject to Executive Order 12372 and the regulations in 34 CFR part 79. However, under 34 CFR 79.8(a), we waive intergovernmental review in order to make an award by the end of FY 2016.

5. *Funding Restrictions:* We reference regulations outlining funding restrictions in the *Applicable Regulations* section of this notice.

6. *Data Universal Numbering System Number, Taxpayer Identification Number, and System for Award Management:* To do business with the Department of Education, you must—

- a. Have a Data Universal Numbering System (DUNS) number and a Taxpayer Identification Number (TIN);

b. Register both your DUNS number and TIN with the System for Award Management (SAM), the Government's primary registrant database;

c. Provide your DUNS number and TIN on your application; and

d. Maintain an active SAM registration with current information while your application is under review by the Department and, if you are awarded a grant, during the project period.

You can obtain a DUNS number from Dun and Bradstreet at the following Web site: <http://fedgov.dnb.com/webform>. A DUNS number can be created within one to two business days.

If you are a corporate entity, agency, institution, or organization, you can obtain a TIN from the Internal Revenue Service. If you are an individual, you can obtain a TIN from the Internal Revenue Service or the Social Security Administration. If you need a new TIN, please allow two to five weeks for your TIN to become active.

The SAM registration process can take approximately seven business days, but may take upwards of several weeks, depending on the completeness and accuracy of the data you enter into the SAM database. Thus, if you think you might want to apply for Federal financial assistance under a program administered by the Department, please allow sufficient time to obtain and register your DUNS number and TIN. We strongly recommend that you register early.

Note: Once your SAM registration is active, it may be 24 to 48 hours before you can access the information in, and submit an application through, *Grants.gov*.

If you are currently registered with SAM, you may not need to make any changes. However, please make certain that the TIN associated with your DUNS number is correct. Also note that you will need to update your registration annually. This may take three or more business days.

Information about SAM is available at www.SAM.gov. To further assist you with obtaining and registering your DUNS number and TIN in SAM or updating your existing SAM account, we have prepared a SAM.gov Tip Sheet, which you can find at: <http://www2.ed.gov/fund/grant/apply/sam-faqs.html>.

In addition, if you are submitting your application via *Grants.gov*, you must (1) be designated by your organization as an Authorized Organization Representative (AOR); and (2) register yourself with *Grants.gov* as an AOR. Details on these steps are outlined at the following *Grants.gov* Web page: www.grants.gov/web/grants/register.html.

7. Other Submission Requirements: Applications for grants under this competition must be submitted electronically unless you qualify for an exception to this requirement in accordance with the instructions in this section.

a. Electronic Submission of Applications

Applications for grants under the Training of Interpreters for Individuals Who Are Deaf or Hard of Hearing and Individuals Who Are Deaf-Blind Program must be submitted electronically using the Governmentwide *Grants.gov* Apply site at www.Grants.gov. Through this site, you will be able to download a copy of the application package, complete it offline, and then upload and submit your application. You may not email an electronic copy of a grant application to us.

We will reject your application if you submit it in paper format unless, as described elsewhere in this section, you qualify for one of the exceptions to the electronic submission requirement and submit, no later than two weeks before the application deadline date, a written statement to the Department that you qualify for one of these exceptions. Further information regarding calculation of the date that is two weeks before the application deadline date is provided later in this section under *Exception to Electronic Submission Requirement*.

You may access the electronic grant application for the Training of Interpreters for Individuals Who Are Deaf or Hard of Hearing and Individuals Who Are Deaf-Blind Program at www.Grants.gov. You must search for the downloadable application package for this competition by the CFDA number. Do not include the CFDA number's alpha suffix in your search (e.g., search for 84.160, not 84.160D).

Please note the following:

- When you enter the *Grants.gov* site, you will find information about submitting an application electronically through the site, as well as the hours of operation.

- Applications received by *Grants.gov* are date and time stamped. Your application must be fully uploaded and submitted and must be date and time stamped by the *Grants.gov* system no later than 4:30:00 p.m., Washington, DC time, on the application deadline date. Except as otherwise noted in this section, we will not accept your application if it is received—that is, date and time stamped by the *Grants.gov* system—after 4:30:00 p.m., Washington, DC time, on

the application deadline date. We do not consider an application that does not comply with the deadline requirements. When we retrieve your application from *Grants.gov*, we will notify you if we are rejecting your application because it was date and time stamped by the *Grants.gov* system after 4:30:00 p.m., Washington, DC time, on the application deadline date.

- The amount of time it can take to upload an application will vary depending on a variety of factors, including the size of the application and the speed of your Internet connection. Therefore, we strongly recommend that you do not wait until the application deadline date to begin the submission process through *Grants.gov*.

- You should review and follow the Education Submission Procedures for submitting an application through *Grants.gov* that are included in the application package for this competition to ensure that you submit your application in a timely manner to the *Grants.gov* system. You can also find the Education Submission Procedures pertaining to *Grants.gov* under News and Events on the Department's G5 system home page at www.G5.gov. In addition, for specific guidance and procedures for submitting an application through *Grants.gov*, please refer to the *Grants.gov* Web site at: www.grants.gov/web/grants/applicants/apply-for-grants.html.

- You will not receive additional point value because you submit your application in electronic format, nor will we penalize you if you qualify for an exception to the electronic submission requirement, as described elsewhere in this section, and submit your application in paper format.

- You must submit all documents electronically, including all information you typically provide on the following forms: The Application for Federal Assistance (SF 424), the Department of Education Supplemental Information for SF 424, Budget Information—Non-Construction Programs (ED 524), and all necessary assurances and certifications.

- You must upload any narrative sections and all other attachments to your application as files in a read-only, non-modifiable Portable Document Format (PDF). Do not upload an interactive or fillable PDF file. If you upload a file type other than a read-only, non-modifiable PDF (e.g., Word, Excel, WordPerfect, etc.) or submit a password-protected file, we will not review that material. Please note that this could result in your application not being considered for funding because the material in question—for example, the application narrative—is critical to a

meaningful review of your proposal. For that reason, it is important to allow yourself adequate time to upload all material as PDF files. The Department will not convert material from other formats to PDF.

- Your electronic application must comply with any page-limit requirements described in this notice.
- After you electronically submit your application, you will receive from *Grants.gov* an automatic notification of receipt that contains a *Grants.gov* tracking number. This notification indicates receipt by *Grants.gov* only, not receipt by the Department. *Grants.gov* will also notify you automatically by email if your application met all the *Grants.gov* validation requirements or if there were any errors (such as submission of your application by someone other than a registered Authorized Organization Representative or inclusion of an attachment with a file name that contains special characters). You will be given an opportunity to correct any errors and resubmit, but you must still meet the deadline for submission of applications.

Once your application is successfully validated by *Grants.gov*, the Department will retrieve your application from *Grants.gov* and send you an email with a unique PR/Award number for your application.

These emails do not mean that your application is without any disqualifying errors. While your application may have been successfully validated by *Grants.gov*, it must also meet the Department's application requirements as specified in this notice and in the application instructions. Disqualifying errors could include, for instance, failure to upload attachments in a read-only, non-modifiable PDF; failure to submit a required part of the application; or failure to meet applicant eligibility requirements. It is your responsibility to ensure that your submitted application has met all of the Department's requirements.

- We may request that you provide us original signatures on forms at a later date.

Application Deadline Date Extension in Case of Technical Issues with the *Grants.gov* System: If you are experiencing problems submitting your application through *Grants.gov*, please contact the *Grants.gov* Support Desk, toll free, at 1-800-518-4726. You must obtain a *Grants.gov* Support Desk Case Number and must keep a record of it.

If you are prevented from electronically submitting your application on the application deadline date because of technical problems with the *Grants.gov* system, we will grant you

an extension until 4:30:00 p.m., Washington, DC time, the following business day to enable you to transmit your application electronically or by hand delivery. You also may mail your application by following the mailing instructions described elsewhere in this notice.

If you submit an application after 4:30:00 p.m., Washington, DC time, on the application deadline date, please contact the person listed under **FOR FURTHER INFORMATION CONTACT** in section VII of this notice and provide an explanation of the technical problem you experienced with *Grants.gov*, along with the *Grants.gov* Support Desk Case Number. We will accept your application if we can confirm that a technical problem occurred with the *Grants.gov* system and that the problem affected your ability to submit your application by 4:30:00 p.m., Washington, DC time, on the application deadline date. We will contact you after we determine whether your application will be accepted.

Note: The extensions to which we refer in this section apply only to the unavailability of, or technical problems with, the *Grants.gov* system. We will not grant you an extension if you failed to fully register to submit your application to *Grants.gov* before the application deadline date and time or if the technical problem you experienced is unrelated to the *Grants.gov* system.

Exception to Electronic Submission Requirement: You qualify for an exception to the electronic submission requirement, and may submit your application in paper format, if you are unable to submit an application through the *Grants.gov* system because—

- You do not have access to the Internet; or
 - You do not have the capacity to upload large documents to the *Grants.gov* system;
- and
- No later than two weeks before the application deadline date (14 calendar days or, if the fourteenth calendar day before the application deadline date falls on a Federal holiday, the next business day following the Federal holiday), you mail or fax a written statement to the Department, explaining which of the two grounds for an exception prevents you from using the Internet to submit your application.

If you mail your written statement to the Department, it must be postmarked no later than two weeks before the application deadline date. If you fax your written statement to the Department, we must receive the faxed statement no later than two weeks before the application deadline date.

Address and mail or fax your statement to: Kristen Rhinehart-Fernandez, U.S. Department of Education, 400 Maryland Avenue SW., Room 5062, Potomac Center Plaza, Washington, DC 20202-2800. FAX: (202) 245-7591.

Your paper application must be submitted in accordance with the mail or hand-delivery instructions described in this notice.

b. Submission of Paper Applications by Mail

If you qualify for an exception to the electronic submission requirement, you may mail (through the U.S. Postal Service or a commercial carrier) your application to the Department. You must mail the original and two copies of your application, on or before the application deadline date, to the Department at the following address: U.S. Department of Education, Application Control Center, Attention: (CFDA Number 84.160D), LBJ Basement Level 1, 400 Maryland Avenue SW., Washington, DC 20202-4260.

You must show proof of mailing consisting of one of the following:

- A legibly dated U.S. Postal Service postmark.
- A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.
- A dated shipping label, invoice, or receipt from a commercial carrier.
- Any other proof of mailing acceptable to the Secretary of the U.S. Department of Education.

If you mail your application through the U.S. Postal Service, we do not accept either of the following as proof of mailing:

- A private metered postmark.
- A mail receipt that is not dated by the U.S. Postal Service.

Note: The U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, you should check with your local post office.

We will not consider applications postmarked after the application deadline date.

c. Submission of Paper Applications by Hand Delivery

If you qualify for an exception to the electronic submission requirement, you (or a courier service) may deliver your paper application to the Department by hand. You must deliver the original and two copies of your application by hand, on or before the application deadline date, to the Department at the following address: U.S. Department of Education, Application Control Center, Attention: (CFDA Number 84.160D), 550 12th

Street SW., Room 7039, Potomac Center Plaza, Washington, DC 20202-4260.

The Application Control Center accepts hand deliveries daily between 8:00 a.m. and 4:30:00 p.m., Washington, DC time, except Saturdays, Sundays, and Federal holidays.

Note for Mail or Hand Delivery of Paper Applications: If you mail or hand deliver your application to the Department—

(1) You must indicate on the envelope and—if not provided by the Department—in Item 11 of the SF 424 the CFDA number, including suffix letter, if any, of the competition under which you are submitting your application; and

(2) The Application Control Center will mail to you a notification of receipt of your grant application. If you do not receive this notification within 15 business days from the application deadline date, you should call the U.S. Department of Education Application Control Center at (202) 245-6288.

V. Application Review Information

1. *Selection Criteria:* The selection criteria for this competition are from 34 CFR 75.210 of EDGAR and are listed in the application package.

2. *Review and Selection Process:* We remind potential applicants that in reviewing applications in any discretionary grant competition, the Secretary may consider, under 34 CFR 75.217(d)(3), the past performance of the applicant in carrying out a previous award, such as the applicant's use of funds, achievement of project objectives, and compliance with grant conditions. The Secretary may also consider whether the applicant failed to submit a timely performance report or submitted a report of unacceptable quality.

In addition, in making a competitive grant award, the Secretary requires various assurances including those applicable to Federal civil rights laws that prohibit discrimination in programs or activities receiving Federal financial assistance from the Department of Education (34 CFR 100.4, 104.5, 106.4, 108.8, and 110.23).

3. *Risk Assessment and Special Conditions:* Consistent with 2 CFR 200.205, before awarding grants under this competition, the Department conducts a review of the risks posed by applicants. Under 2 CFR 3474.10, the Secretary may impose special conditions and, in appropriate circumstances, high-risk conditions on a grant if the applicant or grantee is not financially stable; has a history of unsatisfactory performance; has a financial or other management system

that does not meet the standards in 2 CFR part 200, subpart D; has not fulfilled the conditions of a prior grant; or is otherwise not responsible.

4. *Integrity and Performance System:* If you are selected under this competition to receive an award that over the course of the project period may exceed the simplified acquisition threshold (currently \$150,000), under 2 CFR 200.205(a)(2) we must make a judgment about your integrity, business ethics, and record of performance under Federal awards—that is, the risk posed by you as an applicant—before we make an award. In doing so, we must consider any information about you that is in the integrity and performance system (currently referred to as the Federal Awardee Performance and Integrity Information System (FAPIIS)), accessible through SAM. You may review and comment on any information about yourself that a Federal agency previously entered and that is currently in FAPIIS.

Please note that, if the total value of your currently active grants, cooperative agreements, and procurement contracts from the Federal government exceeds \$10,000,000, the reporting requirements in 2 CFR part 200, Appendix XII, require you to report certain integrity information to FAPIIS semiannually. Please review the requirements in 2 CFR part 200, Appendix XII, if this grant plus all the other Federal funds you receive exceed \$10,000,000.

VI. Award Administration Information

1. *Award Notices:* If your application is successful, we notify your U.S. Representative and U.S. Senators and send you a Grant Award Notification (GAN), or we may send you an email containing a link to access an electronic version of your GAN. We may notify you informally, also.

If your application is not evaluated or not selected for funding, we notify you.

2. *Administrative and National Policy Requirements:* We identify administrative and national policy requirements in the application package and reference these and other requirements in the *Applicable Regulations* section of this notice.

We reference the regulations outlining the terms and conditions of an award in the *Applicable Regulations* section of this notice and include these and other specific conditions in the GAN. The GAN also incorporates your approved application as part of your binding commitments under the grant.

3. *Reporting:* (a) If you apply for a grant under this competition, you must ensure that you have in place the necessary processes and systems to

comply with the reporting requirements in 2 CFR part 170 should you receive funding under the competition. This does not apply if you have an exception under 2 CFR 170.110(b).

(b) At the end of your project period, you must submit a final performance report, including financial information, as directed by the Secretary. If you receive a multiyear award, you must submit an annual performance report that provides the most current performance and financial expenditure information as directed by the Secretary under 34 CFR 75.118. The Secretary may also require more frequent performance reports under 34 CFR 75.720(c). For specific requirements on reporting, please go to www.ed.gov/fund/grant/apply/appforms/appforms.html.

(c) Under 34 CFR 75.250(b), the Secretary may provide a grantee with additional funding for data collection analysis and reporting. In this case, the Secretary establishes a data collection period.

4. *Performance Measures:* The Government Performance and Results Act of 1993 (GPRA) directs Federal departments and agencies to improve the effectiveness of their programs by engaging in strategic planning, setting outcome-related goals for programs, and measuring program results against those goals.

The performance measures for this program are as follows:

(1) The number of working interpreters enrolled in specialized training.

(2) The number and percentage of working interpreters who successfully complete specialized training.

(3) The number and percentage of working interpreters who successfully completed specialized training who subsequently obtained employment in the area(s) for which they were prepared.

(4) The number and percentage of working interpreters who successfully completed specialized training who subsequently advanced in employment in the areas(s) for which they were prepared.

5. *Continuation Awards:* In making a continuation award under 34 CFR 75.253, the Secretary considers, among other things: Whether a grantee has made substantial progress in achieving the goals and objectives of the project; whether the grantee has expended funds in a manner that is consistent with its approved application and budget; and, if the Secretary has established performance measurement requirements, the performance targets in the grantee's approved application.

In making a continuation award, the Secretary also considers whether the grantee is operating in compliance with the assurances in its approved application, including those applicable to Federal civil rights laws that prohibit discrimination in programs or activities receiving Federal financial assistance from the Department (34 CFR 100.4, 104.5, 106.4, 108.8, and 110.23).

VII. Agency Contact

FOR FURTHER INFORMATION CONTACT: Kristen Rhinehart-Fernandez, U.S. Department of Education, 400 Maryland Avenue SW., Room 5062, Potomac Center Plaza, Washington, DC 20202–2800. Telephone: (202) 245–6103 or by email: Kristen.Rhinehart@ed.gov.

If you use a TDD or a TTY, call the Federal Relay Service, toll free, at 1–800–877–8339.

VIII. Other Information

Accessible Format: Individuals with disabilities can obtain this document and a copy of the application package in an accessible format (e.g., braille, large print, audiotope, or compact disc) on request to the program contact person listed under **FOR FURTHER INFORMATION CONTACT** in section VII of this notice.

Electronic Access to This Document: The official version of this document is the document published in the **Federal Register**. Free Internet access to the official edition of the **Federal Register** and the Code of Federal Regulations is available via the Federal Digital System at: www.gpo.gov/fdsys. At this site, you can view this document, as well as all other documents of this Department published in the **Federal Register**, in text or Portable Document Format (PDF). To use PDF you must have Adobe Acrobat Reader, which is available free at the site.

DEPARTMENT OF EDUCATION

[Catalog of Federal Domestic Assistance (CFDA) Number: 84.184C]

Reopening; Applications for New Awards; Promoting Student Resilience

AGENCY: Office of Elementary and Secondary Education, Department of Education.

ACTION: Notice.

SUMMARY: On June 23, 2016, we published in the **Federal Register** (81 FR 40877) a notice inviting applications (NIA) for the Promoting Student Resilience fiscal year (FY) 2016 competition. The NIA established a deadline date of July 25, 2016, for the transmittal of applications. This notice reopens the competition until August 19, 2016.

DATES: Deadline for Transmittal of Applications: August 19, 2016.

SUPPLEMENTARY INFORMATION: We are reopening this competition in order to allow applicants more time to prepare and submit their applications.

Note: All information in the NIA for this competition remains the same, except for the deadline for the transmittal of applications.

Program Authority: 20 U.S.C. 7131, and Title III of Division H of the Consolidated Appropriations Act, 2016 (Pub. L. 114–113).

FOR FURTHER INFORMATION CONTACT: Deirdra Hilliard, U.S. Department of Education, 400 Maryland Avenue SW., Room 3E–249, Washington, DC 20202–6450. Telephone: (202) 453–6726 or by email: deirdra.hilliard@ed.gov.

If you use a telecommunications device for the deaf or a text telephone, call the Federal Relay Service, toll free, at 1–800–877–8339.

Accessible Format: Individuals with disabilities can obtain this document and a copy of the application package in an accessible format (e.g., braille, large print, audiotope, or compact disc) on request to the program contact person listed under **FOR FURTHER INFORMATION CONTACT** in this notice.

Electronic Access to This Document: The official version of this document is the document published in the **Federal Register**. BILLING CODE 4000–01–P

DEPARTMENT OF ENERGY

Energy Savings Performance Contract Energy Sales Agreement; Request for Information

AGENCY: Federal Energy Management Program, Office of Energy Efficiency and Renewable Energy, Department of Energy.

ACTION: Notice of availability and request for information.

SUMMARY: The Federal Energy Management Program Office (FEMP), within the U.S. Department of Energy (DOE), published a notice, “Request for Comments on the Tax Treatment of an Energy Savings Performance Contract Energy Sales Agreement,” on its Web site to gather information on specific concerns related to the Federal Investment Tax Credit eligibility of a renewable energy project structured as an Energy Savings Performance Contract (ESPC) Energy Sales Agreement (ESA) that could benefit from clarification in the form of guidance issued by the Internal Revenue Service and the U.S. Department of the Treasury.

DATES: Written comments and information are requested on or before September 3, 2016.

ADDRESSES: Interested parties are to submit comments electronically to: tracy.niro@ee.doe.gov. Include “August 2016 ESPC Request for Comments” in the subject of the message.

Instructions: All submissions received must include “August 2016 ESPC Request for Comments” in the subject of the message. The notice is available at www.energy.gov/node/1953536.

FOR FURTHER INFORMATION CONTACT: Tracy Niro, U.S. Department of Energy, Federal Energy Management Program (EE–2L), 1000 Independence Avenue SW., Washington, DC 20585; email: Tracy.Niro@ee.doe.gov.

SUPPLEMENTARY INFORMATION: FEMP published a request for comment (RFC)

to gather information on the potential for an Energy Savings Performance Contract Energy Sales Agreement (ESPC ESA) project to qualify as a service contract under 26 U.S.C. 7701(e) and thus remain eligible for the 26 U.S.C. 48 solar investment tax credit (ITC). The RFC requests commenters to identify any specific language included in 26 U.S.C. 7701(e)(4)(A)(i)–(iv) that could benefit from clarification in the form of guidance from Internal Revenue Service (IRS) and the U.S. Department of Treasury (Treasury). The RFC is available at www.energy.gov/node/1953536. The RFC is a continuation of the issues presented in the Federal Energy Management Program's (FEMP) *Request for Comments on Including Onsite Renewable Energy Generation under Energy Savings Performance Contracts*, issued on February 2, 2016, available at <http://energy.gov/eere/femp/downloads/request-comments-including-onsite-renewable-energy-generation-under-energy>.

FEMP invites all interested parties to submit in writing by September 3, 2016, comments and information on matters addressed in the notice.

Issued in Washington, DC, on August 5, 2016.

Hayes Jones,

Operations Supervisor, Federal Energy Management Program.

FARM CREDIT ADMINISTRATION

[NV–16–14]

Equal Employment Opportunity and Diversity

AGENCY: Farm Credit Administration.

ACTION: Policy statement.

SUMMARY: The Farm Credit Administration (FCA) Board recently updated its Policy Statement on Equal Employment Opportunity and Diversity.

DATES: *Effective Date:* August 8, 2016.

FOR FURTHER INFORMATION CONTACT:

Thais Burlew, Director of Equal Employment Opportunity and Inclusion, Farm Credit Administration, 1501 Farm Credit Drive, McLean Virginia 22102–5090, (703) 883–4290, TTY (703) 883–4352.

SUPPLEMENTARY INFORMATION: While not required by law, the Equal Employment Opportunity Commission (EEOC) has determined that reissuance of an agency's EEO policy statement each fiscal year is a symbol of the agency leadership's commitment to EEO and Diversity principles. The FCA conducted its annual review of Policy Statement FCA–PS–62 on Equal Employment Opportunity (EEO) and Diversity. The policy has been slightly edited at EEOC's recommendation to indicate that FCA begins prompt, thorough, and impartial investigations within 10 days of receiving notice of harassment allegations.

The text of the updated Policy Statement is set forth below in its entirety. All FCA Board policy statements may be viewed on FCA's Web site. From www.fca.gov, select "Laws & Regulations," then select "FCA Handbook," then select "FCA Board Policy Statements."

Equal Employment Opportunity and Diversity

FCA–PS–62

Effective Date: August 8, 2016.

Effect on Previous Action: Replaces FCA–PS–62 [NV15–10] dated August 18, 2015 (80 FR 51806, 8/26/15).

Source of Authority: Title VII of the Civil Rights Act of 1964, as amended (42 U.S.C. 2000e *et seq.*); Age Discrimination in Employment Act (29 U.S.C. 621 *et seq.*); Rehabilitation Act of 1973, as amended (29 U.S.C. 721 *et seq.*); Equal Pay Act of 1974 (29 U.S.C. 206(d)); Civil Service Reform Act of 1978 (5 U.S.C. 3112); Notification and Federal Employee Antidiscrimination and Retaliation Act of 2002 (No FEAR Act) (5 U.S.C. 2301); Genetic Information Nondiscrimination Act of 2008 (42 U.S.C. 2000ff *et seq.*); section 5.9 of the Farm Credit Act of 1971, as amended (12 U.S.C. 2243); Executive Order 11478 (Equal Employment Opportunity in the Federal Government), as amended by Executive Orders 13087 and 13152 to include prohibitions on discrimination based on sexual orientation and status as a parent; Executive Order 13166 (Improving Access to Services for Persons with Limited English Proficiency); 29 CFR part 1614; Equal Employment Opportunity Commission Management Directives. The Farm Credit Administration Board hereby adopts the following policy statement:

Purpose

The Farm Credit Administration (FCA or Agency) Board reaffirms its commitment to Equal Employment Opportunity (EEO) and Diversity (EEO) and its belief that all FCA employees should be treated with dignity and respect. The Board also provides guidance to Agency management and staff for deciding and taking action in these critical areas.

Importance

Unquestionably, the employees who comprise the FCA are its most important resource. The Board fully recognizes that the Agency draws its strength from the dedication, experience, and diversity of its employees. The Board is firmly committed to taking whatever steps are needed to protect the rights of its staff and to carrying out programs that foster the development of each employee's potential. We believe an investment in efforts that strongly promote EEO will prevent the conflict and the high costs of correction for taking no, or inadequate, action in these areas.

The Farm Credit Administration (FCA) Board Adopts the Following Policy Statement: It is the policy of the FCA to prohibit discrimination in Agency policies, program practices, and operations. Employees, applicants for employment, and members of the public who seek to take part in FCA programs, activities, and services will be treated fairly. The FCA Board Chairman and Chief Executive Officer (CEO) is ultimately responsible for ensuring that FCA meets all EEO requirements and initiatives in accordance with laws and regulations, to maintain a workplace that is free from discrimination and that values all employees. FCA, under the appropriate laws and regulations, will:

- Ensure equal employment opportunity based on merit and qualification, without discrimination because of race, color, religion, sex (including sexual orientation), age (40 or older), national origin, disability, status as a parent, genetic information, or filing of a complaint, participation in discrimination or harassment complaint proceedings, or other opposition to discrimination;
- Provide for the prompt and fair consideration of complaints of discrimination;
- Make reasonable accommodations for qualified applicants for employment and employees with physical or mental disabilities under law;
- Make reasonable accommodations based on applicants' and employees' religious beliefs or practices, consistent with Title VII;
- Provide an environment free from harassment to all employees;
- Create and maintain an organizational culture that recognizes, values, and supports employee and public diversity and inclusion;
- Develop objectives within the Agency's operation and strategic planning process to meet the goals of EEO and this policy;
- Implement affirmative programs to carry out this policy within the Agency; and
- To the extent practicable, seek to encourage the Farm Credit System to continue its efforts to promote and increase diversity.

Diversity and Inclusion

The FCA intends to be a model employer. That is, as far as possible, FCA will build and maintain a workforce that reflects the rich diversity of individual differences evident throughout this Nation. The Board views individual differences as complementary and believes these differences enrich our organization. When individual differences are respected, recognized, and valued, diversity becomes a powerful force that can contribute to achieving superior results. Therefore, we will create, maintain, and continuously improve on an organizational culture that fully recognizes, values, and supports employee diversity. The Board is

committed to promoting and supporting an inclusive environment that provides to all employees, individually and collectively, the chance to work to their full potential in the pursuit of the Agency's mission. We will provide everyone the opportunity to develop to his or her fullest potential. When a barrier to someone achieving this goal exists, we will strive to remove this barrier.

Affirmative Employment

The Board reaffirms its commitment to ensuring FCA conducts all of its employment practices in a nondiscriminatory manner. The Board expects full cooperation and support from everyone associated with recruitment, selection, development, and promotion to ensure such actions are free of discrimination. All employees will be evaluated on their EEO achievements as part of their overall job performance. Though staff commitment is important, the role of supervisors is paramount to success. Agency supervisors must be coaches and are responsible for helping all employees develop their talents and give their best efforts in contributing to the mission of the FCA.

Workplace Harassment

It is the policy of the FCA to provide a work environment free from unlawful discrimination in any form, and to protect all employees from any form of harassment, either physical or verbal. The FCA will not tolerate harassment in the workplace for any reason. The FCA also will not tolerate retaliation against any employee for reporting harassment or for aiding in any inquiry about reporting harassment. FCA begins prompt, thorough, and impartial investigations within 10 days of receiving notice of harassment allegations.

Disabled Veterans Affirmative Action Program (DVAAP)

A disabled veteran is defined as someone who is entitled to compensation under the laws administered by the Veterans Administration or someone who was discharged or released from active duty because of a service-connected disability. The FCA is committed to increasing the representation of disabled veterans within its organization. Our Nation owes a debt to those veterans who served their country, especially those who were disabled because of service. To honor these disabled veterans, the FCA shall place emphasis on making vacancies known to and

providing opportunities for employing disabled veterans.

Dated this 8th day of August 2016 by order of the Board.

Dated: August 8, 2016.

Dale L. Aultman,

Secretary, Farm Credit Administration Board.

BILLING CODE 6705-01-P

FEDERAL DEPOSIT INSURANCE CORPORATION

Notice to All Interested Parties of the Termination of the Receivership of 10474 First Federal Bank, Lexington, Kentucky

Notice Is Hereby Given that the Federal Deposit Insurance Corporation ("FDIC") as Receiver for First Federal Bank, Lexington, Kentucky ("the Receiver") intends to terminate its receivership for said institution. The FDIC was appointed receiver of First Federal Bank on April 19, 2013. The liquidation of the receivership assets has been completed. To the extent permitted by available funds and in accordance with law, the Receiver will be making a final dividend payment to proven creditors.

Based upon the foregoing, the Receiver has determined that the continued existence of the receivership will serve no useful purpose. Consequently, notice is given that the receivership shall be terminated, to be effective no sooner than thirty days after the date of this Notice. If any person wishes to comment concerning the termination of the receivership, such comment must be made in writing and sent within thirty days of the date of this Notice to: Federal Deposit Insurance Corporation, Division of Resolutions and Receiverships, Attention: Receivership Oversight Department 34.6, 1601 Bryan Street, Dallas, TX 75201.

No comments concerning the termination of this receivership will be considered which are not sent within this time frame.

Dated: August 8, 2016.

Federal Deposit Insurance Corporation.

Ralph E. Frable,

Assistant Executive Secretary.

FEDERAL ELECTION COMMISSION

[Notice 2016–08]

Filing Dates for the Hawaii Special Election in the 1st Congressional District

AGENCY: Federal Election Commission.

ACTION: Notice of filing dates for special election.

SUMMARY: Hawaii has scheduled a special general election on November 8, 2016, to fill the U.S. House of Representatives seat in the 1st Congressional District of the late Representative Mark Takai.

Committees required to file reports in connection with the Special General Election on November 8, 2016, shall file a 12-day Pre-General Report, and a 30-day Post-General Report.

FOR FURTHER INFORMATION CONTACT: Ms. Elizabeth S. Kurland, Information Division, 999 E Street NW., Washington, DC 20463; Telephone: (202) 694–1100; Toll Free (800) 424–9530.

SUPPLEMENTARY INFORMATION:

Principal Campaign Committees

All principal campaign committees of candidates who participate in the Hawaii Special General Election shall file a 12-day Pre-General Report on October 27, 2016; and a Post-General Report on December 8, 2016. (See chart below for the closing date for each report.)

Note that these reports are in addition to the campaign committee’s regular

quarterly filings. (See chart below for the closing date for each report).

Unauthorized Committees (PACs and Party Committees)

Political committees filing on a quarterly basis in 2016 are subject to special election reporting if they make previously undisclosed contributions or expenditures in connection with the Hawaii Special General Election by the close of books for the applicable report(s). (See chart below for the closing date for each report.)

Committees filing monthly that make contributions or expenditures in connection with the Hawaii Special General Election will continue to file according to the monthly reporting schedule.

Additional disclosure information in connection with the Hawaii Special General Election may be found on the FEC Web site at http://www.fec.gov/info/report_dates.shtml.

Disclosure of Lobbyist Bundling Activity

Principal campaign committees, party committees and Leadership PACs that are otherwise required to file reports in connection with the special general election must simultaneously file FEC Form 3L if they receive two or more bundled contributions from lobbyists/registrants or lobbyist/registrant PACs that aggregate in excess of the \$17,600 during the special election reporting periods. (See chart below for closing date of each period.) 11 CFR 104.22(a)(5)(v), (b).

CALENDAR OF REPORTING DATES FOR HAWAII SPECIAL GENERAL ELECTION COMMITTEES INVOLVED IN THE SPECIAL GENERAL ELECTION (11/08/16) MUST FILE

Report	Close of books ¹	Reg./Cert. & overnight mailing deadline	Filing deadline
Pre-General	10/19/16	10/24/16	10/27/16
Post-General	11/28/16	12/08/16	12/08/16
Year-End	12/31/16	01/31/17	01/31/17

¹ The reporting period always begins the day after the closing date of the last report filed. If the committee is new and has not previously filed a report, the first report must cover all activity that occurred before the committee registered as a political committee up through the close of books for the first report due.

On behalf of the Commission,
Matthew S. Petersen,
Chairman, Federal Election Commission.

BILLING CODE 6715–01–P

FEDERAL TRADE COMMISSION

Agency Information Collection Activities; Proposed Collection; Comment Request

AGENCY: Federal Trade Commission (“Commission” or “FTC”).

ACTION: Notice.

SUMMARY: The information collection requirements described below will be submitted to the Office of Management

and Budget (“OMB”) for review, as required by the Paperwork Reduction Act (“PRA”). The FTC is seeking public comments on its proposal to extend for an additional three years the current PRA clearance for information collection requirements in its Antitrust Improvements Act Rules (“HSR Rules”) and corresponding Notification and Report Form for Certain Mergers and Acquisitions (“Notification and Report

Form”). That clearance expires on December 31, 2016.

DATES: Comments must be filed by October 11, 2016.

ADDRESSES: Interested parties may file a comment online or on paper, by following the instructions in the Request for Comment part of the **SUPPLEMENTARY INFORMATION** section below. Write “HSR PRA Clearance Extension, P169300” on your comment and file your comment online at <https://ftcpublic.commentworks.com/ftc/hsrrulespra>, by following the instructions on the web-based form. If you prefer to file your comment on paper, mail your comment to the following address: Federal Trade Commission, Office of the Secretary, 600 Pennsylvania Avenue NW., Suite CC-5610 (Annex J), Washington, DC 20580, or deliver your comment to the following address: Federal Trade Commission, Office of the Secretary, Constitution Center, 400 7th Street SW., 5th Floor, Suite 5610 (Annex J), Washington, DC 20024.

FOR FURTHER INFORMATION CONTACT: Robert L. Jones, Assistant Director, Premerger Notification Office, Bureau of Competition, Federal Trade Commission, Room CC-5301, 600 Pennsylvania Ave. NW., Washington, DC 20580, or by telephone to (202) 326-2740.

SUPPLEMENTARY INFORMATION: Under the PRA, 44 U.S.C. 3501–3521, federal agencies must obtain approval from OMB for each collection of information they conduct or sponsor. “Collection of information” means agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. 44 U.S.C. 3502(3); 5 CFR 1320.3(c). As required by section 3506(c)(2)(A) of the PRA, the FTC is providing this opportunity for public comment before requesting that OMB extend the existing PRA clearance for the HSR Rules and Notification and Report Form, 16 CFR part 801–803 (OMB Control Number 3084–0005).

Pursuant to Section 3506(c)(2)(A), the FTC invites comments on: (1) Whether the disclosure requirements are necessary, including whether the information will be practically useful; (2) the accuracy of our burden estimates, including whether the methodology and assumptions used are valid; (3) how to improve the quality, utility, and clarity of the disclosure requirements; and (4) how to minimize the burden of providing the required information to consumers.

Background Information: Section 7A of the Clayton Act (“Act”), 15 U.S.C. 18a, as amended by the Hart-Scott-

Rodino Antitrust Improvements Act of 1976, Public Law 94–435, 90 Stat. 1390, requires all persons contemplating certain mergers or acquisitions to file notification with the Commission and the Assistant Attorney General and to wait a designated period of time before consummating such transactions. Congress empowered the Commission, with the concurrence of the Assistant Attorney General, to require “that the notification . . . be in such form and contain such documentary material and information . . . as is necessary and appropriate” to enable the agencies “to determine whether such acquisitions may, if consummated, violate the antitrust laws.” 15 U.S.C. 18a(d). Congress similarly granted rulemaking authority to, *inter alia*, “prescribe such other rules as may be necessary and appropriate to carry out the purposes of this section.” *Id.*

Pursuant to that section, the Commission, with the concurrence of the Assistant Attorney General, developed the HSR Rules and the corresponding Notification and Report Form. The following discussion presents the FTC’s PRA burden analysis regarding completion of the Notification and Report Form.

Burden Statement: The following burden estimates are primarily based on FTC data concerning the number of HSR filings and staff’s informal consultations with leading HSR counsel.

Estimated Total Annual Hours

In fiscal year 2015, there were 3,585 non-index filings and just one index filing.¹ Based on an average annual increase of 27% in fiscal years 2013–2015, FTC staff projects a total of 4,553 non-index filings in fiscal year 2016. With index filings not having demonstrated a singular direction over the same span, however, staff instead bases its estimate on a rough average of the number of such filings over that same interval (fiscal years 2013–2015) to project a total of 10 index filings for fiscal year 2016.² Retaining prior

¹ “Index” filings pertain to banking transactions, and thus would not be affected by the amendments. Index filings are incorporated, however, into the FTC’s currently cleared burden estimates (the FTC has jurisdiction over the administration of index filings). They are mentioned here to distinguish them from and to further explain a “non-index” filing. Clayton Act Sections 7A(c)(6) and (c)(8) exempt from the requirements of the premerger notification program certain transactions that are subject to the approval of other agencies, but only if copies of the information submitted to these other agencies are also submitted to the Agencies. Thus, parties must submit copies of these “index” filings, but completing the task requires significantly less time than non-exempt transactions (which require “non-index” filings).

² Based on the current rate of such filings this year, as well as the actual number of such filings,

assumptions, FTC staff estimates that non-index filings require, on average, approximately 37 hours per filing and that index filings require an average of 2 hours per filing.

Calculating the burden for auto-withdrawal of filings pursuant to § 803.12(b) of the HSR Rules requires an analysis of two potential scenarios. In one scenario, a filing is automatically withdrawn and the acquiring person utilizes the two-day resubmission process under § 803.12(c). In that case, no additional transaction is generated as the acquiring person simply restarts the waiting period on the same transaction. In the second scenario, the parties to a terminated transaction for which the filing is automatically withdrawn do not utilize the two-day resubmission process under § 803.12(c) but later decide to move forward with the transaction. In that case, a new filing is required. Both of these scenarios are rare, as it is very unlikely that a transaction for which the HSR filing is automatically withdrawn during the merger review process (due to the parties’ SEC filing indicating that the transaction has been terminated) would be subsequently restarted. Based on experience to date, this would occur approximately once every fifteen years, *i.e.*, a historical frequency of .067 transactions per year. FTC staff believes that this new filing would require the same work and diligence as any new non-index filing. Assuming, then, an average of 37 hours for one transaction, when applied to a historical frequency of .067, this amounts to an annual average of 3 hours, rounded up, for a withdrawn transaction later restarted.

Thus, the total estimated hours burden before adjustments is 168,484 hours [(4,553 non-index filings × 37 hours/each) + (10 index filings × 2 hours/each) + (1 withdrawn transaction later restarted × 3 hours)].

Estimated Total Annual Labor Cost

Using the burden hours (168,484) estimated above and applying an estimated average of \$460/hour for executive and/or attorney compensation, staff estimates that the total labor cost associated with the HSR Rules and the Notification and Report Form is approximately \$77,502,640.

Estimated Total Annual Non-Labor Cost

The applicable requirements impose minimal start-up costs, as businesses subject to the HSR Rules generally have or obtain necessary equipment for other

respectively, in fiscal years 2014 and 2015, the above estimate likely well exceeds the eventual actual results for fiscal year 2016.

business purposes. Staff believes that the above requirements necessitate ongoing, regular training so that covered entities stay current and have a clear understanding of federal mandates, but that this would be a small portion of and subsumed within the ordinary training that employees receive apart from that associated with the information collected under the HSR Rules and the corresponding Notification and Report Form.

Request for Comment: Pursuant to Section 3506(c)(2)(A), the FTC invites comments on: (1) Whether the disclosure requirements are necessary, including whether the information will be practically useful; (2) the accuracy of our burden estimates, including whether the methodology and assumptions used are valid; (3) how to improve the quality, utility, and clarity of the disclosure requirements; and (4) how to minimize the burden of providing the required information to consumers.

You can file a comment online or on paper. For the Commission to consider your comment, we must receive it on or before October 11, 2016. Write “HSR PRA Clearance Extension, P169300” on your comment. Your comment—including your name and your state—will be placed on the public record of this proceeding, including to the extent practicable, on the public Commission Web site, at <http://www.ftc.gov/os/publiccomments.shtm>. As a matter of discretion, the Commission tries to remove individuals’ home contact information from comments before placing them on the Commission Web site.

Because your comment will be made public, you are solely responsible for making sure that your comment does not include any sensitive personal information, like anyone’s Social Security number, date of birth, driver’s license number or other state identification number or foreign country equivalent, passport number, financial account number, or credit or debit card number. You are also solely responsible for making sure that your comment does not include any sensitive health information, like medical records or other individually identifiable health information. In addition, do not include any “[t]rade secret or any commercial or financial information which is . . . privileged or confidential” as provided in Section 6(f) of the FTC Act 15 U.S.C. 46(f), and FTC Rule 4.10(a)(2), 16 CFR 4.10(a)(2). In particular, do not include competitively sensitive information such as costs, sales statistics, inventories, formulas, patterns devices,

manufacturing processes, or customer names.

If you want the Commission to give your comment confidential treatment, you must file it in paper form, with a request for confidential treatment, and you have to follow the procedure explained in FTC Rule 4.9(c).³ Your comment will be kept confidential only if the FTC General Counsel grants your request in accordance with the law and the public interest.

Postal mail addressed to the Commission is subject to delay due to heightened security screening. As a result, we encourage you to submit your comments online. To make sure that the Commission considers your online comment, you must file it at your comment and file your comment online at <https://ftcpublishcommentworks.com/ftc/hsrrulespra> by following the instructions on the web-based form. When this Notice appears at <http://www.regulations.gov/#/home>, you also may file a comment through that Web site.

If you file your comment on paper, write “HSR PRA Clearance Extension, P169300” on your comment and on the envelope, mail your comment to the following address: Federal Trade Commission, Office of the Secretary, 600 Pennsylvania Avenue NW., Suite CC-5610 (Annex J), Washington, DC 20580, or deliver your comment to the following address: Federal Trade Commission, Office of the Secretary, Constitution Center, 400 7th Street SW., 5th Floor, Suite 5610 (Annex J), Washington, DC 20024. If possible, submit your paper comment to the Commission by courier or overnight service.

The FTC Act and other laws that the Commission administers permit the collection of public comments to consider and use in this proceeding as appropriate. The Commission will consider all timely and responsive public comments that it receives on or before October 11, 2016. For information on the Commission’s privacy policy, including routine uses permitted by the Privacy Act, see <http://www.ftc.gov/ftc/privacy.htm>.

David C. Shonka,
Acting General Counsel.

BILLING CODE 6750-01-P

³ In particular, the written request for confidential treatment that accompanies the comment must include the factual and legal basis for the request, and must identify the specific portions of the comment to be withheld from the public record. See FTC Rule 4.9(c), 16 CFR 4.9(c).

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA-2011-D-0376]

Dietary Supplements: New Dietary Ingredient Notifications and Related Issues; Revised Draft Guidance for Industry; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA or we) is announcing the issuance of a revised draft guidance for industry entitled “Dietary Supplements: New Dietary Ingredient Notifications and Related Issues.” The revised draft guidance supersedes FDA’s July 2011 draft guidance on the same topic. The revised draft guidance, when finalized, will help industry in evaluating whether to submit a premarket safety notification for a new dietary ingredient (NDI), or for a dietary supplement containing an NDI, and in preparing such premarket safety notifications (also referred to as NDI notifications).

DATES: Although you may comment on any guidance at any time (see 21 CFR 10.115(g)(5)), to ensure that FDA considers your comment on the draft guidance before we begin work on the final version of the guidance, submit either electronic or written comments on the draft guidance by October 11, 2016.

ADDRESSES: You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <http://www.regulations.gov> will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else’s Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on <http://www.regulations.gov>.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see “Written/Paper Submissions” and “Instructions”).

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Division of Dockets Management (HFA-305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

- For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in “Instructions.”

Instructions: All submissions received must include the Docket No. FDA-2011-D-0376 for “Dietary Supplements: New Dietary Ingredient Notifications and Related Issues; Revised Draft Guidance for Industry.” Received comments will be placed in the docket and, except for those submitted as “Confidential Submissions,” publicly viewable at <http://www.regulations.gov> or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

- Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states “THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.” The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <http://www.regulations.gov>. Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as “confidential.” Any information marked as “confidential” will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA’s posting of

comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <http://www.fda.gov/regulatoryinformation/dockets/default.htm>.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to <http://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the “Search” box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

Submit written requests for single copies of the draft guidance to the Division of Dietary Supplement Programs, Center for Food Safety and Applied Nutrition (HFS-810), Food and Drug Administration, 5001 Campus Drive, College Park, MD 20740. Send one self-addressed adhesive label to assist that office in processing your requests. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the draft guidance.

FOR FURTHER INFORMATION CONTACT: Ali Abdel-Rahman, Center for Food Safety and Applied Nutrition (HFS-810), Food and Drug Administration, 5001 Campus Dr., College Park, MD 20740, 240-402-1853.

SUPPLEMENTARY INFORMATION:

I. Background

We are announcing the availability of a revised draft guidance for industry entitled “Dietary Supplements: New Dietary Ingredient Notifications and Related Issues.” This draft guidance supersedes the July 2011 draft guidance on this topic (76 FR 39111; July 5, 2011) and is being issued consistent with our good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent our current thinking on this topic. It will not create or confer any rights for or on any person and will not operate to bind FDA or the public. An alternative approach may be used if such approach satisfies the requirements of the applicable statutes and regulations.

On October 25, 1994, the Dietary Supplement Health and Education Act of 1994 (DSHEA) (Pub. L. 103-417) was signed into law. DSHEA amended the Federal Food, Drug, and Cosmetic Act (the FD&C Act) by adding, among other provisions: (1) Section 201(ff) (21 U.S.C. 321(ff)), which defines the term “dietary supplement” and (2) section 413 (21 U.S.C. 350b), which describes requirements for NDIs. Among other things, section 413 of the FD&C Act requires the manufacturer or distributor

of an NDI, or of a dietary supplement containing the NDI, to submit a premarket notification to FDA (as delegate for the Secretary of Health and Human Services) at least 75 days before introducing the NDI or dietary supplement into interstate commerce, unless the NDI and any other ingredients in the dietary supplement have been present in the food supply as an article used for food in a form in which the food has not been chemically altered (21 U.S.C. 350b(a)(1)). The notification must contain the information, including any citation to published articles, which is the manufacturer or distributor’s basis for concluding that a dietary supplement containing the NDI will reasonably be expected to be safe.

This draft guidance has several purposes. First, it is intended to help dietary supplement manufacturers and distributors decide whether to submit an NDI notification. In addition, the draft guidance is intended to provide recommendations on how to conduct a safety assessment for an NDI notification and what to include in the notification. In question and answer form, the draft guidance presents FDA’s views on what qualifies as an NDI; when an NDI notification is required; the procedures for submitting an NDI notification; the types of data and information that manufacturers and distributors should consider when evaluating the safety of a dietary supplement containing an NDI; and what should be included in an NDI notification. In addition, the draft guidance contains questions and answers about parts of the dietary supplement definition (section 201(ff) of the FD&C Act) that can affect whether a particular substance may be marketed as a dietary ingredient in a dietary supplement.

We issued the original version of this draft guidance in the **Federal Register** of July 5, 2011 (the 2011 draft guidance). We gave interested parties an opportunity to submit comments by October 3, 2011. In the **Federal Register** of September 9, 2011 (76 FR 55927), we extended the comment period to December 2, 2011. We received numerous comments on the 2011 draft guidance.

Based on those comments and on meetings with industry and other stakeholders, we realized that the 2011 draft guidance contained gaps and unclear statements that were subject to confusion and misinterpretation. Therefore, we decided to clarify and better explain our thinking on some critical issues, in addition to explaining their public health significance, and to

request additional comments on these issues before publishing a final guidance. We have revised certain questions and answers and added a number of new questions and answers.

The major topics on which we have revised or added questions and answers are as follows:

- *Chemical alteration*—Dietary supplements containing an NDI are exempt from the notification requirement when they contain only dietary ingredients that have been present in the food supply as an article used for food in a form in which the food has not been chemically altered. Section IV.B of the revised draft guidance explains FDA's interpretation of "present in the food supply as an article used for food" and the public health basis for that interpretation. In addition, section IV.B has been revised to address the question of what constitutes "chemical alteration" more fully and to explain FDA's reasoning on this issue, as well as discussing additional examples of when chemical alteration occurs and when it does not. Because no guidance document can cover every possible manufacturing scenario, the draft guidance encourages industry to consult with FDA in advance on such matters.

- *Manufacturing changes that create an NDI*—A related issue addressed in section IV.A of the draft guidance is when a manufacturing change alters the structure or properties of an ingredient and creates an NDI for which a notification must be submitted. The revised draft guidance provides examples of manufacturing changes that alter the identity of the ingredient, the key factor in determining whether they also change the regulatory status of the ingredient.

- *Synthetic substances*—Section IV.D of the revised draft guidance contains an expanded discussion clarifying FDA's views on when synthetic copies of botanical and other dietary ingredients qualify as dietary ingredients under the FD&C Act. FDA's thinking is based on the text of section 201(ff)(1) of the FD&C Act, which defines some types of dietary ingredients by identity and others by function.

- *New dietary ingredient definition and list of "grandfathered" dietary ingredients*—In section IV.A of the draft guidance, we revised our response to the question about whether there is an authoritative list of dietary ingredients marketed before October 15, 1994 (a so-called "grandfathered list" or "old dietary ingredient list"). Dietary ingredients marketed before that date are not NDIs and therefore are not subject to the premarket notification

requirement in section 413 of the FD&C Act. Although there is currently no authoritative list of "grandfathered" ingredients, the revised answer notes that FDA is prepared to compile such a list based on independent and verifiable data to be submitted by industry. The revised answer also discusses FDA's thinking on the regulatory status of dietary ingredients that would be on such a list, as well as the status of dietary ingredients not on such a list.

We also revised several questions and answers in section IV.A to clarify various matters regarding FDA's interpretation of the terms "marketed" and "dietary ingredient" in section 413(d) of the FD&C Act, which defines an NDI as a dietary ingredient that was not marketed in the United States before October 15, 1994, and we added more examples of documentation that can be used to show that a dietary ingredient was marketed prior to October 15, 1994.

- *Structuring notifications efficiently and relying on data from prior notifications and master files*—We added several questions and answers in section IV.C of this draft guidance to suggest ways manufacturers and distributors can reduce the number of NDI notifications they must file and to clarify when data and information from a previous notification or "master file" may be used in a notification. For example, the answer to a new question clarifies that firms may submit an NDI notification that covers the use of the NDI in multiple dietary supplements and includes safety data for a range of doses and/or differing conditions of use. This answer also explains that a firm may submit a confidential "master file" containing specifications, manufacturing procedures, and other identity information for an NDI, and may incorporate information from the master file into its own NDI notification or may authorize another firm to rely on information from the master file in a notification for a dietary supplement containing the NDI. We also added a question and answer to describe when a firm may rely on data in another notification. In addition, section IV.C now includes a question and answer with six examples distinguishing situations in which separate notifications are required for different dietary supplements containing the same NDI from situations in which a single NDI notification covers multiple dietary supplements containing the same NDI. Finally, section IV.C now clarifies that, although a combination of NDIs is itself an NDI, a combination of grandfathered dietary ingredients is not, even if that combination has not been used in a dietary supplement before.

- *Identity information to include in an NDI notification*—We revised several questions and answers in section VI.A in consideration of comments regarding chemical and botanical information necessary to determine the identity of an NDI. We also added a new question and answer with recommendations about what chemistry information should be included in a notification for an enzyme NDI. In addition, since some of the standard references on nomenclature of plants and microorganisms have been renamed or updated since the 2011 draft guidance, we updated the citations to refer to the most recent edition.

- *Electronic submission*—We updated the question and answer in section V.A about electronic submission of NDI notifications. The updated answer states that we are accepting NDI notifications electronically and provides the Internet address for the electronic submission gateway. As before, the answer notes that firms still have the option to submit paper notifications to FDA using the procedure described in 21 CFR 190.6.

- *PDF form for NDI notifications submitted on paper*—Because our electronic submission gateway for NDI notifications is now available, we have decided not to provide a competing form for paper notifications. Therefore, we have removed "Appendix B: 75-Day Pre-Market New Dietary Ingredient Notification Form" from the draft guidance.

- *Safety information to include in an NDI notification*—We revised several questions and answers in sections VI.B and VI.C to clarify our thinking on compiling and evaluating scientific evidence about the safety of NDIs and dietary supplements that contain NDIs. In section VI.B, we clarified our thinking on the use of foreign history of use data. We also added a recommendation to consult "Principles and Methods for the Risk Assessment of Chemicals in Food," a joint publication of the World Health Organization and the Food and Agriculture Organization of the United Nations, as a useful source of information on conducting human clinical studies for NDIs and dietary supplements. In response to comments, we removed all references to FDA's "Redbook" guidance, which contains recommendations on toxicity studies and other scientific evidence needed to determine the safety of food additives. We also revised section VI.B to explain that the NDI safety standard is different from the standards for other FDA-regulated products and clarify that evidence for an NDI safety evaluation should be compiled to meet that standard. Although the revised draft

guidance no longer cites the Redbook, we continue to recommend the use of the dietary exposure assessment methodology and some toxicology tests that are also used for the evaluation of food additives because these are standard scientific methods not specific to any particular safety assessment paradigm. Finally, we added a new question at the end of section VI.C to emphasize that this draft guidance contains recommendations about safety information to include in an NDI notification, but these recommendations are not requirements.

- *Other changes*—We made clarifying changes, explanatory changes, and editorial changes throughout the document. We also updated references and links and added new references where appropriate.

II. Paperwork Reduction Act of 1995

Under the Paperwork Reduction Act of 1995 (the PRA) (44 U.S.C. 3501–3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. This draft guidance contains proposed collections of information. “Collection of information” is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes Agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires Federal Agencies to publish a 60-day notice in the **Federal Register** soliciting public comment on each proposed collection of information before submitting the collection to OMB for approval. To comply with this requirement, we intend to publish a 60-day notice on the proposed collections of information in this draft guidance in a future issue of the **Federal Register**.

This draft guidance also refers to previously approved collections of information found in FDA regulations. These collections of information are subject to review by OMB under the PRA. The collections of information in 21 CFR part 111 have been approved under OMB control number 0901–0606, and the collections of information in § 190.6 have been approved under OMB control number 0910–0330.

III. Other Issues for Consideration

Although FDA welcomes comments on any aspect of this draft guidance, we particularly invite comment on the following:

- What processes alter the identity of an ingredient marketed prior to October 15, 1994, and thus create an NDI? We

are especially interested in recommendations for clearer examples or criteria to differentiate changes in manufacturing methods and starting materials that alter the identity of the ingredient from changes that do not.

- What processes “chemically alter” an ingredient within the meaning of section 413(a)(1) of the FD&C Act, and why? Conversely, what processes do not cause chemical alteration, and why? Are there certain processes, such as tinctures, that sometimes result in chemical alteration and sometimes do not? What criteria should be used to evaluate whether an ingredient has been chemically altered? We are especially interested in receiving scientific information that shows whether a particular process actually results in chemical alteration.

- What method of compiling independent and verifiable data on the marketing of dietary ingredients before October 15, 1994, would be most effective? How should an authoritative list of “grandfathered” ingredients based on such data be developed and implemented?

As FDA considers the development of final guidance, we will review comments received on this revised version, as well as comments on the 2011 draft guidance that are still relevant.

IV. Electronic Access

Persons with access to the Internet may obtain the guidance at either <http://www.fda.gov/FoodGuidances> or <http://www.regulations.gov>. Use the FDA Web site listed in the previous sentence to find the most current version of the draft guidance.

V. References

The following references are on display in the Division of Dockets Management (see **ADDRESSES**) and are available for viewing by interested persons between 9 a.m. and 4 p.m., Monday through Friday; they are also available electronically at <http://www.regulations.gov>. FDA has verified the Web site addresses, as of the date this document publishes in the **Federal Register**, but Web sites are subject to change over time.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Agency Information Collection Activities: Submission to OMB for Review and Approval; Public Comment Request; Health Center Program Application Forms

AGENCY: Health Resources and Services Administration, HHS.

ACTION: Notice.

SUMMARY: In compliance with Section 3507(a)(1)(D) of the Paperwork Reduction Act of 1995, the Health Resources and Services Administration (HRSA) has submitted an Information Collection Request (ICR) to the Office of Management and Budget (OMB) for review and approval. Comments submitted during the first public review of this ICR will be provided to OMB. OMB will accept further comments from the public during the review and approval period.

DATES: Comments on this ICR should be received no later than September 12, 2016.

ADDRESSES: Submit your comments, including the ICR Title, to the desk officer for HRSA, either by email to OIRA_submission@omb.eop.gov or by fax to 202–395–5806.

FOR FURTHER INFORMATION CONTACT: To request a copy of the clearance requests submitted to OMB for review, email the HRSA Information Collection Clearance Officer at paperwork@hrsa.gov or call (301) 443–1984.

SUPPLEMENTARY INFORMATION:

Information Collection Request Title: Health Center Program Application Forms OMB No. 0915–0285—Revision.

Abstract: Health centers (those entities funded under Public Health Service Act section 330 and Health Center Program look-alikes) deliver comprehensive, high quality, cost-effective primary health care to patients regardless of their ability to pay. Health centers are an essential primary care provider for America’s most vulnerable populations. Health centers provide

coordinated, comprehensive, and patient-centered primary and preventive health care. Nearly 1,400 health centers operate more than 9,800 service delivery sites that provide care in every state, the District of Columbia, Puerto Rico, the U.S. Virgin Islands, and the Pacific Basin.

The Health Center Program is administered by HRSA's Bureau of Primary Health Care (BPHC). BPHC uses multiple Health Center Program-specific forms (see table below) to oversee the Health Center Program.

Need and Proposed Use of the Information: Health Center Program-specific forms are critical to Health Center Program grant and non-grant award processes and for Health Center Program oversight. The purpose of these forms is to provide HRSA staff and objective review committee panels information essential for application evaluation, funding recommendation, approval, designation, and monitoring. These forms also provide HRSA staff with information essential for ensuring compliance with Health Center Program legislative and regulatory requirements. These application forms are used by existing health centers and other organizations to apply for various grant and non-grant opportunities, renew their grant or non-grant designation, and change their scope of project.

Most of the Health Center Program-specific forms do not require any significant changes with this revision. HRSA intends to revise some of the forms to streamline and clarify data already being requested (Form 1A, 1B, 2, 3, 5A, 5B, 6A, 8, Performance Measures, Project Work Plan, Outreach and Enrollment Progress Report) and change several form names (changing Form 3A to Look-Alike Budget Information, Form 10 to Emergency Preparedness Report, and Increased Demand for Services to Expanded Services). HRSA also intends to add seven new forms. The Supplemental Information form and Summary Page will consolidate important application information that is usually found distributed throughout the application, including eligibility criteria and projected goals. These forms will require applicant confirmation that the information provided is accurate. Two of these new forms will include the Program Narrative Update, used to report progress for renewal of Health Center Program awards, and the Substance Abuse Progress Report, used to report quarterly progress for award recipients of Substance Abuse Expansion supplemental funding. Two other forms, the Health Center Controlled Networks Work Plan and

Progress Report, are forms that have been used in the past (under another OMB control number) to collect application baseline data and progress metrics for grantees. An additional new form, Zika Progress Report, will collect quarterly progress on Zika-related projects.

Likely Respondents: Health Center Program award recipients and look-alikes, state and national technical assistance organizations, and other organizations seeking funding.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose or provide the information requested. This includes the time needed to review instructions; to develop, acquire, install and utilize technology and systems for the purpose of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information. The total annual burden hours estimated for this ICR are summarized in the table below.

TOTAL ESTIMATED ANNUALIZED BURDEN—HOURS

Form name	Number of respondents	Number of responses per respondent	Total responses	Average burden per response (in hours)	Total burden hours
Form 1A: General Information Worksheet	1,700	1	1,700	1.0	1,700
Form 1B: BPHC Funding Request Summary	450	1	450	0.75	337.5
Form 1C: Documents on File	1,000	1	1,000	0.5	500
Form 2: Staffing Profile	1,700	1	1,700	1.0	1,700
Form 3: Income Analysis	1,900	1	1,900	2.5	4,750
Form 3A: Look-Alike Budget Information	100	1	100	1.0	100
Form 4: Community Characteristics	1,000	1	1,000	1.0	1,000
Form 5A: Services Provided	1,700	1	1,700	1.0	1,700
Form 5B: Service Sites	1,200	1	1,200	0.75	900
Form 5C: Other Activities/Locations	1,000	1	1,000	0.5	500
Form 6A: Current Board Member Characteristics	1,000	1	1,000	0.5	500
Form 6B: Request for Waiver of Governance Requirements	100	1	100	1.0	100
Form 8: Health Center Agreements	600	1	600	0.75	450
Form 9: Need for Assistance Worksheet	500	1	500	4.5	2,250
Form 10: Emergency Preparedness Report	1,000	1	1,000	1.0	1,000
Form 12: Organization Contacts	1,000	1	1,000	0.5	500
Clinical Performance Measures	1,000	1	1,000	3.5	3,500
Financial Performance Measures	1,000	1	1,000	1.0	1,000
Implementation Plan	900	1	900	3.0	2,700
Project Work Plan	200	1	200	5.0	1,000
Proposal Cover Page	400	1	400	1.0	400
Project Cover Page	400	1	400	1.0	400
Equipment List	400	1	400	1.0	400
Other Requirements for Sites	400	1	400	0.5	200
Funding Sources	400	1	400	0.5	200
Project Qualification Criteria	400	1	400	1.0	400
O&E Supplemental	1,200	1	1,200	1.0	1,200
O&E Progress Report	1,200	1	1,200	1.0	1,200
Checklist for Adding a New Service Delivery Site	700	1	700	1.5	1,050
Checklist for Deleting Existing Service Delivery Site	700	1	700	1.0	700

TOTAL ESTIMATED ANNUALIZED BURDEN—HOURS—Continued

Form name	Number of respondents	Number of responses per respondent	Total responses	Average burden per response (in hours)	Total burden hours
Checklist for Adding New Service	700	1	700	1.0	700
Checklist for Deleting Existing Service	700	1	700	1.0	700
Checklist for Adding a New Target Population	50	1	50	0.5	25
Expanded Services	1,400	1	1,400	1.0	1,400
Federal Object Class Categories	1,400	1	1,400	0.25	350

DEPARTMENT OF HEALTH AND HUMAN SERVICES**National Institutes of Health****National Institute of Biomedical Imaging and Bioengineering; Notice of Closed Meetings**

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. App.), notice is hereby given of the following meetings.

The meetings will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Institute of Biomedical Imaging and Bioengineering Special Emphasis Panel; Rapid Assessment of Zika Virus Complications (2017/01).

Date: September 12, 2016.

Time: 10:00 a.m. to 4:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, Two Democracy Plaza, Suite 920, 6707 Democracy Boulevard, Bethesda, MD 20892, (Telephone Conference Call).

Contact Person: Dennis Hlasta, Ph.D., Scientific Review Officer, National Institute of Biomedical Imaging and Bioengineering, National Institutes of Health, 6707 Democracy Blvd., Bethesda, MD 20892, (301) 451-4794, dennis.hlasta@nih.gov.

Name of Committee: National Institute of Biomedical Imaging and Bioengineering Special Emphasis Panel; 2017-01 R25 Application Review.

Date: September 28, 2016.

Time: 10:00 a.m. to 4:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, Two Democracy Plaza, Suite 920, 6707 Democracy Boulevard, Bethesda, MD 20892, (Virtual Meeting).

Contact Person: Ruixia Zhou, Ph.D., Scientific Review Officer, 6707 Democracy Boulevard, Democracy Two Building, Suite 957, Bethesda, MD 20892, (301) 496-473, zhour@mail.nih.gov.

Dated: August 8, 2016.

DEPARTMENT OF HEALTH AND HUMAN SERVICES**National Institutes of Health****National Institute of Arthritis and Musculoskeletal and Skin Diseases; Notice of Meeting**

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. App.), notice is hereby given of a meeting of the National Arthritis and Musculoskeletal and Skin Diseases Advisory Council.

The meeting will be open to the public as indicated below, with attendance limited to space available. Individuals who plan to attend and need special assistance, such as sign language interpretation or other reasonable accommodations, should notify the Contact Person listed below in advance of the meeting.

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Arthritis and Musculoskeletal and Skin Diseases Advisory Council.

Date: September 13, 2016.

Open: 8:30 a.m. to 12:00 p.m.

Agenda: Discussion of program policies.

Place: National Institutes of Health, Building 31, 31 Center Drive, 6th Floor, C Wing, Conference Room 6, Bethesda, MD 20892.

Closed: 1:00 p.m. to 4:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, Building 31, 31 Center Drive, 6th Floor, C Wing, Conference Room 6, Bethesda, MD 20892.

Contact Person: Laura K. Moen, Ph.D., Director, Division of Extramural Research Activities, NIAMS/NIH, 6700 Democracy Boulevard, Suite 800, Bethesda, MD 20892, 301-451-6515, moen@mail.nih.gov.

Any interested person may file written comments with the committee by forwarding the statement to the Contact Person listed on this notice. The statement should include the name, address, telephone number and when applicable, the business or professional affiliation of the interested person.

In the interest of security, NIH has instituted stringent procedures for entrance onto the NIH campus. All visitor vehicles, including taxicabs, hotel, and airport shuttles will be inspected before being allowed on campus. Visitors will be asked to show one form of identification (for example, a government-issued photo ID, driver's license,

or passport) and to state the purpose of their visit.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental Health Services Administration

[Docket No. SAMHSA–2016–0002]

Request for Comment on Report Entitled: Advancing the Care of Pregnant and Parenting Women With Opioid Use Disorder and Their Infants: A Foundation for Clinical Guidance

AGENCY: Substance Abuse and Mental Health Services Administration (SAMHSA), Department of Health and Human Services (HHS).

ACTION: Request for comment.

SUMMARY: Substance Abuse and Mental Health Services Administration (SAMHSA), Center for Substance Abuse Treatment, in the Department of Health and Human Services (HHS) announces the opening of a docket to obtain public comment on a report entitled: Advancing the Care of Pregnant and Parenting Women with Opioid Use Disorder and their Infants: A Foundation for Clinical Guidance. The report is available at: <http://www.regulations.gov/docket?D=SAMHSA-2016-0002>.

This report describes the formal process agreed on and followed under

the guidance of the federal steering committee (FSC). It explains the RAND Corporation (RAND)/University of California Los Angeles (UCLA) Appropriateness Method (RAM), justifies its adoption, and reports the outcomes of its application that will form the basis for the development of clinical guidance. This report will serve as the foundation for the development of clinical guidance to be used by providers caring for women with opioid use disorder and their infants.

DATES: Comment Close Date: To be assured consideration, comments must be received at one of the addresses provided below, no later than 5 p.m. no later than 30 days after date of publication in the **Federal Register**.

ADDRESSES: You may submit comments identified by Docket No. [SAMHSA–2016–0002] by any of the following methods:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the instructions for submitting comments.

- *Electronically:* You may submit electronic comments to samhsa.ppd@samhsa.hhs.gov.

- *By regular mail:* You may mail written comments to the following address ONLY: Substance Abuse and Mental Health Services Administration, Center for Substance Abuse Treatment, Division of Pharmacologic Therapies, 5600 Fishers Lane, 13E24, Rockville, MD 20852 Attn: Docket No. [SAMHSA–2016–0002]. Please allow sufficient time for mailed comments to be received before the close of the comment period.

- *By express or overnight mail:* You may send written comments to the following address ONLY: Substance Abuse and Mental Health Services Administration, Attention: DPT **Federal Register** Representative, Division of Pharmacologic Therapies, 5600 Fishers Lane, 13E24, Rockville, MD 20852 Attn: Docket No. [SAMHSA–2016–0002].

- *By hand or courier:* Alternatively, you may deliver (by hand or courier) your written comments ONLY to the following address prior to the close of the comment period: For delivery in Rockville, MD: Substance Abuse and Mental Health Services Administration, Attention: DPT **Federal Register** Representative, Division of Pharmacologic Therapies, 5600 Fishers Lane, 13E24, Rockville, MD 20852. To deliver your comments to the Rockville address, call telephone number (240) 276–2700 in advance to schedule your delivery with one of our staff members.

Instructions: To avoid duplication, please submit only one copy of your comments by only one method. All submissions received must include the

agency name and Docket Number. All relevant comments received will be posted without change to <http://www.regulations.gov>, including any personal information provided. For access to the report or comments received, go to <http://www.regulations.gov>.

FOR FURTHER INFORMATION CONTACT:

Melinda Campopiano, MD, Medical Officer, Substance Abuse and Mental Health Services Administration, Center for Substance Abuse Treatment, Division of Pharmacologic Therapies, 5600 Fishers Lane, 13E24, Rockville, MD 20852, Email: samhsa.ppd@samhsa.hhs.gov.

SUPPLEMENTARY INFORMATION: Inspection of Public Comments:

All comments received before the close of the comment period are available for viewing by the public, including any personally identifiable or confidential business information that is included in a comment. Comments received by the deadline will be available for public inspection at the Substance Abuse and Mental Health Services Administration, Division of Pharmacologic Therapies, 5600 Fishers Lane, 13E24, Rockville, MD 20852, Monday through Friday of each week from 8:30 a.m. to 4:00 p.m. To schedule an appointment to view public comments, phone (240) 276–2700.

Background: SAMHSA led a federal steering committee in overseeing the application of the RAND/UCLA Appropriateness Method (RAM) to the available evidence concerning the optimal management of opioid use disorder for women who are pregnant or parenting and the management of their infants. After completion of the literature review, generation of the indications, and the expert panel RAM rating process—all described in this report—this report was generated for the purpose of producing a clinical guide that will be written to facilitate optimal management of pregnant and parenting women with opioid use disorder and their infants across disciplines and treatment settings. The guide will have a dual purpose: first, to serve as a tool that will increase provider willingness and confidence to manage pregnant and parenting women with opioid use disorder and their infants; and second to help assure the care provided this population optimizes the outcomes for both mother and infant.

The purpose of this effort is to produce a patient-centered guide to be used in a range of clinical settings. SAMHSA plans to organize the results described in this report around clinical scenarios and interventions consistent

with the range of ways that women with opioid use disorder may access substance use treatment or maternity care. The guide will provide options for clinical interventions that recognize the complexities of patients' lives. The guide will also include discussion of any conflicting evidence and clinician, treatment or patient characteristics that directly influence the appropriateness or effectiveness of a given clinical intervention. The paucity of the evidence to support specific interventions will be addressed in the guide. As such, the guide will present options based on current clinical practice, paired with the risks and benefits of each option as currently understood.

Public comment is sought in two general areas: The outcomes of the RAM process and the strategy to translate these findings into a clinical guide. Relevant public comment will inform the development and final appearance of the guide. Members of the expert panel, FSC, and a variety of professional societies will be asked to provide input into the guide outline and drafting of the guide which will then be subject to a formal federal clearance process including scientific review.

Supporting and Related Material in the Docket: The report contains the materials to help inform public comment. The appendices include listings of participants, more detailed information about the literature search, citations of primary references and data tables that were used by SAMHSA to develop the findings in the report. The information provided includes:

- (1) The REPORT
- (2) Supporting appendices: Appendix A: RAM Process Participants; Appendix B: Literature Review Methods; Appendix C: RAM Reference List and Appendices D–E7: Rated Indications

Charles LoDico,
Chemist, SAMHSA/CSAP.

BILLING CODE 4162–20–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental Health Services Administration

Agency Information Collection Activities: Proposed Collection; Comment Request

In compliance with Section 3506(c)(2)(A) of the Paperwork

Reduction Act of 1995 concerning opportunity for public comment on proposed collections of information, the Substance Abuse and Mental Health Services Administration (SAMHSA) will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the information collection plans, call the SAMHSA Reports Clearance Officer at 240–276–1243.

Comments are invited on: (a) Whether the proposed collections of information are necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Proposed Project: SAMHSA Disaster Technical Assistance Center Disaster Behavioral Health Needs Assessment and Customer Satisfaction Surveys (OMB No. 0930–0325)—Revision

The Substance Abuse and Mental Health Services Administration (SAMHSA) is requesting approval for a revision to the data collection associated with the SAMHSA Disaster Technical Assistance Center (DTAC) Disaster Behavioral Health Needs Assessment and Customer Satisfaction Surveys (OMB No. 0930–0325), which expire on May 31, 2017. Specifically, SAMHSA DTAC plans to consolidate the Needs Assessment Survey and Customer Satisfaction Surveys into a single instrument. The new revised instrument, entitled SAMHSA DTAC Customer Feedback Survey (CFS), under this effort will also include a change in administration to make it appropriate for a single, streamlined survey.

The proposed data collection effort will provide feedback on the overall effectiveness of SAMHSA DTAC's services, ongoing needs at the national level, and areas that require enhanced technical assistance (TA) services.

SAMHSA DTAC will be responsible for administering the data collection instrument and analyzing the data. SAMHSA DTAC will use data from the instrument to inform current and future TA activities and to ensure these

activities continue to align with state and local needs.

A three-year clearance is being requested. The SAMHSA DTAC CFS is designed to allow the agency to collect feedback on the overall effectiveness of the services provided by SAMHSA DTAC, as well as ongoing data regarding disaster behavioral health (mental health and substance use-related) needs at the national level and areas that require enhanced training and technical assistance (TA) services. This is the information that was previously collected as part of the SAMHSA DTAC Needs Assessment Survey (NAS) and Customer Satisfaction Survey (CSS). Data from this effort will continue to be used to improve services to jurisdictions, which will lead to (1) better integration of disaster behavioral health (DBH) needs with all-hazards disaster preparedness and response, and (2) improved outcomes at the state, territory, tribal, and local levels with less burden on participants. The new Customer Feedback Survey integrates and consolidates questions from the previously utilized NAS and CSS, which will reduce burden associated with the number of instruments and survey questions. SAMHSA DTAC will continue to be responsible for survey administration and analysis of the data collected, which SAMHSA will use to inform current and future training and TA activities. Table 1 shows the estimated burden associated with CFS data collection activities and the associated costs. It is anticipated that the survey will be administered once each year.

Participation in the Customer Feedback Survey will be solicited from all 50 states, the U.S. territories, and the District of Columbia. The survey will be administered to individuals who have requested TA within the six months prior to administration and those who are subscribed to DTAC's e-communications, *SAMHSA DTAC Bulletin*, or *The Dialogue*, at the time of administration. Internet-based technology will be used to collect data via web-based survey for data entry and management.

TABLE 1—ANNUALIZED ESTIMATE OF RESPONDENT BURDEN

Type of respondent	Instrument	Number of respondents	Number of responses	Total number of responses	Hours per response	Total burden hours
TA requestor, e-communications recipient, colleague of previous requestor.	DTAC Customer Feedback Survey.	200	1	200	0.5	100

Send comments to Summer King, SAMHSA Reports Clearance Officer, 5600 Fishers Lane, 15E57-B, Rockville, MD 20857 OR email a copy to summer.king@samhsa.hhs.gov. Written comments should be received by October 11, 2016.

Summer King,
Statistician.

BILLING CODE 4162-20-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental Health Services Administration

Agency Information Collection Activities: Submission for OMB Review; Comment Request

Periodically, the Substance Abuse and Mental Health Services Administration (SAMHSA) will publish a summary of information collection requests under OMB review, in compliance with the Paperwork Reduction Act (44 U.S.C. chapter 35). To request a copy of these documents, call the SAMHSA Reports Clearance Officer on (240) 276-1243.

Project: Interviews With Grantees Integrating Behavioral Health Treatment, Prevention, and HIV Medical Care Services (OMB NO. 0930-0336)—Reinstatement

SAMHSA is requesting Office of Management and Budget (OMB) approval to conduct in-person Site Visit Interviews with Minority AIDS Initiative—Continuum of Care (MAI-CoC) Grantees Integrating Behavioral Health Treatment, Prevention, and HIV

Medical Care Services. This reinstatement request utilizes revised versions of the site visit interview guide approved under the Minority AIDS Initiative—Targeted Capacity Expansion (MAI-TCE) Grantees Integrating HIV Primary Care, Substance Abuse, and Behavioral Health Services (OMB NO. 0930-0336). The two rounds of interviews (baseline and follow-up) target the collection of programmatic-level data (e.g., community context, organizational structure, and staffing and staff development, services and service model, outreach, referral and enrollment into services, services/care coordination and integration and funding for integrated services and program successes and challenges) through one-on-one and group interviews with grantees who are part of the MAI-CoC program.

The goal of the MAI-CoC project is to integrate behavioral health treatment, prevention, and HIV and Hepatitis medical care services for racial/ethnic minority populations at high risk for behavioral health disorders who are also at high risk for or living with HIV and Hepatitis. The program also supports other priority populations including men who have sex with men (MSM) and bisexual men, transgender persons, and people with substance use disorder. The program is primarily intended for substance use disorder treatment and community mental health providers to provide coordinated and integrated services through the collocation and/or integration of behavioral health treatment and HIV and Hepatitis medical care. Interviews conducted with MAI-CoC grantees during the two rounds of site visits are an integral part of evaluation efforts to: (1) Assess the

impact of the SAMHSA-funded HIV and Hepatitis programs in: Reducing behavioral health disorders and HIV and Hepatitis infections; increasing access to substance use disorder and mental disorder treatment and care; improving behavioral and mental health outcomes; and reducing HIV and Hepatitis-related disparities; (2) Describe the different integrated behavioral health and medical program models; and (3) Determine which program types or models are most effective in improving behavioral health and clinical outcomes.

Over the four-year project, SAMHSA will conduct two rounds of these in-person site visits (baseline and follow-up) with each of the 34 MAI-CoC program grantees.

SAMHSA will conduct one-on-one and group interviews with MAI-CoC grantee staff who will provide information on their program's integration of HIV and Hepatitis prevention, medical care, and primary care into behavioral health services. While participating in the evaluation is a condition of the grantees' funding, participating in the interview process is voluntary. The instruments are designed to collect information about: (1) The development and changes in MAI-CoC program operations, staffing, training and programming; (2) the grantee organization, the MAI-CoC program and its structure, the community context surrounding program efforts, and changes that result from MAI-CoC activities; and, (3) the changes in the number or nature of partnerships and collaborations both internal and external to the MAI-CoC program grantee.

Below is the table of the estimated total burden hours:

Data collection tool	Number of respondents	Number of responses per respondent	Total number responses	Hour per response	Total burden hours
Initial Site Visit Interview Guide	306	1	306	2	612
Follow-up Site Visit Interview Guide	306	1	306	1	306
Total	306	612	918

Written comments and recommendations concerning the proposed information collection should

be sent by September 12, 2016 to the SAMHSA Desk Officer at the Office of Information and Regulatory Affairs,

Office of Management and Budget (OMB). To ensure timely receipt of comments, and to avoid potential delays

in OMB's receipt and processing of mail sent through the U.S. Postal Service, commenters are encouraged to submit their comments to OMB via email to: OIRA_Submission@omb.eop.gov. Although commenters are encouraged to send their comments via email, commenters may also fax their comments to: 202-395-7285. Commenters may also mail them to: Office of Management and Budget, Office of Information and Regulatory Affairs, New Executive Office Building, Room 10102, Washington, DC 20503.

Summer King,
Statistician.

BILLING CODE 4162-20-P

DEPARTMENT OF HOMELAND SECURITY

U.S. Customs and Border Protection

Quarterly IRS Interest Rates Used In Calculating Interest on Overdue Accounts and Refunds on Customs Duties

AGENCY: U.S. Customs and Border Protection, Department of Homeland Security.

ACTION: General notice.

SUMMARY: This notice advises the public that the quarterly Internal Revenue Service interest rates used to calculate

interest on overdue accounts (underpayments) and refunds (overpayments) of customs duties will remain the same from the previous quarter. For the calendar quarter beginning July 1, 2016, the interest rates for overpayments will be 3 percent for corporations and 4 percent for non-corporations, and the interest rate for underpayments will be 4 percent for both corporations and non-corporations. This notice is published for the convenience of the importing public and U.S. Customs and Border Protection personnel.

DATES: *Effective Date:* July 1, 2016.

FOR FURTHER INFORMATION CONTACT: Kara N. Welty, Revenue Division, Collection and Refunds Branch, 6650 Telecom Drive, Suite #100, Indianapolis, Indiana 46278; telephone (317) 614-4614.

SUPPLEMENTARY INFORMATION:

Background

Pursuant to 19 U.S.C. 1505 and Treasury Decision 85-93, published in the **Federal Register** on May 29, 1985 (50 FR 21832), the interest rate paid on applicable overpayments or underpayments of customs duties must be in accordance with the Internal Revenue Code rate established under 26 U.S.C. 6621 and 6622. Section 6621 provides different interest rates applicable to overpayments: One for corporations and one for non-corporations.

The interest rates are based on the Federal short-term rate and determined by the Internal Revenue Service (IRS) on behalf of the Secretary of the Treasury on a quarterly basis. The rates effective for a quarter are determined during the first-month period of the previous quarter.

In Revenue Ruling 2016-12, the IRS determined the rates of interest for the calendar quarter beginning July 1, 2016, and ending on September 30, 2016. The interest rate paid to the Treasury for underpayments will be the Federal short-term rate (1%) plus three percentage points (3%) for a total of four percent (4%) for both corporations and non-corporations. For corporate overpayments, the rate is the Federal short-term rate (1%) plus two percentage points (2%) for a total of three percent (3%). For overpayments made by non-corporations, the rate is the Federal short-term rate (1%) plus three percentage points (3%) for a total of four percent (4%). These interest rates are subject to change for the calendar quarter beginning October 1, 2016, and ending December 31, 2016.

For the convenience of the importing public and U.S. Customs and Border Protection personnel the following list of IRS interest rates used, covering the period from before July of 1974 to date, to calculate interest on overdue accounts and refunds of customs duties, is published in summary format.

Beginning date	Ending date	Under-payments (percent)	Over-payments (percent)	Corporate overpayments (Eff. 1-1-99) (percent)

DEPARTMENT OF HOMELAND SECURITY

U.S. Customs and Border Protection

National Customs Automation Program (NCAP) Test Concerning Electronic Filing of Protests in the Automated Commercial Environment (ACE)

AGENCY: U.S. Customs and Border Protection, Department of Homeland Security.

ACTION: General notice.

SUMMARY: This document announces U.S. Customs and Border Protection’s (CBP’s) plan to conduct a National Customs Automation Program (NCAP) test to assess new functionalities related to the electronic filing and processing of protests and new notification procedures for protests filed electronically in the Automated Commercial Environment (ACE). During the test, participants will be able to submit additional arguments and supporting information electronically, with their electronic protest in ACE. In

addition, participants will be able to submit requests for further review, requests for accelerated disposition, requests to set aside denial of further review, and requests to void denial of a protest electronically in ACE. This notice also announces the testing of electronic protest status notifications from CBP. The test will be known as the ACE Protest Test.

DATES: The ACE Protest Test will commence on August 29, 2016, and will continue until concluded by a notice published in the **Federal Register**. Comments concerning this notice and any aspect of the test may be submitted at any time during the test to the address set forth below.

ADDRESSES: Comments concerning this notice and any aspect of the ACE Protest Test may be submitted at any time during the testing period via email to Josephine Baiamonte, ACE Business Office (ABO), Office of Trade at josephine.baiamonte@cbp.dhs.gov. In the subject line of your email, please indicate, “Comment on ACE Protest Test FRN.”

FOR FURTHER INFORMATION CONTACT: For technical questions related to the application or requests for an ACE Portal Account, including ACE Protest Filer Accounts, contact the ACE Account Service Desk by calling 1–866–530–4172, selecting option 1, then

option 2, or by emailing ACE.Support@cbp.dhs.gov for assistance.

SUPPLEMENTARY INFORMATION:

I. The National Customs Automation Program

The National Customs Automation Program (NCAP) was established by Subtitle B of Title VI—Customs Modernization in the North American Free Trade Agreement Implementation Act (Customs Modernization Act) (Pub. L. 103–182, 107 Stat. 2057, 2170, December 8, 1993) (19 U.S.C. 1411). Through NCAP, the thrust of customs modernization was on trade compliance and the development of the Automated Commercial Environment (ACE), the planned successor to the Automated Commercial System (ACS). ACE is an automated and electronic system for commercial trade processing which is intended to streamline business processes, facilitate growth in trade, ensure cargo security, and foster participation in global commerce, while ensuring compliance with U.S. laws and regulations and reducing costs for U.S. Customs and Border Protection (CBP) and all of its communities of interest. The ability to meet these objectives depends on successfully modernizing CBP’s business functions and the information technology that supports those functions. CBP’s modernization efforts are accomplished through phased

releases of ACE component functionality designed to replace specific legacy ACS functions and add new functionality.

Sections 514 and 515 of the Tariff Act of 1930, as amended (19 U.S.C. 1514 and 1515), provide procedures for protesting certain decisions made by CBP. Section 645 of the Customs Modernization Act amended section 514(c)(1) of the Tariff Act of 1930 (19 U.S.C. 1514(c)(1)) to permit the transmission of such protests to CBP electronically. The CBP regulations governing protests are found in part 174 of Title 19 of the Code of Federal Regulations (19 CFR part 174).

II. Authorization for the ACE Protest Test

The Customs Modernization Act authorizes the Commissioner of CBP to conduct limited test programs or procedures designed to evaluate planned components of the NCAP. The ACE Protest Test is authorized pursuant to 19 CFR 101.9(b) which provides for the testing of NCAP programs or procedures. See Treasury Decision (T.D.) 95–21.

III. Electronic Protest Program

A. ACS Protest Filing

The electronic filing and status of protests is a planned component of the NCAP, authorized by section 411 of the Tariff Act of 1930, as amended by section 631 of the Customs Modernization Act. See 19 U.S.C. 1411(a)(2)(A). The U.S. Customs Service, the legacy agency of CBP, previously tested and deployed electronic protest filing using the Automated Broker Interface (ABI) to transmit a protest to ACS. See, e.g., 65 FR 39224 (June 23, 2000).

On January 14, 2011, CBP published a Final Rule in the **Federal Register** (76 FR 2573) making technical corrections to the protest regulations in 19 CFR part 174 and related provisions in Title 19 of the CFR. The rule amended section 174.12(b) to conform to section 514(c)(1) of the Tariff Act of 1930, as modified by the Customs Modernization Act, allowing a protest to be transmitted electronically to the electronic data interchange system authorized by CBP for that purpose.

B. ACE Protest

CBP has developed the ACE Protest Module to replace electronic protest filing in ACS. The ACE Protest Module is an internet-based processing module, which allows any person with a Protest Filer Account in the ACE Portal to file a protest and supporting documentation

electronically, monitor the status of the filer's electronic protest, and receive CBP notifications and messages regarding the protest. CBP has modified the ACE Portal Account Test to establish the Protest Filer Account. See 81 FR 52453 (August 8, 2016). Parties wishing to file an electronic protest will need to establish and maintain an ACE Portal Account, as specified in that notice.

In addition, on July 28, 2016, CBP published a notice in the **Federal Register** announcing that the ACE Protest Module will be the sole electronic method authorized by the Commissioner of CBP for filing electronic protests. See 81 FR 49685 (July 28, 2016). That notice also announced that CBP will no longer accept protests filed through ABI to ACS. Upon the effective date of that notice, ACE will replace ACS as the authorized electronic data interchange system for filing protests electronically. Pursuant to 19 CFR 174.12(b), protest filers are authorized to transmit their protest electronically to ACE.

IV. Test Participation Criteria

CBP is conducting a test of the ACE Protest Module, to assess new functionalities related to the electronic filing and processing of protests and new notification procedures for protests filed electronically in ACE. Any party who wishes to participate in this test may do so as long as it has a Protest Filer Account. Participation in this test is not confidential information and CBP may disclose the name(s) of participants. When a participant in the ACE Protest Test files a protest in ACE, the entire protest process will be fully automated and must be completed in ACE, with the exception of a request for accelerated disposition, which must be sent by registered or certified mail as required under 19 U.S.C. 1515(b). Once a test participant files a protest as part of this test, the protest filer agrees to the test procedures below for all subsequent actions regarding the protest. For test participants, CBP will waive certain regulations pertaining to protest filing, as described below. Except where otherwise specified by this notice, the CBP regulations concerning the filing of a protest remain the same.

A. Power of Attorney and Certification

The regulations governing the ability to file a protest on behalf of another person are codified at 19 CFR 174.3. For participants in the ACE Protest Test, rather than submitting a power of attorney, the protest filer will be required to check a box affirming the following statement:

I certify that I am authorized to file this protest, that such authority has been granted by a duly and properly executed Power of Attorney where one is required, that all the information, statements and assertions herein are true and correct to the best of my knowledge and belief, and that this protest complies with all applicable regulations.

A protest filer will not be able to submit a protest electronically unless the box next to the certification statement is checked. The protest filer must maintain a copy of the power of attorney to provide to CBP upon request.

B. Identity of Filer

The CBP regulations require that a protest include the name of the person filing the protest, or his agent or attorney. See 19 CFR 174.12(c). Participants in the ACE Protest Test should identify the person filing the protest through the Protest Filer Account. Information identifying the filer of the protest, as required by section 174.12(c), will be collected at the time the protest filer establishes an account. In addition, the Protest Filer will be required to enter the capacity in which it is filing, by selecting a "filer type" (e.g., attorney, broker, importer/consignee, or surety).

C. Place of Filing

The CBP regulations require a protest to be filed with the port director whose decision is being protested. See 19 CFR 174.12(d). Delegation Order Number 14–004, effective on September 11, 2014, delegates concurrent trade authority to the port directors and the directors of the Centers of Excellence & Expertise (CEE). As a result, a protest may be submitted to either the port director or the director of the filer's assigned CEE. For participants in the ACE Protest Test, electronic protests will be filed in the ACE Protest Module instead. Protests filed electronically through the module will be routed to the CBP port, CEE, or other office responsible for the decision that is the subject of the protest.

D. Date of Filing

The CBP regulations state that the date of filing of a protest is the date on which the protest is received by the Customs officer with whom it is required to be filed. See 19 CFR 174.12(f). For electronic filings, the date of filing for claims or information (including a protest, protest amendment, request to set aside denial of further review, and request to void denial of a protest) will be the date on which the protest is received by the ACE Protest Module. The date of filing in the ACE Protest Module will be

determined based on midnight Eastern Standard Time (EST). This means that, to be considered timely, an electronic filing in the ACE Protest Module must be received by 11:59 p.m. (EST) on the final day of the filing period. The protest filer and any other designated parties will receive an electronic message confirming receipt of a protest filing in ACE.

E. Amendment of Protests

The Protest Filer may amend an electronic protest according to the requirements set forth in section 174.14. As required under 19 CFR 174.14(b), when a Protest Filer files a protest electronically, any amendment to such protest must be made electronically through the ACE Protest Module. As a result, for participants in the ACE Protest Test, the place of filing of an amendment to a protest filed in ACE will be the ACE Protest Module, rather than the port director with whom the protest was filed. *See* 19 CFR 174.14(e). The date of filing of an amendment to an ACE Protest will be the date on which the protest amendment is received by the ACE Protest Module. The date of filing in the ACE Protest Module will be determined by the time of receipt of the amendment in ACE based on midnight Eastern Standard Time. The Protest Filer and any other designated parties will receive an electronic message confirming receipt of an amendment made to an electronic protest.

F. Accelerated Disposition

Under 19 U.S.C. 1515(b), a request for accelerated disposition must be sent by registered or certified mail. If the Protest Filer intends to request accelerated disposition for a protest, the request must be sent by registered or certified mail to the port director or other CBP officer whose decision is protested. *See* 19 CFR 174.12(d) and 174.22(a). Test participants are also required to check a box in the ACE Protest Module indicating a request was properly mailed. When making a request for accelerated disposition the Protest Filer must check a box affirming that the Protest Filer has filed the request for accelerated disposition by registered or certified mail:

I certify that I have sent a request for Accelerated Disposition by Certified or Registered United States Mail, and I understand that by requesting accelerated disposition this protest will be deemed denied within 30 days of the request if it is not decided by CBP before the end of the 30 day period, and that any lawsuit filed in the United States Court of International Trade contesting the deemed denial of this protest

is barred unless commenced within 180 days of the date of the deemed denial.

The date of the request for accelerated disposition will be based on the date of the mailing. The Protest Filer may electronically withdraw a request for accelerated disposition of a protest filed through the ACE Protest Module any time prior to the 30 days after the date of the request or the CBP decision on the protest, whichever comes first.

G. Further Review

In lieu of filing an application for further review (AFR) on Customs Form 19, pursuant to 19 CFR 174.25, test participants may submit an AFR concurrently with the protest in the ACE Protest Module. When a protest is filed through the ACE Protest Module, the Protest Filer must use the module to submit the AFR. When a Protest Filer applies for further review, the filer must check a box to answer “yes” or “no” to the following questions:

Have you made prior request of a port director for a further review of the same claim with respect to the same or substantially similar merchandise?

Have you received a final adverse decision from the U.S. Court of International Trade on the same claim with respect to the same category of merchandise or do you have an action involving such a claim pending before the U.S. Court of International Trade?

Have you previously received an adverse administrative decision from the Commissioner of CBP or his designee or have you presently pending an application for an administrative decision on the same claim with respect to the same category of merchandise?

The ACE Protest Module will not accept a protest with an AFR unless the Protest Filer answers these three questions and provides a written justification. The written justification must be entered in the text box provided or uploaded separately.

H. Additional Arguments

A reviewing officer may consider alternative claims and additional grounds or arguments submitted by the protesting party. *See* 19 CFR 174.28. For purposes of the ACE Protest Test, participants may use the ACE Protest Module to submit alternative claims and additional grounds or arguments any time prior to the disposition of the protest. When a protest is filed through the ACE Protest Module, the Protest Filer must use the module to submit additional arguments unless such information is incapable of electronic submission, *e.g.*, samples of imported merchandise.

I. Submission of Additional Information and Protest Withdrawal

When a protest is filed through the ACE Protest Module, the Protest Filer must use the module to submit additional information requested by CBP unless such information is incapable of electronic submission, *e.g.*, samples of imported merchandise. Any request to withdraw a protest submitted through the ACE Protest Module must be submitted electronically through the module.

J. Request To Set Aside Denial of Further Review

A Protest Filer seeking to file a request to set aside CBP’s denial of further review under 19 U.S.C. 1515(c) must use the ACE Protest Module when the underlying protest was filed through the ACE Protest Module. A request will be considered filed with the appropriate CBP officer if it is filed in the ACE Protest Module within 60 days after the date of the protest denial. As noted above, the date of filing in the ACE Protest Module will be determined by the time of receipt of the request for setting aside of the denial of further review in ACE based on midnight Eastern Standard Time. If CBP fails to act on the request to set aside the denial of further review within 60 days from the time of filing, the request will be considered denied and the Protest Filer will receive a courtesy electronic notification.

K. Request To Void Denial of a Protest

A Protest Filer seeking to file a request to void the denial of a protest under 19 U.S.C. 1515(d) must use the ACE Protest Module when the underlying protest was filed through the ACE Protest Module. A request will be considered filed with the appropriate CBP office if it is filed in the ACE Protest Module within 90 days after the date of the protest denial. The date of filing of a request will be the date on which the request is received by the ACE Protest Module. As noted above, the date of filing in the ACE Protest Module will be determined by the time of receipt of the request in ACE based on midnight Eastern Standard Time.

L. Messaging

ACE will generate and send automated messages to notify the Protest Filer and any other designated parties of changes in the status of the protest and decisions made by CBP regarding the protest. These messages will advise the parties when CBP has received the: Protest; request for accelerated disposition; additional arguments; application for further review; protest

amendment; request to set aside denial of further review; request to withdraw a protest; or request to void the denial of a protest. In addition, rather than mailing a notice of denial of the protest pursuant to 19 CFR 174.30, for protests filed electronically, ACE will notify designated parties of actions taken by CBP electronically, including CBP's decision to suspend, grant, or deny a protest.

V. Comments

All interested parties are invited to comment on any aspect of this ACE Protest Test for the duration of the test. CBP requests comments and feedback on all aspects of this test in order to determine whether to modify, alter, expand, limit, continue, end, or fully implement this test.

VII. Development of ACE Prototypes

A chronological listing of **Federal Register** publications detailing ACE test developments is set forth below.

- ACE Portal Accounts and Subsequent Revision Notices: 67 FR 21800 (May 1, 2002); 69 FR 5360 and 69 FR 5362 (February 4, 2004); 69 FR 54302 (September 8, 2004); 70 FR 5199 (February 1, 2005).
- ACE System of Records Notice: 71 FR 3109 (January 19, 2006).
- Terms/Conditions for Access to the ACE Portal and Subsequent Revisions: 72 FR 27632 (May 16, 2007); 73 FR 38464 (July 7, 2008).
- ACE Non-Portal Accounts and Related Notice: 70 FR 61466 (October 24, 2005); 71 FR 15756 (March 29, 2006).
- ACE Entry Summary, Accounts and Revenue (ESAR I) Capabilities: 72 FR 59105 (October 18, 2007).

BILLING CODE 9111-14-P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR-5907-N-33]

Federal Property Suitable as Facilities To Assist the Homeless

AGENCY: Office of the Assistant Secretary for Community Planning and Development, HUD.

ACTION: Notice.

SUMMARY: This Notice identifies unutilized, underutilized, excess, and

surplus Federal property reviewed by HUD for suitability for use to assist the homeless.

FOR FURTHER INFORMATION CONTACT:

Juanita Perry, Department of Housing and Urban Development, 451 Seventh Street SW., Room 7266, Washington, DC 20410; telephone (202) 402-3970; TTY number for the hearing- and speech-impaired (202) 708-2565 (these telephone numbers are not toll-free), call the toll-free Title V information line at 800-927-7588 or send an email to title5@hud.gov.

SUPPLEMENTARY INFORMATION:

In accordance with 24 CFR part 581 and section 501 of the Stewart B. McKinney Homeless Assistance Act (42 U.S.C. 11411), as amended, HUD is publishing this Notice to identify Federal buildings and other real property that HUD has reviewed for suitability for use to assist the homeless. The properties were reviewed using information provided to HUD by Federal landholding agencies regarding unutilized and underutilized buildings and real property controlled by such agencies or by GSA regarding its inventory of excess or surplus Federal property. This Notice is also published in order to comply with the December 12, 1988 Court Order in *National Coalition for the Homeless v. Veterans Administration*, No. 88-2503-OG (D.D.C.).

Properties reviewed are listed in this Notice according to the following categories: Suitable/available, suitable/unavailable, and suitable/to be excess, and unsuitable. The properties listed in the three suitable categories have been reviewed by the landholding agencies, and each agency has transmitted to HUD: (1) Its intention to make the property available for use to assist the homeless, (2) its intention to declare the property excess to the agency's needs, or (3) a statement of the reasons that the property cannot be declared excess or made available for use as facilities to assist the homeless.

Properties listed as suitable/available will be available exclusively for homeless use for a period of 60 days from the date of this Notice. Where property is described as for "off-site use only" recipients of the property will be required to relocate the building to their own site at their own expense. Homeless assistance providers interested in any such property should send a written expression of interest to HHS, addressed to: Ms. Theresa M. Ritta, Chief Real Property Branch, the Department of Health and Human Services, Room 12-07, Parklawn Building, 5600 Fishers Lane, Rockville, MD 20857, (301)-443-2265 (This is not

a toll-free number.) HHS will mail to the interested provider an application packet, which will include instructions for completing the application. In order to maximize the opportunity to utilize a suitable property, providers should submit their written expressions of interest as soon as possible. For complete details concerning the processing of applications, the reader is encouraged to refer to the interim rule governing this program, 24 CFR part 581.

For properties listed as suitable/to be excess, that property may, if subsequently accepted as excess by GSA, be made available for use by the homeless in accordance with applicable law, subject to screening for other Federal use. At the appropriate time, HUD will publish the property in a Notice showing it as either suitable/available or suitable/unavailable.

For properties listed as suitable/unavailable, the landholding agency has decided that the property cannot be declared excess or made available for use to assist the homeless, and the property will not be available.

Properties listed as unsuitable will not be made available for any other purpose for 20 days from the date of this Notice. Homeless assistance providers interested in a review by HUD of the determination of unsuitability should call the toll free information line at 1-800-927-7588 or send an email to title5@hud.gov for detailed instructions, or write a letter to Ann Marie Oliva at the address listed at the beginning of this Notice. Included in the request for review should be the property address (including zip code), the date of publication in the **Federal Register**, the landholding agency, and the property number.

For more information regarding particular properties identified in this Notice (e.g., acreage, floor plan, condition of property, existing sanitary facilities, exact street address), providers should contact the appropriate landholding agencies at the following addresses: AGRICULTURE: Ms. Debra Kerr, Department of Agriculture, OPPM, Property Management Division, Agriculture South Building, 300 7th Street SW., Washington, DC 20024, (202)-720-8873; COE: Ms. Brenda Johnson-Turner, HQUSACE/CEMP-CR, 441 G Street NW., Washington, DC 20314, (202)-761-7238; ENERGY: Mr. David Steinau, Department of Energy, Office of Asset Management (MA-50), 1000 Independence Ave. SW., Washington, DC 20585, (202)-287-1503; INTERIOR: Mr. Michael Wright, Acquisition & Property Management, Department of

the Interior, 3960 N. 56th Ave. #104, Hollywood, FL 33021; (443) 223-4639; NAVY: Mr. Steve Matteo, Department of the Navy, Asset Management Division, Naval Facilities Engineering Command, Washington Navy Yard, 1330 Patterson Ave. SW., Suite 1000, Washington, DC 20374; (202)-685-9426; (These are not toll-free numbers).

Dated: August 4, 2016.

Tonya Proctor,

Deputy Director, Office of Special Needs Assistance Programs.

BILLING CODE 4210-67-P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[16X LLC0910000 L1610000.DS0000
LXSISGPW0000]

Notice of Availability of the Gunnison Sage-Grouse Rangewide Draft Resource Management Plan Amendment and Draft Environmental Impact Statement, Colorado and Utah

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: In accordance with the National Environmental Policy Act of 1969, as amended (NEPA), and the Federal Land Policy and Management

Act of 1976, as amended, the Bureau of Land Management (BLM) has prepared a Gunnison Sage-Grouse (GUSG) Rangewide Draft Resource Management Plan (RMP) Amendment and Draft Environmental Impact Statement (EIS) for the BLM field offices in southwest Colorado and southeast Utah, and by this notice is announcing the opening of the comment period.

DATES: To ensure that comments will be considered, the BLM must receive written comments on the Draft RMP Amendment/Draft EIS within 90 days of the date the Environmental Protection Agency publishes notice of the Draft RMP Amendment/Draft EIS in the **Federal Register**. The BLM will announce future meetings or hearings and any other public participation activities at least 15 days in advance through public notices, media releases and/or mailings.

ADDRESSES: You may submit comments related to the GUSG Rangewide Draft RMP Amendment/Draft EIS by any of the following methods:

- *Website:* <http://1.usa.gov/1Uusw8C>.
- *Email:* gusg_amend@blm.gov.
- *Fax:* 303-239-3699.
- *Mail:* Gunnison Sage-Grouse EIS,

BLM Colorado State Office, 2850 Youngfield St., Lakewood, CO 80215.

Documents pertinent to this proposal may also be viewed at BLM offices in Colorado and Utah. For a list of the offices and their addresses, please see the **SUPPLEMENTARY INFORMATION** section below.

FOR FURTHER INFORMATION CONTACT:

Roger Sayre, Project Manager, via telephone: 303-239-3709; at the BLM Colorado Southwest District Office (see address above); or via email: rsayre@blm.gov. You may contact Mr. Sayre to have your name added to our mailing list. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1-800-877-8339 to contact the above individual during normal business hours. The FIRS is available 24 hours a day, seven days a week, to leave a message or question with the above individual. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: The BLM prepared the GUSG Rangewide Draft RMP Amendment/Draft EIS to address a range of alternatives focused on specific conservation measures across the range of the GUSG in southwest Colorado and southeast Utah. The Draft RMP Amendment/Draft EIS proposes to amend the current management decisions for resources as described in the following RMPs:

- Colorado
 - San Luis RMP (1991)
 - Gunnison RMP (1993)
 - San Juan/San Miguel RMP (1985) (currently under revision in the Uncompahgre RMP)
 - Uncompahgre Basin RMP (1989) (currently under revision in the Dominguez-Escalante National Conservation Area [NCA] RMP and Uncompahgre RMP)
 - Grand Junction RMP (1987) (Currently under revision in the Dominguez-Escalante NCA RMP)
 - Grand Junction RMP (2015)
 - Gunnison Gorge NCA RMP (2004)
 - Canyons of the Ancients National Monument RMP (2010)
 - Tres Rios RMP (2015)
- Utah
 - Moab RMP (2008)
 - Monticello RMP (2008)

The planning area includes approximately 2.1 million acres of BLM, National Park Service, U.S. Forest Service, State, local and private lands located in southwestern Colorado and southeastern Utah within 12 counties (Chaffee, Delta, Dolores, Gunnison, Hinsdale, Mesa, Montrose, Ouray, Saguache and San Miguel counties in Colorado; and Grand and San Juan counties in Utah). Within the decision area, the BLM administers approximately 740,000 surface acres and approximately 1.3 million acres of Federal sub-surface mineral estate. Within the decision area, the BLM manages 623,000 acres of GUSG habitat, representing 37 percent of the habitat across the species range. Surface and subsurface management decisions made as a result of this Draft RMP Amendment/Draft EIS will apply only to the BLM-administered lands and minerals in the decision area.

The Draft RMP Amendment/Draft EIS analyzes management actions applicable to three categories of BLM-administered lands and Federal subsurface: Occupied Habitat, Unoccupied Habitat, and Non-Habitat.

Occupied Habitat:

- Occupied critical habitat as designated by the Fish and Wildlife Service (FWS);
- Vacant/unknown habitat delineated by Colorado Parks and Wildlife that FWS did not designate as occupied critical habitat;
- Habitat within the Poncha Pass area; and
- Specific areas the FWS excluded from the critical habitat designation coinciding with Federal subsurface estate.

Unoccupied Habitat: Unoccupied critical habitat as designated by the FWS.

Non-Habitat: Non-GUSG habitat adjacent to Occupied or Unoccupied Habitat within 4 miles of a lek, where certain activities might disrupt GUSG within the adjacent habitat areas.

The formal public scoping process for the RMP Amendment/EIS began on July 18, 2014, with the publication of a Notice of Intent in the **Federal Register** (79 FR 42033), and ended on August 22, 2014. The BLM held four public scoping meetings in August 2014. The BLM used public scoping comments to help identify planning issues that directed the formulation of alternatives and framed the scope of analysis in the Draft RMP Amendment/Draft EIS. The BLM also used the scoping process to introduce the public to preliminary planning criteria, which set limits on the scope of the Draft RMP Amendment/Draft EIS.

Major issues the Draft RMP Amendment/Draft EIS considers include special status species management (specifically for the GUSG), energy and mineral development, lands and realty, travel and transportation, recreation, fire management and range management.

The Draft RMP Amendment/Draft EIS evaluates four alternatives in detail, including the No Action Alternative (Alternative A) and three action alternatives (Alternatives B, C and D). All action alternatives require compliance with the mitigation hierarchy of first, avoiding impacts to the maximum extent compatible with the goals of the alternative; second, minimizing any impacts that are not avoided; and third, providing compensatory mitigation to offset unavoidable impacts. All mitigation requires a net conservation gain. Alternative A, the No Action Alternative, would continue management of public lands and resources under current BLM RMPs, as previously amended. Alternative B primarily focuses on habitat protection and avoiding impacts to GUSG and GUSG habitat whenever and wherever possible. Alternative C focuses on minimizing and mitigating impacts to GUSG habitat. Alternative D, the Preferred Alternative, includes two sub-alternatives. Sub-alternative D₁ adapts and expands on the BLM Gunnison Basin Candidate Conservation Agreement (2013) to manage the Gunnison Basin GUSG population. Sub-alternative D₂ includes management actions developed and tailored for the satellite (non-Gunnison Basin) populations. Identification of a Preferred Alternative does not represent final agency decision, and the Proposed and Approved RMP Amendments may reflect changes or adjustments based on

public comments, new information, or changes in BLM policies or priorities. The Proposed and Approved RMP Amendments may include objectives and actions described in the other analyzed alternatives or otherwise within the spectrum of alternatives analyzed. Pursuant to 43 CFR 1610.7–2(b), this notice announces a concurrent public comment period on proposed Areas of Critical Environmental Concern (ACECs). BLM determined that four potential ACECs met the criteria for relevance and importance, some of which overlapped. The Draft RMP Amendment/Draft EIS includes a range of alternatives for ACECs from no designations to designation of a single proposed ACEC that encompasses all four potential ACECs. In particular, Alternative B analyzes an ACEC for all Occupied and Unoccupied Habitat (the Sage-Grouse Habitat ACEC), which encompasses all four potential ACECs that were evaluated. This proposed ACEC covers approximately 623,000 acres and meets the relevance and importance criteria because it includes more than locally significant qualities for GUSG, which are threatened and warrant protection. If the Sage-Grouse Habitat ACEC is formally designated, all resource management actions in Alternative B would be applied. The following are the overarching use allocations: closed to fluid mineral leasing; designated as a right-of-way exclusion area; limited to travel on existing or designated roads and trails; and recommended for withdrawal from mineral entry.

Please note that public comments and information submitted including names, street addresses and email addresses of persons who submit comments will be available for public review and disclosure at the above addresses during regular business hours (8 a.m. to 4 p.m.), Monday through Friday, except holidays.

In addition to the Web site listed above, documents pertinent to this proposal may be examined at:

- BLM Colorado State Office (see **ADDRESSES** above)
- BLM Colorado Southwest District Office, 2465 South Townsend Ave., Montrose, CO 81401
- BLM Colorado Grand Junction Field Office, 2815 H Road, Grand Junction, CO 81506
- BLM Colorado Gunnison Field Office, 210 West Spencer Ave., Gunnison, CO 81230
- BLM Colorado San Luis Valley Field Office, 1313 E. Highway 160, Monte Vista, CO 81144

- BLM Colorado Tres Rios Field Office, 29211 Highway 184, Dolores, CO 81323
- BLM Utah State Office, 440 West 200 South, Suite 500, Salt Lake City, UT 84101
- BLM Utah Canyon County District Office, 82 East Dogwood, Moab, UT 84532
- BLM Utah Monticello Field Office, 365 N. Main St., Monticello, UT 84535.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Authority: 40 CFR 1506.6, 40 CFR 1506.10, 43 CFR 1610.2

Ruth Welch,

BLM Colorado State Director.

INTERNATIONAL TRADE COMMISSION

[USITC SE–16–028]

Government in the Sunshine Act Meeting Notice

AGENCY HOLDING THE MEETING: United States International Trade Commission.

TIME AND DATE: August 17, 2016 at 11:00 a.m.

PLACE: Room 101, 500 E Street SW., Washington, DC 20436, Telephone: (202) 205–2000.

STATUS: Open to the public.

MATTERS TO BE CONSIDERED:

1. Agendas for future meetings: None.
2. Minutes.
3. Ratification List.
4. Vote in Inv. Nos. 701–TA–539 and 731–TA–1280–1282 (Final)(Heavy Walled Rectangular Welded Carbon Steel Pipes and Tubes from Korea, Mexico, and Turkey). The Commission is currently scheduled to complete and file its determinations and views of the Commission on September 6, 2016.
5. Outstanding action jackets: None. In accordance with Commission policy, subject matter listed above, not disposed of at the scheduled meeting, may be carried over to the agenda of the following meeting.

By order of the Commission.

Issued: August 10, 2016.

Lisa R. Barton,

Secretary to the Commission.

[FR Doc. 2016–19407 Filed 8–10–16; 4:15 pm]

BILLING CODE 7020–02–P

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–975]

Certain Computer Cables, Chargers, Adapters, Peripheral Devices and Packaging Containing the Same; Notice of To Review an Initial Determination Finding All Respondents in Default; Request for Written Submissions on Remedy, the Public Interest, and Bonding

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has determined not to review the presiding administrative law judge’s (“ALJ”) initial determination (“ID”) (Order No. 7) finding all respondents in default. The Commission requests written submissions, under the schedule set forth below, on remedy, public interest, and bonding.

FOR FURTHER INFORMATION CONTACT:

Amanda Pitcher Fisherow, Esq., Office of the General Counsel, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, telephone (202) 205–2737. Copies of non-confidential documents filed in connection with this investigation are or will be available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, telephone (202) 205–2000. General information concerning the Commission may also be obtained by accessing its Internet server at <http://www.usitc.gov>. The public record for this investigation may be viewed on the Commission’s electronic docket (EDIS) at <http://edis.usitc.gov>. Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission’s TDD terminal on (202) 205–1810.

SUPPLEMENTARY INFORMATION: The Commission instituted this investigation on December 17, 2015, based on a complaint filed on behalf of Belkin International, Inc. of Playa Vista, California (“Complainant”). 80 *Fed. Reg.* 78763–64 (December 17, 2015). The complaint alleges violations of Section 337 of the Tariff Act of 1930, as

amended, 19 U.S.C. 1337, in the sale for importation, importation, or sale within the United States after importation of certain computer cables, chargers, adapters, peripheral devices and packaging containing the same by reason of infringement of one or more of U.S. Trademark Registration No. 2,339,459; U.S. Trademark Registration No. 2,339,460; U.S. Trademark Registration No. 4,168,379; and U.S. Trademark Registration No. 4,538,212. The Commission’s notice of investigation named the following respondents: Dongguan Pinte Electronic Co., Ltd., of Dongguan City, China; and Dongguan Shijie Fresh Electronic Products Factory, of Dongguan City, China (collectively “Respondents”). The Office of Unfair Import Investigations was named as a party.

On June 6, 2016, Complainant moved to find Respondents in default. The Commission investigative attorney filed a response in support of Complainant’s motion. On June 21, 2016, the ALJ issued Order No. 6 ordering Respondents to show cause why they should not be found in default for failing to file a response to the complaint and notice of investigation.

On July 12, 2016, the ALJ issued the subject ID finding Respondents in default. *See* Order No. 7. No petitions for review of the ID were filed.

The Commission has determined not to review the subject ID.

Section 337(g)(1) and Commission Rule 210.16(c) authorize the Commission to order relief against a respondent found in default, unless, after considering the public interest, it finds that such relief should not issue. Complainant seeks a limited exclusion order and a cease and desist order.

In connection with the final disposition of this investigation, the Commission may: (1) Issue an order that could result in the exclusion of articles manufactured or imported by the defaulting respondent; and/or (2) issue a cease and desist order that could result in the defaulting respondent being required to cease and desist from engaging in unfair acts in the importation and sale of such articles. Accordingly, the Commission is interested in receiving written submissions that address the form of remedy, if any, that should be ordered. If a party seeks exclusion of an article from entry into the United States for purposes other than entry for consumption, the party should so indicate and provide information establishing that activities involving other types of entry either are adversely affecting it or likely to do so. For background, see *Certain Devices for*

Connecting Computers via Telephone Lines, Inv. No. 337-TA-360, USITC Pub. No. 2843, Comm'n Op. at 7-10 (December 1994).

If the Commission contemplates some form of remedy, it must consider the effects of that remedy upon the public interest. The factors that the Commission will consider include the effect that the exclusion order and/or cease and desists orders would have on (1) the public health and welfare, (2) competitive conditions in the U.S. economy, (3) U.S. production of articles that are like or directly competitive with those that are subject to investigation, and (4) U.S. consumers. The Commission is therefore interested in receiving written submissions that address the aforementioned public interest factors in the context of this investigation.

If the Commission orders some form of remedy, the U.S. Trade Representative, as delegated by the President, has 60 days to approve or disapprove the Commission's action. See Presidential Memorandum of July 21, 2005, 70 FR 43251 (July 26, 2005). During this period, the subject articles would be entitled to enter the United States under bond, in an amount determined by the Commission and prescribed by the Secretary of the Treasury. The Commission is therefore interested in receiving submissions concerning the amount of the bond that should be imposed if a remedy is ordered.

Written Submissions: Parties to the investigation, interested government agencies, and any other interested parties are encouraged to file written submissions on the issues of remedy, the public interest, and bonding. Complainant is also requested to state the HTSUS numbers under which the accused products are imported. Complainant is further requested to supply the names of known importers of the products at issue in this investigation.

The written submissions and proposed remedial orders must be filed no later than close of business on August 18, 2016. Reply submissions must be filed no later than the close of business on August 25, 2016. No further submissions on these issues will be permitted unless otherwise ordered by the Commission.

Persons filing written submissions must file the original document electronically on or before the deadlines stated above and submit 8 true paper copies to the Office of the Secretary by noon the next day pursuant to section 210.4(f) of the Commission's Rules of Practice and Procedure (19 CFR

210.4(f)). Submissions should refer to the investigation number ("Inv. No. 337-TA-975") in a prominent place on the cover page and/or the first page. (See Handbook for Electronic Filing Procedures, http://www.usitc.gov/secretary/fed_reg_notices/rules/handbook_on_electronic_filing.pdf). Persons with questions regarding filing should contact the Secretary (202-205-2000).

Any person desiring to submit a document to the Commission in confidence must request confidential treatment. All such requests should be directed to the Secretary to the Commission and must include a full statement of the reasons why the Commission should grant such treatment. See 19 CFR 201.6. Documents for which confidential treatment by the Commission is properly sought will be treated accordingly. All information, including confidential business information and documents for which confidential treatment is properly sought, submitted to the Commission for purposes of this Investigation may be disclosed to and used: (i) By the Commission, its employees and Offices, and contract personnel (a) for developing or maintaining the records of this or a related proceeding, or (b) in internal investigations, audits, reviews, and evaluations relating to the programs, personnel, and operations of the Commission including under 5 U.S.C. Appendix 3; or (ii) by U.S. government employees and contract personnel,¹ solely for cybersecurity purposes. All nonconfidential written submissions will be available for public inspection at the Office of the Secretary and on EDIS.

The authority for the Commission's determination is contained in section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and in Part 210 of the Commission's Rules of Practice and Procedure (19 CFR part 210).

By order of the Commission.

Issued: August 8, 2016.

William R. Bishop,

Supervisory Hearings and Information Officer.

[FR Doc. 2016-19188 Filed 8-11-16; 8:45 am]

BILLING CODE 7020-02-P

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

National Endowment for the Humanities

Meetings of Humanities Panel

AGENCY: National Endowment for the Humanities, National Foundation on the Arts and the Humanities.

ACTION: Notice of meetings.

SUMMARY: The National Endowment for the Humanities will hold nine meetings of the Humanities Panel, a federal advisory committee, during September, 2016. The purpose of the meetings is for panel review, discussion, evaluation, and recommendation of applications for financial assistance under the National Foundation on the Arts and Humanities Act of 1965.

DATES: See **SUPPLEMENTARY INFORMATION** section for meeting dates. The meetings will open at 8:30 a.m. and will adjourn by 5:00 p.m. on the dates specified below.

ADDRESSES: The meetings will be held at the National Endowment for the Humanities at Constitution Center at 400 7th Street SW., Washington, DC 20506.

FOR FURTHER INFORMATION CONTACT: Elizabeth Voyatzis, Committee Management Officer, 400 7th Street SW., Room 4060, Washington, DC 20506; (202)606-8322; evoyatzis@neh.gov.

SUPPLEMENTARY INFORMATION: Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C. App.), notice is hereby given of the following meetings:

1. *Date:* September 1, 2016.

This meeting will discuss applications on the subject of International Topics for Digital Projects for the Public: Discovery Grants, submitted to the Division of Public Programs.

2. *Date:* September 6, 2016.

This meeting will discuss applications on the subjects of Arts and Culture for Digital Projects for the Public: Discovery Grants, submitted to the Division of Public Programs.

3. *Date:* September 7, 2016.

This meeting will discuss applications on the subjects of Arts and Culture for Digital Projects for the Public: Production Grants, submitted to the Division of Public Programs.

4. *Date:* September 8, 2016.

This meeting will discuss applications on the subject of U.S. History for Digital Projects for the Public: Production Grants, submitted to the Division of Public Programs.

5. *Date:* September 12, 2016.

This meeting will discuss applications for the Humanities Initiatives at Hispanic-Serving Institutions grant program, submitted to the Division of Education Programs.

6. *Date:* September 13, 2016.

¹ All contract personnel will sign appropriate nondisclosure agreements.

This meeting will discuss applications for the Humanities Initiatives at Historically Black Colleges and Universities grant program, submitted to the Division of Education Programs.

7. *Date:* September 13, 2016.

This meeting will discuss applications on the subjects of World History and Culture for Digital Projects for the Public: Production Grants, submitted to the Division of Public Programs.

8. *Date:* September 14, 2016.

This meeting will discuss applications on the subject of U.S. History for Digital Projects for the Public: Production Grants, submitted to the Division of Public Programs.

9. *Date:* September 14, 2016.

This meeting will discuss applications for the Humanities Initiatives at Tribal Colleges and Universities grant program, submitted to the Division of Education Programs.

Because these meetings will include review of personal and/or proprietary financial and commercial information given in confidence to the agency by grant applicants, the meetings will be closed to the public pursuant to sections 552b(c)(4) and 552b(c)(6) of Title 5, U.S.C., as amended. The Committee Management Officer, Elizabeth Voyatzis, has made this determination pursuant to the authority granted her by the Chairman's Delegation of Authority to Close Advisory Committee Meetings dated April 15, 2016.

Dated: August 8, 2016.

Michael P. McDonald,

General Counsel and Federal Register Liaison Officer.

BILLING CODE 7536-01-P

NUCLEAR REGULATORY COMMISSION

[NRC-2016-0160]

Termination of Operating Licenses for Nuclear Reactors

AGENCY: Nuclear Regulatory Commission.

ACTION: Regulatory guide; withdrawal.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is withdrawing Regulatory Guide (RG) 1.86, "Termination of Operating Licenses for Nuclear Reactors." This RG is being withdrawn because there is more up-to-date guidance in other NRC regulatory documents, making RG 1.86 obsolete.

DATES: The effective date of the withdrawal of RG 1.86 is August 12, 2016.

ADDRESSES: Please refer to Docket ID NRC-2016-0160 when contacting the, NRC about the availability of information regarding this document.

You may obtain publically-available information related to this document, using the following methods:

- *Federal Rulemaking Web site:* Go to <http://www.regulations.gov> and search for Docket ID NRC-2016-0160. Address questions about NRC dockets to Carol Gallagher; telephone: 301-415-3463; email: Carol.Gallagher@nrc.gov. For technical questions, contact the individuals listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly-available documents online in the ADAMS Public Document collection at <http://www.nrc.gov/reading-rm/adams.html>. To begin the search, select "ADAMS Public Documents" and then select "*Begin Web-based ADAMS Search.*" For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1-800-397-4209, 301-415-4737, or by email to pdr.resource@nrc.gov. The ADAMS accession number for each document referenced in this notice (if that document is available in ADAMS) is provided the first time that a document is referenced. The basis for the withdrawal of RG 1.86 is available in ADAMS under Accession No. ML16099A267.

- *NRC's PDR:* You may examine and purchase copies of public documents at the NRC's PDR, Room O1-F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

Regulatory guides are not copyrighted, and NRC approval is not required to reproduce them.

FOR FURTHER INFORMATION CONTACT: Zahira Cruz, Office of Nuclear Materials Safety and Safeguards, telephone: 301-415-3808; email: Zahira.Cruz@nrc.gov, and Harriet Karagiannis, Office of Nuclear Regulatory Research, telephone: 301-415-2493; email: Harriet.Karagiannis@nrc.gov. Both are staff of the U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001.

SUPPLEMENTARY INFORMATION: The NRC staff issued RG 1.86 in June 1974, to provide guidance for termination of licenses for nuclear power plants, including the decommissioning of reactors. In addition, RG 1.86 includes information in Table 1, "Acceptable Surface Contamination Levels," regarding acceptable average and maximum surface contamination criteria.

The guidance in RG 1.86 is no longer needed because it has been updated and replaced by NRC's regulations and other

regulatory guidance. This guidance can be found in RG 1.179, "Standard Formant and Content of License Termination Plans for Nuclear Power Reactors" (ADAMS Accession No. ML110490419); RG 1.184, "Decommissioning of Nuclear Power Reactors" (ADAMS Accession No. ML13144A840); and RG 1.185, "Standard Format and Content for Post-Shutdown Decommissioning Activities Report" (ADAMS Accession No. ML13140A038), which provide the NRC staff guidance on implementing the NRC's regulations related to decommissioning and license termination requirements as amended in 1996 and 1997, respectively.

In addition, various NUREGs, including NUREG-1700, "Standard Review Plan for Evaluating Nuclear Power Reactor License Termination Plans" (ADAMS Accession No. ML003713038; and Volume 2, "Characterization, Survey, and Determination of Radiological Criteria" (ADAMS Accession No. ML032530405), of NUREG-1757, "Consolidated Decommissioning Guidance," provide up-to-date information that aligns with RGs 1.179, 1.184, and 1.185. Specifically, NUREG 1757, Volume 2, Revision 1, includes: (1) Tables of screening criteria (concentrations) applicable to surface contamination of buildings and to surface soils (Tables H.1 and H.2); and (2) guidance on determining site-specific criteria for buildings and soils remaining onsite at license termination (Chapter 5 and Appendix I).

Also, RG 8.21, "Health Physics Surveys for Byproduct Material at NRC-Licensed Processing and Manufacturing Plants" (ADAMS Accession No. ML003739577); RG 8.23, "Radiation Safety Surveys at Medical Institutions" (ADAMS Accession No. ML003739603); and RG 8.30, "Health Physics Surveys in Uranium Recovery Facilities" (ADAMS Accession No. ML021260524), provide information similar to that included in Table 1 of RG 1.86. Specifically, Table 1 in RG 1.86 is now included in RG 8.23 and is titled, "Table 3 Acceptable Surface Contamination Levels for Uncontrolled Release of Equipment."

Because RG 1.86 is no longer needed, the NRC is withdrawing RG 1.86. Withdrawal of a RG means that the guide no longer provides useful information or has been superseded by other guidance, technological innovations, congressional actions, or other events. The withdrawal of RG 1.86 does not alter any prior or existing NRC licensing approval or the acceptability of licensee commitments to RG 1.86.

Although RG 1.86 is withdrawn, current licensees may continue to use it, and withdrawal does not affect any existing licenses or agreements. However, RG 1.86 should not be used in future requests or applications for NRC licensing actions.

Dated at Rockville, Maryland, this 4th day of August, 2016.

For the Nuclear Regulatory Commission.

Thomas H. Boyce,

Chief, Regulatory Guidance and Generic Issues Branch, Division of Engineering, Office of Nuclear Regulatory Research.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[NRC-2016-0054]

License Amendment Requests for Changes to Emergency Response Organization Staffing and Augmentation

AGENCY: Nuclear Regulatory Commission.

ACTION: Regulatory issue summary; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing Regulatory Issue Summary (RIS) 2016-10, "License Amendment Requests for Changes to Emergency Response Organizations Staffing and Augmentation." This RIS clarifies the application of guidance documents that support license amendment requests that would change augmenting emergency response arrival times for holders of nuclear power reactor operating licenses, construction permits, combined licenses, and early site permits.

DATES: The RIS is available as of August 12, 2016.

ADDRESSES: Please refer to Docket ID NRC-2016-0054 when contacting the NRC about the availability of information regarding this document. You may obtain publicly-available information related to this document using any of the following methods:

- *Federal Rulemaking Web site:* Go to <http://www.regulations.gov> and search for Docket ID NRC-2016-0054. Address questions about NRC dockets to Carol Gallagher; telephone: 301-415-3463; email: Carol.Gallagher@nrc.gov. For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly-

available documents online in the ADAMS Public Documents collection at <http://www.nrc.gov/reading-rm/adams.html>. To begin the search, select "ADAMS Public Documents" and then select "Begin Web-based ADAMS Search." For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1-800-397-4209, 301-415-4737, or by email to pdr.resource@nrc.gov. The RIS, "License Amendment Requests for Changes to Emergency Response Organization Staffing and Augmentation," is available in ADAMS under Accession No. ML16124A002.

- *NRC's PDR:* You may examine and purchase copies of public documents at the NRC's PDR, Room O1-F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

- This RIS is also available on the NRC's public Web site at <http://www.nrc.gov/reading-rm/doc-collections/gen-comm/reg-issues/> (select "2016" and then select "RIS-16-10").

FOR FURTHER INFORMATION CONTACT:

Brian K. Harris, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001; telephone: 301-415-2277, email: Brian.Harris2@nrc.gov.

SUPPLEMENTARY INFORMATION: The NRC published a notice of opportunity for public comment on a draft version of this RIS in the **Federal Register** on March 15, 2016 (81 FR 13849), and received comments from three commenters. The NRC staff considered all comments, which resulted in minor RIS modifications. The evaluation of these comments and the resulting changes to the RIS are discussed in a publicly-available memorandum, which is in ADAMS under Accession No. ML16124A001.

Dated at Rockville, Maryland, this 8th day of August 2016.

For the Nuclear Regulatory Commission.

Alex Garmoe,

Acting Chief, Generic Communications Branch, Division of Policy and Rulemaking, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-P

PRESIDIO TRUST

Notice of Public Meeting of Presidio Institute Advisory Council

AGENCY: The Presidio Trust.

ACTION: Notice of public meeting of Presidio Institute Advisory Council.

SUMMARY: Pursuant to the Federal Advisory Committee Act, as amended (5

U.S.C. Appendix 2), notice is hereby given that a public meeting of the Presidio Institute Advisory Council (Council) will be held from 10:00 a.m. to 11:30 a.m. on Monday, September 12, 2016. The meeting is open to the public, and oral public comment will be received at the meeting. The Council was formed to advise the Executive Director of the Presidio Trust (Trust) on matters pertaining to the rehabilitation and reuse of Fort Winfield Scott as a new national center focused on service and leadership development.

SUPPLEMENTARY INFORMATION: The Trust's Executive Director, in consultation with the Chair of the Board of Directors, has determined that the Council is in the public interest and supports the Trust in performing its duties and responsibilities under the Presidio Trust Act, 16 U.S.C. 460bb appendix.

The Council will advise on the establishment of a new national center (Presidio Institute) focused on service and leadership development, with specific emphasis on: (a) Assessing the role and key opportunities of a national center dedicated to service and leadership at Fort Scott in the Presidio of San Francisco; (b) providing recommendations related to the Presidio Institute's programmatic goals, target audiences, content, implementation and evaluation; (c) providing guidance on a phased development approach that leverages a combination of funding sources including philanthropy; and (d) making recommendations on how to structure the Presidio Institute's business model to best achieve the Presidio Institute's mission and ensure long-term financial self-sufficiency.

Meeting Agenda: This meeting of the Council will include an update on Presidio Institute programs. The period from 11:00 a.m. to 11:30 a.m. will be reserved for public comments.

Public Comment: Individuals who would like to offer comments are invited to sign-up at the meeting and speaking times will be assigned on a first-come, first-served basis. Written comments may be submitted on cards that will be provided at the meeting, via mail to Amanda Marconi, Presidio Institute, 1201 Ralston Avenue, San Francisco, CA 94129-0052, or via email to amarconi@presidiotrust.gov. If individuals submitting written comments request that their address or other contact information be withheld from public disclosure, it will be honored to the extent allowable by law. Such requests must be stated prominently at the beginning of the comments. The Trust will make

available for public inspection all submissions from organizations or businesses and from persons identifying themselves as representatives or officials of organizations and businesses.

Time: The meeting will be held from 10:00 a.m. to 11:30 a.m. on Monday, September 12, 2016.

Location: The meeting will be held at 1202 Ralston Avenue, San Francisco, CA 94129.

FOR FURTHER INFORMATION CONTACT:

Additional information is available online at <http://www.presidio.gov/institute/about/Pages/advisory-council.aspx>

Dated: August 8, 2016.

Andrea M. Andersen,

Acting General Counsel.

BILLING CODE 4310-4R-P

SECURITIES AND EXCHANGE COMMISSION

[SEC File No. 270-72, OMB Control No. 3235-0076]

Submission for OMB Review; Comment Request

Upon Written Request Copies Available From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE., Washington, DC 20549-2736.

Extension:

Form D and Regulation D.

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (“Commission”) has submitted to the Office of Management and Budget this request for extension of the previously approved collection of information discussed below.

Form D (17 CFR 239.500) is a notice of sales filed by issuers making an offering of securities in reliance on an exemption under Regulation D (17 CFR 230.501 *et seq.*) or Section 4(a)(5) of the Securities Act of 1933 (15 U.S.C. 77d(a)(5)). Regulation D sets forth rules governing the limited offer and sale of securities without Securities Act registration. The purpose of Form D is to collect empirical data, which provides a continuing basis for action by the Commission either in terms of amending existing rules and regulations or proposing new ones. In addition, the Form D allows the Commission to elicit information necessary in assessing the effectiveness of Regulation D (17 CFR 230.501 *et seq.*) and Section 4(6) of the

Securities Act of 1933 (15 U.S.C. 77d(6)) as capital-raising devices for all businesses. Form D information is required to obtain or retain benefits under Regulation D. Approximately 21,686 issuers file Form D and it takes approximately 4 hours per response. We estimate that 25% of the 4 hours per response (1 hour per response) is prepared by the issuer for an annual reporting burden of 21,686 hours (1 hour per response × 21,686 responses).

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid control number.

The public may view the background documentation for this information collection at the following Web site, www.reginfo.gov. Comments should be directed to: (i) Desk Officer for the Securities and Exchange Commission, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 10102, New Executive Office Building, Washington, DC 20503, or by sending an email to: Shagufta.Ahmed@omb.eop.gov; and (ii) Pamela Dyson, Director/Chief Information Officer, Securities and Exchange Commission, c/o Remi Pavlik-Simon, 100 F Street NE., Washington, DC 20549 or send an email to: PRA.Mailbox@sec.gov. Comments must be submitted to OMB within 30 days of this notice.

Dated: August 5, 2016.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-78502; File No. SR-IEX-2016-10]

Self-Regulatory Organizations: Investors Exchange LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Rule 9.218 To Specify the List of Violations Eligible for Disposition Under IEX’s Minor Rule Violation Plan

August 8, 2016.

Pursuant to Section 19(b)(1)¹ of the Securities Exchange Act of 1934 (“Act”)² and Rule 19b-4 thereunder,³ notice is hereby given that, on August 4, 2016, the Investors Exchange LLC (“IEX” or “Exchange”) filed with the Securities and Exchange Commission

(“Commission”) the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

Pursuant to the provisions of Section 19(b)(1) under the Securities Exchange Act of 1934 (“Act”) [sic],⁴ and Rule 19b-4 thereunder,⁵ Investors Exchange LLC (“IEX” or “Exchange”) [sic] is filing with the Securities and Exchange Commission (“Commission”) [sic] a proposed rule change to amend IEX Rule 9.218 (Violations Appropriate for Disposition Under Plan Pursuant to Exchange Act Rule 19d-1(c)(2)) to specify the list of violations eligible for disposition under IEX Rule 9.216(b), (Procedure for Violation Under Plan Pursuant to Exchange Act Rule 19d-1(c)(2)) pursuant to IEX’s Minor Rule Violation Plan (“MRVP”).⁶ The Exchange has designated this proposal as non-controversial and provided the Commission with the notice required by Rule 19b-4(f)(6)(iii) under the Act.⁷

The text of the proposed rule change is available at the Exchange’s Web site at www.iextrading.com, at the principal office of the Exchange, and at the Commission’s Public Reference Room.

II. Self-Regulatory Organization’s Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statement [sic] may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

⁴ 15 U.S.C. 78s(b)(1).

⁵ 17 CFR 240.19b-4.

⁶ IEX’s MRVP was declared effective by the Commission on August 3, 2016. *See*, Securities Exchange Act Release No. 78474 (August 3, 2016).

⁷ 17 CFR 240.19b-4(f)(6)(iii).

¹ 15 U.S.C. 78s(b)(1).

² 15 U.S.C. 78a.

³ 17 CFR 240.19b-4.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

IEX Rule 9.216(b) provides procedures for disposition of certain rule violations designated as minor rule violations pursuant to a plan declared effective by the Commission in accordance with Section 19(d)(1) of the Act and Rule 19d-1(c)(2) thereunder. IEX's MRVP allows IEX, or FINRA on its behalf, to impose a fine of up to \$2,500 on any Member or associated person of a Member for a minor violation of an eligible rule. As proposed, IEX Rule 9.218 sets forth the rules eligible for disposition pursuant to IEX's MRVP as well as the recommended fine schedule for such dispositions. While IEX considers compliance with all of its rules to be important, inclusion of more technical rule violations in the MRVP is designed to provide for a risk-based allocation of FINRA and IEX resources to more high-risk matters because MRVP settlements are typically handled more efficiently and expeditiously.

The purpose of the MRVP is to provide reasonable but meaningful sanctions for minor or technical violations of rules when the conduct at issue does not warrant stronger, reportable disciplinary sanctions. The inclusion of a rule in IEX's MRVP does not minimize the importance of compliance with such rule, nor does it preclude IEX, or FINRA on its behalf, from choosing to pursue violations of eligible rules through an Acceptance, Waiver and Consent ("AWC") or Complaint if the nature of the violations or prior disciplinary history warrants more significant sanctions. Rather, the option to impose an MRVP sanction gives IEX, and FINRA on its behalf, additional flexibility to administer its enforcement program in the most effective and efficient manner, while still fully meeting IEX's remedial objectives in addressing violative conduct. FINRA, on behalf of IEX, and subject to IEX oversight, will examine and surveil for compliance with MRVP eligible rules in a manner consistent with the IEX regulatory program and will determine on a case-by-case basis whether disposition pursuant to the MRVP is appropriate.

In addition, Members and their associated persons may decline to accept a Minor Rule Violation, in which

case FINRA, on behalf of IEX, may proceed in accordance with the Exchange's disciplinary rules, which include hearing rights for formal disciplinary proceedings.⁸

IEX conducted a comprehensive review of its rules to determine the rules that are appropriate to add to the MRVP. As proposed, the rules included in the MRVP are as follows:

- *Continuing education:* Rule 2.160(p) specifies the continuing education requirements applicable to registered representatives of Members. Both FINRA and the Nasdaq Stock Market ("Nasdaq") include comparable rules in each of their MRVPs.⁹

- *Books and records:* Rule 4.511 requires IEX Members to comply with FINRA Rule 4511 as if such rule were part of the Exchange's rules, and specifies applicable books and records requirements. FINRA Rule 4511 is included in FINRA's MRVP.

- *Furnishing of records:* Rule 4.540 requires IEX Members to furnish specified records to the Exchange, upon request and in a time and manner required by the Exchange. The rule also provides that the Exchange shall be allowed access, at any time, to the books and records of the Member in order to obtain or verify information related to transactions executed on or through the Exchange or activities relating to the Exchange. This rule is comparable to BATS BZX Exchange, Inc. ("BZX") Rule 4.2, which is included in the BZX MRVP.¹⁰

- *Supervision:* Rule 5.110 requires that each Member establish and maintain a system to supervise the activities of each associated person that is reasonably designed to achieve compliance with applicable securities laws and regulations, and with applicable IEX rules; including, as specified, written procedures, internal inspections, transaction review and investigation, and investigation of applicants for registration. Violations of Rule 5.110 would be included in the MRVP where the underlying violative conduct is also included in the MRVP.¹¹

⁸ See, Chapter 9 generally.

⁹ See FINRA Rules 9217 and 1250, Nasdaq Rules 1120 and IM-9216.

¹⁰ See BZX Rule 8.15.

¹¹ For example, if FINRA (on behalf of IEX) identified that a short sale order marking violation (Rule 11.290) was attributable to a supervision deficiency, the supervision deficiency could be included in a disposition under the MRVP.

FINRA treats its comparable Rule 3110 in the same manner.

- *Automated submission of trading data requested:* Rule 8.220 requires Members to submit trade data in the specified automated format upon request by IEX. This rule is comparable to FINRA Rule 8211 which is included in FINRA's MRVP.

- *Market Maker two-sided quotation requirement:* Rule 11.151(a)(1) requires that a Member registered as a Market Maker comply with the specified continuous two-sided quotations requirements. This rule is comparable to BZX Rule 11.8(a)(1) which is included in BZX MRVP.

- *Short sales:* Rule 11.290 requires, among other things, that all sell orders be marked long, short, or short exempt. FINRA includes Rule 200(g) of SEC Regulation SHO (Failure to accurately mark sell orders of equity securities) in its MRV. Similarly, BZX includes its Rule 11.19 requirement to identify short sale orders as such in its MRV plan.

- *Locking or crossing quotations in NMS stocks:* Rule 11.310 provides in relevant part that Users of IEX shall reasonably avoid displaying, and shall not engage in a pattern or practice of displaying, any quotations that lock or cross a protected quotation previously disseminated pursuant to an effective national market system plan. This rule is comparable to BZX Rule 11.20, which is included in BZX MRVP.

- *Order audit trail system requirements:* Rule 11.420 specifies the order audit trail system requirements applicable to Members and persons associated with a Member, and in relevant part also requires compliance with FINRA Rules 7440 and 7550 as if such rule were part of IEX's rules. This rule is comparable to Nasdaq Rules 6954 and 6955,¹² as well as FINRA Rules 7440 and 7450, each of which are included in the Nasdaq and FINRA MRVP.

In addition, as proposed, Rule 9.218 includes the following recommended fine schedule for minor rule violation dispositions of the rules included therein:

¹² Nasdaq Rules 6954 and 6955 were renumbered as Rules 7440A and 7450A respectively.

Occurrence *	Individual	Member
First time fined	\$100	\$500
Second time fined	300	1,000
Third time fined	500	2,500

* Within a "rolling" 12-month period.

The recommended fine schedule is based on BZX Rule 8.15, Interpretations and Policies .01. The recommended fine schedule is intended to provide transparency to IEX Members and associated persons with respect to administration of the Exchange's MRVP.

2. Statutory Basis

IEX believes that the proposed rule change is consistent with the provisions of Section 6 of the Act,¹³ in general, and furthers the objectives of Sections 6(b)(5),¹⁴ (6)¹⁵ and (7)¹⁶ of the Act, in particular.

The Exchange believes that the proposal is consistent with Section 6(b)(5) of the Act¹⁷ because it is designed to promote just and equitable principles of trade, remove impediments to, and perfect the mechanism of, a free and open market and a national market system, and, in general, protect investors and the public interest. Specifically, the proposed rule change will provide the Exchange with the ability to impose reasonable but meaningful sanctions for minor or technical violations of rules when the conduct at issue does not warrant stronger, reportable disciplinary sanctions, which is consistent with the protection of investors and the public interest. Further, the Exchange believes that inclusion of the specified rules in the Exchange's MRVP, as well as the recommended fine schedule, would provide FINRA, on behalf of the Exchange, with the ability to administer its enforcement program in the most effective and efficient manner, while still fully meeting IEX's remedial objectives in addressing violative conduct, which is also consistent with the protection of investors and the public interest.

In addition, the Exchange believes that the proposal is consistent with Section 6(b)(7) of the Act¹⁸ because it would provide a fair procedure for the disciplining of IEX Members and associated persons. As discussed above, under the Exchange's disciplinary rules a Member or associated person may

decline to accept a Minor Rule Violation, in which case FINRA, on behalf of IEX, may proceed in accordance with the Exchange's disciplinary rules, which include hearing rights for formal disciplinary proceedings. The Exchange's rules governing formal disciplinary rules have already been approved by the Commission, which included a finding that IEX's rules concerning its disciplinary and oversight programs are consistent with the requirements of Sections 6(b)(6) and 6(b)(7) of the Act¹⁹ in that they provide fair procedures for the disciplining of members and persons associated with members.²⁰

The Exchange also believes that the proposed rule change does not unfairly discriminate between customers, issuers, brokers and dealers in that it will be applicable to all Members.

B. Self-Regulatory Organization's Statement on Burden on Competition

IEX does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change will allow for a quicker, more efficient means to resolve minor violations of eligible rules, potentially lessening the burden on firms in those circumstances where, absent the rule's inclusion in the MRVP, a more resource-intensive formal process might ensue.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A) of the Act²¹ and Rule 19b-4(f)(6) thereunder.²² Because the proposed rule change does not: (i) Significantly affect the protection of

investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act²³ and Rule 19b-4(f)(6) thereunder.²⁴

A proposed rule change filed under Rule 19b-4(f)(6)²⁵ normally does not become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b-4(f)(6)(iii),²⁶ the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has asked the Commission to waive the 30-day operative delay so that the proposed rule change may become operative at the time of the launch of its operation as a national securities exchange.

The Commission believes that waiving the 30-day operative delay is consistent with the protection of investors and the public interest. As noted above, the IEX MRVP, including the proposed violations, was declared effective by the Commission on August 3, 2016.²⁷ The proposed rule change merely incorporates the list of violations included in the MRVP into IEX Rule 9.218. For this reason, the Commission hereby waives the 30-day operative delay and designates the proposal operative upon filing.²⁸

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the

²³ 15 U.S.C. 78s(b)(3)(A).

²⁴ 17 CFR 240.19b-4(f)(6). In addition, Rule 19b-4(f)(6)(iii) requires the Exchange to give the Commission written notice of the Exchange's intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

²⁵ 17 CFR 240.19b-4(f)(6).

²⁶ 17 CFR 240.19b-4(f)(6)(iii).

²⁷ See *supra* note 6.

²⁸ For purposes only of waiving the 30-day operative delay, the Commission has considered the proposed rule's impact on efficiency, competition, and capital formation. See 15 U.S.C. 78c(f).

¹³ 15 U.S.C. 78f.

¹⁴ 15 U.S.C. 78f(b)(5).

¹⁶ 15 U.S.C. 78f(b)(7).

¹⁷ See *supra* note 14 [sic].

¹⁸ See *supra* note 16 [sic].

¹⁹ See *supra*, notes 15 [sic] and 16 [sic].

²⁰ See Securities Exchange Act Release No. 34-78101 (June 17, 2016), 81 FR 41141 (June 23, 2016) (File No. 10-222).

²¹ 15 U.S.C. 78s(b)(3)(A).

²² 17 CFR 240.19b-4(f)(6).

public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File Number SR-IEX-2016-10 on the subject line.

Paper Comments

- Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549-1090.

All submissions should refer to File Number SR-IEX-2016-10. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal offices of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-IEX-

2016-10, and should be submitted on or before September 2, 2016.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.²⁹

Robert W. Errett,
Deputy Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Investment Company Act Release No. 32209; File No. 812-14497]

Blackrock Funds, et al.; Notice of Application

August 8, 2016.

AGENCY: Securities and Exchange Commission ("Commission").

ACTION: Notice of an application for an order pursuant to: (a) Section 6(c) of the Investment Company Act of 1940 ("Act") granting an exemption from sections 18(f) and 21(b) of the Act; (b) section 12(d)(1)(f) of the Act granting an exemption from section 12(d)(1) of the Act; (c) sections 6(c) and 17(b) of the Act granting an exemption from sections 17(a)(1), 17(a)(2) and 17(a)(3) of the Act; and (d) section 17(d) of the Act and rule 17d-1 under the Act to permit certain joint arrangements and transactions.

Summary of the Application: Applicants request an order that would permit certain registered open-end management investment companies to participate in a joint lending and borrowing facility.

Applicants: Blackrock Funds; Blackrock Funds II; BBIF Government Securities Fund; BBIF Money Fund; BBIF Tax-Exempt Fund; BBIF Treasury Fund; BIF Government Securities Fund; BIF Money Fund; BIF Multi-State Municipal Series Trust; BIF Tax-Exempt Fund; BIF Treasury Fund; Blackrock Emerging Markets Fund, Inc.; Blackrock Financial Institutions Series Trust; Blackrock Index Funds, Inc.; Blackrock Large Cap Series Funds, Inc.; Blackrock Latin America Fund, Inc.; Blackrock Liquidity Funds; Blackrock Master LLC; Blackrock Pacific Fund, Inc.; Blackrock Series, Inc.; Master Government Securities LLC; Master Large Cap Series LLC; Master Money LLC; Master Tax-Exempt LLC; Master Treasury LLC; Quantitative Master Series LLC; Ready Asset Government Liquidity Fund; Ready Assets U.S.A. Government Money Fund; Ready Assets U.S. Treasury Money Fund; Retirement Series Trust; Blackrock Allocation

Target Shares; Blackrock Balanced Capital Fund, Inc.; Blackrock Basic Value Fund, Inc.; Blackrock Bond Fund, Inc.; Blackrock California Municipal Series Trust; Blackrock Capital Appreciation Fund, Inc.; Blackrock Cori Funds; Blackrock Equity Dividend Fund; Blackrock Eurofund; Blackrock Focus Growth Fund, Inc.; Blackrock Global Allocation Fund, Inc.; Blackrock Global Smallcap Fund, Inc.; Blackrock Long-Horizon Equity Fund; Blackrock Mid Cap Value Opportunities Series, Inc.; Blackrock Multi-State Municipal Series Trust; Blackrock Municipal Bond Fund, Inc.; Blackrock Municipal Series Trust; Blackrock Natural Resources Trust; Blackrock Series Fund, Inc.; Blackrock Strategic Global Bond Fund, Inc.; Blackrock Value Opportunities Fund, Inc.; Blackrock Variable Series Funds, Inc.; FDP Series, Inc.; Managed Account Series; Master Bond LLC; Master Focus Growth LLC; Master Value Opportunities LLC; Blackrock Funds III; Master Investment Portfolio; Funds For Institutions Series; and Master Institutional Money Market LLC (together with each investment company listed in Exhibit A-1 to the application, a "Company" and collectively, the "Companies"); Blackrock Advisors, LLC and Blackrock Fund Advisors (each, an "Adviser," and together, the "Advisers").

DATES: The application was filed on June 26, 2015, and amended on November 20, 2015, May 13, 2016 and August 5, 2016.

Hearing or Notification of Hearing: An order granting the requested relief will be issued unless the Commission orders a hearing. Interested persons may request a hearing by writing to the Commission's Secretary and serving applicants with a copy of the request, personally or by mail. Hearing requests should be received by the Commission by 5:30 p.m. on September 2, 2016 and should be accompanied by proof of service on the applicants, in the form of an affidavit, or, for lawyers, a certificate of service. Pursuant to Rule 0-5 under the Act, hearing requests should state the nature of the writer's interest, any facts bearing upon the desirability of a hearing on the matter, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by writing to the Commission's Secretary.

ADDRESSES: Secretary, U.S. Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549-1090; Applicants: Benjamin Archibald, Esq., BlackRock Advisors, LLC, 55 East 52 Street, New York, NY 10055 and John A. MacKinnon, Esq., Sidley Austin LLP,

²⁹ 17 CFR 200.30-3(a)(12), (59).

787 Seventh Avenue, New York, NY 10019.

FOR FURTHER INFORMATION CONTACT:

Laura L. Solomon, Senior Counsel, at (202) 551-6915 or Daniele Marchesani, Branch Chief, at (202) 551-6821 (Division of Investment Management, Chief Counsel's Office).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained via the Commission's Web site by searching for the file number, or an applicant using the Company name box, at <http://www.sec.gov/search/search.htm> or by calling (202) 551-8090.

Applicants' Representations

1. Each Company is organized as a Massachusetts business trust, a Delaware statutory trust, a Delaware limited liability company, or a Maryland corporation and is registered under the Act as an open-end management investment company. Each Company has issued shares of one or more series, each series of shares with its own distinct investment objectives, policies and restrictions. Certain of the Funds¹ either are or may be money market funds that comply with rule 2a-7 under the Act (each a "Money Market Fund" and collectively, the "Money Market Funds"). BlackRock Advisors is a Delaware limited liability company and BFA is a California corporation, each is registered as an investment adviser under the Investment Advisers Act of 1940 ("Advisers Act"). BlackRock Advisors and BFA are under common control by virtue of having the same ultimate parent, BlackRock, Inc.²

2. The Funds may lend cash to banks or other entities by entering into repurchase agreements or purchasing other short-term money market instruments. Certain of the Funds are parties to an unsecured revolving credit agreement with a group of lenders ("Credit Agreement"). The Funds may

¹ Applicants request that the order apply to the applicants and to any existing or future registered open-end management investment company or series thereof for which BlackRock Advisors or BFA or any successor thereto or an investment adviser controlling, controlled by, or under common control (within the meaning of section 2(a)(9) of the Act) with BlackRock Advisors or BFA or any successor thereto serves as investment adviser (each a "Fund" and collectively the "Funds" and each such investment adviser an "Adviser"). For purposes of the requested order, "successor" is limited to any entity that results from a reorganization into another jurisdiction or a change in the type of a business organization.

² All Funds that currently intend to rely on the requested order have been named as applicants. Any other Fund that relies on the requested order in the future will comply with the terms and conditions of the application.

borrow under the Credit Agreement to meet shareholder redemptions and for other lawful purposes.

3. If Funds that experience a cash shortfall were to borrow under the Credit Agreement (or another credit facility), they would pay interest at a rate that is likely to be higher than the rate that could be earned by non-borrowing Funds on investments in repurchase agreements and other short-term money market instruments. Applicants assert the difference between the higher rate paid on a borrowing and what a bank pays to borrow under repurchase agreements or other arrangements represents the bank's profit for serving as the middleperson between a borrower and lender and is not attributable to any material difference in the credit quality or risk of such transactions.

4. The requested relief would permit the applicants to participate in an interfund lending facility ("InterFund Program") that would permit each Fund to lend money directly to and borrow money directly from other Funds for temporary purposes (each, an "InterFund Loan"). The Money Market Funds typically will not participate as borrowers under the InterFund Program. Applicants state that the requested relief will enable the Funds to access an available source of money and reduce costs incurred by the Funds that need to obtain loans for temporary purposes and permit those Funds that have uninvested cash available: (i) To earn a return on the money that they might not otherwise be able to invest; or (ii) to earn a higher rate of interest on investment of their short-term balances.

5. Applicants anticipate that the proposed InterFund Program would provide a borrowing Fund with a source of liquidity at a rate lower than the bank borrowing rate at times when the cash position of the Fund is insufficient to meet temporary cash requirements. This situation could arise when shareholder redemptions exceed anticipated volumes and certain Funds have insufficient cash on hand to satisfy such redemptions. When the Funds liquidate portfolio securities to meet redemption requests, they often do not receive payment in settlement for up to three days (or longer for certain foreign transactions). However, redemption requests normally are effected on the day following the trade date. The proposed InterFund Program would provide a source of immediate, short-term liquidity pending settlement of the sale of portfolio securities.

6. Applicants also anticipate that a Fund could use the InterFund Program when a sale of securities "fails" due to

circumstances beyond the Fund's control, such as a delay in the delivery of cash to the Fund's custodian or improper delivery instructions by the broker effecting the transaction. "Sales fails" may present a cash shortfall if the Fund has undertaken to purchase a security using the proceeds from securities sold. Alternatively, the Fund could: (i) "Fail" on its intended purchase due to lack of funds from the previous sale, resulting in additional cost to the Fund; or (ii) sell a security on a same-day settlement basis, earning a lower return on the investment. Use of the InterFund Program under these circumstances would enable the Fund to have access to immediate short-term liquidity.

7. While bank borrowings and/or custodian overdrafts generally could supply Funds with a portion of the needed cash to cover unanticipated redemptions and sales fails, under the proposed InterFund Program, a borrowing Fund would pay lower interest rates than those that would be payable under short-term loans offered by banks or custodian overdrafts. In addition, Funds making short-term cash loans directly to other Funds would earn interest at a rate higher than they otherwise could obtain from investing their cash in repurchase agreements or certain other short term money market instruments. Thus, applicants assert that the proposed InterFund Program would benefit both borrowing and lending Funds.

8. The interest rate to be charged to the Funds on any Interfund Loan (the "InterFund Loan Rate") would be the average of the "Repo Rate" and the "Bank Loan Rate," both as defined below. The Repo Rate would be the highest current overnight repurchase agreement rate available to a lending Fund. The Bank Loan Rate for any day would be calculated by the InterFund Program Team, as defined below, on each day an InterFund Loan is made according to a formula established by each Fund's Board of Trustees, Board of Directors or Board of Managers, as applicable (each a "Board," and collectively the "Boards") intended to approximate the lowest interest rate at which a bank short-term loan would be available to the Fund. The formula would be based upon a publicly available rate (e.g., Federal funds rate and/or LIBOR) plus an additional spread of basis points and would vary with this rate so as to reflect changing bank loan rates. The initial formula and any subsequent modifications to the formula would be subject to the approval of each Fund's Board. In addition, the Board of each Fund would

periodically review the continuing appropriateness of reliance on the formula used to determine the Bank Loan Rate, as well as the relationship between the Bank Loan Rate and current bank loan rates that would be available to the Fund.

9. Certain members of the Adviser's and/or their affiliates' administrative and other personnel (the "InterFund Program Team"), which may include one or more investment professionals, including individuals involved in making investment decisions regarding short-term investments in the Money Market Funds ("Money Market portfolio managers"), would administer the InterFund Program. No portfolio manager of any Fund, (other than Money Market portfolio managers) would serve as a member of the InterFund Program Team. Under the proposed InterFund Program, the portfolio managers for each participating Fund could provide standing instructions to participate daily as a borrower or lender. The InterFund Program Team on each business day would collect data on the uninvested cash and borrowing requirements of all participating Funds. Once the InterFund Program Team has determined the aggregate amount of cash available for loans and borrowing demand, the InterFund Program Team would allocate loans among borrowing Funds without any further communication from the portfolio managers of the Funds. All allocations made by the InterFund Program Team will require the approval by at least one member of the InterFund Program Team who is a high level employee, other than a Money Market portfolio manager. Applicants anticipate that there typically will be more available uninvested cash each day than borrowing demand. Therefore, after the InterFund Program Team has allocated cash for Interfund Loans, the InterFund Program Team will invest any remaining cash in accordance with the standing instructions of the relevant portfolio manager or such remaining amounts will be invested directly by the portfolio managers of the Funds.

10. The InterFund Program Team would allocate borrowing demand and cash available for lending among the Funds on what the InterFund Program Team believes to be an equitable basis, subject to certain administrative procedures applicable to all Funds, such as the time of filing requests to participate, minimum loan lot sizes, and the need to minimize the number of transactions and associated administrative costs. To reduce transaction costs, each InterFund Loan

normally would be allocated in a manner intended to minimize the number of participants necessary to complete the loan transaction. The method of allocation and related administrative procedures would be approved by the Boards of the Funds, including a majority of the Board members who are not "interested persons," as defined in section 2(a)(19) of the Act ("Independent Board Members"), to ensure that both borrowing and lending Funds participate on an equitable basis.

11. The InterFund Program Team, on behalf of the Advisers, would: (a) Monitor the InterFund Loan Rate and the other terms and conditions of the InterFund Loans; (b) limit the borrowings and loans entered into by each Fund to ensure that they comply with the Fund's investment policies and limitations; (c) implement and follow procedures designed to ensure equitable treatment of each Fund; and (d) make quarterly reports to the Board of each Fund concerning any transactions by the applicable Fund under the InterFund Program and the InterFund Loan Rate charged.

12. The Advisers, through the InterFund Program Team, would administer the InterFund Program as disinterested fiduciaries as part of their duties under the investment management and administrative agreements with each Fund and would receive no additional fee as compensation for their services in connection with the administration of the InterFund Program. The Funds will bear transaction costs, including, without limitation, transaction, wire and other fees in connection with the facility, none of which would be paid to an Adviser. Such costs and fees would be no higher than those applicable for comparable bank loan transactions.

13. No Fund may participate in the InterFund Program unless: (a) The Fund has obtained shareholder approval for its participation, if such approval is required by law; (b) the Fund has fully disclosed all material information concerning the InterFund Program in its prospectus and/or statement of additional information; and (c) the Fund's participation in the InterFund Program is consistent with its investment objectives, investment restrictions, policies, limitations and organizational documents.

14. As part of the Board's review of the continuing appropriateness of a Fund's participation in the proposed InterFund Program as required by condition 14, the Board of the Fund, including a majority of the Independent Board Members, also will review the

process in place to appropriately assess: (i) If the Fund participates as a lender, any effect its participation may have on the Fund's liquidity risk; and (ii) if the Fund participates as a borrower, whether the Fund's portfolio liquidity is sufficient to satisfy its obligations under the facility along with its other liquidity needs.

15. In connection with the InterFund Program, applicants request an order under section 6(c) of the Act exempting them from the provisions of sections 18(f) and 21(b) of the Act; under section 12(d)(1)(J) of the Act exempting them from section 12(d)(1) of the Act; under sections 6(c) and 17(b) of the Act exempting them from sections 17(a)(1), 17(a)(2), and 17(a)(3) of the Act; and under section 17(d) of the Act and rule 17d-1 under the Act to permit certain joint arrangements and transactions.

Applicants' Legal Analysis

1. Section 17(a)(3) of the Act generally prohibits any affiliated person of a registered investment company, or affiliated person of an affiliated person, from borrowing money or other property from the registered investment company. Section 21(b) of the Act generally prohibits any registered management company from lending money or other property to any person, directly or indirectly, if that person controls or is under common control with that company. Section 2(a)(3)(C) of the Act defines an "affiliated person" of another person, in part, to be any person directly or indirectly controlling, controlled by, or under common control with, such other person. Section 2(a)(9) of the Act defines "control" as the "power to exercise a controlling influence over the management or policies of a company," but excludes circumstances in which "such power is solely the result of an official position with such company." Applicants state that the Funds may be under common control by virtue of having common investment advisers and/or by having common trustees, directors, managers and/or officers.

2. Section 6(c) of the Act provides that an exemptive order may be granted where an exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act. Section 17(b) of the Act authorizes the Commission to exempt a proposed transaction from section 17(a) provided that the terms of the transaction, including the consideration to be paid or received, are fair and reasonable and do not involve overreaching on the part of any person

concerned, and the transaction is consistent with the policy of the investment company as recited in its registration statement and with the general purposes of the Act. Applicants believe that the proposed arrangements satisfy these standards for the reasons discussed below.

3. Applicants assert that sections 17(a)(3) and 21(b) of the Act were intended to prevent a party with strong potential adverse interests to, and some influence over the investment decisions of, a registered investment company from causing or inducing the investment company to engage in lending transactions that unfairly inure to the benefit of such party and that are detrimental to the best interests of the investment company and its shareholders. Applicants assert that the proposed transactions do not raise these concerns because: (a) The Advisers, through the InterFund Program Team members, would administer the InterFund Program as disinterested fiduciaries as part of their duties under the investment management and administrative agreements with each Fund; (b) all InterFund Loans would consist only of uninvested cash reserves that the Fund otherwise would invest in short-term repurchase agreements or other short-term investments; (c) the InterFund Loans would not involve a greater risk than such other investments; (d) the lending Fund would receive interest at a rate higher than it could otherwise obtain through short-term repurchase agreements or certain other short-term investments; and (e) the borrowing Fund would pay interest at a rate lower than otherwise available to it under its bank loan agreements. Moreover, applicants assert that the other terms and conditions that applicants propose also would effectively preclude the possibility of any Fund obtaining an undue advantage over any other Fund.

4. Section 17(a)(1) of the Act generally prohibits an affiliated person of a registered investment company, or any affiliated person of such a person, from selling securities or other property to the investment company. Section 17(a)(2) of the Act generally prohibits an affiliated person of a registered investment company, or any affiliated person of such a person, from purchasing securities or other property from the investment company. Section 12(d)(1) of the Act generally prohibits a registered investment company from purchasing or otherwise acquiring any security issued by any other investment company except in accordance with the limitations set forth in that section.

5. Applicants state that the obligation of a borrowing Fund to repay an InterFund Loan could be deemed to constitute a security for the purposes of sections 17(a)(1) and 12(d)(1). Applicants also state that any pledge of securities to secure an InterFund Loan by the borrowing Fund to the lending Fund could constitute a purchase of securities for purposes of section 17(a)(2) of the Act. Section 12(d)(1)(j) of the Act provides that the Commission may exempt persons or transactions from any provision of section 12(d)(1) if and to the extent that such exemption is consistent with the public interest and the protection of investors. Applicants submit that the requested exemptions meet the standards set forth in sections 6(c), 12(d)(1)(j) and 17(b) of the Act and rule 17d-1 under the Act. Applicants also state that the requested relief from section 17(a)(2) of the Act meets the standards of section 6(c) and 17(b) because any collateral pledged to secure an InterFund Loan would be subject to the same conditions imposed by any other lender to a Fund that imposes conditions on the quality of or access to collateral for a borrowing (if the lender is another Fund) or the same or better conditions (in any other circumstance).

6. Applicants state that section 12(d)(1) was intended to prevent the pyramiding of investment companies in order to avoid imposing on investors additional and duplicative costs and fees attendant upon multiple layers of investment companies. Applicants submit that the proposed InterFund Program does not involve these abuses. Applicants note that there will be no duplicative costs or fees to the Funds or their shareholders, and that each Adviser will receive no additional compensation for its services in administering the InterFund Program. Applicants also note that the purpose of the proposed InterFund Program is to provide economic benefits for all the participating Funds and their shareholders. Section 18(f)(1) of the Act prohibits open-end investment companies from issuing any senior security except that a company is permitted to borrow from any bank, provided, that immediately after the borrowing, there is asset coverage of at least 300 per centum for all borrowings of the company. Under section 18(g) of the Act, the term "senior security" generally includes any bond, debenture, note or similar obligation or instrument constituting a security and evidencing indebtedness. Applicants request exemptive relief under section 6(c) from section 18(f)(1) to the limited extent

necessary to implement the InterFund Program (because the lending Funds are not banks).

7. Applicants believe that granting relief under section 6(c) is appropriate because the Funds would remain subject to the requirement of section 18(f)(1) that all borrowings of a Fund, including combined InterFund Loans and bank borrowings, have at least 300% asset coverage. Based on the conditions and safeguards described in the application, applicants also submit that to allow the Funds to borrow from other Funds pursuant to the proposed InterFund Program is consistent with the purposes and policies of section 18(f)(1).

8. Section 17(d) of the Act and rule 17d-1 under the Act generally prohibit an affiliated person of a registered investment company, or any affiliated person of such a person, when acting as principal, from effecting any joint transaction in which the investment company participates, unless, upon application, the transaction has been approved by the Commission. Rule 17d-1(b) under the Act provides that in passing upon an application filed under the rule, the Commission will consider whether the participation of the registered investment company in a joint enterprise, joint arrangement or profit sharing plan on the basis proposed is consistent with the provisions, policies and purposes of the Act and the extent to which such participation is on a basis different from or less advantageous than that of the other participants.

9. Applicants assert that the purpose of section 17(d) is to avoid overreaching by and unfair advantage to insiders. Applicants assert that the InterFund Program is consistent with the provisions, policies and purposes of the Act in that it offers both reduced borrowing costs and enhanced returns on loaned funds to all participating Funds and their shareholders. Applicants note that each Fund would have an equal opportunity to borrow and lend on equal terms consistent with its investment policies and fundamental investment limitations. Applicants assert that each Fund's participation in the proposed InterFund Program would be on terms that are no different from or less advantageous than that of other participating Funds.

Applicants' Conditions

Applicants agree that any order granting the requested relief will be subject to the following conditions:

1. The InterFund Loan Rate will be the average of the Repo Rate and the Bank Loan Rate.

2. On each business day when an interfund loan is to be made, the InterFund Program Team will compare the Bank Loan Rate with the Repo Rate and will make cash available for InterFund Loans only if the InterFund Loan Rate is: (a) More favorable to the lending Fund than the Repo Rate; and (b) more favorable to the borrowing Fund than the Bank Loan Rate.

3. If a Fund has outstanding bank borrowings, any InterFund Loan to the Fund will: (a) Be at an interest rate equal to or lower than the interest rate of any outstanding bank borrowing; (b) be secured at least on an equal priority basis with at least an equivalent percentage of collateral to loan value as any outstanding bank loan that requires collateral; (c) have a maturity no longer than any outstanding bank loan (and in any event not over seven days); and (d) provide that, if an event of default occurs under any agreement evidencing an outstanding bank loan to the Fund, that event of default by the Fund, will automatically (without need for action or notice by the lending Fund) constitute an immediate event of default under the interfund lending agreement which both (i) entitles the lending Fund to call the InterFund Loan immediately and exercise all rights with respect to any collateral and (ii) causes the call to be made if the lending bank exercises its right to call its loan under its agreement with the borrowing Fund.

4. A Fund may borrow on an unsecured basis through the InterFund Program only if the relevant borrowing Fund's outstanding borrowings from all sources immediately after the interfund borrowing total 10% or less of its total assets, provided that if the borrowing Fund has a secured loan outstanding from any other lender, including but not limited to another Fund, the lending Fund's InterFund Loan will be secured on at least an equal priority basis with at least an equivalent percentage of collateral to loan value as any outstanding loan that requires collateral. If a borrowing Fund's total outstanding borrowings immediately after an InterFund Loan would be greater than 10% of its total assets, the Fund may borrow through the InterFund Program only on a secured basis. A Fund may not borrow through the InterFund Program or from any other source if its total outstanding borrowings immediately after the borrowing would be more than 33⅓% of its total assets or any lower threshold provided for by the Fund's fundamental restriction or non-fundamental policy.

5. Before any Fund that has outstanding interfund borrowings may, through additional borrowings, cause its

outstanding borrowings from all sources to exceed 10% of its total assets, it must first secure each outstanding InterFund Loan by the pledge of segregated collateral with a market value at least equal to 102% of the outstanding principal value of the loan. If the total outstanding borrowings of a Fund with outstanding InterFund Loans exceed 10% of its total assets for any other reason (such as a decline in net asset value or because of shareholder redemptions), the Fund will within one business day thereafter either: (a) Repay all its outstanding InterFund Loans; (b) reduce its outstanding indebtedness to 10% or less of its total assets; or (c) secure each outstanding InterFund Loan by the pledge of segregated collateral with a market value at least equal to 102% of the outstanding principal value of the loan until the Fund's total outstanding borrowings cease to exceed 10% of its total assets, at which time the collateral called for by this condition 5 shall no longer be required. Until each InterFund Loan that is outstanding at any time that a Fund's total outstanding borrowings exceed 10% of its total assets is repaid or the Fund's total outstanding borrowings cease to exceed 10% of its total assets, the Fund will mark the value of the collateral to market each day and will pledge such additional collateral as is necessary to maintain the market value of the collateral that secures each outstanding InterFund Loan at least equal to 102% of the outstanding principal value of the InterFund Loans.

6. No Fund may lend to another Fund through the InterFund Program if the loan would cause the lending Fund's aggregate outstanding loans through the InterFund Program to exceed 15% of its current net assets at the time of the loan.

7. A Fund's InterFund Loans to any one Fund shall not exceed 5% of the lending Fund's net assets.

8. The duration of InterFund Loans will be limited to the time required to receive payment for securities sold, but in no event more than seven days. Loans effected within seven days of each other will be treated as separate loan transactions for purposes of this condition.

9. A Fund's borrowings through the InterFund Program, as measured on the day when the most recent loan was made, will not exceed the greater of 125% of the Fund's total net cash redemptions for the preceding seven calendar days or 102% of the Fund's sales fails for the preceding seven calendar days.

10. Each InterFund Loan may be called on one business day's notice by

a lending Fund and may be repaid on any day by a borrowing Fund.

11. A Fund's participation in the InterFund Program must be consistent with its investment restrictions, policies, limitations and organizational documents.

12. The InterFund Program Team will calculate total Fund borrowing and lending demand through the InterFund Program, and allocate InterFund Loans on an equitable basis among the Funds, without the intervention of any portfolio manager (other than a Money Market portfolio manager acting in his or her capacity as a member of the InterFund Program Team). All allocations will require the approval of at least one member of the InterFund Program Team who is high level employee and is not a Money Market portfolio manager. The InterFund Program Team will not solicit cash for the InterFund Program from any Fund or prospectively publish or disseminate loan demand data to portfolio managers (except to the extent that a Money Market portfolio manager has access to loan demand data). After the InterFund Program Team has allocated cash for InterFund Loans, any remaining cash will be invested in accordance with the standing instructions of the relevant portfolio manager or such remaining amounts will be invested directly by the portfolio managers of the Funds.

13. The InterFund Program Team will monitor the InterFund Loan Rate charged and the other terms and conditions of the InterFund Loans and will make a quarterly report to the Boards concerning the participation of the Funds in the InterFund Program and the terms and other conditions of any extensions of credit under the InterFund Program.

14. Each Board, including a majority of the Independent Board Members, will:

(a) Review, no less frequently than quarterly, the participation of each Fund it oversees in the InterFund Program during the preceding quarter for compliance with the conditions of any order permitting such participation;

(b) establish the Bank Loan Rate formula used to determine the interest rate on InterFund Loans;

(c) review, no less frequently than annually, the continuing appropriateness of the Bank Loan Rate formula; and

(d) review, no less frequently than annually, the continuing appropriateness of the participation in the InterFund Program by each Fund it oversees.

15. Each Fund will maintain and preserve for a period of not less than six

years from the end of the fiscal year in which any transaction by it under the InterFund Program occurred, the first two years in an easily accessible place, written records of all such transactions setting forth a description of the terms of the transaction, including the amount, the maturity and the InterFund Loan Rate, the rate of interest available at the time each InterFund Loan is made on overnight repurchase agreements and bank borrowings, and such other information presented to the Boards of the Funds in connection with the review required by conditions 13 and 14.

16. In the event an InterFund Loan is not paid according to its terms and the default is not cured within two business days from its maturity or from the time the lending Fund makes a demand for payment under the provisions of the interfund lending agreement, the Adviser to the lending Fund promptly will refer the loan for arbitration to an independent arbitrator selected by the Board of any Fund involved in the loan who will serve as arbitrator of disputes concerning InterFund Loans.³ The arbitrator will resolve any problem promptly, and the arbitrator's decision will be binding on both Funds. The arbitrator will submit, at least annually, a written report to the Board of each Fund setting forth a description of the nature of any dispute and the actions taken by the Funds to resolve the dispute.

17. The Advisers will prepare and submit to the Board for review an initial report describing the operations of the InterFund Program and the procedures to be implemented to ensure that all Funds are treated fairly. After the commencement of the InterFund Program, the Advisers will report on the operations of the InterFund Program at each Board's quarterly meetings. Each Fund's chief compliance officer, as defined in rule 38a-1(a)(4) under the Act, shall prepare an annual report for its Board each year that the Fund participates in the InterFund Program, that evaluates the Fund's compliance with the terms and conditions of the application and the procedures established to achieve such compliance. Each Fund's chief compliance officer will also annually file a certification pursuant to Item 77Q3 of Form N-SAR as such Form may be revised, amended or superseded from time to time, for each year that the Fund participates in the InterFund Program, that certifies

that the Fund and its Adviser have implemented procedures reasonably designed to achieve compliance with the terms and conditions of the order. In particular, such certification will address procedures designed to achieve the following objectives:

(a) That the InterFund Loan Rate will be higher than the Repo Rate but lower than the Bank Loan Rate;

(b) compliance with the collateral requirements as set forth in the application;

(c) compliance with the percentage limitations on interfund borrowing and lending;

(d) allocation of interfund borrowing and lending demand in an equitable manner and in accordance with procedures established by the Board; and

(e) that the InterFund Loan Rate does not exceed the interest rate on any third party borrowings of a borrowing Fund at the time of the InterFund Loan.

Additionally, each Fund's independent registered public accountants, in connection with their audit examination of the Fund, will review the operation of the InterFund Program for compliance with the conditions of the application and their review will form the basis, in part, of the auditor's report on internal accounting controls in Form N-SAR.

18. No Fund will participate in the InterFund Program, upon receipt of requisite regulatory approval, unless it has fully disclosed in its prospectus and/or statement of additional information all material facts about its intended participation.

For the Commission, by the Division of Investment Management, under delegated authority.

Robert W. Errett,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

Submission for OMB Review; Comment Request

Upon Written Request Copies Available
From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE., Washington, DC 20549-2736.

Extension:

Rules 7a-15 through 7a-37, SEC File No. 270-115, OMB Control No. 3235-0132.

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities

and Exchange Commission ("Commission") has submitted to the Office of Management and Budget this request for extension of the previously approved collection of information discussed below.

Rules 7a-15 through 7a-37 (17 CFR 260.7a-15—260.7a-37) under the Trust Indenture Act of 1939 (15 U.S.C. 77aaa *et seq.*) set forth the general requirements as to form and content of applications, statements and reports that must be filed under the Trust Indenture Act. The respondents are persons and entities subject to the requirements of the Trust Indenture Act. Trust Indenture Act Rules 7a-15 through 7a-37 are disclosure guidelines and do not directly result in any collection of information. The rules are assigned only one burden hour for administrative convenience.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid control number.

The public may view the background documentation for this information collection at the following Web site, www.reginfo.gov. Comments should be directed to: (i) Desk Officer for the Securities and Exchange Commission, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 10102, New Executive Office Building, Washington, DC 20503, or by sending an email to: ShaguftaAhmed@omb.eop.gov; and (ii) Pamela Dyson, Director/Chief Information Officer, Securities and Exchange Commission, c/o Remi Pavlik-Simon, 100 F Street NE., Washington, DC 20549 or send an email to: PRA_Mailbox@sec.gov. Comments must be submitted to OMB within 30 days of this notice.

Dated: August 5, 2016.

³ If the dispute involves Funds that do not have a common Board, the Board of each affected Fund will select an independent arbitrator that is satisfactory to each Fund.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-78499; File No. SR-NYSEArca-2016-106]

Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Specify in Exchange Rules the Exchange's Use of Data Feeds From Investors' Exchange, LLC for Order Handling and Execution, Order Routing, and Regulatory Compliance

August 8, 2016.

Pursuant to Section 19(b)(1)¹ of the Securities Exchange Act of 1934 (the "Act")² and Rule 19b-4 thereunder,³ notice is hereby given that on July 26, 2016, NYSE Arca, Inc. (the "Exchange" or "NYSE Arca") filed with the Securities and Exchange Commission (the "Commission") the proposed rule change as described in Items I, and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to specify in Exchange rules the Exchange's use of data feeds from Investors' Exchange, LLC for order handling and execution, order routing, and regulatory compliance. The proposed rule change is available on the Exchange's Web site at www.nyse.com, at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend NYSE Arca Equities Rule 7.37 ("Rule 7.37") and NYSE Arca Equities Rule 7.37P ("Rule 7.37P") to specify in Exchange rules which data feeds from Investors' Exchange, LLC ("IEX") that the Exchange would use for order handling and execution, order routing, and regulatory compliance.

On July 18, 2014, the Exchange filed a proposed rule change that clarified the Exchange's use of certain data feeds for order handling and execution, order routing, and regulatory compliance.⁴ As noted in that filing, the data feeds available for the purposes of order handling and execution, order routing, and regulatory compliance at the Exchange include the exclusive securities information processor ("SIP") data feeds⁵ or proprietary data feeds from individual market centers ("Direct Feed"). On February 24, 2015, the Exchange adopted Commentary .01 to Rule 7.37 to specify which data feeds that the Exchange uses for the handling, execution, and routing of orders, as well as for regulatory compliance.⁶

To reflect that IEX's application to register as a national securities exchange has been approved by the Commission⁷ and that IEX intends to begin quoting and trading as a registered exchange on August 19, 2016, the Exchange proposes to amend Commentary .01 to Rule 7.37 and Rule 7.37P(d) to specify which data feeds the Exchange would use for IEX. As proposed, the Exchange would use

⁴ See Securities Exchange Act Release No. 72708 (July 29, 2014), 79 FR 45572 (Aug. 5, 2014) (SR-NYSEArca-2014-82).

⁵ The SIP feeds are disseminated pursuant to effective joint-industry plans as required by Rule 603(b) of Regulation NMS, 17 CFR 242.603(b). The three joint-industry plans are: (1) The CTA Plan, which is operated by the Consolidated Tape Association and disseminates transaction information for securities with the primary listing market on exchanges other than NASDAQ Stock Market LLC ("Nasdaq"); (2) the CQ Plan, which disseminates consolidated quotation information for securities with their primary listing on exchanges other than Nasdaq; and (3) the Nasdaq UTP Plan, which disseminates consolidated transaction and quotation information for securities with their primary listing on Nasdaq.

⁶ See Securities Exchange Act Release No. 74409 (March 2, 2015), 80 FR 12221 (March 6, 2015) (SR-NYSEArca-2015-11). Rule 7.37P, which is based on Rule 7.37, specifies order execution, including use of data feeds, on the Exchange's Pillar trading platform. See Securities Exchange Release No. 75494 (July 20, 2015), 80 FR 44170 (July 24, 2015) (SR-NYSEArca-2015-38).

⁷ See Securities Exchange Act Release No. 78101 (June 17, 2016), 81 FR 41142 (June 23, 2016) (File No. 10-222).

the SIP Data Feed for IEX and would not have a secondary source.

2. Statutory Basis

The proposed rule change is consistent with Section 6(b) of the Act,⁸ in general, and furthers the objectives of Section 6(b)(5),⁹ in particular, because it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to, and perfect the mechanism of, a free and open market and a national market system and, in general, to protect investors and the public interest. The Exchange believes that the proposed rule change removes impediments to and perfects the mechanism of a free and open market because it provides enhanced transparency to better assess the quality of an exchange's execution and routing services.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed change is not designed to address any competitive issue but rather would provide the public and investors with information about which data feeds the Exchange uses for execution and routing decisions.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act¹⁰ and Rule 19b-4(f)(6) thereunder.¹¹ Because the proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if

⁸ 15 U.S.C. 78f(b).

⁹ 15 U.S.C. 78f(b)(5).

¹⁰ 15 U.S.C. 78s(b)(3)(A)(iii).

¹¹ 17 CFR 240.19b-4(f)(6).

¹ 15 U.S.C. 78s(b)(1).

² 15 U.S.C. 78a.

³ 17 CFR 240.19b-4.

consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act and Rule 19b-4(f)(6)(iii) thereunder.¹²

A proposed rule change filed pursuant to Rule 19b-4(f)(6) under the Act¹³ normally does not become operative for 30 days after the date of its filing. However, Rule 19b-4(f)(6)(iii)¹⁴ permits the Commission to designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has asked the Commission to waive the 30-day operative delay so that the proposal may become operative immediately upon filing. The Exchange states that waiver of the 30-day operative delay would permit the Exchange to immediately enhance transparency and to accommodate the projected date that IEX will begin operating as a national securities exchange. Based on the foregoing, the Commission believes the waiver of the operative delay is consistent with the protection of investors and the public interest. Therefore, the Commission hereby waives the operative delay and designates the proposal operative upon filing.¹⁵

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act.

¹² In addition, Rule 19b-4(f)(6) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and the text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

¹³ 17 CFR 240.19b-4(f)(6).

¹⁴ 17 CFR 240.19b-4(f)(6)(iii).

¹⁵ For purposes only of waiving the 30-day operative delay, the Commission has also considered the proposed rule's impact on efficiency, competition, and capital formation. See 15 U.S.C. 78c(f).

Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File No. SR-NYSEArca-2016-106 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549-1090.

All submissions should refer to File No. SR-NYSEArca-2016-106. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File No. SR-NYSEArca-2016-106, and should be submitted on or before September 2, 2016.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹⁶

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-78503; File No. SR-CHX-2016-13]

Self-Regulatory Organizations; Chicago Stock Exchange, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Update or Adopt Various Fees for Services Provided by the Financial Industry Regulatory Authority

August 8, 2016

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),¹ and Rule 19b-4² thereunder, notice is hereby given that on August 4, 2016, the Chicago Stock Exchange, Inc. ("CHX" or the "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

CHX proposes to amend its Schedule of Fees and Assessments (the "Fee Schedule") to update or adopt various fees for services provided by the Financial Industry Regulatory Authority ("FINRA"). The text of this proposed rule change is available on the Exchange's Web site at (www.chx.com) and in the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the CHX included statements concerning the purpose of and basis for the proposed rule changes and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The CHX has prepared summaries, set forth in sections A, B and C below, of the most significant aspects of such statements.

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Section J.5 of the Fee Schedule to (1) update various current fees for examinations administered by FINRA and (2) adopt the Series 57 Securities Trader Examination fee,³ so that such fees are identical to corresponding fees reflected under Section 4(c) of the Schedule A of the FINRA By-Laws. FINRA administers these programs on behalf of the exchanges and therefore the fees are payable directly to FINRA through the WebCRD.⁴ Specifically, the Exchange proposes the following amendments:

- Amend the Series 7 Examination fee from \$290 to \$305.⁵
- Amend the Series 14 Examination fee from \$335 to \$350.⁶
- Amend the Series 27 Examination fee from \$115 to \$120.⁷
- Replace reference to the "Series 56 Examination" with the "Series 57 Examination" and adopt a corresponding fee of \$120.⁸

Moreover, given that the Proprietary Trader Continuing Education program is no longer available,⁹ the Exchange proposes to eliminate reference to the "Proprietary Trader Continuing Education (S501)" and the corresponding \$60 fee.

The Exchange further proposes to add "Member Regulation" to the title of Section J of the CHX Fee Schedule, as the Exchange's Member Regulation department is responsible for ensuring that Participants comply with the relevant WebCRD fees, and "WebCRD" to the title of Section J.5 of the CHX Fee Schedule, as all fees under Section J.5

³ The Exchange recently adopted the Securities Trader registration category and corresponding Series 57 Securities Trader Examination, which replaced the Proprietary Trader registration category and corresponding Series 56 Proprietary Examination requirement. See CHX Article 6, Rule 3(a); see also Securities Exchange Act Release No. 78445 (July 29, 2016) (SR-CHX-2016-11).

⁴ WebCRD is the central licensing and registration system for the U.S. securities industry. The CRD system enables individuals and firms seeking registration with multiple states and self-regulatory organizations to do so by submitting a single form, fingerprint card and a combined payment of fees to FINRA. Through the CRD system, FINRA maintains the qualification, employment and disciplinary histories of registered associated persons of broker-dealers.

⁵ See Section 4(c) of the Schedule A of the FINRA By-Laws.

⁶ *Id.*

⁷ *Id.*

⁸ *Id.*

⁹ See CHX Article 6, Rule 11(a)(3); see also *supra* note 3.

are paid directly to FINRA through the WebCRD, as noted above.

2. Statutory Basis

The Exchange believes that its proposal to amend its fee schedule is consistent with Section 6(b) of the Act¹⁰ in general, and furthers the objectives of Section 6(b)(4) of the Act¹¹ in particular, in that it is an equitable allocation of reasonable dues, fees and other charges among Exchange members and issuers and other persons using its facilities. The Exchange believes that the proposal to adopt and update the various FINRA administered examination fees is an equitable allocation of dues, fees and other charges because the fee change applies equally to all Participants and the amended or adopted fees are identical to the corresponding fees charged by FINRA pursuant to Section 4(c) of the Schedule A of the FINRA By-Laws.

Moreover, the Exchange believes that harmonizing the FINRA administered examination fees with those of FINRA and the other national securities exchanges would further the objectives of Section 6(b)(5) of the Act¹² by removing impediments to and perfecting the mechanism of a free and open market and a national market system.

In addition, the Exchange believes that amending the title to Section J of the Fee Schedule to add the term "Member Regulation" would provide a complete description of the Exchange departments that are responsible for ensuring compliance with the fees set forth thereunder and amending the title to Section J.5 of the Fee Schedule clarifies that the fees set forth thereunder are paid directly to FINRA, which further the objectives of Section 6(b)(1) of the Act¹³ in that it further enables the Exchange to be so organized as to have the capacity to be able to carry out the purposes of the Act and to comply, and to enforce compliance by its Participants and persons associated with its Participants, with the provisions of the Act, the rules and regulations thereunder, and the rules of the Exchange.

B. Self-Regulatory Organization's Statement of Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. Given that

the proposed fee change applies to all Participants and harmonizes the CHX Fee Schedule with corresponding fees charged by FINRA pursuant to Section 4(c) of the Schedule A of the FINRA By-Laws, the proposal has no effect on competition.

C. Self-Regulatory Organization's Statement on Comments Regarding the Proposed Rule Changes Received From Members, Participants or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change is effective upon filing pursuant to Section 19(b)(3)(A)(ii) of the Act¹⁴ and subparagraph(f)(2) of Rule 19b-4 thereunder¹⁵ because it establishes or changes a due, fee or other charge imposed by the Exchange.

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File No. SR-CHX-2016-13 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549-1090.

All submissions should refer to File No. SR-CHX-2016-13. This file number should be included on the subject line if email is used. To help the Commission process and review your

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

Proposed Collection; Comment Request

Upon Written Request, Copies Available From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE., Washington, DC 20549-2736.

Extension:

Form N-2; SEC File No. 270-21, OMB Control No. 3235-0026.

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*) the Securities and Exchange Commission (the "Commission") is soliciting comments on the collections of information summarized below. The Commission plans to submit this existing collection of information to the Office of

Management and Budget ("OMB") for extension and approval.

The title for the collection of information is "Form N-2 (17 CFR 239.14 and 274.11a-1) under the Securities Act of 1933 and under the Investment Company Act of 1940, Registration Statement of Closed-End Management Investment Companies." Form N-2 is the form used by closed-end management investment companies ("closed-end funds") to register as investment companies under the Investment Company Act of 1940 (15 U.S.C. 80a-1 *et seq.*) ("Investment Company Act") and to register their securities under the Securities Act of 1933 (15 U.S.C. 77a *et seq.*) ("Securities Act"). The primary purpose of the registration process is to provide disclosure of financial and other information current and potential investors for the purpose of evaluating an investment in a security. Form N-2 also permits closed-end funds to provide investors with a prospectus containing information required in a registration statement prior to the sale or at the time of confirmation of delivery of securities. The form also may be used by the Commission in its regulatory review, inspection, and policy-making roles.

The Commission estimates that there are 136 initial registration statements and 30 post-effective amendments to initial registration statements filed on Form N-2 annually and that the average number of portfolios referenced in each initial filing and post-effective amendment is 1. The Commission further estimates that the hour burden for preparing and filing an initial registration statement on Form N-2 is 515 hours per portfolio, and the hour burden for preparing and filing a post-effective amendment on Form N-2 is 107 hours per portfolio. The estimated annual hour burden for preparing and filing initial registration statements is 70,040 hours (136 initial registration statements × 1 portfolio × 515 hours per portfolio). The estimated annual hour burden for preparing and filing post-effective amendments is 3,210 hours (30 post-effective amendments × 1 portfolio × 107 hours per portfolio). The estimated total annual hour burden for Form N-2, therefore, is estimated to be 73,250 hours (70,040 hours + 3,210 hours).

The information collection requirements imposed by Form N-2 are mandatory. Responses to the collection of information will not be kept confidential. An agency may not conduct or sponsor, and a person is not required to respond to a collection of

information unless it displays a currently valid control number.

The public may view the background documentation for this information collection at the following Web site, www.reginfo.gov. Comments should be directed to: (i) Desk Officer for the Securities and Exchange Commission, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 10102, New Executive Office Building, Washington, DC 20503, or by sending an email to: Shagufta_Ahmed@omb.eop.gov; and (ii) Pamela Dyson, Director/Chief Information Officer, Securities and Exchange Commission, c/o Remi Pavlik-Simon, 100 F Street NE., Washington, DC 20549 or send an email to: PRA_Mailbox@sec.gov. Comments must be submitted to OMB within 30 days of this notice.

Dated: August 5, 2016.

Robert W. Errett,

Deputy Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-78500; File No. SR-NYSEMKT-2016-72]

Self-Regulatory Organizations; NYSE MKT LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend NYSE MKT Rule 19—Equities To Specify in Exchange Rules the Exchange's Use of Data Feeds From Investors' Exchange, LLC for Order Handling and Execution, Order Routing, and Regulatory Compliance

August 8, 2016.

Pursuant to Section 19(b)(1)¹ of the Securities Exchange Act of 1934 (the "Act")² and Rule 19b-4 thereunder,³ notice is hereby given that on July 26, 2016, NYSE MKT LLC (the "Exchange" or "NYSE MKT") filed with the Securities and Exchange Commission (the "Commission") the proposed rule change as described in Items I, and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

¹ 15 U.S.C.78s(b)(1).

² 15 U.S.C. 78a.

³ 17 CFR 240.19b-4.

¹⁶ 17 CFR 200.30-3(a)(12).

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend NYSE MKT Rule 19—Equities to specify in Exchange rules the Exchange's use of data feeds from Investors' Exchange, LLC for order handling and execution, order routing, and regulatory compliance. The proposed rule change is available on the Exchange's Web site at www.nyse.com, at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend NYSE MKT Rule 19—Equities ("Rule 19") to specify in Exchange rules which data feeds from Investors' Exchange, LLC ("IEX") that the Exchange would use for order handling and execution, order routing, and regulatory compliance.

On July 18, 2014, the Exchange filed a proposed rule change that clarified the Exchange's use of certain data feeds for order handling and execution, order routing, and regulatory compliance.⁴ As noted in that filing, the data feeds available for the purposes of order handling and execution, order routing, and regulatory compliance at the Exchange include the exclusive securities information processor ("SIP") data feeds.⁵ On February 24, 2015, the

⁴ See Securities Exchange Act Release No. 72709 (July 29, 2014), 79 FR 45513 (Aug. 5, 2014) (SR-NYSEMKT-2014-62).

⁵ The SIP feeds are disseminated pursuant to effective joint-industry plans as required by Rule 603(b) of Regulation NMS. 17 CFR 242.603(b). The three joint-industry plans are: (1) The CTA Plan, which is operated by the Consolidated Tape Association and disseminates transaction information for securities with the primary listing market on exchanges other than NASDAQ Stock Market LLC ("Nasdaq"); (2) the CQ Plan, which

Exchange adopted Supplementary Material .01 to Rule 19 to specify which data feeds that the Exchange uses for the handling, execution, and routing of orders, as well as for regulatory compliance.⁶

To reflect that IEX's application to register as a national securities exchange has been approved by the Commission⁷ and that IEX intends to begin quoting and trading as a registered exchange on August 19, 2016, the Exchange proposes to amend Supplementary Material .01 to Rule 19, to specify which data feeds the Exchange would use for IEX. As proposed, the Exchange would use the SIP Data Feed for IEX and would not have a secondary source.

2. Statutory Basis

The proposed rule change is consistent with Section 6(b) of the Act,⁸ in general, and furthers the objectives of Section 6(b)(5),⁹ in particular, because it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to, and perfect the mechanism of, a free and open market and a national market system and, in general, to protect investors and the public interest. The Exchange believes that the proposed rule change removes impediments to and perfects the mechanism of a free and open market because it provides enhanced transparency to better assess the quality of an exchange's execution and routing services.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed change is not designed to address any competitive issue but rather would provide the public and investors with information about which data feeds the Exchange uses for execution and routing decisions.

disseminates consolidated quotation information for securities with their primary listing on exchanges other than Nasdaq; and (3) the Nasdaq UTP Plan, which disseminates consolidated transaction and quotation information for securities with their primary listing on Nasdaq.

⁶ See Securities Exchange Act Release No. 74408 (March 2, 2015), 80 FR (March 6, 2015) (SR-NYSEMKT-2015-11).

⁷ See Securities Exchange Act Release No. 78101 (June 17, 2016), 81 FR 41142 (June 23, 2016) (File No. 10-222).

⁸ 15 U.S.C. 78f(b).

⁹ 15 U.S.C. 78f(b)(5).

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act¹⁰ and Rule 19b-4(f)(6) thereunder.¹¹ Because the proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act and Rule 19b-4(f)(6)(iii) thereunder.¹²

A proposed rule change filed pursuant to Rule 19b-4(f)(6) under the Act¹³ normally does not become operative for 30 days after the date of its filing. However, Rule 19b-4(f)(6)(iii)¹⁴ permits the Commission to designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has asked the Commission to waive the 30-day operative delay so that the proposal may become operative immediately upon filing. The Exchange states that waiver of the 30-day operative delay would permit the Exchange to immediately enhance transparency and to accommodate the projected date that IEX will begin operating as a national securities exchange. Based on the foregoing, the Commission believes the waiver of the operative delay is consistent with the protection of investors and the public interest. Therefore, the Commission hereby waives the operative delay and

¹⁰ 15 U.S.C. 78s(b)(3)(A)(iii).

¹¹ 17 CFR 240.19b-4(f)(6).

¹² In addition, Rule 19b-4(f)(6) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and the text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

¹³ 17 CFR 240.19b-4(f)(6).

¹⁴ 17 CFR 240.19b-4(f)(6)(iii).

designates the proposal operative upon filing.¹⁵

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File No. SR-NYSEMKT-2016-72 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549-1090. All submissions should refer to File No. SR-NYSEMKT-2016-72. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE.,

¹⁵ For purposes only of waiving the 30-day operative delay, the Commission has also considered the proposed rule's impact on efficiency, competition, and capital formation. See 15 U.S.C. 78c(f).

Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File No. SR-NYSEMKT-2016-72, and should be submitted on or before September 2, 2016.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹⁶

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-78504; File No. SR-CHX-2016-14]

Self-Regulatory Organizations; Chicago Stock Exchange, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend the Continuing Education Fees

August 8, 2016.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),¹ and Rule 19b-4² thereunder, notice is hereby given that on August 1, 2016, the Chicago Stock Exchange, Inc. ("CHX" or the "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

CHX proposes to amend its Schedule of Fees and Assessments (the "Fee Schedule") to amend the Exchange's Continuing Education fees. The text of this proposed rule change is available on the Exchange's Web site at (www.chx.com) and in the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the CHX included statements concerning the purpose of and basis for the proposed rule changes and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The CHX has prepared summaries, set forth in sections A, B and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

On August 8, 2015, the Commission approved SR-FINRA-2015-015 relating to proposed changes to FINRA Rule 1250 to provide for Web-based delivery for completing the Regulatory Element of the Continuing Education requirements ("CE Online Program").³ Moreover, as of July 1, 2016, FINRA required all participants to complete their Regulatory Element session using the CE Online Program; provided that participants who, pursuant to the Americans with Disabilities Act, need accommodations in completing their session due to a disability may apply for an accommodation and complete their session at a test center.⁴ Pursuant to Section 4(f) of the Schedule A of the FINRA By-Laws, the fee for all Regulatory Element Continuing Education programs is \$55.00.⁵

The Exchange currently utilizes the S101 General Program and S201 Supervisor Program that are part of the Securities Industry Continuing Education Program.⁶ The Exchange recently filed a separate proposed rule change to adopt the changes set forth in SR-FINRA-2015-015 to provide for

² 17 CFR 240.19b-4.

Web-based delivery of the Regulatory Element of the Continuing Education programs.⁷

Consistent with Section 4(f) of the Schedule A of the FINRA By-Laws, the Exchange now proposes to amend Section J.5 of the CHX Fee Schedule to provide that the Continuing Education Regulatory Element fee for the S101 and S201 programs will be \$55.⁸

2. Statutory Basis

The Exchange believes that its proposal to amend its fee schedule is consistent with Section 6(b) of the Act⁹ in general, and furthers the objectives of Section 6(b)(4) of the Act¹⁰ in particular, in that it is an equitable allocation of reasonable dues, fees and other charges among Exchange members and issuers and other persons using its facilities. The Exchange believes that the proposal to set the Continuing Education fee at \$55 is an equitable allocation of dues, fees and other charges because the fee change applies equally to all persons associated with Participants. In addition, the Exchange believes that the amended fee is an equitable allocation of dues, fees and other charges as it will apply uniformly to all persons associated with the Participants who participate in the continuing education program through FINRA.

Moreover, the Exchange believes that harmonizing the Continuing Education fee with those of FINRA and the other national securities exchanges would further the objectives of Section 6(b)(5) of the Act¹¹ by removing impediments to and perfecting the mechanism of a free and open market and a national market system.

B. Self-Regulatory Organization's Statement of Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. Since the proposed rule change applies to all persons associated with Participants who are required to fulfill Continuing

Education requirements, the proposal has no effect on competition. Moreover, the Exchange believes that the harmonization of the Continuing Education fee across the various markets will reduce burdens on competition by removing impediments to participation in the national market system.

C. Self-Regulatory Organization's Statement on Comments Regarding the Proposed Rule Change Received From Members, Participants or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change is effective upon filing pursuant to Section 19(b)(3)(A)(ii) of the Act¹² and subparagraph(f)(2) of Rule 19b-4 thereunder¹³ because it establishes or changes a due, fee or other charge imposed by the Exchange.

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File No. SR-CHX-2016-14 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549-1090.
- All submissions should refer to File No. SR-CHX-2016-14. This file number should be included on the subject line if email is used. To help the

Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the CHX. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File No. SR-CHX-2016-14 and should be submitted on or before September 2, 2016.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹⁴

Robert W. Errett,
Deputy Secretary.

Securities and Exchange Commission (the “Commission”) the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Section 3 of NYSE Arca Equities Rule 8 (Trading of Certain Equity Derivatives) to extend the effectiveness of the Exchange Traded Product (“ETP”) Incentive Program until July 31, 2017. The proposed rule change is available on the Exchange’s Web site at www.nyse.com, at the principal office of the Exchange, and at the Commission’s Public Reference Room.

II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization’s Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Section 3 of NYSE Arca Equities Rule 8 (Trading of Certain Equity Derivatives)

to extend the effectiveness of the ETP Incentive Program⁴ until July 31, 2017.⁵ The ETP Incentive Program is a pilot program designed to incentivize quoting and trading in ETPs and to add competition among existing qualified Market Makers.⁶ In addition, the ETP Incentive Program is designed to enhance the market quality for ETPs by incentivizing Market Makers to take LMM⁷ assignments in certain lower-

⁴ The Commission approved the ETP Incentive Program on a pilot basis in Securities Exchange Act Release No. 69706 (June 6, 2013), 78 FR 35340 (June 12, 2013) (SR-NYSEArca-2013-34) (“ETP Incentive Program Release”). The Exchange subsequently filed to extend the original pilot program for the ETP Incentive Program until September 4, 2015. *See* Securities Exchange Act Release No. 72963 (September 3, 2014), 79 FR 53492 (September 9, 2014) (SR-NYSEArca-2014-99) (notice of filing and immediate effectiveness of proposed rule change extending effectiveness of the ETP Incentive Program until September 4, 2015). Most recently, the Exchange filed to extend the pilot program for the ETP Incentive Program until September 4, 2016 (*See* Securities Exchange Act Release No. 75846 (September 4, 2015), 80 FR 54646 (September 10, 2015) (SR-NYSEArca-2015-78) (notice of filing and immediate effectiveness of proposed rule change extending effectiveness of the ETP Incentive Program until September 4, 2016) (“2015 Extension Notice”). In addition, the Exchange filed a proposed rule change to amend Rules 7.25(c) and 8.800(b) to provide that exchange-traded products (“ETPs”) already listed on the Exchange can be admitted to the ETP Incentive Program on a monthly basis rather than at the beginning of each quarter. *See* Securities Exchange Act Release No. 75282 (June 24, 2015), 80 FR 37340 (June 30, 2015) (SR-NYSEArca-2015-52) (notice of filing and immediate effectiveness of proposed rule change amending NYSE Arca Equities Rules 7.25 and 8.800 to allow an issuer to elect for its ETP to participate in the Crowd Participant Program or the ETP Incentive Program monthly rather than quarterly and to extend the effectiveness of the Crowd Participant Program until June 23, 2016). In SR-NYSEArca-2015-52, the Exchange stated that the Exchange anticipates that expanding the opportunity for issuers to enter the ETP Incentive Program will facilitate the provision of extra liquidity to lower-volume ETPs by incentivizing more Market Makers to take Lead Market Maker (“LMM”) assignments in certain lower-volume ETPs.

⁵ The ETP Incentive Program is scheduled to end on September 4, 2016. For purposes of the ETP Incentive Program, ETPs include securities listed on the Exchange under the following rules: NYSE Arca Equities Rules 5.2(j)(3) (Investment Company Units), 5.2(j)(5) (Equity Gold Shares), 8.100 (Portfolio Depository Receipts), 8.200 (Trust Issued Receipts), 8.201 (Commodity-Based Trust Shares), 8.202 (Currency Trust Shares), 8.203 (Commodity Index Trust Shares), 8.204 (Commodity Futures Trust Shares), 8.300 (Partnership Units), 8.600 (Managed Fund Shares), and 8.700 (Managed Trust Securities).

⁶ A Market Maker is an Equity Trading Permit Holder that acts as a Market Maker pursuant to NYSE Arca Equities Rule 7. *See* NYSE Arca Equities Rule 1.1(v). An Equity Trading Permit Holder is a sole proprietorship, partnership, corporation, limited liability company, or other organization in good standing that has been issued an Equity Trading Permit. *See* NYSE Arca Equities Rule 1.1(n).

⁷ The LMM program is designed to incentivize firms to take on the LMM designation and foster liquidity provision and stability in the market. In

volume ETPs by offering an alternative fee structure for such LMMs that would be funded from the Exchange’s general revenues. The ETP Incentive Program is designed to improve the quality of market for lower-volume ETPs, thereby incentivizing issuers to list them on the Exchange. Moreover, as described in the ETP Incentive Program Release, the Exchange believes that the ETP Incentive Program, which is entirely voluntary, encourages competition among markets for issuers’ listings and among Market Makers for LMM assignments.

The Exchange proposes to extend the current operation of the ETP Incentive Program until July 31, 2017 to allow the Commission, the Exchange, LMMs, and issuers to further assess the impact of such program before proposing to make it available to other securities and implementing the program on a permanent basis.⁸ Issuers began participating in the ETP Incentive Program following the extension of the first pilot period. The Exchange believes that extending the ETP Incentive Program pilot period for an additional approximately eleven months will provide additional time to assess the impact of the program for these issuers and to provide time for additional issuers to participate in the ETP Incentive Program so that the Commission, the Exchange, LMMs, and issuers may assess the impact of the program before making it available to other securities or implementing it on a permanent basis.⁹

In accordance with the 2015 Extension Notice, the Exchange, on April 4, 2016, posted on its Web site an “Assessment Report” regarding the ETP

order to accomplish this, the Exchange currently provides LMMs with an opportunity to receive incrementally higher transaction credits and incur incrementally lower transaction fees (“LMM Rates”) compared to standard liquidity maker-taker rates (“Standard Rates”). The Exchange generally employs a maker-taker transactional fee structure, whereby an Equity Trading Permit Holder that removes liquidity is charged a fee (“Take Rate”), and an Equity Trading Permit Holder that provides liquidity receives a credit (“Make Rate”). *See* Trading Fee Schedule, available at https://www.nyse.com/publicdocs/nyse/markets/nyse-arca/NYSE_Arca_Marketplace_Fees.pdf.

⁸ The Exchange notes that any proposed further continuance of the ETP Incentive Program, a proposal to make the ETP Incentive Program permanent, or a proposal to make such program available to other securities would require a rule filing with the Commission pursuant to Section 19(b) of the Act and Rule 19b-4 thereunder.

⁹ The Exchange has provided to the Commission monthly market quality reports relating to the ETP Incentive Program for the period October 2014 through June 2016, which are posted to the Exchange’s Web site at <https://www.nyse.com/products/etp-incentive-program>.

Incentive Program.¹⁰ The Assessment Report examined the performance of the ETPs in the Incentive Program during the entire period in which they were in the program, and provided statistical analyses with respect to the following factors: volume (consolidated average daily volume (“CADV”) and NYSE Arca average daily volume); national best bid and offer (“NBBO”) bid/ask spread differential; LMM participation rates; NYSE Arca market share; LMM time spent at the inside; LMM time spent within \$0.03 of the inside; percentage of time NYSE Arca had the best price with the best size; LMM quoted spread; and LMM quoted depth. The Assessment Report assessed whether the ETP Incentive Program has met its proposed goals to incentivize market makers to take LMM assignments in certain lower-volume ETPs. The Assessment Report concluded that, while the results in certain cases show strong evidence of higher market quality in some ETPs based on participation in the ETP Incentive Program, the data is less conclusive for other ETPs due, in large part to the limited data available. In addition, a number of variables impact the ability to assess the limited data described in the Assessment Report, including market conditions, product variability, and product inception date. Therefore, the Assessment Report concluded that it is difficult to state conclusively whether the Incentive Program has met its objectives. Consistent with the conclusions of the Assessment Report, the Exchange believes that the Incentive Program should continue as a pilot program for an additional approximately eleven months in order to provide more time for participation so that the Exchange, the Commission, and market participants can meaningfully assess whether the Incentive Program will meet its proposed goals.

Prior to the end of the pilot period ending July 31, 2017, the Exchange will post a report relating to the ETP Incentive Program (the “Assessment Report”) on its Web site three months before the end of the pilot period or at the time it files to terminate the pilot, whichever comes first. The proposed Assessment Report would list the program objectives that are the focus of the pilot and, for each, provide (a) a statistical analysis that includes evidence that is sufficient to inform a reader about whether the program has met those objectives during the pilot

period, along with (b) a narrative explanation of whether and how the evidence indicates the pilot has met the objective, including both strengths and weaknesses of the evidence in this regard. The Assessment Report also would include a discussion of (a) the procedures used in selecting any samples that are used in constructing tables or statistics for inclusion in the Assessment Report, (b) the definitions of any variables and statistics reported in the tables, including test statistics, (c) the statistical significance levels of any test statistics and (d) other statistical or qualitative information that may enhance the usefulness of the Assessment Report as a basis for evaluating the performance of the program. The Assessment Report would present statistics on product performance relative to the performance of comparable or other suitable benchmark products (including test statistics that permit the reader to evaluate the statistical significance of any differences reported or discussed in the report), along with information on the procedures that were used to identify those comparable or benchmark products, the characteristics of each comparable or benchmark products, the characteristics of each product that is the focus of the pilot, the procedures used in selecting the time horizon of the sample and the sensitivity of reported statistics to changes in the time horizon of the sample.

This filing is not otherwise intended to address any other issues and the Exchange is not aware of any problems that Equity Trading Permit Holders or issuers would have in complying with the monthly selection provision or the proposed extension of the pilot program.

2. Statutory Basis

The proposed rule change is consistent with Section 6(b) of the Act,¹¹ in general, and furthers the objectives of Section 6(b)(5) of the Act,¹² in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest.

The Exchange believes that the ETP Incentive Program is designed to enhance the market quality for ETPs by incentivizing Market Makers to take LMM assignments in certain lower

volume ETPs by offering an alternative fee structure for such LMMs that would be funded from the Exchange’s general revenues. The ETP Incentive Program is designed to improve the quality of market for lower-volume ETPs, thereby incentivizing them to list on the Exchange. Moreover, as described in the ETP Incentive Program Release, the Exchange believes that the ETP Incentive Program, which is entirely voluntary, encourages competition among markets for issuers’ listings and among Market Makers for LMM assignments.

The Exchange believes that, by providing additional time for issuers to participate in the ETP Incentive Program, through an extension of the pilot period until July 31, 2017, the ETP Incentive Program would continue to provide an opportunity for rewarding competitive liquidity-providing LMMs, with associated requirements for quoting by LMMs at the National Best Bid or National Best Offer. The ETP Incentive Program, therefore, has the potential to enhance competition among liquidity providers and thereby improve execution quality on the Exchange. An extension of such pilot period will permit additional time to collect data on the ETP Incentive Program so that the Commission, the Exchange, LMMs, and issuers may assess the impact of the ETP Incentive Program before making it available to other securities. The Exchange will continue to monitor the efficacy of the ETP Incentive Program during the extended pilot period. Prior to the end of the pilot period ending July 31, 2017, the Exchange proposes to post an Assessment Report on its Web site three months before the end of the pilot period or at the time it files to terminate the pilot, whichever comes first. The proposed Assessment Report would list the program objectives that are the focus of the pilot as well as additional information described above.

B. Self-Regulatory Organization’s Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

The proposed extension to the pilot period for the ETP Incentive Program is not designed to address any competitive issues but rather to program additional time for the Commission, the Exchange, LMMs and issuers to assess the impact of such program.

¹⁰ The Assessment Report is available at https://www.nyse.com/publicdocs/nyse/products/etp-funds/ETP_Incentive_Program_Assessment_Report.pdf.

¹¹ 15 U.S.C. 78f(b).

¹² 15 U.S.C. 78f(b)(5).

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act¹³ and Rule 19b-4(f)(6) thereunder.¹⁴ Because the proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act and Rule 19b-4(f)(6)(iii) thereunder.

A proposed rule change filed under Rule 19b-4(f)(6)¹⁵ normally does not become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b-4(f)(6)(iii),¹⁶ the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest.

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B)¹⁷ of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File Number SR-NYSEARCA-2016-110 on the subject line.

Paper Comments

- Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549-1090.

All submissions should refer to File Number SR-NYSEARCA-2016-110. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-NYSEARCA-2016-110 and should be submitted on or before September 2, 2016.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹⁸

Robert W. Errett,
Deputy Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-78505; File No. SR-MIAX-2016-23]

Self-Regulatory Organizations; Miami International Securities Exchange LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Its Fee Schedule

August 8, 2016

Pursuant to the provisions of Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")¹ and Rule 19b-4 thereunder,² notice is hereby given that on August 1, 2016, Miami International Securities Exchange LLC ("MIAX" or "Exchange") filed with the Securities and Exchange Commission ("Commission") a proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange is filing a proposal to amend the MIAX Options Fee Schedule ("Fee Schedule") to eliminate certain Web CRD Fees in order to address the transition of the Regulatory Element of Continuing Education ("CE") to the FINRA CE Online System®.

The text of the proposed rule change is available on the Exchange's Web site at http://www.miaxoptions.com/filter/wotitle/rule_filing, at MIAX's principal office, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

¹³ 15 U.S.C. 78s(b)(3)(A)(iii).

¹⁴ 17 CFR 240.19b-4(f)(6).

¹⁵ 17 CFR 240.19b-4(f)(6).

¹⁶ 17 CFR 240.19b-4(f)(6)(iii).

¹⁷ 15 U.S.C. 78s(b)(2)(B).

¹⁸ 17 CFR 200.30-3(a)(12).

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to amend Section 2(c) of the Regulatory Fees section of the Fee Schedule, Web CRD Fees, to (1) delete the \$100 Continuing Education Fee for All Registrations, which relates to test center delivery of the Regulatory Element of CE, and (2) clarify that the \$55 Continuing Education Fee for All Registrations if Web-based shall apply to all registrations without regard to mode of session delivery.

Specifically, the Exchange proposes to (1) delete the \$100 CE Fee in its entirety, and (2) with respect to the \$55 CE Fee, delete reference to Web-based delivery and specify that it is a "session" fee.

MIAX is proposing such Fee Schedule amendments in conjunction with FINRA's transition to CE Online and its phase out of test center delivery of the CE Regulatory Element.³

Background

On July 31, 2015, the Commission approved [sic] SR-FINRA-2015-015 relating to proposed changes to FINRA Rules to provide for Web-based delivery completion of the Regulatory Element of CE requirements. Pursuant to the rule change, the Regulatory Element of CE programs is administered through Web-based delivery via the FINRA CE Online System as of January 4, 2016. Pursuant to the rule change, the Regulatory Element of CE programs also continued to be offered at test centers until no later than six months after January 4, 2016. Test-center delivery of the Regulatory Element has been phased out effective July 1, 2016.⁴ On July 11, 2016, the

³ See Securities Exchange Act Release No. 78281 (July 11, 2016), 81 FR 46133 (July 15, 2016) (SR-FINRA-2016-025) (Notice of Filing and Immediate Effectiveness of a Proposed Rule Change Relating to the Fee for the Regulatory Element of Continuing Education). See also Securities Exchange Act Release No. 75581 (July 31, 2015), 80 FR 47018 (August 6, 2015) (SR-FINRA-2015-015) (Notice of Filing and Immediate Effectiveness of a Proposed Rule Change to Provide a Web-based Delivery Method for Completing the Regulatory Element of the Continuing Education Requirements), *Regulatory Notice* 15-28 (August 2015) and *Information Notice*, May 16, 2016 (Elimination of Continuing Education Delivery at Testing Centers).

⁴ See *Information Notice*, May 16, 2016 (Elimination of Continuing Education Delivery at Testing Centers). Notwithstanding such test center phase out, participants who may need accommodations in completing their CE session due to a disability pursuant to the Americans with Disabilities Act of 1990, Public Law 101-336, 104 Stat. 328 (1990) ("ADA") may apply for an accommodation and complete their CE Regulatory Element session at a test center. See FINRA's CE Online Delivery Accommodation Web page,

Commission approved SR-FINRA-2016-025 relating to proposed changes to FINRA Fees for the Regulatory Element of CE.

In January 2016 the Exchange amended its Rules,⁵ in consultation with FINRA and the other exchanges, to provide for Web-based delivery of the CE Regulatory Element for registered persons.

Proposal

The Exchange now proposes to amend its Fee Schedule to delete the \$100 CE Fee for All Registrations since the test center delivery option for the Regulatory Element will no longer be offered⁶ and the \$100 fee currently charged for administration of non-Web-based CE programs is therefore retired.⁷ Therefore, the Exchange proposes to delete this fee from its current Fee Schedule.

The Exchange further proposes to clarify that the \$55 CE Fee will now generally apply to all CE sessions without further specifying the Web-based delivery mode since there will no longer be more than one mode of CE delivery.⁸ Therefore, the Exchange proposes to delete the reference to Web-based delivery from Section 2(c) of the Fee Schedule and specify that it is a "session" fee in order to provide clarity and avoid confusion.

2. Statutory Basis

The Exchange believes that its proposal to amend its Fee Schedule is consistent with Section 6(b) of the Act⁹ in general, and furthers the objectives of Section 6(b)(4) of the Act¹⁰ in particular, in that it is an equitable allocation of reasonable fees and other charges among Exchange members and

available at <http://www.finra.org/industry/accommodations-continuing-education-ce-online-participants>.

⁵ See Securities Exchange Act Release No. 76892 (January 13, 2016), 81 FR 3206 (January 20, 2016) (SR-MIAX-2016-01).

⁶ See *supra* note 4.

⁷ See Securities Exchange Act Release No. 78281 (July 11, 2016), 81 FR 46133 (July 15, 2016) (SR-FINRA-2016-025) (Notice of Filing and Immediate Effectiveness of a Proposed Rule Change Relating to the Fee for the Regulatory Element of Continuing Education).

⁸ With the exception of participants who may need accommodations in completing their CE session due to a disability pursuant to the ADA and to whom the session fee of \$55 for the Regulatory Element shall apply regardless of whether the session is completed at a test center or through the CE Online System. See Securities Exchange Act Release No. 78281 (July 11, 2016), 81 FR 46133 (July 15, 2016) (SR-FINRA-2016-025) (Notice of Filing and Immediate Effectiveness of a Proposed Rule Change Relating to the Fee for the Regulatory Element of Continuing Education).

⁹ 15 U.S.C. 78f(b).

¹⁰ 15 U.S.C. 78f(b)(4).

issuers and other persons using its facilities.

The Exchange believes that the proposal is fair, equitable and not unreasonably discriminatory because the fee change applies equally to all Members and persons associated with Members. The Exchange believes that the proposal is reasonable because FINRA will administer the CE program only through the FINRA CE Online System and will no longer offer a testing center CE delivery option, except as specifically noted above in which case FINRA has aligned its \$55 session fee for all participants.¹¹ In addition, the Exchange believes this session fee is equitable and not unfairly discriminatory as it will apply uniformly to all Members and persons associated with the Members who choose to participate in the CE program provided through FINRA.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange further believes that the proposal does not impose any burden on competition because FINRA has made, and the Exchange believes that the other exchanges will make, similar changes to their fee schedules.¹²

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act,¹³ and Rule 19b-4(f)(2)¹⁴ thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine

¹¹ See *supra* note 7.

¹² See *id.*

¹³ 15 U.S.C. 78s(b)(3)(A)(ii).

¹⁴ 17 CFR 240.19b-4(f)(2).

whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File No. SR-MIAX-2016-23 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549-1090.

All submissions should refer to File No. SR-MIAX-2016-23. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street, NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the MIAAX. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File No. SR-MIAX-2016-23 and should be submitted on or before September 2, 2016.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹⁵

Robert W. Errett,
Deputy Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

Proposed Collection; Comment Request

Upon Written Request, Copy Available From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE., Washington, DC 20549-2736.

Extension:

Rule 0-4, SEC File No. 270-569, OMB Control No. 3235-0633.

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (the "Commission") is soliciting comments on the collection of information summarized below. The Commission plans to submit this collection of information to the Office of Management and Budget for extension and approval.

Rule 0-4 (17 CFR 275.0-4) under the Investment Advisers Act of 1940 ("Act" or "Advisers Act") (15 U.S.C. 80b-1 *et seq.*) entitled "General Requirements of Papers and Applications," prescribes general instructions for filing an application seeking exemptive relief with the Commission. Rule 0-4 currently requires that every application for an order for which a form is not specifically prescribed and which is executed by a corporation, partnership or other company and filed with the Commission contain a statement of the applicable provisions of the articles of incorporation, bylaws or similar documents, relating to the right of the person signing and filing such application to take such action on behalf of the applicant, and a statement that all such requirements have been complied with and that the person signing and filing the application is fully authorized to do so. If such authorization is dependent on resolutions of stockholders, directors, or other bodies, such resolutions must be attached as an exhibit to or quoted in the application. Any amendment to the application must contain a similar statement as to the applicability of the original statement of authorization. When any application or amendment is signed by an agent or

attorney, rule 0-4 requires that the power of attorney evidencing his authority to sign shall state the basis for the agent's authority and shall be filed with the Commission. Every application subject to rule 0-4 must be verified by the person executing the application by providing a notarized signature in substantially the form specified in the rule. Each application subject to rule 0-4 must state the reasons why the applicant is deemed to be entitled to the action requested with a reference to the provisions of the Act and rules thereunder, the name and address of each applicant, and the name and address of any person to whom any questions regarding the application should be directed. Rule 0-4 requires that a proposed notice of the proceeding initiated by the filing of the application accompany each application as an exhibit and, if necessary, be modified to reflect any amendment to the application.

The requirements of rule 0-4 are designed to provide Commission staff with the necessary information to assess whether granting the orders of exemption are necessary and appropriate in the public interest and consistent with the protection of investors and the intended purposes of the Act.

Applicants for orders under the Advisers Act can include registered investment advisers, affiliated persons of registered investment advisers, and entities seeking to avoid investment adviser status, among others. Commission staff estimates that it receives up to 3 applications per year submitted under rule 0-4 of the Act seeking relief from various provisions of the Advisers Act and, in addition, up to 9 applications per year submitted under Advisers Act rule 206(4)-5, which addresses certain "pay to play" practices and also provides the Commission the authority to grant applications seeking relief from certain of the rule's restrictions. Although each application typically is submitted on behalf of multiple applicants, the applicants in the vast majority of cases are related entities and are treated as a single respondent for purposes of this analysis. Most of the work of preparing an application is performed by outside counsel and, therefore, imposes no hourly burden on respondents. The cost outside counsel charges applicants depends on the complexity of the issues covered by the application and the time required. Based on conversations with applicants and attorneys, the cost for applications ranges from approximately \$12,800 for preparing a well-precedent, routine (or otherwise less involved)

¹⁵ 17 CFR 200.30-3(a)(12).

application to approximately \$200,000 to prepare a complex or novel application. We estimate that the Commission receives 1 of the most time-consuming applications annually, 2 applications of medium difficulty, and 9 of the least difficult applications subject to rule 0-4.¹ This distribution gives a total estimated annual cost burden to applicants of filing all applications of \$402,200 [(1 × \$200,000) + (2 × \$43,500) + (9 × \$12,800)]. The estimate of annual cost burden is made solely for the purposes of the Paperwork Reduction Act, and is not derived from a comprehensive or even representative survey or study of the costs of Commission rules and forms.

The requirements of this collection of information are required to obtain or retain benefits. Responses will not be kept confidential. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid control number.

Written comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted in writing within 60 days of this publication.

Please direct your written comments to Pamela Dyson, Chief Information Officer, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549; or send an email to: PRA_Mailbox@sec.gov.

Dated: August 9, 2016.

Robert W. Errett,

Deputy Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-78501; File No. SR-ICC-2016-007]

Self-Regulatory Organizations; ICE Clear Credit LLC; Order Approving Proposed Rule Change To Revise the ICC End-of-Day Price Discovery Policies and Procedures

August 8, 2016

I. Introduction

On April 22, 2016, ICE Clear Credit LLC ("ICC") filed with the Securities and Exchange Commission ("Commission"), pursuant to Section 19(b)(1) of the Securities Exchange Act ("Act")¹ and Rule 19b-4 thereunder,² a proposed rule change relating to ICC's End-of-Day Price Discovery Policies and Procedures (the "EOD Policy"). The proposed rule change was published for comment in the **Federal Register** on May 11, 2016.³ On June 23, 2016, the Commission extended the time period in which to either approve, disapprove, or institute proceedings to determine whether to disapprove the proposed rule change to August 9, 2016.⁴ The Commission did not receive comments on the proposed rule change. For the reasons discussed below, the Commission is approving the proposed rule change.

II. Description of the Proposed Rule Change

The principal purpose of the proposed rule change is to revise the EOD Policy to change the calculation of single name firm trade ("Firm Trade") notional limits to be at a Clearing Participant ("CP") affiliate group level.

As part of ICC's end-of-day price discovery process, ICC CPs are required to submit end-of-day prices for specific instruments related to their open interest at ICC. ICC determines end-of-day levels directly from these CP price submissions using a proprietary algorithm. To encourage CPs to provide high quality end-of-day submissions, on random days, ICC selects a subset of instruments which are eligible for Firm Trades. In order to determine Firm Trade requirements, the algorithm sorts and ranks all CP submissions and identifies "crossed and/or locked markets." Crossed markets are pairs of

CP submitted prices generated by the sorting and ranking process for which the bid price of one CP is above the offer price of the matched CP. The algorithm identifies locked markets, where the bid and the offer are equal, in a similar fashion.

ICC designates certain crossed and/or locked markets as Firm Trades and CPs are entered into cleared transactions. ICC establishes pre-defined notional amounts for Firm Trades. According to ICC, no single Firm Trade can have a larger notional amount than specified by the pre-defined notional amount for the relevant instrument. On a given Firm Trade day, all potential-trades resulting from the cross-and-lock algorithm in any Firm Trade eligible instrument are designated Firm Trades, unless they breach a CP's notional limits.

Currently single name Firm Trade notional limits are set at the CP level. According to ICC, it designed the Firm Trade system to incentivize trading desks to provide quality end-of-day price submissions for use in its end-of-day price discovery process, while limiting the total overnight risk that a given institution may be required to manage in case of submission errors or outlying pricing submissions which may lead to Firm Trades. One mechanism introduced to provide these protections was single name Firm Trade notional limits per CP. ICC believes that at the time of its introduction, this mechanism achieved its goal of limiting overnight risk limits per institution. However, with the increase in client clearing and in multiple CP memberships per holding company, ICC asserts that the limit provided to a given institution is multiples of that originally contemplated.

In addition, because of recent changes to the EOD Policy to extend the process for determining Firm Trades to include all submissions, including those classified as outlying pricing submissions (or "obvious errors"),⁵ ICC asserts that CPs are eligible to receive Firm Trades on a wider range of price submissions. Due to the broadened scope of the Firm Trade process, ICC asserts a heightened interest in adjusting the allocation process so that CPs are not over-penalized for Firm Trades in terms of overnight risk exposure.

In order to maintain the original intent of the end-of-day price discovery process, ICC has proposed changes to its EOD Policy to implement single name Firm Trade notional limits at the CP affiliate group level, as opposed to the

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

³ Securities Exchange Act Release No. 34-77771 (May 5, 2016), 81 FR 29309 (May 11, 2016) (SR-ICC-2016-007).

⁴ Securities Exchange Act Release No. 34-78144 (June 23, 2016), 81 FR 42018 (June 28, 2016) (SR-ICC-2016-007).

⁵ See Securities Exchange Act Release No. 34-74053 (January 14, 2015), 80 FR 2985 (January 21, 2015) (SR-ICC-2015-001).

¹ The estimated 9 least difficult applications include the estimated 9 applications per year submitted under Advisers Act rule 206(4)-5.

CP level. ICC represents that the proposed changes will return the process to its original design and limit the total overnight risk that a given institution may be required to manage in the case of submission errors or outlying pricing submissions which may lead to Firm Trades.

A “CP affiliate group” will be defined as the set of all affiliated CPs (*i.e.* any CPs that own, are owned by, or are under common ownership with another CP). According to ICC, as the sequence of crosses is considered, the executed single name Firm Trade notional value will be tracked for all CPs in a CP affiliate group. ICC states that no additional single name Firm Trades will be executed against any CP in a CP affiliate group once the CP affiliate group notional limit for single name Firm Trades is reached. ICC asserts there are no changes to the Firm Trade algorithm as a result of these changes. ICC further asserts that setting single name Firm Trade notional limits on an affiliate group basis is consistent with price submission practices where end-of-day submissions from multiple affiliated entities often reflect the institution’s overall view on the market.

ICC states that the proposal returns single name Firm Trade notional limits to the original design while maintaining the system’s price submission incentives. ICC represents that all CPs within an affiliate group will still be subject to potential Firm Trades for any given submission, on a randomized basis. ICC also asserts that though Firm Trade notional limits will be implemented at the CP affiliate group level, the potential implication for a given trading desk of providing an off-market submission for a given instrument remains the same. ICC believes there will be no change in price submission behavior as a result of the changes, and the Firm Trade process will remain an effective tool for ensuring quality price submissions.

III. Discussion and Commission Findings

Section 19(b)(2)(C) of the Act⁶ directs the Commission to approve a proposed rule change of a self-regulatory organization if the Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to such self-regulatory organization. Section 17A(b)(3)(F) of the Act⁷ requires, among other things, that the rules of a clearing agency be designed to promote the

prompt and accurate clearance and settlement of securities transactions, and to the extent applicable, derivative agreements, contracts and transactions, to assure the safeguarding of securities and funds which are in the custody or control of the clearing agency or for which it is responsible and, in general, to protect investors and the public interest. Section 17A(b)(3)(F)⁸ of the Act also requires that the rules of a clearing agency are not designed to permit unfair discrimination among participants in the use of the clearing agency.

The proposed application of the Firm Trade notional limit to CP affiliate groups is intended to manage what is, in ICC’s view, an inappropriate overnight risk to its members without negatively impacting the integrity of its price discovery process. Moreover, the proposed rule change is intended to apply the EOD Policy fairly to participants, and ICC has represented that the proposed rule change is consistent with price submission practices where end-of-day submissions from multiple affiliated entities often reflect the institution’s overall view on the market. As such, the Commission believes that the proposed rule change is designed to promote the prompt and accurate clearance and settlement of securities transactions, derivatives agreements, contracts, and transactions within the meaning of Section 17A(b)(3)(F)⁹ of the Act.

IV. Conclusion

On the basis of the foregoing, the Commission finds that the proposal is consistent with the requirements of the Act and in particular with the requirements of Section 17A of the Act¹⁰ and the rules and regulations thereunder.¹¹

IT IS THEREFORE ORDERED, pursuant to Section 19(b)(2) of the Act,¹² that the proposed rule change (File No. SR-ICC-2016-007) be, and hereby is, approved.¹³

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹⁴

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-78498; File No. SR-NYSE-2016-52]

Self-Regulatory Organizations; New York Stock Exchange LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Rule 19 To Specify in Exchange Rules the Exchange’s Use of Data Feeds From Investors’ Exchange, LLC for Order Handling and Execution, Order Routing, and Regulatory Compliance

August 8, 2016.

Pursuant to Section 19(b)(1)¹ of the Securities Exchange Act of 1934 (the “Act”)² and Rule 19b-4 thereunder,³ notice is hereby given that on July 26, 2016, New York Stock Exchange LLC (“NYSE” or the “Exchange”) filed with the Securities and Exchange Commission (the “Commission”) the proposed rule change as described in Items I, and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Rule 19 to specify in Exchange rules the Exchange’s use of data feeds from Investors’ Exchange, LLC for order handling and execution, order routing, and regulatory compliance. The proposed rule change is available on the Exchange’s Web site at www.nyse.com, at the principal office of the Exchange, and at the Commission’s Public Reference Room.

II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

¹ 15 U.S.C. 78s(b)(1).

² 15 U.S.C. 78a.

³ 17 CFR 240.19b-4.

⁶ 15 U.S.C. 78s(b)(2)(C).

⁷ 15 U.S.C. 78q-1(b)(3)(F).

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Rule 19 to specify in Exchange rules which data feeds from Investors' Exchange, LLC ("IEX") that the Exchange would use for order handling and execution, order routing, and regulatory compliance.

On July 18, 2014, the Exchange filed a proposed rule change that clarified the Exchange's use of certain data feeds for order handling and execution, order routing, and regulatory compliance.⁴ As noted in that filing, the data feeds available for the purposes of order handling and execution, order routing, and regulatory compliance at the Exchange include the exclusive securities information processor ("SIP") data feeds.⁵ On February 24, 2015, the Exchange adopted Supplementary Material .01 to Rule 19 to specify which data feeds that the Exchange uses for the handling, execution, and routing of orders, as well as for regulatory compliance.⁶

To reflect that IEX's application to register as a national securities exchange has been approved by the Commission⁷ and that IEX intends to begin quoting and trading as a registered exchange on August 19, 2016, the Exchange proposes to amend Supplementary Material .01 to Rule 19, to specify which data feeds the Exchange would use for IEX. As proposed, the Exchange would use the SIP Data Feed for IEX and would not have a secondary source.

2. Statutory Basis

The proposed rule change is consistent with Section 6(b) of the Act,⁸

⁴ See Securities Exchange Act Release No. 72710 (July 29, 2014), 79 FR 45511 (Aug. 5, 2014) (SR-NYSE-2014-38).

⁵ The SIP feeds are disseminated pursuant to effective joint-industry plans as required by Rule 603(b) of Regulation NMS. 17 CFR 242.603(b). The three joint-industry plans are: (1) The CTA Plan, which is operated by the Consolidated Tape Association and disseminates transaction information for securities with the primary listing market on exchanges other than NASDAQ Stock Market LLC ("Nasdaq"); (2) The CQ Plan, which disseminates consolidated quotation information for securities with their primary listing on exchanges other than Nasdaq; and (3) the Nasdaq UTP Plan, which disseminates consolidated transaction and quotation information for securities with their primary listing on Nasdaq.

⁶ See Securities Exchange Act Release No. 74410 (March 2, 2015), 80 FR 12240 (March 6, 2015) (SR-NYSE-2015-09).

⁷ See Securities Exchange Act Release No. 78101 (June 17, 2016), 81 FR 41142 (June 23, 2016) (File No. 10-222).

⁸ 15 U.S.C. 78f(b).

in general, and furthers the objectives of Section 6(b)(5),⁹ in particular, because it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to, and perfect the mechanism of, a free and open market and a national market system and, in general, to protect investors and the public interest. The Exchange believes that the proposed rule change removes impediments to and perfects the mechanism of a free and open market because it provides enhanced transparency to better assess the quality of an exchange's execution and routing services.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed change is not designed to address any competitive issue but rather would provide the public and investors with information about which data feeds the Exchange uses for execution and routing decisions.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act¹⁰ and Rule 19b-4(f)(6) thereunder.¹¹ Because the proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act and Rule 19b-4(f)(6)(iii) thereunder.¹²

⁹ 15 U.S.C. 78f(b)(5).

¹⁰ 15 U.S.C. 78s(b)(3)(A)(iii).

¹¹ 17 CFR 240.19b-4(f)(6).

¹² In addition, Rule 19b-4(f)(6) requires a self-regulatory organization to give the Commission

A proposed rule change filed pursuant to Rule 19b-4(f)(6) under the Act¹³ normally does not become operative for 30 days after the date of its filing. However, Rule 19b-4(f)(6)(iii)¹⁴ permits the Commission to designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has asked the Commission to waive the 30-day operative delay so that the proposal may become operative immediately upon filing. The Exchange states that waiver of the 30-day operative delay would permit the Exchange to immediately enhance transparency and to accommodate the projected date that IEX will begin operating as a national securities exchange. Based on the foregoing, the Commission believes the waiver of the operative delay is consistent with the protection of investors and the public interest. Therefore, the Commission hereby waives the operative delay and designates the proposal operative upon filing.¹⁵

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or

written notice of its intent to file the proposed rule change, along with a brief description and the text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

¹³ 17 CFR 240.19b-4(f)(6).

¹⁴ 17 CFR 240.19b-4(f)(6)(iii).

¹⁵ For purposes only of waiving the 30-day operative delay, the Commission has also considered the proposed rule's impact on efficiency, competition, and capital formation. See 15 U.S.C. 78c(f).

• Send an email to rule-comments@sec.gov. Please include File No. SR–NYSE–2016–52 on the subject line.

Paper Comments

• Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File No. SR–NYSE–2016–52. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File No. SR–NYSE–2016–52, and should be submitted on or before September 2, 2016.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹⁶

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (“PRA”) (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (“Commission”) has submitted to the Office of Management and Budget (“OMB”) a request for extension of the previously approved collection of information provided for in Rule 31 (17 CFR 240.31) and Form R31 (17 CFR 249.11) under the Securities Exchange Act of 1934 (15 U.S.C. 78ee.) (“Exchange Act”).

Section 31 of the Exchange Act requires the Commission to collect fees and assessments from national securities exchanges and national securities associations (collectively, “self-regulatory organizations” or “SROs”) based on the volume of their securities transactions. To collect the proper amounts, the Commission adopted Rule 31 and Form R31 under the Exchange Act whereby the SROs must report to the Commission the volume of their securities transactions and the Commission, based on those data, calculates the amount of fees and assessments that the SROs owe pursuant to Section 31. Rule 31 and Form R31 require the SROs to provide this data on a monthly basis.

Currently, there are 23 respondents under Rule 31: 19 national securities exchanges, one security futures exchange, and one national securities association subject to the collection of information requirements of Rule 31; there are additionally two registered clearing agencies that are required to provide certain data in their possession needed by the SROs to complete Form R31, although these two entities are not themselves required to complete and submit Form R31. The Commission estimates that the total burden for all 23 respondents is 390 hours per year. The Commission notes that, based on previous and current experience, it estimates an additional three new national securities exchanges will become registered and subject to the reporting requirements of Rule 31 over the course of the authorization period and incur a burden of 18 hours per year. Thus, the Commission estimates the total burden for the existing and expected new respondents to be 408 hours per year.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information

under the PRA unless it displays a currently valid OMB control number.

The public may view background documentation for this information collection at the following Web site: www.reginfo.gov. Comments should be directed to: (i) Desk Officer for the Securities and Exchange Commission, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 10102, New Executive Office Building, Washington, DC 20503, or by sending an email to: Shagufta_Ahmed@omb.eop.gov; and (ii) Pamela Dyson, Director/Chief Information Officer, Securities and Exchange Commission, c/o Remi Pavlik-Simon, 100 F Street NE., Washington, DC 20549, or by sending an email to: PRA_Mailbox@sec.gov. Comments must be submitted to OMB within 30 days of this notice.

Dated: August 9, 2016.

Robert W. Errett,

Deputy Secretary.

BILLING CODE 8025–01–P

SURFACE TRANSPORTATION BOARD**[Docket No. AB 1100X]****Pacific Harbor Line, Inc.—
Discontinuance of Service
Exemption—in Los Angeles County,
CA**

Pacific Harbor Line, Inc. (PHL), a Class III rail carrier, has filed a verified notice of exemption under 49 CFR pt. 1152 subpart F—*Exempt Abandonments and Discontinuances of Service* to discontinue service over an approximately 3.6-mile rail line in the Port of Los Angeles, between approximately milepost 4.00, north of Front Street and east of Gaffey Street Lead, and south to the end of the Line in Los Angeles County, CA (the Line). The Line traverses United States Postal Service Zip Code 90731.

PHL has certified that: (1) No local traffic has moved over the Line for at least two years; (2) overhead traffic on the Line, if any, can be rerouted over other lines; (3) no formal complaint filed by a user of rail service on the Line (or by a state or local government entity acting on behalf of such user) regarding cessation of service over the Line either is pending before the Surface Transportation Board or any U.S. District Court or has been decided in favor of a complainant within the two-year period; and (4) the requirements at 49 CFR 1105.12 (newspaper publication), and 49 CFR 1152.50(d)(1) (notice to governmental agencies) have been met.

As a condition to this exemption, any employee adversely affected by the discontinuance shall be protected under *Oregon Short Line Railroad—Abandonment Portion Goshen Branch Between Firth & Ammon, in Bingham & Bonneville Counties, Idaho*, 360 I.C.C. 91 (1979). To address whether this condition adequately protects affected employees, a petition for partial revocation under 49 U.S.C. 10502(d) must be filed.

Provided no formal expression of intent to file an offer of financial assistance (OFA) to subsidize continued rail service has been received, this exemption will become effective on September 13, 2016 (50 days after the filing of the exemption), unless stayed pending reconsideration. Petitions to stay that do not involve environmental issues and formal expressions of intent to file an OFA to subsidize continued rail service under 49 CFR 1152.27(c)(2)¹

¹ Each OFA must be accompanied by the filing fee, which is currently set at \$1,600. See 49 CFR 1002.2(f)(25).

must be filed by August 22, 2016.² Petitions to reopen must be filed by September 1, 2016, with the Surface Transportation Board, 395 E Street SW., Washington, DC 20423-0001.

A copy of any petition filed with the Board should be sent to PHL's representative: Rose-Michele Nardi, 1701 Pennsylvania Ave. NW., Suite 300, Washington, DC 20006.

If the verified notice contains false or misleading information, the exemption is void ab initio.

Board decisions and notices are available on our Web site at "WWW.STB.DOT.GOV."

Decided: August 5, 2016.

By the Board, Joseph H. Dettmar, Acting Director, Office of Proceedings.

Jeffrey Herzig,
Clearance Clerk.

[FR Doc. 2016-19233 Filed 8-11-16; 8:45 am]

BILLING CODE 4915-01-P

SURFACE TRANSPORTATION BOARD**[Docket No. FD 34533 (Sub-No. 1)]****Southwestern Railroad, Inc.—
Amended Lease and Operation
Exemption—BNSF Railway Company**

Southwestern Railroad, Inc. (SWRR), a Class III rail carrier, has filed a verified notice of exemption under 49 CFR 1150.41 to continue to lease and operate approximately 227.6 miles of rail line, located in New Mexico, from BNSF Railway Company (BNSF), as follows: (1) The Carlsbad Subdivision between milepost 0.5 at Clovis and milepost 183.0 at Carlsbad; (2) the Carlsbad Yard;¹ (3) the Carlsbad Industrial Spur between milepost 0.0 at Carlsbad and milepost 20.0 near Carlsbad; and (4) the Loving Industrial Spur between milepost 0.0 at Carlsbad and milepost 20.0 at Loving.

SWRR and BNSF entered into a lease agreement in 2004,² and they agreed to a fifth amendment to the lease on June 13, 2016.³ SWRR states that the current amendment modifies the original

² Because PHL is seeking to discontinue service, not to abandon the Line, trail use/rail banking and public use conditions are not appropriate. Because there will be environmental review during abandonment, this discontinuance does not require an environmental review.

¹ SWRR states that there are no mileposts associated with the approximately 5.1 miles of rail line located in the Carlsbad Yard.

² See *Sw. R.R.—Lease & Operation Exemption—BNSF Ry.*, FD 34533 (STB served Oct. 22, 2004).

³ SWRR states that the lease previously had been amended four times and that notice of the most recent amendment requiring Board approval was published in *Southwestern Railroad—Lease & Operation Exemption—BNSF Railway*, FD 35855 (STB served Oct. 1, 2014).

agreement to: (1) Change the termination date of the existing agreement to January 17, 2017; and (2) confirm that upon termination, BNSF can immediately renew operations on the line notwithstanding that SWRR will not as of that date have obtained discontinuance authority.

SWRR has certified that its projected annual revenues as a result of this transaction will not exceed those that would qualify it as a Class III rail carrier. SWRR anticipates that its projected annual revenues will exceed \$5 million. Therefore, SWRR is required, at least 60 days before this exemption is to become effective, to send notice of the transaction to the national offices of the labor unions with employees on the affected line, to post a copy of the notice at the workplace of the employees on the affected line, and to certify to the Board that it has done so. 49 CFR 1150.42(e). On June 28, 2016, and again in its verified notice of exemption, SWRR certified that on or before June 28, 2016, SWRR complied with the requirements of 49 CFR 1150.42(e) by posting a notice of its intent to undertake the proposed transaction at the workplace of the employees on the affected line. SWRR did not serve a copy of the notice of intent on any labor unions because it asserts the line does not have any unionized labor.

SWRR states that this transaction does not include any interchange commitment that prohibits SWRR from interchanging traffic with a third party or limits SWRR's ability to interchange with a third party.

SWRR states that it expects to consummate the transaction on or after August 28, 2016, the effective date of the exemption (30 days after the verified notice was filed).

If the notice contains false or misleading information, the exemption is void ab initio. Petitions to revoke the exemption under 49 U.S.C. 10502(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the effectiveness of the exemption. Petitions for stay must be filed no later than August 19, 2016 (at least seven days before the exemption becomes effective).

An original and 10 copies of all pleadings, referring to Docket No. FD 34533 (Sub-No. 1), must be filed with the Surface Transportation Board, 395 E Street SW., Washington, DC 20423-0001. In addition, one copy of each pleading must be served on William A. Mullins, Baker & Miller PLLC, 2401 Pennsylvania Ave. NW., Suite 300, Washington, DC 20037.

Board decisions and notices are available on our Web site at “WWW.STB.DOT.GOV.”

Decided: August 9, 2016.

By the Board, Rachel D. Campbell, Director, Office of Proceedings.

Tammy Lowery,
Clearance Clerk.

BILLING CODE 4915–01–P

SURFACE TRANSPORTATION BOARD

[Docket No. AB 33 (Sub-No. 330X)]

Union Pacific Railroad Company— Discontinuance of Service Exemption—in Port of Los Angeles’ San Pedro Subdivision, Los Angeles, CA

Union Pacific Railroad Company (UP) has filed a verified notice of exemption¹ under 49 CFR part 1152 subpart F—*Exempt Abandonments and Discontinuances of Service* to discontinue a 3.6-mile freight rail operating easement over a portion of the San Pedro Industrial Lead a.k.a The West Basin Lead on the San Pedro Subdivision (the Line) in Los Angeles County, CA. The Line extends from milepost 4.00 north of Front Street and east of the Gaffey Street Lead past milepost 6.60, where the track splits, to the end of both the eastern and western leads as shown on Revised Exhibit C to the UP’s supplemental notice filed on August 3, 2016. The total mileage for the Line includes both leads. The Line traverses United States Postal Service Zip Code 90731.

UP has certified that: (1) No local or overhead traffic has moved over the Line for at least two years; (2) there is no need to reroute any traffic over other lines; (3) no formal complaint filed by a user of rail service on the Line (or by a state or local government entity acting on behalf of such user) regarding cessation of service over the Line is pending either with the Surface Transportation Board (Board) or with any U.S. District Court or has been decided in favor of complainant within the two-year period; and (4) the requirements at 49 CFR 1105.12 (newspaper publication) and 49 CFR 1152.50(d)(1) (notice to governmental agencies) have been met.

As a condition to this exemption, any employee adversely affected by the

discontinuance of service shall be protected under *Oregon Short Line Railroad—Abandonment Portion Goshen Branch Between Firth & Ammon, in Bingham & Bonneville Counties, Idaho*, 360 I.C.C. 91 (1979). To address whether this condition adequately protects affected employees, a petition for partial revocation under 49 U.S.C. 10502(d) must be filed.

Provided no formal expression of intent to file an offer of financial assistance (OFA) to subsidize continued rail service has been received, this exemption will be effective on September 13, 2016, unless stayed pending reconsideration.² Petitions to stay that do not involve environmental issues and formal expressions of intent to file an OFA to subsidize continued rail service under 49 CFR 1152.27(c)(2)³ must be filed by August 22, 2016.⁴ Petitions to reopen must be filed by September 1, 2016, with the Surface Transportation Board, 395 E Street SW., Washington, DC 20423–0001.

A copy of any petition filed with the Board should be sent to UP’s representative: Mack H. Shumate, Jr., Union Pacific Railroad Company, 101 North Wacker Drive, Room 1920, Chicago, IL 60606.

If the verified notice contains false or misleading information, the exemption is void ab initio.

Board decisions and notices are available on our Web site at “WWW.STB.DOT.GOV.”

Decided: August 5, 2016.

By the Board, Joseph H. Dettmar, Acting Director, Office of Proceedings.

Jeffrey Herzig,
Clearance Clerk.

[FR Doc. 2016–19234 Filed 8–11–16; 8:45 am]

BILLING CODE 4915–01–P

² Although UP states in its verified notice that the proposed consummation date of this transaction is September 10, 2016, this transaction cannot be consummated until September 13, 2016 (50 days from its filing date). 49 CFR 1152.50(d)(2).

³ Each OFA must be accompanied by the filing fee, which is currently set at \$1,600. See 49 CFR 1002.2(f)(25).

⁴ Because this is a discontinuance proceeding and not an abandonment, interim trail use/rail banking and public use conditions are not appropriate. Because there will be an environmental review during abandonment, this discontinuance does not require an environmental review.

Federal Aviation Administration

[Summary Notice No. 2015–82]

Petition for Exemption; Summary of Petition Received; USA Jet Airlines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice.

SUMMARY: This notice contains a summary of a petition seeking relief from specified requirements of Title 14 of the Code of Federal Regulations. The purpose of this notice is to improve the public’s awareness of, and participation in, the FAA’s exemption process. Neither publication of this notice nor the inclusion or omission of information in the summary is intended to affect the legal status of the petition or its final disposition.

DATES: Comments on this petition must identify the petition docket number and must be received on or before September 1, 2016.

ADDRESSES: Send comments identified by docket number FAA–2015–6560 using any of the following methods:

- *Federal eRulemaking Portal:* Go to <http://www.regulations.gov> and follow the online instructions for sending your comments electronically.

- *Mail:* Send comments to Docket Operations, M–30; U.S. Department of Transportation (DOT), 1200 New Jersey Avenue SE., Room W12–140, West Building Ground Floor, Washington, DC 20590–0001.

- *Hand Delivery or Courier:* Take comments to Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

- *Fax:* Fax comments to Docket Operations at 202–493–2251.

Privacy: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to <http://www.regulations.gov>, as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at <http://www.dot.gov/privacy>.

Docket: Background documents or comments received may be read at <http://www.regulations.gov> at any time. Follow the online instructions for accessing the docket or go to the Docket Operations in Room W12–140 of the West Building Ground Floor at 1200

¹ This notice was originally filed on July 25, 2016. On August 2, 2016, and August 3, 2016, UP filed supplemental information clarifying the milepost designations and the distance on the Line on which it proposes to discontinue its freight easement service.

New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: For technical questions concerning this action, contact Nia Daniels, (202–267–9677), 800 Independence Avenue SW., Washington, DC 20591.

This notice is published pursuant to 14 CFR 11.85.

Issued in Washington, DC, on August 8, 2016.

Dale Bouffiou,

Deputy Director, Office of Rulemaking.

Petition for Exemption

Docket No.: FAA–2015–6560.

Petitioner: USA Jet Airlines.

Section of 14 CFR Affected: 121.436(a)(3).

Description of Relief Sought: USA Jet Airlines seeks relief to allow the flight time gained as a Dassault Falcon 20 (DA–20) pilot in command (PIC) operating under § 135.4(a)(1)(2)(i)(ii) and trained and checked under part 121 to count toward the 1,000 hours of flight experience required by § 121.436(a)(3) to serve as PIC in part 121 air carrier operations. This relief would be based upon a proposed alternate means of compliance to allow credit for the certification requirements of Operations Specification A057 and the part 121 training and checking for pilots requiring an airline transport pilot and appropriate type rating flying in USA Jet Airlines' part 135 eligible on-demand cargo operation.

Federal Aviation Administration

[Summary Notice No. 2016-94]

Petition for Exemption; Summary of Petition Received; Mr. Karl Beutner

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice.

SUMMARY: This notice contains a summary of a petition seeking relief from specified requirements of Title 14 of the Code of Federal Regulations. The purpose of this notice is to improve the public's awareness of, and participation in, the FAA's exemption process. Neither publication of this notice nor

the inclusion or omission of information in the summary is intended to affect the legal status of the petition or its final disposition.

DATES: Comments on this petition must identify the petition docket number and must be received on or before September 1, 2016.

ADDRESSES: Send comments identified by docket number FAA-2016-8171 using any of the following methods:

- *Federal eRulemaking Portal:* Go to <http://www.regulations.gov> and follow the online instructions for sending your comments electronically.

- *Mail:* Send comments to Docket Operations, M-30; U.S. Department of Transportation (DOT), 1200 New Jersey Avenue SE., Room W12-140, West Building Ground Floor, Washington, DC 20590-0001.

- *Hand Delivery or Courier:* Take comments to Docket Operations in Room W12-140 of the West Building Ground Floor at 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

- *Fax:* Fax comments to Docket Operations at 202-493-2251.

Privacy: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. Docket: Background documents or comments received may be read at <http://www.regulations.gov> at any time. Follow the online instructions for accessing the docket or go to the Docket Operations in Room W12-140 of the West Building Ground Floor at 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Alphonso W. Pendergrass II (202) 267-4713, Office of Rulemaking, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591.

This notice is published pursuant to 14 CFR 11.85.

Issued in Washington, DC, on August 8, 2016.

Dale Bouffiu,

Acting Director, Office of Rulemaking.

Petition for Exemption

Docket No.: FAA-2016-8171.

Petitioner: Mr. Karl Beutner.

Section(s) of 14 CFR Affected: §§ 61.155(c) and (d) and 61.159(a)(2).

Description of Relief Sought: The petitioner requested the FAA extend his eligibility to complete the Airline Transport Pilot (ATP) practical test from July 31, 2016 to July 31, 2017. The petitioner also requested an exemption from § 61.159(a)(2) of title 14, Code of Federal Regulations (14 CFR) to allow the petitioner to take the ATP practical test with less than the required 100 hours of night flight time.

BILLING CODE 4910-13-P

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

Notice To Rescind Notice of Intent To Prepare Environmental Impact Statement/Draft Section 4(f) Evaluation, MD 28/MD 198 Corridor Study, Montgomery and Prince George's County, Maryland

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice to rescind Notice of Intent to prepare an Environmental Impact Statement/Draft Section 4(f) Evaluation.

SUMMARY: The Federal Highway Administration is issuing this notice to advise the public that FHWA is rescinding its Notice of Intent to prepare an Environmental Impact Statement/Draft Section 4(f) Evaluation for a proposed roadway improvement project in Montgomery and Prince George's Counties, Maryland (**Federal Register** Vol. 68, No. 51827; FR Doc. 03-22037) is being withdrawn and an Environmental Assessment (EA), in lieu of an EIS, is being prepared for this proposed project.

FOR FURTHER INFORMATION CONTACT: Jeanette Mar, Environmental Program Manager, Federal Highway Administration, Maryland Division, 10 South Howard Street, Suite 2450, Baltimore, Maryland 21201, (410) 779-7152, or email: jeanette.mar@dot.gov.

SUPPLEMENTARY INFORMATION: The Federal Highway Administration (FHWA), in cooperation with the Maryland State Highway Administration (SHA), is advising the general public that SHA conducted studies of the potential environmental impacts associated with the proposed roadway improvement project in Montgomery and Prince George's Counties, Maryland along the MD 28/MD 198 Corridor between MD 97

(Georgia Avenue) and I-95, a distance of approximately 10.6 miles.

The purpose of the MD 28/MD 198 Corridor Improvement Study is to improve local traffic safety and operations for motorists, bicyclists, and pedestrians traveling along the MD 28/MD 198 corridor and across intersecting roads, while managing access; and, preserve the rural and suburban quality of life by addressing localized traffic issues, while considering local planning visions and state growth policies for communities along the corridor. MD 28 and MD 198 is experiencing peak hour congestion in areas along portions of the corridor between I-95 and MD 97, particularly east of MD 97, in the vicinity of US 29 and Burtonsville commercial area, and near Sweitzer Lane. Local operational and capacity deficiencies are projected to result from planned and future development in and around the study area. The resulting congestion is expected to cause stop-and-go conditions along the roadways, especially at study-area intersections projected to experience failing conditions by 2040. The roadway segments between the intersections will experience peak-hour capacity constraints imposed by: Projected traffic volumes; the absence of mid-block through lanes on two-lane roadways; the absence of storage lanes for left turns; and the absence of deceleration lanes for right turns. Local area master plans describe objectives for the corridor roadway that include retaining the rural character of adjacent communities and protecting sensitive environmental areas. Recommended features in these plans include the construction of hiker-biker trails and sidewalks and the addition of landscaping.

Alternatives under consideration include taking no action, installing on-road bicycle provisions, a shared use path and segments of sidewalk, and widening existing MD 28/MD 198 to a four- or six-lane roadway in some sections, with various options for access management via frontage roads or median treatments, and intersection improvements including additional turn lanes or installing roundabouts. The EA will be available for public and agency review and comment prior to a Public Hearing. Public notice will be given of the availability of the EA for review and of the time and place of this hearing. Public Informational Workshops were held in June 2014 and March 2015 to solicit opinions and ideas on proposed improvements from local citizens.

To ensure that the full range of issues related to this proposed action are addressed and all significant issues identified, comments and suggestions

are invited from all interested parties. Comments or questions concerning this proposed action and the determination that an EA is the proper environmental document should be directed to FHWA at the address provided above.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Research, Planning and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this program.)

Gregory Murrill,

Division Administrator, Federal Highway Administration, Baltimore, Maryland.

BILLING CODE 4910-22-P

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA-2016-0194]

Agency Information Collection Activities; Renewal of a Currently-Approved Information Collection: Licensing Applications for Motor Carrier Operating Authority

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, FMCSA announces its plan to submit the Information Collection Request (ICR) described below to the Office of Management and Budget (OMB) for review and approval and invites public comment. The FMCSA requests approval to renew an ICR titled, "Licensing Applications for Motor Carrier Operating Authority," that is used by for-hire motor carriers of regulated commodities, motor passenger carriers, freight forwarders, property brokers, and certain Mexico-domiciled motor carriers to register their operations with the FMCSA.

DATES: We must receive your comments on or before October 11, 2016.

ADDRESSES: You may submit comments identified by Federal Docket Management System (FDMS) Docket Number FMCSA-2016-0194 using any of the following methods:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the online instructions for submitting comments.

- *Fax:* 1-202-493-2251.

- *Mail:* Docket Management Facility; U.S. Department of Transportation, 1200 New Jersey Avenue SE., West Building,

Ground Floor, Room W12-140, 20590-0001.

- *Hand Delivery or Courier:* West Building, Ground Floor, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m. E.T., Monday through Friday, except Federal holidays.

Instructions: All submissions must include the Agency name and docket number. For detailed instructions on submitting comments, see the Public Participation heading below. Note that all comments received will be posted without change to <http://www.regulations.gov>, including any personal information provided. Please see the Privacy Act heading below.

Docket: For access to the docket to read background documents or comments received, go to <http://www.regulations.gov>, and follow the online instructions for accessing the dockets, or go to the street address listed above.

Privacy Act: Anyone is able to search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review DOT's complete Privacy Act Statement for the Federal Docket Management System published in the **Federal Register** on January 17, 2008 (73 FR 3316), or you may visit <http://edocket.access.gpo.gov/2008/pdf/E8-794.pdf>.

Public Participation: The Federal eRulemaking Portal is available 24 hours each day, 365 days each year. You can obtain electronic submission and retrieval help and guidelines under the "help" section of the Federal eRulemaking Portal Web site. If you want us to notify you that we received your comments, please include a self-addressed, stamped envelope or postcard, or print the acknowledgement page that appears after submitting comments online. Comments received after the comment closing date will be included in the docket and will be considered to the extent practicable.

FOR FURTHER INFORMATION CONTACT: Mr. Jeff Secrist, Office of Registration and Safety Information, Department of Transportation, Federal Motor Carrier Safety Administration, 1200 New Jersey Avenue SE., Washington, DC 20590-0001. Telephone Number: (202) 385-2367; Email Address: jeff.secris@dot.gov. Office hours are from 8:00 a.m. to 5:00 p.m., E.T., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

Background: The FMCSA registers certain for-hire Mexico-domiciled motor

carriers under 49 U.S.C. 13902(c). These motor carriers may conduct transportation services in the United States only if they are registered with the FMCSA. Each registration is effective from the date specified and remains in effect for such period as the Secretary of Transportation (Secretary) determines by regulations. The ICC Termination Act of 1995 (ICCTA), Public Law 104–88, 109 Stat. 803 (December 29, 1995), transferred this registration authority from the former Interstate Commerce Commission (ICC) to the Secretary who subsequently delegated the registration function to the Federal Highway Administration (FHWA) (FMCSA's predecessor agency), then to the FMCSA at the time that agency was created.

On March 19, 2002, the FMCSA published an interim final rule (IFR) at 67 FR 12702 which proposed to amend 49 CFR part 365 and revise Form OP–1(MX). Under the amended regulations, Mexico-domiciled long-haul motor carriers seeking to operate within the United States beyond the commercial border zones, including carriers that previously filed pending Form OP–1(MX) applications, would be required to submit the revised Form OP–1(MX). Under the revised Form OP–1(MX), the FMCSA would collect more detailed information on an applicant motor carrier's size, operations and history than could be collected previously by using the existing form.

The Final Rule titled, "Unified Registration System," (78 FR 52608) dated August 23, 2013, implemented statutory provisions for an on-line registration system in the ICCTA and the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users, 2005 (SAFETEA–LU). The URS would streamline the registration process and serve as a clearinghouse and repository of information on, and identification of, motor carriers, brokers, freight forwarders, intermodal equipment providers (IEPs), hazardous materials safety permit (HMSP) applicants, and cargo tank facilities required to register with FMCSA. This ICR previously covered registration requirements for non-exempt for-hire carriers, freight forwarders, and property brokers. Under the URS, all forms, except the OP–1(MX), in this ICR were folded into the Form MCSA–1 in the OMB Control Number 2126–0051 titled, "FMCSA Registration/Updates," ICR on October 23, 2015. The Form OP–1(MX) would be retained for the small number of Mexico-domiciled carriers that seek authority to operate beyond the United States municipalities on the United

States-Mexico border and their commercial zones because they are not included within the scope of the URS rule.

The Final Rule titled, "Unified Registration System," (80 FR 63695) dated October 21, 2015, changed the effective and compliance dates of the 2013 URS Final Rule from October 23, 2015, to September 30, 2016, in order to allow FMCSA additional time to complete the information technology (IT) systems work required to fully implement that rule. An additional delay was published on July 28, 2016 (81 FR 49553), stating the URS Final Rule will come into effect on January 14, 2017. This ICR revision will restore the Forms OP–1, OP–1(P), OP–1(FF), and OP–1(NNA) under control number 2126–0016, until January 14, 2017, because these forms are still needed to support registration processes for entities subject to FMCSA's regulations. After January 14, 2017, all forms in this ICR, except the OP–1 (MX), will be folded into the online Form MCSA–1 under the OMB Control Number 2126–0051 titled, "FMCSA Registration/Updates," ICR.

Title: Licensing Applications for Motor Carrier Operating Authority.
OMB Control Number: 2126–0016.

Type of Request: Renewal of a currently approved collection.

Respondents: Motor carriers, motor passenger carriers, freight forwarders, brokers, and certain Mexico-domiciled motor carriers.

Estimated Number of Respondents and Responses: 36 respondents [(12 respondents and responses for Year 1) + (12 respondents and responses for Year 2) + (12 respondents and responses for Year 3)].

Estimated Time per Response: 4 hours.

Expiration Date: October 31, 2016
Frequency of Response: Other (as needed).

Estimated Total Annual Burden: 48 hours [48 hours for Year 1 + 48 hours for Year 2 + 48 hours for Year 3 = 133 hours/3 year approval for ICR = 48 estimated average number of annual burden hours].

Public Comments Invited: You are asked to comment on any aspect of this information collection, including: (1) Whether the proposed collection is necessary for the performance of FMCSA's functions; (2) the accuracy of the estimated burden; (3) ways for FMCSA to enhance the quality, usefulness, and clarity of the collected information; and (4) ways that the burden could be minimized without reducing the quality of the collected information. The agency will summarize

or include your comments in the request for OMB's clearance of this information collection.

Issued on: August 1, 2016.

G. Kelly Regal,

Associate Administrator for Office of Research and Information Technology.

BILLING CODE 4910–EX–P

DEPARTMENT OF TRANSPORTATION

Maritime Administration

[Docket No. DOT–MARAD 2016–0076]

Agency Requests for Renewal of a Previously Approved Information Collection(s): Merchant Marine Medals and Awards

AGENCY: Maritime Administration, DOT.

ACTION: Notice and request for comments.

SUMMARY: The Maritime Administration (MARAD) invites public comments about our intention to request the Office of Management and Budget (OMB) approval to renew an information collection. The information collected will be used by MARAD personnel to process and verify requests for service awards. We are required to publish this notice in the **Federal Register** by the Paperwork Reduction Act of 1995, Public Law 104–13.

DATES: Written comments should be submitted by October 11, 2016.

ADDRESSES: You may submit comments [identified by Docket No. DOT–MARAD–2016–0076] through one of the following methods:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the online instructions for submitting comments.

- *Fax:* 1–202–493–2251.

- *Mail or Hand Delivery:* Docket Management Facility, U.S. Department of Transportation, 1200 New Jersey Avenue SE., West Building, Room W12–140, Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except on Federal holidays.

FOR FURTHER INFORMATION CONTACT: Deveeda Midgette, 202–366–2354, Maritime Administration, Office of Sealift Support, 1200 New Jersey Avenue SE., Washington, DC 20590.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 2133–0506.

Title: Merchant Marine Medals and Awards.

Form Numbers: None.

Type of Review: Renewal of an information collection.

Background: This information collection of information provides a

method of awarding merchant marine medals and decorations to masters, officers, and crew members of U.S. ships in recognition of their service in areas of danger during the operations by the Armed Forces of the United States in World War II, Korea, Vietnam, and Operation Desert Storm.

Respondents: Master, officers and crew members of U.S. ships.

Number of Respondents: 550.

Number of Responses: 550.

Total Annual Burden: 550.
