Discussion: We recognize that medical insurance and other one-stop delivery system programs under WIOA typically do not support training in Braille and mobility or the provision of assistive technology for individuals who are blind and visually impaired.

Under final § 361.37(b), the circumstances when the DSU must provide referrals to other programs and service providers for individuals who choose not to pursue an employment outcome under the VR program has been expanded. Similarly, final § 361.43(d) expands the requirement for the referral of individuals found ineligible for vocational rehabilitation services, or determined ineligible subsequent to the receipt of such services, to include appropriate State, Federal, and local programs, and community service providers (*e.g.,* the SILS program, OIB program, CILs, and programs for the aging) better suited to meet their needs.

Those programs designed to meet the needs of individuals who choose to pursue homemaker outcomes include the OIB program, the only program authorized under title VII of the Act, as amended by WIOA, which remains under the administration of the Department. There is no authority, in either title I or VII, to permit DSUs to use VR program funds to provide OIB program services in order to alleviate any deficiencies in OIB funding, which may result from an increase in the number of individuals seeking services from the OIB program following the change in the employment outcome definition for purposes of the VR program. However, the Administration has requested a $2.0 million increase over the 2016 level for the OIB program in the fiscal year 2017 President's Budget to assist States in meeting an anticipated increase in the demand for OIB services. The Department will consider increases in the demand for OIB program services resulting from this rule change in future budget requests.

We recognize that some CIL staff may not possess the skills necessary to provide individuals who are blind and visually impaired the specialized training and services that will enable them to remain in their homes and care for themselves, such as training in Braille and orientation and mobility. Therefore, we strongly encourage DSUs to strengthen their relationships with the CILs in their States by providing training and technical assistance necessary to build the capacity of the staff that will afford them the option to deliver these services in accordance with the State Plan for Independent Living developed in the State. The Department will support these efforts through technical assistance in collaboration with the Department of Health and Human Services, which is now responsible for the administration of the Centers for Independent Living program under title VII of the Act, as amended by WIOA.

We disagree that the change in the definition necessarily will result in a loss of funding for community rehabilitation programs to provide homemaker services. Although DSUs may no longer use VR program funds to purchase these services from community providers, they may use other program funds to do so, such as those for the OIB programs.

In response to the comment requesting an exemption for existing contractual relationships between the DSUs and other entities to assist individuals with disabilities to achieve outcomes in uncompensated employment, once final § 361.5(c)(15) takes effect a DSU cannot contract with another entity to assist an individual with a disability to achieve an uncompensated outcome, such as homemaker or unpaid family worker. There is no statutory authority that would permit an exemption to the prohibition. However, as discussed in more detail in the *Transition Period* section, DSUs are able to use VR program funds to continue to engage in contractual arrangements for providing services to individuals with disabilities who are already in the process of pursuing homemaker and other uncompensated employment outcomes under individualized plans for employment approved prior to the effective date of these final regulations.

While we understand the concern raised by the commenter who requested a lower eligibility age for the OIB program, title VII of the Act, as amended by WIOA, retains the eligible age of 55 for OIB program services in the statute; therefore, the Department is not authorized to change the age of eligibility. Nor does the Act, as amended by WIOA, authorize the creation of a homemaker program separate from the VR program.

While we appreciate the commenter's recommendation that the CAP should provide outreach services to individuals affected by the implementation of the revised definition of ''employment outcome,'' section 112 of the Act requires, as it always has, the CAP to provide information and advocacy services to individuals who are applicants or consumers of the VR program or any other program under the Act. The CAP may provide information and advocacy services for those individuals pursuing uncompensated outcomes who are served by the VR program during the transition period or served by the OIB or independent living programs after the transition period. However, no authority exists in section 112 of the Act to permit the CAP to conduct outreach to, or to serve, individuals pursuing uncompensated outcomes under programs not authorized by the Act. Although the Department is no longer responsible for the administration of the CIL and SILS programs, these programs continue to be authorized under title VII of the Act, and therefore the CAP can provide assistance to individuals receiving independent living services.

Changes: None.

Feasibility Studies

Comments: Some commenters recommended that we conduct a study of homemaker closures to address problems of overuse and that the definition of ''employment outcome'' include strict criteria to prevent overuse.

One commenter asked whether the Department had conducted a feasibility study to determine if the referral of individuals from VR to other service providers would reasonably result in the provision of services.

Discussion: We have not conducted, nor do we intend to conduct, a study of homemaker closures to address problems of overuse. A study to ensure DSUs do not overuse uncompensated outcomes is not necessary because such outcomes will no longer be permitted under the VR program once these final regulations take effect and the transition period ends. For the same reason, we do not believe it necessary to change § 361.5(c)(15) to prevent the overuse of

homemaker and unpaid family worker outcomes.

However, we intend to monitor State implementation of the final regulations during our annual review and periodic on-site monitoring of State VR agencies to ensure that persons with significant disabilities, including those who are blind and visually impaired, receive vocational rehabilitation services in pursuit of competitive integrated employment or supported employment. Additionally, we will review the steps DSUs are taking to ensure that individuals are appropriately referred under final §§ 361.37(b) and 361.43(d), to other Federal, State, and local programs and providers (*e.g.,* the SILS program, OIB program, CILs, and programs for the aging) that are better able to meet the needs of individuals with disabilities who desire to receive homemaker services. If needed, the Department will consider providing technical assistance to DSUs to enable them to build better relationships with these other entities to increase the potential for successful referrals.

Changes: None.

Transition Period

Comments: A few commenters supported the Department's proposed transition period of six months following the effective date of the final regulations, during which DSUs would finish providing vocational rehabilitation services to, and close the service records of, individuals pursuing uncompensated outcomes, such as homemakers and unpaid family workers, through individualized plans for employment that were approved prior to the effective date.

Some commenters stated that six months would not be long enough to finish providing services and close these service records or to develop relationships with providers of independent living services to which the DSUs could refer these individuals. Of these commenters, some recommended that the Department extend the proposed transition period to 12 months following the effective date of the final regulations, while some others recommended 18 or 24 months.

However, most commenters who commented on the proposed transition period recommended that we adopt a flexible period that DSUs would determine case by case, taking into account the needs of the individual. Finally, one commenter recommended that we permit DSUs to provide vocational rehabilitation services to individuals with the goal of homemaker on their individualized plans for employment without regard to the duration of the services, but that we not allow DSUs to implement new individualized plans for employment with the goal of homemaker following the effective date of the final regulations.

Discussion: To permit DSUs to develop individualized plans for employment that include uncompensated employment goals, such as those of homemakers and unpaid family workers, after the effective date of these final regulations would be inconsistent with the Act, as amended by WIOA. Section 102(b)(4) of the Act, as amended by WIOA, and final § 361.46(a), require all individualized plans for employment developed under the Act to include employment goals consistent with the general goal of competitive integrated employment.

However, we do agree with commenters that DSUs may need longer than six months following the effective date to finish providing services to some individuals who are already pursuing homemaker or other uncompensated outcomes on individualized plans for employment that were developed and executed prior to the effective date. Data obtained through the RSA–911 case service report show that, on average, individuals with disabilities take approximately 24 months to complete the vocational rehabilitation process from the time they apply for services until their service records are closed. These data also demonstrate that individuals who are 55 years and older and blind take approximately 21.5 months to complete the vocational rehabilitation process from the time that they apply for services.

Therefore, the Secretary has concluded that DSUs may continue to provide services to individuals with uncompensated employment goals on their individualized plans for employment that were approved prior to the effective date of the final regulations through June 30, 2017, unless a longer period of time is required based on the needs of the individual, as documented in the individual's service record.

The Secretary believes that DSUs can finish providing services to, and close the service records of, most individuals pursuing homemaker and other uncompensated outcomes during this transition period. However, a DSU can determine on a case-by-case basis, taking into consideration the unique needs of each individual, that the DSU cannot complete the provision of services within that time frame and, therefore, may continue the services until the individual no longer needs them. For example, services may be interrupted and, consequently, the DSU cannot complete the services prior to June 30, 2017. For this and other reasons, the DSU may extend the provision of services beyond June 30, 2017, until they are completed and the individual's service record is closed.

By extending the transition period, DSUs will have sufficient time to develop and strengthen their relationships with other governmental and nonprofit providers of independent living services so that DSUs may make appropriate referrals to these providers and individuals with disabilities can receive the services they need to maintain their homes and independence. The Department plans to provide guidance and technical assistance to: (1) Facilitate the transition to the new definition of employment outcome; and (2) minimize the potential disruption of services to VR program consumers currently receiving services and who do not have a competitive integrated employment or supported employment goal reflected in their individualized plan for employment.

Finally, all participants who exit the VR program after July 1, 2016, including those exiting in uncompensated employment, such as homemakers and unpaid family workers, must be included in the calculations of the performance accountability measures established in section 116(b)(2)(A)(i) of title I of WIOA and explained more fully in the joint performance information collection request. The performance accountability requirements of section 116 of WIOA take effect July 1, 2016.

Changes: We have included a note in final § 361.5(c)(15) allowing for a transition period to permit a DSU to continue services to individuals with uncompensated employment goals on their approved individualized plans for employment prior to the effective date of the final regulations until June 30, 2017, unless a longer period of time is required based on the needs of the individual with the disability.

Extended Services (§ 361.5(c)(19))

Comments: A few commenters were concerned that the provision of extended services to youth with the most significant disabilities will cause an undue hardship for some DSUs. A few other commenters understood the proposed changes to mean that the DSUs were responsible for funding all individuals in extended services even after the individual transitions from the DSU for support.

Discussion: Final § 361.5(c)(19)(iv) specifies that ''extended services'' are those services provided to individuals with the most significant disabilities, which may include youth with the most

significant disabilities, by a State agency, a private nonprofit organization, employer, or any other appropriate resource once an individual has concluded support services from the DSU. The definition of ''extended services'' in final § 361.5(c)(19)(v) specifies that the DSU provides extended services only to ''youth with the most significant disabilities'' for a period not to exceed four years or until such time as a youth reaches the age of 25 and no longer meets the definition of a ''youth with a disability'' under final § 361.5(c)(58). For further information on the provision of extended services in accordance with final §§ 363.4 and 363.22, see the *Analysis of Comments and Changes* section for the Supported Employment Program in 34 CFR part 363.

Changes: None.

Indian; American Indian; Indian American; Indian Tribe (§ 361.5(c)(25))

Comments: Many commenters disagreed with expanding the definition of ''Indian tribe'' to make tribal organizations eligible for AIVRS grants. Most of these commenters requested that we establish policies that give tribal governments the authority to designate those tribal organizations or entities acting on their behalf as applicants or recipients of AIVRS funding.

Discussion: We provide a detailed analysis of these comments in a separate regulatory action implementing the amendments made by WIOA to miscellaneous programs under the Act, including the AIVRS program, published elsewhere in this issue of the **Federal Register**.

Changes: None.

Informed Choice

Comments: Some commenters requested that we define ''informed choice.''

Discussion: We disagree with the recommendation to define ''informed choice'' in final § 361.5(c). Section 102(d) of the Act and final § 361.52 fully describe the critical aspects of informed choice in the context of the VR program and reflect the statutory emphasis that individuals participating in the VR program must be able to exercise informed choice throughout the entire rehabilitation process.

Changes: None.

Supported Employment Definitions

Comments: We received comments on the definitions of ''supported employment'' and ''supported employment services'' in proposed §§ 361.5(c)(53) and 361.5(c)(54), respectively, concerning the short-term basis period, transitional employment, and the duration of supported employment services.

Discussion: We discuss these comments later in the *Analysis of Comments and Changes* section for the Supported Employment Program in final 34 CFR part 363.

Transition-Related Definitions

Comments: We received comments on definitions pertaining to the transition of students and youth with disabilities from school to postsecondary education and employment, including ''pre-employment transition services,'' ''student with a disability,'' ''transition services,'' and ''youth with a disability.''

Discussion: We discuss these comments in section B later in this *Analysis of Comments and Changes* section of the preamble.

Submission, Approval, and Disapproval of the State Plan (§ 361.10)

Content and Submission of the VR Services Portion of the Unified and Combined State Plan

Comments: Apart from public comments received on the joint regulations proposed by the U.S. Departments of Labor and Education implementing jointly administered requirements for the Unified or Combined State Plan, we received comments on proposed § 361.10 pertaining to the VR services portion of the Unified or Combined State Plan. Many commenters expressed support for the revised State Plan requirements and process as described in the proposed joint regulations, noting the regulations promote an opportunity for collaboration across the workforce development system. Additionally, these commenters requested technical assistance and guidance to clarify the State Plan process.

One commenter requested that we clarify the meaning of ''The VR services portion of the State Plan'' and asked whether this is in fact a separate program-specific component of the Unified or Combined State Plan. This commenter previously submitted a Unified State Plan in which the vocational rehabilitation components of the plan were interspersed throughout the overall plan. One commenter asked whether the proposed joint regulation in 34 CFR 676.130(f), which requires the RSA Commissioner to approve the VR services portion of the Unified or Combined State Plan before the Secretaries of Labor and Education approve the Unified or Combined State Plans, means that DSUs will have separate timelines for the submission of the VR program-specific components of the plan.

Discussion: We appreciate the commenters' support, as well as the requests for clarifications. Final § 361.10 implements section 101(a)(1) of the Act, as amended by WIOA, which requires a State to submit a Unified or Combined State Plan under section 102 or section 103, respectively, of title I of WIOA, in order to receive funding under the VR program. The Unified or Combined State Plan must contain a VR services portion. Section 101(a)(1) of the Act, as amended by WIOA, and final § 361.10(a) require the VR services portion of the Unified or Combined State Plan to contain all State Plan requirements under section 101(a) of the Act. Prior to the enactment of WIOA, DSUs submitted a stand-alone State Plan directly to the Department. Under WIOA, the VR services portion will be submitted as part of the Unified or Combined State Plans by the State to the Secretary of the U.S. Department of Labor, who will distribute the plans to the other Federal agencies responsible for their review and approval, including the Department of Education with respect to the review and approval of the VR services portion of the plans.

The ''Required Elements for Submission of the Unified or Combined State Plan and Plan Modifications Under the Workforce Innovation and Opportunity Act,'' recently approved by the Office of Management and Budget under control number 1205–0522, presents the VR services portion of the Unified or Combined State Plan as a distinct component of the plan. The timelines for submission of the Unified or Combined State Plan, and, hence, the VR services portion of that plan, are governed by sections 102 and 103 of title I of WIOA, and the joint final regulations published elsewhere in this issue of the **Federal Register**. Thus, there is no statutory authority to establish a separate timeline or date for the submission of the VR services portion of the plan, despite the fact that the Commissioner must approve the VR services portion before the Secretaries of Labor and Education approve the remainder of the plans.

Changes: None.

Alignment of Program and Fiscal Years

Comments: Many commenters were interested in how the new timelines for the submission and modification of the Unified and Combined State Plans will be aligned with the specific requirements of the VR services portion of the Unified or Combined State Plan, including reporting requirements, performance levels, and the difference

between the start of the program year on July 1 for the purposes of requirements under title I of WIOA versus the start of the Federal fiscal year on October 1 when the VR program formula grants are issued in accordance with the Act. A few commenters supported the alignment of the program years under the Unified and Combined State Plans among all core programs in the workforce development system, including the VR program.

Discussion: While we understand the concern expressed by commenters regarding the potential confusion caused by differences between the VR program's fiscal year and the other core programs' program year, section 110(a)(2)(A) of the Act, which specifies the manner in which VR program allotments are to be made, was not amended by WIOA. Moreover, section 111(a)(1) of the Act, which also remained unchanged by WIOA, requires that payments are made to States on a Federal fiscal year basis. This provision is consistent with section 101(a)(1), which requires States to submit a VR services portion of a Unified or Combined State Plan to receive funding ''for a fiscal year.'' Finally, section 101(a)(10) of the Act, as amended by WIOA, requires the DSU to submit certain data to demonstrate the annual performance of the VR program, within the same fiscal year in which the VR program operates. For these reasons, there is no statutory authority to change the period for making allotments to the States from the fiscal year beginning on October 1 to the program year used under title I of WIOA, which is July 1 of each year for most core programs.

In order to align the VR program with the other core programs to the extent practicable, DSUs must submit the VR services portion of the Unified or Combined State Plan and report the data required under final § 361.40 in a manner consistent with the jointly administered requirements set forth in the joint regulations governing Unified or Combined State Plan requirements published elsewhere in this issue of the **Federal Register**. However, States will continue to receive VR program allotments and report fiscal data through the Financial Status Report (SF–425) in accordance with the Federal fiscal year.

Changes: None.

Other Comments

Comments: Several commenters were uncertain about the application of common performance measures and asked whether combined partners under a Combined State Plan would be held to the new performance standards as well. One commenter asked whether, when there is more than one DSU in the State, DSUs serving individuals who are blind will have separate performance levels from DSUs serving individuals with all other disabilities. Another commenter suggested that Unified or Combined State Plans be posted electronically to a Web site that the public could easily access.

We also received comments regarding the determination of eligibility for individuals with autism and on the significance of disability.

Discussion: The Departments of Education and Labor address these comments in the *Analysis of Comments and Changes* section of the joint final regulations implementing the jointly administered requirements for the submission of a Unified or Combined State Plan under sections 102, and 103 of title I of WIOA and the performance accountability system under section 116 of title I of WIOA, published elsewhere in this issue of the **Federal Register**, because they apply to all core programs in the workforce development system, not just the VR program.

We address the comments regarding the determination of eligibility for individuals with autism and the significance of disability in the *Assessment for Determining Eligibility and Priority for Services (§ 361.42)* section of this preamble.

Changes: None.

Requirements for a State Rehabilitation Council (§ 361.17)

Establishment of a State Rehabilitation Council

Comments: One commenter suggested the word ''if'' be removed from the introductory paragraph in § 361.17. This commenter suggested that all States are required to have a State Rehabilitation Council (SRC or Council).

Discussion: Section 101(a)(21) of the Act, which remained unchanged by WIOA, and final § 361.16 permit States to establish either an independent State commission or an SRC. Therefore, there is no statutory authority to mandate that States establish a Council, rather than an independent commission. For this reason, we have not revised the introductory paragraph in final § 361.17 as the commenter recommended, because it is consistent with the statute. However, the Act does not prohibit a State from establishing both an independent commission and a SRC if it chooses to do so.

Changes: None.

Additional Members

Comments: Some commenters requested that we require in § 361.17(b) that the SRC include additional members, such as a representative of the State's Council on Developmental Disabilities, entities carrying out programs under the Assistive Technology Act of 1998 in the State, and groups of, or representing, individuals with intellectual and developmental disabilities.

Discussion: Section 105(b)(1) of the Act, as amended by WIOA, made only one amendment to the composition requirements of the SRC related to the representation of the AIVRS projects in the State on the SRC. The Act, as amended by WIOA, did not alter the composition requirements in any other way. As a result, there is no statutory basis to require additional representatives from other State entities. However, the Act, as amended by WIOA, does not prohibit a State from electing to add more members to its SRC if it determines this is appropriate.

Changes: None.

Terms of Appointment

Comments: One commenter suggested that we amend the requirements related to terms of appointment in § 361.17(e) to allow SRC members who were appointed to fill a vacancy and serve the remainder of their predecessor's term to be appointed to two additional consecutive full terms.

Discussion: WIOA did not amend section 105(b)(6) of the Act or change the requirements governing terms of appointment; therefore, there is no statutory authority to amend these requirements in final § 361.17(e). The Department has interpreted these requirements to permit an SRC member who completed the term of a vacating member to be appointed for only one additional consecutive full term of three years.

This long-standing Department interpretation is consistent with section 105(b)(6) of the Act, which limits a term to no more than three years; however, there is no requirement that each member be appointed for a three-year term. Under section 105(b)(6)(A)(i) of the Act, an individual who is appointed to complete a predecessor's unfinished term is appointed for the remainder of that term. This appointment constitutes one full term for that individual. Section 105(b)(6)(B) of the Act prohibits an individual from serving more than two consecutive full terms. Therefore, if an individual is appointed to complete one year remaining of a predecessor's term and is then reappointed for a second full three-year term, this individual has served two full terms even though the total number of years served is four.

Changes: None.

Coordination With One-Stop Centers

Comments: None.

Discussion: Section 105(c)(8) of the Act and final § 361.17(h))(8) permit the SRC to perform functions in addition to those specifically authorized in the Act and final regulations so long as they are comparable to the specified functions. To support the alignment of the VR program with the workforce development system as emphasized throughout the Act and these final regulations, we clarify that SRCs may coordinate and establish working relationships with one-stop centers. This coordination is comparable to the coordination with SILCs and CILs required under section 105(c)(7) of the Act and final § 361.17(h)(7).

Changes: None.

Comprehensive System of Personnel Development (§ 361.18)

Data Report for Comprehensive System of Personnel Development (§ 361.18(a))

Comments: One commenter recommended revisions to proposed § 361.18(a) regarding the submission of data on the comprehensive system of personnel development (CSPD) in the vocational rehabilitation services portion of the Unified or Combined State Plan to reduce burden on DSUs. Specifically, the commenter recommended that DSUs be required to submit information about the vocational rehabilitation personnel via pre-print assurances, rather than descriptions, and be required to submit aggregated data, rather than disaggregated data.

Discussion: WIOA made only technical changes to section 101(a)(7)(A) of the Act, none of which increased the reporting that had been required of DSUs for nearly 20 years. While we are sensitive to the burden imposed by reporting requirements, there is no statutory basis for the Department to make the changes suggested by the commenter. Section 101(a)(7)(A) of the Act, as amended by WIOA, explicitly mandates that DSUs provide the requisite information in a descriptive format and the data in a disaggregated format.

Changes: None.

Applicability of Education, and Experiential Requirements to Rehabilitation Counselors (§ 361.18(c)(1))

Comments: We received many comments regarding proposed § 361.18(c)(1)(ii), which requires DSUs to establish, as part of a CSPD, personnel standards for rehabilitation professionals and paraprofessionals that include educational and experiential requirements. Most of these commenters opposed applying this provision to vocational rehabilitation counselors, and many of these commenters stressed the importance of maintaining the education and experience requirement under prior § 361.18(c)(1)(i) for vocational rehabilitation counselors. Specifically, these commenters stated that vocational rehabilitation counselors should be required to meet a national or State-approved or recognized certification, licensing, registration, or other comparable requirements for the area in which such personnel are providing vocational rehabilitation services. These commenters strongly urged the Department to require that vocational rehabilitation counselors meet that higher standard.

Similarly, many commenters urged that the training and education received in a master's degree program in rehabilitation counseling relate in a necessary, direct, and practical way to the work vocational rehabilitation counselors do each day. These commenters asserted that rehabilitation counseling is a professional career that requires extensive knowledge in a very broad arena. In addition, several commenters stressed that the educational requirements applied to vocational rehabilitation counselors must be sufficient to ensure that they have the following knowledge: medical and psychological aspects of disability, counseling and guidance strategies, vocational assessment, person-centered planning, cultural competency, career services, and building relationships with businesses who would like to hire or retain individuals with disabilities. These commenters maintained that all of these skills are available to individuals pursuing a master's degree in a program accredited by the Council on Rehabilitation Education.

Several commenters maintained that section 101(a)(7)(B)(ii) of the Act, as amended by WIOA, and proposed § 361.18(c)(1)(ii), which set education and experience requirements of a baccalaureate degree in an additional field of study such as business administration, human resources, and economics, do not apply to vocational rehabilitation counselors. These commenters strongly believe that since a national certification exists for certified rehabilitation counselors this provision is inapplicable for vocational rehabilitation counselors. Some commenters stated that because there was no legislative report accompanying WIOA, the Department cannot be certain that Congress intended that the lower education and experience requirements in section 101(a)(7)(B)(ii) of the Act, as amended by WIOA, apply to vocational rehabilitation counselors. One commenter stated that including a business degree in the credentials required for vocational rehabilitation personnel, with respect to qualified vocational rehabilitation counselors, was intended to be supplemental to a Master's degree in rehabilitation counseling and does not supplant the highest standard in the State, which in many States is the master's degree in rehabilitation counseling. Another commenter stated that since individuals with less experience could be paid less, they potentially could make up a larger portion of the DSU staff. If done correctly, the commenter stated that this could be a great opportunity to add individuals with business and marketing backgrounds to the DSU staff. This could also potentially help reduce caseloads, since recipients who need assistance only with placement could go straight to the marketing/business staff. Some commenters observed that the new requirements appear to be based on an assumption that a counselor should be able to work with both consumers and employers, as opposed to a team approach where experts in counseling work with consumers and business experts work with employers.

One commenter supported the education and experience requirements in proposed § 361.18(c)(1)(ii) because of the heightened emphasis on employer engagement and competitive integrated employment outcomes. This commenter stated that the proposed changes will provide an opportunity for DSUs to adjust the level of expertise and commitment of its personnel. The commenter also stated that establishing these educational requirements and work experiences will ensure that program participants are receiving quality services.

Discussion: We appreciate the many comments we received regarding CSPD and the changes proposed in § 361.18(c)(1)(ii). We appreciate the fact that CSPD is an important issue for DSUs and their personnel and that it represents a cornerstone of the VR program, ensuring that individuals with disabilities receive services from staff who are qualified to meet their individual needs.

As stated in the NPRM, proposed § 361.18(c)(1)(ii) mirrors section 101(a)(7)(B)(ii) of the Act, as amended by WIOA, with regard to minimum education and experience requirements for vocational rehabilitation personnel. In so doing, § 361.18(c)(1)(i), both proposed and final: (1) Retains language in prior § 361.18(c)(1)(i) regarding national and State-approved

certification and licensure requirements since this requirement remained unchanged by WIOA; (2) incorporates new educational and experiential requirements in proposed § 361.18(c)(1)(ii) that range from a baccalaureate degree with at least one year of relevant experience to a master's or doctoral degree; and (3) deletes the requirement in prior § 361.18(c)(1)(ii) that DSUs must re-train staff who do not meet their established personnel standards.

We agree with commenters that the higher standard in section 101(a)(7)(B)(i) of the Act and final § 361.18(c)(1)(i), which had been the only personnel standard for vocational rehabilitation personnel prior to the enactment of WIOA, has served a critical role in ensuring that well-qualified staff are available to provide vocational rehabilitation services to individuals with disabilities. We understand other lower education or experience requirements may not prepare DSU staff in the same manner as a national or State-approved certification or licensure for vocational rehabilitation counseling could. As commenters indicated, programs leading to such national or State-approved certification or licensure in vocational rehabilitation provide vocational rehabilitation counselors with critical knowledge and understanding of medical and psychological aspects of disability, counseling and guidance strategies, vocational assessment, person-centered planning, cultural competency, career services, and building relationships with businesses who would like to hire or retain individuals with disabilities. However, section 101(a)(7)(B) of the Act, as amended by WIOA, requires that States establish and maintain personnel standards, which apply to all vocational rehabilitation professionals and paraprofessionals employed by the DSU, including both national or State-approved certification and licensure requirements in section 101(a)(7)(B)(i) and the education and experience requirements in section 101(a)(7)(B)(ii). This means that the personnel standards apply to vocational rehabilitation counselors and all other vocational rehabilitation professionals and paraprofessionals. There is nothing in the statute that limits the higher standard to vocational rehabilitation counselors. Nor is there any statutory basis to preclude a DSU from hiring a vocational rehabilitation counselor who meets the education and experience requirements of section 101(a)(7)(B)(ii) but not a national or State-approved certification or licensure requirement. Final § 361.18(c)(1) is consistent with the Act as amended by WIOA.

We also agree with the commenters who supported the proposal, and believe that the new education and experience requirements set forth in section 101(a)(7)(B)(ii) of the Act, as amended by WIOA, and final § 361.18(c)(1)(ii) are beneficial to the VR program and the individuals they serve.

Changes: None.

Applicability of Standards to Other Personnel

Comments: Some commenters stated that the lower educational standards might better be applied to other vocational rehabilitation personnel (*e.g.,* business relations specialists, placement specialists, etc.). One commenter said other positions (such as financial officers, legal counsel, DSU program/division directors, and policy/regulatory compliance officers) should be subject to requirements regarding the development of skills and knowledge and should be required to complete and maintain a certain amount of training regarding the provision of rehabilitation services.

Discussion: Consistent with our interpretation of the CSPD requirements in a NPRM published pursuant to the 1998 Amendments to the Act, we interpret the Act to require the DSU establish and implement appropriate, certification-based standards for all categories of professionals and paraprofessionals needed to conduct the VR program. However, in light of the difficulty States may experience in developing numerous standards at the same time, we would expect DSUs to give priority to those professions that are generally considered most critical to the success of the VR program (65 FR 10619, 10622–10623 (Feb. 28, 2000)). This requirement under the Act, as amended by WIOA, applies to all personnel positions listed under the State's vocational rehabilitation classification as it had under WIA. The specific positions covered under such a classification will vary from State to State. With respect to financial officers and legal counsel, States have the discretion to determine whether they are classified as vocational rehabilitation professionals or paraprofessionals since their classification varies between States. In many States, these positions are not dedicated solely to the DSU and its VR program, but rather are more general State personnel positions. We would agree that program and division administrators and policy and regulatory compliance officers for the DSU's VR program must be covered by the requirement in final § 361.18(c)(1).

Similarly, we would agree that the VR program director or administrator would be covered by the CSPD requirements of section 101(a)(7)(B) because that position would be considered a vocational rehabilitation professional or paraprofessional. The Secretary believes that the individual who oversees vocational rehabilitation professionals and paraprofessionals should satisfy at least the minimum education and experience requirements applicable to all vocational rehabilitation professionals and paraprofessionals.

We appreciate the comment regarding the personnel standards and their applicability to vocational rehabilitation paraprofessionals. Neither the Act nor these final regulations distinguish between vocational rehabilitation professionals and paraprofessionals. By the same token, neither the Act nor these final regulations define what constitutes a vocational rehabilitation professional or paraprofessional as opposed to an administrative staff position providing clerical or other support to rehabilitation personnel.

The distinction among vocational rehabilitation professionals, paraprofessionals, and administrative (*e.g.,* clerical and other support) staff are made at the State level in accordance with State hiring policies and procedures. Neither section 101(a)(7)(B) of the Act, as amended by WIOA, nor final § 361.18(c)(1) require the DSU to develop personnel standards for the hiring of staff who are not classified as vocational rehabilitation professionals or paraprofessionals. However, both the Act and these final regulations require a DSU to develop personnel standards for the hiring of vocational rehabilitation professionals and paraprofessionals that are consistent with the standards set forth in section 101(a)(7)(B) of the Act, as amended by WIOA, and final § 361.18(c)(1).

As such, if a national or State-approved standard—or, in the absence of such standards, other comparable requirements (*e.g.,* State personnel standards)—exists for such paraprofessional this should be the standard for such personnel. However, if no such standard exists or the DSU is unable to hire staff that meet such standard, then the DSU must, under final § 361.18(c)(1)(ii), hire vocational rehabilitation paraprofessionals who meet standards consistent with the education and experience levels established in the Act and these final regulations.

Changes: None.

De-Professionalization and Diminution of Vocational Rehabilitation Personnel

Comments: Several commenters stated that the proposed education and experience requirements seemingly discount the role and impact of the professional rehabilitation counselor working with eligible consumers to obtain competitive integrated employment. Many stated that proposed § 361.18(c)(1)(ii)(A)(*1*), which permits a baccalaureate degree plus one year of relevant experience, serves as a guideline to promote the de-professionalization of the expertise level associated with rehabilitation counseling and the professional provision of qualified services for individuals with disabilities. The commenters asserted that an individual with a baccalaureate degree, some related work experience, or volunteer work, is not equivalent to a master's degree level graduate who is a qualified counselor licensed to practice counseling.

Further, at least one commenter expressed concern that the flexibility offered by the new education and experience requirements could lead to the unintended diminution of a vocational rehabilitation workforce able to meet the needs of a consumer population with significant disabilities, which is its major focus, especially as public resources diminish. The commenter encouraged the Department to work with DSUs and academic institutions to ensure this diminution does not occur. The commenter stated that some of the degrees listed under these personnel standards would be appropriate for specialized titles such as ''business relations specialists'' but may not be appropriate for vocational rehabilitation counselors.

Discussion: Prior § 361.18(c)(1)(ii) permitted DSUs to hire individuals who did not meet the national or State-approved standard so long as the agency provided training to enable the individual to reach that higher standard. While WIOA deleted the provision that allowed DSUs to hire individuals at a lower standard so long as additional training was provided so that the staff person could eventually satisfy the national or State-approved standard, DSUs under final § 361.18(c)(1)(ii) must ensure that individuals who do not meet the higher standard satisfy certain statutorily-required minimum standards. Looking at the new requirements in this way, the new educational and experiential requirements merely set minimum hiring standards, which previously had been left at the DSU's discretion. In this manner, we disagree with commenters that the new provisions of section 101(a)(7)(B)(ii) of the Act, as amended by WIOA, and final § 361.18(c)(1)(ii) promote the de-professionalization of the vocational rehabilitation counselor or the diminution of the knowledge and skills needed to meet the vocational rehabilitation needs of individuals with disabilities.

We believe the education and experience requirements set forth in section 101(a)(7)(B)(ii) of the Act, as amended by WIOA, and final § 361.18(c)(1)(ii) enable DSUs to hire personnel in such a manner that results in an expansion of qualifications of staff available to provide vocational rehabilitation services. For example, the new education and experience requirements could enable DSUs to expand the number of staff trained to provide certain services critical to meeting the employment needs of individuals with disabilities and employers, such as employment specialists or job placement specialists, thereby increasing opportunities for employer engagement and the achievement of competitive integrated employment outcomes by individuals with disabilities. This broader range of acceptable education and experience could lead to a more diverse workforce in VR agencies.

Looking at the new personnel standard requirements in this way, they could be viewed as a means of enabling DSUs to expand the range of qualified personnel available to provide certain services in-house rather than having to contract for those services. DSUs could employ sufficient qualified personnel to work in teams to meet the holistic needs of the individuals served by the VR program, ranging from specific disability-related services to employment-related services. We believe this interpretation is consistent with the plain meaning of the statutory requirements in section 101(a)(7)(B) of the Act, and the heightened emphasis throughout WIOA on employer engagement and the achievement of competitive integrated employment outcomes.

Changes: None.

State Job Classification Minimum Qualifications

Comments: One commenter noted the various degrees listed (*e.g.,* psychology and business) in section 101(a)(7)(B)(ii) of the Act, as amended by WIOA, and proposed § 361.18(c)(1)(ii) are not typically seen for the same position when State governments are developing classification minimum qualifications because each of the degrees provide individuals with different skill sets. The commenter added that, while a DSU would need personnel with skill sets from many of the degrees listed, it would be unreasonable to expect that a single individual would have expertise in two or more specialized skill sets.

Some commenters stated that the standards in proposed § 361.18(c)(1) should be sufficient for recruitment of vocational rehabilitation counselors, but that the use of ''and'' between proposed §§ 361.18(c)(1)(i) and 361.18(c)(1)(ii) seems to imply that additional standards must be used. They expressed concern that requiring at least one year's paid or unpaid work in the field would make it challenging for DSUs to recruit qualified counselors directly from long-term training programs.

Discussion: We disagree with commenters that the degrees listed in section 101(a)(7)(B)(ii) of the Act, as amended by WIOA, and proposed § 361.18(c)(1)(ii) necessarily will pose problems for the development of minimum qualifications within State job classification. While we agree that it would be unreasonable for a single job position to list each of those degrees as a minimum qualification, it is reasonable to post various job positions within the classification for vocational rehabilitation counselors. As stated previously, we believe the amendments to WIOA provide DSUs with an opportunity to employ other personnel, such as business specialists or job placement specialists, who could complement the critical work performed by vocational rehabilitation counselors. In so doing, DSUs could minimize the need to contract for these services. While final § 361.18(c)(1)(ii) permits DSUs to hire individuals with a variety of degrees, there is no requirement or expectation that a vocational rehabilitation counselor or any other vocational rehabilitation professional or paraprofessional employed by the DSU be an expert in more than one area.

The education and experience requirements of section 101(a)(7)(B)(ii) of the Act apply only in those circumstances when the DSU is not able to hire vocational rehabilitation professionals and paraprofessionals who satisfy a national- or State-approved certification or licensure standard. Vocational rehabilitation counselors graduating from long-term training programs would meet a national or State-approved standard and could be hired in accordance with personnel standards established under section 101(a)(7)(B)(i) of the Act, which does not require that the individual satisfy minimum experience requirements.

Changes: None.

Additional or Substitute Qualifications

Comments: Two commenters recommended revising proposed § 361.18(c)(1)(ii)(B) by inserting a work experience requirement similar to that required for individuals with a baccalaureate degree as set forth in proposed § 361.18(c)(1)(ii)(A)(*1*).

Many commenters requested the proposed regulations be revised to include a new provision in § 361.18(c)(1)(ii) to allow a complement of work experience, in addition to specialized training or certification through either advanced higher education or through a legitimately recognized association that provides specialized training when working specifically with individuals who possess unique barriers to independence and require unique training, such as individuals who are blind.

Another commenter recommended that proposed § 361.18(c)(1)(ii) be revised to allow years of experience to substitute for the identified degree(s) for paraprofessionals, which could create reasonable flexibility. A requirement of years of experience, coupled with staff development required by the regulations, would assure that paraprofessionals are highly qualified to provide appropriate services to individuals with disabilities.

Discussion: We appreciate the suggestion made by two commenters adding minimum paid or unpaid work experience requirements for DSU personnel hired at the master's or doctoral level. We also appreciate the many comments recommending that, in addition to satisfying a national or State-approved standard, work experience be required for those personnel who work with individuals with significant barriers to employment, such as individuals who are blind or visually-impaired.

While we agree work experience can be valuable, section 101(a)(7)(B) sets forth explicit requirements for a DSU's personnel standards, including requirements related to minimum educational and experiential requirements. Given the explicit nature of these requirements, there is no statutory basis to require different or additional personnel standards in final § 361.18(c)(1).

Changes: None.

Interplay Between National or State-approved Certification or Licensure Standards and Minimal Educational and Experiential Requirements

Comments: Many commenters requested clarification regarding the interplay between the requirement that a State's CSPD be consistent with a national or State-approved certification or licensure standard in proposed § 361.18(c)(1)(i) and the minimal educational and experiential requirements in proposed § 361.18(c)(1)(ii). Most of these commenters did not support the proposed regulatory language, stating that it is confusing to have two sets of standards for vocational rehabilitation personnel. A few commenters questioned whether a DSU may choose between the two standards, *i.e.* choose to maintain the higher standard of § 361.18(c)(1)(i) or the lower standard of § 361.18(c)(1)(ii). Similarly, some commenters requested clarification about whether the DSUs can maintain their current personnel standards consistent with applicable national or State-approved or recognized certification, licensing, or registration requirements. These commenters were concerned that including lower standards in the regulations would force DSUs to lower their standards. Further, some commenters stated that most States have a minimum personnel standard that is greater than what is being proposed and asked whether the DSUs will have to hire vocational rehabilitation personnel at the lower educational standard.

Discussion: Contrary to the suggestions made by several commenters, the personnel standards in section 101(a)(7)(B)(i) and (ii) are separate and distinct requirements. Therefore, DSUs may not choose to implement one and not the other but, rather, must develop both standards. Under section 101(a)(7)(B)(i), States must continue to develop personnel standards that are consistent with applicable national or State-approved certification or licensure requirements, as well as develop personnel standards that satisfy minimum education and experience requirements. As has always been the case, CSPD standards do not dictate whom a State may or may not hire. Hiring is solely a State matter. Instead, the CSPD standards simply set parameters for the standards a State must use in establishing its hiring procedures. There is nothing in the Act or these final regulations to preclude a DSU from continuing to hire vocational rehabilitation professionals and paraprofessionals that satisfy the higher standard. However, in hiring individuals who do not meet a national or State-approved certification or licensure standard, DSUs must hire individuals who meet the educational and experiential requirements set forth in section 101(a)(7)(B)(ii). These individuals must have at least a baccalaureate degree in a specified field of study plus one year of relevant experience, or a master's or doctoral degree in one of the fields specified.

Further, if a vocational rehabilitation counselor is hired under the standard set forth in final § 361.18(c)(1)(i) (*e.g.,* a standard consistent with a national or State-approved standard), that vocational rehabilitation counselor is not required to meet the education or experience requirements set forth in final § 361.18(c)(1)(ii) as well. There is no requirement that an individual meet both personnel standards set forth in final § 361.18(c)(1).

Changes: None.

Succession Planning

Comments: One commenter suggested that the CSPD requirements should address succession planning at the administrative level. The commenter recommended that the final regulations be revised to incorporate CSPD requirements to address the void in administrative skill and knowledge created in DSUs by retirements.

Discussion: We agree with the commenter's concern that DSUs face a significant loss of knowledge and skills as key personnel retire. We note that DSUs are required, under final § 361.18(d)(2)(iii), to include succession planning in their staff development plans when developing personnel standards and providing on-going training.

Changes: None.

Re-Training of Staff Not Meeting Personnel Standards

Comments: Several commenters expressed serious concerns about the elimination of the requirement to re-train staff who are not meeting the DSU's personnel standards for qualified staff, in prior § 361.18(c)(1)(ii).

Discussion: While we appreciate the concern expressed by commenters regarding the deletion of the regulatory requirement for the DSU to provide re-training to personnel who do not meet the DSU's personnel standards, the statutory requirement for re-training, which had been contained in section 101(a)(7)(B)(ii) of the Act, as amended by WIA, has been deleted by the amendments made by WIOA. Despite the deletion of the regulatory requirement, there is nothing in the Act or these final regulations that prohibits a DSU from making the decision to re-train staff as the agency deems appropriate. However, there is no statutory basis for the Department to require such re-training in these final

regulations given the specific deletion of that statutory requirement.

Changes: None.

Standards of Personnel Development—Other Comparable Requirements (§ 361.18(c)(1))

Comments: Several commenters recommended that the Department define ''other comparable requirements,'' which is included in the personnel standard in section 101(a)(7)(B)(i) of the Act and proposed § 361.18(c)(1)(i) and applies if there are no applicable national, State-approved, or recognized certification, licensing, or registration requirements. The commenters recommended that ''other comparable requirements'' should include competence in counseling and guidance, knowledge and application of the medical and psychological aspects of disability, knowledge and implementation of vocational testing, working knowledge and integration of labor market data and disability employment policy, and providing the services required to develop and implement individualized career plans that assist persons with disabilities in successful employment in a competitive integrated work environment.

Discussion: Section 101(a)(7)(B)(i) of the Act and final § 361.18(c)(1)(i) require a DSU to develop personnel standards that are consistent with any national or State-approved or recognized certification, licensing, or registration requirements, or, in the absence of these requirements, other comparable requirements (including State personnel requirements) that apply to the profession or discipline in which that category of personnel is providing vocational rehabilitation services. While we agree with commenters that ''other comparable requirements'' could include any of the areas suggested, we disagree that the final regulations should define the phrase. This phrase provides DSUs with maximum flexibility when developing personnel standards by enabling DSUs to modify personnel standards as relevant credentials evolve.

Changes: None.

Meaning of ''A 21st Century Understanding of the Evolving Labor Force and the Needs of Individuals With Disabilities''

Comments: Many commenters asked for clarification of what is meant by a 21st century understanding of the evolving labor force and the needs of individuals with disabilities, as used in section 101(a)(7)(B)(ii) of the Act, as amended by WIOA, and in proposed § 361.18(c)(2)(ii). Many commenters stated that the list of examples of relevant personnel skills in proposed § 361.18(c)(2)(ii) either did not help clarify the meaning or was incomplete. Some commenters stated that the list represented skills more oriented to the medical models of the past rather than the employer focus required today. One commenter asserted that the congressional intent behind the requirements for a 21st century understanding included a focus on employment; an understanding of economic and job market trends, business management, and operations; and meeting the needs of local and regional employers.

Many commenters who thought the list of examples was incomplete suggested additions. Some were suggested because the commenters stated that customary, but critical, skills for vocational rehabilitation counselors had been left out of the list. Some brought a more modern focus to the traditional topic, refining knowledge of medical and psychological aspects of disability to include more employment-focused use of such knowledge to determine functional limitations and the vocational implications of these functional limitations on employment planning and workplace accommodations.

Other commenters provided lists of skills that represented areas in which the focus is on greater knowledge of the world of work, including labor market trends and various sources of labor market information and its use in selecting vocational goals and developing individualized plans for employment. Some commenters suggested that using information about job requirements, labor market trends, and other labor market information would help build relationships with employers through greater knowledge of their businesses and their employment requirements and would also help in job development and job placement efforts.

One group of commenters suggested that a recent U.S. Government Accountability Office (GAO) study, which identified gaps in the knowledge of vocational counselors employed by the U.S. Department of Veterans Affairs, could serve as a starting point for developing a list of skills needed for the 21st century vocational rehabilitation counselor employed by the DSU. Some skills included familiarity with Bureau of Labor Statistics data, the Dictionary of Occupational Titles, and the Department of Labor's O*NET occupational system; vocational testing and assessment; job accommodations; training in the Americans with Disabilities Act (ADA) and other employment discrimination laws; vocational implications of various disabilities, including traumatic brain injury, post-traumatic stress syndrome, mental illnesses, and autism; employment plan development; Social Security work incentives, and the Ticket to Work and Self-Sufficiency program; and knowledge of disability programs in the State and local area, including independent living programs.

One commenter suggested that the six areas of knowledge and skills in proposed § 361.18(c)(2)(ii) could be used to ensure vocational rehabilitation personnel have a 21st century understanding. The commenter stated the examples focused on critical knowledge domains and closely mirror the knowledge domains required for accreditation by a vocational rehabilitation counseling program. However, the commenter expressed concern that the process of evaluating whether candidates have the necessary knowledge and skills would be insufficient without the assurance that the candidate graduates from an accredited vocational rehabilitation counseling program. The commenter recommended that the Department recognize graduates from accredited programs as having the knowledge, skill, and experience requirements that are necessary to provide high quality services to individuals with disabilities.

Discussion: We appreciate the many comments and suggestions we received about the skills and knowledge essential to ensuring a 21st century understanding of the evolving labor force and the needs of individuals with disabilities under section 101(a)(7)(B)(ii) of the Act, as amended by WIOA, and in proposed § 361.18(c)(2)(ii). Lacking a widely-accepted definition of the term, we proposed several examples in the regulations to help clarify its meaning. Most commenters, however, stated that the examples in proposed § 361.18(c)(2)(ii) were not sufficient because they did not include a clear focus on employment or emphasize the use of the most up-to-date techniques.

In considering what changes to make in the examples, we first recognized that the requirements for a 21st century understanding apply to knowledge and skills relevant to working with both employers and individuals with disabilities. We also believe that ''21st century'' refers to maintaining a cutting edge, state-of-the-art approach to whatever topic is included in the list, not merely maintaining activities at traditional, established levels. These underlying principles governed the review, selection, and wording of the examples.

We looked at traditional topic areas that are still necessary for working with individuals with disabilities and employers, with the intent to add language that suggests use of contemporary practices or that adds emphasis on an employment focus. For example, we replaced the previous language about knowledge of medical and psychological aspects of disability with language about knowledge of the functional limitations of various disabilities and the vocational implications of these functional limitations for employment.

We considered new approaches to learn about the world of work, large-scale employer needs (*e.g.,* labor market trends and occupational shortages), small-scale employer needs (*e.g.,* specific job requirements, soft skill requirements), and ways to use information differently to inform traditional vocational rehabilitation practices (such as using labor market information to assist in developing vocational goals and employment plans, while providing informed choice). We also took into consideration the GAO report titled ''VA Vocational Rehabilitation and Employment: Further Performance and Workload Management Improvements Are Needed'' (GAO–14–61) published January 14, 2014, as well as various lists of suggested examples provided by national organizations and endorsed by other commenters. After considering all of the comments and suggestions received, we have amended the examples in final § 361.18(c)(2)(ii). We clarify that the term ''apprenticeships'' as used in 361.18(c)(2)(ii)(D) does not include Registered Apprenticeships.

In response to commenters asking whether the ''21st century understanding'' requirement applies only to vocational rehabilitation counselors, section 101(a)(7)(B) of the Act, as amended by WIOA, and final § 361.18(c) require the DSU to develop personnel standards that apply to all vocational rehabilitation professionals and paraprofessionals, not just vocational rehabilitation counselors. The revised list of examples set forth in final § 361.18(c)(2)(ii) provides a comprehensive, but not exhaustive, list of skills necessary for achieving employment outcomes in the 21st century. Because we realize that States may choose to employ staff in a variety of positions, the skills listed may be applicable to various positions in differing ways.

Finally, as we described earlier in the *Applicability of Education, and Experiential Requirements to Rehabilitation Counselors (§ 361.18(c)(1)) section,* we agree with the comment that accredited programs provide vocational rehabilitation counselors with knowledge and skills critical to providing vocational rehabilitation services to individuals with disabilities. However, section 101(a)(7) of the Act does not specify that individuals pursuing employment as vocational rehabilitation counselors must obtain an undergraduate or a graduate-level degree in rehabilitation counseling from accredited programs and final § 361.18(c) mirrors the Act in this respect. In addition, we recognize that other DSU personnel, such as employment specialists and job placement specialists, serve a critical role in working with employers and individuals with disabilities. The Secretary believes all vocational rehabilitation professionals and paraprofessionals must have the knowledge and skills necessary to satisfy the ''21st century understanding'' requirement.

Changes: We have substantially revised the examples in final § 361.18(c)(2)(ii) to provide a more robust list of the skills and knowledge needed to meet the needs of employers and individuals with disabilities in the evolving 21st century labor market.

Staff Development (§ 361.18(d))

Comments: Several commenters requested clarification regarding proposed § 361.18(d)(1)(i), which requires, as part of the DSU's system of personnel development, training implemented in coordination with entities carrying out State programs under section 4 of the Assistive Technology Act of 1998 (29 U.S.C. 3003). Some of these commenters asked whether the purpose of this provision is to require those entities to provide the training to the DSUs. If so, the commenters requested that the Department revise proposed § 361.18(d)(1)(i) to make that intent clear. These commenters also sought clarification on how the training is to be coordinated with the State's assistive technology program. Other commenters thought a Federal ''training fund'' source should be made available for the training, regardless of who provides it. Still other commenters stated that proposed § 361.18(d)(1)(i) should be revised to require that the DSUs fund the entities carrying out the State's assistive technology program to provide this training.

Many commenters expressed concerns about insufficient training funds to meet the training needs of vocational rehabilitation personnel and requested that the Department require DSUs to allocate training funds for any required CSPD training. The commenters were further concerned that the potential hiring of staff at the baccalaureate or higher degree in a discipline other than vocational rehabilitation counseling would increase the need for training in order to ensure these personnel have solid knowledge of the VR program. Despite this expected increased need for training, DSUs will face reduced financial resources because of the elimination of the In-Service Training Grant program by WIOA. Therefore, these commenters were concerned that DSUs would allocate less funding for staff development training, certification fees, and other related expenses. One commenter requested that the Department provide training funds to each DSU to assist in providing staff development and personnel training in the areas mandated by WIOA. Still another commenter recommended that the Department offer regional training rather than onsite training through its monitoring or technical assistance process. The commenter said the regional trainings could benefit a larger group of personnel.

A few commenters recommended that proposed § 361.18(d) be revised to require specific training areas for staff development. For example, one commenter stated that many vocational rehabilitation counselors struggle to identify appropriate service providers for individuals with autism. The commenter requested further guidance from the Department on providing vocational rehabilitation services to this population in order to increase opportunities for competitive integrated employment.

Another commenter asked the Department to require DSUs to include in their agency planning and oversight the substantial involvement of mental health advocates, including individuals who have personally experienced mental illness, treatment, and recovery. Similarly, another commenter recommended that DSUs be required to hire and train peer service providers experienced in working with individuals with mental illness who are seeking vocational rehabilitation services, thereby increasing the DSU's effectiveness in serving this population. Still another commenter recommended that staff development include caseload management training, including implementation standards, measures, techniques, and strategies.

Another commenter stressed the importance of coordinating personnel development activities under the Act and the IDEA. The commenter

recommended that State and local education agencies and DSUs establish memoranda of understanding on coordinating personnel development activities. Yet another commenter recommended that proposed § 361.18(d) require staff development to emphasize the need for evolving skills, including understanding the evolving labor market, nondiscrimination laws, the medical and psychosocial aspects of various disabilities, and how this understanding evolves over time.

Discussion: We appreciate the comments seeking clarification of the requirement that the DSU's CSPD must include assistive technology training for vocational rehabilitation professionals and paraprofessionals. Section 101(a)(7)(A)(v)(I) of the Act was amended slightly by WIOA, but not in a manner that imposed additional requirements for this particular training. Therefore, final § 361.18(d)(1)(i) contains only technical changes from the prior regulation, and there is no statutory basis for the Department to add new requirements regarding how the training should be financed. Section 101(a)(7)(A)(v)(I) of the Act, as amended by WIOA, and final § 361.18(d)(1)(i) simply require DSUs to ensure their vocational rehabilitation professionals and paraprofessionals are adequately trained. This must include a system for the continuing education of personnel in rehabilitation technology, and it must include training implemented in coordination with the entity carrying out the State's assistive technology program. It is within the DSU's discretion to determine how and by whom such training will be provided, so long as the training is adequate.

Further, it is beyond the scope of the Act and these regulations to mandate that an entity, authorized under a separate Federal law, such as the Assistive Technology Act of 1998, perform any action, including providing the training described here. There is also no separate Federal program from which money may be given to DSUs to pay for this training, as in-service training funds were eliminated from the Act by WIOA. However, the Act does not prohibit DSUs from using title I VR program funds to provide the training directly or through a contract with the entity providing assistive technology services in the State.

There are many possible sources of training on assistive technology and several ways in which the DSUs may coordinate with the State assistive technology program entity. For example, the DSU may select a trainer with input from the State's assistive technology program entity, or the DSU and the State assistive technology program entity may jointly train DSU staff. Final § 361.18(d)(1)(i) provides the DSU with maximum flexibility to coordinate with the assistive technology program entity in the manner it deems appropriate.

While we understand the limited financial resources available to DSUs, there is no authority under the Act to provide funding to DSUs for any of the trainings required by section 101(a)(7) of the Act and final § 361.18(d)(1)(i). As the commenters noted, WIOA eliminated the In-Service Training Grant program, which had been used by many DSUs to provide staff development training. Nonetheless, the Act has, and continues to, permit DSUs to use title I VR program funds to provide staff development and training. Given the availability of VR program funds for this purpose, we disagree that DSUs necessarily will allocate fewer resources for this effort.

Finally, the Department will explore options for providing staff development trainings on a broader scale, including regional training.

As section 101(a)(7) of the Act is specific about the training areas that may be included for staff development, there is no statutory basis for imposing additional training requirements. However, final § 361.18(d)(2) is consistent with the Act in that it gives DSUs maximum flexibility to use staff development trainings that are specific to each DSU's needs. Nevertheless, we understand the concerns raised by commenters requesting training on specific topics. We agree that serving individuals with autism may raise many complex issues, some of which are addressed in an Institute on Rehabilitation Issues Monograph on rehabilitation of individuals with autism spectrum disorders, which may be found at: *http://www.iriforum.org//books.aspx*.

While there is statutory authority under section 101(a)(21)(A)(i)(III) to require DSUs to involve mental health advocates in the agency's planning and oversight activities when the DSU has an independent commission or council, there is no specific statutory requirement under section 101(a)(7) that DSUs hire mental health peer service providers. Moreover, there is no statutory basis under section 101(a)(7)(A)(v) of the Act to require caseload management be included in staff development training. However, there is nothing to preclude a DSU from doing these things under § 361.18(d)(2) if a need is identified by the DSU.

Finally, we agree with the commenter regarding the need for coordinating staff development between DSUs and State and local education agencies. The Act, as amended by WIOA, places heightened emphasis on providing vocational rehabilitation services to students and youth with disabilities. Although section 101(a)(7) of the Act does not require DSUs to enter into memoranda of understanding with educational agencies, final § 361.18(f) continues to mandate this coordination as it has for many years in prior regulations. We also agree that staff development should emphasize the evolving skills needed to provide vocational rehabilitation services so that individuals with disabilities may achieve competitive integrated employment in the evolving 21st century labor market. Only with these evolving skills will vocational rehabilitation personnel be able to engage effectively with employers in the evolving labor market of the 21st century. We believe the staff development requirement set forth in final § 361.18(d)(1) and (2) covers these skills needed in the 21st century evolving labor market.

Changes: None.

Training Based on the Needs of the DSU

Comment: None.

Discussion: After further Departmental review, we have determined proposed § 361.18(d)(2) contained a drafting error by inadvertently using the word ''should'' rather than ''must.'' The regulation has used the term ''must'' since final regulations were published in 1997, with regard to the specific training areas for staff development. The specific training areas ''must'' be based on the needs of the DSU. Final § 361.18(d)(2) reflects the correct wording, and this change in these final regulations represents no change in the requirement for DSUs because the provision now reads as it has since 1997.

Changes: Final § 361.18(d)(2) has been changed to require training areas for staff development be based on the needs of the DSU, as is true in prior regulations.

Public Participation Requirements (§ 361.20)

Public Hearings for Changes in an Order of Selection

Comments: Several commenters supported the changes to the prior regulations in proposed § 361.20 that outline the requirements for public notice and participation prior to the adoption of any substantive policies or procedures governing the provision of vocational rehabilitation services under the State plan, including substantive

amendments. Proposed § 361.20 clarifies through descriptive examples the distinction between substantive and administrative changes to VR program rules, policies, and procedures. While ''substantive changes'' trigger the requirement that the designated State agency provide notice and conduct a public meeting, ''administrative changes'' typically do not. These commenters stated that the proposed regulation clarifies and supports a more rigorous and open channel of communication between the designated State agency, the SRC, and community stakeholders.

Nonetheless, several commenters requested further clarification. One commenter asked if a DSU must conduct a public meeting every time it opens or closes a priority category under an order of selection.

Discussion: We appreciate the support for, as well as the requests for further clarification of, proposed § 361.20, which distinguishes between those substantive changes requiring public meetings and those administrative changes that do not.

Final § 361.20(a)(2)(v) states that adopting or amending policies implementing an order of selection constitutes a substantive change that requires public input. However, it is the Department's long-standing policy that a DSU need not conduct a public meeting each time it opens or closes a priority category if doing so is consistent with the information describing the implementation of the order of selection in that agency's currently approved State Plan (now the VR services portion of the Unified or Combined State Plan).

By contrast, we believe that closing one or more priority categories would be a substantive change in the administration of the VR program, and would consequently trigger the requirement to conduct a public meeting if such change represents a departure from the manner in which the DSU has implemented the order of selection under the approved State Plan. For example, if a DSU implements an order of selection and closes one or more priority categories after one or more years without closing priority categories, we believe this action would constitute a substantive change in the administration of the VR program and would require a public meeting.

Changes: None.

Public Meetings of the State Rehabilitation Council

Comments: One commenter asserted that meetings of the SRC should fulfill the requirements of proposed § 361.20, since these are public meetings, and the Council is charged with the responsibility to review vocational rehabilitation policies and other substantive changes to the VR program. The commenter stated that holding public meetings in addition to the Council's meetings takes time away from the central work of the DSU.

Discussion: Under section 101(a)(16)(A) of the Act and final § 361.20, it is the responsibility of the designated State agency, not the SRC, to conduct public meetings. Therefore, the Council's meetings cannot satisfy, on their own, the requirement of final § 361.20. Likewise, it is the responsibility of the Council, and not the designated State agency, to conduct its meetings as required by section 105 of the Act and final § 361.17. We recognize that the designated State agency works closely with the Council, as it is required to do, with regard to substantive changes made to policies and procedures affecting the VR program. Therefore, if the designated State agency and the Council determine it would be expedient and effective to do so, they may use the regular or special meetings of the Council as a forum for obtaining input from the Council and the public on substantive changes in VR program rules, policies, and procedures. If the designated State agency chooses to conduct joint meetings in this manner, they must ensure that all requirements concerning the conduct of public meetings in final § 361.20 are satisfied. We emphasize that neither the designated State agency nor the Council are required to conduct joint meetings for the purpose of gathering public input on substantive changes to the administration of the VR program under either final §§ 361.17 or 361.20, though both entities may find it efficient to do so.

Changes: None.

Substantive and Administrative Changes

Comments: A few commenters stated that the distinction between those changes in DSU rules, policies, and procedures that require public comment and those that do not was not clear in the proposed regulation, and requested further clarification.

Discussion: With respect to the comments seeking further clarification and examples of what constitutes a substantive versus administrative change, the commenters did not specify what additional clarification was needed, and so we can provide no further examples. However, the lists of examples in final § 361.20(a)(2) and (a)(3) are not exhaustive; rather, they illustrate some of the most common substantive and administrative changes contemplated by DSUs. We recognize that States may contemplate many more changes to their rules, policies, and procedures implementing the VR program than those identified in these final regulations.

In addition, the Act, as amended by WIOA, and these final regulations provide significant flexibility to the States in the manner in which they administer the VR program and deliver vocational rehabilitation services, and States may adopt rules, policies, and procedures governing the administration of the program that best suit their particular circumstances. As a result, States may adopt rules, policies, and procedures that vary widely from one another, and we do not believe that it is practicable to further clarify, or add to, the examples listed in final § 361.20(a)(2) and (a)(3). While we believe that final § 361.20 provides States with the guidance necessary to determine if a potential change in rules, policies, and procedures constitutes a substantive change requiring a public meeting, we encourage States to seek guidance from the Department about State specific changes.

Changes: None.

Public Comment Through Electronic Means

Comments: One commenter asked if publishing policy changes on a State agency's Web site and receiving public comment and input at the Web site constitutes a public meeting.

Discussion: The publication by the DSU of a proposed change in rules, policies, or procedures governing its administration of the VR program on a Web site does not constitute a public meeting under section 101(a)(16)(A) of the Act or final § 361.20. As used in final § 361.20(a), which requires public meetings to be held throughout the State, ''public meeting'' means a gathering of people in a physical or virtual (as in the case of videoconferences or teleconferences) location. Nonetheless, designated State agencies can use postings on a Web site and other innovative strategies to gather valuable input from individuals with disabilities, community rehabilitation programs, and other stakeholders affected by proposed changes in rules, policies, or procedures.

Changes: None.

Requirements Related to the Statewide Workforce Development System (§ 361.23)

Comments: Apart from comments on the joint regulations proposed by the Departments of Education and Labor

implementing jointly administered requirements for the one-stop delivery system, one commenter requested that we retitle § 361.23 to improve the reference to the joint regulations governing the one-stop delivery system. A second commenter expressed concern that one-stop centers cannot meet the needs of individuals who are blind or visually impaired. The commenter did not provide an explanation or recommendation on how the regulations could be revised to address this concern.

Discussion: Final § 361.23 provides a cross-reference to the joint regulations governing the one-stop delivery system in subpart F of part 361. Therefore, we believe there is no need to retitle or amend the section further as suggested by the commenter.

We appreciate the concern regarding the availability of services at the one-stop centers for individuals who are blind or visually-impaired. While we understand that there have been some issues with respect to accessibility and availability of services for individuals with significant disabilities in the past, section 121(b)(1)(B)(iv) of WIOA identifies the VR program as a core partner of the workforce development system. As such, DSUs and other core partners of the workforce development system are required to ensure the programmatic and physical accessibility of the services provided through the one-stop centers. For further information, see the joint regulations governing the one-stop delivery system published elsewhere in this issue of the **Federal Register.** Furthermore, we strongly encourage DSUs that serve individuals who are blind or visually impaired to ensure the needs of these individuals are met through the one-stop delivery system, as appropriate, by strengthening their relationships with other core programs through the memoranda of understanding required under section 121 of WIOA and the joint regulations in subpart F. The Secretary believes the strengthened relationships between the VR program and other core programs, as well as the delivery of vocational rehabilitation services directly at the one-stop centers, will ensure the needs of individuals who are blind or visually impaired are met.

Changes: None.

Cooperation and Coordination With Other Entities (§ 361.24)

General

Comments: Some commenters expressed concerns about the difficulty in establishing new collaborative relationships, the lack of or limited fiscal resources necessary to develop and support collaboration, and mechanisms for accountability and transparency. One commenter indicated that collaborative relationships do not currently exist in their State and that establishing them will require additional money and will alter the methodology for developing the State Plan and the statewide needs assessment.

A few commenters expressed concern that proposed § 361.24 contained limited language regarding the contents of agreements and the delineation of issues that should be addressed. For example, a few commenters remarked that there was no requirement for an agreement between the DSU and Medicaid, and mental health agencies, for people with psychiatric disabilities needing long-term employment supports funded by Medicaid. The commenters suggested that cooperative agreements include identification of individuals needing extended supports, referral mechanisms, the use of Medicaid funds in providing extended supports, how funds will be braided between the DSU and agencies with primary responsibilities to serve individuals with specific disabilities, and sources and criteria for providers of extended supports. A similar comment about waivers for home and community based settings stressed that all parties must work cooperatively at both the policy and individual levels; however, the commenter noted that the proposed regulations merely require there to be an agreement, without specifying minimum contents of those agreements.

Discussion: We appreciate and understand the concerns about the difficulty in establishing new collaborative relationships required under the Act, the lack of or limited fiscal resources necessary to do so, and mechanisms for accountability and transparency. However, DSUs have extensive experience in meeting the requirements under prior § 361.24 for cooperating and coordinating with other entities, and we believe that this will enable DSUs to implement the collaboration requirements in the Act as amended by WIOA.

We also appreciate the concerns that proposed § 361.24 contained limited language regarding the contents of agreements and the delineation of issues that should be addressed. While section 101(a)(11) specifies the content requirements for only some of the cooperative agreements, nothing in the Act or final § 361.24 precludes DSUs from including specific content to clarify the responsibility of collaborating entities through these agreements, and we strongly encourage DSUs to do so. For example, DSUs may enter into cooperative agreements with Medicaid and mental health agencies for people with psychiatric disabilities needing long-term employment support funded by Medicaid. Cooperative agreements may include identification of individuals needing extended supports, referral mechanisms, the use of Medicaid funds in providing extended support, how funds will be braided between DSUs and agencies with primary responsibilities to serve individuals with specific disabilities, and sources and criteria for providers of extended services.

Changes: None.

Cooperation and Collaboration With Other Agencies and Entities

Comments: Many commenters supported proposed § 361.24, which expanded the entities with whom the DSU must collaborate and coordinate its activities under the VR program and several offered additional recommendations.

One commenter especially supported the coordination with employers. Other commenters supported the requirement for cooperative agreements with the State Medicaid agency and the State agency primarily serving people with intellectual and developmental disabilities; however, several commenters noted that the State agency responsible for providing mental health services was not included in this requirement and recommended its inclusion.

Many commenters strongly recommended that DSUs be required to enter into formal interagency agreements with AIVRS grant recipients and with Tribal Education Agencies (TEAs) located in the State.

One commenter recommended that the assurance in the VR portion of the Unified or Combined State Plan specify that the DSU coordinate activities with other State agencies functioning as an employer network under the Ticket to Work and Self-Sufficiency Program established under section 1148 of the Social Security Act (42 U.S.C. 1320b–19), and that the network be expanded to include other agencies acting as employer networks. A related comment inquired whether there should be a Federal Partnership Plus agreement instead of individual State agreements.

A few commenters suggested that in the development of the vocational rehabilitation services portion of the Unified or Combined State Plan, the Department require the DSU to collaborate with the lead entity

implementing programs under the Assistive Technology Act of 1998.

Discussion: We appreciate the commenters' review, support, and recommendations. Although some commenters recommended adding the State agencies responsible for providing mental health services to the required cooperative agreement with the State Medicaid agency and the State agency serving individuals with intellectual and developmental disabilities, section 101(a)(11)(G) of the Act does not require such an agreement and, in fact, is very specific about the entities with which the DSU must develop interagency agreements. For this reason, there is no statutory basis for us to require the DSUs to enter into formal cooperative agreements with the State agencies responsible for providing mental health services.

However, we agree with commenters that it could be beneficial to individuals with disabilities to formalize coordination of services between the DSUs and the State agencies providing mental health services. While final § 361.24(f) does not require a formal cooperative agreement, as the commenters suggest, there is nothing in the Act or in this section that prohibits a DSU from entering into a formal cooperative agreement with the State agencies providing mental health services. Furthermore, section 101(a)(11)(K) of the Act, as amended by WIOA, and final § 361.24(g) stress the importance of the relationship between the DSU and the State agencies providing mental health services and requires collaboration between them.

Similarly, while we agree with commenters that coordination and collaboration between DSUs and entities holding section 14(c) certificates under the FLSA and Tribal Education Agencies could be beneficial for different reasons and we encourage such coordination and collaboration, there is no basis under section 101(a)(11) of the Act to require this. However, Section 101(a)(11)(H) of the Act and final § 361.24(d) do require the VR services portion of the Unified or Combined State Plan to include an assurance that the State has entered into a formal cooperative agreement with each AIVRS grant recipient in the State.

Additionally, the Department does not have the authority under section 101(a)(11)(J) of the Act to expand the requirement in final § 361.24(i) to include non-State agencies acting as employer networks. The Act only requires the DSU to coordinate with State agencies serving as employment networks under the Ticket to Work program. While final § 361.24(i) does not impose the requirement on the DSUs for non-State agencies serving this function, there is nothing in the Act or these final regulations that would prohibit a DSU from doing so. Similarly, the statute does not provide the authority to develop a Federal Partnership Plus agreement in lieu of individual State agreements.

Section 101(a)(11)(I) of the Act and final § 361.24(h) require an assurance in the VR portion of the Unified or Combined State Plan that the DSU and the lead agency and the entity, if any, implementing programs under section 4 of the Assistive Technology Act of 1998 have developed working relationships and will enter into agreements for the coordination of their activities, including the referral of individuals with disabilities to programs and activities described in that section. However, the Act does not require that the DSU collaborate with the Assistive Technology Act program in developing the VR portion of the Unified or Combined State Plan. Therefore, to add this requirement in final § 361.24(h), as recommended, is not supported by the Act. Also, nothing in the Act precludes a DSU from seeking input from the Assistive Technology Act program in the development of the VR portion of the Unified or Combined State Plan.

Changes: None.

Non-Educational Agencies

Comments: One commenter asked for clarification of non-educational agencies and requested examples.

Discussion: Section 101(a)(11)(C) of the Act, as amended by WIOA, and final § 361.24(a) require the DSU to describe in the VR services portion of the Unified or Combined State Plan its cooperation with, and use of, a variety of entities, including non-educational agencies serving out-of-school youth. In response to the commenter, the Act does not define non-educational agencies. Therefore, the Act and these final regulations maximize flexibility because the DSU is not limited to a list that may or may not be applicable in any given State. However, we believe that non-educational agencies could include public systems such as welfare services, foster care, and the juvenile or criminal justice systems serving out-of-school youth. Non-educational agencies also could include those State or local agencies that administer the youth formula grant program authorized under title I of WIOA.

Changes: None.

Federal Agreements

Comments: A few commenters asked whether we intend to establish working arrangements or agreements with agencies at the Federal level to assist States in their efforts to implement proposed § 361.24, and one suggestion was made to establish an interagency coordinating workgroup to review any working arrangements or agreements with these agencies.

Discussion: The Department already cooperates and works collaboratively with its Federal partners. The Act does not provide for formal arrangements at the Federal level for the coordination, collaboration, and cooperation required by section 101(a)(11) of the Act; however, we believe that guidance and technical assistance in the development of agreements and cooperative arrangements may be beneficial. Where appropriate, the Department will work collaboratively with Federal partners to assist States.

Changes: None.

Guidance on the Braiding of Funds

Comments: Two commenters suggested that Federal agencies coordinate guidance regarding the ways in which various funding streams may be braided to help States implement agreements to fully support individuals with disabilities. One commenter requested that the Department emphasize transparency of coordination efforts to track resources to ensure accountability and sustainability.

Discussion: Each Federal program has its own requirements for the expenditure of funds, and States must adhere to those requirements when collaborating. Moreover, while the Uniform Guidance, as set forth in 2 CFR part 200, provides for the braiding and blending of funds, it also requires that funds must be spent solely on allowable costs, namely those costs permitted under and allocable to that program. A cost is allocable to the extent that the program receives a benefit relative to the expenditure of those funds (in other words, a proportionate share of those expenditures). While the Department exercises oversight of the expenditure of funds by DSUs under the Act, we do not have the authority to provide guidance related to the expenditure of funds provided by other Federal agencies or programs. However, we support transparency of coordination efforts to track resources to ensure accountability and sustainability.

Changes: None.

Requirements for Training

Comments: One commenter suggested including joint training among the activities in which the DSU must coordinate with other entities.

Discussion: There is no authority under section 101(a)(11) of the Act to require the DSUs to add joint training to the activities that the DSU must coordinate with other entities, with one exception. Joint training is required in section 101(a)(11)(H) with grant recipients under the AIVRS program, but not with the other entities in section 101(a)(11) of the Act.

Changes: None.

Notification of the Client Assistance Program

Comments: One commenter suggested that proposed § 361.24 require that all cooperating agencies notify program participants about the CAP in each State.

Discussion: The suggestion is inconsistent with the Act. Section 20 of the Act requires only programs and projects providing services under the Act, not cooperating agencies, be mandated to notify program participants of the CAP. Moreover, section 112 of the Act authorizes the CAP to serve only individuals who are applicants or consumers of programs funded under the Act. To the extent that a cooperative entity is serving an individual who is also an applicant or consumer of a program funded under the Act, that individual would already receive information about the CAP under section 20 of the Act.

Changes: None.

Requirements for Third-Party Cooperative Arrangements (§ 361.28)

In-Kind Contributions

Comments: Two commenters agreed with the changes to the prior regulation in proposed § 361.28. Many commenters, primarily from one State, noted that excluding costs for administrative time and other indirect costs paid by third parties as an allowable source of match would negatively impact cooperative arrangements between VR agencies and their partners.

One commenter requested that the regulations maintain flexibility for States to use in-kind funding contributions from partners to augment a State's match and leverage State funding. Another commenter expressed concern that as a result of the proposed changes, services for students and clients in one program would cease, and that school district employees would lose their jobs.

Discussion: We appreciate the commenters' concerns, and agree that eliminating the ability of third-party cooperative agencies from using certified personnel time would indeed pose a hardship, but such prohibition is not contained in § 361.28, either proposed or final. Section 361.28(c), both proposed and final, explicitly permits public third-party cooperative agencies to provide match via certified personnel time for staff directly providing the vocational rehabilitation services under the third-party cooperative arrangement, as they have been permitted to do for many years. For example, for a school that is the cooperating agency, the cooperating agency may use the certified time for the teacher responsible for teaching the students under the third-party cooperative arrangement program as a permissible source of match since the teacher is directly providing the service under the third-party cooperative arrangement. Final § 361.28(c) does not change the long-standing arrangements that many DSUs have with third-party cooperative agencies, such as the schools, with regard to certified personnel time. However, not all certified personnel time is permissible as a source of match under a third-party cooperative arrangement. As stated above, the teacher's time is permissible for match purposes under the VR program because he or she is directly providing the service, but certified time for other school staff such as principals, vice principals, secretaries, and supervisors, is not permissible for match purposes under the VR program because these individuals do not directly provide vocational rehabilitation services. The certified time for these individuals is a third-party in-kind contribution as defined in 2 CFR 200.96 and, as such, is not permissible source of match for the VR program. While final § 361.28(c) is a new provision, the content merely clarifies the matching requirements that existed in accordance with § 361.60(b), which remains virtually unchanged by these final regulations. The changes made to this section further clarify the allowable sources of match under third-party cooperative arrangements. Consequently, we believe that final § 361.28(c) should have little or no effect on the services for students and other individuals with disabilities served through third-party cooperative arrangements or the cooperative agencies and their employees.

Contrary to what some commenters appear to believe, third-party in-kind contributions have never been an allowable source of match under the VR program, including for purposes of third-party cooperative arrangements. Final § 361.60(b)(2), which remains unchanged, prohibits the use of third-party in-kind contributions as a source of match for the VR program and this prohibition would apply to third-party cooperative arrangements under the VR program as well. However, during monitoring of the VR program, the Department has found that many DSUs seem to be unaware of this prohibition, especially in the context of third-party cooperative arrangements. For this reason, the Department proposed revisions to § 361.28(c), which are maintained in these final regulations, to remind DSUs of the allowable sources of match for third-party cooperative arrangements. Specifically, these sources include cash transfers from the cooperating agency to the DSU and certified personnel expenditures of cooperating agency staff who directly provide vocational rehabilitation services under the third-party cooperative arrangement, both of which were proposed in the NPRM. In final § 361.28, we have added a new paragraph (c)(3) to specify that other direct expenditures incurred under the contract with the cooperating agency only for the direct provision of services under the third-party cooperative arrangement may be an allowable source of match. These expenditures are distinguished from in-kind contributions because the expenditures were incurred specifically for the purpose of the third-party cooperative arrangement and in accordance with the terms and conditions of the contract and within the contract period, all of which can be verified by supporting documentation from the cooperating agency. For example, if it was necessary for a cooperating agency to purchase instructional materials to provide new or expanded services authorized under the third-party cooperative arrangement contract, and if those materials were not already available to the cooperating agency, the expenditures for those materials may be an allowable source of match. On the other hand, expenditures for costs incurred by the third-party cooperating agency not directly for the provision of vocational rehabilitation services, such as, indirect costs, depreciation, existing utilities, space and supplies are not an allowable source of match because they are third-party in-kind contributions as defined in 2 CFR 200.96.

Changes: We have revised final § 361.28 by adding new paragraph (c)(3) to permit other direct expenditures incurred by the cooperating agency to be used as a source of match so long as those expenditures were incurred specifically for the purpose of the third-party cooperative arrangement.

Students Who Are Eligible or Potentially Eligible for Services

Comments: One commenter requested that proposed § 361.28(a)(2) include services provided by the cooperating agency for students with disabilities who are eligible or potentially eligible for services from the DSU.

Discussion: Under final § 361.28(a)(2), which remains unchanged from prior regulations, vocational rehabilitation services provided under a third-party cooperative arrangement are only available to applicants for, or recipients of, services from the VR program. Given amendments to the Act made by WIOA, particularly new provisions in section 103(b)(7) regarding transition services to groups of students and youth with disabilities and section 113 regarding the provision of pre-employment transition services to students with disabilities, it is possible that some of these services will be provided to youth or students with disabilities who have not yet applied or been determined eligible for vocational rehabilitation services. This means that these students and youth with disabilities would be considered a ''recipient'' of vocational rehabilitation services for purposes of final § 361.28. As such, DSUs could enter into third-party cooperative arrangements for the provision of these group transition services or pre-employment transition services so long as all requirements of final § 361.28 are satisfied.

Changes: None.

Statewide Assessment; Annual Estimates; Annual State Goals and Priorities; Strategies; and Reports of Progress (§ 361.29)

Comprehensive Statewide Needs Assessment

Comments: We received many comments on proposed § 361.29 pertaining to statewide assessment, annual estimates, goals and priorities, strategies, and reports of progress. One commenter requested clarification of the role of SRCs in the conduct of a comprehensive statewide needs assessment under WIOA.

Several commenters suggested that we revise § 361.29(a) to require that the comprehensive statewide needs assessment be conducted independently, thereby helping to ensure that the needs assessment is more objective and comprehensive.

Another commenter requested that we add a requirement to proposed §§ 361.29(a)(1)(i) and 361.29(b) that the statewide assessment include individuals who are working in subminimum wage and sheltered employment for employers using section 14(c) certificates issued by the Department of Labor under the FLSA. The commenter recommended that because States are required to conduct annual reviews of individuals in subminimum wage and sheltered employment, the needs of these individuals should be added to the assessment requirements under § 361.29(a).

Additionally, the commenter stated that States should be required to review the quality of supported employment services provided to individuals with the most significant disabilities and ensure that any employer holding subminimum wage certificates under section 14(c) of the FLSA should be able to provide supported employment services. Lastly, the same commenter asserted that States should include data on individuals working in segregated employment in any reports to RSA.

Discussion: In response to the comment requesting clarification of the role of the SRC, there is no authority under section 101(a)(15) or 105 of the Act or under title I of WIOA for the SRC to participate in the conduct of any needs assessments required by title I of WIOA. The activities of the Council are limited to those listed in section 105(c) of the Act and final § 361.17(h), both of which remain unchanged by WIOA or these final regulations. In general, the SRC's responsibilities encompass only functions associated with the conduct of the VR program under title I of the Act, not those functions of the VR program as a core partner in the workforce development system under title I of WIOA.

Specifically, section 105(c)(3) and final § 361.17(h)(3) authorize the Council to advise the DSU on activities carried out under title I of the Act and part 361 and to assist with the preparation of the VR services portion of the Unified or Combined State Plan, applications, reports, needs assessments, and evaluations required to be carried out under title I and part 361.

We disagree with the recommendation to require that the comprehensive statewide needs assessment be conducted independently. Final § 361.29(a) mirrors section 101(a)(15)(A) of the Act, which does not require that the assessment be carried out independently. On the contrary, that provision requires that the DSU and Council jointly conduct the assessment every three years. Therefore, there is no authority to revise § 361.29(a) as the commenters recommend.

The contents of the comprehensive statewide needs assessment are outlined in section 101(a)(15)(A) of the Act and final § 361.29(a) is consistent with the statute. However, nothing in the Act and these final regulations prohibits a DSU and Council from conducting a needs assessment that includes additional elements, such as the needs of individuals in subminimum wage and sheltered employment.

Changes: None.

Annual Estimates and Reports of Progress

Comments: One commenter supported the change in proposed § 361.29 that requires DSUs that have implemented orders of selection to estimate and report how many individuals with disabilities are not receiving services, asserting this will provide indirect data regarding the appropriateness of not implementing an order of selection. One commenter requested clarification as to what the Department means by the submission of annual estimates ''at such time and in such manner to be determined by the Commissioner'' and expressed concern that this was not consistent with the continued requirements to submit various annual reports and updates. The same commenter suggested that the phrase ''standards and indicators authorized by Section 106 of the Act'' be removed as no longer relevant and that only performance measures authorized under WIOA be included.

Another commenter stated that the requirement under WIOA for the increased collection of data would offer evidence of successes and challenges across the Nation but would also impose some additional costs on the DSUs, which are already struggling under budget constraints.

Additionally, one commenter expressed concerns about the apparent lack of annual reporting of progress toward achieving goals and priorities, and that once the WIOA system is fully implemented, annual reporting should not be such a burden. The commenter requested guidance on how best to use data collected under the newly aligned systems to maximize fiscal and staff resources.

One commenter expressed concern that the lack of annual reporting to the Department regarding flaws in the delivery system for persons with significant disabilities, including those receiving supported employment services, could preclude making timely adjustments to maximize the opportunity for successful, integrated employment in accordance with Section 109 of the Act, as amended by WIOA,

which allows for ''expanded types of trainings, technical assistance and other services DSUs may provide under the VR program, to employers who have hired or are interested in hiring individuals with disabilities.''

Discussion: We appreciate the support for the requirement to report the numbers of individuals with disabilities who may not be served in the event that an order of selection is implemented, as well as the other comments expressing concerns and suggestions. In response to the comment requesting clarification pertaining to submission of annual estimates, ''at such time and in such manner to be determined by the Commissioner'' allows the Department to solve a practical problem caused by a statutory inconsistency. Section 101(a)(10) requires that DSUs collect key data to more effectively manage the VR program and ensure that the needs of the program's consumers, including those with the most significant disabilities, are met. Many of these data must be collected annually, and historically have been submitted as part of annual State plan updates. However, under sections 102 and 103 of title I of WIOA, the Unified or Combined State Plan is submitted every four years, with modifications made at least every two years, as appropriate. Therefore, the Secretary may determine it appropriate to require the data, which are collected annually by DSUs, to be reported only when the State submits a Unified or Combined State Plan or a modification to that Plan.

Although collected data are to be submitted at a time and in a manner to be determined by the Secretary, DSUs still must gather and analyze required data annually as required by the Act and these final regulations. This will allow the agency to respond in a timely manner to the needs of all consumers, including those with the most significant disabilities who may need supported employment services in order to achieve their vocational goals.

Section 106 of the Act requires that the standards and indicators for the VR program must be consistent with the performance accountability measures required by section 116 of title I of WIOA for all core programs, including the VR program. Therefore, all references to standards and indicators throughout the Act and these final regulations refer to the performance accountability measures under WIOA and the phrase cannot be removed from final § 361.29.

We address comments associated with any burden resulting from the data reporting requirements under section 101(a)(10) of the Act, as amended by WIOA, in the *Regulatory Impact Analysis* section of these final regulations. The Departments of Education and Labor will jointly issue guidance regarding the alignment of data reporting requirements pursuant to the joint regulations governing the performance accountability system established under WIOA and published in subpart E of part 361.

Changes: None.

Provision of Training and Services for Employers (§ 361.32)

Comments: While commenters generally appreciated the increased emphasis on engagement with employers, some suggested that the regulations clarify the types of services and activities in which the DSU may engage, and differentiate the roles and responsibilities of the DSU and the employer, especially with regard to providing accommodations.

Some commenters acknowledged the importance and need for training employers about their obligations under the ADA and about vocational rehabilitation services provided through the VR program, such as work-based learning experiences, pre-employment transition services, disability awareness and the needs of individuals with disabilities in the workplace.

A few commenters suggested that the Department recommend some actions to engage employers, such as encouraging States to establish employer advisory councils at the State, regional, or local level.

One commenter suggested that proposed § 361.32 was not strong enough to prioritize the activities under this section because it authorizes, but does not require, an allocation of funding for services. The commenter recommended that the Department more heavily emphasize the importance of activities under this section.

Finally, one commenter recommended aligning allowable activities under this section with WIOA performance measures regarding effectiveness in serving employers and requested guidance on tracking data related to services provided to employers and the effectiveness of such services.

Discussion: We appreciate the supportive comments and the additional recommendations for implementing the requirements for activities DSUs may engage in with employers. Section 109 of the Act, as amended by WIOA, describes the activities for which States may pay to educate and provide services to employers who have hired, or are interested in hiring, individuals with disabilities under programs carried out under title I of the Act. However, section 109 of the Act does not address prohibited activities or the differentiation of the roles and responsibilities of the DSU and the employer, particularly in providing accommodations. Section 109(1) only allows the DSU to provide training and technical assistance to employers regarding the employment of individuals with disabilities, including disability awareness, and the requirements of the ADA and other employment-related laws. The recommended inclusion of language to describe accommodations that are incumbent upon employers to provide does not fall under the purview of the Department or within the scope and authority of these regulations. Instead, the responsibility of employers for work place accommodations is within the jurisdiction of the Equal Employment Opportunity Commission, which is charged with the enforcement of title I of the ADA.

Section 109 of the Act, as amended by WIOA, and final § 361.32 clearly recognize the important role that DSUs can play in increasing opportunities for competitive integrated employment for individuals with disabilities through the provision of technical assistance and training to employers and specify a wide variety of these activities. For example, the statute and regulation describe the areas in which DSUs may work with employers to provide opportunities for work-based learning experiences and pre-employment transition services to recruit qualified applicants who are individuals with disabilities, to train employees who are individuals with disabilities, and to promote awareness of disability-related obstacles to continued employment. Furthermore, the Act and final regulation provide that the DSU may assist employers through consultation, technical assistance, and support related to workplace accommodations, assistive technology, facilities and workplace access, and using available financial support for hiring or accommodating individuals with disabilities. Given these and other examples, we do not believe that it is necessary to include additional language in final § 361.32 to further emphasize the importance of this technical assistance and training. However, we clarify here that the use of the term ''apprenticeships'' in final § 361.32 does not include Registered Apprenticeships.

Although we recognize the value of the DSUs engaging employers through activities such as establishing Statewide or regional/local level employer advisory councils, section 109 of the Act

does not require this activity and therefore, we have no statutory authority to require this activity in these regulations. However, final § 361.24(c) requires States to describe in the VR services portion of the Unified or Combined State Plan how the DSU will work with employers to identify opportunities for competitive integrated employment and career exploration, and to facilitate the provision of vocational rehabilitation services.

We agree that the provision of training and services for employers by DSUs is important in accomplishing the purposes of the Act, as amended by WIOA; however, final § 361.32 mirrors section 109 of the Act, as amended by WIOA, which authorizes, but does not require, the expenditure of funds for activities under this section. Therefore, we have no authority to require DSUs to incur expenditures under this section.

The Departments of Education and Labor appreciate the comment regarding the potential interplay between the activities authorized under section 109 of the Act and final § 361.32, and the performance indicator for the effectiveness of serving employers required by 116(b)(2)(A)(i)(VI) of title I of WIOA. Because the measures apply to all core programs in the workforce development system, not just the VR program, we have addressed this comment in the joint final regulations implementing the performance accountability measures under section 116 of WIOA, and published elsewhere in this issue of the **Federal Register**.

Changes: None.

Innovation and Expansion Activities (§ 361.35)

Resource Plans for Statewide Independent Living Councils

Comments: Many of the commenters opposed the changes in proposed § 361.35(a)(3) which requires the State to assure that it will reserve and use a portion of its VR program funds to support the funding of the Statewide Independent Living Council (SILC), consistent with the plan prepared jointly by the Council and the State under section 705(e)(1). The commenters contend that WIOA did not amend section 101(a)(18)(A)(ii)(I) of the Act and therefore, the Department should not change its regulation and allow the State and the SILC to determine not to use I&E funds. The commenters further stated that any change to § 361.35 would harm CILs by diverting funds from the SILS program under Part B of title VII if I&E funds are not used. Some other commenters opposed proposed § 361.35 allowing innovation and expansion funds to be used at all to support SILC resource plans to the extent needed, arguing that other funding sources are available.

A few commenters requested clarification as to when the DSU uses I&E funds to support the SILC. Of these, one commenter indicated that the DSU, in the commenter's State, has supported the SILC with innovation and expansion funds and would likely continue to do so unless there is a change in the designated State entity (DSE), the State agency responsible for the administration of the independent living programs authorized under title VII of the Act, as amended by WIOA.

Discussion: We appreciate the concerns expressed by commenters. In proposed § 361.35, we attempted to set forth our long-standing interpretation of the statutory language in section 101(a)(18)(A)(ii)(II) that a State's contribution of innovation and expansion funds to the SILC resource plan is governed by the resource plan's description of support for the SILC. We consistently have interpreted the statutory requirement in section 101(a)(18)(A)(ii)(II) that the funding of the SILC be consistent with the SILC resource plan to mean that the State and the SILC may decide to use innovation and expansion funds to support the SILC resource plan, or not to do so as they determine how they will use the sources of funding available under section 705(e) to support the SILC.

Our data shows that States and SILCs have been using innovation and expansion funds to support SILC resource plans in this way for many years. Based upon an analysis of the data from all of the State Plans for Independent Living for the period FY 2014 through FY 2016, we found that innovation and expansion funds account for 38 percent of the roughly $8.7 million contributed by States to SILC resource plans. We found that only 32 States contributed innovation and expansion funds to the SILC resource plan. Of these 32 States, 13 States used only innovation and expansion funds to support the SILC.

However, because the innovation and expansion section of the Act remained unchanged by WIOA and our proposed regulation sparked confusion among many commenters, we have decided to return to the current regulation which mirrors the statutory language requiring that the reservation and use of the innovation and expansion funds to support the funding of the SILC be consistent with the SILC resource plan. We continue to interpret the current regulation, as we always have, that the State and the SILC determine in the SILC resource plan which sources and amounts of available funding, including innovation and expansion funding, will be used in the SILC resource plan, and then the State reserves and uses the innovation and expansion funding to support funding of the SILC, consistent with the SILC resource plan.

Changes: We have revised final § 361.35(a)(3) to substitute the language of the current regulation, with conforming edits, for the language in the proposed regulation.

Innovative Approaches With Components of the Workforce Development System

Comments: None.

Discussion: Section 101(a)(18)(A)(i) of the Act and final 361.35(a)(1) require the designated State unit to develop and implement innovative approaches to improve vocational rehabilitation services to individuals with disabilities that are consistent with the comprehensive statewide needs assessment and the State's goals and priorities. To support the alignment of the VR program with the workforce development system as emphasized throughout the Act and these final regulations, we clarify that these innovative approaches may include activities and partnerships with components of the workforce development system.

Changes: None.

Ability To Serve All Eligible Individuals; Order of Selection for Services (§ 361.36)

Individuals Who Require Specific Services and Equipment To Maintain Employment

Comments: Most commenters supported proposed § 361.36(a)(3)(v), which permits the DSU to elect to serve eligible individuals who require specific services or equipment to maintain that employment, whether or not those individuals are receiving vocational rehabilitation services under the order of selection. The commenters stated that this proposed change from the prior regulations will better serve the needs of individuals with disabilities who are at risk of losing their jobs by allowing the DSU an opportunity to serve them outside an order of selection, as appropriate.

A few commenters expressed concern that proposed § 361.36(a)(3)(v) would allow individuals with less significant disabilities to be served before individuals with significant or the most significant disabilities. A few commenters also questioned whether this new provision applies only to

individuals with the most significant disabilities. In addition, a few commenters stated that providing specific services or equipment to eligible individuals who do not meet the order of selection should be mandatory to ensure that they are able to maintain their employment.

Conversely, a few commenters suggested that the DSU should not be required to use this authority at all. One commenter suggested that a DSU should not be required to state its intent to use the authority in the vocational rehabilitation services portion of the Unified or Combined State Plan. One commenter requested clarification of the term ''immediate need,'' which the Department used in explaining the proposed provision in the preamble of the NPRM.

Discussion: We appreciate the comments supporting the flexibility afforded to DSUs in § 361.36(a)(3)(v). We also recognize the need, as expressed by some commenters, for clarification of this exemption from the order of selection.

Final § 361.36(a)(3)(v), which implements section 101(a)(5)(D) of the Act, applies to those specific services or equipment that an individual needs to maintain current employment. The regulation does not apply to other services an individual may need for other purposes. In other words, if an individual is receiving services and equipment from a DSU under this exemption, the individual is within the order of selection for the purpose of receiving any other vocational rehabilitation services not covered by the exemption. This means that if the individual needs services that are not directly tied to maintaining current employment, the individual's ability to receive those services from the VR program depends on the individual's placement in the State's order of selection.

As to whether and how the DSU may exercise its authority under final § 361.36(a)(3)(v), that section applies to all eligible individuals, not just those with the most significant disabilities. It is possible that individuals with less significant disabilities would receive vocational rehabilitation services before individuals with significant or the most significant disabilities. The Act, as amended by WIOA, gives the DSU the option to provide services and equipment to individuals at immediate risk of losing employment outside the established order, and the DSU should consider doing so if financial and staff resources are sufficient. If the DSU elects to do so—again, the exercise of the authority is not mandatory—section 101(a)(5)(D) of the Act requires that it indicate this in the VR services portion of the Unified or Combined State Plan.

The term ''immediate need'' in the *Summary of Proposed Changes* section of the NPRM has its common meaning, and it remains the same. The phrase means that the eligible individual would almost certainly lose his or her current job if not provided specific services or equipment in the very near future that would enable him or her to retain that employment.

Changes: None.

Information and Referral

Comments: One commenter sought clarification about referring individuals to other programs under proposed § 361.37 for specific services or equipment necessary to help them retain employment, as well as other services that cannot be provided under proposed § 361.36(a)(3)(v). This commenter further suggested that if an individual is referred elsewhere for specific services or equipment necessary to maintain employment, the DSU should follow up to ensure the necessary services were delivered.

Discussion: If the individual is placed into a closed category of that order, under sections 101(a)(5)(E) and 101(a)(20) of the Act, and final §§ 361.36(a)(3)(iv)(B) and 361.37(a)(2), the DSU must refer the individual to other programs and providers for those services not covered by the exemption. These provisions require a DSU to assure in the VR services portion of the Unified or Combined State Plan that individuals who do not meet the order of selection criteria will have access to an information and referral system through which the DSU will refer them to other appropriate Federal and State programs, including other components of the statewide workforce development system.

However, neither section 101(a)(5)(E) nor 101(a)(20) requires the DSU to follow up with the programs to which the individuals are referred, and we have no authority to do so either. While we agree this is a best practice, we also recognize the administrative burden the requirement would impose on the DSU.

Changes: None.

Monitoring by the State Rehabilitation Council

Comments: A few commenters proposed that § 361.36(f)(4) allow the SRC to monitor the use of this authority by the DSU and ensure that individuals with the most significant disabilities are still prioritized for vocational rehabilitation services. A few other commenters also suggested that the SRC be involved in monitoring the use of the new provision but did not propose any additional regulatory language.

Discussion: Section 105(c) of the Act, which sets forth the functions of the SRC, does not authorize it to monitor the DSU's exercise of the order of selection exemption. Rather, section 107(a)(1) of the Act requires the Department to monitor the DSUs.

However, under section 105(c)(1)(A) of the Act and final § 361.17(h)(1)(i), the SRC is tasked with reviewing, analyzing, and advising the DSU about the order of selection and the discretion to exercise the authority set forth in section 101(a)(5)(D) of the Act and final § 361.36(a)(3)(v). In addition, the SRC has the opportunity to review and comment on the DSU's intent to use the authority under § 361.36(a)(3)(v) when the SRC reviews the DSU's order of selection policies under final § 361.36(f) and when the SRC advises and assists the DSU in the preparation of the VR services portion of the Unified or Combined State Plan under final § 361.17(h)(3).

Changes: None.

Order of Selection Criteria

Comments: A few commenters suggested that the DSU develop a ''meaningful'' order of selection to ensure that individuals with the most significant disabilities receive vocational rehabilitation services. One commenter suggested that the order of selection be based on something other than the refinement of the three criteria in the definition of ''individual with a significant disability'' in § 361.5(c)(30).

Discussion: Section 101(a)(5) of the Act remained unchanged by WIOA, except for the addition of section 101(a)(5)(D) permitting the DSU to exercise its discretion to provide specific services and equipment to individuals, who are at risk of immediate job loss, outside the order of selection. Therefore, there is no authority to further amend final § 361.36 to require the DSU to establish a ''meaningful'' order of selection or to permit the order of selection to be based on criteria other than those included in the definition of an ''individual with a significant disability'' in final § 361.5(c)(30).

Changes: None.

Prohibited Factors

Comments: Some commenters questioned whether the proposed § 361.36 is consistent with the requirement in § 361.42(c)(2)(ii)(D), which prohibits the DSU from considering an applicant's particular service needs, the anticipated cost of

services required by an applicant, or the income level of an applicant and applicant's family. Other commenters indicated that the proposed § 361.36 aligns with § 361.42(a)(1)(iii), which permits the DSU to provide vocational rehabilitation services to eligible individuals who require services in order to retain their employment.

Discussion: For States operating under an order of selection, the DSU must determine eligibility under final § 361.42 prior to assigning eligible individuals to any priority category. WIOA did not change this requirement. Therefore, under final § 361.42(c)(2)(ii)(D) an applicant's particular service needs (including those services necessary to maintain current employment) are not considered in determining eligibility. The order of selection exemption in final § 361.36(a)(3)(v) applies only after an individual has been determined eligible. Consequently, the eligible individual would be exempt from the order of selection for the purpose of receiving services necessary to maintain employment.

Changes: We have made a technical amendment to § 361.36(d)(2)(vi) to reflect the exemption set forth in § 361.36(a)(3)(v).

Pre-Employment Transition Services

Comments: Some commenters raised various concerns, posed questions, or sought clarification about pre-employment transition services, including serving students with disabilities who may not have applied or been determined eligible for vocational rehabilitation services.

Discussion: We address these comments in the *Pre-Employment Transition Services (§ 361.48(a))* section elsewhere in this *Analysis of Comments and Changes.*

Changes: None.

Information and Referral Programs (§ 361.37)

Benefits Planning

Comments: Most of the comments received on this regulation were in support of the changes to the prior regulation in proposed § 361.37, while some suggested further revisions. A few of these commenters suggested that § 361.37 specify to whom referrals are made for benefits planning for individuals with disabilities receiving Social Security benefits under title II or title XVI of the Social Security Act.

Discussion: We appreciate the comments supporting the changes to § 361.37 and the comments suggesting further revisions. Section 361.37(b)(5), both proposed and final, which requires the DSU to refer individuals who do not choose to seek an employment outcome under the VR program to the SSA for information about receiving benefits while employed, has remained unchanged from the VR program regulations that were published in 2001. While section 102(b)(2) of the Act, as amended by WIOA, requires the DSU to provide information about benefits planning to individuals with disabilities receiving Social Security benefits, it does not mandate the DSUs to make related referrals to any one agency or organization for this service. Some DSUs have the capacity to provide this information in-house, whereas others may need to refer individuals to other programs or entities. As such, and because the needs of the individuals requiring these services also vary, we believe it best serves DSUs and individuals with disabilities not to require a specific referral program in final § 361.37. For the same reason, we have not specified other entities to which DSUs may refer individuals with disabilities for any other type of service.

Changes: None.

Referral Options

Comments: One commenter suggested that a list of all options for referrals be included in proposed § 361.37. Another commenter suggested that referral options may not be available in certain geographical areas of the State. The commenter also noted the dilemma facing DSU personnel if it is known, before a referral is made, that individuals with disabilities are unlikely to receive services from other programs in the State.

Discussion: We do not believe it is possible or practicable to include a list of all referral options in final § 361.37 because the Federal, State, and local agencies, as well as non-profit organizations that serve individuals with disabilities vary widely from State to State. In addition, DSUs are most familiar with the referral option in their State and we would not want them to believe these options were limited by the inclusion of a list in final § 361.37. However, we clarify that these referral options include one-stop centers as components of the workforce development system.

If referral options are not available in a geographic location or if a referral will not result in the individual with a disability receiving services, we encourage DSUs to continue to build partnerships with a broader set of appropriate Federal and State programs, including other components of the statewide workforce development system, to ensure effective referral options are available in the State. DSUs should not make referrals to other programs unless there is an expectation that the individual with a disability will benefit from the referral.

Changes: None.

Follow-Up

Comments: One commenter suggested that DSUs be required to follow-up on referrals made to other programs to verify that individuals with disabilities are receiving the services for which they were referred.

Discussion: The Act, as amended by WIOA, does not require a DSU to follow-up on the referrals it makes to other programs. Therefore, we have not made the suggested revision. While we agree with commenters that this is a best practice, we also recognize the administrative burden the requirement would impose. However, the criteria for appropriate referrals in final § 361.37(c) is designed to ensure effective referrals for individuals with disabilities.

Changes: None.

Independent Living Services

Comments: A few commenters suggested that there may be difficulty in referring individuals with disabilities for independent living services if the DSU is not the same entity administering the independent living programs authorized under title VII of the Act, as amended by WIOA. One commenter stated that the Department would need to partner with the Department of Health and Human Services when referrals are made for independent living services.

Discussion: We acknowledge that some States may establish a designated State entity (DSE) responsible for administering the independent living programs, which is separate from the DSU for the VR program. However, this should not inhibit referrals between the VR and independent living programs as required in final § 361.37(b). In these circumstances, we encourage the DSU to partner with the DSE to develop effective referral policies and procedures to enable individuals with disabilities to access both programs. The Department intends to support these partnerships in the State through technical assistance developed and delivered jointly with the Department of Health and Human Services, which now administers the SILS program and the CIL program.

Changes: None.

Protection, Use, and Release of Personal Information (§ 361.38)

Comments: None.

Discussion: We anticipate that other Federal and State agencies, and researchers will have an increased interest in using the data required to be collected by core programs in the workforce development system, including the VR program, under section 116(b) of title I of WIOA. Section 116(b) of WIOA requires DSUs to collect significantly more personal information than was required previously under section 101(a)(10) of the Act and prior § 361.40. Therefore, after further Departmental review, we have strengthened the protection of the confidentiality of this information by requiring in final § 361.38 that DSUs enter into written agreements with any entity seeking access to personal information collected under the VR program for the purpose of audits, evaluations, research, or for other program purposes. We understand that DSUs already enter into such written agreements and the revisions to final § 361.38 will not represent a change in practices under the VR program.

Changes: We have revised final § 361.38(a), (d), and (e) by requiring that DSUs enter into written agreements with other organizations and entities receiving personal VR program information during the conduct of audits, evaluations, research, and for other program purposes.

Reports; Evaluation Standards and Performance Indicators (§ 361.40)

We received numerous comments on proposed reporting requirements under § 361.40, including the collection and reporting of data on students with disabilities receiving pre-employment transition services, evaluation standards and performance indicators under section 106 of the Act, common performance accountability measures under section 116 of WIOA, and the timeframe for implementation of reporting requirements. We also received comments on burden estimates that were included in the *Regulatory Impact Analysis* of the NPRM. While one commenter supported the collection of new data elements required under section 101(a)(10) of the Act and implemented in § 361.40(a) of these final regulations, in general, commenters expressed concerns or requested additional clarification concerning the collection and reporting of data. We address these comments under the subheadings below.

Pre-Employment Transition Services

Comments: We received several comments on the reporting of data on students with disabilities receiving pre-employment transition services under proposed § 361.40(a)(1)(ii). One commenter noted that States may opt to track funding and services for students receiving pre-employment transition services in different ways, depending on factors such as staffing patterns, order of selection wait list considerations, and counselor caseload sizes. One commenter expressed the opinion that there are more effective ways to track the expenditures from the 15 percent of the VR program allotment reserved for the provision of pre-employment transition services than collecting individual case information for each student receiving these services.

A few commenters requested guidance about the specific data elements that will be required for students who are receiving pre-employment transition services and are applicants, or potentially eligible, for vocational rehabilitation services. Another commenter asked what additional data will be needed for purposes of performance accountability reporting pursuant to section 116 of WIOA once the student becomes a participant under the VR program.

Finally, one commenter requested clarification and guidance about the interplay between the data required to be reported under § 361.40(a), collected through the Case Service Report (RSA–911), and the content of the VR services portion of the Unified or Combined State Plan regarding the number of students who are receiving pre-employment transition services.

Discussion: We appreciate the concerns expressed regarding the new data reporting requirements in final § 361.40(a) related to the provision of pre-employment transition services to students with disabilities. We agree with commenters that it is reasonable to anticipate an increase in the number of individuals that will need to be reported through the RSA–911. Prior to the enactment of WIOA, DSUs could only serve, and thus report, individuals who were applicants or eligible individuals under the VR program. However, section 113 of the Act, as added by WIOA, requires DSUs to provide pre-employment transition services to all students potentially eligible for vocational rehabilitation services who need such services, regardless of whether they have applied and been determined eligible for vocational rehabilitation services. This change is likely to result in a significant increase in the number of individuals reported under the RSA–911.

Students with disabilities who are not yet served under an individualized plan for employment and who receive pre-employment transition services are not considered ''participants'' as that term is defined under the joint final regulations for performance accountability purposes published elsewhere in this issue of the **Federal Register**. However, students with disabilities receiving pre-employment transition services are considered ''reportable individuals'' for RSA–911 reporting and WIOA performance purposes, regardless of whether they have applied for vocational rehabilitation services or are receiving these services under an individualized plan for employment. This does not, however, preclude a DSU from serving an eligible student with a disability under an individualized plan for employment. Once the student has begun receiving services under a signed individualized plan for employment, he or she will be counted as a participant and included in the applicable performance indicator calculations. At the point the student with a disability becomes a participant, all the applicable RSA–911 data elements will be collected and reported in the individual's RSA–911 case record.

We have identified and defined the specific data elements needed for all students with disabilities receiving pre-employment transition services in the RSA–911 instructions. We believe this will reduce collection and reporting burden to the maximum extent possible, and prevent a requirement for collecting specific information that would otherwise result in an application for services for students with disabilities who have not intended to apply for these services.

In addition to the tracking necessary to demonstrate compliance with the requirement to reserve at least 15 percent of the State's VR allotment for providing pre-employment transition services, under section 110(d) of the Act, as amended by WIOA, and final § 361.65(a)(3), section 101(a)(10) of the Act requires DSUs to have a mechanism to report the number of students with disabilities receiving these services. We recognize the burden this will place on DSUs and we have included a specific, but limited, set of data elements in the RSA–911 to enable DSUs to report the number of students with disabilities receiving these services, including both those who have been determined eligible for vocational rehabilitation services and those who have not applied for vocational rehabilitation services. For further information regarding the specific data elements DSUs are required to report regarding students receiving pre-employment transition services, see the RSA–911 data collection instrument published elsewhere in this issue of the **Federal**

Register. We believe DSUs should use these data, along with other information (such as that obtained through the comprehensive statewide needs assessment required under section 101(a)(15)(A) of the Act, as amended by WIOA, and final § 361.29(a)), when developing the VR services portion of the Unified or Combined State Plan, including the goals and strategies related to the provision of pre-employment transition services under sections 101(a)(15)(C) and (D) of the Act, as amended by WIOA, and final § 361.29(c) and (d).

Changes: None.

Standards and Indicators

Comments: With respect to proposed § 361.40(b), a few commenters requested that we add indicators to the evaluation standards and performance indicators. Of these, a few requested that separate indicators be added for transition services to students and youth with disabilities and for services to youth with disabilities. One commenter expressed the concern that students with disabilities will not be counted as participants or included in the performance indicators, thereby eliminating a large number of vocational rehabilitation consumers from the performance measures. This commenter recommended that we establish new performance indicators for students with disabilities receiving pre-employment transition services. Another commenter requested we add performance indicators aligned with evidence-based practices that promote individuals with disabilities entering the labor force. One commenter requested that we include additional performance indicators in these final regulations rather than add them later through an information collection request. Another commenter asked if the Department would continue using the evaluation standards and performance indicators in prior §§ 361.80 through 361.89 as Federal reporting requirements under the VR program. Finally, one commenter requested that we limit the data selected to only that required to determine the performance accountability measures under section 116 of WIOA.

Discussion: Section 106 of the Act, as amended by WIOA, makes the VR program subject to the common performance accountability measures, established in section 116 of title I of WIOA, which are applicable to all core programs of the workforce development system. Therefore, we have removed prior § 361.80 through § 361.89, which established the evaluation standards and indicators in use by the VR program prior to the enactment of WIOA. Final § 361.40(b) includes a cross reference to the joint performance accountability regulations developed by the Departments of Labor and Education in subpart E of final part 361.

Section 106 of the Act, as amended by WIOA, does not provide additional VR program-specific performance accountability measures. However, consistent with section 116(b)(1)(A)(ii) of title I of WIOA, section 106(a)(2) permits States, but not the Department, to establish and provide information on additional performance accountability indicators. States must identify any additional performance indicators in the Unified or Combined State Plan. Under this section, States could opt to include additional performance indicators, including any or all of the additional performance measures recommended by commenters or the evaluation standards and performance indicators set forth in prior §§ 361.80 through 361.89.

In addition, section 101(a)(10)(A) of the Act requires that, in the VR services portion of the Unified or Combined State Plan, the State assures that it will submit certain reports in the form and level of detail and at the time required by the Secretary. Regarding applicants for, and eligible individuals receiving, services, these reports must provide the wide variety of data specified in section 101(a)(10)(C), as well as data related to the evaluation standards and indicators in section 106 of the Act, which are the performance accountability indicators in section 116(b) of title I of WIOA. Therefore, there is no statutory authority to limit the data reported by DSUs through the RSA–911 to those data needed for the performance accountability indicators applicable to the core programs under WIOA, as recommended.

Changes: None.

Program Year

Comments: One commenter requested that the Department use the program year under title I of WIOA, instead of the fiscal year, for the operation of the VR program in order to better align the program with the performance data required under section 116 of WIOA.

Discussion: We understand the concern expressed by commenters and the potential confusion that may result because the annual award and financial reporting cycle for the VR program is no longer aligned with the State planning and performance reporting cycle required under title I of WIOA. The VR program is a current-funded program for which Congress appropriates annual funds to be obligated consistent with the Federal fiscal year and section 110(a)(2)(A) of the Act, which specifies the manner in which allotments are to be made. As noted in the *Submission, Approval, and Disapproval of the State Plan (§ 361.10)* section earlier in this preamble, section 110(a)(2)(A) of the Act, which was not amended by WIOA, requires that allotments be made for each fiscal year beginning on or after October 1, 1978. We interpret section 110(a)(2)(A) of the Act to require that VR program allotments coincide with the Federal fiscal year. Thus, we cannot change the year under which the VR program operates in order to align it with the July 1 through June 30 program year for submission of the VR services portion of the Unified or Combined State Plan and the reporting of performance data required under final § 361.40. States will continue to receive VR program allotments and report fiscal data through the Financial Status Report (SF–425) and the VR program Cost Report (RSA–2) in accordance with the Federal fiscal year.

Changes: None.

Performance Accountability Regulations

Comments: One commenter recommended that we include the joint performance regulations in proposed § 361.40.

Discussion: We disagree with the recommendation. The extent and detail of the joint regulations governing the performance accountability system under section 116 of title I of WIOA makes it necessary to include them in a separate subpart of these final regulations. For the convenience of the reader, we grouped this subpart E with subparts D and F, which set forth the joint final regulations implementing requirements for unified and combined planning and the one-stop delivery system, respectively, of WIOA. We believe it is sufficient to include a cross reference to subpart E in final § 361.40(b).

Changes: None.

Cumulative Caseload Report (RSA–113)

Comments: We received two comments regarding the VR program's Cumulative Caseload Report (RSA–113). One commenter asked whether we intend to make changes to this data collection instrument and requested that we provide guidance on these changes. Another commenter suggested that the Department discontinue use of the RSA–113 because it is redundant with data reported through the revised RSA–911.

Discussion: We do not intend to make changes to the currently approved RSA–113 or the instructions for its submission. At this time, we use the

data reported through the RSA–113, the only source of quarterly VR program data, for program management purposes and to support budget requests for the VR program. However, we intend to reduce the reporting burden on the States by discontinuing use of the RSA–113 when DSUs are able to report similar data through the RSA–911 on a quarterly basis. When appropriate, the Department will provide guidance to DSUs regarding reporting changes.

Changes: None.

States With Two VR Agencies

Comments: One commenter asked whether, in States with two VR agencies, those agencies that serve individuals who are blind and visually impaired would establish levels of performance for purposes of the performance accountability indicators under section 116 of title I of WIOA separate from those established by agencies serving individuals with all other disabilities. Another commenter expressed concern that VR agencies serving individuals who are blind and visually impaired would be required to establish separate levels of performance due to the relatively low number of individuals served by these agencies and the high variance in outcomes.

Discussion: Section 116(b)(3)(A)(iii) of title I of WIOA requires States to identify, in their Unified or Combined State Plans, expected levels of performance for the performance indicators for the first two years covered by their plans. Because this section, as well as all other provisions of section 116 of WIOA pertinent to the establishment of levels of performance for the performance accountability indicators, refers to the ''State,'' States must establish the expected levels of performance using State-level, not VR agency-level, data. Therefore, in States with more than one VR agency, the agencies must work together to identify expected levels of performance that take into account their individual performance. We will monitor each agency's performance on the performance accountability indicators and their contributions toward achieving the adjusted levels of performance through a review of the data reported on the RSA–911 and during periodic reviews in accordance with section 107 of the Act. See the *Analysis of Comments and Changes* section of the joint performance regulations published elsewhere in this issue of the **Federal Register** for a more detailed discussion about setting expected levels of performance and adjusted levels of performance.

Changes: None.

Reporting Burden

Comments: We received numerous comments on the Department's burden estimates, all of which stated that we underestimated the costs associated with the reporting of data under proposed § 361.40 described in the *Regulatory Impact Analysis* section of the NPRM. In particular, commenters raised concerns about estimates of the amount of time needed for the collection of new data and the quarterly reporting of individual data on all open service records, as well as the cost of changes to State management information systems. Some of these commenters stated that the proposed new reporting requirements will create a burden on the financial and personnel resources of the agency. One commenter noted that documenting and tracking the number of potentially eligible students with disabilities would be burdensome and costly considering the number of potentially eligible students is staggering when compared to the number of transition-age consumers previously served by the DSUs.

Discussion: We recognize that proposed new data collection and reporting requirements, including data on students with disabilities receiving pre-employment transition services, will have an impact on the financial and personnel resources of the agency. However, the collection and reporting of such data are required by the amendments made by WIOA to section 101(a)(10) of the Act. In addition, the collection and reporting of data regarding the number of students with disabilities receiving pre-employment transition services and the costs of these services will enable the Department and the States to better track the use of VR program funds that must be reserved for the provision of these services.

In response to the comments regarding the burden associated with the reporting of data under final § 361.40 and as a result of further Departmental review, we have adjusted the burden estimates as described in the *Regulatory Impact Analysis* section of the preamble of these final regulations. Comments pertaining to specific estimates of reporting burden included in the *Regulatory Impact Analysis* of the NPRM are addressed in the *Regulatory Impact Analysis* of these final regulations. No changes are needed to the regulatory text of final § 361.40.

Changes: None.

RSA–911 Case Service Report

Comments: We received comments related to the definitions of data elements, the reporting of Social Security numbers, the reliability of data, the data elements used to report services to employers, the reporting of barriers to employment as required by section 116 of title I of WIOA, and the timelines by which States must report data required for the performance accountability indicators.

Discussion: We discuss comments related to the manner in which the data are required to be reported under final § 361.40(a) and (b) through the RSA–911 in the supporting statement for this data collection instrument published elsewhere in this issue of the **Federal Register**, and under the joint performance accountability system final regulations, also published elsewhere in this issue of the **Federal Register**, as appropriate.

Assessment for Determining Eligibility and Priority for Services (§ 361.42)

Advancing in Employment and Other Eligibility Criteria

Comments: Many commenters expressed strong support for proposed § 361.42(a)(1)(iii) permitting an applicant to be eligible if he or she requires vocational rehabilitation services to advance in employment and meets all other eligibility criteria. However, some of these commenters requested clarification regarding the effect of the regulation when an individual is unable to advance in employment due to his or her disability. These commenters also asked whether advancing in employment refers only to the individual's current employment, or if it extends to preparations, including graduate education services, for advancing in future employment. A few commenters requested clarification about whether a DSU would be required to support the pursuit of a graduate degree by an individual already employed successfully in a competitive integrated environment and about how financial need shall be assessed.

Some commenters expressed concern that the term ''advance in employment'' was too vague and that it would be difficult to know when an individual has achieved his or her goal since one can always advance in employment to some degree. These commenters also expressed concerns that serving more individuals who want to advance in employment could force a DSU to implement an order of selection. Some commenters suggested that the regulations should clarify that advancement in employment should be explicitly linked to the individual's impairment, rather than broader developmental needs.

A few commenters inquired whether the proposed changes in § 361.1, which establishes the purpose of the VR program, affect the determination of eligibility under § 361.42. These commenters expressed concern that the deletion of the term ''gainful employment'' in proposed § 361.1 could be misconstrued as disallowing entry level employment as a vocational goal. A few commenters asked whether the new emphasis on self-sufficiency and competitive integrated employment means that those who apply for vocational rehabilitation services intending only to work part-time will be a lower priority for the purpose of determining eligibility.

Discussion: We appreciate the strong support for the changes in final § 361.42. We also understand the need for clarification.

Section 102(a)(1)(B) of the Act, as amended by WIOA, allows for an individual with a disability, whose physical or mental impairment constitutes a substantial impediment to employment, to be determined eligible for vocational rehabilitation services if he or she requires services to prepare for, secure, retain, advance in, or regain employment. By adding the phrase ''advance in,'' section 102(a)(1)(B) of the Act, as amended by WIOA, reinforces the Department's long-standing commitment that the VR program must provide comprehensive services to assist individuals with disabilities to achieve their maximum vocational potential. The VR program is not intended solely to place individuals with disabilities in entry-level jobs but rather to assist them to obtain appropriate employment, given their unique strengths, resources, priorities, concerns, abilities, capabilities, and informed choice. The VR program's purpose is the same regardless of whether an individual wants to advance in employment or obtain employment. We disagree with the commenter that the provision of vocational rehabilitation services to assist an individual to advance in employment should be limited to disability needs rather than other needs or desires. The extent to which DSUs should assist eligible individuals to advance in their careers by providing vocational rehabilitation services depends upon whether the individual has achieved employment that is consistent with this standard. The DSU's assistance could include, as appropriate for the individual, graduate-level postsecondary education, if necessary to achieve the advancement in employment specified in the vocational goal on the individual's approved individualized plan for employment. All other eligibility criteria still apply to applicants seeking to advance in employment.

Consistent with long-standing Department policy, we interpret the phrase ''advance in employment,'' as used in section 102(a)(1)(B) of the Act and final § 361.42(a)(1)(iii), broadly to include advancement within an individual's current employment or advancement into new employment. In this way, the VR program ensures that individuals with disabilities obtain the services necessary so they can pursue and engage in high-demand jobs available in today's economy.

The addition of the phrase ''advance in'' in § 361.42(a)(1)(iii), both proposed and final, underscores long-standing policy. Because DSUs have been assisting individuals to advance in employment prior to this statutory and regulatory revision, we do not anticipate that the change will result in a DSU implementing an order of selection due to an increased number of individuals seeking to advance in employment. As stated, although the phrase ''advance in'' employment is new in both the statute and these final regulations, its inclusion merely mirrors long-standing Departmental policy as set forth in RSA–PD–97–04, dated August 19, 1997.

As discussed in more detail in the *Purpose (§ 361.1)* section earlier in this preamble, inclusion of the term ''economic self-sufficiency,'' rather than ''gainful employment'' as contained in prior § 361.1, does not alter the eligibility criteria set forth in final § 361.42(a)(1) or establish a priority of services for individuals seeking any particular form of employment. Therefore, the changes contained in final §§ 361.1 and 361.42(a)(1)(iii) do not require DSUs to treat individuals seeking part-time or self-employment differently (*e.g.,* given lower priority) than individuals seeking full-time employment. Neither the Act, as amended by WIOA, nor these final regulations, supports such an interpretation. Section 361.42(c)(2), for example, prohibits the DSU from considering the nature of an applicant's vocational goal when determining eligibility and priority for services. Therefore, a DSU may not prioritize the determination of eligibility for individuals who choose to pursue full-time employment over those who elect to seek part-time employment or self-employment. In addition, economic self-sufficiency is intended to serve as a goal to maximize employment, which may be achieved through a variety of employment options, including entry-level employment for individuals for whom it is consistent with their skills, interests, and informed choice. However, the achievement of economic self-sufficiency is not among the criteria used to determine eligibility for the VR program under section 102(a) of the Act.

Changes: None.

Substantial Impediment to Employment

Comments: One State VR agency asked whether a substantial impediment to employment for the purpose of determining eligibility meant an impediment to any employment, or just to the employment the individual wished to pursue.

Discussion: Although this particular eligibility criterion was not changed in the Act, as amended by WIOA, or § 361.42, either proposed or final, we clarify in this Discussion that the term ''substantial impediment to employment'' should be interpreted in its broadest context, not just considered with respect to the applicant's specific vocational goal when determining eligibility. Final § 361.42(c)(2)(ii)(B), as it did in prior regulations, prohibits the DSU from considering the individual's desired employment objective, even if known, during this stage of the vocational rehabilitation process.

Changes: None.

Prohibited Factors

Comments: A number of commenters expressed concerns about the inability to consider an applicant's employment history when determining eligibility, particularly for those who are currently employed and apply for vocational rehabilitation services to advance in employment. One commenter stated that not being able to evaluate disability barriers from previous or current employment experiences, or not being able to assess abilities and capabilities by examining past and current educational credentials, could prevent the qualified rehabilitation counselor from determining whether an individual has a substantial impediment to employment and whether the individual requires services to achieve an employment outcome.

Other commenters expressed concern that proposed § 361.42(c)(2), which precludes the consideration of an applicant's employment history, current employment status, level of education, or educational credentials when determining eligibility for services, contradicts the definition of ''assessment'' in § 361.5(c)(5)(ii)(E), which states that the vocational rehabilitation counselor must rely on information obtained from the eligible individual's experience in integrated

employment settings in the community and other integrated settings.

Some of these commenters requested that we remove the requirement that a DSU must not consider an applicant's employment history, current employment status, level of education, or educational credentials when determining eligibility for services. A commenter requested that criminal records be added to the list of prohibited factors when determining eligibility for vocational rehabilitation services, except when the criminal background is related to the employment outcome.

Discussion: The additional factors, set forth in both proposed and final § 361.42(c)(2)(ii)(E) and (F), that a DSU must not consider when determining an applicant's eligibility for vocational rehabilitation services are consistent with long-standing policy. A DSU must examine a variety of factors when developing an individualized plan for employment, including the individual's past and current employment and education credentials, to ensure that the appropriate vocational rehabilitation services are identified to assist the individual to achieve his or her chosen vocational goal specified in the approved individualized plan for employment. However, a DSU may not use an applicant's employment or education to determine his or her eligibility for vocational rehabilitation services. The change from the prior regulation in proposed and final § 361.42(c)(2)(ii)(E) and (F) clarifies existing eligibility criteria and the list of prohibited factors in order to ensure consistency with the phrase ''advance in employment'' in the Act, as amended by WIOA, and these final regulations. Because an individual may be eligible for the VR program if he or she requires vocational rehabilitation services to advance in employment, the Act seems to take into account that the individual could have more than minimal educational or employment history. Regardless of his or her education or employment history, the applicant still must demonstrate that he or she has a disability and that the disability constitutes a substantial impediment to employment as required in § 361.42(a)(1)(ii) and requires vocational rehabilitation services to prepare for, secure, retain, advance in, or regain employment in accordance with final § 361.42(a)(1)(iii). In making these determinations, the qualified vocational rehabilitation counselor would review all known information about the applicant in order to assess the individual's impediments and service needs, but the eligibility determination itself must not be based on the fact that the individual has an extensive employment or educational history.

Although final § 361.42(c)(2) does not specifically prohibit a DSU from considering an applicant's criminal background when determining an individual's eligibility for vocational rehabilitation services, the Act and these final regulations require that a DSU base the determination of eligibility only on those factors identified in section 102(a)(1) of the Act and final § 361.42(a)(1). However, the DSU may develop policy and issue guidance to its vocational rehabilitation counselors about managing an individual's criminal background when developing the individualized plan for employment to ensure that the vocational goal is appropriate and that any necessary vocational rehabilitation services to address this background are provided in a manner that is consistent with limitations that might be imposed by Federal, State, and local law and regulations due to that criminal history. For further information regarding Federal law and guidance in this area, see: *http://wdr.doleta.gov/directives/* and *http://www.eeoc.gov/laws/guidance/.*

Changes: None.

Residency

Comments: A number of commenters requested clarification about the definition of ''residency'' for the purpose of determining eligibility and providing vocational rehabilitation services. Several commenters noted that individuals may apply for services when living just across the border in a neighboring State, while other individuals receive services from one State but intend to work in another State and continue working with the VR agency with which they began their rehabilitation program.

Discussion: We proposed only one change from the prior regulation in § 361.42(c)(1) to clarify that a DSU is prohibited from establishing de facto duration of residency requirements by requiring the applicant to produce documentation that would, under State or local law, result in a duration of residence requirement. Although the clarification regarding documentation did not exist in prior § 361.42(c)(1), the provision as contained in final § 361.42(c)(1) is consistent with long-standing Department policy. The explicit prohibition against a duration of residency requirement existed in prior § 361.42(c)(1) and remains unchanged in all other respects in these final regulations and is consistent with section 101(a)(12) of the Act.

Nonetheless in response to the requests for clarification, as stated in Technical Assistance Circular 12–04, titled ''Provision of Vocational Rehabilitation Services to An Individual by More Than One Agency'' and dated June 11, 2012, we clarify here in this Discussion that an individual may receive vocational rehabilitation services from more than one DSU simultaneously, including those in different States, when appropriate, and in accordance with the implementation of an order of selection, as applicable, in each State. In this way, the individual can receive the services that best support his or her vocational needs and the achievement of an employment outcome.

Changes: None.

Compliance Threshold

Comments: A few commenters recommended that we establish a compliance threshold of 90 percent with the requirement to determine eligibility within 60 days of the receipt of the application. These commenters stated this would provide a national benchmark by which DSUs would be held accountable by community stakeholders as well as State and Federal auditors.

Discussion: Section 102(a)(6) of the Act and final § 361.41(b)(1) require DSUs to determine the eligibility of an applicant within 60 days from the receipt of an application for vocational rehabilitation services, unless exceptional circumstances preclude the determination and the individual agrees to a specific extension of time. This requirement remains unchanged in the Act, as amended by WIOA and these final regulations; therefore, it is not a new requirement imposed on DSUs.

We appreciate the recommendations made by commenters for a mechanism to ensure compliance. Section 106(a)(1) of the Act requires States to comply with the common performance accountability system requirements imposed on all core programs of the workforce development system, including the VR program, established by section 116 of title I of WIOA. Section 116(b)(1)(A) requires a State to comply with the six primary performance indicators set forth in section 116(b)(2)(A)(i), as well as any other additional performance indicators developed by the State. While there is no statutory authority for the Department to impose a performance accountability measure, such as that recommended by commenters, there is nothing to preclude a State from developing such a measure for itself. We will continue to assess the compliance

of DSUs with the 60-day eligibility determination requirement in accordance with section 107 of the Act using all available data and information.

Changes: None.

Entities Holding Special Wage Certificates

Comments: Many commenters requested clarification about whether a DSU may contract with a community rehabilitation program to provide assessments used in the determination of eligibility, if the community rehabilitation program holds a subminimum wage certificate under section 14(c) of the FLSA.

Discussion: Neither the Act, as amended by WIOA, nor these final regulations prohibit a DSU from contracting with a community rehabilitation program for assessment services regardless of whether that provider also holds a subminimum wage certificate under section 14(c) of the FLSA. Nevertheless, we strongly encourage DSUs to contract with providers that can conduct assessments in competitive integrated settings. It is through these assessments that DSUs may best determine the individual's eligibility for the VR program and the vocational rehabilitation services needed to achieve competitive integrated employment.

Changes: None.

Extended Evaluation and Trial Work Experiences

Comments: Many commenters supported eliminating extended evaluation as a tool for determining eligibility for some individuals with the most significant disabilities. However, many other commenters also requested clarification of the circumstances under which it might be appropriate to use extended evaluation for the determination of eligibility for vocational rehabilitation services. Some commenters expressed concern that individuals for whom a trial work opportunity may not be available may inappropriately be determined ineligible for services and requested an evidentiary standard in the absence of the term ''clear and convincing evidence'' in § 361.42. Some commenters explicitly requested that extended evaluation be reinserted into the regulations.

Some commenters asked whether the term ''clear and convincing evidence'' was removed from proposed § 361.42(e)(2)(iii) by mistake and recommended retaining this standard. The proposed language required that ''sufficient evidence'' be obtained through trial work experiences to determine if an individual cannot benefit from vocational rehabilitation services to achieve a vocational goal. These commenters believed sufficient evidence is not a strong enough standard and that individuals with significant disabilities may be inappropriately determined ineligible as a result.

One commenter recommended that we revise § 361.42(e)(2)(i) to require that all trial work experiences take place in integrated settings by deleting the phrase ''to the maximum extent possible.'' One commenter requested that we add examples of supports for individuals with serious mental illness to § 361.42(e)(2)(iv), such as individual placement and supported employment services.

Discussion: We appreciate the support by many commenters for the elimination of the use of extended evaluations for the purpose of determining that an individual is unable to benefit from vocational rehabilitation services due to the severity of the individual's disability and, thus, is ineligible for vocational rehabilitation services under section 102(a)(2)(B) of the Act, as amended by WIOA, and § 361.42. The Act's amendment and these final regulations help to ensure that before a DSU makes an ineligibility determination, it must conduct a full assessment of the capacity of the applicant to perform in realistic work settings, without the use of lengthy extended evaluations.

We appreciate the comment recommending that all trial work experiences be conducted in competitive integrated employment settings. While we agree that these experiences should be provided in competitive integrated employment settings, to the maximum extent possible, as stated in both proposed and final § 361.42(e)(2)(i), there is no statutory authority to do as the commenter recommends. Section 102(a)(2)(B) of the Act, as amended by WIOA, requires a DSU to explore an individual with a disability's ability to work through trial work experiences prior to determining that the individual is not eligible for the VR program due to the severity of his or her disability. The trial work experiences must be of ''sufficient variety'' and must provide the individual with the opportunity to ''try different employment experiences'' and ''become employed in competitive integrated employment.'' There is no mandate in section 102(a)(2) that all trial work experiences be in competitive integrated employment. In fact, the use of the phrases ''sufficient variety'' and ''different employment opportunities'' suggest the congressional understanding that some trial work experiences may need to be provided in a setting other than competitive integrated employment. However, given the Act's heightened emphasis on the achievement of employment outcomes in competitive integrated employment, as well as the fact that section 102(a)(2)(B) of the Act, as amended by WIOA, specifically mandates that trial work experiences provide individuals with the opportunity to become employed in competitive integrated employment, we believe that final § 361.42(e)(2)(i) is consistent with the statute. Proposed and final § 361.42(e)(2)(i), are both consistent with prior § 361.42(e)(2)(i), with only minor wording changes to conform to terms used in the Act, as amended by WIOA. The Department also believes that trial work experiences in integrated settings, rather than simulated or mock experiences in sheltered environments, provide the DSU with the best and most comprehensive evidence of an individual's capacity to achieve competitive integrated employment. Therefore, consistent with the intent of the Act to provide individuals with disabilities the opportunity to achieve competitive integrated employment, we strongly recommend that DSUs exhaust all opportunities to provide trial work experiences through actual work experiences in integrated community environments to obtain the evidence necessary for making the determination of an individual's eligibility for vocational rehabilitation services.

We do not expect that individuals with significant disabilities will be determined ineligible in greater numbers as a result of this change. Rather, we expect that more individuals, including those with the most significant disabilities, and those who may require supported employment services, will achieve competitive integrated employment outcomes.

We appreciate the comments regarding the inadvertent deletion of prior regulatory provisions regarding clear and convincing evidence from proposed § 361.42(e)(2)(iii) and appreciate the strong support that this provision be retained in these final regulations. We agree with commenters that ''sufficient evidence'' is insufficient for a determination of ineligibility and that some individuals with significant disabilities may be inappropriately determined ineligible as a result. The deletion of the provision related to clear and convincing evidence was indeed an error and we have revised final § 361.42(e)(2)(iii) to read exactly as it had in prior regulations, thus resulting

in no regulatory change from prior regulations to these final regulations.

We believe retaining prior regulatory text in these final regulations is consistent with the statutory requirements of section 102 of the Act, as amended by WIOA. Specifically, section 102(a) of the Act, read in its entirety, establishes the information that is sufficient to make a determination of eligibility for an individual with a disability for purposes of the VR program. There is no, and never has been, a statutory requirement that clear and convincing evidence be used to make an eligibility determination. This long-standing statutory interpretation is consistent with use of the phrase ''sufficient evidence'' in § 361.42(e)(2)(iii)(A), both prior and final, with respect to eligibility determinations. However, when making a determination of ineligibility due to the severity of an individual's disability, section 102(a)(5)(C)(i) of the Act, which remained unchanged by WIOA, requires the DSU to inform the individual in writing of the reason for the ineligibility determination, including the clear and convincing evidence that formed the basis for that determination. This long-standing statutory requirement is consistent with use of the phrase ''clear and convincing evidence'' in § 361.42(e)(2)(iii)(B), both prior and final, with respect to determinations of ineligibility. Therefore, given the error noted by commenters, the Department has retained prior § 361.42(e)(2)(iii) in these final regulations.

In addition, prior to WIOA, section 102(a)(2)(B) of the Act required that trial work experiences be of sufficient variety and provided over a sufficient period of time to enable the DSU to determine the eligibility of the individual, or to obtain clear and convincing evidence of the individual's inability to achieve an employment outcome due to the severity of his or her disability.

Section 102(a)(2)(A) and section 102(a)(2)(B) now state only that the trial work experiences must be of sufficient variety and over a sufficient period of time to determine the eligibility of the individual. Section 102 of the Act, as amended by WIOA, no longer makes reference to the need for clear and convincing evidence for the purpose of determining an individual's ineligibility for vocational rehabilitation services. Consistent with these amendments, we proposed to revise §§ 361.42(e)(1) and 361.42(e)(2)(iii) to require that trial work experiences be of sufficient variety and over a sufficient period of time for the DSU to obtain sufficient evidence that the individual cannot benefit from participation in the VR program.

In proposing this change, we believe that the Act, as amended by WIOA, did not intend, to weaken the evidentiary standard required for this determination. It remains our long-standing policy that individuals with disabilities, including those with the most significant disabilities, must be afforded every opportunity to obtain the vocational rehabilitation services needed to achieve high quality employment and that a DSU should only deny an individual this opportunity in limited circumstances, and based on the highest level of proof.

Therefore, we have revised final § 361.42(e)(2)(iii) to clarify that the trial work experiences must yield clear and convincing evidence before a DSU may determine an individual is incapable of benefiting from the provision of vocational rehabilitation services, and, thus, is ineligible for the program.

We agree with the commenter that individuals with serious mental illness should be afforded the necessary supports, such as—but not limited to—individual placement or supported employment services, to ensure trial work experiences are beneficial. The same is true for any individual with significant disabilities participating in trial work experiences. Proposed § 361.42(e)(2)(iv) remained unchanged from prior regulations. While we disagree with the commenter that specific examples pertinent to mental illness should be included in final § 361.42(e)(2)(iv) because to do so could cause more confusion as to why other examples were not added. However, assistive technology services and personal assistance services are not the only support that should be provided during a trial work experience. Although we believe the provision was clear that the two examples given were just two examples of many given the use of the word ''including,'' we have nonetheless made a small change to § 361.42(e)(2)(iv) to add further clarity.

Changes: We have revised final § 361.42(e)(2)(iii) to retain prior § 361.42(e)(2)(iii), thereby specifying that a DSU must base eligibility determinations on sufficient evidence, but that determinations of ineligibility due to the severity of an individual's disability must be based on clear and convincing evidence. We have also revised final § 361.42(e)(2)(iv) to add the phrase ''including, but not limited to'' when providing examples of the types of support services that may be provided to an individual participating in a trial work experience. This change clarifies that DSUs should ensure an individual with a disability receives the supports he or she needs so that the trial work experience is beneficial.

Development of the Individualized Plan for Employment (§ 361.45)

Time Frame for Developing the Individualized Plan for Employment

Comments: Many commenters supported the change from the prior regulations in proposed § 361.45(e) which required that the DSU develop the individualized plan for employment for each eligible individual as soon as possible, but no later than 90 days following determination of eligibility, unless the DSU and the individual agree to a specific extension of that time frame. Some commenters supported the 90-day standard but were concerned that the quality of plans be maintained and that plans continue to be individualized based on interests, abilities and informed choice and not be made uniform out of expediency. These commenters stated that DSUs may not take the time needed to develop a comprehensive individualized plan for employment within the 90-day time limit, and may settle for a more generalized plan rather than seeking an extension of time. Some commenters, though they supported a specific time limit, stated that the limit should be shorter than 90 days and recommended that we strengthen the regulation to promote the more timely development of the individualized plan for employment. One commenter recommended the adoption of a 90 percent compliance standard for this regulation to strengthen the adherence to the time limit. Another commenter asked how long the extended period should be to ensure that there are no additional delays in the development of the individualized plan for employment. Finally, one commenter requested guidance concerning how to proceed in situations where the individual does not agree to an extension.

Discussion: We appreciate the comments supporting the proposed regulatory changes, as well as the concerns expressed by commenters about those same changes. As explained in the NPRM, the change to § 361.45(e), which mirrors section 102(b)(3)(F) of the Act, as amended by WIOA, is intended to efficiently and effectively serve eligible individuals, move them through the VR process with minimal delay, and achieve employment outcomes in competitive integrated employment. We believe that DSUs can implement the regulation in a manner that does not negatively affect the quality and individualized nature of the plan for

employment for each eligible individual and that this requirement will have a minimal impact on the majority of DSUs that have already adopted the 90-day time frame. Despite the 90-day time frame, these plans must be of sufficient quality to incorporate mandatory components in section 102(b)(4) of the Act, and meet requirements under § 361.46(a)(1), which requires the individualized plan for employment to be consistent with the individual's unique strengths, resources, priorities, concerns, abilities, capabilities, career interest, and informed choice consistent with the general goal of competitive integrated employment (except that in the case of an eligible individual who is a student or a youth with a disability, the description may be a description of the individual's projected post-school employment outcome).

In addition, the change to § 361.45(e) is necessary to implement the statutory requirement in section 102(b)(3)(F) of the Act, as amended by WIOA, that specifically mandates DSUs to develop the individualized plan for employment for each individual within 90 days following the determination of eligibility, unless the DSU and the individual agree to an extension of that time frame. Therefore, we do not have the statutory authority to shorten the time frame because to do so would be inconsistent with the statute.

DSUs must comply with the requirements of section 102(b)(3)(F) of the Act and final § 361.45(e) when developing the individualized plans for employment for each eligible individual. We will assess the DSUs' compliance with the requirement during the monitoring and review we conduct under section 107 of the Act. We do not believe that it is necessary, therefore, to include a 90 percent compliance standard in this regulation to strengthen the adherence to the time frame.

Section 102(b)(3)(F) of the Act and final § 361.45(e) permit the DSU and individual to agree to a specific extension of the 90-day time limit without imposing a limitation on the length of that extension. DSUs should ensure that the extension is warranted based on the particular circumstances and needs of the individual and that the extensions are not so long as to cause unnecessary delays in providing services.

The individualized plan for employment is an evolving document and may be amended to effect changes of goal, services, providers, and time frames. If the individual disagrees with the vocational rehabilitation counselor's request to extend the time for developing the plan, the counselor should determine whether the plan, as written at that time, addresses the mandatory components of section 102(b) of the Act and final § 361.46, and whether the information in the plan is sufficient to allow the DSU and individual to proceed with the delivery of services, with the understanding that the plan may be amended. If the counselor determines that the plan does not contain sufficient information on which to base the provision of services and the individual still disagrees with the request to extend the development of the plan beyond 90 days after further vocational guidance and counseling, the counselor should refer the individual to the CAP for help in resolving the disagreement, and must, in accordance with section 102(c)(2)(B)(ii), inform the individual of the due process rights set forth in section 102(c) of the Act and final § 361.57.

Changes: None.

Options for Developing the Individualized Plan for Employment

Comments: All comments received on proposed § 361.45(c)(1) supported the requirement that a DSU provide eligible individuals information about the option of requesting assistance from a disability advocacy organization when developing the individualized plan for employment. Many of the commenters recommended that we include in the regulation examples of disability advocacy organizations, such as agencies funded under the Act, entities providing services under the Ticket to Work and Work Incentive Act of 1998, and agencies assisting individuals with disabilities under the Developmental Disabilities Assistance and Bill of Rights Act of 2000 and the IDEA.

All commenters supported our inclusion of benefits planning in proposed § 361.45(c)(3). A few commenters requested that we define that term. One commenter asked whether we would support the development of additional benefit planning resources and what documentation would be required to verify the individual's completion of benefits planning.

Discussion: We appreciate the comments supporting the proposed regulations. Section 102(b)(1)(A) of the Act, as amended by WIOA, and final § 361.45(c)(1)(ii)(C) are intended to empower eligible individuals by clarifying that they can choose to seek assistance from disability advocacy organizations when developing their individualized plans for employment. Section 102(b)(1)(A) of the Act does not specify examples of these disability advocacy organizations, and we do not believe it necessary to include examples in final § 361.45(c)(1)(ii)(C) because to do so could have an unintended limiting effect. However, we encourage DSUs to provide eligible individuals with a list of the advocacy organizations in the State so that they may identify those organizations with expertise in disability-related needs, responsibilities, and services that are required to achieve the individuals' employment goals.

Consistent with section 102(b)(2) of the Act, as amended by WIOA, final § 361.45(c) requires DSUs to provide certain information in writing to eligible individuals when developing the individualized plan for employment. Specifically, final § 361.45(c)(2) and (3) require DSUs to provide general information on additional supports and assistance for individuals with disabilities desiring to enter the workforce, including assistance with benefits planning, to individuals receiving Supplemental Security Income or Social Security Disability Insurance benefits. We recommend that DSUs retain a copy of this written information and guidance in the individual's service record, as they would be documents pertinent to the development of the individualized plan for employment.

In addition, we understand that benefits planning may take many different forms over a course of time. Furthermore, benefits planning and the individuals certified to provide these types of support services are determined by the SSA's work incentive program. We believe it is important that States retain sufficient flexibility to work with providers appropriately certified or defined by SSA. Therefore, we disagree with the recommendation to define ''benefits planning'' in these final VR program regulations.

Furthermore, although DSUs must provide information about benefits planning and available resources, they are not required to document the completion of these services. However, if benefits planning is included and the services in the individualized plan for employment, it should be documented upon completion.

Changes: None.

Data for Preparing the Individualized Plan for Employment

Comments: One commenter stated that the determination of eligibility only requires that an individual have impediments to employment but not necessarily impediments to the specific employment outcome the individual desires, and questioned why only this data would be used.

Discussion: While we appreciate the concerns expressed by the commenter, this section of the Act was not changed by WIOA and, therefore, no changes were proposed in the NPRM. We address other comments we received on this section regarding the use of sheltered employment settings for the conduct of assessments in the *Assessment for Determining Eligibility and Vocational Rehabilitation Needs* section under the *Applicable Definitions* section previously in this preamble.

Changes: None.

Content of the Individualized Plan for Employment (§ 361.46)

Comments: The majority of commenters supported proposed § 361.46(a)(1), requiring that the individualized plan for employment specify an employment goal consistent with the general goal of competitive integrated employment under section 102(b)(4) of the Act, as amended by WIOA. However, a few commenters expressed concern that the proposed regulation does not satisfactorily address the needs of all individuals with disabilities because it limits options for employment goals to competitive integrated employment, and stated that the regulation is in conflict with congressional intent regarding the full range of employment options.

A few commenters recommended adding to or clarifying the requirement in proposed § 361.46(a)(7)(iii) that the individualized plan for employment contain a description of how the responsibilities for service delivery will be divided between the employment network and the DSU under section 102(b)(4)(H) of the Act.

Discussion: We appreciate the support for the proposed regulation. WIOA did not amend section 102(b)(4)(H) of the Act, which requires that the individualized plan for employment for an individual receiving assistance from an employment network through the Ticket to Work and Self-Sufficiency program established under the Social Security Act include a description of how the responsibility for providing services will be divided between the employment network and the DSU. Therefore, we do not believe that further clarification of this long-standing requirement is necessary.

We received comments about eliminating uncompensated employment outcomes through the individualized plan for employment, and we address them in the discussion on the definition of ''employment outcome'' in final § 361.5(c)(15) under the Applicable Definitions section elsewhere in this *Analysis of Comments and Changes* section.

Changes: None.

Scope of Vocational Rehabilitation Services for Individuals With Disabilities

Services for Individuals Who Have Applied or Been Determined Eligible for Vocational Rehabilitation Services (§ 361.48(b))

Advanced Training

Comments: A few commenters supported including advanced training in STEM fields (science, technology, engineering, or mathematics, including computer science), medicine, law, or business as a vocational or other training service in proposed § 361.48(b)(6) so that individuals with disabilities can be prepared for the high-demand careers available in today's economy. One commenter recommended that advanced training be provided, as appropriate, not only for those specific careers mentioned in proposed § 361.48(b)(6), but for all careers. Another commenter suggested that § 361.48(b)(6) explicitly state that advanced training must be provided under an individualized plan for employment. Still another commenter requested that proposed § 361.5(c) include a definition of ''advanced training.''

By contrast, a few commenters expressed concern about the potential cost burden upon VR agencies that would result from individuals pursuing advanced training under proposed § 361.48(b)(6). These commenters suggested that comparable benefits are typically limited for graduate students; as a result, DSUs would need to cover all or a substantial portion of the cost of advanced degrees.

Additionally, one commenter requested that we clarify in § 361.48(b) that vocational rehabilitation services are not intended to assist individuals to obtain employment in only entry-level careers.

Discussion: We appreciate the support for including advanced training among the individualized services available. The Department has a long history of encouraging DSUs to provide advanced training, when appropriate, to assist eligible individuals in achieving their employment goals. Section 103(a)(18) of the Act, as amended by WIOA, specifically permits DSUs to provide vocational rehabilitation services that encourage qualified eligible individuals to pursue advanced training in the STEM fields, medicine, law, or business. Section 103(a)(5) of the Act and our prior regulation in § 361.48(f) (now final § 361.48(b)(6)) have historically permitted DSUs to provide training at institutions of higher education, including in advanced degree programs, to qualified eligible individuals.

While section 103(a)(18) of the Act specifically mentions advanced education in certain fields, that does not exclude advanced training in other fields under section 103(a)(5) of the Act. In reviewing proposed § 361.48(b)(6), the Department recognizes that it could be interpreted as allowing advanced training in only certain fields. This was not our intent, and that restriction would not be consistent with section 103(a) of the Act or long-standing Department policy. Therefore, we have revised final § 361.48(b)(6) to clarify that DSUs may provide advanced training in any field, not just the specific fields listed in section 103(a)(18) of the Act.

We do not believe that a definition of ''advanced training'' is necessary. Neither section 7, nor section 103(a), of the Act, as amended by WIOA, defines ''advanced training.'' We understand that ''advanced training'' may have multiple meanings, such as degrees conferred by institutions of higher education and advanced certifications in certain fields, all of which may be permissible under the VR program. Therefore, we will not define this term in final § 361.48(b)(6) or elsewhere in final part 361 to avoid limiting the meaning of ''advanced training.''

As stated earlier, final § 361.48(b)(6) continues the long-standing availability of financial support for advanced training through the VR program. Therefore, though comparable benefits for graduate-level education may be limited, we anticipate that DSUs will experience little, if any, increase in the costs of providing this existing service.

The Secretary agrees that providing vocational rehabilitation services is not limited only to helping an individual with a disability obtain entry-level employment. Under section 102(a)(1) of the Act, as amended by WIOA, and final § 361.48(b), DSUs are to provide vocational rehabilitation services to help eligible individuals advance in employment, consistent with each individual's approved individualized plan for employment and his or her unique strengths, resources, priorities, concerns, abilities, capabilities, interests, and informed choice.

Changes: We have revised § 361.48(b)(6) to clarify that DSUs may provide advanced training in any field.

Other Services

Comments: Some commenters recommended that proposed § 361.48(b)

include other services not already specifically mentioned. Of these commenters, a few suggested that § 361.48(b)(6) allow DSUs to provide tuition and other services for students with intellectual or developmental disabilities in a Comprehensive Transition and Postsecondary Program for Students with Intellectual Disabilities, as defined by the Higher Education Act of 2008. One commenter asked that assistive technology be included among the individualized services listed in this section. Another commenter suggested that § 361.48(b) require that DSUs recruit, train, and hire peer service providers and mental health advocates to offer individualized support services to individuals experiencing mental illness.

Finally, one commenter requested that we clarify the difference between job retention services and follow-along services in § 361.48(b)(12).

Discussion: We disagree with the commenters' recommendations to identify in final § 361.48(b) other services not specifically listed. The list of services in section 103(a) of the Act and final § 361.48(b) is not exhaustive. Therefore, DSUs may provide other services, not specifically listed, if necessary for the individual to achieve an employment outcome. Similarly, we clarify here that the vocational and other training services specified in final § 361.48(b)(6) encompass tuition and other services for students with intellectual or developmental disabilities in a Comprehensive Transition and Postsecondary Program for Students with Intellectual Disabilities, as defined by the Higher Education Act of 2008. In addition, assistive technology is encompassed in the definition of ''rehabilitation technology'' in final § 361.5(c)(45), which is included among the individualized services in final § 361.48(b)(17). Also, section 103(a) of the Act, as amended by WIOA, does not specifically require a DSU to provide mental health advocacy services or peer-counseling services for individuals with mental health diagnoses. However, a DSU may provide peer-counseling services, on an individualized basis, under final § 361.48(b)(3), (12), and (21).

Finally, job-retention services and follow-along services are both types of job-related services. Job-retention services may include any vocational rehabilitation service (*i.e.,* vocational rehabilitation counseling and guidance, maintenance, or tools) necessary to help an individual maintain employment. Follow-along services typically mean direct contact with an employed individual to provide support with issues arising from employment, such as on-the-job performance, or with addressing employment barriers, such as absenteeism or tardiness, that could jeopardize employment.

Changes: None.

Scope of Vocational Rehabilitation Services for Groups of Individuals With Disabilities (§ 361.49(a))

Establishment, Development, or Improvement of Community Rehabilitation Programs

Comments: One commenter suggested that vocational rehabilitation services provided under § 361.49(a)(1) for establishing, developing, or improving a public or other nonprofit community rehabilitation program should be allowable only if these services result in competitive integrated employment for the individuals receiving services from the program.

Discussion: We agree with the comment that services for groups provided under § 361.49(a)(1) must be provided for the purpose of achieving competitive integrated employment. Section 103(b)(2) of the Act remained unchanged by the amendments in WIOA, except for a technical amendment. As such, services provided under this authority have always been for the purpose of promoting integration in the community through employment, and final § 361.49(a)(1), like the Act, as amended by WIOA, emphasizes employment outcomes in competitive integrated employment, including supported employment and customized employment.

Changes: None.

Technical Assistance to Businesses

Comments: Another commenter sought clarification about the difference between technical assistance to businesses seeking to employ individuals with disabilities in proposed § 361.49(a)(4) and training and services for employers in proposed § 361.32. This commenter inquired whether both authorities may be used to fund these similar services.

Discussion: In answer to the request for clarification, DSUs are permitted to partner with employers and businesses under both final §§ 361.49(a)(4) and 361.32, as authorized by sections 103(b) and 109, respectively, of the Act, as amended by WIOA. Under final § 361.49(a)(4), DSUs may use VR program funds to provide technical assistance to businesses seeking to hire individuals with disabilities, and this authority must be exercised in a manner consistent with the ultimate purpose of the program—achieving competitive integrated employment. Final § 361.32 is similar, and it identifies specific activities DSUs may engage in when providing training and technical assistance to businesses. These activities may include, but are not limited to, general training and technical assistance for employers about employing individuals with disabilities, disability awareness, and employment law; recruitment, training, retention of, and workplace accommodations for, employees with disabilities; and improving opportunities for work-based learning experiences for individuals with disabilities. The specific activities in final § 361.32 are encompassed within the more general authority of final § 361.49(a)(4). Thus, there is little distinction between the two authorities, and DSUs may rely on both when providing training and technical assistance to businesses seeking to employ individuals with disabilities in competitive integrated employment.

Changes: None.

Establishment, Development, or Improvement of Assistive Technology Programs

Comments: A few commenters opposed proposed § 361.49(a)(8), because it requires that individuals with disabilities be applicants of or be determined eligible for vocational rehabilitation services to access assistive technology services through the establishment, development, or improvement of assistive technology demonstration, loan, reutilization, or financing programs established under the Assistive Technology Act of 1998.

Discussion: We agree with commenters that section 103(b)(8) of the Act, as amended by WIOA, is not explicitly limited to individuals with disabilities who have applied or been determined eligible for the VR program. We also agree that individuals with disabilities who are not applicants or eligible individuals of the VR program may benefit from the coordination of programming with activities authorized under the Assistive Technology Act of 1998.

After further review, we recognize that limiting these generalized assistive technology services to applicants and eligible individuals of the VR program, as we did in proposed § 361.49(a)(8), may have created an unintended barrier for these individuals in accessing generalized assistive technology services. Our intention of limiting this service to applicants and eligible individuals of the VR program in proposed § 361.49(a)(8) was to be consistent with the establishment authority in section 103(b)(2) of the Act

and proposed § 361.49(a)(1), which remained substantially unchanged by WIOA.

However, we acknowledge that the nature of the services provided under the new establishment authority of section 103(b)(8) of the Act and proposed § 361.49(a)(8) is quite different. We also acknowledge that neither section 103(b) of the Act, as amended by WIOA, nor proposed § 361.49 mandates the DSU to provide any one of these services, including the assistive technology related services in section 103(b)(8) of the Act and proposed § 361.49(a)(8). Furthermore, consistent with section 103(b) of the Act, under final § 361.49(a), some of the services to groups are available to individuals who may not have applied or been determined eligible for vocational rehabilitation services.

We acknowledge that some individuals with disabilities may require generalized assistive technology services before they are able to apply for vocational rehabilitation services, or that, through the receipt of generalized assistive technology services, individuals with disabilities may realize their potential to achieve competitive integrated employment and subsequently apply for vocational rehabilitation services. Therefore, the final regulations do not limit assistive technology services to applicants and eligible individuals of the VR program.

Finally, the assistive technology services provided under this authority are more generalized in nature and for the benefit of a group of individuals; they are not tied to the individualized plan for employment of any one individual. Individualized assistive technology services and devices may only be provided, under section 103(a)(14) of the Act and final § 361.48(b)(17) and in accordance with an agreed upon individualized plan for employment.

Changes: We have revised final § 361.49(a)(8) so that DSUs are permitted to provide any individual with a disability generalized assistive technology services provided under programs established, developed, or improved by the DSU in coordination with activities authorized under the Assistive Technology Act of 1998.

Advanced Training

Comments: One commenter sought clarification of the authority of the DSU to provide support to eligible individuals (including, as appropriate, tuition) for advanced training in specific fields under proposed § 361.49(a)(9).

Discussion: As stated in the NPRM, because § 361.49(a)(9) addresses services to groups, we believe there are only limited circumstances in which it would be appropriate for the DSU to provide support for advanced training under that section. Examples include supporting an advanced degree program for multiple eligible individuals at the same institution of higher education or developing and implementing specific programming to benefit a group of eligible individuals working toward advanced degrees at institutions of higher education.

Final § 361.49(a)(9), which mirrors section 103(b)(9) of the Act, as amended by WIOA, is not intended, and must not be used, to replace the authority of the DSU to provide advanced training to eligible individuals on their individualized plans for employment under section 103(a)(5) and (18) of the Act and final § 361.48(b).

Changes: None.

Comparable Services and Benefits (§ 361.53)

Accommodations and Auxiliary Aids and Services

Comments: Although a few commenters supported the proposed regulation, many commenters recommended that accommodations and auxiliary aids and services be exempt from a search for comparable services and benefits when they are needed to help an individual participate in services that are exempt from such a search. Two commenters recommended removing the requirement to search for comparable benefits for auxiliary aids and devices altogether. Some commenters indicated that, prior to WIOA, providing accommodations or auxiliary aids and services was typically done in support of another service and rarely a stand-alone service.

A few commenters noted a technical error in proposed § 361.53(b), which cross-referenced the vocational rehabilitation services exempt from a determination of the availability of comparable services and benefits in proposed § 361.48(a) instead of proposed § 361.48(b), the correct citation. These commenters also recommended revising the regulation to specify that a comparable service review is not required prior to providing an accommodation or auxiliary aid or service if it is necessary for an individual to receive one of the exempt services listed in proposed § 361.48(b).

Discussion: We appreciate the comments and recommendations about comparable services and benefits. Although many commenters suggested that we exempt accommodations and auxiliary aids and services from a search for comparable services and benefits, especially when they are needed to enable an individual to participate in services that are exempt from such a search, doing so would be contrary to the statute. Whereas some commenters noted that prior to WIOA, providing accommodations for auxiliary aids and services was typically done in support of another service and rarely as a stand-alone service, section 101(a)(8)(A)(i) of the Act, as amended by WIOA, specifically added accommodations or auxiliary aids and services to those services that require a determination of available comparable services and benefits before the DSU may provide them. Moreover, section 101(a)(8)(A)(i) specifically exempts certain services from this search, but accommodations or auxiliary aids and services are not among those that are exempt.

We agree that there was an error in the cross-reference to proposed § 361.48(a), as noted by several commenters. We have made the correction.

Changes: We have revised final § 361.53(b), which cross-references § 361.48, to correct a typographical error that appeared in the NPRM. The correct cross-reference is § 361.48(b).

Pre-Employment Transition Services and Personally Prescribed Devices

Comments: A few commenters suggested that pre-employment transition services be added to the list of services exempt from a search for comparable services and benefits because the vocational rehabilitation agency must ensure that these services are provided or provide them directly.

One commenter suggested that personally-prescribed devices, such as eyeglasses, hearing aids, and wheelchairs, be added as an exempt service under proposed § 361.53(b). The commenter based this recommendation on a statement in the preamble of the NPRM about identifying agency financial responsibilities in interagency agreements under proposed § 361.53(d) that personally prescribed devices are not included in accommodations or auxiliary aids and services for the purposes of these regulations.

Discussion: While we agree with commenters that DSUs must provide, or arrange for the provision of, pre-employment transition services, section 101(a)(8)(A)(i) of the Act, as amended by WIOA, does not exempt these services from the search for comparable services and benefits as it does for other specific services. A DSU may satisfy its mandate under section 113 of the Act by arranging for pre-employment transition services provided by another public

entity after conducting a search for comparable services and benefits. Similarly, section 101(a)(8)(A)(i) of the Act does not exempt personally-prescribed devices, such as eyeglasses, hearing aids, and wheelchairs. Given that the Act specifically exempts some services, there is no statutory basis to exempt other services or devices from the search for comparable services and benefits; therefore, personally prescribed devices may not be added as an exempt service under final § 361.53(b) as referenced in final § 361.53(d).

Changes: None.

Interagency Agreements

Comments: Several commenters addressed interagency agreements between DSUs and public institutions of higher education for providing accommodations and auxiliary aids and services. A few commenters shared their concern that students may not receive services they need because the DSU and an institution of higher education cannot agree on financial responsibilities. One commenter suggested that DSUs be required to provide the services and then pursue reimbursement from the universities if no interagency agreement exists. Other commenters supported interagency agreements so long as they did not result in denial or delays in providing needed aids or accommodations. Some commenters stated that interagency agreements should not require negotiation of the financial responsibilities for providing accommodations or auxiliary aids and services, which should be the responsibility of the agency that is providing the service, aid, or accommodation. Other commenters stated that these financial responsibilities should be defined at a national level. One commenter suggested that interagency agreements should be explicit in specifying who is responsible for accommodations, services, and auxiliary aids, and that the regulations should include a required time frame of six months from the publication of the final regulations for completing interagency agreements.

A few commenters objected to one example in the NPRM describing agency financial responsibilities in interagency agreements with public institutions of higher education. Specifically, the commenters thought the example of a DSU providing interpreters or readers both in and out of a classroom in a State where tuition is free for deaf or blind students could be misinterpreted as guidance or direction from the Department about how to assign financial responsibilities rather than as an example of negotiating financial responsibilities.

Discussion: We appreciate the concerns expressed by commenters regarding negotiation of financial responsibilities in interagency agreements and the potential delay in students receiving services. Pursuant to section 101(a)(8)(A)(i) of the Act and final § 361.53(c)(2), DSUs must provide a service if that service is not available as a comparable service at the time it is needed. This provision should not be interpreted as precluding the required negotiation of financial responsibilities under an interagency agreement required by section 101(a)(8)(B) of the Act and final § 361.53(d).

Although some commenters suggested that accommodations and auxiliary aids and services should be the responsibility of the agency providing the service requiring the accommodations, section 101(a)(8)(B) of the Act, as amended by WIOA, mandates that State-level interagency agreements identify who is financially responsible for providing vocational rehabilitation services, including accommodations or auxiliary aids and services.

There is no statutory authority for the Department to define these financial responsibilities at the national level. While the statute and these final regulations establish some parameters, both permit States to develop interagency agreements appropriate to their unique needs, thereby ensuring maximum flexibility. For example, States may choose to explicitly identify the financial responsibilities of each party to the interagency agreement as suggested by the commenter.

Additionally, there is no statutory authority for the Department to impose a deadline of six months from the publication of the final regulations to complete interagency agreements. Moreover, we do not believe such a deadline is necessary because the requirement to enter into interagency agreements, set forth in section 101(a)(8)(B) of the Act and final § 361.53, existed prior to the enactment of WIOA. The requirement to enter into an interagency agreement is long-standing, with the only change being the explicit inclusion of accommodations or auxiliary aids and services. However, as noted in the preamble to the NPRM, we believe that these services were always included in the search for comparable services and benefits, as is any vocational rehabilitation service that is not explicitly exempt. For this reason, the changes made to the interagency agreements pursuant to the amendments made by WIOA are technical—not substantive—in nature, and additional time to implement the requirement is not necessary.

Finally, in response to comments expressing concern about one of the examples provided in the preamble to the NPRM, that example is one of several in a non-exhaustive list. Determination of agency financial responsibilities in interagency agreements is a State matter and should be developed appropriately to meet each State's unique circumstances. We provided the examples only to demonstrate how some States have resolved financial responsibilities in interagency agreements. However, these examples do not necessarily represent best practices or the complete universe of how such issues may be resolved.

Changes: None.

Semi-Annual and Annual Review of Individuals in Extended Employment and Other Employment Under Special Certificate Provisions of the Fair Labor Standards Act (§ 361.55)

Effective Date

Comments: Many commenters strongly supported or endorsed proposed § 361.55, which was viewed as helpful in increasing the potential of as many people with disabilities as possible moving into competitive integrated employment. A few commenters requested clarification about the effective date.

Discussion: We appreciate the many comments supporting this regulation, which is consistent with section 101(a)(14) of the Act, as amended by WIOA. The additional review requirement in § 361.55 is one of many new requirements by which WIOA places heightened emphasis on ensuring that individuals with disabilities, including those with the most significant disabilities, can achieve competitive integrated employment if given the necessary services and supports.

In response to the comments seeking clarification of the effective date of the requirements in final § 361.55, most provisions of the Act, as amended by WIOA (with only a few exceptions not applicable here), took effect on July 22, 2014, the date WIOA was signed into law. This includes section 101(a)(14), which requires the semi-annual review and reevaluation for the first two years following the beginning of employment, and annually thereafter, for individuals with a disability who have received services under the VR program and who are employed in an extended employment setting in a community

rehabilitation program or any other employment under section 14(c) of the FLSA. The purpose of these reviews is to determine each individual's interest, priorities, and needs with respect to competitive integrated employment or training for such employment.

Changes: None.

Who is subject to the requirements?

Comments: A few commenters requested that we clarify who is subject to these requirements (*e.g.,* all individuals, only youth, or individuals in day habilitation programs).

Discussion: Final § 361.55 applies to all individuals with disabilities, regardless of age, who have been served by the VR program and are employed in extended employment or in any employment setting at subminimum wage. This includes any individual who has received services under an individualized plan for employment but has been determined by the DSU to be no longer eligible for services under final § 361.43.

Changes: None.

Documentation

Comments: A few commenters asked that we clarify the documentation required for the semi-annual and annual reviews.

Discussion: The documentation required in final § 361.55(b)(2) for the semi-annual or annual reviews must be consistent with final § 361.47(a)(10). We believe that the DSU could satisfy the requirement by: (1) Documenting the results of the semi-annual or annual review; (2) obtaining a signed acknowledgment that the individual with a disability, or if appropriate, the individual's representative, has provided input to the review; and (3) obtaining a signed acknowledgment by the individual, or the individual's representative as appropriate, that the review was done.

Final § 361.47(b) requires the DSU, in consultation with the SRC, if the State has a Council, to determine the type of documentation that the DSU will maintain in order to meet service record requirements, including those in final § 361.55(b)(2). We encourage the DSU to document the interests, priorities, and needs discussed in final § 361.55(b)(1) and the maximum efforts made under final § 361.55(b)(3) to assist the individual in achieving competitive, integrated employment.

Changes: None.

Costs of Conducting the Reviews

Comments: One commenter noted the unknown costs to the DSU associated with conducting semi-annual and annual reviews.

Discussion: We agree with the commenter that the costs associated with conducting semi-annual and annual reviews may not be readily known; however, prior to the amendments made by WIOA, DSUs were required to conduct annual reviews for up to two years and annually thereafter at the request of the individual with a disability or his or her representative. Therefore, the DSU should have a historical cost basis for estimating the current costs of conducting these reviews.

Changes: None.

Informed Choice

Comments: Other commenters suggested allowing an individual, directly or indirectly through his or her representative, to exercise informed choice to opt out of future reviews after any review has taken place.

Discussion: While we appreciate the commenter's suggestion to allow an individual to opt out of future reviews after any given review has taken place, section 101(a)(14) of the Act, as amended by WIOA, does not permit this. WIOA removed the previous statutory provision that required the reviews to be conducted annually only for the first two years of employment. Under the prior requirement, the reviews would continue past the mandatory two years only if requested by the individual or, if appropriate, the individual's representative. By removing this language, WIOA requires the reviews and provides no ability for an individual to opt out.

Changes: None.

Retroactive Reviews

Comments: One commenter was concerned that the semi-annual and annual reviews would not be conducted by the DSU in that State. The commenter observed that the DSU had not been tracking individuals or conducting reviews, despite beginning tracking efforts in 2014. The commenter suggested that we require DSUs to conduct, within a specified time, retroactive semi-annual and annual reviews for all individuals with disabilities in subminimum wage or extended employment that have been found ineligible to benefit from vocational rehabilitation services.

Discussion: We appreciate both the concern about the DSU not tracking and conducting reviews, as well as the recommendation to require DSUs to conduct retroactive semi-annual and annual reviews within a specified time. Since the enactment of WIOA, DSUs have been required to conduct semi-annual reviews on individuals with disabilities in extended employment, or any other employment under section 14(c) of the FLSA, for two years following the beginning of such employment and annually thereafter. To require a set period of time for retroactive reviews is inconsistent with the Act; however, the conduct of reviews, albeit with differing time frames, has been a requirement prior to the passage of WIOA and a responsibility of the DSU. Therefore, a DSU that historically has not, and is not conducting reviews currently, would be out of compliance with the requirement under the Act.

Changes: None.

Cross-Reference With 34 CFR 397.40

Comments: A few commenters suggested that the language in proposed § 361.55 and proposed 34 CFR 397.40, regarding semi-annual and annual reviews, be cross-referenced and reconciled to ensure consistency and avoid confusion about which requirements apply and the respective responsibilities of the DSU under each provision. One commenter suggested we add a new § 361.55(c) to indicate that: (1) The requirements in part 361 supersede any requirements that may apply in 34 CFR 397.40 regarding the responsibilities of a DSU for individuals with disabilities, regardless of age, who are employed at a subminimum wage; and (2) reviews conducted under § 361.55 are subject to the requirements under 34 CFR 397.40, regarding informing the individual of self-advocacy, self-determination, and peer mentoring training opportunities available in the community.

Discussion: Although a few commenters suggested that the language in proposed § 361.55 and proposed § 397.40 regarding semi-annual and annual reviews be cross-referenced and reconciled to ensure consistency and avoid confusion about applicable requirements and responsibilities of the DSU, the sections are under separate titles in the Act and have differing effective implementation dates. Section 101(a)(14) took effect upon enactment (July 22, 2014); section 511 of the Act, as amended by WIOA, will take effect on July 22, 2016. Moreover, final part 361 and 34 CFR part 397 apply to different, although sometimes intersecting, groups of individuals with disabilities. Final § 361.55 applies only to individuals who have received or are receiving vocational rehabilitation services, whereas final 34 CFR 397.40 covers a much broader population of individuals with disabilities because

many of those individuals may not have ever received vocational rehabilitation services. Neither section supersedes the other; therefore, the specific responsibilities of the DSU and the requirements for reviews must be met under both. While it is conceivable that the required reviews under final § 361.55 and final 34 CFR 397.40 may be fulfilled concurrently for some individuals with disabilities to whom both apply, it cannot be assumed that a review required under final § 361.55 sufficiently replaces the review required under final 34 CFR 397.40 or vice versa.

Changes: None.

Individuals With a Record of Service

Comments: None.

Discussion: Upon further Departmental review of proposed § 361.55 in light of the practical implementation of these requirements with regard to students with disabilities receiving pre-employment transition services under section 113 of the Act, as amended by WIOA and final § 361.48(a), we have determined that clarifying technical amendments are necessary. Thus, we clarify in final § 361.55(a)(1) and (a)(2) that the requirements of final § 361.55 apply to those individuals who have a record of service—in other words, individuals who have applied for or been determined eligible for, vocational rehabilitation services—and achieved employment either at subminimum wage or in extended employment. This clarifying change retains the long-standing applicability of these requirements to such individuals. Without this clarifying change, it may be construed that the requirements may also apply to students with disabilities receiving pre-employment transition services. As noted in a separate discussion related to ''Transition Services,'' there is no requirement that these students apply for or be determined eligible for vocational rehabilitation services in order to receive pre-employment transition services. As such, it is possible that a DSU will have no information about the student to form the basis for these semi-annual or annual reviews.

Changes: Final §§ 361.55(a)(2)(i) and (ii) now explicitly applies these requirements to individuals who have a record of service.

B. Transition of Students and Youth With Disabilities From School to Postsecondary Education and Employment

This section presents the analysis of comments we received on proposed regulations regarding the provision of transition and other vocational rehabilitation services to students and youth with disabilities to ensure that they have meaningful opportunities to move from school to post-school activities, including competitive integrated employment. The analysis is presented by topical headings relevant to sections of the regulations in the order they appear in part 361 as listed. We discussed some of these regulatory sections, such as §§ 361.24, 361.46, 361.48(b), and 361.49, under section A as they also pertain to the general administration of the VR program and the provision of vocational rehabilitation services to individuals with disabilities of any age.

Transition-Related Definitions (§ 361.5(c))

Pre-Employment Transition Services (§ 361.5(c)(42))

The Term ''Pre-Employment Transition Services''

Comments: Some commenters suggested revising the term ''pre-employment transition services'' to ''student career services.''

Discussion: We appreciate the suggestions raised by the commenters. However, we will not change the term ''pre-employment transition services'' in final § 361.5(c)(42) to ''student career services'' because this term is not used in the Act. Rather, section 7(30) of the Act, as amended by WIOA, defines ''pre-employment transition services,'' and it is the term used throughout title I of the Act, including in sections 101(a)(25), 103(a)(15), 110(d), 112(a), and 113.

Changes: None.

Scope of Definition

Comments: A few commenters recommended alternate definitions for the term ''pre-employment transition services'' that would include: (1) The pre-employment transition coordination responsibilities in proposed § 361.48(a)(4); (2) each of the five required activities in proposed § 361.48(a)(2); and (3) use of the term ''potentially eligible'' and its definition.

Discussion: While we appreciate the suggestions, we disagree that the definition of ''pre-employment transition services'' should be expanded to include more specific information regarding the types of services that constitute ''pre-employment transition services'' and the population to be served. The definition of ''pre-employment transition services'' in final § 361.5(c)(42) is consistent with the statutory definition in section 7(30) of the Act because it refers to the required and authorized activities specified in detail in final § 361.48(a), which are the only services permitted.

We also disagree with the recommendation to include pre-

employment coordination services in the definition of ''pre-employment transition services.'' We agree that coordination activities are necessary for arranging and providing pre-employment transition services. However, coordination activities are more akin to the related activities performed by vocational rehabilitation counselors and other vocational rehabilitation personnel during the course of providing pre-employment transition services rather than the services themselves. As such, we included pre-employment transition coordination activities under the implementation of pre-employment transition services in final § 361.48(a), but have not included them as part of the definition of ''pre-employment transition services.''

We also do not believe it is necessary to define the term ''potentially eligible,'' either within the definition of ''pre-employment transition services'' or separately in final § 361.5(c). Because this term is unique to implementing pre-employment transition services and is not applicable to any other vocational rehabilitation service, we interpret the phrase ''potentially eligible'' in § 361.48(a)(1) as meaning all students with disabilities, regardless of whether they have applied or been determined eligible for vocational rehabilitation services. In so doing, the term is applicable only when implementing the requirements governing pre-employment transition services in final § 361.48(a).

Changes: None.

Definitions for Required Activities

Comments: A few commenters recommended that we define the required activities listed in proposed § 361.48(a)(2), including work-based learning experiences, and career (or job exploration) counseling. In this same vein, many suggested that we define work-based learning experiences in a manner consistent with section 103(a) of the School to Work Opportunities Act of 1994, and include job training, work experiences, workplace mentoring, and instruction in general workplace competencies. One commenter requested that we define career counseling, expressing concern that many States may provide this service in ways that are less effective than one-on-one counseling, such as presentations to groups of students. One commenter requested that we broadly define the five required pre-employment transition services to facilitate maximum use of the VR funds reserved for those services. However, a few commenters requested that the required activities not be defined so as to maintain the flexibility permitted in the Act, as amended by WIOA, to allow States to be innovative in the types of activities provided to students with disabilities and to maximize use of the VR funds reserved for providing pre-employment transition services.

Discussion: We considered the requests to define the required activities listed in § 361.48(a)(2). We reviewed section 103 of the School-to-Work Opportunities Act of 1994, which expired on October 1, 2001, and found that it included mandatory activities under the work-based learning component that are similar to the five required activities identified in section 113(b) of the Act, as amended by WIOA. Given the similarities, we do not believe further clarifications are needed.

We agree with the comment that, by not defining the required activities, we maintain flexibility for States and enable the use of creative and innovative strategies that are State specific and tailored to meet the needs of students with disabilities. We also considered the comment about defining career counseling. DSUs must provide career counseling, or job exploration counseling as the term is used in section 113 of the Act, in a manner that most effectively meets the needs of the student with a disability in an individual or group setting, as they would any other vocational rehabilitation service. By providing job exploration counseling in group settings, DSUs can prepare students with disabilities for one-on-one counseling.

Changes: None.

Acronym for Pre-Employment Transition Services

Comments: A few commenters expressed concerns about the use of an acronym for ''pre-employment transition services.''

Discussion: We agree with the commenters that an acronym should not be used as shorthand for ''pre-employment transition services.'' We did not use the most obvious acronym for ''pre-employment transition services'' in the NPRM or in these final regulations, and we do not intend to use it in administering the VR program because of its negative connotations.

Changes: None.

Student With a Disability (§ 361.5(c)(51))

Scope of Definition

Comments: A few commenters supported the proposed definition. However, most commenters did not agree, for differing reasons, with the Department's proposed definition or its interpretation set forth in the preamble of the NPRM. Most of those disagreeing stated the Department narrowed the scope of the definition of a ''student with a disability.''

Some commenters disagreed with the regulatory definition because it did not mirror the statutory definition. Specifically, they believed the addition of the phrase ''a student who is'' to the phrase ''an individual with a disability for the purposes of section 504'' in proposed § 361.5(c)(51)(i)(C)(*2*) narrows the scope of the statutory definition. In fact, one commenter believed that the interpretation effectively eliminated individuals qualifying on the basis of section 504 of the Act.

A few commenters recommended that the Department adjust the age range of a ''student with a disability,'' while other commenters recommended that the definition require a consistent age range across the Nation.

Discussion: We appreciate the comments supporting the definition, as well as those expressing concern or disagreement. We anticipated many of the same concerns when developing the proposed regulations. However, we firmly believe that § 361.5(c)(51), both as proposed and final, is consistent with both the plain meaning and intent of the definition in section 7(37) of the Act, as amended by WIOA. We agree with commenters that § 361.5(c)(51)(i)(C)(*2*), both as proposed and final, limits the definition to students. We adopted almost verbatim section 7(37) of the Act, as amended by WIOA, and, in so doing, we attempted to eliminate confusion that the term ''student with a disability'' could be construed to apply to someone not in an educational program. We recognize that the applicability of section 504 of the Act, in any other context, is much broader. Therefore, in an effort to reduce confusion and potential non-compliance, we clarified in § 361.5(c)(51)(i)(C)(*2*), both proposed and final, that this particular criterion, as all others, applies only to students with disabilities. We believe this clarification is consistent with the statute because the term itself—''student with a disability''—describes a population that encompasses only individuals with disabilities who are participating in educational programs. For this reason, we also disagree with the recommendations to remove any explicit requirement in the definition of a ''student with a disability'' that the individual be a participant in an educational program because to do so would contradict the plain meaning of

the term itself and section 7(37) of the Act.

The definitions of ''student with a disability'' in section 7(37) of the Act and final § 361.5(c)(51) allow for a certain degree of flexibility in the age range of students with disabilities. States may elect to use a lower minimum age for receipt of pre-employment transition services than the earliest age for the provision of transition services under section 614(d)(1)(A)(i)(VIII) of the IDEA. The section applies beginning with the first individualized education program (IEP) to be in effect when a child with a disability turns 16, or younger if determined appropriate by the IEP Team, and updated annually thereafter. Pursuant to 34 CFR 300.320(b) of the the IDEA regulations, transition services may be provided for students with disabilities younger than age 16, if determined appropriate by the IEP Team. Furthermore, a ''student with a disability'' may not be older than 21, unless a State law provides for a higher maximum age for the receipt of special education and related services under the IDEA. Therefore, there is no statutory authority to revise the definition of a ''student with a disability,'' for purposes of the VR program, by adjusting the specified age range or creating a standard age range to be applied across the Nation because to do so would be inconsistent with the age criteria contained in the statutory definition.

Changes: None.

Educational Programming

Comments: Some commenters stated that the Department's interpretation that the definition applies only to students in secondary school directly contradicts congressional intent, as expressed in section 2(b)(5) of the Act, as amended by WIOA, because the narrower interpretation does not ensure, to the greatest extent possible, that students and youth with disabilities have opportunities for postsecondary success. Most of these commenters stated that students in postsecondary education should be included within the definition, as should students in GED, ESL, home school, vocational/technical programs, and juvenile justice or mental health treatment facilities, so long as they meet the age requirements in the definition. These commenters stated that students in these educational programs and settings also need pre-employment transition services, which are available only to individuals who meet the definition of a ''student with a disability.'' One commenter requested that the Department share documentation of congressional intent in support of the interpretation that the definition does not include individuals in postsecondary education. A few commenters were concerned that the emphasis on serving only secondary students might decrease emphasis by DSUs on services for individuals enrolled in postsecondary education.

Some commenters expressed concern about the impact of the Department's interpretation of the definition of ''student with a disability'' on the use of funds reserved for the provision of pre-employment transition services. These commenters believed the definition of a ''student with a disability'' should be broader in order for States to maximize use of the funds reserved for pre-employment transition services.

Discussion: We appreciate the concerns expressed by the commenters and have reconsidered our interpretation, as described in the preamble to the NPRM, that the definition of a ''student with a disability'' should be limited to students in a secondary education program. Our intention in the NPRM was to be consistent with congressional intent for the definition, given the requirements governing the availability of a free appropriate public education under the IDEA, which is limited to services included in the individualized education programs of children with disabilities who are enrolled in secondary education under State law (20 U.S.C. 1412(a)(1) and 1401(9)). Services provided under the IDEA are not affected by our interpretation here, which applies only to the VR program.

Nonetheless, we agree that section 7(37) of the Act, as amended by WIOA, is silent on the educational setting for a student with a disability. After much consideration of the potential effects for such change in interpretation, the Secretary agrees that the definition of a ''student with a disability'' in final § 361.5(c)(51), for purposes of the VR program, should be interpreted as applying to students also enrolled in educational programs outside secondary school, including postsecondary education programs, so long as the students satisfy the age requirements set forth in final § 361.5(c)(51). We believe this change will eliminate the concern expressed by commenters regarding the potential negative effect a different interpretation would have on a DSU providing and maximizing postsecondary education opportunities to eligible individuals with disabilities needing such services under an approved individualized plan for employment. Furthermore, as was set forth in the NPRM, the Secretary believes that the definition applies to secondary students who are homeschooled, as well as students in other non-traditional secondary educational programs. This interpretation is not affected by this discussion, and these individuals remain covered by the definition of a ''student with a disability'' in final § 361.5(c)(51).

We also agree with commenters that postsecondary education students may benefit from certain pre-employment transition services set forth in section 113 of the Act, as amended, and final § 361.48(a), all of which are limited to ''students with disabilities.'' We believe this broader interpretation of the definition will increase the potential for DSUs to maximize the use of funds reserved for the provision of pre-employment transition services by increasing the number of students who can receive these services. Therefore, we have revised the definition of ''student with a disability'' in final § 361.5(c)(51) to include students in secondary, postsecondary, and other recognized education programs.

However, this broader interpretation does not expand the list of required or authorized activities in section 113 of the Act, as amended by WIOA, and final § 361.48(a). A DSU can use the reserved funds to provide pre-employment transition services, as set forth in final § 361.48(a), to students with disabilities in postsecondary education or other educational programs who meet the age requirements of the definition. For example, a DSU may provide work-based learning activities such as internships to an individual with a disability in a postsecondary education program who otherwise satisfies the definition of a ''student with a disability,'' but may not use the reserved funds (dedicated to the provision of pre-employment transition services under final § 361.48(a)) to provide services and activities not specifically included in section 113 of the Act and final § 361.48(a). In other words, a DSU may not use the funds reserved for pre-employment transition services to pay for tuition and other costs of attending postsecondary education, since this is not among those activities that are required or authorized under section 113 of the Act and final § 361.48(a). These and other necessary services, however, may be provided with VR funds not reserved for the provision of pre-employment transition services so long as they are provided pursuant to an approved individualized plan for employment under section 103(a) of the Act and final § 361.48(b) of these final regulations.

Section 113 of the Act, as amended by WIOA, requires DSUs to coordinate pre-employment transition services with local educational agencies. This applies to students with disabilities in educational programs administered by local educational agencies. DSUs should coordinate the pre-employment transition services provided to students who are not participating in programs administered by local educational agencies with the public entities administering those educational programs, as described in section 101(a)(11)(C) of the Act, as amended by WIOA, and final § 361.24.

Changes: We have revised the definition of ''student with a disability'' in final § 361.5(c)(51) to includes students in secondary, postsecondary, and other recognized education programs.

Students Who Have Applied or Been Determined Eligible for Vocational Rehabilitation Services

Comments: A few commenters recommended that the definition apply only to individuals with disabilities who have applied for and been determined eligible for vocational rehabilitation services.

Discussion: We disagree with the comments recommending that a ''student with a disability'' should be limited to individuals who have applied or been determined eligible for vocational rehabilitation services. The definition in final § 361.5(c)(51) is consistent with section 7(37) of the Act, which does not limit the definition to applicants and eligible individuals of the VR program. Furthermore, to impose such a limitation would be contrary to the Department's interpretation of ''potentially eligible,'' students with disabilities, as used in section 113 of the Act, as amended by WIOA, and final § 361.48(a). We have repeatedly stated in both the NPRM and these final regulations that all ''students with disabilities,'' regardless of whether they have submitted an application or been determined eligible for vocational rehabilitation services, may receive pre-employment transition services under final § 361.48(a). See a more detailed discussion of ''Potentially Eligible'' later in this section in connection with comments received under final § 361.48(a).

Upon further Departmental review of this issue, the Secretary has determined that other conforming changes are needed throughout final part 361 to ensure these students, who may not have applied or been determined eligible for the VR program, would still be protected by fundamental rights under the VR program, namely the protection of their personal information under final § 361.38 and the right to exercise informed choice under final § 361.52. We have revised these provisions to refer to ''recipients of services'' rather than ''eligible individuals.''

Changes: We have revised final § 361.38 and final § 361.52 to refer to ''recipients of services'' rather than ''eligible individuals,'' thereby ensuring that students and youth with disabilities who may receive pre-employment transition services or transition services to groups, as applicable, are still protected by requirements governing confidentiality and informed choice even if they have not applied or been determined eligible for the VR program.

Transition Services (§ 361.5(c)(55))

Scope of ''Pre-Employment Transition Services'' and ''Transition Services''

Comments: A few commenters supported the definition of ''transition services'' in proposed § 361.5(c)(55), while a few commenters requested clarification regarding the difference between ''transition services'' and ''pre-employment transition services,'' and the responsibility of DSUs to provide job placement assistance within the context of these services.

Discussion: We appreciate the support from commenters to maintain the proposed definition of ''transition services'' in final § 361.5(c)(55). As to the difference between ''pre-employment transition services'' and ''transition services,'' we believe the distinction between the two is critical. As stated in the preamble to the NPRM, vocational rehabilitation services are provided on a continuum, with pre-employment transition services being the earliest set of services available to students with disabilities.

Pre-employment transition services, authorized by section 113 of the Act, as amended by WIOA, and implemented by final § 361.48(a), are designed to help students with disabilities to begin to identify career interests that will be further explored through additional vocational rehabilitation services, such as transition services. Furthermore, pre-employment transition services are only those services and activities listed in section 113 of the Act, as amended by WIOA, and final § 361.48(a). Job placement assistance is not included among the listed pre-employment transition services, but it could constitute a transition service under section 103(a)(15) of the Act and final § 361.48(b). Finally, pre-employment transition services are available only to students with disabilities, whereas transition services may be provided to a broader population—both students and youth with disabilities.

Following the continuum, transition services represent the next set of vocational rehabilitation services available to students and youth with disabilities. They are outcome-oriented and promote movement from school to post-school activities, including postsecondary education, vocational training, and competitive integrated employment. As such, transition services may include job-related services, such as job search and placement assistance, job retention services, follow-up services, and follow-along services, based on the needs of the individual.

Individualized transition services under section 103(a)(15) of the Act and final § 361.48(b) must be provided to students who have been determined eligible for the VR program and in accordance with an approved individualized plan for employment. Transition services also may be provided in group settings to students and youth with disabilities under section 103(b)(7) of the Act, as amended by WIOA, and final § 361.49(a)(7). Although these group services are not individualized, they can still be beneficial for job exploration, including presentations from employers in the community and group mentoring activities.

Changes: None.

Outreach and Engagement of Parents or Representatives

Comments: A few commenters requested that we revise the definition to incorporate parental outreach and engagement.

Discussion: We agree that engaging and coordinating with parents or representatives of students and youth with disabilities is consistent with the network of services and activities included in the definition, and we have revised the definition accordingly.

Changes: We have revised final § 361.5(c)(55) by adding paragraph (v) to include outreach to and engagement of parents or, as appropriate, the representatives of students or youth with disabilities in the definition of ''transition services.''

Youth With a Disability (§ 361.5(c)(58))

Distinction Between ''Student With a Disability'' and ''Youth With a Disability''

Comments: While a few commenters praised the clarity of the proposed definition, most stated that making a

distinction between a student with a disability and a youth with a disability creates unnecessary complexity and burden. These commenters recommended that services available to students with disabilities, such as pre-employment transition services, also be available to youth with disabilities. One commenter recommended that ''youth with a disability'' be defined more broadly than ''student with a disability'' so that individuals who are homeschooled and others could be covered by the definition.

Discussion: We appreciate all of the comments and concerns about the definition of ''youth with a disability'' in § 361.5(c)(58). While we understand the commenters' concerns, the Act, as amended by WIOA, defines the terms ''student with a disability'' and ''youth with a disability'' differently. Moreover, the Act and these final regulations use the terms differently, depending on the context. For example, only students with disabilities can receive pre-employment transition services under section 113 of the Act and final § 361.48(a), but both students with disabilities and youth with disabilities can receive transition services under section 103 of the Act and final §§ 361.48(b) and 361.49(a). The definitions set forth in these final regulations are consistent with the statute, and we have no statutory authority to consolidate the two definitions or to delete one of them because to do so would be inconsistent with the statute.

The age range in the definition of ''youth with a disability'' in final § 361.5(c)(58) is broader than that for ''student with a disability'' in final § 361.5(c)(51). Therefore, a student with a disability always meets the definition of a ''youth with a disability'' because a student with a disability has an age range that fits within the age range prescribed by the definition of a ''youth with a disability.''

However, a youth with a disability may not necessarily meet the definition of a ''student with a disability.'' A youth with a disability could also be a student with a disability if the individual meets the age range in the definition of ''student with a disability'' and participates in an educational program (see the earlier discussion of educational programming under *Student with a Disability section § 361.5(c)(51)*). On the other hand, a youth with a disability who is outside the age range for a student with a disability or is not participating in an educational program does not meet the definition of a ''student with a disability.''

Changes: None.

Scope of Definition

Comments: One commenter questioned whether the definition of ''youth with a disability'' includes criteria related to the IDEA or section 504, as is the case with the definition of a ''student with a disability.''

Discussion: As previously discussed, the definition of ''youth with a disability'' in final § 361.5(c)(58) not only is broader in age range but also is not tied to participation in an educational program under the IDEA or section 504 of the Act, as is the definition of ''student with a disability.''

Changes: None.

Coordination With Education Officials (§ 361.22)

Coordination of Pre-Employment Transition Services

Comments: A few commenters expressed support for proposed § 361.22, suggesting minimal to no changes. A few, however, stated that DSUs are required to provide pre-employment transition services in collaboration with educational agencies, and recommended that we include in proposed § 361.22(b) reference to these services wherever the interagency coordination of transition services is mentioned. One commenter stated that a major challenge in transition is determining which entity is responsible for job placement assistance and support, and recommended proposed § 361.22(b) be revised to incorporate specific mention of these services in the coordination of pre-employment transition services.

A few commenters recommended that we consider including in proposed § 361.22 a reference to technical assistance circular 14–03 (RSA–TAC–14–03), which discusses transition-related principles.

Discussion: We appreciate the comments supporting proposed § 361.22, as well as those seeking further clarification or expressing concerns. We agree that pre-employment transition services should be added to final § 361.22(b) as it is referenced in final § 361.22(a)(1). However, there is no statutory basis to require job placement services in connection with pre-employment transition services, as job placement services are not among the required or authorized activities under section 113 of the Act, as amended by WIOA. Yet, while we cannot require it, nothing in the Act prohibits States from including job placement activities as a transition service in the formal interagency agreement.

We disagree with the request to add a reference in final § 361.22(b) to technical assistance circular 14–03 because the content of technical assistance circular 14–03 has been significantly affected by the amendments to the Act made by WIOA. As a result, we will be revising this particular technical assistance circular accordingly.

Changes: We have revised § 361.22(b)(1) to state that the formal interagency agreement must include collaboration between the DSU and the State educational agency for providing pre-employment transition services to students with disabilities. We have also revised §§ 361.22(b)(3) and (b)(4) to similarly cover pre-employment transition services when identifying personnel responsible for providing services and when developing procedures for outreach to and identification of students with disabilities.

Financial and Programmatic Responsibilities

Comments: One commenter suggested that we revise proposed § 361.22 by requiring that the formal interagency agreement between the DSU and the State educational agency contain more robust minimum content provisions, since the agreement is critical to providing services to students with disabilities and a successful transition from school to post-school activities.

Many commenters stated that additional guidance is needed to determine which entity, the school or the DSU, is financially responsible for providing transition services to students with disabilities. Many requested that we revise proposed § 361.22 to explicitly identify the financial roles and responsibilities of each entity, stating that the interagency agreement cannot be effective if it is broad, general or abstract. Other commenters recommended that the formal interagency agreement provide clear direction about agencies' responsibilities for services under particular circumstances, stating that specificity is essential to coordinating shared responsibilities and funding.

A few commenters expressed concern that major problems and delays in implementing transition planning services occur because neither WIOA nor the IDEA state explicitly which entity is responsible for providing transition services. These commenters stated that the financial responsibilities must be made clear so that neither the local educational agency nor the DSU may shift the burden for providing a

service, for which it otherwise would be responsible, to the other entity.

A few commenters also noted that while many of these decisions can be resolved at the State and local level, there are still instances where it is difficult to determine the responsible entity, such as in the determination of which entity is responsible for job placement assistance and related work supports. Conversely, one commenter, representing school officials, stated that decisions about providing and assuming financial responsibility for transition services must be made at the State and local level through interagency collaboration and coordination, cannot be wholly dictated by regulation, and must be made based on the circumstances of the situation and the eligibility of the student.

One commenter expressed the concern that the budget for the VR program is not as significant as the budget for special education, and vocational rehabilitation funds may be quickly exhausted if the VR program were to provide pre-employment transition services to every student with a disability. Another commenter noted that the schools and DSUs need to collaborate with other entities that have shared responsibilities and funding. Similarly, one commenter stated that the IDEA, WIOA, and the Americans with Disabilities Act seem to be in a competitive relationship, since the entities covered by these statutes are responsible for providing and funding some of the same services.

Discussion: As discussed in the preamble of the NPRM, over the years many individuals have sought clarification and posed questions about the financial responsibilities of schools and DSUs when services fall under the purview of both entities. For example, pre-employment transition services and transition services can be both vocational rehabilitation services under the VR program and special education or related services under the IDEA. While neither the Act, as amended by WIOA, nor the IDEA is explicit as to which entity—the DSU or the State educational agency and, as appropriate, the local educational agency—is financially responsible for providing pre-employment transition services and transition services, both final § 361.22(c) and 34 CFR 300.324(c)(2) provide that neither the DSU nor the local educational agency may shift the burden for providing services, for which it otherwise should be responsible, to the other entity. It is essential that section 101(c) of the Act, as amended by WIOA, and section 612(a)(12) of the IDEA, along with their implementing regulations in § 361.22(c) and 34 CFR 300.154, are read in concert to avoid any inconsistency or conflict between the two requirements.

Section 113(a) of the Act, as amended by WIOA, requires the DSU to provide, or arrange for the provision of, pre-employment transition services in collaboration with local educational agencies. Therefore, decisions as to which entity will be responsible for providing services that are both special education services and vocational rehabilitation services must be made at the State and, as appropriate, local level as part of the collaboration between the DSU, State educational agencies, and, as appropriate, the local educational agencies.

We agree that the formal interagency agreement should facilitate the transition of students with disabilities receiving special education services to receiving vocational rehabilitation services without delay or disruption. Since the decisions about financial responsibility for providing pre-employment transition services and transition services must be made at the State and local level during collaboration and coordination of services, a formal interagency agreement or other mechanism for interagency coordination can explicitly address all aspects of these issues. As suggested in the NPRM, the agreement criteria could address criteria such as:

1. The purpose of the service. Is it related more to an employment outcome or education? That is, is the service usually considered a special education or related service, such as transition planning necessary for the provision of a free appropriate public education?

2. Customary Services. Is the service one that the school customarily provides under part B of the IDEA? For example, if the school ordinarily provides job exploration counseling or work experiences to its eligible students with disabilities, the mere fact that those services are now authorized under the Act as pre-employment transition services does not mean the school should cease providing them and refer those students to the VR program. However, if summer work experiences are not customarily provided by a local educational agency, the DSU and local educational agency may collaborate to coordinate and provide summer work-based learning experiences.

3. Eligibility. Is the student with a disability eligible for transition services under the IDEA? The definition of a ''student with a disability'' under the Act and these final regulations is broader than under the IDEA because the definition in the Act includes those students who are individuals with disabilities under section 504 of the Act. It is possible that students receiving services under section 504 do not have individualized education programs under the IDEA because they are not eligible to receive special education and related services under the IDEA. As a result, DSUs are authorized to provide transition services under the VR program to a broader population under WIOA than local educational agencies are authorized to provide under the IDEA.

The Secretary believes that these criteria may assist DSUs, State educational agencies, and local educational agencies as they collaborate and coordinate the provision of transition services, including pre-employment transition services, to students with disabilities. We strongly encourage that formal interagency agreements have clearly defined parameters for collaborating and coordinating the delivery of pre-employment transition services and transition services and clearly defined responsibilities for each entity. However, there is no statutory basis for the Department to establish service delivery or financial responsibilities. Those decisions must be made at the State level while developing an interagency agreement and considering the population, available resources, and needs of the students and youth. Consequently, States have maximum flexibility to develop these interagency agreements in a manner that best meets the unique needs and capacities of both the DSUs and educational agencies.

Changes: None.

Contracting With Subminimum Wage Programs

Comments: Some commenters recommended that proposed § 361.22(b)(6) be revised to prohibit contracts or arrangements with, or referrals to, programs in which youth with disabilities are employed at subminimum wage. They stated that the agreements should go beyond documentation requirements and make proactive efforts to identify individuals being considered for employment at subminimum wage. One commenter expressed support for using the existing formal interagency agreement as the mechanism to develop and document the process required in section 511 of the Act as proposed in § 361.22.

Discussion: We agree with commenters that the Act emphasizes the need to ensure that individuals with disabilities, especially students and youth with disabilities, are given the opportunity to receive training for and

obtain work in competitive integrated employment. The commenters misunderstood our proposal because § 361.22(b)(6), both proposed and final, requires the interagency agreement between the DSU and the State educational agency to include an assurance that, in accordance with 34 CFR 397.31, neither the State educational agency nor the local educational agency will enter into a contract or other arrangement with an entity, as defined in 34 CFR 397.5(d), for the purpose of operating a program for a youth with a disability under which work is compensated at a subminimum wage. Moreover, new requirements in section 511 of the Act, as amended by WIOA, and in final 34 CFR part 397 place additional limitations on the use of subminimum wages for individuals with disabilities, especially youth with disabilities. For example, final 34 CFR 397.10 requires the DSU, in coordination with the State educational agency, to develop a process that ensures youth with disabilities receive documentation demonstrating their completion of the various required activities.

Changes: None.

Coordination and Outreach to Parents and Representatives

Comments: A few commenters urged the Department to ensure that coordination efforts include outreach to parents of students who are in need of transition services. One such commenter recommended proposed § 361.22(b)(4) be revised to include systematic outreach to, and engagement of, parents, including through the IEP process for the IDEA eligible students. The commenter stated that without this outreach and engagement, parents will not have a meaningful understanding of the benefits of vocational rehabilitation services for their children.

Discussion: While there is no statutory basis in section 101(a)(11)(D) of the Act to require outreach to parents, we agree that family members, caregivers, and representatives play a critical role in the transition process. We believe that for pre-employment transition services and transition services to be meaningful and to lead to successful outcomes for students and youth with disabilities, their family members, caregivers, and representatives must be aware of the services and benefits offered by DSUs and be involved in the transition process. Although DSUs may conduct outreach to parents and representatives, this activity may be affected by State laws governing the age of majority.

Under section 615(m) of the IDEA and 34 CFR 300.520, a State may transfer all rights accorded to parents under Part B of the IDEA to the student when he or she reaches the age of majority under State law that applies to all children. If rights under the IDEA transfer to the student, a student may have the right to make his or her own education, employment, and independent living decisions under the IDEA. DSUs may conduct outreach directly to these students. Parental consent to participate in pre-employment transition services and transition services should be obtained pursuant to State law, as well as policies of the educational programs and the DSU. We further emphasize here that the Department funds programs and projects that advise and assist parents and representatives of students and youth with disabilities as their children prepare for adult life. The Department awarded grants to more than 65 Parent Training and Information Centers funded by the Office of Special Education Programs and seven Parent Information and Training Programs funded by RSA during FY 2015. Individuals will find additional resources regarding age of majority at *www.parentcenterhub.org/repository/age-of-majority-parentguide/.*

Changes: None.

Dispute Resolution

Comments: Some commenters expressed the concern that proposed § 361.22(c) is limited and provides no safeguards for students if an agreement is not reached about financial responsibility for a particular service, which can lead to delays in services or no services at all. Some commenters stated that the formal interagency agreement should include a mechanism to resolve disputes between the State educational agency and the DSU about providing pre-employment transition services and transition services. One commenter also suggested that we require language in the formal interagency agreement to inform individuals of the availability of the CAP.

Discussion: We disagree with the recommendations to require that the formal interagency agreement include: (1) A mechanism for resolving disputes between the DSU and the State educational agency or local educational agency; (2) a method for resolving disputes between an individual with a disability and these entities; and (3) information about the CAP. Section 101(a)(11)(D) of the Act, as amended by WIOA, which provides the statutory authority for final § 361.22(b), does not require that States create a grievance procedure for disputes under the agreements, in general, or, more specifically, about the provision of pre-employment transition services or transition services. Likewise, section 101(a)(11)(D) of the Act does not require the interagency agreement to identify a process for resolving disputes between an individual with a disability and the DSU, State educational agency, or local educational agency about pre-employment transition services and transition services, or to include information about the CAP. We believe final § 361.22 is consistent with the Act, and it provides States maximum flexibility to develop the interagency agreements in a manner that best meets their unique needs and circumstances. However, there is nothing in the Act or these final regulations that prohibits States from including in the formal interagency agreement a grievance procedure (*e.g.,* similar to the one in section 101(a)(8) of the Act) to resolve disputes between the DSU and the State educational agency, or the local educational agency, as appropriate, as well as procedures to resolve disputes between an individual with a disability and the DSU, State educational agency or local educational agency, and information about the CAP. We encourage States to include these procedures and information in their interagency agreements.

Section 20 of the Act requires all programs providing services under the Act, including the VR program, to inform applicants and recipients of services of the availability and purpose of the CAP. Therefore, regardless of whether the formal interagency agreement between the DSU and the State educational agency addresses the CAP, all students and youth with disabilities receiving vocational rehabilitation services, including pre-employment transition services and transition services, will be informed about it. In addition, an applicant for, or eligible individual under, the VR program who is dissatisfied with a decision made by vocational rehabilitation personnel, including those about pre-employment transition services and transition services, may request a review of that decision under section 102(c) of the Act. Upon further Departmental review, the Secretary has realized that the statute has created an unintended inconsistency among sections 20, 102(c), 103(b)(7), 12(a), and 113. Specifically, section 20 requires programs funded under the Act to inform applicants for and recipients of those services about the CAP. There is no requirement that the recipients be

determined eligible for those services in order to receive information about the CAP. Section 103(b)(7) of the Act permits the DSU to provide transition services to youth and students with disabilities in a group setting, regardless of whether those students or youth have applied for or been determined eligible for vocational rehabilitation services. Section 112(a) specifically authorizes the CAP to assist students with disabilities receiving pre-employment transition services. Section 113 makes clear that students with disabilities are eligible to receive pre-employment transition services regardless of whether they have applied or been determined eligible for the VR program. All of these provisions, read in concert, make clear that due process rights under the Act would be available to students and youth with disabilities receiving pre-employment transition services and transition services even if they have not yet applied for or been determined eligible for the VR program. However, section 102(c) refers only to ''applicants and eligible individuals,'' thus creating an internal inconsistency within the Act. Because it is clear that students and youth with disabilities are able to receive certain services without having applied or been determined eligible for vocational rehabilitation services and they are eligible for advocacy assistance from the CAP, the Secretary has determined it is necessary to amend final § 361.57 throughout to make clear that ''recipients'' of vocational rehabilitation services may exercise due process rights when disagreements arise during the receipt of pre-employment transition services and transition services. We have also made conforming changes throughout final part 361, such as with the definition of ''impartial hearing officer'' in § 361.5(c)(24) and ''qualified and impartial mediator'' in 361.5(c)(43).

The student or youth with a disability, or the individual's parent, as appropriate, will be informed of the CAP. Disputes or disagreements between parents and educational personnel are beyond the scope of the Act and these final regulations.

Changes: We have revised final § 361.57 throughout to replace ''eligible individuals'' with ''recipients.'' We also made conforming changes to the definitions of ''impartial hearing officer'' and ''qualified and impartial mediator'' in final § 361.5(c).

Cooperation and Coordination With Other Entities (§ 361.24)

Comments: A few commenters disagreed with proposed § 361.24(d), stating that the regulations do not ensure that American Indian students and youth with disabilities enrolled in, but disconnected from, the education system are adequately served. These same commenters specifically requested that reference to the American Indian Vocational Rehabilitation Services (AIVRS) program funded under § 121 of the Act be made throughout the final regulations whenever ''new transition services'' are mentioned. A few other commenters addressed transition services for American Indian students with disabilities without referring to proposed § 361.24.

Some commenters recommended that we require DSUs to include in their formal interagency agreements with AIVRS projects and to address in their agreements with Tribal Education Agencies in the State how the State VR agency plans to provide equitable pre-employment transition services to American Indian students with disabilities, particularly those that attend schools on Indian reservations. The commenters also recommended that we require State VR agencies to address how services to American Indian students with disabilities will be incorporated into the budgeting and spending plans for the funds reserved for providing pre-employment transition services for students with disabilities.

One commenter encouraged the Department to consider using Impact Aid funds for youth in transition.

Discussion: While the Department understands the commenters' concerns regarding the need to ensure that coordination among the DSU, AIVRS program, and educational agencies is taking place and that transition services, including pre-employment transition services, are provided to American Indian students with disabilities, the Department does not believe a revision to the final regulations is necessary to do this.

Final § 361.24, as it did when proposed, addresses the need for coordination among these entities and for providing transition services to American Indians living on or near a reservation. Section 361.24(d)(1) requires the VR services portion of the Unified or Combined State Plan to assure that DSUs have entered into formal cooperative agreements with AIVRS programs in their States. Section 361.24(d)(2) sets out requirements for cooperative agreements with AIVRS programs, and those include strategies for providing transition planning under § 361.24(d)(2)(iii). Furthermore, the Federal funds reserved in accordance with § 361.65, and any funds made available from State, local, or private funding sources, are to be used to provide pre-employment transition services to all students with disabilities, including American Indian students with disabilities, in need of such services, regardless of whether an application for services has been submitted. Finally, § 361.30 requires that the DSU assure in the VR services portion of the Unified or Combined State Plan that it will provide services to American Indians with disabilities to the same extent that it provides services to other populations with disabilities in the State.

Final § 361.22 provides for a formal interagency agreement with the State Educational Agency that would include educational services, including transition services and pre-employment transition services, provided by local educational agencies for Indian students with disabilities living on reservations. DSUs coordinate with schools on reservations that provide services through the Bureau of Indian Education or TEAs under the requirement in § 361.24(a) that the DSU cooperate with Federal and local agencies and programs. Because the final regulations provide appropriate mechanisms for coordination with the Federal, State and Tribal agencies that provide educational services to Indian students with disabilities on reservations, we do not believe a change in the regulations is necessary.

As for using funds for transition services provided under the Impact Aid law (formerly Title VIII of the Elementary and Secondary Education Act of 1965 (ESEA) and now in Title VII as a result of the Every Student Succeeds Act reauthorization), the comment is beyond the scope of these regulations. That said, however, the Impact Aid provides assistance to local school districts with concentrations of children residing on Indian lands, military bases, low-rent housing properties, or other Federal properties and, to a lesser extent, concentrations of children who have parents in the uniformed services or employed on eligible Federal properties who do not live on Federal property. The majority of Impact Aid funds is general aid to the school district recipients and may be used in whatever manner the districts choose, as long as it is consistent with State and local requirements. The Department does not have the statutory authority to direct Impact Aid general aid money, including for the use suggested by the commenter.

Changes: None.

Content of the Individualized Plan for Employment (§ 361.46)

Comments: A few commenters requested additional guidance regarding the use of a ''projected post-school employment outcome'' in an individualized plan for employment for a student or youth with a disability and asked whether the use of the broad category ''Standard Occupational Codes'' would meet this description.

Discussion: In response to the request for additional guidance, the individualized plan for employment with a projected post-school employment outcome should outline the services and activities that will guide the individual's career exploration. The projected post-school employment outcome facilitates the individual's exploration and identification of a vocational goal based upon his or her informed choice. It may be a specific goal, such as a Web designer, or a broader goal, such as medical practitioner. The projected goal may be amended during the career development process, and eventually it must be revised to a specific vocational goal once this process is completed.

Changes: None.

Scope of Vocational Rehabilitation Services for Individuals With Disabilities (§ 361.48)

Pre-Employment Transition Services (§ 361.48(a))

Scope of Pre-Employment Transition Services and Use of Reserve

Comments: Some commenters expressed support for the proposed regulation. However, most commenters recommended revisions or sought clarification about the scope and provision of pre-employment transition services. One commenter suggested that we revise proposed § 361.48(a) to include only direct services to individuals, while another commenter requested clarification as to whether pre-employment transition coordination activities in proposed § 361.48(a)(4) could be paid for with funds reserved for providing pre-employment transition services.

Discussion: Section 113(a) of the Act, as amended by WIOA, states that the funds reserved under section 110(d) and any funds made available from State, local, or private (other) sources shall be used to provide, or arrange for the provision of, pre-employment transition services. The coordination activities required by section 113(d) of the Act, as amended by WIOA, and final § 361.48(a)(4) are essential for arranging and providing the ''required'' and ''authorized'' activities set forth in section 113(b) and (c) of the Act and final § 361.48(a)(2) and (3). Therefore, there is no statutory authority to limit the scope of final 361.48(a) to only the direct services required by section 113(b) of the Act. See a more detailed discussion of the definition of ''Pre-Employment Transition Services,'' and the services included in that definition, earlier in this section.

We agree with the commenter that proposed § 361.48(a) should be revised to clarify that pre-employment transition coordination services provided under § 361.48(a)(4) may be paid with funds reserved for providing pre-employment transition services, because coordination activities are essential for arranging and providing those services, as required by section 113(a) of the Act and § 361.48(a).

Changes: We have revised final § 361.48(a) to clarify that the funds reserved for the provision of pre-employment transition services may be used to pay for pre-employment transition coordination activities.

Potentially Eligible

Comments: Through the NPRM, we sought public comments and alternate suggestions related to our interpretation of ''potentially eligible'' to mean all students with disabilities, regardless of whether they have applied for and been determined eligible for the VR program. Of the comments received, most agreed with this interpretation. However, some commenters provided alternate interpretations.

Of those commenters, a few suggested that the term should be interpreted as meaning students with disabilities who have at least applied for vocational rehabilitation services, with one commenter suggesting this would both allow for providing individualized services and ensure parental consent for students with disabilities to work with a vocational rehabilitation counselor. Other commenters stated that serving applicants for vocational rehabilitation services would allow the counselor not only to gather sufficient information to meet the specific needs of the student with a disability but also to track and report the provision of services and expenditure of funds. One commenter recommended revising proposed § 361.48(a)(1) to limit the ''potentially eligible'' population to those individuals who have both applied for and been determined eligible for vocational rehabilitation services.

Furthermore, some commenters provided alternate interpretations for limiting or expanding the population to students or youth based upon age-range, or enrollment in secondary, postsecondary, or dual enrollment educational programs. One commenter recommended that ''potentially eligible'' be defined to ensure consistent implementation across States. A few commenters expressed concerns that the regulations significantly limit the resources for students who have applied for and been determined eligible for the full scope of vocational rehabilitation services, as well as individuals with most significant disabilities. A few commenters expressed concerns that spending funds required to be reserved for providing pre-employment transition services on students who are potentially eligible for vocational rehabilitation services may force DSUs to implement an order of selection or close priority categories under an existing order of selection. One commenter raised concerns that DSUs may have limited fiscal and human resources required to address the needs of potentially eligible students. One commenter requested clarification as to how students would be identified.

Another commenter suggested that proposed § 361.48(a) does not conform to section 112 of the Act, as amended by WIOA, because the CAP is unable to provide assistance or advocacy services to individuals who are not vocational rehabilitation clients or client-applicants. A few commenters also expressed concerns about students being able to make informed choices, as well as obtaining parental consent for potentially eligible students who are minors and participating in pre-employment transition services, prior to submitting an application for vocational rehabilitation services.

Discussion: We appreciate the comments supporting the proposed regulation, as well as comments expressing concerns and suggestions for changes. After much consideration of all available options, we have decided to maintain our interpretation of ''potentially eligible'' for purposes of pre-employment transition services. In so doing, all students with disabilities, regardless of whether they have applied for or been determined eligible for the VR program, may receive pre-employment transition services. The Secretary believes this is the broadest legally supportable interpretation and the one that is most consistent with the apparent congressional intent.

Most notably, section 113 of the Act is the only statutory section that references ''potentially eligible'' students with disabilities. All other sections of title I of the Act refer to ''applicants'' or individuals determined eligible for services. Given the stark

contrast in the use of ''potentially eligible'' in section 113 of the Act, the Secretary believes it imperative that meaning is given to that phrase by not limiting it to individuals who have applied for or been determined eligible for the VR program.

The broader interpretation means all students with disabilities will be able to obtain much-needed pre-employment transition services and begin the early phase of job exploration without the potential delays, and the administrative burden on DSU personnel and resources, caused by application processing, eligibility determinations, assignment to an order of selection category, and development of an individualized plan for employment. However, there is nothing that precludes a DSU from taking an application as soon as a student expresses an interest in pre-employment transition services or other vocational rehabilitation services and making a timely determination of eligibility.

We want to emphasize that the phrase ''potentially eligible'' applies only in the context of pre-employment transition services. This means that students with disabilities who need individualized services beyond the scope of pre-employment transition services (*e.g.,* transition and other vocational rehabilitation services) must first apply for, and be determined eligible for, the VR program, be assigned to the appropriate category if the State is on an order of selection, and develop an approved individualized plan for employment. We recommend that DSUs request students with disabilities who are ''potentially eligible'' for vocational rehabilitation services and receiving pre-employment transition services submit an application for services as soon as possible in the event further vocational rehabilitation services are needed.

This recommendation is especially pertinent for those States that have implemented an order of selection. A student's position on the wait list for services other than pre-employment transition services, in the event the student is placed in a closed category, is based on the date of application, not the date of referral or the receipt of pre-employment transition services. To provide students with disabilities an opportunity to apply for services as early as possible in the transition process and ensure a smooth transition into the VR program, it is imperative that DSUs collaborate with educational programs to identify students who may be eligible or potentially eligible for vocational rehabilitation services and engage parents and representatives. The earlier a student is placed on a wait list, the sooner his or her turn will open in the State's order in the event a State is on an order of selection.

We want to make clear that neither the Act nor these final regulations exempt these students with disabilities from the State's order of selection, if one has been implemented, or VR program requirements once they apply and are determined eligible for services. While under the order of selection regulations at § 361.36, the student could continue to receive pre-employment transition services if such services have begun, a student could not begin to receive pre-employment transition services if such services had not begun prior to applying and being determined eligible. To permit such would create an exemption from the order of selection requirements and the statute does not provide such authority. However, we recognize the benefit early services can have for students. Therefore, we want to make clear that these students could receive transition services offered to groups of students and youth with disabilities under § 361.49. While not identical to pre-employment transition services, many similar services could be provided under the services to groups authority.

A detailed discussion regarding comments related to the continuation of pre-employment transition services under an order of selection is provided in the *Continuation of Pre-Employment Transition Services* section later in this *Analysis of Comments and Changes.*

In response to the concern related to the availability of services from the CAP, section 112(a) of the Act, as amended by WIOA, specifically authorizes CAP grantees to assist individuals receiving services under sections 113 and 511 of the Act. Therefore, these individuals are clients and client-applicants for purposes of the CAP.

Finally, as discussed previously under ''Coordination with Education Officials,'' parental consent to participate in pre-employment transition services is governed by State law, as well as policies of the educational programs and the DSU. Furthermore, informed choice, as outlined in final § 361.52, applies throughout the vocational rehabilitation process; therefore, students with disabilities receiving pre-employment transition services under final § 361.48(a) must be given the opportunity to exercise their informed choice.

Changes: None.

Discretion To Provide Pre-Employment Transition Services to All Students With Disabilities

Comments: One commenter requested that we clarify whether States have the option, under proposed § 361.48(a), to provide pre-employment transition services to all students with disabilities, including those who have not applied for vocational rehabilitation services. Another commenter requested that we revise the ''may'' in proposed § 361.48(a)(1) to ''shall'' in order to ensure that pre-employment transition services are provided to all students with disabilities, regardless of whether they have applied for services.

Discussion: We agree that clarification is necessary. Section 110(d)(1) of the Act, as amended by WIOA, requires States to reserve at least 15 percent of their Federal vocational rehabilitation allotment for providing pre-employment transition services. Moreover, section 113 of the Act, as amended by WIOA, requires States to use the reserved funds to provide, or arrange for the provision of, pre-employment transition services to all students with disabilities in need of such services who are eligible or potentially eligible for services. Therefore, the requirement to reserve and use funds for providing pre-employment transition services is mandatory, not discretionary. A State must provide pre-employment transition services to all students with disabilities needing those services and may not limit or expand those services. We used the term ''may'' in proposed § 361.48(a)(1) to recognize that, for the first time, the Act permitted the delivery of pre-employment transition services to students with disabilities who have not applied for or been determined eligible for the VR program. However, we acknowledge the confusion caused by the use of the term. We therefore clarify that States must provide pre-employment transition services not only to students with disabilities who have applied for vocational rehabilitation services but also to those students with disabilities who have not applied for services.

Changes: We have revised final § 361.48(a)(1) to clarify that DSUs must make pre-employment transition services available statewide to all students with disabilities, not just those who have applied for or been determined eligible for vocational rehabilitation services.

Provision of Required Activities Based on Need

Comments: Some commenters requested that we clarify whether a

student must be provided all five required services or only those required services based upon a student's need. Of these comments, many recommended the latter, as students with disabilities may not need all five activities set forth in section 113(b) of the Act, as amended by WIOA.

A few commenters requested clarification about, or criteria for, making a determination of need. One commenter also recommended that the regulations promote client choice about participating in pre-employment transition services to ensure that students are not coerced into participating in these services. Finally, one commenter expressed concern that DSUs may require students with disabilities to participate in pre-employment transition services as readiness or preparatory activities before applying for vocational rehabilitation services, thereby delaying the transition from school to post-school activities.

Discussion: Section 113(a) and (b) of the Act, as amended by WIOA, when read in concert with each other, as well as final § 361.48(a)(2), require the DSU to make certain ''required'' pre-employment transition services available to all students with disabilities who need them. However, none of these provisions mandate that all five ''required'' activities be provided to each student with a disability if all the activities are not necessary. Pre-employment transition services, as is true for any vocational rehabilitation service, must be provided solely on the basis of the individual's need for that service.

Under final § 361.50, DSUs are responsible for developing policies, in consultation with the SRC, for determining the need for pre-employment transition services. These policies must include clear and consistent criteria based on the needs of students identified in the comprehensive statewide needs assessment. The policies will guide the DSU, in consultation with school personnel, family members, and students with a disability, in determining which pre-employment transition services each student needs, consistent with his or her interests and informed choice.

Finally, pre-employment transition services are designed to be an early start at job exploration for students with disabilities and should enrich, not delay, transition planning, application to the VR program, and the continuum of vocational rehabilitation services necessary for movement from school to post-school activities. Neither section 113 of the Act, as amended by WIOA, nor final § 361.48(a) requires students with disabilities receiving pre-employment transition services to apply for, or be determined eligible for, the VR program or to receive other vocational rehabilitation services. The Act and these final regulations maximize opportunities for achieving competitive integrated employment by imposing no requirement that would delay or hinder the student's ability to access these crucial early services or that would permit a DSU to coerce an individual to participate in any of them. However, should the student with a disability need additional vocational rehabilitation services, he or she must apply for and be determined eligible for those services. See the more detailed discussion of comments related to ''Potentially Eligible'' earlier in this section.

Changes: None.

Continuation of Pre-Employment Transition Services

Comments: Some commenters expressed concerns about the continuation of pre-employment transition services and availability of reserved funds for those services once a student with a disability applies for and is determined eligible for the VR program. Of those commenters, many expressed the need for a continuation of services for those students who received pre-employment transition services prior to applying for the VR program and aging out of or exiting an educational program. Some commenters requested that States be permitted to use funds reserved under section 110(d) of the Act to continue to provide services for any student with a disability who has received pre-employment transition services and who cannot receive vocational rehabilitation services due to a State's implementation of an order of selection. One commenter suggested that those students found eligible for the VR program while, or after, receiving pre-employment transition services should be given an automatic service priority under a State's order of selection, while another commenter requested clarification as to why students with disabilities have not received a service priority under proposed § 361.36. Some commenters expressed concerns that serving students who have not applied for services, regardless of the severity of their disability, will result in a delay of services to other students who have applied and been determined eligible for vocational rehabilitation services, including individuals with the most significant disabilities. A few commenters expressed the concern that the emphasis on serving students would limit the funds available to serve adult consumers.

Discussion: We understand the commenters' concerns about the continuation of services for students with disabilities after receiving pre-employment transition services, as some students may apply but not be determined eligible for the VR program. Others may no longer satisfy the definition of a ''student with a disability'' because they are no longer within the required age range or are no longer participating in an education program. These issues arise only when a student with a disability who is receiving, or has received, pre-employment transition services also needs other vocational rehabilitation services. All students with disabilities who apply for vocational rehabilitation services, even if they are still receiving pre-employment transition services, will be subject to all relevant requirements for eligibility, order of selection, and development of the individualized plan for employment (including its development prior to leaving school under final § 361.22(a)(2)). Neither the Act nor these final regulations exempt students with disabilities from any of these requirements, which apply to all VR program applicants.

Section 101(a)(5) of the Act, as amended by WIOA, does not exempt students with disabilities receiving pre-employment transition services prior to the determination of eligibility from a State's order of selection; therefore, we do not have the statutory authority to include such an exemption in final § 361.36. Nonetheless, consistent with the policy underlying prior § 361.36(e)(3), which requires a DSU to continue providing vocational rehabilitation services to individuals who had begun receiving these services under an individualized plan for employment prior to the implementation of an order of selection, it is imperative that students with disabilities not experience a disruption in the pre-employment transition services that they are receiving and that are so critical to their transition to postsecondary education and employment. Thus, we have revised final § 361.36(e)(3) by requiring DSUs implementing an order of selection to continue the provision of pre-employment transition services to students with disabilities who were receiving these services prior to the determination of eligibility and assignment to a priority category. DSUs may use the funds reserved under section 110(d) and final § 361.65(a)(3)

for the continuation of these services. This change does not permit the DSU to provide any other transition or vocational rehabilitation services for students with disabilities assigned to closed priority categories.

As for ceasing to satisfy the definition of ''student with a disability,'' pre-employment transition services under section 113 of the Act and final § 361.48(a) are available only to students with disabilities. Therefore, if an individual no longer meets the definition of a ''student with a disability,'' despite the fact that he or she has received or is receiving pre-employment transition services, he or she is no longer able to receive these services under section 113 of the Act and final § 361.48(a). However, if the individual has been determined eligible for vocational rehabilitation services and has been assigned to an open category in the State's order of selection, if the State has implemented one, he or she may continue to receive the same types of pre-employment transition services under section 103(a) of the Act and final § 361.48(b), in accordance with an approved individualized plan for employment. The DSU would pay for these services with VR funds, other than those reserved for the provision of pre-employment transition services under section 113 of the Act because the reserved funds must be used solely for the provision of pre-employment transition services to individuals who satisfy the definition of a ''student with a disability.''

Changes: We have revised final § 361.36(e)(3) by requiring a designated State unit implementing an order of selection to continue to provide pre-employment transition services to students with disabilities who have begun receiving these services prior to the determination of eligibility and assignment to a closed priority category.

Required Activities

Comments: Several commenters provided alternate suggestions for the required activities specified in proposed § 361.48(a)(2). One commenter recommended that States be permitted to develop their own menu of pre-employment transition services, while many other commenters recommended a variety of revisions to proposed § 361.48(a)(2). Specifically, one commenter requested that job exploration counseling include actual work experience in competitive integrated employment settings. A few commenters requested that work-based learning experiences include paid or unpaid work experiences in school or community settings, as well as experiential learning opportunities. Some commenters who recommended paid work experiences suggested that placement be aligned with the definition of competitive integrated employment. Many commenters on work-based learning experiences requested that the Department delete ''to the maximum extent possible'' from the regulation, prohibit sheltered work in segregated settings, and require that the experiences only be provided in integrated settings. However, a few commenters requested clarification as to whether entities with certificates issued by the Department of Labor under section 14(c) of the FLSA could provide pre-employment transition services.

A few commenters suggested that we revise proposed 361.48(a)(2) to conform to similar language in the Higher Education Opportunity Act of 2008 by replacing ''or'' with ''and'' in the language that governs counseling on opportunities for enrollment in comprehensive transition or postsecondary educational programs at institutions of higher education. In addition, these commenters recommended language specific to counseling on opportunities for enrollment of students with intellectual disabilities in postsecondary educational programs at institutions of higher education. A few other commenters proposed revising the focus of workplace readiness training to replace the development of social skills and independent living with a focus on soft skills, financial literacy, mobility skills, and other skills necessary for employment. Another few commenters recommended that the regulations require instruction in self-advocacy to be provided by a recognized self-advocacy group of the individual's choosing and that peer mentoring occur during work experiences. A few commenters recommended that the required activities include outreach to and engagement of parents of students with disabilities in conjunction with parent centers and parent training information centers.

Discussion: We appreciate the commenters' suggestions, concerns, and requests for clarification. However, section 113(b) of the Act, as amended by WIOA, specifically itemizes the pre-employment transition services that must be provided—the ''required'' activities. Furthermore, section 113(c) of the Act itemizes the pre-employment transition services that may be provided—the ''authorized'' activities—in the event funds remain after providing the required activities. Given the Act's specificity about the pre-employment transition services that must be provided, as well as those that may be provided, there is no statutory basis to require additional activities or impose additional requirements, such as requiring that instruction in self-advocacy be provided by a recognized self-advocacy group of the individual's choosing or that peer mentoring occur during work experiences.

We disagree with the commenters' request to revise § 361.48(a)(2)(iii) to conform to similar language in the Higher Education Opportunity Act of 2008 and specifically includes programs and services for students with intellectual disabilities. Final § 361.48(a)(2)(iii) mirrors section 113(b)(3) of the Act, as amended by WIOA, and we do not believe the replacement of ''or'' with ''and'' helps to better describe the manner in which DSUs are to provide this service. In addition, Section 113(b)(3)of the Act and final § 361.48(a)(2)(iii) encompass counseling on the broad range of comprehensive transition or postsecondary education programs available to all students with disabilities, including students with intellectual disabilities. Therefore, we do not believe it is necessary to revise final § 361.48(a)(2)(iii).

Moreover, there is no statutory basis for States to develop their own menu of pre-employment transition services. Rather, under section 113(b) of the Act and final § 361.48(a)(2), each State must make all ''required'' pre-employment transition services available to students with disabilities who need such services.

Similarly, contrary to recommendations made by commenters, we do not have the authority to remove, by regulation, statutory requirements. Accordingly, § 361.48(a)(2)(ii) must be consistent with section 113(b)(2) of the Act, as amended by WIOA, which requires that work-based learning experiences occur in integrated settings to the maximum extent possible. While we agree with commenters that work-based learning experiences in integrated settings are optimal, the Act's use of the phrase ''to the maximum extent possible'' leaves open the possibility for work-based learning experiences in non-integrated settings. Consequently, we cannot require that all work-based learning experiences occur in integrated settings. However, DSUs should exhaust all opportunities for work-based learning experiences in competitive integrated employment settings before considering provision of these services in non-integrated work settings, as appropriate for the needs, and consistent with the informed choice, of the individual student with a disability,

and his or her family or guardian, as applicable.

Having said this, the Department agrees that actual work experiences in integrated settings, rather than simulated or mock experiences in sheltered environments, provide students with disabilities with the most beneficial opportunities for job exploration, work-based learning, work readiness, and peer mentoring. The Secretary believes that DSUs, to the maximum extent possible, should provide work-based learning experiences, which may be paid or unpaid, through actual work experiences in integrated community environments to prepare students with disabilities for community-based competitive integrated employment, instead of using classrooms and educational facilities as settings for work-based learning experiences that segregate, replicate the tasks performed in adult sheltered employment, and often result in referrals to segregated employment settings following exit from school.

If these are paid work-based learning experiences, students with disabilities must be paid competitive wages to the extent competitive wages are paid to students without disabilities. Training stipends are also permissible for students with disabilities to the same extent that they are provided to students without disabilities participating in these experiences. Similarly, nothing in the Act prohibits States from coordinating the provision of pre-employment transition services with entities that hold certificates issued by the Department of Labor under section 14(c) of the FLSA. However, the Department strongly encourages training in competitive integrated settings to prepare students for competitive integrated employment. In addition, there is no statutory basis here to require that self-advocacy instruction be provided by a specific entity.

We agree that engaging students' parents or representatives is essential to their participation in pre-employment transition services and vital to their success. Since DSUs will be delivering pre-employment transition services to students with disabilities at a much younger age, parents must be involved, as required by State law and the policies of educational agencies and the DSU. We encourage DSUs to provide information regarding the application process and availability of services to all students with disabilities, and their parents or representatives, early in the transition process. As such, parent centers funded through the Rehabilitation Act and the IDEA may serve as mechanisms for outreach to, and engagement of, parents.

Changes: None.

Continuum of Services

Comments: A few commenters requested clarification about ''required activities'' under pre-employment transition services in § 361.48(a)(2). One commenter stated that pre-employment transition services appear to be a continuum of services and requested clarification as to whether a student might initially receive a general level of pre-employment transition services and then later receive a customized level of pre-employment transition services. Another commenter requested clarification as to how individualized pre-employment transition services would be funded for a student or youth with a disability who is not a vocational rehabilitation client. One commenter suggested that general pre-employment transition services be reserved for students who are potentially eligible for the VR program, while reserving individualized level pre-employment transition services for those students with disabilities determined eligible for vocational rehabilitation services. The same commenter suggested that pre-employment transition services be directed toward determining whether further vocational rehabilitation services are required for the individual to be successful in securing and maintaining employment. A few commenters requested clarification of the difference between employment assistance under pre-employment transition services and transition services, including the role of the vocational rehabilitation counselor.

Discussion: In response to requests for clarification, DSUs may provide, or arrange for the provision of, ''required'' pre-employment transition services to students with disabilities in classroom, employment, or community (group) settings. These services may be general in nature for students with disabilities who have not applied and been determined eligible for vocational rehabilitation services. As a student progresses through the vocational rehabilitation process by applying and being determined eligible for services, the DSU will have the information necessary to conduct assessments and provide more individualized and customized services to address the student's particular needs. But in some instances DSUs may nonetheless have sufficient information to provide individualized pre-employment transition services to students with disabilities who have not applied and been determined eligible for vocational rehabilitation services. Thus, we decline to require in final § 361.48(a)(2) that providing more individualized pre-employment transition services be limited to students with disabilities who have applied and been determined eligible for vocational rehabilitation services.

Finally, section 113 requires that DSUs use the funds reserved under section 110(d) of the Act, as amended by WIOA, to provide pre-employment transition services not only to students with disabilities who are eligible for vocational rehabilitation services but also to students with disabilities who are potentially eligible for vocational rehabilitation services, which includes all students with disabilities regardless of whether they have submitted an application for these services.

Examples of the five ''required'' activities and how they may be provided in either a group or individualized setting include, but are not limited to, the following:

One, general job exploration counseling may be provided in a classroom or community setting and include information regarding in-demand industry sectors and occupations, as well as non-traditional employment, labor market composition, administration of vocational interest inventories, and identification of career pathways of interest to the students. Job exploration counseling provided on an individual basis might be provided in school or the community and include discussion of the student's vocational interest inventory results, in-demand occupations, career pathways, and local labor market information that applies to those particular interests.

Two, work-based learning experiences in a group setting may include coordinating a school-based program of job training and informational interviews to research employers, work-site tours to learn about necessary job skills, job shadowing, or mentoring opportunities in the community. Work-based learning experiences on an individual basis could include work experiences to explore the student's area of interest through paid and unpaid internships, apprenticeships (not including pre-apprenticeships and Registered Apprenticeships), short-term employment, fellowships, or on-the-job trainings located in the community. These services are those that would be most beneficial to an individual in the early stages of employment exploration during the transition process from school to post-school activities, including employment. Should a student need more individualized services (*e.g.,* job coaching, orientation and mobility training, travel expenses,

uniforms or assistive technology), he or she would need to apply and be determined eligible for vocational rehabilitation services and develop and have an approved individualized plan for employment.

Three, counseling on opportunities for enrollment in comprehensive transition or postsecondary educational programs at institutions of higher education in a group setting may include information on course offerings, career options, the types of academic and occupational training needed to succeed in the workplace, and postsecondary opportunities associated with career fields or pathways. This information may also be provided on an individual basis and may include advising students and parents or representatives on academic curricula, college application and admissions processes, completing the Free Application for Federal Student Aid (FAFSA), and resources that may be used to support individual student success in education and training, which could include disability support services.

Four, workplace readiness training may include programming to develop social skills and independent living, such as communication and interpersonal skills, financial literacy, orientation and mobility skills, job-seeking skills, understanding employer expectations for punctuality and performance, as well as other ''soft'' skills necessary for employment. These services may include instruction, as well as opportunities to acquire and apply knowledge. These services may be provided in a generalized manner in a classroom setting or be tailored to an individual's needs in a training program provided in an educational or community setting.

Five, instruction in self-advocacy in a group setting may include generalized classroom lessons in which students learn about their rights, responsibilities, and how to request accommodations or services and supports needed during the transition from secondary to postsecondary education and employment. During these lessons, students may share their thoughts, concerns, and needs, in order to prepare them for peer mentoring opportunities with individuals working in their area(s) of interest. Further individual opportunities may be arranged for students to conduct informational interviews or mentor with educational staff such as principals, nurses, teachers, or office staff; or they may mentor with individuals employed by or volunteering for employers, boards, associations, or organizations in integrated community settings. Students may also participate in youth leadership activities offered in educational or community settings.

The wide variety of pre-employment transition services described in these examples is designed to be an early start at job exploration for students with disabilities. DSUs are not to use these activities as assessment services for the purpose of determining whether additional vocational rehabilitation services are needed, or if the individual will be successful in employment. In response to commenters' requests for clarification of the difference between employment assistance under pre-employment transition services and transition services, see more detailed descriptions of the distinctions between the two types of services in the *Transition Services (section 361.5(c)(55))* and *Scope of Pre-Employment Transition Services and Use of the Reserve* sections earlier in this section B.

Changes: None.

Other Vocational Rehabilitation Services as Pre-Employment Transition Services

Comments: A few commenters recommended that we interpret the scope of required activities under section 113 of the Act, as amended by WIOA, to include both support services and individualized vocational rehabilitation services necessary to participate in pre-employment transition services. The commenters requested that the funds reserved for providing pre-employment transition services also be permitted to pay for services provided under section 103(a) of the Act, as amended by WIOA, and proposed § 361.48(b), including, but not limited to job coaching services, maintenance, transportation to and from work-based learning experiences, travel, uniforms, tools, sign language interpreters, reasonable accommodations, assistive technology, independent living, and orientation and mobility services for students who are blind. One commenter requested that pre-employment transition services be expanded to include all transition services for students determined eligible for vocational rehabilitation services. Another commenter requested that we include all services listed on an individualized plan for employment within the scope of pre-employment transition services, including postsecondary education and training costs.

Discussion: Section 113 of the Act, as amended by WIOA, and final § 361.48(a) set out a list of pre-employment transition services that must be made available to all students with disabilities who are eligible or potentially eligible for vocational rehabilitation services (''required'' activities), as well as those that may be provided (''authorized'' activities). Under section 113(a) of the Act, the funds required to be reserved for pre-employment transition services must be used solely for providing pre-employment transition services. Therefore, the Department has no statutory authority to expand or limit the pre-employment transition services listed in section 113 of the Act, as amended by WIOA. Furthermore, if a student with a disability needs any additional individualized vocational rehabilitation services, including those necessary for participating in pre-employment transition services, such as those provided under final § 361.48(b), the student must apply and be determined eligible for vocational rehabilitation services and develop an individualized plan for employment that includes the additional necessary services. These additional services must be charged as a vocational rehabilitation expenditure separate from the funds reserved for providing pre-employment transition services.

Changes: None.

Pre-Employment Transition Coordination Activities

Comments: A few commenters expressed concerns that proposed § 361.48(a)(4) did not permit alternate means of participation in the meetings required by section 113 of the Act, as amended by WIOA, and permitted in section 103(b)(6) of the Act. Many commenters recommended we include language to allow for alternate means of participation in meetings as vocational rehabilitation counselors may not be available to participate in all individualized education program or person-centered planning meetings across a State.

A few commenters stated that pre-employment transition coordination activities must occur between DSUs and parent training and information centers funded by the Office of Special Education Programs and RSA to ensure that parental outreach concerning the benefits of pre-employment transition services is coordinated among these federally funded centers.

Discussion: We agree that alternate means for participating in pre-employment transition coordination activities (*e.g.,* video conferences and teleconferences) could minimize travel time and costs and maximize both the number of individualized education program and person-centered planning

meetings in which a vocational rehabilitation counselor could participate, as well as the number of direct services a vocational rehabilitation counselor could provide to students with disabilities. Although § 361.48(a)(4), both as proposed and final, does not explicitly permit DSUs to use alternate means to participate in individualized education program or person-centered planning meetings, it does not prohibit them. DSUs may therefore use these alternate means.

Decisions on how to conduct meetings is a matter of agency administration. Conducting these meetings via alternate means would be consistent with the explicit authority to conduct alternate format meetings under section 101(a)(11)(D)(i) of the Act and final § 361.22(b)(1). Additionally, section 614(f) of the IDEA and its implementing regulations in 34 CFR 300.328 allow the parent of a child with a disability and a public agency to agree to use alternative means of meeting participation requirements, such as video conferences and conference calls, when conducting individualized education program team meetings and placement meetings under the IDEA, as well as carrying out administrative matters under section 615 of the IDEA (such as scheduling, exchange of witness lists, and status conferences). Since the Act and the IDEA provide for alternate means for conducting meetings very similar to those required by section 113 of the Act and final § 361.48(a), DSUs may use alternate means to conduct these meetings as well. We do not believe a regulatory change is necessary to accomplish this.

We agree that coordinating with federally funded parent centers is a mechanism that would help parents of students with disabilities understand the benefits of pre-employment transition services. Section 113(d) of the Act, as amended by WIOA, however, does not require this. The statute is clear that the funds reserved for providing pre-employment transition services must only be spent on the activities specified in section 113 of the Act, as amended by WIOA, and final § 361.48(a). Given the Act's specificity of the activities that constitute pre-employment transition services, there is no statutory authority for final § 361.48(a)(4) to include any additional required coordination responsibilities.

Changes: None.

Documentation and Reporting

Comments: Some commenters requested clarification as to how States should document the provision and costs of pre-employment transition services for students with disabilities who have not yet applied and been determined eligible for vocational rehabilitation services and for whom limited personal information is available. Additionally, one commenter requested additional guidance about the tracking of funds expended on groups of students who have not applied or been determined eligible for the VR program.

A few commenters requested flexibility in the reporting of pre-employment transition services because it is burdensome for DSUs to develop and implement tracking systems for a large potentially eligible population. These commenters also stated this tracking could be difficult because DSUs may not have access to the personal identifying information, including Social Security numbers, typically used to document and report vocational rehabilitation services provided. A few commenters suggested that the Department establish reporting requirements for pre-employment transition services that are similar to the child count reporting requirements under the IDEA. One commenter requested clarification regarding reporting requirements for the funds reserved for providing pre-employment transition services and whether expenditures are only to be reported during the time period for which an individual meets the definition of a student with a disability or during the entire fiscal year in which the individual was served.

Discussion: Because sections 110(d) and 113 of the Act require a State to reserve and use at least 15 percent of its total vocational rehabilitation allotment for providing, or arranging for the provision of, pre-employment transition services to students with disabilities, it will be critical that the DSU implement administrative methods and procedures that ensure proper data collection and financial accountability of these reserved funds, as required by final § 361.12 and 2 CFR 200.302 of the Uniform Guidance. In addition, section 101(a)(10)(C) of the Act, as amended by WIOA, expands the VR program-specific data that DSUs must report, including data elements related to students with disabilities who are receiving pre-employment transition services. These reporting requirements are included in final § 361.40(a) to ensure that the Secretary has the information needed to assess the performance of the VR program, especially with regard to providing pre-employment transition services to students with disabilities.

Although the Department recognizes the burden placed on DSUs to develop procedures for tracking pre-employment transition services and related expenditures for students who have not yet applied or been determined eligible for vocational rehabilitation services, DSUs are required by section 101(a)(10)(C) of the Act to do so in order to properly account for, and report, the provision of pre-employment transition services and the reserved funds spent on those services. Moreover, the State's accounting procedures must be such that the DSU will be able to complete accurately all required forms, including financial reports, that show the reservation and use of these funds for this purpose, as required by final § 361.12 and 2 CFR 200.302.

The Department does not have the authority to grant exceptions from, or waivers of, these reporting requirements. Regardless of whether students with disabilities are receiving pre-employment transition services without having applied or been determined eligible for vocational rehabilitation services, *i.e.* by virtue of the fact they are ''potentially eligible'' for the program, if Federal funds are being spent, expenditures must be tracked and monitored in accordance with final § 361.12 and the Uniform Guidance in 2 CFR 200.302 (Financial Management) and 200.328 (Monitoring), as well as the Federal cost principles in 2 CFR 200.403 (Allowability), 200.404 (Reasonable) and 200.405 (Allocable). Furthermore, the Department issued Policy Directive (PD) 15–05 on February 5, 2015, which provided technical assistance on reporting the total Federal expenditures for providing pre-employment transition services. We appreciate the commenters' proposed alternate suggestions for reporting. However, the Department uses the SF–425 to collect financial data from DSUs so that it can monitor the financial status of the VR program and assess grantee compliance with Federal fiscal requirements under the VR program, including requirements for the reservation and use of funds for providing pre-employment transition services.

As they have been required to do for many years, DSUs must submit completed SF–425 reports semi-annually. The end dates for each reporting period in a fiscal year are March 31 and September 30. Semi-annual reports must be submitted no later than 45 days after the end of the reporting period. Final reports must be submitted no later than 90 days after the period of performance. ''Period of performance'' means the time during which the non-Federal entity may incur new obligations to carry out the work authorized under the Federal award.

These final regulations do not affect any of these reporting requirements. To ensure the proper accounting and reporting of services provided and funds expended, especially with regard to pre-employment transition services, DSUs must track and report data on students with disabilities until they no longer meet the definition of a student with a disability. At that point, DSUs must track and report services provided to, and funds expended on, these individuals as they would any other individual receiving vocational rehabilitation services.

Changes: None.

Performance Measures

Comments: A few commenters expressed concern that pre-employment transition services and expenditure of funds are not included in the proposed common performance accountability measures. These commenters recommended that we revise the common performance accountability measures to include and evaluate these services. One commenter requested clarification regarding how group service expenditures would inform statistical adjustment model calculations, as it was unclear how the ratio of reportable individuals to participants may reflect on the performance of a DSU.

Discussion: The VR program is no longer subject to its own set of performance standards and indicators established by the Department, as it had been prior to the enactment of WIOA. Because the common performance accountability indicators are mandated by section 116(b) of title I of WIOA and apply to all six core programs of the workforce development system, including the VR program, the Departments of Education and Labor do not have the authority to establish additional performance accountability indicators beyond those identified in the statute. However, section 106(a)(2) of the Act and section 116(b)(1)(A)(ii) of title I of WIOA permit States to develop additional accountability measures to evaluate the performance of the core partners in the workforce development system. We intend to monitor State implementation of pre-employment transition services and expenditure of funds during our annual review and periodic on-site monitoring of State VR agencies to identify areas of concern and the need for technical assistance. The Departments of Education and Labor address the remaining comments in the joint final regulations implementing the performance accountability system under title I of WIOA, and published elsewhere in this issue of the **Federal Register**.

Changes: None.

Services for Individuals Who Have Applied for or Been Determined Eligible for Vocational Rehabilitation Services (§ 361.48(b))

Comments: A few commenters supported proposed § 361.48(b)(18) and agreed that youth may be provided transition services that are similar to pre-employment transition services under an individualized plan for employment. Another commenter requested that proposed § 361.48(b)(18) require DSUs to provide students and youth with disabilities an application for vocational rehabilitation services at the beginning of the transition process. A few commenters expressed concerns regarding the expansion of services for students and youth with disabilities at the expense of other individuals with disabilities served by DSUs. One commenter expressed such concerns in terms of potential harm to the Randolph-Sheppard program.

Some commenters requested that we identify the services, including transition services, that would be allowable if provided by community rehabilitation programs that hold section 14(c) certificates under the FLSA. A few commenters recommended that the regulations prohibit DSUs from contracting with section 14(c) certificate holders to provide transition services. One commenter requested that we clarify if entities holding section 14(c) certificates may provide transition services and proposed alternatives for providing these services if they may not.

One commenter requested that incentives be added for providing transition services or supported employment services.

Discussion: We appreciate the support for, and consideration given by commenters to, proposed § 361.48(b)(18). We agree that students and youth with disabilities should receive adequate information and applications for vocational rehabilitation services at the beginning of the transition from secondary programs to post-secondary activities. A DSU may provide the information and application under final §§ 361.41 and 361.52, which require the DSU to establish and implement standards for promptly processing referrals, informing individuals of application requirements, and facilitating individuals' informed choice as they transition. Therefore, we do not believe it is necessary to add further requirements to final § 361.48(b)(18).

We acknowledge that the heightened emphasis on providing services to students and youth with disabilities may cause some DSUs concern about their ability to serve all individuals. We believe that the process for implementing an order of selection established within section 101(a)(5) of the Act, as amended by WIOA, is adequate to address these concerns in the event that vocational rehabilitation services cannot be provided to all eligible individuals.

We acknowledge the commenters' support and concerns about section 14(c) certificate holders providing transition and other vocational rehabilitation services. While the Act does not prohibit community rehabilitation programs that are section 14(c) certificate holders from providing transition or other vocational rehabilitation services or training in sheltered settings, section 511 of the Act prohibits local and State educational agencies from entering into a contract or other arrangement with section 14(c) entities for the purpose of operating a program for youth with disabilities under which work is compensated at a subminimum wage. The Department strongly encourages training in competitive integrated settings to prepare students for competitive integrated employment, as stated in the discussion of ''required'' activities in final § 361.48(a) and discussed in more detail in *Required Activities* earlier in this section B. There is no statutory basis for requiring or permitting incentive payments for providing vocational rehabilitation services, including transition and supported employment services.

Changes: None.

Scope of Vocational Rehabilitation Services for Groups of Individuals With Disabilities (§ 361.49)

Comments: A few commenters sought clarification of, or suggested revisions to, proposed § 361.49(a)(7) governing the provision of transition services for groups of youth and students with disabilities. Of these, one commenter questioned whether transition services may be provided under this authority to students and youth with disabilities who have not applied or been determined eligible for vocational rehabilitation services. Similarly, another commenter suggested that DSUs be required to provide an application to all students and youth with disabilities receiving transition services under proposed § 361.49(a)(7). One commenter communicated concerns that allowing transition services under this authority will lead to students and youth with

disabilities receiving services in segregated environments. Another commenter suggested that pre-employment transition services under proposed § 361.49 be limited to group orientations. Yet another commenter supported providing transition services for groups of students and youth with disabilities and then providing transition services to this population under final § 361.48(b) if more individualized services are necessary.

One other commenter suggested that we add the term ''competitive integrated employment'' to proposed § 361.49(a)(7) to emphasize that transition services for groups of students and youth with disabilities are to support the achievement of competitive integrated employment. The same commenter recommended that we add outreach to and engagement of parents to § 361.49(a)(7) as an allowable service to groups. Finally, one commenter requested clarification of how informed choice of both the individual and the individual's representative would be provided and documented if transition services are provided to groups of youth and students with disabilities.

Discussion: We appreciate all of these comments. A student with a disability or a youth with a disability is not required to have applied or been determined eligible for vocational rehabilitation services to receive general transition services provided to groups under section 103(b)(7) of the Act, as amended by WIOA, and final § 361.49(a)(7). Therefore, a DSU may, but is not required to, provide or collect applications from students and youth with disabilities receiving transition services under final § 361.49(a)(7). Students with disabilities may receive these services in a variety of settings, including classroom, employment, and community-based settings. However, the Department strongly encourages DSUs to provide these services in integrated settings to the maximum extent possible to best prepare students and youth with disabilities for competitive integrated employment. Furthermore, students and youth with disabilities may continue to receive generalized transition services under this authority while also receiving individualized vocational rehabilitation services under an individualized plan for employment pursuant to section 103(a) of the Act and final § 361.48(b).

Pre-employment transition services may be provided in a group setting to students with disabilities who have not applied or been determined eligible for vocational rehabilitation services, as discussed in the examples in final § 361.48(a). Contrary to the assumption in some comments, pre-employment transition services cannot be provided to students with disabilities as a service for groups under section 103(b)(7) of the Act, as amended by WIOA, or final § 361.49(a)(7). Pre-employment transition services must only be provided under section 113 of the Act and final § 361.48(a).

The intent of these generalized transition services when provided under final § 361.49(a)(7) is to benefit groups of students and youth with disabilities. We understand the concern that these services are limited to only students and youth with disabilities. Transition services provided under final § 361.48(b) under an individualized plan for employment are more individualized in nature, and the settings in which they are delivered are typically more diverse.

We agree that the purpose of transition services to groups should ultimately be achieving competitive integrated employment for students and youth with disabilities consistent with the purpose of the VR program set forth in final § 361.1. Nonetheless, the transition services provided under final § 361.49(a)(7) are not limited to those individuals who have been determined eligible for the VR program and who are pursuing an employment outcome in competitive integrated employment or supported employment. Therefore, we cannot require that the transition services authorized in final section 361.49(a)(7) be provided only for the purpose of assisting students and youth with disabilities to obtain competitive integrated employment.

We also agree that the families of students and youth with disabilities should be involved in all transition services, even though section 103(b) of the Act, as amended by WIOA, does not specifically include outreach to and engagement of parents within its requirements. Neither the Act nor these final regulations prohibit a DSU from providing outreach to, and engaging parents in, the provision of transition services under final § 361.49(a)(7).

Finally, informed choice, as outlined in final § 361.52, applies throughout the vocational rehabilitation process; therefore, students and youth with disabilities receiving transition services under final § 361.49(a)(7) must be given the opportunity to exercise their informed choice.

Changes: None.

C. Fiscal Administration of the VR Program

Section C includes the *Analysis of Comment and Changes* to the regulations in subpart C of part 361 that pertain to the fiscal administration of the VR program and covers requirements for matching funds, maintenance of effort, program income, and the allotment and payment of funds. The analysis is presented by topical headings relevant to sections of the regulations in the order they appear in part 361 as listed.

Topical Headings

Matching Requirements (§ 361.60)
- Third-Party In-Kind Contributions
- Additional Sources of Match
- Differences Between Prior and Proposed Regulations

Maintenance of Effort Requirements (§ 361.62)

Program Income (§ 361.63)
- Waiver
- Legal Basis
- Pre-Employment Transition Services
- Amount of Program Income Earned
- Addition Alternative

Allotment and Payment of Federal Funds for Vocational Rehabilitation Services (§ 361.65)
- Exemption from the Reservation of Funds Requirement for Pre-Employment Transition Services
- Use of Reserved Funds for Other Vocational Rehabilitation Services
- Amount of Funds to Be Reserved
- Application of the Reservation of Funds to the State and to the State Allotment
- Effect of Reallotment and Carryover on the Reservation of Funds
- Administrative Costs
- Tracking of the Reserved Funds
- Use of Reserved Funds for Authorized Activities

Matching Requirements (§ 361.60)

Third-Party In-Kind Contributions

Comments: Several commenters requested that the Department either include third-party in-kind contributions as an allowable source of match under the VR program or clarify whether these contributions are an allowable source of match. One commenter questioned whether the Department has the authority to exclude third-party in-kind contributions as a source of match under the VR program, given that these contributions are a permissible source of match in the Uniform Guidance contained in 2 CFR part 200.

Discussion: We have addressed the comments regarding the allowability and use of third-party in-kind contributions as match under the VR program in the discussion of third-party cooperative arrangements in final § 361.28 earlier in section A of this *Analysis of Comments and Changes* section. We received similar comments about that regulation, and issues of third-party in-kind contributions most

often arise in the third-party cooperative arrangement context.

For more than two decades, the Department has excluded third-party in-kind contributions from the allowable sources of match for the VR program. Neither the NPRM nor these final regulations reflect any substantive changes to this prohibition.

In addition, we do not agree that § 361.60 is inconsistent with 2 CFR part 200 with regard to third-party in-kind contributions. Specifically, 2 CFR 200.306 states that for all Federal awards, any shared costs or matching funds and all contributions, including cash and third-party in-kind contributions, must be accepted as part of the non-Federal entity's cost sharing or matching when specific criteria are met. However, 2 CFR 200.102(c) states that ''the Federal awarding agency may apply more restrictive requirements to a class of Federal awards or non-Federal entities when approved by OMB, or when required by Federal statutes or regulations. . . .''

Section 361.60(b)(2) has prohibited, and continues to prohibit, DSUs from considering third-party in-kind contributions as a permissible source of match under the VR program. The Department is within its authority to continue to exclude third-party in-kind contributions as an allowable source of match under the VR program, as it has done for more than two decades, and thus the VR program regulations are consistent with 2 CFR part 200. Nevertheless, given the comments questioning the relationship between the prohibition against using third-party in-kind contributions for match purposes under the VR program in § 361.60(b)(2) and the permissibility of these contributions under 2 CFR 200.306(b), we have revised final § 361.4(d) to reduce confusion. These revisions are purely technical and do not affect the long-standing prohibition against using third-party in-kind contributions as a source of match under the VR program.

Changes: We have revised final § 361.4(d) to exempt 2 CFR 200.306(b), as it relates to third-party in-kind contributions, from the VR program, thereby ensuring consistency with final § 361.60(b)(2) and the long-standing prohibition against third-party in-kind contributions as a source of match under the VR program.

Additional Sources of Match

Comments: Another commenter requested that the Department include additional sources of non-Federal share as examples of potential matching sources.

Discussion: We appreciate the commenter's request for additional examples of permissible sources of match under the VR program. The 1988 regulations (53 FR 16978 (May 12, 1988)), which remained in effect until 1997, contained a short list of examples of permissible match sources, none of which included third-party in-kind contributions.

Similarly, the 1997 final regulations (62 FR 6307 (Feb. 11, 1997)) simplified the requirements by removing the list of permissible sources of expenditures to meet the non-Federal share. Instead, it referred to former 34 CFR 80.24 for a list of allowable match sources, to the extent that provision was not inconsistent with § 361.60(b), which prohibited third-party in-kind contributions from being used for match purposes under the VR program. We emphasized in the preamble to the 1995 NPRM (60 FR 64475 (Dec. 15, 1995)) that the proposed regulation would not prohibit the use of any funding sources that had been allowable for match purposes under the VR program, but third-party in-kind contributions were not among them. Although we do not believe the list of permissible match sources should be re-inserted into final § 361.60, we provide here the still-effective permissible match sources that had been contained in prior § 361.76, which existed until the 1997 regulations took effect and subsequently was replaced by prior § 361.60.

The old regulations in 34 CFR 361.76, which formed the basis for both prior and final § 361.60, indicated that the allowable sources of match were:

1. Direct State appropriation to the VR agency,

2. Transfers or allotments from other public agencies,

3. Expenditures incurred by other public agencies pursuant to a cooperative agreement in accordance with 34 CFR 361.13 (which formed the basis for both prior and final § 361.28),

4. Funds set aside from Business Enterprise Programs, established under the Randolph-Sheppard Act, for which the DSU provides supervision and management services, and

5. Private contributions deposited into the VR agency's account.

Section 361.60 has remained substantively unchanged from 1997 through these final regulations.

Changes: None.

Differences Between Prior and Proposed Regulation

Comments: One commenter requested we clarify the differences between the prior and proposed § 361.60(b)(3).

Discussion: We made only technical changes to proposed § 361.60(b)(3)(iii) in the NPRM. Specifically, we replaced the phrase ''grant, subgrant, or contract'' with the word ''subaward'' in order to be consistent with the use of this term in the Uniform Guidance, as set forth in 2 CFR part 200. We made no further changes to final § 361.60(b)(3)(iii).

Changes: None.

Maintenance of Effort Requirements (§ 361.62)

Comments: A few commenters supported proposed § 361.62. One commenter stated that section 241(b) of WIOA did not support the proposed VR regulations and recommended allowing flexibility for States to choose the fiscal year in which maintenance of effort penalties would be paid.

Discussion: We appreciate the comments supporting proposed § 361.62. Section 241(b) of WIOA, referenced by the commenter, does not apply to the VR program but rather to programs authorized under the Adult Education and Family Literacy Act in title II of WIOA. Instead, section 420 of WIOA amended section 111(a)(2)(B) of the Act, which governs the maintenance of effort requirements for the VR program. Final § 361.62(a) is consistent with section 111(a)(2)(B) of the Act, as amended by WIOA.

Changes: None.

Program Income (§ 361.63)

Waiver

Comments: Several commenters requested that we waive the requirement for States to expend program income prior to drawing down Federal grant funds. One commenter stated that the role of the Department in placing restrictions on the use of program income should be limited since VR program grantees are not required to generate program income.

Discussion: We appreciate the comments submitted regarding proposed § 361.63. The Act gives the Secretary the authority to grant waivers of only two VR program requirements, specifically those related to statewideness (section 101(a)(4)) and maintenance of effort (section 111(a)(2)(C)). The Act, as amended by WIOA, does not provide a general waiver authority or a specific authority to waive program income requirements. Therefore, we may not include in final § 361.63 a waiver of the requirement to expend program funds prior to drawing down Federal VR program funds.

Changes: None.

Legal Basis

Comments: Another commenter noted that following the 1992 amendments to the Rehabilitation Act, the Department interpreted the Act as allowing program income, including transferred program income, to be obligated and/or expended on or before September 30th of the carryover year of the grant period. According to the commenter, WIOA did not amend the Act to require the expenditure of program income under the VR program as soon as it was received. The commenter also recommended that we review both the 1992 amendments to the Rehabilitation Act and WIOA to determine whether there is a sufficient legal basis to exempt DSUs from the requirement to expend program income before requesting additional Federal grant funds and that we include this exemption in the VR program final regulations. One commenter noted that the NPRM incorrectly cited 2 CFR 200.305(b)(5) as the legal authority requiring that program income be disbursed prior to drawing down Federal funds.

Discussion: While we agree that DSUs are not required to earn program income under the VR program, we disagree that the Secretary's authority over program income is, therefore, limited. As a recipient of Federal VR program funds, DSUs must comply with all applicable Federal requirements, including those in the Act, the VR program regulations in final part 361, Education Department General Administrative Regulations (EDGAR), and government-wide regulations in 2 CFR part 200 (see final § 361.4). Requirements governing program income affecting the VR program are found in final § 361.63 and 2 CFR 200.305, both of which are under the Secretary's purview. Moreover, final § 361.4(b) and (d) make final part 361 and 2 CFR part 200, respectively, applicable to the VR program. For this reason, DSUs must comply with all Federal requirements governing program income to the extent that they earn such income under the VR program.

We agree that section 19(a)(2) of the Act allows program income to remain available for obligation and expenditure in the year following the year in which the program income was earned. However, we also believe that final § 361.63(c)(3) is consistent with both section 19(a)(2) of the Act and 2 CFR 200.305. In the event that a DSU receives program income at the end of a fiscal year and is unable to disburse it prior to the end of that year, the DSU may carry over that program income for use in the following Federal fiscal year; however, that DSU must spend that program income prior to drawing down Federal funds.

The Department reminded DSUs of this requirement—program income must be disbursed prior to drawing down Federal funds—in PD–11–03 (dated October 26, 2010), as well as in PD–12–06 and PD–15–05 (dated February 13, 2012 and February 5, 2015, respectively). The Department also reminded DSUs of this requirement in a PowerPoint presentation at the FY 2011 Fiscal Conference, held in Washington, DC, in August 2011.

Prior to developing proposed § 361.63, the Department reviewed the legislative and regulatory history about program income. Our review found that, while the Act has not addressed this issue specifically, EDGAR has long done so. The Federal government has had a long-standing requirement under the common rule implementing former OMB Circular A–102, codified by the Department of Education in former 34 CFR 80.21(f)(2), that States must expend program income prior to drawing down Federal grant funds. The Uniform Guidance, codified in 2 CFR part 200, was adopted by the Department in 2 CFR 3474 on December 19, 2014, in 79 FR 76091. The Uniform Guidance in 2 CFR 200.305(a) specifies the payment procedures that States must use to draw down Federal funds; however, these procedures appear, on the surface, to apply only to funds included in a Treasury-State Agreement (TSA), and not all Federal program funds made available to States are subject to TSAs.

For this reason, the Uniform Guidance in 2 CFR 200.305(a) has created an ambiguity about how States should draw Federal funds under non-TSA programs. Moreover, TSAs do not cover program income earned by State grantees. Thus, in addition to the ambiguity regarding non-TSA programs, 2 CFR 200.305(a) does not address whether States must expend available program income funds before requesting additional Federal cash, as had been the long-standing government-wide requirement in OMB Circular A–102 and codified for Department grantees in former 34 CFR 80.21(f)(2). This silence creates concern because, for all other non-Federal entities, § 200.305(b)(5) clearly requires those entities to expend available program income funds before requesting payments of Federal funds.

While the § 200.305(a) silence creates an ambiguity, we do not believe that this ambiguity should be construed to no longer require States to expend program income funds before requesting additional Federal cash because no such policy change was discussed in the preambles to either the final guidance in 2 CFR part 200, which was published on December 26, 2013 (78 FR 78589), or in the Interim Final Guidance published on December 19, 2014 (79 FR 75867). This issue is critical to the Department because DSUs earn more than $100 million in program income annually under the VR program—an amount that far exceeds amounts earned under any other program administered by the Department. For this reason, the Secretary believes it is essential that we resolve this ambiguity in these regulations. Therefore, we proposed in the NPRM to incorporate the requirement to expend program income before requesting payment of funds by referencing 2 CFR 200.305(a).

Upon further review of that proposed change, and in consideration of one comment, we have determined that the proposed amendment, as presented in the NPRM, would not achieve the needed objective because it referenced the wrong citation from 2 CFR part 200. We resolved the ambiguity by revising final § 361.63(c)(3) to explicitly require States to expend available program income funds before requesting additional cash payments, maintaining the long-standing requirement that applied to VR program grantees under 34 CFR 80.21(f)(2). The Secretary believes this change is essential to protect the Federal interest by using program income to increase the funds devoted to the VR program and keep to a minimum the interest costs to the Federal government of making grant funds available to the States. There is no legal basis to exempt DSUs from this long-standing government-wide requirement.

Changes: We have revised final § 361.63(c)(3) to explicitly require States to disburse available program income funds before requesting additional cash payments.

Pre-Employment Transition Services

Comments: Some commenters expressed concerns that the requirement to spend program income first creates an undue barrier to the ability of DSUs to reserve 15 percent of their VR program allotments for providing pre-employment transition services. According to these commenters, grantees cannot predict the arrival of program income to the same extent that they can anticipate the arrival of allotted funds. As a result, DSUs may have to expend program income for pre-employment transition services instead of their State allotments, thereby failing to expend the 15 percent reserve required for the provision of pre-employment transition services.

Discussion: We recognize the challenge for States to meet both the requirements to disburse program income prior to drawing down Federal funds as well as to reserve VR program funds for providing pre-employment transition services. While final § 361.63(c)(1)(ii) requires States to expend available program income funds before requesting additional cash payments, it does not preclude States from executing allowable accounting adjustments between program income disbursed on pre-employment transition services and other Federal funds expended on non-pre-employment transition services for the same time period. These accounting adjustments must be in accordance with Generally Accepted Accounting Principles (GAAP) and the State's accounting procedures and must be reflected in the State accounting system that is required by final § 361.12 and 2 CFR 200.302.

Changes: None.

Amount of Program Income Earned

Comments: One commenter noted that it is unable to determine the actual amount of program income earned until after the end of the Federal award because the program income must be ''netted out.''

Discussion: Program income, as defined in 2 CFR 200.80 and used in final § 361.63, means the ''gross'' program income earned by the grantee. Furthermore, as stated earlier, program income is considered earned when received. In other words, if a DSU receives $100,000 in program income in November, it should report this amount as received—or earned—on the SF–425 covering the first quarter of the Federal fiscal year. Therefore, DSUs should not wait until the end of a fiscal year to determine the amount of program income received, and all reports should reflect gross—not net—amounts.

Changes: None.

Addition Alternative

Comments: None.

Discussion: Upon further Department review, we determined it necessary to clarify in § 361.63(c)(3) that the deduction method is no longer available to DSUs for expending program income. In examining the grant formula set forth in the statute more closely, we have concluded that the use of the deduction method would, in effect, result in a reduction of a VR grant allotment. Absent specific statutory authority, these reductions would be inconsistent with the statute and general appropriations law principles. In reviewing the grantees' financial reports, we have found that very few, if any, DSUs elect to use the deduction method. Instead, most, if not all, grantees elect to use the addition method, which is still permissible and, in fact, will be the only permissible use of program income under the VR program final regulations. We do not believe this change will negatively impact many, if any, grantees. Therefore, we have revised final § 361.63(c)(3) to require VR program grantees to use program income only to supplement the VR grant through the addition alternative.

Changes: We have revised final § 361.63(c)(3) to require DSUs to use the addition alternative when expending program income.

Allotment and Payment of Federal Funds for Vocational Rehabilitation Services (§ 361.65)

Exemption From the Reservation of Funds Requirement for Pre-Employment Transition Services

Comments: Some commenters agreed with the changes to proposed § 361.65. Many commenters recommended that we exempt DSUs from the requirement to reserve at least 15 percent of their State allotments for providing pre-employment transition services in cases where the DSUs lack resources to do so.

Discussion: We appreciate the commenters who supported proposed § 361.65 and those who expressed concern or sought clarification. Section 110(d)(1) of the Act, as amended by WIOA, requires States—not the Department—to reserve at least 15 percent of their VR program allotment for providing pre-employment transition services. Given this explicit requirement, the Secretary lacks statutory authority to exempt States from the reservation requirement or to modify this requirement because to do so would be inconsistent with the statute. While we understand the concerns expressed by commenters regarding an inability to expend the full amount of reserved funds on pre-employment transition services, we encourage DSUs to work closely with the school systems and other entities to identify students with disabilities who might benefit from pre-employment transition services. Through these outreach activities, DSUs may be able to identify students with disabilities who could benefit from pre-employment transition services and who were not previously known to the agencies.

Changes: None.

Use of Reserved Funds for Other Vocational Rehabilitation Services

Comments: A few commenters requested that agencies who may not meet the reservation requirement, due to a lack of individuals who qualify to receive pre-employment transition services, be allowed to use the remaining reserved funds to provide vocational rehabilitation services listed under proposed § 361.48(b) to other eligible individuals.

Discussion: Funds reserved, pursuant to section 110(d)(1) of the Act, for providing pre-employment transition services must be used solely for the activities set forth in section 113 of the Act, as amended by WIOA, and final § 361.48(a). If a student with a disability requires other vocational rehabilitation services, the DSU must pay for those services with the remainder of the VR program allotment.

Changes: None.

Amount of Funds To Be Reserved

Comments: A few commenters recommended creating a benchmark for pre-employment transition services provided, rather than tying those services to actual Federal funds spent. Two commenters recommended basing the reservation of funds on the number of individuals in the State who would be eligible to receive pre-employment transition services. These commenters added that the remaining funds would be used for the provision of all other allowable vocational rehabilitation services.

Two commenters stated that the requirement to reserve at least 15 percent is too high. One commenter recommended that we consider DSUs to have satisfied the requirement if they demonstrate progress toward the minimum 15 percent requirement in the first 2 years of implementation, based upon the amount of funds spent in the previous fiscal year for pre-employment transition services. One commenter recommended that we allow States to negotiate the reservation requirement based upon populations of students with disabilities in the States. One commenter expressed concern that requiring at least 15 percent of the VR award to be used for pre-employment transition services will reduce the Federal VR funds available to support the Randolph-Sheppard program.

Discussion: Section 110(d)(1) of the Act, as amended by WIOA, requires States to reserve ''at least'' 15 percent of their VR program allotment for providing pre-employment transition services. Final § 361.65(c)(3) mirrors the statutory requirement. Although several

commenters referred to the 15 percent reservation requirement as a ''limit,'' the Act as amended by WIOA, and final § 361.65(c)(3) do not restrict States from spending more than 15 percent of their allotments for the provision of these services.

We appreciate the many recommendations for alternative ways for DSUs to meet the pre-employment transition services reservation requirement under proposed § 361.65(a)(3)(i). We also appreciate the concerns that the reservation of funds for the sole purpose of providing pre-employment transition services will reduce the amount of funds available for other VR program purposes, including services for individuals who are blind or visually impaired who wish to start a vending facility under the Randolph-Sheppard program. Nevertheless, the Act requires States to reserve at least 15 percent of their VR program allotment for providing pre-employment transition services. The Act provides no exceptions to this requirement and, therefore, we do not have the authority to make the changes suggested by the commenters because to do so would be inconsistent with the statute.

Changes: None.

Application of the Reservation of Funds to the State and to the State Allotment

Comments: Many commenters requested that RSA apply the pre-employment transition reservation requirement to the State as a whole and not to the DSU in States with separate agencies serving individuals who are blind and individuals with all other disabilities. One commenter requested clarification regarding how pre-employment transition services are to be funded. A few commenters requested that we clarify whether the reservation requirement applies to the State funds, or just the Federal funds.

Discussion: Section 113(a) of the Act requires pre-employment transition services to be paid for with funds reserved from the VR program allotment pursuant to section 110(d)(1) of the Act, as amended by WIOA. We agree with commenters that the reservation of funds for providing pre-employment transition services is a State requirement, not a DSU-specific requirement. Section 110(d) of the Act, as amended by WIOA, and final § 361.65(a)(3)(i) require the State—not the DSU—to reserve the funds, thereby making this a matter that must be resolved at the State level when there are two agencies in the State. For this reason, the Department encourages DSUs to coordinate to ensure State compliance. While the Department recommends that each DSU, when a State has two DSUs, reserve at least 15 percent of its allotment to facilitate the tracking of State compliance with the reservation requirement, the Act does not require that this be done. If one DSU (when a State has two DSUs) uses more of its funds than the other, the State would be in compliance so long as the State's total of funds reserved for providing pre-employment transition services is at least 15 percent of the State's total allotment, including any additional funds received during reallotment by one or both DSUs.

The State allotment, from which funds must be reserved, refers to the Federal funds awarded pursuant to section 110(a) of the Act, not State funds appropriated to the DSUs by State legislatures.

Changes: None.

Effect of Reallotment and Carryover on the Reservation of Funds

Comments: One commenter requested clarification regarding whether funds received during reallotment would count toward the State's allotment for purposes of the pre-employment transition services reservation requirement. One commenter requested clarification regarding whether the reservation requirement applies to the carryover period.

Discussion: Under section 110(b)(3) of the Act, funds received during reallotment are an increase to the State's allotment. Similarly, funds relinquished during reallotment are a reduction to the State's allotment. Therefore, funds received or relinquished by a State during reallotment affect the amount of funds that must be reserved for providing pre-employment transition services.

Section 19 of the Act, which governs the carryover of grant funds, applies to all VR program funds, including funds reserved for providing pre-employment transition services. Section 19(b) of the Act permits grantees to carry over Federal funds for obligation and expenditure in the subsequent Federal fiscal year only to the extent that the DSU has provided sufficient non-Federal expenditures to match those funds. This means that grantees may carry over Federal funds reserved for providing pre-employment transition services into the subsequent Federal fiscal year only to the extent that they have provided the requisite 21.3 percent non-Federal share by the end of the Federal fiscal year in which the funds were awarded. In addition, because they have been matched in the fiscal year for which they were appropriated, the funds reserved for providing pre-employment transition services that are eligible for carryover into the succeeding Federal fiscal year may only be obligated in that succeeding Federal fiscal year and expended for providing pre-employment transition services.

Changes: None.

Administrative Costs

Comments: Some commenters requested clarification regarding fiscal reporting requirements, including staff time, counted toward the reservation requirement given that DSUs may not expend funds reserved for providing pre-employment transition services on administrative costs. One commenter requested clarification regarding the apparent contradiction of some of the authorized activities listed in proposed § 361.48(a)(3), which might appear to be administrative in nature, and the prohibition in proposed § 361.65(a)(3)(ii) against using reserved funds for administrative costs.

Discussion: We appreciate the comments requesting clarification regarding whether DSUs may pay for staff-related costs from funds reserved for the provision of pre-employment transition services. Section 110(d)(2) of the Act, as amended by WIOA, prohibits DSUs from using the reserved funds for administrative costs. Section 7(1) of the Act and final § 361.5(c)(2) define ''administrative costs'' as including, among other things, ''administrative salaries, including clerical and other support staff salaries, in support of these administrative functions.'' It has been the long-standing Department policy that staff-related costs, including salaries, fringe benefits, and travel, incurred while providing vocational rehabilitation services, constitute service costs, not administrative costs. As such, costs associated with staff time spent providing pre-employment transition services may be paid with the funds reserved for providing those services.

By contrast, supervisory costs, rent, utilities, indirect costs, and other similar associated costs are administrative costs—not service costs—and, as such, cannot be paid with the reserved funds. In considering the various pre-employment transition services specified in section 113 of the Act and final § 361.48(a) in this way, we do not believe there are actual conflicts between final § 361.48(a) and § 361.65.

However, we have revised final § 361.65(a)(3)(ii)(B) to add a cross-reference to the definition of ''administrative costs'' in final § 361.5(c)(2), to clarify that these costs are still allowable under the VR program and may be paid for with VR program

funds not reserved for the provision of pre-employment transition services under final § 361.65(a)(3).

Changes: We have revised final § 361.65(a)(3)(ii)(B) to clarify that the administrative costs referred to in this provision are those that meet the definition of ''administrative costs'' in final § 361.5(c)(2). This change is technical, not substantive.

Tracking of the Reserved Funds

Comments: Some commenters requested that we provide flexibility regarding the tracking of pre-employment transition service expenditures to minimize time-consuming administrative requirements. One commenter requested that the Department issue guidance to States regarding tracking expenditures, for example, creating a separate accounting code to track the reservation requirement. One commenter requested that the Department allow agencies with counselors who work with schools or support the provision of pre-employment transition services to count all of the counselor's time toward the reservation requirement, thereby easing the burden on DSUs associated with tracking these costs.

Discussion: When tracking expenditures incurred for the provision of pre-employment transition services, DSUs may need to develop a cost objective (*i.e.,* a separate accounting code) that is different from the one used for other VR program cost allocation purposes, thereby enabling DSUs to track pre-employment transition services expenditures properly with the reserved funds. Similarly, DSUs should account for personnel time to ensure the proper allocation of staff time between the provision of pre-employment transition services and other vocational rehabilitation services, just as the DSU does when its personnel work on multiple programs. DSUs must track pre-employment transition services in a manner that ensures the reserved funds are used only for the provision of services set forth in section 113 of the Act and final § 361.48(a). Although this could increase administrative burden slightly, it is only in this manner that a DSU can be certain it is expending reserved funds appropriately. The Department will issue guidance separately about tracking expenditures from the reserved funds and other fiscal matters relevant to the reservation of funds for providing pre-employment transition services.

Changes: None.

Use of Reserved Funds for Authorized Activities

Comments: Some commenters requested that we clarify when the authorized activities (as opposed to the required activities) in proposed § 361.48(a)(3) are allowable pre-employment transition expenditures in meeting the reservation requirement. Specifically, the commenters wanted to know the threshold for determining when funds are remaining after providing the required activities under § 361.48(a)(3).

Discussion: As stated in final § 361.48(a)(3), a DSU may provide ''authorized'' pre-employment transition services only to the extent that reserved funds remain after providing the ''required'' activities. As part of the Comprehensive Statewide Needs Assessment, States should determine the number of potential individuals eligible for pre-employment transition services. This data will enable the States to target the amount of the reserved funds necessary for ensuring the ''required'' pre-employment transition services are provided to students with disabilities. To the extent the States demonstrate that they have made the required pre-employment transition services available to the population identified in the Comprehensive Statewide Needs Assessment, the States have met the requirement to provide the ''required'' pre-employment transition services prior to the ''authorized'' activities. Any reserved funds remaining beyond the targeted amount necessary for the ''required'' activities may then be used for ''authorized'' activities in final § 361.48(a)(3).

Changes: We have revised proposed § 361.65(a)(3)(ii)(A) to clarify that funds reserved for providing pre-employment transition services may be used to pay for the costs of providing all of the services ''specified'' in final § 361.48(a). Proposed § 361.65(a)(3)(ii)(A) referred to services ''authorized'' in final § 361.48(a). We believe this technical change is necessary to avoid any confusion about the general use of the term ''authorized'' and the distinction between ''required'' and ''authorized'' services in the context of pre-employment transition services.

Part 363—The State Supported Employment Services Program

The discussion of comments on part 363 is presented by topic in the order that the relevant sections appear in this part.

Competitive Integrated Employment and Short-Term Basis (§ 363.1)

Comments: Overall, commenters strongly supported the focus and emphasis in part 363 on individuals with the most significant disabilities, including youth with the most significant disabilities, achieving competitive integrated employment. One commenter suggested, however, that supported employment should not be assumed automatically as the first option for people with significant, or the most significant, disabilities. Another commenter urged that ''States'' (presumably designated State agencies) track all individuals working in segregated settings and at subminimum wage to help identify the need for supported employment.

Other commenters pointed out discrepancies in the definition of ''supported employment'' between proposed 34 CFR 361.5(c)(53) and proposed §§ 363.1(b) and (c) and urged that these be made consistent.

One commenter suggested adding other approaches or evidence-based models such as Individual Placement and Support (IPS) to supported employment and customized employment. This commenter also asked whether funds could be used to train new or existing providers in various models of supported employment.

Many commenters responded to the short-term basis provisions in proposed § 363.1(c) and proposed 34 CFR 361.5(c)(53) under which individuals with the most significant disabilities working in an integrated setting are working toward competitive integrated employment and can reasonably anticipate achieving competitive integrated employment within six months of entering supported employment. A few commenters endorsed the six-month period, indicating that the six-month period would not allow individuals to linger for long periods in subminimum wage employment.

A few commenters considered six months to be too long and even recommended eliminating the short-term basis period altogether, indicating that under no circumstance should any individual with a disability be employed at a subminimum wage. However, most commenters considered six months to be arbitrary, too restrictive, or not sufficient, especially for individuals with the most significant disabilities, such as individuals who are blind who, as indicated by multiple commenters, might require additional training or specialized services in order

to achieve competitive integrated employment. Others recommended extensions of up to 12, 18, or 24 months, or even an unspecified time based upon an individual's needs, in order to achieve competitive integrated employment consistent with the individual's unique strengths, priorities, concerns, abilities, capabilities, interests, and informed choice.

Some commenters suggested adding unpaid internships, apprenticeships, and transitional employment as examples of ''working on a short term basis.'' These commenters also recommended emphasizing that employment in sheltered workshops and enclaves and group employment settings does not constitute supported employment. A few commenters stated that individuals working on a short-term basis should be only in integrated settings as they work toward competitive integrated employment. Other commenters, however, referenced competitive, but non-integrated, settings when commenting on the short-term basis provision. One commenter asked for clarification to ensure that AbilityOne contracts with non-profit agencies that employ individuals with disabilities remain a viable option for individuals with the most significant disabilities to achieve employment outcomes in supported employment.

Discussion: We appreciate the many supportive comments regarding the goal of competitive integrated employment for all individuals with significant disabilities, including youth with significant disabilities, and particularly for those with the most significant disabilities.

We also agree with the commenter who suggested that supported employment should not be considered automatically as the first choice for individuals with significant disabilities or the most significant disabilities. The State Supported Employment Services program (Supported Employment program) and supported employment services exist to support individuals with the most significant disabilities who need intensive services and supports to achieve an employment outcome. Supported employment should be considered when determining an individual's employment goal, consistent with his or her unique strengths, priorities, concerns, abilities, capabilities, interests, and informed choice.

The Act, as amended by WIOA, specifically mentions customized employment and supported employment. We do not believe that including examples of additional approaches or models of supported employment, such as Individual Placement and Supports, is necessary. However, we support developing and implementing evidence-based models of supported employment, so long as they are consistent with the Act, as amended by WIOA, and the implementing regulations. Furthermore, administrative funds under this part, subject to the 2.5 percent administrative cost limitation, and funds under 34 CFR part 361, as appropriate, may be used to support training of providers and others on various models of supported employment.

Although the tracking of all individuals working in segregated settings and at subminimum wage would be useful to designated State units (DSUs) in identifying and assessing the need for supported employment, we do not have the authority under the Act to require this unless the individuals have been served through the VR program (see 34 CFR 361.55, which requires the DSU to conduct semi-annual or annual reviews, as applicable, of individuals in extended employment and other employment under special wage certificate provisions of the Fair Labor Standards Act), or the individuals have become known to the DSU through the activities required in section 511 of the Act.

We agree with commenters who noted discrepancies in the definition of ''supported employment'' in proposed 34 CFR 361.5(c)(53) and proposed § 363.1(b) and (c), and we have made the definitions consistent in these final regulations.

We also appreciate the many comments about ''short-term basis.'' As proposed, § 363.1(c) is consistent with the requirement in the Act, as amended by WIOA, that supported employment be in competitive integrated employment or in an integrated work setting in which the individual is working on a short-term basis toward competitive integrated employment. Therefore, despite the payment of competitive wages, employment in a non-integrated work setting does not meet the requirement under the Act, as amended by WIOA, for an employment outcome in supported employment.

The Secretary acknowledges the diverse views, concerns, and recommendations of the commenters about the variables that should be considered in determining the short-term basis period but believes six months is consistent with the intent of the Act. The Secretary agrees with the commenters, however, that, in limited circumstances, an extended period of time may be appropriate based upon the needs of the individual and upon demonstrated progress toward competitive earnings documented in his or her service record. Therefore, an individual with a most significant disability, including a youth with a most significant disability, may, in limited circumstances, have up to 12 months from achieving a supported employment outcome, as appropriate, to address fully his or her individualized needs to secure competitive earnings in supported employment.

In response to the concerns about the availability of sufficient time to help individuals achieve an employment outcome, particularly in relation to the short-term basis, we want to clarify when the six-month short-term basis period, and the additional six months that may be available in limited circumstances, begins. This period begins only after an individual with a most significant disability, including a youth with a most significant disability, has completed up to 24 months of supported employment services (unless a longer period of time is necessary based upon the individual's needs) and the individual is stable in the supported employment placement for a minimum period of 90 days following the transition to extended services. At this point, the individual has achieved a supported employment outcome in accordance with the criteria set forth in final § 363.54. We believe that this provides sufficient time, considering both the time allowed for providing supported employment services and the short-term basis period, if needed, to address fully the needs of an individual in supported employment and to enable that individual to achieve competitive integrated employment. Our data support this belief and show that most supported employment outcomes are achieved in less than 24 months.

In response to multiple commenters' concerns about individuals with the most significant disabilities, such as individuals who are blind who may require additional training or specialized services to achieve competitive integrated employment, we want to clarify that vocational rehabilitation services, as well as supported employment services, are available to them. The vocational rehabilitation services generally occur prior to placement in supported employment as part of the individual's approved individualized plan for employment.

Again, because the definition of ''employment outcome,'' which includes supported employment, requires achieving competitive integrated employment as defined in

final § 361.5(c)(9), all supported employment outcomes must be in integrated settings with the expectation that individuals with the most significant disabilities can and will achieve competitive wages.

We appreciate the recommendations regarding activities that commenters stated should constitute employment during the short-term basis period, including unpaid internships, apprenticeships, and transitional employment; however, we want to emphasize that the short-term basis period begins following the achievement of the supported employment outcome. Unpaid internships, pre-apprenticeships, apprenticeships (including Registered Apprenticeships), and transitional employment are vocational rehabilitation services that lead to employment outcomes, but they do not constitute supported employment outcomes within the meaning of the definition of ''supported employment'' in final 34 CFR 361.5(c)(53) and § 363.1(b) and (c). Therefore, they would not be appropriate placements for employment on a short-term basis.

Finally, we agree with commenters that employment in sheltered workshops and enclaves and group employment settings does not constitute supported employment under this part because an individual achieves a supported employment outcome only if, at a minimum, the supported employment is in an integrated setting. There is a full discussion about why non-integrated employment does not meet the definition of ''competitive integrated employment'' in the responses to comments on the definition of competitive integrated employment in 34 CFR 361.5(c)(9). That discussion also addresses whether entities that are set up specifically for providing employment to individuals with disabilities, such as AbilityOne non-profit agencies, will be able to place individuals with the most significant disabilities in competitive integrated employment and achieve employment outcomes in supported employment.

Changes: We have revised the definition of ''supported employment'' to be consistent in both final § 363.1(b) and (c) and final 34 CFR 361.5(c)(53). In the NPRM, the definition in proposed 34 CFR 361.5(c)(53) did not include the phrase ''and customized'' when referring to competitive integrated employment, and proposed § 363.1(b) did not include the phrase ''including a youth with a most significant disability'' when referring to individuals with the most significant disabilities. Additionally, proposed 34 CFR 361.5(c)(53) included ''transitional employment,'' which has been removed in final 34 CFR 361.5(c)(53). We have corrected other, minor inconsistencies in singular and plural references to individuals with the most significant disabilities.

We have also revised final § 363.1(c) by adding a limited circumstance in which an individual can extend the short term basis up to a 12-month period from the achievement of the supported employment outcome to demonstrate progress toward competitive earnings based on information contained in the service record.

Definitions (§ 363.6(a))

Comments: We received several comments regarding changes in proposed 34 CFR 361.5(c) to definitions relevant to the Supported Employment program. A few commenters requested the removal of the definition of ''transitional employment'' in proposed 34 CFR 361.5(c)(56). These commenters also suggested removing the reference to transitional employment from the definitions of ''supported employment'' in proposed 34 CFR 361.5(c)(53) and ''ongoing support services'' in proposed 34 CFR 361.5(c)(37). They noted that WIOA eliminated ''transitional employment'' and that the definition of ''supported employment'' in WIOA supersedes the definition in the Workforce Investment Act of 1998, which included ''transitional employment'' for individuals with mental illness. The commenters suggested that Congress deliberately removed ''transitional employment'' to ensure people with the most significant disabilities have access to competitive integrated employment.

Some commenters sought clarification about the definition of ''extended services'' in proposed 34 CFR 361.5(c)(19)(v) related to youth with the most significant disabilities.

Discussion: We agree with the commenters' assessment of the congressional intent behind removing the definition of ''transitional employment'' and the reference to transitional employment in both the definition of supported employment and the definition of ongoing support services. The term is no longer supported by the Act.

We discuss the commenters' request for clarification about the definition of ''extended services'' in proposed 34 CFR 361.5(c)(19)(v) for youth with the most significant disabilities in this *Analysis of Comments and Changes* under ''Services to Youth with the Most Significant Disabilities'' in § 363.4(a)(2).

Changes: We have removed the definition of ''transitional employment'' in final 34 CFR 361.5(c), as well as the references to it in the definition of ''supported employment'' in 34 CFR 361.5(c)(53) and ''ongoing support services'' in 34 CFR 361.5(c)(37).

The definition of ''extended services'' in 34 CFR 361.5(c)(19)(v) has been revised as discussed in § 363.4(a)(2) of this *Analysis of Comments and Changes* section under ''Services to Youth with the Most Significant Disabilities.''

Extension of Time for the Provision of Supported Employment Services (34 CFR 361.5(c)(54)(iii))

Comment: A few commenters recommended either basing the time frame for providing supported employment services on an individual's need rather than a prescribed period of time or revising the regulatory language to make it easier to extend the 24-month time frame, as needed. A few other commenters disagreed with extending the time frame beyond 18 months.

Discussion: We appreciate the concerns regarding the time frame for providing supported employment services. WIOA extended the availability of supported employment services from 18 months to 24 months, and this mandate cannot be changed by the Department. The extension provides additional time for individuals with the most significant disabilities to receive the services and supports necessary to achieve an employment outcome in supported employment, either in competitive integrated employment or working on a short-term basis to achieve competitive integrated employment. In accordance with section 7(39)(C) of the Act, under special circumstances, the eligible individual and the rehabilitation counselor or coordinator can jointly agree to extend the time to achieve the employment outcome identified in the individualized plan for employment.

Changes: None.

Services to Youth With the Most Significant Disabilities (§§ 363.4(a)(2) and 363.22)

Extended Services (§ 363.4(a)(2))

Comments: Many commenters suggested changing the statutorily defined time frame of up to four years during which the DSU may expend supported employment program funds for extended services for youth with the most significant disabilities, either by establishing a longer or shorter period for providing extended services or by basing this period upon individual circumstances.

Additionally, commenters requested clarification regarding the point at which the DSU would be required to terminate its provision of extended services for a youth who turns 25 years of age and no longer meets the definition of a ''youth with a disability'' in 34 CFR 361.5(c)(58).

With respect to the use of funds allotted under the Supported Employment program for extended services, a few commenters recommended changing the word ''may'' in proposed § 363.4(a) to ''shall'' or ''will'' to establish that it is mandatory for DSUs to provide extended services to youth with the most significant disabilities.

A few commenters asked for clarification whether providing extended services is mandatory or optional, citing discrepancy between the language in proposed § 363.22, which appears to indicate that the reserve must be used for extended services, and proposed § 363.4(a)(2), which uses the word ''may'' when referring to the use of funds allotted under this part.

Other commenters also proposed making the DSU either the initial payer or the payer of last resort for extended services for youth with the most significant disabilities. Still other commenters raised questions about providing extended services to youth with the most significant disabilities who have not been served by the DSU as an applicant or eligible individual.

Discussion: We appreciate the suggested revisions to proposed § 363.4(a)(2). While many commenters sought to limit the DSU's responsibility for extended services, given limited available resources, we cannot do so. Section 604(b)(2) of the Act mandates that the DSU make available extended services for youth with the most significant disabilities for up to four years. Nothing in the Act authorizes the Department to grant a waiver of this requirement or to change the time period from four years to any other time period for youth with the most significant disabilities.

While the DSU cannot ''opt out'' of any of the activities authorized under § 363.4 by refusing to fund them, DSUs determine the need for and fund services on a case-by-case basis dependent upon each individual's need for services. Therefore, it is not appropriate to change the ''may'' in 34 CFR 363.4(a) to ''shall'' or ''will,'' and doing so would not be consistent with the authorizing language in section 604 of the Act. In light of the responsibility to make available funds for extended services for youth with the most significant disabilities, DSUs should continue to explore the availability of funding from other sources, as is done for other individuals with the most significant disabilities transitioning from supported employment services to extended services.

Regarding the point at which the DSU may no longer provide extended services to a youth with the most significant disabilities, in no case may a DSU provide more than four years of extended services. Also, once a youth with the most significant disabilities reaches 25 years of age, he or she no longer meets the definition of ''youth with a disability'' in 34 CFR 361.5(c)(58), and the DSU must discontinue funding extended services. We appreciate the commenters bringing this last scenario to our attention. Final § 363.4(a)(2) now states that at the age of 25, a youth with a most significant disability is no longer eligible to receive extended services, even if he or she has not yet received services for four years. Nevertheless, under final § 363.53(b)(2)(ii), the DSU must identify another source of extended services to ensure that there will be no interruption of services.

As indicated by a few commenters, section 606(b)(7)(D) of the Act provides that the State shall use supported employment funds only to supplement, and not to supplant, title I VR program funds in providing supported employment services. A few commenters suggested that this provision means that the Supported Employment program or VR program funds should be the payer of last resort (others suggested the payer of first resort) for extended services to youth with the most significant disabilities. The ''supplement, not supplant clause,'' as it is known, addresses only the relationship between the Supported Employment program and the VR program when providing supported employment services, which now includes extended services. It does not affect at all the relationship of the Supported Employment program or VR program to sources of funds that have historically been the providers of extended services to individuals after they have transitioned from supported employment services provided by the DSU. We expect those State and other sources of funding to coordinate with the Supported Employment and VR programs to provide the extended services needed by youth with the most significant disabilities. One of the purposes of the Supported Employment program is to assist States in developing collaborative programs with appropriate public and private nonprofit organizations to provide supported employment services for individuals with the most significant disabilities.

As to whether the DSU can provide extended services to youth with the most significant disabilities who have not been served by the DSU as an applicant or eligible individual, we emphasize that in order to be eligible for supported employment services, including extended services, provided by the DSU, youth with the most significant disabilities must meet the requirements of § 363.3, which include being determined eligible for vocational rehabilitation services. The DSU therefore may not provide extended services to a youth with the most significant disabilities who has not received services from the DSU through an individualized plan for employment simply because he or she meets the definition of a youth with a disability and is in need of extended services.

Changes: We have revised § 363.4(a)(2) to clarify that extended services to youth with the most significant disabilities provided by the DSU may be for a period not to exceed four years, or until such time as the youth reaches age 25 and no longer meets the definition of ''youth with a disability'' under final 34 CFR 361.5(c)(58), whichever occurs first.

Reserve of Supported Employment Funds for Services for Youth With the Most Significant Disabilities (§ 363.22)

Comments: One commenter agreed with the reserve requirement, indicating that the reserve funds should also be targeted to ''school-to-work'' transition services to place youth in competitive integrated employment.

Of the commenters that expressed concern regarding the requirement for reserving 50 percent of supported employment funds for supported employment services to youth with the most significant disabilities, most requested an exemption to ensure that adults with the most significant disabilities, particularly those with adult onset visual impairment or blindness, are able to be served.

Discussion: We appreciate these concerns. However, WIOA mandates the 50 percent reservation of funds for supported employment services, including extended services, for youth with the most significant disabilities. The reserved funds may not be used for ''school-to-work'' transition services because the funds must be used for supported employment services for youth with the most significant disabilities, including extended services, which occur after placing such youth in competitive integrated employment. WIOA does not provide

any exceptions or authorize the Department to grant an exemption or waiver.

Changes: None.

Match Requirements for Funds Reserved for Serving Youth With the Most Significant Disabilities (§ 363.23)

Comments: Some commenters preferred that the 50 percent reserve not have a match requirement, and others indicated the match tracking and monitoring requirements are burdensome. A few commenters sought clarification regarding whether the match required new funding by the State or whether the State could realign current funding. The commenters indicated that it was difficult to comprehend the intent of the match without a defined plan for allocating the funds.

Other commenters requested that in-kind match, such as those used and tracked in the Independent Living Services for Older Individuals Who Are Blind program, be allowed to meet the match requirements under this section. A few commenters requested examples of match and asked whether certified personnel expenditures are permitted as a third-party contribution.

Discussion: We appreciate the concerns expressed by the commenters regarding the required match for funds reserved for providing supported employment services, including extended services, to youth with the most significant disabilities. This is a new requirement that will require all States to provide a non-Federal share; however, States that have historically expended non-Federal funds to supplement the Federal supported employment award now may count those expenditures for the provision of services to youth with the most significant disabilities as match for the reserve requirement.

WIOA mandates the match requirement for supported employment and does not provide any exceptions to it or authorize the Secretary to grant a waiver. The activities and internal processes necessary for States to track and expend the non-Federal share for the reserve should not be burdensome because they may be modeled after those used for the part 361 match requirements.

In addressing what may be used as match, allowable sources of match for the supported employment program follow the same guidelines for those sources allowable under the VR program. Under final 34 CFR 361.28(b)(2), which addresses third-party cooperative arrangements for providing vocational rehabilitation services, which in turn include supported employment services under final 34 CFR 361.48(b)(13), certified personnel expenditures for time cooperating agency staff spent providing direct vocational rehabilitation services pursuant to a third-party cooperative arrangement are allowable. Certified personnel expenditures include staff salary and fringe benefits allocable to the third-party cooperative arrangement. To ensure consistency with part 361, third-party in-kind contributions are not permitted as match.

In reviewing proposed § 363.23 further, we determined that it did not effectively describe the calculation of the 10 percent match, which must be based upon the total expenditures, made up of the Federal funds reserved and the non-Federal share, incurred for providing supported employment services to youth with the most significant disabilities.

Changes: We have revised final § 363.23(a)(2)(i) to demonstrate that the match calculation is based upon the total expenditures, including the Federal funds reserved and the non-Federal share, associated with the 50 percent reserve of Federal funds for providing supported employment services to youth with the most significant disabilities.

Program Income (§ 363.24)

Comments: A commenter disagreed with limiting the use of program income and supported eliminating the requirement to disburse program income prior to requesting additional cash draws from its Federal award.

Discussion: There has been a long-standing government-wide requirement under the common rule implementing former OMB Circular A–102, as codified by the Department in former 34 CFR 80.21(f)(2), that States must expend program income prior to drawing down Federal grant funds. The Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (Uniform Guidance), codified in 2 CFR part 200, were adopted by the Department in 2 CFR 3474 on December 19, 2014 (79 FR 76091). The new 2 CFR 200.305(a) specifies the payment procedures that States must use to draw down Federal funds; however, these procedures appear, on the surface, to apply only to funds included in a Treasury-State Agreement (TSA), but not all Federal program funds made available to States are subject to TSAs. For this reason, there is an ambiguity in 2 CFR 200.305(a) about how States should draw Federal funds under non-TSA programs. Moreover, TSAs do not cover program income earned by State grantees, and 2 CFR 200.305(a) does not address whether States should expend available program income funds before requesting additional Federal cash, as had been the long-standing government-wide requirement in OMB Circular A–102 and codified for Department grantees in 34 CFR 80.21(f)(2).

This silence creates concern because, for all other non-Federal entities, 2 CFR 200.305(b)(5) requires those entities to expend available program income funds before requesting payments of Federal funds. We do not believe, however, that this ambiguity should be construed to lift the requirement that States expend program income funds before requesting additional Federal cash because no such policy change was discussed in the preambles to either the final guidance in 2 CFR part 200, which was published on December 26, 2013 (78 FR 78589), or in the Interim Final Guidance published on December 19, 2014 (79 FR 75867).

Here, 34 CFR 361.63(c)(2) permits the transfer of VR Social Security reimbursement program income to carryout programs under title VI of the Rehabilitation Act (Supported Employment). Historically, some State VR agencies have transferred a portion of VR Social Security reimbursement program income to the Supported Employment programs for use by those programs. For this reason, we believe it is essential that we resolve this ambiguity via these regulations.

Thus, we proposed in the NPRM to incorporate the requirement to expend program income before requesting payment of funds by referencing 2 CFR 200.305(a), but that provision is ambiguous. These final regulations now resolve the ambiguity by revising § 363.24(b)(1) to require States to expend available program income funds before requesting additional cash payments from their Federal Supported Employment grant. We believe this change is essential to protect the Federal interest by using program income to increase the funds devoted to this program to which VR Social Security reimbursement program income may be transferred, keeping to a minimum potential interest costs to the Federal government of making grant funds available to the States. These final regulations should not negatively impact States because this change merely maintains the status quo that existed under former 34 CFR 80.21(f)(2).

In addition, upon further review of the proposed program income regulation, we determined that it was necessary to address the relationship between program income and match. Just as with program income in the VR

program, program income earned in the Supported Employment program may not be used to meet the required non-Federal share under § 363.23.

Changes: We have revised § 363.24 by removing the inapplicable reference to the Uniform Guidance in § 363.24(b)(1), leaving only the requirement that program income earned in the Supported Employment program must be disbursed prior to requesting additional cash draws from its Federal award. We have also added a new § 363.24(b)(3), which provides that program income cannot be used to meet the non-Federal share requirement under § 363.23.

Period of Availability of Funds (§ 363.25)

Comment: None.

Discussion: In reviewing proposed § 363.25(b), we determined that it would be beneficial to clarify the use of Federal funds reserved for the provision of supported employment services to youth with the most significant disabilities that have been matched in the fiscal year for which the funds were appropriated and thus are available for obligation in the succeeding fiscal year. The Federal supported employment reserve funds eligible for carryover into the succeeding Federal fiscal year, because they have been matched in the fiscal year for which the funds were appropriated, may only be obligated and expended in that succeeding Federal fiscal year for supported employment services to youth with the most significant disabilities.

Changes: Final § 363.25(b) states that any reserved funds carried over may only be obligated and expended in that succeeding Federal fiscal year for providing supported employment services to youth with the most significant disabilities.

Limitations on Administrative Costs (§ 363.51)

Comment: One commenter stated that the reduction of the administrative cost limit from 5 percent to 2.5 percent would severely limit the agency's ability to hire and retain staff.

Discussion: Despite this mandated reduction in section 603(c) of the Act, funds from the VR program remain available for costs related to the Supported Employment program, including administrative costs under § 363.4(c)(1) and section 608(a) of the Act. The limitation of administrative costs under the Supported Employment program expands the availability of funds for supported employment services to individuals with the most significant disabilities, and the availability of VR program funds for administrative costs related to the Supported Employment program helps to mitigate the impact of the reduction in administrative costs upon the DSU's ability to hire and retain staff.

Changes: None.

Requirements for Transition To Extended Services, the Achievement of an Employment Outcome, and Closure of a Service Record (§ 363.53, § 363.54, and § 363.55)

Comments: Many commenters requested clarification of requirements related to the transition to extended services, especially for youth with the most significant disabilities; the interplay of the short-term basis with the achievement of an employment outcome; and the requirements related to case closure, particularly when youth with the most significant disabilities are receiving extended services from the DSU.

Discussion: We acknowledge the questions and confusion that many commenters expressed about the transition to extended services, employment outcome, and closure of the service record as they pertain to individuals receiving supported employment services. The transition to extended services continues to take place after an individual has completed supported employment services. WIOA makes two changes to the transition to extended services.

First, an individual receiving supported employment services can now receive those services for up to 24 months, instead of the previous 18, and, under special circumstances, may receive an extension based upon the individual's need as described in 34 CFR 361.5(c)(54)(iii). The transition to extended services begins after all supported employment services are complete. Second, the DSU may now provide extended services to youth with the most significant disabilities in accordance with § 363.4(a) and 34 CFR 361.5(c)(19)(v). The DSU's responsibilities necessitated by both of those changes have been outlined more comprehensively in a revised section 363.53.

By including the requirement to achieve competitive integrated employment into the definition of ''supported employment'' in Section 7(38) of WIOA, Congress stated its expectation that all individuals with disabilities, even those with the most significant disabilities, could achieve competitive integrated employment. Recognizing, however, that those individuals with the most significant disabilities may need more time and supports to reach that goal, Congress permitted those individuals to be employed in an integrated setting with non-competitive wages on a short-term basis, as long as they were working toward competitive integrated employment. The definition of ''employment outcome'' in 34 CFR 361.5(c)(15) addresses the achievement of competitive integrated employment in supported employment. Therefore, final § 363.54 explains when an individual with a most significant disability is considered to have achieved an employment outcome in supported employment, either in competitive integrated employment or when he or she is working on a short-term basis toward competitive employment in an integrated work setting.

When the DSU closes the service record of an individual with a most significant disability now depends on whether the DSU is providing services during the short-term basis period or providing extended services for youth. A new final § 361.55 describes how the new statutory requirements for employment on a short-term basis working toward competitive integrated employment, extended services for youth, and achieving an employment outcome relate to closing the service record.

Changes: We have reformatted and revised § 363.53 to better identify the steps that the DSU must take prior to transitioning an individual with a most significant disability, including a youth with a most significant disability, to extended services. Those steps include both a joint decision made by the counselor and the individual that the individual needs no further supported employment services, as defined in § 361.5(c)(54), and identifying providers of extended services, including the DSU in the case of a youth with a most significant disability, under 34 CFR part 361.5(c)(19).

We have reformatted and revised final § 363.54 to better identify the considerations that the DSU must take into account when determining when an individual with a most significant disability, including a youth with a most significant disability, who is employed in competitive integrated employment or in an integrated setting and is working on a short-term basis toward competitive integrated employment, will be considered to have achieved an employment outcome in supported employment.

We have removed the cross-reference from proposed § 363.54(b) to the closure of the service record requirement in 34

CFR 361.56 as a criterion for achieving an employment outcome.

Final § 363.54 sets forth four requirements that must be satisfied for an employment outcome. First, the individual must have completed supported employment services under this part and 34 CFR part 361, meaning the individual has received services for up to 24 months, or longer if the counselor and the individual have determined that such services are needed to support and maintain the individual in supported employment. Any other vocational rehabilitation services listed on the individualized plan for employment provided to individuals who are working on a short-term basis toward the achievement of competitive integrated employment in supported employment need not be completed prior to satisfying the achievement of an employment outcome.

Second, the individual has transitioned to extended services provided either by the DSU for youth with the most significant disabilities, or another provider, consistent with the provisions of §§ 363.4(a)(2) and 363.22.

Third, the individual has maintained employment and achieved stability in the work setting for a minimum of 90 days after transitioning to extended services, and, finally, the employment must be individualized and customized consistent with the strengths, abilities, interests, and informed choice of the individual.

New final § 363.55 addresses when the service record of an individual who has achieved an employment outcome in supported employment may be closed. Separate requirements are specified for different scenarios, depending on whether individuals with a most significant disability, including youth with a most significant disability, achieve competitive integrated employment or work toward competitive integrated employment on a short-term basis and whether they are receiving extended services and any other vocational rehabilitation services from the DSU or from other service providers.

Limitation on Use of Subminimum Wage (34 CFR Part 397)

The Analysis of Comments and Changes of part 397 is presented in the order in which relevant subjects and sections appear in this part.

General Comments (Part 397)

Comments: More than 550 commenters responded to proposed part 397. Some commenters expressed strong support for all or various sections. A few commenters suggested that section 511 of the Act, as added by WIOA, does not go far enough, and stated that the payment of subminimum wages to individuals with disabilities perpetuates the perception that these individuals are less valued. The commenters recommended that the payment of subminimum wages to individuals with disabilities should be entirely eliminated. Others supported Congress' steps to reinforce the belief that, with the proper supports and services, individuals with all types of disabilities can attain competitive integrated employment. A few commended the Department for its efforts in issuing important regulations designed to curb subminimum wage employment, especially for youth with disabilities, who too often transition from school directly into sheltered employment at subminimum wages without ever having the opportunity to try competitive integrated work or explore their interests and abilities.

Some commenters remarked that section 511 of the Act and the implementing regulations in part 397 will help to eliminate practices that have not worked to benefit individuals with disabilities, such as the overuse of employment at subminimum wages, years of extended evaluation, and cycles of performance evaluations that result in low wages based upon an individual's productivity without necessary supports and services. In addition, a few commenters suggested that supporting subminimum wage employment appeared to be inconsistent with the purpose of the VR program and that resources should not be used to provide services or activities that result in individuals being employed in segregated settings at subminimum wages.

Generally, however, supporters of proposed part 397 regarded the regulations as helping individuals who are considering subminimum wage employment, or those already employed at subminimum wage, access opportunities for competitive integrated employment.

Multiple commenters voiced opposition to, or concerns about, proposed part 397. These commenters expressed concern that proposed part 397 would eliminate or phase out section 14(c) certificates and subminimum wages, close sheltered workshops, and cause individuals employed at subminimum wages to lose their jobs. Some of these commenters stated that individuals employed in sheltered employment were mostly incapable of working in competitive integrated employment, enjoyed a supportive and safe environment and social network in sheltered employment, and would lose income-based financial and medical benefits if they were paid minimum wages. Additionally, many of these commenters expressed concern that employers in the community would not hire individuals with low productivity who are unable to perform at expected levels and that it was unrealistic to believe that there are enough jobs for them in competitive employment. As a result, these individuals with disabilities would remain at home or need increased support from day programs.

Many commenters suggested that there should be a continuum of employment opportunities for individuals with disabilities, including sheltered workshops, and that the proposed regulations do not consider the choices that individuals and families make among these options.

Discussion: We appreciate the many thoughtful recommendations to change, clarify, and improve the regulations. Section 511 of the Act, as added by WIOA, and final part 397 set forth the requirements that must be satisfied: (1) Before an entity holding a special wage certificate issued by the Department of Labor under section 14(c) of the Fair Labor Standards Act (FLSA) may hire a youth with a disability or continue to employ an individual with a disability of any age at subminimum wages; and (2) by DSUs and local educational agencies with regard to services and documentation that must be provided to these individuals. Neither section 511 of the Act nor final part 397 eliminates the payment of subminimum wages or section 14(c) certificates. Both of these actions are outside the scope of the Department's authority and these final regulations. We also understand the concerns about the potential loss of needed disability-related and income-based benefits and the availability of sufficient jobs in the community; however, WIOA embodies the belief that with appropriate skills and supports, all individuals with disabilities can participate in the competitive workforce and achieve self-sufficiency. The Act, as amended by WIOA, and WIOA itself, could result in more job opportunities becoming available to individuals with disabilities, including those with the most significant disabilities. Two of the core purposes of WIOA are to ensure that: (1) Individuals who face barriers to employment, such as individuals with disabilities, receive the services and supports they need to acquire the skills necessary to obtain competitive integrated employment; and (2)

employers receive the training, technical assistance, and other services they need to understand and tap into the full potential of individuals with disabilities in the workforce, for example through supported employment or customized employment. In addition, the Act, as amended by WIOA, and final part 361 require DSUs to work with other public agencies to ensure that individuals with disabilities receive the benefits planning they need to better understand the interplay of income-based benefits and work and to make informed decisions about the type of employment to pursue. Through all of these efforts, the Secretary hopes that individuals with disabilities, including those with the most significant disabilities, have more employment opportunities.

In addition, neither section 511 of the Act nor final part 397 restricts or eliminates sheltered employment. Individuals with disabilities continue to have a continuum of choices and options for employment ranging from competitive integrated employment to employment in sheltered workshops. Therefore, individuals with disabilities choosing to pursue or continue in sheltered employment may do so; however, certain requirements must be satisfied before the employer hires or continues to employ them at subminimum wages. While we recognize that many subminimum wage jobs for individuals with disabilities are in sheltered settings, section 511 of the Act and final part 397 focus exclusively on the requirements that must be satisfied before an entity holding a section 14(c) certificate may hire or continue to employ an individual with a disability at subminimum wages, not on the setting in which those wages are paid.

Changes: None.

Purpose (§ 397.1)

Comments: One commenter recommended that § 397.1(b)(1) require the DSU to ensure that youth with disabilities actually have completed certain services, not just provide documentation about the completion of those services to the youth. The commenter further suggested we revise this section to maximally limit the use of subminimum wage employment by requiring the DSU to: (1) Track youth with disabilities receiving pre-employment transition services and transition services from the DSU who are considering subminimum wage employment; (2) identify all individuals currently receiving services from the DSU considering subminimum wage employment; (3) identify all individuals over the past three years who applied for and were found ineligible for the VR program and may be currently working in, or considering, subminimum wage employment; (4) track referral agreements with, and conduct outreach to, State and local educational agencies to identify youth with disabilities considering subminimum wage employment; and (5) track referral agreements with, and conduct outreach to, the State agency with primary responsibility for providing services and supports for individuals with intellectual and developmental disabilities, and any other State agency providing services to a significant number of individuals in subminimum wage employment. The commenter also recommended that we revise § 397.1 by clarifying that nothing in this part supersedes the requirements of 34 CFR 361.55 regarding semi-annual and annual review of individuals in extended employment or other employment under special certificates issued under section 14(c) of the FLSA.

Discussion: We appreciate the commenter's time and consideration in reviewing this section and making substantive suggestions that would assist DSUs in carrying out the intent of section 511. In particular, the Secretary believes the proactive steps recommended by the commenter offer potential ways in which DSUs could increase the number of youth and other individuals with disabilities considering subminimum wage employment who become known to the DSUs, thereby significantly impacting the DSU's ability to assist in limiting the use of subminimum wages. That said, the Act does not require DSUs to seek out or solicit youth and others with disabilities considering, or already employed at, subminimum wages. Similarly, the Act does not require DSUs to track youth with disabilities or others with disabilities, except for those individuals who have become known to the DSU through the vocational rehabilitation process or through activities required in §§ 397.20, 397.30, 397.40 and 397.50. However, there is nothing in the Act or these final regulations that would prohibit a DSU from working with local educational agencies or other public agencies that may be able to identify individuals seeking or working in subminimum wage employment, for example, when implementing the requirements in section 101(a)(11) of the Act, as amended by WIOA, and the final regulations in 34 CFR 361.22 related to coordination with education officials, 34 CFR 361.24 regarding cooperation and coordination with other entities, and the documentation process requirements in final part 397. This could increase the number of individuals known to the DSU and allow the DSU to provide services, especially employment-related counselling and guidance, earlier than it otherwise would.

While we encourage the DSUs and State and local educational agencies to work together to identify these students and youth with disabilities as early as possible, any referrals by educational agencies that are subject to the confidentiality requirements of the Family Education Rights and Privacy Act (FERPA) (20 U.S.C. 1232g(b) and 34 CFR 99.30 and 99.31) and/or the IDEA (20 U.S.C. 1417(c) and 34 CFR 300.622) would need to comply with the applicable confidentiality standards. Although we are not revising the final regulations as recommended, the Department will consider ways to incorporate some of the suggestions into technical assistance to the DSUs.

The Secretary understands the recommendation to require the DSU to ensure that youth with disabilities actually complete certain services, in addition to providing documentation. However, the Secretary disagrees that this is necessary. Under section 511(c)(1)(A) of the Act and final § 397.40(a), DSUs must provide certain information and career counselling services to all individuals with disabilities, known by the DSUs, who want to continue employment at subminimum wage. Upon the completion of those services, the DSU must provide the individual with documentation that the services were provided. As such, the documentation ''ensures,'' as the commenter desired, that the services were actually completed. Similarly, a youth with a disability must complete certain services, such as transition and, as appropriate, pre-employment transition services, prior to beginning work in subminimum wage employment. Again, the DSUs and local educational agencies must provide documentation that the youth has completed these services, thus ensuring that the services were completed.

Finally, the Secretary agrees that nothing in this part supersedes the requirements of final 34 CFR 361.55 regarding semi-annual and annual review of individuals in extended employment or other employment under special wage certificate provisions in section 14(c) of the FLSA. We received similar suggestions to cross-reference and reconcile the requirements under final 34 CFR 361.55 and final § 397.40 to ensure consistency

and avoid confusion about which requirements apply and the respective responsibilities of the DSU under each provision. While the Secretary understands the concerns, such revisions are not necessary or appropriate. The DSUs must satisfy their responsibilities under both final 34 CFR 361.55 and final § 397.40. These sections implement requirements under separate titles in the Act and apply to different—although sometimes intersecting—populations. We discuss these requirements of final 34 CFR 361.55 more fully in the *Analysis of Comments and Changes* section earlier in this preamble and those in final § 397.40 in a following section.

Changes: None.

Jurisdiction (§ 397.2)

Jurisdiction of the Departments of Education and Labor

Comments: One commenter agreed that proposed § 397.2 is consistent with the statutory authority granted to the Department. The commenter noted that the Department has the authority to regulate the actions of State educational agencies and collect data, citing Executive Order 11761 (To Facilitate Coordination of Federal Education Programs), and, therefore, has the authority to impose documentation requirements; to impose requirements for educational agencies, as detailed in proposed §§ 397.2(a)(1) and (2); and to regulate the actions of State and local educational agencies with regard to subminimum wage placements as detailed in proposed § 397.2(a)(3).

The same commenter agreed with proposed § 397.2(b), which states that nothing in this part will be construed to grant the Department or its grantees jurisdiction over requirements set forth in the FLSA. The commenter added that, although the Department of Labor has the authority to grant entities section 14(c) certificates allowing subminimum wage employment to individuals with disabilities, the Department has the authority to regulate, and thus restrict, the placement of individuals with disabilities in subminimum wage employment as it relates to public schools.

Another commenter stated that the Department has express legal authority to administer funding for the VR program under the Act and to oversee services by local school districts under the Individuals with Disabilities Education Act (IDEA). The commenter urged the Department to assume a central enforcement role over programs that facilitate employment outcomes for youth with disabilities, something which, according to the commenter, was lacking in the proposed regulations.

Other commenters stated that the Department should take a more proactive and vigorous role in enforcement, working collaboratively with the Department of Labor's Wage and Hour Division to enforce fully and meaningfully the requirements of section 511 of the Act, including provisions under which both Departments have overlapping jurisdiction. Similarly, several commenters viewed the enforcement of section 511 of the Act as a shared responsibility between the Departments of Education and Labor.

Several commenters expressed concerns about the enforcement of section 511, including the concern that entities holding section 14(c) certificates would continue their current practices and not comply with requirements under the Act. Some commenters suggested the Department require entities holding special wage certificates to refer youth and other individuals with disabilities to the DSU or educational agency. Many commenters recognized that these entities are subject to enforcement action from the Department of Labor and may have their certificates revoked under 29 CFR 525.17.

Similarly, since section 511 of the Act is entitled ''limitations on the use of subminimum wage,'' one commenter suggested that there is a legal basis under WIOA for the Department of Labor to revoke section 14(c) certificates for violations of section 511 of the Act, which these final regulations should require. The same commenter stated that after the effective date of section 511 on July 22, 2016, when an entity holding a section 14(c) certificate hires a person with a disability who is age 24 or younger without completing the required steps in section 511(a)(2)(B) of the Act, the entity should face enforcement action from the Departments of Labor and Education under both the FLSA and the Act, as amended by WIOA. Without vigorous enforcement by both Departments, particularly the Department of Education, the commenter suggested that entities holding section 14(c) certificates would view the responsibility for meeting the requirements under section 511 of the Act as resting with the DSUs.

Discussion: The Secretary appreciates the many comments and recommendations about jurisdiction and enforcement. In response to the many comments received, the Department consulted further on the matter with the Department of Labor's Wage and Hour Division. Although the Secretary understands the various concerns expressed, both the Departments of Education and Labor agree that under FLSA and WIOA, the authority to administer and enforce Federal requirements governing the payment of subminimum wages by entities holding special wage certificates under section 14(c) of the FLSA resides with the Secretary of Labor. The Secretary of Labor administers and enforces the minimum wage and overtime requirements of the FLSA, issues and revokes subminimum wage certificates, and remedies unauthorized payment of subminimum wages. See 29 U.S.C. 206, 207, and 214(c); 29 CFR part 525. Section 511 states that its provisions ''shall be construed in a manner consistent with the provisions of the Fair Labor Standards Act of 1938 (29 U.S.C. 201 *et seq.*), as amended before or after the effective date of this Act.'' Accordingly, if an employer fails to comply with the section 511 criteria for payment of a subminimum wage, the Secretary of Labor would take enforcement action pursuant to the FLSA in the same manner as he would against any other employer who failed to satisfy the requirements of the FLSA. The Secretary of Labor has delegated his authority to administer the FLSA to the Department of Labor's Wage and Hour Division.

The Secretary agrees with commenters who called for greater collaboration between the Department and the Department of Labor's Wage and Hour Division to ensure that the requirements of section 511 of the Act are enforced fully and meaningfully. Additionally, the Secretary agrees that the provisions of section 511 are dependent on the DSUs and educational agencies knowing the identities of individuals seeking employment or who are already employed at subminimum wage. However, despite the recommendations made by commenters, there is no statutory authority for the Department to require entities holding special wage certificates to refer youth and other individuals with disabilities to the DSU or educational agency. Section 511 of the Act does not grant the Department the authority to impose this or any other requirement on entities holding special wage certificates under the FLSA. Recognizing the importance of these requirements, the Secretary proposed part 397, taking the initiative to regulate on those provisions for which the Department is solely responsible. Under section 511 of the Act, the Department has the authority to

regulate the activities and services that must be provided to an individual before the individual is eligible for, or may continue work compensated at a subminimum wage. Additionally, the Department has the authority to regulate how documentation of these actions is provided by the DSU to the individual with a disability, including the documentation process developed by the DSU in consultation with the State educational agency. We have revised final § 397.2(a)(1) to specify the Department's jurisdiction over the documentation process. Lastly, while States, not the Department, have oversight of services by local school districts under the IDEA, the Department has the authority under section 511 of the Act to prohibit State and local educational agencies from entering into a contract or other arrangement with certain entities for the purpose of operating a program under which a youth with a disability is engaged in work compensated at a subminimum wage. The Department has enforcement authority over State and local educational agencies that violate this prohibition.

Contrary to the opinion of some commenters, the Department of Labor rather than the Department has enforcement authority and jurisdiction over entities holding special wage certificates, including the suspension or revocation of these certificates. Despite recommendations that we require the Department of Labor to revoke violators' section 14(c) certificates if entities are found to be in violation of section 511, the statute does not authorize the Department of Education to do so; any suspension or revocation and any related regulations must be undertaken and promulgated by the Department of Labor.

Changes: We have revised final § 397.2(a)(1) to state that the Department has jurisdiction over the documentation process developed by the DSU in consultation with the State educational agency.

Interplay of the Other WIOA Rulemakings

Comments: One commenter noted that the Department of Labor's NPRM covering programs authorized under titles I and III of WIOA, as well as the joint NPRM issued by the Departments of Education and Labor for the workforce development system, did not address section 511 or the Department of Labor's enforcement of the documentation requirements for hiring or retaining individuals with disabilities in subminimum wage employment.

Discussion: In response to the comment regarding the lack of mention of section 511's requirements or the Department of Labor's enforcement responsibilities either in its program-specific NPRM (80 FR 20690 (April 16, 2015)) or in the joint NPRM issued by the Departments of Education and Labor (80 FR 20574 (April 16, 2015)), the Secretary believes it would not have been appropriate to do so for two reasons. First, the joint NPRM focuses solely on jointly administered requirements imposed by title I of WIOA on the Department of Education and the Department of Labor's Employment and Training Administration. The explicit requirements set forth in title I make both the Department and the Department of Labor's Employment and Training Administration equally responsible for administering and monitoring all jointly administered requirements governing the workforce development system.

Section 511, on the other hand, imposes requirements on State and local educational agencies and DSUs administered by the Department, that are separate and distinct from the restrictions imposed on entities holding section 14(c) certificates that fall under the exclusive purview of the Department of Labor's Wage and Hour Division. There is nothing in section 511 of the Act that shifts the responsibility for enforcement under the FLSA either to the Department exclusively or to the Department jointly with the Department of Labor. In fact, section 511(b)(3) of the Act requires that section 511 be construed in a manner that is consistent with the FLSA. Therefore, the Department of Labor retains the authority to enforce all minimum wage and subminimum wage requirements for entities holding special wage certificates.

Second, the Department of Labor's program-specific NPRM focuses solely on program-specific requirements imposed by titles I and III of WIOA. Section 511, on the other hand, is contained in title V of the Act, which is contained in title IV of WIOA. As such, the provisions of section 511 would not have been appropriate for the Department of Labor's program-specific NPRM. Moreover, the enforcement authority in section 511 that belongs to the Department of Labor resides with a different division, specifically the Wage and Hour Division, than that covered by the Department of Labor's program-specific NPRM. Rules required under the FLSA related to the provisions of section 511 are the responsibility of the Department of Labor.

Changes: None.

Reviewing Documentation

Comments: Many commenters suggested that the final regulations specify timelines for reviewing documentation. One commenter stated that proposed § 397.2 does not address enforcement, either by DSUs or the Department of Labor, for the failure of section 14(c) certificate holders to maintain required documentation. The commenter also stated that it is unclear whether the Department of Labor has the ability to revoke a license for a workshop that fails to keep the required documentation under final §§ 397.20, 397.30, and 397.40.

Several commenters emphasized the importance of enforcing the document review process. They suggested that the DSU or its contractor authorized to review individual documentation maintained by entities holding section 14(c) certificates have an enforcement mechanism to address deficiencies and violations. These commenters urged the Department to take a stronger stand to ensure that corrective actions can be taken by the DSU or its contractor. Another commenter requested that the final regulations define the consequences for non-compliance. One commenter suggested that the DSU should be required to report deficiencies to the Department of Labor or the Client Assistance Program (CAP).

Some commenters stated that DSUs are not enforcement or compliance agencies and requested clarification regarding enforcement authority in the documentation review process. One commenter agreed that while it was clear in the proposed regulations that the Department of Labor oversees entities holding section 14(c) certificates and the payment of subminimum wages to individuals with disabilities, further clarification of the DSU's role and scope was required. Without it, the DSU might become the ''de facto'' organization responsible for policing subminimum wage certificates rather than providing guidance and technical assistance.

One commenter urged that the final regulations task the Department of Labor with enforcing provisions related to the review of documentation since it already monitors entities holding special wage certificates and reviews employee documentation, unlike DSUs. If the final regulations also include the remedy of revoking an entity's 14(c) certificate for failure to maintain the required documentation for individuals employed at subminimum wage, the Department of Labor has the capacity to implement that remedy. In the view of the commenter, imposing an

enforcement obligation on the DSUs would be burdensome and likely result in no enforcement at all.

Discussion: Many commenters suggested final part 397 include timelines for the review of documentation. Section 511(e)(2)(B) of the Act imposes no specific requirements on when, how often, or how reviews must be done. Rather, the statute states that the reviews will be conducted at a time and in a manner as necessary, consistent with regulations established by the DSU or the Secretary of Labor. Therefore, under section 511(e)(2)(B) of the Act, requirements governing the reviews, including whether or when they must be done, are beyond the scope of these final regulations.

Although some commenters requested that we provide the DSU or its contractor an enforcement mechanism for addressing documentation deficiencies and violations by entities holding section 14(c) certificates, the Secretary lacks the statutory authority to do as the commenters suggest. Likewise, the Secretary lacks the statutory authority to define the consequences for non-compliance by entities holding special wage certificates under the FLSA, which rests with the Department of Labor, or to require the DSU to report non-compliance by these entities to the Department of Labor or to the CAP. Having said this, nothing in section 511 prohibits a DSU from informing the Department of Labor's Wage and Hour Division of non-compliance it finds during any documentation review and doing so may assist in supporting the Department of Labor's efforts in monitoring compliance. A more detailed discussion of this issue is presented in the *Review of Documentation (§ 397.50)* section later in this preamble. As discussed under the *CAP and PAIR* (Protection and Advocacy of Individual Rights) section, the reporting of non-compliance to the CAP is not authorized.

We acknowledge that reviewing individual documentation held by the entities holding special wage certificates, as authorized by section 511(e)(2)(B) of the Act, may be regarded as burdensome to DSUs. Section 511 does not require that DSUs conduct these reviews. Rather section 511(e)(2)(B) merely subjects entities holding section 14(c) certificates to these reviews in an effort to ensure that the intent of section 511 is being fulfilled. These reviews may be conducted in a manner and at such time as is deemed necessary, consistent with a DSU's or the Department of Labor's regulations. While the Secretary agrees with the comment that the Department of Labor is experienced with conducting these reviews, the Secretary does not have the statutory authority to require that the Department of Labor be solely responsible for the documentation reviews. Section 511(e)(2)(B) of the Act clearly grants authority to the DSUs to conduct these reviews as well.

Changes: None.

CAP and PAIR

Comments: Many commenters suggested that CAPs and PAIR programs have jurisdiction for reviewing compliance with section 511. To ensure that required activities are completed and are meaningful (*i.e.,* not just checklist actions), some commenters recommended that the CAP or the PAIR agency be empowered to represent students and others with disabilities employed at subminimum wages under section 511. Commenters emphasized that, given the role of CAPs in the new requirements in sections 113 and 511 of the Act, the regulations should define this role and provide the CAPs the authority and ability to monitor and effectively advocate for individuals with disabilities. The commenters noted that the CAPs have access to workers in sheltered workshops and their records, regardless of whether they are VR program consumers. The commenters endorsed the need for independent advocates to ensure that DSUs and entities adhere to the requirements of section 511 to make the most of the opportunity presented in the Act to improve the employment of individuals with disabilities.

One commenter requested that we require that the protection and advocacy systems have access to any entity covered under sections 113 and 511 of the Act to monitor for rights and safety compliance, which includes the ability to speak with individuals with disabilities privately and to access records with the consent of an individual service recipient, parent, or guardian. Additionally, the commenter suggested that we require CAP staff with similar access to advise individuals employed by an entity holding a section 14(c) certificate of their rights and, with consent, to access their records.

Discussion: With respect to the comments regarding the CAPs, section 112(a) of the Act, as amended by WIOA, specifically requires CAPs to inform and advise clients and client-applicants of all available benefits under the Act, including under section 511. Clients or client-applicants, as defined in final 34 CFR 370.6(b) for purposes of the CAP, are individuals seeking or receiving services under the Act, including individuals seeking or receiving services under section 511. Upon the request of clients or client-applicants, CAPs may assist and advocate for them, including by pursuing legal, administrative, or other appropriate remedies to protect their rights and ensure access to the services under the Act.

Although several commenters expressed concerns that the proposed regulations did not provide CAP and PAIR programs with the authority to access records and conduct monitoring, the Secretary does not agree that CAP or PAIR programs have the authority to access records in the manner the commenter suggests. The advocacy provided by CAPs, whether individual or systemic, must be at the request of clients or client-applicants and must be solely for the purpose of protecting their rights or to facilitate their access to services under the Act. In representing the client or client-applicant upon that individual's request, CAPs could access relevant records of individuals with disabilities under section 511 of the Act, so long as they follow the requirements of the holder of those records, which typically require the informed written consent of the client or client-applicant.

PAIR programs have limited monitoring authority. PAIR programs provide advocacy and legal services to protect the rights of individuals with disabilities who are not eligible for services from other components of the protection and advocacy system and whose concerns are beyond the scope of the CAP. Since section 112 of the Act specifically authorizes the CAP to assist individuals with disabilities receiving services under section 511, such activities would fall outside the scope of the PAIR programs.

Despite the suggestion that independent advocates ensure that DSUs and entities adhere to the requirements of section 511 to make the most of the opportunity presented in the Act to improve the employment of individuals with disabilities, there is no statutory basis to require independent advocates to take on this role. There is no mention of independent advocates in section 511 of the Act, and these entities are not within the purview of the Department. Having said this, there is nothing in section 511 to preclude a DSU or the Department of Labor from contracting with an independent advocate to conduct reviews of documentation.

On the other hand, section 112 of the Act, as amended by WIOA, does not authorize CAPs to engage in advocacy for the sole purpose of gaining general access to records or conducting monitoring. Since section 112 of the

Act, as amended by WIOA, references the applicability of the requirements of the CAP to section 511 already, we do not believe that additional language is needed in final part 397. The Department has, however, made minor revisions to final 34 CFR part 370 to clarify that CAPs may advocate on behalf of clients or client-applicants requesting assistance with issues arising under section 511. Final 34 CFR part 370 is published elsewhere in this issue of the **Federal Register**.

Changes: None.

Rules of Construction (§ 397.3)

Comments: A few commenters requested that we revise § 397.3 to emphasize that nothing in section 511 or final part 397 changes or affects a State's obligations under the U.S. Supreme Court's 1999 *Olmstead* decision, subsequent U.S. Department of Justice enforcement actions, or the rules established for home- and community-based services by the U.S. Department of Health and Human Services' Center for Medicare and Medicaid Services (CMS).

Discussion: Section 511 and final part 397 are consistent with the *Olmstead* decision and other requirements for community- and home-based services. Under each of the requirements mentioned by the commenters, services must be provided in the community to the extent possible.

Section 511 gives individuals every opportunity possible to obtain competitive integrated employment by requiring that youth with disabilities receive certain services before beginning employment at subminimum wages and that individuals with disabilities of any age receive certain services every six months for the first year of subminimum wage employment and annually thereafter as long as subminimum wage employment continues.

Moreover, under section 511(b)(1) of the Act, nothing in section 511 is to be construed as changing the purpose of the Act, which is to empower individuals with disabilities to maximize their opportunities to achieve competitive integrated employment, nor is section 511 to be construed as promoting subminimum wage. Final § 397.3 sets forth the ''rules of construction'' consistent with those set forth in section 511(b) of the Act. Paragraphs (a) and (b) of final § 397.3 promote opportunities for competitive integrated employment for individuals with disabilities. Therefore, the Secretary declines to make the suggested revision.

Changes: None.

What regulations apply? (§ 397.4)

Comments: None.

Discussion: Although we received no comments specific to proposed § 397.4, we received several comments about various provisions in part 397 regarding informed choice and confidentiality. Specifically, we received comments asking whether an individual with a disability has the right to refuse to participate in activities required by section 511 of the Act and part 397. As the Secretary has stated throughout this preamble, an individual has the right to exercise informed choice regarding participation in the activities required by this part. The Secretary has revised final § 397.4(b) to highlight 34 CFR 361.52 as being applicable to final part 397.

In addition, we received comments asking whether the DSU could provide documentation to a family member of an individual with a disability. A DSU must protect all personal information regarding an individual in its possession, pursuant to final 34 CFR 361.38. To highlight this requirement, we have revised final § 397.4(b) to specifically mention the confidentiality requirements of final 34 CFR 361.38.

In addition to these specific changes in final part 397, we also made conforming changes in final 34 CFR part 361 to make clear that final 34 CFR 361.38 and 361.52 apply to applicants and recipients of services. In so doing, we ensure that individuals receiving services required by part 397, regardless of whether they have applied for or been determined eligible for vocational rehabilitation services, are still protected by the confidentiality and informed choice requirements. These changes were discussed in the preamble to final part 361 in Part B of the *Analysis of Comments.*

Changes: We have revised final § 397.4(b) to highlight final 34 CFR 361.38 and 34 CFR 361.52 as being applicable to final part 397.

What definitions apply? (§ 397.5)

Comments: A few commenters suggested that the Department provide specific definitions for the terms ''self-advocacy,'' ''self-determination,'' and ''peer mentoring training opportunities'' to ensure integrity and reflect the intent of section 511. One commenter requested a definition for ''certain information.'' Another commenter asked whether the term ''special wage certificate'' in proposed § 397.5(c)(2) included all types of section 14(c) certificates issued by the Department of Labor (*e.g.,* business certificate holders and patient workers) among those certificate-holding entities that must comply with section 511 of the Act. The commenter also asked that we clarify in § 397.5(d) whether ''entity'' includes associated businesses affiliated with a section 14(c) certificate holder, such as a non-profit community rehabilitation program that has a for-profit business in the same location.

Discussion: We appreciate the commenters' recommendations for additional definitions; however, we use these terms in part 397 as they are commonly understood, just as they are used in section 511 of the Act. Attempting to define these terms could cause us to inadvertently define the terms too broadly or too narrowly. This is of particular concern both because we would be defining these terms after the comment period has ended, without the benefit of public input, and because this is a new statutory provision, and we do not yet have institutional experience with how DSUs may implement them in this context.

As commonly understood, ''peer mentoring'' generally involves individuals with disabilities providing guidance, counseling, and advice to other individuals with disabilities based upon their own experiences and training and the experiences of others they know. ''Self-advocacy'' generally involves developing the skills, knowledge, and confidence to stand up for oneself and using appropriate means to obtain one's goals. Finally, ''self-determination'' generally means having the abilities, attitudes, skills, and opportunities to play an active and prominent role in living and planning one's life and future. Neither final part 397 nor section 511 of the Act includes the phrase ''certain information.''

Next, ''special wage certificate'' applies to all entities holding section 14(c) certificates, including work centers (also known as community rehabilitation programs), hospital/residential care centers (facilities that employ patient workers), business establishments that are not a work center or an employer of patient workers, and School Work Experience Programs (SWEP). All must comply with section 511 of the Act, which provides for no exceptions and refers simply to entities holding special wage certificates issued under section 14(c) of the FLSA.

Whether ''entity,'' as defined in final § 397.5(d), includes associated businesses affiliated with a section 14(c) certificate holder depends upon individual circumstances. As defined, ''entity'' refers to any employer who holds a special wage certificate issued under section 14(c) of the FLSA.

Therefore, the factors to consider include, but are not limited to, whether the associated business is separately incorporated, operates under the same or a separate special wage certificate described in section 14(c) of the FLSA, employs or jointly employs as defined in the FLSA, individuals with disabilities at subminimum wages, shares subminimum wage employees with the section 14(c) certificate holder, or operates as a contractor or subcontractor for the section 14(c) certificate holder. The for-profit nature of an associated business of a non-profit is not a determining factor since both may hold a special wage certificate under the FLSA.

Changes: None.

Coordinated Documentation Process (§ 397.10)

Comments: Most commenters on proposed § 397.10 supported the requirement that the DSU, in consultation with the State educational agency, develop a process, or utilize an existing process to document the completion of required activities under section 511 of the Act by youth with disabilities prior to seeking or entering subminimum wage employment. A few commenters strongly supported using the DSU's formal interagency agreement with the State educational agency required by 34 CFR 361.22(b) as the mechanism to develop a robust documentation process, and a few commenters requested that final § 397.10 reflect the role of the State Rehabilitation Council in this process. One commenter suggested that we require the interagency agreement to include a requirement that students and parents or guardians be provided training on subminimum wage employment. One commenter recommended that we require the interagency agreements to be developed with local educational agencies, in addition to State educational agencies. In addition, the commenter recommended that interagency agreements that specify data sharing requirements be developed with State agencies serving individuals with intellectual and developmental disabilities as well. The commenter suggested that the interagency agreements indicate how each agency will ensure compliance with the requirements in this section.

Several commenters recommended that the Department provide guidance detailing the documentation and collaboration requirements of DSUs, educational agencies, and other entities under section 511. Similarly, one commenter requested that we include more specific language in the regulations regarding the types of documentation that would be acceptable, emphasizing that guidance should be sufficient to ensure that documentation is complete and meets the intent of section 511 of the Act. Some stated that proposed § 397.10 focused heavily on compliance with the documentation requirements, and not the congressional intent of limiting the use of subminimum wages.

Many commenters expressed concerns about the 90-day time frame for providing documentation to youth with disabilities in proposed § 397.10(c)(2) and recommended shorter time frames, such as 30 or 45 days. They noted that allowing the DSU up to 90 days to provide documentation to youth with disabilities after completing each of the required activities, which may or may not take place concurrently, could result in prolonged delays for such youth seeking to enter subminimum wage employment since there are several steps and multiple activities in the process that the youth must complete.

One commenter asked the Department to define ''completed'' in proposed § 397.10(b)(2)(i), stating that transition services are typically ongoing and may continue until a student graduates from high school. The same commenter posed a series of additional questions about proposed § 397.10(b)(2)(ii). The commenter asked about what constitutes documentation; the level of detail required; requirements for the rigor and quality of the activities; the need for signatures, dates, descriptions and settings of activities; information about the location or setting of activities; and the DSU's obligations if the educational agency fails to provide documentation of transition activities or such activities are deemed substandard.

One commenter urged the Department to include a new paragraph in § 397.10 or, alternatively, in § 397.50, to require the DSU to retain copies of documentation required by this part and to provide this documentation for review by the CAP or a protection and advocacy agency.

One commenter remarked that documentation of required activities denotes completion of these activities without regard to consumer choice to participate, whereas other commenters requested clarification of what documentation would be required if an individual, exercising informed choice, refuses vocational rehabilitation services.

Finally, one commenter asked for clarification regarding whether a documentation process between the DSU and the State educational agency must be developed and what documentation is required in those States that prohibit subminimum wages for individuals with disabilities. Alternatively, the commenter suggested that emphasis should be placed upon tracking services in the regulations regardless of whether a subminimum wage prohibition exists.

Discussion: We appreciate the many comments we received regarding the documentation process. Compliance with the documentation process requirements is intended to result in limiting the use of subminimum wages. The Secretary agrees that the formal interagency agreement between the DSU and the State educational agency provides an optimal mechanism to develop and describe the documentation process required in final § 397.10, and the Department appreciates the strong support we received from commenters on this point. As noted by the commenters, final 34 CFR 361.22(b)(5) requires the DSU and State educational agency to develop a formal interagency agreement that, at a minimum, provides for coordination necessary to satisfy documentation requirements set forth in final § 397.10. Under final 34 CFR 361.20(c) and (d), the State Rehabilitation Council (SRC) must provide input into the VR services portion of the Unified or Combined State Plan, and the DSU must actively consult with the SRC, if it has a Council, on its policies and procedures governing the provision of vocational rehabilitation services. The functions of the SRC in final 34 CFR 361.17(h) support Council involvement in developing the coordinated documentation process. Therefore, the Secretary does not believe it necessary to specifically state the role of the SRC in the documentation process in final § 397.10.

While the Secretary agrees that students and parents or guardians can benefit from training about subminimum wage employment, the Act does not require the formal interagency agreement to include such a requirement. To add it would be inconsistent with the statutorily required actions that must be taken by either the DSU or the State educational agency with regard to the documentation process. Nonetheless, nothing in the Act precludes the DSU and State educational agency from including a training requirement in the formal interagency agreement.

Similarly, we do not believe it necessary to require, in final part 397, the DSU to enter into interagency agreements with local educational

agencies and State agencies serving individuals with intellectual and developmental disabilities, because final 34 CFR 361.24(f) and (g) provide for the DSU to enter into cooperative agreements and engage in interagency collaboration with these State agencies. These cooperative agreements could provide a mechanism for addressing, as appropriate, the requirements in final § 397.10 and promote data sharing. The Secretary encourages the DSUs, local educational agencies, and State agencies serving individuals with developmental and intellectual disabilities to work collaboratively to identify individuals with disabilities, particularly youth with disabilities, who are considering or who are already engaged in subminimum wage employment.

The Secretary agrees that further operational guidance regarding the requirements for collaboration, development, and implementation of the documentation process is warranted. Therefore, the Department's Office of Special Education and Rehabilitative Services intends to collaborate with the Department of Labor's Wage and Hour Division in issuing guidance about implementing the requirements in final part 397, particularly the documentation process. This guidance will help to ensure that the documentation process works smoothly within already-established procedures for the DSUs and State and local educational agencies, especially with regard to the protection of personally identifiable information, while also enabling efficient and effective reviews of any such documentation by the Department of Labor.

Final §§ 397.10 and 397.30 specify the documentation requirements. Final § 397.20 describes the activities for which documentation must be provided, all of which are familiar to DSUs and local educational agencies and should pose no additional administrative burden. Each DSU has case management practices for documenting various steps in the vocational rehabilitation process, such as eligibility and ineligibility determinations, the individualized plan for employment, the provision of vocational rehabilitation services (including pre-employment transition services), and case closure. State educational agencies also have methods for documenting transition services provided to students under the IDEA. In developing the documentation process, each DSU, in coordination with the State educational agency, has flexibility to determine the most appropriate procedures for documenting required activities and for timely provision of the documentation to youth with disabilities upon their completion of the required activities.

As proposed, § 397.10(c)(2) required the DSU to provide the documentation of the completion of each of the required actions in §§ 397.20 and 397.30 to a youth as soon as possible, but no later than 90 days, following the completion of each of the actions. We understand the concerns raised by commenters, and we want to emphasize that we anticipate DSUs and State educational agencies will develop a process whereby the documentation in most instances will be provided either concurrently with the completion of the activity or very shortly thereafter, and we encourage them to do so.

For example, DSUs typically provide documentation of eligibility or ineligibility determinations to the individual within a very short time after the decision is made. Similarly, DSUs typically provide a copy of the individualized plan for employment to the individual at the time both parties sign the document. With regard to providing services, such as pre-employment transition services or transition services, we anticipate that the DSUs and schools will develop a streamlined approach for transmittal of the documentation by the DSU to the youth.

We proposed a period of up to 90 days to be consistent with other time frames in the vocational rehabilitation process and to enable DSUs to obtain documentation from local educational agency personnel who may not be available due to extenuating circumstances. It was never the Department's intent to delay the provision of the required documentation to any individual seeking subminimum wage employment. After considerable deliberation and balancing competing interests while not imposing undue burden on the DSUs or schools, the Secretary has modified the time frame in these final regulations. Final § 397.10(c)(2) requires the DSU to provide the requisite documentation, including documentation received from the local educational agency, to the youth within 45 calendar days of completion of the activity.

For example, if a student completes a required activity provided by the local educational agency, the documentation must be transmitted to the DSU and provided to the youth all within 45 calendar days. However, if, due to extenuating circumstances additional time is needed, documentation must be provided to the youth within 90 calendar days after completion of the activity. As provided in final § 397.10(c)(2)(i)(B), this exception for extenuating circumstances is a limited exception that would cover circumstances such as, the unexpected absence of the individual necessary to provide the documentation, or a natural disaster. That said, DSUs and State educational agencies could establish a shorter time frame in their documentation processes.

We recognize that providing transition services, as well as pre-employment transition services, may be ongoing for students with disabilities. For example, under the IDEA, a student with a disability may receive transition services until the student graduates from high school with a regular diploma or exceeds the age of eligibility for a free appropriate public education. Similarly, students with disabilities may receive pre-employment transition services under the Act for as long as the student remains in an educational program and meets the definition of a ''student with a disability'' under final 34 CFR 361.5(c)(51). For purposes of final § 397.10(b)(2)(i), the local educational agency must, consistent with confidentiality requirements of FERPA and/or the IDEA, provide the DSU documentation of transition services when a student has completed all transition services in the individualized education program. The final regulations do not contain a definition of ''completion,'' as suggested by commenters, because the definition would vary widely depending on the activity. The Secretary will provide more guidance in the general operational guidance for the documentation process required by section 511 and final part 397.

Section 511 of the Act does not address what constitutes documentation, the level of detail required, requirements related to the rigor and quality of the activities, the need for signatures, dates, descriptions and settings of activities, information about the location or setting of activities, and the DSU's obligations if the education agency fails to provide documentation of transition activities or such activities are deemed substandard. Some of these issues are best left to the DSU and State educational agency to negotiate when developing the interagency agreement or the documentation process to maximize State flexibility and accommodate the unique needs within a State. However, the Secretary agrees that some guidance would be helpful. Therefore, the Secretary has revised final § 397.10(a) to state that the documentation process must address both the actual production and transmittal of documentation.

Again, the transmittal of all documentation by the educational agency to the DSU must comply with the confidentiality requirements of FERPA and the IDEA.

In addition, the Secretary has revised final § 397.10(a) by adding three new paragraphs. Final § 397.10(a)(1) establishes minimum requirements for information to be contained in the documentation of determinations made or the completion of an activity. Final § 397.10(a)(2) establishes minimum requirements for information that must be contained in documentation in the event that a youth, or his or her parent or guardian, exercises informed choice and refuses to participate in an activity required by section 511 of the Act or final part 397. Final § 397.10(a)(3) requires the DSU to retain a copy of all required documentation provided to the youth. The DSU must retain this documentation just as it would any other documentation in its case management system, and the documentation must be retained in accordance with the requirements of 2 CFR 200.333, which governs record retention for all Federal grantees.

In using an existing process or developing a new documentation process, the DSU and the State educational agency may wish to consider questions such as those posed by the commenter but not addressed in these final regulations. In addition, the Secretary has revised final § 397.10(b)(2)(i) to require the educational agency to provide the documentation to the DSU. The Secretary has also added a new requirement in final § 397.10(c)(3) that the DSU provide, when transmitting documentation of the last determination made or activity completed, a cover sheet that itemizes all documentation provided to the youth. The Secretary hopes that these additions will assist DSUs and State educational agencies in developing a streamlined documentation process that will enable the expedient completion and transmittal of the documentation to the youth, and allow for the expedient review of the documentation, if a review is conducted by the DSU or the Wage and Hour Division of the Department of Labor.

Additionally, for the reasons discussed in the section titled *Jurisdiction (§ 397.2),* any access to these records by CAPs or protection and advocacy systems is subject to the requirements of sections 112 and 509 of the Act, respectively, and implementing final regulations in 34 CFR part 370 and 34 CFR part 381.

Although section 511 of the Act and final part 397 establish prerequisites for a youth with a disability to work in subminimum wage employment, as with any vocational rehabilitation service, the youth with a disability, or his or her parent or guardian, as applicable, may exercise informed choice and refuse to participate. If a youth chooses not to participate in the activities required by section 511 of the Act and final part 397, or chooses to opt out of the vocational rehabilitation process entirely, such a choice will impact the permissibility of the youth to work at subminimum wage and preclude him or her from obtaining subminimum wage employment given the limitations imposed by section 511 of the Act and final part 397. Accordingly, DSUs should inform youth with disabilities and/or their guardians of the youth's ineligibility for subminimum wage employment if he or she refuses to participate in the required activities. As discussed previously, final § 397.10(a)(2) establishes documentation requirements for when a youth refuses to participate in the required activities. Meeting these requirements demonstrates the DSU's compliance under section 511 and final part 397. The Secretary believes it is appropriate to establish an even shorter time frame for the transmittal of documentation demonstrating the youth's refusal to participate in required activities under final part 397 because there should be few administrative reasons for delay. Thus, in this circumstance, final § 397.10(b)(2)(ii) requires that the documentation be provided to the youth, within 10 calendar days of the youth's refusal.

In a State that prohibits the payment of subminimum wages to individuals with disabilities, the DSU and the State educational agency still must develop a documentation process in accordance with final § 397.10, although it may be used infrequently. This documentation would be necessary if a youth with a disability seeks subminimum wage employment in another State that does not prohibit subminimum wages.

Finally, the Department, upon further review, notes that the documentation of pre-employment transition services in final § 397.10(b)(1) refers to a ''student with a disability'' rather than a ''youth with a disability'' because only a student with a disability may receive pre-employment transition services. Further, the section states more directly that the appropriate school official responsible for providing transition services will provide the DSU documentation of completion of appropriate transition services under the IDEA.

Changes: We made several changes to final § 397.10. First, we revised final § 397.10(a) to state that the documentation process must cover both the production and transmittal of the documentation. The process must ensure all confidentiality requirements of FERPA and the IDEA are satisfied.

Second, we revised final § 397.10(a) by adding three paragraphs. Final § 397.10(a)(1) establishes minimum information that must be contained in documentation of a youth's completion of required activities. Final § 397.10(a)(2) establishes the minimum information that must be contained in documentation when a youth refuses to participate in the required activities. Final § 397.10(a)(3) requires the DSU to retain copies of all documentation required by final part 397.

We revised final § 397.10(b)(1) to clarify that we are referring to a ''student with a disability'' with regard to the documentation of the completion of appropriate pre-employment transition services. We also revised § 397.10(b)(2)(i) to clarify that the appropriate school official responsible for the provision of transition services must provide the DSU documentation of completion of appropriate transition services under the IDEA. We revised final § 397.10(c)(2) by adding two new paragraphs. Final § 397.10(c)(2)(i) requires the DSU to provide all requisite documentation to the youth within 45 calendar days of the determination or the completion of the required activities, unless extenuating circumstances make additional time necessary. In that case, the documentation must be provided to the youth within 90 calendar days of the determination or completion of the activity or service. The final regulations also provide examples of what could constitute extenuating circumstances necessitating the additional time. Final § 397.10(c)(2)(ii) requires the DSU to provide documentation of the youth's refusal to participate in required activities within 10 calendar days of the refusal. Lastly, final § 397.10(c)(3) was added to require the DSU to provide a coversheet that itemizes all documentation provided to the youth when transmitting documentation of the last determination made or activity completed.

Responsibilities of a DSU to Youth With Disabilities Who Are Known To Be Seeking Subminimum Wage Employment (§ 397.20)

Reasonable Period of Time

Comments: Most commenters on this section recommended changes in proposed § 397.20(a)(2)(ii)(B) and proposed § 397.20(b)(3)(i) related to the determination that a youth with a disability is not able to achieve the employment goal specified in his or her individualized plan for employment, other than supported employment, after working toward the goal for a reasonable period of time with appropriate supports and vocational rehabilitation services. The commenters recommended that, for these youth, the reasonable period of time be consistent with, or no less than, the time period provided in proposed § 397.20(b)(3)(ii) for individuals with disabilities whose specified employment goal is in supported employment. A few commenters recommended defining the time frame for ''reasonable period of time'' for all youth, regardless of whether they were seeking supported employment outcomes or other outcomes, as 36 months or up to four years since the DSU is being allowed to provide up to four years of extended services for youth in supported employment. The commenters stated that limiting the length of time the DSU can devote to helping youth with disabilities achieve competitive integrated employment creates barriers to the policy of maximizing steps to facilitate attaining competitive integrated employment and requested that the Department amend the proposed rule to designate a minimum, not maximum, period of time during which DSUs must assist youth with disabilities to attain integrated employment outcomes, including supported employment. Citing the low participation rate of individuals with disabilities in the labor force, coupled with the significant barriers to employment faced by these individuals, one commenter recommended a minimum of three years as the appropriate amount of time for youth with disabilities to work toward competitive integrated employment before considering segregated work and subminimum wage employment. This commenter stated that, without a minimum time frame, the proposed regulations offer little to prevent youth from continuing to settle for subminimum wage employment. Some premised their suggestion of extending the time frame to four years based upon the DSU being allowed to provide up to four years of extended services for youth in supported employment. On the other hand, one commenter suggested that, consistent with the provision of supported employment services, in no case should the reasonable period of time exceed two years.

Suggesting that the distinctions in ''reasonable period of time'' between those youth with supported employment goals and those with other employment goals prove more confusing than helpful, a few commenters supported language that reflects an individualized approach for defining ''reasonable period of time'' for all youth, including those individuals in supported employment. One commenter stated that, without uniform time frames for both youth with disabilities seeking supported employment outcomes and youth seeking other competitive integrated employment outcomes, DSUs may circumvent the necessary level of effort needed in working with individuals by simply writing an individualized plan for employment that does not include the goal of supported employment.

Discussion: We appreciate the many comments we received about defining ''reasonable period of time'' before closing a service record as unsuccessful when a youth has been pursuing, through an individualized plan for employment, an employment outcome (as defined under final 34 CFR 361.5(c)(15)), other than in supported employment.

Although many commenters requested a specified time frame—of anywhere from 24 months, to coincide with that for the provision of supported employment services, to up to four years to coincide with the amount of time allowed for the provision of extended services for a youth with a disability—we believe that a ''reasonable period of time'' must take into account the disability-related and vocational needs of the individual, as well as the anticipated length of time required to complete the services identified in the individualized plan for employment to achieve an employment outcome. The time frame for providing supported employment services is prescribed in section 7(39) of the Act, as amended by WIOA, and final 34 CFR 361.5(c)(54), but the Act does not limit the amount of time for providing any other vocational rehabilitation service. Therefore, we believe that it is not in the best interest of individuals with disabilities to limit the time for providing vocational rehabilitation services other than supported employment services. To do so might unnecessarily restrict the amount of time an individual may need to complete the services necessary to achieve an employment outcome in competitive integrated employment.

We understand the concerns expressed by many of the commenters about limitations on the amount of time the DSU may devote to assisting youth with disabilities to achieve competitive integrated employment, especially if someone is not seeking supported employment. We also understand the desire to provide a minimum time, rather than a maximum time, during which the DSU may help youth with disabilities attain employment outcomes, including supported employment. However, we believe that with allowable extensions, and based upon the needs of the individual and the individual's disability, DSUs have the flexibility to provide all services and supports necessary for an individual to achieve competitive integrated employment in a reasonable time prior to closing the individual's service record as unsuccessful.

Changes: None.

Requirements for Closure

Comments: A few commenters recommended that we revise proposed § 397.20(a)(2)(ii)(C) to reference 34 CFR 361.47(10) rather than the more general 34 CFR 361.47 when addressing the requirements for closure of the service record of a youth with a disability. The commenters stated that under 34 CFR 361.47(10), the vocational rehabilitation counselor will not accidentally classify the youth with a disability as having achieved competitive integrated employment, when, in fact, the youth has obtained subminimum wage employment. One commenter also suggested that this change would serve as a reminder to vocational rehabilitation counselors that a placement of a youth with a disability in a subminimum wage environment is less desirable than a placement into competitive integrated employment.

Discussion: We do not agree with the recommendation that we revise proposed § 397.20(a)(2)(ii)(C) to reference final 34 CFR 361.47(10), rather than the more general final 34 CFR 361.47, when addressing the requirements for closure of a service record for a youth with a disability. Final 34 CFR 361.47 contains other requirements, and limiting the reference to final 34 CFR 361.47(10) could provide the impression that other requirements do not apply. We anticipate that the discussion in part 361 of these regulations found elsewhere in this issue of the **Federal Register** regarding ''competitive

integrated employment'' and ''employment outcome'' will serve to clarify that employment at subminimum wages is not a successful outcome for purposes of the VR program.

Changes: None.

Pre-employment Transition Services

Comments: Several commenters provided comments about the DSU's responsibility to document completed pre-employment transition services. One commenter asked that the final regulations specifically prohibit the use of segregated settings such as sheltered workshops for providing pre-employment transition services, regardless of whether these settings pay subminimum wages. Given that this section applies to youth with disabilities, a commenter requested clarification regarding how youth with disabilities who are age 24 or younger, who are not students with disabilities, may be provided pre-employment transition services that are, by definition, provided to students with disabilities. The commenter stated that although a youth with a disability who is no longer a student may have received pre-employment transition services, or transition services under the IDEA, a DSU would find it challenging to document the services after the youth has left the education system. As an alternative, the commenter suggested that we make an exception to the definition of ''pre-employment transition services'' for the purpose of proposed § 397.20 to include all youth in the provision and documentation of pre-employment transition services. Another commenter stated that it would be overly burdensome to track all individuals receiving pre-employment transition services and their activities in order to provide documentation to those few considering subminimum wage employment. The commenter recommended removing the requirement for documentation of pre-employment transition services from proposed § 397.20(a)(1).

One commenter was concerned that proposed § 397.20 served as a loophole for the education system to continue to view subminimum wage employment as a viable alternative and suggested that the final regulations be strengthened by specifying that youth must be provided exposure to, and opportunities for, experiences such as integrated work-based learning programs, summer jobs, summer volunteering, and summer internships to enable them to make an informed choice to pursue subminimum wage employment.

Discussion: As discussed in the *Analysis of Comments and Changes* section for part 361 earlier in this preamble, we do not have the authority to prohibit the use of segregated settings, such as sheltered workshops, for providing pre-employment transition services. That being said, assessment services and pre-employment transition services are to be carried out in an integrated setting to the maximum extent possible in accordance with final 34 CFR 361.5(c)(5) and final 34 CFR 361.48(a)(2), respectively.

We understand the confusion created by proposed § 397.20(a)(1), which covered the documentation of completed pre-employment transition services that must be provided to youth by the DSU, when, in fact, pre-employment transition services are provided to students with disabilities, not to all youth with disabilities. We have revised this paragraph to clarify that documentation for the completion of pre-employment transition services applies to students with disabilities. We have made further revisions for the documentation of the completion of transition services under the IDEA, which the DSU is also responsible for providing to youth once the local educational agency has provided such documentation to the DSU.

We disagree with the commenter's alternative suggestion of making an exception to the definition of ''pre-employment transition services'' in final 34 CFR 361.5(c)(42) to include all youth for purposes of this part, as that would be inconsistent with section 113 of the Act.

We understand that a DSU would find it challenging to obtain documentation of services after a youth has left the education system; however, educational systems must maintain records of the provision of transition services to students provided through an individualized education program.

We appreciate the commenter's concern about the burden of tracking individuals receiving pre-employment transition services and their activities in order to provide documentation to a few individuals that might seek subminimum wage employment. The commenter recommended removing the requirement from final § 397.20(a)(1). However, this would be inconsistent with section 511(d)(2)(a) of the Act.

We agree that youth with disabilities may find integrated work based learning programs, summer jobs, summer volunteering, and summer internships valuable and these experiences could better enable them to make an informed choice of whether to pursue subminimum wage employment. However, we do not believe that embedding this language in the regulations in part 397 would strengthen the final regulations, as they already incorporate the requirements to document the completion of pre-employment transition services and/or transition services for youth with disabilities, which include these activities.

Finally, we made a technical change in the title of this section, replacing ''considering'' with ''seeking'' to be consistent with § 397.30. ''Seeking'' more appropriately describes those youth who have determined that they would like to pursue subminimum wage employment.

Changes: We added § 397.20(a)(1)(i) and (ii) to require DSUs to document completion of transition services under the IDEA in addition to completion of pre-employment transition services under the VR program. Additionally, we inserted ''a student with a disability'' in final § 397.20(a)(1)(i) because pre-employment transition services are available only to students with disabilities. Finally, we replaced the word ''considering'' with ''seeking'' in the title of this section to be consistent with the title in § 397.30.

Other Comments

Comments: A commenter posed a series of questions and concerns about how to serve eligible VR consumers who might be contemplating subminimum wage employment if there is a lag time or lack of supported employment providers or customized employment and the consequences to consumers and families, as well as DSUs, if an individual chooses to opt out of the vocational rehabilitation process.

Other commenters asked whether the employment goal specified in the individualized plan for employment needs to be consistent with competitive integrated employment when considering the individual's strengths, resources, priorities, concerns, abilities, capabilities, interests and informed choice. Also, they asked what the expectations are around the determination of ineligibility, including how many work experiences must be provided and how long to pursue supported employment after the 24-month period or customized employment when resources for long-term supports are not available. Finally, commenters asked how to consider an individual's geographic area when providing referrals to Federal and State programs and other resources that offer employment-related services and supports designed to enable the individual to explore, discover, experience, and attain competitive integrated employment.

Discussion: We understand that commenters have concerns and questions about the responsibilities of DSUs in this section. Limited resources and available providers of services, including providers of long-term supports, provide a challenge for DSUs as they work to locate services that will assist individuals with disabilities in achieving competitive integrated employment or supported employment. Without sufficient service providers or resources, a youth may choose to opt out of the VR process entirely, precluding him or her from achieving even subminimum wage employment given the limitations imposed by section 511 of the Act and final part 397. In the event a youth opts out of the vocational rehabilitation process because of a lack of resources in the community, there would be no consequences for the DSU under this part.

The specified employment goal must be consistent with the general goal of competitive integrated employment when considering the individual's strengths, resources, priorities, concerns, abilities, capabilities, interests, and informed choice in accordance with section 102(b)(4) of the Act, as amended by WIOA, and final 34 CFR 361.46(a). The answers to the other questions posed by the commenter are dependent upon circumstances and require the judgment of the DSU and the vocational rehabilitation counselor in consideration of the consumer's choice and needs.

Changes: None.

Responsibilities of a Local Educational Agency to Youth With Disabilities Who Are Known To Be Seeking Subminimum Wage Employment (§ 397.30)

Comments: Commenters recommended several changes to proposed § 397.30 regarding the responsibilities of a local educational agency to youth with disabilities seeking subminimum wage employment. Several commenters recommended that we require the local educational agency to retain copies of documentation that a youth has completed transition services and to make this documentation available for review by the CAP or a protection and advocacy system. A few commenters also recommended that the phrase ''who are known to be seeking subminimum wage employment'' or, alternatively, ''who are known to be'' be deleted from the title of proposed § 397.30, presumably to include all youth with disabilities under the responsibilities of the local educational agency in this part, not just those seeking subminimum wage employment. Commenters also recommended that the language indicating that a local educational agency may provide a youth with a disability documentation of transitions services received under the IDEA be changed to indicate that this is not optional, but a requirement. Finally, one commenter offered additional language that a local educational agency is responsible for referring youth with disabilities considering subminimum wage employment as a transition outcome to the designated State unit in order to complete the requirements under proposed § 397.20.

Discussion: We appreciate all of the comments and suggestions on this section. While the suggestion to require local educational agencies to retain copies of documentation that a youth has completed transition services is unnecessary given the requirements of 2 CFR 200.333, we understand the concerns expressed. After much consideration, the Secretary has revised final § 397.30 to require the educational agency to retain a copy of all documentation provided to the DSU in accordance with 2 CFR 200.333. This requirement in final § 397.30(d) should pose no additional burden to the local educational agencies because the agencies are already subject to Federal record retention requirements. Final § 397.30(d) is consistent with a similar provision in final § 397.10(c), thereby ensuring consistency between the DSU and local educational agencies for purposes of the documentation process. Similarly, the Secretary has revised final § 397.30(a) to state that the documentation transmitted to the DSU must comply with the confidentiality requirements of FERPA and the IDEA. Additionally, final § 397.30 is revised to establish minimum information content requirements for the documentation to be provided to the DSU upon completion of the transition services under the IDEA or the youth's refusal to participate in those activities. In addition, the Secretary has also added a new paragraph in final § 397.30 to require a time frame for the transmittal of the documentation to the DSU—of no more than 30 calendar days after completion of the transition service, or no more than 60 calendar days after completion of the transition service if additional time is needed due to extenuating circumstances, or within 5 calendar days of the youth refusal to participate. This gives the DSU the time necessary to transmit the documentation to the youth within the time required by final § 397.10(c).

In addition, final § 397.30(c)(2) requires educational personnel, when transmitting documentation of the last service or activity completed by the youth to the DSU, to provide a coversheet that itemizes all documentation transmitted to the DSU regarding that youth. In so doing, the DSU will have a checklist to ensure receipt of each documentation, thereby ensuring the youth obtains all necessary documentation. These additional provisions are necessary to ensure consistency between the DSU and the local educational agencies in the documentation process. All of these changes are consistent with those made in final § 397.10.

As previously discussed in other sections of this part, the CAP and protection and advocacy systems already have access to records in accordance with their governing statutes and regulations and section 511 of the Act does not expand this access.

We disagree with the recommendation to remove the phrase ''who are known to be seeking subminimum wage employment'' or, alternatively, ''who are known to be'' from the title in final § 397.30. The provisions relate directly to youth who are contemplating or seeking subminimum wage employment, and local educational agencies have knowledge of these individuals in meeting the IDEA requirements for transition services in the individualized education program in 20 U.S.C. 1414(d)(1)(A)(i)(VIII)(aa)–(bb).

In considering the commenter who recommended making it mandatory for the local educational agency to provide documentation of the completion of required activities to the student, upon further review, the Department has determined that providing documentation of completed activities by the local educational agency directly to a youth with a disability seeking subminimum wage employment is not mandatory, and we are removing this language in the final regulation to be more consistent with the statute and final § 397.10. The documentation must be provided by the local education agency to the DSU in accordance with section 511(d)(2)(ii) and (iii).

The local educational agency, in accordance with the requirements in section 511(d)(2) and the documentation process developed by the DSU in consultation with the State educational agency, must provide documentation to the DSU. The DSU is then responsible under section 511(d)(2)(A)(iii) to provide this documentation to the student with a disability. Final §§ 397.10 and 397.30 make this requirement clear and ensure

consistency with specific statutory requirements.

While we agree that it is in the best interest of a student with a disability considering subminimum wage employment to be referred by a local educational agency to the DSU in order to complete the requirements under final § 397.20, we believe that this is best left to the DSU and the State educational agency to negotiate when developing the interagency agreement required by 34 CFR 361.22. Nevertheless, we believe that this practice represents the type of coordination and cooperation that should exist between DSUs and local educational agencies and enables collaboration with the student with a disability to provide a complete program of services that may result in an employment outcome in competitive integrated employment. See a more detailed discussion of this issue earlier in this preamble. Regardless, once the DSU receives documentation of completed transition activities from the local educational agency, then the individual will become known to the DSU, and thus ''referred.''

Changes: We have revised final § 397.30 in several ways. We have revised final § 397.30(a) by deleting the language stating that a local educational agency may provide documentation to a youth of the completion of actions described in § 397.20(a) and inserting in its place language that the local educational agency must provide the DSU with such documentation in accordance with section 511(d)(2). We also stated that the documentation must be transmitted in a manner that complies with the confidentiality requirements of FERPA and the IDEA. We added final § 397.30(b), which establishes minimum content requirements for the documentation that must be transmitted by the local educational agency to the DSU. We added final § 397.30(c), which establishes the time frame under which a local educational agency must provide the DSU with required documentation and requires the local educational agency to retain a copy of all documentation provided to the DSU under this part. Final § 397.30(c)(2) requires educational personnel to transmit a coversheet to the DSU that itemizes all documentation provided to the DSU regarding the youth. This coversheet is to be provided when the educational personnel transmits documentation of the last activity completed by the youth. Lastly, we added final § 397.30(d), which establishes the timeline in which documentation must be transmitted by the educational agency to the DSU.

Contracting Prohibition on Educational Agencies (§ 397.31)

Comments: A few commenters supported proposed § 397.31. A few commenters also suggested that the Department of Labor has the responsibility to oversee the DSUs and State educational agencies to ensure that subminimum wage employment is not being used inappropriately.

Most commenters expressed concern that the proposed regulation was being interpreted by educational agencies and DSUs to mean that an entity that holds a section 14(c) certificate is automatically prohibited from providing any service paid for by local and State educational agencies and that this was not the intent of section 511(b)(2) of the Act. The commenters requested that we clarify that State and local educational agencies may contract with entities holding section 14(c) certificates such as community rehabilitation programs for other purposes, including transition and pre-employment transition services that are beneficial to students with disabilities and supported by parents of these individuals. One commenter asked whether proposed § 397.31 eliminates the ability of local educational agencies to contract with holders of section 14(c) certificates for the provision of internships and work-based tryouts, among other services.

One commenter mentioned that in rural States or areas, the availability of services may be limited to providers who hold special wage certificates, thus provisions in part 397 should not preclude students from accessing the expertise section 14(c) certificate holders have in assisting people into competitive integrated employment.

Additionally, a commenter strongly emphasized the desire to sustain a wide range of quality rehabilitation services for youth with disabilities and believed that restricting the legitimate engagement of State educational agencies with section 14(c) certificate holders would result in a reduction of service availability, and curtail learning opportunities and services available to youth with disabilities.

A commenter asked whether schools may contract with providers that offer subminimum wage and minimum wage services when the only service being contracted for would be opportunities paid at minimum wage.

A few commenters suggested that the regulatory language as proposed should not be modified to suggest that some types of contracts between an educational agency and an entity using section 14(c) certificates are permissible. A few others expressed support for the regulation but suggested that the language should clearly indicate that States cannot engage at all in any contracts for any vocational rehabilitation services with agencies that pay subminimum wages.

One commenter emphasized that the types of jobs students with disabilities are introduced to during high school correlate to the types of jobs they will obtain following graduation. They therefore supported proposed § 397.31, which reduces students' exposure to subminimum wage employment and increases students' opportunities for obtaining competitive integrated employment. Similarly, another commenter stated that limiting the opportunity for inadvertent slotting into subminimum wage employment is a step in the right direction for students with disabilities toward achieving competitive integrated employment. One commenter, citing research predicting post-school employment, suggested that all work-related activities to prepare individuals with disabilities for jobs and careers should happen in realistic integrated environments, not in segregated workplaces or where an individual is paid a subminimum wage.

A few commenters suggested that the formal interagency agreement between the DSU and the State educational agency in proposed 34 CFR 361.22 prohibit contracts or arrangements with, or referrals to, programs in which youth with disabilities are employed at subminimum wages. Commenters also recommended inserting the requirement for referrals in proposed § 397.31.

Other commenters suggested inserting the word ''sub-contract'' between ''contract'' and ''other arrangements'' to align proposed § 397.31 with the language in section 511(a) of the Act regarding entities, including contractors and subcontractors of entities. Additionally, many of these commenters also requested that the prohibition be extended to local and State educational agencies that operate a program where a youth with a disability is engaged in subminimum wage employment. A few commenters were unclear about the term ''other arrangement'' and interpreted this as not specifically prohibiting referrals to programs employing youth with disabilities at subminimum wages.

A number of commenters requested either that the Department issue guidance to local and State educational agencies clarifying that the contracting prohibitions only apply to contracts for the purposes of operating a program under which a youth with disabilities is

employed at subminimum wage. In the alternative, the commenters suggested that the Department require State educational agencies to issue clear policy directives to local educational agencies regarding the prohibition on State and local educational agencies contracting with section 14(c) certificate holders in order to pay individuals subminimum wages. In addition, commenters asked that the Department add additional language regarding the responsibilities of State educational agencies to enforce this provision.

Discussion: We appreciate the support for proposed § 397.31. We disagree with the recommendation that the Department of Labor should have oversight responsibility for the DSUs and the State educational agencies to ensure that subminimum wage employment is not being used inappropriately. Rather, both the Departments of Education and Labor have responsibilities for oversight under section 511. Specifically, the Department has sole responsibility for overseeing all requirements under section 511 and final part 397 that relate to requirements that fall under its purview, such as the documentation process and the prohibition against a State or local educational agency entering into a contract with an entity holding a special wage certificate for the purpose of operating a program in which a youth is compensated for work at subminimum wage. The Department of Labor, on the other hand, has sole responsibility for overseeing requirements that fall under its purview, such as those related to entities holding special wage certificates paying individuals with disabilities subminimum wages without the requirements of section 511 of the Act and final part 397 being met. There is no statutory authority for the Department to compel the Department of Labor to oversee entities, such as the DSUs and educational agencies, that are under the Department's purview.

We appreciate the significance of the contracting prohibition in section 511(b)(2) of the Act and the comments received in response to proposed § 397.31 seeking clarification and making recommendations. We agree with the substantial number of commenters that this section does not preclude State and local educational agencies from contracting with entities holding section 14(c) certificates, such as community rehabilitation programs, for purposes other than operating a program for youth under which work is compensated at a subminimum wage. In other words, nothing in section 511(b)(2) of the Act or final § 397.31 precludes a State or local educational agency from contracting with an entity, even if that entity holds a special wage certificate under section 14(c) of the FLSA, for another purpose, including the provision of transition and pre-employment transition services that are beneficial to students with disabilities, so long as they are not paid subminimum wage if compensation is provided. Pre-employment transition services under final 34 CFR 361.48(a) and assessment services provided to vocational rehabilitation consumers must be provided in integrated settings to the maximum extent possible. Further, nothing in section 511(b)(2) of the Act or final § 397.31 prohibits a State or local educational agency from contracting with an entity holding a special wage certificate for the purpose of operating a program in which the youth is paid at or above minimum wage. A State or local educational agency, prior to entering into such a contract, must ensure that the youth will be paid at least minimum wage. Only in doing this can the local or State educational agency ensure its compliance with section 511(b)(2) and final § 397.31. It is not necessary to revise final § 397.31 because the regulation mirrors the statute and states that the prohibition is against contracting for ''the purpose'' of operating a program for youth under which work is compensated at a subminimum wage.

The Department also agrees with commenters who regard the contracting prohibition as a step toward limiting the progression of students and transition-age youth into subminimum wage employment, since it seeks to limit the exposure of these individuals to settings that pay subminimum wages. Final § 397.31 raises expectations for both youth with disabilities and their families, and redirects them toward experiences leading to competitive integrated employment in the community.

While we understand the commenters' desire to align the language in final § 397.31 with section 511(a) of the Act, which references entities holding special wage certificates as well as their contractors and subcontractors, we disagree that it is necessary to specifically mention ''subcontractors'' in these final regulations. Final § 397.31 prohibits the State or local educational agency from entering into a contract or other arrangement with an ''entity, as defined in § 397.5(d)'' for the purpose of operating a program in which the youth is engaged in work compensated at a subminimum wage. Final § 397.5(d) defines ''entity'' as an employer, or a contractor or subcontractor of that employer, that holds a special wage certificate described in section 14(c) of the FLSA. Therefore, contractors and subcontractors of the employer holding the special wage certificate are already included in that definition, making specific reference to contractors and subcontractors unnecessary. The reference to ''other arrangements'' in both section 511(b)(2) and final § 397.31 refers to any other type of agreement (other than a contract), such as a memorandum of understanding or subcontract, through which the State or local educational agency makes arrangements with entities operating programs in which youth with disabilities are paid subminimum wages under section 14(c) of the FLSA. The term allows for a broad interpretation of the relationships that might exist between a local or State educational agency and an entity, as well as the types of agreements they may enter into to establish those relationships, including sub-contracts. For purposes of the requirements and limitations in final part 397 (including the contracting prohibition in final § 397.31), a local or State educational agency that holds a section 14(c) certificate to operate a program in which a youth with a disability is engaged in work compensated at a subminimum wage is treated in the same manner as any other entity holding a special wage certificate under section 14(c) of the FLSA.

We agree that the interagency agreement between the DSU and State educational agency, as described in 34 CFR 361.22, should include reference to the prohibition in final § 397.31. Therefore, 34 CFR 361.22(b)(6), both proposed and final, requires the interagency agreement to include an assurance that neither the State or local educational agency will enter into a contract or other arrangement for the purpose of operating a program in which youth with disabilities are engaged in work compensated at a subminimum wage. Thus, final 34 CFR 361.22(b)(6) ensures consistency between the interagency agreement required under that part and the requirements of final § 397.31.

The Secretary disagrees with the recommendation to revise final § 397.31 to prohibit local or State educational agencies from making referrals to entities holding special wage certificates. As discussed previously, as well as in detail in the preamble to final 34 CFR part 361, the Act does not prohibit services such as assessments, pre-employment transition services, and other services from being provided by

entities holding special wage certificates under section 14(c) of the FLSA. However, the Act requires that each of these services be provided, to the maximum extent possible, in integrated settings. We wish to point out that entities holding special wage certificates under section 14(c) of the FLSA, also include businesses, in addition to community rehabilitation programs, that operate in integrated settings in the community. The focus of the prohibition in final § 397.31 is the payment of subminimum wages to youth with disabilities–not the setting in which the work is performed. Therefore, there is nothing in the Act to prohibit a State or local educational agency from making a referral to such entity, so long as the purpose of the referral is not for the payment of subminimum wages to the youth with a disability.

With regard to the request that final § 397.31 be revised to specify that the State educational agency is responsible for enforcing final § 397.31, the Secretary disagrees that such change is necessary. First, the Department will be enforcing this provision through its regular monitoring activities. Second, the prohibition applies to both the State and local educational agencies; therefore, it would not be appropriate for the State educational agency to enforce a requirement against itself. As stated above, the Department intends to issue operating guidance to the States regarding the implementation of the requirements of final part 397, including the prohibition contained in final § 397.31.

Changes: None.

Responsibilities of a DSU for Individuals Regardless of Age in Subminimum Wage Employment (§ 397.40)

Counseling, Information and Referral Services

Comments: Many commenters expressed support for the provision of services by DSUs described in proposed § 397.40 for individuals employed at a subminimum wage, regardless of age. Many were encouraged by the requirement for ongoing information and referral, as well as, career counseling and the potential benefit that it could bring to consumers in the future. Others suggested that proposed § 397.40 require information be provided to family members and/or caregivers as appropriate, in addition to the individual. Still others asked that this section require the provision of benefits counseling so that individuals would understand the impact and benefits, rather than the perceived barriers, of moving out of subminimum wage employment into competitive integrated employment. A few indicated that it is imperative that any career counseling provide participants with information on Federal and State programs that continue healthcare and income supports to individuals with disabilities who engage in the workforce.

A few commenters expressed concerns related to the requirement to provide information and career counseling-related services to adults working in subminimum wage jobs, suggesting that the requirement places pressure on DSU staff and fiscal resources due to the sheer numbers of these individuals, and could impact the ability to serve all eligible individuals in the State through the VR program without implementing an order of selection.

Another commenter asked whether the services described in proposed § 397.40 were for all individuals or just those individuals that have been served by the DSU.

Regarding required intervals for providing information and referral and career counseling, many commenters provided requests for clarification and recommendations related to the semi-annual and annual intervals for providing these services to individuals in subminimum wage employment. Several recommended referencing and reconciling the requirements under proposed § 397.40 with those under proposed 34 CFR 361.55 related to semi-annual and annual reviews for individuals in extended employment or subminimum wage employment.

A few commenters sought clarification regarding the individuals to be served and whether there were differences in the requirements for youth and other individuals with disabilities. One commenter asked whether entities were to refer every subminimum wage employee for career counseling by January of 2017 or whether this section only applies to individuals who become employed in subminimum wage after the effective date of section 511, July 22, 2016, citing that, either way, the workload would be significant.

Another commenter questioned why these services were available every six months for the first year of employment only, suggesting that the more often individuals received career counseling and information and referral services, the more likely that the individual would become comfortable with the idea of future competitive integrated employment.

Discussion: We appreciate the support for, and extensive comments and recommendations received in response to, proposed § 397.40. Section 511 of the Act does not require that the DSU provide the information to the family or caregivers, as well as to the individual with a disability. As a recipient of services from a DSU, the individual with a disability would be protected by the provisions in final 34 CFR 361.38, governing the protection, use, and release of personal information, and other Federal and State privacy laws and regulations. For this reason, we lack the statutory authority to make the recommended change in final § 397.40. However, if an individual chooses to include family members and caregivers in such activities, nothing would prohibit DSUs or their contractors from doing so with the informed consent of the individual. On the other hand, if a parent, other family member, or another individual has power of attorney for or guardianship over, or has any other legal authority to act as the individual's representative, the DSU could provide the information to that representative in accordance with the laws governing that representation.

We agree with commenters that income-based benefits counseling would be beneficial to individuals with disabilities who are employed at subminimum wage. There is no prohibition in section 511 against providing benefits counseling as a part of information and referral or career counseling. The Secretary believes that information provided as part of benefits counseling could enable individuals with disabilities to have the information they need to understand the full opportunities provided by competitive integrated employment. For this reason, the Secretary has revised final § 397.40(a) by adding paragraph (4) to specify that career counseling and information and referral services may include benefits counseling, particularly with regard to the interplay between earned income and income-based financial, medical, and other benefits.

We understand the concerns and challenges with meeting the requirements under this section due to the potentially large numbers of individuals to be served on an annual or semi-annual basis. DSUs may contract these services to help mitigate the demands upon the DSU staff and resources. We also recognize these additional activities could impact a State's needs and decisions regarding order of selection. However, section 511 is explicit about the activities that must be performed by the DSU with regard to individuals with disabilities employed

at subminimum wage. Therefore, there is no statutory basis to limit the DSU's responsibilities under final § 397.40, which is consistent with section 511(c) of the Act.

To clarify, the services under this section are for any individual in subminimum wage employment, not just individuals who have been applicants or recipients of services under the VR program or who have been served by the DSU under another program administered by that agency.

With respect to career counseling, and whether requirements for information and referral and career counseling differ between youth and other individuals with disabilities, all are required. The timing for the semi-annual provision of career counseling and information and referral services applies only for an individual with a disability who begins employment at subminimum wage on or after the effective date of section 511 (July 22, 2016). This means, for example, that an individual who begins employment at subminimum wage on July 30, 2016, must receive the first provision of the semi-annual career counselling and information and referral services no later than January 30, 2017, and the second provision of the semi-annual services no later than July 30, 2017, and the annual set of services no later than July 30, of each year thereafter for as long as the individual maintains subminimum wage employment. For individuals who were already employed at subminimum wage when section 511 takes effect (July 22, 2016), the individual must receive career counseling and information and referral services at least once a year. Neither the statute nor these final regulations dictate when those annual reviews must be done. This is a matter for the entity holding the special wage certificate and/or the DSU to determine in terms of what works best within their operations. However, the Secretary clarifies here that all individuals employed at subminimum wage must have received the requisite first annual career counseling and information and referral services no later than July 22, 2017, and annually thereafter by that date. Consistent with the Act, all individuals employed at subminimum wage, regardless of date of employment, must receive career counseling by at least one year after the effective date of section 511.

We agree that frequent career counseling and guidance activities may assist individuals in subminimum wage employment to consider competitive integrated employment. Although the Act requires DSUs to provide these career counseling and information and referral services on a semi-annual basis for the first year of employment and annually thereafter, nothing in the Act prohibits a DSU from providing these services on a more frequent basis. The specific requirements for youth, and the semi-annual and annual counseling and information and referral requirements, along with the documentation requirements, as required by the statute become effective on July 22, 2016. The Secretary has revised final § 397.40(c) to make these requirements related to the required intervals more clear.

Changes: In final § 397.40(a), we added paragraph (4) to specify that the career counseling and information and referral services a DSU must provide may include benefits counseling, particularly with regard to the interplay between earned income and income-based financial, medical, and other benefits. We made revisions to final § 397.40(c) to provide that the required intervals for providing services under final §§ 397.40(a) and (b) will be calculated based upon the date the individual becomes known to the DSU. We revised final § 397.40(c) to clarify when the required services are due for both individuals hired at subminimum wage on or after the effective date of the statute and also for individuals hired at subminimum wage prior to that date. As part of the revisions to final § 397.40(c), we specified in paragraphs (c)(3)(i) and (ii) that DSUs are responsible for providing the required services only when that individual becomes ''known'' to the DSU, and we specified what it means to become ''known.''

Identification and Referral of Individuals

Comments: Several commenters requested that the phrase ''who are known'' be clarified, defined, or replaced with more specific language. A few thought that the language in proposed § 397.40(a)(2) was vague, limiting, or misleading and could be interpreted to mean it applies only to individuals who have been through the vocational rehabilitation process or who have been referred by the CAP.

A few commenters suggested that language be added mandating interagency agreements with the State educational agency, the State intellectual and developmental disabilities agency, and any other appropriate agency serving individuals who may be in subminimum wage employment to identify and refer individuals considering, or currently in, subminimum wage employment to the DSU. This suggestion aligned with other commenters who advocated a more expansive and proactive strategy by the DSU to identify all individuals who are contemplating or are currently in subminimum wage, which one commenter described as similar to ''child find'' under the IDEA. One commenter urged that a subsection be added to final 34 CFR 361.29(a)(1)(i) and (b) requiring the comprehensive statewide assessment under the VR program include information about individuals who are working in segregated and subminimum wage jobs for employers using section 14(c) certificates.

One commenter asked whether the DSU was required to track an individual working in a sheltered workshop setting who contacted the agency for independent living services.

Another commenter asked whether proposed § 397.40 establishes an affirmative requirement or expectation that DSUs or their contractors seek out individuals in subminimum wage employment, noting the potential issue of confidentiality between the individual and the employer.

A commenter suggested adding language that would require that any entity holding a section 14(c) certificate failing to refer an individual to the DSU have its section 14(c) certificate suspended until it has been documented that all employees working at subminimum wage have been referred to the DSU.

Some commenters suggested that coordination and guidance from the Federal Departments on the identification issues would be helpful.

Discussion: The use of the phrase ''who are known'' in several sections of these regulations highlights that the DSU must be aware that an individual with a disability is employed at the subminimum wage level in order to provide the services required by section 511 of the Act and final part 397, including the services and activities required by final § 397.40. Such awareness may be made through the self-identification by the individual with a disability, the vocational rehabilitation process, cooperative or coordinated activities with other agencies, or referral to the DSU, including referral by employing entities. Otherwise, there is no mandate in section 511 of the Act for the DSUs to seek out or solicit these individuals. To impose such a requirement in these final regulations would be extremely burdensome on the DSUs because of the thousands of entities holding special wage certificates under section 14(c) of the FLSA. It would not be practical or reasonable to expect or require the DSU to take on the role of seeking out individuals with disabilities who are

employed at subminimum wage. Moreover, confidentiality laws and regulations would prohibit the automatic release of personal information about the individual with a disability to the DSU without the written consent of the individual.

Furthermore, there is no statutory mandate for entities holding section 14(c) certificates to refer to the DSU employees or individuals with disabilities seeking to enter subminimum wage employment.

We considered using the words ''who are referred'' instead of ''who are known,'' but that phrase implied an active referral process required by other entities, all of whom are outside of the Department's purview. The phrase ''who are known'' allows for any method of identifying individuals to the DSU and clarifies there is no mandate that the DSU seek out or solicit individuals with disabilities employed at subminimum wage. In final § 397.40(a)(2), we are including ''self-referred'' in the list detailing examples of how the DSU knows of an individual. The Secretary has also added a paragraph in final § 397.40(c)(3)(ii) to clarify when an individual with a disability becomes ''known'' to the DSU.

While we agree that there is benefit in identifying individuals with disabilities in subminimum wage employment or those potentially seeking such employment, through interagency agreements with other State agencies such as the State educational agency, the State intellectual and developmental disabilities agency, and any other appropriate agency, we cannot require other agencies to make these referrals because section 511 does not impose any requirements on most of the agencies suggested by the commenters. State and local educational agencies will be providing, in effect, a referral when they transmit documentation to the DSU demonstrating the completion of transition and other services by students with disabilities. As stated in an earlier section of this preamble, we have encouraged DSUs and various other State and local agencies with whom they have relationships for cooperation and coordination of services, to include provisions in their interagency agreements related to the referral of individuals employed at subminimum wage. We do not believe it is appropriate to amend these final regulations to require such provisions because these matters are best left to the States to determine what meets their unique needs and circumstances. We expect that DSUs will use the opportunity as they develop relationships and agreements through the coordination and cooperative agreements set out in final 34 CFR 361.24 to seek cross-agency referrals.

With regard to entities holding 14(c) certificates under the FLSA, all authority to impose requirements (*e.g.,* consequences for failure to comply including suspension or revocation of the special wage certificate) rests with the Department of Labor and are beyond the scope of these final regulations.

We appreciate the question from the commenter who asked whether the DSU is required to track an individual who is employed in a sheltered workshop setting at subminimum wage, and who contacted the agency for independent living services. While such is not specifically required by statute, section 511 of the Act requires the DSU to provide certain services and/or documentation to individuals with disabilities, including youth with disabilities, who are seeking (for purposes of youth with disabilities only) or maintaining subminimum wage employment (for individuals with disabilities of any age). The Secretary has interpreted, for purposes of final part 397, and stated throughout this preamble, that the DSU must provide these required services or documentation to any individual with a disability whom it knows is seeking or maintaining employment at subminimum wage, not only individuals who have participated in the VR program or been referred by the CAP. As stated above, the DSU can know of these individuals in a variety of ways, including through the programs it administers, such as the VR program or the independent living programs. Therefore, if the DSU knows of an individual through the independent living program and knows that individual is seeking or maintaining subminimum wage employment, the DSU must provide the services and documentation required by section 511 of the Act and final part 397, including the requirements of final § 397.40.

We address the comment that we add requirements to the comprehensive statewide assessment to include information about individuals who are working in segregated and subminimum wage jobs for employers using section 14(c) certificates in the *Analysis of Comments and Changes* section for 34 CFR part 361, under the discussion of 34 CFR 361.29, earlier in this preamble.

It is anticipated that joint guidance from the Departments of Education and Labor is forthcoming and will address, among other aspects of WIOA, the limitations on use of subminimum wage if the required services and documentation have not been provided. In the meantime, the expectation is that, at every opportunity, DSUs will identify individuals with disabilities seeking employment or who are currently employed at a subminimum wage.

Changes: We revised final § 397.40(a)(2) to include ''self-referral'' and added a paragraph in final § 397.40(c)(3)(ii) to clarify when an individual with a disability becomes ''known'' to the DSU.

Financial Interest

Comments: With regard to self-advocacy, self-determination, and peer mentoring training opportunities, several commenters requested clarification related to ''financial interest'' and what entities may not provide these services. One commenter proposed language that specifically includes the entity that employs the individual at subminimum wages among those entities deemed to have a financial interest for the purpose of this section. Some commenters asked that we clarify that an entity providing subminimum wage employment to an individual may not provide self-advocacy, self-determination, and peer mentoring training opportunities to the individual.

A few commenters recommended that the Department further clarify that an entity that holds a section 14(c) certificate, but does not have a financial interest in the outcome of the individual, may provide the services required under section 511(c)(1). Some of those commenters expressed concern that an overly restrictive interpretation would have a detrimental impact on rural areas with few providers.

Several commenters regarded section 14(c) certificate holders as clearly having a ''financial interest'' and therefore, should be precluded from providing services required under this section. Although these entities may not have an immediate financial interest in the employment outcome of the individual, some commenters viewed them as having a definite interest in encouraging the individual to apply for vocational rehabilitation services in anticipation of being selected at a later time to provide employment or supported employment services.

Several commenters suggested that if the DSU contracts with public and private service providers to provide the services required for individuals who are currently in subminimum wage employment, rather than provide the services directly, language be added to proposed § 397.40 in the final regulations that explicitly and specifically prohibits section 14(c) certificate holders from providing these

services, to avoid what the commenters perceived as a clear conflict of interest for these entities. In this scenario, commenters emphasized that employers would have a financial interest in the outcome of these services and would not be positioned to provide adequate or objective career counseling.

Discussion: With regard to self-advocacy, self-determination, and peer mentoring training opportunities, several commenters requested clarification of ''financial interest'' and what entities may not provide these services. Based upon the comments and our assessment, we have determined that all entities holding special wage certificates under section 14(c), irrespective of whether any employ the individual receiving the services, have a financial interest or a potential future financial interest in providing these services. Therefore, these entities may not be used to provide these services. The Secretary believes that many organizations and providers are available and are already providing self-advocacy, self-determination, and peer mentoring training services, such as the centers for independent living (CILs) in each State. Although some commenters have expressed concern about the potentially detrimental impact on rural areas with few providers, the Secretary believes that virtual and electronic technology allows access to these services even if the provider is not physically located in a particular rural area.

We agree with the several commenters who suggested that if the DSU contracts with public and private service providers to provide the services required for individuals who are currently in subminimum wage employment, rather than provide the services directly itself, then the services may be provided, so long as the service providers are not section 14(c) certificate holders. We have added language in final § 397.40, therefore, that prohibits section 14(c) certificate holders from providing these services.

Changes: We inserted language in final § 397.40(e) stating that a contractor providing the services on behalf of the DSU may not be an entity holding a special wage certificate under section 14(c) of the FLSA as defined in final § 397.5(d).

Time Frames and Documentation Requirements

Comments: One commenter recommended that the Department set a time frame for providing documentation of the completion of activities under proposed § 397.40 to individuals with disabilities in subminimum wage employment, suggesting that this would circumvent resource-intensive disputes and inconsistencies in the interpretation of timeliness.

Discussion: Upon the suggestion of commenters, we include a specific time period for providing documentation of the completion of activities under final § 397.40 to individuals with disabilities in subminimum wage employment. This time frame is consistent with that in § 397.10 for the provision of documentation to youth with disabilities, thereby ensuring consistency between all provisions in final part 397 related to documentation. Similarly, the Secretary has revised final § 397.40 to set minimal content requirements for the documentation that must be provided to the individual demonstrating completion of the career counseling and information and referral services. Again, this new regulatory text is consistent with that contained in final § 397.10 and § 397.30.

Changes: We have included a time frame in final § 397.40(d) of no later than 45 calendar days after completion of the required activities or services for the DSU to provide documentation of activities in this section to individuals with disabilities; however, where extenuating circumstances exist, the DSU can have up to 90 calendar days after completion of the required activities or services. We also added final § 397.40(d)(1)(ii) to provide a time frame of 10 calendar days for DSUs to provide this documentation to an individual who has refused to participate in a required activity. We also added final § 397.40(d)(2) and (3) to specify minimum content requirements for the documentation DSUs must provide to individuals, including individuals who refuse to participate in a required activity. We added final § 397.40(d)(4) requiring DSUs to retain a copy of all documentation required by part 397, in a manner consistent with 2 CFR 200.333.

Clarifications

Comments: One commenter asked for an explanation as to why the DSU is only required to provide individuals in subminimum wage employment with self-advocacy, self-determination, and peer mentoring training opportunities, all of which are fundamental to achieving independence and self-sufficiency, if the employer holding a section 14(c) certificate has fifteen or fewer employees.

Clarification was sought by a few commenters regarding how proposed part 397 would impact clients of the DSU who are being paid subminimum wages in a community rehabilitation program as part of their training under an individualized plan for employment. Additionally, a commenter asked if the DSU may contract with businesses to perform a service in a workshop, for a limited time, as part of the individual's individualized plan for employment.

Discussion: The requirement that the DSU must provide individuals in subminimum wage employment with self-advocacy, self-determination, and peer mentoring training opportunities only when the employer holding a section 14(c) certificate has fifteen or fewer employees is consistent with the requirement of section 511(c)(3) of the Act. Employers holding a section 14(c) certificate that have more than fifteen employees are responsible for ensuring that individuals in subminimum wage employment are provided self-advocacy, self-determination, and peer mentoring training opportunities in accordance with section 511(c)(1)(B) of the Act. This provision removes the burden that would otherwise be experienced by small businesses as a result of these requirements by having the DSU provide the services instead.

The Secretary does not believe that final part 397 would impact clients of the DSU who receive a training stipend that is below minimum wage for work performed in a community rehabilitation program as part of their training under an individualized plan for employment. That being said, we encourage that all training and assessment take place in an integrated setting to the maximum extent possible to reinforce the expectation under the Act that all individuals with disabilities, given the proper training and supports, can achieve competitive integrated employment. However, neither section 511 of the Act nor final part 397 prohibits a DSU from entering into a contract with a business in which clients in training receive a training stipend that is below minimum wage. Unlike the prohibition against these contracts for State and local educational agencies, such a prohibition for DSUs would go beyond the scope of section 511 of the Act and these final regulations. We wish to emphasize, however, that section 511(b)(2) of the Act and final § 397.31 address contracting prohibitions for State and local educational agencies entering into contracts with entities holding section 14(c) certificates for the purpose of operating a program for youth in which work is compensated at a subminimum wage. In this case, work associated with a work experience, work adjustment training and extended employment, or other activities for which work is

compensated must be at or above the minimum wage.

Changes: None.

Review of Documentation (§ 397.50)

Comments: One commenter on proposed § 397.50 recommended that we clarify the review process and the necessary documentation required.

Most commenters responding to proposed § 397.50 regarding the role of the DSU in the review of individual documentation maintained by entities, as defined in proposed § 397.5(d) under this part, stated that the proposed regulation did not include sufficient language to provide for any enforcement mechanism, should the DSU discover that documentation does not exist or is not sufficient. Some commenters asked that an enforcement mechanism be included, reflecting, at a minimum, the requirement that the DSU report documentation deficiencies to the Department of Labor for action, or to the CAP. Some commenters suggested that, although the proposed regulation establishes a much needed opportunity to review individual documentation, it does not indicate what actions, including authorized corrective actions or revocation of section 14(c) certificates, may be taken if deficiencies are identified by the DSU or its contractor.

Several commenters recommended that we remove the proposed language that allows a contractor working for the DSU to conduct documentation reviews of section 14(c) certificate holders, viewing this as conflicting with section 511. They suggested that if the final regulations continue to allow contractors to conduct documentation reviews, that additional language be added that specifies parameters for such contractors, including a prohibition of the use of organizations that are section 14(c) certificate holders to conduct such reviews.

Several commenters requested that specified timelines for the review of documentation be added to enhance enforcement, and that language be added to specify that the CAP and protection and advocacy system have jurisdiction in reviewing compliance with Section 511 requirements.

A few commenters requested that we clarify whether the review of documentation by the DSU is a requirement, and if so, noted that the DSUs do not have the resources or expertise to conduct such reviews, suggesting that the reviews are best conducted by the agency responsible for the administration of the special wage certificate.

Another commenter shared concerns about the record-keeping responsibilities and the supporting documentation for monitoring purposes. Other commenters had questions and concerns pertaining to whether the DSU can make a blanket documentation of an entity, or if requests to review documentation must be made on an individual basis. Commenters recommended that the final regulations task the Department of Labor with the responsibility for documentation reviews based upon its experience with reviewing and monitoring entities for compliance with section 14(c) of the FLSA.

Discussion: We appreciate the comments regarding the need to review documentation of individuals who are employed at subminimum wage, consistent with the requirements in section 511. The commenters raise many important issues that necessitate clarification. As we discussed in an earlier section of the preamble for final part 397, neither section 511(e)(2)(B) of the Act nor final § 397.50 requires either the DSU or the Department of Labor to review documentation maintained by entities holding special wage certificates. Rather, both section 511(e)(2)(B) of the Act and final § 397.50 subject those entities to a review of documentation should the DSU or the Department of Labor conduct such reviews. We appreciate the concerns expressed by commenters about the strategies, responsibilities, resources, and expertise required to conduct documentation reviews. However, there is no statutory basis to task the Department of Labor, Wage and Hour Division, with this exclusive responsibility even though it has more experience in conducting reviews of entities involving documentation of compliance with section 14(c) under the FLSA. As noted previously, section 511(e)(2)(B) of the Act and final §§ 397.50 specify that both the DSU and the Department of Labor have authority to conduct these reviews. Therefore, to task only the Department of Labor with this responsibility in these final regulations would be inconsistent with the statute. While we understand the concerns about lack of resources, we disagree that the DSUs do not have sufficient expertise to conduct the reviews. In fact, much of the documentation to be reviewed would be that generated by the DSU itself and, therefore, would be familiar to the DSU. Moreover, we do not believe it is necessary to revise final § 397.50 to identify the documentation to be reviewed during a review under this section because the documentation that must be reviewed is set out in these regulations in final §§ 397.10, 397.20, 397.30, and 397.40. Given the intent of section 511 to limit the use of subminimum wage, the Secretary believes that DSUs, in conjunction with the Department of Labor may have an impact on the degree to which youth and other individuals with disabilities seek or maintain employment at subminimum wage through the documentation review process and the requirements set out elsewhere in this section.

Because there is no requirement that these reviews be done, neither the statute nor these final regulations establish a time frame for the reviews. Section 511(e)(B) of the Act provides that the reviews are to be done ''at such a time'' as may be necessary to fulfill the intent of section 511. Therefore, the timing of any such reviews must be determined by the DSU or the Department of Labor as either deems necessary.

We disagree with commenters that the DSU should report violations discovered during a review of documentation to the CAP. As previously discussed, the applicability of final part 397 to CAPs and protection and advocacy systems must be consistent with their responsibilities under their respective authorizing statutes and regulations. Monitoring and oversight activities are beyond the scope of the CAP's authority under section 112 of the Act. Therefore, we do not believe it is appropriate to include any specific language regarding their authority or jurisdiction in these final regulations.

We also appreciate the many comments and suggested regulatory language submitted by a variety of commenters related to the DSU's role in the review of documentation. We agree that enforcement measures and consequences for non-compliance are important; however, section 511 of the Act does not include specific enforcement authority for DSUs and to include such measures in the final regulations would be inconsistent with the Act. Enforcement of section 14(c) of the Fair Labor Standards Act rests with the Department of Labor, Wage and Hour Division. Additionally, consequences for non-compliance with the requirements for documentation prior to hiring youth with disabilities or continuing to employ individuals with disabilities of any age and the retention of documentation records by entities under section 511 also rests with the Department of Labor, Wage and Hour Division. Although section 511 does not require DSUs to report documentation

deficiencies to the Department of Labor, Wage and Hour Division for action, the Secretary agrees with commenters that such reporting would be consistent with the purpose of final part 397.

Similarly, if a parent or an individual with a disability brings an instance of non-compliance with the documentation or other requirements of section 511 to the attention of the DSU, we would encourage the DSU to report this to the Department of Labor, Wage and Hour Division as well. Therefore, the Secretary has revised final § 397.50 by adding a new paragraph (b) to specify that DSUs should report deficiencies to the Department of Labor's Wage and Hour Division. The Secretary has intentionally used ''should'' rather than ''must'' because there is no requirement that the DSUs conduct reviews and, there is no mechanism for enforcement for failing to report deficiencies. We also want to emphasize that the Secretary purposely used ''should'' rather than ''may'' to signal that the Department strongly encourages DSUs to report such deficiencies whenever they are found.

We disagree with commenters that the use of a contractor working for the DSU to conduct documentation reviews of section 14(c) certificate holders is inconsistent with section 511. In fact, section 511(e)(2)(B) refers to ''representatives working directly for'' the DSU or Department of Labor. If the authority to conduct reviews were limited to DSU or Department of labor personnel, the statute would have used such wording. Use of the words ''representative working directly for'' the DSU or Department of labor implies that it could be agency staff or contractors for those agencies. We agree, however, that if a contractor is working on behalf of the DSU to review documentation, the contractor may not be an entity holding a special wage certificate under section 14(c) of the FLSA. We believe that this is consistent with the intent of section 511 of the Act and, therefore, we include this language in final § 397.50(a).

Changes: We have revised final § 397.50 by adding a new paragraph (b) and redesignating the proposed language as paragraph (a). We have inserted additional language in final § 397.50(a) stating that the contractor may not be an entity holding a special wage certificate under section 14(c) of the FLSA. Final § 397.50(b) states that DSUs should report deficiencies noted during documentation reviews to the Department of Labor's Wage and Hour Division.

Executive Orders 12866 and 13563

Regulatory Impact Analysis

Under Executive Order 12866, the Secretary must determine whether this regulatory action is ''significant'' and, therefore, subject to the requirements of the Executive order and subject to review by OMB. Section 3(f) of Executive Order 12866 defines a ''significant regulatory action'' as an action likely to result in a rule that may—

(1) Have an annual effect on the economy of $100 million or more, or adversely affect a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities in a material way (also referred to as an ''economically significant'' rule);

(2) Create serious inconsistency or otherwise interfere with an action taken or planned by another agency;

(3) Materially alter the budgetary impacts of entitlement grants, user fees, or loan programs or the rights and obligations of recipients thereof; or

(4) Raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles stated in the Executive order.

This regulatory action is a significant regulatory action subject to review by OMB under section 3(f) of Executive Order 12866.

We have also reviewed these regulations under Executive Order 13563, which supplements and explicitly reaffirms the principles, structures, and definitions governing regulatory review established in Executive Order 12866. To the extent permitted by law, Executive Order 13563 requires that an agency—

(1) Propose or adopt regulations only upon a reasoned determination that their benefits justify their costs (recognizing that some benefits and costs are difficult to quantify);

(2) Tailor its regulations to impose the least burden on society, consistent with obtaining regulatory objectives and taking into account—among other things and to the extent practicable—the costs of cumulative regulations;

(3) In choosing among alternative regulatory approaches, select those approaches that maximize net benefits (including potential economic, environmental, public health and safety, and other advantages; distributive impacts; and equity);

(4) To the extent feasible, specify performance objectives, rather than the behavior or manner of compliance a regulated entity must adopt; and

(5) Identify and assess available alternatives to direct regulation, including economic incentives—such as user fees or marketable permits—to encourage the desired behavior, or provide information that enables the public to make choices.

Executive Order 13563 also requires an agency ''to use the best available techniques to quantify anticipated present and future benefits and costs as accurately as possible.'' The Office of Information and Regulatory Affairs of OMB has emphasized that these techniques may include ''identifying changing future compliance costs that might result from technological innovation or anticipated behavioral changes.''

We also have determined that this regulatory action would not unduly interfere with State, local, and tribal governments in the exercise of their governmental functions.

We have assessed the potential costs and benefits of this regulatory action. The potential costs associated with the regulations are those resulting from statutory requirements and those we have determined as necessary for administering these programs effectively and efficiently. Elsewhere in this section under the *Paperwork Reduction Act of 1995,* we identify and explain burdens specifically associated with information collection requirements.

In assessing the potential costs and benefits—both quantitative and qualitative—of these final regulations, we have determined that the benefits would justify the costs.

Need for Regulatory Action

Executive Order 12866 emphasizes that ''Federal agencies should promulgate only such regulations as are required by law, are necessary to interpret the law, or are made necessary by compelling public need, such as material failures of private markets to protect or improve the health and safety of the public, the environment, or the well-being of the American people.'' The Department's goal in regulating is to incorporate the provisions of the Act, as amended by WIOA, into the Department's regulations governing the VR program and Supported Employment program in parts 361 and 363, respectively, as well as to clarify, update, and improve these final regulations. This final regulatory action is also necessary to establish a new part 397 to implement specific provisions of section 511 of the Act, as added by WIOA, which fall under the purview of the Secretary. Section 511 of the Act, in general, places limitations on the use of

subminimum wages for individuals with disabilities.

Response to Comments on Reporting Burden Estimates VR Services Portion of the Unified or Combined State Plan Time Estimated for Submission

Comments: One commenter stated that the time estimated for compiling the VR services portion of the Unified or Combined State plan is not accurate, given all the new requirements under the Act, as amended by WIOA, for collaboration with other entities, providing training and technical assistance to employers, providing pre-employment transition services to students with disabilities, changes to CSPD requirements, and the new requirements in section 511 of the Act.

Discussion: We appreciate the concerns expressed by the commenter regarding the estimated burden associated with developing and submitting the VR services portion of the Unified or Combined State plan. The estimated additional burden represents the hours needed by a DSU to compile and submit information as part of the VR services portion of the Unified or Combined State plan describing how the DSU is implementing new VR program requirements under WIOA, not the time the DSU engages in the actual implementation of the various activities described in the plan. Consequently, we believe the estimated burden is accurate.

Changes: None.

Reports; Standards and Indicators

The Department received numerous comments on the burden associated with new data collection and reporting requirements under this rule and the joint rule implementing the performance accountability system for the core programs under section 116 of WIOA. Most of these commenters stated that we underestimated the costs of new data collection and reporting requirements in the *Summary of Potential Costs and Benefits* section of the *Regulatory Impact Analysis* for these rules. In particular, commenters raised concerns about estimates of the amount of time needed for the collection of new data and the quarterly reporting of individual data on open and closed service records, as well as the cost of changes to State management information systems.

Data Collection

Comments: In the NPRM, the Department estimated that it would take 15 minutes per vocational rehabilitation counselor to collect the new data required under WIOA. Several commenters stated that we underestimated the burden for collecting new data. One commenter asserted that this estimate did not allow adequate time for counselors to collect the new data. Another commenter suggested that a more accurate estimate of the time required is 15 minutes per open service record and not per counselor. Several commenters indicated the burden for data collection should be based upon varying estimates for the total amount of minutes to collect this data, based on an individual service record basis, including 15, 30, 60, and 120 minutes per service record.

Discussion: Upon further review, we have determined that time per data element provides a better estimate of the additional burden associated with the collection of new data required under WIOA, including the requirements in § 361.40 of these final regulations. As a result of this change in methodology the estimated annual burden for the collection of new data elements has increased significantly from the estimate in the NPRM. Specifically, we now estimate the burden for the collection of new data elements to be reported in the Individual Service Report (RSA–911) at one minute per data element. Additional information on the calculation of this burden estimate is provided in the *Summary of Potential Costs and Benefits* section of this *Regulatory Impact Analysis* under the subheading *Reports; Standards and Indicators.*

Changes: The estimated burden associated with the collection of new data in the RSA–911 Service Report discussed under the *Summary of Potential Costs and Benefits* of this final regulation (see *Reports; Standards and Indicators*) is calculated based on an average of one minute per data element.

Data Reporting

Comments: In the NPRM, the Department estimated that it would take an additional 50 hours per year per DSU to submit the RSA–911 data file due to the need to report all open service record data quarterly rather than closed service records annually. Several commenters stated that we underestimated the burden related to the change in reporting for the RSA–911, including our estimate of the number of hours it currently takes to prepare the current annual submission of the RSA–911 report. One commenter suggested that if it currently takes an average of 50 hours to submit the RSA–911 data file annually, it should take 200 hours to produce the four required quarterly reports because the staff time required to generate and verify the data is the same as it is for an annual report. However, another commenter stated that it will take 150 hours per quarter for an annual total of 600 hours to report RSA–911 data. Still another commenter said that due to the increase in complexity of the RSA–911 reporting, it would be appropriate to recalculate the quarterly burden for submitting the RSA–911 report as 400 hours, instead of 50 hours. One commenter claimed that its staff spent approximately 1,000 staff hours preparing the current annual RSA–911 report.

Discussion: We disagree that the hours needed to submit the RSA–911 file of data open records on a quarterly basis will require at least four times as many hours as the previous annual submission of data on closed records. DSUs spend an extensive amount of time each year analyzing and revising their closed record data prior to reporting. However, under these regulations, DSUs are expected to report a quarterly ''snapshot'' of their open case data, a process that will be much less labor intensive for each submission. States are expected to maintain accurate and timely data in their case management systems. These data should be quickly and efficiently exported via reporting software to generate the RSA–911 report each quarter. However, we recognize that States may incur some additional burden in ensuring the quality of the new data to be reported and thus have increased the estimated quarterly RSA–911 data submission burden.

Changes: The estimated annual burden for the submission of the RSA–911 data file on a quarterly basis has been increased from an average of 100 hours (25 hours per quarter), as estimated in the NPRM, to 120 hours (30 hours per quarter) per DSU.

Changes to State DSU Information Systems

Comments: Several commenters stated that the Department underestimated the burden associated with updating and modifying agency case management systems. One commenter stated that its cost estimate for making the required changes to the agency's case management system to collect new data and report open service record data on a quarterly basis vastly exceeds the Department's estimate of $31,000. Another commenter noted that the burden estimates omit any mention of the costs to train staff and monitor data quality during implementation, and to build or change data collection instruments and processes that may be needed to collect information directly from participants post-exit. Three

commenters specifically provided cost estimates for modifying their information systems to collect and report the additional data required by WIOA of $200,000 to $500,000, $1,000,000 to $2,000,000, and $6,311,040. One commenter indicated there will be additional costs to update the agency's data collection software, which includes interfacing with a centralized data collection database at the State level, as well as several State and Federal databases. Three commenters indicated that DSUs will incur additional costs to modify, develop and maintain information technology systems to capture the required data. Another commenter cited costs for modifying systems to capture new or modified data elements and building automation to link vocational rehabilitation service records to Unemployment Insurance wage data for the reporting of employment or earnings.

Discussion: In response to the comments regarding the burden associated with the reporting of data in accordance with final § 361.40 and as a result of further Departmental review, we have increased the burden estimate for modifying and maintaining agency information systems to collect and report the required new data. We recognize that modifications to agency case management systems necessitated by the redesigned RSA–911 will vary widely because agencies themselves range in size, the sophistication of their information technology systems, and how the system is supported. We are also aware that in addition to modifying their systems, agencies will incur increased labor and contractual costs to maintain their systems. The Department has taken these factors into consideration in calculating burden estimates for this final regulation and the joint final regulations. Additional information on the calculation of these burden estimates is provided in the *Summary of Potential Costs and Benefits* section of this *Regulatory Impact Analysis* under the subheading *Reports; Standards and Indicators.*

Changes: The Department has expanded its analysis and revised its burden estimates associated with modifying and maintaining agency information systems under the *Summary of Potential Costs and Benefits* of these final regulations (see subheading *Reports; Standards and Indicators)* to reflect State variation.

Proration of Burden

Comments: None.

Discussion: DSUs will report data required by section 101(a)(10)(C) of the Act, as amended by WIOA, under these final regulations and by section 116 of WIOA under the joint final regulations through the RSA–911. To more appropriately reflect the costs attributable to these two rules, we have prorated the burden based on an analysis of all new WIOA data elements to be reported through the RSA–911. Using this methodology, the Department estimates that approximately 64 percent of the increase in burden is related to these final regulations, while 36 percent is related to the joint final regulations.

Changes: Estimates of the total increase in burden for the collection and reporting of new data are prorated to reflect the 64 percent of burden attributed to requirements under these final regulations.

Summary of Potential Costs and Benefits

The Secretary believes the changes made by WIOA implemented through these final regulations will improve the programs covered in this final regulatory action and will yield substantial benefits in terms of program management, efficiency, and effectiveness. The Secretary believes that the final regulations represent the least burdensome way to implement the amendments to the Act made by WIOA. Due to the number of regulatory changes, our analysis focuses solely on new requirements imposed by WIOA, organized in the following manner. First, we discuss the potential costs and benefits related to implementing changes to the VR program under section A that specifically relate to: competitive integrated employment and employment outcomes, pre-employment transition services and transition services, and additional VR program provisions. Second, we discuss the potential costs and benefits related to implementing changes to the Supported Employment program under section B. Finally, we discuss the costs and benefits pertaining to implementing requirements of section 511 of the Act that fall under the purview of the Department under section C.

Where possible, the Department derived estimates by comparing the costs and benefits incurred under existing program regulations against the benefits and costs associated with implementing requirements contained in these final regulations. The Department also made an effort, when feasible, to quantify and monetize the benefits and costs of the final regulations. When unable to quantify benefits and costs—for example, due to data limitations—we describe them qualitatively. In accordance with the regulatory analysis guidance contained in OMB Circular A–4 and consistent with the Department's practices in previous rulemakings, this regulatory analysis focuses on the likely consequences (benefits and costs that accrue to individuals with disabilities) of these final regulations. In this analysis, the Department also considers the transfer of benefits from one group to another that do not affect total resources available to the VR program and Supported Employment program. However, in a number of instances, the Department is unable to quantify these transfers due to limitations of the data it currently collects.

This *Regulatory Impact Analysis* presents the Department's estimate of the additional labor and other costs and benefits associated with the implementation of the provisions in these final regulations. In estimating DSU labor costs for this analysis, we use Bureau of Labor Statistics (BLS) data on mean hourly wage rate for State employees, as well as data on employer compensation costs to calculate loaded wage factors.[1] [2] Loaded wage factors account for non-wage factors such as health and retirement benefits. We then multiplied the loaded wage factor by each occupational category's wage rate to calculate an hourly compensation rate used throughout this analysis to estimate the labor costs for each provision. For DSU personnel, we used a loaded wage factor of 1.57, which represents the ratio of average total compensation to average wages.[3]

For Federal employees we use wage rates from the Office of Personnel

[1] Bureau of Labor Statistics. (2014–2015). *May 2014–2015 national industry-specific occupational employment and wage estimates: NAICS 999200—State government, excluding schools and hospitals (OES designation).* Retrieved from: *http://www.bls.gov/oes/current/naics4_999200.htm.*

[2] Bureau of Labor Statistics. (2016). *2015). 2014 Employer Costs for Employee Compensation.* Retrieved from: *http://www.bls.gov/schedule/archives/ecec_nr.htm.*

The Department calculated this value using data from Table 3. ''Employer Costs per Hour Worked for Employee Compensation and Costs as a Percent of Total Compensation: State and Local Government Workers, by Major Occupational and Industry Group.'' Wages and salaries for all workers. Average Series ID CMU3020000000000D, CMU3020000000000P. To calculate the average wage and salary in 2014–2015 of $21,2228.41, we averaged the wage and salaries for all workers provided in March, June, September, and December releases.

[3] The State and local loaded wage factor was applied to all non-Federal employees. Discerning the number of State and local-sector employees and private-sector employees at the local level is difficult; therefore, the Departments used the State and local-sector loaded wage factor (1.5657) instead of the private-sector wage factor (1.43) for all non-Federal employees to avoid underestimating the costs.

Management's (OPM) Salary Table for the 2015 General Schedule for Federal employees.[4] For Federal employees, we used a loaded wage factor of 1.63 based on internal data from DOL.

A. Vocational Rehabilitation Program

Competitive Integrated Employment and Employment Outcomes

The Act, as amended by WIOA, emphasizes the achievement of competitive integrated employment by individuals with disabilities, including those with the most significant disabilities. Congress added a new term and accompanying definition to the Act—''competitive integrated employment,'' which represents, in general, a consolidation of two existing regulatory terms and their definitions—''competitive employment'' and ''integrated setting.'' In implementing the new term and its definition in these final regulations, we replaced the existing regulatory term and definition of ''competitive employment'' with the new term ''competitive integrated employment,'' by mirroring the statute and incorporating relevant critical criteria from the existing regulatory definition of ''integrated setting.'' Because this change is more technical than substantive, and given that the substance of the definition already existed in two separate definitions, we believe this particular change will have no significant impact on the VR program, thereby resulting in no added cost burden to DSUs.

In addition to implementing the new term and definition of ''competitive integrated employment'' in these final regulations, we also have revised the regulatory definition of ''employment outcome.'' While the Act, as amended by WIOA, made only technical changes to the statutory definition of ''employment outcome,'' the Secretary believes a regulatory change is necessary in light of other amendments made by WIOA throughout the Act that emphasize the achievement of competitive integrated employment under the VR program and Supported Employment program. Consequently, the Secretary defines ''employment outcome'' in these final regulations as an outcome in competitive integrated employment or supported employment, thereby eliminating uncompensated employment (*e.g.,* homemakers and unpaid family workers), which had been permitted to date as a matter of the Secretary's discretion, from the scope of employment outcomes for purposes of the VR program. The Secretary believes the regulatory definition of ''employment outcome'' in final § 361.5(c)(15) is consistent with all amendments to the Act made by WIOA, from the purpose of the Act to the addition of section 511. With the change to the definition of ''employment outcome,'' individuals with disabilities requiring homemaker or other unpaid family worker services will need to obtain those services, more appropriately, from independent living and other programs serving individuals with disabilities, not the VR program.

It is difficult to quantify the extent to which the change to the definition of ''employment outcome'' in these final regulations, which has the effect of eliminating homemakers and unpaid family workers from its scope, will affect VR program costs nationally due to a number of highly variable factors. For example, it is not known whether individuals who previously had achieved homemaker outcomes or would seek such outcomes will choose to pursue competitive integrated employment through the VR program in the future, or seek services from other resources, such as those available from independent living, aging, or other programs serving individuals with disabilities. Based on data reported by DSUs through the RSA–911 for the period beginning in fiscal year (FY) 1980 and ending in FY 2015, the percentage of individuals exiting the VR program as homemakers nationally declined significantly from 15 percent of all individuals achieving an employment outcome in FY 1980 to 1.7 percent in FY 2015 (representing 3,257 of the 186,209 total employment outcomes that year). While the national percentage of homemaker outcomes compared to all employment outcomes is small, some DSUs have a greater percentage of homemaker outcomes than others, particularly those serving only individuals who are blind and visually impaired. In FY 2015, the 24 DSUs that only provided services to individuals who are blind and visually impaired reported that 885 of the 6,442 employment outcomes in that year, or about 13.7 percent, were homemaker outcomes. DSUs that serve individuals with disabilities other than those with blindness and visual impairments reported 480 homemaker outcomes in that year, or 0.5 percent of the 96,404 employment outcomes. In addition, the 32 DSUs that serve individuals with all disabilities reported 1,892 homemaker outcomes in FY 2015, representing 2.3 percent of their total 83,362 employment outcomes.

The average cost per employment outcome, including the average cost per homemaker outcome, can be calculated based on data reported by DSUs in the RSA–911 on the cost of purchased services for individuals exiting the VR program with an employment outcome. In FY 2015, the average cost per homemaker outcome for the VR program was $6,574, while the comparable average cost per employment outcome for all individuals exiting the VR program with an employment outcome that year was $5,627. It is possible that this higher average cost is because individuals obtaining a homemaker outcome generally require more intensive services or costly equipment because the nature or severity of their disabilities have prevented them from pursuing competitive integrated employment. However, there may be other factors that increase the average cost of these outcomes. For example, it may be that some of these individuals originally had a goal of competitive employment, but after receiving services for an intensive or long period of time without obtaining such an outcome, they may have chosen to change their goal. Further analysis is needed to identify the factors that contribute to the average higher cost of homemaker closures.

Given current information reported to the Department by DSUs, we are not able to predict how many individuals who would have possibly had a homemaker outcome might now choose to seek competitive integrated employment. However, for the purpose of providing a gross estimate of these costs, we assume that approximately one-fourth (814) of the number of individuals who exited the VR program with a homemaker outcome will choose a goal of competitive integrated employment and continue to seek services through the VR program. We also assume that obtaining competitive integrated employment for these individuals may be more expensive than the current cost for obtaining a homemaker outcome, but also assume it is unlikely that the average costs for providing services to these individuals would exceed more than 150 percent of their current costs (or approximately 175 percent of the average cost per employment outcome for all agencies in FY 2015). As such, we estimate that the additional cost to DSUs to provide VR services to those individuals who previously would have exited the program with homemaker outcomes will not exceed $3,287 per outcome, or about

[4] The wage rate for Federal employees is based on Step 5 of the General Schedule (**Source:** OPM, 2014–2015, ''Salary Table for the 2014–2015 General Schedule''). Retrieved from: *https://www.opm.gov/policy-data-oversight/pay-leave/salaries-wages/salary-tables/pdf/2014/GS_h.pdf.*

$2,675,618 per year for all DSUs. Alternatively, assuming that about 75 percent of the number of individuals who would have otherwise attained a homemaker outcome will no longer seek services from DSUs (2,443), at an average cost of $6,574, there will be a savings of $16,060,282 to the VR program. Based on these assumptions, we estimate an overall net savings to the VR program of approximately $13,384,664.

We recognize that the change in the definition of ''employment outcome'' could potentially increase the demand for services from independent living and other programs, such as the Independent Living Services for Older Individuals Who Are Blind (OIB) program and other programs for aging individuals or persons with disabilities, that can provide services similar to those that such individuals would have previously sought from the VR program. We also recognize that meeting this potential increase in demand may result in a cost transfer to other Federal, State, and local programs. However, without additional information, such as the likelihood of how many consumers would access which programs, we cannot provide sound quantifiable estimates of potential cost transfers at this time.

For illustrative purposes we provide a quantitative description of the potential cost transfer to the OIB program resulting from the change in the definition of ''employment outcome'' in these final regulations. RSA–911 data show that 75.6 percent of individuals with a homemaker outcome in FY 2015 were individuals with blindness and visual impairments. In addition, 49 percent (1,208) of such individuals with a homemaker outcome were age 55 or older at application. We expect many of the individuals in the upper age range of this subgroup will be referred to and receive services through the OIB program. However, considering the differences in the focus of the VR and OIB programs and that a number of individuals with homemaker outcomes may have received employment-related services for a long period of time without obtaining a competitive integrated employment outcome, we expect the average cost per individual served for this population under the OIB program will be significantly lower than the average cost under the VR program. Assuming 75 percent of such individuals were to receive services from the OIB program at an average annual cost of $1,500 per individual, the annual cost transfer would be approximately $1.4 million. To assist States in meeting the increased demand for OIB services, including assistance in reducing the impact of the change in the definition of ''employment outcome'' in these final regulations for those States that have typically reported higher numbers of homemaker outcomes, the Administration's FY 2017 Budget Request includes a $2 million increase for the OIB program.

Pre-Employment Transition Services and Transition Services

The Act, as amended by WIOA, places heightened emphasis on the provision of pre-employment transition services and other transition services to students and youth with disabilities, as applicable. As a result, the Secretary makes numerous amendments in these final VR program regulations to implement new statutory requirements. A few of those changes are relevant to this discussion.

Final § 361.65(a)(3) requires DSUs to reserve at least 15 percent of the State's VR allotment for the provision of pre-employment transition services to students with disabilities who are eligible or potentially eligible for vocational rehabilitation services. Based on a total of $3.024 billion in VR grant funds awarded to States from FY 2015 appropriations, the total amount of funds required to be reserved for pre-employment transition services is $453.6 million. Overall, this reservation of funds will decrease the amounts available to support other authorized activities that State agencies provide through the VR program and result in a transfer of benefits from the VR eligible individuals a State agency may have historically served to students with disabilities in need of pre-employment transition services. Additionally, under final § 361.65(a)(3)(ii)(B), States may not include administrative costs associated with the provision of pre-employment transition services in the calculation or use of that reserved amount. We are unable to estimate the potential increase in DSU administrative costs that may arise from implementation of new section 113 of the Act or the required reservation of funds at this time. However, to implement these requirements, DSUs will need to dedicate resources to: (1) Ensure that the 15 percent minimum is reserved from the State's VR program allotment; (2) track the provision of pre-employment transition services to ensure the reserved funds were spent solely on allowable services specified in section 113 of the Act, as added by WIOA, and its implementing regulation in final § 361.48(a) and not on administrative costs; and (3) provide for administrative costs related to pre-employment transition services with non-reserved VR program funds.

Second, section 113 of the Act, as added by WIOA, requires DSUs to provide pre-employment transition services to students with disabilities who are eligible or potentially eligible for vocational rehabilitation services. In final § 361.48(a), ''potentially eligible'' means all students with disabilities who satisfy the definition in final § 361.5(c)(51), regardless of whether they have applied, and been determined eligible, for the VR program. The Secretary believes this interpretation is consistent with congressional intent and the stated desires of some DSUs and other stakeholders expressed through comments.

Although pre-employment transition services are a new category of services identified in the Act, many of these services historically were provided under the broader category of transition services. Therefore, the provision of these services is not new to DSUs. However, until the enactment of WIOA, all such services were provided only to those students with disabilities who had been determined eligible for the VR program. Consequently, providing pre-employment transition services to all students with disabilities under final § 361.48(a) will likely increase staff time and resources spent on the provision of these services.

We are unable to provide a quantitative estimate of the impact of this requirement on DSUs at this time because we do not currently have data on the number of students with disabilities that will be referred for such services or adequate data on the cost of providing pre-employment transition services. In the future, information provided by the State in the VR services portion of the Unified or Combined State plan and RSA data collections, such as the revised RSA–911, should assist the Department in assessing the impact of the pre-employment transition service requirements.

In general, the extent of the impact of the reservation on a particular State will likely depend on the extent to which it has been providing transition services that are now specified under section 113 as pre-employment transition services to students with disabilities. DSUs that have provided extensive transition services to students with disabilities, including services that would meet the definition of pre-employment transition services, are likely to see less transfer of benefits among individuals served. For State agencies that have not provided these services or have only provided these services to a small extent, there may be more extensive transfers of

services and benefits of the VR program among individuals (*i.e.,* to students with disabilities and away from other individuals who otherwise would have been served). We are extremely limited in our ability to estimate the annual amount that State agencies have spent in providing similar services to eligible individuals prior to the implementation of section 113 of the Act that would have met the definition of a student with a disability because we do not collect the necessary annual data under the currently approved RSA–911 report.

Under the current RSA–911, DSUs report individual level data in the year in which the service record is closed and the information reported on services and service costs are cumulative over the duration of the service record. In addition, while DSUs may directly provide many of the pre-employment transition services with VR staff, only the cost of services purchased by the agency on behalf of an individual are reported under the current RSA–911. Further, the pre-employment transition services that States are required to provide to students with disabilities are not specifically reported in the service categories of the currently approved RSA–911.

However, for illustrative purposes, FY 2015 data on closed service records reported in the RSA–911 (the most recent year for which full data are available) for youth who were between the ages of 16 and 21 at the time of application do provide some limited insight into the amount spent on purchased services for the service categories that DSUs would have most likely reported the receipt of services similar to pre-employment transition services. Although, the reservation requirement went into effect in FY 2015, we believe that it is still an appropriate base year since youth whose service records were closed in that year were not likely to have been affected by the new requirement.

DSUs reported service record closures in the FY 2015 RSA–911 for 98,454 youth who were between the ages of 16 and 21 at application and total purchase service costs of about $526.5 million (including about $11.6 million in title VI Supported Employment funds) for such youth. Because reporting is limited to closed cases, we are unable to determine the amount of the purchased services actually expended in FY 2015. However, at least 85 percent of these purchases were for categories of service that would not include pre-employment transition services as defined in final § 361.5(c)(42) (*e.g.,* postsecondary education, assessment, diagnosis and treatment, and on-the-job supports). Similarly, for the subset of youth whose service records were closed in FY 2015 that were in secondary education and had an IEP or were receiving services under section 504 at the time of application to the VR program (53,734 students), about 82 percent of the $245 million in reported purchased services for this group were for categories of service that would not meet the statutory definition of pre-employment transition services.

While it is important to note that RSA data show significant variation in the number and amount of funds spent for this age group among State agencies, available information indicates that many State agencies will experience challenges in meeting the new reservation requirement and will need to develop and implement aggressive strategies in order to expend these funds in the initial years of implementation.

Further, we recognize that the FY 2015 data include only those students with disabilities who had applied and been determined eligible for VR services and that under these final regulations DSUs will provide pre-employment transition services to students with disabilities who may not have applied or been determined eligible for the VR program. These final regulations also clarify that, in addition to secondary education, the term ''students with disabilities'' includes students in postsecondary or other recognized education programs that meet the age and other requirements contained in final § 361.5(c)(51).

Therefore, we anticipate that many DSUs will need to serve a larger number of students with disabilities in order to expend the reserved funds than they had prior to the passage of WIOA, thereby increasing the potential total value of the benefits transferred as a result of final § 361.48(a).

Fiscal reports submitted by DSUs appear to confirm the early challenges DSUs are having in spending these funds. FY 2015 fourth quarter Federal Financial (SF–425) reports document that in total, DSUs expended 33.6 percent of the $453.6 million that were required to be reserved for pre-employment transition services based on final FY 2015 State VR grant awards. Provided that States matched their Federal VR grant funds, the remaining amount of the required reservation would have been carried over for obligation and liquidation in FY 2016.

Despite these challenges, we are optimistic that as States implement the strategies described in the VR services portion of their Unified or Combined State plans to address the needs of students with disabilities for pre-employment transition services consistent with § 361.29 (a)(4) (*e.g.,* working with employers to provide opportunities for work-based learning experiences (including internships, short-term employment, apprenticeships, and fellowships), as required under final § 361.32(b), and coordinating with schools to ensure the provision of pre-employment transition services for students with disabilities as required under final § 361.48(a)(4)), they will adopt policies and practices that enable them to effectively spend the funds reserved for this purpose to improve employment outcomes for students with disabilities.

Third, section 103(b)(7) of the Act, as added by WIOA, and in its implementing regulation in final § 361.49(a)(7) permit DSUs to provide transition services to groups of youth and students with disabilities regardless of whether they have applied, and been determined eligible, for the VR program. Such services to groups were not permitted prior to the passage of WIOA. The regulation benefits DSUs in two significant ways by: (1) Giving them the ability to serve groups of youth and students with disabilities simultaneously, who may need only basic generalized services (*i.e.,* group tours of universities and vocational training programs, employer or business site visits to learn about career opportunities, career fairs coordinated with workforce development and employers to facilitate mock interviews and resume writing, and other general services), thereby reducing the amount of funds expended per individual; and (2) reducing administrative burden on the DSUs, as well as the burden on students or youth with disabilities and their families, by not having to engage in processes for determining eligibility, conducting assessments, and developing individualized plans for employment. However, we are unable to quantify the impact of this regulatory provision due to the variability in the number of individuals who may seek out these services nationally, the degree to which individuals will require these services within each State, and the services that will be provided in each State.

Additional Vocational Rehabilitation Program Provisions VR Services Portion of the Unified or Combined State Plan

Section 101(a)(1) of the Act, as amended by WIOA, requires the VR State plan, which has been a stand-alone State plan, to be submitted as a VR services portion of a Unified or Combined State plan for all six core programs of the workforce development system, including the VR program.

Requirements related to the submission of Unified or Combined State plans take effect in July 2016. Discussion of the burden associated with new Unified or Combined State plan requirements affecting all core programs, including the VR program, will be addressed in the *Regulatory Impact Analysis* for the joint final regulations published elsewhere in this issue of the **Federal Register**. This *Regulatory Impact Analysis* focuses solely on the impact of new requirements affecting the VR services portion of the Unified or Combined State plan and not any plan requirement that affects all core programs.

In preparing for the transition to the submission of Unified or Combined State plans every four years, with modifications submitted every two years of the four-year plan, the final regulations no longer require DSUs to submit particular reports and updates annually, but, rather, at such time and in such manner as determined by the Secretary as required in final § 361.29. This flexibility allows for VR program-specific reporting to be done in a manner consistent with those for the Unified or Combined State plan under section 102 or 103 of WIOA, thus avoiding additional burden or costs to DSUs through the submission of separate reports annually or whenever updates are made.

Section 101(a) of the Act, as amended by WIOA, requires DSUs to include additional descriptive information in the VR services portion of the Unified or Combined State plan. Therefore, final § 361.29 requires DSUs to describe in the VR services portion of the Unified or Combined State plan: (1) The results of the comprehensive statewide needs assessment with respect to the needs of students and youth with disabilities for pre-employment transition services and other transition services, as appropriate; (2) goals and priorities to address these needs; and (3) strategies for the achievement of these goals. Final § 361.24(c) also requires that the VR services portion of the Unified or Combined State plan include a description of how the DSU will work with employers to identify competitive integrated employment and career exploration opportunities, in order to facilitate the provision of VR services, including pre-employment transition services and transition services for youth and students with disabilities, as applicable. Final § 361.24(g) further requires that the VR services portion of the Unified or Combined State plan contain a description of collaboration with the State agency responsible for administering the State Medicaid plan under title XIX of the Social Security Act, the State agency responsible for providing services for individuals with developmental disabilities, and the State agency responsible for providing mental health services, to develop opportunities for community-based employment in integrated settings, to the greatest extent practicable. As a result, DSUs will be required to expend additional effort in the development of these descriptions in the VR services portion of the Unified or Combined State plan beyond the 25 hours previously estimated for the development and submission of the entire stand-alone VR State plan, now the VR services portion of the Unified or Combined State plan. We estimate that DSUs will require an additional five hours for the development of these descriptions, for a total of 30 hours (25 hours previous burden plus 5 hours new additional burden) per DSU, or 2,400 hours for all 80 DSUs. The average hourly compensation rate of $54.21—based on data obtained from the Bureau of Labor Statistics for State social and community service managers (*e.g.,* field services manager or other program manager responsible for development of the VR services portion of the Unified or Combined State plan) and the loaded wage factor—is more consistent with State rates of pay than the $22.00 per hour wage rate used to calculate costs from the most recent State plan information collection extension. At an hourly compensation rate of $54.21, each DSU would expend $271 in additional costs for the five hours needed to develop the new descriptions required for the VR services portion of the Unified or Combined State plan, resulting in a total of $21,684 and 400 additional hours for all 80 DSUs. Despite the additional costs incurred by all 80 DSUs in the development and submission of the State plan, we believe that the additional burden is more accurate and outweighed by the benefit to the public through a more comprehensive understanding of the activities DSUs engage in to assist individuals with disabilities to obtain the skills necessary to achieve competitive integrated employment in job-driven careers.

Order of Selection

Final § 361.36(a)(3)(v) implements section 101(a)(5) of the Act, as amended by WIOA, by permitting DSUs, at their discretion, to serve eligible individuals who require specific services or equipment to maintain employment, regardless of whether they are receiving VR services under an order of selection. DSUs implementing an order of selection are not required to use this authority; rather, they may choose to do so based on agency policy, or the availability of financial and staff resources. Under final § 361.36(a)(3)(v), DSUs implementing an order of selection must state in the VR services portion of the Unified or Combined State plan that they have elected to exercise this discretion, thereby signaling a decision to serve eligible individuals who otherwise might have been placed on a waiting list under the State's order of selection, and who are at risk of losing their employment. This change will increase flexibility for a State managing its resources. While a State that elects to implement this authority could prevent an individual from losing employment by avoiding a delay in services, DSUs doing so would potentially need to reallocate resources to cover expenditures for services or equipment for individuals who meet the qualifications of this provision and fall outside an open priority category of the DSU's order of selection.

For FY 2015, the VR State plans of 35 of the 80 DSUs (44 percent) documented that the agency had established an order of selection, one agency more than in FY 2014. This total includes two of the 24 DSUs serving only individuals who are blind and visually impaired and 33 of the 56 other DSUs. Based on data reported through the RSA–911 in FY 2015, nationwide, 20.4 percent of the individuals whose service records were closed and who received services were employed at application, with an average cost of purchased services of $4,617. In addition, according to data reported through the VR program Cumulative Caseload (RSA–113) report, 30,311 individuals nationwide were on a waiting list for VR services at the beginning of FY 2015 due to the implementation of an order of selection. Assuming that 20.4 percent of the 30,311 individuals on the waiting list could potentially benefit from the provision of services and equipment to maintain employment (which assumes individuals on a waiting list are just as likely to be employed at the time of application as individuals whose records were closed and received services), a possible 6,183 individuals could benefit from this regulatory change, for a total cost of $28,546,911 across all 80 DSUs. This figure represents the potential reallocation of resources to cover the cost of services for individuals who, prior to enactment of WIOA, may not have received them, and away from eligible individuals who would have received services based on a DSU's order of selection policy.

However, the implementation of an order of selection by a DSU may differ from year to year, as well as within a given fiscal year. In fact, not all DSUs that indicate they have established order of selections as part of their State plans actually implement those orders or report that they had individuals on waiting lists during the year. For example, 63 percent of such agencies (22 of 35) reported that they had individuals on a waiting list in FY 2015. In addition, we are unable to predict which DSUs that have implemented an order of selection will choose this option. The degree to which individuals will be referred for this service could vary widely among DSUs, as could the level of services or equipment that an individual may need to maintain employment.

Reports; Standards and Indicators

Final § 361.40 implements changes to reporting requirements in section 116(b) in title I of WIOA and section 101(a)(10) of the Act, as amended by WIOA. Final § 361.40 does not list the actual data to be reported, rather, it requires the collection and reporting of the information specified in sections 13, 14, and 101(a)(10) of the Act. New requirements under section 101(a)(10) include the reporting of data on the number of: Individuals with open service records and the types of services these individuals are receiving (including supported employment services); students with disabilities receiving pre-employment transition services; and individuals referred to the State VR program by one-stop operators and individuals referred to such one-stop operators by DSUs. The RSA–911 is revised as described in the information collection published for a 30-day public comment period at FR Document 2016–09713 consistent with the requirements in final § 361.40.

Final § 361.40 also requires States to report the data necessary to assess DSU performance on the standards and indicators subject to the performance accountability provisions described in section 116 of WIOA. The common performance accountability measures apply to all core programs of the workforce development system, including the VR program, and are implemented in part 677 of the joint regulations and set forth in subpart E of part 361. The impact and analysis of the joint regulations governing the common performance accountability system are addressed in the regulatory action for the joint regulations published elsewhere in this issue of the **Federal Register**.

In response to the comments regarding the burden associated with the collection of data under final § 361.40, described in the Comments section of this *Regulatory Impact Analysis,* and as a result of further Departmental review, we have adjusted the burden estimates as described here.

We have increased the estimated burden for the collection of the new data required by section 101(a)(10), including data required to assess State agency performance under section 106 of the Act by recalculating the estimates using the time DSUs will spend collecting these additional data elements. We estimate that on average it will take DSU staff one minute per data element to collect the new required data.

For the first year of data collection, DSUs will incur greater data collection burden than in subsequent years. As required by statute, the WIOA performance accountability system goes into effect July 1, 2016. All participants who are still receiving services (have not exited) by the start of program year (PY) 2016 become WIOA participants and will be counted and tracked in accordance with the WIOA performance requirements set forth in section 116 of WIOA. The final RSA–911 Information Collection Request (ICR) will include new and/or revised data elements and definitions as necessary to provide alignment with the WIOA Participant Individual Record Layout (PIRL) and comply with new requirements under the Act as amended by WIOA.

In order to meet the requirements in final § 361.40, DSUs will need to collect additional information for new applicants and VR consumers as well as current eligible individuals who, as of the effective date of section 116 of title I (July 1, 2016), met the definition of ''participant,'' as that term is defined under the joint final regulations implementing the jointly administered performance accountability system requirements of section 116 of title I of WIOA published elsewhere in this issue of the **Federal Register**.

DSUs are at varying stages of revising their case management systems consistent with the new joint data specifications described in the PIRL and the new elements required under title I of the Act as proposed in the ICR, published in the **Federal Register** on April 27, 2016 (81 FR 24888).

Based on data reported by DSUs through the Quarterly Caseload Report (RSA 113) for FYs 2014 and 2015, we estimate that in the first year of data collection DSUs will in total incur a minimum of about 800,000 hours of additional burden to collect new data for VR consumers (an average of 10,000 to 11,250 per DSU), including participants and reportable individuals in the VR system at the beginning of FY 2016, individuals who will be determined eligible during the first year of data collection, students with disabilities who are receiving pre-employment transition services and data needed for subminimum wage determinations under section 511 of the Act.

Based on data reported through the RSA–113 for FY 2015 and the proportion of new VR-specific data elements to all new data elements required by WIOA (64 percent), we estimate that DSUs will spend a total of approximately 512,000 hours collecting the new VR-specific data elements, or an average of 6,400 hours per DSU in the first year of data collection. We further estimate that vocational rehabilitation counselors will complete 50 percent of data collection activities for new VR-specific data elements, and that vocational rehabilitation technicians or similar personnel will complete the remaining 50 percent.

Using an hourly compensation rate of $36.66 for vocational rehabilitation counselors (wage rate based on State-employed rehabilitation counselors), the estimated cost for 50 percent of the data collection burden (256,000 hours) is $9,384,960. Using an hourly compensation rate of $28.29 for vocational rehabilitation assistants or equivalent positions (wage rate based on State-employed social and human service assistants [5] plus the loaded wage factor), the estimated cost for the remaining 50 percent of the data collection burden is $7,242,240. Consequently, we estimate that the total additional cost for all 80 DSUs to collect the new VR program-specific data elements is $16,627,200, or an average of $207,840 per DSU for the initial year of data collection.

For the second and subsequent years of data collection under these final regulations, we estimate that in total DSUs will incur about 200,000 hours of additional burden per year under WIOA. For new VR-specific data elements, we estimate 128,000 hours, or an average of 1,600 hours of additional annual burden per DSU, in the second and subsequent years of data collection. Using the same strategy to calculate the costs for the first year of data collection, we estimate that the total additional

[5] Bureau of Labor Statistics. (2015) *May 2015 national industry-specific occupational employment and wage estimates: NAICS 999200—State government, excluding schools and hospitals (OES designation).* Retrieved from: *http://www.bls.gov/oes/current/oes211093.htm.*

annual cost for all 80 DSUs to collect the new VR program-specific data elements is $4,156,800, or an average of $51,960 per DSU for the second and subsequent years of data collection. The remaining portion of the burden for new data collection attributed to the performance accountability requirements in section 116 of title I of WIOA ($10,558,080 or $131,976 per DSU) is included in the *Regulatory Impact Analysis* for the final joint regulations, published elsewhere in this issue of the **Federal Register**.

As described in the discussion of comments on this *Regulatory Impact Analysis,* we estimate an average of 70 additional burden hours per year, or a total of 120 hours per year (30 hours per quarter), for each DSU to submit the RSA–911 data file of open case service records on a quarterly basis. As a result, the estimated total number of hours needed for the submission of the data file for 80 agencies will increase from 4,000 to 9,600 hours, resulting in an increase of 5,600 hours. Using an average hourly compensation rate of $57.02 (wages based on State-employed database administrators), the estimated additional cost for all 80 DSUs to submit the RSA–911 data file of open service records on a quarterly basis is $319,312. The estimated additional cost per DSU is $3,991.

The total additional VR-specific burden hours for both collection and submission of required data will be 6,470 hours per DSU (6,400 data collection hours and 70 data submission hours), or a total of 517,600 hours for all 80 DSUs. The estimated total additional VR program-specific cost for both collection and submission per DSU is $211,831, with a total additional burden cost of $16,946,512 for all 80 DSUs.

DSUs will also incur additional costs related to programming and modifications of their case management systems to collect and report new VR program-specific data required under section 101(a)(10) of the Act. Additional burden related to the programming of case management systems as a result of the redesigned RSA–911 will vary widely because DSUs range in size and the sophistication of their information technology systems.

Upon further Departmental review since the publication of the NPRM, including the review of comments summarized in the Comments section of this *Regulatory Impact Analysis,* we have adjusted the estimates associated with the modification of DSU data systems. The adjusted estimates are based on: The apportionment of the data elements in the RSA–911 necessitated by the requirements of section 116 of WIOA and section 101(a)(10) of the Act, as amended by WIOA; adjustments to the wage rates for DSU personnel; and updated information regarding the variation in the level of effort required by DSUs to modify and maintain their data systems.

Although we estimate that each DSU will require computer systems analysts for this one-time task, the related burden for changing a State's case management system has been broken down to reflect the variation among the 80 DSUs with respect to their size and updated information regarding the number of DSUs that modify and maintain their case management and reporting systems and those that contract for these services. Roughly 30 of the 80 DSUs use case management and reporting systems purchased from software providers who are responsible for maintaining and updating the software. We estimate these 30 DSUs will require two computer systems analysts to spend 150 hours integrating the software changes into their own State systems, resulting in 300 hours per DSU, or a total of 9,000 hours in additional burden for all 30 DSUs. Of the remaining 50 DSUs that do not have agreements with a software provider to maintain and update software, five of these agencies are categorized as large agencies (more than 5,000 employment outcomes) and 45 of these agencies are categorized as small to medium-sized agencies (less than 1,000 employment outcomes, and between 1,000 and 5,000 employment outcomes, respectively). We estimate the five large agencies will require five computer systems analysts to spend 1,000 hours each to maintain and update agency software (for a total of 5,000 hours per agency), while the 45 small to medium-sized agencies will require two staff members to spend 1,000 hours each to maintain and update the software (for a total of 2,000 hours per agency) in order to make the necessary software changes. As a result, we estimate that the large agencies will need a total of 25,000 total hours and the small to medium-size agencies will need 90,000 hours, for a total of 115,000 hours for the 50 agencies to maintain and update computer software. Combining these estimates with the 9,000 hours for the 30 agencies that we believe will only have to integrate the software changes their providers are contracted to make, the total burden estimate for all 80 agencies is 124,000 hours. The VR program-specific burden (prorated at 64 percent of total burden) is estimated at 79,360 hours. We estimate that the cost burden for all 80 agencies to maintain and update their computer software based on a total of 79,360 VR-specific hours and an hourly compensation rate of $56.17 for State-employed computer systems analysts, will be $4,457,651. The balance of the burden in modifying agency data systems associated with the common data reporting requirements under title I of WIOA (36 percent) is included in the *Regulatory Impact Analysis* of the joint final regulations published elsewhere in this issue of the **Federal Register**.

In addition to maintaining and updating software, 48 agencies that utilize vendor supplied case management software will incur additional software licensing or user fees. Our discussions with case management software vendors informed our revised estimate of the average cost of $700.00 per user annually for software licensing or user fees, which will include a 20 percent increase due to new WIOA requirements, resulting in $140 of additional costs per user. Information obtained in discussions with case management software vendors also resulted in an estimate of approximately 6,600 users in States served by vendor systems. We estimate an additional total software licensing or user costs related to new WIOA requirements of $924,000. After adjusting this cost to reflect only the VR program-specific burden (64 percent), we estimate that the 48 States will incur an additional $591,360 in licensing or user fees, or $12,320 per agency.

Finally, the 80 DSUs will be required to train vocational rehabilitation counselors regarding the new data reporting requirements. To estimate this labor cost, we assume an average of 62 vocational rehabilitation counselors per agency and 8 hours of training per counselor. Using an hourly compensation rate of $36.66 per vocational rehabilitation counselor, the estimated labor costs for vocational rehabilitation counselors to receive training on collecting the new data is $1,454,669 for all 80 agencies, or $18,183 per agency. We estimate that development of the training materials and methodologies will require 1 staff trainer 8 hours per agency. Using the social and community service manager hourly compensation rate ($54.21) as a proxy for the staff trainer, the total cost for development of the training is $34,694, or $434 per agency. The total cost for development of the training and vocational rehabilitation counselor participation in the training is $1,489,363. Since we are estimating that approximately 64 percent of the burden related to performance accountability is VR-specific burden, the estimated cost

will be $953,192 for all 80 agencies, or $11,915 per agency.

Including all of the associated costs with the maintenance and updating of software ($4,457,651), licensing fees ($591,360), and agency staff training ($953,192), the estimated aggregate VR program-specific burden for all 80 agencies is $6,002,203, which does not include the additional initial year combined RSA–911 data collection and submission burden of $16,946,512 because that burden estimate was described separately above.

At the Federal level, RSA will develop its performance accountability and data analysis capacity using new staff positions. We estimate that it will take two full-time data management specialist positions, one at a GS–13 Step 5 and one at a GS–14 Step 5, to complete the necessary database programming requirements. With an hourly compensation rate of $64.71 for the GS–13 position and $76.48 for the GS–14 position, the total cost for software development is $293,675. Since we are estimating that approximately 64 percent of the burden related to performance accountability is VR-specific burden, the estimated cost will be $187,952.

We believe that these data collection and reporting costs are outweighed by the benefits to the VR program because the new information to be reported and having access to more timely information on individuals currently participating in the VR program will better enable the Department and its Federal partners to assess the performance of the program and monitor the implementation of WIOA, particularly as it relates to key policy changes, such as the provision of pre-employment transition services and the integration of the VR program in the workforce development system.

Extended Evaluation

Final §§ 361.41 and 361.42 remove requirements related to extended evaluation because the Act, as amended by WIOA, no longer includes references to such evaluations. Instead, a DSU must use trial work experiences when conducting an exploration of an individual with a significant disability's abilities, capabilities, and capacity to perform in work situations. These revisions streamline the eligibility determination process for all applicants whose ability to benefit from VR services is in question.

VR program data collected by the Department do not distinguish between individuals who had a trial work experience and those that had an extended evaluation. However, RSA–911 data show that 4,924 individuals exited from the VR program during or after trial work experiences or extended evaluations in FY 2015. DSUs expended a total of $4,126,785 on the provision of services to these individuals for an average cost of $838 per individual. Because we are unable to estimate how many of the 4,924 individuals were in extended evaluation, as opposed to trial work experiences, we cannot quantify either the current costs or the potential change in costs for this specific group of individuals. Based on the monitoring of DSUs, we note that the use of these services varies among DSUs, mainly due to variations in opportunities for individuals to participate in trial work experiences, and the extent to which DSUs historically utilized extended evaluation. We believe that the benefits of streamlining the eligibility determination process for applicants whose ability to benefit from VR services is in question and ensuring that ineligibility determinations are based on a full assessment of the capacity of an applicant to perform in realistic work settings outweighs the costs of removing the limited exception to trial work experiences.

Time Frame for Completing the Individualized Plan for Employment

Final § 361.45 implements section 102(b) of the Act, as amended by WIOA, by requiring DSUs to develop individualized plans for employment as soon as possible, but not later than 90 days after the date of determination of eligibility, unless the DSU and the eligible individual agree to the extension of that deadline to a specific date by which the individualized plan for employment must be completed. Due to variations in current DSU timelines for the development of the individualized plan for employment, the establishment of a 90-day timeframe by WIOA will ensure consistency across the VR program nationally and the timely delivery of services, thereby improving DSU performance and the achievement of successful employment outcomes by individuals with disabilities.

We are unable to quantify potential additional costs to DSUs to develop individualized plans for employment within 90 days of an eligibility determination due to the variance in timelines currently in place. It is likely that DSUs that have had prolonged timelines beyond 90 days prior to the enactment of WIOA could experience a change in annual expenditure patterns. For example, if larger numbers of individuals, with approved individualized plans for employment, begin to receive VR services at an earlier time than had historically been the case, an agency will expend its funds at a faster rate. However, while the overall cost per individual served is not likely to be affected by this provision, the average time before some DSUs incur expenses related to the development of, and provision of VR services under, individualized plans for employment could be shortened, resulting in a shift in the outlay of program funds for services sooner than in previous years. Therefore, in any given fiscal year, the outlay of program funds for these DSUs could be higher. While costs over the life of the service record should not be affected, some DSUs could find it necessary to implement an order of selection due to the transfer of costs that would have been incurred in a subsequent fiscal year to the current fiscal year. As always, DSUs are encouraged to conduct planning that incorporates programmatic and fiscal elements to make projections and assessments of VR program resources and the number of individuals served, using management tools including order of selection, as appropriate.

The Establishment, Development, or Improvement of Assistive Technology Demonstration, Loan, Reutilization, or Financing Programs

Section 103(b)(8) of the Act, as added by WIOA, permits a DSU to establish, develop, or improve assistive technology demonstration, loan, reutilization, or financing programs. Thus, final § 361.49(a)(8) permits DSUs to establish, develop, or improve these assistive technology programs in coordination with activities authorized under the Assistive Technology Act of 1998, to promote access to assistive technology for individuals with disabilities and employers. This regulation reflects the integral role assistive technology plays in the vocational rehabilitation and employment of individuals with disabilities. We are not able to quantify additional costs associated with this provision due to the variable nature of the specific assistive technology needs of individuals with disabilities, and the availability of assistive technology demonstration, loan, reutilization, or financing programs within each State.

Maintenance of Effort Requirements

Section 111(a) of the Act, as amended by WIOA, and final § 361.62(a) require the Secretary to reduce a State's annual VR program award to satisfy a maintenance of effort (MOE) deficit in any prior year. Before the enactment of WIOA, the Secretary could only reduce

the subsequent year's grant to satisfy an MOE deficit from the preceding fiscal year. If an MOE deficit was discovered after it was too late to reduce the succeeding year's grant, the Secretary was required to seek recovery through an audit disallowance, whereby the State repaid the deficit amount with non-Federal funds.

Because the Secretary is now able to reduce any subsequent year's VR program grant for any prior year's MOE deficit, DSUs benefit as they are no longer required to repay MOE shortfalls with non-Federal funds, thereby increasing the availability of non-Federal funds, in those instances, for obligation as match under the VR program. Since FY 2010, two States were required to pay a total of $791,342 in non-Federal funds for MOE penalties because their MOE shortfall was not known prior to the awarding of Federal funds in the year after the MOE deficit. Consequently, these funds were unavailable to be used as matching funds for the VR program in the year they were paid. On the other hand, the new authority could have resulted in the deduction of the $791,342 MOE penalties from a Federal award that was not limited to the year immediately following the year with the MOE deficit.

B. The Supported Employment Program

Services to Youth With the Most Significant Disabilities in Supported Employment

Section 603(d) of the Act, as amended by WIOA, and final § 363.22 require DSUs to reserve 50 percent of their State Supported Employment Services Program grant allotment to provide supported employment services, including extended services, to youth with the most significant disabilities. This new requirement is consistent with the heightened emphasis throughout the Act on the provision of services to youth with disabilities, especially those with the most significant disabilities, and is consistent with the final VR program regulations in part 361, since the Supported Employment program is supplemental to that program.

In addition, section 606(b) of the Act, as amended by WIOA, and final § 363.23 require States to provide a 10 percent match for the 50 percent of the Supported Employment allotment reserved for the provision of supported employment services, including extended services, to youth with the most significant disabilities. Prior to the enactment of WIOA, there was no match requirement under the Supported Employment program.

Finally, section 604 of the Act, as amended by WIOA, and final § 363.4(b) permit DSUs to provide extended services, for a period not to exceed four years, to youth with the most significant disabilities. DSUs may use the reserved funds to provide these extended services, as well as supported employment services, to youth with the most significant disabilities. Prior to the enactment of WIOA, DSUs were not permitted to provide extended services to any individual, including youth with the most significant disabilities.

After setting aside funds to assist in carrying out section 21 of the Act, the FY 2015 Federal appropriation provided $27,272,520 for distribution to DSUs under the Supported Employment State Grants program. Assuming States were able to provide the required 10 percent non-Federal match for the available Supported Employment formula grant funds in FY 2015, the 50 percent reservation would result in the dedication of $13,636,260 for supported employment services, including extended services, to youth with the most significant disabilities. Conversely, the reserved funds would not be available for the provision of supported employment services to individuals who are not youth with the most significant disabilities, and may be viewed as a transfer of title VI funds from these individuals to youth with the most significant disabilities. The 10 percent match requirement would generate $1,515,140 in non-Federal funds for supported employment services, including extended services, for youth with the most significant disabilities. The match requirement represents additional non-Federal funds that States must expend in order to obligate and expend the Federal funds reserved for youth with the most significant disabilities. If the appropriation increases in future years, the match requirement would result in additional supported employment resources for youth with the most significant disabilities. However, States will have to identify additional non-Federal resources in order to match the Federal funds reserved for this purpose.

Finally, as stated above, DSUs may provide extended services to youth with the most significant disabilities, whereas prior to the enactment of WIOA such services were not permitted for individuals of any age. Under the Act, as amended by WIOA, DSUs still may not provide extended services to individuals with the most significant disabilities who are not also youth with the most significant disabilities. Since extended services have not previously been an authorized activity with the use of VR program or supported employment program funds, this change could have a significant impact on States by creating a funding source for these services that previously was not available. However, because this is not a service that was previously permitted under either the VR program or the Supported Employment program, the Department has no data on which to quantify the impact this new requirement will have on States.

Extension of Time for the Provision of Supported Employment Services

Section 7(39) of the Act, as amended by WIOA, and final § 361.5(c)(54) amend the definition of ''supported employment'' to permit the provision of supported employment services for a period up to 24 months, rather than the previous 18 months. Although contained in part 361, the definition of supported employment services applies to both the VR program and Supported Employment program. DSUs have the authority to exceed this time period under special circumstances if jointly agreed to by the individual and the vocational rehabilitation counselor.

The change will benefit individuals with the most significant disabilities who require ongoing support services for a longer period of time to achieve stability in the employment setting, prior to full transition to extended services. This provision could result in DSUs using more resources under both the VR program and Supported Employment program to provide ongoing services.

DSUs typically have not provided ongoing support services for a full 18 months for a majority of their consumers. In FY 2015, 13,652 individuals achieved supported employment outcomes within 21 months following the development of the individualized plans for employment, which period we assume could include the provision of supported employment services for a full 18 months and a minimum period of 90 days prior to program closure. Of these individuals, 9,592, or approximately 70.2 percent, achieved supported employment outcomes within 12 months. While we anticipate that most individuals may not need supported employment services for the full 24 months, in FY 2015, 1,783 individuals achieved supported employment outcomes within a period ranging from 21 months to 27 months of the development of the individualized plan for employment. DSUs in total expended $13,237,902 on purchased services for these individuals, or an average of $7,425 per individual.

Assuming this period includes the provision of supported employment services for a full 24 months and a minimum period of 90 days prior to program closure, we estimate that an approximate number of individuals would benefit from the provision of supported employment services for an additional six months and that DSUs would incur similar costs for the provision of these services as a result of the regulatory change.

Limitations on Supported Employment Administrative Costs

Section 603(c) of the Act, as amended by WIOA, and final § 363.51(b) reduce the maximum amount of a State's grant allotment under the Supported Employment program that can be used for administrative costs from 5 percent of the State's grant allotment to 2.5 percent. As a result, a larger portion of Federal Supported Employment funds must be spent on the provision of supported employment services, including extended services to youth with the most significant disabilities, rather than administrative costs. However, any administrative costs incurred beyond the 2.5 percent limit on the use of Supported Employment funds may be paid for with VR program funds.

Based upon the $27,272,520 allotted to States under the Supported Employment program in FY 2015, the total allowable amount of these Federal funds that could be used to support administrative costs would be reduced by half, from $1,363,626 to $681,813. Thus, for those DSUs that have typically used more than 2.5 percent of their Supported Employment program allotment to cover administrative costs, the change would provide a small increase in the amount of funds available for the provision of services to individuals with the most significant disabilities pursuing a supported employment outcome. DSUs may shift these excess costs to the VR program since it does not have a cap on the amount of funds that can be spent on administrative costs under that program. We cannot estimate the impact of this shift on the VR program because DSUs do not report data showing the amount of VR program funds spent on administrative costs for the Supported Employment program.

C. Limitations on the Use of Subminimum Wage

Section 511 of the Act, as added by WIOA, imposes limitations on the payment of subminimum wages by employers who hold special wage certificates under the Fair Labor Standards Act. These statutory requirements take effect on July 22, 2016.

Pursuant to section 511 of the Act, as added by WIOA, final § 397.10 requires the DSU, in consultation with the State educational agency, to develop a process, or utilize an existing process, that ensures individuals with disabilities, including youth with disabilities, receive documentation demonstrating completion of the various activities required by section 511. Final §§ 397.20 and 397.30 establish the documentation that the DSUs and local educational agencies, as appropriate, must provide to demonstrate an individual's completion of the various activities required by section 511(a)(2) of the Act. These include completing pre-employment transition services under final § 361.48(a) and the determination under an application for VR services under final §§ 361.42 and 361.43. Final § 397.40 establishes the documentation that the DSUs must provide to individuals with disabilities upon the completion of certain information and career counseling-related services, as required by section 511(c) of the Act. We are not able to quantify the costs to the DSUs related to the provision of this required documentation because the number of youth and other individuals who potentially could receive services under part 397 will vary widely from State to State. In addition, there exists no reliable national data on which to base a calculation of costs. However, DSUs generate documentation throughout the vocational rehabilitation process that may meet the requirements of final §§ 397.20 and 397.30, including written notification of a consumer's eligibility or ineligibility, copies of individualized plans for employment and subsequent amendments, and written notification when the consumer's record is closed. As a result, the use of this documentation to meet section 511 requirements should not result in significant additional burden to DSUs.

Paperwork Reduction Act of 1995

The Paperwork Reduction Act of 1995 does not require the public to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control numbers assigned to collections of information in these final regulations are: 1205–0522 (Required Elements for Submission of the Unified or Combined State Plan and Plan Modifications under the Workforce Innovation and Opportunity Act), 1820–0013 (Cumulative Case Report), 1820–0017 (Annual Vocational Rehabilitation Program/Cost Report), 1820–0508 (VR Case Service Report), 1820–0563 (Annual Report of Appeals), 1820–0693 (Program Improvement Plan), and 1820–0694 (VR Program Corrective Action Plan). WIOA made several significant changes that affect the VR program collections of information. These substantive changes will be submitted to OMB with the final regulations.

Required Elements for Submission of the Unified or Combined State Plan and Plan Modifications Under the Workforce Innovation and Opportunity Act (1205–0522)

Section 101(a) of the Act, as amended by WIOA, adds new content requirements to the State plan, which is now submitted as the VR services portion of the Unified or Combined State Plan under section 102 or 103 of title I of WIOA. As a result, these information collection requirements are contained in the Required Elements for Submission of the Unified or Combined State Plan and Plan Modifications, and we will discontinue the VR State Plan (OMB 1820–0500). In the NPRM, we described the substantive changes to the content of the VR State Plan, now collected under the VR services portion and supported employment supplement of the Unified or Combined State Plan (OMB control number 1205–0522), caused by final §§ 361.10, 361.18, 361.24, 361.29, and 361.36, along with final §§ 363.10 and 363.11. In addition, the form includes previously approved information collection requirements related to a number of regulations that remained unchanged as a result of the amendments to the Act, including §§ 361.12, 361.13, 361.15, 361.16, 361.17, 361.19, 361.20, 361.21, 361.22, 361.23, 361.25, 361.26, 361.27, 361.30, 361.31, 361.34, 361.35, 361.37, 361.40, 361.46, 361.51, 361.52, 361.53, and 361.55. We have made no changes in the content of the VR services portion of the Unified or Combined State Plan and supported employment supplement since publication of the NPRM.

In the NPRM, we increased the estimated time for each DSU to prepare and submit the VR services portion of the Unified or Combined State Plan and its supported employment supplement from 25 to 30 hours annually.

In addition, the total cost of this data collection increased due to the proposed adjustment to the average hourly wage rate of State personnel used to estimate the annual burden for this data collection from $22.00 to $39.78, so that wage rates are consistent with data reported by the Bureau of Labor Statistics. As a result of these changes, we estimated in the NPRM a total annual burden of 2,400 hours (30 hours for each of the 80 respondents), at

$39.78 per hour, for a total annual cost of $95,472.00. Since publication of the NPRM, we have adjusted the total annual estimated cost burden for submission of the VR services portion of the Unified or Combined State Plan due to further adjustments in the average hourly wage rate for State personnel responsible for the submission of the form of $54.21 based on data from the Bureau of Labor Statistics, for a total of $130,104 for all 80 agencies.

VR Case Service Report (1820–0508)

The VR Case Service Report is used to collect annual individual level data on the individuals that have exited the VR program, including individuals receiving services with funds provided under the Supported Employment program. Sections 101(a)(10) and 607 of the Act contain data reporting requirements under the VR program and Supported Employment program, respectively. WIOA amends these sections to require States to report additional data describing the individuals served and the services provided through these programs. In addition, WIOA amends section 106 of the Act by requiring that the standards and indicators used to assess the performance of the VR program be consistent with the performance accountability measures for the core programs of the workforce development system established under section 116 of WIOA. We described in the NPRM the substantive changes made to final §§ 361.40 and 363.52 that cause substantive changes to the active and OMB-approved data collection under 1820–0508—the VR Case Service Report (RSA–911). Since publication of the NPRM, we have made no substantive changes to the RSA–911 as a result of changes in these final regulations or the joint final regulations governing the performance accountability system published elsewhere in this issue of the **Federal Register**. However, since the NPRM, we have modified the RSA–911 to incorporate changes in the data collected through the joint ICR. In addition, we have revised the layout of the form in response to comments to better align the collection of specific data elements with the VR process and to clarify the data needed to track the provision of pre-employment transition services and the achievement of supported employment outcomes.

In the NPRM, we increased the estimated burden for the submission of the RSA–911 caused by the reporting of the data for both open and closed cases on a quarterly basis. We estimated the total annual reporting burden to be 8,000 hours at $33.63 per hour (a rate more consistent with the rate reported through the Bureau of Labor Statistics for State-employed database administrators), for a total annual cost of $269,040.

As described in the *Regulatory Impact Analysis* section of these final regulations, we have increased the estimated burden associated with the RSA–911 since publication of the NPRM for several reasons. We now include in the estimated burden the time needed for both collection and submission of the data. Previous burden estimates were based only on the time needed to prepare and submit the RSA–911. In addition, we have changed the method used to estimate the time needed to collect the data from a total of 15 minutes per vocational rehabilitation counselor to one minute for each new data element in the form. We also have revised the estimated hours associated with the submission of the data on a quarterly basis from a total of 100 per year to a total of 120 hours (30 hours per quarter). Finally, we now estimate that 64 percent of the new data elements are required by substantive changes to the VR program-specific requirements in section 101(a)(10) of the Act and the remaining 36 percent are required by section 116 of WIOA. We have prorated the estimated burden for the collection of the new data elements based on these percentages. As a result of these changes, the total additional VR-specific burden hours for both collection and submission of required data is 6,470 hours per VR agency (6,400 data collection hours and 70 data submission hours), or a total of 517,600 hours for all 80 VR agencies. The estimated total additional VR program-specific cost for both collection and submission per VR agency is $211,831, with a total additional burden cost of $16,946,512 for all 80 VR agencies.

Intergovernmental Review

These programs are subject to Executive Order 12372 and the regulations in 34 CFR part 79. One of the objectives of the Executive order is to foster an intergovernmental partnership and a strengthened federalism. The Executive order relies on processes developed by State and local governments for coordination and review of proposed Federal financial assistance.

This document provides early notification of our specific plans and actions for these programs.

Assessment of Educational Impact

In the NPRM we requested comments on whether the proposed regulations would require transmission of information that any other agency or authority of the United States gathers or makes available. We received no comments.

Federalism

Executive Order 13132 requires us to ensure meaningful and timely input by State and local elected officials in the development of regulatory policies that have federalism implications. ''Federalism implications'' means substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. In the NPRM we stated that parts 361, 363, and 397 may have federalism implications and encouraged State and local elected officials to review and provide comments on the proposed regulations. In the *Public Comment* section of this preamble, we discuss any comments we received on this subject.

Accessible Format: Individuals with disabilities can obtain this document in an accessible format (*e.g.,* braille, large print, audiotape, or compact disc) on request to the person listed under **FOR FURTHER INFORMATION CONTACT**.

Electronic Access to This Document: The official version of this document is the document published in the **Federal Register**. Free Internet access to the official edition of the **Federal Register** and the Code of Federal Regulations is available via the Federal Digital System at: *www.gpo.gov/fdsys*. John B. King, Jr.,

Secretary of Education.

The Secretary of Education amends 34 CFR chapter III as follows:

■ 1. Part 361 is revised to read as follows:

PART 361—STATE VOCATIONAL REHABILITATION SERVICES PROGRAM

Subpart A—General

Sec.

361.1 Purpose.
361.2 Eligibility for a grant.
361.3 Authorized activities.
361.4 Applicable regulations.
361.5 Applicable definitions.

Subpart B—State Plan and Other Requirements for Vocational Rehabilitation Services

361.10 Submission, approval, and disapproval of the State plan.
361.11 Withholding of funds.

Administration

361.12 Methods of administration.
361.13 State agency for administration.
361.14 Substitute State agency.
361.15 Local administration.
361.16 Establishment of an independent commission or a State Rehabilitation Council.
361.17 Requirements for a State Rehabilitation Council.
361.18 Comprehensive system of personnel development.
361.19 Affirmative action for individuals with disabilities.
361.20 Public participation requirements.
361.21 Consultations regarding the administration of the vocational rehabilitation services portion of the Unified or Combined State Plan.
361.22 Coordination with education officials.
361.23 *[Reserved]*
361.24 Cooperation and coordination with other entities.
361.25 Statewideness.
361.26 Waiver of statewideness.
361.27 Shared funding and administration of joint programs.
361.28 Third-party cooperative arrangements involving funds from other public agencies.
361.29 Statewide assessment; annual estimates; annual State goals and priorities; strategies; and progress reports.
361.30 Services to American Indians.
361.31 Cooperative agreements with private nonprofit organizations.
361.32 Provision of training and services for employers.
361.33 [Reserved]
361.34 Supported employment State plan supplement.
361.35 Innovation and expansion activities.
361.36 Ability to serve all eligible individuals; order of selection for services.
361.37 Information and referral programs.
361.38 Protection, use, and release of personal information.
361.39 State-imposed requirements.
361.40 Reports; Evaluation standards and performance indicators.

Provision and Scope of Services

361.41 Processing referrals and applications.
361.42 Assessment for determining eligibility and priority for services.
361.43 Procedures for ineligibility determination.
361.44 Closure without eligibility determination.
361.45 Development of the individualized plan for employment.
361.46 Content of the individualized plan for employment.
361.47 Record of services.
361.48 Scope of vocational rehabilitation services for individuals with disabilities.
361.49 Scope of vocational rehabilitation services for groups of individuals with disabilities.
361.50 Written policies governing the provision of services for individuals with disabilities.
361.51 Standards for facilities and providers of services.
361.52 Informed choice.
361.53 Comparable services and benefits.
361.54 Participation of individuals in cost of services based on financial need.
361.55 Semi-annual and annual review of individuals in extended employment and other employment under special certificate provisions of the Fair Labor Standards Act.
361.56 Requirements for closing the record of services of an individual who has achieved an employment outcome.
361.57 Review of determinations made by designated State unit personnel.

Subpart C—Financing of State Vocational Rehabilitation Programs

361.60 Matching requirements.
361.61 Limitation on use of funds for construction expenditures.
361.62 Maintenance of effort requirements.
361.63 Program income.
361.64 Obligation of Federal funds.
361.65 Allotment and payment of Federal funds for vocational rehabilitation services.

Subparts D–F—[Reserved]

Authority: Section 12(c) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 709(c), unless otherwise noted.

Subpart A—General

§ 361.1 Purpose.

Under the State Vocational Rehabilitation Services Program, the Secretary provides grants to assist States in operating statewide comprehensive, coordinated, effective, efficient, and accountable vocational rehabilitation programs, each of which is—

(a) An integral part of a statewide workforce development system; and

(b) Designed to assess, plan, develop, and provide vocational rehabilitation services for individuals with disabilities, consistent with their unique strengths, resources, priorities, concerns, abilities, capabilities, interests, and informed choice so that they may prepare for and engage in competitive integrated employment and achieve economic self-sufficiency.

(Authority: Sections 12(c) and 100(a) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 709(c) and 720(a))

§ 361.2 Eligibility for a grant.

Any State that submits to the Secretary a vocational rehabilitation services portion of the Unified or Combined State Plan that meets the requirements of section 101(a) of the Act and this part is eligible for a grant under this program.

(Authority: Section 101(a) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 721(a))

§ 361.3 Authorized activities.

The Secretary makes payments to a State to assist in—

(a) The costs of providing vocational rehabilitation services under the vocational rehabilitation services portion of the Unified or Combined State Plan; and

(b) Administrative costs under the vocational rehabilitation services portion of the Unified or Combined State Plan, including one-stop infrastructure costs.

(Authority: Sections 12(c) and 111(a)(1) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 709(c) and 731(a)(1))

§ 361.4 Applicable regulations.

The following regulations apply to this program:

(a) The Education Department General Administrative Regulations (EDGAR) as follows:

(1) 34 CFR part 76 (State-Administered Programs).

(2) 34 CFR part 77 (Definitions that Apply to Department Regulations).

(3) 34 CFR part 79 (Intergovernmental Review of Department of Education Programs and Activities).

(4) 34 CFR part 81 (General Education Provisions Act—Enforcement).

(5) 34 CFR part 82 (New Restrictions on Lobbying).

(b) The regulations in this part 361.

(c) 2 CFR part 190 (OMB Guidelines to Agencies on Governmentwide Debarment and Suspension (Nonprocurement)) as adopted in 2 CFR part 3485.

(d) 2 CFR part 200 (Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards) as adopted in 2 CFR part 3474, except the requirements to accept third-party in-kind contributions to meet cost-sharing or matching requirements, as otherwise authorized under 2 CFR 200.306(b).

(Authority: Section 12(c) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 709(c))

§ 361.5 Applicable definitions.

The following definitions apply to this part:

(a) Definitions in EDGAR 77.1.

(b) Definitions in 2 CFR part 200, subpart A.

(c) The following definitions:

(1) *Act* means the Rehabilitation Act of 1973, as amended (29 U.S.C. 701 *et seq.*).

(2) *Administrative costs under the vocational rehabilitation services portion of the Unified or Combined State Plan* means expenditures incurred in the performance of administrative functions under the vocational rehabilitation program carried out under this part, including expenses related to program planning, development, monitoring, and evaluation, including, but not limited to, expenses for—

(i) Quality assurance;

(ii) Budgeting, accounting, financial management, information systems, and related data processing;

(iii) Providing information about the program to the public;

(iv) Technical assistance and support services to other State agencies, private nonprofit organizations, and businesses and industries, except for technical assistance and support services described in § 361.49(a)(4);

(v) The State Rehabilitation Council and other advisory committees;

(vi) Professional organization membership dues for designated State unit employees;

(vii) The removal of architectural barriers in State vocational rehabilitation agency offices and State-operated rehabilitation facilities;

(viii) Operating and maintaining designated State unit facilities, equipment, and grounds, as well as the infrastructure of the one-stop system;

(ix) Supplies;

(x) Administration of the comprehensive system of personnel development described in § 361.18, including personnel administration, administration of affirmative action plans, and training and staff development;

(xi) Administrative salaries, including clerical and other support staff salaries, in support of these administrative functions;

(xii) Travel costs related to carrying out the program, other than travel costs related to the provision of services;

(xiii) Costs incurred in conducting reviews of determinations made by personnel of the designated State unit, including costs associated with mediation and impartial due process hearings under § 361.57; and

(xiv) Legal expenses required in the administration of the program.

(Authority: Sections 7(1) and 12(c) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 705(1) and 709(c))

(3) *Applicant* means an individual who submits an application for vocational rehabilitation services in accordance with § 361.41(b)(2).

(Authority: Section 12(c) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 709(c))

(4) *Appropriate modes of communication* means specialized aids and supports that enable an individual with a disability to comprehend and respond to information that is being communicated. Appropriate modes of communication include, but are not limited to, the use of interpreters, open and closed captioned videos, specialized telecommunications services and audio recordings, Brailled and large print materials, materials in electronic formats, augmentative communication devices, graphic presentations, and simple language materials.

(Authority: Section 12(c) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 709(c))

(5) *Assessment for determining eligibility and vocational rehabilitation needs* means, as appropriate in each case—

(i)(A) A review of existing data—

(*1*) To determine if an individual is eligible for vocational rehabilitation services; and

(*2*) To assign priority for an order of selection described in § 361.36 in the States that use an order of selection; and

(B) To the extent necessary, the provision of appropriate assessment activities to obtain necessary additional data to make the eligibility determination and assignment;

(ii) To the extent additional data are necessary to make a determination of the employment outcomes and the nature and scope of vocational rehabilitation services to be included in the individualized plan for employment of an eligible individual, a comprehensive assessment to determine the unique strengths, resources, priorities, concerns, abilities, capabilities, interests, and informed choice, including the need for supported employment, of the eligible individual. This comprehensive assessment—

(A) Is limited to information that is necessary to identify the rehabilitation needs of the individual and to develop the individualized plan for employment of the eligible individual;

(B) Uses as a primary source of information, to the maximum extent possible and appropriate and in accordance with confidentiality requirements—

(*1*) Existing information obtained for the purposes of determining the eligibility of the individual and assigning priority for an order of selection described in § 361.36 for the individual; and

(*2*) Information that can be provided by the individual and, if appropriate, by the family of the individual;

(C) May include, to the degree needed to make such a determination, an assessment of the personality, interests, interpersonal skills, intelligence and related functional capacities, educational achievements, work experience, vocational aptitudes, personal and social adjustments, and employment opportunities of the individual and the medical, psychiatric, psychological, and other pertinent vocational, educational, cultural, social, recreational, and environmental factors that affect the employment and rehabilitation needs of the individual;

(D) May include, to the degree needed, an appraisal of the patterns of work behavior of the individual and services needed for the individual to acquire occupational skills and to develop work attitudes, work habits, work tolerance, and social and behavior patterns necessary for successful job performance, including the use of work in real job situations to assess and develop the capacities of the individual to perform adequately in a work environment; and

(E) To the maximum extent possible, relies on information obtained from experiences in integrated employment settings in the community and in other integrated community settings;

(iii) Referral, for the provision of rehabilitation technology services to the individual, to assess and develop the

capacities of the individual to perform in a work environment; and

(iv) An exploration of the individual's abilities, capabilities, and capacity to perform in work situations, which must be assessed periodically during trial work experiences, including experiences in which the individual is provided appropriate supports and training.

(Authority: Sections 7(2) and 12(c) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 705(2) and 709(c))

(6) *Assistive technology terms*—(i) *Assistive technology* has the meaning given such term in section 3 of the Assistive Technology Act of 1998 (29 U.S.C. 3002).

(ii) *Assistive technology device* has the meaning given such term in section 3 of the Assistive Technology Act of 1998, except that the reference in such section to the term *individuals with disabilities* will be deemed to mean more than one individual with a disability as defined in paragraph (20)(A) of the Act.

(iii) *Assistive technology service* has the meaning given such term in section 3 of the Assistive Technology Act of 1998, except that the reference in such section to the term—

(A) *Individual with a disability* will be deemed to mean an individual with a disability, as defined in paragraph (20)(A) of the Act; and

(B) *Individuals with disabilities* will be deemed to mean more than one such individual.

(Authority: Sections 7(3) and 12(c) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 705(3) and 709(c))

(7) *Community rehabilitation program*—(i) *Community rehabilitation program* means a program that provides directly or facilitates the provision of one or more of the following vocational rehabilitation services to individuals with disabilities to enable those individuals to maximize their opportunities for employment, including career advancement:

(A) Medical, psychiatric, psychological, social, and vocational services that are provided under one management.

(B) Testing, fitting, or training in the use of prosthetic and orthotic devices.

(C) Recreational therapy.

(D) Physical and occupational therapy.

(E) Speech, language, and hearing therapy.

(F) Psychiatric, psychological, and social services, including positive behavior management.

(G) Assessment for determining eligibility and vocational rehabilitation needs.

(H) Rehabilitation technology.

(I) Job development, placement, and retention services.

(J) Evaluation or control of specific disabilities.

(K) Orientation and mobility services for individuals who are blind.

(L) Extended employment.

(M) Psychosocial rehabilitation services.

(N) Supported employment services and extended services.

(O) Customized employment.

(P) Services to family members if necessary to enable the applicant or eligible individual to achieve an employment outcome.

(Q) Personal assistance services.

(R) Services similar to the services described in paragraphs (c)(7)(i)(A) through (Q) of this section.

(ii) For the purposes of this definition, *program* means an agency, organization, or institution, or unit of an agency, organization, or institution, that provides directly or facilitates the provision of vocational rehabilitation services as one of its major functions.

(Authority: Section 7(4) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 705(4))

(8) *Comparable services and benefits*—(i) *Comparable services and benefits* means services and benefits, including accommodations and auxiliary aids and services, that are—

(A) Provided or paid for, in whole or in part, by other Federal, State, or local public agencies, by health insurance, or by employee benefits;

(B) Available to the individual at the time needed to ensure the progress of the individual toward achieving the employment outcome in the individual's individualized plan for employment in accordance with § 361.53; and

(C) Commensurate to the services that the individual would otherwise receive from the designated State vocational rehabilitation agency.

(ii) For the purposes of this definition, comparable services and benefits do not include awards and scholarships based on merit.

(Authority: Sections 12(c) and 101(a)(8) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 709(c) and 721(a)(8))

(9) *Competitive integrated employment* means work that—

(i) Is performed on a full-time or part-time basis (including self-employment) and for which an individual is compensated at a rate that–

(A) Is not less than the higher of the rate specified in section 6(a)(1) of the Fair Labor Standards Act of 1938 (29 U.S.C. 206(a)(1)) or the rate required under the applicable State or local minimum wage law for the place of employment;

(B) Is not less than the customary rate paid by the employer for the same or similar work performed by other employees who are not individuals with disabilities and who are similarly situated in similar occupations by the same employer and who have similar training, experience, and skills; and

(C) In the case of an individual who is self-employed, yields an income that is comparable to the income received by other individuals who are not individuals with disabilities and who are self-employed in similar occupations or on similar tasks and who have similar training, experience, and skills; and

(D) Is eligible for the level of benefits provided to other employees; and

(ii) Is at a location—

(A) Typically found in the community; and

(B) Where the employee with a disability interacts for the purpose of performing the duties of the position with other employees within the particular work unit and the entire work site, and, as appropriate to the work performed, other persons (*e.g.,* customers and vendors), who are not individuals with disabilities (not including supervisory personnel or individuals who are providing services to such employee) to the same extent that employees who are not individuals with disabilities and who are in comparable positions interact with these persons; and

(iii) Presents, as appropriate, opportunities for advancement that are similar to those for other employees who are not individuals with disabilities and who have similar positions.

(Authority: Sections 7(5) and 12(c) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 705(5) and 709(c))

(10) *Construction of a facility for a public or nonprofit community rehabilitation program* means—

(i) The acquisition of land in connection with the construction of a new building for a community rehabilitation program;

(ii) The construction of new buildings;

(iii) The acquisition of existing buildings;

(iv) The expansion, remodeling, alteration, or renovation of existing buildings;

(v) Architect's fees, site surveys, and soil investigation, if necessary, in

connection with the acquisition of land or existing buildings, or the construction, expansion, remodeling, or alteration of community rehabilitation facilities;

(vi) The acquisition of initial fixed or movable equipment of any new, newly acquired, newly expanded, newly remodeled, newly altered, or newly renovated buildings that are to be used for community rehabilitation program purposes; and

(vii) Other direct expenditures appropriate to the construction project, except costs of off-site improvements.

(Authority: Sections 7(6) and 12(c) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 705(6) and 709(c))

(11) *Customized employment* means competitive integrated employment, for an individual with a significant disability, that is—

(i) Based on an individualized determination of the unique strengths, needs, and interests of the individual with a significant disability;

(ii) Designed to meet the specific abilities of the individual with a significant disability and the business needs of the employer; and

(iii) Carried out through flexible strategies, such as—

(A) Job exploration by the individual; and

(B) Working with an employer to facilitate placement, including—

(*1*) Customizing a job description based on current employer needs or on previously unidentified and unmet employer needs;

(*2*) Developing a set of job duties, a work schedule and job arrangement, and specifics of supervision (including performance evaluation and review), and determining a job location;

(*3*) Using a professional representative chosen by the individual, or if elected self-representation, to work with an employer to facilitate placement; and

(*4*) Providing services and supports at the job location.

(Authority: Section 7(7) and 12(c) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 705(7) and 709(c))

(12) *Designated State agency* or *State agency* means the sole State agency, designated, in accordance with § 361.13(a), to administer, or supervise the local administration of, the vocational rehabilitation services portion of the Unified or Combined State Plan. The term includes the State agency for individuals who are blind, if designated as the sole State agency with respect to that part of the Unified or Combined State Plan relating to the vocational rehabilitation of individuals who are blind.

(Authority: Sections 7(8)(A) and 101(a)(2)(A) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 705(8)(A) and 721(a)(2)(A))

(13) *Designated State unit* or *State unit* means either—

(i) The State vocational rehabilitation bureau, division, or other organizational unit that is primarily concerned with vocational rehabilitation or vocational and other rehabilitation of individuals with disabilities and that is responsible for the administration of the vocational rehabilitation program of the State agency, as required under § 361.13(b); or

(ii) The State agency that is primarily concerned with vocational rehabilitation or vocational and other rehabilitation of individuals with disabilities.

(Authority: Sections 7(8)(B) and 101(a)(2)(B) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 705(8)(B) and 721(a)(2)(B))

(14) *Eligible individual* means an applicant for vocational rehabilitation services who meets the eligibility requirements of § 361.42(a).

(Authority: Sections 7(20)(A) and 102(a)(1) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 705(20)(A) and 722(a)(1))

(15) *Employment outcome* means, with respect to an individual, entering, advancing in, or retaining full-time or, if appropriate, part-time competitive integrated employment, as defined in paragraph (c)(9) of this section (including customized employment, self-employment, telecommuting, or business ownership), or supported employment as defined in paragraph (c)(53) of this section, that is consistent with an individual's unique strengths, resources, priorities, concerns, abilities, capabilities, interests, and informed choice.

Note to paragraph (c)(15): A designated State unit may continue services to individuals with uncompensated employment goals on their approved individualized plans for employment prior to September 19, 2016 until June 30, 2017, unless a longer period of time is required based on the needs of the individual with the disability, as documented in the individual's service record.

(Authority: Sections 7(11), 12(c), 100(a)(2), and 102(b)(4)(A) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 705(11), 709(c), 720(a)(2), and 722(b)(4)(A))

(16) *Establishment, development, or improvement of a public or nonprofit community rehabilitation program* means—

(i) The establishment of a facility for a public or nonprofit community rehabilitation program, as defined in paragraph (c)(17) of this section, to provide vocational rehabilitation services to applicants or eligible individuals;

(ii) Staffing, if necessary to establish, develop, or improve a public or nonprofit community rehabilitation program for the purpose of providing vocational rehabilitation services to applicants or eligible individuals, for a maximum period of four years, with Federal financial participation available at the applicable matching rate for the following levels of staffing costs:

(A) 100 percent of staffing costs for the first year;

(B) 75 percent of staffing costs for the second year;

(C) 60 percent of staffing costs for the third year; and

(D) 45 percent of staffing costs for the fourth year; and

(iii) Other expenditures and activities related to the establishment, development, or improvement of a public or nonprofit community rehabilitation program that are necessary to make the program functional or increase its effectiveness in providing vocational rehabilitation services to applicants or eligible individuals, but are not ongoing operating expenses of the program.

(Authority: Sections 7(12) and 12(c) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 705(12) and 709(c))

(17) *Establishment of a facility for a public or nonprofit community rehabilitation program* means—

(i) The acquisition of an existing building and, if necessary, the land in connection with the acquisition, if the building has been completed in all respects for at least one year prior to the date of acquisition and the Federal share of the cost of acquisition is not more than $300,000;

(ii) The remodeling or alteration of an existing building, provided the estimated cost of remodeling or alteration does not exceed the appraised value of the existing building;

(iii) The expansion of an existing building, provided that—

(A) The existing building is complete in all respects;

(B) The total size in square footage of the expanded building, notwithstanding the number of expansions, is not greater than twice the size of the existing building;

(C) The expansion is joined structurally to the existing building and does not constitute a separate building; and

(D) The costs of the expansion do not exceed the appraised value of the existing building;

(iv) Architect's fees, site survey, and soil investigation, if necessary in

connection with the acquisition, remodeling, alteration, or expansion of an existing building; and

(v) The acquisition of fixed or movable equipment, including the costs of installation of the equipment, if necessary to establish, develop, or improve a community rehabilitation program.

(Authority: Sections 7(12) and 12(c) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 705(12) and 709(c))

(18) *Extended employment* means work in a non-integrated or sheltered setting for a public or private nonprofit agency or organization that provides compensation in accordance with the Fair Labor Standards Act.

(Authority: Section 12(c) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 709(c))

(19) *Extended services* means ongoing support services and other appropriate services that are—

(i) Needed to support and maintain an individual with a most significant disability including a youth with a most significant disability, in supported employment;

(ii) Organized or made available, singly or in combination, in such a way as to assist an eligible individual in maintaining supported employment;

(iii) Based on the needs of an eligible individual, as specified in an individualized plan for employment;

(iv) Provided by a State agency, a private nonprofit organization, employer, or any other appropriate resource, after an individual has made the transition from support from the designated State unit; and

(v) Provided to a youth with a most significant disability by the designated State unit in accordance with requirements set forth in this part and part 363 for a period not to exceed four years, or at such time that a youth reaches age 25 and no longer meets the definition of a youth with a disability under paragraph (c)(58) of this section, whichever occurs first. The designated State unit may not provide extended services to an individual with a most significant disability who is not a youth with a most significant disability.

(Authority: Sections 7(13), 12(c), and 604(b) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 705(13), 709(c), and 795i(b))

(20) *Extreme medical risk* means a probability of substantially increasing functional impairment or death if medical services, including mental health services, are not provided expeditiously.

(Authority: Sections 12(c) and 101(a)(8)(A)(i)(III) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 709(c) and 721(a)(8)(A)(i)(III))

(21) *Fair hearing board* means a committee, body, or group of persons established by a State prior to January 1, 1985, that—

(i) Is authorized under State law to review determinations made by personnel of the designated State unit that affect the provision of vocational rehabilitation services; and

(ii) Carries out the responsibilities of the impartial hearing officer in accordance with the requirements in § 361.57(j).

(Authority: Sections 12(c) and 102(c)(6) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 709(c) and 722(c)(6))

(22) *Family member,* for purposes of receiving vocational rehabilitation services in accordance with § 361.48(b)(9), means an individual—

(i) Who either—

(A) Is a relative or guardian of an applicant or eligible individual; or

(B) Lives in the same household as an applicant or eligible individual;

(ii) Who has a substantial interest in the well-being of that individual; and

(iii) Whose receipt of vocational rehabilitation services is necessary to enable the applicant or eligible individual to achieve an employment outcome.

(Authority: Sections 12(c) and 103(a)(19) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 709(c) and 723(a)(19))

(23) *Governor* means a chief executive officer of a State.

(Authority: Section 7(15) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 705(15))

(24) *Impartial hearing officer*—(i) *Impartial hearing officer* means an individual who—

(A) Is not an employee of a public agency (other than an administrative law judge, hearing examiner, or employee of an institution of higher education);

(B) Is not a member of the State Rehabilitation Council for the designated State unit;

(C) Has not been involved previously in the vocational rehabilitation of the applicant or recipient of services;

(D) Has knowledge of the delivery of vocational rehabilitation services, the vocational rehabilitation services portion of the Unified or Combined State Plan, and the Federal and State regulations governing the provision of services;

(E) Has received training with respect to the performance of official duties; and

(F) Has no personal, professional, or financial interest that could affect the objectivity of the individual.

(ii) An individual is not considered to be an employee of a public agency for the purposes of this definition solely because the individual is paid by the agency to serve as a hearing officer.

(Authority: Sections 7(16) and 12(c) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 705(16) and 709(c))

(25) *Indian; American Indian; Indian American; Indian Tribe*—(i) *In general.* The terms ''Indian'', ''American Indian'', and ''Indian American'' mean an individual who is a member of an Indian tribe and include a Native and a descendant of a Native, as such terms are defined in subsections (b) and (r) of section 3 of the Alaska Native Claims Settlement Act (43 U.S.C. 1602).

(ii) *Indian tribe.* The term ''Indian tribe'' means any Federal or State Indian tribe, band, rancheria, pueblo, colony, or community, including any Alaska native village or regional village corporation (as defined in or established pursuant to the Alaska Native Claims Settlement Act) and a tribal organization (as defined in section 4(l) of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450(b)(l)).

(Authority: Section 7(19) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 705(19))

(26) *Individual who is blind* means a person who is blind within the meaning of applicable State law.

(Authority: Section 12(c) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 709(c))

(27) *Individual with a disability,* except as provided in paragraph (c)(28) of this section, means an individual—

(i) Who has a physical or mental impairment;

(ii) Whose impairment constitutes or results in a substantial impediment to employment; and

(iii) Who can benefit in terms of an employment outcome from the provision of vocational rehabilitation services.

(Authority: Section 7(20)(A) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 705(20)(A))

(28) *Individual with a disability,* for purposes of §§ 361.5(c)(13), 361.13(a), 361.13(b)(1), 361.17(a), (b), (c), and (j), 361.18(b), 361.19, 361.20, 361.23(b)(2), 361.29(a) and (d)(8), and 361.51(b), means an individual—

(i) Who has a physical or mental impairment that substantially limits one or more major life activities;

(ii) Who has a record of such an impairment; or

(iii) Who is regarded as having such an impairment.

(Authority: Section 7(20)(B) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 705(20)(B))

(29) *Individual with a most significant disability* means an individual with a significant disability who meets the designated State unit's criteria for an individual with a most significant disability. These criteria must be consistent with the requirements in § 361.36(d)(1) and (2).

(Authority: Sections 7(21)(E) and 101(a)(5)(C) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 705(21)(E) and 721(a)(5)(C))

(30) *Individual with a significant disability* means an individual with a disability—

(i) Who has a severe physical or mental impairment that seriously limits one or more functional capacities (such as mobility, communication, self-care, self-direction, interpersonal skills, work tolerance, or work skills) in terms of an employment outcome;

(ii) Whose vocational rehabilitation can be expected to require multiple vocational rehabilitation services over an extended period of time; and

(iii) Who has one or more physical or mental disabilities resulting from amputation, arthritis, autism, blindness, burn injury, cancer, cerebral palsy, cystic fibrosis, deafness, head injury, heart disease, hemiplegia, hemophilia, respiratory or pulmonary dysfunction, mental illness, multiple sclerosis, muscular dystrophy, musculo-skeletal disorders, neurological disorders (including stroke and epilepsy), spinal cord conditions (including paraplegia and quadriplegia), sickle cell anemia, intellectual disability, specific learning disability, end-stage renal disease, or another disability or combination of disabilities determined on the basis of an assessment for determining eligibility and vocational rehabilitation needs to cause comparable substantial functional limitation.

(Authority: Section 7(21)(A) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 705(21)(A))

(31) *Individual's representative* means any representative chosen by an applicant or eligible individual, as appropriate, including a parent, guardian, other family member, or advocate, unless a representative has been appointed by a court to represent the individual, in which case the court-appointed representative is the individual's representative.

(Authority: Sections 7(22) and 12(c) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 705(22) and 709(c))

(32) *Integrated setting* means—

(i) With respect to the provision of services, a setting typically found in the community in which applicants or eligible individuals interact with non-disabled individuals other than non-disabled individuals who are providing services to those applicants or eligible individuals; and

(ii) With respect to an employment outcome, means a setting—

(A) Typically found in the community; and

(B) Where the employee with a disability interacts, for the purpose of performing the duties of the position, with other employees within the particular work unit and the entire work site, and, as appropriate to the work performed, other persons (*e.g.,* customers and vendors) who are not individuals with disabilities (not including supervisory personnel or individuals who are providing services to such employee) to the same extent that employees who are not individuals with disabilities and who are in comparable positions interact with these persons.

(Authority: Section 12(c) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 709(c))

(33) *Local workforce development board* means a local board, as defined in section 3 of the Workforce Innovation and Opportunity Act.

(Authority: Section 7(25) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 705(25))

(34) *Maintenance* means monetary support provided to an individual for expenses, such as food, shelter, and clothing, that are in excess of the normal expenses of the individual and that are necessitated by the individual's participation in an assessment for determining eligibility and vocational rehabilitation needs or the individual's receipt of vocational rehabilitation services under an individualized plan for employment.

(Authority: Sections 12(c) and 103(a)(7) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 709(c) and 723(a)(7))

(i) *Examples:* The following are examples of expenses that would meet the definition of *maintenance.* The examples are illustrative, do not address all possible circumstances, and are not intended to substitute for individual counselor judgment.

Example 1: The cost of a uniform or other suitable clothing that is required for an individual's job placement or job-seeking activities.

Example 2: The cost of short-term shelter that is required in order for an individual to participate in assessment activities or vocational training at a site that is not within commuting distance of an individual's home.

Example 3: The initial one-time costs, such as a security deposit or charges for the initiation of utilities, that are required in order for an individual to relocate for a job placement.

(ii) [Reserved]

(35) *Mediation* means the act or process of using an independent third party to act as a mediator, intermediary, or conciliator to assist persons or parties in settling differences or disputes prior to pursuing formal administrative or other legal remedies. Mediation under the program must be conducted in accordance with the requirements in § 361.57(d) by a qualified and impartial mediator as defined in § 361.5(c)(43).

(Authority: Sections 12(c) and 102(c)(4) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 709(c) and 722(c)(4))

(36) *Nonprofit,* with respect to a community rehabilitation program, means a community rehabilitation program carried out by a corporation or association, no part of the net earnings of which inures, or may lawfully inure, to the benefit of any private shareholder or individual and the income of which is exempt from taxation under section 501(c)(3) of the Internal Revenue Code of 1986.

(Authority: Section 7(26) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 705(26))

(37) *Ongoing support services,* as used in the definition of *supported employment,* means services that—

(i) Are needed to support and maintain an individual with a most significant disability, including a youth with a most significant disability, in supported employment;

(ii) Are identified based on a determination by the designated State unit of the individual's need as specified in an individualized plan for employment;

(iii) Are furnished by the designated State unit from the time of job placement until transition to extended services, unless post-employment services are provided following transition, and thereafter by one or more extended services providers throughout the individual's term of employment in a particular job placement;

(iv) Include an assessment of employment stability and provision of specific services or the coordination of services at or away from the worksite that are needed to maintain stability based on—

(A) At a minimum, twice-monthly monitoring at the worksite of each individual in supported employment; or

(B) If under specific circumstances, especially at the request of the individual, the individualized plan for employment provides for off-site monitoring, twice monthly meetings with the individual;

(v) Consist of—

(A) Any particularized assessment supplementary to the comprehensive assessment of rehabilitation needs described in paragraph (c)(5)(ii) of this section;

(B) The provision of skilled job trainers who accompany the individual for intensive job skill training at the work site;

(C) Job development and training;

(D) Social skills training;

(E) Regular observation or supervision of the individual;

(F) Follow-up services including regular contact with the employers, the individuals, the parents, family members, guardians, advocates or authorized representatives of the individuals, and other suitable professional and informed advisors, in order to reinforce and stabilize the job placement;

(G) Facilitation of natural supports at the worksite;

(H) Any other service identified in the scope of vocational rehabilitation services for individuals, described in § 361.48(b); or

(I) Any service similar to the foregoing services.

(Authority: Sections 7(27) and 12(c) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 705(27) and 709(c))

(38) *Personal assistance services* means a range of services, including, among other things, training in managing, supervising, and directing personal assistance services, provided by one or more persons, that are—

(i) Designed to assist an individual with a disability to perform daily living activities on or off the job that the individual would typically perform without assistance if the individual did not have a disability;

(ii) Designed to increase the individual's control in life and ability to perform everyday activities on or off the job;

(iii) Necessary to the achievement of an employment outcome; and

(iv) Provided only while the individual is receiving other vocational rehabilitation services. The services may include training in managing, supervising, and directing personal assistance services.

(Authority: Sections 7(28), 12(c), 102(b)(4)(B)(i)(I)(bb), and 103(a)(9) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 705(28), 709(c), 722(b)(4)(B)(i)(I)(bb), and 723(a)(9))

(39) *Physical and mental restoration services* means—

(i) Corrective surgery or therapeutic treatment that is likely, within a reasonable period of time, to correct or modify substantially a stable or slowly progressive physical or mental impairment that constitutes a substantial impediment to employment;

(ii) Diagnosis of and treatment for mental or emotional disorders by qualified personnel in accordance with State licensure laws;

(iii) Dentistry;

(iv) Nursing services;

(v) Necessary hospitalization (either inpatient or outpatient care) in connection with surgery or treatment and clinic services;

(vi) Drugs and supplies;

(vii) Prosthetic and orthotic devices;

(viii) Eyeglasses and visual services, including visual training, and the examination and services necessary for the prescription and provision of eyeglasses, contact lenses, microscopic lenses, telescopic lenses, and other special visual aids prescribed by personnel who are qualified in accordance with State licensure laws;

(ix) Podiatry;

(x) Physical therapy;

(xi) Occupational therapy;

(xii) Speech or hearing therapy;

(xiii) Mental health services;

(xiv) Treatment of either acute or chronic medical complications and emergencies that are associated with or arise out of the provision of physical and mental restoration services, or that are inherent in the condition under treatment;

(xv) Special services for the treatment of individuals with end-stage renal disease, including transplantation, dialysis, artificial kidneys, and supplies; and

(xvi) Other medical or medically related rehabilitation services.

(Authority: Sections 12(c) and 103(a)(6) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 709(c) and 723(a)(6))

(40) *Physical or mental impairment* means—

(i) Any physiological disorder or condition, cosmetic disfigurement, or anatomical loss affecting one or more of the following body systems: neurological, musculo-skeletal, special sense organs, respiratory (including speech organs), cardiovascular, reproductive, digestive, genitourinary, hemic and lymphatic, skin, and endocrine; or

(ii) Any mental or psychological disorder such as intellectual disability, organic brain syndrome, emotional or mental illness, and specific learning disabilities.

(Authority: Sections 7(20)(A) and 12(c) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 705(20)(A) and 709(c))

(41) *Post-employment services* means one or more of the services identified in § 361.48(b) that are provided subsequent to the achievement of an employment outcome and that are necessary for an individual to maintain, regain, or advance in employment, consistent with the individual's unique strengths, resources, priorities, concerns, abilities, capabilities, interests, and informed choice.

(Authority: Sections 12(c) and 103(a)(20) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 709(c) and 723(a)(20))

Note to paragraph (c)(41): Post-employment services are intended to ensure that the employment outcome remains consistent with the individual's unique strengths, resources, priorities, concerns, abilities, capabilities, interests, and informed choice. These services are available to meet rehabilitation needs that do not require a complex and comprehensive provision of services and, thus, should be limited in scope and duration. If more comprehensive services are required, then a new rehabilitation effort should be considered. Post-employment services are to be provided under an amended individualized plan for employment; thus, a re-determination of eligibility is not required. The provision of post-employment services is subject to the same requirements in this part as the provision of any other vocational rehabilitation service. Post-employment services are available to assist an individual to maintain employment, *e.g.,* the individual's employment is jeopardized because of conflicts with supervisors or co-workers, and the individual needs mental health services and counseling to maintain the employment, or the individual requires assistive technology to maintain the employment; to regain employment, *e.g.,* the individual's job is eliminated through reorganization and new placement services are needed; and to advance in employment, *e.g.,* the employment is no longer consistent with the individual's unique strengths, resources, priorities, concerns, abilities, capabilities, interests, and informed choice.

(42) *Pre-employment transition services* means the required activities and authorized activities specified in § 361.48(a)(2) and (3).

(Authority: Sections 7(30) and 113(b) and (c) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 705(30) and 733(b) and (c))

(43) *Qualified and impartial mediator*—(i) *Qualified and impartial mediator* means an individual who—

(A) Is not an employee of a public agency (other than an administrative law judge, hearing examiner, employee

of a State office of mediators, or employee of an institution of higher education);

(B) Is not a member of the State Rehabilitation Council for the designated State unit;

(C) Has not been involved previously in the vocational rehabilitation of the applicant or recipient of services;

(D) Is knowledgeable of the vocational rehabilitation program and the applicable Federal and State laws, regulations, and policies governing the provision of vocational rehabilitation services;

(E) Has been trained in effective mediation techniques consistent with any State-approved or -recognized certification, licensing, registration, or other requirements; and

(F) Has no personal, professional, or financial interest that could affect the individual's objectivity during the mediation proceedings.

(ii) An individual is not considered to be an employee of the designated State agency or designated State unit for the purposes of this definition solely because the individual is paid by the designated State agency or designated State unit to serve as a mediator.

(Authority: Sections 12(c) and 102(c)(4) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 709(c) and 722(c)(4))

(44) *Rehabilitation engineering* means the systematic application of engineering sciences to design, develop, adapt, test, evaluate, apply, and distribute technological solutions to problems confronted by individuals with disabilities in functional areas, such as mobility, communications, hearing, vision, and cognition, and in activities associated with employment, independent living, education, and integration into the community.

(Authority: Sections 7(32) and (12(c) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 705(32) and 709(c))

(45) *Rehabilitation technology* means the systematic application of technologies, engineering methodologies, or scientific principles to meet the needs of, and address the barriers confronted by, individuals with disabilities in areas that include education, rehabilitation, employment, transportation, independent living, and recreation. The term includes rehabilitation engineering, assistive technology devices, and assistive technology services.

(Authority: Section 7(32) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 705(32))

(46) *Reservation* means a Federal or State Indian reservation, a public domain Indian allotment, a former Indian reservation in Oklahoma, and land held by incorporated Native groups, regional corporations, and village corporations under the provisions of the Alaska Native Claims Settlement Act (43 U.S.C. 1601 *et seq.*); or a defined area of land recognized by a State or the Federal Government where there is a concentration of tribal members and on which the tribal government is providing structured activities and services.

(Authority: Section 121(e) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 741(e))

(47) *Sole local agency* means a unit or combination of units of general local government or one or more Indian tribes that has the sole responsibility under an agreement with, and the supervision of, the State agency to conduct a local or tribal vocational rehabilitation program, in accordance with the vocational rehabilitation services portion of the Unified or Combined State Plan.

(Authority: Section 7(24) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 705(24))

(48) *State* means any of the 50 States, the District of Columbia, the Commonwealth of Puerto Rico, the United States Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands.

(Authority: Section 7(34) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 705(34))

(49) *State workforce development board* means a State workforce development board, as defined in section 3 of the Workforce Innovation and Opportunity Act (29 U.S.C. 3102).

(Authority: Section 7(35) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 705(35))

(50) *Statewide workforce development system* means a workforce development system, as defined in section 3 of the Workforce Innovation and Opportunity Act (29 U.S.C. 3102).

(Authority: Section 7(36) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 705(36))

(51) *Student with a disability*—(i) *Student with a disability* means, in general, an individual with a disability in a secondary, postsecondary, or other recognized education program who—

(A)(*1*) Is not younger than the earliest age for the provision of transition services under section 614(d)(1)(A)(i)(VIII) of the Individuals with Disabilities Education Act (20 U.S.C. 1414(d)(1)(A)(i)(VIII)); or

(*2*) If the State involved elects to use a lower minimum age for receipt of pre-employment transition services under this Act, is not younger than that minimum age; and

(B)(*1*) Is not older than 21 years of age; or

(*2*) If the State law for the State provides for a higher maximum age for receipt of services under the Individuals with Disabilities Education Act (20 U.S.C. 1400 *et seq.*), is not older than that maximum age; and

(C)(*1*) Is eligible for, and receiving, special education or related services under Part B of the Individuals with Disabilities Education Act (20 U.S.C. 1411 *et seq.*); or

(*2*) Is a student who is an individual with a disability, for purposes of section 504.

(ii) *Students with disabilities* means more than one student with a disability.

(Authority: Sections 7(37) and 12(c) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 705(37) and 709(c))

(52) *Substantial impediment to employment* means that a physical or mental impairment (in light of attendant medical, psychological, vocational, educational, communication, and other related factors) hinders an individual from preparing for, entering into, engaging in, advancing in, or retaining employment consistent with the individual's abilities and capabilities.

(Authority: Sections 7(20)(A) and 12(c) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 705(20)(A) and 709(c))

(53) *Supported employment*—(i) *Supported employment* means competitive integrated employment, including customized employment, or employment in an integrated work setting in which an individual with a most significant disability, including a youth with a most significant disability, is working on a short-term basis toward competitive integrated employment that is individualized, and customized, consistent with the unique strengths, abilities, interests, and informed choice of the individual, including with ongoing support services for individuals with the most significant disabilities—

(A) For whom competitive integrated employment has not historically occurred, or for whom competitive integrated employment has been interrupted or intermittent as a result of a significant disability; and

(B) Who, because of the nature and severity of their disabilities, need intensive supported employment services and extended services after the transition from support provided by the designated State unit, in order to perform this work.

(ii) For purposes of this part, an individual with a most significant disability, whose supported employment in an integrated setting does not satisfy the criteria of competitive integrated employment, as defined in paragraph (c)(9) of this section is considered to be working on a short-term basis toward competitive integrated employment so long as the individual can reasonably anticipate achieving competitive integrated employment—

(A) Within six months of achieving a supported employment outcome; or

(B) In limited circumstances, within a period not to exceed 12 months from the achievement of the supported employment outcome, if a longer period is necessary based on the needs of the individual, and the individual has demonstrated progress toward competitive earnings based on information contained in the service record.

(Authority: Sections 7(38), 12(c), and 602 of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 705(38), 709(c), and 795g)

(54) *Supported employment services* means ongoing support services, including customized employment, and other appropriate services needed to support and maintain an individual with a most significant disability, including a youth with a most significant disability, in supported employment that are—

(i) Organized and made available, singly or in combination, in such a way as to assist an eligible individual to achieve competitive integrated employment;

(ii) Based on a determination of the needs of an eligible individual, as specified in an individualized plan for employment;

(iii) Provided by the designated State unit for a period of time not to exceed 24 months, unless under special circumstances the eligible individual and the rehabilitation counselor jointly agree to extend the time to achieve the employment outcome identified in the individualized plan for employment; and

(iv) Following transition, as post-employment services that are unavailable from an extended services provider and that are necessary to maintain or regain the job placement or advance in employment.

(Authority: Sections 7(39), 12(c), and 103(a)(16) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 705(39), 709(c), and 723(a)(16))

(55) *Transition services* means a coordinated set of activities for a student or youth with a disability—

(i) Designed within an outcome-oriented process that promotes movement from school to post-school activities, including postsecondary education, vocational training, competitive integrated employment, supported employment, continuing and adult education, adult services, independent living, or community participation;

(ii) Based upon the individual student's or youth's needs, taking into account the student's or youth's preferences and interests;

(iii) That includes instruction, community experiences, the development of employment and other post-school adult living objectives, and, if appropriate, acquisition of daily living skills and functional vocational evaluation;

(iv) That promotes or facilitates the achievement of the employment outcome identified in the student's or youth's individualized plan for employment; and

(v) That includes outreach to and engagement of the parents, or, as appropriate, the representative of such a student or youth with a disability.

(Authority: Sections 12(c) and 103(a)(15) and (b)(7) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 709(c) and 723(a)(15) and (b)(7))

(56) *Transportation* means travel and related expenses that are necessary to enable an applicant or eligible individual to participate in a vocational rehabilitation service, including expenses for training in the use of public transportation vehicles and systems.

(Authority: Sections 12(c) and 103(a)(8) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 709(c) and 723(a)(8))

(i) *Examples.* The following are examples of expenses that would meet the definition of *transportation.* The examples are purely illustrative, do not address all possible circumstances, and are not intended as substitutes for individual counselor judgment.

Example 1: Travel and related expenses for a personal care attendant or aide if the services of that person are necessary to enable the applicant or eligible individual to travel to participate in any vocational rehabilitation service.

Example 2: The purchase and repair of vehicles, including vans, but not the modification of these vehicles, as modification would be considered a rehabilitation technology service.

Example 3: Relocation expenses incurred by an eligible individual in connection with a job placement that is a significant distance from the eligible individual's current residence.

(ii) [Reserved]

(57) *Vocational rehabilitation services*—(i) If provided to an individual, means those services listed in § 361.48; and

(ii) If provided for the benefit of groups of individuals, means those services listed in § 361.49.

(Authority: Sections 7(40) and 103 of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 705(40) and 723)

(58) *Youth with a disability*—(i) *Youth with a disability* means an individual with a disability who is not—

(A) Younger than 14 years of age; and

(B) Older than 24 years of age.

(ii) *Youth with disabilities* means more than one youth with a disability.

(Authority: Section 7(42) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 705(42))

Subpart B—State Plan and Other Requirements for Vocational Rehabilitation Services

§ 361.10 Submission, approval, and disapproval of the State plan.

(a) *Purpose.* (1) To be eligible to receive funds under this part for a fiscal year, a State must submit, and have approved, a vocational rehabilitation services portion of a Unified or Combined State Plan in accordance with section 102 or 103 of the Workforce Innovation and Opportunity Act.

(2) The vocational rehabilitation services portion of the Unified or Combined State Plan must satisfy all requirements set forth in this part.

(b) *Separate part relating to the vocational rehabilitation of individuals who are blind.* If a separate State agency administers or supervises the administration of a separate part of the vocational rehabilitation services portion of the Unified or Combined State Plan relating to the vocational rehabilitation of individuals who are blind, that part of the vocational rehabilitation services portion of the Unified or Combined State Plan must separately conform to all applicable requirements under this part.

(c) *Public participation.* Prior to the adoption of any substantive policies or procedures specific to the provision of vocational rehabilitation services under the vocational rehabilitation services portion of the Unified or Combined State Plan, including making any substantive amendment to those policies and procedures, the designated State agency must conduct public meetings throughout the State, in accordance with the requirements of § 361.20.

(d) *[Reserved]*

(e) *Submission of policies and procedures.* The State is not required to

submit policies, procedures, or descriptions required under this part that have been previously submitted to the Secretary and that demonstrate that the State meets the requirements of this part, including any policies, procedures, or descriptions submitted under this part that are in effect on July 22, 2014.

(f) *Due process.* If the Secretary disapproves the vocational rehabilitation services portion of the Unified or Combined State Plan, the Secretary will follow these procedures:

(1) *Informal resolution.* Prior to disapproving the vocational rehabilitation services portion of the Unified or Combined State Plan, the Secretary attempts to resolve disputes informally with State officials.

(2) *Notice.* If, after reasonable effort has been made to resolve the dispute, no resolution has been reached, the Secretary provides notice to the State agency of the intention to disapprove the vocational rehabilitation services portion of the Unified or Combined State Plan and of the opportunity for a hearing.

(3) *State plan hearing.* If the State agency requests a hearing, the Secretary designates one or more individuals, either from the Department or elsewhere, not responsible for or connected with the administration of this program, to conduct a hearing in accordance with the provisions of 34 CFR part 81, subpart A.

(4) *Initial decision.* The hearing officer issues an initial decision in accordance with 34 CFR 81.41.

(5) *Petition for review of an initial decision.* The State agency may seek the Secretary's review of the initial decision in accordance with 34 CFR part 81.

(6) *Review by the Secretary.* The Secretary reviews the initial decision in accordance with 34 CFR 81.43.

(7) *Final decision of the Department.* The final decision of the Department is made in accordance with 34 CFR 81.44.

(8) *Judicial review.* A State may appeal the Secretary's decision to disapprove the vocational rehabilitation services portion of the Unified or Combined State Plan by filing a petition for review with the United States Court of Appeals for the circuit in which the State is located, in accordance with section 107(d) of the Act.

(Approved by the Office of Management and Budget under control number 1205–0522)

(Authority: Sections 101(a) and (b) and 107(d) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 721(a) and (b) and 727(d); and 20 U.S.C. 1231g(a))

§ 361.11 Withholding of funds.

(a) *Basis for withholding.* The Secretary may withhold or limit payments under section 111 or 603(a) of the Act, as provided by section 107(c) of the Act, if the Secretary determines that—

(1) The vocational rehabilitation services portion of the Unified or Combined State Plan, including the supported employment supplement, has been so changed that it no longer conforms with the requirements of this part or part 363; or

(2) In the administration of the vocational rehabilitation services portion of the Unified or Combined State Plan there is a failure to comply substantially with any provision of such plan or with an evaluation standard or performance indicator established under section 106 of the Act.

(b) *Informal resolution.* Prior to withholding or limiting payments in accordance with this section, the Secretary attempts to resolve disputed issues informally with State officials.

(c) *Notice.* If, after reasonable effort has been made to resolve the dispute, no resolution has been reached, the Secretary provides notice to the State agency of the intention to withhold or limit payments and of the opportunity for a hearing.

(d) *Withholding hearing.* If the State agency requests a hearing, the Secretary designates one or more individuals, either from the Department or elsewhere, not responsible for or connected with the administration of this program, to conduct a hearing in accordance with the provisions of 34 CFR part 81, subpart A.

(e) *Initial decision.* The hearing officer issues an initial decision in accordance with 34 CFR 81.41.

(f) *Petition for review of an initial decision.* The State agency may seek the Secretary's review of the initial decision in accordance with 34 CFR 81.42.

(g) *Review by the Secretary.* The Secretary reviews the initial decision in accordance with 34 CFR 81.43.

(h) *Final decision of the Department.* The final decision of the Department is made in accordance with 34 CFR 81.44.

(i) *Judicial review.* A State may appeal the Secretary's decision to withhold or limit payments by filing a petition for review with the United States Court of Appeals for the circuit in which the State is located, in accordance with section 107(d) of the Act.

(Authority: Sections 12(c), 101(b), and 107(c) and (d) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 709(c), 721(b) and 727(c) and (d))

Administration

§ 361.12 Methods of administration.

The vocational rehabilitation services portion of the Unified or Combined State Plan must assure that the State agency, and the designated State unit if applicable, employs methods of administration found necessary by the Secretary for the proper and efficient administration of the plan and for carrying out all functions for which the State is responsible under the plan and this part. These methods must include procedures to ensure accurate data collection and financial accountability.

(Approved by the Office of Management and Budget under control number 1205–0522)

(Authority: Sections 12(c) and 101(a)(6) and (a)(10)(A) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 709(c) and 721(a)(6) and (a)(10)(A))

§ 361.13 State agency for administration.

(a) *Designation of State agency.* The vocational rehabilitation services portion of the Unified or Combined State Plan must designate a State agency as the sole State agency to administer the vocational rehabilitation services portion of the Unified or Combined State Plan, or to supervise its administration in a political subdivision of the State by a sole local agency, in accordance with the following requirements:

(1) *General.* Except as provided in paragraphs (a)(2) and (3) of this section, the vocational rehabilitation services portion of the Unified or Combined State Plan must provide that the designated State agency is one of the following types of agencies:

(i) A State agency that is primarily concerned with vocational rehabilitation or vocational and other rehabilitation of individuals with disabilities; or

(ii) A State agency that includes a vocational rehabilitation unit as provided in paragraph (b) of this section.

(2) *American Samoa.* In the case of American Samoa, the vocational rehabilitation services portion of the Unified or Combined State Plan must designate the Governor.

(3) *Designated State agency for individuals who are blind.* If a State commission or other agency that provides assistance or services to individuals who are blind is authorized under State law to provide vocational rehabilitation services to individuals who are blind, and this commission or agency is primarily concerned with vocational rehabilitation or includes a vocational rehabilitation unit as provided in paragraph (b) of this section, the vocational rehabilitation services portion of the Unified or Combined State Plan may designate that agency as the sole State agency to

administer the part of the plan under which vocational rehabilitation services are provided for individuals who are blind or to supervise its administration in a political subdivision of the State by a sole local agency.

(b) *Designation of State unit*—(1) *General.* If the designated State agency is not of the type specified in paragraph (a)(1)(i) of this section or if the designated State agency specified in paragraph (a)(3) of this section is not primarily concerned with vocational rehabilitation or vocational and other rehabilitation of individuals with disabilities, the vocational rehabilitation services portion of the Unified or Combined State Plan must assure that the agency (or each agency if two agencies are designated) includes a vocational rehabilitation bureau, division, or unit that—

(i) Is primarily concerned with vocational rehabilitation or vocational and other rehabilitation of individuals with disabilities and is responsible for the administration of the State agency's vocational rehabilitation program under the vocational rehabilitation services portion of the Unified or Combined State Plan;

(ii) Has a full-time director who is responsible for the day-to-day operations of the vocational rehabilitation program;

(iii) Has a staff, at least 90 percent of whom are employed full time on the rehabilitation work of the organizational unit;

(iv) Is located at an organizational level and has an organizational status within the State agency comparable to that of other major organizational units of the agency; and

(v) Has the sole authority and responsibility described within the designated State agency in paragraph (a) of this section to expend funds made available under the Act in a manner that is consistent with the purpose of the Act.

(2) In the case of a State that has not designated a separate State agency for individuals who are blind, as provided for in paragraph (a)(3) of this section, the State may assign responsibility for the part of the vocational rehabilitation services portion of the Unified or Combined State Plan under which vocational rehabilitation services are provided to individuals who are blind to one organizational unit of the designated State agency and may assign responsibility for the rest of the plan to another organizational unit of the designated State agency, with the provisions of paragraph (b)(1) of this section applying separately to each of these units.

(c) *Responsibility for administration*—(1) *Required activities.* At a minimum, the following activities are the responsibility of the designated State unit or the sole local agency under the supervision of the State unit:

(i) All decisions affecting eligibility for vocational rehabilitation services, the nature and scope of available services, and the provision of these services.

(ii) The determination to close the record of services of an individual who has achieved an employment outcome in accordance with § 361.56.

(iii) Policy formulation and implementation.

(iv) The allocation and expenditure of vocational rehabilitation funds.

(v) Participation as a partner in the one-stop service delivery system established under title I of the Workforce Innovation and Opportunity Act, in accordance with 20 CFR part 678.

(2) *Non-delegable responsibility.* The responsibility for the functions described in paragraph (c)(1) of this section may not be delegated to any other agency or individual.

(Approved by the Office of Management and Budget under control number 1205–0522)

(Authority: Section 101(a)(2) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 721(a)(2))

§ 361.14 Substitute State agency.

(a) *General provisions.* (1) If the Secretary has withheld all funding from a State under § 361.11, the State may designate another agency to substitute for the designated State agency in carrying out the State's program of vocational rehabilitation services.

(2) Any public or nonprofit private organization or agency within the State or any political subdivision of the State is eligible to be a substitute agency.

(3) The substitute agency must submit a vocational rehabilitation services portion of the Unified or Combined State Plan that meets the requirements of this part.

(4) The Secretary makes no grant to a substitute agency until the Secretary approves its plan.

(b) *Substitute agency matching share.* The Secretary does not make any payment to a substitute agency unless it has provided assurances that it will contribute the same matching share as the State would have been required to contribute if the State agency were carrying out the vocational rehabilitation program.

(Authority: Section 107(c)(3) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 727(c)(3))

§ 361.15 Local administration.

(a) If the vocational rehabilitation services portion of the Unified or Combined State Plan provides for the administration of the plan by a local agency, the designated State agency must—

(1) Ensure that each local agency is under the supervision of the designated State unit and is the sole local agency as defined in § 361.5(c)(47) that is responsible for the administration of the program within the political subdivision that it serves; and

(2) Develop methods that each local agency will use to administer the vocational rehabilitation program, in accordance with the vocational rehabilitation services portion of the Unified or Combined State Plan.

(b) A separate local agency serving individuals who are blind may administer that part of the plan relating to vocational rehabilitation of individuals who are blind, under the supervision of the designated State unit for individuals who are blind.

(Approved by the Office of Management and Budget under control number 1205–0522)

(Authority: Sections 7(24) and 101(a)(2)(A) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 705(24) and 721(a)(2)(A))

§ 361.16 Establishment of an independent commission or a State Rehabilitation Council.

(a) *General requirement.* Except as provided in paragraph (b) of this section, the vocational rehabilitation services portion of the Unified or Combined State Plan must contain one of the following two assurances:

(1) An assurance that the designated State agency is an independent State commission that—

(i) Is responsible under State law for operating, or overseeing the operation of, the vocational rehabilitation program in the State and is primarily concerned with vocational rehabilitation or vocational and other rehabilitation services, in accordance with § 361.13(a)(1)(i);

(ii) Is consumer-controlled by persons who—

(A) Are individuals with physical or mental impairments that substantially limit major life activities; and

(B) Represent individuals with a broad range of disabilities, unless the designated State unit under the direction of the commission is the State agency for individuals who are blind;

(iii) Includes family members, advocates, or other representatives of individuals with mental impairments; and

(iv) Conducts the functions identified in § 361.17(h)(4).

(2) An assurance that—

(i) The State has established a State Rehabilitation Council (Council) that meets the requirements of § 361.17;

(ii) The designated State unit, in accordance with § 361.29, jointly develops, agrees to, and reviews annually State goals and priorities and jointly submits to the Secretary annual reports of progress with the Council;

(iii) The designated State unit regularly consults with the Council regarding the development, implementation, and revision of State policies and procedures of general applicability pertaining to the provision of vocational rehabilitation services;

(iv) The designated State unit transmits to the Council—

(A) All plans, reports, and other information required under this part to be submitted to the Secretary;

(B) All policies and information on all practices and procedures of general applicability provided to or used by rehabilitation personnel providing vocational rehabilitation services under this part; and

(C) Copies of due process hearing decisions issued under this part and transmitted in a manner to ensure that the identity of the participants in the hearings is kept confidential; and

(v) The vocational rehabilitation services portion of the Unified or Combined State Plan, and any revision to the vocational rehabilitation services portion of the Unified or Combined State Plan, includes a summary of input provided by the Council, including recommendations from the annual report of the Council, the review and analysis of consumer satisfaction described in § 361.17(h)(4), and other reports prepared by the Council, and the designated State unit's response to the input and recommendations, including its reasons for rejecting any input or recommendation of the Council.

(b) *Exception for separate State agency for individuals who are blind.* In the case of a State that designates a separate State agency under § 361.13(a)(3) to administer the part of the vocational rehabilitation services portion of the Unified or Combined State Plan under which vocational rehabilitation services are provided to individuals who are blind, the State must either establish a separate State Rehabilitation Council for each agency that does not meet the requirements in paragraph (a)(1) of this section or establish one State Rehabilitation Council for both agencies if neither agency meets the requirements of paragraph (a)(1) of this section.

(Approved by the Office of Management and Budget under control number 1205–0522)

(Authority: Sections 101(a)(21) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 721(a)(21))

§ 361.17 Requirements for a State Rehabilitation Council.

If the State has established a Council under § 361.16(a)(2) or (b), the Council must meet the following requirements:

(a) *Appointment.* (1) The members of the Council must be appointed by the Governor or, in the case of a State that, under State law, vests authority for the administration of the activities carried out under this part in an entity other than the Governor (such as one or more houses of the State legislature or an independent board), the chief officer of that entity.

(2) The appointing authority must select members of the Council after soliciting recommendations from representatives of organizations representing a broad range of individuals with disabilities and organizations interested in individuals with disabilities. In selecting members, the appointing authority must consider, to the greatest extent practicable, the extent to which minority populations are represented on the Council.

(b) *Composition*—(1) *General.* Except as provided in paragraph (b)(3) of this section, the Council must be composed of at least 15 members, including—

(i) At least one representative of the Statewide Independent Living Council, who must be the chairperson or other designee of the Statewide Independent Living Council;

(ii) At least one representative of a parent training and information center established pursuant to section 682(a) of the Individuals with Disabilities Education Act;

(iii) At least one representative of the Client Assistance Program established under part 370 of this chapter, who must be the director of or other individual recommended by the Client Assistance Program;

(iv) At least one qualified vocational rehabilitation counselor with knowledge of and experience with vocational rehabilitation programs who serves as an ex officio, nonvoting member of the Council if employed by the designated State agency;

(v) At least one representative of community rehabilitation program service providers;

(vi) Four representatives of business, industry, and labor;

(vii) Representatives of disability groups that include a cross section of—

(A) Individuals with physical, cognitive, sensory, and mental disabilities; and

(B) Representatives of individuals with disabilities who have difficulty representing themselves or are unable due to their disabilities to represent themselves;

(viii) Current or former applicants for, or recipients of, vocational rehabilitation services;

(ix) In a State in which one or more projects are funded under section 121 of the Act (American Indian Vocational Rehabilitation Services), at least one representative of the directors of the projects in such State;

(x) At least one representative of the State educational agency responsible for the public education of students with disabilities who are eligible to receive services under this part and part B of the Individuals with Disabilities Education Act;

(xi) At least one representative of the State workforce development board; and

(xii) The director of the designated State unit as an ex officio, nonvoting member of the Council.

(2) *Employees of the designated State agency.* Employees of the designated State agency may serve only as nonvoting members of the Council. This provision does not apply to the representative appointed pursuant to paragraph (b)(1)(iii) of this section.

(3) *Composition of a separate Council for a separate State agency for individuals who are blind.* Except as provided in paragraph (b)(4) of this section, if the State establishes a separate Council for a separate State agency for individuals who are blind, that Council must—

(i) Conform with all of the composition requirements for a Council under paragraph (b)(1) of this section, except the requirements in paragraph (b)(1)(vii), unless the exception in paragraph (b)(4) of this section applies; and

(ii) Include—

(A) At least one representative of a disability advocacy group representing individuals who are blind; and

(B) At least one representative of an individual who is blind, has multiple disabilities, and has difficulty representing himself or herself or is unable due to disabilities to represent himself or herself.

(4) *Exception.* If State law in effect on October 29, 1992 requires a separate Council under paragraph (b)(3) of this section to have fewer than 15 members, the separate Council is in compliance with the composition requirements in paragraphs (b)(1)(vi) and (viii) of this section if it includes at least one representative who meets the requirements for each of those paragraphs.

(c) *Majority.* (1) A majority of the Council members must be individuals

with disabilities who meet the requirements of § 361.5(c)(28) and are not employed by the designated State unit.

(2) In the case of a separate Council established under § 361.16(b), a majority of the Council members must be individuals who are blind and are not employed by the designated State unit.

(d) *Chairperson.* (1) The chairperson must be selected by the members of the Council from among the voting members of the Council, subject to the veto power of the Governor; or

(2) In States in which the Governor does not have veto power pursuant to State law, the appointing authority described in paragraph (a)(1) of this section must designate a member of the Council to serve as the chairperson of the Council or must require the Council to designate a member to serve as chairperson.

(e) *Terms of appointment.* (1) Each member of the Council must be appointed for a term of no more than three years, and each member of the Council, other than a representative identified in paragraph (b)(1)(iii) or (ix) of this section, may serve for no more than two consecutive full terms.

(2) A member appointed to fill a vacancy occurring prior to the end of the term for which the predecessor was appointed must be appointed for the remainder of the predecessor's term.

(3) The terms of service of the members initially appointed must be, as specified by the appointing authority as described in paragraph (a)(1) of this section, for varied numbers of years to ensure that terms expire on a staggered basis.

(f) *Vacancies.* (1) A vacancy in the membership of the Council must be filled in the same manner as the original appointment, except the appointing authority as described in paragraph (a)(1) of this section may delegate the authority to fill that vacancy to the remaining members of the Council after making the original appointment.

(2) No vacancy affects the power of the remaining members to execute the duties of the Council.

(g) *Conflict of interest.* No member of the Council may cast a vote on any matter that would provide direct financial benefit to the member or the member's organization or otherwise give the appearance of a conflict of interest under State law.

(h) *Functions.* The Council must, after consulting with the State workforce development board—

(1) Review, analyze, and advise the designated State unit regarding the performance of the State unit's responsibilities under this part, particularly responsibilities related to—

(i) Eligibility, including order of selection;

(ii) The extent, scope, and effectiveness of services provided; and

(iii) Functions performed by State agencies that affect or potentially affect the ability of individuals with disabilities in achieving employment outcomes under this part;

(2) In partnership with the designated State unit—

(i) Develop, agree to, and review State goals and priorities in accordance with § 361.29(c); and

(ii) Evaluate the effectiveness of the vocational rehabilitation program and submit reports of progress to the Secretary in accordance with § 361.29(e);

(3) Advise the designated State agency and the designated State unit regarding activities carried out under this part and assist in the preparation of the vocational rehabilitation services portion of the Unified or Combined State Plan and amendments to the plan, applications, reports, needs assessments, and evaluations required by this part;

(4) To the extent feasible, conduct a review and analysis of the effectiveness of, and consumer satisfaction with—

(i) The functions performed by the designated State agency;

(ii) The vocational rehabilitation services provided by State agencies and other public and private entities responsible for providing vocational rehabilitation services to individuals with disabilities under the Act; and

(iii) The employment outcomes achieved by eligible individuals receiving services under this part, including the availability of health and other employment benefits in connection with those employment outcomes;

(5) Prepare and submit to the Governor and to the Secretary no later than 90 days after the end of the Federal fiscal year an annual report on the status of vocational rehabilitation programs operated within the State and make the report available to the public through appropriate modes of communication;

(6) To avoid duplication of efforts and enhance the number of individuals served, coordinate activities with the activities of other councils within the State, including the Statewide Independent Living Council established under chapter 1, title VII of the Act, the advisory panel established under section 612(a)(21) of the Individuals with Disabilities Education Act, the State Developmental Disabilities Planning Council described in section 124 of the Developmental Disabilities Assistance and Bill of Rights Act, the State mental health planning council established under section 1914(a) of the Public Health Service Act, and the State workforce development board, and with the activities of entities carrying out programs under the Assistive Technology Act of 1998;

(7) Provide for coordination and the establishment of working relationships between the designated State agency and the Statewide Independent Living Council and centers for independent living within the State; and

(8) Perform other comparable functions, consistent with the purpose of this part, as the Council determines to be appropriate, that are comparable to the other functions performed by the Council.

(i) *Resources.* (1) The Council, in conjunction with the designated State unit, must prepare a plan for the provision of resources, including staff and other personnel, that may be necessary and sufficient for the Council to carry out its functions under this part.

(2) The resource plan must, to the maximum extent possible, rely on the use of resources in existence during the period of implementation of the plan.

(3) Any disagreements between the designated State unit and the Council regarding the amount of resources necessary to carry out the functions of the Council must be resolved by the Governor, consistent with paragraphs (i)(1) and (2) of this section.

(4) The Council must, consistent with State law, supervise and evaluate the staff and personnel that are necessary to carry out its functions.

(5) Those staff and personnel that are assisting the Council in carrying out its functions may not be assigned duties by the designated State unit or any other agency or office of the State that would create a conflict of interest.

(j) *Meetings.* The Council must—

(1) Convene at least four meetings a year in locations determined by the Council to be necessary to conduct Council business. The meetings must be publicly announced, open, and accessible to the general public, including individuals with disabilities, unless there is a valid reason for an executive session; and

(2) Conduct forums or hearings, as appropriate, that are publicly announced, open, and accessible to the public, including individuals with disabilities.

(k) *Compensation.* Funds appropriated under title I of the Act, except funds to carry out sections 112 and 121 of the Act, may be used to compensate and reimburse the expenses

of Council members in accordance with section 105(g) of the Act.

(Approved by the Office of Management and Budget under control number 1205–0522)

(Authority: Section 105 of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 725)

§ 361.18 Comprehensive system of personnel development.

The vocational rehabilitation services portion of the Unified or Combined State Plan must describe the procedures and activities the State agency will undertake to establish and maintain a comprehensive system of personnel development designed to ensure an adequate supply of qualified rehabilitation personnel, including professionals and paraprofessionals, for the designated State unit. If the State agency has a State Rehabilitation Council, this description must, at a minimum, specify that the Council has an opportunity to review and comment on the development of plans, policies, and procedures necessary to meet the requirements of paragraphs (b) through (d) of this section. This description must also conform with the following requirements:

(a) *Personnel and personnel development data system.* The vocational rehabilitation services portion of the Unified or Combined State Plan must describe the development and maintenance of a system by the State agency for collecting and analyzing on an annual basis data on qualified personnel needs and personnel development, in accordance with the following requirements:

(1) Data on qualified personnel needs must include—

(i) The number of personnel who are employed by the State agency in the provision of vocational rehabilitation services in relation to the number of individuals served, broken down by personnel category;

(ii) The number of personnel currently needed by the State agency to provide vocational rehabilitation services, broken down by personnel category; and

(iii) Projections of the number of personnel, broken down by personnel category, who will be needed by the State agency to provide vocational rehabilitation services in the State in five years based on projections of the number of individuals to be served, including individuals with significant disabilities, the number of personnel expected to retire or leave the field, and other relevant factors.

(2) Data on personnel development must include—

(i) A list of the institutions of higher education in the State that are preparing vocational rehabilitation professionals, by type of program;

(ii) The number of students enrolled at each of those institutions, broken down by type of program; and

(iii) The number of students who graduated during the prior year from each of those institutions with certification or licensure, or with the credentials for certification or licensure, broken down by the personnel category for which they have received, or have the credentials to receive, certification or licensure.

(b) *Plan for recruitment, preparation, and retention of qualified personnel.* The vocational rehabilitation services portion of the Unified or Combined State Plan must describe the development, updating, and implementation of a plan to address the current and projected needs for personnel who are qualified in accordance with paragraph (c) of this section. The plan must identify the personnel needs based on the data collection and analysis system described in paragraph (a) of this section and must provide for the coordination and facilitation of efforts between the designated State unit and institutions of higher education and professional associations to recruit, prepare, and retain personnel who are qualified in accordance with paragraph (c) of this section, including personnel from minority backgrounds and personnel who are individuals with disabilities.

(c) *Personnel standards.* (1) The vocational rehabilitation services portion of the Unified or Combined State Plan must include the State agency's policies and describe—

(i) Standards that are consistent with any national or State-approved or recognized certification, licensing, or registration requirements, or, in the absence of these requirements, other comparable requirements (including State personnel requirements) that apply to the profession or discipline in which that category of personnel is providing vocational rehabilitation services; and

(ii) The establishment and maintenance of education and experience requirements, to ensure that the personnel have a 21st-century understanding of the evolving labor force and the needs of individuals with disabilities, including requirements for—

(A)(*1*) Attainment of a baccalaureate degree in a field of study reasonably related to vocational rehabilitation, to indicate a level of competency and skill demonstrating basic preparation in a field of study such as vocational rehabilitation counseling, social work, psychology, disability studies, business administration, human resources, special education, supported employment, customized employment, economics, or another field that reasonably prepares individuals to work with consumers and employers; and

(*2*) Demonstrated paid or unpaid experience, for not less than one year, consisting of—

(*i*) Direct work with individuals with disabilities in a setting such as an independent living center;

(*ii*) Direct service or advocacy activities that provide such individual with experience and skills in working with individuals with disabilities; or

(*iii*) Direct experience in competitive integrated employment environments as an employer, as a small business owner or operator, or in self-employment, or other experience in human resources or recruitment, or experience in supervising employees, training, or other activities; or

(B) Attainment of a master's or doctoral degree in a field of study such as vocational rehabilitation counseling, law, social work, psychology, disability studies, business administration, human resources, special education, management, public administration, or another field that reasonably provides competence in the employment sector, in a disability field, or in both business-related and rehabilitation-related fields; and

(2) As used in this section—

(i) *Profession or discipline* means a specific occupational category, including any paraprofessional occupational category, that—

(A) Provides rehabilitation services to individuals with disabilities;

(B) Has been established or designated by the State unit; and

(C) Has a specified scope of responsibility.

(ii) Ensuring that personnel have a 21st-century understanding of the evolving labor force and the needs of individuals with disabilities means that personnel have specialized training and experience that enables them to work effectively with individuals with disabilities to assist them to achieve competitive integrated employment and with employers who hire such individuals. Relevant personnel skills include, but are not limited to—

(A) Understanding the functional limitations of various disabilities and the vocational implications of functional limitations on employment, especially with regard to individuals whose disabilities may require specialized services or groups of individuals with disabilities who

comprise an increasing proportion of the State VR caseloads, such as individuals with traumatic brain injury, post-traumatic stress syndrome, mental illnesses, autism, blindness or deaf-blindness;

(B) Vocational assessment tools and strategies and the interpretation of vocational assessment results, including, when appropriate, situational and work-based assessments and analysis of transferrable work skills;

(C) Counseling and guidance skills, including individual and group counseling and career guidance;

(D) Effective use of practices leading to competitive integrated employment, such as supported employment, customized employment, internships, apprenticeships, paid work experiences, etc.;

(E) Case management and employment services planning, including familiarity and use of the broad range of disability, employment, and social services programs in the state and local area, such as independent living programs, Social Security work incentives, and the Social Security Administration's Ticket-to-Work program;

(F) Caseload management, including familiarity with effective caseload management practices and the use of any available automated or information technology resources;

(G) In-depth knowledge of labor market trends, occupational requirements, and other labor market information that provides information about employers, business practices, and employer personnel needs, such as data provided by the Bureau of Labor Statistics and the Department of Labor's O*NET occupational system;

(H) The use of labor market information for vocational rehabilitation counseling, vocational planning, and the provision of information to consumers for the purposes of making informed choices, business engagement and business relationships, and job development and job placement;

(I) The use of labor market information to support building and maintaining relationships with employers and to inform delivery of job development and job placement activities that respond to today's labor market;

(J) Understanding the effective utilization of rehabilitation technology and job accommodations;

(K) Training in understanding the provisions of the Americans with Disabilities Act and other employment discrimination and employment-related laws;

(L) Advocacy skills to modify attitudinal and environmental barriers to employment for individuals with disabilities, including those with the most significant disabilities;

(M) Skills to address cultural diversity among consumers, particularly affecting workplace settings, including racial and ethnic diversity and generational differences; and

(N) Understanding confidentiality and ethical standards and practices, especially related to new challenges in use of social media, new partnerships, and data sharing.

(d) *Staff development.* (1) The vocational rehabilitation services portion of the Unified or Combined State Plan must include the State agency's policies and describe the procedures and activities the State agency will undertake to ensure that all personnel employed by the State unit receive appropriate and adequate training, including a description of—

(i) A system of staff development for rehabilitation professionals and paraprofessionals within the State unit, particularly with respect to assessment, vocational counseling, job placement, and rehabilitation technology, including training implemented in coordination with entities carrying out State programs under section 4 of the Assistive Technology Act of 1998 (29 U.S.C. 3003);

(ii) Procedures for acquiring and disseminating to rehabilitation professionals and paraprofessionals within the designated State unit significant knowledge from research and other sources; and

(iii) Policies and procedures relating to the establishment and maintenance of standards to ensure that personnel, including rehabilitation professionals and paraprofessionals, needed within the designated State unit to carry out this part are appropriately and adequately prepared and trained.

(2) The specific training areas for staff development must be based on the needs of each State unit and may include, but are not limited to—

(i) Training regarding the Workforce Innovation and Opportunity Act and the amendments it made to the Rehabilitation Act of 1973;

(ii) Training with respect to the requirements of the Americans with Disabilities Act, the Individuals with Disabilities Education Act, and Social Security work incentive programs, including programs under the Ticket to Work and Work Incentives Improvement Act of 1999, training to facilitate informed choice under this program, and training to improve the provision of services to culturally diverse populations; and

(iii) Activities related to—

(A) Recruitment and retention of qualified rehabilitation personnel;

(B) Succession planning; and

(C) Leadership development and capacity building.

(e) *Personnel to address individual communication needs.* The vocational rehabilitation services portion of the Unified or Combined State Plan must describe how the designated State unit includes among its personnel, or obtains the services of—

(1) Individuals able to communicate in the native languages of applicants, recipients of services, and eligible individuals who have limited English proficiency; and

(2) Individuals able to communicate with applicants, recipients of services, and eligible individuals in appropriate modes of communication.

(f) *Coordination with personnel development under the Individuals with Disabilities Education Act.* The vocational rehabilitation services portion of the Unified or Combined State Plan must describe the procedures and activities the State agency will undertake to coordinate its comprehensive system of personnel development under the Act with personnel development under the Individuals with Disabilities Education Act.

(Approved by the Office of Management and Budget under control number 1205–0522)

(Authority: Sections 12(c) and 101(a)(7) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 709(c) and 721(a)(7))

§ 361.19 Affirmative action for individuals with disabilities.

The vocational rehabilitation services portion of the Unified or Combined State Plan must assure that the State agency takes affirmative action to employ and advance in employment qualified individuals with disabilities covered under and on the same terms and conditions as stated in section 503 of the Act.

(Approved by the Office of Management and Budget under control number 1205–0522)

(Authority: Section 101(a)(6)(B) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 721(a)(6)(B))

§ 361.20 Public participation requirements.

(a) *Conduct of public meetings.* (1) The vocational rehabilitation services portion of the Unified or Combined State Plan must assure that prior to the adoption of any substantive policies or procedures governing the provision of vocational rehabilitation services under the Unified or Combined State Plan, the

designated State agency conducts public meetings throughout the State to provide the public, including individuals with disabilities, an opportunity to comment on the policies or procedures.

(2) For purposes of this section, substantive changes to the policies or procedures governing the provision of vocational rehabilitation services that would require the conduct of public meetings are those that directly impact the nature and scope of the services provided to individuals with disabilities, or the manner in which individuals interact with the designated State agency or in matters related to the delivery of vocational rehabilitation services. Examples of substantive changes include, but are not limited to—

(i) Any changes to policies or procedures that fundamentally alter the rights and responsibilities of individuals with disabilities in the vocational rehabilitation process;

(ii) Organizational changes to the designated State agency or unit that would likely affect the manner in which services are delivered;

(iii) Any changes that affect the nature and scope of vocational rehabilitation services provided by the designated State agency or unit;

(iv) Changes in formal or informal dispute procedures;

(v) The adoption or amendment of policies instituting an order of selection; and

(vi) Changes to policies and procedures regarding the financial participation of eligible individuals.

(3) Non-substantive, *e.g.*, administrative changes that would not require the need for public hearings include:

(i) Internal procedures that do not directly affect individuals receiving vocational rehabilitation services, such as payment processing or personnel procedures;

(ii) Changes to the case management system that only affect vocational rehabilitation personnel;

(iii) Changes in indirect cost allocations, internal fiscal review procedures, or routine reporting requirements;

(iv) Minor revisions to vocational rehabilitation procedures or policies to correct production errors, such as typographical and grammatical mistakes; and

(v) Changes to contract procedures that do not affect the delivery of vocational rehabilitation services.

(b) *Notice requirements.* The vocational rehabilitation services portion of the Unified or Combined State Plan must assure that the designated State agency, prior to conducting the public meetings, provides appropriate and sufficient notice throughout the State of the meetings in accordance with—

(1) State law governing public meetings; or

(2) In the absence of State law governing public meetings, procedures developed by the designated State agency in consultation with the State Rehabilitation Council.

(c) *Summary of input of the State Rehabilitation Council.* The vocational rehabilitation services portion of the Unified or Combined State Plan must provide a summary of the input of the State Rehabilitation Council, if the State agency has a Council, into the vocational rehabilitation services portion of the Unified or Combined State Plan and any amendment to that portion of the plan, in accordance with § 361.16(a)(2)(v).

(d) *Special consultation requirements.* The vocational rehabilitation services portion of the Unified or Combined State Plan must assure that the State agency actively consults with the director of the Client Assistance Program, the State Rehabilitation Council, if the State agency has a Council, and, as appropriate, Indian tribes, tribal organizations, and native Hawaiian organizations on its policies and procedures governing the provision of vocational rehabilitation services under the vocational rehabilitation services portion of the Unified or Combined State Plan.

(e) *Appropriate modes of communication.* The State unit must provide to the public, through appropriate modes of communication, notices of the public meetings, any materials furnished prior to or during the public meetings, and the policies and procedures governing the provision of vocational rehabilitation services under the vocational rehabilitation services portion of the Unified or Combined State Plan.

(Approved by the Office of Management and Budget under control number 1205–0522)

(Authority: Sections 12(c), 101(a)(16)(A), and 105(c)(3) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 709(c), 721(a)(16)(A), and 725(c)(3))

§ 361.21 Consultations regarding the administration of the vocational rehabilitation services portion of the Unified or Combined State plan.

The vocational rehabilitation services portion of the Unified or Combined State Plan must assure that, in connection with matters of general policy arising in the administration of the vocational rehabilitation services portion of the Unified or Combined State Plan, the designated State agency takes into account the views of—

(a) Individuals and groups of individuals who are recipients of vocational rehabilitation services or, as appropriate, the individuals' representatives;

(b) Personnel working in programs that provide vocational rehabilitation services to individuals with disabilities;

(c) Providers of vocational rehabilitation services to individuals with disabilities;

(d) The director of the Client Assistance Program; and

(e) The State Rehabilitation Council, if the State has a Council.

(Approved by the Office of Management and Budget under control number 1205–0522)

(Authority: Sections 101(a)(16)(B) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 721(a)(16)(B))

§ 361.22 Coordination with education officials.

(a) *Plans, policies, and procedures.* (1) The vocational rehabilitation services portion of the Unified or Combined State Plan must contain plans, policies, and procedures for coordination between the designated State agency and education officials responsible for the public education of students with disabilities that are designed to facilitate the transition of students with disabilities from the receipt of educational services, including pre-employment transition services, in school to the receipt of vocational rehabilitation services under the responsibility of the designated State agency.

(2) These plans, policies, and procedures in paragraph (a)(1) of this section must provide for the development and approval of an individualized plan for employment in accordance with § 361.45 as early as possible during the transition planning process and not later than the time a student with a disability determined to be eligible for vocational rehabilitation services leaves the school setting or, if the designated State unit is operating under an order of selection, before each eligible student with a disability able to be served under the order leaves the school setting.

(b) *Formal interagency agreement.* The vocational rehabilitation services portion of the Unified or Combined State Plan must include information on a formal interagency agreement with the State educational agency that, at a minimum, provides for—

(1) Consultation and technical assistance, which may be provided

using alternative means for meeting participation (such as video conferences and conference calls), to assist educational agencies in planning for the transition of students with disabilities from school to post-school activities, including pre-employment transition services and other vocational rehabilitation services;

(2) Transition planning by personnel of the designated State agency and educational agency personnel for students with disabilities that facilitates the development and implementation of their individualized education programs (IEPs) under section 614(d) of the Individuals with Disabilities Education Act;

(3) The roles and responsibilities, including financial responsibilities, of each agency, including provisions for determining State lead agencies and qualified personnel responsible for transition services and pre-employment transition services;

(4) Procedures for outreach to and identification of students with disabilities who are in need of transition services and pre-employment transition services. Outreach to these students should occur as early as possible during the transition planning process and must include, at a minimum, a description of the purpose of the vocational rehabilitation program, eligibility requirements, application procedures, and scope of services that may be provided to eligible individuals;

(5) Coordination necessary to satisfy documentation requirements set forth in 34 CFR part 397 with regard to students and youth with disabilities who are seeking subminimum wage employment; and

(6) Assurance that, in accordance with 34 CFR 397.31, neither the State educational agency nor the local educational agency will enter into a contract or other arrangement with an entity, as defined in 34 CFR 397.5(d), for the purpose of operating a program under which a youth with a disability is engaged in work compensated at a subminimum wage.

(c) *Construction.* Nothing in this part will be construed to reduce the obligation under the Individuals with Disabilities Education Act (20 U.S.C. 1400 *et seq.*) of a local educational agency or any other agency to provide or pay for any transition services that are also considered special education or related services and that are necessary for ensuring a free appropriate public education to children with disabilities within the State involved.

(Approved by the Office of Management and Budget under control number 1205–0522)

(Authority: Sections 12(c), 101(a)(11)(D), 101(c), and 511 of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 709(c), 721(a)(11)(D), 721(c), and 794g)

§ 361.23 [Reserved]

§ 361.24 Cooperation and coordination with other entities.

(a) *Interagency cooperation.* The vocational rehabilitation services portion of the Unified or Combined State Plan must describe the designated State agency's cooperation with and use of the services and facilities of Federal, State, and local agencies and programs, including the State programs carried out under section 4 of the Assistive Technology Act of 1998 (29 U.S.C. 3003), programs carried out by the Under Secretary for Rural Development of the Department of Agriculture, noneducational agencies serving out-of-school youth, and State use contracting programs, to the extent that such Federal, State, and local agencies and programs are not carrying out activities through the statewide workforce development system.

(b) *Coordination with the Statewide Independent Living Council and independent living centers.* The vocational rehabilitation services portion of the Unified or Combined State Plan must assure that the designated State unit, the Statewide Independent Living Council established under title VII, chapter 1, part B of the Act, and the independent living centers established under title VII, Chapter 1, Part C of the Act have developed working relationships and coordinate their activities.

(c) *Coordination with Employers.* The vocational rehabilitation services portion of the Unified or Combined State Plan must describe how the designated State unit will work with employers to identify competitive integrated employment opportunities and career exploration opportunities, in order to facilitate the provision of—

(1) Vocational rehabilitation services; and

(2) Transition services for youth with disabilities and students with disabilities, such as pre-employment transition services.

(d) *Cooperative agreement with recipients of grants for services to American Indians*—(1) *General.* In applicable cases, the vocational rehabilitation services portion of the Unified or Combined State Plan must assure that the designated State agency has entered into a formal cooperative agreement with each grant recipient in the State that receives funds under part C of the Act (American Indian Vocational Rehabilitation Services).

(2) *Contents of formal cooperative agreement.* The agreement required under paragraph (d)(1) of this section must describe strategies for collaboration and coordination in providing vocational rehabilitation services to American Indians who are individuals with disabilities, including—

(i) Strategies for interagency referral and information sharing that will assist in eligibility determinations and the development of individualized plans for employment;

(ii) Procedures for ensuring that American Indians who are individuals with disabilities and are living on or near a reservation or tribal service area are provided vocational rehabilitation services;

(iii) Strategies for the provision of transition planning by personnel of the designated State unit, the State educational agency, and the recipient of funds under part C of the Act, that will facilitate the development and approval of the individualized plan for employment under § 361.45; and

(iv) Provisions for sharing resources in cooperative studies and assessments, joint training activities, and other collaborative activities designed to improve the provision of services to American Indians who are individuals with disabilities.

(e) *Reciprocal referral services between two designated State units in the same State.* If there is a separate designated State unit for individuals who are blind, the two designated State units must establish reciprocal referral services, use each other's services and facilities to the extent feasible, jointly plan activities to improve services in the State for individuals with multiple impairments, including visual impairments, and otherwise cooperate to provide more effective services, including, if appropriate, entering into a written cooperative agreement.

(f) *Cooperative agreement regarding individuals eligible for home and community-based waiver programs.* The vocational rehabilitation services portion of the Unified or Combined State Plan must include an assurance that the designated State unit has entered into a formal cooperative agreement with the State agency responsible for administering the State Medicaid plan under title XIX of the Social Security Act (42 U.S.C. 1396 *et seq.*) and the State agency with primary responsibility for providing services and supports for individuals with intellectual disabilities and individuals with developmental disabilities, with respect to the delivery of vocational rehabilitation services, including

extended services, for individuals with the most significant disabilities who have been determined to be eligible for home and community-based services under a Medicaid waiver, Medicaid State plan amendment, or other authority related to a State Medicaid program.

(g) *Interagency cooperation.* The vocational rehabilitation services portion of the Unified or Combined State Plan shall describe how the designated State agency will collaborate with the State agency responsible for administering the State Medicaid plan under title XIX of the Social Security Act (42 U.S.C. 1396 *et seq.*), the State agency responsible for providing services for individuals with developmental disabilities, and the State agency responsible for providing mental health services, to develop opportunities for community-based employment in integrated settings, to the greatest extent practicable.

(h) *Coordination with assistive technology programs.* The vocational rehabilitation services portion of the Unified or Combined State Plan must include an assurance that the designated State unit, and the lead agency and implementing entity (if any) designated by the Governor of the State under section 4 of the Assistive Technology Act of 1998 (29 U.S.C. 3003), have developed working relationships and will enter into agreements for the coordination of their activities, including the referral of individuals with disabilities to programs and activities described in that section.

(i) *Coordination with ticket to work and self-sufficiency program.* The vocational rehabilitation services portion of the Unified or Combined State Plan must include an assurance that the designated State unit will coordinate activities with any other State agency that is functioning as an employment network under the Ticket to Work and Self-Sufficiency Program established under section 1148 of the Social Security Act (42 U.S.C. 1320b–19).

(Approved by the Office of Management and Budget under control number 1205–0522)

(Authority: Sections 12(c) and 101(a)(11) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 709(c) and 721(a)(11))

§ 361.25 Statewideness.

The vocational rehabilitation services portion of the Unified or Combined State Plan must assure that services provided under the vocational rehabilitation services portion of the Unified or Combined State Plan will be available in all political subdivisions of the State, unless a waiver of statewideness is requested and approved in accordance with § 361.26.

(Approved by the Office of Management and Budget under control number 1205–0522)

(Authority: Section 101(a)(4) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 721(a)(4))

§ 361.26 Waiver of statewideness.

(a) *Availability.* The State unit may provide services in one or more political subdivisions of the State that increase services or expand the scope of services that are available statewide under the vocational rehabilitation services portion of the Unified or Combined State Plan if—

(1) The non-Federal share of the cost of these services is met from funds provided by a local public agency, including funds contributed to a local public agency by a private agency, organization, or individual;

(2) The services are likely to promote the vocational rehabilitation of substantially larger numbers of individuals with disabilities or of individuals with disabilities with particular types of impairments; and

(3) For purposes other than those specified in § 361.60(b)(3)(i) and consistent with the requirements in § 361.60(b)(3)(ii), the State includes in its vocational rehabilitation services portion of the Unified or Combined State Plan, and the Secretary approves, a waiver of the statewideness requirement, in accordance with the requirements of paragraph (b) of this section.

(b) *Request for waiver.* The request for a waiver of statewideness must—

(1) Identify the types of services to be provided;

(2) Contain a written assurance from the local public agency that it will make available to the State unit the non-Federal share of funds;

(3) Contain a written assurance that State unit approval will be obtained for each proposed service before it is put into effect; and

(4) Contain a written assurance that all other requirements of the vocational rehabilitation services portion of the Unified or Combined State Plan, including a State's order of selection requirements, will apply to all services approved under the waiver.

(Approved by the Office of Management and Budget under control number 1205–0522)

(Authority: Section 101(a)(4) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 721(a)(4))

§ 361.27 Shared funding and administration of joint programs.

(a) If the vocational rehabilitation services portion of the Unified or Combined State Plan provides for the designated State agency to share funding and administrative responsibility with another State agency or local public agency to carry out a joint program to provide services to individuals with disabilities, the State must submit to the Secretary for approval a plan that describes its shared funding and administrative arrangement.

(b) The plan under paragraph (a) of this section must include—

(1) A description of the nature and scope of the joint program;

(2) The services to be provided under the joint program;

(3) The respective roles of each participating agency in the administration and provision of services; and

(4) The share of the costs to be assumed by each agency.

(c) If a proposed joint program does not comply with the statewideness requirement in § 361.25, the State unit must obtain a waiver of statewideness, in accordance with § 361.26.

(Approved by the Office of Management and Budget under control number 1205–0522)

(Authority: Section 101(a)(2)(A) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 721(a)(2)(A))

§ 361.28 Third-party cooperative arrangements involving funds from other public agencies.

(a) The designated State unit may enter into a third-party cooperative arrangement for providing or contracting for the provision of vocational rehabilitation services with another State agency or a local public agency that is providing part or all of the non-Federal share in accordance with paragraph (c) of this section, if the designated State unit ensures that—

(1) The services provided by the cooperating agency are not the customary or typical services provided by that agency but are new services that have a vocational rehabilitation focus or existing services that have been modified, adapted, expanded, or reconfigured to have a vocational rehabilitation focus;

(2) The services provided by the cooperating agency are only available to applicants for, or recipients of, services from the designated State unit;

(3) Program expenditures and staff providing services under the cooperative arrangement are under the administrative supervision of the designated State unit; and

(4) All requirements of the vocational rehabilitation services portion of the Unified or Combined State Plan, including a State's order of selection,

will apply to all services provided under the cooperative arrangement.

(b) If a third party cooperative arrangement does not comply with the statewideness requirement in § 361.25, the State unit must obtain a waiver of statewideness, in accordance with § 361.26.

(c) The cooperating agency's contribution toward the non-Federal share required under the arrangement, as set forth in paragraph (a) of this section, may be made through:

(1) Cash transfers to the designated State unit;

(2) Certified personnel expenditures for the time cooperating agency staff spent providing direct vocational rehabilitation services pursuant to a third-party cooperative arrangement that meets the requirements of this section. Certified personnel expenditures may include the allocable portion of staff salary and fringe benefits based upon the amount of time cooperating agency staff directly spent providing services under the arrangement; and

(3) other direct expenditures incurred by the cooperating agency for the sole purpose of providing services under this section pursuant to a third-party cooperative arrangement that—

(i) Meets the requirements of this section;

(ii) Are verifiable as being incurred under the third-party cooperative arrangement; and

(iii) Do not meet the definition of third-party in-kind contributions under 2 CFR 200.96.

(Authority: Section 12(c) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 709(c))

§ 361.29 Statewide assessment; annual estimates; annual State goals and priorities; strategies; and progress reports.

(a) *Comprehensive statewide assessment.* (1) The vocational rehabilitation services portion of the Unified or Combined State Plan must include—

(i) The results of a comprehensive, statewide assessment, jointly conducted by the designated State unit and the State Rehabilitation Council (if the State unit has a Council) every three years. Results of the assessment are to be included in the vocational rehabilitation portion of the Unified or Combined State Plan, submitted in accordance with the requirements of § 361.10(a) and the joint regulations of this part. The comprehensive needs assessment must describe the rehabilitation needs of individuals with disabilities residing within the State, particularly the vocational rehabilitation services needs of—

(A) Individuals with the most significant disabilities, including their need for supported employment services;

(B) Individuals with disabilities who are minorities and individuals with disabilities who have been unserved or underserved by the vocational rehabilitation program carried out under this part;

(C) Individuals with disabilities served through other components of the statewide workforce development system as identified by those individuals and personnel assisting those individuals through the components of the system; and

(D) Youth with disabilities, and students with disabilities, including

(*1*) Their need for pre-employment transition services or other transition services; and

(*2*) An assessment of the needs of individuals with disabilities for transition services and pre-employment transition services, and the extent to which such services provided under this part are coordinated with transition services provided under the Individuals with Disabilities Education Act (20 U.S.C. 1400 *et seq.*) in order to meet the needs of individuals with disabilities.

(ii) An assessment of the need to establish, develop, or improve community rehabilitation programs within the State.

(2) The vocational rehabilitation services portion of the Unified or Combined State Plan must assure that the State will submit to the Secretary a report containing information regarding updates to the assessments under paragraph (a) of this section for any year in which the State updates the assessments at such time and in such manner as the Secretary determines appropriate.

(b) *Annual estimates.* The vocational rehabilitation services portion of the Unified or Combined State Plan must include, and must assure that the State will submit a report to the Secretary (at such time and in such manner determined appropriate by the Secretary) that includes, State estimates of—

(1) The number of individuals in the State who are eligible for services under this part;

(2) The number of eligible individuals who will receive services provided with funds provided under this part and under part § 363, including, if the designated State agency uses an order of selection in accordance with § 361.36, estimates of the number of individuals to be served under each priority category within the order;

(3) The number of individuals who are eligible for services under paragraph (b)(1) of this section, but are not receiving such services due to an order of selection; and

(4) The costs of the services described in paragraph (b)(2) of this section, including, if the designated State agency uses an order of selection, the service costs for each priority category within the order.

(c) *Goals and priorities*—(1) *In general.* The vocational rehabilitation services portion of the Unified or Combined State Plan must identify the goals and priorities of the State in carrying out the program.

(2) *Council.* The goals and priorities must be jointly developed, agreed to, reviewed annually, and, as necessary, revised by the designated State unit and the State Rehabilitation Council, if the State unit has a Council.

(3) *Submission.* The vocational rehabilitation services portion of the Unified or Combined State Plan must assure that the State will submit to the Secretary a report containing information regarding revisions in the goals and priorities for any year in which the State revises the goals and priorities at such time and in such manner as determined appropriate by the Secretary.

(4) *Basis for goals and priorities.* The State goals and priorities must be based on an analysis of—

(i) The comprehensive statewide assessment described in paragraph (a) of this section, including any updates to the assessment;

(ii) The performance of the State on the standards and indicators established under section 106 of the Act; and

(iii) Other available information on the operation and the effectiveness of the vocational rehabilitation program carried out in the State, including any reports received from the State Rehabilitation Council under § 361.17(h) and the findings and recommendations from monitoring activities conducted under section 107 of the Act.

(5) *Service and outcome goals for categories in order of selection.* If the designated State agency uses an order of selection in accordance with § 361.36, the vocational rehabilitation services portion of the Unified or Combined State Plan must identify the State's service and outcome goals and the time within which these goals may be achieved for individuals in each priority category within the order.

(d) *Strategies.* The vocational rehabilitation services portion of the Unified or Combined State Plan must describe the strategies the State will use

to address the needs identified in the assessment conducted under paragraph (a) of this section and achieve the goals and priorities identified in paragraph (c) of this section, including—

(1) The methods to be used to expand and improve services to individuals with disabilities, including how a broad range of assistive technology services and assistive technology devices will be provided to those individuals at each stage of the rehabilitation process and how those services and devices will be provided to individuals with disabilities on a statewide basis;

(2) The methods to be used to improve and expand vocational rehabilitation services for students with disabilities, including the coordination of services designed to facilitate the transition of such students from the receipt of educational services in school to postsecondary life, including the receipt of vocational rehabilitation services under the Act, postsecondary education, employment, and pre-employment transition services;

(3) Strategies developed and implemented by the State to address the needs of students and youth with disabilities identified in the assessments described in paragraph (a) of this section and strategies to achieve the goals and priorities identified by the State to improve and expand vocational rehabilitation services for students and youth with disabilities on a statewide basis;

(4) Strategies to provide pre-employment transition services;

(5) Outreach procedures to identify and serve individuals with disabilities who are minorities and individuals with disabilities who have been unserved or underserved by the vocational rehabilitation program;

(6) As applicable, the plan of the State for establishing, developing, or improving community rehabilitation programs;

(7) Strategies to improve the performance of the State with respect to the evaluation standards and performance indicators established pursuant to section 106 of the Act and section 116 of Workforce Innovation and Opportunity Act; and

(8) Strategies for assisting other components of the statewide workforce development system in assisting individuals with disabilities.

(e) *Evaluation and reports of progress.* (1) The vocational rehabilitation services portion of the Unified or Combined State Plan must include—

(i) The results of an evaluation of the effectiveness of the vocational rehabilitation program; and

(ii) A joint report by the designated State unit and the State Rehabilitation Council, if the State unit has a Council, to the Secretary on the progress made in improving the effectiveness of the program from the previous year. This evaluation and joint report must include—

(A) An evaluation of the extent to which the goals and priorities identified in paragraph (c) of this section were achieved;

(B) A description of the strategies that contributed to the achievement of the goals and priorities;

(C) To the extent to which the goals and priorities were not achieved, a description of the factors that impeded that achievement; and

(D) An assessment of the performance of the State on the standards and indicators established pursuant to section 106 of the Act.

(2) The vocational rehabilitation services portion of the Unified or Combined State Plan must assure that the designated State unit and the State Rehabilitation Council, if the State unit has a Council, will jointly submit to the Secretary a report that contains the information described in paragraph (e)(1) of this section at such time and in such manner the Secretary determines appropriate.

(Approved by the Office of Management and Budget under control number 1205–0522)

(Authority: Section 101(a)(15) and (25) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 721(a)(15) and (25))

§ 361.30 Services to American Indians.

The vocational rehabilitation services portion of the Unified or Combined State Plan must assure that the designated State agency provides vocational rehabilitation services to American Indians who are individuals with disabilities residing in the State to the same extent as the designated State agency provides vocational rehabilitation services to other significant populations of individuals with disabilities residing in the State.

(Approved by the Office of Management and Budget under control number 1205–0522)

(Authority: Sections 101(a)(13) and 121(b)(3) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 721(a)(13) and 741(b)(3))

§ 361.31 Cooperative agreements with private nonprofit organizations.

The vocational rehabilitation services portion of the Unified or Combined State Plan must describe the manner in which cooperative agreements with private nonprofit vocational rehabilitation service providers will be established.

(Authority: Section 101(a)(24)(B) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 721(a)(24)(B))

§ 361.32 Provision of training and services for employers.

The designated State unit may expend payments received under this part to educate and provide services to employers who have hired or are interested in hiring individuals with disabilities under the vocational rehabilitation program, including—

(a) Providing training and technical assistance to employers regarding the employment of individuals with disabilities, including disability awareness, and the requirements of the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 *et seq.*) and other employment-related laws;

(b) Working with employers to—

(1) Provide opportunities for work-based learning experiences (including internships, short-term employment, apprenticeships, and fellowships);

(2) Provide opportunities for pre-employment transition services, in accordance with the requirements under § 361.48(a);

(3) Recruit qualified applicants who are individuals with disabilities;

(4) Train employees who are individuals with disabilities; and

(5) Promote awareness of disability-related obstacles to continued employment.

(c) Providing consultation, technical assistance, and support to employers on workplace accommodations, assistive technology, and facilities and workplace access through collaboration with community partners and employers, across States and nationally, to enable the employers to recruit, job match, hire, and retain qualified individuals with disabilities who are recipients of vocational rehabilitation services under this part, or who are applicants for such services; and

(d) Assisting employers with utilizing available financial support for hiring or accommodating individuals with disabilities.

(Approved by the Office of Management and Budget under control number 1205–0522)

(Authority: Section 109 of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 728A)

§ 361.33 [Reserved]

§ 361.34 Supported employment State plan supplement.

(a) The vocational rehabilitation services portion of the Unified or Combined State Plan must assure that the State has an acceptable plan under

part 363 of this chapter that provides for the use of funds under that part to supplement funds under this part for the cost of services leading to supported employment.

(b) The supported employment plan, including any needed revisions, must be submitted as a supplement to the vocational rehabilitation services portion of the Unified or Combined State Plan submitted under this part.

(Approved by the Office of Management and Budget under control number 1205–0522)

(Authority: Sections 101(a)(22) and 606 of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 721(a)(22) and 795k)

§ 361.35 Innovation and expansion activities.

(a) The vocational rehabilitation services portion of the Unified or Combined State Plan must assure that the State will reserve and use a portion of the funds allotted to the State under section 110 of the Act—

(1) For the development and implementation of innovative approaches to expand and improve the provision of vocational rehabilitation services to individuals with disabilities, particularly individuals with the most significant disabilities, including transition services for students and youth with disabilities and pre-employment transition services for students with disabilities, consistent with the findings of the comprehensive statewide assessment of the rehabilitation needs of individuals with disabilities under § 361.29(a) and the State's goals and priorities under § 361.29(c);

(2) To support the funding of the State Rehabilitation Council, if the State has a Council, consistent with the resource plan identified in § 361.17(i); and

(3) To support the funding of the Statewide Independent Living Council, consistent with the Statewide Independent Living Council resource plan prepared under Section 705(e)(1) of the Act.

(b) The vocational rehabilitation services portion of the Unified or Combined State Plan must—

(1) Describe how the reserved funds will be used; and

(2) Include a report describing how the reserved funds were used.

(Approved by the Office of Management and Budget under control number 1205–0522)

(Authority: Sections 12(c) and 101(a)(18) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 709(c) and 721(a) (18))

§ 361.36 Ability to serve all eligible individuals; order of selection for services.

(a) *General provisions*—(1) The designated State unit either must be able to provide the full range of services listed in section 103(a) of the Act and § 361.48, as appropriate, to all eligible individuals or, in the event that vocational rehabilitation services cannot be provided to all eligible individuals in the State who apply for the services, include in the vocational rehabilitation services portion of the Unified or Combined State Plan the order to be followed in selecting eligible individuals to be provided vocational rehabilitation services.

(2) The ability of the designated State unit to provide the full range of vocational rehabilitation services to all eligible individuals must be supported by a determination that satisfies the requirements of paragraph (b) or (c) of this section and a determination that, on the basis of the designated State unit's projected fiscal and personnel resources and its assessment of the rehabilitation needs of individuals with significant disabilities within the State, it can—

(i) Continue to provide services to all individuals currently receiving services;

(ii) Provide assessment services to all individuals expected to apply for services in the next fiscal year;

(iii) Provide services to all individuals who are expected to be determined eligible in the next fiscal year; and

(iv) Meet all program requirements.

(3) If the designated State unit is unable to provide the full range of vocational rehabilitation services to all eligible individuals in the State who apply for the services, the vocational rehabilitation services portion of the Unified or Combined State Plan must—

(i) Show the order to be followed in selecting eligible individuals to be provided vocational rehabilitation services;

(ii) Provide a justification for the order of selection;

(iii) Identify service and outcome goals and the time within which the goals may be achieved for individuals in each priority category within the order, as required under § 361.29(c)(5);

(iv) Assure that—

(A) In accordance with criteria established by the State for the order of selection, individuals with the most significant disabilities will be selected first for the provision of vocational rehabilitation services; and

(B) Individuals who do not meet the order of selection criteria will have access to services provided through the information and referral system established under § 361.37; and

(v) State whether the designated State unit will elect to serve, in its discretion, eligible individuals (whether or not the individuals are receiving vocational rehabilitation services under the order of selection) who require specific services or equipment to maintain employment, notwithstanding the assurance provided pursuant to paragraph (3)(iv)(A) of this section.

(b) *Basis for assurance that services can be provided to all eligible individuals.* (1) For a designated State unit that determined, for the current fiscal year and the preceding fiscal year, that it is able to provide the full range of services, as appropriate, to all eligible individuals, the State unit, during the current fiscal and preceding fiscal year, must have in fact—

(i) Provided assessment services to all applicants and the full range of services, as appropriate, to all eligible individuals;

(ii) Made referral forms widely available throughout the State;

(iii) Conducted outreach efforts to identify and serve individuals with disabilities who have been unserved or underserved by the vocational rehabilitation system; and

(iv) Not delayed, through waiting lists or other means, determinations of eligibility, the development of individualized plans for employment for individuals determined eligible for vocational rehabilitation services, or the provision of services for eligible individuals for whom individualized plans for employment have been developed.

(2) For a designated State unit that was unable to provide the full range of services to all eligible individuals during the current or preceding fiscal year or that has not met the requirements in paragraph (b)(1) of this section, the determination that the designated State unit is able to provide the full range of vocational rehabilitation services to all eligible individuals in the next fiscal year must be based on—

(i) A demonstration that circumstances have changed that will allow the designated State unit to meet the requirements of paragraph (a)(2) of this section in the next fiscal year, including—

(A) An estimate of the number of and projected costs of serving, in the next fiscal year, individuals with existing individualized plans for employment;

(B) The projected number of individuals with disabilities who will apply for services and will be determined eligible in the next fiscal year and the projected costs of serving those individuals;

(C) The projected costs of administering the program in the next fiscal year, including, but not limited to, costs of staff salaries and benefits,

outreach activities, and required statewide studies; and

(D) The projected revenues and projected number of qualified personnel for the program in the next fiscal year.

(ii) Comparable data, as relevant, for the current or preceding fiscal year, or for both years, of the costs listed in paragraphs (b)(2)(i)(A) through (C) of this section and the resources identified in paragraph (b)(2)(i)(D) of this section and an explanation of any projected increases or decreases in these costs and resources; and

(iii) A determination that the projected revenues and the projected number of qualified personnel for the program in the next fiscal year are adequate to cover the costs identified in paragraphs (b)(2)(i)(A) through (C) of this section to ensure the provision of the full range of services, as appropriate, to all eligible individuals.

(c) *Determining need for establishing and implementing an order of selection.* (1) The designated State unit must determine, prior to the beginning of each fiscal year, whether to establish and implement an order of selection.

(2) If the designated State unit determines that it does not need to establish an order of selection, it must reevaluate this determination whenever changed circumstances during the course of a fiscal year, such as a decrease in its fiscal or personnel resources or an increase in its program costs, indicate that it may no longer be able to provide the full range of services, as appropriate, to all eligible individuals, as described in paragraph (a)(2) of this section.

(3) If a designated State unit establishes an order of selection, but determines that it does not need to implement that order at the beginning of the fiscal year, it must continue to meet the requirements of paragraph (a)(2) of this section, or it must implement the order of selection by closing one or more priority categories.

(d) *Establishing an order of selection*—(1) *Basis for order of selection.* An order of selection must be based on a refinement of the three criteria in the definition of *individual with a significant disability* in section 7(21)(A) of the Act and § 361.5(c)(30).

(2) *Factors that cannot be used in determining order of selection of eligible individuals.* An order of selection may not be based on any other factors, including—

(i) Any duration of residency requirement, provided the individual is present in the State;

(ii) Type of disability;

(iii) Age, sex, race, color, or national origin;

(iv) Source of referral;

(v) Type of expected employment outcome;

(vi) The need for specific services except those services provided in accordance with 361.36(a)(3)(v), or anticipated cost of services required by an individual; or

(vii) The income level of an individual or an individual's family.

(e) *Administrative requirements.* In administering the order of selection, the designated State unit must—

(1) Implement the order of selection on a statewide basis;

(2) Notify all eligible individuals of the priority categories in a State's order of selection, their assignment to a particular category, and their right to appeal their category assignment;

(3) Continue to provide services to any recipient who has begun to receive services irrespective of the severity of the individual's disability as follows—

(i) The designated State unit must continue to provide pre-employment transition services to students with disabilities who were receiving such services prior to being determined eligible for vocational rehabilitation services; and

(ii) The designated State unit must continue to provide to an eligible individual all needed services listed on the individualized plan for employment if the individual had begun receiving such services prior to the effective date of the State's order of selection; and

(4) Ensure that its funding arrangements for providing services under the vocational rehabilitation services portion of the Unified or Combined State Plan, including third-party arrangements and awards under the establishment authority, are consistent with the order of selection. If any funding arrangements are inconsistent with the order of selection, the designated State unit must renegotiate these funding arrangements so that they are consistent with the order of selection.

(f) *State Rehabilitation Council.* The designated State unit must consult with the State Rehabilitation Council, if the State unit has a Council, regarding the—

(1) Need to establish an order of selection, including any reevaluation of the need under paragraph (c)(2) of this section;

(2) Priority categories of the particular order of selection;

(3) Criteria for determining individuals with the most significant disabilities; and

(4) Administration of the order of selection.

(Approved by the Office of Management and Budget under control number 1205–0522)

(Authority: Sections 12(d); 101(a)(5); 101(a)(12); 101(a)(15)(A), (B) and (C); 101(a)(21)(A)(ii); and 504(a) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 709(d), 721(a)(5), 721(a)(12), 721(a)(15)(A), (B) and (C); 721(a)(21)(A)(ii), and 794(a))

§ 361.37 Information and referral programs.

(a) *General provisions.* The vocational rehabilitation services portion of the Unified or Combined State Plan must assure that—

(1) The designated State agency will implement an information and referral system adequate to ensure that individuals with disabilities, including eligible individuals who do not meet the agency's order of selection criteria for receiving vocational rehabilitation services if the agency is operating on an order of selection, are provided accurate vocational rehabilitation information and guidance (which may include counseling and referral for job placement) using appropriate modes of communication to assist them in preparing for, securing, retaining, advancing in, or regaining employment; and

(2) The designated State agency will refer individuals with disabilities to other appropriate Federal and State programs, including other components of the statewide workforce development system.

(b) The designated State unit must refer to appropriate programs and service providers best suited to address the specific rehabilitation, independent living and employment needs of an individual with a disability who makes an informed choice not to pursue an employment outcome under the vocational rehabilitation program, as defined in § 361.5(c)(15). Before making the referral required by this paragraph, the State unit must—

(1) Consistent with § 361.42(a)(4)(i), explain to the individual that the purpose of the vocational rehabilitation program is to assist individuals to achieve an employment outcome as defined in § 361.5(c)(15);

(2) Consistent with § 361.52, provide the individual with information concerning the availability of employment options, and of vocational rehabilitation services, to assist the individual to achieve an appropriate employment outcome;

(3) Inform the individual that services under the vocational rehabilitation program can be provided to eligible individuals in an extended employment setting if necessary for purposes of training or otherwise preparing for employment in an integrated setting;

(4) Inform the individual that, if he or she initially chooses not to pursue an employment outcome as defined in § 361.5(c)(15), he or she can seek services from the designated State unit at a later date if, at that time, he or she chooses to pursue an employment outcome; and

(5) Refer the individual, as appropriate, to the Social Security Administration in order to obtain information concerning the ability of individuals with disabilities to work while receiving benefits from the Social Security Administration.

(c) *Criteria for appropriate referrals.* In making the referrals identified in paragraph (a)(2) of this section, the designated State unit must—

(1) Refer the individual to Federal or State programs, including programs carried out by other components of the statewide workforce development system, best suited to address the specific employment needs of an individual with a disability; and

(2) Provide the individual who is being referred—

(i) A notice of the referral by the designated State agency to the agency carrying out the program;

(ii) Information identifying a specific point of contact within the agency to which the individual is being referred; and

(iii) Information and advice regarding the most suitable services to assist the individual to prepare for, secure, retain, or regain employment.

(d) *Order of selection.* In providing the information and referral services under this section to eligible individuals who are not in the priority category or categories to receive vocational rehabilitation services under the State's order of selection, the State unit must identify, as part of its reporting under section 101(a)(10) of the Act and § 361.40, the number of eligible individuals who did not meet the agency's order of selection criteria for receiving vocational rehabilitation services and did receive information and referral services under this section.

(Approved by the Office of Management and Budget under control number 1205–0522)

(Authority: Sections 7(11), 12(c), 101(a)(5)(E), 101(a)(10)(C)(ii), and 101(a)(20) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 705(11), 709(c), 721(a)(5)(E), 721(a)(10)(C)(ii), and 721(a)(20))

§ 361.38 Protection, use, and release of personal information.

(a) *General provisions.* (1) The State agency and the State unit must adopt and implement written policies and procedures to safeguard the confidentiality of all personal information, including photographs and lists of names. These policies and procedures must ensure that—

(i) Specific safeguards are established to protect current and stored personal information, including a requirement that data only be released when governed by a written agreement between the designated State unit and receiving entity under paragraphs (d) and (e)(1) of this section, which addresses the requirements in this section;

(ii) All applicants and recipients of services and, as appropriate, those individuals' representatives, service providers, cooperating agencies, and interested persons are informed through appropriate modes of communication of the confidentiality of personal information and the conditions for accessing and releasing this information;

(iii) All applicants and recipients of services or their representatives are informed about the State unit's need to collect personal information and the policies governing its use, including—

(A) Identification of the authority under which information is collected;

(B) Explanation of the principal purposes for which the State unit intends to use or release the information;

(C) Explanation of whether providing requested information to the State unit is mandatory or voluntary and the effects of not providing requested information;

(D) Identification of those situations in which the State unit requires or does not require informed written consent of the individual before information may be released; and

(E) Identification of other agencies to which information is routinely released;

(iv) An explanation of State policies and procedures affecting personal information will be provided to each individual in that individual's native language or through the appropriate mode of communication; and

(v) These policies and procedures provide no fewer protections for individuals than State laws and regulations.

(2) The State unit may establish reasonable fees to cover extraordinary costs of duplicating records or making extensive searches and must establish policies and procedures governing access to records.

(b) *State program use.* All personal information in the possession of the State agency or the designated State unit must be used only for the purposes directly connected with the administration of the vocational rehabilitation program. Information containing identifiable personal information may not be shared with advisory or other bodies that do not have official responsibility for administration of the program. In the administration of the program, the State unit may obtain personal information from service providers and cooperating agencies under assurances that the information may not be further divulged, except as provided under paragraphs (c), (d), and (e) of this section.

(c) *Release to applicants and recipients of services.* (1) Except as provided in paragraphs (c)(2) and (3) of this section, if requested in writing by an applicant or recipient of services, the State unit must make all requested information in that individual's record of services accessible to and must release the information to the individual or the individual's representative in a timely manner.

(2) Medical, psychological, or other information that the State unit determines may be harmful to the individual may not be released directly to the individual, but must be provided to the individual through a third party chosen by the individual, which may include, among others, an advocate, a family member, or a qualified medical or mental health professional, unless a representative has been appointed by a court to represent the individual, in which case the information must be released to the court-appointed representative.

(3) If personal information has been obtained from another agency or organization, it may be released only by, or under the conditions established by, the other agency or organization.

(4) An applicant or recipient of services who believes that information in the individual's record of services is inaccurate or misleading may request that the designated State unit amend the information. If the information is not amended, the request for an amendment must be documented in the record of services, consistent with § 361.47(a)(12).

(d) *Release for audit, evaluation, and research.* Personal information may be released to an organization, agency, or individual engaged in audit, evaluation, or research only for purposes directly connected with the administration of the vocational rehabilitation program or for purposes that would significantly improve the quality of life for applicants and recipients of services and only if, in accordance with a written agreement, the organization, agency, or individual assures that—

(1) The information will be used only for the purposes for which it is being provided;

(2) The information will be released only to persons officially connected with the audit, evaluation, or research;

(3) The information will not be released to the involved individual;

(4) The information will be managed in a manner to safeguard confidentiality; and

(5) The final product will not reveal any personal identifying information without the informed written consent of the involved individual or the individual's representative.

(e) *Release to other programs or authorities.* (1) Upon receiving the informed written consent of the individual or, if appropriate, the individual's representative, the State unit may release personal information to another agency or organization, in accordance with a written agreement, for its program purposes only to the extent that the information may be released to the involved individual or the individual's representative and only to the extent that the other agency or organization demonstrates that the information requested is necessary for its program.

(2) Medical or psychological information that the State unit determines may be harmful to the individual may be released if the other agency or organization assures the State unit that the information will be used only for the purpose for which it is being provided and will not be further released to the individual.

(3) The State unit must release personal information if required by Federal law or regulations.

(4) The State unit must release personal information in response to investigations in connection with law enforcement, fraud, or abuse, unless expressly prohibited by Federal or State laws or regulations, and in response to an order issued by a judge, magistrate, or other authorized judicial officer.

(5) The State unit also may release personal information in order to protect the individual or others if the individual poses a threat to his or her safety or to the safety of others.

(Authority: Sections 12(c) and 101(a)(6)(A) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 709(c) and 721(a)(6)(A))

§ 361.39 State-imposed requirements.

The designated State unit must, upon request, identify those regulations and policies relating to the administration or operation of its vocational rehabilitation program that are State-imposed, including any regulations or policy based on State interpretation of any Federal law, regulation, or guideline.

(Authority: Section 17 of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 714)

§ 361.40 Reports; Evaluation standards and performance indicators.

(a) *Reports.* (1) The vocational rehabilitation services portion of the Unified or Combined State Plan must assure that the designated State agency will submit reports, including reports required under sections 13, 14, and 101(a)(10) of the Act—

(i) In the form and level of detail and at the time required by the Secretary regarding applicants for and eligible individuals receiving services, including students receiving pre-employment transition services in accordance with § 361.48(a); and

(ii) In a manner that provides a complete count (other than the information obtained through sampling consistent with section 101(a)(10)(E) of the Act) of the applicants and eligible individuals to—

(A) Permit the greatest possible cross-classification of data; and

(B) Protect the confidentiality of the identity of each individual.

(2) The designated State agency must comply with any requirements necessary to ensure the accuracy and verification of those reports.

(b) *[Reserved]*

(Approved by the Office of Management and Budget under control number 1205–0522)

(Authority: Sections 12(c), 101(a)(10)(A) and (F), and 106 of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 709(c),721(a)(10)(A) and (F), and 726)

Provision and Scope of Services

§ 361.41 Processing referrals and applications.

(a) *Referrals.* The designated State unit must establish and implement standards for the prompt and equitable handling of referrals of individuals for vocational rehabilitation services, including referrals of individuals made through the one-stop service delivery systems under section 121 of the Workforce Innovation and Opportunity Act. The standards must include timelines for making good faith efforts to inform these individuals of application requirements and to gather information necessary to initiate an assessment for determining eligibility and priority for services.

(b) *Applications.* (1) Once an individual has submitted an application for vocational rehabilitation services, including applications made through common intake procedures in one-stop centers under section 121 of the Workforce Innovation and Opportunity Act, an eligibility determination must be made within 60 days, unless—

(i) Exceptional and unforeseen circumstances beyond the control of the designated State unit preclude making an eligibility determination within 60 days and the designated State unit and the individual agree to a specific extension of time; or

(ii) An exploration of the individual's abilities, capabilities, and capacity to perform in work situations is carried out in accordance with § 361.42(e).

(2) An individual is considered to have submitted an application when the individual or the individual's representative, as appropriate—

(i)(A) Has completed and signed an agency application form;

(B) Has completed a common intake application form in a one-stop center requesting vocational rehabilitation services; or

(C) Has otherwise requested services from the designated State unit;

(ii) Has provided to the designated State unit information necessary to initiate an assessment to determine eligibility and priority for services; and

(iii) Is available to complete the assessment process.

(3) The designated State unit must ensure that its application forms are widely available throughout the State, particularly in the one-stop centers under section 121 of the Workforce Innovation and Opportunity Act.

(Authority: Sections 12(c), 101(a)(6)(A), and 102(a)(6) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 709(c), 721(a)(6)(A), and 722(a)(6))

§ 361.42 Assessment for determining eligibility and priority for services.

In order to determine whether an individual is eligible for vocational rehabilitation services and the individual's priority under an order of selection for services (if the State is operating under an order of selection), the designated State unit must conduct an assessment for determining eligibility and priority for services. The assessment must be conducted in the most integrated setting possible, consistent with the individual's needs and informed choice, and in accordance with the following provisions:

(a) *Eligibility requirements*—(1) *Basic requirements.* The designated State unit's determination of an applicant's eligibility for vocational rehabilitation services must be based only on the following requirements:

(i) A determination by qualified personnel that the applicant has a physical or mental impairment;

(ii) A determination by qualified personnel that the applicant's physical or mental impairment constitutes or results in a substantial impediment to employment for the applicant; and

(iii) A determination by a qualified vocational rehabilitation counselor

employed by the designated State unit that the applicant requires vocational rehabilitation services to prepare for, secure, retain, advance in, or regain employment that is consistent with the individual's unique strengths, resources, priorities, concerns, abilities, capabilities, interest, and informed choice. For purposes of an assessment for determining eligibility and vocational rehabilitation needs under this part, an individual is presumed to have a goal of an employment outcome.

(2) *Presumption of benefit.* The designated State unit must presume that an applicant who meets the eligibility requirements in paragraphs (a)(1)(i) and (ii) of this section can benefit in terms of an employment outcome.

(3) *Presumption of eligibility for Social Security recipients and beneficiaries.* (i) Any applicant who has been determined eligible for Social Security benefits under title II or title XVI of the Social Security Act is—

(A) Presumed eligible for vocational rehabilitation services under paragraphs (a)(1) and (2) of this section; and

(B) Considered an individual with a significant disability as defined in § 361.5(c)(29).

(ii) If an applicant for vocational rehabilitation services asserts that he or she is eligible for Social Security benefits under title II or title XVI of the Social Security Act (and, therefore, is presumed eligible for vocational rehabilitation services under paragraph (a)(3)(i)(A) of this section), but is unable to provide appropriate evidence, such as an award letter, to support that assertion, the State unit must verify the applicant's eligibility under title II or title XVI of the Social Security Act by contacting the Social Security Administration. This verification must be made within a reasonable period of time that enables the State unit to determine the applicant's eligibility for vocational rehabilitation services within 60 days of the individual submitting an application for services in accordance with § 361.41(b)(2).

(4) *Achievement of an employment outcome.* Any eligible individual, including an individual whose eligibility for vocational rehabilitation services is based on the individual being eligible for Social Security benefits under title II or title XVI of the Social Security Act, must intend to achieve an employment outcome that is consistent with the applicant's unique strengths, resources, priorities, concerns, abilities, capabilities, interests, and informed choice.

(i) The State unit is responsible for informing individuals, through its application process for vocational rehabilitation services, that individuals who receive services under the program must intend to achieve an employment outcome.

(ii) The applicant's completion of the application process for vocational rehabilitation services is sufficient evidence of the individual's intent to achieve an employment outcome, and no additional demonstration on the part of the applicant is required for purposes of satisfying paragraph (a)(4) of this section.

(5) *Interpretation.* Nothing in this section, including paragraph (a)(3)(i), is to be construed to create an entitlement to any vocational rehabilitation service.

(b) *Interim determination of eligibility.* (1) The designated State unit may initiate the provision of vocational rehabilitation services for an applicant on the basis of an interim determination of eligibility prior to the 60-day period described in § 361.41(b)(2).

(2) If a State chooses to make interim determinations of eligibility, the designated State unit must—

(i) Establish criteria and conditions for making those determinations;

(ii) Develop and implement procedures for making the determinations; and

(iii) Determine the scope of services that may be provided pending the final determination of eligibility.

(3) If a State elects to use an interim eligibility determination, the designated State unit must make a final determination of eligibility within 60 days of the individual submitting an application for services in accordance with § 361.41(b)(2).

(c) *Prohibited factors.* (1) The vocational rehabilitation services portion of the Unified or Combined State Plan must assure that the State unit will not impose, as part of determining eligibility under this section, a duration of residence requirement that excludes from services any applicant who is present in the State. The designated State unit may not require the applicant to demonstrate a presence in the State through the production of any documentation that under State or local law, or practical circumstances, results in a de facto duration of residence requirement.

(2) In making a determination of eligibility under this section, the designated State unit also must ensure that—

(i) No applicant or group of applicants is excluded or found ineligible solely on the basis of the type of disability; and

(ii) The eligibility requirements are applied without regard to the—

(A) Age, sex, race, color, or national origin of the applicant;

(B) Type of expected employment outcome;

(C) Source of referral for vocational rehabilitation services;

(D) Particular service needs or anticipated cost of services required by an applicant or the income level of an applicant or applicant's family;

(E) Applicants' employment history or current employment status; and

(F) Applicants' educational status or current educational credential.

(d) *Review and assessment of data for eligibility determination.* Except as provided in paragraph (e) of this section, the designated State unit—

(1) Must base its determination of each of the basic eligibility requirements in paragraph (a) of this section on—

(i) A review and assessment of existing data, including counselor observations, education records, information provided by the individual or the individual's family, particularly information used by education officials, and determinations made by officials of other agencies; and

(ii) To the extent existing data do not describe the current functioning of the individual or are unavailable, insufficient, or inappropriate to make an eligibility determination, an assessment of additional data resulting from the provision of vocational rehabilitation services, including trial work experiences, assistive technology devices and services, personal assistance services, and any other support services that are necessary to determine whether an individual is eligible; and

(2) Must base its presumption under paragraph (a)(3)(i) of this section that an applicant who has been determined eligible for Social Security benefits under title II or title XVI of the Social Security Act satisfies each of the basic eligibility requirements in paragraph (a) of this section on determinations made by the Social Security Administration.

(e) *Trial work experiences for individuals with significant disabilities.* (1) Prior to any determination that an individual with a disability is unable to benefit from vocational rehabilitation services in terms of an employment outcome because of the severity of that individual's disability or that the individual is ineligible for vocational rehabilitation services, the designated State unit must conduct an exploration of the individual's abilities, capabilities, and capacity to perform in realistic work situations.

(2)(i) The designated State unit must develop a written plan to assess periodically the individual's abilities, capabilities, and capacity to perform in competitive integrated work situations

through the use of trial work experiences, which must be provided in competitive integrated employment settings to the maximum extent possible, consistent with the informed choice and rehabilitation needs of the individual.

(ii) Trial work experiences include supported employment, on-the-job training, and other experiences using realistic integrated work settings.

(iii) Trial work experiences must be of sufficient variety and over a sufficient period of time for the designated State unit to determine that—

(A) There is sufficient evidence to conclude that the individual can benefit from the provision of vocational rehabilitation services in terms of an employment outcome; or

(B) There is clear and convincing evidence that due to the severity of the individual's disability, the individual is incapable of benefitting from the provision of vocational rehabilitation services in terms of an employment outcome; and

(iv) The designated State unit must provide appropriate supports, including, but not limited to, assistive technology devices and services and personal assistance services, to accommodate the rehabilitation needs of the individual during the trial work experiences.

(f) *Data for determination of priority for services under an order of selection.* If the designated State unit is operating under an order of selection for services, as provided in § 361.36, the State unit must base its priority assignments on—

(1) A review of the data that was developed under paragraphs (d) and (e) of this section to make the eligibility determination; and

(2) An assessment of additional data, to the extent necessary.

(Authority: Sections 7(2), 12(c), 101(a)(12), 102(a), 103(a)(1), 103(a)(9), 103(a)(10), and 103(a)(14) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 705(2), 709(c), 721(a)(12), 722(a), 723(a)(1), 723(a)(9), 723(a)(10), and 723(a)(14))

Note to § 361.42: *Clear and convincing evidence* means that the designated State unit has a high degree of certainty before it can conclude that an individual is incapable of benefiting from services in terms of an employment outcome. The clear and convincing standard constitutes the highest standard used in our civil system of law and is to be individually applied on a case-by-case basis. The term *clear* means unequivocal. For example, the use of an intelligence test result alone would not constitute clear and convincing evidence. Clear and convincing evidence might include a description of assessments, including situational assessments and supported employment assessments, from service providers who have concluded that they would be unable to meet the individual's needs due to the severity of the individual's disability. The demonstration of ''clear and convincing evidence'' must include, if appropriate, a functional assessment of skill development activities, with any necessary supports (including assistive technology), in real life settings. (S. Rep. No. 357, 102d Cong., 2d. Sess. 37–38 (1992))

§ 361.43 Procedures for ineligibility determination.

If the State unit determines that an applicant is ineligible for vocational rehabilitation services or determines that an individual receiving services under an individualized plan for employment is no longer eligible for services, the State unit must—

(a) Make the determination only after providing an opportunity for full consultation with the individual or, as appropriate, with the individual's representative;

(b) Inform the individual in writing, supplemented as necessary by other appropriate modes of communication consistent with the informed choice of the individual, of the ineligibility determination, including the reasons for that determination, the requirements under this section, and the means by which the individual may express and seek remedy for any dissatisfaction, including the procedures for review of State unit personnel determinations in accordance with § 361.57;

(c) Provide the individual with a description of services available from a client assistance program established under 34 CFR part 370 and information on how to contact that program;

(d) Refer the individual—

(1) To other programs that are part of the one-stop service delivery system under the Workforce Innovation and Opportunity Act that can address the individual's training or employment-related needs; or

(2) To Federal, State, or local programs or service providers, including, as appropriate, independent living programs and extended employment providers, best suited to meet their rehabilitation needs, if the ineligibility determination is based on a finding that the individual has chosen not to pursue, or is incapable of achieving, an employment outcome as defined in § 361.5(c)(15).

(e) Review within 12 months and annually thereafter if requested by the individual or, if appropriate, by the individual's representative any ineligibility determination that is based on a finding that the individual is incapable of achieving an employment outcome. This review need not be conducted in situations in which the individual has refused it, the individual is no longer present in the State, the individual's whereabouts are unknown, or the individual's medical condition is rapidly progressive or terminal.

(Authority: Sections 12(c) and 102(a)(5) and (c) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 709(c) and 722(a)(5)and (c))

§ 361.44 Closure without eligibility determination.

The designated State unit may not close an applicant's record of services prior to making an eligibility determination unless the applicant declines to participate in, or is unavailable to complete, an assessment for determining eligibility and priority for services, and the State unit has made a reasonable number of attempts to contact the applicant or, if appropriate, the applicant's representative to encourage the applicant's participation.

(Authority: Section 12(c) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 709(c))

§ 361.45 Development of the individualized plan for employment.

(a) *General requirements.* The vocational rehabilitation services portion of the Unified or Combined State Plan must assure that—

(1) An individualized plan for employment meeting the requirements of this section and § 361.46 is developed and implemented in a timely manner for each individual determined to be eligible for vocational rehabilitation services or, if the designated State unit is operating under an order of selection in accordance with § 361.36, for each eligible individual to whom the State unit is able to provide services; and

(2) Services will be provided in accordance with the provisions of the individualized plan for employment.

(b) *Purpose.* (1) The designated State unit must conduct an assessment for determining vocational rehabilitation needs, if appropriate, for each eligible individual or, if the State is operating under an order of selection, for each eligible individual to whom the State is able to provide services. The purpose of this assessment is to determine the employment outcome, and the nature and scope of vocational rehabilitation services to be included in the individualized plan for employment.

(2) The individualized plan for employment must be designed to achieve a specific employment outcome, as defined in § 361.5(c)(15), that is selected by the individual consistent with the individual's unique strengths, resources, priorities, concerns, abilities,

capabilities, interests, and informed choice.

(c) *Required information.* The State unit must provide the following information to each eligible individual or, as appropriate, the individual's representative, in writing and, if appropriate, in the native language or mode of communication of the individual or the individual's representative:

(1) *Options for developing an individualized plan for employment.* Information on the available options for developing the individualized plan for employment, including the option that an eligible individual or, as appropriate, the individual's representative may develop all or part of the individualized plan for employment—

(i) Without assistance from the State unit or other entity; or

(ii) With assistance from—

(A) A qualified vocational rehabilitation counselor employed by the State unit;

(B) A qualified vocational rehabilitation counselor who is not employed by the State unit;

(C) A disability advocacy organization; or

(D) Resources other than those in paragraph (c)(1)(ii)(A) through (C) of this section.

(2) *Additional information.* Additional information to assist the eligible individual or, as appropriate, the individual's representative in developing the individualized plan for employment, including—

(i) Information describing the full range of components that must be included in an individualized plan for employment;

(ii) As appropriate to each eligible individual—

(A) An explanation of agency guidelines and criteria for determining an eligible individual's financial commitments under an individualized plan for employment;

(B) Information on the availability of assistance in completing State unit forms required as part of the individualized plan for employment; and

(C) Additional information that the eligible individual requests or the State unit determines to be necessary to the development of the individualized plan for employment;

(iii) A description of the rights and remedies available to the individual, including, if appropriate, recourse to the processes described in § 361.57; and

(iv) A description of the availability of a client assistance program established under part 370 of this chapter and information on how to contact the client assistance program.

(3) *Individuals entitled to benefits under title II or XVI of the Social Security Act.* For individuals entitled to benefits under title II or XVI of the Social Security Act on the basis of a disability or blindness, the State unit must provide to the individual general information on additional supports and assistance for individuals with disabilities desiring to enter the workforce, including assistance with benefits planning.

(d) *Mandatory procedures.* The designated State unit must ensure that—

(1) The individualized plan for employment is a written document prepared on forms provided by the State unit;

(2) The individualized plan for employment is developed and implemented in a manner that gives eligible individuals the opportunity to exercise informed choice, consistent with § 361.52, in selecting—

(i) The employment outcome, including the employment setting;

(ii) The specific vocational rehabilitation services needed to achieve the employment outcome, including the settings in which services will be provided;

(iii) The entity or entities that will provide the vocational rehabilitation services; and

(iv) The methods available for procuring the services;

(3) The individualized plan for employment is—

(i) Agreed to and signed by the eligible individual or, as appropriate, the individual's representative; and

(ii) Approved and signed by a qualified vocational rehabilitation counselor employed by the designated State unit;

(4) A copy of the individualized plan for employment and a copy of any amendments to the individualized plan for employment are provided to the eligible individual or, as appropriate, to the individual's representative, in writing and, if appropriate, in the native language or mode of communication of the individual or, as appropriate, the individual's representative;

(5) The individualized plan for employment is reviewed at least annually by a qualified vocational rehabilitation counselor and the eligible individual or, as appropriate, the individual's representative to assess the eligible individual's progress in achieving the identified employment outcome;

(6) The individualized plan for employment is amended, as necessary, by the individual or, as appropriate, the individual's representative, in collaboration with a representative of the State unit or a qualified vocational rehabilitation counselor (to the extent determined to be appropriate by the individual), if there are substantive changes in the employment outcome, the vocational rehabilitation services to be provided, or the providers of the vocational rehabilitation services;

(7) Amendments to the individualized plan for employment do not take effect until agreed to and signed by the eligible individual or, as appropriate, the individual's representative and by a qualified vocational rehabilitation counselor employed by the designated State unit;

(8) The individualized plan for employment is amended, as necessary, to include the postemployment services and service providers that are necessary for the individual to maintain, advance in or regain employment, consistent with the individual's unique strengths, resources, priorities, concerns, abilities, capabilities, interests, and informed choice; and

(9) An individualized plan for employment for a student with a disability is developed—

(i) In consideration of the student's individualized education program or 504 services, as applicable; and

(ii) In accordance with the plans, policies, procedures, and terms of the interagency agreement required under § 361.22.

(e) *Standards for developing the individualized plan for employment.* The individualized plan for employment must be developed as soon as possible, but not later than 90 days after the date of determination of eligibility, unless the State unit and the eligible individual agree to the extension of that deadline to a specific date by which the individualized plan for employment must be completed.

(f) *Data for preparing the individualized plan for employment.* (1) *Preparation without comprehensive assessment.* To the extent possible, the employment outcome and the nature and scope of rehabilitation services to be included in the individual's individualized plan for employment must be determined based on the data used for the assessment of eligibility and priority for services under § 361.42.

(2) *Preparation based on comprehensive assessment.*

(i) If additional data are necessary to determine the employment outcome and the nature and scope of services to be included in the individualized plan for employment of an eligible individual, the State unit must conduct a comprehensive assessment of the unique strengths, resources, priorities, concerns, abilities, capabilities,

interests, and informed choice, including the need for supported employment services, of the eligible individual, in the most integrated setting possible, consistent with the informed choice of the individual in accordance with the provisions of § 361.5(c)(5)(ii).

(ii) In preparing the comprehensive assessment, the State unit must use, to the maximum extent possible and appropriate and in accordance with confidentiality requirements, existing information that is current as of the date of the development of the individualized plan for employment, including information—

(A) Available from other programs and providers, particularly information used by education officials and the Social Security Administration;

(B) Provided by the individual and the individual's family; and

(C) Obtained under the assessment for determining the individual's eligibility and vocational rehabilitation needs.

(Authority: Sections 7(2)(B), 101(a)(9), 102(b), and 103(a)(1) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 705(2)(B), 721(a)(9), 722(b), and 723(a)(1))

§ 361.46 Content of the individualized plan for employment.

(a) *Mandatory components.* Regardless of the approach in § 361.45(c)(1) that an eligible individual selects for purposes of developing the individualized plan for employment, each individualized plan for employment must—

(1) Include a description of the specific employment outcome, as defined in § 361.5(c)(15), that is chosen by the eligible individual and is consistent with the individual's unique strengths, resources, priorities, concerns, abilities, capabilities, career interests, and informed choice consistent with the general goal of competitive integrated employment (except that in the case of an eligible individual who is a student or a youth with a disability, the description may be a description of the individual's projected post-school employment outcome);

(2) Include a description under § 361.48 of—

(i) These specific rehabilitation services needed to achieve the employment outcome, including, as appropriate, the provision of assistive technology devices, assistive technology services, and personal assistance services, including training in the management of those services; and

(ii) In the case of a plan for an eligible individual that is a student or youth with a disability, the specific transition services and supports needed to achieve the individual's employment outcome or projected post-school employment outcome.

(3) Provide for services in the most integrated setting that is appropriate for the services involved and is consistent with the informed choice of the eligible individual;

(4) Include timelines for the achievement of the employment outcome and for the initiation of services;

(5) Include a description of the entity or entities chosen by the eligible individual or, as appropriate, the individual's representative that will provide the vocational rehabilitation services and the methods used to procure those services;

(6) Include a description of the criteria that will be used to evaluate progress toward achievement of the employment outcome; and

(7) Include the terms and conditions of the individualized plan for employment, including, as appropriate, information describing—

(i) The responsibilities of the designated State unit;

(ii) The responsibilities of the eligible individual, including—

(A) The responsibilities the individual will assume in relation to achieving the employment outcome;

(B) If applicable, the extent of the individual's participation in paying for the cost of services; and

(C) The responsibility of the individual with regard to applying for and securing comparable services and benefits as described in § 361.53; and

(iii) The responsibilities of other entities as the result of arrangements made pursuant to the comparable services or benefits requirements in § 361.53.

(b) *Supported employment requirements.* An individualized plan for employment for an individual with a most significant disability for whom an employment outcome in a supported employment setting has been determined to be appropriate must—

(1) Specify the supported employment services to be provided by the designated State unit;

(2) Specify the expected extended services needed, which may include natural supports;

(3) Identify the source of extended services or, to the extent that it is not possible to identify the source of extended services at the time the individualized plan for employment is developed, include a description of the basis for concluding that there is a reasonable expectation that those sources will become available;

(4) Provide for periodic monitoring to ensure that the individual is making satisfactory progress toward meeting the weekly work requirement established in the individualized plan for employment by the time of transition to extended services;

(5) Provide for the coordination of services provided under an individualized plan for employment with services provided under other individualized plans established under other Federal or State programs;

(6) To the extent that job skills training is provided, identify that the training will be provided on site; and

(7) Include placement in an integrated setting for the maximum number of hours possible based on the unique strengths, resources, priorities, concerns, abilities, capabilities, interests, and informed choice of individuals with the most significant disabilities.

(c) *Post-employment services.* The individualized plan for employment for each individual must contain, as determined to be necessary, statements concerning—

(1) The expected need for post-employment services prior to closing the record of services of an individual who has achieved an employment outcome;

(2) A description of the terms and conditions for the provision of any post-employment services; and

(3) If appropriate, a statement of how post-employment services will be provided or arranged through other entities as the result of arrangements made pursuant to the comparable services or benefits requirements in § 361.53.

(d) *Coordination of services for students with disabilities.* The individualized plan for employment for a student with a disability must be coordinated with the individualized education program or 504 services, as applicable, for that individual in terms of the goals, objectives, and services identified in the education program.

(Approved by the Office of Management and Budget under control number 1205–0522)

(Authority: Sections 101(a)(8), 101(a)(9), and 102(b)(4) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 721(a)(8), 721(a)(9), and 722(b)(4))

§ 361.47 Record of services.

(a) The designated State unit must maintain for each applicant and eligible individual a record of services that includes, to the extent pertinent, the following documentation:

(1) If an applicant has been determined to be an eligible individual, documentation supporting that

determination in accordance with the requirements under § 361.42.

(2) If an applicant or eligible individual receiving services under an individualized plan for employment has been determined to be ineligible, documentation supporting that determination in accordance with the requirements under § 361.43.

(3) Documentation that describes the justification for closing an applicant's or eligible individual's record of services if that closure is based on reasons other than ineligibility, including, as appropriate, documentation indicating that the State unit has satisfied the requirements in § 361.44.

(4) If an individual has been determined to be an individual with a significant disability or an individual with a most significant disability, documentation supporting that determination.

(5) If an individual with a significant disability requires an exploration of abilities, capabilities, and capacity to perform in realistic work situations through the use of trial work experiences to determine whether the individual is an eligible individual, documentation supporting the need for, and the plan relating to, that exploration and documentation regarding the periodic assessments carried out during the trial work experiences in accordance with the requirements under § 361.42(e).

(6) The individualized plan for employment, and any amendments to the individualized plan for employment, consistent with the requirements under § 361.46.

(7) Documentation describing the extent to which the applicant or eligible individual exercised informed choice regarding the provision of assessment services and the extent to which the eligible individual exercised informed choice in the development of the individualized plan for employment with respect to the selection of the specific employment outcome, the specific vocational rehabilitation services needed to achieve the employment outcome, the entity to provide the services, the employment setting, the settings in which the services will be provided, and the methods to procure the services.

(8) In the event that an individual's individualized plan for employment provides for vocational rehabilitation services in a non-integrated setting, a justification to support the need for the non-integrated setting.

(9) In the event that an individual obtains competitive employment, verification that the individual is compensated at or above the minimum wage and that the individual's wage and level of benefits are not less than that customarily paid by the employer for the same or similar work performed by non-disabled individuals in accordance with § 361.5(c)(9)(i).

(10) In the event an individual achieves an employment outcome in which the individual is compensated in accordance with section 14(c) of the Fair Labor Standards Act or the designated State unit closes the record of services of an individual in extended employment on the basis that the individual is unable to achieve an employment outcome consistent with § 361.5(c)(15) or that an eligible individual through informed choice chooses to remain in extended employment, documentation of the results of the semi-annual and annual reviews required under § 361.55, of the individual's input into those reviews, and of the individual's or, if appropriate, the individual's representative's acknowledgment that those reviews were conducted.

(11) Documentation concerning any action or decision resulting from a request by an individual under § 361.57 for a review of determinations made by designated State unit personnel.

(12) In the event that an applicant or eligible individual requests under § 361.38(c)(4) that documentation in the record of services be amended and the documentation is not amended, documentation of the request.

(13) In the event an individual is referred to another program through the State unit's information and referral system under § 361.37, including other components of the statewide workforce development system, documentation on the nature and scope of services provided by the designated State unit to the individual and on the referral itself, consistent with the requirements of § 361.37.

(14) In the event an individual's record of service is closed under § 361.56, documentation that demonstrates the services provided under the individual's individualized plan for employment contributed to the achievement of the employment outcome.

(15) In the event an individual's record of service is closed under § 361.56, documentation verifying that the provisions of § 361.56 have been satisfied.

(b) The State unit, in consultation with the State Rehabilitation Council if the State has a Council, must determine the type of documentation that the State unit must maintain for each applicant and eligible individual in order to meet the requirements in paragraph (a) of this section.

(Authority: Sections 12(c), 101(a)(6), (9), (14), and (20) and 102(a), (b), and (d) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 709(c), 721(a)(6), (9), (14), and (20), and 722(a), (b), and (d))

§ 361.48 Scope of vocational rehabilitation services for individuals with disabilities.

(a) *Pre-employment transition services.* Each State must ensure that the designated State unit, in collaboration with the local educational agencies involved, provide, or arrange for the provision of, pre-employment transition services for all students with disabilities, as defined in § 361.5(c)(51), in need of such services, without regard to the type of disability, from Federal funds reserved in accordance with § 361.65, and any funds made available from State, local, or private funding sources. Funds reserved and made available may be used for the required, authorized, and pre-employment transition coordination activities under paragraphs (2), (3) and (4) of this section.

(1) *Availability of services.* Pre-employment transition services must be made available Statewide to all students with disabilities, regardless of whether the student has applied or been determined eligible for vocational rehabilitation services.

(2) *Required activities.* The designated State unit must provide the following pre-employment transition services:

(i) Job exploration counseling;

(ii) Work-based learning experiences, which may include in-school or after school opportunities, or experience outside the traditional school setting (including internships), that is provided in an integrated environment in the community to the maximum extent possible;

(iii) Counseling on opportunities for enrollment in comprehensive transition or postsecondary educational programs at institutions of higher education;

(iv) Workplace readiness training to develop social skills and independent living; and

(v) Instruction in self-advocacy (including instruction in person-centered planning), which may include peer mentoring (including peer mentoring from individuals with disabilities working in competitive integrated employment).

(3) *Authorized activities.* Funds available and remaining after the provision of the required activities described in paragraph (a)(2) of this section may be used to improve the transition of students with disabilities from school to postsecondary education or an employment outcome by—

(i) Implementing effective strategies to increase the likelihood of independent

living and inclusion in communities and competitive integrated workplaces;

(ii) Developing and improving strategies for individuals with intellectual disabilities and individuals with significant disabilities to live independently; participate in postsecondary education experiences; and obtain, advance in and retain competitive integrated employment;

(iii) Providing instruction to vocational rehabilitation counselors, school transition personnel, and other persons supporting students with disabilities;

(iv) Disseminating information about innovative, effective, and efficient approaches to achieve the goals of this section;

(v) Coordinating activities with transition services provided by local educational agencies under the Individuals with Disabilities Education Act (20 U.S.C. 1400 *et seq.*);

(vi) Applying evidence-based findings to improve policy, procedure, practice, and the preparation of personnel, in order to better achieve the goals of this section;

(vii) Developing model transition demonstration projects;

(viii) Establishing or supporting multistate or regional partnerships involving States, local educational agencies, designated State units, developmental disability agencies, private businesses, or other participants to achieve the goals of this section; and

(ix) Disseminating information and strategies to improve the transition to postsecondary activities of individuals who are members of traditionally unserved and underserved populations.

(4) *Pre-employment transition coordination.* Each local office of a designated State unit must carry out responsibilities consisting of—

(i) Attending individualized education program meetings for students with disabilities, when invited;

(ii) Working with the local workforce development boards, one-stop centers, and employers to develop work opportunities for students with disabilities, including internships, summer employment and other employment opportunities available throughout the school year, and apprenticeships;

(iii) Working with schools, including those carrying out activities under section 614(d) of the IDEA, to coordinate and ensure the provision of pre-employment transition services under this section;

(iv) When invited, attending person-centered planning meetings for individuals receiving services under title XIX of the Social Security Act (42 U.S.C. 1396 *et seq.*); and

(b) *Services for individuals who have applied for or been determined eligible for vocational rehabilitation services.* As appropriate to the vocational rehabilitation needs of each individual and consistent with each individual's individualized plan for employment, the designated State unit must ensure that the following vocational rehabilitation services are available to assist the individual with a disability in preparing for, securing, retaining, advancing in or regaining an employment outcome that is consistent with the individual's unique strengths, resources, priorities, concerns, abilities, capabilities, interests, and informed choice:

(1) Assessment for determining eligibility and priority for services by qualified personnel, including, if appropriate, an assessment by personnel skilled in rehabilitation technology, in accordance with § 361.42.

(2) Assessment for determining vocational rehabilitation needs by qualified personnel, including, if appropriate, an assessment by personnel skilled in rehabilitation technology, in accordance with § 361.45.

(3) Vocational rehabilitation counseling and guidance, including information and support services to assist an individual in exercising informed choice in accordance with § 361.52.

(4) Referral and other services necessary to assist applicants and eligible individuals to secure needed services from other agencies, including other components of the statewide workforce development system, in accordance with §§ 361.23, 361.24, and 361.37, and to advise those individuals about client assistance programs established under 34 CFR part 370.

(5) In accordance with the definition in § 361.5(c)(39), physical and mental restoration services, to the extent that financial support is not readily available from a source other than the designated State unit (such as through health insurance or a comparable service or benefit as defined in § 361.5(c)(10)).

(6) Vocational and other training services, including personal and vocational adjustment training, advanced training in, but not limited to, a field of science, technology, engineering, mathematics (including computer science), medicine, law, or business); books, tools, and other training materials, except that no training or training services in an institution of higher education (universities, colleges, community or junior colleges, vocational schools, technical institutes, or hospital schools of nursing or any other postsecondary education institution) may be paid for with funds under this part unless maximum efforts have been made by the State unit and the individual to secure grant assistance in whole or in part from other sources to pay for that training.

(7) Maintenance, in accordance with the definition of that term in § 361.5(c)(34).

(8) Transportation in connection with the provision of any vocational rehabilitation service and in accordance with the definition of that term in § 361.5(c)(57).

(9) Vocational rehabilitation services to family members, as defined in § 361.5(c)(23), of an applicant or eligible individual if necessary to enable the applicant or eligible individual to achieve an employment outcome.

(10) Interpreter services, including sign language and oral interpreter services, for individuals who are deaf or hard of hearing and tactile interpreting services for individuals who are deaf-blind provided by qualified personnel.

(11) Reader services, rehabilitation teaching services, and orientation and mobility services for individuals who are blind.

(12) Job-related services, including job search and placement assistance, job retention services, follow-up services, and follow-along services.

(13) Supported employment services in accordance with the definition of that term in § 361.5(c)(54).

(14) Personal assistance services in accordance with the definition of that term in § 361.5(c)(39).

(15) Post-employment services in accordance with the definition of that term in § 361.5(c)(42).

(16) Occupational licenses, tools, equipment, initial stocks, and supplies.

(17) Rehabilitation technology in accordance with the definition of that term in § 361.5(c)(45), including vehicular modification, telecommunications, sensory, and other technological aids and devices.

(18) Transition services for students and youth with disabilities, that facilitate the transition from school to postsecondary life, such as achievement of an employment outcome in competitive integrated employment, or pre-employment transition services for students.

(19) Technical assistance and other consultation services to conduct market analyses, develop business plans, and otherwise provide resources, to the extent those resources are authorized to be provided through the statewide workforce development system, to eligible individuals who are pursuing

self-employment or telecommuting or establishing a small business operation as an employment outcome.

(20) Customized employment in accordance with the definition of that term in § 361.5(c)(11).

(21) Other goods and services determined necessary for the individual with a disability to achieve an employment outcome.

(Authority: Sections 7(37), 12(c), 103(a), and 113 of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 705(37), 709(c), 723(a), and 733)

§ 361.49 Scope of vocational rehabilitation services for groups of individuals with disabilities.

(a) The designated State unit may provide for the following vocational rehabilitation services for the benefit of groups of individuals with disabilities:

(1) The establishment, development, or improvement of a public or other nonprofit community rehabilitation program that is used to provide vocational rehabilitation services that promote integration into the community and prepare individuals with disabilities for competitive integrated employment, including supported employment and customized employment, and under special circumstances, the construction of a facility for a public or nonprofit community rehabilitation program as defined in §§ 361.5(c)(10), 361.5(c)(16) and 361.5(c)(17). Examples of special circumstances include the destruction by natural disaster of the only available center serving an area or a State determination that construction is necessary in a rural area because no other public agencies or private nonprofit organizations are currently able to provide vocational rehabilitation services to individuals.

(2) Telecommunications systems that have the potential for substantially improving vocational rehabilitation service delivery methods and developing appropriate programming to meet the particular needs of individuals with disabilities, including telephone, television, video description services, satellite, tactile-vibratory devices, and similar systems, as appropriate.

(3) Special services to provide nonvisual access to information for individuals who are blind, including the use of telecommunications, Braille, sound recordings, or other appropriate media; captioned television, films, or video cassettes for individuals who are deaf or hard of hearing; tactile materials for individuals who are deaf-blind; and other special services that provide information through tactile, vibratory, auditory, and visual media.

(4) Technical assistance to businesses that are seeking to employ individuals with disabilities.

(5) In the case of any small business enterprise operated by individuals with significant disabilities under the supervision of the designated State unit, including enterprises established under the Randolph-Sheppard program, management services and supervision provided by the State unit along with the acquisition by the State unit of vending facilities or other equipment, initial stocks and supplies, and initial operating expenses, in accordance with the following requirements:

(i) *Management services and supervision* includes inspection, quality control, consultation, accounting, regulating, in-service training, and related services provided on a systematic basis to support and improve small business enterprises operated by individuals with significant disabilities. Management services and supervision may be provided throughout the operation of the small business enterprise.

(ii) *Initial stocks and supplies* includes those items necessary to the establishment of a new business enterprise during the initial establishment period, which may not exceed six months.

(iii) Costs of establishing a small business enterprise may include operational costs during the initial establishment period, which may not exceed six months.

(iv) If the designated State unit provides for these services, it must ensure that only individuals with significant disabilities will be selected to participate in this supervised program.

(v) If the designated State unit provides for these services and chooses to set aside funds from the proceeds of the operation of the small business enterprises, the State unit must maintain a description of the methods used in setting aside funds and the purposes for which funds are set aside. Funds may be used only for small business enterprises purposes, and benefits that are provided to operators from set-aside funds must be provided on an equitable basis.

(6) Consultation and technical assistance services to assist State educational agencies and local educational agencies in planning for the transition of students and youth with disabilities from school to postsecondary life, including employment.

(7) Transition services to youth with disabilities and students with disabilities who may not have yet applied or been determined eligible for vocational rehabilitation services, for which a vocational rehabilitation counselor works in concert with educational agencies, providers of job training programs, providers of services under the Medicaid program under title XIX of the Social Security Act (42 U.S.C. 1396 *et seq.*), entities designated by the State to provide services for individuals with developmental disabilities, centers for independent living (as defined in section 702 of the Act), housing and transportation authorities, workforce development systems, and businesses and employers. These specific transition services are to benefit a group of students with disabilities or youth with disabilities and are not individualized services directly related to an individualized plan for employment goal. Services may include, but are not limited to, group tours of universities and vocational training programs, employer or business site visits to learn about career opportunities, career fairs coordinated with workforce development and employers to facilitate mock interviews and resume writing, and other general services applicable to groups of students with disabilities and youth with disabilities.

(8) The establishment, development, or improvement of assistive technology demonstration, loan, reutilization, or financing programs in coordination with activities authorized under the Assistive Technology Act of 1998 (29 U.S.C. 3001 *et seq.*) to promote access to assistive technology for individuals with disabilities and employers.

(9) Support (including, as appropriate, tuition) for advanced training in a field of science, technology, engineering, or mathematics (including computer science), medicine, law, or business, provided after an individual eligible to receive services under this title demonstrates—

(i) Such eligibility;

(ii) Previous completion of a bachelor's degree program at an institution of higher education or scheduled completion of such a degree program prior to matriculating in the program for which the individual proposes to use the support; and

(iii) Acceptance by a program at an institution of higher education in the United States that confers a master's degree in a field of science, technology, engineering, or mathematics (including computer science), a juris doctor degree, a master of business administration degree, or a doctor of medicine degree, except that—

(A) No training provided at an institution of higher education may be paid for with funds under this program

unless maximum efforts have been made by the designated State unit to secure grant assistance, in whole or in part, from other sources to pay for such training; and

(B) Nothing in this paragraph prevents any designated State unit from providing similar support to individuals with disabilities within the State who are eligible to receive support under this title and who are not served under this section.

(b) If the designated State unit provides for vocational rehabilitation services for groups of individuals, it must—

(1) Develop and maintain written policies covering the nature and scope of each of the vocational rehabilitation services it provides and the criteria under which each service is provided; and

(2) Maintain information to ensure the proper and efficient administration of those services in the form and detail and at the time required by the Secretary, including the types of services provided, the costs of those services, and, to the extent feasible, estimates of the numbers of individuals benefiting from those services.

(Authority: Sections 12(c), 101(a)(6)(A), and 103(b) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 709(c), 721(a)(6), and 723(b))

§ 361.50 Written policies governing the provision of services for individuals with disabilities.

(a) *Policies.* The State unit must develop and maintain written policies covering the nature and scope of each of the vocational rehabilitation services specified in § 361.48 and the criteria under which each service is provided. The policies must ensure that the provision of services is based on the rehabilitation needs of each individual as identified in that individual's individualized plan for employment and is consistent with the individual's informed choice. The written policies may not establish any arbitrary limits on the nature and scope of vocational rehabilitation services to be provided to the individual to achieve an employment outcome. The policies must be developed in accordance with the following provisions:

(b) *Out-of-State services.* (1) The State unit may establish a preference for in-State services, provided that the preference does not effectively deny an individual a necessary service. If the individual chooses an out-of-State service at a higher cost than an in-State service, if either service would meet the individual's rehabilitation needs, the designated State unit is not responsible for those costs in excess of the cost of the in-State service.

(2) The State unit may not establish policies that effectively prohibit the provision of out-of-State services.

(c) *Payment for services.* (1) The State unit must establish and maintain written policies to govern the rates of payment for all purchased vocational rehabilitation services.

(2) The State unit may establish a fee schedule designed to ensure a reasonable cost to the program for each service, if the schedule is—

(i) Not so low as to effectively deny an individual a necessary service; and

(ii) Not absolute and permits exceptions so that individual needs can be addressed.

(3) The State unit may not place absolute dollar limits on specific service categories or on the total services provided to an individual.

(d) *Duration of services.* (1) The State unit may establish reasonable time periods for the provision of services provided that the time periods are—

(i) Not so short as to effectively deny an individual a necessary service; and

(ii) Not absolute and permit exceptions so that individual needs can be addressed.

(2) The State unit may not establish absolute time limits on the provision of specific services or on the provision of services to an individual. The duration of each service needed by an individual must be determined on an individual basis and reflected in that individual's individualized plan for employment.

(e) *Authorization of services.* The State unit must establish policies related to the timely authorization of services, including any conditions under which verbal authorization can be given.

(Authority: Sections 12(c) and 101(a)(6) of the Rehabilitation Act of 1973, as amended and 29 U.S.C. 709(c) and 721(a)(6))

§ 361.51 Standards for facilities and providers of services.

(a) *Accessibility of facilities.* The vocational rehabilitation services portion of the Unified or Combined State Plan must assure that any facility used in connection with the delivery of vocational rehabilitation services under this part meets program accessibility requirements consistent with the requirements, as applicable, of the Architectural Barriers Act of 1968, the Americans with Disabilities Act of 1990, section 504 of the Act, and the regulations implementing these laws.

(b) *Affirmative action.* The vocational rehabilitation services portion of the Unified or Combined State Plan must assure that community rehabilitation programs that receive assistance under part B of title I of the Act take affirmative action to employ and advance in employment qualified individuals with disabilities covered under and on the same terms and conditions as in section 503 of the Act.

(c) *Special communication needs personnel.* The designated State unit must ensure that providers of vocational rehabilitation services are able to communicate—

(1) In the native language of applicants and eligible individuals who have limited English proficiency; and

(2) By using appropriate modes of communication used by applicants and eligible individuals.

(Approved by the Office of Management and Budget under control number 1205–0522)

(Authority: Sections 12(c) and 101(a)(6)(B) and (C) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 709(c) and 721(a)(6)(B) and (C))

§ 361.52 Informed choice.

(a) *General provision.* The vocational rehabilitation services portion of the Unified or Combined State Plan must assure that applicants and recipients of services or, as appropriate, their representatives are provided information and support services to assist applicants and recipients of services in exercising informed choice throughout the rehabilitation process consistent with the provisions of section 102(d) of the Act and the requirements of this section.

(b) *Written policies and procedures.* The designated State unit, in consultation with its State Rehabilitation Council, if it has a Council, must develop and implement written policies and procedures that enable an applicant or recipient of services to exercise informed choice throughout the vocational rehabilitation process. These policies and procedures must provide for—

(1) Informing each applicant and recipient of services (including students with disabilities who are making the transition from programs under the responsibility of an educational agency to programs under the responsibility of the designated State unit and including youth with disabilities), through appropriate modes of communication, about the availability of and opportunities to exercise informed choice, including the availability of support services for individuals with cognitive or other disabilities who require assistance in exercising informed choice throughout the vocational rehabilitation process;

(2) Assisting applicants and recipients of services in exercising informed

choice in decisions related to the provision of assessment services;

(3) Developing and implementing flexible procurement policies and methods that facilitate the provision of vocational rehabilitation services and that afford recipients of services meaningful choices among the methods used to procure vocational rehabilitation services;

(4) Assisting eligible individuals or, as appropriate, the individuals' representatives, in acquiring information that enables them to exercise informed choice in the development of their individualized plans for employment with respect to the selection of the—

(i) Employment outcome;

(ii) Specific vocational rehabilitation services needed to achieve the employment outcome;

(iii) Entity that will provide the services;

(iv) Employment setting and the settings in which the services will be provided; and

(v) Methods available for procuring the services; and

(5) Ensuring that the availability and scope of informed choice is consistent with the obligations of the designated State agency under this part.

(c) *Information and assistance in the selection of vocational rehabilitation services and service providers.* In assisting an applicant and eligible individual in exercising informed choice during the assessment for determining eligibility and vocational rehabilitation needs and during development of the individualized plan for employment, the designated State unit must provide the individual or the individual's representative, or assist the individual or the individual's representative in acquiring, information necessary to make an informed choice about the specific vocational rehabilitation services, including the providers of those services, that are needed to achieve the individual's employment outcome. This information must include, at a minimum, information relating to the—

(1) Cost, accessibility, and duration of potential services;

(2) Consumer satisfaction with those services to the extent that information relating to consumer satisfaction is available;

(3) Qualifications of potential service providers;

(4) Types of services offered by the potential providers;

(5) Degree to which services are provided in integrated settings; and

(6) Outcomes achieved by individuals working with service providers, to the extent that such information is available.

(d) *Methods or sources of information.* In providing or assisting the individual or the individual's representative in acquiring the information required under paragraph (c) of this section, the State unit may use, but is not limited to, the following methods or sources of information:

(1) Lists of services and service providers.

(2) Periodic consumer satisfaction surveys and reports.

(3) Referrals to other consumers, consumer groups, or disability advisory councils qualified to discuss the services or service providers.

(4) Relevant accreditation, certification, or other information relating to the qualifications of service providers.

(5) Opportunities for individuals to visit or experience various work and service provider settings.

(Approved by the Office of Management and Budget under control number 1205–0522)

(Authority: Sections 12(c), 101(a)(19), 102(b)(2)(B), and 102(d) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 709(c), 721(a)(19), 722(b)(2)(B), and 722(d))

§ 361.53 Comparable services and benefits.

(a) *Determination of availability.* The vocational rehabilitation services portion of the Unified or Combined State Plan must assure that prior to providing an accommodation or auxiliary aid or service or any vocational rehabilitation services, except those services listed in paragraph (b) of this section, to an eligible individual or to members of the individual's family, the State unit must determine whether comparable services and benefits, as defined in § 361.5(c)(8), exist under any other program and whether those services and benefits are available to the individual unless such a determination would interrupt or delay—

(1) The progress of the individual toward achieving the employment outcome identified in the individualized plan for employment;

(2) An immediate job placement; or

(3) The provision of vocational rehabilitation services to any individual who is determined to be at extreme medical risk, based on medical evidence provided by an appropriate qualified medical professional.

(b) *Exempt services.* The following vocational rehabilitation services described in § 361.48(b) are exempt from a determination of the availability of comparable services and benefits under paragraph (a) of this section:

(1) Assessment for determining eligibility and vocational rehabilitation needs.

(2) Counseling and guidance, including information and support services to assist an individual in exercising informed choice.

(3) Referral and other services to secure needed services from other agencies, including other components of the statewide workforce development system, if those services are not available under this part.

(4) Job-related services, including job search and placement assistance, job retention services, follow-up services, and follow-along services.

(5) Rehabilitation technology, including telecommunications, sensory, and other technological aids and devices.

(6) Post-employment services consisting of the services listed under paragraphs (b)(1) through (5) of this section.

(c) *Provision of services.* (1) If comparable services or benefits exist under any other program and are available to the individual at the time needed to ensure the progress of the individual toward achieving the employment outcome in the individual's individualized plan for employment, the designated State unit must use those comparable services or benefits to meet, in whole or part, the costs of the vocational rehabilitation services.

(2) If comparable services or benefits exist under any other program, but are not available to the individual at the time needed to ensure the progress of the individual toward achieving the employment outcome specified in the individualized plan for employment, the designated State unit must provide vocational rehabilitation services until those comparable services and benefits become available.

(d) *Interagency coordination.* (1) The vocational rehabilitation services portion of the Unified or Combined State Plan must assure that the Governor, in consultation with the entity in the State responsible for the vocational rehabilitation program and other appropriate agencies, will ensure that an interagency agreement or other mechanism for interagency coordination takes effect between the designated State vocational rehabilitation unit and any appropriate public entity, including the State entity responsible for administering the State Medicaid program, a public institution of higher education, and a component of the statewide workforce development system, to ensure the provision of vocational rehabilitation services, and,

if appropriate, accommodations or auxiliary aids and services, (other than those services listed in paragraph (b) of this section) that are included in the individualized plan for employment of an eligible individual, including the provision of those vocational rehabilitation services (including, if appropriate, accommodations or auxiliary aids and services) during the pendency of any interagency dispute in accordance with the provisions of paragraph (d)(3)(iii) of this section.

(2) The Governor may meet the requirements of paragraph (d)(1) of this section through—

(i) A State statute or regulation;

(ii) A signed agreement between the respective officials of the public entities that clearly identifies the responsibilities of each public entity for the provision of the services; or

(iii) Another appropriate mechanism as determined by the designated State vocational rehabilitation unit.

(3) The interagency agreement or other mechanism for interagency coordination must include the following:

(i) *Agency financial responsibility.* An identification of, or description of a method for defining, the financial responsibility of the designated State unit and other public entities for the provision of vocational rehabilitation services, and, if appropriate, accommodations or auxiliary aids and services other than those listed in paragraph (b) of this section and a provision stating the financial responsibility of the public entity for providing those services.

(ii) *Conditions, terms, and procedures of reimbursement.* Information specifying the conditions, terms, and procedures under which the designated State unit must be reimbursed by the other public entities for providing vocational rehabilitation services, and accommodations or auxiliary aids and services based on the terms of the interagency agreement or other mechanism for interagency coordination.

(iii) *Interagency disputes.* Information specifying procedures for resolving interagency disputes under the interagency agreement or other mechanism for interagency coordination, including procedures under which the designated State unit may initiate proceedings to secure reimbursement from other public entities or otherwise implement the provisions of the agreement or mechanism.

(iv) *Procedures for coordination of services.* Information specifying policies and procedures for public entities to determine and identify interagency coordination responsibilities of each public entity to promote the coordination and timely delivery of vocational rehabilitation services, and accommodations or auxiliary aids and services, other than those listed in paragraph (b) of this section.

(e) *Responsibilities under other law.* (1) If a public entity (other than the designated State unit) is obligated under Federal law (such as the Americans with Disabilities Act, section 504 of the Act, or section 188 of the Workforce Innovation and Opportunity Act) or State law, or assigned responsibility under State policy or an interagency agreement established under this section, to provide or pay for any services considered to be vocational rehabilitation services (*e.g.,* interpreter services under § 361.48(j)), and, if appropriate, accommodations or auxiliary aids and services other than those services listed in paragraph (b) of this section, the public entity must fulfill that obligation or responsibility through—

(i) The terms of the interagency agreement or other requirements of this section;

(ii) Providing or paying for the service directly or by contract; or

(iii) Other arrangement.

(2) If a public entity other than the designated State unit fails to provide or pay for vocational rehabilitation services, and, if appropriate, accommodations or auxiliary aids and services for an eligible individual as established under this section, the designated State unit must provide or pay for those services to the individual and may claim reimbursement for the services from the public entity that failed to provide or pay for those services. The public entity must reimburse the designated State unit pursuant to the terms of the interagency agreement or other mechanism described in paragraph (d) of this section in accordance with the procedures established in the agreement or mechanism pursuant to paragraph (d)(3)(ii) of this section.

(Approved by the Office of Management and Budget under control number 1205–0522)

(Authority: Sections 12(c) and 101(a)(8) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 709(c) and 721(a)(8))

§ 361.54 Participation of individuals in cost of services based on financial need.

(a) *No Federal requirement.* There is no Federal requirement that the financial need of individuals be considered in the provision of vocational rehabilitation services.

(b) *State unit requirements.* (1) The State unit may choose to consider the financial need of eligible individuals or individuals who are receiving services through trial work experiences under § 361.42(e) for purposes of determining the extent of their participation in the costs of vocational rehabilitation services, other than those services identified in paragraph (b)(3) of this section.

(2) If the State unit chooses to consider financial need—

(i) It must maintain written policies—

(A) Explaining the method for determining the financial need of an eligible individual; and

(B) Specifying the types of vocational rehabilitation services for which the unit has established a financial needs test;

(ii) The policies must be applied uniformly to all individuals in similar circumstances;

(iii) The policies may require different levels of need for different geographic regions in the State, but must be applied uniformly to all individuals within each geographic region; and

(iv) The policies must ensure that the level of an individual's participation in the cost of vocational rehabilitation services is—

(A) Reasonable;

(B) Based on the individual's financial need, including consideration of any disability-related expenses paid by the individual; and

(C) Not so high as to effectively deny the individual a necessary service.

(3) The designated State unit may not apply a financial needs test, or require the financial participation of the individual—

(i) As a condition for furnishing the following vocational rehabilitation services:

(A) Assessment for determining eligibility and priority for services under § 361.48(b)(1), except those non-assessment services that are provided to an individual with a significant disability during either an exploration of the individual's abilities, capabilities, and capacity to perform in work situations through the use of trial work experiences under § 361.42(e).

(B) Assessment for determining vocational rehabilitation needs under § 361.48(b)(2).

(C) Vocational rehabilitation counseling and guidance under § 361.48(b)(3).

(D) Referral and other services under § 361.48(b)(4).

(E) Job-related services under § 361.48(b)(12).

(F) Personal assistance services under § 361.48(b)(14).

(G) Any auxiliary aid or service (*e.g.,* interpreter services under § 361.48(b)(10), reader services under § 361.48(b)(11)) that an individual with a disability requires under section 504 of the Act (29 U.S.C. 794) or the Americans with Disabilities Act (42 U.S.C. 12101, *et seq.*), or regulations implementing those laws, in order for the individual to participate in the vocational rehabilitation program as authorized under this part; or

(ii) As a condition for furnishing any vocational rehabilitation service if the individual in need of the service has been determined eligible for Social Security benefits under titles II or XVI of the Social Security Act.

(Authority: Section 12(c) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 709(c))

§ 361.55 Semi-annual and annual review of individuals in extended employment and other employment under special certificate provisions of the Fair Labor Standards Act.

(a) The vocational rehabilitation services portion of the Unified or Combined State Plan must assure that the designated State unit conducts a semi-annual review and reevaluation for the first two years of such employment and annually thereafter, in accordance with the requirements in paragraph (b) of this section for an individual with a disability served under this part—

(1) Who has a record of service, as described in § 361.47, as either an applicant or eligible individual under the vocational rehabilitation program; and

(2)(i) Who has achieved employment in which the individual is compensated in accordance with section 14(c) of the Fair Labor Standards Act; or

(ii) Who is in extended employment, including those individuals whose record of service is closed while the individual is in extended employment on the basis that the individual is unable to achieve an employment outcome consistent with § 361.5(c)(15) or that the individual made an informed choice to remain in extended employment.

(b) For each individual with a disability who meets the criteria in paragraph (a) of this section, the designated State unit must—

(1) Semi-annually review and reevaluate the status of each individual for two years after the individual's record of services is closed (and annually thereafter) to determine the interests, priorities, and needs of the individual with respect to competitive integrated employment or training for competitive integrated employment;

(2) Enable the individual or, if appropriate, the individual's representative to provide input into the review and reevaluation and must document that input in the record of services, consistent with § 361.47(a)(10), with the individual's or, as appropriate, the individual's representative's signed acknowledgment that the review and reevaluation have been conducted; and

(3) Make maximum efforts, including identifying and providing vocational rehabilitation services, reasonable accommodations, and other necessary support services, to assist the individual in engaging in competitive integrated employment as defined in § 361.5(c)(9).

(Approved by the Office of Management and Budget under control number 1205–0522)

(Authority: Sections 12(c) and 101(a)(14) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 709(c) and 721(a)(14))

§ 361.56 Requirements for closing the record of services of an individual who has achieved an employment outcome.

The record of services of an individual who has achieved an employment outcome may be closed only if all of the following requirements are met:

(a) *Employment outcome achieved.* The individual has achieved the employment outcome that is described in the individual's individualized plan for employment in accordance with § 361.46(a)(1) and is consistent with the individual's unique strengths, resources, priorities, concerns, abilities, capabilities, interests, and informed choice.

(b) *Employment outcome maintained.* The individual has maintained the employment outcome for an appropriate period of time, but not less than 90 days, necessary to ensure the stability of the employment outcome, and the individual no longer needs vocational rehabilitation services.

(c) *Satisfactory outcome.* At the end of the appropriate period under paragraph (b) of this section, the individual and the qualified rehabilitation counselor employed by the designated State unit consider the employment outcome to be satisfactory and agree that the individual is performing well in the employment.

(d) *Post-employment services.* The individual is informed through appropriate modes of communication of the availability of post-employment services.

(Authority: Sections 12(c), 101(a)(6), and 106(a)(2) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 709(c), 721(a)(6), and 726(a)(2))

§ 361.57 Review of determinations made by designated State unit personnel.

(a) *Procedures.* The designated State unit must develop and implement procedures to ensure that an applicant or recipient of services who is dissatisfied with any determination made by personnel of the designated State unit that affects the provision of vocational rehabilitation services may request, or, if appropriate, may request through the individual's representative, a timely review of that determination. The procedures must be in accordance with paragraphs (b) through (k) of this section:

(b) *General requirements.* (1) *Notification.* Procedures established by the State unit under this section must provide an applicant or recipient or, as appropriate, the individual's representative notice of—

(i) The right to obtain review of State unit determinations that affect the provision of vocational rehabilitation services through an impartial due process hearing under paragraph (e) of this section;

(ii) The right to pursue mediation under paragraph (d) of this section with respect to determinations made by designated State unit personnel that affect the provision of vocational rehabilitation services to an applicant or recipient;

(iii) The names and addresses of individuals with whom requests for mediation or due process hearings may be filed;

(iv) The manner in which a mediator or impartial hearing officer may be selected consistent with the requirements of paragraphs (d) and (f) of this section; and

(v) The availability of the client assistance program, established under 34 CFR part 370, to assist the applicant or recipient during mediation sessions or impartial due process hearings.

(2) *Timing.* Notice described in paragraph (b)(1) of this section must be provided in writing—

(i) At the time the individual applies for vocational rehabilitation services under this part;

(ii) At the time the individual is assigned to a category in the State's order of selection, if the State has established an order of selection under § 361.36;

(iii) At the time the individualized plan for employment is developed; and

(iv) Whenever vocational rehabilitation services for an individual are reduced, suspended, or terminated.

(3) *Evidence and representation.* Procedures established under this section must—

(i) Provide an applicant or recipient or, as appropriate, the individual's representative with an opportunity to submit during mediation sessions or due process hearings evidence and other information that supports the applicant's or recipient's position; and

(ii) Allow an applicant or recipient to be represented during mediation sessions or due process hearings by counsel or other advocate selected by the applicant or recipient.

(4) *Impact on provision of services.* The State unit may not institute a suspension, reduction, or termination of vocational rehabilitation services being provided to an applicant or recipient, including evaluation and assessment services and individualized plan for employment development, pending a resolution through mediation, pending a decision by a hearing officer or reviewing official, or pending informal resolution under this section unless—

(i) The individual or, in appropriate cases, the individual's representative requests a suspension, reduction, or termination of services; or

(ii) The State agency has evidence that the services have been obtained through misrepresentation, fraud, collusion, or criminal conduct on the part of the individual or the individual's representative.

(5) *Ineligibility.* Applicants who are found ineligible for vocational rehabilitation services and previously eligible individuals who are determined to be no longer eligible for vocational rehabilitation services pursuant to § 361.43 are permitted to challenge the determinations of ineligibility under the procedures described in this section.

(c) *Informal dispute resolution.* The State unit may develop an informal process for resolving a request for review without conducting mediation or a formal hearing. A State's informal process must not be used to deny the right of an applicant or recipient to a hearing under paragraph (e) of this section or any other right provided under this part, including the right to pursue mediation under paragraph (d) of this section. If informal resolution under this paragraph or mediation under paragraph (d) of this section is not successful in resolving the dispute within the time period established under paragraph (e)(1) of this section, a formal hearing must be conducted within that same time period, unless the parties agree to a specific extension of time.

(d) *Mediation.* (1) The State must establish and implement procedures, as required under paragraph (b)(1)(ii) of this section, to allow an applicant or recipient and the State unit to resolve disputes involving State unit determinations that affect the provision of vocational rehabilitation services through a mediation process that must be made available, at a minimum, whenever an applicant or recipient or, as appropriate, the individual's representative requests an impartial due process hearing under this section.

(2) Mediation procedures established by the State unit under paragraph (d) of this section must ensure that—

(i) Participation in the mediation process is voluntary on the part of the applicant or recipient, as appropriate, and on the part of the State unit;

(ii) Use of the mediation process is not used to deny or delay the applicant's or recipient's right to pursue resolution of the dispute through an impartial hearing held within the time period specified in paragraph (e)(1) of this section or any other rights provided under this part. At any point during the mediation process, either party or the mediator may elect to terminate the mediation. In the event mediation is terminated, either party may pursue resolution through an impartial hearing;

(iii) The mediation process is conducted by a qualified and impartial mediator, as defined in § 361.5(c)(43), who must be selected from a list of qualified and impartial mediators maintained by the State—

(A) On a random basis;

(B) By agreement between the director of the designated State unit and the applicant or recipient or, as appropriate, the recipient's representative; or

(C) In accordance with a procedure established in the State for assigning mediators, provided this procedure ensures the neutrality of the mediator assigned; and

(iv) Mediation sessions are scheduled and conducted in a timely manner and are held in a location and manner that is convenient to the parties to the dispute.

(3) Discussions that occur during the mediation process must be kept confidential and may not be used as evidence in any subsequent due process hearings or civil proceedings, and the parties to the mediation process may be required to sign a confidentiality pledge prior to the commencement of the process.

(4) An agreement reached by the parties to the dispute in the mediation process must be described in a written mediation agreement that is developed by the parties with the assistance of the qualified and impartial mediator and signed by both parties. Copies of the agreement must be sent to both parties.

(5) The costs of the mediation process must be paid by the State. The State is not required to pay for any costs related to the representation of an applicant or recipient authorized under paragraph (b)(3)(ii) of this section.

(e) *Impartial due process hearings.* The State unit must establish and implement formal review procedures, as required under paragraph (b)(1)(i) of this section, that provide that—

(1) Hearing conducted by an impartial hearing officer, selected in accordance with paragraph (f) of this section, must be held within 60 days of an applicant's or recipient 's request for review of a determination made by personnel of the State unit that affects the provision of vocational rehabilitation services to the individual, unless informal resolution or a mediation agreement is achieved prior to the 60th day or the parties agree to a specific extension of time;

(2) In addition to the rights described in paragraph (b)(3) of this section, the applicant or recipient or, if appropriate, the individual's representative must be given the opportunity to present witnesses during the hearing and to examine all witnesses and other relevant sources of information and evidence;

(3) The impartial hearing officer must—

(i) Make a decision based on the provisions of the approved vocational rehabilitation services portion of the Unified or Combined State Plan, the Act, Federal vocational rehabilitation regulations, and State regulations and policies that are consistent with Federal requirements; and

(ii) Provide to the individual or, if appropriate, the individual's representative and to the State unit a full written report of the findings and grounds for the decision within 30 days of the completion of the hearing; and

(4) The hearing officer's decision is final, except that a party may request an impartial review under paragraph (g)(1) of this section if the State has established procedures for that review, and a party involved in a hearing may bring a civil action under paragraph (i) of this section.

(f) *Selection of impartial hearing officers.* The impartial hearing officer for a particular case must be selected—

(1) From a list of qualified impartial hearing officers maintained by the State unit. Impartial hearing officers included on the list must be—

(i) Identified by the State unit if the State unit is an independent commission; or

(ii) Jointly identified by the State unit and the State Rehabilitation Council if the State has a Council; and

(2)(i) On a random basis; or

(ii) By agreement between the director of the designated State unit and the applicant or recipient or, as appropriate, the individual's representative.

(g) *Administrative review of hearing officer's decision.* The State may establish procedures to enable a party who is dissatisfied with the decision of the impartial hearing officer to seek an impartial administrative review of the decision under paragraph (e)(3) of this section in accordance with the following requirements:

(1) A request for administrative review under paragraph (g) of this section must be made within 20 days of the mailing of the impartial hearing officer's decision.

(2) Administrative review of the hearing officer's decision must be conducted by—

(i) The chief official of the designated State agency if the State has established both a designated State agency and a designated State unit under § 361.13(b); or

(ii) An official from the office of the Governor.

(3) The reviewing official described in paragraph (g)(2)(i) of this section—

(i) Provides both parties with an opportunity to submit additional evidence and information relevant to a final decision concerning the matter under review;

(ii) May not overturn or modify the hearing officer's decision, or any part of that decision, that supports the position of the applicant or recipient unless the reviewing official concludes, based on clear and convincing evidence, that the decision of the impartial hearing officer is clearly erroneous on the basis of being contrary to the approved vocational rehabilitation services portion of the Unified or Combined State Plan, the Act, Federal vocational rehabilitation regulations, or State regulations and policies that are consistent with Federal requirements;

(iii) Makes an independent, final decision following a review of the entire hearing record and provides the decision in writing, including a full report of the findings and the statutory, regulatory, or policy grounds for the decision, to the applicant or recipient or, as appropriate, the individual's representative and to the State unit within 30 days of the request for administrative review under paragraph (g)(1) of this section; and

(iv) May not delegate the responsibility for making the final decision under paragraph (g) of this section to any officer or employee of the designated State unit.

(4) The reviewing official's decision under paragraph (g) of this section is final unless either party brings a civil action under paragraph (i) of this section.

(h) *Implementation of final decisions.* If a party brings a civil action under paragraph (h) of this section to challenge the final decision of a hearing officer under paragraph (e) of this section or to challenge the final decision of a State reviewing official under paragraph (g) of this section, the final decision of the hearing officer or State reviewing official must be implemented pending review by the court.

(i) *Civil action.* (1) Any party who disagrees with the findings and decision of an impartial hearing officer under paragraph (e) of this section in a State that has not established administrative review procedures under paragraph (g) of this section and any party who disagrees with the findings and decision under paragraph (g)(3)(iii) of this section have a right to bring a civil action with respect to the matter in dispute. The action may be brought in any State court of competent jurisdiction or in a district court of the United States of competent jurisdiction without regard to the amount in controversy.

(2) In any action brought under paragraph (i) of this section, the court—

(i) Receives the records related to the impartial due process hearing and the records related to the administrative review process, if applicable;

(ii) Hears additional evidence at the request of a party; and

(iii) Basing its decision on the preponderance of the evidence, grants the relief that the court determines to be appropriate.

(j) *State fair hearing board.* A fair hearing board as defined in § 361.5(c)(21) is authorized to carry out the responsibilities of the impartial hearing officer under paragraph (e) of this section in accordance with the following criteria:

(1) The fair hearing board may conduct due process hearings either collectively or by assigning responsibility for conducting the hearing to one or more members of the fair hearing board.

(2) The final decision issued by the fair hearing board following a hearing under paragraph (j)(1) of this section must be made collectively by, or by a majority vote of, the fair hearing board.

(3) The provisions of paragraphs (b)(1), (2), and (3) of this section that relate to due process hearings and of paragraphs (e), (f), (g), and (h) of this section do not apply to fair hearing boards under this paragraph (j).

(k) *Data collection.* (1) The director of the designated State unit must collect and submit, at a minimum, the following data to the Secretary for inclusion each year in the annual report to Congress under section 13 of the Act:

(i) A copy of the standards used by State reviewing officials for reviewing decisions made by impartial hearing officers under this section.

(ii) The number of mediations held, including the number of mediation agreements reached.

(iii) The number of hearings and reviews sought from impartial hearing officers and State reviewing officials, including the type of complaints and the issues involved.

(iv) The number of hearing officer decisions that were not reviewed by administrative reviewing officials.

(v) The number of hearing decisions that were reviewed by State reviewing officials and, based on these reviews, the number of hearing decisions that were—

(A) Sustained in favor of an applicant or recipient;

(B) Sustained in favor of the designated State unit;

(C) Reversed in whole or in part in favor of the applicant or recipient; and

(D) Reversed in whole or in part in favor of the State unit.

(2) The State unit director also must collect and submit to the Secretary copies of all final decisions issued by impartial hearing officers under paragraph (e) of this section and by State review officials under paragraph (g) of this section.

(3) The confidentiality of records of applicants and recipients maintained by the State unit may not preclude the access of the Secretary to those records for the purposes described in this section.

(Authority: Sections 12(c) and 102(c) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 709(c) and 722(c))

Subpart C—Financing of State Vocational Rehabilitation Programs

§ 361.60 Matching requirements.

(a) *Federal share*—(1) *General.* Except as provided in paragraph (a)(2) of this section, the Federal share for expenditures made by the State under the vocational rehabilitation services portion of the Unified or Combined State Plan, including expenditures for the provision of vocational rehabilitation services and the administration of the vocational rehabilitation services portion of the Unified or Combined State Plan, is 78.7 percent.

(2) *Construction projects.* The Federal share for expenditures made for the construction of a facility for community rehabilitation program purposes may

not be more than 50 percent of the total cost of the project.

(b) *Non-Federal share*—(1) *General.* Except as provided in paragraph (b)(2) and (b)(3) of this section, expenditures made under the vocational rehabilitation services portion of the Unified or Combined State Plan to meet the non-Federal share under this section must be consistent with the provisions of 2 CFR 200.306(b).

(2) *Third party in-kind contributions.* Third party in-kind contributions specified in 2 CFR 200.306(b) may not be used to meet the non-Federal share under this section.

(3) *Contributions by private entities.* Expenditures made from those cash contributions provided by private organizations, agencies, or individuals and that are deposited in the State agency's account or, if applicable, sole local agency's account, in accordance with State law prior to their expenditure and that are earmarked, under a condition imposed by the contributor, may be used as part of the non-Federal share under this section if the funds are earmarked for—

(i) Meeting in whole or in part the State's share for establishing a community rehabilitation program or constructing a particular facility for community rehabilitation program purposes;

(ii) Particular geographic areas within the State for any purpose under the vocational rehabilitation services portion of the Unified or Combined State Plan, other than those described in paragraph (b)(3)(i) of this section, in accordance with the following criteria:

(A) Before funds that are earmarked for a particular geographic area may be used as part of the non-Federal share, the State must notify the Secretary that the State cannot provide the full non-Federal share without using these funds.

(B) Funds that are earmarked for a particular geographic area may be used as part of the non-Federal share without requesting a waiver of statewideness under § 361.26.

(C) Except as provided in paragraph (b)(3)(i) of this section, all Federal funds must be used on a statewide basis consistent with § 361.25, unless a waiver of statewideness is obtained under § 361.26; and

(iii) Any other purpose under the vocational rehabilitation services portion of the Unified or Combined State Plan, provided the expenditures do not benefit in any way the donor, employee, officer, or agent, any member of his or her immediate family, his or her partner, an individual with whom the donor has a close personal relationship, or an individual, entity, or organization with whom the donor shares a financial or other interest. The Secretary does not consider a donor's receipt from the State unit of a subaward or contract with funds allotted under this part to be a benefit for the purposes of this paragraph if the subaward or contract is awarded under the State's regular competitive procedures.

(Authority: Sections 7(14), 12(c), 101(a)(3), 101(a)(4), and 104 of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 705(14), 709(c), 721(a)(3), 721(a)(4), and 724))

Example for paragraph (b)(3): Contributions may be earmarked in accordance with § 361.60(b)(3)(iii) for providing particular services (*e.g.,* rehabilitation technology services); serving individuals with certain types of disabilities (*e.g.,* individuals who are blind), consistent with the State's order of selection, if applicable; providing services to special groups that State or Federal law permits to be targeted for services (*e.g.,* students with disabilities who are receiving special education services), consistent with the State's order of selection, if applicable; or carrying out particular types of administrative activities permissible under State law. Contributions also may be restricted to particular geographic areas to increase services or expand the scope of services that are available statewide under the vocational rehabilitation services portion of the Unified or Combined State Plan in accordance with the requirements in § 361.60(b)(3)(ii).

§ 361.61 Limitation on use of funds for construction expenditures.

No more than 10 percent of a State's allotment for any fiscal year under section 110 of the Act may be spent on the construction of facilities for community rehabilitation program purposes.

(Authority: Section 101(a)(17)(A) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 721(a)(17)(A))

§ 361.62 Maintenance of effort requirements.

(a) *General requirements.* The Secretary reduces the amount otherwise payable to a State for any fiscal year by the amount by which the total expenditures from non-Federal sources under the vocational rehabilitation services portion of the Unified or Combined State Plan for any previous fiscal year were less than the total of those expenditures for the fiscal year two years prior to that previous fiscal year.

(b) *Specific requirements for construction of facilities.* If the State provides for the construction of a facility for community rehabilitation program purposes, the amount of the State's share of expenditures for vocational rehabilitation services under the plan, other than for the construction of a facility for community rehabilitation program purposes or the establishment of a facility for community rehabilitation purposes, must be at least equal to the expenditures for those services for the second prior fiscal year.

(c) *Separate State agency for vocational rehabilitation services for individuals who are blind.* If there is a separate part of the vocational rehabilitation services portion of the Unified or Combined State Plan administered by a separate State agency to provide vocational rehabilitation services for individuals who are blind—

(1) Satisfaction of the maintenance of effort requirements under paragraphs (a) and (b) of this section is determined based on the total amount of a State's non-Federal expenditures under both parts of the vocational rehabilitation services portion of the Unified or Combined State Plan; and

(2) If a State fails to meet any maintenance of effort requirement, the Secretary reduces the amount otherwise payable to the State for a fiscal year under each part of the plan in direct proportion to the amount by which non-Federal expenditures under each part of the plan in any previous fiscal year were less than they were for that part of the plan for the fiscal year 2 years prior to that previous fiscal year.

(d) *Waiver or modification.* (1) The Secretary may waive or modify the maintenance of effort requirement in paragraph (a) of this section if the Secretary determines that a waiver or modification is necessary to permit the State to respond to exceptional or uncontrollable circumstances, such as a major natural disaster or a serious economic downturn, that—

(i) Cause significant unanticipated expenditures or reductions in revenue that result in a general reduction of programs within the State; or

(ii) Require the State to make substantial expenditures in the vocational rehabilitation program for long-term purposes due to the one-time costs associated with the construction of a facility for community rehabilitation program purposes, the establishment of a facility for community rehabilitation program purposes, or the acquisition of equipment.

(2) The Secretary may waive or modify the maintenance of effort requirement in paragraph (b) of this section or the 10 percent allotment limitation in § 361.61 if the Secretary determines that a waiver or modification is necessary to permit the State to respond to exceptional or

uncontrollable circumstances, such as a major natural disaster, that result in significant destruction of existing facilities and require the State to make substantial expenditures for the construction of a facility for community rehabilitation program purposes or the establishment of a facility for community rehabilitation program purposes in order to provide vocational rehabilitation services.

(3) A written request for waiver or modification, including supporting justification, must be submitted to the Secretary for consideration as soon as the State has determined that it has failed to satisfy its maintenance of effort requirement due to an exceptional or uncontrollable circumstance, as described in paragraphs (d)(1) and (2) of this section.

(Authority: Sections 101(a)(17) and 111(a)(2) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 721(a)(17) and 731(a)(2))

§ 361.63 Program income.

(a) *Definition.* For purposes of this section, program income means gross income received by the State that is directly generated by a supported activity under this part or earned as a result of the Federal award during the period of performance, as defined in 2 CFR 200.80.

(b) *Sources.* Sources of program income include, but are not limited to: Payments from the Social Security Administration for assisting Social Security beneficiaries and recipients to achieve employment outcomes; payments received from workers' compensation funds; payments received by the State agency from insurers, consumers, or others for services to defray part or all of the costs of services provided to particular individuals; and income generated by a State-operated community rehabilitation program for activities authorized under this part.

(c) *Use of program income.* (1) Except as provided in paragraph (c)(2) of this section, program income, whenever earned, must be used for the provision of vocational rehabilitation services and the administration of the vocational rehabilitation services portion of the Unified or Combined State Plan. Program income—

(i) Is considered earned in the fiscal year in which it is received; and

(ii) Must be disbursed during the period of performance of the award.

(2) Payments provided to a State from the Social Security Administration for assisting Social Security beneficiaries and recipients to achieve employment outcomes may also be used to carry out programs under part B of title I of the Act (client assistance), title VI of the Act (supported employment), and title VII of the Act (independent living).

(3)(i) The State must use program income to supplement Federal funds that support program activities that are subject to this part. See, for example, 2 CFR 200.307(e)(2).

(ii) Notwithstanding 2 CFR 200.305(a) and to the extent that program income funds are available, a State must disburse those funds (including repayments to a revolving fund), rebates, refunds, contract settlements, audit recoveries, and interest earned on such funds before requesting additional funds from the Department.

(4) Program income cannot be used to meet the non-Federal share requirement under § 361.60.

(Authority: Sections 12(c) and 108 of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 709(c) and 728; 2 CFR part 200)

§ 361.64 Obligation of Federal funds.

(a) Except as provided in paragraph (b) of this section, any Federal award funds, including reallotted funds, that are appropriated for a fiscal year to carry out a program under this part that are not obligated by the State by the beginning of the succeeding fiscal year remain available for obligation by the State during that succeeding fiscal year.

(b) Federal funds appropriated for a fiscal year remain available for obligation in the succeeding fiscal year only to the extent that the State met the matching requirement for those Federal funds by obligating, in accordance with 34 CFR 76.707, the non-Federal share in the fiscal year for which the funds were appropriated.

(Authority: Section 19 of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 716)

§ 361.65 Allotment and payment of Federal funds for vocational rehabilitation services.

(a) *Allotment.* (1) The allotment of Federal funds for vocational rehabilitation services for each State is computed in accordance with the requirements of section 110 of the Act, and payments are made to the State on a quarterly basis, unless some other period is established by the Secretary.

(2) If the vocational rehabilitation services portion of the Unified or Combined State Plan designates one State agency to administer, or supervise the administration of, the part of the plan under which vocational rehabilitation services are provided for individuals who are blind and another State agency to administer the rest of the plan, the division of the State's allotment is a matter for State determination.

(3) *Reservation for pre-employment transition services.* (i) Pursuant to section 110(d) of the Act, the State must reserve at least 15 percent of the State's allotment, received in accordance with section 110(a) of the Act for the provision of pre-employment transition services, as described in § 361.48(a) of this part.

(ii) The funds reserved in accordance with paragraph (a)(3)(i) of this section—

(A) Must only be used for pre-employment transition services specified in § 361.48(a); and

(B) Must not be used to pay for administrative costs, (as defined in § 361.5(c)(2)) associated with the provision of such services or any other vocational rehabilitation services.

(b) *Reallotment.* (1) The Secretary determines not later than 45 days before the end of a fiscal year which States, if any, will not use their full allotment.

(2) As soon as possible, but not later than the end of the fiscal year, the Secretary reallots these funds to other States that can use those additional funds during the period of performance of the award, provided the State can meet the matching requirement by obligating the non-Federal share of any reallotted funds in the fiscal year for which the funds were appropriated.

(3) In the event more funds are requested by agencies than are available, the Secretary will determine the process for allocating funds available for reallotment.

(4) Funds reallotted to another State are considered to be an increase in the recipient State's allotment for the fiscal year for which the funds were appropriated.

(Authority: Sections 12(c), 110, and 111 of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 709(c), 730, and 731)

Subparts D–F—[Reserved]

■ 2. Effective October 18, 2016, § 361.10 is amended by adding paragraph (d) to read as follows:

§ 361.10 Submission, approval, and disapproval of the State plan.

* * * * *

(d) *Submission, approval, disapproval, and duration.* All requirements regarding the submission, approval, disapproval, and duration of the vocational rehabilitation services portion of the Unified or Combined State Plan are governed by regulations set forth in subpart D of this part.

* * * * *

■ 3. Effective October 18, 2016, § 361.23 is added to read as follows:

§ 361.23 Requirements related to the statewide workforce development system.

As a required partner in the one-stop service delivery system (which is part of

the statewide workforce development system under title I of the Workforce Innovation and Opportunity Act), the designated State unit must satisfy all requirements set forth in regulations in subpart F of this part.

363.53 What requirements must a designated State unit meet for the transition of an individual to extended services?
363.54 When will an individual be considered to have achieved an employment outcome in supported employment?
363.55 When will the service record of an individual who has achieved an employment outcome in supported employment be closed?
363.56 What notice requirements apply to this program?

Authority: Sections 602–608 of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 795g–795m, unless otherwise noted.

Subpart A—General

§ 363.1 What is the State Supported Employment Services program?

(a) Under the State supported employment services program, the Secretary provides grants to assist States in developing and implementing collaborative programs with appropriate entities to provide programs of supported employment services for individuals with the most significant disabilities, including youth with the most significant disabilities, to enable them to achieve an employment outcome of supported employment in competitive integrated employment. Grants made under the State supported employment services program supplement a State's vocational rehabilitation program grants under 34 CFR part 361.

(b) For purposes of this part and 34 CFR part 361, ''supported employment'' means competitive integrated employment, including customized employment, or employment in an integrated work setting in which an individual with a most significant disability, including a youth with a most significant disability, is working on a short-term basis toward competitive integrated employment, that is individualized and customized, consistent with the unique strengths, abilities, interests, and informed choice of the individual, including with ongoing support services for individuals with the most significant disabilities—

(1)(i) For whom competitive integrated employment has not historically occurred; or

(ii) For whom competitive integrated employment has been interrupted or intermittent as a result of a significant disability; and

(2) Who, because of the nature and severity of the disability, need intensive supported employment services, and extended services after the transition from support provided by the designated State unit in order to perform the work.

(c) *Short-term basis.* For purposes of this part, an individual with a most significant disability, whose supported employment in an integrated setting does not satisfy the criteria of competitive integrated employment, as defined in 34 CFR 361.5(c)(9), is considered to be working on a short-term basis toward competitive integrated employment so long as the individual can reasonably anticipate achieving competitive integrated employment—

(1) Within six months of achieving a supported employment outcome; or,

(2) In limited circumstances, within a period not to exceed 12 months from the achievement of the supported employment outcome, if a longer period is necessary based on the needs of the individual, and the individual has demonstrated progress toward competitive earnings based on information contained in the service record.

(Authority: Sections 7(38), 7(39), 12(c), and 602 of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 705(38) 705(39), 709(c), and 795g)

§ 363.2 Who is eligible for an award?

Any State that submits the documentation required by § 363.10, as part of the vocational rehabilitation services portion of the Unified or Combined State Plan under 34 CFR part 361, is eligible for an award under this part.

(Authority: Section 606(a) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 795k(a))

§ 363.3 Who is eligible for services?

A State may provide services under this part to any individual, including a youth with a disability, if—

(a) The individual has been determined to be—

(1) Eligible for vocational rehabilitation services in accordance with 34 CFR 361.42; and

(2) An individual with a most significant disability;

(b) For purposes of activities carried out under § 363.4(a)(2), the individual is a youth with a disability, as defined in 34 CFR 361.5(c)(59), who satisfies the requirements of this section; and

(c) Supported employment has been identified as the appropriate employment outcome for the individual on the basis of a comprehensive assessment of rehabilitation needs, as defined in 34 CFR 361.5(c)(5), including an evaluation of rehabilitation, career, and job needs.

(Authority: Section 605 of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 795j)

§ 363.4 What are the authorized activities under the State Supported Employment Services program?

(a) The State may use funds allotted under this part to—

(1) Provide supported employment services, as defined in 34 CFR 361.5(c)(54);

(2) Provide extended services, as defined in 34 CFR 361.5(c)(19), to youth with the most significant disabilities, in accordance with § 363.11(f), for a period of time not to exceed four years, or until such time that a youth reaches the age of 25 and no longer meets the definition of a youth with a disability under 34 CFR 361.5(c)(58), whichever occurs first; and

(3) With funds reserved, in accordance with § 363.22 for the provision of supported employment services to youth with the most significant disabilities, leverage other public and private funds to increase resources for extended services and expand supported employment opportunities.

(b) Except as provided in paragraph (a)(2) of this section, a State may not use funds under this part to provide extended services to individuals with the most significant disabilities.

(c) Nothing in this part will be construed to prohibit a State from providing—

(1) Supported employment services in accordance with the vocational rehabilitation services portion of the Unified or Combined State Plan submitted under 34 CFR part 361 by using funds made available through a State allotment under that part.

(2) Discrete postemployment services in accordance with 34 CFR 361.48(b) by using funds made available under 34 CFR part 361 to an individual who is eligible under this part.

(d) A State must coordinate with the entities described in § 363.50(a) regarding the services provided to individuals with the most significant disabilities, including youth with the most significant disabilities, under this part and under 34 CFR part 361 to ensure that the services are complementary and not duplicative.

(Authority: Sections 7(39), 12(c), 604, 606(b)(6), and 608 of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 705(39), 709(c), 795i, 795k(b)(6), and 795m)

§ 363.5 What regulations apply?

The following regulations apply to the State supported employment services program:

(a) The Education Department General Administrative Regulations (EDGAR) as follows:

(1) 34 CFR part 76 (State-Administered Programs).

(2) 34 CFR part 77 (Definitions that Apply to Department Regulations).

(3) 34 CFR part 79 (Intergovernmental Review of Department of Education Programs and Activities).

(4) 34 CFR part 81 (General Education Provisions Act—Enforcement).

(5) 34 CFR part 82 (New Restrictions on Lobbying).

(b) The regulations in this part 363.

(c) The following regulations in 34 CFR part 361 (The State Vocational Rehabilitation Services Program): §§ 361.5, 361.31, 361.32, 361.34, 361.35, 361.39, 361.40, 361.41, 361.42, 361.47(a), 361.48, 361.49, and 361.53.

(d) 2 CFR part 200 (Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards), as adopted in 2 CFR part 3474.

(e) 2 CFR part 180 (OMB Guidelines to Agencies on Governmentwide Debarment and Suspension (Nonprocurement)), as adopted in 2 CFR part 3485.

(Authority: Section 12(c) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 709(c))

§ 363.6 What definitions apply?

The following definitions apply to this part:

(a) Definitions in 34 CFR part 361.

(b) Definitions in 34 CFR part 77.

(c) Definitions in 2 CFR part 200, subpart A.

(Authority: Sections 7 and 12(c) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 705 and 709(c))

Subpart B—How Does a State Apply for a Grant?

§ 363.10 What documents must a State submit to receive a grant?

(a) To be eligible to receive a grant under this part, a State must submit to the Secretary, as part of the vocational rehabilitation services portion of the Unified or Combined State Plan under 34 CFR part 361, a State plan supplement that meets the requirements of § 363.11.

(b) A State must submit revisions to the vocational rehabilitation services portion of the Unified or Combined State Plan supplement submitted under this part as may be necessary.

(Approved by the Office of Management and Budget under control number 1205–0522)

(Authority: Section 606(a) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 795k(a))

§ 363.11 What are the vocational rehabilitation services portion of the Unified or Combined State Plan supplement requirements?

Each State plan supplement, submitted in accordance with § 363.10, must—

(a) Designate a designated State unit or, as applicable, units, as defined in 34 CFR 361.5(c)(13), as the State agency or agencies to administer the Supported Employment program under this part;

(b) Summarize the results of the needs assessment of individuals with most significant disabilities, including youth with the most significant disabilities, conducted under 34 CFR 361.29(a), with respect to the rehabilitation and career needs of individuals with most significant disabilities and their need for supported employment services. The results of the needs assessment must also address needs relating to coordination;

(c) Describe the quality, scope, and extent of supported employment services to be provided to eligible individuals with the most significant disabilities under this part, including youth with the most significant disabilities;

(d) Describe the State's goals and plans with respect to the distribution of funds received under § 363.20;

(e) Demonstrate evidence of the designated State unit's efforts to identify and make arrangements, including entering into cooperative agreements, with—

(1) Other State agencies and other appropriate entities to assist in the provision of supported employment services; and

(2) Other public or non-profit agencies or organizations within the State, employers, natural supports, and other entities with respect to the provision of extended services;

(f) Describe the activities to be conducted for youth with the most significant disabilities with the funds reserved in accordance with § 363.22, including—

(1) The provision of extended services to youth with the most significant disabilities for a period not to exceed

four years, in accordance with § 363.4(a)(2); and

(2) How the State will use supported employment funds reserved under § 363.22 to leverage other public and private funds to increase resources for extended services and expand supported employment opportunities for youth with the most significant disabilities;

(g) Assure that—

(1) Funds made available under this part will only be used to provide authorized supported employment services to individuals who are eligible under this part to receive such services;

(2) The comprehensive assessments of individuals with significant disabilities, including youth with the most significant disabilities, conducted under 34 CFR part 361 will include consideration of supported employment as an appropriate employment outcome;

(3) An individualized plan for employment, as described in 34 CFR 361.45 and 361.46, will be developed and updated, using funds received under 34 CFR part 361, in order to—

(i) Specify the supported employment services to be provided, including, as appropriate, transition services and pre-employment transition services to be provided for youth with the most significant disabilities;

(ii) Specify the expected extended services needed, including the extended services that may be provided under this part to youth with the most significant disabilities in accordance with an approved individualized plan for employment for a period not to exceed four years; and

(iii) Identify, as appropriate, the source of extended services, which may include natural supports, programs, or other entities, or an indication that it is not possible to identify the source of extended services at the time the individualized plan for employment is developed;

(4) The State will use funds provided under this part only to supplement, and not supplant, the funds received under 34 CFR part 361, in providing supported employment services specified in the individualized plan for employment;

(5) Services provided under an individualized plan for employment will be coordinated with services provided under other individualized plans established under other Federal or State programs;

(6) To the extent job skills training is provided, the training will be provided onsite;

(7) Supported employment services will include placement in an integrated setting based on the unique strengths, resources, interests, concerns, abilities, and capabilities of individuals with the most significant disabilities, including youth with the most significant disabilities;

(8) The designated State agency or agencies, as described in paragraph (a) of this section, will expend no more than 2.5 percent of the State's allotment under this part for administrative costs of carrying out this program; and

(9) The designated State agency or agencies will provide, directly or indirectly through public or private entities, non-Federal contributions in an amount that is not less than 10 percent of the costs of carrying out supported employment services provided to youth with the most significant disabilities with the funds reserved for such purpose under § 363.22; and

(h) Contain any other information and be submitted in the form and in accordance with the procedures that the Secretary may require.

(Approved by the Office of Management and Budget under control number 1205–0522)

(Authority: Section 606 of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 795k)

Subpart C—How Are State Supported Employment Services Programs Financed?

§ 363.20 How does the Secretary allot funds?

(a) *States.* The Secretary will allot the sums appropriated for each fiscal year to carry out the activities of this part among the States on the basis of relative population of each State, except that—

(1) No State will receive less than $250,000, or $\frac{1}{fxspo;3}$ of 1 percent of the sums appropriated for the fiscal year for which the allotment is made, whichever amount is greater; and

(2) If the sums appropriated to carry out this part for the fiscal year exceed the sums appropriated to carry out this part (as in effect on September 30, 1992) in fiscal year 1992 by $1,000,000 or more, no State will receive less than $300,000, or $\frac{1}{fxspo;3}$ of 1 percent of the sums appropriated for the fiscal year for which the allotment is made, whichever amount is greater.

(b) *Certain Territories.* (1) For the purposes of this section, Guam, American Samoa, the United States Virgin Islands, and the Commonwealth of the Northern Mariana Islands are not considered to be States.

(2) Each jurisdiction described in paragraph (b)(1) of this section will be allotted not less than ⅛ of 1 percent of the amounts appropriated for the fiscal year for which the allotment is made.

(Authority: Section 603(a) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 795h(a))

§ 363.21 How does the Secretary reallot funds?

(a) Whenever the Secretary determines that any amount of an allotment to a State under § 363.20 for any fiscal year will not be expended by such State for carrying out the provisions of this part, the Secretary will make such amount available for carrying out the provisions of this part to one or more of the States that the Secretary determines will be able to use additional amounts during such year for carrying out such provisions.

(b) Any amount made available to a State for any fiscal year in accordance with paragraph (a) will be regarded as an increase in the State's allotment under this part for such year.

(Authority: Section 603(b) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 795h(b))

§ 363.22 How are funds reserved for youth with the most significant disabilities?

A State that receives an allotment under this part must reserve and expend 50 percent of such allotment for the provision of supported employment services, including extended services, to youth with the most significant disabilities in order to assist those youth in achieving an employment outcome in supported employment.

(Authority: Sections 12(c) and 603(d) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 709(c) and 795h(d))

§ 363.23 What are the matching requirements?

(a) *Non-Federal share.* (1) For funds allotted under § 363.20 and not reserved under § 363.22 for the provision of supported employment services to youth with the most significant disabilities, there is no non-Federal share requirement.

(2)(i) For funds allotted under § 363.20 and reserved under § 363.22 for the provision of supported employment services to youth with the most significant disabilities, a designated State agency must provide non-Federal expenditures in an amount that is not less than 10 percent of the total expenditures, including the Federal reserved funds and the non-Federal share, incurred for the provision of supported employment services to youth with the most significant disabilities, including extended services.

(ii) In the event that a designated State agency uses more than 50 percent of its allotment under this part to provide supported employment services to

youth with the most significant disabilities as required by § 363.22, there is no requirement that a designated State agency provide non-Federal expenditures to match the excess Federal funds spent for this purpose.

(3) Except as provided under paragraphs (b) and (c) of this section, non-Federal expenditures made under the vocational rehabilitation services portion of the Unified or Combined State Plan supplement to meet the non-Federal share requirement under this section must be consistent with the provision of 2 CFR 200.306.

(b) *Third-party in-kind contributions.* Third-party in-kind contributions, as described in 2 CFR 200.306(b), may not be used to meet the non-Federal share under this section.

(c)(1) *Contributions by private entities.* Expenditures made from contributions by private organizations, agencies, or individuals that are deposited into the sole account of the State agency, in accordance with State law may be used as part of the non-Federal share under this section, provided the expenditures under the vocational rehabilitation services portion of the Unified or Combined State Plan supplement, as described in § 363.11, do not benefit in any way the donor, an individual to whom the donor is related by blood or marriage or with whom the donor shares a financial interest.

(2) The Secretary does not consider a donor's receipt from the State unit of a contract or subaward with funds allotted under this part to be a benefit for the purpose of this paragraph if the contract or subaward is awarded under the State's regular competitive procedures.

(Authority: Sections 12(c) and 606(b)(7)(I) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 709(c) and 795k(b)(7)(I))

§ 363.24 What is program income and how may it be used?

(a) *Definition.* (1) *Program income* means gross income earned by the State that is directly generated by authorized activities supported under this part or earned as a result of the Federal award during the period of performance.

(2) Program income received through the transfer of Social Security Administration payments from the State Vocational Rehabilitation Services program, in accordance with 34 CFR 361.63(c)(2), will be treated as program income received under this part.

(b) *Use of program income.* (1) Program income must be used for the provision of services authorized under § 363.4. Program income earned or received during the fiscal year must be disbursed during the period of performance of the award, prior to requesting additional cash payments.

(2) States are authorized to treat program income as an addition to the grant funds to be used for additional allowable program expenditures, in accordance with 2 CFR 200.307(e)(2).

(3) Program income cannot be used to meet the non-Federal share requirement under § 363.23.

(Authority: Sections 12(c) and 108 of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 709(c) and 728)

§ 363.25 What is the period of availability of funds?

(a) Except as provided in paragraph (b) of this section, any Federal award funds, including reallotted funds, that are appropriated for a fiscal year to carry out a program under this part that are not obligated by the State by the beginning of the succeeding fiscal year, and any program income received during a fiscal year that is not obligated or expended by the State prior to the beginning of the succeeding fiscal year in which the program income was received, remain available for obligation by the State during that succeeding fiscal year.

(b) Federal funds appropriated for a fiscal year and reserved for the provision of supported employment services to youth with the most significant disabilities, in accordance with § 363.22 of this part, remain available for obligation in the succeeding fiscal year only to the extent that the State met the matching requirement, as described in § 363.23, for those Federal funds by obligating, in accordance with 34 CFR 76.707, the non-Federal share in the fiscal year for which the funds were appropriated. Any reserved funds carried over may only be obligated and expended in that succeeding Federal fiscal year for the provision of supported employment services to youth with the most significant disabilities.

(Authority: Sections 12(c) and 19 of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 709(c) and 716)

Subparts D–E—[Reserved]

Subpart F—What Post-Award Conditions Must Be Met by a State?

§ 363.50 What collaborative agreements must the State develop?

(a) A designated State unit must enter into one or more written collaborative agreements, memoranda of understanding, or other appropriate mechanisms with other public agencies, private nonprofit organizations, and other available funding sources, including employers and other natural supports, as appropriate, to assist with the provision of supported employment services and extended services to individuals with the most significant disabilities in the State, including youth with the most significant disabilities, to enable them to achieve an employment outcome of supported employment in competitive integrated employment.

(b) These agreements provide the mechanism for collaboration at the State level that is necessary to ensure the smooth transition from supported employment services to extended services, the transition of which is inherent to the definition of ''supported employment'' in § 363.1(b). The agreement may contain information regarding the—

(1) Supported employment services to be provided, for a period not to exceed 24 months, by the designated State unit with funds received under this part;

(2) Extended services to be provided to youth with the most significant disabilities, for a period not to exceed four years, by the designated State unit with the funds reserved under § 363.22 of this part;

(3) Extended services to be provided by other public agencies, private nonprofit organizations, or other sources, including employers and other natural supports, following the provision of authorized supported employment services, or extended services as appropriate for youth with the most significant disabilities, under this part; and

(4) Collaborative efforts that will be undertaken by all relevant entities to increase opportunities for competitive integrated employment in the State for individuals with the most significant disabilities, especially youth with the most significant disabilities.

(Authority: Sections 7(38), 7(39), 12(c), 602, and 606(b) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 705(38), 705(39), 709(c), 795g, and 795k(b))

§ 363.51 What are the allowable administrative costs?

(a) A State may use funds under this part to pay for expenditures incurred in the administration of activities carried out under this part, consistent with the definition of administrative costs in 34 CFR 361.5(c)(2).

(b) A designated State agency may not expend more than 2.5 percent of a State's allotment under this part for administrative costs for carrying out the State supported employment program.

(Authority: Sections 7(1), 12(c), and 603(c) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 705(1), 709(c), and 795h(c))

§ 363.52 What are the information collection and reporting requirements?

Each State agency designated in § 363.11(a) must collect and report separately the information required under 34 CFR 361.40 for—

(a) Eligible individuals receiving supported employment services under this part;

(b) Eligible individuals receiving supported employment services under 34 CFR part 361;

(c) Eligible youth receiving supported employment services and extended services under this part; and

(d) Eligible youth receiving supported employment services under 34 CFR part 361 and extended services.

(Authority: Sections 13 and 607 of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 710 and 795l)

§ 363.53 What requirements must a designated State unit meet for the transition of an individual to extended services?

(a) A designated State unit must provide for the transition of an individual with a most significant disability, including a youth with a most significant disability, to extended services, as defined in 34 CFR 361.5(c)(19), no later than 24 months after the individual enters supported employment, unless a longer period is established in the individualized plan for employment.

(b) Prior to assisting the individual in transitioning from supported employment services to extended services, the designated State unit must ensure—

(1) The counselor and individual have considered extending the provision of supported employment services beyond 24 months, as appropriate, and have determined that no further supported employment services are necessary to support and maintain the individual in supported employment before the individual transitions to extended services; and

(2) The source of extended services for the individual has been identified in order to ensure there will be no interruption of services. The providers of extended services may include—

(i) A State agency, a private nonprofit organization, employer, or any other appropriate resource, after an individual has made the transition from support from the designated State unit; or,

(ii) The designated State unit, in the case of a youth with a most significant disability, in accordance with requirements set forth in 34 CFR 361.5(c)(19) and this part for a period not to exceed four years, or at such time that a youth reaches the age of 25 and no longer meets the definition of a youth with a disability under 34 CFR 361.5(c)(58), whichever occurs first. For youth who still require extended services after they can no longer receive them from the designated State unit, the designated State unit must identify another source of extended services for those youth in order to ensure there will be no interruption of services. The designated State unit may not provide extended services to individuals with the most significant disabilities who are not youth with the most significant disabilities.

(Authority: Sections 7(13), 12(c), and 604(b) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 705(13), 709(c) and 795i)

§ 363.54 When will an individual be considered to have achieved an employment outcome in supported employment?

An individual with a most significant disability, including a youth with a most significant disability, who is employed in competitive integrated employment or who is employed in an integrated setting working on a short-term basis to achieve competitive integrated employment will be considered to have achieved an employment outcome, including customized employment, in supported employment when—

(a) The individual has completed supported employment services provided under this part and 34 CFR part 361, except for any other vocational rehabilitation services listed on the individualized plan for employment provided to individuals who are working on a short-term basis toward the achievement of competitive integrated employment in supported employment. An individual has completed supported employment services when—

(1) The individual has received up to 24 months of supported employment services; or

(2) The counselor and individual have determined that an extension of time to provide supported employment services beyond 24 months is necessary to support and maintain the individual in supported employment before the individual transitions to extended services and that extension of time has concluded; and

(b) The individual has transitioned to extended services provided by either the designated State unit for youth with the most significant disabilities, or another provider, consistent with the provisions of §§ 363.4(a)(2) and 363.22; and

(c) The individual has maintained employment and achieved stability in the work setting for at least 90 days after transitioning to extended services; and

(d) The employment is individualized and customized consistent with the strengths, abilities, interests, and informed choice of the individual.

(Authority: Sections 7(11), 7(13), 7(38), 7(39), 7(40), 12(c), 602, and 606(b) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 705(11), 705(13), 705(38), 705(39), 705(40), 709(c), 795g, and 795k(b))

§ 363.55 When will the service record of an individual who has achieved an employment outcome in supported employment be closed?

(a) The service record of an individual with a most significant disability, including a youth with a most significant disability, who has achieved an employment outcome in supported employment in competitive integrated employment will be closed concurrently with the achievement of the employment outcome in supported employment when the individual—

(1) Satisfies requirements for case closure, as set forth in 34 CFR 361.56; and

(2) Is not receiving extended services or any other vocational rehabilitation service provided by the designated State unit with funds under this part or 34 CFR part 361.

(b) The service record of an individual with a most significant disability, including a youth with a most significant disability who is working toward competitive integrated employment on a short-term basis and is receiving extended services from funds other than those allotted under this part and 34 CFR part 361 will be closed when the individual—

(1) Achieves competitive integrated employment within the short-term basis period established pursuant to § 363.1(c); and the individual—

(i) Satisfies requirements for case closure, as set forth in 34 CFR 361.56; and

(ii) Is no longer receiving vocational rehabilitation services provided by the designated State unit with funds under 34 CFR part 361; or

(2) Does not achieve competitive integrated employment within the short-term basis period established pursuant to § 363.1(c).

(c) The service record of a youth with a most significant disability who is receiving extended services provided by the designated State unit from funds under this part or 34 CFR part 361 will be closed when—

(1) The youth with a most significant disability achieves an employment

outcome in supported employment in competitive integrated employment without entering the short-term basis period; and

(i) Is no longer eligible to receive extended services provided by the designated State unit with funds allotted under this part and 34 CFR part 361 because the individual—

(A) No longer meets age requirements established in the definition of a youth with a disability pursuant to 34 CFR 361.5(c)(58); or

(B) Has received extended services for a period of four years; or

(C) Has transitioned to extended services provided with funds other than those allotted under this part or part 361 prior to meeting the age or time restrictions established under paragraphs (c)(1)(i)(A) and (B) of this section, respectively; and

(ii) Satisfies requirements for case closure, as set forth in 34 CFR 361.56; and

(iii) The individual is no longer receiving any other vocational rehabilitation service from the designated State unit provided with funds under 34 CFR part 361; or

(2) The youth with a most significant disability who is working toward competitive integrated employment on a short-term basis—

(i) Achieves competitive integrated employment within the short-term basis period established pursuant to § 363.1(c);

(ii) Is no longer eligible to receive extended services provided by the designated State unit with funds allotted under this part and 34 CFR part 361 because the individual—

(A) No longer meets age requirements established in the definition of a youth with a disability pursuant to 34 CFR 361.5(c)(58); or

(B) Has received extended services for a period of four years; or

(C) Has transitioned to extended services provided with funds other than those allotted under this part or 34 CFR part 361 prior to meeting the age or time restrictions established under paragraphs (c)(2)(ii)(A) and (B) of this section, respectively; and

(iii) Satisfies requirements for case closure, as set forth in 34 CFR 361.56; or

(3) The youth with a most significant disability working toward competitive integrated employment on a short-term basis does not achieve competitive integrated employment within the short-term basis period established pursuant to § 363.1(c).

(Authority: Sections 7(11), 7(13), 7(38), 7(39), 7(40), 7(42), 12(c), 602, and 606(b) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 705(11), 705(13), 705(38), 705(39), 705(40), 705(42), 709(c), 795g, and 795k(b))

§ 363.56 What notice requirements apply to this program?

Each grantee must advise applicants for or recipients of services under this part, or as appropriate, the parents, family members, guardians, advocates, or authorized representatives of those individuals, including youth with the most significant disabilities, of the availability and purposes of the Client Assistance Program, including information on seeking assistance from that program.

(Authority: Section 20 of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 717)

■ 6. Part 397 is added to read as follows:

PART 397—LIMITATIONS ON USE OF SUBMINIMUM WAGE

Subpart A—General Provisions

Sec.

397.1 Purpose.
397.2 What is the Department of Education's jurisdiction under this part?
397.3 What rules of construction apply to this part?
397.4 What regulations apply?
397.5 What definitions apply?

Subpart B—Coordinated Documentation Procedures Related to Youth with Disabilities

397.10 What documentation process must the designated State unit develop?

Subpart C—Designated State Unit Responsibilities Prior to Youth with Disabilities Starting Subminimum Wage Employment

397.20 What are the responsibilities of a designated State unit to youth with disabilities who are known to be seeking subminimum wage employment?

Subpart D—Local Educational Agency Responsibilities Prior to Youth with Disabilities Starting Subminimum Wage Employment

397.30 What are the responsibilities of a local educational agency to youth with disabilities who are known to be seeking subminimum wage employment?
397.31 What are the contracting limitations on educational agencies under this part?

Subpart E—Designated State Unit Responsibilities to Individuals with Disabilities During Subminimum Wage Employment

397.40 What are the responsibilities of a designated State unit for individuals with disabilities, regardless of age, who are employed at subminimum wage?

Subpart F—Review of Documentation

397.50 What is the role of the designated State unit in the review of documentation under this part?

Authority: Section 511 of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 794g, unless otherwise noted.

Subpart A—General Provisions

§ 397.1 Purpose.

(a) The purpose of this part is to set forth requirements the designated State units and State and local educational agencies must satisfy to ensure that individuals with disabilities, especially youth with disabilities, have a meaningful opportunity to prepare for, obtain, maintain, advance in, or regain competitive integrated employment, including supported or customized employment.

(b) This part requires—

(1) A designated State unit to provide youth with disabilities documentation demonstrating that they have completed certain requirements, as described in this part, prior to starting subminimum wage employment with entities (as defined in § 397.5(d)) holding special wage certificates under section 14(c) of the Fair Labor Standards Act of 1938 (29 U.S.C. 214(c));

(2) A designated State unit to provide, at certain prescribed intervals for the duration of such employment, career counseling and information and referral services, designed to promote opportunities for competitive integrated employment, to individuals with disabilities, regardless of age, who are known to be employed at subminimum wage; and

(3) A designated State unit, in consultation with the State educational agency, to develop a process or utilize an existing process, to document completion of required activities under this part by a youth with a disability known to be seeking employment at subminimum wage.

(c) This part authorizes a designated State unit, or a representative of a designated State unit, to review individual documentation required to be maintained by these entities under this part.

(d) The provisions in this part work in concert with requirements in 34 CFR parts 300, 361, and 363, and do not alter any requirements under those parts.

(Authority: Sections 12(c) and 511 of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 709(c) and 794g)

§ 397.2 What is the Department of Education's jurisdiction under this part?

(a) The Department of Education has jurisdiction under this part to implement guidelines for—

(1) Documentation requirements imposed on designated State units and local educational agencies, including the documentation process that the

designated State unit must develop in consultation with the State educational agency;

(2) Requirements related to the services that designated State units must provide to individuals regardless of age who are employed at subminimum wage; and

(3) Requirements under § 397.31.

(b) Nothing in this part will be construed to grant to the Department of Education, or its grantees, jurisdiction over requirements set forth in the Fair Labor Standards Act, including those imposed on entities holding special wage certificates under section 14(c) of that Act, which is administered by the Department of Labor.

(Authority: Sections 12(c), 511(b)(3), 511(c), and 511(d) of the Rehabilitation Act of 1973, as amended; 709(c), 794g(b)(3), 794g(c), and 794g(d))

§ 397.3 What rules of construction apply to this part?

Nothing in this part will be construed to—

(a) Change the purpose of the Rehabilitation Act, which is to empower individuals with disabilities to maximize opportunities for achieving competitive integrated employment;

(b) Promote subminimum wage employment as a vocational rehabilitation strategy or employment outcome, as defined in 34 CFR 361.5(c)(15); or

(c) Be inconsistent with the provisions of the Fair Labor Standards Act, as amended before or after July 22, 2014.

(Authority: Sections 12(c) and 511(b) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 709(c) and 794g(b))

§ 397.4 What regulations apply?

(a) The regulations in 34 CFR part 300 governing the definition of transition services, and the Individualized Education Program requirements related to the development of postsecondary goals and the transition services needed to assist the eligible child in reaching those goals (§§ 300.320(b), 300.321(b), 300.324(c), and 300.43).

(b) The regulations in 34 CFR part 361 governing the vocational rehabilitation program, especially those regarding protection and use of personal information in 34 CFR 361.38; eligibility determinations in 34 CFR 361.42; individualized plans for employment in 34 CFR 361.45 and 34 CFR 361.46; provision of vocational rehabilitation services, including pre-employment transition services, transition services, and supported employment services in 34 CFR 361.48; ineligibility determinations in 34 CFR 361.43; informed choice in 34 CFR 361.52; and case closures in 34 CFR 361.56.

(c) The regulations in 29 CFR part 525 governing the employment of individuals with disabilities at subminimum wage rates pursuant to a certificate issued by the Secretary of Labor.

(d) The regulations in this part 397.

(Authority: Sections 12(c), 102(a) and (b), 103(a), and 113 of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 709(c), 722(a) and (b), 723(a), and 733; sections 601(34) and 614(d)(1)(A)(i)(VIII) of the Individuals with Disabilities Education Act (20 U.S.C. 1401(34) and 1414(d)); and section 14(c) of the Fair Labor Standards Act (29 U.S.C. 214(c))

§ 397.5 What definitions apply?

(a) The following terms have the meanings given to them in 34 CFR 361.5(c):

(1) Act;

(2) Competitive integrated employment;

(3) Customized employment;

(4) Designated State unit;

(5) Extended services;

(6) Individual with a disability;

(7) Individual with a most significant disability;

(8) Individual's representative;

(9) Individualized plan for employment;

(10) Pre-employment transition services;

(11) Student with a disability;

(12) Supported employment;

(13) Vocational rehabilitation services; and

(14) Youth with a disability.

(b) The following terms have the meanings given to them in 34 CFR part 300:

(1) Local educational agency (§ 300.28);

(2) State educational agency (§ 300.41); and

(3) Transition services (§ 300.43).

(c) The following terms have the meanings given to them in 29 CFR 525.3 and section 6(a)(1) of the Fair Labor Standards Act (29 U.S.C. 206(a)(1)):

(1) *Federal minimum wage* has the meaning given to that term in section 6(a)(1) of the Fair Labor Standards Act (29 U.S.C. 206(a)(1)); and

(2) *Special wage certificate* means a certificate issued to an employer under section 14(c) of the Fair Labor Standards Act (29 U.S.C. 214(c)) and 29 CFR part 525 that authorizes payment of subminimum wages, wages less than the statutory minimum wage.

(d) *Entity* means an employer, or a contractor or subcontractor of that employer, that holds a special wage certificate described in section 14(c) of the Fair Labor Standards Act (29 U.S.C. 214(c)).

(Authority: Sections 7, 12(c), and 511(a) and (f) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 705, 709(c), and 794g(a) and (f); sections 601 and 614(d) of the Individuals with Disabilities Education Act, 20 U.S.C. 1401 and 1414(d); section 901 of the Elementary and Secondary Education Act of 1965, 20 U.S.C. 7801; and sections 6(a)(1) and 14(c) of the Fair Labor Standards Act, 29 U.S.C. 206(a)(1) and 29 U.S.C. 214(c))

Subpart B—Coordinated Documentation Procedures Related to Youth with Disabilities

§ 397.10 What documentation process must the designated State unit develop?

(a) The designated State unit, in consultation with the State educational agency, must develop a new process, or utilize an existing process, to document the completion of the actions described in § 397.20 and § 397.30 by a youth with a disability, as well as a process for the transmittal of that documentation from the educational agency to the designated State unit, consistent with confidentiality requirements of the Family Education Rights and Privacy Act (20 U.S.C. 1232g(b) and 34 CFR 99.30 and 99.31) and the Individuals with Disabilities Education Act (20 U.S.C. 1417(c) and 34 CFR 300.622).

(1) Such documentation must, at a minimum, contain the—

(i) Youth's name;

(ii) Determination made, including a summary of the reason for the determination, or description of the service or activity completed;

(iii) Name of the individual making the determination or the provider of the required service or activity;

(iv) Date determination made or required service or activity completed;

(v) Signature of the designated State unit or educational personnel making the determination or documenting completion of the required services or activity;

(vi) Date of signature described in paragraph (a)(1)(v) of this section;

(vii) Signature of designated State unit personnel transmitting documentation to the youth with a disability; and

(viii) Date and method (*e.g.,* hand-delivered, faxed, mailed, emailed, etc.) by which document was transmitted to the youth.

(2) In the event a youth with a disability or, as applicable, the youth's parent or guardian, refuses, through informed choice, to participate in the activities required by this part, such documentation must, at a minimum, contain the—

(i) Youth's name;

(ii) Description of the refusal and the reason for such refusal;

(iii) Signature of the youth or, as applicable, the youth's parent or guardian;

(iv) Signature of the designated State unit or educational personnel documenting the youth's refusal;

(v) Date of signatures; and

(vi) Date and method (*e.g.,* hand-delivered, faxed, mailed, emailed, etc.) by which documentation was transmitted to the youth.

(3) The documentation process must include procedures for the designated State unit to retain a copy of all documentation required by this part in a manner consistent with the designated State unit's case management system and the requirements of 2 CFR 200.333.

(b) The documentation process must ensure that—

(1) A designated State unit provides, in the case of a student with a disability, documentation of completion of appropriate pre-employment transition services, in accordance with § 361.48(a) of this chapter and as required by § 397.20(a)(1);

(2) In the case of a student with a disability, for actions described in § 397.30—

(i) The appropriate school official, responsible for the provision of transition services, must provide the designated State unit documentation of completion of appropriate transition services under the Individuals with Disabilities Education Act, including those provided under section 614(d)(1)(A)(i)(VIII) (20 U.S.C. 1414(d)(1)(A)(i)(VIII));

(ii) The designated State unit must provide documentation of completion of the transition services, as documented and provided by the appropriate school official in accordance with paragraph (b)(2) of this section, to the youth with a disability.

(c) The designated State unit must provide—

(1) Documentation required by this part in a form and manner consistent with this part and in an accessible format for the youth; and

(2)(i) Documentation required by paragraph (a)(1) of this section to a youth as soon as possible upon the completion of each of the required actions, but no later than—

(A) 45 calendar days after the determination or completion of the required activity or service; or

(B) 90 calendar days, if additional time is necessary due to extenuating circumstances, after the determination or completion of each of the required actions in § 397.20 and § 397.30(a). Extenuating circumstances should be interpreted narrowly to include circumstances such as the unexpected lengthy absence of the educational or designated State unit personnel necessary for the production of the documentation or the transmittal of that documentation due to illness or family emergency, or a natural disaster.

(ii) Documentation required by paragraph (a)(2) of this section, when a youth has refused to participate in an action required by this part, must be provided to the youth within 10 calendar days of the youth's refusal to participate.

(3) When transmitting documentation of the final determination or activity completed, as required by § 397.20 and § 397.30(a), the designated State unit must provide a coversheet that itemizes each of the documents that have been provided to the youth.

(Authority: Sections 12(c) and 511(d) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 709(c) and 794g(d))

Subpart C—Designated State Unit Responsibilities Prior to Youth With Disabilities Starting Subminimum Wage Employment

§ 397.20 What are the responsibilities of a designated State unit to youth with disabilities who are known to be seeking subminimum wage employment?

(a) A designated State unit must provide youth with disabilities documentation upon the completion of the following actions:

(1)(i) Pre-employment transition services that are available to a student with a disability under 34 CFR 361.48; or

(ii) Transition services under the Individuals with Disabilities Education Act (20 U.S.C. 1400 *et seq.*), such as transition services available to the individual under section 614(d) of that Act (20 U.S.C. 1414(d));

(2) Application for vocational rehabilitation services, in accordance with 34 CFR 361.41(b), with the result that the individual was determined—

(i) Ineligible for vocational rehabilitation services, in accordance with 34 CFR 361.43; or

(ii) Eligible for vocational rehabilitation services, in accordance with 34 CFR 361.42; and

(A) The youth with a disability had an approved individualized plan for employment, in accordance with 34 CFR 361.46;

(B) The youth with a disability was unable to achieve the employment outcome specified in the individualized plan for employment, as described in 34 CFR 361.5(c)(15) and 361.46, despite working toward the employment outcome with reasonable accommodations and appropriate supports and services, including supported employment services and customized employment services, for a reasonable period of time; and

(C) The youth with a disability's case record, which meets all of the requirements of 34 CFR 361.47, is closed.

(3)(i) Regardless of the determination made under paragraph (a)(2) of this section, the youth with a disability has received career counseling, and information and referrals from the designated State unit to Federal and State programs and other resources in the individual's geographic area that offer employment-related services and supports designed to enable the individual to explore, discover, experience, and attain competitive integrated employment.

(ii) The career counseling and information and referral services provided in accordance with paragraph (a)(3)(i) of this section must—

(A) Be provided by the designated State unit in a manner that facilitates informed choice and decision-making by the youth, or the youth's representative as appropriate;

(B) Not be for subminimum wage employment by an entity defined in § 397.5(d), and such employment-related services are not compensated at a subminimum wage and do not directly result in employment compensated at a subminimum wage provided by such an entity; and

(C) Be provided within 30 calendar days of a determination under paragraph (a)(2)(i) or (a)(2)(ii)(C) of this section for a youth known by the designated State unit to be seeking employment at subminimum wage.

(b) The following special requirements apply—

(1) For purposes of this part, all documentation provided by a designated State unit must satisfy the requirements for such documentation, as applicable, under 34 CFR part 361.

(2) The individualized plan for employment, required in paragraph (a)(2)(ii)(A) of this section, must include a specific employment goal consistent with competitive integrated employment, including supported or customized employment.

(3)(i) For purposes of paragraph (a)(2)(ii)(B) of this section, a determination as to what constitutes a ''reasonable period of time'' must be consistent with the disability-related and vocational needs of the individual, as well as the anticipated length of time required to complete the services identified in the individualized plan for employment.

(ii) For an individual whose specified employment goal is in supported employment, such reasonable period of time is up to 24 months, unless under special circumstances the individual and the rehabilitation counselor jointly agree to extend the time to achieve the employment outcome identified in the individualized plan for employment.

(Authority: Sections 7(5), 7(39), 12(c), 102(a) and (b), 103(a), 113, and 511(a) and (d) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 705(5), 705(39), 709(c), 722(a) and (b), 723(a), 733, and 794g(a) and (d))

Subpart D—Local Educational Agency Responsibilities Prior to Youth With Disabilities Starting Subminimum Wage Employment

§ 397.30 What are the responsibilities of a local educational agency to youth with disabilities who are known to be seeking subminimum wage employment?

(a) Of the documentation to demonstrate a youth with a disability's completion of the actions described in § 397.20(a), a local educational agency, as defined in § 397.5(b)(1), must provide the designated State unit with documentation that the youth has received transition services under the Individuals with Disabilities Education Act (20 U.S.C. 1400 *et seq.*), such as transition services available to the individual under section 614(d) of that Act (20 U.S.C. 1414(d)). The documentation must be provided to the designated State unit in a manner that complies with confidentiality requirements of the Family Education Rights and Privacy Act (20 U.S.C. 1232g(b) and 34 CFR 99.30 and 99.31) and the Individuals with Disabilities Education Act (20 U.S.C. 1417(c) and 34 CFR 300.622).

(b)(1) The documentation of completed services or activities required by paragraph (a) of this section must, at a minimum, contain the—

(i) Youth's name;

(ii) Description of the service or activity completed;

(iii) Name of the provider of the required service or activity;

(iv) Date required service or activity completed;

(v) Signature of educational personnel documenting completion of the required service or activity;

(vi) Date of signature described in paragraph (b)(1)(v) of this section; and

(vii) Signature of educational personnel transmitting documentation to the designated State unit; and

(viii) Date and method (*e.g.,* hand-delivered, faxed, mailed, emailed, etc.) by which document was transmitted to the designated State unit.

(2) In the event a youth with a disability or, as applicable, the youth's parent or guardian, refuses, through informed choice, to participate in the activities required by this part, such documentation must, at a minimum, contain the—

(i) Youth's name;

(ii) Description of the refusal and the reason for such refusal;

(iii) Signature of the youth or, as applicable, the youth's parent or guardian;

(iv) Signature of the educational personnel documenting the youth's refusal;

(v) Date of signatures required by paragraphs (b)(2)(iii) and (iv) of this section;

(vi) Signature of educational personnel transmitting documentation of the refusal to the designated State unit; and

(vii) Date and method (*e.g.,* hand-delivered, faxed, mailed, emailed, etc.) by which documentation was transmitted to the designated State unit.

(c)(1)(i) The educational personnel must transmit the documentation required by paragraph (b)(1) of this section to the designated State unit as soon as possible upon the completion of each of the required actions, but no later than—

(A) 30 calendar days after the completion of the required activity or service; or

(B) 60 calendar days, if additional time is necessary due to extenuating circumstances, after the completion of each of the required actions in paragraph (a) of this section. Extenuating circumstances should be interpreted narrowly to include the unexpected lengthy absence due to illness or family emergency of the educational personnel necessary to produce or transmit the documentation, or a natural disaster.

(ii) Documentation required by paragraph (b)(2) of this section, when a youth has refused to participate in an action required by this part, must be provided to the DSU within 5 calendar days of the youth's refusal to participate.

(2) When the educational personnel transmits the last documentation to the designated State unit regarding the services provided to the youth under paragraph (a) of this section, the educational personnel must provide a cover sheet that itemizes the documentation that has been provided to the designated State unit regarding that youth.

(d) The educational agency must retain a copy of all documentation provided to the designated State unit under this section in a manner consistent with the requirements of 2 CFR 200.333.

(Authority: Sections 12(c), 511(a)(2)(A), and 511(d) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 709(c), 794g(a)(2)(A), and (d))

§ 397.31 What are the contracting limitations on educational agencies under this part?

Neither a local educational agency, as defined in § 397.5(b)(1), nor a State educational agency, as defined in § 397.5(b)(2), may enter into a contract or other arrangement with an entity, as defined in § 397.5(d), for the purpose of operating a program for a youth under which work is compensated at a subminimum wage.

(Authority: Section 511(b)(2) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 794g(b)(2))

Subpart E—Designated State Unit Responsibilities to Individuals With Disabilities During Subminimum Wage Employment

§ 397.40 What are the responsibilities of a designated State unit for individuals with disabilities, regardless of age, who are employed at a subminimum wage?

(a) *Counseling and information services.* (1) A designated State unit must provide career counseling and information and referral services, as described in § 397.20(a)(3), to individuals with disabilities, regardless of age, or the individual's representative as appropriate, who are known by the designated State unit to be employed by an entity, as defined in § 397.5(d), at a subminimum wage level.

(2) A designated State unit may know of an individual with a disability described in this paragraph through the vocational rehabilitation process, self-referral, or by referral from the client assistance program, another agency, or an entity, as defined in § 397.5(d).

(3) The career counseling and information and referral services must be provided in a manner that—

(i) Is understandable to the individual with a disability; and

(ii) Facilitates independent decision-making and informed choice as the individual makes decisions regarding opportunities for competitive integrated employment and career advancement, particularly with respect to supported employment, including customized employment.

(4) The career counseling and information and referral services provided under this section may include benefits counseling, particularly with regard to the interplay between

earned income and income-based financial, medical, and other benefits.

(b) *Other services.* (1) Upon a referral by an entity, as defined in § 397.5(d), that has fewer than 15 employees, of an individual with a disability who is employed at a subminimum wage by that entity, a designated State unit must also inform the individual within 30 calendar days of the referral by the entity, of self-advocacy, self-determination, and peer mentoring training opportunities available in the community.

(2) The services described in paragraph (b)(1) of this section must not be provided by an *entity* as defined in § 397.5(d).

(c) *Required intervals.* (1) For individuals hired at subminimum wage on or after July 22, 2016, the services required by this section must be carried out once every six months for the first year of the individual's subminimum wage employment and annually thereafter for the duration of such employment.

(2) For individuals already employed at subminimum wage prior to July 22, 2016, the services required by this section must be carried out once by July 22, 2017, and annually thereafter for the duration of such employment.

(3)(i) With regard to the intervals required by paragraphs (c)(1) and (2) of this section for purposes of the designated State unit's responsibilities to provide certain services to individuals employed at subminimum wage, the applicable intervals will be calculated based upon the date the individual becomes known to the designated State unit.

(ii) An individual with a disability may become ''known'' to the designated State unit through self-identification by the individual with a disability, referral by a third-party (including an *entity* as defined in § 397.5(d)), through the individual's involvement with the vocational rehabilitation process, or any other method.

(d) *Documentation.* (1)(i) The designated State unit must provide documentation to the individual as soon as possible, but no later than—

(A) 45 calendar days after completion of the activities required under this section; or

(B) 90 calendar days, if additional time is necessary due to extenuating circumstances, after the completion of the required actions in this section. Extenuating circumstances should be interpreted narrowly to include circumstances such as the unexpected lengthy absence of the designated State unit personnel, due to illness or other family emergency, who is responsible for producing or transmitting the documentation to the individual with a disability, or a natural disaster.

(ii) Documentation required by paragraph (d)(3) of this section, when an individual has refused to participate in an activity required by this section, must be provided to the individual within 10 calendar days of the individual's refusal to participate.

(2) Such documentation must, at a minimum, contain the—

(i) Name of the individual;

(ii) Description of the service or activity completed;

(iii) Name of the provider of the required service or activity;

(iv) Date required service or activity completed;

(v) Signature of individual documenting completion of the required service or activity;

(vi) Date of signature described in paragraph (d)(2)(v) of this section;

(vii) Signature of designated State unit personnel (if different from that in paragraph (d)(2)(v) of this section) transmitting documentation to the individual with a disability; and

(viii) Date and method (*e.g.,* hand-delivered, faxed, mailed, emailed, etc.) by which document was transmitted to the individual.

(3) In the event an individual with a disability or, as applicable, the individual's representative, refuses, through informed choice, to participate in the activities required by this section, such documentation must, at a minimum, contain the—

(i) Name of the individual;

(ii) Description of the refusal and the reason for such refusal;

(iii) Signature of the individual or, as applicable, the individual's representative;

(iv) Signature of the designated State unit personnel documenting the individual's refusal;

(v) Date of signatures; and

(vi) Date and method (*e.g.,* hand-delivered, faxed, mailed, emailed, etc.) by which documentation was transmitted to the individual.

(4) The designated State unit must retain a copy of all documentation required by this part in a manner consistent with the designated State unit's case management system and the requirements of 2 CFR 200.333.

(e) *Provision of services.* Nothing in this section will be construed as requiring a designated State unit to provide the services required by this section directly. A designated State unit may contract with other entities, *i.e.,* other public and private service providers, as appropriate, to fulfill the requirements of this section. The contractor providing the services on behalf of the designated State unit may not be an entity holding a special wage certificate under section 14(c) of the Fair Labor Standards Act (29 U.S.C. 214(c)) as defined in 397.5(d).

(Authority: Sections 12(c) and 511(c) and (d) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 709(c) and 794g(c) and (d))

Subpart F—Review of Documentation

§ 397.50 What is the role of the designated State unit in the review of documentation under this part?

(a) The designated State unit, or a contractor working directly for the designated State unit, is authorized to engage in the review of individual documentation required under this part that is maintained by an *entity,* as defined in 397.5(d), under this part. The contractor referred in this section may not be an entity holding a special wage certificate under section 14(c) of the Fair Labor Standards Act (29 U.S.C. 214(c)).

(b) If deficiencies are noted during a documentation review conducted under paragraph (a) of this section, the designated State unit should report the deficiency to the U.S. Department of Labor's Wage and Hour Division.

(Authority: Sections 12(c) and 511(e)(2)(B) of the Rehabilitation Act of 1973, as amended; 29 U.S.C. 709(c) and 794g(e)(2)(B))

Workforce Innovation and Opportunity Act; Joint Rule for Unified and Combined State Plans, Performance Accountability, and the One-Stop System Joint Provisions; Final Rule

AGENCY: Office of Career, Technical, and Adult Education (OCTAE), Rehabilitation Services Administration (RSA), Education; Employment and Training Administration (ETA), Labor.

ACTION: Final rule.

SUMMARY: The Departments of Education (ED) and Labor (DOL) (or, collectively, Departments) issue this Joint Final Rule to implement jointly administered activities authorized by title I of the Workforce Innovation and Opportunity Act (WIOA) signed into law on July 22, 2014 (hereafter ''Joint WIOA Final Rule''). Through these regulations, the Departments implement workforce education and employment system reforms and strengthen the nation's public workforce development system to provide increased economic opportunity and make the United States more competitive in the 21st century evolving labor market. This Joint WIOA Final Rule provides guidance for State and local workforce development systems that increase the skill and credential attainment, employment, retention, and earnings of participants, especially those with significant barriers to employment, thereby improving the quality of the workforce, reducing dependency on public benefits, increasing economic opportunity, and enhancing the productivity and competitiveness of the nation.

DATES: This final rule is effective October 18, 2016.

SUPPLEMENTARY INFORMATION: This Joint WIOA Final Rule reflects changes made as a result of public comments received to the joint Notice of Proposed Rulemaking that was published on April 16, 2015, at 80 FR 20574.

WIOA strengthens the alignment of the public workforce development system's six core programs by compelling unified strategic planning requirements, common performance accountability measures, and requirements governing the one-stop delivery system. In so doing, WIOA placed heightened emphasis on coordination and collaboration at the Federal, State, local, and tribal levels to ensure a streamlined and coordinated service delivery system for job seekers, including those with disabilities, and employers. These regulations lay the foundation, through coordination and collaboration at the Federal level, for implementing the Departments' vision and goals of WIOA.

In addition to this Joint WIOA Final Rule, the Departments are issuing separate final rules to implement program-specific requirements of WIOA that fall under each Department's purview. The DOL is issuing a Final Rule governing program-specific requirements under titles I and III of WIOA (hereinafter ''DOL WIOA Final Rule''). The ED is issuing three final rules: One implementing program-specific requirements of the Adult Education and Family Literacy Act (AEFLA), as reauthorized by title II of WIOA; and two final rules implementing all program-specific requirements for programs authorized under the Rehabilitation Act of 1973, as amended by title IV of WIOA. The Department-specific final rules are published elsewhere in this issue of the **Federal Register**. Developing and issuing all five WIOA final rules collaboratively reinforces WIOA's heightened emphasis on coordination and collaboration to ensure an integrated and seamless service delivery system for job seekers and employers.

I. Executive Summary

Purpose of This Regulatory Action: President Barack Obama signed WIOA into law on July 22, 2014. WIOA is the first legislative reform of the public workforce system in more than 15 years, which passed Congress by a wide bipartisan majority. WIOA supersedes the Workforce Investment Act of 1998 (WIA) and amends the Wagner-Peyser Act and the Rehabilitation Act of 1973. WIOA strengthens and improves our nation's public workforce system and increases economic opportunities for individuals in the United States, especially youth and individuals with significant barriers to employment, to secure and advance in employment. WIOA reaffirms the role of the customer-focused one-stop delivery system, a cornerstone of the public workforce development system, and enhances and increases coordination among several key employment, education, and training programs.

WIOA supports innovative strategies to improve coordination among the six core programs and other Federal programs that support employment services, workforce development, adult education and literacy, and vocational rehabilitation (VR) activities.

In WIOA, Congress directed the Departments to issue regulations implementing statutory requirements to ensure that the public workforce system operates as a comprehensive, integrated, and streamlined system to provide pathways to prosperity and continuously improve the quality and performance of its services to job seekers and to employers. Therefore, the Departments are issuing this Joint WIOA Final Rule to implement jointly administered activities authorized under WIOA, specifically those related to the Unified and Combined State Plans, performance accountability, and the one-stop delivery system. In an effort to promote collaboration and coordination at the State and local levels among the core programs and other Federal partner programs, the Departments have collaborated extensively with the Department of Health and Human Services (HHS) and other Federal agencies in developing this Final Rule.

The Departments are publishing this Joint WIOA Final Rule to implement those provisions of WIOA that affect all of the six core programs, specifically the: Adult, dislocated worker, and youth programs authorized under title I and administered by DOL; AEFLA program authorized under title II and administered by ED; Employment Service program authorized under the Wagner-Peyser Act, as amended by title III, and administered by DOL (Wagner-Peyser Act Employment Service program); and VR program, authorized under title I of the Rehabilitation Act of 1973, as amended by title IV, and administered by ED. The requirements in these joint final regulations will be jointly administered by both Departments. The regulations contained in this Final Rule also impact other Federal programs that participate in the one-stop system and/or are identified as partner programs in a State's Combined State Plan if a State elects to submit such Plan rather than a Unified State Plan.

A critical part of the implementation of WIOA is the collection and reporting of accurate, timely information about individuals who receive services through the programs authorized under the law. Such information is critical to inform public policy and support analysis of effective strategies. In keeping with the Paperwork Reduction Act (PRA), the methods for collecting such information are provided to the public for comment through information collection requests (ICRs). The Joint WIOA Final Rule had two accompanying requests to support the performance and planning aspects of these rules. Soon after publication of the Notice of Proposed Rulemaking (NPRM) (80 FR 20574, April 16, 2015), the Departments published a notice in the **Federal Register** announcing the joint ICR for the WIOA Performance Management, Information, and Reporting System (80 FR 43474, July 22, 2015) and requested comments on this ICR during a 60-day public comment period (hereinafter ''WIOA Joint Performance ICR'') (see *https://www.regulations.gov/#!docketDetail;D=ETA-2015-0007*). On September 1, 2015, DOL solicited comments on its own WIOA performance accountability ICR to require the following programs to report on a standardized set of data elements through the WIOA Workforce Performance Accountability, Information, and Reporting System: WIOA adult, dislocated worker, and youth, Wagner-Peyser Act Employment Service, National Farmworker Jobs Programs (NFJP), Trade Adjustment Assistance, YouthBuild, Indian and Native American (INA) grantees, and the Jobs for Veterans' State Grants (80 FR 52798) (hereinafter ''DOL Performance ICR'') (see *https://www.regulations.gov/#!docketDetail;D=ETA-2015-0008*). On April 16, 2015, ED solicited comments on its ICR related to the VR program Case Service Report (RSA–911) to require VR agencies to report data required under sec. 101(a)(10) of the Rehabilitation Act, of 1973, as amended by WIOA, as well as performance accountability data under title I of WIOA (hereinafter ''RSA–911''). The Departments received 112 public comment submissions in response to the WIOA Joint Performance ICR, DOL received public comments on the DOL Performance ICR, and ED received public comments on the RSA–911 (respectively).

On August 6, 2015, the Departments, together with the Departments of Health and Human Services, Agriculture, and Housing and Urban Development (HUD), proposed a new information collection regarding required elements for submission of the Unified or Combined State Plan and Plan modifications under WIOA (hereinafter ''State Plan ICR'') (80 FR 47003) (see *https://www.regulations.gov/#!docketDetail;D=ETA-2015-0006*). The State Plan ICR received a total of 16 public comments. These public comment submissions informed the development of the final State Plan ICR, which the Office of Management and Budget (OMB) approved on February 19, 2016. Most provisions in titles I through III of WIOA took effect on July 1, 2015, the first full program year after enactment; however, the new State Plans and performance accountability system requirements in the statute will take effect on July 1, 2016. Title IV took effect upon enactment unless otherwise indicated.

Section V. Rulemaking Analysis and Notices, D. Paperwork Reduction Act provides summary information about the public comments on the Joint Performance ICR and the State Plan ICR.

In addition to this Joint WIOA Final Rule, the Departments are publishing, in separate regulatory actions published in the **Federal Register**, four agency-specific final rules that implement the provisions of WIOA that are administered separately by the Departments—one published by DOL implementing the agency-specific provisions of title I, and three published by ED implementing the agency-specific provisions of titles II and IV. Readers should note that there are a number of cross-references in this Joint WIOA Final Rule to the agency-specific final rules. Finally, the Departments structured this Joint WIOA Final Rule so that the Code of Federal Regulations (CFR) parts will align with the CFR parts in the agency-specific final rules.

To implement those provisions of WIOA that affect the WIOA programs and which will be jointly administered by both Departments, these regulations implement a number of improvements that WIOA makes to the public workforce system. These include improvements to:

- Ensure that workforce education and employment services are coordinated and complementary by requiring a single, 4-year strategic State Plan for achieving the workforce goals of the State. Additionally, States may conduct, along with the core programs, collaborative planning with other Federal education and training programs specified in WIOA;
- Ensure that Federal investments in education, employment, and training are evidence-based, data-driven, and accountable to participants and taxpayers by establishing a common performance accountability system for the core programs, requiring other authorized programs to report on the common performance indicators, and providing easy-to-understand information to consumers and the public about training providers and

program performance to help inform their decision-making; and

• Enhance services provided to all job seekers and employers through the one-stop delivery system, also known as the American Job Center system, by: Requiring the colocation of the Wagner-Peyser Act Employment Service program; adding the Temporary Assistance for Needy Families (TANF) program as a required partner; providing for State-established certification to ensure high-quality American Job Centers; requiring partners to dedicate funding for allowable infrastructure and other shared costs that are commensurate to the partner's proportionate use and relative benefit received by the program; and promoting the development of integrated intake, case management, and reporting systems.

Changes From the Notice of Proposed Rulemaking

The Departments published a Joint WIOA NPRM on April 16, 2015 at 80 FR 20574. The Final Rule supports the tenets expressed in the NPRM. In response to comments received and to strengthen the intent of the law, the Departments have made numerous revisions, including but not limited to changes to the following areas:

• *State Plans:* The Joint WIOA Final Rule text, among other things: (1) Clarifies the expected involvement of stakeholders, core programs, and the State Workforce Development Boards (WDBs) in the State Plan development; (2) ensures consistency by requiring a description of joint planning and coordination across core programs, required one-stop partners, and other programs and activities included in the Unified and Combined State Plans; (3) requires States to provide an opportunity for public comment on and input into the development of Unified and Combined State Plans prior to their submission, and (4) clarifies requirements for Unified and Combined State Plan modifications. The preamble responds to suggestions regarding certain Unified and Combined State Plan requirements, as well as provides further guidance and clarifications with regard to certain regulatory requirements governing the Unified and Combined State Plans.

• *Performance Accountability:* The Joint WIOA Final Rule clarifies certain definitions, primary indicators of performance, and sanctions. Changes in the Final Rule text include, among others: (1) Revising the definitions of ''participant,'' ''exit,'' and ''State;'' (2) clarifying the credential attainment rate indicator; (3) adding the types of gain that are included in the measurable skill gains indicator; (4) clarifying the difference between the ''adjusted level of performance'' that is agreed upon at the time the Unified or Combined State Plan is approved and the ''adjusted level of performance'' that is determined at the end of the program year; and (5) adding a phased-in approach for sanctions due to failure to achieve adjusted levels of performance and a transition period for complete WIOA data to be available. The preamble explains intent to phase in implementation of the ''effectiveness in serving employers'' indicator and to implement a uniform, national customer satisfaction survey that is not tied to accountability provisions or the determination of sanctions. The preamble also provides further guidance and clarification regarding changes made to the Final Rule text, including the inclusion of outlying areas (American Samoa, Guam, Commonwealth of the Northern Mariana Islands, the U.S. Virgin Islands, and, as applicable, the Republic of Palau) for purposes of the performance accountability system.

• *One-Stop Governance and Operations:* The Joint WIOA Final Rule includes changes to the operational aspects of one-stop operations including, among others: (1) Revising coverage of multiple program services and staff coverage in one-stop affiliate sites; (2) revising infrastructure funding regulations, and emphasizing partners' responsibilities towards infrastructure costs; (3) providing detailed information about career services; (4) clarifying the involvement of the TANF programs as one-stop partners; (5) simplifying provisions governing Memoranda of Understanding (MOU) negotiations; (6) emphasizing the need to conduct an open competition for one-stop operator selection; (7); changing the requirements related to hours of operation outside normal business hours; (8) emphasizing both physical and programmatic accessibility; (9) clarifying when the State funding mechanism is triggered for the funding of the one-stop system, including the funding limits applicable to the State funding mechanism; and (10) establishing a deadline to conform to the new common one-stop identifier.

As noted throughout this Final Rule, the Departments will be issuing guidance to help our regulated communities understand their rights and responsibilities under WIOA and these regulations. Consistent with the Administrative Procedure Act's exemption from its notice and comment requirement for general statements of policy, interpretations and procedural instructions, this guidance will provide interpretations of many of the terms and provisions of these regulations and more detailed procedural instructions that would not be appropriate to set out in regulations. The Departments will also be issuing guidance to provide information on current priorities and initiatives, suggested best practices, and in response to stakeholder questions.

The Departments also made a number of non-substantive changes to correct grammatical and typographical errors to improve the readability and conform the document stylistically that are not discussed in the analysis below.

III. Public Comments Received on the Notice of Proposed Rulemaking

The Departments published five NPRMs related to WIOA on April 16, 2015. The first NPRM is the Joint Rule for Unified and Combined State Plans, Performance Accountability, and the One-Stop System Joint Provisions (80 FR 20574) (hereinafter ''the Joint WIOA NPRM''); the second NPRM is the Workforce Innovation and Opportunity Act (80 FR 20690); the third NPRM is the Programs and Activities Authorized by the Adult Education and Family Literacy Act (Title II of the Workforce Innovation and Opportunity Act) (80 FR 20668); the fourth is the State Vocational Rehabilitation Services program; State Supported Employment Services program; Limitations on Use of Subminimum Wage (80 FR 21059); and the fifth is the Workforce Innovation and Opportunity Act, Miscellaneous Program Changes (80 FR 20688).

During the 60-day public comment period, the Departments received a total of 546 public comments on the Joint WIOA NPRM. In addition to these comments, the Departments also considered relevant public comments on the DOL and ED program-specific NPRMs.

General Comments

Comments: The Departments received many comments supporting these regulations. For example, the Departments received comments supporting cross-program data and performance measurement, the increased focus on adult education and services to immigrants, improved alignment between Federal initiatives and State and local needs, increased matching of apprenticeships with employers, as well as support for other provisions discussed in the section-by-section analysis below. Additionally, the Departments received comments commending the collaboration on joint regulations and encouraging additional coordinated guidance. Also, several commenters expressed support for the enactment of WIOA, noting the law will decrease unemployment, make the United States more competitive, lead to higher wages, and facilitate entry into the middle class.

A few commenters generally opposed the rulemaking, in part because they disagreed with the role WIOA assigns to the Federal government concerning covered programs. Others suggested that the NPRM itself was excessive, overly cumbersome, and not understandable to the layperson, needed clarification, and was inconsistent with the plain and simple language of WIOA.

Departments' Response: The Departments acknowledge these comments, but do not address them further in the Final Rule since they do not request specific changes to the regulatory text. However, the Departments note that the section-by-section analysis is drafted to provide additional clarity on complicated provisions, such as those related to the definitions used in the performance accountability regulations, requirements for the State funding mechanism for the one-stop system, and requirements for Unified and Combined State Plan modifications. Furthermore, revisions were made to various sections in the regulatory text to improve readability. Additionally, the Departments will continue to provide guidance and technical assistance, as needed, to assist States in implementing WIOA.

Accessibility of the Public Workforce System to Individuals With Disabilities

Comments: The Departments received many comments related to increased access to workforce services for individuals with disabilities, both in support of legislative changes and expressing concern that the regulations need to hold the public workforce system fully accountable to implement such changes. Several commenters noted that, under WIOA, individuals with disabilities will have greater access to workforce training programs and be able to take advantage of the benefits resulting from their training. However, one commenter asserted that the rule must do more to consider the unique needs of individuals with disabilities, who may take longer than others to achieve employment. Another commenter expressed concern that her organization would not have enough resources to provide pre-employment transition services to potentially eligible students with disabilities. A commenter encouraged efforts to improve the ability of the one-stop system to serve customers with disabilities through existing services and programs, and another urged the Departments to include specific requirements for training and access to text-to-speech and speech-to-text technologies for people with dyslexia and print disabilities.

Departments' Response: WIOA includes numerous provisions intended to increase employment opportunities for individuals with disabilities, and these regulations reinforce those statutory provisions. There are numerous discussions throughout part 678 reiterating the Departments' intent to ensure access to needed employment and training services to all individuals.

The Department has published a Final Rule to implement sec. 188 of WIOA, which prohibits discrimination against WIOA participants, by making technical changes only to its existing regulation implementing WIA (*i.e.,* (1) replicating at part 38 the rule from part 37, and (2) replacing references to the ''Workforce Investment Act of 1998'' or ''WIA'' with ''Workforce Innovation and Opportunity Act'' or ''WIOA'' to reflect the proper

statutory authority). *See* 80 FR 43,871 (July 23, 2015).

In addition, on January 26, 2016, DOL proposed updating these regulations to better align with the Americans with Disabilities Act Amendments Act of 2008, Public Law 110–325, sec. 2(b)(1), 122 Stat. 3553 (2008) and the relevant implementing regulations and guidance issued by the Department of Justice (28 CFR parts 35 and 36), as well as the final regulations and guidance issued by the Equal Employment Opportunity Commission (29 CFR part 1630, 76 FR 16978 (Mar. 25, 2011) (Equal Employment Opportunity Commission regulations implementing Americans with Disabilities Act title I)). *See* 81 FR 4493 (January 26, 2016). The proposed WIOA sec. 188 rule would ensure that the definition of ''disability'' is consistent with the Americans with Disabilities Act Amendments Act and current case law, which will enable more individuals with disabilities to be effectively served within the public workforce system. That NPRM also addresses accessibility requirements (such as those for information and electronic technologies) and service animals. The Departments encourage commenters to review carefully the provisions of part 678 in this Joint WIOA Final Rule, as well as the proposed WIOA sec. 188 rule.

With respect to the commenter's concerns about pre-employment transition services, the Departments acknowledge that the provision of these services is a new requirement imposed on the VR program under sec. 113 of the Rehabilitation Act of 1973, as amended by title IV of WIOA. States must reserve at least 15 percent of their VR allotment to provide these services to students with disabilities. The ED provides detailed discussions regarding this requirement in the VR program-specific final regulations published elsewhere in this issue of the **Federal Register**.

Requests To Extend the Comment Period

Comments: A few commenters requested a 60-day extension of the comment period. The commenters cited the size and complexity of the five proposed NPRMs implementing WIOA.

Departments' Response: While the Departments recognize that the issues addressed in the NPRM are complex and important, the Departments concluded that the 60-day comment period was sufficient to provide the public a meaningful opportunity to comment, and this conclusion is supported by the hundreds of complex and thoughtful comments received. Additionally, the NPRM was available to the public for a preliminary review on the **Federal Register** Web site upon submission of the NPRMs to the **Federal Register**, which was several weeks prior to publication, thereby providing stakeholders additional time prior to the publication date.

Conclusion

These final regulations provide the critical framework for the implementation of WIOA. However, achieving the goals of WIOA will take visionary leadership and coordination at the State, regional, and local levels, and partnerships across many programs. It will require investment and innovation to develop new information technology that supports this important work, and make the most of this investment of public funds. The Departments will support these activities through program funding, on-going technical assistance and the provision of guidance to all levels of the American Job Center system.

IV. Section-by-Section Discussion of Public Comments and the Final Joint Regulations

A. Unified and Combined State Plans Under Title I of the Workforce Innovation and Opportunity Act (20 CFR Part 676; 34 CFR Part 361, Subpart D; 34 CFR Part 463, Subpart H)

WIOA requires the Governor of each State to submit a Unified or Combined State Plan to the Secretary of Labor that outlines a 4-year strategy for the State's workforce development system. States must have approved State Plans in place to receive funding for the six core programs under WIOA—the adult, dislocated worker, and youth programs (WIOA title I); the AEFLA program (WIOA title II); the Employment Service program authorized under the Wagner-Peyser Act, as amended by WIOA title III (Wagner-Peyser Act Employment Service); and the VR program authorized under title I of the Rehabilitation Act of 1973, as amended by WIOA title IV (VR program). States must submit, at a minimum, a Unified State Plan, which encompasses the six core programs under WIOA. However, States are encouraged to submit a Combined State Plan, which must include the six core programs of the Unified State Plan, plus one or more Combined State Plan partner programs, as described at § 676.140(d): (1) Career and Technical Education (CTE) programs authorized under the Carl D. Perkins Career and Technical Education Act of 2006 (20 U.S.C. 2301 *et seq.*); (2) TANF, authorized under part A of title IV of the Social Security Act (42 U.S.C. 601 *et seq.*); (3) Employment and training programs authorized under sec. 6(d)(4) of the Food and Nutrition Act of 2008 (7 U.S.C. 2015(d)(4)); (4) Work programs authorized under sec. 6(o) of the Food and Nutrition Act of 2008 (7 U.S.C. 2015(o)); (5) Trade adjustment assistance activities under chapter 2 of title II of the Trade Act of 1974 (19 U.S.C. 2271 *et seq.*); (6) Services for veterans authorized under chapter 41 of title 38 United States Code; (7) Programs authorized under State unemployment compensation laws (in accordance with applicable Federal law); (8) Senior Community Service Employment Programs under title V of the Older Americans Act of 1965 (42 U.S.C. 3056 *et seq.*); (9) Employment and training activities carried out by HUD; (10) Employment and training activities carried out under the Community Services Block Grant Act (CSBG) (42 U.S.C. 9901 *et seq.*); and (11) Reintegration of offenders programs authorized under sec. 212 of the Second Chance Act of 2007 (42 U.S.C. 17532). When a State elects this option, the Combined State Plan will take the place of the Unified State Plan for that State. Coordination across multiple Federal programs provides a wider range of coordinated and streamlined services to the customer.

This part describes the submission process and content requirements for the Unified and Combined State Plans under WIOA. The major content areas of the Unified or Combined State Plan include strategic and operational planning elements. Strategic planning elements include State analyses of economic and workforce factors, an assessment of workforce development activities, formulation of the State's vision and goals for preparing an educated and skilled workforce that meets the needs of employers, and a strategy to achieve the vision and goals. Operational planning elements include State strategy implementation, State operating systems and policies, program-specific requirements, assurances, and additional requirements imposed by the Secretaries of Labor and Education, or other Secretaries, as appropriate.

State WDBs are responsible for the development, implementation, and modification of the plan, and for convening all relevant programs, partners, and stakeholders. The Governor must ensure that the Unified or Combined State Plan is developed in a transparent manner and in consultation with representatives of Local WDBs and chief elected officials (CEOs), businesses, representatives of labor organizations, community-based

organizations (CBOs), adult education providers, institutions of higher education, other stakeholders with an interest in the services provided by the six core programs, and any Combined plan partner program included in a Combined Plan, as well as the general public, including individuals with disabilities. Other stakeholders include, but are not limited to, youth education and workforce development providers, disability advocates and service entities, youth-serving programs, and other advocacy organizations relevant to the programs covered by the Unified or Combined State Plan.

As noted in the NPRM, the Departments have chosen not to include all of the specific planning elements in the regulation. Instead, comprehensive State Plan requirements for both Unified and Combined State Plans are detailed in the WIOA Unified and Combined State Plan and Plan Modifications ICR, entitled ''*Required Elements for Submission of the Unified or Combined State Plan and Plan Modifications under the Workforce Innovation and Opportunity Act*,'' under the OMB Collection Number 1205–0522 (hereafter ''WIOA State Plan ICR''). ICRs must be renewed every 3 years. In future years, the WIOA State Plan ICR may undergo revisions. Throughout this preamble, ''WIOA State Plan ICR'' refers to the WIOA State Plan ICR as published on February 19, 2016. The WIOA State Plan ICR went through two rounds of public comment before being finalized and future revisions will be subject to public comment as well, as required under the PRA. In addition, the Departments jointly have issued guidance explaining the mechanics of how a State must submit its State Plan, through TEGL No. 14–15, Policy Directive RSA–PD–16–03, and Program Memorandum 16–1, all entitled *Workforce Innovation and Opportunity Act (WIOA) Requirements for Unified and Combined State Plans*, which were issued in March 2016. States must use the WIOA State Plan ICR to develop and submit the WIOA Unified or Combined State Plan and in accordance with instructions described in the jointly issued State Plan guidance.

In the section-by-section discussions of each Unified and Combined State Plan provision below, the heading references the DOL CFR part and section number. However, ED has identical provisions at 34 CFR part 361, subpart D (under its State VR program regulations) and at 34 CFR part 463, subpart H (under a new CFR part for AEFLA regulations). For purposes of brevity, the section-by-section discussions for each Department's provisions appear only once—in conjunction with the DOL section number—and constitute the Departments' collective explanation and rationale for each provision. When the regulations are published in the CFR, these joint performance regulations will appear in each of the CFR parts identified above.

Section 676.100 What are the purposes of the Unified and Combined State Plans?

Section 676.100 describes the principal purposes of the Unified and Combined State Plans, which communicate the State's vision for the State public workforce system and serve as vehicles for developing, aligning, and integrating the State public workforce system across Federal programs. Section 676.100(b) explains how the strategies articulated in the plan support the State's vision and overarching goals. The goals of the 4-year Unified and Combined State Plans are to align and integrate Federal education, employment, and training programs; direct investments to ensure that training and services are meeting the needs of employers and job seekers; apply consistent job-driven training strategies across all relevant Federal programs; and engage economic, education, and workforce partners in improving the workforce development system. The Departments received a few comments on this section, none of which necessitated substantive changes to the regulatory text. Section 676.100, as discussed below, remains unchanged from the NPRM except for minor technical edits.

Comments: Several commenters supported the Departments' stated purpose of the Unified and Combined State Plans. A commenter said the regulation should require that State WDBs be provided with regular (*e.g.*, quarterly) program information and data, and at least annual analysis of the State's progress toward State Plan goals.

Departments' Response: The Departments considered these comments and concur that regular receipt and review of program information, data, and analysis will better enable effective decision-making by the State WDB. Section 677.160 of the joint performance regulations requires States to report data annually for all six core programs; however, some programs will report data quarterly, specifically the WIOA title I programs, the Wagner-Peyser Act Employment Service program, and the VR program, in accordance with part 677 of this Joint WIOA Final Rule. The State's quarterly and annual reports are publicly available, and State and Local WDBs are encouraged to review this information regularly. Therefore, the Departments have concluded that it is unnecessary to amend the final regulations to require that data be provided to the WDBs regularly as the commenter recommended.

Comments: A commenter requested confirmation that the references to ''relevant'' and ''job-driven'' education and training, in proposed § 676.100(b)(2) and (3), refer to ''evidence-based'' strategies identified in the Job-Driven Checklist (from Vice President Biden's report ''Ready to Work: Job-Driven Training and American Opportunity'' and the study of ''What Works in Job Training: A Synthesis of Evidence''). The commenter urged the Departments to provide clarification on how to, and encourage States to, use the joint State planning process to ensure that these evidence-based strategies are incorporated into their newly energized workforce development systems.

Departments' Response: The Departments agree that evidence- based strategies are important for the strategic planning required by this section. Paragraph (b)(2) of § 676.100 requires, as part of the description of the purpose of the Unified and Combined State Plans, that the plans direct investments to economic, education, and workforce training programs that focus on providing relevant education and training. Section 676.100(b)(3) further requires that plans apply strategies for job-driven training consistently across Federal programs. The references to ''relevant'' and ''job-driven'' education and training, in § 676.100(b)(2) and (3), include the ''evidence-based'' strategies identified in the Job-Driven Checklist from Vice President Biden's report ''Ready to Work: Job-Driven Training and American Opportunity'' and the study of ''What Works in Job Training: A Synthesis of Evidence.'' Through the issuance of joint Departmental guidance and instructions, the Departments offered further clarification and encouragement to States regarding how the joint planning process can ensure that evidence-based strategies are incorporated throughout the workforce development system, including the priorities of the job-driven checklist. No change to the regulatory text was made in response to this comment.

Section 676.105 What are the general requirements for the Unified State Plan?

Section 676.105 describes the general requirements for the Unified State Plan that apply to all six core programs. These requirements set the foundation

for WIOA implementation by fostering strategic alignment, improving service integration, and ensuring that the public workforce system is industry-relevant, responds to the economic needs of the State, and matches employers with skilled workers. The Departments envision a plan that describes how the State will develop and implement a unified, integrated workforce development system rather than a plan that discusses the State's approach to operating each core program individually.

Section 676.105(a) explains that Unified State Plans must be submitted in accordance with § 676.130 and sec. 102(c) of WIOA as explained in joint planning guidelines issued by the Secretaries of Labor and Education, with instructions to States on how to submit Unified State Plans.

Section 676.105(b) implements WIOA's statutory requirements in sec. 102(a), and requires that the State submit the Unified State Plan to the Secretary of Labor to receive funding for the workforce development system's six core programs. The Departments made an editorial change under § 676.105(b) to clarify that at a minimum States must satisfy the requirements of a Unified State Plan to be eligible to receive funding for the workforce development system's six core programs. However, if a State submits a Combined State Plan then it will, by including all the requirements of a Unified State Plan as mandated by the regulation, also satisfy the requirements of a Unified State Plan. WIOA sec. 103(b)(1) and § 676.140(e)(1) of this regulation state that a Combined State Plan must include all of the requirements of a Unified State Plan. Therefore, if a State submits a complete Combined State Plan, it also will satisfy all the requirements of a Unified State Plan.

Section 676.105(c) requires, in accordance with sec. 102(a) of WIOA, that the State outline its 4-year strategy for WIOA's core programs and meet the requirements of WIOA sec. 102(b). Paragraph (c) of § 676.105 remains unchanged from that proposed in the NPRM.

Section 676.105(d), which implements sec. 102(b) of WIOA, describes the strategic and operational planning elements that must be included in the Unified State Plan. The final regulation, consistent with that proposed in the NPRM, concerns major structural elements rather than enumerating all the statutory State planning requirements. States still must comply with each of the statutory requirements, regardless of whether they are repeated in regulation. In addition to minor technical edits throughout, the Departments made two substantive changes to § 676.105(d)(3). First, in § 676.105(d)(3)(iv), the Departments specifically mention the assurance that the lead State agencies responsible for administering the core programs reviewed and commented on the appropriate operational planning of the Unified State Plan and approved those elements as serving the needs of the individuals served by the programs. Second, the Departments added a new paragraph (d)(3)(v) that requires the Unified State Plan to include a description of the joint planning and coordination across the core programs and other required one-stop partners and other programs in the workforce development system. While these provisions are new in these final regulations, they do not represent new requirements on the States because each of these requirements are contained in sec. 102(b) of WIOA and were applicable to the States regardless of whether they were mentioned in the NPRM.

In these final regulations, the Departments have added § 676.105(e) to make clear that all of the requirements of part 676 (which implements the Unified or Combined State Plan requirements of secs. 102 and 103 of WIOA) apply to the outlying areas. As a result, the outlying areas must submit a Unified or Combined State Plan to receive funding for all of the core programs. This regulatory change is discussed at greater length below.

Outlying Areas

Comments: The Departments received several comments related to the applicability of Unified or Combined State Plan requirements to outlying areas. In the NPRM, the Departments sought comments specifically related to this issue and provided two options: Either (1) require outlying areas to submit Unified or Combined State Plans or (2) exempt outlying areas from the Unified or Combined State Plan requirement as a prerequisite for receiving funds for core programs. The commenters were unanimous in their support of explicitly requiring outlying areas to submit Unified or Combined State Plans as a prerequisite for receiving funding for all core programs. In so doing, these commenters said this approach would ensure consistency and a unified planning process, increase the relevance and validity of national program comparisons, and contribute to a fair and equitable distribution of funds. These commenters also noted that this approach would avoid the concern that outlying areas would submit Unified or Combined State Plans that include only the adult education and VR programs, since titles II and IV of WIOA require the submission of such plans as a prerequisite to receive funding.

While supporting the approach that would require outlying areas to submit a Unified or Combined State Plan as a prerequisite to receive funding for all core programs, one commenter expressed concern that ED permits outlying areas to receive adult education program funds under title II through the Consolidated Grant to Insular Areas application process (Consolidated Grant process). The commenter recommended that if ED continues to permit the award of adult education funds through the Consolidated Grant process, the Departments should require that outlying areas choosing to go through the Consolidated Grant process include title II activities as part of the planning process for the Unified or Combined State Plan, even though their funding is awarded through the Consolidated Grant.

Another commenter expressed concern that, if the outlying areas were not required to submit Unified or Combined State Plans for all core programs, a situation could exist in which the VR program would be the only component of such a plan if any of the outlying areas opted to include adult education program funds in its Consolidated Grant application process. The commenter suggested that, in such a situation, the Departments should ensure that outlying areas are not penalized and denied funding for the VR program, which is one of the six core programs under WIOA.

Other commenters expressed general support for requiring outlying areas to submit Unified or Combined State Plans, and one commenter noted that the inconsistency in the definitions of ''State'' and ''outlying areas'' in WIOA raised questions as to congressional intent on the issue of whether the Unified or Combined State Plan requirements should be applicable to the outlying areas. A commenter suggested, if the intent of differing definitions was to treat outlying areas differently than States, a more comprehensive delineation should be provided. In particular, the delineation should specify more than just a ''competitive process'' for the title I programs since outlying areas have historically received funding for these programs on a formula basis. The commenter suggested that the requirement for competitions is inconsistent with the need for a Unified or Combined State Plan because, under

a competition, funds would come into question every year. The commenter further suggested that if outlying areas are not going to be treated differently for purposes of the State planning requirements, a reconciliation of terms should be provided by Congress, thereby eliminating all ambiguity and restoring formula funding for the outlying areas through submission of a Unified or Combined State Plan.

Departments' Response: The Departments agree that applying the Unified or Combined State Plan requirements to the outlying areas is most consistent with the vision under WIOA for all six core programs to provide an integrated and coordinated workforce development system.

The Departments want to make clear that the State Plan requirements in WIOA secs. 102 and 103 apply to outlying areas, not just to States. To that end, the Departments have added clarifying language in § 676.105(e) of these final regulations. The Departments have concluded that requiring the outlying areas to submit Unified or Combined State Plans that incorporate all of the core programs as a prerequisite to receive funding under any of the core programs is most consistent with the plain meaning of WIOA's planning and allocation of funds requirements when both are read together. Further, it is the only interpretation that gives full meaning to the unified strategic planning required across all core programs.

In resolving the apparent inconsistency and potential for confusion regarding the definitions of ''State'' and ''outlying area,'' as it was explained in the NPRM preamble, the Final Rule relies on the Secretary of Labor's general authority to regulate at sec. 189 of WIOA, and applicable provisions of titles II and IV of WIOA. In so doing, the Departments ensure that all core programs—and all grantees under each of those programs—are treated similarly, thereby achieving the vision of WIOA as an integrated and coordinated one-stop delivery system and a unified, strategic planning process encompassing all core programs.

The Departments also agree with the commenter that the option, which has existed for ED, for outlying areas to include the adult education program as part of a Consolidated Grant application, raises some unique concerns with regard to the Unified or Combined State Plan requirements of WIOA. When an outlying area submits a Consolidated Grant application, pursuant to 48 U.S.C. 1469a, the application is submitted in lieu of any other State Plan required by any of the programs included in the Consolidated Grant application. The Departments have considered the suggestion made by the commenter; however, resolution of this particular concern goes beyond the scope of these joint regulations. The ED will take the recommendation under advisement and will address this issue more fully in its administration of the Consolidated Grant to Insular Areas.

The Departments recognize that this interpretation raises additional questions with regard to the competition provisions that apply to the title I core programs in WIOA sec. 127(b)(1)(B). The DOL will address this issue in guidance.

Joint Planning Guidelines

Comments: Proposed § 676.105(a) is, in the NPRM, the first mention of joint planning guidelines to be issued by the Secretaries of Labor and Education. A number of commenters questioned whether the joint guidelines would be subject to public comment, and a few commenters challenged whether, in issuing the joint guidelines, the Departments would be in compliance with the Administrative Procedures Act (APA).

Departments' Response: The Departments' joint planning guidelines, issued March 2016, complied with the APA. The APA does not require notice and comment for interpretative rules, general statements of policy, or rules of agency organization, procedure, or practice. *See* 5 U.S.C. 553(b)(A). The planning guidance falls under these exceptions, and thus, was not subject to notice and comment rulemaking. Specifically, the guidance includes procedural rules explaining the mechanics of how a State must submit its State Plan, as well as interpretive rules as needed to explain the applicable statutory and regulatory requirement.

Comments: One commenter supported the inclusion of adult education as a core program in the Unified State Plan in § 676.105(b)(2), as well as the requirement that those who administer adult education programs be represented on State and Local WDBs. Multiple commenters asserted that any grant programs under the jurisdiction of DOL ETA and operated through the State Workforce Agency (SWA) or the one-stop delivery system should be required to be part of the State's Unified or Combined plan. As an example, the commenters said there should not be a separate planning process for the Jobs for Veterans' State Grant (JVSG) or Foreign Labor Certification. Another commenter said non-WIOA core program partners should be allowed to participate in the strategic portion of the planning process, even if they cannot fully align their program budgets and operational plans with a 2- or 4-year operational plan.

Departments' Response: The Departments acknowledge the commenter's support for inclusion of those who administer adult education programs on the State and Local WDBs in the regulation as proposed. State and Local WDB requirements, and related comments, are discussed in sections of the DOL WIOA Final Rule preamble, which is published elsewhere in this issue of the **Federal Register** (*see* 20 CFR 679.110(b)(3)(iii)(A) and 679.320(d)).

Regarding comments in support of including additional programs in the Unified State Plan, sec. 102(a) of WIOA and § 676.105(b) make clear that only the core programs (as defined in sec. 3(12) and (13) of WIOA) are to be included in such plan. Paragraph (b) of § 676.105 is consistent with the six core programs identified throughout WIOA. States may submit a Combined State Plan that could include the programs mentioned by commenters. If a State chooses to submit a Combined State Plan, the plan must include the six core programs and one or more of the Combined State Plan partner programs and activities described in sec. 103(a)(2) of WIOA, and § 676.140(d). The JVSG is a Combined State Plan partner program which States may include in a Combined State Plan as described under WIOA sec. 103 and § 676.140(d). Foreign Labor Certification is not a Combined Plan partner program under WIOA sec. 103; however, a State may include a description of Foreign Labor Certification in its State Plan among its description of other programs and activities.

Regarding the inclusion of non-WIOA core program partners in the strategic portion of the planning process, WIOA sec. 102(b)(2) requires State Plans to discuss alignment *among* core programs and the employment and training services within education and human services programs which operate in partnership with the one-stop delivery system, including those not authorized by WIOA. Although not described in the regulation for State Plans, this requirement is reflected in the WIOA State Plan ICR. The Departments agree that coordination with program partners and stakeholders to the fullest extent possible is vital for successful joint planning. In addition to the changes made to § 676.105(d)(3) as described above and relevant to these comments, the Departments revised § 676.140 regarding Combined State Plans, which

will be discussed in more detail below in connection with that section. Further comments regarding the importance of public comment, review, input and coordination in development of the plan are discussed in this preamble in § 676.130(c) and (d)(1) for Unified State Plans and under §§ 676.140(e)(4) and 676.143(b) and (c) for Combined State Plans.

Comments: A couple of commenters responded to the authority granted to the Secretaries by WIOA sec. 102(b)(2) to create additional operational planning requirements beyond those already detailed in statutory language. These commenters requested that the Secretaries, in their discretion, keep to a minimum any additional planning requirements to reduce the burden placed on States and to provide States with ample opportunity to comply with statutorily established planning elements.

Departments' Response: The Departments have considered these comments and agree. WIOA contains a detailed description of planning requirements, and the Departments have chosen not to include all of the specific planning elements in the regulation. However, as made clear in the NPRM and this preamble, States must comply with all State planning requirements set forth in WIOA regardless of whether the requirements are repeated in these regulations. Comprehensive State Plan requirements for both Unified and Combined State Plans are detailed through the WIOA State Plan ICR. The Departments have endeavored to keep additional planning requirements to a minimum, while also attempting to ensure that the WIOA reform principles of program integration and alignment, job-driven training, accountability and transparency are reflected in the State Plans.

Comments: The Departments received a number of comments that requested plan requirements be added. In response to these suggestions, described in more detail below, the Departments have made no change to the regulatory text but have indicated whether the particular suggested requirements are indeed already included in the applicable WIOA State Plan ICR, published on February 19, 2016. In future years, the WIOA State Plan ICR may undergo revisions. The level of detail of the plan requirements suggested by the following comments is more appropriately addressed in the WIOA State Plan ICR than in the regulatory text. The Departments have declined to incorporate the following suggested changes in the regulatory text, but the discussion of the following comments points to various provisions of the WIOA State Plan ICR and other places in the regulation that are pertinent to the commenters' concerns.

Some commenters asserted that the regulation should require that States address priority of service for covered veterans, and for those veterans with service connected and non-service-connected (condition not as a result of military service) disabilities.

Departments' Response: The Departments have reviewed these comments. The WIOA State Plan ICR requires that States describe in their Unified or Combined State Plans how they will implement and monitor the priority of service provisions for all veterans in accordance with the requirements of 38 U.S.C. 4215. This provision applies to all employment and training programs funded in whole or in part by DOL. In addition, the WIOA State Plan ICR requires States to explain the referral process for veterans determined to have a significant barrier to employment, including certain disabled veterans, to receive services from the JVSG program.

Comments: One commenter said the Departments should unify the definition of ''supportive services'' across programs, thereby aligning adult education and literacy activities with other core programs and with one-stop partners. The commenter noted the disparity between the definition of ''supportive services'' under sec. 3(59) of WIOA and the definition of ''other services'' under career pathways programs. The commenter concluded that the quality and type of wraparound services offered should not be dependent on the program in which individuals participate, and the Departments should encourage States to develop comprehensive wraparound services that are available to adults, youth, dislocated workers, and adult education students whenever possible.

Departments' Response: WIOA sec. 3(59) provides a definition of ''supportive services;'' this definition applies to, and remains consistent across, all core programs. The WIOA State Plan ICR, which implements the statutory and regulatory requirements for Unified and Combined State Plans, requires States to describe how the entities carrying out the programs involved in the Unified or Combined State Plan including the core programs, any applicable Combined State Plan partner programs, and any mandatory and optional one-stop partner programs, will coordinate activities and resources to provide comprehensive, high-quality, customer-centered services. This requirement includes the provision of supportive services. However, the determination of need for, and the extent to which there is a need for, supportive services is within the State WDB's discretion, consistent with each of the individual program's authorizing statutes.

Comments: One commenter, in response to § 676.105(d)(1), said the Departments should ensure that consistent data definitions and comparable data are used to assess respective labor market areas.

Departments' Response: The WIOA State Plan ICR emphasizes the use of economic analysis and labor market information throughout and also addresses alignment of labor market information systems. The Departments encourage States to use a variety of accurate, reliable, and timely labor market information on which to base analyses in the State Plan. However, consistent with WIOA, the Departments will not require States to use a particular dataset and will leave the choice of data sources to the States' discretion, thereby allowing each State to meet its own unique needs and circumstances.

Addressing the Needs of Individuals With Barriers to Employment

Comments: A commenter suggested that the Departments require States to provide additional information regarding how they will address the needs of people with disabilities. Another commenter stated that WIOA requires that State and local planning efforts be informed by an analysis of various data, including data that include the education and skill levels of individuals with barriers to employment. A commenter said it would be helpful if the Departments explicitly required that States determine the number of individuals employed under 14(c) special wage certificates as part of the ''analysis of the current workforce, employment and unemployment data, labor market trends, and the educational and skill levels of the workforce, including individuals with barriers to employment (including individuals with disabilities), in the State'' pursuant to WIOA sec. 102(b)(1)(B). This commenter also stated that the strategic planning elements obligate the State to examine the specific employment related characteristics in their State and that this would be a valuable opportunity to gather information on employment statistics for individuals with disabilities.

Departments' Response: Consistent with WIOA and these final regulations, multiple sections of the WIOA State

Plan ICR require the State to address the needs of individuals with barriers to employment. The term ''individual with a barrier to employment,'' as defined in sec. 3(24) of WIOA, encompasses the following groups of people: Individuals with disabilities, including youth with disabilities; displaced homemakers; low-income individuals; Indians, Alaska Natives, and Native Hawaiians; older individuals; ex-offenders; homeless individuals, or homeless children and youths; youth who are in or have aged out of the foster care system; individuals who are English language learners, individuals who have low levels of literacy, and individuals facing substantial cultural barriers; farmworkers (as defined at sec. 167(i) of WIOA and Training and Employment Guidance Letter No. 35–14); individuals within 2 years of exhausting lifetime eligibility under the TANF program; single parents (including single pregnant women); and long-term unemployed individuals. Therefore, States are required to address the needs of individuals with disabilities in the Unified or Combined State Plan.

Consistent with sec. 102(b)(1)(B) of WIOA and these final regulations, the WIOA State Plan ICR requires that State analysis related to individuals with barriers to employment include employment and unemployment, labor market trends, education, and skill levels of the workforce and any apparent gaps between the skills in demand by employers and the skill levels of the workforce. State and local planning efforts are informed by this analysis. Based on this analysis of workforce and labor market information required under sec. 102(b)(1)(B) of WIOA, § 676.105(d) and the WIOA State Plan ICR require State Plans to describe State's strategic vision and goals for developing its workforce and meeting employer needs in order to support economic growth and economic self-sufficiency. To that end, the State must describe its goals for preparing an educated and skilled workforce, including preparing youth and individuals with barriers to employment and other populations. Further, the WIOA State Plan ICR requires the State to assure that the State obtained input into the development of the Unified or Combined State Plan and provided an opportunity for comment on the plan by primary stakeholders, including organizations that provide services to individuals with barriers to employment and that the Unified or Combined State Plan is available and accessible to the general public.

Additionally, the Departments agree that the number of individuals employed under 14(c) special wage certificates may be helpful as part of the analysis by the State of workforce needs. However, the benefit of requiring the collection of sufficient data elements to satisfy the needs of every program must be balanced with the burden such a requirement would impose on State program operators and participants. For this reason, the Departments are not regulating such a requirement. While the collection of this data element will not be required of States, comparable data is publicly available. When an employer applies for a sec. 14(c) certificate from the Department of Labor's Wage and Hour Division, the employer is required to report on their application the number of workers with disabilities they employed at subminimum wages during their most recently completed fiscal year. The Department of Labor's Wage and Hour Division posts on its Web site (*http://www.dol.gov/whd/workerswithdisabilities/*) lists of all employers who hold sec. 14(c) certificates and certain data elements reported on their applications, including the number of workers with disabilities who were paid subminimum wages.

Finally, the Departments agree that the strategic planning elements requirements present a valuable opportunity to gather information on employment statistics for individuals with disabilities, so long as States are mindful of Federal and State law protecting personally identifiable information (PII).

Comments: A couple of commenters said States should be required to include the following information in their State Plans: (1) Explicit activities focused on how they will work to ensure ''low-level learners'' and hard-to-serve populations are served by the State Plan, and (2) a report on the diversity of programs funded and the actions taken to ensure broad participation at the local level. A commenter urged the Departments to encourage States and localities to build activities into their State Plans specifically directed at raising awareness about older workers and dispelling stereotypes. This same commenter also urged the Departments to encourage States to create plans that ensure engagement of all players to help employers connect with older workers.

Departments' Response: The Departments have reviewed these comments. As noted above, States must address in their Unified or Combined State Plans the needs of ''individuals with barriers to employment,'' as defined in sec. 3(24) of WIOA, in the State's workforce analysis, goals for the public workforce system and in the State's stakeholder input and public comment assurances. As described above, the term ''individual with a barrier to employment'' includes individuals who have low levels of literacy and older workers. However, the Governors and State WDBs will determine the explicit activities appropriate for their individual States. For this reason, the Departments are not requiring in these regulations specific activities to satisfy these requirements, though we acknowledge that some states may elect to do so. In developing their Unified or Combined State Plans, States must conduct a thorough analysis of labor market statistics, which will address the needs of specific populations. The Departments do not have authority under WIOA to require a report on the diversity of programs funded and the actions taken to ensure broad participation at the local level, as recommended by commenters.

Comments: A few commenters recommended that the Departments encourage WDBs to establish effective operational partnerships with Continuum of Care bodies and State councils focused on homelessness. A couple of commenters also suggested that the Departments encourage State Plans to include specific strategies for using employment to prevent and end homelessness. One commenter provided examples of specific strategies for using employment to prevent and end homelessness, including HUD support for public housing residents, individuals with housing vouchers, and housing and community development projects. Lastly, this same commenter urged the Departments to work with HUD and other national experts and initiatives to identify and promote promising examples of where and how homeless services systems and workforce systems are working together for the benefit of increasing employment and economic opportunity for job seekers.

Departments' Response: The Departments have reviewed these comments. The Departments encourage State and Local WDBs to partner with appropriate entities to address the needs and concerns of individuals who are homeless or at risk of homelessness, including Continuum of Care bodies, State councils focused on homelessness, and programs administered by HUD. These are appropriate strategies for a State Plan in States with significant issues related to individuals who are homeless or at-risk of homelessness. As noted above, in developing its Unified or Combined State Plan, the State must

address the needs of individuals with barriers to employment in the State's workforce analysis, goals for the public workforce system and in the State's stakeholder input and public comment assurances. An ''individual with a barrier to employment'' in WIOA sec. 3(24) includes homeless individuals. Because each State's needs and circumstances are unique, the Departments have not imposed the additional planning requirements suggested by commenters in these final regulations. The Departments agree with the commenter about the need for increased collaboration at the Federal level and, to that end, the Departments have collaborated with other Federal agencies, including HUD, in developing the WIOA State Plan ICR and will continue to do so to ensure full implementation of WIOA.

Comments: A few commenters stated that WIOA represents a substantial shift from the WIA because it increases the amount of title I youth funding dedicated to out-of-school youth to 75 percent (up from the prior 30 percent under WIA) and expands the age range to include those between 16 and 24 years old. The commenters said immigrants represent more than 1 in 10 youth in this age range nationwide. The commenters urged the Departments to explore ways to encourage States and Local WDBs to review their program design and recruitment strategies to ensure that they are reaching and effectively serving eligible immigrants and youth in their communities who are English language learners.

Departments' Response: Some guidance has already been released by DOL related to the change in the percentage of youth program (title I) formula dollars that must be spent on out-of-school youth, (see TEGL No. 23–14), and DOL plans to issue further guidance and technical assistance focused on strategies for complying with this requirement. The Departments agree that States should address their strategies for serving out-of-school youth in State Plans. The WIOA State Plan ICR requires States to describe the strategies the State will use to achieve improved outcomes for out-of-school youth as they are defined in WIOA sec. 129(a)(1)(B), including how it will leverage and align the core programs, any Combined State Plan partner programs included in this plan, required and optional one-stop partner programs, and any other resources available. In developing their Unified or Combined State Plans, States must address the needs of individuals with barriers to employment in their workforce analysis, goals for the public workforce system and in stakeholder input and public comment assurances. Under WIOA sec. 3(24), individuals with barriers to employment include youth with disabilities, homeless children and youths, youth who are in or have aged out of the foster care system, individuals who are English language learners, individuals who have low levels of literacy, and individuals facing substantial cultural barriers. In their Unified or Combined State Plan, States also must describe how the one-stop delivery system will ensure that each one-stop center is able to meet the needs of English language learners. The Departments encourage States with eligible immigrants and youth in their communities to revisit their program design and strategies to ensure that they are reaching and effectively serving these populations.

Comments: A couple of commenters recommended that the Departments require that State Plans provide for access for English language learners to all title I-funded services. If any title I-funded programs in a State or locality are not explicitly expected to provide access to English language learners, the commenters continued, the Departments should require that the State or locality demonstrate how it is complying with Federal anti-discrimination provisions and providing equitable access to title I services for English language learners.

Departments' Response: The Departments have reviewed these comments and agree that providing for the needs of English language learners through title I services, as well as other services, should be a component of all Unified and Combined State Plans. Sec. 102(b)(2)(C)(vii) of WIOA requires States to describe how the one-stop delivery system (including one-stop center operators and the one-stop delivery system partners) will comply with sec. 188 of WIOA. In addition, the WIOA State Plan ICR requires States to describe how the one-stop delivery system (including one-stop center operators and the one-stop delivery system partners) will ensure that each one-stop center is able to meet the needs of English language learners, such as through established procedures, staff training, resources, and other materials.

The Departments agree with the importance of ensuring that States address the needs of the specific populations mentioned by the commenters. As noted above, States must address, in developing their Unified or Combined State Plans, the needs of individuals with barriers to employment in their workforce analysis, goals for the public workforce system, and in stakeholder input and public comment assurances. It also should be noted that WIOA grant recipients are subject to all of the requirements of the sec. 188 WIOA Nondiscrimination and Equal Opportunity Regulations (29 CFR part 38).

Suggestions for State Plan Requirements

Section 676.105(d)(3)(i) through (v) lists the operational planning elements that must be included in a Unified or Combined State Plan. Section 676.105(d)(3)(ii) states that operational planning elements must include State operating systems, including data systems, and policies that will support the implementation of the State's strategy.

Comments: In response to these requirements, a commenter requested guidance on where to focus State efforts in technology planning. Specifically the commenter asked whether the State strategic plan can describe a schedule for developing a comprehensive technology plan and how States should prioritize investments in technology as funds become available. Another commenter requested guidance on the Departments' expectations regarding the States' development of a common intake system among one-stop partners.

Departments' Response: The Departments have considered these comments and agree that additional guidance regarding the operational planning elements contained in a State Plan is appropriate. The Departments plan to issue joint planning and operational guidance regarding the technology planning and data systems to be used for reporting and intake systems. Further, States are encouraged to utilize the Departments' available technical assistance.

Comments: A commenter recommended that the Departments require States to include and address the following five topics in their Unified State Plan: (1) Priority of Service, (2) Career Pathways, (3) Criteria for Selecting Employers for Work-based Training, (4) Youth Committees, and (5) Measurable Skill Gains. The commenter went on to detail how States should address each of the enumerated topics in the State Plans. Specifically, with regard to Priority of Service, the commenter recommended requiring that Unified State Plans include a description of how the Governor will ensure priority of service for title I adult career and training services for recipients of public assistance, individuals who are basic skills deficient, and other low-income individuals. Regarding career pathways, the commenter said Unified State Plans should be required to explain: How the

WIOA definition of a career pathway will be applied to the programs in their State that align with industries in the regional economy; how the State will make accessible secondary and postsecondary education; how the State will include individual education and career counseling services; how the State will include integrated education and training; how the State is organized for acceleration; how the State will make available high school equivalency and at least one postsecondary credential; and how the State will promote career advancement. The commenter also recommended that Unified State Plans be required to demonstrate how they will track career pathway participants whose service happens not within one particular Federal program and funding stream, but across these programs through co-enrollment. In addition, this same commenter urged the Departments to require States to list the criteria they will use for selecting employers as an operational element of the Unified State Plan, and to ensure that local plans in their State similarly describe the criteria they will use for selecting employers. Regarding youth committees, the commenter recommended that the Departments require States to explain in their State Plans the State-directed format for local areas youth committee elections. Lastly, to ensure the effective implementation of the measurable skill gains indicator, the commenter recommended that Unified State Plans be required to ensure that local plans include: (1) A process describing how they will use the measurable skill gains indicator based on their service delivery strategies across programs, and (2) a list of the measurable skill gains that they will be utilizing in the coming year.

Departments' Response: The Departments considered this comment but did not revise the regulatory text. Many of the concerns are already addressed by sec. 102 of WIOA, these regulations, and the WIOA State Plan ICR. The WIOA State Plan ICR, consistent with sec. 134(c)(3)(E) of WIOA, requires States to address, in developing their Unified or Combined State Plans, priority in the delivery of career and training services to individuals who are low income, public assistance recipients, or basic skills deficient. With regard to the commenter's concern about career pathways, the WIOA State Plan ICR, consistent with secs. 101(d)(3)(B) and 102(b)(2)(B)(ii) of WIOA, includes requirements for the State to describe both its sector and career pathways strategy. Further comments regarding career pathways are discussed in detail below. With regard to the commenter's concerns about work-based training, the WIOA State Plan ICR requires States to address work-based learning approaches as a part of adult, dislocated worker, and youth activities under title I–B of WIOA. However, the Departments decline to require a specific policy on employer criteria because the description of the State's approach will provide sufficient information to the Departments and stakeholders. Regarding youth committees, WIOA eliminates the requirement for Local WDBs to establish a youth council; however, the Local WDB may choose to establish a standing youth committee, as described at 20 CFR 681.110 (*see* DOL WIOA Final Rule). States with Local WDBs that have chosen to form standing youth committees may describe this as a part of the State's operational planning elements, which are required in the WIOA State Plan ICR. However, the Departments have declined to require that States address standing youth committees because the creation of standing youth committees is determined by Local WDBs and the appropriateness of including such committees in the State Plan will vary from State to State. The DOL has issued guidance on standing youth committees, in TEGL No. 23–14 and in TEGL No. 8–15. Lastly, measurable skill gains is a required performance indicator under WIOA and it is defined in part 677 of this Joint WIOA Final Rule. That part further defines the specific allowable skill gains. The Departments addressed the data collection necessary to sufficiently measure skill gains and identify other indicators in the WIOA Joint Performance ICR. The Departments also provided further guidance on this particular issue. Therefore, the Departments decline to revise the regulatory text in response to the concerns discussed above.

Comments: Some commenters said the Departments should require the States to include in their Unified or Combined State Plans a demonstration of how they will ensure that eligible providers have direct and equitable access to apply and compete for grants or contracts.

Departments' Response: In response to this concern, the Departments direct the commenters to the WIOA State Plan ICR, which requires States to describe, with regard to the distribution of funds for title II programs in particular, how the eligible agency will ensure direct and equitable access to all eligible providers to apply and compete for funds. This provision in the WIOA State Plan ICR is consistent with sec. 231(c) of WIOA requiring direct and equitable access for all eligible providers under title II. Further, the WIOA State Plan ICR requires States to describe how the eligible agency will ensure that it is using the same grant or contract announcement and application procedure for all eligible providers. The guidance sufficiently addresses the commenters' concerns; no changes to the regulatory text were made in response to these comments.

Comments: One commenter remarked that throughout the ''Career Services'' section of the law, there are references to the ''assistance'' provided by the one-stop center or its contractor as it relates to financial aid eligibility and filing for unemployment compensation. Due to the significant decline in resources, the commenter requested that State Plans address how statewide resources will be utilized to ensure local areas have enough staff to meet this demand, including how the State will allocate funding and merit staff.

Departments' Response: The Departments have considered this comment and concluded that adopting a requirement such as that would result in substantial burden to the States. The purpose of WIOA is best served if the States retain flexibility to determine the best use of staff resources to deliver workforce services in the State.

Industry and Sector Partnerships

Comments: Several commenters recommended that the Departments require States to describe in the Unified State Plan how they will carry out the requirements under WIOA sec. 101(d)(3)(D) relating to the development of industry or sector partnerships. One of these commenters made several recommendations with regard to industry or sector partnerships. First, require regional plans to clarify the relationship between regional sector initiatives and any industry or sector partnerships in the regional planning area. Second, establish a new subpart H covering Industry or Sector Partnerships that, at a minimum, (a) describes the purposes of industry or sector partnerships, (b) reiterates the required partners for an industry or sector partnership as set forth in WIOA, (c) clarifies the role of Local WDBs in industry and sector partnerships, (d) identifies the ways in which States and local areas can evaluate the effectiveness of industry or sector partnerships, and (e) eliminates the current references to industry or sector partnerships in proposed § 678.435, which generally describes the business services that must be provided through the one-stop delivery system.

Additionally, as noted in the portion of the DOL WIOA NPRM preamble addressing 20 CFR 675.300, commenters recommended that the Departments define the terms ''Industry and Sector Partnership'' and ''Sector Strategy'' and suggested specific components to include in such definitions.

Departments' Response: The WIOA State Plan ICR requires States to describe the strategies they will implement, including industry or sector partnerships related to in-demand industry sectors and occupations and career pathways, as required by WIOA sec. 101(d)(3)(B) and (D). It also requires States to address industry sectors and occupations throughout the analyses required in the State Plan. Additionally, WIOA sec. 3(26) defines ''industry or sector partnership.'' Due to the changing needs of the workforce and employers, and in order to maximize States' flexibility to develop strategies to address these changing needs, the Departments decline to change the regulation to be more prescriptive through changing the definition of ''industry or sector partnership,'' defining the term ''sector strategy,'' or adding a new subpart H on industry or sector partnerships. The Departments have provided technical assistance on sector strategies and plan to continue to do so while also issuing further guidance on industry and sector partnerships. Lastly, regional planning requirements are addressed in 20 CFR 679.510 (*see* DOL WIOA Final Rule published elsewhere in this issue of the **Federal Register**).

Comments: One commenter recommended that special emphasis be placed upon highlighting the importance of credentialing within industry and sector partnerships, especially for new high-growth industries. Specifically, the commenter recommended the following: (1) Funds be specifically allocated and used for State and local credentialing efforts within industry or sector partnerships, (2) DOL link credentialing to industry or sector partnerships and amend the proposed State Plan requirements to require States to use explicit language to clarify how they will integrate credentialing into the development of new industry or sector partnerships, where applicable, and (3) States should be required to explain their efforts to find industry-driven credentials as part of their Unified State Plans while providing a list of those credentials to DOL.

Departments' Response: The Departments agree that credentialing as a part of industry or sector partnerships is important. The WIOA State Plan ICR supports the inclusion of credentialing and its role in sector and career pathways strategies. Specifically, the WIOA State Plan ICR, consistent with sec. 102(b)(2)(B)(vi) of WIOA, requires States to describe how their strategies will improve access to activities leading to recognized postsecondary credentials, including registered apprenticeship certificates. The requirement in the WIOA State Plan ICR further includes credentials that are industry-recognized certificates, licenses, or certifications, and that are portable and stackable. The WIOA State Plan ICR also requires States to describe the strategies the State will implement, including industry or sector partnerships related to in-demand industry sectors and occupations and career pathways, as required by WIOA sec. 101(d)(3)(B) and (D). Such strategies may include the use of credentials or industry-recognized certificates. The Departments have concluded that these requirements adequately address the States' use of credentials within industry or sector partnerships. The Departments have declined to require States to use explicit language regarding how they will integrate credentialing and the State's efforts to fund industry-driven credentials, or to require that States provide a list of those credentials to the Departments to reduce planning burdens on States. Lastly, funding allocations for State credentialing efforts are outside the authority of this rule.

Career Pathways

Comments: Several commenters were pleased that WIOA sec. 3(7) codifies a definition of ''career pathways'' in Federal law, but they expressed concern that the rule includes little guidance on how career pathways are to be implemented. These commenters recommended that the Departments require States to describe how they will carry out the requirements under WIOA relating to the development of career pathways.

Departments' Response: The Departments considered the commenters' support for the WIOA definition of career pathways and the recommendation that States be required to describe how they will carry out the development of career pathways in the State Plan. Career pathways are designed to serve a diverse group of learners, including youth, dislocated workers, veterans, individuals with disabilities, individuals who have low levels of literacy or English proficiency, new immigrants, women, and minorities. Career pathways programs provide opportunities for more flexible education and training, allow people to earn industry-recognized credentials, and support the attainment of marketable skills that transfer into work for all. The Departments are choosing not to regulate further regarding the implementation of career pathways in order to promote maximum flexibility at the State and local level, and the Departments will continue to support career pathways programs locally and regionally through comprehensive technical assistance.

Comments: A number of commenters recommended that the rule clarify the minimum requirements that a Local WDB must satisfy in order to demonstrate successful implementation of career pathways.

A few commenters encouraged the Departments to use a forthcoming Career Pathways and Credentials Toolkit to amplify and build awareness of States' and localities' requirements for career pathways under WIOA.

Another commenter encouraged the Departments to expand the use of career pathways, especially for racial minorities and women, and to provide support to States and localities as they implement plans to improve career pathways available locally and regionally.

One commenter said the Departments should offer more specific guidance for operationalizing career pathways, such as acceptable strategies for braiding funding streams from titles I and II of WIOA and ways to identify and improve career pathways programs, with a particular focus on how to integrate wraparound services successfully into career pathways programs.

One commenter provided the following recommendations:

- Unified State Plans should be required to demonstrate how to track career pathway participants whose service happens across Federal program and funding streams through co-enrollment.
- The required elements for the Unified State Plan should specify the need to identify co-enrolled participants across the WIOA titles and in the CTE and human service partner systems.
- Unified State Plans should illustrate roles for CTE partners in development and implementation of career pathways, including strategies for co-enrollment.
- The Joint WIOA Final Rule should provide guidance to title I and title II providers on working with CTE in the design and implementation of career pathways, and should promote shared decision-making.
- Unified State Plans should be required to address strategies for serving TANF recipients through career pathway programming, as part of the plan's description of how career

pathway services will be provided to adults, youth, and individuals with barriers to employment.

Departments' Response: Consistent with sec. 101(d)(3)(D) of WIOA, the WIOA State Plan ICR includes requirements for the State to describe the career pathways strategies. The WIOA State Plan ICR, consistent with secs. 101(d) and 102(b)(2) of WIOA, also requires States to describe how such activities will be aligned across the core programs and Combined State Plan partner programs included in the State Plan and among the entities administering the programs, including using co-enrollment and other strategies, as appropriate. States have the option of including strategies that address TANF recipients as well as the option of including TANF as a Combined State Plan partner program in a Combined State Plan. Because career pathways, co-enrollment, and TANF recipients already are reflected in guidance, the Departments decline to regulate planning requirements regarding career pathways further. Regarding commenters' suggestions for specific strategies around implementation and requests for guidance, the Departments agree that additional guidance is necessary to describe WIOA requirements for incorporating career pathways into the State's strategies, although the Departments have concluded that additional regulatory text on career pathways is not necessary. The Departments are working in partnership with other Federal agencies to provide additional guidance on the implementation of career pathways in WIOA, and the Departments continue to take steps to incorporate career pathways approaches into a wide range of program investments, evaluation and research activities, and technical assistance efforts.

Combined State Plan Partner Programs

Paragraph (d)(2) of § 676.105 specifically requires that Unified State Plans include strategies for aligning the core programs with Combined State Plan partner programs and other resources to support the State's vision and goals (WIOA sec. 102(b)(1)).

Comments: A few commenters noted that the term ''optional programs'' is not used in WIOA sec. 102(b)(1), but the commenters also acknowledged that from the context it is apparent that the Departments intended to refer to the programs described at sec. 103(a)(2) and proposed § 676.140(d). The commenters supported this language, but they encouraged the Departments to clarify this intent explicitly by amending proposed § 676.105(d)(2) to include ''as described in § 676.140(d)'' after the words ''optional programs.'' One commenter stated that while the use of the term ''optional programs'' for other workforce development programs is understood to be in reference to the fact that they are not required to be part of Unified Plans, there is the danger that the term could inadvertently send a message about the value of these programs. The commenter recommended that guidance should clarify that ''optional'' only refers to the planning requirements and does not imply that other programs beyond the WIOA ''core'' programs are any less essential to workforce development.

Departments' Response: The Departments have reviewed these comments and agree that the term ''optional program'' was unclear. The term ''optional,'' as used in the NPRM, referred to the State's option of including these partner programs in a Combined State Plan. The Departments also agree that Combined State Plan partner programs are a valuable part of the workforce development system and the Departments encourage States to maximize the involvement of these programs in developing the State's strategies, goals, and vision for the one-stop delivery system in each State. The Departments revised § 676.105(d)(2), by replacing the term ''optional programs'' with ''Combined State Plan partner programs'' and also applied the suggested edit cross-referencing the term to § 676.140. The sentence now reads as ''Strategies for aligning the core programs and Combined State Plan partner programs as described in § 676.140(d), as well as other resources available to the State, to achieve the strategic vision and goals in accordance with sec. 102(b)(1)(E) of WIOA.'' Throughout this preamble to the Joint WIOA Final Rule, the Departments have generally used the term ''Combined State Plan partner program'' to refer to what were called ''optional programs'' in the NPRM.

Coordination in Plan Development

Comments: A number of commenters expressed concern about having an adequate voice and input into the State Plan development process. One commenter requested that the Departments issue a stronger or clearer regulation addressing which entities must be involved in the process.

Departments' Response: The Departments reviewed these comments and agree that the regulation would benefit from a more explicit statement regarding the role of core programs in the planning process. In response to these comments, the Departments have added a new paragraph (d)(3)(v) to § 676.105 to clarify that operational planning elements must include a description of joint planning methods across core programs and required one-stop partner programs and other programs and activities in the Unified Plan. Due to this addition, proposed § 676.105(d)(3)(v) has been redesignated as § 676.105(d)(3)(vi) in this Joint WIOA Final Rule. The Departments also have added a new paragraph (c) to § 676.130 to explain how stakeholder and core program providers should be involved in plan development, as well as the role of the State WDB in plan development. The Departments have made parallel revisions to §§ 676.140 and 676.143 for Combined State Plans, all of which will be discussed in connection with each of these provisions.

Comments: Several commenters supported the unified planning process in general but expressed concern about the lack of oversight and enforcement mechanisms regarding the requirement that the development of the plan is collaborative. The commenters urged the Departments to remind all the core programs that they must truly collaborate if WIOA is to succeed.

Similarly, a commenter said the rule's strategic approach will require constant collaboration between Federal, State, and local governments, as well as other community partners, but the willingness to collaborate among these actors must be present. This commenter said other challenges include resistance to change within the workforce system, procurement requirements in a single State area, and conflicting performance requirements from different funding streams.

Another commenter said research has shown that bundling multiple services leads to more successful outcomes in the workforce development field, and the workforce system provides an ideal platform to integrate financial capability services because they both are focused on ensuring individuals have the tools to participate in, contribute to, and benefit from the mainstream economy.

Departments' Response: The Departments issued this Final Rule jointly to lay the foundation, through coordination and collaboration at the Federal level, for implementing the vision and goals of WIOA. One of WIOA's principal areas of reform is to require States to plan across programs and include this planning process in the Unified or Combined State Plans, which promotes a shared understanding of the workforce needs of a State and a comprehensive strategy for addressing those needs. Unified or combined

planning can support better alignment of resources, increased coordination among programs, and improved efficiency in service delivery. The Departments considered these comments and recognize the challenges mentioned by the commenters. WIOA placed heightened emphasis on coordination and collaboration at the Federal, State, and local levels to ensure a streamlined and coordinated service delivery system for job seekers. The WIOA State Plan ICR, consistent with the statutory and regulatory requirements, reinforces the importance of collaboration in the development of State Plans. However, to further address these comments and others relating to the issue of collaboration and stakeholder involvement, the Departments have added new paragraph (d)(3)(v) to § 676.105 to clarify that operational planning elements must include a description of joint planning methods across core programs and required one-stop partner programs in the Unified Plan. The WIOA statute and the WIOA State Plan ICR require the State to assure that core programs have ''reviewed and commented on the appropriate operational planning elements of the Unified State Plan, and approved the elements as serving the needs of the populations served by such programs.'' The Departments have amended § 676.105(d)(3)(iv) to emphasize this statutorily required assurance.

Lastly, the Departments note that some of the stated challenges, such as procurement requirements, are not relevant to the regulation of State Plans. Regarding the challenges cited by commenters regarding differing reporting requirements, WIOA has addressed this challenge by requiring the six core programs to report performance outcomes against the primary indicators of performance. The core programs will all use the same definitions and data elements. The Departments agree that aligning performance outcomes is a significant step toward aligning programs. WIOA sec. 116's performance requirements are addressed in the WIOA State Plan ICR Appendix 1, as well as the WIOA Joint Performance ICR and part 677 of this Joint WIOA Final Rule.

The Role of State Workforce Development Boards in Plan Development

Comments: Several commenters requested clarification about the role of the State WDB in approval of State Plans. One commenter said the Departments should require the State WDB to review and approve the State Plan before submission. This same commenter asked if core programs were required to sign off on the plan, or if their representation on the State WDB would serve that purpose. A commenter asked about the authority of a State WDB over specific programs' plans, specifically requesting clarification on whether the Board can, in effect, veto a portion of the plan.

Departments' Response: The Departments reviewed these comments and agree that the Joint WIOA Final Rule should provide additional clarification about the role of the State WDB in approval of State Plans. Accordingly, the Departments revised §§ 676.130(c) and 676.143(b) to clarify expected roles during plan development. More detail will be provided in the discussions related to these particular sections below. The Departments expect the States to recognize the importance of an inclusive and collaborative process in developing the State Plan. The Departments also have revised § 676.105(d)(3)(iv), which implements an assurance required by sec. 102(b)(2)(E) of WIOA. Under § 676.105(d)(3)(iv), States are required to assure that the lead State agencies responsible for the administration of the core programs review and comment on the appropriate operational planning sections of the Unified State Plan and approve that each element serves the needs of the population served by such programs.

Comments: A commenter requested clarification on the processes of State, regional, and local planning. Specifically, this commenter wondered how much direct influence local workforce boards will have in their State's respective State Plans. The commenter requested greater assurances that Local WDBs be systematically included in the State planning process. Similarly, a commenter recommended that Governors must have Local WDB and CEO consent before taking actions impacting Local WDBs, stating that most of the best innovations are developed based on local relationships. Another commenter recommended regulatory language that enables local areas to meet the needs of the State WDB in meeting their responsibilities under WIOA for statewide planning, but encourages and allows local areas to provide their own input, feedback, and strategies within the local plan.

Departments' Response: The Departments agree with the commenters that it is important for the Governor to include Local WDBs and CEOs in the State planning process. Section 679.110 of 20 CFR requires that State WDB membership include two or more CEOs (*see* DOL WIOA Final Rule published elsewhere in this issue of the **Federal Register**). The Governor has the flexibility to appoint more local elected officials to the State WDB as he/she sees fit. The Departments encourage the Governor to use this authority, which may include increasing the representation of CEOs, to ensure accurate representation of the interests of job seekers and businesses in the State and also to ensure the involvement of these local representatives in the State planning process. WIOA does not require that Governors must have Local WDB and CEO consent before taking actions impacting Local WDBs. However, the Departments do expect engagement of Local WDBs in the development of the State Plan through public comment and input. This is further discussed below at § 676.130(d). The requirements for local plan development and input are discussed in 20 CFR 679.550 (*see* DOL WIOA Final Rule published elsewhere in this issue of the **Federal Register**).

Section 676.110 What are the program-specific requirements in the Unified State Plan for the adult, dislocated worker, and youth programs authorized under Workforce Innovation and Opportunity Act title I?

Section 676.110 indicates that program-specific requirements for the adult, dislocated worker, and youth workforce investment activities in the Unified State Plan are described in sec. 102(b)(2)(D)(i) of WIOA. Additional planning requirements may be explained in joint planning guidelines issued by the Secretaries of Labor and Education.

Proposed Additional Title I Program-Specific Requirements to State Plans

Comments: One commenter agreed with the proposed program-specific requirements in §§ 676.110 through 676.125. Another commenter stated that this section provides insufficient direction and accountability to ensure that the needs of individuals with a barrier to employment or who have priority of service are adequately included and addressed in a Unified or Combined State Plan. The commenter recommended that the Departments require that State and local planning efforts utilize the most current Census and administrative data available to develop estimates of each priority service population in their planning efforts, and update these data year to year. The commenter said these data should be utilized in Federal reviews of State Plans to ensure that system designs and projected investments are

equitably targeted to service-priority populations. The commenter further stated that the data also should be used to benchmark system performance in actual implementation of the priority of service from year to year.

Departments' Response: The Departments have considered these comments. The WIOA State Plan ICR, consistent with WIOA requirements for title I–B programs, requires States to address priority in the delivery of career and training services to individuals who are low income, public assistance recipients, or basic skills deficient. WIOA sec. 134(c)(3)(E) prioritizes these groups for the receipt of individualized career services and training services. The Departments encourage States to use a variety of accurate, reliable, and timely labor market information on which to base analysis and priority of service. Indeed, priority for use of adult funds can be made using a variety of available data, in addition to the use of Census data. However, to minimize the burden for each individual State, the Departments will not require States to use a particular dataset, leaving it to the discretion of the States to choose the appropriate data sources.

Section 676.115 What are the program-specific requirements in the Unified State Plan for the Adult Education and Family Literacy Act program authorized under Workforce Innovation and Opportunity Act title II?

Section 676.115 explains the additional planning requirements to which the AEFLA program is subject. Section 676.115 contains three specific program requirements. First, § 676.115(a) restates the statutory requirement that the eligible agency must explain in its Unified or Combined State Plan how it will align its adult education content standards with its State-adopted challenging academic content standards under the Elementary and Secondary Education Act by July 1, 2016. Second, § 676.115(b)(1) addresses the requirement that States describe the methods and factors the State will use to award multi-year grants on a competitive basis to eligible providers. Third, § 676.115(b)(2) requires that States describe the methods and factors used to provide direct and equitable access to funds using the same grant or contract announcement or application procedure. Based on comments, and as discussed further below, the Departments have deleted proposed regulatory text at § 676.115(c) concerning a requirement to describe the interoperability of data systems. Deletion of paragraph (c) is the only substantive change made to this regulatory provision from that proposed in the NPRM.

Timing of Plan Acceptance and Open Competitions

Comments: Many commenters expressed concern that States may have to issue requests for proposals (RFPs) for funds before the plans have been approved. Several commenters said that this would result in an RFP process that does not address the objectives of the State Plan. Some commenters asked that the Departments provide an additional transition year in order to allow for the time necessary for States to receive State and local plan approval and begin the implementation of the approved plans, after which the States could run their competitions in alignment with the approved plans.

Departments' Response: The Departments agree with the commenters' concerns and recognize the time that is required for State procurement processes. The ED understands that it would create difficulties to require States to issue RFPs prior to the State Plan being approved when the RFPs are intended to be based on the approved State Plan. Additionally local plans must be in place before the RFP can be issued so applications for subgrants can be aligned with local plans. The ED has issued guidance regarding the process for awarding subgrants to eligible providers authorized under title II, which provides information regarding the timing of competitions and their alignment with State and local plans. It is not necessary to address this concern in the regulation and the regulation is not revised in response to these comments.

Alignment With State Elementary and Secondary Education Act Standards

Comments: Numerous commenters stated that most States have adopted the College and Career Readiness Standards for adult education and will demonstrate in their State Plans how the College and Career Readiness Standards for adult education align with the standards that State established under the Elementary and Secondary Education Act of 1965, as amended (ESEA). These commenters also expressed concern regarding the unavailability of standards for adult education that focus on English Language Acquisition. Additionally, commenters raised concerns about the absence of assessments that measure performance on the College and Career Readiness Standards for adult education and recommended that the Departments provide a 3-year transition period during which States are held accountable based on the available assessments instruments. A commenter also recommended that the Departments integrate the English language descriptors into the current adult education National Reporting System Educational Functioning Levels descriptors. Finally, another commenter recommended that the Departments adjust accountability measurements to reflect separate English Language Acquisition tables in the National Reporting System from the standard adult basic education (ABE) standards.

Departments' Response: The Departments have reviewed the commenters' concerns related to having adequate time to establish English Language Acquisition content standards, as well as the lack of assessment mechanism to measure adult education content standards. The ED recognizes that English Language Acquisition content standards do not yet exist. The ED acknowledges that there are currently no National Reporting System-approved assessment instruments by which to measure student progress and achievement in relation to College and Career Readiness standards. However, based on our review of the comments, it appears that some commenters might have misunderstood the proposed requirement pertaining to content standards. The final regulations require the eligible agency to describe in the Unified State Plan how, by July 1, 2016, it will align its content standards for adult education with State-adopted challenging academic standards under the ESEA. The regulations do not require that the State implement those standards by July 1, 2016, or that the State implement assessments aligned to the standards by July 1, 2016. The ED intends to issue guidance pertaining to the alignment and implementation of standards; the standards for English language acquisition; and the aligned assessments for accountability in adult education. Finally, although the Departments reviewed the comments about the integration of the English Language Acquisition descriptors into the National Reporting System and the separation of the accountability measures in the English Language Acquisition table from the ABE tables, the Departments concluded that they do not have the statutory authority to address these in the final regulations. No changes to the regulatory text were made in response to these comments.

Interoperability of Data Systems

Comments: Numerous commenters sought clarification on the definition of

''interoperability.'' Several commenters stated that there is a national data integration workgroup at the Federal level; and recommended that, rather than each State expending time and funds to create an interoperable system, the Departments give the States the option to await the results of the national data integration workgroup before creating their State interoperable system.

Commenters stated that, due to the variety in State data systems, regulations that attempt to implement a ''one size fits all'' approach are impractical. These commenters recommended that the Departments convey expectations for interoperability via non-regulatory guidance (including guidance highlighting existing solutions and offering States options for reporting this data). A commenter recommended that DOL work with other Federal agencies to establish minimum national standards for how integrated data systems should be designed and interface with existing public systems to support the employment needs of adults and youth facing barriers to employment. The commenter also urged DOL to work with other Federal agencies to ensure that integrated data systems align with existing data being collected on employment, education, and training services across Federal programs.

A commenter said the requirement for a description of how the State will ensure interoperability of data systems in the reporting on core indicators of performance and performance reports is listed only under the AEFLA title II specific section (§ 676.115); however, in the law, the requirement for such information is listed under sec. 102(b)(2)(C) State Operating Systems and Policies of WIOA. Therefore, the commenter suggested § 676.115(c) should be moved to § 676.105, General Requirements. Another commenter said the regulations place the responsibility of ensuring interoperability of data systems on the title II adult education programs, which is not feasible because the various data systems are governed under different programs and frequently by different agencies. The commenter also said the rule seems to place the burden of supporting the cost of interoperability on title II adult education programs, which is not equitable because there will likely be a significant cost to creating such interoperability. The commenter recommended that the Departments restate this in regulation as a joint requirement of core programs and any programs included in a Combined State Plan.

Departments' Response: The Departments agree with commenters' concerns regarding the complexity of integration, including the amount of time, planning, and resources necessary to achieve such integration. The Departments agree with the commenters that the integration and interoperability of data systems is not limited to title II of WIOA. The Departments understand that performance and accountability data collection and systems integration is a long-term process that will involve additional costs and resources for all programs. The Departments will review reports from the national data integration workgroup, as well as information from the planning descriptions provided by States in the initial State Plan, to inform possible policy decisions and the development of guidance on this topic. The Departments also will look into similar data collection and system integration across Federal agencies that provide employment, education, and training services.

As a result of these concerns, the Departments have removed the language proposed in § 676.115(c), and instead have included in the WIOA State Plan ICR, consistent with sec. 102(b)(2)(C) of WIOA, a general requirement that States address fiscal and management accountability information system planning across all of the programs included in a Unified or Combined State Plan, as required by sec. 116(i)(1) of WIOA.

Direct and Equitable

Comments: Regarding § 676.115(b)(2), which specifies that all eligible agencies ''will provide direct and equitable access to funds,'' several commenters said that there is no specific mention of this requirement in § 676.140, which governs the Combined State Plan. One commenter sought clarification on whether this was intentional or an oversight.

Departments' Response: The Departments have reviewed these comments and agree that the omission of the requirement related to direct and equitable access of funds in the Combined State Plan was an error. The Departments have revised § 676.140(e)(1) to include this requirement in the regulations that address the Combined State Plan.

Request for Guidance

Comments: Several commenters said States should be required to identify the guidance they will provide to eligible providers for nominating an adult education representative to the Local WDB that would represent all eligible providers in the region as well as communicate board activities.

Departments' Response: The Departments have reviewed the comments supporting a requirement that States issue guidance for adult education representation on the Local WDB. States have the authority to issue such guidance and it is not necessary to revise the regulations to address this specific need.

Section 676.120 What are the program-specific requirements in the Unified State Plan for the Employment Service program authorized under the Wagner-Peyser Act, as amended by Workforce Innovation and Opportunity Act title III?

Section 676.120 states that Wagner-Peyser Act Employment Service programs are subject to the requirements in sec. 102(b) of WIOA, including any additional requirements imposed by the Secretary of Labor under secs. 102(b)(2)(C)(viii) and 102(b)(2)(D)(iv) of WIOA. This section requires States to include any information the Secretary of Labor determines is necessary to administer the Wagner-Peyser Act Employment Services programs. The Departments have provided additional information through jointly issued planning guidance and the WIOA State Plan ICR. Except for the addition of a reference to WIOA sec. 102(b)(2)(D)(iv) and other minor technical edits, this provision remains substantively the same as that proposed in the NPRM. WIOA sec. 102(b)(2)(D)(iv) refers to Wagner-Peyser Act program-specific requirements.

Proposed Additional Wagner-Peyser Act Program-Specific Requirements for State Plans

Comments: A commenter agreed with the proposed requirements specific to Wagner-Peyser Act Employment Services programs. One commenter stated that homeless persons should be a prioritized group for employment services, including those with no income or work history, and those with a criminal background. Also, this commenter recommended that serving higher barrier persons be incentivized.

Departments' Response: The Departments agree with the importance of ensuring that States address the needs of very low income and homeless populations in the State Plan. As discussed under § 676.105, the WIOA State Plan ICR, consistent with WIOA, requires that Unified and Combined State Plans address the needs of individuals with barriers to employment. As defined in sec. 3(24)(G) of WIOA, an ''individual with a barrier

to employment'' includes homeless individuals or homeless children and youths. However, employment services under the Wagner-Peyser Act are universal and available to all; the Departments do not have the authority to prioritize use of Wagner-Peyser Act funds for specific populations.

Comments: Several commenters said the regulation should require State workforce agencies to include a clearly defined management reporting structure for State merit-based employees as part of the State Plan for each one-stop center to minimize confusion and protect the systemic integrity of Wagner-Peyser Act services.

Departments' Response: While the Departments recognize the importance of adhering to merit staffing requirements for Wagner-Peyser Act services, the Departments decline to require a reporting structure for merit staff in the regulation or in the WIOA State Plan ICR because it imposes an unnecessary burden on States. However, a State may elect to develop such a policy and include it in its State Plan.

Section 676.125 What are the program-specific requirements in the Unified State Plan for the State Vocational Rehabilitation program authorized under title I of the Rehabilitation Act of 1973, as amended by Workforce Innovation and Opportunity Act title IV?

Section 676.125 requires States to submit a VR services portion as part of the Unified State Plan that complies with all State Plan requirements set forth in sec. 101(a) of the Rehabilitation Act of 1973, as amended by title IV of WIOA. All submission requirements of the VR Services portion of the Unified State Plan are in addition to the jointly developed strategic and operational content requirements prescribed by sec. 102(b) of WIOA. Except for minor technical edits, this provision remains substantively the same as that proposed in the NPRM.

Individuals With Disabilities in the VR Program

Comments: A commenter agreed with the requirements specific to the VR program.

Some commenters stated that there should be greater emphasis on the VR program in the State Plans. The commenters encouraged Governor-mandated appointment of disability service providers on State WDBs to ensure proper representation for the development of this section of the plan. Similarly, other commenters urged the Departments to encourage greater inclusion of stakeholders within the disability community in the development, review, and implementation of the plans. One commenter further encouraged the Departments to issue guidance that will ensure that State executives will not ignore or under-represent the workforce development needs of people with disabilities in the strategic and operational planning outline in either the Unified or Combined State Plan.

Departments' Response: In response to the first concern, the Departments refer commenters to the WIOA State Plan ICR where the VR program is addressed at length in Section VI Program-Specific Requirements for Core State Plan Programs. This section overviews the descriptions and estimates that must be included in the VR Services Portion of a State Plan, as required by sec. 101(a) of the Rehabilitation act of 1973, as amended by WIOA, and sec. 102(b)(2)(D)(iii) of WIOA. State WDB membership requirements are addressed in 20 CFR 679.110 (*see* DOL WIOA Final Rule published elsewhere in this issue of the **Federal Register**). The Departments also note that beyond these requirements, the constitution of State WDBs and their membership has been left to the States. Although State Plans must include a State WDB Membership Roster and a list of Board activities as described in sec. III(b)(3)(B) of the WIOA State Plan ICR, the Departments have concluded that it is unnecessary to include additional regulatory text. With regard to greater stakeholder involvement in the review and implementation of State Plans, §§ 676.130(d) and 676.143(c), already require that States provide an opportunity for comment on and input into the development of a State Plan from representatives of Local WDBs and CEOs, businesses, labor organizations, institutions of higher education, other stakeholders with an interest in the services provided by the six core programs, and the general public, including individuals with disabilities. Thus, stakeholders with disabilities are required to have opportunity to engage in the development of State Plans. Finally, sec. 102(b) of WIOA and the WIOA State Plan ICR require the State to address the needs of individuals with barriers to employment within the State Plan's Strategic Vision and Goals and Operational Planning Elements. According to WIOA sec. 3(24), the term ''individual with a barrier to employment'' includes individuals with disabilities, including youth who are individuals with disabilities.

Interagency Cooperation

Comments: A commenter said the Departments should make explicit the importance of including State developmental disabilities agencies in cooperative agreements regarding individuals eligible for home and community-based waiver programs. Another commenter stated that, in addition to the cooperative agreement between VR and the State developmental disabilities agency, State Plans should be required to contain a cooperative agreement between Medicaid and the State mental health agency in order to promote effective collaboration between State agencies.

Departments' Response: While not stated in the regulation itself, the WIOA State Plan ICR describes how a State will incorporate interagency cooperation between VR and other State agencies providing assistance to or serving individuals with disabilities. In the WIOA State Plan ICR, consistent with sec. 101(a)(11) of the Rehabilitation Act, as amended by title IV of WIOA, the VR agency must describe the collaboration between the responsible State agency administering the State Medicaid plan, the State agency serving individuals with developmental disabilities, and the State agency responsible for providing mental health services. Nothing in this requirement restricts collaboration between agencies, as the goal is to develop opportunities for competitive integrated employment to the greatest extent possible. A more detailed discussion of the collaboration between the VR agency and other agencies serving individuals with disabilities is provided in ED's Final Rule related to the VR program published elsewhere in this issue of the **Federal Register**.

VR Program's Order of Selection

Comments: One commenter referenced a proposal to give State VR agencies operating under an Order of Selection the option to indicate that they will serve eligible individuals with disabilities outside the Order of Selection who have an immediate need for equipment or services to maintain employment. The commenter requested clarification in determining what services or equipment is allowed to be provided if identified as an immediate need if the individual is in jeopardy of losing his or her job.

Departments' Response: Section 101(a)(5)(D) of the Rehabilitation Act of 1973, as amended, indicates that State Plans shall, under an Order of Selection, permit the State, in its discretion, to elect to serve eligible individuals who

require specific services or equipment to maintain employment. The WIOA State Plan ICR allows for the VR program to identify whether it will serve eligible individuals with disabilities outside the Order of Selection who has an immediate need for equipment or services to maintain employment. Services or equipment provided to eligible individuals under these circumstances must be determined on an individual basis according to the employee's need required to maintain employment, consistent with the Individualized Plan for Employment. A much more detailed discussion of this issue is provided in ED's Final Rule covering the VR program published elsewhere in this issue of the **Federal Register**.

Records and Data Collection

Comments: A commenter said the Departments should identify ways to allow State VR agencies to gain ready access to Federal employment data, such as the data that are available through the Federal Employment Data Exchange System funded by DOL.

Departments' Response: The Departments addressed this issue through the WIOA State Plan ICR process. Section III(b)(6)(A) of the WIOA State Plan ICR states that State agencies responsible for the administration of core programs (such as the VR program) shall describe plans to align and integrate available workforce and educational data systems for the core programs, unemployment insurance (UI) programs, and education through postsecondary education. This directive provides sufficient identification of the opportunities available to States to incorporate both State and Federal data into their State programs. For this reason, no changes to the regulatory text were made in response to this comment.

Independent Living for Older Individuals Who Are Blind Program

Comments: A couple of commenters opposed eliminating a requirement in the State Plan for the Independent Living for Older Individuals who are Blind program, stating that this elimination constitutes a great disservice to older persons with vision loss. The commenters recommended that an Independent Living for Older Individuals who are Blind section be added to the VR section of the Unified or Combined State Plans.

Departments' Response: The Independent Living for Older Individuals who are Blind program is covered under title VII of the Rehabilitation Act of 1973, as amended by WIOA, and is not among the six core programs that must submit a Unified State Plan pursuant to sec. 102 of WIOA. The VR services portion of the Unified or Combined State Plan is similar in content to the standalone VR State Plans that were submitted prior to the passage of WIOA and covers only the VR program requirements of title I of the Rehabilitation Act, as amended by WIOA. The Independent Living for Older Individuals who are Blind program requires submission of an application with assurances every 3 years that complies with the requirements for that program as set forth in title VII of the Rehabilitation Act, as amended by WIOA. A detailed discussion of the Independent Living Services for Older Individuals Who are Blind program (34 CFR part 367) is provided in ED's Final Rule of WIOA Miscellaneous Programs published elsewhere in this issue of the **Federal Register**.

Section 676.130 What is the development, submission, and approval process of the Unified State Plan?

In order to facilitate the State strategic planning process, and concurrent review by the relevant Federal program offices, this section requires the Unified State Plan to be submitted to the Secretary of Labor, according to the procedures established in sec. 102(c) of WIOA, which are clarified and explained through joint planning guidelines. Likewise, the Departments, upon receipt of a Unified State Plan, follow procedures established by this section. Section 676.130 also explains requirements for transparency, public comment, and submission, as well as the terms for approval of plans by the Secretaries of Labor and Education.

Section 676.130(a) requires that the Unified State Plan be submitted in accordance with the procedures set out in the joint planning guidelines, issued by the Secretaries of Labor and Education, which explains the submission and approval process described in sec. 102(c) of WIOA.

Sections 676.130(b)(1) and (2) reiterate the requirement at sec. 102(c)(1) of WIOA regarding the deadlines for submitting the initial and subsequent Unified State Plans to the Departments. The Departments developed a process for submission of Unified State Plans to ensure that ED receives the entire Unified State Plan submission concurrently. WIOA secs. 102(c)(1)(A) and 103(b)(1) require States to submit the initial Unified or Combined State Plan no later than 120 days prior to the commencement of the second full program year after the date of enactment (*i.e.,* July 1, 2016), making the statutory submission date for the initial Unified or Combined State Plan March 3, 2016. However, pursuant to the orderly transition authority in sec. 503 of WIOA, the Departments considered the initial Unified or Combined State Plans timely if submitted by April 1, 2016.

Section 102(c)(1)(B) of WIOA requires subsequent Unified State Plans to be submitted not later than 120 days prior to the end of the 4-year period covered by the preceding Unified State Plan. In other words, WIOA Unified State Plans cover 4-year periods, and the subsequent plan must be submitted no later than 120 days before existing plan's 4-year period ends. The Departments have made clarifying edits to the regulatory text in § 676.130(b)(2) to more clearly align it with these statutory requirements. The Departments anticipate that the second Unified State Plans will need to be submitted in the spring of 2020. The official submission dates for the plans will be announced in the joint planning guidelines.

Section 676.130(b)(3) clarifies that, consistent with current practice for many of the core programs, a program year runs from July 1 through June 30 of any year. This clarification is particularly important, in this context, for the VR program since that program operates on a Federal fiscal year basis and will continue to do so, in accordance with title I of the Rehabilitation Act of 1973, despite the fact that the VR services portion of the Unified State Plan will align, for submission and performance purposes, with the other partners on a program year basis.

In order to more accurately reflect the content of § 676.130, the Departments have made a change to the title to include the word ''development.'' Additionally, in response to comments, described below, requesting clarity regarding the role of the State WDB, core program administrators and required one-stop partners, the Departments have added § 676.130(c). This additional paragraph explains the statutory requirement that the Unified State Plan must be developed with the assistance of the State WDB and must be developed in coordination with administrators with optimum policy-making authority for the core programs and required one-stop partners. The term ''optimum policy-making authority'' is defined in 20 CFR 679.120 as ''an individual who can reasonably be expected to speak affirmatively on behalf of the entity he or she represents and to commit that entity to a chosen course of action.'' *See* DOL WIOA Final

Rule published elsewhere in this issue of the **Federal Register**. Accordingly, § 676.130(c) through (h) have been renumbered at § 676.130(d) through (i). Other than these changes to paragraph (b)(2), the addition of paragraph (c), and the edit to paragraph (h) discussed below, no changes to the regulatory text have been made.

Deadlines

Comments: The Departments received a comment that supported the timeline for developing initial Unified State Plans. Several commenters requested clarification about the definition of program year, specified in § 676.130(b)(3), as it applies to VR, noting that the VR program operates on a Federal fiscal year. A couple commenters said the specified program year may put additional administrative burden and costs, especially in the startup, on State VR agencies. A commenter said the VR agencies should continue to report as they currently do. Due to the difference in fiscal year versus program year, one commenter recommended that the VR program be transferred to DOL to ensure seamless coordination of workforce activity at the Federal and State level and to ensure that the States operate unified, integrated programs. However, other commenters said it is unclear whether the change in program will be a burden for State VR agencies. In fact, one commenter anticipated a benefit for aligning State match, fiscal planning, and managing funds. One of these commenters said that ED should survey State VR agencies to see if this will prove to be a burden or an issue for administration of the State Plan.

A commenter remarked that performance data and plans will be on the program year basis and that Federal awards and reporting will remain on the fiscal year basis. The commenter sought clarification as to how reporting and performance timeframes will be integrated.

Departments' Response: The Departments acknowledge the concerns expressed by commenters. The VR program will utilize a program year, according to the § 676.130(b)(3) definition, for the purposes of reporting performance and identifying its goals and priorities as part of the VR portion of the Unified or Combined State Plan. Since data will be collected quarterly, RSA will have the flexibility to report performance data for each of the VR agencies for both the program year and the fiscal year. The Departments have not concluded that this will cause any additional burden to the VR agencies for the development of the VR portion of the State Plan, in particular, to establish and evaluate the State's performance measures. Further guidance about performance reporting for VR agencies will be provided in the final ICR for the RSA–911 report. Fiscally, the VR agencies will continue to operate on a Federal fiscal year basis as required statutorily pursuant to secs. 110 and 111 of the Rehabilitation Act of 1973, as amended. The WIOA State Plan ICR Appendix 1 clarifies what performance information States must include in the State Plan. The Departments provided further instructions through the WIOA Joint Performance ICR, the WIOA State Plan ICR, and related joint guidance. Finally, WIOA does not authorize the VR program to move to DOL.

Stakeholder Involvement

Comments: Numerous commenters expressed concern about having adequate voice and input into the State Plan development process, and a number of commenters requested stronger or clearer regulation on who must be involved in the State Plan development process. Commenters said the Departments should require a role in the planning process for core programs, one-stop partners, State and Local WDBs, and CEOs, among other entities.

Departments' Response: Although WIOA requires an inclusive planning process, and there are many references to inclusiveness in planning and program implementation throughout the Joint WIOA Final Rule, the Departments considered these comments and agree. The Joint WIOA Final Rule will continue to emphasize inclusiveness in planning and program implementation and will further benefit from a more explicit statement of the entities required to participate in the development of Unified State Plans. In response to the comments, the Departments have added regulatory text in a new paragraph (c) to § 676.130 to clarify that Unified State Plans must be developed with the assistance of the State WDB and in coordination with administrators with optimum policy-making authority for the core programs and required one-stop partners. In addition, to ensure consistency, the Departments have added regulatory text in a new paragraph (d)(3)(v) of § 676.105, discussed above, requiring that the Unified Plans include a ''description of joint planning and coordination across core programs, required one-stop partner programs and other programs and activities included in the Unified Plan.'' The Departments also have revised the title of § 676.130 to include the word ''development'' to clarify that this section describes the development of the Unified State Plan, as well as submission and approval. These changes are reflected in the WIOA State Plan ICR.

Collaboration and Input Into the Plan Process

Comments: A couple of commenters recommended that States should include title II adult education partners, as well as other immigrant-serving organizations, in their WIOA planning. A few commenters suggested that refugee programs and service providers be included in planning at the State and Local level and that the Departments should emphasize in the regulation's discussion of local governance the importance of providing expertise in serving linguistically and culturally diverse populations. Some commenters noted several organizations should have input into the development of State Plans, including: quality credentialing organizations, immigrant-serving organizations, State and local human service agencies, community and technical colleges, nonprofit community-based and nontraditional service providers, and State Departments of Education.

Departments' Response: The Departments considered these comments and note that collaboration in the planning process for Unified and Combined Plans is required of title II adult education program partners as they are among the core programs included in all plans. The WIOA State Plan ICR enables States to include human services, faith- and community-based organizations, and educational institutions in the State Plan, as well as other Federal programs, particularly as part of a discussion of innovative partnerships with the one-stop delivery system. These types of organizations may include immigrant-serving organizations and refugee programs. No change to the regulatory text was made in response to these comments.

Public Comment and Availability of Information

Comments: One commenter said the rule should reaffirm that, as one of its responsibilities, the State WDB must provide an environment for State Plan development that is conducive to participation and receptive to input. Further, this commenter stated that States should be required to describe how they will make this process accessible to individuals with disabilities.

Departments' Response: The State must provide an opportunity for comment and input into the State Plan. Furthermore, the Departments agree that

the public comment process must be accessible to all concerned organizations and individuals, including individuals with disabilities. As described in § 676.130(d)(1), the State must provide an opportunity for public comment on and input into the development of the Unified State Plan prior to its submission which includes an opportunity for comment by representatives of Local WDBs and CEOs, businesses, representatives of labor organizations, community-based organizations, adult education providers, institutions of higher education, other stakeholders with an interest in the services provided by the six core programs, and the general public, including individuals with disabilities. Further, as discussed earlier, the WIOA State Plan ICR, consistent with WIOA, requires the State to address the needs of individuals with barriers to employment including the needs of English language learners.

Comments: Several commenters stated that the consultation requirement should accommodate Single States that have only a volunteer State WDB and no Local WDB to consult.

Departments' Response: Although single-area States have no Local WDB to consult, they still have stakeholders, including CEOs. In accordance with § 676.130(d)(1), single-area States must provide an opportunity for comment by CEOs and other stakeholders as a part of the opportunity for public comment on State Plans, which includes local officials and local stakeholders.

Comments: A couple commenters recommended a minimum notice period of 90 days for the opportunity for public comment on the development of the Unified State Plan. A commenter urged the Departments to require that States publicly post the plan electronically and that the Departments themselves create an electronic database where States, policy makers, advocates, and the general public can access all of the plans.

Departments' Response: The Departments have reviewed these comments and decline to set a number of days for public comment of Unified State Plans, leaving the decision of schedules for public comment and posting plans electronically to the discretion of the States. Many States' laws require a minimum number of days for public comment, and many States use online posting as a way of making the plans available for public comment. While the Departments are not adding a regulation regarding an electronic database, the Departments provide a centralized online access point for completed State Plans.

Review and Approval of Unified State Plans

Comments: A commenter stated that WIOA indicates that approval of the Unified State Plan will occur within 90 days after submission, but the NPRM stated that it will occur within 90 days of receipt. The commenter recommended a revision to the language making the terminology for establishing the timeframe for review and approval of plans be consistent and that a definition be provided for determining that start date.

Departments' Response: The Departments decline to change the regulatory text and retain the use of the word ''receipt'' in the renumbered § 676.130(h) in order to allow the Departments to have a full 90 days to review the plan in the event of any delay in transmission of the plan from the State to the Departments. However, the Departments have replaced the words ''by the appropriate Secretary'' in paragraph (h) with ''the Secretary of Labor,'' to clarify that the 90-day review period begins upon receipt of the plan by the Secretary of Labor. This wording is more closely aligned with the statute, at WIOA sec. 102(c)(1). As stated in paragraph (e) of this section, immediately upon receipt of a Unified State Plan from a State, the Secretary of Labor will ensure that the entire Unified State Plan is submitted to the Secretary of Education pursuant to a process developed by the Secretaries. At that point, the Secretaries will begin their review.

Comments: Several commenters said States whose Unified State Plans are rejected should be given detailed reasons why in writing so those States can focus on areas that need improvement.

Departments' Response: As a part of the approval process, the Departments intend to provide States with detailed reasons in writing if a plan is not approvable.

Comments: A few commenters asserted that there was lack of clarity in the NPRM regarding whether the Unified Plan submission process will change. These commenters recommended that DOL issue a TEGL on the submission process of the Unified Plan. Similarly, a commenter said more guidance is needed to understand how this process will work and differ from previous Unified Plan submissions.

Departments' Response: The Departments considered these comments and agree that additional guidance will assist States in understanding the submission and approval process for Unified State Plans. The Departments issued joint guidance, which describes the submission process in greater detail. This joint guidance included TEGL No. 14–15, ''*Workforce Innovation and Opportunity Act (WIOA) Requirements for Unified and Combined State Plans,*'' issued to DOL grantees, a Program Memorandum issued to AEFLA grantees, and a Policy Directive issued to VR program grantees, all of which contained identical content.

Rehabilitation Services Administration Approval of Plan

The renumbered § 676.130(g) states that before the Secretary of Labor and the Secretary of Education approve the Unified State Plan, the VR portion of the Unified State Plan must be approved by the Commissioner of the Rehabilitation Services Administration (RSA).

Comments: Several commenters requested clarification on whether the 90-day approval timeframe for the entire plan starts when the VR portion of the Unified State Plan is approved by the RSA Commissioner or when it is subsequently forwarded to the ED and DOL Secretaries for approval. A commenter suggested that the regulation require a timeline for the Commissioner of RSA to approve or disapprove the VR portion of the Unified State Plan.

Departments' Response: The 90-day review timeframe, which begins upon receipt of the State Plan by DOL, includes RSA Commissioner review and approval. The VR program is an ED program, and ED's and DOL's reviews of plan submissions are concurrent. However, the approval of the VR services portion of the plan by the RSA Commissioner must occur first, after which the plan, if it complies with all of the other requirements, will be officially approved by the Secretaries of Labor and Education. The Secretaries of Labor and Education have developed a process to ensure that both Departments receive the entire Unified State Plan submission concurrently to ensure timely review. The Departments have concluded that the existing regulatory text and preamble place adequate emphasis on the timely concurrent reviews of the plans by the Departments and no changes to the regulatory text were made in response to these comments.

Comments: Some commenters asked whether it is the responsibility of the State VR agencies or the Secretaries of Labor and Education to obtain approval from the RSA Commissioner. One of these commenters stated that placing the responsibility on VR agencies to ensure that this review is done

(especially before submission of the plan to the Secretaries by the States) would be an unfair burden to place on VR agencies and States. This commenter further asked when the deadline is for the submittal of the VR portion of the State Plan to the RSA Commissioner, if it is the responsibility of State VR agencies to submit and obtain approval of the VR portion of the plan by the RSA Commissioner prior to submission to the Secretary of Labor.

Departments' Response: It is not the State VR agencies' responsibility to submit and obtain approval of the VR portion of the State Plan prior to submitting the Unified Plan to the Departments. Rather, the entire Unified State Plan, including the VR services portion of that Plan, should be submitted to the Departments, and the review and approval by the RSA commissioner will take place following that submission as a part of the 90-day Federal review of the plan. The ED, including RSA, and DOL will work together to ensure the timely review and approval of all portions of the State Plans, including the VR services portion. The Departments have developed a process for submission of Unified State Plans to ensure that the Departments of Labor and Education, including the RSA Commissioner, receive the entire Unified State Plan submission concurrently. The Departments have concluded that the existing regulatory text and preamble place adequate emphasis on the timely concurrent reviews of the plans by the Departments.

Comments: Some commenters requested clarification on what happens to the full Unified State Plan if the RSA Commissioner does not approve the VR portion of the State Plan.

Departments' Response: Approval of the Unified State Plan requires that the requirements of all core programs are met, including the requirements for the VR portion of the State Plan. No change to the regulatory text was made in response to these comments.

Guidance on Submission and Approval Process

Comments: Several commenters provided suggestions for potential joint guidance from the Departments and how the guidance should influence the submission and approval process for Unified State Plans. Some commenters recommended that the Departments issue guidance that provides recommendations for how States can develop appropriate outreach and engagement strategies for stakeholders. One commenter said the Departments should issue guidance that addresses whether the VR agency should hold separate public meetings on their portion of the State Plan or schedule a unified public meeting for the entire State Plan. One commenter welcomed guidance from the Departments that advises State and local areas on whether to submit workforce plans that cover additional workforce related programs besides the six core programs.

Numerous commenters requested that any guidance from the Departments that provides further details on the submission of the State Plans be released as early as possible. A few commenters said States may be waiting for guidance from the agencies before beginning their planning processes in earnest, which may cause some States to bypass key opportunities for stakeholder engagement or forgo pursuing a Combined State Plan in an effort to meet the statutory deadlines for plan submission.

A commenter said it would be useful if the Departments provided a template for the Unified and Combined State Plans, ideally several months before the plan is due. The commenter also said ensuring that the templates are available at least several months ahead of the submission deadline would make the process of completing the plan much more efficient for States.

Departments' Response: The Departments issued joint planning guidelines that address these and other topics regarding State Plan development, submission, and approval and the requirements of the WIOA State Plan ICR. For example TEGL No. 14–15, ''*Workforce Innovation and Opportunity Act (WIOA) Requirements for Unified and Combined State Plans,*'' was issued on March 4, 2016. The ED issued identical guidance to its grantees via Program Memorandum OCTAE 16–1 (*http://www2.ed.gov/about/offices/list/ovae/wioa-16-1.pdf*) and RSA–PD–16–03 (*http://www2.ed.gov/policy/speced/guid/rsa/pd/2016/pd-16-03.pdf*) on March 9, 2016. VR agencies must still meet the requirements for public participation prior to the submission or amendment of a State Plan in accordance with 34 CFR 361.20. Although not commonly referred to as a template, the WIOA State Plan ICR is a detailed and comprehensive set of requirements for developing and submitting State Plans. In addition to the written joint guidance, the Departments also have presented multiple webinars on the development and submission of the State Plans. No change to the regulatory text was made in response to these comments.

Section 676.135 What are the requirements for modification of the Unified State Plan?

Given the multi-year life of the Unified State Plan, States must revisit regularly State Plan strategies and recalibrate these strategies to respond to the changing economic conditions and workforce needs of the State. At a minimum, a State is required to submit modifications to its Unified State Plan at the end of the first 2-year period of any 4-year plan and also under other specific circumstances, examples of which have been included in this section. States may choose to submit a State Plan modification at any time during the life of the plan. Section 676.135 further describes the requirements for submission and approval of Unified State Plan modifications, which are subject to the same public review and comment requirements and approval process as the full Unified State Plan submissions.

Except for minor technical edits, such as corrections to cross-references to other sections that have been renumbered and edits to conform with changes to part 677 on the performance accountability system, this section remains substantively the same as that proposed in the NPRM.

Timeframe for Unified Plan Modifications

Comments: One commenter supported the 2-year timeline for modifying initial Unified State Plans specified in § 676.135(a). Another commenter said Federal agencies should use the State Unified Plan timeframe for submitting mandatory modifications to review the regulatory framework and other guidance under which WIOA is initially implemented. The Departments, this commenter continued, should use this time to review how the challenges and opportunities involved in WIOA's implementation have evolved.

Departments' Response: The Departments considered this comment and agree. The Departments intend to update existing and future regulations, ICRs, and guidance as appropriate and as needed for the continued effective implementation of WIOA.

Unified State Plan Modification Requirements

Comments: Regarding proposed § 676.135(b), several commenters stated that modifications to State Plans only should be necessary in the event of significant or substantial changes in labor market and economic conditions or other factors significantly affecting implementation of the plan.

Departments' Response: The Departments recognize the balance between the benefit of periodic modifications of State Plans and the potential burden of submitting State Plan modifications beyond those required at the end of the first 2-year period. The Departments agree that periodic review of State Plans aids in the continual update and improvement of State policies and that State Plan modifications other than those required at the end of the first 2-year period should be required only in the event of substantial changes impacting the plan. Paragraph (b) of § 676.135, which is consistent with WIOA, requires States to submit modifications at the end of the first 2-year period, and these modifications must reflect changes in labor market and economic conditions. Other than this 2-year modification, States are required to submit modifications only when changes in Federal or State law or policy substantially affect the strategies, goals, and priorities upon which the Unified State Plan is based, or when there are changes in the statewide vision, strategies, policies, State negotiated levels of performance (*see* § 677.170(b) of this Joint WIOA Final Rule), the methodology used to determine local allocation of funds, reorganizations which change the working relationship with system employees, changes in organizational responsibilities, changes to the membership structure of the State WDB or alternative entity, and similar substantial changes to the State's workforce investment system.

Public Comment on Unified State Plan Modifications

Comments: Several commenters stated that the VR regulations in 34 CFR part 361 already address when public comments are needed in the State Plan modification process. Specifically, any change to the VR portion of the State Plan that directly affects the provision of services, such as Order of Selection or the imposition of a financial needs test, would require public review and input before such a change is made. These commenters recommended that the Joint WIOA Final Rule here reflect the same high threshold for public comments on State Plan modifications for the other five core programs.

Departments' Response: Paragraph (c) of § 676.135 contains the same public review and comment requirements for all modifications to Unified State Plans as those for the development of initial Unified State Plans specified in § 676.130(d). In addition, States must adhere to any program-specific requirements for the core programs included in the State Plan, such as sec.101(a) of the Rehabilitation Act of 1973, as amended, and its implementing regulations under 34 CFR 361.10 and 361.20. The Departments do not require that the entire plan be subject to the program-specific public comment requirements of the VR rules in 34 CFR part 361. However, the Departments plan to issue further guidance regarding State Plan modifications.

Comments: Some commenters said States should have the flexibility to define what constitutes a major change, as plan modifications necessitated by minor changes are burdensome and expend valuable resources. One commenter stated that there was no definition of ''substantial change'' provided in the NPRM and suggested that the threshold for ''substantive change'' in proposed 34 CFR 361.20(a)(2) be used in the Joint WIOA Final Rule. Another commenter said ''substantial change'' should be defined as a change that involves a substantive change to service delivery or participating partners or substantial fiscal impact.

Departments' Response: The Departments agree that State Plan modifications other than those required after the first 2-year period for State Plans should be limited in order to avoid undue burden. However, the Departments also want to ensure State Plans are up to date and that States periodically review State Plans. Sections 676.135(b)(2) and (3) describe the circumstances where a Unified State Plan modification is required (other than at the first 2-year period). States are required to modify State Plans when changes in Federal or State law or policy substantially affect the strategies, goals, and priorities upon which the Unified State Plan is based; or when there are changes in the statewide vision, strategies, policies, State negotiated levels of performance, the methodology used to determine local allocation of funds, reorganizations which change the working relationship with system employees, changes in organizational responsibilities, changes to the membership structure of the State WDB or alternative entity, and similar substantial changes to the State's workforce development system. The Departments have not defined the term ''substantial change'' in this regulation and have instead outlined in the regulation the specific situations where modifications of Unified State Plans are required.

Section 676.140 What are the general requirements for submitting a Combined State Plan?

States have the option to submit a Combined State Plan that goes beyond the core programs of a Unified State Plan to include at least one additional Federal workforce, educational, or social service program from the programs identified in sec. 103(a)(2) of WIOA. Generally, the requirements for a Combined State Plan include the requirements for the Unified State Plan as well as the program-specific requirements for any Combined State Plan partner programs that are included in the Combined State Plan. To expand the benefits of cross-program strategic planning, increase alignment among State programs, and improve service integration, the Departments strongly encourage States to submit Combined State Plans.

Section 676.140 specifies the general requirements for submitting a Combined State Plan. Paragraph (a) of § 676.140 states that a State may choose to develop and submit a 4-year Combined State Plan in lieu of the Unified State Plan. The Departments have edited § 676.140(a), as well as § 676.140(e)(1), to correctly cite references to Unified State Plan requirements that must be included in a Combined State Plan. Paragraph (e) of § 676.140 specifies the information that a Combined Plan must contain. Paragraph (e)(2) of § 676.140 has been edited to include the words ''and activities,'' to clarify that the Combined Plan must provide the required information for any programs and activities included in the State Plan. Section 676.140(e)(3), consistent with WIOA, has been revised to expand the required description of joint planning and coordination to include core programs, required one-stop partner programs and other programs and activities included in the State Plan. Section 676.140(i) is a new paragraph that requires States that submit employment and training activities carried out by HUD under a Combined State Plan to submit any other required planning documents for HUD programs directly to HUD, according to the requirements of Federal law and regulations. Except for the changes described here, this section remains unchanged from that proposed in the NPRM.

Comments: One commenter said planning and implementation must be a thoughtful process, and system transformation cannot be rushed. This same commenter also said there should be increased interagency collaboration between the Departments. Specifically,

the commenter stated that there should be more incentives for programs within the two Departments to be included in a Combined State Plan.

Departments' Response: The Departments considered these comments but did not make changes to the regulatory text based on them. The Departments agree that planning and implementation must be thoughtful processes and that system transformation is an ongoing process. WIOA does not authorize incentives for States submitting a Combined State Plan. However, the Departments encourage States to be as inclusive as possible in their State Plans because joint planning across programs, including between those in the two Departments, fosters greater alignment and coordination of services.

Planning Cycles

Section 676.140(a) allows States to choose to develop and submit a 4-year Combined State Plan in lieu of the Unified State Plan. In the NPRM, the Departments note that the Combined Plan's 4-year plan development and implementation cycle, with a 2-year modification deadline, is inconsistent with the planning cycles governing many Combined State Plan partner programs. The Departments sought comment on how to reconcile differing planning cycles across Combined State Plan partner programs that do not align with the 4-year planning required by WIOA. In response, commenters provided various recommendations.

Comments: A few commenters said an approved Combined State Plan should suffice to meet the planning requirements of Combined State Plan partner programs and that Federal agencies should address the issues of differing planning cycles at the Federal level through executive actions. Another commenter said the Departments should require Combined State Plan partner programs to describe their planning cycles for the upcoming 4 years, and to include when during the next 4 years they may need to submit modifications to their part of the Combined State Plan. Similarly, two commenters suggested that the Combined State Plan report on the progress of the mid-cycle plan submitted by the Combined State Plan partner program(s) and include language on how the Combined State Plan partner program's submitted plan includes integration with WIOA programs.

Departments' Response: WIOA does not authorize the Departments to change the planning requirements, including submission deadlines that are under other authorizing legislation. However, WIOA gives the States the ability to apply the 2-year WIOA modification provisions to the Combined State Plan partner programs included in the plan in addition to any modification timeline or interval required by the statute governing the Combined State Plan partner program *as long as they do not overwrite those programs' required timelines.* The Departments have concluded that for any Combined State Plan partner program included in the plan with a different planning cycle from WIOA, States should submit program-specific modifications that align with the natural planning cycles for that specific program, unless the 2-year WIOA modification cycle can accommodate that program's planning and modification cycle. For example, if a State chooses to include CTE programs under the Carl D. Perkins Career and Technical Education Act of 2006 (Perkins Act), as a part of its Combined State Plan, the State would submit plan modifications annually to align with Perkins' annual State Plan cycle. As another example, the TANF authorizing statute requires a State to have submitted a plan within 27 months of the end of the first fiscal quarter in order to receive TANF funds for that fiscal year. Accordingly, adopting the more frequent 2-year WIOA cycle for modifications should accommodate TANF's cycle, allowing a State to make all changes to each portion of the Combined State Plan concurrently. The State must submit such modifications to the relevant Secretary for that program, as well as to the Departments of Labor and Education. Special instructions apply to UI State Quality Service Plan and to JVSG as described below. The Departments have developed a process for submission of Combined State Plans that ensures that all relevant Secretaries receive the plan concurrently and, as part of this system, the Departments anticipate that State Plan modifications will be housed in an accessible format with that State's original State Plan. The State may choose to describe the planning cycles of the Combined State Plan partner programs that are included in the State Plan, and the State also may describe intentions to submit future modifications to comply with those planning cycles; however, in order to minimize burden, the Departments have chosen not to require these descriptions through regulation or through the WIOA State Plan ICR.

States that include, in their Combined State Plan, UI programs (UI Federal-State programs administered under State unemployment compensation laws in accordance with applicable Federal law) carried out under title III, sec. 302, of the Social Security Act including secs. 303(a)(8) and (9) which govern the expenditure of funds, should submit their UI State Quality Service Plan following the cycle, according to UI State Quality Service Plan Planning and Reporting Guidelines.

The JVSG programs, carried out under chapter 41 of title 38 of the U.S. Code, require both a JVSG State Plan and a separate annual application for funding. States that include the JVSG programs in their Combined State Plan must submit the JVSG State Plan information in their Combined State Plan, and submit their funding applications annually as required by current Veterans' Employment and Training Service guidance.

Comments: One commenter said the bifurcated nature of the WIOA State Plans could be adapted to allow non-WIOA programs to participate in the strategic portion of the planning process, even if they cannot fully align their budgets and operational plans with a 2- or 4-year operational plan. A commenter suggested that the Departments issue guidance on how States can incorporate existing and aligned planned activity with WIOA funded programs, as well as other related programs. The commenter concluded that several agencies that administer the Combined State Plan partner programs permitted have plans that align with partners outside of the six core programs, and States and local areas need a method of aligning existing effective plans. A commenter recommended adding Social Security Administration's Ticket to Work as a workforce program in the Combined State Plan. A commenter urged DOL to work closely with the Department of Justice to outline additional recommendations and considerations within guidance for working specifically with the Second Chance Act partners and State Departments of Corrections.

Departments' Response: The Departments received similar comments, in response to § 676.130, regarding the inclusion of program partners beyond the core programs and required one-stop partners in the development of the Unified Plan. As already discussed in the context of Unified Plans in the preamble section that discusses § 676.130, the WIOA State Plan ICR, consistent with secs. 102 and 103 of WIOA, allows States to include programs beyond the core programs, required one-stop partners, and Combined State Plan partner programs in a Combined State Plan. This is particularly true in the context of a discussion of innovative partnerships with the one-stop delivery

system. These partners and programs could include human services, faith- and community-based organizations, educational institutions, and Federal programs not listed among the Combined Plan programs. These programs may be incorporated into the strategic portion of the planning process. As mentioned in the introduction, the Departments issued joint guidance to facilitate the inclusion of innovative partnerships and to foster alignment across partner programs outside of WIOA's core programs. States also are encouraged to utilize technical assistance, as the specific dynamics across program partners within States will vary. Because sec. 103 of WIOA provides an exclusive list of Combined State Plan partner programs, the Departments do not have the authority to expand the statutory list of Combined State Plan partner programs for inclusion in Combined State Plans.

Comments: One commenter said the Departments should keep the approval of the core programs separate from the approval of Combined State Plan partner programs, such that the implementation of what would otherwise be an approved Unified State Plan is not impacted or held up by decisions on Combined State Plan partner program cycles.

Departments' Response: The Departments agree with this comment and have added text to § 676.143(h) to clarify that approval or disapproval of Combined State Plan portions covering Combined State Plan partner programs does not impact approval of the common sections of the plan which cover the core programs. This change will be discussed in more detail in the preamble related to that section. The portions of the Combined State Plan related to the core programs are subject to the same approval requirements applicable to the Unified State Plan (WIOA sec. 102(c)). The Secretaries of Labor and Education's written determination of approval or disapproval of the portion of the plan for the six core programs may be separate from the written determination of approval, disapproval, or completeness of the program-specific requirements of Combined State Plan partner programs and activities described in § 676.140(d) and included the Combined State Plan. For example, if all the common planning elements and program-specific requirements for the core programs are met, approval and funding may proceed regardless of specific issues that may be identified in the program-specific sections for any Combined State Plan partner programs.

Temporary Assistance for Needy Families

Section 676.140(d)(2) specifies that TANF, authorized under part A of title IV of the Social Security Act, is a Combined State Plan partner program that may be included in the Combined State Plan.

Comments: One commenter said it appears that as a Combined State Plan partner program in a Combined State Plan TANF would be subject both to its own current statutory participation rate requirements and to the six performance measures specified in WIOA. The commenter stated that the performance accountability sections in both WIOA and the NPRM consistently refer to the six performance measures in relation to the core programs only and it is the core programs' funding alone that is tied to performance on these measures. The commenter requested that an exception be made such that when a State includes TANF as part of its Combined State Plan, TANF training and employment activities not be subject to WIOA required performance measures. The commenter requested that TANF training and employment activities only be subject to the performance measures under TANF, the same way that performance measures for CSBG employment and training activities are only those under CSBG.

Departments' Response: The Departments have reviewed this comment but did not make a change to the regulatory text. WIOA sec. 103 does not require the Combined State Plan partner programs to report on the WIOA sec. 116 primary indicators of performance. WIOA sec. 103(b)(1) only requires the Combined State Plan partner programs, which include TANF, to include the requirements, if any, applicable to that program or activity under the Federal law authorizing the program or activity. This means those portions of the plans related to training and employment. An explicit exemption for TANF is not required in these regulations. In referring to CSBG and to HUD employment and training activities, WIOA sec. 103(a)(2) does not refer to a specific program within those agencies but to employment and training activities in general. In contrast, WIOA sec. 103(a)(2) refers to TANF as a whole and does not limit this to the employment and training activities under TANF.

Comments: A commenter asked whether a separate TANF State Plan would be required even if the State opts to submit a Combined State Plan. If a separate TANF State Plan is required, the commenter asked what the advantage would be for a TANF entity in combining their State Plan with the WIOA Unified Plan. A commenter said the Departments should explicitly state that the Governor's option to determine that TANF will not be a required one-stop partner in a State is a separate and distinct decision from the option of including TANF in a Combined State Plan.

Departments' Response: If the State opts to submit a Combined State Plan under this rule that includes a TANF State Plan, the State would not be required to submit a separate TANF State Plan to HHS. Instead, HHS will receive the Combined State Plan under this rule. If a State submits a Combined State Plan that is approved, the State is not required to submit any other plan in order to receive the funds to operate the programs covered by that Plan. The Combined State Plan takes the place of the individual State Plans for the Combined State Plan partner programs that are covered by the plan and replaces the Unified State Plan. In this way, the Combined State Plan is meant to promote integrated planning across State programs in addition to the integration among the core programs that would occur under a Unified State Plan. While no additional plan is required, § 676.140(f) stipulates that each Combined State Plan partner program included in the Combined State Plan remains subject to the applicable program-specific requirements of the Federal law and regulations, and any other applicable legal or program requirements, governing the implementation and operation of that program. Finally, a Governor's option to determine that TANF will not be a required one-stop partner in a State is a separate and distinct decision from the option of including TANF in a Combined State Plan.

Perkins/Career and Technical Education Programs

Comments: Several commenters did not support the use of a Combined State Plan because, according to these commenters, the current Federal funding is essential for local CTE programs; the current Unified Plan model is working well by allowing local control of Perkins funds; the workforce board should not dictate course offerings or the curriculum provided; and the reporting/performance requirements for both WIOA and Perkins would conflict.

Another commenter stated that schools should have the ability to develop programs that align with each other and the resources to support

program development. The commenter said Office of Superintendent of Public Instruction should be given the control to direct funds to support CTE program development and oversee the implementation of the Programs of Study.

Departments' Response: The Departments considered these comments. States have the option of including postsecondary programs, including programs of study described in sec. 122 (c) under the Perkins Act, as a part of their Combined State Plan. However, even if Perkins postsecondary programs are included as a part of a State's Combined State Plan, there will be no impact on the amount of Perkins postsecondary funds that are distributed at the local level, unless the State formally amends its Perkins Act State Plan to change its secondary and postsecondary split of funds pursuant to sec. 112(a)(1) of the Perkins Act. In the case where there is a change in the split, the formula established in sec. 132 of the Perkins Act, or the alternative formula established in sec. 133 of the Perkins Act, still applies.

In addition, under WIOA, Local WDBs cannot dictate course offerings or curricula. Local recipients retain the ability to develop programs and align resources to meet students' needs. Finally, as discussed above, WIOA sec. 103 does not require the Combined Plan partner programs to report on the WIOA sec. 116 primary indicators of performance. WIOA sec. 103(b)(1) only requires the Combined State Plan partner programs to include the requirements, if any, applicable to that program or activity under the Federal law authorizing the program or activity.

Comments: One commenter stated that the regulation should account for WIOA's statutory requirement that Combined State Plan partner programs remain subject to their original authorizing statutes. This is particularly important, according to the commenter, in instances where the Perkins eligible agency does not fall under the direct line of authority or control of the Governor. It is imperative to assure the Perkins eligible agency that it has full authority to carry out the responsibilities under sec. 121 of the Perkins Act when part of a WIOA Combined State Plan. The Perkins eligible agency is ultimately subject to the Federal government fiscal and accountability reporting requirements under Perkins regardless of whether the Perkins State Plan is separate or part of a WIOA Combined Plan.

Departments' Response: Reference to the original authorizing statutes and their requirements are made throughout the Joint Rule with respect to Combined State Plan partner programs included in Combined State Plans. There is no intention of removing or minimizing the authority of the Perkins eligible agency to carry out its Perkins' responsibilities under WIOA.

Comments: A commenter made the following remarks about the submission of a Perkins State Plan as part of the Combined State Plan:

- The NPRMs do not address a reconciliation of the two separate and distinct submission requirements (2-year versus annual).
- If a State submits the annual Perkins Plan separate from the Combined State Plan, the rules are not clear if the Perkins Plan must be approved by the State WDB.
- The rules require two agencies to negotiate the level of performance on the core indicators of WIOA but do not indicate if the two agencies must negotiate the level of performance on the Perkins indicators.
- The Perkins State levels of performance are dependent on local negotiations and levels of performance but the NPRMs do not indicate how the integrity, validity, and reliability of the local Perkins negotiations can be retained.

Departments' Response: As discussed previously, WIOA gives the States the ability to apply the 2-year WIOA modification provisions to the Combined State Plan partner programs included in the plan in addition to any modification timeline or interval required by the statute governing the Combined State Plan partner program *as long as they do not overwrite those programs' required timelines.* The Departments have concluded that for any Combined State Plan partner program included in the plan with a different planning cycle from WIOA, States should submit program-specific modifications that align with the natural planning cycles for that specific program. Section 676.140(f) stipulates that each Combined Plan partner program included in the Combined State Plan remains subject to the applicable program-specific requirements of the Federal law and regulations, and any other applicable legal or program requirements, governing the implementation and operation of that program.

If a State chooses to include Perkins as part of its Combined State Plan, the State will submit Perkins State Plan modifications annually, consistent with the Perkins annual State Plan cycle. If the Perkins State Plan modifications affect only the administration of Perkins and have no impact on the Combined State Plan as a whole or the integration and administration of the core and Combined State Plan partner programs, then such modifications may be submitted only to the Secretary of Education consistent with § 676.145(c)(2). Modifications to a Perkins State plan that impact the Combined State Plan as a whole or the integration and administration of the core and Combined State Plan partner programs are subject to the same public review and comment requirements that apply to the development of the original Combined State Plan. Under the Perkins-specific procedures, hearings may or may not be required depending on the specific facts presented.

In response to the commenters who raised concerns regarding performance negotiations, the Departments are clarifying that sec. 103 of WIOA does not require Combined State Plan partner programs to report on the primary indicators of performance in sec. 116 of WIOA. Section 103(b)(1) of WIOA only requires the Combined State Plan partner programs, which include Perkins, to include the requirements, if any, applicable to that program or activity under the Federal law authorizing the program or activity. Perkins program inclusion in a State's Combined State Plan will not impact the annual Perkins performance indicator negotiation process. See sec. 676.143(i). The WIOA State Plan ICR Appendix 1 clarifies what performance information States must include in the State Plan. The Departments provided further instructions through the WIOA Joint Performance ICR, the WIOA State Plan ICR, and related joint guidance. The Departments issued operational guidance on both performance and State Plan submission guidelines following the finalized Performance and WIOA State Plan ICRs.

Inclusion of Combined State Plan Programs Not Under Governor's Authority

Section 676.140(e)(4) requires States to provide assurance that all of the entities responsible for planning or administering an eligible program described in a Combined State Plan have a ''meaningful opportunity to review and comment'' on all portions of the plan.

Comments: Several commenters recommended strengthening the language in the regulation to ensure that States give assurances that all of the entities responsible for planning or administering a program described in a Combined State Plan have approved the inclusion of the programs in a Combined Plan, especially where such

programs do not fall under the direct control of a Governor. According to these commenters, as the language currently stands, it could be interpreted as leaving this decision of whether to include a Combined State Plan partner program in the Combined State Plan up to the sole discretion of the Governor.

One commenter stated that, based on sec. 121 of the Perkins Act, the Perkins eligible agency should have the authority to determine whether CTE programs authorized under the Perkins Act are included in a State's Combined Plan. Section 121 of the Perkins Act states, in relevant part, that each ''eligible agency . . . shall prepare and submit to the Secretary a State plan . . .'' As mentioned above, the Perkins eligible agency maintains authority to carry out the responsibilities under sec. 121 of the Perkins Act under a Combined State Plan.

A few commenters said the Joint WIOA Final Rule should state the intent that the TANF program should have a meaningful influence in all stages of plan development and be a voting member of the State WDB.

Departments' Response: The Departments have concluded that no change to the regulatory text at § 676.140(e)(4) is necessary in response to these comments. The Departments have modified § 676.140(e)(3) to require States to describe joint planning methods in the Combined State Plan among the core programs, and with the required one-stop partner programs and other programs and activities included in the State Plan. The Departments acknowledge that not all programs identified in WIOA for potential inclusion in the Combined State Plan fall under the purview of the Governor. For some, the Federal funds go directly to local entities, such as several HUD programs administered by Public Housing Authorities. Others, such as the Reintegration of Ex-Offenders, are competitive grants that may be awarded to community-based organizations. Perkins funds flow directly to a State eligible agency by formula. In some States the Perkins State eligible agency is an independent agency not under the authority of the Governor. The Departments expect the Governor to work in collaboration with any Combined State Plan partner programs included in the plan and with the agencies that administer those programs consistent with these regulations and sec. 103(b)(3) of WIOA. The Departments expect that the State's joint planning methods across these programs ensure that the State has full cooperation from any such programs and agencies included in the Combined State Plan. Finally, in response to the comment that the TANF program should be a voting member of the State WDB, State WDB membership requirements are addressed in 20 CFR 679.110 (*see* DOL WIOA Final Rule).

Other Comments

Comments: Two commenters sought clarification on the primary indicators of performance relative to the inclusion of those partners beyond the core programs. If a State should choose the Combined State Plan option, one commenter asked whether all partners would be held to the standards of performance accountability identified in WIOA.

Departments' Response: WIOA sec. 103 does not require the Combined Plan partner programs to report on the WIOA sec. 116 primary indicators of performance. WIOA sec. 103(b)(1) only requires the Combined State Plan partner programs to include the requirements, if any, applicable to that program or activity under the Federal law authorizing the program or activity. The WIOA State Plan ICR Appendix 1 clarifies what performance information States must include in the State Plan. The Departments provided further instructions through the WIOA Joint Performance ICR, the WIOA State Plan ICR, and related joint guidance.

Comments: A commenter requested that the Departments ensure that partner programs will not have to submit additional or separate standalone plans.

Departments' Response: Partner programs, except for those carrying out employment and training activities carried out under CSBG, HUD programs, and the Food and Nutrition Act of 2008, will not be required to submit additional or separate standalone plans. Paragraph (h) and new paragraph (i) of § 676.140 explain the additional submission requirements for CSBG and HUD programs. Under paragraphs (h) and (i), the regulation explicitly limits the Combined Plan requirements for CSBG and HUD programs to ''employment and training activities.'' However, these activities are only a subset of a broad range of antipoverty activities provided under these two programs. In the case of CSBG programs, under § 676.140(h), the State would submit the remainder of the State Plan for CSBG (*e.g.*, those parts that apply to the other antipoverty activities provided by CSBG that are not ''employment and training activities'') to the Federal agency that administers the program. New paragraph (i) clarifies that, like the requirements under paragraph (h) for CSBG programs, only the components of the individual plans for HUD programs that pertain to employment and training should be submitted with the Combined State Plan. The State must submit any other required planning documents for HUD to the Federal agency that administers the respective program. The language in this new paragraph creates a consistent approach for the Combined State Plan partner programs that WIOA sec. 103(a) identifies by activities rather than by a specific program name. This change also makes the regulatory text relating to HUD consistent with instructions in the WIOA State Plan ICR for submission requirements for Combined State Plans.

For employment and training programs and work programs authorized under the Food and Nutrition Act of 2008, including those under secs. 6(d)(4) and 6(o), the State would similarly submit to the Departments of Labor and Education only the Supplemental Nutrition Assistance Program Employment and Training programs (SNAP E&T). The Departments declined to regulate an exception for SNAP E&T because State Plans for SNAP E&T, as described under 7 CFR 273.7(c)(8), are generally not comingled with the State Plans for the remaining activities under SNAP.

Comments: A commenter expressed concern that proposed § 676.140 does not require States to identify populations for Priorities of Service, though this is required at the local level. The commenter recommended that the regulation be revised to require that States identify populations for priority of service, and provide explanation of why those populations are named.

Departments' Response: As discussed earlier under § 676.105, in the title I-specific requirements, the WIOA State Plan ICR requires the State to address its policy for ensuring adult program funds provide a priority in the delivery of career and training services to individuals who are low income, public assistance recipients, or basic skills deficient. Otherwise, as with the Unified Plan Requirements, the Departments have chosen not to regulate the specifics of State Plan requirements, as these are explained in comprehensive detail in the WIOA State Plan ICR.

Section 676.143 What is the development, submission, and approval process for the Combined State Plan?

Section 676.143 implements WIOA's statutory requirements for submitting a Combined State Plan. These are similar to the requirements for submitting a Unified State Plan at § 676.130, with added considerations for review and approval by the Federal agencies that oversee the Combined State Plan partner

programs. The heading for § 676.143 has been modified to include the word ''development,'' to more accurately reflect the content of this section. In response to comments, discussed earlier, regarding the role of State WDB, core programs, required one-stop partners, and other stakeholders in the development of the State Plan, the Departments have made several revisions to § 676.143 to mirror the requirements for Unified Plans related to coordination, public comment and input. A new paragraph (b) has been added to include information similar to the newly added § 676.130(c), clarifying that the Combined State Plan, just as the Unified State Plan, must be developed with the assistance of the State WDB and must be developed in coordination with administrators with optimum policy-making authority for the core programs and required one-stop partners. New § 676.143(c)(1) and (2) have been added to include information similar to § 676.130(d)(1) and (2) requiring that the State must provide an opportunity for public comment and input on the development of the Combined State Plan prior to its submission, and that these requirements apply to the portions of the plan that cover the core programs. Finally, § 676.143(c)(3) has been added to further clarify that the portions of the Combined State Plan that cover the Combined State Plan partner programs are subject to any applicable public comment requirements for those programs. Proposed § 676.143(b) has been renumbered to § 676.143(d), and remaining sections have been renumbered accordingly. Renumbered § 676.143(e)(1) has been revised to clarify that, before the Secretaries of Labor and Education approve the Combined State Plan, the VR services portion of the Combined State Plan must be approved by the RSA Commissioner. In response to comments requesting clarity around Combined State Plan approval, new § 676.143(h) states that the Secretaries of Labor and Education's written determination of approval or disapproval of the portion of the plan for the six core programs may be separate from the written determination of approval, disapproval, or completeness for program-specific requirements of Combined State Plan partner programs at § 676.140(d). Except for the changes described here, this section remains unchanged from that proposed in the NPRM.

Submission of Combined State Plan

Section 676.143(d) requires a State to submit to the Secretaries of Labor and Education and, if applicable, to the Secretary of the agency with responsibility for approving the program's plan or for deeming it complete under the law governing the program, as part of its Combined State Plan, any plan, application, form, or any other similar document that is required as a condition for the approval of Federal funding under the applicable program or activity.

Comments: A couple of commenters stated that, to reduce the burden on States, the Secretaries of Labor and Education should be responsible for distributing the plans to other appropriate Federal entities. One of these commenters said the Secretaries of Labor and Education may want to consider taking all of the Combined State Plans and submitting them as a batch to the other appropriate Federal entities.

Departments' Response: The submission process set forth in WIOA sec. 103(a)(1) for Combined State Plans requires that they be submitted to the ''appropriate Secretaries,'' which differs from the submission process for the Unified State Plan set forth in WIOA sec. 102(a). However, similar to what is required by § 676.130(e) for the submission of Unified State Plans, the Departments developed a process for the single electronic submission of Combined State Plans that allows for concurrent review of, and immediate access to, the plans by all the relevant Federal entities. As discussed in the introduction, the Departments issued guidance that explains the submission process for Combined State Plans, which is intended to streamline State submission of plans. No change to the regulatory text was made in response to these comments, but the Departments have issued further guidance regarding State Plan submission.

Timelines for Review and Approval

Section 676.143(e) stipulates the timelines for review and approval by the Secretary of Labor or Secretary of Education, or another appropriate Secretary.

Comments: A couple of commenters requested clarification on the different timelines for the review and approval of the Combined State Plan (90 days for core programs and 120 days for Combined State Plan partner programs).

Departments' Response: The Departments considered these comments and are implementing the regulation to reflect the statutory requirements. As required by WIOA sec. 103(c)(3), Combined State Plan partner programs that fall under an authority other than the Secretary of Labor or Secretary of Education have an approval timeline of 120 days, rather than 90 days. This additional time allows for review and approval of Combined State Plan partner programs that are administered outside the Departments of Education and Labor, such as programs administered by U.S. Department of Agriculture, HHS, and HUD. These are statutory requirements not subject to regulatory change.

Rehabilitation Services Administration Approval of Combined State Plans

Comments: Several commenters requested clarification on whether the VR portion of a Combined State Plan must be approved by the RSA Commissioner prior to the full Combined State Plan being approved by the Secretaries of Labor and Education, as the Unified State Plan process description explicitly states in § 676.130(g).

Departments' Response: The Departments considered these comments and agree that the rule needed to provide additional clarification regarding this requirement. Just as required for Unified State Plans, the RSA Commissioner must approve the VR services portion of the Combined State Plan prior to approval of the full Combined State Plan by the Secretaries of Labor and Education. The Departments have added regulatory text to clarify this requirement at § 676.143(e)(1).

Comments: One commenter said ensuring review by the RSA Commissioner should be the responsibility of the Secretaries, not VR agencies, and asked if this review would be part of the 90-day review timeframe.

Departments' Response: The Departments worked together to ensure the timely review of all State Plans, including the VR services portion of each plan. As discussed under § 676.130 for Unified Plans, it is not the State VR agencies' responsibilities to submit and obtain approval of the VR services portion of the State Plan prior to submitting the Combined State Plan to the Departments. Rather, the entire plan should be submitted to the Departments and review by the RSA commissioner will take place following that submission as a part of the 90-day Federal review of the plan. The Departments developed a process for submission of State Plans to ensure that all Departments, as appropriate, receive the entire submission concurrently. The Departments have concluded that the existing regulatory text and preamble place adequate emphasis on the timely concurrent reviews of the plans by the Departments.

Review, Approval, and Disapproval of Combined State Plans

Section 676.143(f) provides specifics on the approval process for Combined State Plans.

Comments: A few commenters stated that there appears to be little incentive for States to pursue a Combined State Plan. One commenter said States need assurances that the Departments will handle the Combined State Plan review in a manner different from how the Departments handled the Unified State Plan review under WIA, which was largely superficial in nature. The commenter recommended that the review process not only enforce statutory requirements but also consider the plan in a coordinated, cross-agency approach. The commenter said States need additional clarity on how the Federal agencies will manage the review process and make approval determinations, particularly when the statutes provide mixed or conflicting direction.

Departments' Response: Although States only are required, at a minimum, to submit a Unified State Plan that encompasses the six core programs under WIOA, the Departments encourage States to submit a Combined State Plan that includes additional Combined State Plan partner programs as described at § 676.140. Development of a Combined State Plan allows for coordination across multiple Federal programs, cross-program strategic planning, increased alignment among State programs, and improved service integration, which provides a wider range of coordinated and streamlined services to the customer. WIOA offers an expanded opportunity for States to create and implement a shared vision and strategy for the public workforce system within the State. The Departments have added language to § 676.143 in paragraphs (e)(1) and (h) to further clarify the review process for Combined State Plans. Review of Combined State Plans will take into consideration the strategic coordination, program alignment, integration, and cross-agency joint planning that is reflected in the Combined Plan. The Departments worked together to create a robust review process across all partner agencies and consider this review process to be integral to effective joint planning and implementation. The Departments have added regulatory text at § 676.143(h) to clarify that the Secretaries of Labor and Education's written determination of approval or disapproval of the portion of the plan for the six core programs may be separate from the written determination of approval, disapproval, or completeness of the program-specific requirements of Combined State Plan partner programs and activities included in the Combined State Plan.

Comments: One commenter requested guidance (1) that allows States to develop a Combined State Plan without the threat of a loss of funds if elements of the individual programs are not specifically identified, and (2) on how accountability metrics and reporting requirements for those programs included in the plan will not be a disincentive for inclusion. A commenter said it is not clear what benefit exists for the State or local Perkins recipients to attempt to address indicators that are not pertinent to their purpose of operation as outlined in State regulation as well as the ''Federal Perkins regulation.'' The commenter said if the Combined State Plan partner programs are not required to report on the WIOA indicators of performance, the benefit of a Combined State Plan is not clear.

Departments' Response: Regarding concerns about funding, the joint submission, or joint review process of the Combined State Plans will not impact funding because the Departments developed a process to ensure Combined State Plans are reviewed in a coordinated and timely manner across agencies. The Combined State Plan review process is further explained at § 676.143. Combined State Plan partner programs are not subject to the six common indicators for performance under WIOA, although they may be subject to the same or similar indicators under their own authorizing statute or under State law. Regardless of whether required indicators are identical, States will find that public workforce development system customers can benefit from the results of developing a Combined State Plan that fosters program integration and alignment and optimal use of resources. The Departments' worked together to implement a robust review process across all partner agencies and consider this review process to be integral to effective joint planning and implementation. Performance issues have been addressed through the WIOA State Plan ICR, the WIOA Joint Performance ICR, and related joint guidance.

Comments: One commenter said it is unclear how the rejection of one part of a Combined State Plan would affect funding for the other programs. A commenter stated that the regulation implies that disapproval by any Secretary of their respective program will result in disapproval of the Combined State Plan as a whole, which provides incentive to submit a Unified State Plan (instead of a Combined State Plan). Similarly, another commenter said disapproval of a section of the plan pertaining to a program not considered to be a core program should not result in the disapproval of the entire plan. Another commenter requested additional guidance on the process to follow if the RSA Commissioner does not approve the VR portion of the State Plan.

Departments' Response: Per § 676.143(h), disapproval of a section of a Combined State Plan pertaining to a Combined State Plan partner program does not impact the approval for the portions of the Combined State Plan that apply to the core programs. In the process mentioned above, the common planning elements and program-specific elements of Combined State Plans are reviewed concurrently across the Departments of Labor and Education and other relevant agencies, with the approval determination by RSA occurring first, and with additional time allowed for specific Combined State Plan sections that fall within the purview of U.S. Department of Agriculture, HUD, or HHS. A determination regarding approval or disapproval for the common elements and the core programs may be issued separately from the approval determination for program-specific requirements for Combined State Plan partner programs, including those that allow 120 days for review. The Departments have added a new § 676.143(h) to clarify that the Secretaries of Labor and Education's written determination of approval or disapproval of the portion of the plan for the six core programs may be separate from the written determination of approval, disapproval, or completeness for program-specific requirements of Combined State Plan partner programs specified in § 676.140(d) in the Combined State Plan. However, the portions of the Combined State Plans that cover the core programs must be approved by all core program agencies.

Special Rule for Perkins Act Programs

Comments: Several commenters referred to § 676.143(f) in the NPRM, which has been renumbered to § 676.143(i) in the Joint WIOA Final Rule, the special regulation for programs authorized by the Perkins Act, which directs the State to come to an agreement with the Secretary of Education regarding State performance measures. One commenter requested further clarification as to what accountability measures would take

precedence under an agreement between the Secretary of Education and a State. The commenter stated that the Departments should specify that when a State chooses to include Perkins in a Combined State Plan, the State is required to include the totality of the Perkins State Plan in the Combined State Plan and cannot break off the parts relevant only to postsecondary CTE.

Departments' Response: WIOA sec. 103 does not subject the Combined State Plan partner programs to the WIOA sec. 116 primary indicators of performance. WIOA sec. 103(b)(1) only requires the Combined State Plan partner programs, which include Perkins programs, to include the requirements, if any, applicable to that program or activity under the Federal law authorizing the program or activity. The WIOA State Plan ICR Appendix 1 further clarifies what performance information States must include in the State Plan. As discussed in § 676.140 above, if a State chooses to include postsecondary CTE programs under the Perkins Act as a part of its Combined State Plan, the State would submit the entirety of the State Plan, including any annual revisions, pertaining to the CTE programs authorized under the Perkins Act. In addition, the State would submit plan modifications annually to align with Perkins' annual State Plan cycle, consistent with § 676.145.

Section 676.145 What are the requirements for modifications of the Combined State Plan?

Section 676.145 specifies requirements for modifying a Combined State Plan. Sections 676.145(a)(1) through (3) have been added to mirror the core program modification requirements specified for Unified State Plans in § 676.135(b). Section 676.145(a)(1) through (3) outline three instances in which a modification for the core programs is required. These instances include: (1) At the conclusion of the first 2-year period of a 4-year State Plan, (2) when changes in Federal or State law substantially affect the plan's implementation, and (3) when there are substantial changes to the State's workforce investment system. The Departments revised § 676.145(a)(3) to clarify that modifications to the Combined State Plans are required when States modify their negotiated levels of performance. This clarification was made for consistency with the changes to part 677 on the performance accountability system. The Departments have added a clarifying edit to § 676.145(c)(1) to explain that States have discretion to apply the plan modification requirements for core programs to Combined State Plan partner programs so long as it is consistent with any other modification requirements for that program. The Departments have incorporated proposed § 676.145(f) into § 676.145(c)(2) to clarify these provisions to address commenters' confusion in this area, and deleted paragraph (f). The Departments also have made technical edits at § 676.145(d). Except for the changes described here, this section remains substantively the same as that proposed in the NPRM.

Timeframe for Combined State Plan Modifications

Comments: A couple of commenters said the Departments should consider emphasizing the opportunity for States to submit Combined Plan modifications following submission of the initial plan to ensure that Combined Plan partner programs continue to be engaged in the planning and implementation process. Some commenters said the Federal agencies responsible for the Combined Plan partner programs should accept the Combined State Plan on the timeline outlined in WIOA and not prescribe more frequent updates or different timeframes for modifications and renewals. In addition, the commenters said the submission deadlines must align. These commenters also said the Departments should issue final guidance early enough that there is sufficient time to negotiate the levels of performance for State performance accountability measures before submission deadline.

Departments' Response: The Departments agree that modifications following submission of the initial plan are useful to ensure that Combined State Plan partner programs continue to be engaged in the planning and implementation process. Sections 676.135 and 676.145 enable States to continue to modify and improve the planning process of both core and Combined State Plan partner programs through Unified and Combined State Plans. The Departments are not prescribing more frequent updates beyond what is required under WIOA timeframes. However, the Departments have revised § 676.145(a) to clarify the circumstances under which a Combined State Plan must be modified for core programs, which are the same modification requirements that apply under Unified State Plans. The States have the discretion to apply these modification requirements to Combined State Plan partner programs or activities. The Departments have added regulatory text at § 676.145(c)(1) to clarify that a State may apply these modification requirements to Combined State Plan partner programs, as long as this is consistent with any other modification requirements for those specific programs. As discussed under § 676.140, the Departments do not have the authority to change the planning requirements, including submission deadlines, that are not under WIOA's jurisdiction. The Departments have provided additional clarity on the review and approval process through joint planning guidelines.

Combined State Plan Modification Requirements

Unlike § 676.135, which addresses modifications of Unified State Plans, proposed § 676.145, which addressed modifications for Combined State Plans, did not require modification of a plan when there are ''substantial changes'' to a State's workforce investment system.

Comments: The Departments received comments requesting that language similar to that in § 676.135(b)(2) and (3), requiring States to submit modifications when there are ''substantial changes,'' be added to the section pertaining to Combined State Plan modifications.

Departments' Response: The Departments considered these comments and agree. The Departments have revised proposed § 676.145(a) by adding new paragraphs (a)(2) and (a)(3) that are essentially identical to § 676.135(b)(2) and (3) to clarify that the same modification requirements that apply to the Unified Plan also apply to the portions of the Combined Plan covering the core programs. States are required to submit a modification for the portions of the Combined Plan covering the core programs when (1) changes in Federal or State law or policy substantially affect the strategies, goals, and priorities upon which the Combined State Plan is based, and (2) when there are changes in the statewide vision, strategies, policies, State negotiated levels of performance, the methodology used to determine local allocation of funds, reorganizations which change the working relationship with system employees, changes in organizational responsibilities, changes to the membership structure of the State WDB or alternative entity, and similar substantial changes to the State's workforce investment system. Under WIOA sec. 103(b)(1), it is at the discretion of the State to decide whether to apply these modification requirements to Combined State Plan partner programs or activities, as long as this is consistent with any other modification requirements for those specific programs. The Departments

have added language at § 676.145(c)(1) to clarify this distinction.

Public Comment on Combined Plan Modifications

In the NPRM, the Departments sought comments on how to streamline the public review and comment process for Combined State Plan modifications. The Departments further sought comments in the NPRM on whether it is advisable to limit the requirement for public comment on plan modifications to significant or substantial modifications to the common planning elements and, if so, how the Departments might define ''significant'' or ''substantial changes.''

Comments: One commenter indicated that historically, in-person meetings are poorly attended, so comments in relation to § 676.145 should be allowed via other methods, such as surveys, webinars, video conferences, and phone conferences. Another commenter said public review should not exceed 30 days.

Some commenters said the Departments should limit the comment process under § 676.145 to significant or substantial modifications, such as substantive change to service delivery or participating partners, adding or removing a Combined State Plan partner program, or discretionary changes within a program that would directly affect the provision of services and its collaboration with other programs (excluding programmatic changes required due to audit findings or sanctions). One commenter said the Departments should allow public comment on the shared planning elements to streamline this process significantly, particularly for States in which core program agencies have different governance and review processes.

Departments' Response: In the Joint WIOA Final Rule, the Departments have not included requirements related to the timing, method, or other specifics related to public review and comment. The Departments leave much of the process related to public review and comment to the discretion of the State so long as regulatory requirements for public comment are met. If, based on the regulatory categories described in § 676.145, a Combined State Plan modification is required, such a plan modification is subject to the requirements for comment as described in § 676.145(d). As described in § 676.145(d), modifications to the Combined State Plan are subject to the same public review and comment requirements that apply to the development of the original Combined State Plan as described in § 676.143(c) except that, if the modification, amendment, or revision affects the administration of a particular Combined State Plan partner program and has no impact on the Combined State Plan as a whole or the integration and administration of the core and other Combined State Plan partner programs at the State level, a State may comply instead with the procedures and requirements applicable to the particular Combined State Plan partner program. The Departments have made a technical edit to § 676.145(c)(2)(ii) for clarity by adding the word ''other'' before Combined State Plan partner programs in the phrase ''has no impact on the Combined State Plan as a whole or the integration and administration of the core and Combined State Plan partner programs at the State level.'' The Combined State Plan partner programs being referred to here are those other than the program that is the focus of the modification. States may determine, at their discretion, if these same plan modification requirements apply to Combined State Plan partner programs included in the Combined State Plan. States can further use their own discretion to provide a reasonable period of time for public comment. Many State laws also require a minimum number of days for public comment. Likewise, States may determine the best way to streamline the public comment process while ensuring that regulatory requirements for public comment are met.

In addition to the regulatory text changes discussed above, various non-substantive changes have been made for purposes of correcting typographical errors and improving clarity that have not been necessary to note elsewhere.

B. Performance Accountability Under Title I of the Workforce Innovation and Opportunity Act (20 CFR Part 677; 34 CFR Part 361, Subpart E; 34 CFR Part 463, Subpart I)

1. Introduction

Section 116 of WIOA establishes performance accountability indicators and performance reporting requirements to assess the effectiveness of States and local areas in achieving positive outcomes for individuals served by the workforce development system's six core programs described in sec. 116(b)(3)(A)(ii) of WIOA. These six core programs are the adult, dislocated worker, and youth programs under title I of WIOA; AEFLA program under WIOA title II; Employment Service program authorized under the Wagner-Peyser Act, as amended by WIOA title III (Wagner-Peyser Act Employment Service program); and VR program authorized under title I of the Rehabilitation Act of 1973, as amended by WIOA title IV.

The performance accountability system established in WIOA subtitle A (''System Alignment'') in sec. 116 requires that the performance accountability requirements apply across all six core programs with few exceptions. As such, the six core programs have an historic opportunity to align performance-related definitions, streamline performance indicators, integrate reporting, and ensure comparable data collection and reporting across all the core programs, while also implementing program-specific requirements.

Through this Joint WIOA Final Rule, the Departments are laying the foundation for a performance accountability system that serves all core programs and their targeted populations in a manner that is customer-focused and that supports an integrated service design and delivery model. In addition, WIOA requires additional DOL-administered title I programs, specifically Job Corps, Native American programs, the Migrant and Seasonal Farmworker programs, and the YouthBuild program, to comply with the same primary indicators as the core programs (see 20 CFR part 686 and 20 CFR part 684 of the DOL WIOA Final Rule published elsewhere in this issue of the **Federal Register**). The inclusion of these additional DOL-administered programs into the common performance accountability system will better align both the core programs and other education and training programs across the public workforce system. Further, DOL is including other workforce programs under its purview in this performance-related streamlining effort, including the JVSG program as authorized by the Jobs for Veterans Act and other appropriate formula and competitive grant programs.

In the section-by-section discussions of each performance accountability regulatory provision below, the heading references the DOL CFR section number. The ED is establishing in this Joint WIOA Final Rule identical provisions at 34 CFR part 361, subpart E (under its State VR program regulations) and at 34 CFR part 463, subpart I (under a new CFR part for AEFLA regulations). Although for purposes of brevity, the section-by-section discussions for each provision appear only once—in conjunction with the DOL section number—the discussions nevertheless constitute the Departments' collective explanation and rationale for each regulatory provision. When the

regulations are published in the CFR, these joint performance regulations will appear in each of the CFR parts identified above.

2. Definitions (20 CFR 677.150; 34 CFR 361.150; 34 CFR 463.150)

Section 677.150 What definitions apply to Workforce Innovation and Opportunity Act performance accountability provisions?

Section 677.150 defines ''participant,'' ''reportable individual,'' ''exit,'' and ''State,'' which are key performance-related terms applicable to all six core programs for implementation of the performance accountability system under sec. 116 of WIOA and part 677 of these joint regulations. The definition of ''participant'' has been revised, as explained below, to distinguish clearly between participants and reportable individuals. The definitions of ''reportable individual'' and ''exit'' have been revised as explained below. The Departments also have added a definition of ''State,'' which includes the outlying areas for purposes of part 677, other than in regard to sanctions or the statistical adjustment model. These definitions establish the foundation of an integrated performance accountability system and support clarity and alignment of performance metrics and comparability among the programs, States, and outlying areas.

Definition of ''Participant'' (§ 677.150(a))

Comments: Numerous commenters responded to the Departments' solicitations for input on the joint NPRM regarding the proposed definitions of ''participant,'' ''reportable individual,'' and ''exit.'' While several commenters supported the definition of ''participant'' generally, many commenters raised multiple concerns regarding the distinction between self-service and staff-assisted service. A common concern was that the proposed definition of ''participant'' excludes self-service only individuals, which conflicts with WIOA's goal of leveraging technology to improve service delivery. Some commenters expressed concerns about the term ''staff-assisted service,'' stating that the term should either be defined or removed because it is critical to understanding the precise distinction between a ''participant'' and a ''reportable individual.'' Several commenters asserted that the Departments should remove ''staff-assisted service'' from the definition of ''participant'' because it is not defined in WIOA or regulations and can be misleading when providing upfront assessment services to youth. Other commenters encouraged the Departments to define ''staff-assisted service'' in order to provide clarification. One commenter indicated that the regulatory definition of ''participant,'' for purposes of the title I youth program, should reflect policy positions articulated by the Departments in the Joint WIOA NPRM's preamble.

Commenters also suggested additional terms and concepts that could be defined, including providing definitions for ''qualifying services,'' ''facilitated self-service,'' and ''career and training services.'' One commenter asserted that the Departments should issue timely guidance with additional definitions and clarifications or allow States to continue using definitions contained in WIA.

Departments' Response: The Departments agree that it is critical that these definitions be clear in order to ensure compliant data collection and reporting. Section 677.150(a) provides a definition of ''participant'' that applies to all six core programs because the primary performance indicators set forth in sec. 116(b)(2)(A)(i) of WIOA specifically base performance calculations on the participants in each of the core programs. The definition of ''participant'' establishes a common point at which an individual is meaningfully engaged in a core program and thus, it is appropriate for the person to be included in the primary indicators of performance. In the NPRM, the Departments attempted to distinguish ''staff-assisted services,'' which required more meaningful interaction with a core program, from ''self-services'' and information-only services and activities, where individuals engaged in these activities that require minimal interaction with the programs, by which the Departments mean minimal resources are spent on their behalf in most cases. While individuals who receive only self-service or information-only services and activities do not satisfy the definition of ''participant,'' these individuals are considered ''reportable individuals'' as defined in § 677.150(b) and discussed in more detail below.

The Departments considered each of the suggested revisions to the proposed definition of ''participant'' and have modified § 677.150 to clarify the application of this definition to requirements under WIOA. The Departments made the following changes to the definition of ''participant'' in § 677.150(a).

In § 677.150(a), the Departments replaced the phrase ''staff-assisted services'' with ''services other than those described in § 677.150(a)(3).'' In so doing, the Departments eliminate the confusion of what is meant by ''staff-assisted services'' and make clear that individuals who receive the services described in § 677.150(a)(3) will not be deemed to be ''participants'' for purposes of the performance accountability system requirements under part 677, but rather will constitute a ''reportable individual'' under § 677.150(b).

The Departments provided additional clarification in renumbered § 677.150(a)(3) to describe what does and does not constitute self-service and information-only services and activities. In so doing, the Departments have eliminated the confusion noted by commenters. Specifically, the revisions contained in § 677.150(a)(3) clarify that the difference between reportable individual and participant is the point when a reportable individual uses services other than those identified in renumbered § 677.150(a)(3). The Departments clarify what is meant by self-service and information-only services and activities, thereby avoiding use of the term ''staff-assisted services'' in this regulation, which raised concerns among commenters.

Because the Departments appreciate the concerns raised by commenters and recognize the changing landscape and advances in service delivery and design, the Departments added § 677.150(a)(3)(ii)(A) to describe self-service. The Departments recognize that not all electronic technologies are self-service and that individuals engaged in this type of service could potentially meet the definition of ''participant.'' For example, there may be some services that provide robust levels of assistance in assessing a person's skills and matching that person to a job that are provided using electronic technologies that involve one-on-one interaction with a one-stop center staff member, such as an Internet chat room, or interactive technology, such as video conferencing, that would result in the individual becoming a participant. Additionally, the Departments acknowledge how fast technology evolves and new technology emerges that could be used by States and local areas to maximize available resources and better serve job seekers, workers, and employers. The Departments will continue to assess the field and emerging innovative technologies that may provide more cost-effective services and inform the workforce system of such developments, and their allowable uses, through program guidance.

The Departments are continuing to examine staff-assisted virtual service

delivery in order to determine its potential. Paragraph (a)(3)(ii)(B) of § 677.150 clarifies that virtual services providing support above an individual's independent job- or information-seeking efforts would not qualify as self-service, thus resulting in the individual becoming a ''participant.''.

The Departments have concluded that the following revisions to § 677.150(a)(3), described in more detail below, add the clarity requested by commenters:

Self-service occurs when individuals independently access the workforce development system information and activities with very little to no staff assistance. This can be done in either a physical location, such as a one-stop center resource room or partner agency, or remotely via the use of electronic technologies, with very little to no staff assistance.

Importantly, if a service is virtual service it is not automatically a self-service. As many commenters pointed out, there have been great strides made in the area of virtual service design and delivery allowing for staff to provide support and services through a variety of in-person and virtual platforms. For example, there may be some services that are provided using electronic technologies that involve one-on-one interaction with a one-stop center staff member or interactive technology, such as video conferencing, that would trigger participation. Furthermore, individuals who receive self-service or information-only services and activities can still be participants if they receive services other than self-service or information-only activities.

Information-only services or activities are activities or services that provide readily available information that does not require an assessment by a staff member of the individual's skills, education, or career objectives. In a public workforce development setting, information activities or services may include both self-service basic career services and staff-assisted basic career services. Both are designed to inform and educate an individual about the labor market and to enable an individual to identify his or her employment strengths, weaknesses, and range of appropriate services. However, basic career services that require significant staff involvement are not considered information-only services or activities.

Applying the above guidance to determining when a reportable individual satisfies the definition of a ''participant,'' an individual is a reportable individual, but not a participant, when a staff member provides the individual with readily available information that does not require an assessment of the individual's skills, education, or career objectives, because the individual is a recipient of information-only services or activities. Such information could include labor market trends, the unemployment rate, businesses that are hiring or reducing their workforce, information on high growth industries, occupations that are in demand, and referrals other than referrals to employment. Information-only services or activities also occur when a staff member provides the individual with information and instructions on how to access the variety of other services available in the one-stop center, including tools in the resource room.

Significant staff involvement that would result in an individual qualifying as a participant includes a staff member's assessment of an individual's skills, education, or career objectives in order to achieve any of the following:

- Assist individuals in deciding on appropriate next steps in the search for employment, training, and related services, including job referral;
- Assist individuals in assessing their personal barriers to employment; or
- Assist individuals in accessing other related services necessary to enhance their employability and individual employment related needs.

The Departments also added a new § 677.150(a)(2) to align the regulatory text definition of ''participant,'' for purposes of the title I youth program, with the intent expressed in the NPRM. New § 677.150(a)(2) clarifies the definition of a ''participant'' for purposes of the WIOA title I youth program.

The Departments did not add a definition of ''staff-assisted service,'' as suggested by commenters, because the revisions to § 677.150(a) described above resulted in the removal of the term from the regulatory text. In addition, the Departments declined to add the recommended definitions of ''qualifying services'' or ''facilitated self-services,'' because the modifications made to the definition of ''participant''—particularly at § 677.150(a)(3) regarding clarifications of self-service and information-only services or activities—will address the needs of commenters. In addition, the Departments consider additional recommended definitions to fall within the scope of either the WIOA Joint Performance ICR (which identify performance calculations, definitions, and reporting parameters) or operating and programmatic guidance.

The Departments did not add definitions of ''career services'' and ''training services'' because WIOA sec. 134(c)(2) and (3) define ''career services'' and ''training services,'' respectively, and these terms are further defined at § 678.430 (''What are career services?'') in the Joint WIOA Final Rule and 20 CFR 680.200 (''What are training services for adult and dislocated workers?''), in the DOL WIOA Final Rule, both of which are published in this issue of the **Federal Register**. The WIOA Joint Performance ICR contains further specifications regarding the collection and reporting of career and training services under this section. The Departments intend to issue further clarifying programmatic guidance regarding these and other performance-related definitions in order to assist States and outlying areas in implementing them.

Comments: A commenter acknowledged the problems associated with outcome evaluations of participants who do not go through an intake process but stated that the performance metrics should give credit for the investment of resources and staff required to maintain effective self-service systems. Another commenter asserted that self-service individuals should be included in the definition of ''participant'' to allow States to fully convey the impact and return on investment for this large customer group.

Departments' Response: The Departments recognize commenters' concerns about the resources required to maintain effective self-service systems. Although performance calculations on the primary indicators of performance are limited to individuals who meet the definition of participant and do not include individuals who only use the self-service system, other information that captures resources and costs associated with those individuals served by the public workforce system at the self-service or information-only levels is collected and reported in the State annual performance reports under § 677.160, and additional elements are required through associated ICRs published by the Departments.

The Departments expect that because information about reportable individuals, including those who access self-service and information-only services or activities, will be included in the State annual performance reports and associated WIOA Joint Performance ICR or Department-specific ICRs, such investments by States and local areas will be recognized. The Departments note that the changes in the regulatory text maintain the policy expressed by

the Departments in the NPRM. Individuals who only use the self-service system or who receive information-only services or activities are not defined as ''participants.'' No change to the regulatory text was made in response to these comments.

Comments: A commenter opposed the exclusion of self-service individuals in the definition of ''participant,'' asserting that it creates a bias against rural areas where one-stop centers are less accessible.

Conversely, a number of other commenters stated that individuals receiving self-service and information-only services should not be considered participants for performance purposes, stating that participation should not begin until an individual receives a staff-assisted service. A commenter agreed that self-service individuals should be excluded from the definition of ''participant,'' but suggested that a performance analysis be conducted to assess the impact of exclusion of self-service results on performance.

Departments' Response: The Departments recognize commenters' concerns about the delivery of services in rural areas and recognize the importance of leveraging virtual services technology to improve the delivery of services in such areas. As discussed above, the Departments do not consider all services provided virtually to be ''self-service'' and reiterate that such activities, even when delivered virtually, can trigger participation and subsequent inclusion in performance calculations. The Departments developed the proposed definitions in order to maintain a level of rigor and accountability that is consistently applied across programs, while also providing a platform that is flexible enough to accommodate changes in service delivery design and advancements in technology. As stated above, no changes to the regulatory text regarding individuals who only use the self-service system were made in response to comments, as these individuals are not considered ''participants'' for purposes of the performance accountability system.

With regard to the recommendation that a performance analysis be conducted to assess the impact of exclusion of self-service and information-only services or activities, the Departments analyzed a number of factors before proposing the definition of participant, including the relative impact of self-service exclusion and inclusion, and concluded that exclusion of such services had little to no impact on performance outcomes. Therefore, as stated above, the Departments decline to change the regulation's definition of participants based on these comments.

With regard to the recommendation that participation begin only when an individual receives a staff-assisted service, the Departments have concluded that to define such a precise attachment point in regulation would prevent the performance accountability system from being able to adapt and account for all the services that the programs are providing. For example, an individual could receive staff-assisted services in the form of an assessment in the WIOA youth program, or in the form of fewer than 12 contact hours of AEFLA services, yet still appropriately be excluded from the definition of a participant.

Comments: A few commenters suggested that self-service participants should be included in Wagner-Peyser Act employment indicators or measured separately.

Departments' Response: The Departments considered collection and reporting burdens of doing so and did not revise the regulatory text to require additional collection and reporting on reportable individuals beyond the associated counts and information already required under the WIOA Joint Performance ICR. However, States should feel free to conduct additional analysis beyond what is required to be submitted to the Departments, such as an analysis on outcome of Wagner-Peyser Act self-service individuals. No change to the regulatory text was made in response to these comments.

Comments: Several commenters remarked that, under the NPRM, a youth receiving an assessment could be considered as receiving a staff-assisted service and therefore be considered a ''participant.'' These commenters further stated that this proposed regulation would conflict with the discussion in the NPRM, which had proposed that a ''participant'' for performance calculation purposes of the WIOA youth program, would be a ''reportable individual'' who was determined eligible, received an assessment, and received a program element. These commenters asserted that an assessment alone should not be considered a staff-assisted service, and that the regulation should be revised to conform to the language in the preamble of the NPRM. Another commenter expressed similar concerns, stating that an assessment alone for any individual in any program should not trigger participation.

Departments' Response: The Departments agree with the numerous commenters who asserted the NPRM text regarding the definition of ''participant,'' as applied to the WIOA title I youth programs, could potentially conflict with the stated intent in the preamble. The Departments, therefore, revised the regulatory text by adding a new § 677.150(a)(2), which reflects the intent stated in the NPRM preamble. In so doing, the Departments have made clear that a WIOA program youth is not considered a ''participant,'' and subsequently included in performance calculations, until the youth has been determined eligible, received an objective assessment, developed an individual service strategy, and received 1 of the 14 youth program elements (as outlined in WIOA sec. 129(c)(2)). The Departments have concluded that this change is consistent with the general definition of a ''participant'' in § 677.150(a), as well as the application of the definition to all core programs. This differs from the NPRM only by additionally requiring the youth participant to have satisfied the applicable program requirement for provision of services, including eligibility determination, objective assessment, and the development of an individual service strategy, as required under WIOA sec. 129(c)(1)(B).

Comments: A few commenters suggested that co-enrollees be counted as participants in all of the core programs from which they are receiving services. A few commenters discussed the benefits of co-enrollment, particularly for youth populations, and supported the idea that eligible individuals may be co-enrolled in title I youth services and title II adult education programs. One commenter requested clarification regarding how to account for individuals enrolled in multiple core programs. Another commenter remarked that differences among programs and uncertainty about reporting co-enrollees create a disincentive for co-enrollment.

Departments' Response: The Departments recognize the value of co-enrollment across the core programs and greatly encourage efforts by the core programs in States to establish the data infrastructure and partnerships necessary to facilitate seamless enrollment in one or more core programs under WIOA. The Departments encourage co-enrollment between those programs that are required partners under WIOA, such as the Jobs for Veterans State Grant Programs, the Trade Adjustment Assistance (TAA) programs, and others as outlined in sec. 121(b)(1)(B) of WIOA.

However, the Departments have concluded there is no need for revision to the regulations to address these comments since WIOA sec. 116(d)(2)(I)

and § 677.160(a)(1) require core programs to report the number of participants who are enrolled in more than one of the programs described in WIOA sec. 116(b)(3)(A)(ii), disaggregated by each subpopulation of such individuals. Therefore, individuals who are co-enrolled in more than one core program and who meet the definition of participant under each respective program must be included in each respective program's performance calculations.

These calculations, as proposed under the WIOA Joint Performance ICR, would be done independent of the participant's participation in another core program unless a State opted to implement such policies for co-enrollment that allows for a common participation or exit date based on entering any of the core programs. Under WIA title I, some States maintained similar policies. For example, under WIA title I, in those cases where an individual was initially enrolled in the Wagner-Peyser Act program and subsequently received services under another DOL-administered program, the participation date for each program was the same and the receipt of a program's service was recorded as the date of receipt for first service as named. Such practices are allowed to continue under WIOA. Irrespective of the dates for participation and exit, each program would account for the participants in its program, and would be accountable for the outcomes of such participants in their reporting. For example, a title I youth participant who is co-enrolled in a title II AEFLA program and who also meets the definition of participant under title II, would be included in the State performance report for both title I youth and the AEFLA program under title II. No change to the regulatory text was made in response to these comments.

Comments: Several commenters addressed the applicability of the ''participant'' definition to the VR program. A few of these commenters noted that the proposed definition of ''participant'' would inflate the number of individuals exiting the VR program without achieving an employment outcome. Of these, one commenter stated it is not clear how the definitions of ''participant,'' ''exit,'' and the calculation of the performance indicators that rely on quarterly wage data are being operationalized in the proposed VR ICR for the RSA–911, particularly as it relates to calculating the denominator, and numerator. Specifically, this commenter said that it appeared that quarterly earnings and Federal Employer Identification Numbers (FEINs) only should be supplied for those participants who achieve competitive integrated employment. As a result, this commenter stated this would mean a significant number of VR participants would be included in the denominator but would be automatically excluded from the numerator for performance calculations if they did not achieve a competitive integrated employment outcome, even though they received significant VR services before exiting the VR program. This commenter was concerned that this approach would not provide a consistent and equitable comparison across all core programs since the definition of ''participant'' means an individual who received staff-assisted services. For example, this commenter asserted that WIOA title I and title III (Wagner-Peyser Act Employment Service) staff-assisted services may be quite limited compared to the intensive and sustained services provided to VR customers under an individualized plan for employment (IPE), the development of which requires substantial VR counselor investment and is in itself a service that may improve employment prospects. Therefore, this commenter recommended that the denominator be likewise limited to those participants who achieved competitive integrated employment or, in the alternative, require quarterly earnings and FEINs for all participants, not just those who achieved competitive integrated employment. This commenter recommended that RSA provide the specific formula for calculating performance indicators and provide a comment period. A few commenters stated that the proposed definition of ''participant'' would exclude a potentially large number of students with disabilities who receive pre-employment transition services under the VR program. Another commenter urged the Departments to provide guidance regarding the application of the ''participant'' definition to the VR program.

Departments' Response: The Departments agree that the definition of ''participant,'' for purposes of the VR program, will include both those individuals who exit the VR program after achieving an employment outcome as well as those individuals who exit without achieving an employment outcome. While the Departments understand that this calculation is a departure from what was done by VR agencies under prior 34 CFR 361.84(c), § 677.150(a)(1) of the Joint WIOA Final Rule is consistent with the use of the term ''participant'' throughout sec. 116 of WIOA and its application to the primary performance indicators set forth in sec. 116(b)(2)(A)(i) of WIOA. Moreover, the definition of ''participant,'' for purposes of the VR program, at § 677.150(a)(1) is consistent with the definition as applied to all core programs in § 677.150(a). Specifically, the definition of ''participant'' is broad enough to account for programmatic differences but narrow enough to capture the same type of individual with respect to each of the core programs. As the commenter noted, Wagner-Peyser Act services are often characterized as self-services and information-only activities. In accordance with § 677.150(a)(3), individuals receiving those kinds of services would not meet the definition of ''participant'' and, thus, there would be no comparison in the performance calculations between these individuals and participants of the VR program. However, individuals receiving Wagner-Peyser Act services that go beyond self-services or information-only activities would meet the definition of ''participant'' in § 677.150(a). As such, there would be comparability between this participant and a participant of the VR program. The Departments recognize that VR services are provided in a much more intensive manner and for a more extended period of time than those provided by the Wagner-Peyser Act program. Such differences will be reflected in the performance levels established for each of the core programs.

With respect to performance calculations, the three employment-related indicators measure the percentage of participants who are employed in the second and fourth quarters after exit, as well as their median earnings in the second quarter after exit. The Departments provide further guidance regarding the performance calculations in the WIOA Joint Performance ICR.

The Departments also agree that students with disabilities who receive pre-employment transition services without having applied, or been determined eligible, for the VR program would not satisfy the definition of ''participant'' as set forth in § 677.150(a)(1), but rather would be tracked and reported as ''reportable individuals,'' as defined in § 677.150(b). However, if a student with a disability applies and is determined eligible for the VR program and develops an IPE that includes the provision of pre-employment transition services or any other VR service, such student would satisfy the definition of ''participant'' as

set forth in § 677.150(a)(1) and would be included in the performance calculations as such. The Departments have provided additional guidance regarding the reporting of ''participants'' in the WIOA Joint Performance ICR. No change was made to the regulation at § 677.150(a)(1) in response to the comments.

Comments: Several commenters urged the Departments to adopt consistent definitions regarding point of enrollment across titles triggered by engagement in program activity, not just initial assessment. They expressed particular concern for the youth program.

Departments' Response: The definition of ''participant'' takes into consideration the unique purposes and characteristics of each program and the ways in which an individual may access, and ultimately engage in, services in each of the core programs, thereby focusing on the established common point in service design and delivery that an individual reaches regardless of the program. The Departments concluded that it was sufficient to revise the definition of ''participant'' for purposes of the WIOA youth program.

Comments: Several commenters sought clarification concerning the distinction between the data collected for reportable individuals and participants, particularly with regard to whether they are included in performance calculations for the primary indicators of performance.

Departments' Response: While the Departments will collect and track information on reportable individuals as well as participants, the Departments currently do not intend to require reporting of outcomes of reportable individuals. The Departments will notify States via the ICR process of any collection and reporting requirements for reportable individuals. No change to the regulatory text was made in response to these comments.

Comments: A commenter asserted that older individuals with barriers to employment may require priority in receiving staff-assisted services, since these individuals are not as likely to use self-service tools.

Departments' Response: The Departments recognize the unique challenges faced by the different populations with barriers to employment that affect both their access to and utilization of services within the public workforce system. WIOA provides for meaningful access to individuals seeking services, including individuals with multiple barriers to employment. The regulation no longer refers to staff-assisted services.

Comments: Several commenters stated that while the definition of ''participant'' is well suited for WIOA performance accountability purposes, it is not suitable for many education programs and postsecondary students. These commenters stated that postsecondary students may participate in the workforce system in ways that are not captured in the definition. For instance, students may take courses and determine a degree pathway but never officially enroll in a program of study.

Departments' Response: The definition of ''participant'' establishes a common point at which an individual is meaningfully engaged in a core program. This takes into consideration the unique purposes and characteristics of each program and the ways in which an individual may access, and ultimately engage in, services in each of these programs. For example, an individual who accesses postsecondary education through the VR program, as set forth in title IV of WIOA, would meet the definition of participant at the point at which the eligible individual has an approved and signed IPE. Likewise, an individual accessing a career pathway program funded through title II would meet the definition of participant once the individual has completed at least 12 contact hours. Therefore, because programmatic differences are already accounted for, including differences regarding educational programs, the Departments have made no change to this Joint WIOA Final Rule regarding the definition of ''participant'' as applied to an educational program. The Departments note that further clarity is provided through the WIOA Joint Performance ICR. No change to the regulatory text was made in response to these comments.

Comments: A few commenters stated that the definition of ''participant'' is problematic when applied to all individuals in a program of study for the purpose of the eligible training provider performance report.

Departments' Response: The Departments recognize the need for clarity on terms as they apply to the eligible training provider (ETP) performance reports applicable to the adult and dislocated worker programs. There is further discussion on this and associated issues in the preamble of § 677.230 below. The Departments do not consider all individuals in a program of study through an ETP as falling within the definition of participants as defined under § 677.150. No change to the regulatory text was made in response to these comments.

Comments: Although the Departments received no comments specifically on proposed § 677.150(a)(4), which requires that programs must include participants in their performance calculations, the Departments received comments with respect to other areas of performance accountability that highlighted the intersection between WIOA core programs and their partner programs. Some commenters addressed the general applicability of these provisions to the national programs authorized under title I, particularly with regard to those programs identified in WIOA sec. 121(b)(1)(B).

Departments' Response: The Departments reiterate that sec. 116 applies to other programs, including the national programs and the partner programs identified in WIOA sec. 121(b)(1)(B), to the extent provided for by provisions of WIOA pertaining to those programs and their authorizing statutes and implementing regulations. In some instances, these statutes or regulations invoke the performance accountability provisions of WIOA sec. 116. In other instances, a program has its own statutory or regulatory performance provisions that apply to the program. In the case of ETP programs authorized at 20 CFR part 680 and reported through § 677.230 of these joint regulations, the definitions under § 677.150 only apply to those individuals who are WIOA program participants who received training from an ETP. Where § 677.230 outlines required reporting for all individuals in a program of study, these definitions under § 677.150 do not apply. Further direction regarding the terms, calculations, and reporting is provided and discussed in the WIOA Joint Performance ICR. No change to the regulatory text was made in response to these comments.

Because of WIOA sec. 134's unique eligibility requirements, the Departments do not consider individuals who receive incumbent worker training to be participants required for inclusion in the WIOA performance indicator calculations. WIOA sec. 134(d)(4) requires the Local WDB to determine if an employer is eligible to have its employees receive incumbent worker training; there is no separate determination of the eligibility of any particular employee to receive incumbent worker training.

Definition of ''Reportable Individual'' (§ 677.150(b))

Section 677.150(b) defines ''reportable individual'' as an individual who has

taken action that demonstrates an intent to use program services and who meets specific program criteria for reporting, which may include the provision of identifying information, the use of a self-service system, or receipt of information-only services or activities. This approach requires counting as a ''reportable individual'' those who use the self-service system, or who receive only information-only services or activities, as well as those who receive other services that may occur prior to an individual meeting the definition of ''participant'' in § 677.150(a).

A key difference between ''reportable individuals'' and ''participants'' is that reportable individuals are not included in performance calculations for primary indicators of performance. Furthermore, there currently is no requirement for the collection and reporting of outcome data for reportable individuals, but the Departments may propose an amended ICR through an additional PRA notice and comment period, to require such collections and reporting in the future if determined to be appropriate. The Departments intend to issue more detailed guidance on the tracking and reporting of reportable individuals under WIOA through the WIOA Joint Performance ICR, Department-specific ICRs, guidance, and technical assistance.

The Departments revised § 677.150(b) by deleting the word ''core'' to clarify that the definition of a ''reportable individual'' is not limited to core programs, as had appeared in proposed § 677.150(b). With this change, a ''reportable individual'' is one who has taken action that demonstrates intent to use program services and who meets specific reporting criteria of the program. The Departments also revised § 677.150(b) to emphasize that the listed examples of actions taken by a reporting individual (*i.e.,* providing identifying information, using the self-service system, or receiving information-only services or activities) are neither exhaustive nor required. An individual may be properly treated as a reportable individual without having taken all of the actions identified at § 677.150(b). Similarly, an individual may take action demonstrating an intent to use program services by meeting specific program reporting criteria other than those identified at § 677.150(b).

Comments: Of the commenters who remarked on the proposed definition of ''reportable individual,'' most expressed support. Multiple commenters applauded the Departments for establishing a definition that is broad enough to cover students with disabilities who access pre-employment transition services under the VR program but do not subsequently apply for VR services.

Departments' Response: The Departments will continue to consider further clarification that can be provided in program guidance, the WIOA Joint Performance ICR, and Department-specific ICRs that support alignment and consistency of performance definitions across all programs and States. The final regulations for the VR program, which are published elsewhere in this issue of the **Federal Register,** contain specific provisions regarding the application of this definition as applied to students with disabilities receiving pre-employment transition services under the VR program.

Comments: A few commenters asserted that receipt of staff-assisted services should align with the type of activity, not the level of engagement of one-stop center staff.

Departments' Response: As discussed above with regard to the definition of a ''participant,'' the Departments modified § 677.150(a), particularly by adding § 677.150(a)(3), to explain that the point at which a person is a participant is when the person moves beyond self-service or information-only services or activities. In the NPRM, the Departments considered receipt of ''staff-assisted services'' to be the most common point across the core programs to define the transition to being a participant. However, in response to comments, the Departments modified the definition of participant to eliminate the use of the term ''staff-assisted services'' thereby aligning the definitions of ''participant'' and ''reportable individual'' and clarifying the progression from ''reportable individual'' to ''participant.''

Comments: One commenter proposed that the appropriate point of receipt of staff-assisted services should be when initial assessment and eligibility documentation is complete.

Departments' Response: As noted above, the definition of ''participant'' no longer incorporates a reference to ''staff-assisted'' services, but the definition continues to require that the individual has received certain services after having satisfied all programmatic requirements for the provision of services, such as eligibility determination. The Departments note that the definition does not explicitly require completion of an initial assessment, but it does require satisfaction of all applicable programmatic requirements—which may include an initial assessment or an eligibility determination. No change to the regulatory text was made in response to these comments.

Comments: One commenter suggested that ''reportable individuals,'' should be those individuals who have a signed and approved IEP.

Departments' Response: The Departments decline to adopt the recommendation because to do so would be inconsistent with the distinctions between the definitions of ''participant'' and ''reportable individual.'' The Departments plan to provide more detailed guidance on the tracking and reporting of reportable individuals under WIOA through the WIOA Joint Performance ICR, Department-specific ICRs, guidance, and technical assistance.

Comments: Several commenters sought clarification concerning the proposed definition of ''reportable individual.'' Of these, a few commenters requested that the Departments clarify whether a pretest is required for individuals in the AEFLA program in order to be considered reportable.

Departments' Response: A reportable individual is an individual who has taken action that demonstrates an intent to use program services and meets the specific criteria of the program. Further explanation of this definition is available through the WIOA Joint Performance ICR. A pretest has no bearing on the status of an individual being a participant or a reportable individual.

Comments: A few commenters stated that a clearer description of the point at which an individual becomes ''reportable'' would enhance comparability among States. Multiple commenters suggested that individuals become ''reportable'' when an individual provides identifying information. A commenter remarked that it is unclear how agencies should track reportable individuals. This commenter stated that an individual should not be considered reportable without providing identifying information to enable tracking.

Departments' Response: The Departments note that the regulations simply require the reporting of reportable individuals. Someone can be considered a reportable individual without providing identifying information. The Departments intend to issue further program guidance to aid States in implementing the requirement to report on ''reportable individuals.'' No change to the regulatory text was made in response to these comments.

Comments: A commenter thought that the term ''reportable individual'' may not be easily understood by the general

public and suggested ''customer'' as an alternative.

Departments' Response: The Departments have concluded that ''customer'' would not be an appropriate term for these purposes as all individuals who are served through a program would be considered customers. The terms in § 677.150 are consistent with the purposes outlined in this section and with the requirements of sec. 116 of WIOA. No change to the regulatory text was made in response to these comments.

Comments: A commenter inquired as to whether an individual could first be tracked as a participant and then tracked as a reportable individual if the person exited the program after receiving services and was subsequently determined to be ineligible.

Departments' Response: To do as the commenter suggests would be inconsistent with the definitions of ''participant'' and ''reportable individual'' at § 677.150(a) and (b). To be clear, an individual is a ''participant'' if he or she is a ''reportable individual'' who has satisfied programmatic requirements for the receipt of services, such as eligibility determination, and has received services that go beyond self-service or information-only services or activities. Therefore, once an individual crosses the threshold from ''reportable individual'' to ''participant'' by receiving such services, this does not change by virtue of the fact that the individual eventually exits the program because he or she is later determined ineligible. Neither the definition of ''participant'' nor ''reportable individual'' contain requirements related to the individual's exit from the program. Those requirements are set forth in the definition of ''exit'' at § 677.150(c), discussed in more detail below. The Departments will provide further guidance regarding the reporting of participants and reportable individuals in the WIOA Joint Performance ICR and Department-specific ICRs, as well as guidance and technical assistance. No change to the regulatory text was made in response to these comments.

Definition of ''Exit'' (§ 677.150(c))

Section 677.150(c) defines the term ''exit'' for purposes of the performance accountability system for the core programs under WIOA, as well as applicable non-core programs as described through regulation or guidance. Several of the primary indicators of performance require measuring participants' progress after they have exited from the program.

Generally for core programs, except for the VR program, ''exit'' is the last date of service. The last date of service means the individual has not received any services for 90 days and no future services are planned. For the purpose of this definition, ''services'' do not include self-service, information-only services or activities, or follow-up services. Therefore, as set forth in § 677.150(c)(1)(i), in order to determine whether an individual has exited, States will retroactively determine if 90 days have passed with no further services provided and no further services scheduled.

The definition of ''exit'' at § 677.150(c)(2) for the VR program is similar to that in § 677.150(c)(1) in that it marks the point at which the individual is no longer engaged with the program and there is no ongoing relationship between the individual and the program. However, because of specific programmatic requirements between the VR program and other core programs, it was essential that the definition of ''exit'' clarify when the individual's relationship with the VR program ends. Under the VR program, an individual is determined to have exited the program on the date the individual's case is closed in accordance with VR program requirements.

Even with this programmatic distinction, the calculations are essentially the same as with the other core programs because in all instances the ''exit'' count captures all persons who are no longer active participants in any of the core programs. In addition, for purposes of the VR program, the Departments exclude from the definition of ''exit'' those individuals who have achieved supported employment outcomes at subminimum wages. This provision is necessary to implement WIOA's heightened emphasis on competitive integrated employment. There are no substantive changes to § 677.150(c)(2).

Comments: The Departments received numerous comments, in response to both the NPRM and the proposed WIOA Joint Performance ICR, regarding whether an individual would be counted more than once in a program year if he or she met the definitions of ''participant'' and ''exit'' more than once in that same program year. The majority of these commenters opposed the Departments' position, set forth in the proposed WIOA Joint Performance ICR, which was that an individual only would count once in a program year.

Departments' Response: The Departments note that under WIA, DOL counted as an ''exit'' from its programs for performance accountability purposes each time in a program year a participant exited from a program, regardless of whether the participant exited more than once in that program year. This was referred to as calculating on a ''period of participation'' basis. Thus, the same individual could be counted as more than one ''participant'' and as having more than one ''exit'' in that same program year for the performance accountability calculations. Although States reported individuals similarly for the VR program, States reported an individual only once in a program year under the AEFLA program, regardless of whether the individual would meet the definitions of ''participant'' and ''exit,'' more than once in a program year.

The NPRM was silent as to whether ''participants'' and ''exits'' should count more than once in the same program year. However, the Departments proposed a different approach in the proposed WIOA Joint Performance ICR published on July 22, 2015 at 80 FR 43474. In the proposed WIOA Joint Performance ICR, the Departments proposed counting each individual once per program year regardless of how many times an individual met the definitions of ''participant'' and ''exit'' in § 677.150 within that same program year.

After consideration, the Departments agree with the concerns raised by commenters. In response to those comments, the Departments will include in the performance calculations each time a participant exits from a program during a program year, even though this could result in such a person being counted as more than one participant. This calculation method for performance accountability purposes maintains the reporting approach historically used by some programs, as discussed above, and by linking a set of services or interventions to outcomes for each exit during a program year, strengthens accountability.

However, the Departments will require States to provide unique identifiers for each individual ''participant'' so that the Departments will be able to calculate the number of unique participants in each core program during a program year. The Departments will provide technical assistance and guidance to States, including the WIOA Joint Performance ICR, as they take the necessary steps to modify their systems and processes to comply with these instructions.

Comments: Many commenters provided input regarding the proposed definition of ''exit'' and responded to the Departments' request for comments

on the costs and benefits of taking either a program exit approach or a common exit approach. A number of commenters expressed support for utilizing a common exit in order to support career pathways and cross-program participation that would benefit participants. One commenter supported the use of a common exit, specifically phased in over a 4-year period. Conversely, other commenters opposed the use of a common exit and stated that the Departments should maintain program exits. Commenters cited numerous reasons for maintaining program exits including that: (1) Program exits are preferable to comply with sec. 504 of WIOA, which requires States to simplify and reduce reporting burdens; (2) States should be permitted to choose whether to use a program exit or a common exit, and indicate their selection in the Unified or Combined State Plan; (3) States should have the option to use integrated periods of participation with common program exit dates for some or all core programs; and (4) a common exit would be problematic if the services provided by multiple programs are sequential.

Departments' Response: Common Measures policies that included the use of common exit as a reporting structure were developed by ETA in 2005 for use in title I programs under WIA as an acknowledgment that integrated reporting was key to integrated case management. The efforts to promote the use of a common exit across WIOA title I and Wagner-Peyser Act Employment Service programs have significantly increased the use of common exit policies across States.

The Departments have concluded that continuing common exit policies would emphasize the importance of an individual receiving and completing all program services necessary to ensure a successful attachment to the labor market. The Departments also recognize that the use of a common exit is dependent on the ability of States to exchange data effectively and efficiently across core programs in order to determine outcomes for each of the programs. The Departments considered each of the commenters' concerns and suggestions with regard to the proposed definition of exit and have revised the definition by adding § 677.150(c)(3) to allow WIOA title I and Wagner-Peyser Act Employment Service (title III) programs to utilize a common exit policy. The decision to allow a common exit date for WIOA title I and Wagner-Peyser Act Employment Service programs—and not for the AEFLA and VR programs under WIOA titles II and IV, respectively—was based on a number of factors. In particular, under WIA and continuing under WIOA, DOL encouraged co-enrollment between the title I and Wagner-Peyser Act Employment Service programs resulting in many states developing a common exit policy or co-enrollment strategies which DOL does not seek to disrupt. The ED will explore the feasibility of the use of a common exit policy for its title II and VR programs.

The concept of integrated case management and common exit has extended beyond WIOA title I core programs and Wagner-Peyser Act Employment Service programs to their DOL partner programs, such as the TAA program and the JVSG program. Paragraph (c)(3)(i) of § 677.150 provides that where a State has implemented a common exit policy, the policy may extend to those required partner programs administered by DOL. As such, DOL encourages States to implement common exit policies consistent with these joint regulations.

Since 2009, co-enrolling TAA participants with WIOA title I and Wagner-Peyser Act Employment Service programs has continued to provide participants supportive services, such as childcare and local transportation costs, that are not available under TAA. Further, due to the variable geography of TAA certified worker groups, WIOA title I program services and Wagner-Peyser Act Employment Service are often essential in providing prompt assessments and follow up services that complement the more substantial training and other services funded under TAA.

Similarly, the Veterans Employment and Training Service worked to align its programs with WIOA as a key partner program. Currently, JVSG and Wagner-Peyser Act Employment Service have a common exit in multiple States. This ensures that program participants who may be co-enrolled exit all programs at the same point, and are measured and tracked for employment outcomes based on the same point. This approach is aligned with the idea that DOL's one-stop center programs offer seamless services to participants and that, despite referral to or from partner programs, employment outcomes are not measured until services are complete. The modifications to the definition of exit in this Joint WIOA Final Rule allow for these practices to continue and also allow States the flexibility to implement and move forward with existing common exit policies for programs administered by DOL.

Comments: A few commenters cited the challenge of matching and exchanging data across agencies. Multiple commenters recommended implementing a research study to examine the use of the common exit, rather than codifying this requirement in regulation. One commenter stated that a common exit would make it very difficult to track and conduct follow up services. A commenter stated that the cost of reporting a common exit is prohibitive for that State. A commenter remarked that a common exit would be the costliest option.

Departments' Response: The Departments recognize the challenges raised by commenters with regard to infrastructure and integration of data systems that would be required under a common exit policy. Under the current regulation, the States have the discretion to choose to adopt a common exit policy for DOL-administered programs. The Departments acknowledge that certain States are at different stages and may vary in their approaches and ability to adopt a common exit across multiple programs. The Departments also note, however, that common exit supports a customer-centric design that allows programs to leverage co-enrollment for individuals who are eligible for, and need, multiple services that cross program lines without penalizing programs that may have to delay outcomes for those individuals referred to or co-enrolled in a partner program. Further, common exit policies have allowed smaller pilot, discretionary, or partner programs to access data and outcomes at a level that would not be available through their grant or program alone.

With WIOA's focus on integration, common exit is a natural progression where appropriate infrastructure, and integrated data systems exist across programs. The DOL envisions full implementation of a common exit across the States for the DOL core programs. The DOL understands this is a long-term goal and intends to support States from where they are at in terms of capacity and structure towards achieving this goal. With this in mind, the Departments will require the States to develop a plan for implementing a common exit policy and will require States to share that plan with the Departments. The Departments anticipate modifying the requirements for State Plans through the information collection request process and will require the States to share their plans for implementing a common exit policy through the State Plan and will also require the States to conduct an examination and analysis of their capacity and structures that would support a common exit policy for the DOL core programs under title I and the

Wagner-Peyser Act Employment Service program. This will allow DOL to support the States as they move towards implementing a common exit policy.

The Departments will continue to work with State and Local WDBs, one-stop center operators, and partners to achieve an integrated data system for the core programs and other programs to ensure interoperability and standardized collection of program and participant information, particularly for those States that have a common exit policy. Paragraph (c)(3) of § 677.150 allows for the use and implementation of common exit policies for DOL administered-programs. The Departments encourage the use of common exit for DOL-administered programs, but do not currently require its immediate implementation, due partially to the commenters' concerns about potential difficulties and costs in implementing common exit. The Departments have concluded that this approach is responsive to both commenters who supported common exit as well as to commenters who supported program exits and appropriately allows States flexibility to choose to continue their use of common exit or to plan for the full implementation of common exit as a policy for WIOA title I and Wagner-Peyser Act Employment Service programs. Additionally the Departments will seek to collect information through the appropriate information collection vehicles on existing common exit policies, the programs included in those common exit policies, and their impacts on program design and outcomes.

Comments: Many commenters supported the use of common exit in theory, but expressed reservations about the implementation of a common exit to title I youth programs, asserting that the use of a common exit would delay reporting of multiple performance indicators, harming the performance of the youth programs. These commenters suggested that the Departments encourage co-enrollment without a common exit, provide instruction for the identification in the participant record of individuals who are co-enrolled, and afford local programs the flexibility to use a program-specific exit or a common exit.

Departments' Response: In response to the concerns raised about common exit and its effect on the performance of WIOA youth programs, predominately concerning the short-term or self-service nature of some programs as opposed to other programs providing longer-term or more intensive services, the Departments have clarified that the definition of ''participant'' at § 677.150(a)(3)(ii) and (iii) excludes individuals who receive only ''self-service'' or ''information-only services or activities.'' As noted above, States—not individual programs within a State—are afforded the flexibility to use program-specific exit or common exit. It does not appear feasible or preferable for individual programs within a State to choose the type of exit to implement.

Comments: A number of commenters made additional suggestions specific to youth programs. One commenter stated that title I youth programs should have a defined end date, at which point participants should be considered to have exited, rather than waiting 90 days. Another commenter stated that local programs currently believe that no title I youth funds may be spent on youth once they exit, and requested clarification concerning follow-up services for youth conducted after an individual has exited. In addition, several commenters suggested that a hold status be maintained for youth who are not receiving services due to documented hardships. These commenters stated that a hold status would avoid counting these individuals as having exited if they reengage after the 90-day window.

Departments' Response: While the Departments understand the concerns raised by commenters, the Departments decline to modify the definition of ''exit'' at § 677.150(c) with regard to the 90-day period of no services. This definition maintains consistency with the definition of exit applied across other programs. Paragraph (c)(1)(i) of § 677.150 requires that 90 days of no services (except for self-service, information-only services or activities, and follow-up services) must have elapsed, and no future services, other than follow-up services, may be planned in order for a participant to satisfy the definition of ''exit.''

Conversely, § 677.150(c)(3) adds flexibility for States that have or are pursuing common exit policies and strategies for their programs under WIOA titles I and III (Wagner-Peyser Act Employment Service) as well as other required partner programs that are administered by DOL. The clarification in this Final Rule that self-service and follow-up services do not delay exit should allay the commenters' concerns regarding delayed reporting. By definition, follow-up services are provided to youth following exit and as a result, title I youth funds may be spent on participants once they exit in order to provide such follow-up services.

For the sake of clarification, such expenditures of title I youth funds on participants for follow up services after exit do not result in delaying an individual's exit from the program. Section 681.580 (*see* DOL WIOA Final Rule published elsewhere in this issue of the **Federal Register**) clarifies which youth formula program elements may be provided during follow-up. Additionally, DOL will issue guidance on providing effective follow-up services for the programs it administers. Although the Departments are not implementing a ''hold status'' as suggested by the commenters, DOL will clarify through guidance the circumstances under which a ''gap in service'' may be appropriate in order to delay exit for those States that implement a common exit strategy for DOL-administered programs.

Comments: Numerous commenters responded to the Departments' solicitation for comments regarding the effect of self-service activities on a participant's exit date. Most of the commenters asserted that self-service should not be used to delay the date of exit or count as re-enrollment in a program. However, other commenters asserted that individuals who access self-service activities should continue to qualify as participants because the use of these services indicates that participants have not completed their search for employment. One commenter suggested that self-service participants should continue to be tracked as reportable individuals.

Departments' Response: The Departments acknowledge commenters' recommendation that self-service not be used to delay the exit date or qualify as re-enrollment. With regard to individuals who continue to use self-service, the Departments note that individuals access self-service tools for a variety of reasons, but the decision to retain an exclusion of self-service from the definition of ''participant'' at § 677.150(a)(3)(ii) is consistent with the decision in the NPRM to establish a uniform program attachment point in service delivery and design from which to compare programs. See the extensive discussion regarding the definition of ''participant'' and § 677.150(a), above.

Comments: Commenters raised a number of questions regarding various aspects of the proposed definition of ''exit,'' including requests for clarification regarding whether exit means exiting a core program or exiting all WIOA services.

Departments' Response: Whether ''exit'' means from a specific program or a common exit from multiple programs depends on whether a State has implemented a common exit policy for DOL-administered programs. As discussed in more detail above, the

Departments have modified the definition of exit at § 677.150(c)(3) to allow WIOA title I and Wagner-Peyser Act Employment Service programs to apply a common exit policy. States that lack a common exit policy across title I and Wagner-Peyser Act Employment Service programs will be required to conduct an assessment and develop a plan towards implementing a common exit policy. Additionally, States that retain or develop a common exit policy across title I and Wagner-Peyser Act Employment Service programs may extend such a policy to DOL-administered required partner programs identified in WIOA sec. 121(b)(1)(B). Further, States with common exit policies that include WIOA title I core programs and Wagner-Peyser Act Employment Service programs should ensure those policies align with the criteria in § 677.150(c).

Comments: Several commenters expressed concerns regarding the definition of ''exit'' for purposes of the VR program since individuals served by VR typically require lengthier service delivery and follow-up activities than the other core programs. A few commenters also stated that a common exit would better protect individuals in the VR program from exiting the program before receiving the services they need.

Departments' Response: As other commenters have noted, the VR program typically requires lengthier period of service delivery than the other core programs. While not common, it is possible for a single VR participant to receive services for 10 years, and service durations of 3 to 5 years are not unusual. If there were a single exit, it would mean that other programs would not be able to exit these co-enrollees until the VR case was closed. The VR program is not included under the common exit provision at this time, because if they were incorporated into the common exit provision, programs under other WIOA titles would not be able to report exit achievements until the time of the VR closure, no matter how much time had elapsed since participation in those programs. With the VR program having a separate closure process, individuals are shielded from the entreaties of other programs that may wish to close the case. The ED will explore the feasibility of the use of a common exit policy for its title II and VR programs. No change to the regulatory text was made in response to these comments.

Comments: Some commenters expressed support for expanding the proposed definition of ''exit'' to reference the termination of staff-assisted services.

Departments' Response: The definition of ''participant'' at § 677.150(a) no longer references the term ''staff-assisted'' services due to concerns raised by many commenters about the confusion such term raises. Section 677.150(a) now describes the services as being those other than self-service and information-only services or activities, which are described further in § 677.150(a)(3). See the response to comments related to the definition of ''participant'' above regarding the Departments' elimination of the term ''staff-assisted'' services from the definition; therefore, it is not necessary to expand the use of that term with regard to the definition of ''exit'' as the commenters suggest.

Comments: Several commenters remarked on the application of the definition of ''exit'' to education programs, noting that the definition does not account for a transfer between institutions or participants not taking a class during the summer term that could exceed the 90-day timeframe.

Departments' Response: Section 677.150(c)(1)(i) makes clear that a participant ''exits'' a program only if 90 days of no services have elapsed *and* there are no future services planned. Please see the analysis of comments regarding § 677.230, below, for further discussion of these and other terms as they apply to eligible training providers.

Comments: Some commenters suggested the Departments revise the definition of ''exit'' at § 677.150(c) to lengthen the proposed 90-day period of no services to 120 days, citing the challenges of sporadic engagement in services in which youth cycle in and out of services. In such cases, service delays can extend an exit beyond the 90 days. One commenter suggested doubling the 90-day window to 180 days. Other commenters suggested shortening the 90-day period.

Departments' Response: Although the Departments recognize that out-of-school youth, among other examples, may be a population that is difficult to engage in continuous services, the Departments have concluded that it is important to maintain consistency across all core programs regarding the definition of exit. The 90-day period has a basis in historical application. Under WIA, the DOL-administered programs and the AEFLA program under title II used 90 days of no service as a benchmark for determining when services had ended. Similarly, prior to WIOA the VR program closed an individual's service record after services had ended and the individual had maintained employment for 90 days.

The Departments have not revised the definition of ''exit'' at § 677.150(c) since lengthening the timeframe would delay outcomes for indicators that are already lagged behind the actual time period of exit, such as employment-related primary indicators that measure a participant's employment at the second and fourth quarters after exit and the median earnings of a participant in the second quarter after exit. The Departments have concluded that the 90-day period of no service strikes the appropriate balance for knowing how the programs are performing while providing enough time to account for sporadic participation. No change to the regulatory text was made in response to these comments.

Comments: Some commenters expressed support for retaining the current ''neutral'' exits. Other commenters urged the Departments to adopt a more flexible exit policy that would allow participants who were ''negative'' exits due to loss of contact with the program, to reengage and positively exit if performance outcomes are achieved.

Departments' Response: There are a number of reasons why individuals exit from the programs in which they are enrolled. The current definition of ''exit'' allows for performance accountability that can uniformly translate across programs, while also retaining critical programmatic differences and the policy-based flexibility for States in their program engagement and design. The Departments have concluded that the definitions in § 677.150, including that for ''exit'' at § 677.150(c), are consistent with their applicability to the performance accountability system set forth in sec. 116 of WIOA.

A ''neutral'' exit, as it relates to the performance accountability provisions, allows the State to exclude certain participants from the calculation of the primary indicators. The Departments have concluded that there is sufficient statutory authority to permit certain exclusions, as appropriate, from the performance calculations for the primary indicators of performance. The Departments have implemented these exclusions through the WIOA Joint Performance ICR. The Departments have concluded that it is important to account for premature exits from the program and that modifying the definition of ''exit'' to allow neutral exits would undermine program accountability intended by WIOA. The Departments intend to provide guidance on how to calculate the primary

indicators of performance and provide guidance on other performance-related requirements through the WIOA Joint Performance ICR, programmatic guidance, and technical assistance. No change to the regulatory text was made in response to these comments.

Comments: A commenter emphasized the need for guidance regarding the transition from active programming to follow-up services, particularly as it relates to the definition of ''exit.''

Departments' Response: The Departments will provide further guidance regarding the transition from active programming to follow-up services as it relates to the definition of ''exit.''

Definition of ''State'' (§ 677.150(d))

The Departments have added a definition of ''State'' as § 677.150(d) to specify that the outlying areas are subject to the performance accountability provisions of part 677. This provides that, for purposes of part 677 other than in regard to sanctions or the statistical adjustment model, ''State'' includes the outlying areas of American Samoa, Guam, Commonwealth of the Northern Mariana Islands, the U.S. Virgin Islands, and, as applicable, the Republic of Palau. In so doing, as discussed in detail immediately below regarding outlying areas, the Departments ensure that the performance accountability requirements apply to the outlying areas as well. This regulatory change is essential to ensuring consistency with the Departments' decision to require outlying areas to submit Unified or Combined State Plans which, pursuant to sec. 102 of WIOA must include expected levels of performance, thereby making the performance accountability system applicable to the outlying areas.

In the NPRM, the Departments specifically requested comments about the applicability of WIOA sec. 116 performance accountability system requirements to the core programs administered by the outlying areas, namely American Samoa, Guam, Commonwealth of the Northern Mariana Islands, the U.S. Virgin Islands, and, as applicable, the Republic of Palau (80 FR 20574, 20583–20584 (April 16, 2015)). The Departments explained the ambiguity that was created by differing terms and definitions for outlying areas and States, for purposes of the title I core programs, but made clear that titles II and IV specifically subject adult education and VR grantees, including outlying areas, to the common performance accountability system set forth in sec. 116 of WIOA.

Sections 189(a) and (c) of WIOA provide the authority to impose planning and performance reporting requirements on outlying areas, which is being accomplished through this definition. The decision to treat outlying areas as States for purposes of the common performance accountability system dovetails, and is consistent with, the Departments' decision to treat outlying areas the same as States for purposes of the Unified and Combined State Plan requirements, as discussed elsewhere in this preamble with respect to part 676 of this Joint WIOA Final Rule.

Although the Departments will hold the outlying areas accountable for complying with the performance accountability system requirements of sec. 116 of WIOA and part 677, the Departments will not impose monetary sanctions against the outlying areas pursuant to sec. 116(f)(1)(B) of WIOA for two reasons. First, the sanctions are imposed against the Governor's Reserve under sec. 128(a) of WIOA, which the outlying areas do not receive. Second, the sanctions are imposed when a State fails to satisfy the adjusted levels of performance or fails to report. The adjusted performance level is based on several required factors set forth in sec. 116(b)(3)(A)(v) of WIOA, including, among other things, the use of a statistical adjustment model. The performance output data provided by the core programs in the outlying areas yield too small a sample size; thus, applying an adjustment model to the outlying areas will not yield a valid result. In addition, there are cases in the outlying areas where required data are not available to run the statistical adjustment model. Despite the fact that the Departments will not impose monetary sanctions against the outlying areas in accordance with sec. 116(f)(1)(B) of WIOA, the Departments want to make clear that the Departments will hold outlying areas accountable for poor performance or failure to report through technical assistance and the development of performance improvement plans in accordance with sec. 116(f)(1)(A) of WIOA.

3. State Indicators of Performance for Core Programs (20 CFR Part 677, Subpart A; 34 CFR 361.155 Through 361.175; 34 CFR 463.155 Through 463.175)

Section 677.155 What are the primary indicators of performance under the Workforce Innovation and Opportunity Act?

Section 677.155 implements the primary indicators of performance as set forth in WIOA sec. 116(b)(2)(A)(i). These primary performance indicators apply to the core programs described in sec. 116(b)(3)(A)(ii) of WIOA, and administered by ED's OCTAE and RSA, and DOL's ETA. These primary indicators of performance create a common language shared across the programs' performance metrics, which the Departments anticipate will support system alignment, enhance programmatic decision-making, and facilitate consumer choice. The Departments implement the requirements of sec. 116 of WIOA through this Joint WIOA Final Rule, as revised and described in this preamble.

Comments: A commenter expressed concern about the cost and time it would take to establish and operate a fiscal and management accountability information system.

Departments' Response: The Departments recognize the concerns raised with regard to the infrastructure, and resulting cost, required to implement the performance, fiscal, and management accountability information systems. No changes to the regulatory text were made in response to this comment because the performance accountability provisions outlined within sec. 116 of WIOA clearly mandate States and local areas to collect and report on the information contained in part 677. The Departments want to make clear that all core programs were required, even prior to the enactment of WIOA, to operate fiscal and management systems pursuant to WIA, former OMB Circular A–87, OMB's Uniform Guidance (2 CFR part 200), and programmatic requirements. It is important to note that WIOA's requirements for States to operate such systems are very similar to those required under WIA, which is why the Departments do not consider these to be new requirements. However, the Departments acknowledge an integration of such systems would be a departure from that required under WIA and recognize that time and resources combined with guidance and technical assistance will be necessary before an integration of fiscal and management systems could occur.

The Departments have concluded that system integration will, in the long-term, reduce administrative and reporting burden while supporting alignment and comprehensive accountability across all of the core programs. The Departments will work with State and Local WDBs, one-stop center operators, and partners to achieve an integrated data system for the programs covered by WIOA to ensure interoperability and the accurate and

standardized collection of program and participant information. Integrated data systems will allow for unified and streamlined intake, case management and service delivery, minimize the duplication of data, ensure consistently defined and applied data elements, facilitate compliance with performance reporting and evaluation requirements, and provide meaningful information about core program participation to inform operations. Data integration may be accomplished through a variety of methodologies including data sharing, linking systems, or use of data warehouses.

Comments: A commenter urged State and local planning efforts to use the most current Census and administrative data available to develop estimates of each priority service population.

Departments' Response: The Departments note that the WIOA State Plan ICR provides guidance as to what information should be included in the analysis and the State Plan requirements. No change to the regulatory text is being made in response to this comment.

Comments: A commenter recommended creating data systems to separate participants by program and local area and allowing the progress measures to be skills based using goal setting rather than time intervals. A commenter recommended adding self-sufficiency as an indicator of performance. Commenters supported workforce system performance that addresses the needs of veterans with disabilities.

Departments' Response: Changing the primary indicators of performance to a skills-based measurement system, rather than one based on time intervals, would not be consistent with the primary indicators of performance set forth in sec. 116(b)(2)(A)(i) of WIOA, which require the measurement of employment in the second and fourth quarters after exit, the attainment of a credential during participation in the program and up to 1 year post exit, and the attainment of measurable skill gains during the program year. WIOA clearly establishes timeframes for each of these primary indicators of performance.

However, sec. 116(b)(1)(A)(ii) of WIOA and § 677.165 permit States to develop additional indicators of performance. If a State were to do so, the State could implement skills-based indicators or indicators that measure self-sufficiency or services to veterans with disabilities as suggested by commenters. The Departments encourage State and Local WDBs to work in collaboration to identify and implement additional indicators of performance that aid in the management of workforce programs in their State. No change to the regulatory text is being made in response to this comment.

Comments: In the preamble to the NPRM, the Departments requested comments on using the performance indicators identified in § 677.155 for additional programs beyond the core programs. The Departments postulated that this broader use of the six primary indicators of performance could streamline reporting on other DOL-administered programs, such as the JVSG program and other discretionary grant programs. Commenters supported the use of common metrics across education and workforce programs wherever appropriate. Commenters also raised questions about alignment with various specific programs, such as Migrant and Seasonal Farmworkers, Job Corps, Indian and Native American, Family Literacy, Integrated English Literacy and Civics Education, Wagner-Peyser Act Employment Service, Adult Education, and JVSG.

Departments' Response: The Departments acknowledge that WIOA has introduced unprecedented opportunities for alignment and as such, envision integration across workforce programs to the maximum extent feasible. The core programs, described in sec. 116(b)(3)(A)(ii) of WIOA, are covered under this Joint WIOA Final Rule and the WIOA Joint Performance ICR. National programs such as Job Corps, the National Farmworker Jobs Program, and the Indian and Native American adult and youth programs that are authorized under title I of WIOA are also aligned under this regulation, as well as their respective program regulations at 20 CFR parts 686 (Job Corps), 685 (National Farmworker Jobs Program), and 684 (Indian and Native American Program). Additionally, the Departments intend that DOL-administered partner programs authorized by statutes other than WIOA and not covered under these joint regulations, such as the JVSG programs and the TAA programs, will be aligned with the performance accountability system under WIOA through both legislative and policy guidance. The Departments recognize the variety of interactions among programs under WIOA and programs authorized by other statutes. The Departments understand the need for further guidance and clarification, which will be issued throughout the workforce development system and which will include information on how and where to report.

Comments: A commenter noted that many programs for out-of-school youth, including Job Corps, often use accredited online high school programs to provide education to youth participants. The commenter requested that any measure intended to capture progress on achieving or attaining a high school diploma or recognized equivalency degree should reflect any State-accredited standard.

Departments' Response: Details regarding accreditation are beyond the scope of this Joint WIOA Final Rule and will be addressed in guidance or in the WIOA Joint Performance ICR or DOL Performance ICR. No change to the regulatory text is being made in response to this comment.

Comments: Commenters requested guidance and examples on several subjects, such as: Measuring and reporting registered apprenticeship performance; how wages for successful and unsuccessful closures are used and measured; performance data for industry-driven credentials; students with degrees from another country; areas where net income can apply as a performance indicator; incorporating self-employment as a successful outcome; performance metrics; when enrollment occurs; operational definitions; determination of competitive wage; cross program impacts; individualized measurements of the six primary indicators as relates to VR consumers; and individual skills measurement. A few commenters asked that States be allowed flexibility in developing data sharing agreements and additional performance measures.

Departments' Response: The Departments acknowledge the need for clarification and examples to illustrate the methods that each of the core programs will use to determine performance on the primary indicators, including details regarding data collection for self-employment outcomes, as well as educational attainment and measurable skill gains. The Departments will address these issues in guidance and in the instructions for program-specific reporting requirements contained in the WIOA Joint Performance ICR.

With regard to requests for State flexibility in developing data sharing agreements and additional performance measures, sec. 116(b)(1)(A)(ii) of WIOA and § 677.165 permit States to implement, through their State Plans, additional indicators of performance and encourage States to also leverage their program collection and reporting to analyze and manage performance of their programs. With regard to data sharing agreements States have the flexibility to enter into data sharing agreements, ensuring that such

agreements meet all applicable Federal and State statutory and regulatory confidentiality requirements. No change to the regulatory text is being made in response to this comment.

Section 677.155(a)(1) identifies the six primary indicators of performance that will be applied to the core programs identified in sec. 116(b)(3)(A)(ii) of WIOA. Where practicable, DOL intends to leverage these indicators to streamline reporting for other DOL-administered programs, such as the JVSG program, TAA and other discretionary grant programs.

Section 677.155(a)(1)(i) implements the first primary indicator as described in sec. 116(b)(2)(A)(i)(I) of WIOA. This primary indicator is a measure of the percentage of program participants who are in unsubsidized employment during the second quarter after exit from the program. There are no changes to § 677.155(a)(1)(i) from that proposed in the NPRM, which mirrors the statutory requirement of WIOA sec. 116(b)(2)(A)(i)(I).

Comments: A commenter recommended that calculated employment percentages should not include individuals who never received core program services.

Departments' Response: The issue raised by the commenter is more closely related to the definitions of ''participant'' and ''reportable individual,'' as set forth in § 677.150 and which are discussed in detail above. The Departments have concluded that these definitions are clear in setting the standards under which participants are included in performance calculations for purposes of the primary indicators of performance. Specifically, the definition of ''participant'' at § 677.150(a) ensures that an individual is receiving services of a substantive nature from any of the core programs before the individual is considered a ''participant'' and, thus, included in performance calculations. Because § 677.155(a)(1)(i) is consistent with sec. 116(b)(2)(A)(i)(I) of WIOA, no change to the regulatory text is being made in response to this comment.

Comments: A number of commenters expressed support for the WIOA requirements as proposed in § 677.155(a)(1)(i) and (ii). However, many commenters recommended that this section of the regulation and the section related to calculating performance should include the option for excluding participants who report that they are not working and not looking for work. These commenters cited data showing that 29 percent of AEFLA participants were ''not in the labor force.'' A commenter suggested adding the words ''who are in the labor force at enrollment'' after the word ''participants'' in § 677.155(a)(1)(i) through (iii). Another commenter stated that it would seem practical to include participants who are not looking for employment in the calculation of the employment performance outcome.

Departments' Response: The Departments acknowledge the concerns raised by commenters about being held accountable for those participants who enter the program and are not seeking employment, and about how participants not in the labor force might affect performance outcomes. However, WIOA secs. 116(b)(2)(A)(i)(I) through (b)(2)(A)(i)(III) measure the percentage of program participants in employment during the second and fourth quarters after exit and the median earnings of participants in the second quarter after exit. Therefore, the Departments disagree with commenters who believe that individuals who are not looking for work should not be included in the performance calculation. Having said this, the Departments recognize that there are very limited circumstances where certain individuals, such as those who are incarcerated and receiving services under sec. 225 of WIOA, should not be included in the performance calculations for this indicator. The Departments have decided to exclude incarcerated individuals served under sec. 225 of WIOA because they do not have the opportunity to obtain employment or participate in education or training programs in the same manner as other participants who are in the general population. The Departments consider additional determinations regarding the need for exclusions from performance calculations to be more appropriately made through the ICR process and, therefore, have added § 677.155(a)(2) to the regulatory text. This matter will be discussed in more detail with respect to that provision below.

Comments: Another commenter asked whether the State can use AEFLA funds to serve individuals who are not looking for employment.

Departments' Response: Section 203(4) of WIOA defines an eligible individual for the purposes of AEFLA. Eligibility does not include employment status. Whether or not an individual is seeking employment does not affect that person's eligibility status under title II. Further matters concerning AEFLA program implementation are in the program-specific final regulations published elsewhere in this issue of the **Federal Register**.

Comments: Several commenters opposed the suggestion in the preamble to the NPRM that the Departments plan to calculate an ''entered employment rate'' for participants who were not employed at the time of program entry, in addition to an employment rate for all program participants regardless of employment status at entry.

Departments' Response: Upon consideration of the various issues, the Departments have not made changes to these joint regulations to require the collection and reporting of an entered employment rate. Instead, the Departments intend to utilize the individual records available for the WIOA title I, Wagner-Peyser Act Employment Service, and VR programs (*i.e.*, the disaggregated data submitted by the States) to calculate such a measure for comparative purposes. The Departments can calculate this entered employment rate from the information that is required to be collected under sec. 116 of WIOA. Therefore, no additional reporting burden will be imposed on the States for these programs for this additional calculation at the Federal level.

However, such entered employment rate calculations will not be possible at the Federal level for the AEFLA program under title II, because States report AEFLA program data only in an aggregate manner. Therefore, for the Departments to receive the data necessary to perform the entered employment rate calculation for the AEFLA program—and to produce such outcome data—would place an undue burden on title II programs.

Comments: Most commenters opposed including the entered employment rate as a performance indicator. A number of commenters recommended that only the employment rate should be counted for those employed during the second quarter after exit because less document retrieval would be required, and there are other indicators that can show whether program participants are better off after enrollment. Other commenters suggested that the employment rate should include job seekers who were both employed and not employed at the time of participation because this will help determine how effective the system is at helping both the unemployed and those looking for career progression. A commenter added that it is difficult to capture information about employees in part-time or multiple-employer jobs.

Several other commenters, however, supported calculation of an entered employment rate, particularly for youth programs.

The Departments also received numerous comments in reference to calculating the second quarter after exit employment indicator as an ''entered

employment measure,'' as defined in WIA. A commenter only would support an entered employment calculation if the Departments modified the regulation to require submission of individual records under title II.

Departments' Response: The Departments have concluded that that the entered employment rate will provide a useful comparison of the public workforce system as it exists under WIA and WIOA. As stated above, the Departments will calculate an entered employment rate for the WIOA title I, Wagner-Peyser Act Employment Service, and VR programs using information collected through the WIOA Joint Performance ICR. This entered employment rate will not be a primary indicator of performance and, thus, it will not be a basis for sanctions. It is nonetheless useful information in evaluating the impact and efficacy of programs under WIOA. No change to the regulatory text is being made in response to this comment.

Comments: A commenter opposed measuring the employment rate in the second quarter after exit instead of the first quarter, as done under WIA, because the commenter suggested that 2 quarters after exit is too late to determine unsubsidized employment. Another commenter agreed that it is simpler to locate and re-engage a customer after the first quarter performance measure rather than waiting an additional 3 months. A commenter added that the time frame of 6 months for an individual working in an integrated setting to achieve a competitive integrated employment outcome is too fixed and arbitrary, and the time period should be increased to 18 months if needed by the individual. Another commenter warned that using the second and fourth quarters after exit for performance measures will negatively impact States with a highly seasonal workforce.

Departments' Response: The Departments acknowledge the concerns raised, but sec. 116(b)(2)(A)(i)(I) and (II) of WIOA specifically require that employment be measured at the 6- and 12-month mark (second and fourth quarters respectively). Given the specificity of the quarters to be measured for purposes of the performance accountability system, the Departments do not have the authority to implement a regulation inconsistent with the statutory requirement. No change to the regulatory text is being made in response to this comment.

Comments: A commenter opposed the provisions in §§ 677.155(a)(1)(i) and 677.175(a) because of a concern that these provisions would ask educators to store personal data, such as social security numbers (SSNs), that the students may be unwilling or unable to share.

Departments' Response: The Departments acknowledge the concerns about the retention of SSNs. The Departments concluded that, where available and possible, the use of wage records to fulfill reporting requirements is required in accordance with sec. 116(i)(2) of WIOA. Matching participant SSNs against quarterly wage record information is the most effective means by which timely and accurate data can be made available to the system. However, consistent with the Privacy Act, program services cannot be withheld if an individual is unwilling or unable to disclose a SSN. More specifically, program eligibility is not contingent on the provision of a SSN for any of the core programs.

Nevertheless, the use of quarterly wage records is essential to achieve full accountability under the WIOA performance accountability system to identify high performing States and localities, and, if necessary, to provide technical assistance to help improve performance or sanction low performing States and localities. Matching participant SSNs against quarterly wage record information is the most cost-effective means by which timely and accurate data can be made available to the system.

In consideration of the circumstances articulated by commenters in responses to both the Joint WIOA NPRM and the proposed WIOA Joint Performance ICR, the Departments will allow the collection and verification of non-UI wage data in the absence of available UI wage data obtained through wage record matching, as discussed more fully in the preamble to § 677.175 below. The Departments also intend to issue guidance and technical assistance regarding the collection and reporting of both quarterly wage record data and supplemental information. No change to the regulatory text is being made in response to this comment.

Comments: A commenter remarked that the indicators in § 677.155(a)(1)(i) through (iii) would require an unprecedented degree of interdependency between VR and other State and Federal repositories of employment data. Another commenter recommended that, given that several of the primary performance indicators for the core programs, including VR, require reporting on the percent of exiters who are in ''unsubsidized employment,'' the Departments should clearly define ''unsubsidized employment.'' In particular, the commenter requested clarity regarding whether individuals in competitive integrated employment who receive supported employment services following VR case closure are considered to be in ''unsubsidized employment.''

Departments' Response: The Departments acknowledge that the use of wage record data for the employment and median earnings indicators will require a greater level of cooperation between the State VR and UI agencies. The Departments are developing guidance to facilitate this process and also are developing a new State wage record interchange system data sharing agreement to aid in the exchange of wage record data to enable all core programs to meet the performance reporting requirements outlined in these regulations and sec. 116 of WIOA.

The Departments have considered the comments regarding the VR program and ''unsubsidized employment.'' Section 116 of WIOA describes the primary performance indicators for all core programs, including the VR program. Three of the performance indicators pertain to the employment status or median earnings of participants who exit a program in unsubsidized employment. In response to the commenter regarding supported employment and unsubsidized employment, the Departments want to clarify that supported employment means, in general for purposes of the VR program, employment in competitive integrated employment or in an integrated setting in which the individual is working towards competitive integrated employment on a short-term basis. Once an individual achieves supported employment as an employment outcome under the VR program and exits that program (in other words, his or her VR record of service is closed), the individual typically receives extended services from another provider. Receipt of extended services after the VR record of service is closed does not affect the nature of the employment. Supported employment is considered unsubsidized employment because the wages are not subsidized by another entity. Individuals in supported employment at subminimum wage who are working on a short-term basis toward competitive integrated employment would not satisfy the definition of ''exit'' for performance accountability purposes.

Comments: A commenter recommended that adult education providers receive student-level disaggregated wage or UI data for compliance and input into the Student Information System tracking and

monitoring application and that MOUs and guidance from the Departments must authorize access. Commenters concluded that States may need to use alternative methods for tracking employment outcomes for participants and need to be provided with options for databases and data sharing.

Departments' Response: As mentioned above, the Departments are aware of the necessity for pathways to match wage record data to exit data in order to have complete outcome information on a program. The Departments reiterate their intent to issue guidance and facilitate a new data sharing agreement in order to facilitate wage record data matching required for all core programs in meeting their performance reporting requirements under WIOA. These agreements will be executed under the authority of WIOA sec. 116(i)(2) and consistent with all applicable Federal and State privacy and confidentiality laws and regulations. The Departments cannot require the sharing of individual level PII from wage records with entities that do not meet the requirements of 20 CFR part 603. It should be noted that the Departments are aware of and recognize that a variety of structures exist within States affecting levels of access to certain types of information required to comply with WIOA and efforts are underway to issue joint guidance on data access and how to obtain what is necessary to comply with WIOA reporting requirements.

Comments: An individual expressed concern that the performance indicators in § 677.155(a)(1)(i) and (ii) may act as a disincentive to making progress in further education and training after exit. A commenter asked for clarification about the calculations for employment in the second and fourth quarters after exit, inquiring as to the time period for measurement and the individuals to be included in the measure.

Departments' Response: The Departments have considered commenters' concerns regarding the disincentive the employment performance indicators may create for furthering education and training after exit. However, sec. 116(b)(2)(A)(i)(I) of WIOA establishes a statutory requirement for a performance indicator measuring the percentage of program participants who are in unsubsidized employment during the second quarter after exit from the program. Subsequent guidance providing the time periods for measurement and other operational parameters pertaining to calculations will be issued by the Departments.

Comments: In the preamble to the Joint WIOA NPRM, the Departments asked for public comment on whether and how to collect information on the quality of employment. A commenter suggested that while the Departments are proposing some metrics that attempt to assess the quality of employment, specifically mentioning median wage, retention, and training-related outcomes, the Departments should consider looking at quality of employment once the current performance indicators are implemented. Other commenters asserted that information on the quality of employment should not be collected because it is redundant, costly, and too subjective. Another commenter described several factors contributing to the quality of employment: Fair, attractive, and competitive compensation and benefits; opportunities for development, learning, and advancement; wellness, health, and safety protections; availability of flexible work options; opportunities for meaningful work; promotion of constructive relationships in the workplace; culture of respect, inclusion, and equity; and provisions for employment security and predictabilities. Other commenters added the importance of wages sufficient to sustain the worker and dependents, work-based training, changes in net income, worker input into schedules, and employment outcomes consistent with the consumer's education and employment goal. One of the commenters discouraged making inappropriate comparisons across programs.

Departments' Response: The majority of commenters did not support collecting information on the quality of employment because it would be too subjective to collect consistently, overly burdensome, and costly. At this time, the Departments have decided not to include such a measure because it would be too burdensome to implement a measure that would have to be developed in the absence of an existing metric. The Departments will consider in the future whether there is a suitable mechanism to measure the quality of employment. No change to the regulatory text is being made in response to this comment.

Section 677.155(a)(1)(ii) implements the second statutory indicator as described in sec. 116(b)(2)(A)(i)(II) of WIOA. This indicator is a measure of the percentage of program participants who are in unsubsidized employment during the fourth quarter after exit from the program. This section, which mirrors WIOA sec. 116(b)(2)(A)(i)(II), remains unchanged from what was proposed in the NPRM.

Under WIA, the common measures included a retention measure based on individuals who were employed in the first quarter after exiting from WIA services, and who were also employed in the second and third quarters. WIOA does not have an equivalent to the WIA retention measure. Instead, WIOA requires a second—separate and distinct—employment indicator for the fourth quarter after exit, which measures the employment rate in that quarter, regardless of whether those participants also were employed in the second quarter after exit from the program. In other words, a participant would be counted as a positive outcome for this indicator if he or she was employed in the fourth quarter after exit regardless of whether he or she was also employed in the second quarter after exit.

Comments: In the preamble to the NPRM, the Departments sought comment on the advantages and disadvantages of collecting or reporting the employment retention rate. A commenter expressed support for a retention rate because it would be an important measure to know, for example, when comparing Job Corps to other youth programs. A few commenters reasoned that a retention rate would represent the quality of the initial job placement. Many commenters supported using a retention rate as long as programs would not be held accountable to negotiated goals for employment retention and States would not be required to capture, report, or calculate additional values. Some commenters opposed highlighting measures of employment retention because they would be confusing for the system and impede the transition from the measures in WIA to the indicators in WIOA. A commenter stated that there was no benefit to calculating this measure for WIOA title I programs; however, another commenter supported the proposed provision to calculate a retained employment rate in the fourth quarter after exit. An individual commented that if fourth quarter employment is not used as a retention measure, then the growth or reduction of the employment rate of the cohort can be used to evaluate occupational skills training, particularly for those who are underemployed.

There were a few commenters who articulated a preference for the requirement under WIA. Commenters stated that employee retention is based on market conditions and dependent on factors such as company working conditions. Commenters also asserted that a retention measure should take into account a change or advancement

in occupation and quality or levels of work. A commenter remarked that by collecting or reporting the retention rate, the Departments could compare performance under WIOA with performance under WIA, but the commenter also suggested this was not necessary. A few commenters asked whether the individual had to be working with the same employer or at the same job between the second and fourth quarters. Other commenters recommended that employment retention should be measured regardless of whether the employer or job title has changed.

Departments' Response: As stated above, retained employment rate would not be counted for the purpose of performance calculations and, thus, would not form the basis for sanctions because it is not among the primary performance indicators set forth in sec. 116(b)(2)(A)(i) of WIOA. The Departments have concluded that calculating a retained employment rate would provide useful information about the effectiveness of services that lead to sustained attachment to employment. The Departments will calculate a retained employment rate for participants who were employed at the second quarter after exit for informational purposes at the Federal level for those programs for which the Federal offices collect individual (*i.e.*, disaggregated data) records (*i.e.*, for the WIOA title I, Wagner-Peyser Act Employment Service, and VR programs). For the AEFLA program, for which ED does not collect individual (*i.e.*, disaggregated) records, the Departments will not require States to calculate and report a retained employment rate in addition to an employment rate at the fourth quarter after exit.

Comments: With regard to this indicator and partner program metrics, one commenter remarked that in States where TANF is a required one-stop partner, a performance metric that is limited to 1 year after exit from the program may not align with outcomes that are significant for TANF customers, resulting in positive outcomes of TANF employment services that will not be captured. Another commenter suggested that the fourth quarter employment information could be obtained more easily by the local DOL office rather than the State VR administration and as such, State VR agencies should not be required to report this data.

Departments' Response: The Departments acknowledge the commenters' concerns regarding the capture of outcomes for TANF employment services and the difficulty some programs will face in the collection of the data necessary to calculate this indicator. However, if an individual is a participant in a WIOA core program as described in sec. 116(b)(3)(A)(ii) of WIOA, sec. 116(b)(2)(A)(i)(II) of WIOA explicitly requires the Departments to measure the employment rate for that participant in the fourth quarter after exit, regardless of whether that individual is also a participant in TANF or any other required partner program. With regard to comments that maintain that VR agencies should not have to report data on the fourth quarter after exit due to issues of data access and availability, the Departments reiterate the intent to renegotiate the wage record data sharing agreements and issue joint guidance on accessing such data in order to meet the requirements laid out in WIOA sec. 116. The Departments strongly encourage the development, enrichment, and enhancement of partnerships at the State and local levels to leverage such connections in obtaining relevant performance information. No change to the regulatory text is being made in response to this comment.

Section 677.155(a)(1)(iii) implements the third statutory indicator as described in sec. 116(b)(2)(A)(i)(III) of WIOA. This indicator is a measure of the median earnings of those program participants who are in unsubsidized employment in the second quarter after exit. This section remains unchanged from that proposed in the NPRM.

Comments: Several commenters requested guidance on how to match wage records or collect employment-related data without the use of SSNs, because some States cannot collect SSNs and some students do not have them. A commenter suggested that the regulation should provide States with the authority to require SSNs as a condition of program participation. Another commenter asserted that WIOA only should require SSNs when customers are directly receiving some form of financial assistance. A commenter discussed the challenge of tracking the progress of individuals without SSNs. A commenter urged the Departments to provide ways for agencies to share long-term wage and employment information to enable the commenter to report on the indicators.

Departments' Response: The Departments considered the concerns raised by commenters in light of the statutory provisions at WIOA sec. 116(b)(2)(a)(1)(iii) and concluded that, where available and possible, the use of wage records to fulfill reporting requirements is required in accordance with sec. 116(i)(2) of WIOA. Matching participant SSNs against quarterly wage record information is the most effective means by which timely and accurate data can be made available to the system.

Nevertheless, the Departments want to make clear that neither WIOA nor this Joint WIOA Final Rule allows or requires States to request or require SSNs as a condition of program participation or for receipt of any form of financial assistance. As such, program eligibility under WIOA is not contingent on the provision of a SSN. Additionally, depriving such an individual of service would be in violation of the Privacy Act of 1974, which establishes a code of fair information practices that govern the collection, use, dissemination, and maintenance of information about individuals contained in systems of Federal records. Specifically, sec. 7(a)(1) of the Privacy Act (5 U.S.C. 552a Note, Disclosure of Social Security Number) provides that unless the disclosure is required by Federal statute, ''It shall be unlawful for any Federal, State, or Local government agency to deny to any individual any right, benefit, or privilege provided by law because of such individual's refusal to disclose his social security account number.'' In consideration of the circumstances articulated by the commenters in public comments received on both the Joint WIOA NPRM and the WIOA Joint Performance ICR, the Departments are allowing the use of supplemental information to augment the performance information obtained through wage record matching when necessary because critical information (such as a SSN) is not available. More information can be found in the preamble to § 677.175 discussed in more detail below. The WIOA Joint Performance ICR also will provide for the collection of such supplemental wage information in those circumstances where quarterly wage records are not available or may not apply. The Departments also intend to issue guidance and technical assistance regarding the collection and reporting of both quarterly wage record data and supplemental information on employment-based outcomes.

Comments: Some commenters supported the use of median earnings rather than average (mean) earnings, used under WIA, noting that averages can be skewed by a few numbers. One commenter stated that the indicator data should be collected at both the second and fourth quarters. Commenters suggested that the median earnings indicator should be based on all earnings and not just earnings related to the employment goals on the IPE for customers of VR services. With the

change from an average earnings calculation under WIA to a median earnings calculation under WIOA, one commenter asked how to arrive at a baseline for determining performance numbers. A few commenters said they would prefer reporting both average and median wages and highlight the high-income employment outcomes they have historically achieved. The commenters also asked how to best verify and include incomes for self-employment outcomes in this indicator.

Departments' Response: WIOA sec. 116(b)(2)(A)(i)(III), which forms the basis for § 677.155(a)(1)(iii), requires States to collect data regarding median earnings of participants who are in unsubsidized employment during the second quarter after exit from a core program. The Departments have the authority to collect additional information that provides context for the primary indicators of performance. Such information is important to understand and manage public workforce programs. The Departments note that the primary indicators identified in § 677.155 are the only indicators subject to the performance accountability sanctions. Additionally, pursuant to sec. 116(b)(1)(A)(ii) of WIOA and § 677.165, States may develop additional performance indicators which could include median earnings in the fourth quarter, as the commenter suggests.

With regard to inclusion of all earnings and not just those earnings related to employment goals on the IPE for customers of VR services, the individual records collected under the RSA–911 can be used to determine median wages at exit. The Departments acknowledge that wages may vary over time and that median earnings at exit may not reflect median wages in the second and fourth quarters after exit. With regard to baseline data for median earnings, the Departments recognize that some programs may not have the historical data necessary to establish a baseline for median earnings while other programs can review the data collected under WIA to establish an approximate baseline for this indicator. The Departments acknowledge the concerns raised regarding such employment outcomes that would not be captured through a pure match against State UI wage records, such as self-employment. The Departments will promulgate guidance regarding the collection and verification of supplemental employment information, as noted in the preamble to § 677.155(a)(1)(iii) and more fully discussed in the preamble to § 677.175. The Departments recognize there is a need to further clarify and provide guidance regarding transitioning to the WIOA performance indicators and intend to provide further clarification and guidance on the establishment of baseline data. No change to the regulatory text is being made in response to these comments.

Comments: A few commenters recommended that the value of benefits received should be included in the participants' median earnings indicator. Commenters urged reporting of wages expressed as dollars per hour to reflect outcomes for part-time workers accurately.

Departments' Response: Since the value of benefits clearly does not constitute earnings, adopting this recommendation would be inconsistent with the statutory provision calling for measuring earnings. Further information and clarification regarding the operational parameters of each indicator will be provided through both the WIOA Joint Performance ICR and program guidance. No change to the regulatory text is being made in response to these comments.

Comments: A few commenters stated that individuals participating in an education or training program should be excluded from the calculation of this indicator. Commenters especially expressed support for not including youth who were enrolled in postsecondary education in the median earnings indicator because such youth would not necessarily have an income. Some commenters warned that as many individuals are simultaneously enrolled and employed part time, they tend to work fewer hours at lower hourly wage rates. In these instances, the earnings measure serves as a disincentive for programs to provide further education and training. One of the commenters added that exiting applicants with entrepreneurship training may not reflect well on the earnings measures because a new business often takes time to become profitable.

Departments' Response: In response to the comments regarding exclusions from the median earnings indicator, sec. 116(b)(2)(A)(i)(III) of WIOA requires the collection of data regarding the median earnings for all participants who exit the program and are employed during the second quarter after exit, regardless of whether the participants are simultaneously enrolled in an educational or training program. The Departments understand the commenters' concerns regarding the decreased likelihood of full-time employment while enrolled in an education or training programs, but the Departments expect the levels of performance for different programs will vary based on the results of the statistical adjustment of the performance levels for those programs. Furthermore, States will have the ability to disaggregate performance data in order to gain an understanding of the effect of including youth in performance outcomes. No change to the regulatory text is being made in response to these comments.

Comments: Other individuals requested guidance on how to treat missing earnings information for particular participants and whether the participant may be excluded from the dataset used to determine the median earnings.

Departments' Response: In State wage record systems, a missing wage means that no wages for an individual were reported by any firm residing in that State. The missing wage only indicates that the individual is not in employment covered by the quarterly wage records for performance accountability purposes. The Departments have determined that collection and verification of supplemental employment data is allowed for the performance indicators where a wage is not present in quarterly wage data. Supplemental information that is used to establish employment must include earnings information and be counted in the employment indicators and the median earnings indicator. This calculation is meant to represent the median quarterly wage of all individuals who are employed in the second quarter after exit, therefore, ''missing earnings information'' will not be included in the median earnings calculation. Further, the Departments have elected to permit non-wage record matches (supplemental information) in the performance calculations. More information about this is in the preamble to § 677.175 discussed in more detail below. The Departments note that the use of supplemental information must be uniform across performance indicators. In other words, if a participant is included in the employment in second quarter after exit indicator based on information obtained through supplemental information, wage information must be collected and that data must also be used for the median earnings indicator. Likewise, if the collection and verification of employment and wages cannot be obtained for such a participant through either wage record matching or through supplemental wage information, then the participant cannot be included as being in unsubsidized employment during the second quarter and fourth quarters after exit, as measured by the

first and second performance indicators. The Departments will issue guidance regarding the collection and verification of supplemental employment information, as noted in the preamble to §§ 677.155(a)(1)(iii) and 677.175.

Section 677.155(a)(1)(iv) implements the fourth statutory indicator as described in sec. 116(b)(2)(A)(i)(IV) of WIOA, subject to sec. 116(b)(2)(A)(iii). This indicator is the percentage of program participants who obtain a recognized postsecondary credential or a secondary school diploma or its recognized equivalent, during participation in or within 1 year after exit from the program. The Departments are implementing § 677.155(a)(1)(iv) as revised and described here. The regulation, consistent with the statutory requirements, limits inclusion of participants who obtain a secondary school diploma or its equivalent in the percentage counted as meeting the criterion by only including those participants who are employed or are enrolled in an education or training program leading to a recognized credential within 1 year after exit from the program. The Departments specifically sought comment on clarifications necessary to implement this indicator.

Comments: Many commenters expressed concerns about including all program participants in the indicator and asked whether the indicator is limited to those in an education or training program.

Departments' Response: The Departments revised § 677.155(a)(1)(iv) to clarify that this indicator only applies to those participants who are or were enrolled in an education or training program. The purpose of the indicator is to measure performance related to attainment of a recognized postsecondary credential or a secondary school diploma or its recognized equivalent. As such, it would not fulfill the purpose of this indicator to measure a State's performance on the credential attainment indicator against a universe of participants that includes individuals who are not in an education or training program through which they can obtain one of these credentials. The Departments decided that it is appropriate to include, for purposes of this indicator, only those participants enrolled in an education or training program. The Departments have excluded participants enrolled in work-based on-the-job training or customized training from this indicator because such training does not typically lead to a credential. This exclusion avoids creating a disincentive to enroll in work-based training. This section has been revised to clarify that only those participants in an education or training program are included in the performance calculations for this performance indicator, with the exception of those in on-the-job or customized training. The WIOA Joint Performance ICR also will explain that participants, for purposes of the credential rate performance indicator, are only those who are in an education or training program (excluding those in on-the-job training or customized training).

During the review period leading to this Joint WIOA Final Rule, the Departments noted an error in the NPRM related to the statutory requirement that participants receiving a secondary school diploma or its equivalent be included in the percentage of participants meeting the performance indicator only if the participant is employed or enrolled in an education or training program leading to a recognized postsecondary credential within 1 year of exit from the program. The NPRM incorrectly stated that a participant who has *obtained a high school diploma or its equivalent* only is included in the indicator if the participant is employed or is enrolled in an education or training program leading to a recognized credential within 1 year of exit from the program. The Departments have corrected § 677.155(a)(1)(iv) to make it consistent with WIOA's requirement so that a participant who *obtains a secondary school diploma or its recognized equivalent* only counts as having met the performance indicator if the participant is also employed or is enrolled in an education or training program leading to a recognized postsecondary credential within 1 year after exit from the program.

Comments: A few commenters stated that they fully supported the proposed provision. Some commenters remarked that WIOA presents a great opportunity to learn more about the credentials being earned by participants in the workforce system. The commenters suggested that regulations on the reporting of credential attainment should strike a balance between incentivizing the collection of better data and unfairly penalizing States that do not have the ability to measure attainment of all types of credentials, and that the Departments should consider a phased approach for making licenses and certifications part of performance levels.

Departments' Response: The Departments are not planning a phased implementation of the credential attainment indicator because such data generally were collected and reported under WIA. With regard to the full performance accountability provisions under WIOA sec. 116, which include the application of an objective statistical adjustment model and the implementation of sanctions, the Departments did modify § 677.190 to allow for a phased-in approach for assessing performance success or failure for the purposes of sanctions in order to provide programs time to collect and report at least 2 full years of data required to develop and run a statistical adjustment model on those indicators. More information can be found on this in the preamble to § 677.190 below.

Comments: In the preamble to the NPRM, the Departments sought comments on clarifications that would be necessary to implement the credential attainment indicator. Many commenters requested clarification about accepted credentials; how to collect and track credentials; the definitions of enrollment and postsecondary credential; the determination of ''within 1 year after exit'' from the program; the achievement of a secondary degree or General Education Diploma (GED); and whether the indicator applies to the VR program. A commenter recommended consideration of apprenticeships as postsecondary credentials, but other commenters suggested that employer-based work activities generally do not result in industry-recognized credentials but often result in permanent employment.

Departments' Response: The definition of ''recognized postsecondary credential'' is found in sec. 3(52) of WIOA, stating ''a credential consisting of an industry-recognized certificate or certification, a certificate of completion of an apprenticeship, a license recognized by the State involved or Federal Government, or an associate or baccalaureate degree.''

With respect to one comment, the Departments note that this definition includes completion of an apprenticeship. In addition, the statutory language of the credential attainment indicator in WIOA sec. 116(b)(2)(A)(i)(IV) includes participants' attainment of a secondary school diploma or its recognized equivalent in performance calculations, subject to the requirement that those participants also are employed or in an education or training program leading to a recognized postsecondary credential within 1 year after exit from the program. The credential attainment indicator applies to all core programs, including the VR program, except for the Wagner-Peyser Act Employment Service program, as

specified in sec. 116(b)(2)(A)(i) of WIOA. To be counted as having met the indicator, a participant must have obtained a credential at any point during participation in the program or up to 1 year after exit from the program.

The Departments will issue joint guidance that further illustrates what constitutes a recognized postsecondary credential for the credential rate indicator, including definitions for each type of credential. The Departments recognize burden concerns for tracking credential attainment. However, as noted, WIOA requires the collection of data for purposes of reporting on the credential attainment indicator for all core programs, except for the Wagner-Peyser Act Employment Service program. The Departments also will provide joint guidance and technical assistance for tracking and reporting with respect to this performance indicator.

Comments: A few commenters expressed concern that the value of a secondary diploma would be reduced. One commenter suggested the regulations should clarify that employment is at any time during the year after exit. Commenters recommended including alternative, standards-based certificates of high school completion for students with disabilities among the credentials recognized for achievement of the credential attainment indicator. Commenters cautioned that this indicator may not be appropriate for students in English language acquisition programs, and one of these commenters requested that postsecondary credentials include completion of Career and Technical Education programs. A commenter encouraged the reporting of credential type in addition to the attainment of a credential.

Departments' Response: The Departments do not agree that a secondary school diploma would be devalued because a participant's attainment of a secondary school diploma can be included in performance calculations for purposes of the credential attainment indicator. For those who obtain a secondary school diploma or its recognized equivalent, such participants must also be employed or in an education or training program leading to a postsecondary credential within 1 year after exit from the program. Such employment or enrollment in an education or training program only needs to be for some period during the 4 quarters after exit, not for the entire 1-year period after exit. The types of secondary school diplomas and alternate diplomas that would satisfy this performance indicator are those recognized by a State and that are included for accountability purposes under the ESEA, as amended by the Every Student Succeeds Act. The types of recognized equivalents, for those not covered under ESEA, that would satisfy this performance indicator are those recognized by a State. No change to the regulatory text is being made in response to these comments.

Comments: Several commenters also expressed concern that State VR and other programs do not track whether a participant is enrolled in postsecondary education after program exit and that to do so would represent a significant burden. One of the commenters recommended that educational attainment data could be reported as it occurs by the appropriate State educational authorities and matched to participant data. A commenter suggested that sharing information should be mandatory between workforce agencies and secondary and postsecondary educational and other training institutions. One commenter stated that national access to postsecondary records and earnings not covered by UI wage records are needed for implementation of the provision.

Departments' Response: The Departments recognize that, in cases where information was not previously collected or reported on, there is an initial burden associated with establishing such collections for reporting. However, the Departments have concluded that WIOA sec. 116(b)(2)(A)(i)(IV), read in conjunction with sec. 116(b)(2)(A)(iii), requires that the indicator applies to all core programs and necessitates tracking enrollment and employment up to 1 year after exit. With regard to the comments raised concerning real-time tracking and matching of educational attainment, the Departments note that tracking and reporting on participants is an obligation of the program. A State educational authority would not necessarily have information on all participants enrolled in education programs, public or private, non-profit or for-profit. The Departments do not currently have the authority to mandate sharing of information between workforce agencies and secondary and postsecondary educational and other training institutions in the manner proposed. In regards to the comment about national access to postsecondary records and earnings, the Departments do not think that implementation requires national access because States have the authority to implement appropriate mechanisms, including data sharing agreements, at the State level to fulfill these reporting requirements. The Departments are developing guidance to help the States meet their obligations. No change to the regulatory text is being made in response to this comment.

Comments: One commenter stated that participants who were in occupational training designed to lead to employment in a specific occupation and who do not achieve the credential because they have become employed in the occupation should be removed from the indicator. Some commenters suggested that the credential attainment indicator should not be calculated as the percentage of all participants who earn a credential, but the indicator only should calculate the percentage of participants receiving education or training services who earn a credential. A commenter recommended that the indicator only should apply to participants who were enrolled in a program leading to a postsecondary credential or secondary diploma. One commenter cautioned that many students are currently unavailable to the job market. Another commenter reasoned that cross-enrollment may lead to participants furthering their training in one program after leaving another, and this may not be completed within 1 year.

Departments' Response: With respect to the comment that the credential attainment indicator should calculate only the percentage of participants receiving education or training services who earn a credential, the Departments reiterate, as noted above, that § 677.155(a)(1)(iv) has been revised, as contained in these final regulations, to address this concern. With respect to the comment that those who do not earn a credential because they become employed should not be included in the calculation for the credential attainment indicator, the Departments note that the reason that a participant fails to attain a credential, including participating in further training, is not a basis for excluding that participant from the performance calculations for the credential attainment indicator. No change to the regulatory text is being made in response to these comments.

Comments: Commenters also suggested that the indicator would result in a strong disincentive to enroll participants in title I programs that would not result in an industry-recognized credential. An individual mentioned that the indicator may discourage participation in training programs that take several years to complete. Commenters also suggested that prospective workers enrolled in TANF and other hard-to-serve populations may require more than 1

year to achieve positive outcomes and that States have varying requirements for attaining credentials.

Departments' Response: The Departments note that because the credential attainment indicator is an exit-based indicator, there is no requirement for a participant to attain a credential within 1 year of enrollment in the program. There is no time limit on how long participants are in the program, and the measurement point for credential attainment is not until 1 year following exit from the program. If participants are in a program multiple years before attaining a credential they are still counted as a success in the indicator if the credential is attained during participation in the program or within 1 year of program exit. Thus, the Departments do not think that this indicator will discourage participation in training programs that take several years to complete. It should be noted that in instances where participants are enrolled in an education or training program that is not intended to result in a credential, the measurable skill gains indicator can capture progress made by participants.

Section 677.155(a)(1)(v) implements the fifth statutory indicator as described in sec. 116(b)(2)(A)(i)(V) of WIOA. This indicator is a measure of the percentage of participants who, during a program year, are in education or training programs that lead to a recognized postsecondary credential or employment, and who are achieving measureable skill gains toward such a credential or employment. The Departments are defining measurable skill gains as documented academic, technical, occupational, or other forms of progress toward the credential or employment. After seeking and considering all comments on the measurable skill gains indicator proposed at § 677.155(a)(1)(v), the Departments added five measures of documented progress that specify how to show a measurable skill gain.

Comments: The preamble of the NPRM identified six examples of standardized ways States could measure documented progress during participation in an education or training program, and sought public comment on these and other ways progress may be measured. Some commenters generally supported the examples as well as the preamble language that stated, ''Documented progress could include such measures as . . .'' because it provided the State with flexibility. Another commenter recommended a menu system similar to the proposed but recommended the progress measure be attached to participant characteristics rather than a funding stream. Other commenters asserted that it would be difficult to standardize measures and documentation across all core programs as proposed by the Departments, and there would be little benefit for the VR program where individuals often seek to maintain their current occupation. Another commenter recommended that Local WDBs should be required to write into their local plans an exhaustive list of the documented progress measures they will use.

Departments' Response: The Departments noted the suggested ways in which the States could measure documented progress. The Departments disagree with commenters that recommend against standardized methods, across States and core programs, to measure documented progress for purposes of the measurable skill gains indicator. Section 116(b)(4)(A) of WIOA requires the Secretaries to issue definitions of the primary performance indicators in order to ensure national comparability of performance data. Defining the measurable skill gains indicator to include standardized methods to measure documented progress across programs helps to ensure this comparability. With regard to the VR program, although a State VR agency may provide services to individuals with disabilities that enable them to maintain their current occupation, the Departments note that the majority of individuals served by the VR program receive assistance in obtaining or advancing in employment. With regard to local plan content and the recommendation that it include ''an exhaustive'' list of the documented progress measures, the Departments encourage States and local areas to consider the service provisions and applicable progress measures in the development of their plans but have determined that it is beyond the scope of part 677 to regulate concerning such requirements. State and local plans are discussed more fully in 20 CFR part 679 (*see* DOL WIOA Final Rule, published elsewhere in this issue of the **Federal Register**). The Departments reiterate that States will be required to report on the measurable skill gains indicator as set forth in § 677.155(a)(1)(v), consistent with program guidance. No change to the regulatory text is being made in response to these comments.

Comments: Many commenters strongly supported the fact that the proposed regulations recognize the intent of Congress to ''encourage local adult education programs to serve all low-skilled adults,'' and stated that the measurable skill gains indicator will help to achieve that goal. One commenter suggested that measurable skill gains should be the only indicator of performance required for students functioning below the ninth grade level.

Departments' Response: The Departments do not agree with the suggestion that the measurable skill gains indicator be the only indicator of performance for students functioning below the ninth grade level since WIOA requires that the indicators of performance apply across all core programs in order to assess the effectiveness of States and local areas in achieving positive outcomes for participants served by those programs.

There is no basis for a blanket exclusion from all performance indicators except the measurable skill gains indicator for participants functioning below the ninth grade level. Such participants have the potential to receive services under a program, be included in performance calculations, and be counted as having met one of the other indicators. Therefore, unless a student functioning below the ninth grade level is otherwise appropriately excluded from participants included in the performance calculations for a particular indicator under § 677.155(a)(2), the Departments will not categorically exclude such students functioning below the ninth grade level from the other five indicators of performance. No change to the regulatory text is being made in response to these comments.

Comments: The majority of commenters endorsed continued use of educational functioning levels (EFLs) and encouraged eventual refinement of EFLs or the development of other potential measures that can document participants' progress toward educational goals. Other commenters expressed concern because in high intensity programs, students may advance two or more EFLs; therefore, the proposed language would not capture the full impact of adult education instruction. The commenters recommended that the requirement should be ''the achievement of the EFLs of the participant.''

Departments' Response: As set forth in the preamble of the NPRM, the first standardized way States could measure and document participants' measurable skill gains is the documented achievement of at least one EFL of a participant in an education program that provides instruction below the postsecondary level. The Departments agree with comments that supported the continued use of EFLs to measure progress towards the measurable skill gains indicator. The Departments also

recognize that in some cases, students may advance more than one EFL during a program year. However, for purposes of the performance calculations, programs will be permitted to report only one EFL measureable skill gain per a participant's exit from the program through the WIOA Joint Performance ICR. This means that if a participant exits a program more than once in a program year and attains an EFL measureable skill gain prior to exiting each time, then the program will be able to report, for performance calculation purposes, more than one EFL measureable skill gain for the participant in a program year. In so doing, participants, for purposes of performance calculation purposes with respect to the measureable skill gains indicator, will be treated the same as for any other performance indicator. Having said this, through the WIOA Joint Performance ICR, the Departments will require States to provide unique identifiers for participants. Thus, there will be a unique count of participants under the core programs regardless of how many times the participant exits the program (see discussion in this preamble regarding the definition of ''exit'' in § 677.150(c) above). The Departments have added § 677.155(a)(1)(v)(A) to include ''documented achievement of at least one educational functioning level of a participant receiving instruction below the postsecondary education level,'' as one way of measuring documented progress under the measurable skill gains indicator. Options for measuring educational functioning level gain are described in the WIOA Joint Performance ICR.

Comments: A commenter recommended that attainment of a high school diploma not be included as one of the measures of documented progress for purposes of the measurable skill gains indicator.

Departments' Response: The Departments disagree with the assertion and consider attainment of a secondary school diploma a valuable measure of progress and have therefore revised § 677.155(a)(1)(v)(B) to include ''documented attainment of a secondary school diploma or its recognized equivalent.''

Comments: Commenters stated that a lower requirement of six credit hours per semester better reflects the capability of adults who must work to provide for their families. Another commenter suggested that the measure should be expanded to include a demonstration of semester-to-semester retention, which is a key indicator of academic success.

Departments' Response: As proposed in the preamble of the NPRM, the third standardized way States could measure and document participants' measurable skill gains is through a transcript or report card for either secondary or postsecondary education. The Departments had proposed a measure requiring a transcript or report card for 1 academic year or for 24 credit hours. The Departments agree with the concern that a transcript for 1 academic year or 24 credit hours is too onerous for part-time students and have changed this measure to require that the transcript or report card reflect a sufficient number of credit hours to show a participant is achieving the State's academic standards. The Departments' current standard for a sufficient number of credit hours is at least 12 hours per semester or, for part-time students, a total of at least 12 hours over the course of 2 completed consecutive semesters during the program year that shows a participant is achieving the State unit's academic standards. The Departments have added § 677.155(a)(1)(v)(C) to read ''secondary or postsecondary transcript or report card for a sufficient number of credit hours that shows a participant is meeting the State unit's academic standards.'' Clarification regarding the progress measures and the specific requirements for collection and reporting will be provided through the Departments' WIOA Joint Performance ICR, Department-specific ICRs, and programmatic guidance.

Comments: A commenter suggested that the Joint WIOA Final Rule identify progress reports from training providers as an acceptable measure of documented progress for purposes of the measurable skill gains indicator.

Departments' Response: As proposed in the NPRM, the fourth standardized way States could measure and document participants' measurable skill gains is through a satisfactory or better progress report towards established milestones from an employer who is providing training. Such milestones to be achieved could include completion of on-the-job training (OJT) or completion of 1 year of an apprenticeship program. The Departments agree with the commenter that progress reports from training providers as to achievement of established milestones also could be acceptable and note that when participants are enrolled in training programs, the training providers are in the best position to report on participants' progress toward established milestones. The Departments emphasize that rigor is expected in determining whether a progress report is satisfactory, whether from an employer or a training provider. The Departments have added § 677.155(a)(1)(v)(D) to include ''satisfactory or better progress report, towards established milestones, such as completion of OJT or completion of 1 year of an apprenticeship program or similar milestones, from an employer or training provider who is providing training.''

Comments: Several commenters requested information on how progress shall be measured under the VR program.

Departments' Response: With regard to the VR program, there may be several methods for obtaining documentation related to measuring progress. For example, documentation such as standardized reports of progress from training providers, provided to the State VR agency, may be used to substantiate progress. To adequately document progress, programs should identify appropriate methodologies based upon the nature of the service being provided. For example, VR agencies frequently use grade reports from postsecondary educational institutions to document a student's progress toward achieving a degree. For OJT, where the individual is being trained on site by either the employer or by a vendor, VR Counselors receive regular training reports that include the OJT milestones completed as the individual masters the job skills required. More broadly, for apprenticeship programs, the milestones are already incorporated into the process. The steps required to complete the apprenticeship and the increases in pay that occur can be used to document progress.

Comments: Some commenters recommended that successful completion of an exam, as recommended in the preamble of the NPRM as a way of measuring documented progress, be understood as achieving a passing score on the exam.

Departments' Response: As proposed in the preamble of the NPRM, the fifth standardized way States could measure and document participants' measurable skill gains is through successful completion of an exam that is required for a particular occupation, or through progress in attaining technical or occupational skills as evidenced by trade-related benchmarks such as knowledge-based exams. The Departments agree with the commenters that this measure documenting a measurable skill gain should require that a participant achieve a passing score on an exam and thus have added § 677.155(a)(1)(v)(E), which requires ''successful passage of an exam that is

required for a particular occupation, or progress in attaining technical or occupational skills as evidenced by trade-related benchmarks such as knowledge-based exams.'' Joint guidance will be issued about what qualifies as a trade-related benchmark to show documented progress for purposes of the measurable skill gain indicator.

Comments: Commenters expressed concern about another measure of documented progress proposed in the preamble to the NPRM—measurable observable performance based on industry standards. Commenters indicated that it would be very challenging to identify a way to document this type of gain.

Departments' Response: The Departments agree with the commenters' concerns that it would be difficult to articulate a method for documenting progress using measurable, observable performance based on industry standards. The Departments did not include this measure in § 677.155(a)(1)(v).

Comments: Commenters recommended using other measures of progress including achievement of passing grades, completion of high school equivalency (HSE) subtests, receipt of postsecondary education or training, completing some adult diploma requirements, and obtaining U.S. citizenship to document measurable skill gains. A commenter suggested that employment-related indicators of skill gains, such as employment in the participant's program of study, advancement in job titles, and performance-based wage increases, recognize that skills attainment correlates with career progression. One commenter recommended that a high school credential from another country should be treated as sufficient in meeting the requirement. Some commenters suggested that the metric should measure completion of something easily definable such as a degree, certification, or entrance into a program. A commenter asked the Departments to measure interim progress, including documented gains in achieving ''soft skills,'' such as program attendance, timely arrival, gains in proper behavior, and creating an IPE. Another commenter asked whether proceeding through a prescribed program toward a secondary degree would be considered ''achieving measurable skill gains.'' One commenter cautioned about subjectivity in deciding positive gains. One commenter stated that the measurement should be simply ''making progress—yes or no.''

Departments' Response: The Departments reviewed all of the additional suggestions for measurement of documented progress under the measurable skill gains indicator and concluded that none of the additional suggestions would be included in the Joint WIOA Final Rule or WIOA Joint Performance ICR. The Departments concluded that subjectivity should not be a part of determining skill gains and have included five objective progress measures that States may use in implementing the measurable skill gains indicator of performance. These indicators are sufficiently broad as to provide flexibility that addresses some of the commenters' concerns, while maintaining rigor. Several of the measures suggested by commenters (*e.g.,* achieving soft skills) do not share the same level of rigor or objectivity. The Departments will provide further clarification, definition, and specification in the WIOA Joint Performance ICR.

Comments: Another commenter suggested the Departments empanel expert working groups to assist in developing measures of skill gains. A commenter suggested that regional or local workforce boards be allowed to assign the WIOA defined skill gains indicator to particular education or training programs based on program curriculum and goals. One commenter recommended allowing the Local WDB to define industry-related credentials or eliminating work-based learning from the measurable skill gains indicator. Another commenter agreed that work-based training activities, such as on-the-job training, should be exempt from this indicator.

Departments' Response: The Departments acknowledge the various points raised with regard to objective measures that are implemented in a rigorous manner. The Departments have, through the WIOA Joint Performance ICR, jointly coordinated the development of the underlying calculations, specifications, and operational definitions of the documented progress measures under this indicator. This will ensure measures uniformly are implemented in a rigorous and objective way. In addition to the WIOA Joint Performance ICR, each core program will define through guidance, the types of skill gains that are appropriate for the services provided and whether the program is an education or training program that leads to a recognized postsecondary credential or employment. For example, work experience in the WIOA title I youth program may not be considered an education or training program and, therefore, the measurable skill gains indicator may not apply to those participants engaged only in work experience under the WIOA title I youth program. More guidance regarding education and training programs is provided in 20 CFR part 680 (*see* DOL WIOA Final Rule published elsewhere in this issue of the **Federal Register**). No change to the regulatory text is being made in response to these comments.

Comments: Commenters asked for specificity and guidance about the ''comparator group/cohort;'' how to most efficiently collect documentation (such as confirmation by phone or email); industry-specific recognized credentials; how time intervals would be used for skill gains; how the measure applies to shorter-term training programs that are completed within 1 year; how different measures could be used for different trainings; whether Indian and Native American youth are included in this indicator; and definitions and timing regarding when a measurable skill gain must have occurred in order to be counted.

Departments' Response: The Departments recognize that the regulation poses broad parameters for these indicators. Many concerns and requests for clarity by commenters were identified and will be explained within the WIOA Joint Performance ICR or Department-specific ICRs, which are designed to operationalize such aspects of collection and reporting as time periods, specific calculations, details regarding who is included, and where to record positive outcomes. In addition to the WIOA Joint Performance ICR, the Departments will provide further guidance on acceptable source documentation, and the definitions recommended by commenters. In addition, the Departments will provide program-specific guidance for programs, such as the Indian and Native American youth program, on the application of performance indicators in their respective regulations and in guidance.

Comments: In the preamble to the NPRM, the Departments sought comments on whether time intervals should be required when implementing the measurable skill gains indicator and if so, what time intervals might be. One commenter suggested that specific time intervals should not be required because of variation in services across and within core programs and because individuals at different levels take different amounts of time to show gain. Other commenters agreed that a time requirement should not be used for determining measurable skill gains. Certain commenters, however, recommended that time intervals be established in a manner that is flexible

enough to meet the varying durations of service across core programs, from 1 month to an academic year, but those time intervals should not adversely affect the provision of services based on the particular needs of a customer. One commenter stated that, for youth under WIA, the skill gains and literacy/numeracy gains are effective for a participation year. However, if a customer enrolls in education or training toward the end of a program year, it will result in a negative outcome due to the customer not having enough time to obtain the skill gain before June 30. This commenter recommended that any participants, adult or youth, who were enrolled less than 90 days prior to the program year end, and are continuing services into the next program year be allowed to continue as an active participant, and considered enrolled in Year 1, and in progress in Year 2, with expected completion in Year 2. Another commenter supported a minimum program duration threshold, and suggested that measurable skill gains generally should not be available to programs that are shorter than sixteen weeks. Another commenter suggested a time period of measurement set at the first anniversary of enrollment and each year thereafter.

Departments' Response: The Departments considered whether a minimum time threshold should be incorporated into the measurable skill gains indicator. The Departments have concluded that, given the diversity of participant needs and program services, imposing a time period by which progress is to be documented would be somewhat arbitrary and difficult. Such practice could result in excluding a number of participants from performance accountability reporting requirements, even if those participants would achieve a gain under one of the measures of progress. The Departments recognize that participants enrolling late in the program year may not have enough time to achieve a measurable skill gain prior to the end of the first program year, and the Departments recognize this could be perceived as negatively impacting performance. However, the negotiation process can and should take into account enrollment patterns and lower baseline data when setting targets for the measurable skill gains indicator. The Departments are concerned about incentivizing behavior that discourages service providers from enrolling disconnected youth in particular when they first approach programs, or that purposefully attempts to focus service on individuals who are more likely to obtain a positive outcome. The Departments emphasize that programs must not delay enrollment or prohibit participants from entering a program late in the program year. All participant outcomes, regardless if achieved at the end of the reporting period in which they enrolled or in the next reporting period, count as positive outcomes for the program. No change to the regulatory text was made in response to these comments.

The Departments will define, through program guidance, the types of services and trainings that constitute ''an education or training program that leads to a recognized postsecondary credential or employment,'' applicable for each of the core programs. All participants who enrolled during a program year in an education or training program that leads to a recognized postsecondary credential or employment are counted each time the participant exits the program during a program year.

Comments: In the preamble of the NPRM, the Departments also asked for comments on whether the negotiated levels of performance for this indicator should be set at the indicator level or the discrete documented progress measure (*e.g.,* attainment of high school diploma) level. Setting the negotiated levels of performance at the indicator level would aggregate results for all documented progress measures (*i.e.,* achieving any or several of measurable skill gains would be recorded as a success). Setting the negotiated levels of performance based on discrete documented progress measures would separately set targets for each indicator and each measurable skill gains. The vast majority of these commenters preferred that the performance targets for this indicator be set at the indicator level rather than at the documented progress level. Other commenters, however, suggested that standardization is more easily achieved by linking the target to a documented progress measure level, stating that targets based on documented progress, versus an indicator, may be easier to collect. Another commenter suggested that performance targets should include both indicator and documented progress measures.

Departments' Response: After considering the comments received, the Departments agree with the majority of commenters that supported setting the target (or the adjusted level of performance) at the indicator level. The Departments have concluded this will provide a more streamlined and user-friendly approach to using progress measures and will result in a more uniform application of the measurable skill gains indicator. Guidance on negotiating adjusted levels of performance that contains specific information about setting targets for Measurable Skill Gains will be issued by the Departments. No change to the regulatory text is being made in response to these comments.

Section 677.155(a)(1)(vi) implements the sixth statutory indicator as described in sec. 116(b)(2)(A)(i)(VI) of WIOA, subject to sec. 116(b)(2)(A)(iv). This indicator measures program effectiveness in serving employers. Under WIOA, the Departments must consult with stakeholders and receive public comment on proposed approaches to defining the indicator. As part of this requirement, in addition to seeking public comment through the NPRM and the WIOA Joint Performance ICR, the Departments previously sought public input on performance indicators generally and on the business indicators specifically through several avenues, including a town-hall meeting that addressed all of the primary indicators, a town-hall meeting convened with employers, and additional town-halls and webinars on WIOA across the country as well as consultations with State Administrators for AEFLA programs and VR stakeholders. As described more fully below, the Departments received many comments regarding the three proposed definitions of this indicator. After considering the responses received through all venues, the Departments are initially implementing this indicator in the form of a pilot program to test the rigor and feasibility of the three proposed approaches, and to develop a standardized indicator. The performance indicator for effectiveness in serving employers will not be included in sanctions determinations until the standardized indicator is developed.

Proposed Approaches to Measuring Employer Satisfaction

Comments: The preamble to the NPRM described three approaches to measure employer satisfaction (*i.e.,* effectiveness in serving employers). In the first approach, States would use wage records to identify whether or not a participant matched the same FEIN in the second and fourth quarters. Many commenters opposed this approach because participants may have relocated, joined the military, or found a better job, although these circumstances do not mean the employer was not satisfied. They also opposed this approach because the mere fact that an individual is employed with the same employer does not mean that

the employer is satisfied. Many other commenters, however, favored the approach because it would be the least disruptive to employers. A commenter agreed that employee retention can be measured, but that measure does not take into account the quality of the placement. Commenters suggested piloting a limited demonstration using existing data to determine if the variability in the types of occupations in a particular local area has a more profound impact on retention than the value added by the services provided under a WIOA program, and to determine whether there is a correlation between retention and effectiveness.

The second approach to define this indicator would measure the repeated use rate for employers' use of the core programs. Many commenters did not support this approach because some employers may not have many hiring needs during a program year, or an employer may have a need but the program has no students who are ready to graduate and go to work. Also, this approach would encourage programs to protect their individual employer relationships rather than working collaboratively through sector partnerships. Several commenters recommended use of this measure along with the number of workers employed by businesses participating in sector partnerships. Other commenters supported the approach because it represents increased use, retention, or growth of business engagement, although some commenters would use the number of workers employed, not the number of businesses served. The preamble to the NPRM specifically sought comments on how States could capture this data, the feasibility of capturing and reporting this data, and queried whether this indicator would measure the efficacy of services provided to employers. The Departments received both positive and negative comments regarding this approach.

The third approach would use the number or percent of employers that are using the core program services out of all employers represented in an area or State served by the system (*i.e.,* employers served). A large proportion of commenters opposed this approach and warned that this saturation method only would work if all participants come from the local market area; for a number of programs, it is usually not the case that most of the participants come from the local market area. Also, the commenters asserted that this option would focus too much on the breadth of employer involvement, rather than the depth or quality. Some commenters supported this approach when used with another approach. The preamble to the NPRM specifically sought comments on how States could capture this data, the feasibility of capturing and reporting this data, and queried whether this indicator would measure the efficacy of services provided to employers. The Departments received both positive and negative comments regarding this approach.

Departments' Response: After further review, analysis, and consideration of public response, the Departments have concluded that too little is known with regard to the validity and reliability of each of the proposed approaches. In concurrence with multiple commenters, the Departments have concluded that the retention method, using wage record FEIN matches to be the least burdensome method to employers for measuring the quality of service provided to employers given that the outcome is concluded solely by the use of wage-match data, which prevents outside factors from influencing the way success is measured within the reporting system. The Departments concluded, however, that there was not enough evidence that this point of measurement would encompass the intent of this indicator. Therefore, the Departments have proposed a pilot allowing all three approaches, and any additional measure that the Governor may establish relating to services for employers, with the intent of assessing each approach for its efficacy in measuring the effectiveness in serving employers.

The Departments have included these approaches in the WIOA Joint Performance ICR and will require each State to choose two of the three approaches set out in the NPRM as well as any additional measure that the Governor may establish related to services to employers, with results to be included in the first WIOA annual report due in October 2017. This approach provides States flexibility in selecting the measures that best suit their needs, while providing partner Agencies the opportunity to evaluate States' experiences in using these measures during PY 2016 and PY 2017, and additionally allows the Departments to obtain employer feedback regarding the extent to which these indicators measure effectiveness in serving employers. The Departments will evaluate State experiences with the various indicator approaches and plan to use the results of that evaluation to identify a standardized indicator that we anticipate will be implemented no later than the beginning of PY 2019. In this process, the Departments intend to engage the National Association of State Workforce Agencies (NASWA) and the States to inform the evaluation design; communicate how States fare in operationalizing the measures; and contribute to the development of technical assistance activities and tools.

The Departments acknowledge the dissatisfaction expressed by commenters with using each of the NPRM proposed measures as a sole indicator of successful service to employers and agree with comments discussing the utility of piloting multiple alternative measures to ensure that States are being required to report on employer satisfaction in the most effective manner. As such, the Departments will work to implement a pilot program, the details of which will be further delineated in joint Departmental guidance. The Departments have opted to implement a pilot program using all of the approaches in order to assess the States' experiences with these and evaluate the efficacy of such approaches in measuring this construct. Further guidance regarding the pilot program will be provided.

Effectiveness in Serving Employers across Programs

Comments: The NPRM also sought comment on using effectiveness in serving employers as a shared indicator across programs, as many employers are served by multiple programs. Many commenters supported using effectiveness in serving employers as a shared indicator across programs because it would foster collaboration rather than competition among the core programs. One commenter stated that using effectiveness in serving employers as a shared indicator would mitigate concerns regarding measuring effectiveness in serving employers for the Wagner-Peyser Act program. Commenters stated that there are too many indicators already and a single metric should suffice. Commenters also suggested that the Departments should engage the employer community, such as using a short survey or task force, to discover methods of measuring effectiveness. One commenter, however, opposed employer surveys and burdensome employer contacts. A group of commenters recommended that agency directors conduct a study on how effectively workforce development aligns with business needs. Others favored having States create and submit for approval an indicator that meets the State's current needs, including targeted sectors and partner collaboration. A commenter suggested that the workforce system offer one point of contact or

''account executive'' to each employer. However, one commenter opposed the use of a shared indicator, and recommended measuring at an individual program level in order to measure the impact on each core program.

One commenter developed a novel approach for measuring effectiveness and provided details in a concept paper, which was expressly supported by some commenters. The approach includes a customizable point-menu system that would award varying levels of points to WDBs based on the degree of intensity and the value of services provided. Services earning high points would clearly reflect deeper relationships with employers and activities that are the result of longer-term relationships. The Departments will consider this approach in the course of the pilot program. A separate commenter suggested using tiers to measure employer engagement with concrete examples. The Departments also will further consider this suggestion of a tiered approach.

The preamble to the NPRM also requested feedback regarding whether a single metric for this indicator would sufficiently capture effectiveness in serving employers or if this indicator should encompass a combination of metrics, as well as how these metrics could most effectively be combined. A number of commenters expressed concern or disinterest with using a single metric to measure effectiveness in serving employers.

A few other commenters who expressed support for using multiple metrics for this indicator recommended a list of core functions to indicate the effectiveness in serving employers, with the list of core functions including strategic planning with business to identify business needs; outreach and recruitment; hiring; retention; training, consultation services, and other customized services; and business customer satisfaction with services provided. One commenter added preparing workers for in-demand industries and occupations and the percentage of participants who earn an industry credential. Some commenters also mentioned fill rate—the number of job seekers placed against the number of open job orders in the system—and employer referrals. A few commenters stated that there is insufficient clarity on the employer satisfaction indicator and the meaning of effectiveness.

Departments' Response: The Departments have concluded that implementing the effectiveness in serving employers indicator as a shared indicator across all core programs to be the most useful approach based on the collaborative nature of this method and the overwhelming majority of commenters who were in favor of this option. In doing so, States and local areas are better positioned to provide a single point of contact to each employer, making it easier for the differences between specific core programs to become invisible and enable the programs to serve together as a unified front. Measurement at the program level would be contrary to WIOA's efforts to streamline reporting across programs, reduce burden on employers, and decrease the likelihood of duplicated employer counts. In keeping with such efforts, the Departments have opted not to require employers to fill out any additional surveys. The Departments had, however, prior to the publication of the NPRM, engaged in multiple meaningful exchanges with the employer community to receive feedback on the most appropriate ways to assess the utility of the public workforce system for businesses.

In addition, through the implementation of the previously mentioned pilot program, the Departments will seek to discover the best methods for assessing how well workforce development aligns with business needs. There were a number of noteworthy measures suggested by State workforce agencies and nonprofit organizations, some of which will be included in the pilot, giving the Departments an opportunity to review some of the alternative methods that would help States to improve current relationships and establish strong future relationships with local employers, such as using the fill rate, employer referrals, the level of employer engagement, allowing any additional measure that the Governor may establish relating to services for employers, participation in targeted sector partnerships, the inclusion of recruitment, training, and other pre-hire services as part of the performance metric, using tiers to measure employer engagement, and the use of already existing electronic, or wage record data along with a myriad of other valuable recommendations. The Departments acknowledge the value of using a combination of metrics as pointed out by a number of commenters and will seek to delve further into the benefits of such an option through the use of the upcoming pilot program. No change to the regulatory text is being made in response to these comments.

Comments: One commenter stated that the provision is not applicable to the INA program because it is not a core program. Another commenter requested that the measurement of effectiveness of serving employers be eliminated as a measure for Adult Education and Literacy because the program already works closely with Career and Technical Education, the workforce system, and industry to ensure that it is providing programs and services to meet the needs of employers. A commenter recommended that any finalized measure not allow a program to be penalized because of factors beyond its control. Another commenter requested information about feedback obtained at the stakeholder meetings that involved employer partners.

Departments' Response: The Departments recognize that the INA program is not a core program. However, WIOA sec. 116(e)(5) requires that the performance accountability indicators (which include effectiveness in serving employers) be used to assess performance, and WIOA sec. 116(h)(2) requires agreement on the adjusted levels of performance for all of the primary indicators be reached between the Secretary of Labor and the entity carrying out activities under this section.

In response to the comment requesting that the measurement of effectiveness of serving employers be eliminated as an indicator for the AEFLA program, the Departments have no authority to exempt AEFLA programs from the indicator regarding effectiveness in serving employers. WIOA sec. 116(b)(2)(A) explicitly requires that the State primary indicators of performance for the AEFLA activities authorized under title II, as well as for other specified programs and activities, shall include indicators of effectiveness in serving employers. In response to concerns about programs being required to account for factors beyond their control, the Departments refer to § 677.170 and the associated discussions regarding factors to be considered when coming to agreement on negotiated levels of performance, including the objective statistical model. The Departments have provided a summary of comments raised at stakeholder meetings and during the regulatory process above. No change to the regulatory text is being made in response to these comments.

Comments: Commenters expressed a great deal of concern regarding the implementation of an indicator that would likely cause undue penalty.

Departments' Response: The Departments note that this concern weighed heavily in the decision to allow employee retention to serve as a means of measuring employer satisfaction. The Departments also note that concerns regarding penalties are an issue that will

be greatly ameliorated with the use of benchmark target setting via the statistical adjustment model. The statistical adjustment model also will address issues such as size discrepancies across States and local areas, labor shortages, and other external factors and provide objective, realistic goals for improvement. Application of the statistical model to both set targets and apply sanctions is most effective when assessing quantitative metrics, with the use of qualitative metrics making both efforts exponentially more complex. It is for this reason that, although the Departments understand the significance of using such methods to evaluate quality service to employers, more qualitative metrics were not included as part of the effectiveness in serving employers indicator.

As previously stated, a great deal of discussion regarding these and other proposed methods for measuring this indicator took place during previous webinars and town halls with State workforce agencies, members of the employer community, and other stakeholders. The outcome of these discussions was the three options listed within the NPRM. Understanding the importance of receiving extensive feedback on this issue, the Departments requested further input via the NPRM and the proposed WIOA Joint Performance ICR, the responses for which can be found on regulations.gov. No change to the regulatory text is being made in response to these comments.

Section 677.155(a)(2). The Departments added a new paragraph § 677.155(a)(2) after considering public comments received in response to the proposed WIOA Joint Performance ICR, particularly with regard to discrete populations that would be excluded from performance calculations. As noted in both the preamble to the NPRM and the supporting statement to the proposed WIOA Joint Performance ICR, because of the close relationship between the two documents, the Departments informed the public that comments on either the NPRM or the proposed WIOA Joint Performance ICR would be used to form the basis for necessary changes in both the Joint WIOA Final Rule and the finalized WIOA Joint Performance ICR. After reviewing WIOA sec. 116, the Departments have concluded that the purpose of the performance accountability system is to measure a program's performance with respect to the populations served and the services provided. A program's performance should be measured in terms of populations it is designed to serve or services it is designed to provide. In so doing, the performance accountability system will measure a program's performance more precisely. Given that sec. 116(f) of WIOA imposes sanctions for poor performance, it is critical that the Departments receive data that accurately reflect a program's performance. Explicitly defining which participants will be included in performance indicator calculations will allow a program's performance to be assessed appropriately. It is for this reason that the Departments proposed certain ''exclusions'' in the proposed WIOA Joint Performance ICR.

The Departments have added language in the Joint WIOA Final Rule at § 677.150(a)(2)(i) to exclude individuals receiving services under sec. 225 of WIOA from all primary performance indicators for purposes of performance accountability, except the measurable skill gains indicator (§ 677.155(a)(1)(v)). This is because the measurable skill gains indicator is the only performance indicator applicable to this population. In so doing, the Departments ensure programs serving these individuals will not be inadvertently subject to low performance levels with regard to those indicators not applicable to sec. 225 participants.

Section 677.150(a)(2)(ii) allows the Secretaries of Labor and Education to make further decisions as to the participants to be included in calculating program performance levels for other purposes that are necessary with regard to any of the primary performance indicators. Further information about those exclusions is provided through the WIOA Joint Performance ICR and related guidance.

Section 677.155(b)—Indicators for the Employment Service Programs

Paragraph (b) of § 677.155 remains unchanged from that proposed in the NPRM. The Departments did not receive any comments regarding this provision.

Section 677.155(c)—Indicators for the Youth Program

Paragraph (c) of § 677.155 implements the primary indicators for the WIOA title I youth program, as described in sec. 116(b)(2)(A)(ii) of WIOA. No change to the regulatory text is being made in response to public comments.

Comments: A few commenters supported the fact that the common performance indicators for youth programs apply only to WIOA title I youth programs. Some commenters remarked that employment rate measures are different for youth and adults because the youth measure allows enrollment in education and training to be included in the indicator, that this difference is likely to work against co-enrollment. These commenters suggested that 18 to 24 year old individuals co-enrolled in the WIOA title I youth program and other WIOA programs only be included in the youth indicators.

Departments' Response: Although the Departments recognize that subjecting such youth to adult and youth employment rate indicators could serve as a barrier to co-enrollment, WIOA only authorizes the youth indicators for the WIOA title I youth program and does not authorize these indicators for any other WIOA core program.

Comments: One commenter suggested that the following outcomes count toward the first two youth statutory indicators as successful outcomes: (1) Unsubsidized employment, (2) military employment, (3) education (secondary or postsecondary), (4) advanced training (long-term licensed or credentialed, for example, registered nurse training), and (5) occupational skills training.

Departments' Response: The Departments agree that these suggested outcomes, and additionally registered apprenticeships, are among the successful outcomes for the first two statutory indicators, but do not think that any change to the regulatory text is necessary to accommodate such outcomes as successful. Specific references to particular successful outcomes will be included in the WIOA Joint Performance ICR.

Comments: One commenter suggested that supplemental data be allowed to measure employment in the second and fourth quarters after exit because UI wage record data alone do not capture the full spectrum of employment options.

Departments' Response: The Departments agree and have chosen to permit the States to use non-wage record matches (supplemental information) in calculating the performance indicators, subject to use consistent with the Departments' guidance on this issue. More information can be read about this in the preamble to § 677.175 below. That guidance regarding the use of supplemental wage data will be relevant to the use of supplemental data to determine employment status.

Comments: One commenter recommended consideration of planned short-term employment by youth as a positive outcome, such as internships. Another commenter requested that service programs such as AmeriCorps, NCCC, and Public Allies be counted as ''unsubsidized employment.'' A

commenter recommended that placement in unsubsidized employment or postsecondary education count as a success regardless of the quarter in which it occurs, rather than focusing only on the second and fourth quarters after exit. Similarly, one commenter asked that attainment of initial employment count as a successful outcome (*i.e.,* a placement rate).

Departments' Response: As required by sec. 116(b)(2)(A)(ii)(I) and (II) of WIOA, only unsubsidized employment will count as a positive outcome for employment in the first and second indicators. Internships that are subsidized would not count as a positive employment outcome, but they are an important service in preparing youth for unsubsidized employment. However, service programs, such as AmeriCorps, would count as a positive outcome in the first and second primary youth indicators because these service programs are considered training for the purposes of those youth indicators. The Departments will clarify the categorization of service programs in the WIOA Joint Performance ICR. The first and second primary youth indicators measure the percentage of participants in unsubsidized employment, or in education or training activities, during the second and fourth quarters after exit. The Departments do not have the authority to deviate from the WIOA statute by counting participants' status in the first and third quarters after exit, or by counting participants as successful simply upon attainment of initial employment.

Comments: A few commenters expressed concern that the requirement to track educational attainment up to a year after exit may prove infeasible. One commenter favored alignment of reporting that is required on post-school outcomes.

Departments' Response: Although the Departments recognize that tracking attainment up to a year after exit is difficult for an often-transient youth population, the WIOA title I youth program includes a follow-up services program element that is required to last not less than 12 months after completion of participation. The requirement to capture program outcomes 1 year after exit is consistent with the follow-up services program element. In addition, follow-up services help ensure youth receive the support they need as they transition to the world of work or postsecondary education. Regarding alignment of reporting on post-school outcomes, WIOA requires the specific indicators for youth programs identified in WIOA sec. 116(b)(2)(A)(ii). No change to the regulatory text is being made in response to these comments.

Comments: A number of commenters stated that the Departments only should measure status of employment or education in the second quarter after exit, rather than an entered employment or education rate that includes only those not employed or not in education prior to program enrollment. This commenter also asked for a clarification of the definition of education and training activities related to the two youth indicators that measure the percentage of participants in unsubsidized employment or in education or training activities. One commenter suggested that any type of education should count in the two youth indicators related to employment or education or training.

Departments' Response: The Departments agree that the first two indicators only should measure status of employment or education in the second and fourth quarter after exit, respectively, regardless of employment or education status at enrollment. The definition of education and training activities related to the two youth indicators will be included in the WIOA Joint Performance ICR. Both secondary and postsecondary education will count as successful outcomes for the two youth indicators related to employment or education or training. No change to the regulatory text is being made in response to these comments.

Comments: Many commenters addressed the third primary performance indicator, which measures median earnings in the second quarter after exit. The commenters reasoned that areas that are highly successful in exiting youth to postsecondary education and training should not be penalized; therefore, youth who are working part-time and are also in education or training activities should be excluded from the calculation of median earnings. In addition, a commenter suggested that the focus of services to youth is education and training and, therefore, a measure of median earnings does not seem appropriate.

Departments' Response: WIOA requires all participants with earnings in the second quarter after exit to be included in the earnings indicator, including participants engaged in education or training programs. Therefore, youth who are working part time while in education or training activities will be included in the calculation of median earnings. Those engaged in both employment and education and training will be taken into account in both the statistical adjustment model and through target setting. No change to the regulatory text is being made in response to these comments.

The fourth primary indicator for youth measures attainment of a recognized postsecondary credential, or secondary school diploma or its recognized equivalent, by participants who are enrolled in an education or training program (excluding those in on-the-job training or incumbent worker training), subject to the caveat that such participants only are measured as successes if the participant is also employed or enrolled in an education or training program leading to a recognized postsecondary credential within 1 year from program exit. The language of this indicator is the same as the indicator in § 677.155(a)(1)(iv). The Departments have provided an in-depth explanation of this in the preamble for § 677.155(a)(1)(iv) above and refer readers to this section for more information on this indicator. No particular comments were received regarding the implementation of the fourth primary youth indicator, other than discussed above. The Departments are implementing § 677.155(c)(4) as revised.

The fifth primary indicator documents measurable skill gains. The language of this indicator is the same as the indicator in § 677.155(a)(1)(v). The Departments have provided an in-depth explanation of these changes in the preamble for § 677.155(a)(1)(v) above. No particular comments were received regarding the implementation of the fifth primary youth indicator, other than discussed above. The Departments are implementing § 677.155(c)(5) as revised and discussed in more detail above with respect to § 677.155(a)(1)(v).

The sixth primary indicator measures effectiveness in serving employers. The Departments' approach for measuring this indicator and the resulting changes to the regulatory text are discussed in significant detail in the preamble discussion for § 677.155(a)(1)(vi) above and that approach is applicable for this indicator for purposes of calculating performance under the title I youth program.

Comments: A commenter suggested that the proposed youth indicators in § 677.155(d)(1) and (2) sufficiently measure employer satisfaction and that, to the extent that those measures do not sufficiently measure employer satisfaction, a brief survey could be developed and administered to measure employer satisfaction.

Departments' Response: The Departments have concluded that the effectiveness in serving employers

indicator is statutorily required as a separate indicator from percentage of participants in education or training activities, or in unsubsidized employment, during the second and fourth quarters after exit from the program. The Departments will be implementing a pilot program, as discussed above, to assess measures of effectiveness in serving employers.

Comments: One commenter stated that the introductory description provided under this proposed section is confusing regarding the primary indicators, particularly when distinguishing between the adult and youth indicators. The commenter suggested that the indicators of performance for adults and youth be separately described so there is no confusion in the field as to which indicators apply to each population group.

Departments' Response: As suggested, the Joint WIOA Final Rule separates adult and youth indicators to avoid confusion.

Comments: One commenter suggested that the VR program report youth performance separately just as title I youth programs.

Departments' Response: Section § 677.155(d) of the NPRM contained the performance indicators set forth in sec. 116(b)(2)(A)(ii) of WIOA, which applies only to the title I youth program. These youth performance indicators are now found in the final regulatory text at § 677.155(c). WIOA sec. 116(b)(2)(A)(i) requires all other core programs, including the VR program, to comply with the primary performance indicators set forth in sec. 116(b)(2)(A)(i) of WIOA and § 677.155(a)(1). Therefore, there is no statutory authority for the Departments to do as the commenter suggests.

The Departments understand that the VR program pays for training and education needed for individuals, including youth, to obtain employment. Because the youth indicators in § 677.155(c) are not applicable to the VR program, State VR programs are not required to report outcomes under the youth indicators. Adult and youth performance outcomes can be differentiated in the RSA–911 data, as has always been the case, with no need for additional reporting burden.

Section 677.160 What information is required for State performance reports?

Section 677.160, which implements sec. 116(d)(2) of WIOA, identifies the information States are statutorily required to report in the State performance report, including levels achieved for the primary indicators of performance. No substantive changes have been made to this section.

Comments: Some commenters expressed concern that in many States and tribal nations it will be time-consuming and costly to collect the data and produce a report for all core programs.

Departments' Response: The Departments understand the concerns expressed by some of the commenters regarding the collection of data needed to produce the annual reports and have made every effort to minimize the burden and cost to States by incorporating only necessary data elements in the Departments' data collection instrument provided through the WIOA Joint Performance ICR. Prior to amending each Department's data collection instrument, considerable time was taken to ensure the required data elements collected would be consistent across all core programs and that the only elements added would be necessary to meet the requirements under sec. 116 of WIOA, thereby minimizing the burden as much as possible. Each core program will be responsible for submitting performance reports to their respective Federal agency, just as has been done prior to WIOA. Further, the Departments clarify in this response that there is no requirement in WIOA or the Joint WIOA Final Rule that data reporting be integrated among all core programs. As discussed in more detail with respect to the issue of ''common exit'' in the preamble for § 677.150(c) above, DOL intends to work towards developing an integrated reporting mechanism for the core programs it administers. The Departments are open to States wishing to submit integrated performance reports, but a single report submission across core programs is not required. If a State were to do this, it must ensure that it reports on all required reporting elements—both for the common performance accountability system under sec. 116 of WIOA and for each of the program-specific reporting elements.

Comments: Commenters recommended that the Departments develop guidance, technical assistance, or an integrated set of reporting specifications that will allow States to submit customer data in the same format for each of the six core programs.

Departments' Response: The Departments recognize the need for, and will develop and disseminate, guidance and associated technical assistance related to the preparation and submission of joint and WIOA title-specific performance reporting, and the WIOA Joint Performance ICR.

Comments: One commenter suggested that the Departments, working with State and local systems, should consider how core programs can collect and provide information on the amount of training provided to program participants.

Departments' Response: The Departments acknowledge the comment and have concluded that data that will be collected through the WIOA Joint Performance ICR associated with this Joint WIOA Final Rule are sufficient to meet the requirements of sec. 116(d)(2) of WIOA. Prior to imposing additional information collection requirements, the Departments must consider them in the context of associated burden and cost. The Departments have concluded that the final information collections meet the statutory requirement while minimizing reporting burden to the extent possible.

Comments: Commenters urged the Departments to allow the State and local agencies that administer the core programs to have access to the data they need, such as UI wage record data. A commenter added that in some States, a release of information form must be signed by the participant. Another commenter recommended that States should be given the option to await the results of the national data integration workgroup before creating their State interoperable system.

Departments' Response: With regard to the commenters' concerns about the availability of quarterly wage record information and the need for, in some cases, informed consent for the disclosures required under applicable privacy and confidentiality laws and regulations for all programs, the Departments did not modify this regulation. The Departments are developing, and will disseminate, guidance that covers the allowable disclosures and processes through which disclosures can be made under 20 CFR part 603, 20 U.S.C. 1232g and 34 CFR part 99 and 34 CFR 361.38. Additionally, work is underway to re-negotiate the Wage Record Interchange System Data Sharing Agreements to establish pathways to the wage record matching required for all core programs to meet their performance reporting requirements.

Paragraph (a)(1) of § 677.160 requires the total number of participants served and total number of participants exited, disaggregated by the number of individuals with barriers to employment and by numbers of participants co-enrolled in core programs. No change to the regulatory text is being made in response to these comments.

Comments: Commenters supported the provision in § 677.160(a)(1)(i) that would require reporting to be disaggregated by categories for individuals with barriers to employment. Commenters also urged that the requirement apply to ''reportable individuals'' as well as ''participants.'' Those commenters generally suggested that the information in the reporting requirements should be disaggregated based on each disability subset and not the entire group.

Departments' Response: The Departments acknowledge the identified potential benefits for State reporting of disaggregated data for ''reportable individuals'' in addition to ''participants.'' For the purpose of § 677.160, the Departments are addressing only the requirements for States' annual performance report as required under sec. 116(d)(2) of WIOA, which requires reports on only participants. It should be noted that the different core programs already collect and report information pertaining to ''reportable individuals'' through their separate individual reporting vehicles.

With regard to the discrete disability categories, RSA currently collects a number of data elements, including the primary and secondary disability type, for individuals who have been determined eligible for VR services and would be considered a ''reportable individual.'' The data can be disaggregated in different categories, including by disability type. The final RSA–911, which is published concurrently with this Joint WIOA Final Rule, has been revised to align with the additional WIOA requirements. No change to the regulatory text is being made in response to these comments.

Comments: A commenter recommended that the requirement to collect information on barriers to employment be tied to the point at which the initial IPE is signed.

Departments' Response: The Departments recognize that different State programs have a number of questions regarding how each of the core programs will collect the required data elements, including at what point required demographic information will be collected to produce the most reliable information and how the current consumer information will be updated to meet the new WIOA requirements. These issues will be addressed through guidance related to the WIOA Joint Performance ICR or the Department-specific ICRs. The Departments also note that § 677.150(a)(1) defines participants for the VR program as an individual who has an approved and signed IPE, and who has begun to receive services. Therefore, data elements required on ''participants'' must comply with the definition applicable to that term for the VR program. No change to the regulatory text is being made in response to these comments.

Comments: Commenters inquired about implementing a count of total participants and total exiters, disaggregated by co-enrollment in any of the core programs. A commenter expressed concern about being able to obtain the information. For disaggregated counts for those who participated by co-enrollment as required by § 677.160(a)(1)(ii), commenters warned that integrated case management and reporting systems would need to be in place, and the commenters requested technical assistance regarding how core programs housed in different agencies can share and compare participant data to meet reporting requirements. One commenter, however, supported the requirement to report data disaggregated for co-enrollment in any of the core programs.

Departments' Response: The Departments acknowledge that the absence of integrated case management or integrated reporting systems poses challenges to ensuring uniform and easy access to data across programs. The Departments have concluded that integrated data systems would allow for unified and streamlined intake, and case management and service delivery, and would overcome many such challenges. The Departments also note that such systems are not widely used or in place currently at the State level, and encourage States to examine ways in which this may be developed or implemented across core programs. The Departments note that data system integration ranges from data sharing between existing systems to employing consolidated systems. However, in the absence of such systems, the Departments encourage all programs to ensure strong partnerships and collaborative workspaces in which to ensure all programs can meet their reporting requirements. In addition to planning and conducting training and technical assistance on data sharing, the Departments will issue joint guidance for matching education and wage records in order to assist States in providing performance information required under WIOA. Additionally, the Departments will work with State and Local WDBs, one-stop center operators, and partners to achieve an integrated data system for the core programs and other programs to ensure interoperability and the accurate and standardized collection of program and participant information. No change to the regulatory text is being made in response to these comments.

Paragraph (a)(2) of § 677.160 requires disaggregated performance levels based on barriers to employment, age, sex, race, and ethnicity. Certain commenters favored this provision. No substantive change was made to this section.

Paragraphs (a)(3) through (a)(7) of § 677.160 require information on participants who received career services and training services. The Departments have revised § 677.160(a)(3), (4), (6) and (7) to specify that career services and training services are two different services, not one type of service. No change was made to § 677.160(a)(5).

Comments: Several commenters stated that tracking these detailed costs would be overly burdensome and exceed the value of the information gained.

Departments' Response: The Departments recognize the concerns identified by the commenters about the States' ability to collect data pertaining to career services and training services, including expenditures. However, the data elements contained in the State performance report, including the data elements on career services and training services, are required by statute. No change to the regulatory text is being made in response to these comments.

Comments: A few commenters recommended that reporting begin with a 1 year period and work up to 3 years.

Departments' Response: The Departments have concluded that these provisions are prospective provisions that do not require retroactive collection of information. Reporting begins in PY 2016, and by PY 2018 States will have reported 3 years of data. No change to the regulatory text is being made in response to this comment.

Comments: Commenters asked for a definition of ''career and training service'' and the relationship to ''vocational and training services'' in the VR program regulations.

Departments' Response: WIOA defines both career services and training services in sec. 134(c)(2) and (c)(3)(D), respectively. Additionally, further information is provided in § 678.430 of this Joint WIOA Final Rule about career services in the one-stop delivery system. Although the definitions are contained in statutory provisions relevant only to the title I core programs, sec. 121 of WIOA (which applies to all core programs) requires each of the core programs to provide career services and training services, as applicable to the program, thereby making those

definitions relevant to all core programs, including the VR program. Furthermore, these services are consistent with the types of services provided by the VR program and with the data collected through the VR program's RSA–911 collection instrument.

With respect to § 677.160(a)(3) (4), (6), and (7), the Departments have revised the regulatory text to address commenter requests for clarity. The previous language at § 677.160(a)(3) referred to ''the total number of participants and exiters who received career and training services for the most recent program year and the 3 preceding program years, as applicable to the program.'' This has been revised to refer to ''the total number of participants who received career services and the total number of participants who exited from career services for the most recent program year and the 3 preceding program years, and the total number of participants who received training services and the total number of participants who exited from training services for the most recent program year and the 3 preceding program years as applicable to the program.'' In so doing, the Departments make clear that career services and training services are two different types of services, not one type of service. The revised language is also more consistent with the statutory provision by referring to ''participants who exited'' rather than ''exiters'' since these final regulations define ''exit,'' not ''exiter.'' A similar revision was made to § 677.160(a)(4). Likewise, proposed § 677.160(a)(6) previously referred to ''the amount of funds spent on each type of career and training service for the most recent program year and the 3 preceding program years.'' This language has been revised to refer to ''the amount of funds spent on career services and the amount of funds spent on training services for the most recent program year and the 3 preceding program years, as applicable to the program.'' A similar revision was made to § 677.160(a)(7). These changes clarify that the Departments interpret sec. 116(d)(2)(D) to require the collection and reporting on participants who receive career services and participants who receive training services, as well as participants who exited from career services and training services, as a single point of collection and thus does not require an itemized collection and reporting on each of the various career services or each of the various training services that a program provides. Instead, the amount to be reported is the total amount spent on career services and the total amount spent on training services.

Comments: Paragraph (a)(3) of § 677.160 requires reporting on the number of participants and exiters who received career services and training services. A number of comments were received regarding the difficulty of tracking costs associated with expenditures of funds on such services, as required in paragraph (a)(6).

Departments' Response: The Departments will provide technical assistance or guidance in regard to tracking costs associated with expenditures of funds on career and training services.

No particular comments were received in regard to § 677.160(a)(4).

Paragraph (a)(5) of § 677.160 requires reporting on the percentage of participants who obtained training-related employment through WIOA title I, subtitle B programs.

Comments: Some commenters warned that determining what constitutes training-related employment under paragraph (a)(5) is highly subjective and requires clarification.

Departments' Response: The Departments will provide more information regarding what constitutes training-related employment services through the WIOA Joint Performance ICR and through guidance. No change to the regulatory text is being made in response to these comments.

Paragraphs (a)(6) and (a)(7) of § 677.160 require reporting on the amount of funds spent on career services and training services, and the average cost per participant for participants receiving career services and training services.

Comments: Commenters requested guidance on whether the average cost per participant for career and training services refers to the cost to serve the individual or the costs of the career and training services, and whether administrative costs are included. Separately, one of these commenters also asked for the meaning of ''type'' of service needed for disaggregation in reporting under paragraph (a)(6).

Departments' Response: The Departments will provide guidance regarding calculations of costs in the WIOA Joint Performance ICR. The Departments have revised § 677.160(a)(6) to reflect the statutory language, as WIOA did not require reports on the amount of funds spent on career services and training services to be disaggregated by the type of career service or training service. The language of the regulation no longer refers to the ''type'' of service.

Paragraph (a)(8) of § 677.160 requires that States report on the percent of the State's annual WIOA allotment expended on administrative costs.

Comments: A commenter sought clarification on whether this means the percentage of each core program's annual allotment spent on administrative cost, or the State as a whole.

Departments' Response: The Departments want to clarify that § 677.160(a)(8) applies only with respect to the allotment under WIOA sec. 132(b) and not with respect to allotments under other core programs. No change to the regulatory text is being made in response to this comment.

Paragraph (a)(9) of § 677.160 requires information that facilitates comparisons with programs in other States.

Comments: Some commenters opposed a requirement for additional data collection and preferred, for example, development of shared tools/surveys for measuring the quality of services to one-stop center customers.

Departments' Response: The Departments note that WIOA allows consideration of information that is necessary to facilitate comparison of programs across States, which could potentially include the development of shared tools or surveys. No change to the regulatory text is being made in response to these comments. Further, the Departments note that implementation of this provision would be accomplished through the information collection request process.

Comments: The Departments also sought comments on the potential inclusion of a supplemental customer service measure, including suggestions on how to structure such a measure and whether the inclusion of such a measure would be valuable. Commenters did not favor developing a universal access point for customer feedback to be provided with regard to the one-stop centers, though other commenters expressed support for State or local measures of customer satisfaction. One commenter asserted that such information would serve as a foundation for substantive strategic planning, continuous improvement, program research and evaluation, and the dissemination of best practices nationwide.

Departments' Response: The Departments are considering various mechanisms available to produce a national measure of customer satisfaction, with particular interest in a measure akin to the net promoter score used commonly in business and industry. Additionally, the Departments intend to collect information on

customer satisfaction efforts used by the State and local areas through the WIOA Joint Performance ICR as well as information on what States are doing to leverage such information in the management of their programs. The Departments continue to welcome input and participation from States and local areas on how to capture customer satisfaction as it pertains to usage of the public workforce system.

Comments: Other commenters also supported the provision and suggested customer service measures to assess the quality of services, but warned that guidance is needed. A few commenters reasoned that a customer service measure is valuable only if the local area receives the information and has a mechanism to reach out to the customer and make the experience better.

A few commenters warned that obtaining the data would be difficult and suggested that the measure should be left to the discretion of the State or local government. Commenters recommended that the provision should be part of the continuous improvement process at the local level. In addition to the approach described above, the Departments also are interested in the work that has been developed and used at the State and local levels with regard to customer satisfaction, as well as what actions States and Local areas have and will take in response to such feedback.

Departments' Response: At this time, the Departments are not modifying the regulatory text to regulate such activities. As discussed above, the Departments recognize that, a national, State or local customer satisfaction measure would require guidance and technical assistance that will be provided through the mechanisms available such as the information collection request process, which allows for notice and public comment, program guidance, and technical assistance. The Departments reiterate their intent to implement a uniform, national customer satisfaction survey, applicable to both participants and reportable individuals. While this customer satisfaction survey will not be tied to accountability provisions, and the survey results will not be factored into determinations of sanctions, customer satisfaction will be a factor considered in the certification of one-stop centers. The Departments anticipate the survey will encompass two elements: A national net-promoter score-type indicator will be issued through the amended WIOA Joint Performance ICR with a standard methodology; and a State-based methodology that States will develop and States and Local WDBs will use for one-stop center accountability and customer service improvement. A focus from the Federal level will be on understanding what States and local WDBs did with the results, which is critical to using the data and information gathered towards the betterment of service delivery and design. When the Departments collect information on these activities, such actions and instructions will be conveyed through the information collection process that is also subject to notice and public comment.

Comments: Paragraph (a)(10) of § 677.160 requires a State narrative report regarding pay-for-performance contracting. A local government recommended that the Departments provide a clear definition of pay-for-performance contracts.

Departments' Response: The Departments did not introduce a definition of pay-for-performance contracts under this section of the regulation. The Departments refer to 20 CFR part 683, subpart E, where the allowance and guidelines for pay-for-performance activities is more fully described (*see* DOL WIOA Final Rule, published in this issue of the **Federal Register**). Paragraph (a)(10) of § 677.160 remains unchanged from that proposed in the NPRM.

Paragraph (b) of § 677.160 prohibits the disaggregation of data for a category in the State performance report if the number of participants in that category is insufficient to yield statistically reliable information.

Comments: Commenters suggested that States are likely to have several ''cell sizes'' that do not meet the standard of statistical reliability; therefore, reporting requirements should include alternative methods for summarizing data into larger aggregates. A commenter requested guidance on an acceptable level of disaggregation of data.

Departments' Response: The Departments recognize that disaggregation can produce certain cell sizes that fall below the aggregation levels that are allowed in order to protect the data from yielding PII.

The Departments did not impose a minimum disaggregation level in this section of the NPRM or this Joint WIOA Final Rule and will provide additional clarity through guidance regarding aggregation that is statistically significant and reliable yet protects the identity of individuals served through the programs. In developing such guidelines and guidance, the Departments have considered industry standards such as those established by the National Institute of Standards and Technology (NIST), the Family Educational Rights and Privacy Act (FERPA), the confidentiality regulations for the VR program at 34 CFR 361.38, the UC confidentiality regulations found at 20 CFR part 603, the Social Security Act sec. 1137(a)(5) as well as State laws that govern aggregation levels and factors that can be used to affect the level of suppression required to maintain the privacy and confidentiality of participant data. No change to the regulatory text is being made in response to these comments. Furthermore, the Departments reiterate their interpretation of this statutory provision of WIOA, as noted in the NPRM at 80 FR 20474, 20589 (April. 16, 2015). As written, WIOA sec. 116(d)(2) requires the performance report to be subject to WIOA sec. 116(d)(5)(C). However, this section refers to Data Validation, and the Departments interpret this reference to requires States to comply with sec. 116(d)(6)(C), which ensures the Departments receive statistically reliable information and protects participants' privacy. The Departments are implementing this regulation as proposed.

Paragraph (c) of § 677.160 requires that the State performance report include a mechanism of electronic access to the State's local area and ETP performance reports. This provision does not require a State to submit the actual local area and ETP performance reports with its State report. Failure to provide a mechanism of electronic access to the State's local area and ETP performance reports will constitute an incomplete State performance report submission, and thus trigger sanctions. No comments were received regarding this electronic access reporting requirement. This section remains unchanged from that proposed in the NPRM.

Paragraph (d) of § 677.160 states that States and local areas must comply with the requirements in sec. 116 of WIOA as explained through joint guidance that the Departments will promulgate. This section remains unchanged from that proposed in the NPRM.

Section 677.165 May a State establish additional indicators of performance?

Section 677.165 reflects the WIOA provisions in sec. 116(b)(2)(B) that a State may identify in the Unified or Combined State Plan additional performance accountability indicators. For example, a State could add an indicator for attaining U.S. citizenship, work readiness, completion of work-based learning, or any other indicator of State significance. This provision of additional performance indicators proposed by the State remains

unchanged from WIA. There were no comments on proposed § 677.165. There were no substantive changes made to this section.

Section 677.170 How are State levels of performance for primary indicators established?

Section 677.170 outlines the process that will be followed and the factors that will be considered in determining adjusted levels of performance. WIOA uses the term ''adjusted levels'' to refer to both the levels agreed to prior to the start of a program year, as well as the adjustment done using the objective statistical model at the close of the program year. In order to distinguish between the two adjustment processes described in statute, this section was revised to use two different terms for each process, specifically ''negotiated levels of performance'' and ''adjusted levels of performance.'' Section 677.170 was revised to provide specific distinctions among expected levels, negotiated levels, and adjusted levels of performance. The section explains the process under which levels of performance are negotiated, adjusted, and then calculated.

Section 677.170(a)(1) implements the requirement in sec. 116(b)(3)(A)(iii) that States provide expected levels of performance in the initial submission of the Unified or Combined State Plan for the first 2 years of the plan. In addition, the Departments are requiring in § 677.170(a)(2) that the States submit expected levels of performance for the third and fourth years before the start of the third program year covered by the Unified or Combined State Plan consistent with §§ 676.135 and 676.145, as part of the State Plan modifications under sec. 102(c)(3)(A) of WIOA.

Comments: One commenter questioned whether performance levels required in the State Plans are the proposed standards or the negotiated standards since the term ''expected'' is used. The commenter also recommended that the State WDB coordinate and participate in performance negotiations for each partner and that the negotiations be completed with States at least 45 days before the statutory deadlines for submission of the 4-year plans and the 2-year plan modifications.

Departments' Response: Section 116(b)(3)(A)(iii) of WIOA requires that each State identify expected levels of performance for each of the corresponding primary indicators of performance for each of the core programs for the first 2 program years covered by the Unified or Combined State Plan. The expected levels of performance are those submitted by the State in the initial submission of the State Plan prior to negotiation. The expected levels of performance will be used to reach agreement with the Departments on State negotiated levels of performance. Therefore, the expected performance levels are similar to proposed goals, reflecting the State's expectations for its performance. These expected levels, however, will be adjusted through negotiations between the State and the Departments in accordance with sec. 116(b)(3)(A)(iv) of WIOA. Once the negotiated levels of performance are agreed upon, these levels will be incorporated into the approved Unified or Combined State Plan. Section 677.170(a) reflects this statutory requirement. The Departments did not modify the regulation to require coordination across core programs with regard to the negotiations process, as recommended by the commenter. The Departments agree that the commenter's suggestions are important for the purposes and priorities of WIOA and strongly encourage coordination across the core programs and other partner programs with respect to negotiating performance levels for all programs operating in a State. This section is consistent with the statutory requirements; the timing of the negotiation is connected to the approval of the State Plan. The Departments will provide guidance about the negotiation process.

Section 677.170(b) requires that the State reach agreement with the Secretaries on negotiated levels of performance based on the factors in WIOA sec. 116(b)(3)(A)(v). The Departments reiterate that WIOA uses the term ''adjusted levels'' to refer to both the levels agreed to prior to the start of a program year, as well as the adjustment done using the objective statistical model at the close of the program year. This paragraph was revised to use the term ''negotiated levels'' as appropriate, to distinguish between the two processes.

The Departments sought comments on whether any additional factors, beyond those identified in the proposed regulation, should be considered in developing the statistical adjustment model, and the best approach to updating the model as necessary.

Comments: Several commenters requested clarification of the requirement for promoting continuous improvement, as set forth in paragraph (b)(3) of § 677.170. One commenter recommended that the Departments consider embracing the full concept of continuous improvement or eliminate the term from the regulations because a true continuous improvement measure may have nothing to do with increasing a performance measure and may seek to improve a process. Another commented that continuous improvement can be defined in a variety of ways, including as improvements in efficiency. Commenters also requested that continuous improvement be defined in the regulation.

Departments' Response: The Departments want to make clear that sec. 116(b)(3)(A)(v) of WIOA requires the negotiated levels of performance take into account four factors, including, among other things, how the levels of performance promote continuous improvement. The Departments recognize the complexities involved in using a continuous improvement factor in performance negotiations. However, the Departments are unable to remove the continuous improvement factor from the regulation because it is a statutory requirement. The Departments will issue guidance on the performance negotiations process that will provide additional information regarding how the factor will be applied. No change to the regulatory text is being made in response to these comments.

Section 677.170(c) provides that the Secretaries will disseminate an objective statistical adjustment model that will be used both to reach agreement on the State negotiated levels of performance and to revise the negotiated levels at the end of a program year, to establish the adjusted levels of performance. The objective statistical adjustment model will account for actual economic conditions and characteristics of participants, including the factors required by WIOA sec. 116(b)(3)(A)(v)(II). The Departments will consider identified statutory factors and other factors, which through empirical support are established to have an effect on employment or skill outcomes and are consistent with the factors identified in WIOA. The Departments also will publish guidance that includes how the model was developed, what factors were considered, and how the results are interpreted.

The regulation reflects the statutory requirement that the objective statistical model consider certain factors. The differences among States in actual economic conditions, as set forth in § 677.170(c)(1) for required inclusion in the statistical adjustment model, include the same economic conditions identified in WIOA sec. 116(b)(3)(A)(v)(II)(aa). The characteristics of participants, as set forth in § 677.170(c)(2) for required inclusion in the statistical adjustment

model, include the factors identified in WIOA sec. 116(b)(3)(A)(v)(II)(bb).

Comments: One commenter expressed concern that including participants' disability status as a factor in the objective statistical model could unintentionally undermine the goal of increasing the number of participants with disabilities in integrated and competitive employment settings.

Departments' Response: The Departments note that disability status is a statutorily required factor for the objective statistical model. The Departments also note that continuous improvement is a factor in establishing the negotiated levels of performance.

Comments: In the preamble to the NPRM, the Departments requested comments specifically concerning additional factors to consider in developing the statistical adjustment model. Many commenters supported the commitment to use a statistical model and offered additional factors, including race, Hispanic ethnicity, age, gender, veterans in the area, severity of disability (*e.g.*, receiving Social Security disability benefits), seasonal employment, self-employment, minimum wage and other economic data applicable to the local area, nature of predominant employers in the area, quality of educational and training facilities in the area, crime rate in the area, public transportation and geographic barriers in the area, unemployment rate applicable to young people, lack of a high school diploma, individuals not in the workforce, and ratio of earnings at program entry to child support arrearages.

Departments' Response: Upon consideration of comments regarding additional factors to be included in the model, the Departments concluded additional regulation is not required to include additional factors. The Departments intend, in accordance with the statutory requirements for the use of an objective statistical model, to consider those identified statutory factors along with any other factors either established within WIOA or through empirical support (and which are consistent with the factors in the statute) to have an effect on employment or skill outcomes as measured by the primary indicators of performance established in § 677.155. Factors that are included in the model will be based on the application of empirically supported statistical analyses used to determine the effect of a particular factor on participant outcomes. The statistical adjustment model will be reviewed periodically and may be revised with appropriate consultation to ensure its accuracy and utility.

Comments: A commenter asserted that adjusted performance levels should include a factor for small States, single-area States, and areas of generally lower population.

Departments' Response: The Departments are considering all potential factors in an effort to establish a model that is evidence-based and supported by the literature. Having conducted a review of the existing literature, the Departments have concluded that small States and single-area State structures would be accounted for by those variables that capture industrial structures, unemployment rates, and shares of the population represented by race and educational levels. No change to the regulatory text is being made in response to these comments.

Comments: One commenter suggested that the Departments be mindful of the potential burden that requiring additional data collection would create and urged reducing reporting burdens and simplifying reporting requirements.

Departments' Response: The Departments are mindful of the reporting burden that would result from requiring additional information on participants. In this case, the Departments aim to work with States as well as other agencies that may have administrative data that could be used to populate the model based on established, empirical evidence that such information is shown to have an effect on the outcomes being measured.

Comments: A few of the commenters suggested that the Secretaries may need to establish separate statistical models for different programs, such as those for youth and for adults, and suggested that the models should be tested over a trial period and re-examined. Commenters also recommended regular updates to the models.

Departments' Response: Section 116(b)(3)(A)(v)(II) of WIOA requires that adjustments be made using ''the objective statistical model,'' which the Departments will build on a common framework for all core programs to allow for programmatic differences between programs. The model will be examined and revised as necessary. No change to the regulatory text is being made in response to these comments.

Comments: One commenter raised concerns about the title II program not collecting individual records at the Federal level and stated that such records are absolutely necessary to develop and operate statistical models. The commenter urged the Departments to develop a common reporting mechanism. Other commenters noted that title II programs lack experience using adjustment models and requested additional guidance and technical assistance.

Departments' Response: The Departments acknowledge that the use of aggregate data for the title II AEFLA program creates shortcomings for developing an adjustment model because, among other things, the results only can be used to adjust performance at the aggregate level (*i.e.*, State) and results from these models cannot be applied to any sub-level (*e.g.*, city, county). However, the Departments disagree that individual data are absolutely necessary to develop a statistical adjustment model for State-level adjustments. Aggregate data may be used in statistical adjustment models when individual records are not available. The Departments have already developed statistical models for other program purposes that produce accurate results using aggregated data and show that results are comparable for State level adjustments, regardless of whether individual data (*i.e.*, disaggregated data) or aggregate data are used. The Departments note that for the AEFLA program under title II, ED will provide technical assistance to States in applying the statistical adjustment model. The Departments will develop procedures to minimize burden to States when using the model to generate adjusted levels of performance. No change to the regulatory text is being made in response to these comments.

Comments: A few commenters warned that there is limited or no statistical tribal data available that captures economic circumstances for the various Indian and Native American geographic service areas. One of these commenters added that a regression model that factors in local economic conditions will need to be developed for the INA program.

Departments' Response: In response to the commenter's concern about developing an accurate regression model to establish levels of performance for INA program grantees, the Departments recognize that labor market information (LMI) for American Indian geographic service areas may not be as reliable as that for other areas. However, the regression model also factors in the characteristics of participants served by the grantee and is, therefore, not totally dependent on LMI. Despite the potential for inaccurate LMI data for American Indian geographic service areas, the Departments are confident a regression model can be developed that establishes fair and attainable levels of performance for each INA program grantee's service area. The Departments envision developing further guidance regarding

INA adult performance indicators. No change to the regulatory text is being made in response to these comments.

Comments: Some commenters did not support the use of an adjustment model, or express concerns about the design of the State performance accountability systems, because of the temptation to serve those individuals who are more likely to achieve positive outcomes. This commenter also noted that the fact that the State has sufficient tools to evaluate current and projected performance to identify intervening occurrences that would trigger re-evaluation of performance.

Departments' Response: While the Departments understand the concerns expressed, sec. 116(b)(3)(A)(v)(II) of WIOA requires the use of an objective statistical model to adjust the State levels of performance based on actual economic conditions and characteristics of participants. The Departments caution that any service provider tempted to utilize the tactics described by the commenter should consider the impact on future performance levels, which may be affected because of relatively lower numbers or percentages of hard-to-serve populations and other populations with barriers to employment. No change to the regulatory text is being made in response to this comment.

Comments: Commenters added that the model will need to account for varying levels of impact of a particular demographic or local economic condition in different parts of the country, in particular race and ethnicity, offender status, dependence on public assistance, local minimum wage, and the local unemployment rates for young adults. Some commenters recommended these factors be explicitly mentioned in the regulation. One such commenter suggested that select CEOs participate in the selection of factors in different parts of the country.

Departments' Response: The Departments are considering a State fixed effect variable. Such a variable would account, in essence, for the quality of the programs and their services. The Departments, after consulting with various stakeholders and particularly in consultation with expert reviewers, identified that the most important piece of information that is not directly included within the statistical adjustment model for the purposes of the performance accountability system, is the quality of the programs and services. The model is being developed with consideration of all participant and student variables required by WIOA and the potential State specific factors that could be accounted for through a State fixed effect variable. This variable ultimately could serve the same purpose statistically as including additional individual characteristics and any other State characteristic not included in the model. With regard to participation of select CEOs in the selection of factors to be included within the statistical adjustment model, the Departments note that the methodology, including the factors in the model, will be available for public comment and review. Moreover, WIOA sec. 116(b)(3)(A)(viii) requires the Departments to develop an objective statistical model in consultation with a variety of stakeholders identified in sec. 116(b)(4)(B), who would include CEOs. No change to the regulatory text is being made in response to these comments.

Comments: Some commenters also suggested that States should be allowed to provide additional information specific to the State that may not be fully accounted for in the national statistical models when setting performance targets. Some commenters suggested that State and local areas should be able to document this information and use it in performance negotiations. Others stated that additional State information is critical because it is not feasible to develop a single statistical model with one set of demographic and economic variables that is equally accurate for all States and all boards.

Departments' Response: The Departments note that States are permitted to provide additional information concerning factors listed in sec. 116(b)(3)(A)(v) of WIOA during the negotiations process. The States may provide relevant documentation and research concerning these factors during the negotiation process. The Departments will ensure that each programs' data, its availability, and its specificity will be considered in developing the methodology and framework for the application of the model to each program. The Departments intend to continue to assess the quality and robustness of the statistical adjustment model since it plays such a key part in the adjusted levels of performance under this section. No change to the regulatory text is being made in response to these comments.

Section 677.170(d) requires the statistical adjustment model to be used before the beginning of a program year as a consideration in establishing levels of performance, and then used to adjust levels of performance at the end of a program year. The Departments reiterate that WIOA uses the term ''adjusted levels'' to refer to both the levels agreed to prior to the start of a program year, as well as the adjustment done using the objective statistical model at the close of the program year. This paragraph was revised to use the term ''negotiated levels'' as appropriate to the process.

Comments: Several commenters opposed having the goals adjusted twice a year, because it would make building strategic plans difficult, add additional burden, and create a moving target. Another commenter requested that the margin of error be published with the statistical models. A few commenters asserted that applying the formula at the end of the year creates the possibility of targets higher than planned outcomes, which could lead to local areas failing performance. The commenters stated that this approach does not lend itself to a strategic planning process. An individual suggested that the year-end adjustment process needs to allow room for additional factors that were not anticipated to be significant at the start of the year, and another commenter asked whether States will be able or required to negotiate the final targets or if the results of the model will be applied without discussion.

Departments' Response: Section 677.170(d) implements sec. 116(b)(3)(A)(iv) and (vii) of WIOA and requires the objective statistical model to be applied before the beginning of the program year as a consideration in establishing State levels of performance for the upcoming program year and be used again at the end of the program year based on actual circumstances. Therefore, there is no statutory authority to delete the requirement to use the objective statistical model at the end of the program year. The concern about margin of error is important in evaluating the results from the model. Consequently, the Departments will provide confidence intervals along with the adjusted performance measures for each State. The Departments also recognize that the effects of variables used in the adjustment model may change over time. No change to the regulatory text is being made in response to these comments.

Comments: Commenters requested that the model be made available for the States to install within their own information systems so that it can be made available to the local areas.

Departments' Response: The Departments acknowledge the commenters' interest in incorporating the model within their own systems. As required by WIOA, the Departments intend to make the statistical adjustment model available to States, local areas, and the public. No change to the

regulatory text is being made in response to these comments.

Comments: Commenters sought guidance and technical assistance, including guidance on how to ensure that disadvantaged populations receive comparable services throughout the program with expectations that they will achieve outcomes leading to successful exits similar to all participants in the program. A commenter favored development of a common reporting mechanism, so that model development would not be delayed by claims that the necessary data are not available.

Departments' Response: The Departments intend to publish guidance that includes how the model was developed, what factors were considered, and how the results are interpreted. The Departments also share the commenters' concerns regarding comparable service for disadvantaged participants and commit to providing technical assistance and guidance on how to ensure an equal distribution of services. No change to the regulatory text is being made in response to these comments.

Comments: Many commenters suggested that, because data are lacking to set benchmarks for the new outcome measures, FY2017 should be a benchmarking year, or implementation should be lagged for 2 to 4 years to establish accurate levels of performance. A commenter expressed concern about the comparability of data across core programs and across States. Another commenter asked for clarification on whether there will be sanctions for low performance prior to the establishment of benchmarks and baselines.

Departments' Response: The Departments have revised § 677.190(c) in response to these comments; more information about the Departments' approach is set out below in the preamble to that section.

Section 677.170(e). The Departments added a new paragraph (e) to § 677.170, and renumbered the previous paragraph (e) as § 677.170(f). The new paragraph (e) specifies that the previously discussed negotiated levels, after being revised at the end of the program year based on the statistical adjustment model, are the adjusted levels of performance.

Section 677.170(f) requires States to comply with the requirements in sec. 116 of WIOA. The Departments intend to issue guidance, which may include information on reportable individuals as established by the Secretaries. No comments were received regarding this reporting requirement and no changes have been made to this section.

Section 677.175 What responsibility do States have to use quarterly wage record information for performance accountability?

Section 677.175 implements the requirement that States must, consistent with State laws, use quarterly wage record information to measure progress on State and local performance accountability measures, as required by sec. 116(i)(2) of WIOA. Such information includes the intrastate and interstate wages paid to an individual, the individual's SSN, and information about the employer paying the wages to the individual.

After further review of this provision, the Departments recognize that some participants may not be included in quarterly wage records held by the State, such as those participants who refuse to provide a SSN to the program or who may be self-employed. In light of this fact, the Departments have revised § 677.175(a) to make clear that States must use quarterly wage records to the extent they are available; however, States may use other information when such records are not available. In so doing, the Departments ensure that programs may track the participants for performance accountability purposes even if their information is not contained in the State's quarterly wage record system.

The Departments have revised § 677.175(c) to provide that the State agency or appropriate State entity designated to assist in carrying out the performance requirements is responsible for preventing disaggregation that would violate applicable privacy standards. The Departments added the words ''applicable'' and ''standards'' to § 677.175(c)(3) to require that the States must consider the privacy standards that apply to them.

Comments: A significant number of commenters raised concerns about the difficulty in matching wage records, citing concerns over FERPA privacy rules, that students often refuse to provide SSNs (for reasons such as concern about consumer fraud and uncertain residency status), some students do not have SSNs, and several States do not allow programs to collect SSNs. Some of these commenters asserted that there are other data matching mechanisms by which to track employee outcomes. Other commenters suggested not including participants without SSNs in the measure for computing the percentage for the performance target. Many commenters also urged the Departments to provide guidance on how to collect employment-related data without use of SSNs, acceptable forms of SSN validation, and on alternatives to using wage records. Many commenters added that data from the UI wage record system often do not present a complete picture of employment because it excludes the self-employed, those outside of an individual State, and risks over-representing Limited English Proficient individuals in the non-matching group. Some of these commenters recommended that States be given supplemental options such as follow-up calls or emails to verify employment status.

Departments' Response: The Departments considered the commenters' concerns about the obstacles to using wage record information and agree there are limited circumstances in which such information may not be available. The Departments want to make clear that sec. 116(i)(2) of WIOA requires that States use quarterly wage records when determining performance under the primary performance indicators that measure employment status and median earnings. Using its authority under sec. 189 of WIOA, the Secretaries are allowing States to use other information to verify performance of those individuals for whom quarterly wage records are not available, such as those who are self-employed. This flexibility is necessary to carry out the requirements of WIOA and its performance accountability system. To do otherwise would potentially result in programs not able to report on participants as required under WIOA. Therefore, where available and possible, States must use wage records to fulfill reporting requirements. Furthermore, the Departments understand that wage record information may not provide a complete representation of the employment outcomes. For all the reasons discussed here, the Departments will allow the collection and verification of supplemental wage information to demonstrate employment outcomes in the second and fourth quarters after exit in those instances where wage records are not available. However, if a State uses supplemental information to report on the employment rate indicators, the State also must use supplemental information to report on the median earnings indicators. The Departments will provide guidance on acceptable supplemental information to verify performance outcomes. Section 677.175(a) has been revised to reflect the changes described here.

With regard to acceptable forms of SSN validation, the Departments note

that WIOA sec. 116(d)(5) requires the Departments to issue data validation guidelines, which the States must use to ensure that the information in the reports is valid and reliable. See the preamble to § 677.240 below for further discussion on this requirement.

In the NPRM, the Departments expressed the intent to engage in a renegotiation of the WRIS data sharing agreements with States, which will allow States to conduct interstate wage matches for all WIOA core programs. Like WIA, WIOA similarly provides authority for the Departments to facilitate data matching between the States.

Comments: Several commenters approved of this commitment and encouraged the Departments to clarify that all the core programs may use the Federal Employment Data Exchange System (FEDES) for WIOA performance reporting.

Departments' Response: Under WIA, DOL's Employment and Training Administration aided in the establishment and management of a system through which participating, signed States could access Federal employment records from the participating government agencies. The Departments have concluded that the authorities established in WIOA allow for the continuation of such an agreement to facilitate wage matching for Federal employment for States that become signatories to the established data sharing agreement. The Departments have concluded that such agreements should be entered into and conducted at the State level based on the language of WIOA sec. 116(i)(2), which requires that the use of wage records must be consistent with State law. Moreover, WIOA sec. 116(i)(2) requires the Secretary of Labor to facilitate such arrangements between States. Therefore, the Departments continue in their commitment to review and renegotiate the appropriate agreements with State government entities that provide the necessary wage data for complete and robust performance reporting across all core programs under WIOA.

Comments: One commenter recommended that, for private training providers who cannot access wage record information, regulations should provide that the data these entities submitted for training participants not found in the UI wage records be returned to the provider, indicating that the records do not match UI records.

Departments' Response: ETP access to wage records is governed by the UC Confidentiality and Disclosure regulations at 20 CFR part 603. Therefore, training providers seeking access to wage records must comply with these provisions. Because ETP access is governed by 20 CFR part 603, the Departments have not changed § 677.175 in response to this comment. However, the Departments will issue guidance regarding the process of matching wage records. No change to the regulatory text is being made in response to this comment.

Comments: Another commenter favored allowing performance to be reported disaggregated by industry.

Departments' Response: The Departments consider additional disaggregation, when it is not required by statute, to pose an additional and unnecessary burden on the States. Moreover, many States do not require the inclusion of the North American Industry Classification System codes within wage records. Therefore, its inconsistent availability makes requiring this kind of reporting infeasible. No change to the regulatory text is being made in response to this comment.

Comments: One commenter suggested that WDBs and AEFLA providers are entitled to know whether a participant they served was employed in a given quarter.

Departments' Response: The Departments reiterate that an entity's ability to obtain this information depends on their compliance with the confidentiality requirements of 20 CFR part 603 (covering UC records), 34 CFR part 99 (covering educational records protected by FERPA), and 34 CFR 361.38 (covering VR records), as well as any applicable State laws. However, the Departments want to make clear that States are responsible for ensuring the appropriate entities have access to the information required for reporting purposes under WIOA sec. 116 and these regulations.

Comments: The Departments received several comments related to the use of wage record information and the VR program. Another commenter asked whether the wage record provision will be tracked in the VR program differently than in the other core programs. A commenter requested that additional guidance on VR access to WRIS be issued so that States may plan any necessary changes to their IT systems.

Departments' Response: The Departments recognize the unique disclosure requirements that have to be navigated by various entities. Because of the importance of protecting PII while also obtaining the necessary information needed for States to comply with the performance accountability system requirements, the Departments will issue guidance to assist States in regard to accessing wage record information.

The Departments also refer these commenters to the UC Confidentiality and Disclosure regulations at 20 CFR part 603, which govern the confidentiality and disclosure of, wage record information. It should be noted that the confidentiality provisions apply to PII contained within a wage record and this extends to the absence of data for an individual level as well. The tracking of employment outcomes through wage record matching is subject to 20 CFR part 603 and any applicable Federal and State laws; therefore, there may be some variation in the mechanisms for matching wage record data via the State UC agencies and the process through which any core program enters into and engages under those agreements. Furthermore, regulating access to wage record information is beyond the scope of this part. No change to the regulatory text is being made in response to these comments.

Comments: A commenter asserted that if the VR program is to track progress on wages, then it would need ready access to longer-range employment data.

Departments' Response: The VR program is subject to the same outcome reporting requirements as the other core programs under WIOA. Thus the Departments have concluded that access to a different duration of employment data is not necessary. No change to the regulatory text is being made in response to this comment.

Comments: Another commenter requested clarification on how participants who are seeking to better themselves without entering the workforce or postsecondary education should be treated in the performance accountability system. This population includes retirees, the non-working disabled, and English language learners who are seeking to improve their language skills but are not in the labor force.

Departments' Response: The Departments interpret WIOA sec. 116(b)(2)(A)(i) to require all participants to be included in the primary performance indicators, with very limited exceptions, regardless of their employment status at program entry. No change to the regulatory text is being made in response to this comment.

Comments: A commenter requested clarification about whether the wage record information refers to wages paid or wages earned.

Departments' Response: The Departments clarify that the wage record information held by State UC agencies, from which wage record information is drawn, only contain the wages paid to an individual. See 20 CFR 603.2(k)(1). Moreover, sec. 1137(a)(3) of the Social Security Act, which creates the requirement that States provide quarterly wage reports, only requires that employers report wage information. Similarly, sec. 3306(b) of the Federal Unemployment Tax Act defines wages as all remuneration for employment. Because the records only include wages paid, the Departments interpret WIOA sec. 116(i)(2)'s requirement to use State UI wage records to mean that the States only are required to report on wages paid. No change to the regulatory text is being made in response to this comment.

Comments: Some commenters favored data sharing and record matching across departments and programs. Another commenter said that the Indian and Native American programs (INAP) do not have a mechanism to match participant SSNs with UI wage records. One commenter recommended that the Departments, in renegotiating the Wage Record Interchange System (WRIS) agreements, make it possible for States to access readily both intra- and interstate UI data beyond the fourth quarter after exit for longer-term program impact evaluations.

Departments' Response: The Departments recognize the variety of structures that exist for programs under WIOA; some programs are run through the States and others are run through sub-State level grantees. The Departments recognize the challenges faced by the INA programs in complying with WIOA performance reporting requirements and will be issuing guidance for and providing technical assistance to those programs. Under WIA the Secretary of Labor, working with States, established the WRIS to facilitate access to interstate wage data for State workforce agencies to fulfill their performance reporting requirements. In addition, DOL established the Common Reporting Information System (CRIS) in order to provide access to the aggregate wage data necessary for performance reporting, to those workforce programs that were not operated by State workforce agencies. These programs included the WIA national programs, such as INAP and NFJP, as well as competitive and discretionary grant programs operated under the jurisdiction of DOL.

Under WIOA, the WRIS, WRIS2, and CRIS are being reviewed and renegotiated to establish the mechanisms for programs, including those under the jurisdiction of ED, where applicable, to access the quarterly wage data necessary for grantees to fulfill their WIOA performance reporting requirements.

The Departments considered these comments and made no changes to the regulatory text. First, WIOA sec. 116(i)(2) already requires that the wage records of any State receiving program funds are available to any other State to the extent that such wage records are required by the other State in carrying out performance accountability for its State Plan. While the Departments are working to facilitate applicable programs' access to intra- and interstate UI data, the Departments have determined that the conditions and availability of the records outlined within these agreements are not appropriately included in this regulation.

Comments: A commenter suggested that DOL look at wage record pilots to research gaps in wage record use.

Departments' Response: The Departments will continue to give consideration to activities that identify gaps and improve on the usage of wage record information for the purposes of performance reporting. No change to the regulatory text is being made in response to this comment.

Comments: Several commenters suggested that Local WDBs have access to data that is timely and pertinent, citing surveys in which participants say that their job is unrelated to the training received.

Departments' Response: The Departments recognize the need for local areas to gain access to timely and accurate data and the Departments strongly urge States to provide the sub-State level local area reporting outcomes to their local areas along with the reporting that they submit to the Departments. No change to the regulatory has been made in response to these comments.

Comments: Commenters suggested that the wages should include all program participant wages, pre- and post-exit.

Departments' Response: The Departments have concluded that it is not necessary to include this level of specificity in the regulatory text. Such information and its required collection are handled through the WIOA Joint Performance ICR. No change to the regulatory text is being made in response to these comments.

4. Sanctions for State Performance and the Provision of Technical Assistance (20 CFR part 677, subpart B; 34 CFR 361.180 through 361.200; 34 CFR 463.180 through 463.200)

Section 677.180 When is a State subject to a financial sanction under the Workforce Innovation and Opportunity Act?

Section 677.180 outlines performance and reporting requirements that are subject to sanctions under sec. 116(f) of WIOA. Section 677.180 provides that the failure to submit the State annual performance report required under sec. 116(d)(2) of WIOA is sanctionable, and that sanctions for performance failure are based on the primary indicators of performance. The Departments have revised § 677.180 to correct a statutory citation error in the introductory paragraph (to change WIOA sec. 116(d) to sec. 116(f)). WIOA sec. 116(d) outlines the requirements for performance reports. The correct reference should be to sec. 116(f), which governs sanctions for State failure to meet State performance accountability indicators. No other substantive changes were made to this section.

Comments: Commenters expressed support for the imposition of sanctions for failure to report as well as for failure to meet a performance standard.

A few commenters stated that funding and sanctions should be tied to individual programs to ensure that a core program's poor performance does not negatively impact the funding of other core programs.

Departments' Response: The Departments recognize the commenters' concerns regarding funding and sanctions being tied to individual programs; however, WIOA sec. 116(f)(1)(B) makes clear that the sanctions are imposed against the Governor's Reserve for statewide activities under the title I adult, dislocated worker, and youth formula programs regardless of which of the six core program's performance constitutes a failure giving rise to the sanction. Therefore, given the explicit statutory requirement, the Departments do not have the authority to do as these commenters suggested. No change to the regulatory text was made in response to these comments.

Comments: Another commenter requested clarification regarding how individual core programs will be held accountable if they reside in different agencies.

Departments' Response: The Departments note that accountability for the State's performance rests with the Governor and State WDB, through

which all core programs are represented. Therefore, even if the core programs are located in different agencies, there is no difference in how the States and core programs are treated. The Departments encourage and expect the core programs to work closely together regardless of the State agency in which they are located. No change to the regulatory text was made in response to this comment.

Comments: A commenter sought clarification concerning the process for submitting the State annual performance report and the manner in which sanctions will be enforced.

Departments' Response: The Departments consider the process of submitting State annual performance reports to fall under the purview of sub-regulatory guidance as it is implementation of the regulatory requirements. Therefore, the Departments will issue guidance clearly explaining how to carry out the annual reporting process. The Departments will impose financial sanctions consistent with WIOA sec. 116(f)(1)(B), which provides for a five percent reduction of the State Governor's Reserve for Statewide Activities from the amount allocated in the immediately succeeding program year. The Departments consider the logistics of how the financial sanction will work to fall under the purview of sub-regulatory guidance as it is implementation of the statutory and regulatory requirement. Moreover, the financial sanctions will be carried out consistent with financial management and rules already in place. Therefore, the Departments will issue further guidance on how this process will be conducted. No change to the regulatory text is being made in response to this comment.

Comments: One commenter requested clarification about whether WIOA or Perkins indicators of performance would take precedence in a Combined State Plan.

Departments' Response: The Departments clarify here that the Perkins program is subject to its authorizing statute's requirements on performance measurement. Should a grantee receive both Perkins and WIOA funds, it must report on both programs accordingly.

Section 677.185 When are sanctions applied for a State's failure to submit an annual performance report?

Section 677.185 outlines the circumstances under which a State may be sanctioned for failure to report under sec. 116(f)(1)(B) of WIOA. No substantive changes were made to this section.

Comments: A commenter stated that the 30-day deadline to request an extension should be removed as it does not allow for exceptional circumstances, such as a natural disaster, that may occur closer to the deadline.

Departments' Response: The Departments refer the commenter to § 677.185(c)(2) which allows for unexpected events within the 30-day period and provides a process by which exceptional circumstances may be addressed in less than 30 days. No change to the regulatory text was made in response to this comment.

Comments: A few commenters supported the enforcement of sanctions for failure to report.

A few other commenters requested clarification regarding what the Departments consider exceptional circumstances under which a State would be exempt from sanctions for failure to report.

Departments' Response: In response to the comments on enforcement of sanctions for failure to report, the Departments note that a State annual performance report is considered complete only when it provides a mechanism of electronic access to local area and ETP performance reports. Thus, the submission of a State annual performance report that does not provide a mechanism of electronic access to local area and ETP performance reports is a sanctionable offense. Section 677.185(b) provides a non-exhaustive list of examples that may qualify as an exceptional circumstance. The listed exceptional circumstances include natural disasters, unexpected personnel transitions, and unexpected technology related impacts. These are not the only circumstances that may be justified, but rather are examples of the types of circumstances the Departments would consider exceptional. The Departments expect that any request for delay or any failure to report timely information would not be based on a routine or predictable situation. The Departments interpret § 677.185(c) to require these exceptional circumstances to be fully documented by the States, supported by clear rationale, and include an estimation of when the performance reports will be made available. The Departments will determine the merits of each request based on exceptional circumstances in consultations with the States, and their respective regional offices. The Departments plan to issue guidance to provide further clarity with regard to exceptional circumstances. No change to the regulatory text is being made in response to these comments.

Comments: A commenter expressed concern that the guidance regarding exceptional circumstances is to be issued without public comment and at a point at which States may already incur sanctions.

Departments' Response: Any guidance issued by the Departments regarding exceptional circumstances would be interpretive and thus, is exempt from the notice and comment rulemaking requirements under the Administrative Procedure Act. *See* 5 U.S.C. 553(b)(A). The Departments intend to issue guidance prior to applying sanctions. No change to the regulatory text has been made in response to this comment.

Comments: A commenter requested the Departments focus on incentivizing timely submission of State annual performance reports rather than sanctions.

Departments' Response: WIOA sec. 116(f) requires that financial sanctions apply with regard to the timely submission of performance reports and does not provide for incentives within this context. No change to the regulatory text was made in response to this comment.

Section 677.190 When are sanctions applied for failure to achieve adjusted levels of performance?

Section 677.190 governs how States will be assessed for performance failure and when such failure will result in a financial sanction. Although the Departments have referenced other non-core programs in previous sections of this preamble for part 677, consistent with WIOA sec. 116(b)(2) and 116(f)(1)(B), performance success or failure will be based solely on the performance of the six core programs of WIOA—not other partner programs in the public workforce development system. The Departments have added two new provisions to § 677.190(c) to reflect a phased-in approach for applying sanctions for failure to achieve adjusted levels of performance. In addition, the Departments reiterate that WIOA uses the term ''adjusted levels'' to refer to both the levels agreed to prior to the start of a program year, as well as the adjustment done using the objective statistical model at the close of the program year. Paragraph (c) was revised to make clear that performance accountability will be based on a comparison of the State's performance with that determined to be the ''adjusted levels of performance,'' as appropriate. These revisions resulted in renumbering the subsequent paragraphs. Section 677.190(c)(2) provides that, until at least 2 years of complete data are available

for each of the indicators, the Departments will assess the State's performance on the overall program score based on the indicators for which there are at least 2 years of data available. Section 677.190(c)(4) similarly provides that until at least 2 years of complete data are available for each of the indicators, the Departments will assess the States' performance on the overall indicator score, based on the indicators for which there are at least 2 years of data available. The Departments consider complete data to consist of, at a minimum, 2 full program years of performance data.

Comments: Many commenters discussed the timeline for implementing the full accountability system, with the majority of commenters supporting a 2-year benchmarking period to allow for the collection of baseline data to be used to assess performance moving forward. Other suggestions included a 1-year baseline period, a 3-year baseline period, and a 4-year baseline period. Still, other commenters supported a baseline period, but did not provide a specific timeline for implementing the full performance accountability system. Commenters supported using the PY 2016, PY 2017, and PY 2018 annual report as the first years to report on State adjusted levels of performance. A commenter suggested the PY 2016 annual report be the first used for all of the performance indicators except credential attainment and measurable skill gains. Some commenters asserted that a 2-year delay in the implementation of sanctions would allow for further calibration of the statistical adjustment model. Some commenters requested a 2-year transition period that would allow States to adapt to the new performance standards before sanctions are implemented.

Departments' Response: Section 677.190(c)(1) and (3) govern how performance on the overall State indicator score and the overall State program score will be assessed. As explained above, the Departments have revised the regulatory text in § 677.190(c) to reflect a phased-in approach for applying sanctions for failure to achieve adjusted levels of performance. Paragraphs (c)(2) and (4) of § 677.190 govern how performance on the overall State indicator score and the overall State program score will be assessed. Section 677.190(c)(2) provides that, until at least 2 years of complete data are available for each of the indicators, the Departments will assess the State's performance on the overall program score based on the indicators for which there are at least 2 years of data available. Section 677.190(c)(4) similarly provides that until at least 2 years of complete data are available for each of the indicators, the Departments will assess the States' performance on the overall indicator score, based on the indicators for which there are at least 2 years of data available. Pursuant to these provisions, the Departments consider complete data to consist of, at a minimum, 2 full program years of performance data.

The Departments acknowledge that, given the lag in reporting data and the amount of time needed for each indicator to be measured, 2 program years' worth of data for each of the indicators will occur at different times. However, the Departments consider it vital that performance accountability take effect as soon as possible to align with the vision and requirements of WIOA. These revisions provide for an assessment of the overall State program and indicator score when the States have reported at least 2 years of complete data for the indicators. For performance accountability determinations, including the determination of failure to achieve adjusted levels of performance, the Departments will not use data reported prior to July 1, 2016. The Departments note that where historical data that were reported under WIA provide a proxy for the new indicators (at least 2 years of data), it is possible to establish a statistical adjustment model for negotiation of those indicators. Such indicators will be included in the overall State program or overall State indicator score for performance assessment when States have reported 2 years of outcomes under WIOA. The States are still subject to a performance risk plan under § 677.200(b).

Comments: Several commenters urged the Departments to delay implementation of the full performance accountability system for reasons other than the collection of baseline data, including that the first annual State report should be coordinated with the development of data systems.

Departments' Response: The Departments recognize the challenges in unified reporting across the core programs. For this reason the Departments are exercising the transition authority in sec. 503 of WIOA to implement the requirements in a manner that allows for an orderly transition from the requirements of WIA to the requirements of WIOA. To the extent that data are available, States must comply by submitting the requisite data. Moreover, the Departments recognize that some States have the capability to currently report all of the data in one system and upload reports to the Departments, whereas other States may not have that capability. The Departments plan to provide guidance on the submission process for WIOA State annual reports through the WIOA Joint Performance ICR.

Comments: Several commenters stated that sanctions should not be implemented until the third consecutive year of performance failure, rather than the second, in order to allow improvement measures to be effective.

Departments' Response: Section 116(f)(1)(B) of WIOA provides that performance is assessed and sanctions are applied in the second consecutive year of failure. Therefore, the Departments cannot implement the commenters' suggestion.

Comments: Several commenters remarked that a definition of second year failure should be added to the regulatory text in order to prevent a State from incurring sanctions without adequate time to improve performance. Another commenter stated that sanctions should not be applied until a State has demonstrated that it is able to implement their performance improvement plan. While acknowledging the existing statutory constraints, a commenter expressed concern about the lack of time to intervene and allow program adjustments to demonstrate improvement.

Departments' Response: Section 116(f)(1)(B) of WIOA is clear that sanctions apply after 2 program years of consecutive performance failure; the statutory language does not permit the Departments to delay sanctions because the State has not been able to implement its performance improvement plan. The Departments encourage States to use their quarterly data to monitor progress on their performance improvement plan benchmarks without waiting until they submit their annual performance report. No change to the regulatory text was made in response to these comments.

Comments: Concerning the timing of performance outcome reporting, several commenters stated that performance outcomes for core programs should be reported by December 31 of each year.

Departments' Response: The Departments have concluded that the timing of reporting performance outcomes will be announced through joint guidance clarifying when and how States should provide their respective program performance reports. No change to the regulatory text was made in response to these comments.

Comments: A commenter asserted that to evaluate performance effectively,

indicators should be reported on a quarterly basis.

Departments' Response: The Departments note that § 677.235 requires quarterly reporting for the WIOA title I, Wagner-Peyser Act Employment Service, and VR programs. No change to the regulatory text was made in response to these comments.

Comments: Commenters also addressed the limited availability of and timely access to data, which can significantly hinder a State's ability to identify areas of improvement and make the necessary program adjustments to avoid failing.

Departments' Response: The Departments acknowledge the commenters' concern regarding the limited availability of timely data that may assist in identifying areas of program improvement. The Departments have clarified the regulations regarding data availability and sanctions in § 677.190(c), above. Additionally, the Departments note that all States have access to their program data and can use it to assess at intervals of their own choosing to best manage their performance, without the Departments having to require such action.

Comments: Some commenters suggested using only the State average measure of the performance indicators rather than the average program scores for each State in order to incentivize partnerships among programs.

Departments' Response: Under these regulations, failure is determined by both individual program performance as well as overall State performance in the overall State indicator score. The Departments' approach is premised on ensuring accountability for the individual core programs while incentivizing the partnerships that the Departments have concluded are critical to WIOA's long-term success. No change to the regulatory text was made in response to these comments.

Comments: Several commenters suggested that the Departments award monetary incentives and public recognition in order to emphasize the importance of performance success, rather than setting unrealistic goals.

Departments' Response: The Departments note that WIOA, unlike WIA, does not authorize the use of incentives for successful performance. However, States may continue to utilize incentives to recognize successful local performance under WIOA sec. 134(a)(3)(A)(xi). Finally, requests for guidance concerning performance metrics were made in order to allow for proper administration of programs. The Departments intend to issue further details on performance accountability through the WIOA Joint Performance ICR, guidance, and technical assistance.

Comments: In addition to soliciting public comments on the NPRM text, the Departments posed several questions regarding the application of sanctions for failure to achieve adjusted levels of performance. Many commenters responded to the question about using a weighted average or a straight average for calculating State overall indicator scores. Some commenters supported the use of an unweighted average in order to support the goal of shared accountability among core programs. A commenter stated that performance measures should not be weighted until it is clear how weighted averages would be determined. Other commenters stated that a weighted average would take into account differences among programs and would prevent the misrepresentation of particular programs. Citing the enhanced accuracy of the system of performance, a commenter suggested that program performance be weighted by the number of participants served to avoid giving unequal weight to smaller core programs. Other commenters urged the Departments to weight the indicators in order to maintain the emphasis on job placement and employer partnerships as established in WIOA. A few commenters suggested that local areas be weighted less due to their lesser impact on wages paid within the area. A commenter supported the use of a weighted average if performance is to be determined regionally, in order to take into account the relative size of regional WDBs. In addition, several commenters stated that if a weighted average is pursued, a draft weighted average should be published for public comment. Similarly, a commenter suggested that the weights assigned to each program should be determined or agreed to by all partners. A few commenters suggested that, in addition to a public comment period, the weights should be reviewed at the end of each program year and adjusted as needed.

Departments' Response: The Departments considered the comments regarding the use of a weighted or unweighted average for the determination of performance outcomes across programs and individual indicators. The Departments have decided that using unweighted measures across the programs and indicators still ensures performance accountability across all core programs and individual indicators. The Departments conclude this, in part, because an average performance number weighted by the number of participants would essentially cause each State's performance under Wagner-Peyser Act Employment Service programs to have a disproportionate impact. The Wagner-Peyser Act Employment Service program served more than 14 million participants in PY 2014, which surpasses the number of participants served in all other core programs combined. Using a weighted formula would mean that the Wagner-Peyser Act Employment Service program's outcomes would be determinative of a State's failure to achieve performance requirements. The Departments do not consider this to be consistent with the performance accountability goal of WIOA, which provides for shared accountability across the core programs. The Departments have concluded that using unweighted outcomes across the programs and indicators properly implements WIOA in recognizing the importance of both employment-related and education outcomes of the participants. No change to the regulatory text was made in response to these comments.

Comments: Additionally, some commenters suggested the Departments weight the employment indicators more heavily than the credential and measureable skill gains indicators.

Departments' Response: The Departments considered these comments, but decided not to alter the regulation as the three employment-related indicators make up half of all of the WIOA performance indicators. The three employment related indicators are the second and fourth quarter employment rate and the second quarter median earnings indicator. Because these measures make up half of all WIOA performance indicators, the Departments concluded they already have a sufficient impact on a State's performance.

Comments: Many commenters addressed the proposed thresholds for performance failure of 90 percent for each of the State overall program scores and the overall State indicator scores, and 50 percent of the individual indicator scores. Numerous commenters opposed the 90 percent threshold, citing the current lack of core program performance data, the unrealistic nature of a 90 percent threshold, and the seemingly arbitrary assignment of the threshold. A few commenters stated that the 90 and 50 percent threshold for performance failure should not be established without the required statistical adjustment models. Many other commenters responded to the Departments' solicitation regarding the potential increase of the 90 percent threshold to emphasize the importance

of performance success stating that the 90 percent threshold should not be increased. Other commenters urged the Departments to adopt alternate thresholds, ranging from 70 to 80 percent, with the majority supporting an 80 percent threshold. A number of commenters urged the Departments to establish thresholds in guidance rather than regulation so that they could be more easily adjusted in the future, as necessary. Many commenters stated that the Departments should establish a lower threshold than 90 percent to allow for a phased-in approach that gradually increases the threshold for performance failure over time. One commenter supported a tiered approach in order to promote continuous improvement. Although the vast majority of commenters supported maintaining or decreasing the proposed thresholds, one commenter stated that the 50 percent threshold for individual performance indicators should be increased because, as proposed, it would weaken the requirements of States and was not Congress's intent in WIOA.

Departments' Response: The Departments considered the comments regarding the overall 90 percent threshold and the 50 percent threshold for individual indicators for a program year. The Departments considered the various commenter-proposed threshold levels in light of historical performance data and historical thresholds for each of the core programs and have decided to maintain the thresholds as proposed. The new thresholds are an increase from the 80 percent threshold familiar to the title I programs and a decrease from the 100 percent threshold for title II programs under WIA. The Departments consider these thresholds to be reasonable due to the use and application of an objective statistical model to account for actual conditions experienced by a program. Previously, the title I and title II thresholds were applied to a negotiated performance level and performance was assessed in the absence of weighting for actual economic conditions or participant characteristics. With the structure of the performance accountability system in sec. 116 of WIOA, the Departments consider a 90 percent overall threshold to strike the appropriate balance between maintaining flexibility for unknown mitigating variables and the newer precision introduced by utilizing an objective statistical model. The 50 percent performance threshold ensures that significant performance failure on a single indicator cannot be compensated for by successful performance in any other indicator or set of indicators. The introduction of an overall State score across programs and indicators ensures that the performance accountability system as articulated in sec. 116 of WIOA maintains alignment and integration across all of the core programs. This overall score paradigm, which is set at the 90 percent threshold, and balanced with a 50 percent threshold on any single indicator, allows a State to account for mitigating factors that prevent it from achieving 100 percent of its adjusted levels of performance. It also provides that a State has not failed to achieve its negotiated levels of performance unless its average performance across all programs for one indicator or its performance for all indicators in one program falls below 90 percent of the State's adjusted targets. No change to the regulatory text was made in response to these comments.

Comments: One commenter expressed concern that a program could potentially pass the threshold for all of the individual indicators, but not meet the overall program or overall indicator threshold, which would send a mixed message to a program.

Departments' Response: In order to ''pass'' the threshold, each State must meet or exceed the 90 percent threshold for the overall State program score for each program and the overall State indicator score for each indicator. Furthermore, under § 677.190(d)(2), the State must not fall below 50 percent on any individual indicator. This is an additional safeguard against egregious failure by one indicator being outweighed by high scores elsewhere. Thus, there is no possibility of what the commenter suggested occurring. No change to the regulatory text was made in response to this comment.

Comments: Some commenters raised potential alternative metrics for evaluating success including: the use of statistical variation metrics instead of the proposed threshold framework; standard deviation units or variation against regression predictions; and confidence intervals rather than a point estimate.

Departments' Response: The Departments considered utilizing these methods, but concluded that a consistent threshold, which does not change from year to year based on the size of the dataset, is the most appropriate way to account for variations in the core programs or the indicators and the varying availability of data. By creating a consistent threshold, expected levels of performance will be easier for program staff to understand and allows for comparisons across program years. No change to the regulatory text was made in response to these comments.

Section 677.195 What should States expect when a sanction is applied to the Governor's Reserve Allotment?

Section 677.195 governs what will occur when a sanction is applied to the Governor's Reserve for failure to report or failure to meet adjusted levels of performance. It clarifies that the sanction will be five percent of the amount that could otherwise be reserved by the Governor.

Section 677.195(a)(3) was added so that this section contains the causes of failure as defined in § 677.190(e) by noting that States also are subject to a 5 percent reduction of the Governor's Reserve Allotment for the immediately succeeding program year if the State's score for the same indicator in the same program falls below 50 percent for the second consecutive year. A conforming edit was made to § 677.195(b).

Comments: Several commenters expressed general support for the Departments' interpretation of WIOA sec. 116(f) and the approach proposed. However, numerous commenters opposed this approach and requested clarification regarding the implementation of financial sanctions only on WIOA title I programs funded by the Governor's Reserve allotment. A commenter suggested that the burden of financial sanctions be applied to the specific programs not meeting the performance requirements. A few commenters requested clarification from the Departments concerning allocation of funding lost via sanctions. A number of commenters urged the Departments to permit the restoration of funds once the State meets its reporting responsibilities. Commenters also remarked that sanctioned funds should be spent on the Technical Assistance and Performance Improvement Plan.

Departments' Response: Section 116(f)(1)(B) of WIOA does not provide authority for the Departments to use, for other purposes, funds that are reduced as a sanction from the Governor's Reserve. Therefore, the funds may not be used for technical assistance, performance improvement plans, the restoration of the Governor's Reserve funding, or any other activity. In contrast, WIA provided that funds reduced due to sanctions were to be used by the Secretary for performance incentive grants to the States under sec. 503 of WIA, which was not carried over to WIOA.

The Departments considered the comments regarding the sanctions to WIOA title I programs being based on

any program's failure. WIOA sec. 116(f)(1)(B) clearly requires that any performance sanction must apply to the Governor's Reserve allotment under title I for any core program or indicator failure. Therefore, the Departments do not have the authority to sanction the specific program not meeting its adjusted levels of performance. The Departments strongly encourage high levels of alignment and coordination to ensure all core partners are engaged at all levels. The Departments emphasize the role of State and local planning to ensure alignment and common goals in attaining integration and service delivery. Regarding the commenters' request for clarification concerning the allocation of funding lost via sanctions, the Governor's Reserve for the next program year will be reduced by five percentage points and money lost via sanction will not be reallocated. No change to the regulatory text was made in response to these comments.

Comments: Commenters also supported the elimination of proposed § 677.195(b) because a State could fail to meet 2 different indicators for 2 consecutive years and receive a 5 percent sanction, but if the State fails to meet one indicator for 2 consecutive years and fails to report one time, the State would receive a 10 percent sanction. These commenters stated that the latter scenario is a less significant infraction and should not prompt the imposition of a 10 percent sanction.

Departments' Response: The Departments considered the comments on imposing sanctions when in the same year the State fails to submit a performance report and is in its second year of failure to meet adjusted levels of performance. The Departments are maintaining the language in § 677.195(b) because the Departments conclude that failure to submit a State annual performance report is a serious compliance issue and should result in sanctions. Because the regulations provide for a 10 percent sanction on States that fail to submit performance reports as well as fail to meet the adjusted levels of performance for 2 consecutive years (5 percent for failure to submit report plus 5 percent for failure to meet adjusted levels of performance), States will have an incentive to report to the Departments even if they fail the adjusted levels of performance for 2 consecutive years because by doing so, they would receive only a 5 percent sanction for failure to meet adjusted levels of performance rather than the 10 percent sanction. No change to the regulatory text was made in response to these comments.

Comments: Several commenters addressed concerns regarding the insufficient funding of the Governor's Reserve allotment and stated that sanctions should be lessened or not implemented until the allotment is fully funded, as is statutorily required. One commenter suggested that the Departments scale sanctions according to the funding available in the Governor's Reserve allotment.

Departments' Response: The Departments considered the comments regarding the funding of the Governor's Reserve allotment and the use of sanctions. Statutorily, the Governor's Reserve is set at 15 percent of the WIOA adult, dislocated worker, and youth formula allocations to the States. For several years, the Governor's Reserve levels were restricted below 15 percent through the congressional appropriation, but were restored in the FY 2016 Consolidated Appropriations Act. The Departments support the full funding of the Governor's Reserve at 15 percent as envisioned in WIOA. The Departments note that if the Governor's Reserve amount is not fully funded, the amount of funds subject to sanctions will be proportionately less because the sanction is either 5 or 10 percent of the Reserve amount no matter how much the Reserve amount is. No change to the regulatory text was made in response to these comments.

Comments: A commenter stated that the sanctions for failure to report and failure to meet a State's adjusted levels of performance should be separated. Another commenter requested that the Departments provide guidelines for a process allowing for minor corrections to annual reports without incurring sanctions for failure to report.

Departments' Response: The Departments considered the comments regarding the separation of sanctions for failure to report and for failure to achieve performance. The Departments note that these two sanctions are applied separately. When a State fails to meet 90 percent of its adjusted levels of performance or fails to submit a report in the same year, the State would incur 2 separate 5 percent sanctions totaling 10 percent. Otherwise, a State may receive a sanction for failure to report based on the criteria described in § 677.185 or a State may receive a sanction for failure to achieve adjusted levels of performance per § 677.190. Regarding a process to allow for minor corrections to annual reports, the Departments will provide a process for this and details on the process in guidance. No change to the regulatory text was made in response to these comments.

Comments: A commenter urged the Departments to allow States flexibility in imposing sanctions on the State agencies responsible for the late submission.

Departments' Response: The Departments note that ultimately the Governor and State Workforce Board, which consists of representatives from all core programs, are responsible for the submission of the annual report. The Departments expect the State agencies to work together to ensure timely reporting and, if there are expected delays due to exceptional circumstances, that the State provides timely communication to the Departments. The Departments note the flexibility provided to States under § 677.185(b) and will work with States that are struggling to submit timely reports through guidance and technical assistance. No change to the regulatory text was made in response to these comments.

Section 677.200 What other administrative actions will be applied to States' performance requirements?

Section 677.200 outlines the circumstances under which a State will be subject to additional administrative actions when determined to be at risk due to low performance on an individual primary indicator, the overall State indicator score, and the overall State program score. No substantive change was made to this section.

Comments: A few commenters remarked that language in the NPRM indicated that the Departments would each issue their own guidance regarding performance risk or performance improvement plans. These commenters were concerned that the development of separate guidance documents signals a lack of long-term coordination between the Departments regarding performance accountability and reporting. A commenter urged DOL and WDBs to become familiar with setting measurable objectives, defining activities to meet the objectives, and determining if the objectives were achieved.

Departments' Response: WIOA provides a unique opportunity for the core programs to work together in new ways, and to the extent practical the Departments will use joint guidance so that all core programs are provided a clear and consistent message.

Regarding comments about DOL and WDBs setting measurable objectives, defining activities to meet objectives, and determining if objectives were achieved for purposes of the DOL-administered core programs, this will be communicated generally. WIOA articulates certain performance

requirements, the Joint WIOA Final Rule operationalizes the provisions of WIOA, and the Departments will provide guidance and technical assistance to assist States and Local WDBs in achieving their performance goals.

5. Local Performance Accountability for Workforce Innovation and Opportunity Act Title I Programs (20 CFR Part 677, Subpart C; 34 CFR 361.205 Through 361.210; 34 CFR 463.205 Through 463.210)

Section 677.205 What performance indicators apply to local areas and what information must be included in local area performance reports?

This section governs which performance indicators apply to local areas and the information that must be included in the local area performance reports. While the arrangement of this section was revised no substantive changes were made to the regulatory text.

Comments: One commenter noted that the title did not fully convey what was contained within this section of the regulation.

Departments' Response: The Departments concur and modified the title of this section to clarify that this section also governs what information the local area must include in its local area performance reports.

Proposed § 677.205(a), (b), and (c) are implemented as proposed.

Comments: One commenter recommended removing section § 677.205(d) of the NPRM as unnecessary and duplicative of the requirements of § 677.175.

Departments' Response: The Departments agree that this section is duplicative, and is removing it. As a result, the Departments are renumbering subsequent sections to conform to this deletion.

Comments: One commenter recommended revising proposed § 677.205(e)(2) to clarify that in addition to reporting on the performance indicators, the local area report must also include the other program information required in the State annual performance report, such as average cost information.

Departments' Response: The Departments agree that further clarification would assist States and local areas in complying with their reporting requirements. The Departments note that as finalized, this has been renumbered as § 677.205(d)(1). Since § 677.205(d)(1) includes all of the information previously in § 677.205(e)(1) and (2), the Departments removed proposed § 677.205(e)(2) from this Final Rule and have renumbered the remainder of § 677.205(d).

Comments: One commenter encouraged adding a parallel provision to the one that is included in § 677.160(b) to clarify that the disaggregation of data in the local area performance report is also subject to WIOA sec. 116(d)(6)(C).

Departments' Response: The Departments have added a parallel provision at § 677.205(e).

The Departments made a technical edit to proposed § 677.205(f) to state that States must comply with any requirements from sec. 116(d)(3) of WIOA as explained in guidance. The Departments made this revision to clarify our expectations that, to the extent that either Department's guidance merely explains in plain terms the requirements that stem directly from WIOA, the Departments expect States to comply with those statutory requirements.

Comments: Several commenters from various stakeholder entities questioned the applicability of local performance indicators to core programs outside of WIOA title I. Many of these commenters specifically requested clarification on whether other core programs were exempt from local reporting requirements. One commenter also acknowledged some confusion regarding local-level requirements and offered several suggestions on reorganizing this subpart to enhance clarity. Additionally, the Departments received a number of comments pertaining to additional indicators of performance, with commenters suggesting that language be added to the Final Rule requiring States to develop any additional indicators of performance only in consultation with Local WDBs and CEOs.

Departments' Response: The Departments acknowledge that there may be some confusion across the core programs regarding local-level performance-related requirements and are taking this opportunity to specify that local-level accountability requirements contained in WIOA sec. 116 pertain solely to title I adult, dislocated worker, and youth programs. As provided by WIOA sec. 116(b)(2)(B) and § 677.165 of this regulation, the Governor has discretion to add additional indicators of performance.

The Departments recognize that Local WDBs and CEOs are critical partners in the establishment of additional indicators of performance and strongly encourage States to engage and consult with Local WDBs and CEOs in their development. No change to the regulatory text was made in response to these comments.

Section 677.210 How are local performance levels established?

Section 677.210 explains how the local performance levels are established. This section has been revised and renumbered in accordance with the distinctions among expected, negotiated, and adjusted levels of performance as described in the preamble to § 677.170. This has resulted in the introduction of the terms ''negotiated levels'' and ''adjusted levels'' as it applies appropriately within the process. Additionally, the Departments have added language to mirror provisions in § 677.190 that require 2 years of complete data for any local core program before applying the objective statistical model and establishing adjusted levels of performance.

Comments: Several comments pertained to the negotiations process in response to proposed § 677.210(b). A few commenters were unclear why Local WDBs are included in the negotiations process described in sec. 116(c) of WIOA but are not included in the negotiations process described in sec. 116(b). Many commenters also expressed a desire that the negotiations process be meaningful, with one commenter noting that the negotiations process under WIA was often subjective with performance standards dictated on a take it or leave it basis. Similarly, a commenter emphasized that the process should not simply be a matter of setting a target independently and passing it down to Local WDBs. Another commenter also suggested that the overall negotiations process would be enhanced if local areas were allowed to provide additional information not accounted for in the statistical models. One commenter suggested that the regulations contain an appeal mechanism for Local WDBs in cases where the State does not negotiate performance with the Local WDB and CEO as required by WIOA.

Departments' Response: The Departments note that local areas are permitted to provide additional information during the negotiations process. This allows the negotiations process to take into account other information that local areas consider important when establishing the negotiated levels of performance. The Departments also note that under WIOA sec. 116(g)(2)(B), the local areas may appeal the Governor's decision to impose a reorganization plan under WIOA sec. 116(g)(2)(B)(i). Therefore, if the Governor fails to negotiate with the

Local WDBs, the Local WDB fails to meet its local performance accountability indicators as described in WIOA sec. 116(g), and the Governor imposes a reorganization plan, then the Local WDB may exercise its right to appeal under WIOA sec. 116(g)(2)(B). For further discussion, the Departments refer readers to the preamble to 20 CFR 679.130 on the functions of the State WDB (*see* DOL WIOA Final Rule published elsewhere in this issue of the **Federal Register**).

WIOA sec. 116(c)(2) requires the Local WDB, CEO, and the Governor to negotiate and reach agreement on local levels of performance. The Local WDBs are not included in the process outlined in sec. 116(b) because that process pertains to State accountability, with negotiations occurring between the State and the cognizant Federal agency for the core program. The Departments agree that WIOA requires a meaningful negotiation. The Departments encourage the parties to negotiate which the Departments interpret as requiring open-communication between the parties for the purpose of reaching an agreement on the local performance targets. The Departments emphasize that the purpose of the statistical adjustment model required under sec. 116(b)(3)(A)(viii) is to enhance objectivity in the development of performance targets as part of the negotiations process. However, because the Departments have concluded that the requirement to negotiate is already conveyed through WIOA and the regulation, the Departments do not consider additional regulatory text necessary to ensure States comply with the requirements contained in sec. 116(c) that pertain to inclusion in the negotiations process. Therefore, no change to the regulatory text has been made in response to this comment.

The Departments also agree that the statistical adjustment model may not adequately account for all of the economic and demographic variables that may affect a local area's performance. Section 677.210(c) requires the negotiations between the Governor, Local WDB, and CEO to include a discussion of the circumstances not accounted for in the model. Because this is already required by the regulation, the Departments did not make a change to the regulatory text in response to this comment.

Comments: Another commenter recommended that local areas have access to the models in order to run local targets.

Departments' Response: The Departments note that it will publish the methodology of the statistical adjustment model, and the Departments invite the public, including local areas, to review, and access the model, as appropriate.

Comments: The Departments received a number of comments on the statistical adjustment model. Some commenters expressed concern that using the model as proposed at the end of the program year would result in targets being applied retroactively. Similarly, commenters expressed concern that targets set through the model may not reflect service to hard-to-serve populations, such as foreign-born participants often served by title II programs or other populations with barriers to employment. Some commenters suggested that the model needed to be updated on a regular basis in order to reflect the barriers of enrolled participants and the participants actually served.

Departments' Response: With respect to the utilization of the model at the end of program year in order to account for actual circumstances, this would not be a retroactive application of a performance target, but rather an adjustment to an already established target based on what actually transpired during the program year. This would take into account, as a commenter suggested, service to hard-to-serve populations, such as those with barriers to employment. In other words, the model will increase the performance levels required if a State or local area were to serve lower-than-anticipated percentages of hard-to-serve populations with barriers to employment because it would presumably be easier to serve these individuals. Similarly, performance levels (or targets) would be decreased if a State or local area were to serve a higher-than-anticipated percentage of individuals with barriers, because these individuals are harder to serve. Given the importance both Departments place on consistent understanding, application, and implementation of these complex yet critical requirements, the Departments are committed to providing joint and substantive technical assistance in addition to detailed policy guidance. Furthermore, commenters' expressed need to update the model to reflect the participants who are actually being served is one of the hallmarks of the statistical adjustment models as envisioned. Because the model addresses the commenters' concerns, no changes to the regulatory text were made in response to these comments.

Comments: One commenter recommended a national workgroup with broad participation across core programs and other WIOA stakeholders in order to address the statistical model, as well as other aspects of WIOA performance accountability because of the significance and impact of this Joint WIOA Final Rule. One commenter recommended that local areas be given an opportunity to review any detailed methodology utilized for setting performance targets prior to implementation.

Departments' Response: The Departments understand the significance of these joint regulations on performance accountability that implement sec. 116 of WIOA. It is for this reason that the Departments have convened multiple stakeholder dialogues to address the intricacies of the statistical adjustment models as they are developed, consistent with, and as required by WIOA sec. 116(b)(3)(A)(viii). In addition, once the statistical adjustment methodology has been approved, there will be a comment period to ensure broad stakeholder input into its finalization.

Comments: Another commenter remarked that CEOs of each local area in a planning region should be permitted to choose to develop, rather than be required to develop, regional performance measures in addition to local area measures and recommended a revision to 20 CFR 679.510 to reflect this suggested flexibility, remarking that Local WDBs and CEOs already have a significant responsibility regarding their own local area performance targets; requiring regional targets in addition to local area targets would be unduly burdensome.

Departments' Response: WIOA sec. 108(b)(1) requires the CEOs to develop the regional performance indicators and the Departments' regulations are consistent with this statutory requirement. Therefore, the regulatory text has not been changed in response to this comment.

Comments: A commenter requested that the Departments provide additional information regarding the requirement to promote continuous improvement through performance target setting, adding that neither the Preamble nor the NPRM text discuss the requirement beyond the fact that it exists. The commenter opined that the Departments seemed to interpret continuous improvement under WIA as requiring improvement on every measure, every year, and offered their own interpretation of continuous improvement, which could be defined as achieving the same results with fewer resources or serving a population with more barriers (or simply a larger population) with the same resources (*i.e.,* increased efficiency). A commenter

recommended, based on the context of an optimal return on investment in Federal funds, that setting targets focusing on improvement of measures with lower performance, while setting targets consistent with existing performance levels on measures with higher performance, is consistent with the requirement to set targets that promote continuous improvement and an optimal return on investment of Federal funds.

Departments' Response: The Departments agree that continuous improvement can be defined in multiple ways based on the circumstances and context. Because the meaning of this term varies significantly based on the circumstances and context in which it is used, the Departments do not think it is appropriate for inclusion in the regulation and will be providing additional information on continuous improvement during guidance development. Therefore, no change was made to the regulatory text in response to this comment.

6. Incentives and Sanctions for Local Performance for Workforce Innovation and Opportunity Act Title I Programs (20 CFR Part 677, Subpart D; 34 CFR 361.215 Through 361.225; 34 CFR 463.215 Through 463.225)

Section 677.215 Under what circumstances are local areas eligible for State Incentive Grants?

This section of the regulation governs when local areas are eligible for incentive grants.

Comments: The Departments received a comment asking under what circumstances local areas are eligible for State incentive grants. Another commenter remarked that the question posed by the rule regarding possible circumstances for eligibility is not actually answered by the rule, which instead goes on to discuss pay-for-performance strategies.

Departments' Response: The Departments agree that the regulatory text in this paragraph should be revised to ensure understanding and consistent application. Therefore, paragraph (a) has been revised to specify that Governors are not required to award incentive funds based on local performance on the primary indicators, although they have the flexibility to do so using State set-aside funds based on WIOA at sec. 134(a)(3)(A)(xi). Paragraph (b) has been revised to clarify that Governors also have the flexibility to create incentives for the Local WDBs to implement pay-for-performance contract strategies to provide training services as described in sec. 134(c)(3) or youth activities as described in sec. 129(c)(2). However, these incentives must be paid for with non-Federal funds.

The Departments have chosen not to regulate under what specific circumstances a local area be eligible for incentive grants using WIOA funds given that this is at the discretion of the Governor. However, the Departments are considering providing guidance on this topic. No change to the regulatory text was made in response to this comment.

Comments: Other commenters remarked that separate funds should be made available for States as an incentive for meeting or exceeding statewide performance targets as was the case under WIA, with commenters expressing concern that the dedicated incentive grants to States were utilized to leverage other funds and programs and the lack of this provision in WIOA presents a funding gap. These commenters requested further clarity on the issue and recommended that funds be made available to target system development needs.

Departments' Response: The requirement under WIA that high-performing States be rewarded with State incentive grants within specified Federal parameters no longer exists under WIOA. Rather, sec. 134(a)(3)(A)(xi) provides States with the flexibility to utilize Governor's Reserve funds to provide incentive grants to local areas for performance by the local areas on local performance accountability indicators. Further, the Departments would like to emphasize that, in addition to the statewide capacity building efforts that are a required use of the funds allotted to States, both Departments are committed to providing substantive technical assistance on a national, regional, and statewide basis in order to target specific development needs, including needs around performance accountability. No change to the regulatory text is being made in response to this comment.

Comments: One commenter expressed confusion about the programs included in pay-for-performance contract strategies and inquired as to whether the provision applies to title II providers, which the commenter recommended.

Departments' Response: The Departments interpret the statutory provision for pay-for-performance contract strategy incentives at WIOA sec. 116(h) as only permitted for WIOA title I programs because of the specific reference to title I training services for adults and dislocated workers as well as the reference to title I youth services. Moreover, WIOA references Local WDBs, which are responsible for title I programs and providers, as the other programs do not have Local WDBs. However, there is nothing prohibiting the adoption of pay-for-performance contract strategies by other programs that is consistent with other Federal, State, and local policies. No change to the regulatory text has been made in response to this comment.

Section 677.220 Under what circumstances may a corrective action or sanction be applied to local areas for poor performance?

This section explains when a corrective action plan or sanction may be applied to a local area. This section has been revised and renumbered in accordance with the distinctions among expected, negotiated, and adjusted levels of performance as described in the preamble to § 677.170. This has resulted in the introduction of the terms ''negotiated levels'' and ''adjusted levels'' as it applies appropriately within the process. Additionally, the Departments have added language to mirror provisions in § 677.190 that require 2 years of complete data for any local core program before applying the objective statistical model and establishing adjusted levels of performance. The Departments also have revised § 677.220(b) to specify that failure occurs when a local area fails to meet the adjusted levels of performance for the same indicator for the same core program authorized under WIOA title I for the third consecutive program year.

Comments: Several commenters indicated that more clarity is needed regarding how sanctions would apply locally to other programs and funding streams besides WIOA title I. One commenter remarked that the impact of local sanctions should be spread across the other core programs. Another commenter noted that all potential sanctions would be placed squarely on the shoulders of the Local WDB regardless of fault, creating a situation it viewed as inequitable.

Departments' Response: Any financial sanction applied to the Governor's Reserve Allotment is based on *State* performance across the core programs, and not local performance. This is governed by WIOA sec. 116(f) and subpart B of this part. Specifically, §§ 677.180 through 677.200 govern when the Departments will sanction a State. The Departments note that the local area provisions under WIOA sec. 116(c) only apply to WIOA title I programs. The other core programs may participate, partner, and provide services in a local area, but, there is no local area performance accountability

provision for those programs. However, local areas are held accountable for performance on the primary performance indicators for title I programs. Local-level accountability and any sanctions imposed are determined by the State, consistent with WIOA sec. 116(g) and subpart D of this part. Therefore, the Departments are not changing the regulatory text in response to these comments.

Comments: Several commenters responded to the Departments' request for feedback regarding what other actions in addition to those already in statute should be considered by the Governor for local areas that continue to fail to meet performance for 3 consecutive years. Many commenters offered suggestions but stated the need for clarification first on what is meant by ''failure to meet adjusted levels of performance on required indicators for a third consecutive year,'' recommending that local area failure for a third consecutive year be based on the same indicator and not any indicator.

Departments' Response: The Departments have defined ''failure to meet'' adjusted levels of performance at the State level across the core programs based on the primary indicators of performance and criteria delineated in § 677.190 of these regulations. Determining what is meant by ''failure to meet adjusted levels of performance on required indicators for a third consecutive year'' *at the local level* is within the Governor's discretion per § 677.220(a)(1), which is similar to the historical requirements that existed under WIA. Because defining these terms is within the Governor's discretion, the Departments think this is not appropriate to be addressed in these regulations. No change to the regulatory text was made in response to these comments.

Comments: One commenter proposed another reason for the Departments to define ''failure to meet adjusted levels of performance'' arguing that a local area could be making significant progress towards improving performance but could potentially miss the required level by a fraction of a point. The commenter added that the lagged performance data complicates matters further and that some systemic performance issues may take more than 3 years to correct. For these reasons, this commenter suggested changing the regulatory language of ''fails to meet'' to ''fails to make satisfactory progress.''

Departments' Response: The Departments' requirement to determine when a corrective action or sanction can be applied to a local area is based on statutory language and the Departments will not modify this requirement. Therefore, no change to the regulatory text was made in response to this comment.

Comments: Several commenters offered suggestions for additional actions that might be taken by the Governor in addition to those already specified in regulatory text. Some commenters suggested that the Governor should be authorized to apply a financial sanction, with one commenter adding that the Governor should be authorized to dissolve a local area for continued failure, and other commenters recommended that the Governor also be authorized to consolidate local areas. Another commenter supported the Governor's flexibility, noting that redesignation of a local area is an inequitable penalty when compared to the penalties WIOA prescribes for State workforce agencies that fail to meet required performance levels. Other commenters, including a number of Local WDBs, expressed concern that the language in the regulatory text allowing Governors to take significant actions as deemed appropriate was too broad in scope and could be used to redesignate or eliminate local areas, suggesting at a minimum that parameters be specified at the Federal level. These commenters also stated that any additional actions taken by the Governor should be required to include consultation with the local elected official, although one commenter suggested the mandatory consultation with local elected officials should extend to any actions related to technical assistance. One commenter also inquired about the absence of any reference to failing performance for 2 consecutive years, stating it was clear that technical assistance was required after the first year, and it was clear a reorganization plan was needed after the third consecutive year, but the regulations were silent on what would take place after the second consecutive year of failure.

Departments' Response: The Departments considered the comments regarding additional significant actions that might be taken by a Governor for continued local performance failure and concluded that there is nothing prohibiting a State from considering financial sanctions as a potential ''significant action'' as part of the reorganization plan. Therefore, no Federal action is needed to permit this. The Departments also agree that significant actions taken by the Governor pursuant to § 677.220(b)(3) would be most effective if they included a consultation with the local elected official and other local stakeholders, and therefore, recommend the Governor do so. However, the Departments do not think a change in regulatory text is necessary as WIOA and regulation do not preclude the Governor from doing this. The Departments do not agree that regulatory text is necessary requiring consultation with local elected officials occur prior to the provision of any technical assistance as this is not required by WIOA and the process for providing technical assistance is at the Governor's discretion. Therefore, the Departments have chosen not to regulate this. Regarding the comment pertaining to failure for a second consecutive year, WIOA sec. 116(g)(1) makes clear that failure ''for any program year'' will trigger the provision of technical assistance; therefore, if failure occurs in the second consecutive year, the Governor is obligated to provide technical assistance, or request the Secretary of Labor to do so. In response to comments that the Governor could consolidate, redesignate, or dissolve a local area through the reorganization plan, the Departments note that WIOA sec. 116(g)(2) leaves what actions are most appropriate to take when a local area fails to meet its local performance accountability indicators, to the Governor's discretion. Therefore, the Departments will not change regulatory text in response to these comments.

Comments: One commenter requested clarification on § 677.220(b)(2), which allows the Governor to prohibit the use of eligible providers and one-stop partners that have been identified as achieving poor levels of performance as an action that may be taken as part of a reorganization plan. The commenter pointed out that neither WIOA nor proposed regulations addressed poor performance levels of one-stop partners, such as TANF, and suggested that the NPRM was referring to a competitively procured contractor or one-stop center operator.

Departments' Response: The language in the regulation is statutory language from WIOA sec. 116(g)(2)(A)(ii), and the Departments do not have authority to change the requirements of WIOA. No change to the regulatory text was made in response to this comment.

Comments: The Departments also received a number of general comments pertaining to this paragraph. One commenter wanted to ensure that any technical assistance for youth programs be developed by experienced youth experts that also could include youth who have successfully navigated the system and who are now employed. This commenter also cautioned against assumptions that a particular youth program may be causing the

performance failure. Another commenter strongly recommended that the Departments delay enforcement of the sanctions provisions for at least 2 years to further calibrate the statistical adjustment model, during which time States could approach implementation in a methodical manner that allowed for the application of lessons learned without strict penalties. Other commenters offered a similar suggestion, recommending that an additional 2 years was needed to implement these requirements, during which time the Departments should launch an intensive and nationwide technical assistance effort. Another commenter recommended transitional implementation in conjunction with the development of a national workgroup of broad stakeholders and experts to tackle each aspect of performance accountability, including the imposition of sanctions.

Departments' Response: The Departments expect the technical assistance the Governor provides pursuant to § 677.220(a) will be well-informed and developed with input from subject matter experts and agrees that former youth participants can offer a valuable perspective on technical assistance needs based on their own experience. In response to comments requesting delayed implementation of performance at the local level, the Departments received similar comments on the State-level performance accountability. In response to those comments, the Departments have revised § 677.190(c) to provide that the Departments expect full implementation of the performance accountability requirements to take some years, given the complexity of WIOA's requirements and the timing of the availability of data necessary to populate the statistical adjustment models, for instance. At the local level, the decisions on performance implementation are at the Governor's discretion and subject to the requirements of 20 CFR part 679 (*see* DOL WIOA Final Rule, published elsewhere in this issue of the **Federal Register**). Therefore, no change to the regulatory text is being made in this part in response to this comment. Additional information on implementation will be provided by the Departments in guidance.

Section 677.225 Under what circumstances may local areas appeal a reorganization plan?

This section of the regulation governs the process for an appeal if the local area wishes to appeal a reorganization plan. The Departments received few comments on the proposed text for this paragraph of the regulations. The Departments are implementing this regulation as proposed, except for a revision to § 677.225(d) which is described below.

The Departments revised paragraph (d) of § 677.225, replacing ''to impose a reorganization plan'' with ''on the appeal'' for consistency with the relevant WIOA provision. WIOA sec. 116(g) governs the consequences for a local area's failure to meet local performance accountability indicators for the youth, adult, or dislocated worker programs. WIOA sec. 116(g)(2) requires the Governor to develop a corrective action plan if the local area's failure continues for a third consecutive year. The local area and CEO of the local area may appeal this decision to the Governor. The Local WDB and CEO may appeal the Governor's decision on the appeal to the Secretary of Labor. The proposed version of this paragraph stated that the Governor's decision to impose a reorganization plan becomes effective at the time it is issued. However, WIOA sec. 116(g)(2)(C) provides that it is the Governor's decision on the appeal, not the reorganization plan, that becomes effective unless the Secretary of Labor rescinds or revises the plan.

Comments: One commenter recommended a revision to the regulatory text to clarify that if the Secretary of Labor does not respond to a joint appeal pursuant to § 677.225(c) within 30 days, then the Governor's decision to impose a reorganization plan automatically results in the reorganization plan becoming effective.

Departments' Response: Section 677.225(c) clearly requires the Departments to respond within the specified timeframe. The statutory text does not provide for automatic effectiveness of the plan if the Secretary of Labor does not respond within the 30-day timeframe. No change to the regulatory text was made in response to these comments.

7. Eligible Training Provider Performance for Workforce Innovation and Opportunity Act Title I Programs (20 CFR Part 677, Subpart E; 34 CFR 361.230; 34 CFR 463.230)

Section 677.230 What information is required for the eligible training provider performance reports?

Section 677.230 implements the requirements of sec. 116(d)(4) of WIOA, which requires annual ETP performance reports. The ETP performance reports provide critical information, including the employment, earnings, and credentials obtained by individuals in the program of study eligible to receive funding under the adult and dislocated worker formula programs under title I of WIOA. This information will be of significant benefit in assisting WIOA participants and members of the general public in identifying effective training programs and providers. The information will also benefit providers by widely disseminating information about their programs increasing awareness of the program and potentially as a tool to enhance their programs.

Section 677.230(b) has been revised to specify that the registered apprenticeships programs referred to are those registered under the National Apprenticeship Act. This section, in conjunction with 20 CFR 680.400 through 680.530, establishes the minimum requirements for performance information to be provided in the ETP performance reports. Additional information on these requirements and the data to be collected is provided through the WIOA Joint Performance ICR. The Departments inserted ''mechanism of'' into § 677.230(c) to clarify that the State must provide a mechanism of electronic access to the public ETP performance report in its annual State performance report. This edit was made for consistency with § 677.160(c).

Comments: The Departments sought specific input on how the Departments could best support ETPs in meeting the requirements of this section as well as on how to make the ETP reports a useful tool for WIOA participants, ETPs, interested stakeholders, and the general public. Multiple commenters suggested the Departments could support ETPs in meeting the requirements of subpart E by providing reporting formats and instructions in order to establish the basis for data collection. A commenter remarked that guidance to States would help streamline performance reporting for training providers and minimize the associated burden.

However, other comments suggested the Departments avoid being too prescriptive in order to maximize the accessibility of the reported data. A few commenters suggested that the increased volume of data collection necessitates technical assistance and funding support from DOL.

Departments' Response: The Departments recognize that in many cases the ETP reporting provisions will be different from what was standard under WIA. In recognition of this, the Departments are issuing definitions on the elements required under this provision through the WIOA Joint Performance ICR in accordance with the

PRA. The Departments crafted the definitions as they pertain to ETP reporting with consideration of commenter suggestions, industry standards, and statutory requirements while balancing the need for clarity and flexibility. Although the Departments agree these definitions are needed, they are appropriately handled through the aforementioned WIOA Joint Performance ICR.

Comments: Several commenters asserted that the Departments must permit an alternate definition of ''participant'' and/or ''exit'' for use in ETP reporting. These commenters noted that they would require considerable local flexibility in the application of these definitions. Commenters further articulated a need for technical assistance around the data collections associated with these definitions.

Departments' Response: As mentioned above, through the WIOA Joint Performance ICR, the Departments are issuing definitions of how these terms are used in ETP reporting. These definitions balance the needs for consistency and flexibility. No change to the regulatory text was made in response to these comments.

Comments: A few commenters suggested that the performance metrics, which are required to be reported for all individuals in a program of study, be waived for non-WIOA participants for the first 2 years to provide sufficient time to establish the required data systems to collect and report on these elements.

Departments' Response: The Departments have given consideration to the systems readiness to implement these provisions and understand that implementation will require guidance and technical assistance in order to assist States in this implementation. No change to the regulatory text was made in response to these comments.

Comments: A commenter stated that data collected should align with existing data collected on educational programs from other sources in order to maximize its usefulness to consumers.

Departments' Response: The Departments considered this concern, however, the data being collected are required by WIOA sec. 116(d)(4). Therefore no change to the regulatory text has been made in response to this comment.

Comments: A few commenters stated that since many training providers serve small populations, the data they report would not be statistically reliable indicators of performance. Similarly, a commenter requested clarification regarding the application of the disaggregation requirements to individual ETPs.

Departments' Response: The Departments recognize the contribution of ETPs that may serve smaller populations. The Departments note that the data disaggregation requirement in WIOA sec. 116(d)(6)(C) also applies to the ETP performance reports. The Departments will provide additional information on the parameters of the collection and reporting of this information through the WIOA Joint Performance ICR and program-specific guidance. This information is required to be collected under WIOA sec. 116(d)(4); therefore, no change to the regulatory text has been made in response to these comments.

Comments: A commenter urged the Departments to provide States maximum flexibility in displaying provider performance data in order to allow for State experimentation and to ensure compatibility with technology platforms. Another commenter suggested that the ''scorecards'' already developed by Local WDBs should be considered as a model.

Departments' Response: WIOA sec. 116(d)(1) and (4) require the use of 'a template' developed by the Departments to report on outcomes for eligible training providers and this template must be used consistent with the requirements of WIOA sec. 116 and this regulation. However, the use of this template does not preclude the States from additionally displaying performance data in a manner of their choosing and the Departments welcome innovative approaches to displaying this information in a user-friendly manner. No change to the regulatory text was made in response to these comments.

Comments: A commenter stated that if this data were a Federal requirement collected through ED, there would be a more consistent national approach.

Departments' Response: WIOA sec. 116(d)(4) requires the collection and reporting of this information on eligible training providers therefore no change to the regulatory text has been made in response to this comment.

Comments: A few commenters suggested that the possible barriers to employment be standardized for the purpose of the ETP performance report.

Departments' Response: The Departments recognize the importance of standardized and uniform definitions to provide data that are comparable across programs and States. The Departments note that specific calculations, definitions, and reporting parameters will be provided through the WIOA Joint Performance ICR; therefore, no change has been made with respect to defining barriers to employment in this section. No change to the regulatory text was made in response to these comments.

Comments: A commenter identified the most important data to be reported as training program completion rates, wage rates, and job placement rates.

Departments' Response: The Departments acknowledge the suggestions raised regarding information that is valuable to understanding the outcomes of training programs. WIOA provides specific collection requirements at sec. 116(d)(4), which includes much of the data suggested by the commenter, and further information as it pertains to the reporting requirements for these programs can be found in the WIOA Joint Performance ICR. No changes to the regulatory text were made in response to this comment.

Comments: A commenter stated that the performance outcomes only should be collected on those participants receiving services under WIOA title I, subtitle B.

Departments' Response: WIOA sec. 116(d)(4)(a) requires reporting on the primary indicators of performance for all students in the program of study, therefore no change has been made in response to this suggestion. No change to the regulatory text was made in response to this comment.

Comments: A commenter asserted that the ETP reporting requirements should be kept flexible to provide local providers the greatest choice in training providers. Commenters urged the Departments to allow ETP eligibility to last more than 1 year in order to generate enough participants and exits to provide a useful outcome measurement. A commenter remarked that WIOA authorizes Governors to establish a transition period for ETPs under WIA to remain on the list through 2015. A commenter suggested that the Departments require States to list credentialing programs on ETP lists (ETPLs) in order to provide the most comprehensive information.

Departments' Response: WIOA sec. 122 governs this process; therefore, the Departments refer readers to the discussion of 20 CFR part 680 in the DOL WIOA Final Rule (published in this issue of the **Federal Register**) for responses to these comments and more information regarding these issues. No change to the regulatory text was made in response to these comments.

Comments: The Departments received numerous comments requesting clarity and further information on the interaction between the provisions in WIOA sec. 116(d)(4) Eligible Training Provider performance report and the

performance reporting required for training provider eligibility under WIOA sec. 122 (20 CFR part 680, *see* DOL WIOA Final Rule).

Departments' Response: WIOA sec. 116(d)(4) requires that the ETP performance report must be prepared annually and the States must provide electronic access to this report in their State annual performance report pursuant to § 677.160(c). WIOA sec. 122 governs the process for determining training provider eligibility; this process requires calculation of certain performance information. As many commenters noted, there is significant overlap in what must be included in the WIOA sec. 116(d)(4) report and the information providers must provide for the eligibility determination under WIOA sec. 122. The Departments recognize this overlap may provide opportunities for States to collect this information for both purposes. Further information concerning ETP reporting requirements and performance reporting requirements is available through the WIOA Joint Performance ICR. The Departments will also be providing technical assistance in regard to these reporting requirements. No change to the regulatory text was made in response to these comments.

Under 20 CFR 681.550, DOL allows the use of individual training accounts (ITAs) for out-of-school youth ages 16 to 24. The parameters for this allowance are discussed in the preamble to that section. The Departments clarify here how youth are reported on in the WIOA sec. 116(d)(4) eligible training provider performance reports. The Departments clarify that such out-of-school youth are reported on in both the eligible training provider performance report as well as in the State and Local annual reports. Because WIOA sec. 116(d)(4) does not describe such youth, the Departments are clarifying here as well as in the WIOA Joint Performance ICR how these youth program participants are reported on in these reports. When such youth are reported on in the eligible training provider performance reports, their performance is reported using the same performance indicators as prescribed for WIOA adult and dislocated worker participants. Using the same metrics minimizes the burden on ETPs. The Departments note that such youth are excluded from the required reporting identified at § 677.230(a)(1)(i) through (iii) but are included in the counts required by § 677.230(a)(2) through (a)(4). The Departments further note that such youth are additionally reported on in the State and Local annual reports in accordance with §§ 677.155(d), 677.160, and 677.205, as described in those sections. The Departments will provide additional guidance on the treatment of these individuals through the WIOA Joint Performance ICR and in guidance.

Comments: A number of commenters responded to the Departments' request for comments regarding support for registered apprenticeship programs interested in providing performance information. A few commenters suggested that registered apprenticeship programs should report on the same performance outcomes as other training programs. Another commenter urged the Departments to require registered apprenticeships to publish performance data. Other commenters suggested there is value in having a comprehensive list of registered apprenticeship providers, but opposed additional reporting requirements for these programs. A commenter stated that if pre-apprenticeship programs are to be included in the ETP system, they will likely require separate criteria. Another commenter stated that performance information for registered apprenticeship programs should be clearly described.

Departments' Response: The Departments have concluded that WIOA sec. 116(d)(4) does not require registered apprenticeship programs to provide performance information for the ETP report. However, the Departments note that including information for a registered apprenticeship in these reports would provide a benefit to those individual seeking training through registered apprenticeships in that they will gain visibility and access to a broader applicant pool by voluntarily participating in this reporting. Therefore, the Departments are implementing § 677.230(b) as proposed to allow for the voluntary submission of performance information from registered apprenticeship program sponsors and their providers of related technical instruction. Any such information must be published in the State's annual ETP performance reports. With regard to the creation of a comprehensive list of registered apprenticeships the Departments note that such a requirement is beyond the scope of this regulation. No change to the regulatory text was made in response to these comments.

Comments: A commenter supported the creation of incentives for registered apprenticeship programs to submit performance information.

Departments' Response: The Departments are not creating additional incentives but notes that incentive for reporting already exists as explained above. No change to the regulatory text was made in response to this comment.

Comments: A commenter encouraged the Departments to account for positive outcomes from registered apprenticeship programs, even if the outcome is not necessarily completion of the program because programs could be several years in length.

Departments' Response: To the extent that the registered apprenticeship is actively reporting the information required under these provisions includes such information as measureable skill gains, which accounts for progress made during participation of a registered apprenticeship. No change to the regulatory text was made in response to this comment.

Comments: The Departments received multiple comments on how to calculate the average cost per participant for those who received training services for the most recent program year and the 3 preceding program years as required by WIOA sec. 116(d)(4)(E) and § 677.230(a)(3). One commenter noted that this metric is not currently collected. Such suggestions included: Calculating at the education or training program level, rather than the participant level; aligning calculations with existing national reporting standards, such as the Integrated Postsecondary Education Data System; calculating based on the tuition plus any support services (*e.g.*, books, supplies, transportation) necessary to succeed in the training; calculating based on actual training costs for a student, including portions paid for with government subsidies; and calculating based on the direct cost paid under WIOA title I funding.

Departments' Response: The Departments considered these proposals; however, the Departments have concluded that the cost per participant is more appropriately addressed in the WIOA Joint Performance ICR, which provides more specificity around what underlying data are necessary and how such data will be used in calculating this information. The Departments will provide additional information on how this metric is calculated through the WIOA Joint Performance ICR, guidance, and technical assistance. No change to the regulatory text was made in response to these comments.

Comments: Commenters expressed concern that the ETP performance report does not provide sufficient cost information because it does not take into account other factors such as, textbooks, supplies, transportation, etc.

Departments' Response: WIOA sec. 116(d)(4) and § 677.230 mandate the collection of specific information for each program of study for each eligible

provider of training services under title I as outlined in § 677.230(a). The Departments are cognizant of the reporting burden the ETP performance report places on ETPs and do not want to place additional burden on these entities. However, WIOA sec. 122 and 20 CFR part 680 require States to develop procedures for determining the eligibility of training providers and programs and to make information about the provider and program available to participants and members of the public. The WIOA sec. 116(d)(4) ETP performance report is only one component of an overall consumer product. States are not precluded from developing additional resources for consumers and the Departments encourage States to identify additional information that would be most helpful for students to have as they are evaluating a program or provider. No change to the regulatory text was made in response to these comments.

Comments: Numerous commenters raised issues on the burden posed for training providers. Such as:

- A commenter asserted that many small training providers, particularly those in rural areas, would be unable to comply with ETP performance reporting requirements, which would limit available trainings.
- A commenter expressed concern regarding the burden associated with collecting data reliant on SSNs, stating that many community colleges do not collect student SSNs.
- A commenter described the increased data collection burden associated with obtaining the SSNs for all enrolled students, and, if deemed necessary, establishing data sharing agreements with each of the individual ETPs.
- A commenter asserted that the costs associated with collecting, maintaining, and reporting out data are unknown and will vary depending on the entity responsible for these processes.
- This commenter also suggested that entities applying for inclusion on the State ETPL may not capture the required demographic and programmatic data that would allow for the production of the performance report.
- A few commenters suggested that many of the reporting elements would not be valuable and would impose a significant burden at the State and local level.

Multiple commenters suggested that many training providers do not have the capability or desire to report the proposed level of data on a regular basis, and this will lead to a decrease in training provider participation.

Departments' Response: The information required to be reported is required by WIOA sec. 116(d)(4). The Departments reiterate that the ETP performance reports provide critical information, including the employment, earnings, and credentials obtained by individuals in the program of study eligible to receive funding under the adult and dislocated worker formula programs under title I of WIOA. This information will be of significant benefit in assisting WIOA participants and members of the general public in identifying effective training programs and providers. The information will also benefit providers by widely disseminating information about their programs and potentially as a tool to enhance their programs. No change to the regulatory text was made in response to these comments.

Comments: Many commenters addressed § 677.230(e)(3) which contains the provisions allowing the Governor to designate one or more State agencies such as a State Education Agency or State Educational Authority to assist in overseeing the eligible training provider performance. Several commenters suggested designating the State as responsible for ETP data collection, coordination, and dissemination. These commenters suggested that their proposed approach would ensure local staff time is spent serving participants and that the data are consistently collected and reported across the State. A few commenters also stated that the burden on training providers would be minimized by not requiring collection of any data the State already has. A few commenters suggested aligning the ETP eligibility determination process with the data reporting process in order to minimize burden. A commenter sought clarification regarding the role of training providers in generating ETP performance reports and collecting data on participants.

Departments' Response: The Departments note that § 677.230(e) allows many such actions as recommended by the commenters. Additionally, the Departments reiterate that to the extent that there is overlap between data collected to meet requirements under WIOA sec. 122 and WIOA sec. 116 this overlap may provide opportunities for efficiency in collection and reporting of this information for both purposes. No change to the regulatory text was made in response to these comments.

Comments: Commenters expressed concern regarding the level of burden to eligible training providers for collecting the required data.

Departments' Response: The Departments acknowledge the need to identify the most effective data collection strategies and have reviewed the comments received through the WIOA Joint Performance ICR. Based on comments received, the Departments have concluded that State grantees are best situated to make the ETP performance reports available to ETA given their existing familiarity with the reporting structure. Grantees are required to establish a process to collect the data from the eligible training providers. The Departments will provide additional guidance on the ETP performance report.

Comments: In order to facilitate the reporting process, a commenter suggested that all training providers should report outcomes in the same format to facilitate cross-program comparisons and identify underperforming vendors.

Departments' Response: The Departments agree that reporting data in the same format would facilitate cross-program comparisons and WIOA sec. 116(d)(1) requires the Departments to develop a template for the annual ETP performance report. This section of WIOA requires the ETPs to use this report; therefore, all annual ETP performance reports will have outcomes listed in the same report to facilitate cross-program comparisons. Because this is already accomplished through WIOA and the regulation, the Departments did not make any changes to the regulatory text based on this comment.

Comments: Another commenter suggested that each program of study that a provider wants to be eligible to serve WIOA-funded students should be required to report.

Departments' Response: Under WIOA sec. 116(d)(4), the required reporting on a program of study only applies to those eligible training providers who are already on the State list of Eligible training providers and programs. Additional information on eligibility requirements is found in 20 CFR part 680, subpart D. The Departments also note, however, there is nothing in WIOA that precludes a State or an Eligible Training provider from providing or publishing similar information. No change to the regulatory text was made in response to this comment.

Comments: A commenter pointed out that entrepreneurship training would not score well on the performance indicators unless a recognized credential is developed.

Departments' Response: The Departments acknowledge concerns raised with regard to training that is

targeted at self-employment and recognizes that individuals who are self-employed would not be accounted for in State UI wage records. However, the Departments note that WIOA sec. 116(d)(4) identifies more than just employment or credential based outcomes. Such indicators as measurable skill gains combined with the allowance to collect and verify employment information through supplemental means as described more fully in the preamble to § 677.175 provides alternative points of information on outcomes associated with such trainings. The Departments have not made any revisions to this section with regard to this comment. Further clarification on the allowed sources of data and calculations for these provisions will be provided through the WIOA Joint Performance ICR. No change to the regulatory text was made in response to this comment.

8. Performance Reporting Administrative Requirements (20 CFR Part 677, Subpart F; 34 CFR 361.235 Through 361.240; 34 CFR 463.235 Through 463.240)

Section 677.235 What are the reporting requirements for individual records for core Workforce Innovation and Opportunity Act (WIOA) title I programs; the Wagner-Peyser Act Employment Service program, as amended by WIOA title III; and the Vocational Rehabilitation program authorized under title I of the Rehabilitation Act of 1973, as amended by WIOA title IV?

This section of the regulations requires all of the core programs—except for the title II program—to report using individual records, as opposed to aggregate data. While the NPRM would have required that records submitted to DOL must be submitted in one record that is integrated across all core DOL-administered programs, the regulatory text has been revised to read that such records ''may'' be submitted in an integrated format.

Comments: Many commenters expressed a range of concerns regarding the proposed reporting requirements that appear to be based on incorrect or incomplete information. For instance, one commenter asserted that WIA required an SSN for program participation, whereas the Wagner-Peyser Act Employment Service program did not, thereby resulting in data deficiencies regarding the matching of wage records, which should be addressed under WIOA.

Departments' Response: The provision of a SSN is strongly encouraged to facilitate objective performance measurement through the use of wage records; however, requiring an SSN as a condition of program participation has been and remains a violation of the Privacy Act of 1974, 5 U.S.C. 552a Note, which DOL has previously clarified in policy guidance. See TEGL No. 5–08, ''*Policy for Collection and Use of Workforce System Participants' Social Security Numbers.*'' No change to the regulatory text was made in response to these comments.

Comments: Another commenter suggested that, because one integrated record was required for each participant across all core programs, sufficient time should be provided to implement this paragraph, and it should be implemented no earlier than July 1, 2018. One commenter noted that State VR agencies are not part of the Workforce Investment Streamlined Performance Reporting (WISPR) system and suggested that States should be allowed to file separate reports for the VR program.

Departments' Response: While the Departments want to make clear that there is no requirement that performance reporting for the Departments of Labor and Education be integrated, the Departments encourage moving in that direction. For States that have integrated reporting of WIOA title I core programs and Wagner-Peyser Act Employment Service programs, DOL strongly encourages those States to submit an integrated report. This provision regarding the submission of integrated reports does not extend to the AEFLA and VR programs administered by ED. However, the Departments note that as previously discussed, DOL intends to work towards developing an integrated reporting mechanism. No change to the regulatory text was made in response to this comment.

Comments: Another commenter disagreed with the Departments' intention to have States integrate and submit their performance reporting as a single, comprehensive, aggregate report because it would incur an undue and unrealistic burden.

Departments' Response: As explained above, this is not a current requirement. The Departments understand that there would be a burden with submitting a single, aggregate report to be submitted by one State agency when the different programs may currently be housed in different departments or agencies.

Comments: Several commenters were also under the impression that all of the core programs currently utilize individual records, with one commenter asserting that the comment had been validated by WIOA staff across multiple States.

Departments' Response: The Departments also would like to clarify that five of the six core programs currently transmit individual records to their respective Departments. The ED's OCTAE, which administers title II programs, does not receive individual records from State Adult Education Agencies. It is noted that for title II, State eligible agencies are required to collect individual records on a quarterly basis and submit annually aggregated data using individual records. The Departments acknowledge the need for guidance on program reporting as well as technical assistance needed to ensure consistent understanding for implementation. No change to the regulatory text was made in response to these comments.

Comments: Many commenters expressed opposition to the exclusion of title II programs from the individual records reporting requirements. Several articulated that the expectations for system alignment through integrated reporting discussed in the NPRM would be undercut by the proposal to exclude title II from the same quarterly reporting requirements as the other five core programs. One commenter remarked that title II programs should be included in these reporting requirements in the spirit of true integration. And, and as previously noted, some commenters were under the impression that all of the core programs already use individual records, thereby making the exclusion of title II unwarranted.

Departments' Response: Although ED's Office of Career, Technical, and Adult Education does not collect individual records at the Federal level, States are required to maintain individual record systems that meet strict standards. States are required to collect such data quarterly and aggregate the data to meet performance requirements in an annual submission. No change to the regulatory text was made in response to these comments.

Comments: Several commenters suggested that the burden for the proposed reporting requirements was considerably underestimated and should reside at the Federal level, with some suggesting the additional requirements constitute an unfunded mandate, particularly for the VR program, which must incur the significant cost and staff training needed to transition from annual reporting of the RSA 911 to the proposed quarterly reporting of the RSA 911. Many of these commenters recommended that a currently available tool be utilized to validate RSA 911 data on a quarterly

basis without the requirement for full quarterly report submission. Additionally, there were concerns raised regarding data that are collected through the VR program, which falls under the confidentiality requirements under 34 CFR 361.38 that may prohibit the release of social security information.

Departments' Response: The ED's RSA acknowledges that additional time and resources as well as staff training will be needed to accomplish statutory requirement while ensuring consistent understanding and nationwide implementation. There is no provision in 34 CFR 361.38 that prohibits the release of SSNs for reporting purposes since the reporting requirements are necessary for the administration of the VR program. Therefore 34 CFR 361.38(b) does not require informed written consent for the release of PII for this purpose. However, there may be other Federal or State laws that would govern such releases. Further, the Departments refer to the VR Performance ICR for the RSA–911 form where burden for collection and reporting this information in the RSA 911 are further addressed. No change to the regulatory text was made in response to these comments.

Comments: The Departments received comments on aspects of this part related to calculations for indicators and performance information, structure and compilation of individual records, and formatting for the collection of underlying data for the reports.

Departments' Response: Because of the level of detail these comments sought on the more specific technical aspects of this part, the Departments, as discussed throughout this regulation, reiterate that such information will be provided through the WIOA Joint Performance ICR or Department-specific ICRs, as well as associated program guidance. No change to the regulatory text was made in response to these comments.

Section 677.240 What are the requirements for data validation of State annual performance reports?

Section 677.240 provides the requirements for data validation of State annual performance reports. It has been revised to specify that performance reports should be consistent with the requirement for data validation in WIOA sec. 116(d)(5).

Comments: Several commenters requested guidance for conducting data validation across core programs. Commenters specifically asked for guidance concerning where the responsibility for data validation lies when participants are co-enrolled in two or more partner programs. Commenters also asked for clarification regarding the distinction between State and local roles in annual reporting. Multiple commenters supported either the postponement of the effective date for data validation requirements until July 2017 or the gradual implementation of data validation requirements, particularly if the validation pertains to new data that are required to be collected. Some of these commenters expressed concern regarding potentially retroactive data validation requirements whereby States would have to go back in order to capture newly required data elements on periods of participation that began before the new requirements were implemented. Several commenters also suggested that the starting point for data validation guidance be based on existing data validation methods and procedures used under WIA, with one commenter specifically suggesting that a comprehensive review of the data elements currently included in WIA data validation be undertaken to ensure the appropriate data are being validated, eliminating those elements that are either duplicative or no longer necessary.

Departments' Response: The Departments concur that joint guidance for conducting data validation across the core programs is necessary in order to provide the level of detail and specificity required to implement these provisions. As noted above, § 677.240(a) has been revised to specify that reporting should be consistent with guidance issued pursuant to WIOA sec. 116(d)(5) concerning data validation. The guidance to be developed will be based on a comprehensive review of the methodology, data elements, and source documentation that have been utilized under WIA. It will clarify State and local roles in annual reporting and the associated validation process, and the co-enrollment of participants across two or more core programs will be addressed. The Departments do not expect to issue guidance that includes the need for retroactive data collection. In terms of implementation timeframes, the Departments anticipate a phased-in approach, which is particularly important for those programs that have not conducted data validation under WIA. Expectations will be articulated through the Departments' joint policy guidance, and technical assistance will be provided to ensure consistency in understanding and implementation. No change to the regulatory text has been made in response to these comments.

Comments: Commenters shared specific suggestions for source documentation to be used to validate personal identity, with one commenter arguing that applicant and counselor statements should be acceptable for SSN validation to eliminate the need to copy social security cards, thereby minimizing the risk of file breach. Another commenter requested clarification on accuracy standards, inquiring as to whether the Departments will follow the ''five percent rule'' used for WIA data validation.

Departments' Response: Source documentation requirements will be clarified in policy guidance to be issued jointly by the Departments, including documentation to validate personal identity. The Departments agree with one commenter who suggested that allowing staff verification is not consistent with data quality standards. The Departments acknowledge the proposed suggestions by commenters and will further clarify such procedures through the guidelines. No change to the regulatory text was made in response to these comments.

The ''five percent rule'' referenced in the comment pertains to an accuracy standard utilized under WIA by DOL for its programs whereby critical data elements with an error rate exceeding five percent were flagged as potentially symptomatic of larger reporting and data quality issues. This will be addressed in guidance.

In addition to the regulatory text changes discussed above, various non-substantive changes have been made for purposes of correcting typographical errors and improving clarity that have not been necessary to note elsewhere.

C. Description of the One-Stop System Under Title I of the Workforce Innovation and Opportunity Act (20 CFR Part 678; 34 CFR Part 361, Subpart F; 34 CFR Part 463, Subpart J)

1. Introduction

In the section-by-section discussions of each one-stop system provision below, the heading references the DOL CFR part and section number. However, ED has identical provisions at 34 CFR part 361, subpart F (under its State VR program regulations) and at 34 CFR part 463, subpart J (under a new CFR part for AEFLA regulations). For purposes of brevity, the section-by-section discussions for each Department's provisions appear only once—in conjunction with the DOL section number—and constitute the Departments' collective explanation and rationale for each provision. When the regulations are published in the CFR, these joint one-stop regulations will

appear in each of the CFR parts identified above.

2. General Description of the One-Stop Delivery System (20 CFR Part 678, Subpart A; 34 CFR 361.300 Through 361.320; 34 CFR 463.300 Through 463.320)

WIOA reaffirms the role of the one-stop delivery system, a cornerstone of the public workforce development system, and subpart A describes the one-stop delivery system. Although there are many similarities to the system established under WIA, there are also significant changes under WIOA. This subpart, therefore, restates WIA requirements governing one-stop centers, to the extent they are still applicable under WIOA, and embodies a set of reforms that, when implemented effectively, are intended to make significant improvements to the public workforce delivery system. These regulations set forth requirements of the one-stop delivery system as established under WIOA, requiring partners to collaborate to support a seamless customer-focused service delivery network. The regulations require that programs and providers colocate, coordinate, and integrate activities and information, so that the system as a whole is cohesive and accessible for individuals and employers alike. These regulations provide a detailed framework for implementation; however, the Departments acknowledge additional written guidance and technical assistance to the public workforce system is needed to implement the provisions and intentions of WIOA fully. Such guidance and technical assistance was provided during PY 2015 and will continue to be provided and updated with the future development of policies regarding the one-stop delivery system. The ultimate goal is to increase the long-term employment outcomes for individuals seeking services, especially those with significant barriers to employment, and to improve services to employers.

Subpart A describes the one-stop delivery system. It establishes the different types of one-stop centers allowable in each local area, the need for both physical and programmatic accessibility in the one-stop delivery system, and also addresses the use of technology to provide services through the one-stop delivery system. As discussed in §§ 678.305 and 678.310, a local area's one-stop delivery system may be made up of a combination of a comprehensive one-stop center and a network of affiliated sites. When designing the one-stop delivery system, States and Local WDBs must ensure that information on the availability of career services is available at all one-stop center physical locations and access points, including electronic access points, regardless of where individuals initially enter the local one-stop delivery system. The Departments acknowledge that some comments of support were included among comments in this subpart. No changes to the regulatory text were made in response to these comments.

The Departments made several changes to regulatory text in response to comments on subpart A. Most notably, changes were made to § 678.305(d) that clarify what it means to make available a ''direct linkage'' through technology to provide access to program services and information for those partner programs not physically located in a comprehensive one-stop center.

Section 678.300 What is the one-stop delivery system?

This section provides that there are responsibilities at the local, State, and Federal levels relative to the establishment and maintenance of the one-stop delivery system.

Comments: Several commenters addressed the accessibility provisions in this subpart. A few commenters stated that VR agencies must work closely with workforce systems to ensure accessibility for individuals with disabilities. Another commenter said that each local area must have at least one comprehensive one-stop center that is accessible. A few commenters said that there are one-stop centers located in buildings that are not fully accessible, and the regulations should emphasize in this section that full accessibility is required.

Departments' Response: The Departments agree with commenters that accessibility to one-stop centers and the program and services provided at those centers is of the utmost importance. Section 188 of WIOA, the corresponding regulations at 29 CFR part 38, and the regulations in this part at §§ 678.305, 678.310, and 678.800 require that all one-stop centers and affiliated sites be physically and programmatically accessible to disabled individuals. The Departments have concluded that the numerous instances of directly addressing this or cross-referencing another section of regulation or WIOA throughout part 678 is sufficient emphasis on this point. No change to the regulatory text was made in response to these comments.

Comments: One commenter asked which entity is responsible for ensuring one-stop center accessibility.

Departments' Response: The decision as to which entity will be responsible for ensuring accessibility at a one-stop center is ultimately the Local WDB's to make, appropriately specified in the MOU.

Comments: Another commenter said this subpart should describe the procedure for when a one-stop center is found not to be physically and programmatically accessible.

Departments' Response: The procedures that must be followed when a one-stop center is found not to be physically or programmatically accessible are described in 29 CFR part 38. The Departments have added cross references to those regulations in §§ 678.305 and 678.310 to clarify that these are the controlling regulations in such instances, replacing references to § 678.800.

Comments: A commenter asked, given the long-standing separation between one-stop centers and adult education programs, how soon the Departments expect these entities to fulfill the requirement to provide a ''seamless customer-facing service delivery network.''

Departments' Response: While the Departments understand that adapting to the new one-stop delivery system structure will take time for all partners involved, partner programs are expected to work as expeditiously as possible to reach the goal of providing a ''seamless customer-facing service delivery network.''

Comments: A few commenters requested guidance on how certain partners, like libraries, are expected to measure enrollment.

Departments' Response: A WIOA program carries the responsibility for reporting and ensuring such data are available to fulfill their reporting requirements. In the case where a partner program is receiving WIOA funds to provide services for any program, a mechanism for tracking and reporting such services and individuals will need to be established between the local one-stop partner and the program responsible for making such reports. Where a local one-stop partner is providing services beyond those funded under WIOA, reporting requirements would not extend to such services. In the case of a local one-stop partner, such as a local library, who may only be providing space for a program or programs to operate within, or providing access to public computers by which participants access programs, reporting is the responsibility of the program operator.

Comments: A few commenters said that this section will require the UI program to change its business model.

Departments' Response: The Departments do not agree that the UI program will require a change to its business model, and see the program as completely adaptable to the new regulations' plan and vision for the one-stop delivery system. New requirements, such as the requirement to provide ''meaningful assistance'' to claimants who need help filing a claim, do not translate into a move away from primarily on-line or phone claims filing. They simply assure that claimants who need assistance accessing the program receive it.

Section 678.305 What is a comprehensive one-stop center and what must be provided there?

Access and Direct Linkage

Providing one-stop center participants with access to program activities and services is the keystone of the one-stop delivery system. ''Access'' is defined in § 678.305(d), which provides three ways each partner program may meet this requirement: (1) Having a program staff member physically present at the one-stop center; (2) having a staff member from a different partner program physically present at the one-stop center appropriately trained to provide information to customers about the programs, services, and activities available through partner programs; or (3) making available a direct linkage through technology to program staff who can provide meaningful information or services. Options two and three offer a wide range of possibilities to partners. Option two could require varying levels of assistance depending on the program's needs, but this could be as simple as providing a hardcopy TANF benefit application to a participant or directing them to an online form. Direct linkage can take many forms as well, and the Departments received many comments on the definition of this term, as discussed below.

Comments: A few commenters disagreed with the definition of ''direct linkage,'' specifically because it does not include providing a phone number or Web site that individuals can use at home. These commenters said this is an unnecessary restraint on how States can serve customers and does not take into account the usage of mobile apps and other technology. The commenters also said that the definition of ''direct linkage'' exceeds what is required in WIOA. Further, the commenters stated that proposed technologies, such as live Web chat systems, are expensive.

Departments' Response: Maintaining the option of connecting to a well-trained program staff member at the one-stop center is extremely important to the success of the one-stop delivery system. The Departments recognize that the language defining ''access'' and ''direct linkage'' may have been too restrictive and also could make it appear that every interaction required a human component, not just the availability of the option to speak with a person. Many one-stop customers may only require services provided electronically or may not be ready for a direct interaction with a staff member. For these reasons, the Departments have changed the regulatory text in paragraph (d)(3) of this section, replacing ''providing direct linkage . . .'' with ''making available a direct linkage . . .,'' in order to reflect that communicating with an individual must remain an option, but is not required for every one-stop customer interaction.

Comments: Several of the previously mentioned commenters joined other commenters who said that it is not realistic to expect that every customer can receive services at the time of arrival at the one-stop center, and suggested that the regulation should not prohibit arranging for customers to receive services at a later time.

Departments' Response: The Departments agree that the proposed regulation was not intended to prohibit arrangements to serve customers at a later time. Accordingly, the Departments have deleted the language prohibiting arranging for customers to receive services at a later time, thereby providing what the Departments see as more flexible service delivery options. Specifically, paragraph (d)(2) was changed by striking the phrase ''or making arrangements for the customer to receive services at a later time or on a different day.''

Comments: A few commenters commented that the definition of ''direct linkage'' implies that all customers entering a one-stop center have a computer with Internet access at home. The commenters recommended revising this section to indicate that providing a computer with access to enrollment or eligibility services does qualify as a direct linkage.

Departments' Response: While providing such a service is of value and should be encouraged, a ''direct linkage,'' pursuant to these final regulations, must be the availability of a direct connection to a program staff member by phone or through real-time Web-based communication, an element seen by the Departments as critical to the service. As mentioned above, however, not all one-stop customer interactions require the use of a ''direct linkage;'' rather, the regulations require only that a ''direct linkage'' remains available to the customer. The language of paragraph (d)(2) was changed from ''[a] 'direct linkage' does not include providing a phone number or computer Web site that can be used at an individual's home . . .'' to ''[a] 'direct linkage' cannot exclusively be providing a phone number or computer Web site . . . .'' This means that providing a phone number or Web site, as mentioned by the commenters, would still be considered serving an individual, as long as more involved access was available to that customer if desired.

Comments: Another commenter also disagreed with the NPRM, saying that States should have flexibility to determine how and when to deliver virtual services.

Departments' Response: The Departments have concluded that, with the above-mentioned changes to the definitions of ''accessibility'' and ''direct linkage,'' States and local areas are provided a reasonable amount of flexibility to determine how and when to deliver virtual services, as long as the option of a ''direct linkage'' remains open to customers if another form of ''access'' is not available. The Departments have not made further changes to the regulatory text in response to this comment.

Comments: A few commenters requested clarification on the definition of ''timely manner'' and ''within a reasonable time.''

Departments' Response: The Departments decline to define ''within a reasonable time'' in this section. The Departments consider what is ''reasonable'' will fluctuate based on demand and resources in a specific local area. However, to ensure quality customer service, the Departments encourage States and local areas to minimize the time during which an individual must await a direct linkage to services and to coordinate direct services effectively.

One-Stop Center Partner Staffing

Comments: A commenter asked whether the title I program staff person needs to be present full-time or may be present on a part-time basis. Another commenter asked whether there must also be at least a part-time title II staff presence. Additionally, one commenter said that electronic linkage should be permissible instead of requiring a physical staff presence.

Departments' Response: At least one title I staff person must be present when the one-stop center is open for operations, although this requirement does not have to be met by a full-time staff person and can be met by the physical presence of different staff trading off throughout the one-stop center's times of operation.

No such requirement exists for the physical presence of a title II staff person at the one-stop center. However, such physical presence may be appropriate as a means to provide access to the title II program, depending upon the particular local area's needs.

Lastly, as long as there is a physical presence of at least one title I program staff member at all times of operation, all other programs have the option to provide ''access'' through a ''direct linkage'' that leverages available technologies according to the definitions provided in this section. The Departments, however, encourage partners to strive for a physical presence at one-stop centers to serve customers' needs better.

Comments: A few commenters asked if it is the intent of the regulations to have all required partners colocated in the one-stop centers.

Departments' Response: As stated in § 678.305(a), ''[a] comprehensive one-stop center is a physical location where job seeker and employer customers can access the programs, services, and activities of all required one-stop partners.'' As providing services through ''direct linkage'' is an allowable form of ''access,'' as defined in § 678.305(d), not all required partners must be physically present at a comprehensive one-stop center as long as ''access'' to their services, programs, and activities is provided. However, the Departments encourage as much physical presence of partner staff persons that is feasible.

Comments: Another commenter said that it will be logistically difficult to ensure that 50 percent of required partners are located in the one-stop centers, particularly with regard to adult education programs and the volume of customers that they serve.

Departments' Response: This comment seems to stem from a misunderstanding of the colocation requirements. While all required one-stop partners must provide ''access'' to their programs and activities through a comprehensive one-stop center, at least one title I program staff person must be physically present. However, the Departments encourage as much physical presence of other one-stop partners' program staff persons as is feasible. States and local areas should be aware of the requirement in § 678.315 that, if Wagner-Peyser Act services are provided at an affiliated site, at least one or more other one-stop partner programs must be located in the affiliated site, and there must be a physical presence of combined staff from the other program(s) over 50 percent of the time that the site is open.

Comments: Another commenter said that the ability of the VR program to participate through technology instead of through a physical presence will greatly expand the VR program's participation in the one-stop delivery system.

Departments' Response: As stated above, as long as this technology meets the definition of ''direct linkage'' as stated in § 678.305(d), the VR agencies are able to substitute this for a physical presence at a comprehensive one-stop center.

Comments: One commenter asked if it is the intent of the regulations to require NFJP grantees to be located in the same one-stop center as other entities that provide one-stop services. The commenter said that colocating these grantees would be logistically very difficult. A couple of commenters stated that the decision to colocate services can be beneficial but should consider financial viability. If it is more beneficial to locate NFJP programs outside of a one-stop center, these commenters reasoned that grantees should be given the flexibility to do so, and commented that the grantee can still develop a close partnership with the one-stop delivery system without necessarily being colocated.

Departments' Response: Because NFJP is an entity that administers a program authorized by title I of WIOA, sec. 121(b)(1)(B) and § 678.400(b)(1) require NFJP to be a comprehensive one-stop center partner. This does not necessarily mean, however, that NFJP staff must be physically present at the one-stop center. There are multiple examples in the regulations for providing access to a program and its services through the one-stop center (such as providing a ''direct linkage''), as discussed in paragraph (d) of this section. It should be noted, however, that an NFJP staff member placed at the local area's comprehensive one-stop center could serve as the required title I staff member when present.

Comments: Another commenter remarked that, traditionally, there has been a cost increase associated with operating NFJP services in conjunction with a one-stop delivery system that leaves less funding available for training programs and participant services. This commenter said that the increase in operating costs would be due to high rent, assignment of personnel to other duties in the one-stop delivery system, and cooperative spending.

Departments' Response: The Departments determined that while there may be cost increases in some areas, there may be savings in others due to the infrastructure cost contribution plan laid out in the local area's MOU in accordance with §§ 678.700 through 678.755.

Comments: One commenter suggested that one-stop centers should receive guidance about how to calculate co-occupancy rates so that partners are aware if there is inadequate space to provide colocated services.

Departments' Response: The Departments recognize the importance of quality facilities, including adequate physical space, to deliver services across one-stop partner programs. However, the Departments do not consider this level of detail necessary in regulations and have not made changes to the regulatory text in response to this comment. The Departments encourage the use of State and local administrative data to guide negotiations regarding colocation and shared infrastructure costs.

Comments: Some commenters said that the regulation implies that operating one-stop centers beyond normal business hours will lead to a higher evaluation during the certification process. These commenters expressed concern about the fairness of this practice, stating that some one-stop centers many not be able to stay open past normal business hours due to lease agreements or security concerns (*e.g.*, needing to hire an additional security guard).

Departments' Response: Providing nontraditional hours of operation, such as on Saturdays or after 5 p.m. on weekdays, is seen as a critical element in servicing difficult to reach populations, such as low-wage, low-skill, and other employed workers, and homeless individuals. Therefore, this will remain one of the required elements to be taken into account when evaluating the effectiveness of one-stop centers. The Departments have revised the regulatory text at § 678.800(b) to reflect that such hours should be provided where there is such a need by the workforce population, as identified by the Local WDB. It should be noted that this is only one factor to take into consideration when evaluating a one-stop center for certification, and while operating a one-stop center beyond normal business hours will count positively toward a center's evaluation, this will in no way negatively affect the

evaluations of other one-stop centers in the State that may not be able to offer such services.

Comments: Another commenter asserted that the regulation's emphasis on expanding operating hours would require additional staff and relocations to larger facilities to accommodate these staff.

Departments' Response: In some instances, this may be true, but the Departments encourage creative ways of implementing these nontraditional hours with the resources the one-stop centers and Local WDBs have available to them. Innovation is one of the driving principles behind WIOA, including in how services are delivered to difficult to reach populations and individuals with barriers to employment.

Other Comments

Comments: Another commenter said that States should determine standards for one-stop centers with input from Local WDBs.

Departments' Response: Under sec. 101(d)(6) of WIOA, State WDBs are responsible for assisting the Governor in developing statewide policies affecting the coordinated provision of services through the one-stop delivery system, including developing objective criteria and procedures that Local WDBs will use to assess the effectiveness and continuous improvement of one-stop centers. In addition, one-stop centers must adhere to the requirements in sec. 121 of WIOA and these implementing regulations.

Comments: A commenter suggested amending this section to encourage States to develop technology-based strategies to ensure that wraparound, or comprehensive, services are available outside of normal business hours.

Departments' Response: The Departments encourage the development of technology-based strategies to deliver services to customers in innovative and comprehensive ways, both during normal business hours and nontraditional hours, and the Departments have concluded that the regulations support such activity as written. No changes to the regulatory text were made in response to this comment.

Comments: Another commenter said that the NPRM does not provide enough guidance on how to decide the number and location of comprehensive one-stop centers, explaining that these decisions require significant collaboration among several stakeholders.

Departments' Response: While sec. 121(e) of WIOA and § 678.300(c) require that at least one comprehensive one-stop center be established in a local area, many local areas will require the establishment of multiple centers to serve their populations properly. This is highly dependent on individualized factors in each local area. This determination is best carried out at the State and local planning level. WIOA sec. 121(a) requires the establishment of the one-stop delivery system, consistent with the approved Unified or Combined State Plan, through the Local WDB for a local area and with the agreement of CEO for the local area. It is these entities that should determine the proper number and location of one-stop centers, by drawing on their knowledge of the area's needs. The Departments made no change to the regulatory text in response to the comment.

Section 678.310 What is an affiliated site and what must be provided there?

In addition to the requirement for a physical center in each local area where all required one-stop partners must provide access to their programs, services and activities, consistent with sec. 121(e)(2)(B) of WIOA,,§§ 678.310 and 678.320 provide that the one-stop delivery system may also provide partner programs, services, and activities through affiliated sites or through a network of eligible one-stop partners that provide at least one or more of the programs, services, and activities at a physical location or through an electronically or technologically linked access point, such as a library. The Departments added a reference to 29 CFR part 38, the implementing regulations of WIOA sec. 188.

Comments: A commenter recommended that affiliated sites not be required to have operators; however, the commenter also said that the entities delivering services at these sites should be signatories to the MOU.

Departments' Response: As required by sec. 121(c) of WIOA, an MOU is an agreement among the one-stop partner programs and the Local WDB; therefore, the entities delivering services—*i.e.*, the partner programs—will be signatories to the MOU. A local area's one-stop operator may be in charge of running affiliated sites as well as the comprehensive one-stop center. In other cases, other arrangements for operations of the affiliate sites may be specified in the MOU. The operator may be assigned different responsibilities, which are dependent on the terms of the selection process and the operator agreement(s) reached between the operator(s) and the Local WDB.

Comments: One commenter suggested that affiliated sites should not have to provide access to all required partners, since physical staffing is determined locally.

Departments' Response: Since affiliated sites are not required to provide access to all partner programs, as stated in § 678.310(a), no change to the regulatory text is necessary.

Comments: Another commenter asked whether VR agencies are required to participate in affiliated sites.

Departments' Response: To clarify, neither the VR program, nor any other partner program, is required to participate in affiliated sites by these regulations or by statute; partner programs are required only to participate in the operation of the one-stop delivery system and must provide access to their programs through the comprehensive one-stop centers. The Departments encourage the use of affiliated sites to serve a local area's population better, but decisions concerning this implementation are ultimately made by the local areas. These affiliated sites should, first and foremost, supplement and enhance customer access to services, and should be seen as access points that are in addition to the local area's comprehensive one-stop centers.

Comments: One commenter asked whether an adult education provider in a CBO is considered an affiliated site.

Departments' Response: Yes, an adult education provider, or any other partner program, located in a CBO, may be considered an affiliated site. If any partner program in a CBO is considered an affiliated site, that program must follow all of the requirements of this section.

Section 678.315 Can a stand-alone Wagner-Peyser Act Employment Service office be designated as an affiliated one-stop site?

This section sets forth the prohibition against standalone Wagner-Peyser Act Employment Services offices. WIOA requires that the Wagner-Peyser Act Employment Service program be colocated with one-stop centers. A Wagner-Peyser Act Employment Service office cannot, by itself, constitute an affiliated site. In those cases where the Wagner-Peyser Act Employment Service program is located in an affiliated site, there must be staff of at least one other partner in that affiliated site that is physically present more than 50 percent of the time the center is open.

Comments: A commenter asked whether one partner agency that administers multiple partner programs can satisfy the 50 percent presence requirement. This commenter reasoned that multiple partners should be able to

meet the 50 percent requirement collectively.

Departments' Response: In light of the comments and upon considering the requirement for physical presence of non-Wagner Peyser program staff more than 50 percent of the time, the Departments have concluded that it is appropriate to allow a combination of partner program staff members to meet this requirement, and the Departments have revised the regulatory text to reflect this.

If there is only one qualifying partner program (*i.e.*, partner programs other than local veterans' employment representatives, disabled veterans' outreach program specialists, or UC programs) in addition to the Wagner-Peyser Act program at an affiliated site, then that partner program alone must meet the more than 50 percent threshold. If there is more than one qualifying partner program in the affiliated site, such programs together must have staff present to provide coverage more than 50 percent of the time the site is open.

Comments: A commenter also recommended that electronic access should be included to meet the more than 50 percent requirement. Another commenter agreed, and also added that it may not be financially feasible to have staff in affiliated sites more than 50 percent of the time.

Departments' Response: While the Departments appreciate and encourage partners' use of technology to better, and more comprehensively, serve customers of the one-stop delivery system, the Departments have not revised the regulatory text to permit such activities in order to meet the more than 50 percent physical presence requirement for non-Wagner-Peyser Act partner programs. Doing so would defeat the purpose of this requirement, which is to have staff other than Wagner-Peyser Act staff physically present for a majority of the time that an affiliated site is open.

Comments: A few commenters requested flexibility in determining staffing at affiliated sites to meet local needs best, stating that the 50 percent threshold may result in some programs being overstaffed while Wagner-Peyser Act services are understaffed. Another commenter agreed that this requirement is burdensome and does not take into account existing long-term lease agreements.

Departments' Response: In determining the number and placement of affiliated sites, Local WDBs should consider how their one-stop delivery system could deliver services most effectively across the local area with the resources that are available. In making these adjustments, Local WDBs should consider the services that are needed in each location, how services are delivered in the comprehensive one-stop center, where the one-stop center is located, and where current affiliated sites are located. This may require the opening of new affiliated sites, or the consolidation of existing offices that would be considered affiliated sites under WIOA. The Departments recognize that such adjustments take time, but the Departments expect this process to begin as soon as possible.

Comments: Another commenter asked how this requirement would affect existing standalone Wagner-Peyser Act offices.

Departments' Response: This requirement will mean that either a non-Wagner-Peyser Act partner program will need to colocate at the formerly standalone Wagner-Peyser Act office; the Wagner-Peyser Act program will need to move to another space that can support colocation with a non-Wagner-Peyser Act partner program; or the Wagner-Peyser Act program will need to shift operations to a comprehensive one-stop center, of which the program is a required member, or to another affiliated site. As stated in § 678.315, Wagner-Peyser Act programs may no longer exist in standalone offices.

Comments: One commenter recommended strengthening the language about how required partners are to operate in integrated partnerships with Wagner-Peyser Act services. The commenter stated that many local areas have flexibility to determine whether to colocate with Wagner-Peyser Act services.

Departments' Response: The Departments are not altering the regulatory text to address the language concerning how required partners are to operate in partnership with Wagner-Peyser Act services. WIOA recognizes the Wagner-Peyser Act program's role in the one-stop delivery system and has made Wagner-Peyser Act one of the core programs. The Departments have determined that Wagner-Peyser Act services are vital to the successful operation of one-stop centers, and have, through administrative guidance, strongly encouraged access to these services throughout the public workforce system.

Comments: A few commenters expressed concern about the lack of specific instructions for how State workforce agencies are supposed to fund the colocation of Wagner-Peyser Act services. The commenters recommended that States do not need to use their Wagner-Peyser Act program allocations for this action.

Departments' Response: Given the diversity in how States have structured their Wagner-Peyser Act employment services, the regulation provides States with discretion in developing an appropriate plan for relocation. Any plan, including the identification of funding to be used to carry out relocation, must comply with applicable Federal cost principles. The Departments did not make changes to the regulatory text in response to this comment.

Comments: One commenter recommended that States be required to have a conflict-resolution process in place for on-site staff disputes, which may help alleviate one of the major challenges of program colocation.

Departments' Response: While the Departments recognize the utility of such a process and may recommend the implementation of such a process in many instances, the Departments have decided it is best to provide Local WDBs with flexibility in determining how to operationalize the colocation of programs, as well as integrated service delivery. For this reason, the Departments will not require a conflict-resolution process for on-site staff disputes, and have made no changes to the regulatory text.

Section 678.320 Are there any requirements for networks of eligible one-stop partners or specialized centers?

The Departments received no comments for this section and made no substantive changes to the regulatory text. However, the Departments have rephrased the first sentence of the paragraph to improve clarity and readability. The phrase ''such as having in place processes to make referrals to'' was stricken from its original position; ''one-stop center'' was added after ''comprehensive;'' and the phrase ''for example, by having processes in place to make referrals to these centers and the partner programs located in them'' was inserted at the end of the first sentence. The new sentence reads as follows: ''Any network of one-stop partner or specialized centers must be connected to the comprehensive one-stop center and any appropriate affiliate one-stop centers, for example, by having processes in place to make referrals to these centers and the partner programs located in them.'' The Departments have made these changes to make this sentence more understandable than originally phrased and do not intend to change the meaning of the sentence or paragraph.

3. One-Stop Partners and the Responsibilities of Partners (20 CFR Part 678, Subpart B; 34 CFR 361.400 Through 361.440; 34 CFR 463.400 Through 463.440)

The public workforce system envisioned by WIOA seeks to provide all participants with access to high-quality one-stop centers that connect them with the full range of services available in their communities, whether they are looking to find jobs, build educational or occupational skills, earn a postsecondary certificate or degree, obtain guidance on how to chart careers, or are employers seeking skilled workers. A genuinely seamless, one-stop experience requires strong partnerships across programs that are able to streamline service delivery and align program requirements. In this subpart of the regulation, the Departments describe requirements relating to such one-stop partnerships. Specifically, this subpart identifies the programs that are required partners and their roles and responsibilities, the other entities that may serve as partners, and the types of services provided.

The Departments changed several sections of this subpart in response to comments. While small changes to the regulatory text were made in § 678.410, much more significant changes were made to § 678.415(e), which changed the default one-stop partner under the Perkins Act from the State agency administering that program to a local postsecondary recipient of Perkins funds. Changes to the requirements for local TANF partners have also been made in § 678.430(a)(2) and (d). Two additions were also made to the human services that may be provided as business services in § 678.435(b)(4).

Section 678.400 Who are the required one-stop partners?

This section lists the one-stop partners required under sec. 121(b)(1)(B) of WIOA. Beyond the partners previously required under WIA, WIOA adds the TANF program, administered by HHS, and the Ex-Offender program, administered by DOL under sec. 212 of the Second Chance Act of 2007, to the list of required partners.

Comments: A commenter requested clarification on participation for career and technical education programs and also a clearer definition of employment and training programs. The commenter expressed concern that without a clear definition of these terms, nearly any entity can claim to be an employment and training program. Further, the commenter requested that States be able to define these terms.

Departments' Response: Within the context of these regulations, these terms are used in reference to programs authorized under specific Federal statutes. The ''career and technical education programs'' referred to in § 678.400(b)(6) are those authorized by the Perkins Act at the postsecondary level. The ''employment and training activities'' listed in this section are either those carried out under the CSBG or those carried out by HUD, as provided in § 678.400(b)(9) and (10), respectively. Under these categorical restrictions, the Departments are not concerned that nearly any entity could claim to be an employment and training program. Section 121(b)(1)(B) of WIOA, as implemented by § 678.400, lists intentionally broad categories of required partners so as to bring more local partner programs into the comprehensive one-stop center and the broader one-stop delivery system to provide more comprehensive services for the one-stop centers' customers. For this reason, the Departments are not changing the regulatory text concerning these terms. The Departments have determined that it is within the best interests of the one-stop delivery system and its customers for States to adhere to these broad categorical definitions. Furthermore, narrowing these definitions would exclude some programs explicitly included by Congress as the regulatory language mirrors the statutory text in WIOA secs. 121(b)(1)(B)(vi), (ix), and (x).

Comments: A commenter asked whether CSBG programs have to be physically located at the one-stop center.

Departments' Response: If a CSBG program carries out employment and training activities, then these activities must be accessible at the comprehensive one-stop center, either through a physical presence or through another means of ''access'' as defined by the regulations in § 678.305(d), because these programs are required one-stop partners under sec. 121(b)(1)(B) of WIOA. Section 678.305(c) specifically requires customers to have access to one-stop partner programs in a comprehensive one-stop center, including employment and training activities carried out under the CSBG program. Furthermore, § 678.305(d) defines ''access'' as including, but not limited to, having partner program staff physically present at the one-stop center. That is, one-stop partner programs do not need to be physically present in a comprehensive one-stop center, but they must provide access to their services in the ways described in § 678.305(d).

Comments: One commenter said that the Perkins program needs to determine who the Perkins one-stop partner will be. Another commenter stated that § 678.400 needs to be reconciled with the Perkins Act and asserted that career and technical education programs do not have authority to enter into an MOU, although a postsecondary entity does have such authority.

Departments' Response: The NPRM specified that the State Eligible Agency serves as the one-stop partner for the Perkins program. As discussed below in this preamble, the Departments have determined that an eligible recipient at the postsecondary level, or a consortium of eligible recipients at the postsecondary level in the local area is the most appropriate entity to serve as the one-stop partner in a local area. This change is reflected in § 678.415(e) and is discussed in the corresponding preamble section below.

Comments: Another commenter recommended that all Federal grantees that have employment and training components in their grant should be required one-stop partners.

Departments' Response: While the Departments encourage the inclusion of such entities as additional one-stop partners, the list of required partners in § 678.400(b) is the statutorily mandated list of required partners. The Departments do not have authority to require additional programs to be one-stop partners. However, several entities such as those mentioned by the commenter are explicitly listed in sec. 121(b)(2)(B) of WIOA and § 678.410 as acceptable additional one-stop partners, subject to approval of the Local WDB and CEO.

Section 678.405 Is temporary assistance for needy families a required one-stop partner?

This section provides further clarification that the Governor may determine that TANF will not be a required one-stop partner in a local area(s), but must notify the Secretaries of Labor and HHS in writing of this determination. This implements sec. 121(b)(1)(C) of WIOA. It should be noted that the Governor's decision to exclude TANF from being a required one-stop partner is distinct and separate from the decision to include or not to include TANF in a Combined State Plan. TANF remains one of the many options of programs to be included in a Combined State Plan. Its status as a required one-stop partner does not mean it is required to be included in a Combined State Plan. For all sections regarding TANF, the HHS, which administers the program, was consulted extensively.

Comments: A few commenters expressed support for TANF being a required one-stop partner. Other commenters remarked that adding TANF as a one-stop partner will lead to improved services for job seekers. However, one commenter recommended that the Departments include stronger language about including TANF as a required one-stop partner. This commenter said that if TANF is such an important partner, it should not be so easy for Governors to opt out.

Departments' Response: While the Departments agree that TANF is an important partner in the one-stop delivery system, WIOA requires—at sec. 121(b)(1)(C)—that Governors be able to determine that TANF will not be a required one-stop partner through written notice to both the Secretary of Labor and the Secretary of HHS. It should be noted, however, that even if the Governor decides not to require TANF to be a one-stop partner, local TANF programs may still work in collaboration or partnership with the local one-stop centers to deliver employment and training services to the TANF population, unless inconsistent with the Governor's direction. Additionally, the local TANF program also may find other avenues of providing TANF services to one-stop customers that may not reach ''partner'' status.

Comments: One commenter recommended that the regulations should clarify that TANF employment and training activities must be offered at one-stop centers, with other TANF-funded activities included at the discretion of the local TANF agency and Local WDB. This commenter reasoned that requiring all TANF activities at one-stop centers would be a substantial cost and administrative burden.

Departments' Response: Access through the one-stop delivery system is required only for TANF activities related to work, education or training, the initiation of an application, and career services as specified in § 678.430(a)(2). TANF is a required one-stop partner unless the Governor opts not to require TANF participation in either a specific local area or the entire State. The cost of the various activities associated with the one-stop operators should be one of the factors considered by the Governor in making this decision.

Comments: A commenter stated that even if the Governor opts out, local TANF programs might still be required to be one-stop partners. Other commenters expressed support for local TANF programs to be permitted to opt in as one-stop partners, even if the Governor opts out. Another commenter expressed concern that the proposed regulations would permit a local TANF agency official to defy a Governor's decision not to include TANF as a required one-stop partner. The commenter recommended that this clause should be deleted, stating that a Governor's decision regarding TANF as a required one-stop partner must be respected.

Departments' Response: While local TANF programs are allowed to be one-stop partners, they cannot be required to do so if the Governor has determined that TANF is not required to be a partner. However, the Departments agree that local TANF programs should be permitted to work in collaboration and partnership with the local one-stop centers and have determined that allowing local TANF programs to make this decision, in conjunction with Local WDBs, is in the best interest of serving one-stop customers to the fullest extent possible, unless doing so is inconsistent with the Governor's direction. The Departments recognize the importance of increasing access to TANF programs, and have determined that allowing these programs' voluntary inclusion, when not required by a Governor and when not prohibited by the Governor's direction, is consistent with the spirit of WIOA. The Departments have modified the regulatory text to indicate that local TANF programs may become partners at the local one-stop centers unless the Governor directs or orders otherwise. While a Governor may choose not to require TANF programs to be one-stop partners, the Departments do not want to create barriers to local TANF programs becoming partners in the local one-stop center when there is a mutual desire to do so. The Departments have concluded that the availability of TANF services to one-stop customers is an important element of the one-stop vision. Furthermore, the Departments have interpreted WIOA sec. 121(b) as providing separate authority to local areas to include additional one-stop partners, including TANF, which is not overridden by a Governor electing to exclude TANF from being a required partner. However, as administrator of the State TANF program, the Governor is empowered under the Social Security Administration (SSA) to direct the actions of local TANF programs and may choose to limit a local program's ability to opt in. It should be noted here that any additional partners not required by sec. 121(b)(1)(B) of WIOA, but permitted by sec. 121(b)(2)(B), can participate as a one-stop partner only with the agreement of the CEO and Local WDB.

Comments: A commenter urged the Departments to ensure that a decision regarding whether TANF is a required one-stop partner should be separate from the decision regarding including TANF in a Combined State Plan.

Departments' Response: The Governor's decision to exclude TANF as a required one-stop partner must be made through direct written notification of such a decision from the State's Governor to the Secretaries of Labor and HHS. By contrast, at any time, a Governor can opt to include or not include TANF in a Combined State Plan, whether or not TANF is a required one-stop partner in the State.

Comments: Another commenter asked how TANF being a required partner instead of a core partner translates into level of service delivery for clients.

Departments' Response: The regulations do not differentiate between core programs and required one-stop partners with respect to level of service delivery. All required one-stop partners are expected to provide comparable levels of service delivery to one-stop customers, regardless of whether they are core programs under WIOA. No changes to the regulatory text were made in response to this comment.

Comments: One commenter stated that this is an opportunity for the TANF program to partner with schools.

Departments' Response: While the TANF program's inclusion in a State's one-stop delivery system may, in fact, provide an opportunity for TANF programs to partner with schools, this is a decision that should be made at the local level and will not be required by the Departments. As such, no changes to the regulatory text were made in response to this comment.

Section 678.410 What other entities may serve as one-stop partners?

Partnerships across programs are critical to supporting the one-stop vision for service delivery. Section 678.410 reinforces sec. 121(b)(2)(B)(vii) of WIOA, which states that other Federal, State, local, or private sector entities that carry out workforce development programs may serve as additional one-stop partners if the Local WDB and CEOs approve.

Comments: A few commenters recommended that the regulations should strongly encourage partnerships with disability service providers, as increasing the employment of persons with disabilities is a key goal of WIOA. Another commenter stated that SNAP employment and training programs would include the Basic Food

Employment and Training (BFET) and Able-Bodied Adults Without Dependents (ABAWD) programs. The commenter also asked whether § 678.410(b)(6) includes programs funded by the Office of Refugee Resettlement (ORR). Another commenter urged one-stop centers that have youth services to partner with Runaway and Homeless Youth (RHY) providers. The commenter explained that RHY providers have best practices for dealing with traumatized youth. One commenter looked forward to working with refugee English language training organizations and other organizations as potential one-stop partners.

Departments' Response: Each one of the comments above suggests including programs as one-stop center partners. Local partners representing any one of these programs that provides services or serves participants who are in need of the career development or job placement services of the one-stop delivery system would be appropriate additions to the one-stop delivery system in a given local area and could be added as additional partners under § 678.410(b)(6). Inclusion in the one-stop center of these and other programs is outlined in the local area strategic plan, and in the specifications for the selection of one-stop operators and service providers in the local areas. In response to these and other comments, which are addressed below, wording has been added to this section to clarify that the list of optional one-stop partners is not exhaustive. The Departments have determined that no additional specific regulatory language is needed.

Comments: A commenter recommended that the Departments add a reference to local or regional labor market information, which should be used to drive strategic planning and one-stop partner decisions regarding the appropriate mix of services required in local areas.

Departments' Response: Many factors, including labor market information, can inform what local partners should include in a one-stop center. The Departments have not changed the examples of optional one-stop partners in the regulation, but have clarified that the list in § 678.410 is not exhaustive, by changing ''including'' to ''including, but not limited to'' in the catch-all provision of paragraph (b)(6). It should be noted that the term ''including'' is, by definition, nonexclusive, and that this addition is made for the sake of emphasis and should not to be interpreted as suggesting that any other use of the term ''including'' in these or any other regulations denotes exclusivity. The Departments agree that partners suggested by commenters can be appropriate and useful one-stop partners but have concluded that it is easier to communicate this flexibility by clarifying that the list is not exhaustive, rather than trying to list every potential partner.

Section 678.415 What entity serves as the one-stop partner for a particular program in the local area?

This section provides a general definition of the entities that carry out the programs identified in §§ 678.400 and 678.410 and serve as the one-stop partners. The regulation defines an entity as the grant recipient, administrative entity, or other organization responsible for administering the funds of the specified program in the local area. The term ''entity'' does not include service providers that contract with, or are subrecipients of, the local administrative entity. The regulation notes that for programs that do not have local administrative entities, the responsible State agency should be the one-stop partner.

Section 678.410(d) lists the entity that acts as the WIOA title I one-stop partner for national programs in any particular local area. While YouthBuild was listed in the NPRM as one of these national programs, the paragraph failed to list which entity would serve as the one-stop partner. Just as for the Indian and Native American and Migrant and Seasonal Farmworker programs, the grantee of the YouthBuild program is the entity that will serve as the one-stop partner in a local area. The regulatory text has been amended to convey this and correct the omission in the NPRM.

Comments: A commenter asserted that proposed § 678.415(e), which designates the Perkins State eligible agency as the local one-stop partner for purposes of negotiating the MOU, ''lacks any support in the text of the law and would make an already complicated negotiation process that much more complex.'' Several commenters recommended revising the paragraph to state that the entity that carries out the program is the local area's Perkins eligible institution, rather than the State eligible agency. Further, this commenter recommended that the Departments remove the clause about the State eligible agency delegating its responsibilities.

Departments' Response: In response to these comments, the Departments agree that the local eligible recipient is a more appropriate one-stop partner for the Perkins program and have changed the regulatory text in § 678.415(e) to provide that the Perkins one-stop partner is the eligible recipient at the postsecondary level, or a consortium of eligible recipients at the postsecondary level in the local area. This change is aligned to the statutory text in WIOA sec. 121(b)(1)(B)(vi). The regulatory text also has been revised to state that the Perkins one-stop partner may request assistance from the State eligible agency in completing its responsibilities as a one-stop partner.

Comments: A few commenters interpreted proposed § 678.415(c) to mean that if the State's VR program is under an umbrella agency that is not primarily concerned with vocational rehabilitation, the designated VR partner will be the director of the designated State unit.

Departments' Response: Under § 678.415(c), if the designated State agency—which these commenters refer to as an ''umbrella agency''—is not primarily concerned with VR, then the designated State unit for the VR program would be the local partner.

Comments: One commenter stated that it is unclear from this section whether the Local WDB or its chosen title I provider is the entity that serves as the one-stop partner and recommended that the Local WDB not be considered the one-stop partner in this case.

Departments' Response: The Departments agree with the commenter that the Local WDB is not a one-stop partner, unless it is a specific program provider as well. The Departments have concluded that the proposed regulatory text is clear on this issue and have made no changes to the regulatory text.

Comments: Another commenter agreed with the Job Corps center being the one-stop partner, but suggested also including the providers who conduct recruitment for the Job Corps program.

Departments' Response: Determination of such an inclusion in the local one-stop delivery system is best left to the Local WDB. These providers will remain permissible one-stop partners but will not be required, and the Departments decline to change the regulatory text in response to this comment.

Comments: One commenter suggested allowing the State TANF agency to delegate its responsibilities under § 678.415(a), as other mandatory partners are permitted to do.

Departments' Response: The Departments' interpretation of WIOA is that the local TANF program is the required one-stop partner that, therefore, holds the responsibilities mentioned by this commenter. Matters concerning the roles of entities in

carrying out TANF must be addressed under the TANF authorizing statute.

Comments: Some commenters expressed support for not requiring the one-stop partner to have responsibilities in local areas where that program or activity is not carried out.

Departments' Response: The final regulation continues to reflect this policy.

Section 678.420 What are the roles and responsibilities of the required one-stop partners?

This section describes and elaborates upon the statutory responsibilities of the one-stop partners. These responsibilities and corresponding WIOA provisions are identified and summarized in paragraphs (a) through (e) of § 678.420. Jointly funding services is a necessary foundation for an integrated service delivery system. All partner contributions to the costs of operating and providing services within the one-stop delivery system must be proportionate to the benefits received and also must adhere to the partner program's Federal authorizing statute and to Federal cost principles requiring that costs are reasonable, necessary, and allocable. The requirement in § 678.420(e), to provide representation on State and Local WDBs, is new in WIOA and is required only of core programs; WIA only required one-stop partner representation on Local WDBs, and required it for all one-stop partner programs. The Departments have begun issuing guidance and providing the system with technical assistance on matters related to this section and will continue to do so.

Responsibilities Related to Infrastructure Cost Contributions

Comments: A commenter asked whether the statement in this section that references Federal laws on administrative costs refers to the established ceilings on the infrastructure contributions that can be expected from certain programs, such as VR.

Departments' Response: This is the intent of the rule and, as such, the Departments have made no changes to the regulatory text in response to this comment.

Comments: A commenter stated that partner programs would be more likely to contribute to infrastructure costs if the individual programs' authorization were amended to include that expectation.

Departments' Response: Revisions to the authorizing statutes and regulations of individual programs are beyond the scope of this regulation.

Comments: Another commenter stated that it would be very challenging to establish equitable funding to support a one-stop delivery system without stronger language and guidance governing the required one-stop partners.

Departments' Response: The Departments have released, and will continue to release, guidance relating to this and many other issues. The Departments concluded that the guidance will be sufficient in assisting one-stop partners in supporting a one-stop delivery system and decline to make a change to the regulatory text.

Comments: A few commenters said that § 678.420(b) can be construed to mean that YouthBuild programs must contribute money to their local one-stop delivery system. The commenters expressed concern that YouthBuild programs would have to pay into the one-stop delivery system for infrastructure support when the money is needed to operate the program.

Departments' Response: As a statutorily required one-stop partner program, YouthBuild is required by sec. 121(b)(1)(A)(ii) of WIOA to contribute to the infrastructure costs of any one-stop center in which it participates, based on proportionate use and relative benefit received. The Departments do not have authority to change this requirement and have made no changes to the regulatory text in response to these comments.

Comments: A commenter requested additional guidance on proportional benefits received and also on costs associated with title II providers contributing to one-stop infrastructure.

Departments' Response: The portion of this preamble addressing public comments and changes made to the provisions in subpart E relating to ''One-Stop Operating Costs'' also addresses many of these issues.

Other Comments

A few commenters recommended rewording this section to state that not all one-stop partners are required to be members of the State and Local WDBs.

Departments' Response: After considering this comment, the Departments have concluded that the language of the proposed regulatory text is clear that not all one-stop partners are required to be members of the State and Local WDBs. No changes to the regulatory text were made in response to this comment.

Comments: One commenter asked what recourse a Local WDB would have if States allocate the majority of their program funding to more populous areas, leaving rural areas underfunded.

Departments' Response: The allocation of funds by programs is beyond the scope of this regulation and WIOA. As such, the Departments have no ability or authority to create such a recourse mechanism. As good faith partners in the one-stop delivery system, however, the Departments expect that programs will operate in a manner that best serves the needs of a State.

Section 678.425 What are the applicable career services that must be provided through the one-stop delivery system by required one-stop partners?

WIOA requires one-stop partners to deliver applicable program-specific career services. This regulation clarifies that an applicable career service is a service identified in § 678.430 and is an authorized program activity.

Comments: A few commenters requested clarification on what services must be physically available in one-stop centers. Another commenter said that proposed § 678.425 does not describe how or where these services must be provided and suggested that customers should be able to receive in-person assistance with the required partners. Another commenter expressed support for eliminating the sequence of services, as this would provide staff with greater flexibility to serve customers.

Departments' Response: The Departments have not made changes to § 678.425. Section 678.305(b)(1) specifically states that comprehensive one-stop centers must provide career services described in § 678.430. The language is not qualified by the phrase ''access to,'' meaning that career services must actually be provided in the comprehensive one-stop centers. With respect to programs and activities to which the one-stop partners must provide access, as set forth in § 678.305(b)(2) through (4), the regulations describe requirements concerning physical presence of staff and in-person assistance in § 678.305(a), (c), and (d). Paragraph (a) of § 678.305 requires that at least one title I staff person be physically present in a comprehensive one-stop center. Paragraph (c) of § 678.305 requires customers to have access to one-stop partner programs in a comprehensive one-stop center, and paragraph (d) defines ''access'' as including, but not limited to, physical presence of partner program staff appropriately trained to provide information to customers about the programs, services, and activities available through partner programs. That is, one-stop partner programs do not need to be physically present in a comprehensive one-stop center, but they

must provide access to their services in the ways described in § 678.305(d).

Section 678.430 What are career services?

Unemployment Insurance Claims Filing and Assistance. Section 678.430 specifies the career services that one-stop partners must provide through the one-stop delivery system. Paragraph (a)(10) provides that core services include providing meaningful assistance to individuals seeking assistance in filing a claim for unemployment compensation.

Comments: Several commenters addressed the proposed definition of ''meaningful assistance.'' In particular, one commenter expressed support for the definition as it allows for technology to be used to provide the assistance. However, this commenter joined many others in expressing strong disagreement with the discussion in the preamble to the NPRM that one-stop customers referred to a phone-based service for UI claims be sent to a dedicated phone line for one-stop customers, rather than the general State UI queue. These commenters asserted that this requirement is not in WIOA; would be costly and difficult to maintain during times of high call volume; fails to take advantage of existing UI claims filing and assistance technology infrastructure in many States; and gives priority to individuals who are able to travel to one-stop centers, thereby disproportionately affecting individuals who are unable to travel to one-stop centers due to distance, lack of transportation options, or disability. A few commenters also stated that this requirement conflicts with the fact that most UI claims are done remotely through self-service options, including mobile applications and Web sites. One commenter asked for the definition of ''within a reasonable time.'' Another commenter said that the definition of ''meaningful assistance'' is not clear.

Departments' Response: The Departments disagree with the comments regarding a dedicated phone line for one-stop customers using UI services. States are not required to have a dedicated phone line for one-stop customers, but a phone line would provide a direct linkage for providing services remotely as required by § 678.305(d). More importantly, simply referring one-stop customers to the general UI queue, without otherwise making trained staff available does not qualify as ''meaningful assistance.'' Therefore, if local areas choose to provide meaningful assistance through technological means, trained staff must be available such as through a dedicated phone line.

In response to the comments regarding concerns that the ''meaningful assistance'' requirement to help individuals file UI claims is overly burdensome, the Departments note that § 678.430(a)(10)(i) provides flexibility to States regarding implementation by providing a menu of options for States to meet the requirement. The regulation does not mandate the service delivery methodology. Options include the ability to provide the service remotely as long as it is provided by trained and available staff within a reasonable time. The Departments also note that this requirement is targeted to individuals who need assistance and is not intended to replace State processes for taking claims remotely, either online or by phone. The Departments have not provided a definition of reasonable time because that varies by circumstances. The Departments have made no changes to the regulatory text in response to these comments.

Comments: Many commenters raised concerns about private entities or contractors providing assistance with filing UI claims, asserting that this should be considered an inherently governmental function that must be conducted by State merit staff. These commenters said that if UI staff is not present in one-stops to fulfill this function, Employment Services staff could do so. A few commenters also recommended that ''State merit'' be inserted before ''staff'' in proposed § 678.430(a)(10)(i)(A) and (B). A commenter expressed concern regarding the definition of ''filing,'' suggesting that it should not be the function of one-stop or Wagner-Peyser Act staff to file UI applications.

Another commenter asked for guidance on defining ''and assistance'' in the requirement to provide ''information and assistance regarding filing claims for unemployment compensation.'' Another commenter expressed support for the proposed expanded definition of ''enhanced career services'' including UI claims filing assistance and eligibility assessments.

Departments' Response: The Departments decline to make changes to § 678.430(a)(10) to refer to State merit staff. The assistance requirement only encompasses helping the individual navigate the State's claims filing process and providing the individual with general information on their responsibilities as a claimant. These functions are informational in nature and not directly connected to determining the claimant's eligibility for benefits. The requirement does not encompass speaking specifically to the individual's potential eligibility for benefits or making any determinations regarding the individual's eligibility for benefits, which are inherently governmental functions that must be provided by UI merit staff. The Departments note that it has been permissible for non-State merit staff to carry out similar functions, for example, reviewing compliance with State work search requirements as part of the Reemployment and Eligibility Assessment program for many years. The Departments reiterate the importance that, if these functions are carried out by non-UI staff, States must ensure that the staff is well trained. The Departments expect to provide additional guidance and technical assistance to States on the implementation of these provisions. For the reasons stated above, the Departments are not revising the regulatory text in response to these comments. For more information about the impact of WIOA implementation merit staffing for the Wagner-Peyser Act, see 20 CFR 652.215.

Temporary Assistance for Needy Families

Comments: Several commenters addressed the Departments' request for comment regarding the identification and inclusion of TANF employment, related supported services, and TANF intake functions as career services that must be provided in one-stop centers. For example, some commenters suggested that because there are so many ways of delivering TANF intake services (*e.g.*, electronically), States should have flexibility in determining whether TANF intake services should be physically located in the one-stop centers.

Departments' Response: The Departments recognize the need, and utility, of providing States flexibility in implementing TANF intake services and have added two paragraphs to § 678.430. Paragraph (a)(2) of § 678.430 states, in pertinent part, that ''[f]or the TANF program, States must provide individuals with the opportunity to initiate an application for TANF assistance and non-assistance benefits and services . . .'' This provides States with flexibility as to how this is achieved. As a required partner, however, TANF must still provide access (as defined by § 678.305(d)) to employment services and related support services. To this end, paragraph (d) has been added to § 678.430, stating that ''[i]n addition to the requirements in paragraph (a)(2) of this section, TANF

agencies must identify employment services and related support being provided by the TANF program (within the local area) that qualify as career services and ensure access to them via the local one-stop delivery system.''

Comments: Another commenter suggested that required partners should be required to provide TANF outreach and intake at one-stop centers.

Departments' Response: As TANF is a required one-stop partner by default, and only is excluded from the one-stop delivery system through a decision by the Governor, TANF outreach and intake services must be provided at any one-stop center for which TANF is a partner.

Comments: One commenter asserted that including TANF intake functions as career services would require significant cross training of other program staff in their State. For these reasons, the commenter supported the continuation of the colocation/co-enrollment model for TANF services at one-stop centers. Another commenter asked whether State agency staff were properly cross trained to conduct TANF intake.

Departments' Response: The Departments recognize that some services come at higher costs than others, and this is one of the many factors that must be weighed in determining how best to deliver services. In addition, the question of what constitutes ''proper'' training on the TANF program for local one-stop workforce staff will depend on the TANF benefits and services that are offered at the local one-stop center.

Comments: A few commenters stated that requiring one-stop centers to process TANF applications that are not related to employment is unhelpful and should not be considered career services.

Departments' Response: As mentioned above, the Departments' review and consideration of comments made on the NPRM, particularly the language regarding intake, application processing, and initial eligibility determinations for TANF assistance and non-assistance benefits at one-stop centers, prompted the Departments to modify the requirement from how it was proposed in the NPRM. This modified requirement, found in final § 678.430(a)(2), requires that, at a minimum, the one-stop centers must enable a family to initiate an application (as defined by the State agency) for TANF assistance and non-assistance benefits and services. One-stop centers could accomplish this by having paper application forms available at the one-stop center or by having information or links to the application on the one-stop center's Web site.

The Departments have determined that allowing customers in need of career services to have the opportunity to initiate an application for TANF benefits at one-stop centers is not counterproductive or unhelpful. On the contrary, providing for a family's unmet needs via a TANF benefit is crucial to ensuring progress and success in meeting career service objectives.

The Departments affirm the NPRM preamble explanation on the identification and delivery of career services (restated below) absent a definition of career services in the TANF statute.

The TANF statute does not include a definition for career services. Accordingly, the TANF State grantees must identify any employment and related support services that the TANF program provides (within the particular local area) that are comparable with the career services as described in this section.

Comments: A few commenters remarked that there is no universal English as a Second Language (ESL) test under TANF or other employment and training programs and suggested that ESL providers are better at conducting language proficiency testing than employment service providers. Another commenter suggested that one-stop providers should be expected to provide services to linguistically and culturally diverse populations.

Departments' Response: The regulations do not require a specific ESL test as part of the initial assessment of skills, or to gain meaningful access to TANF or other Federal programs. They leave the selection and use of assessment tools, and qualified administrators of such tools, up to the partner program or service provider, as appropriate to individual participants. If any one-stop partner or service provider receives funds directly or indirectly from HHS or other Federal agencies, it is required under title VI of the Civil Rights Act of 1964 and its implementing regulations, to take reasonable steps to ensure meaningful access to its programs by persons with limited English proficiency. Title VI also prohibits Federal grant recipients from utilizing methods of administration that have the effect of discriminating against persons based on their race, color, or national origin. In some cases, a provider's failure to provide language assistance to linguistically or culturally diverse populations could be a violation of title VI. However, the title VI requirement to take reasonable steps to ensure meaningful access does not mean that jurisdictions are required to provide universal ESL training. While individual jurisdictions may need to provide ESL training and testing to TANF family members in some cases, universal ESL training is not a statutorily mandated requirement.

Other Career Services

Comments: A commenter suggested that career services also should include a pre-screening for eligibility for supportive services such as the Children's Health Insurance Program (CHIP), SNAP, the Earned Income Tax Credit, TANF, and transportation services alongside the initial assessment of skill levels.

Departments' Response: Paragraph (a)(2) of § 678.430 requires that, along with intake, an orientation to the other services and programs provided at the one-stop center must be given to participants, and paragraph (a)(5) requires referrals to, and coordination of, activities with other programs and services. The Departments have determined that this strikes a balance between the burden on one program's staff to be knowledgeable about other partner programs and the benefit that this knowledge can be to participants. Requiring all staff to do pre-screening for the programs identified by the commenter would take time away from providing actual programmatic assistance to participants, as well as delay other participants from receiving services.

Comments: Other commenters requested additional guidance on the initial assessment process. The commenters asked whether there is a specific point in service delivery when initial assessments should be provided to customers, what the vision and intent is of this assessment, and how the assessment is to be used. Another commenter asked whether there are any standardized tools to be used to conduct this assessment.

Departments' Response: The Departments intend to issue joint guidance on this subject in the near future.

Comments: One commenter said that the assessment should be tailored to include an evaluation of women's ''interest and aptitude for higher-wage, nontraditional careers.''

Departments' Response: The Departments have decided not to change the regulatory text in response to this comment. The Departments recognize the importance of placing women in higher-wage, nontraditional careers, but note that local areas have discretion to undertake such an evaluation as part of

the initial assessment of skill levels required in § 678.430(a)(3).

Comments: A commenter recommended rewording paragraph (b)(1) of § 678.430 to state, ''Comprehensive and specialized assessments of the skill levels, interests, values, aptitudes, and service needs of adults and dislocated workers . . .''

Departments' Response: The Departments have decided not to change the regulatory text in response to this comment. The assessment of skill levels could very well include these elements, but the Departments had determined that the inclusion of such elements is best left up to the Local WDB and partners to decide, given that they are in a position to adapt these processes to local area needs.

Comments: Another commenter suggested that these assessments should include disability-related barriers to employment and the development of an action plan to reduce these barriers, as well as information on how to access common disability-related services. This commenter also recommended that when to disclose a disability and how to request a reasonable accommodation should be part of career counseling.

Departments' Response: Disability-related barriers to employment and information on how to access disability-related services are elements of the assessment process that the Departments encourage Local WDBs and partner programs to implement, but the Departments have decided not to change § 678.430(b)(1) in response to the comment at this time. The assessment process is meant to be molded to best fit a local area's employment environment and the needs of the participants, potential employers, and the community. Moreover, as written, § 678.430(b)(1)(ii) specifically indicates that assessments may include in-depth interviewing and evaluation to identify employment barriers, which could include disability-related barriers.

Comments: A commenter expressed support for the inclusion of financial literacy as an allowable activity. The commenter stated that bundling financial education with workforce development leads to improved employment and financial outcomes. Another commenter suggested that there should be financial literacy programs specifically targeting individuals with disabilities.

Departments' Response: The Departments agree with the commenter's statements about the bundling of financial education with workforce development. While the Departments have chosen not to change § 678.430(b)(9) to specifically include financial literacy programs targeting individuals with disabilities, the Departments encourage Local WDBs to implement such plans as they determine are necessary to meet the needs of a local area.

Comments: One commenter recommended that one-stop center partners should work with local institutions to ensure that one-stop customers are banked (*e.g.,* have banking accounts) to reduce reliance on predatory lending.

Departments' Response: The Departments recognize the need to combat predatory lending and encourage Local WDBs to make such partnerships a part of their financial literacy services programs. However, the Departments decline to change the regulatory text to mandate such relationships because they may not be appropriate for every local area. The Local WDB is in the best position to determine if such a service is needed in a particular local area.

Comments: Another commenter recommended that transportation should be put in a separate paragraph to emphasize that transportation for youth includes transportation to one-stop centers and work sites. The commenter also suggested that referrals to organizations that assist with housing, food, and obtaining identification documents should be provided at one-stop centers.

Departments' Response: The provision of information about the availability of, and the referral to, transportation provided through TANF are included in WIOA sec.134(c)(2)(A)(1)(ix) and in § 678.430(a)(9) as a career service. The commenter's recommendation about transportation is adequately addressed in the regulatory provision as drafted, and the Departments have decided that it is not necessary to include it in a separate paragraph. The Departments have also determined that § 678.430(a)(9), requiring information and referrals to be provided for other supportive services and assistance, would encompass referrals to other services as suggested by the commenter. While the list in the regulation does not specifically mention some of these services, it is a non-exhaustive list. Local WDBs are free to provide information and referrals to any supportive services that they determine would benefit one-stop participants in a local area.

Comments: Another commenter said that it might be confusing to differentiate between basic and individualized career services.

Departments' Response: The Departments have decided to make a distinction and separation between these terms. Basic services are those made available to each individual who accesses a one-stop center, while individualized services are those that are tailored to each participant to best meet his or her needs.

Comments: A commenter suggested that if career services are classified as ''pre-enrollment'' and ''required enrollment,'' Local WDBs could determine the customer flow without having to worry about cost issues.

Departments' Response: While the Departments have determined that some career services are more appropriate for those in pre-enrollment or those enrolled in a program, the Departments have determined that it is best to leave this distinction to the Local WDBs, as they are in better positions to recognize and respond to the needs of the local area.

Comments: A couple of commenters stated that § 678.430(a) potentially conflicts with § 678.305, and suggested that the Departments rephrase it to read: ''Basic career services must be made available in accordance with the methods outlined in § 678.305, at a minimum. . .''

Departments' Response: The Departments disagree, having found, after examination of the text, no conflicting language or intent in these two sections. No changes to the regulatory were made text in response to this comment.

Comments: Another commenter suggested adding ''and recognized postsecondary credentials'' to § 678.430(a)(4)(i)(A) to place additional emphasis on the benefits of such credentials.

Departments' Response: The Departments have not made such a change in the regulatory text, but postsecondary credentials and their importance in the employment environment of a local area will be emphasized by title II and other educational programs.

Comments: One commenter expressed disagreement with § 678.430, asserting that it restricts what WIOA allows. The commenter recommended that States should be permitted to develop guidelines to help local areas determine how to deliver services.

Departments' Response: After consideration, the Departments have not found this section to restrict WIOA's allowances and, in fact, the Departments have determined that § 678.430 is unrestrictive regarding what services a one-stop center may provide to a local area. The list of career services here are

required, but the list should not be read as excluding additional career services that a Local WDB may decide the local area needs. Nothing in this regulation prohibits States from developing guidelines on the deliverance of services, and the Departments encourage States to do so.

Comments: A few commenters requested guidance on how to deliver career services when multiple one-stop partners might provide similar services.

Departments' Response: The coordination among partners over which partner or partners will provide a service at any particular one-stop center or affiliated site is a subject that must be agreed upon and described in the MOU.

Comments: A commenter asked for clarification on the definitions of ''group counseling'' and ''individual counseling.''

Departments' Response: ''Group counseling'' involves two or more participants addressing certain issues, problems, or situations that may be shared by the group members, while ''individual counseling'' is a one-on-one session that may go into greater detail about a particular participant's needs.

Comments: A few commenters recommended that States be given flexibility in determining follow-up time frames and whether follow-up services are appropriate.

Departments' Response: The 12-month time frame requirement for follow-up services to be conducted is established by WIOA sec. 134(c)(2)(A)(iii). No change to the regulatory text was made in this section in response to the comments.

Section 678.435 What are the business services provided through the one-stop delivery system, and how are they provided?

The one-stop delivery system is intended to serve both job seekers and businesses. Similar to job seekers, businesses should have access to a truly one-stop experience in which high quality and professional services are provided across partner programs in a seamless manner. Labor markets are typically regional, but programs often design service delivery strategies around State and local geographic boundaries. Effective business services must be developed in a manner that supports engagement of employers of all sizes in the context of both regional and local economies, but should avoid burdening employers, for example, with multiple uncoordinated points of contact. Section 678.435(a) lists required business services. Section 678.435(b) States that local areas have flexibility to provide services that meet the needs of area businesses and must carry out these activities in accordance with relevant statutory provisions.

Comments: A commenter encouraged the Departments to improve the marketing of one-stop services to employers, because many employers that could benefit substantially from these services are not aware that there are one-stop services available to them.

Departments' Response: While the Departments encourage Local WDBs and one-stop operators to increase efforts to reach out to local business industries and sectors, and to form and foster these relationships and partnerships is required by both the regulations in the section and WIOA, the Departments have determined this is a decision best left up to the Local WDBs. This will ensure that these efforts can be customized to fit the particular employment environment of the local area and remain malleable to the changing employment landscape.

Comments: Several commenters recommended that employers be provided with an individual liaison at the one-stop center.

Departments' Response: Individual liaisons can be an effective mechanism for serving employers. However, each local one-stop center should structure business services to best meet the needs of the employers that they serve; the Departments decline to require that all one-stop centers use this structure, although it may be a best practice that should be encouraged. The Departments also note that the duties of the one-stop operator under § 678.620(a) may include the coordination of service delivery by required one-stop partners and service providers. This could reasonably include interacting with employers on a regular basis to ensure that appropriate service providers are meeting the employers' needs. For these reasons, no change was made to the regulatory text concerning this topic. However, the Departments will continue to engage with business customers to determine the best ways to determine effectiveness in serving employers and to improve those services continuously.

Comments: Several commenters recommended eliminating references to sector partnerships in this section. The commenters asserted that it is important to distinguish between developing and implementing sector partnerships and simply providing career or training services to employers in a particular industry. Further, the commenters said that while sector partnerships are described as a required activity in § 678.435(a), paragraph (c) describes sector partnerships as one of several permissible activities that Local WDBs may undertake. The commenters suggested that the Departments should revise the language to state that Local WDBs should ensure that business services provided at one-stop centers can support sector partnerships in local areas.

Departments' Response: The Departments view the development of industry and sector partnerships as a critical business service that local areas must explicitly provide as required by WIOA sec. 134(c)(1)(A)(v). Regarding the commenters' statements about § 678.435(a) and (c), these paragraphs do not describe the same services. Paragraph (a) refers to ''industry or sector partnerships,'' while paragraph (c)(1) refers to ''industry sector strategies,'' which, as is noted in the regulatory text, could include strategies involving industry partnerships. Because these are separate services and not references to the same or duplicative services, the Departments have concluded that no change to the regulatory text is necessary. Moreover, while it is important for business services provided through one-stop centers to properly support industry sector partnerships, to change the regulatory text to specify this could have the unintended consequence of making this appear as a priority above providing these services to non-partner employers that seek them out.

Comments: One commenter requested additional guidance regarding the implementation of sector partnerships, particularly the role of the convener (*e.g.,* Local WDBs). Another commenter said that the limited instructions in the NPRM regarding sector partnerships might indicate that they are not a high priority and result in delayed implementation.

Departments' Response: The Departments have concluded that the regulatory text does not indicate these sector partnerships are a low priority, but rather the regulatory text indicates that the details of how these partnerships are structured and operate are best left to Local WDBs with agency guidance, as they are in a better position to know the individual needs of a local area.

Comments: The Departments received a number of comments that discussed the types of services that should be available to employers. One commenter suggested that one-stop centers should be able to provide services for employers interested in hiring individuals with disabilities. Another commenter said that the list of services to employers should be expanded to include services that are important for

hiring and retaining employees with disabilities, including ''information on work experience options and tax credits, assistance and information on job accommodations and assistive technologies, and disability awareness training.''

Departments' Response: The Departments have considered the suggestions regarding the types of services that should be available to employers, and have decided to amend the regulatory text to include some, but not all, of the suggestions.

Business services related to job accommodations and assistive technology for individuals with disabilities have been included at § 678.435(b)(4)(vi) to encourage not only these specific practices, but also the provision of other disability hiring services and general disability awareness. Information on local, State, and Federal tax credits is already listed as a possible business service to be provided under § 678.435(c)(6). The Departments do not consider information on work experience options, suggested by the commenter, as a business service and have not added this to § 678.435(c).

Comments: Another commenter also suggested including individuals with disabilities in job fairs and customized recruitment events and expanding the list of services to include assistance on legal requirements and best practices around accommodating individuals with disabilities.

Departments' Response: The Departments recognize the need to provide access to these services. However, the Departments have concluded not to make this addition to this section of the regulation because the Departments have determined that this level of detail is not necessary. All WIOA services are subject to the nondiscrimination requirements of WIOA sec. 188 and its implementing regulations at 29 CFR part 38. Additionally, the Departments have made technical assistance on holding effective and inclusive job fairs available and will continue to provide guidance and resources regarding appropriate accommodations.

Comments: A couple of commenters expressed support for § 678.435 and suggested additional services to employers including metrics, recordkeeping, and data analysis; affirmative action planning and assistance with goal attainment; assessment of employer needs; accessibility reviews; cultural awareness of specific disabilities; mentoring; on-the-job evaluation; and disability management for existing workforces. Another commenter said that businesses could use assistance developing ''position descriptions'' to better define the skills required for positions, as well as assistance locating information on where certifications are awarded.

Departments' Response: While the Departments recognize the advantages of providing these and other services, the Departments also recognize that providing an all-encompassing list of possible business services is an impossibility and would restrict creative thinking about methods of service provision, the encouragement of which is at the heart of WIOA. Because of this, the list of possible business services in the regulation will remain a non-exhaustive list and the Departments made no changes to the regulatory text in response to these comments.

Comments: One commenter recommended that the Departments should clarify their use of the phrase ''labor laws'' to ensure that it is clear this includes all Federal employment discrimination laws.

Departments' Response: The Departments recognize the need for clarity in this language and have revised the regulatory text to include employment and discrimination laws in § 678.435(b)(4)(vii).

Comments: Another commenter suggested that Job Corps should be a required partner in the sector partnerships required in § 678.435(a).

Departments' Response: To fully support the development of sector-based strategies, the Departments are providing States, local areas, and regions with flexibility. The Departments strongly encourage that sector partnerships include a variety of entities, including training and education programs like Job Corps. Given the range of potential partners and the variety of industries and career pathways that may be included in a sector strategy, the Departments are not placing further regulatory requirements around partnerships, but will encourage such partnerships through guidance and technical assistance.

Comments: One commenter asked whether the services provided in § 678.435(b) but conducted by business intermediaries need to be located in the one-stop centers.

Departments' Response: WIOA sec. 134(d)(1)(A) requires that business services, which are listed as a permissible local employment and training activity at WIOA sec. 134(d)(1)(A)(ix), be provided through the one-stop delivery system. No change to the regulatory text was made in response to this comment.

Comments: Another commenter recommended that the Departments clarify in the regulations that it is an allowable activity for local areas to provide business services and develop relationships with the business community that will last beyond a change in one-stop operator or career services provider.

Departments' Response: The Departments encourage Local WDBs to develop strategies to establish and sustain lasting partnerships and provision of business services. These business services may be provided by the Local WDB or through effective business intermediaries working in conjunction with the Local WDB, or through other public and private entities in a manner determined appropriate by the Local WDB and in cooperation with the State, consistent with § 678.435(c). No change has been made to this portion of the regulatory text in response to the comment.

Section 678.440 When may a fee be charged for the business services in this subpart?

WIOA allows customized employer-related services to be provided on a fee-for-service basis. Section 678.440 clarifies that there is no requirement that a fee-for-service be charged to employers. The Local WDBs, however, should examine available resources and assets to determine an appropriate cost structure. These Boards may also provide such services for no fee. The regulatory text was revised to add paragraph (d) to explain that fees earned are program income.

Comments: One commenter expressed support for this section as proposed. Another commenter said that each program should be permitted to determine whether to charge a fee, instead of the Local WDB making that decision.

Departments' Response: After considering this comment, the Departments have concluded that Local WDBs are in the best position to determine what business services are needed in a local area and what fee, if any, should be associated with the provision of these services. The Departments encourage Local WDBs to consult with partner programs when making such decisions, keeping in mind that any fees collected by partners are program income allocable to partner programs in proportion to the partner programs' participation in the activity. In this case, program income must be expended by the partner in accordance with the partner program's authorizing statute, implementing regulations, and Federal cost principles identified in

Uniform Guidance to ensure consistency with program income disbursement requirements. Additionally, the partner must consult its program statute and grant requirements to determine which method to use when disbursing program income as described in the Uniform Guidance at 2 CFR 200.307(e).

Comments: One commenter expressed concern that employer services beyond the provision of no-charge services under the Wagner-Peyser Act have not been discussed.

Departments' Response: Local WDBs are not limited to only those business services discussed in this and other sections. They may also provide other business services that meet the workforce investment needs of area employers. If the Wagner-Peyser Act program provides funds for a business service, a fee cannot be charged. The Departments have concluded that the regulations sufficiently address business services and will not modify the regulatory text in response to this comment. Further joint guidance, however, will be released on this topic.

Comments: A few commenters expressed concern about the prohibition on charging a fee for certain services. These commenters asked whether ''appropriate recruitment and other business services on behalf of employers'' includes activities such as career expos, job fairs, and sector convening events. The commenters said that these events can be quite costly, and suggested that this section state that no fee, above a cost recovery fee, may be charged for services described in § 678.435(a).

Departments' Response: Events such as career expos, job fairs, and sector convening events are not subject to the prohibition on charging fees as they are services provided under § 678.435(b) and (c). For example, Wagner-Peyser Act funds are used for general labor exchanges, but these are limited to situations such as the use of a job board. These larger events are more tailored for employers, for which fee-for-service is allowed. WIOA sec. 134(d)(1)(A)(ix) discusses activities to promote business services and strategies to meet workforce needs of employers, which may be provided on a fee-for-service basis.

4. Memorandum of Understanding for the One-Stop Delivery System (20 CFR Part 678, Subpart C; 34 CFR 361.500 Through 361.510; 34 CFR 463.500 Through 463.510)

This subpart describes the requirements for the MOU between the Local WDB, CEO, and the one-stop partners relating to the operation of the one-stop delivery system in the local area. The Local WDB acts as the convener of MOU negotiations and shapes how local one-stop services are delivered. One comment concerning the extension of existing MOUs to cover one-stop operations in PY 2016 was very pertinent and, as explained below, helped inform the Departments' decision on the implementation of the State funding mechanism, although this decision did not affect the regulatory language in subpart C. As explained in greater detail below, the Departments promulgate this subpart with no substantive changes.

Comments: A commenter suggested that Governors should be permitted to opt out of the MOU requirement if a comparable mechanism already exists and achieves the desired results.

Departments' Response: While the Departments recognize that existing mechanisms may already be in place in many States and local areas, bypassing the WIOA MOU process is not an option, because partner participation in the MOU is required by WIOA sec. 121(b)(1)(A)(iii). Any existing mechanisms will need to be supplanted by the WIOA MOU mechanism.

Section 678.500 What is the Memorandum of Understanding for the one-stop delivery system and what must be included in the Memorandum of Understanding?

Section 678.500 describes what must be included in the MOU executed between the Local WDB, with the agreement of the CEO, and the one-stop partners relating to the operation of the one-stop delivery system in the local area.

Comments: A commenter recommended allowing existing MOUs in place under WIA to extend for the first program year of WIOA to acknowledge the unlikelihood of negotiating MOUs before the deadline.

Departments' Response: The Departments note the first year of implementation for WIOA MOU provisions was PY 2015 (July 1, 2015 to June 30, 2016), which concluded prior to the effective date of these regulations.

Comments: A commenter asked who specifically is supposed to write the MOU and wondered whether they can trust Local WDBs to write their own agreements.

Departments' Response: Neither WIOA nor the regulations address which entity writes the MOU, but § 678.500(a) specifies that the MOU must be a ''product of local discussion and negotiation'' among the Local WDB, chief elected official, and the one-stop partners,'' who all must sign it, according to paragraph (d), and which must include procedures for amending and reviewing it, according to paragraphs (b)(5) and (6). The Departments have determined that these provisions, and those in § 678.510, include adequate safeguards for the drafting of the MOUs, and that specifying a single entity to draft the MOU would be too prescriptive.

Comments: A commenter asked, for single-area States, if the State WDB assumes the MOU negotiation responsibilities, or whether the Governor/mayor assumes these responsibilities.

Departments' Response: WIOA and the regulations do not assign negotiation responsibilities to a single party, and the regulations specify the joint nature of the responsibility among the parties. Therefore, no specific governmental entity is required by these regulations to assume MOU negotiation responsibilities, in single-area States.

Comments: A few commenters supported the inclusion of provisions in this section that would allow one-stop partners to share client data through MOUs and confidentiality agreements.

Departments' Response: WIOA and the regulations are silent on the inclusion of data sharing agreements in the MOU, but the Departments have concluded that the MOU may include such agreements, consistent with all applicable laws and regulations including 34 CFR 361.38 (covering VR program privacy safeguards). No change to the regulatory text was made in response to these comments.

Comments: A commenter said that the regulations should clarify that MOUs must be in accordance with 34 CFR 361.38.

Departments' Response: The Departments agree; MOUs must not contain any provisions that violate the requirements of 34 CFR 361.38, which covers the protection, use, and release of personal information within the VR program. This applies specifically to § 678.500(b)(3), which requires that MOUs include methods for referring individuals between the one-stop operators and partners for appropriate services and activities, as there are specific guidelines to be followed in 34 CFR 361.38(e) regarding the release of participating individuals' information. As there are no specific requirements applying to the sharing of information, but rather only a requirement that the MOU provide the method of referrals from one partner program to another partner program, the Departments are not referencing the requirements of 34 CFR 361.38 in the regulatory text,

although such requirements will be mentioned in guidance released to aid in the implementation of the one-stop delivery system.

Comments: Another commenter said that the MOU should include a specific process to ensure individuals are screened to determine the best set of services to receive at the one-stop center.

Departments' Response: The Departments agree that individuals should receive the services that best meet their needs, but do not agree that the regulations should prescribe a screening process, especially given WIOA's movement away from the sequential delivery of services provided under WIA. The Departments will address this issue in guidance, if necessary, and through technical assistance.

Comments: A few commenters requested additional guidance on MOU requirements, including whether the MOU should address partnerships that do not involve financial commitments, like housing agencies.

Departments' Response: All one-stop partners must be signatories to an MOU, and all must use a portion of their funds to maintain the one-stop delivery system including their proportionate share of one-stop infrastructure costs, whether this is through cash contributions, non-cash contributions, or third-party in-kind contributions. These requirements are covered in much greater detail in subpart E of this part.

Section 678.505 Is there a single Memorandum of Understanding for the local area, or must there be different Memoranda of Understanding between the Local Workforce Development Board and each partner?

Section 678.505 establishes that a Local WDB and one-stop partners may develop a single ''umbrella'' MOU that applies to all partners, or develop separate agreements between the Local WDB and each partner or groups of partners. Under either approach, the MOU requirements described in § 678.500 apply. The Departments encourage States and local areas to use ''umbrella'' MOUs to facilitate transparent, flexible agreements that are not burdensome so that partners may focus upon service delivery.

Comments: One commenter expressed support for the option to utilize an umbrella MOU or individual MOUs with each partner. Another commenter agreed that the umbrella MOU is the best approach, and said that MOUs for all local areas should be in a consistent format. In addition, a commenter asserted that WIOA sec. 121(c)(1) requires each Local WDB to enter into one MOU with all of the partners.

Departments' Response: The Departments interpret sec. 121(c)(1) as permitting a single umbrella MOU that encompasses all partner programs, and the Departments encourage the use of such MOUs, but they are not required. No change to the regulatory text was made in response to this comment. The Departments will provide suggestions about the MOU in guidance and through technical assistance. However, because the MOU is the product of local discussion and negotiation developed by the Local WDB, with the agreement of the chief elected official and the local one-stop partners, which relates solely to the operation of the one-stop delivery system in that particular local area, the determination of an MOU's format is best left to the Local WDBs, as long as the MOU meets the requirements outlined in § 678.500 and any requirements mandated by the State.

Comments: A different commenter expressed opposition to umbrella MOUs, saying that they will result in inaccurate cost allocations and inappropriate service delivery decisions.

Departments' Response: The Departments have determined that there is no reason why umbrella MOUs will be less effective than multiple MOUs in addressing cost allocation and service delivery decisions in most situations. No change to the regulatory text was made in response to this comment.

Comments: A commenter remarked that statewide organizations, such as VR, could have to enter into several dozen MOUs to cover all local areas.

Departments' Response: This is correct. Any program that is a partner in a one-stop center, whether they are a partner in one or more, must sign an MOU with the appropriate Local WDB.

Comments: A commenter suggested that the State WDB and any statewide partners negotiate on a ''mandatory agreement template'' that can be used by Local WDBs in their MOUs with these statewide agencies. Another commenter agreed and supported the development of a standard MOU for use with all Local WDBs.

Departments' Response: While there is nothing to preclude the use of such a strategy, the Departments have determined not to require, encourage, or discourage such a method in order to leave the MOU mechanism as flexible and adaptable to local area situations as possible.

Comments: A commenter said that partner programs operating outside of the workforce area (*e.g.,* INA programs, Job Corps) should not be required to sign MOUs. Rather, the commenter said, these programs should commit to taking referrals from local areas and vice versa.

Departments' Response: If a program is a required one-stop partner under WIOA sec. 121(b)(1) and the corresponding regulations found in subpart B of this part, then that program must sign an MOU with the Local WDB for each local area where it is a partner. According to WIOA sec. 121(b)(1)(A), required partners are limited to those entities that carry out programs or activities in a local area. Likewise, if a program is not required to be a partner but is approved by the Local WDB and CEO as an additional partner, that partner program must sign the respective MOU. The Departments have determined that, as this is required by WIOA, no changes to the regulatory text regarding what entities are required to sign MOUs are necessary.

Section 678.510 How must the Memorandum of Understanding be negotiated?

Section 678.510 describes the collaborative and good-faith approach Local WDBs and partners are expected to use to negotiate MOUs. ''Good-faith'' negotiations may include fully and repeatedly engaging partners, transparently sharing information, and maintaining a shared focus on the needs of the customer. Section 678.510(a) allows Local WDBs, CEOs, and partners to request assistance from a State agency responsible for the program, the Governor, State WDB, or other appropriate parties when negotiating the MOU. The Departments acknowledge that additional guidance and technical assistance will be needed on MOU requirements and negotiating infrastructure funding agreements. The Departments will issue guidance on this topic. Ongoing technical assistance will be made available to the public workforce system as well.

5. One-Stop Operators (20 CFR Part 678, Subpart D; 34 CFR 361.600 Through 361.635; 34 CFR 463.600 Through 463.635)

This subpart addresses the role and selection of one-stop operators. Unlike the other subparts in this Joint WIOA Final Rule, this subpart is administered primarily by DOL. DOL and ED agreed that the subpart should remain in this part of the Joint Rule, so that all of the subparts having to do with one-stop requirements are together. However, unlike the rest of part 678, this portion of the preamble refers mainly to DOL. For this reason, any reference to ''the

Department'' throughout this subpart D discussion is a reference to DOL.

Comments: As noted, the Department received and evaluated numerous public comments on this topic. Several commenters expressed support for the Department's proposal to require competition for one-stop operators, primarily on the grounds that competition leads to better services and outcomes for job seekers. Others raised concerns, as detailed below.

Department's Response: It is the conclusion of the Department that the requirement to use a competitive process for the selection of the one-stop operator is required by statute, as is the requirement for continuous improvement through evaluation of operator performance and regularly scheduled competitions. Competition is intended to promote efficiency and effectiveness of the one-stop operator by regularly examining performance and costs. The Department recognizes the challenges associated with competitive selection, including the additional costs such a process carries with it, the statutory requirement for a competitive process is clear. Additionally, competitive procurement processes are not uncommon in State and local government, and the Department encourages the consideration of methods used by other State and local government entities in streamlining their own process, as well as consideration of State and local procurement laws and the Uniform Guidance. Even with such a reference, however, additional guidance and technical assistance will be needed on MOU requirements and negotiating infrastructure funding agreements. Ongoing guidance and technical assistance will be made available to all parts of the public workforce system as well.

Section 121(d)(2)(A) of WIOA only allows for selection of a one-stop operator through a competitive process. This subpart uses the term ''selection'' of one-stop operator through a competitive process, rather than ''designation'' or ''certification'' to avoid confusion. The competitive process established by this subpart requires States to follow the same policies and procedures they use for procurement from non-Federal funds as allowed under the Uniform Guidance at 2 CFR 200.317. All other non-Federal entities, including subrecipients of a State (such as local areas), are required to use a competitive process based on the procurement standards in the Uniform Guidance set out at 2 CFR 200.318 through 200.326.

Unlike under WIA, there is no ''designation'' or ''certification,'' separate from the competitive selection requirements, of any entity as a one-stop operator, including a Local WDB. For Local WDBs, WIOA imposes an additional step beyond the competitive selection. Section 107(g)(2) of WIOA states that a Local WDB may be designated or certified as a one-stop operator only with the agreement of the CEO in the local area and the Governor. DOL interprets this provision to create an additional requirement for situations in which a Local WDB is selected to be a one-stop operator through the competitive process as required under WIOA sec. 121(d)(2)(A) and as described in this subpart at § 678.605(c). In situations in which the outcome of the competitive selection process is the selection of the Local WDB itself as the one-stop operator, WIOA sec.107(g)(2) requires that the Governor and CEO approve the selection.

The DOL received many public comments regarding the impact of competition on local services. In response to these comments, changes were made to § 678.605, simplifying the language regarding the procedures to be followed in conducting a one-stop operator selection competition. Some minor changes were also made to §§ 678.620 and 678.635 for clarity and consistency.

Section 678.600 Who may operate one-stop centers?

Sections 678.600(a) through (d) describe who may operate a one-stop center. As stated in paragraph (a), WIOA allows a one-stop operator to be a single eligible entity or a consortium of entities. Consortia, like single entities, must be selected through a competitive process. Eligible entities identified in WIOA sec. 121(d)(2)(B). Section 678.600(c)(6) clarifies that a Local WDB, with the approval of the chief elected official and the Governor, may serve as the one-stop operator. Section 678.600(c)(7) clarifies that another interested organization or entity, which is capable of carrying out the duties of the one-stop operator, may serve as the one-stop operator. Section 678.600(d) repeats the requirement in sec. 121(d)(3) of WIOA that elementary schools and secondary schools are not eligible to be one-stop operators; however, nontraditional public secondary schools such as night schools, adult schools, or area career and technical education schools are eligible to be operators.

Section 678.600 states that a one-stop operator may be a single entity or a consortium of entities, and that if a consortium consists of one-stop partners, it must include a minimum of three of the one-stop partners described in § 678.400.

Comments: One commenter stated that these two provisions of § 678.600(a), when taken together, do not make clear whether a single one-stop partner may be a one-stop operator. The commenter further stated that a one-stop operator may be a single one-stop partner, based on WIOA's intent and current practice, but requested that the regulations clarify this point.

Department's Response: The commenter is correct in that a single one-stop partner may serve as a one-stop operator. Paragraph (c) of § 678.600 lists the types of entities that may be selected as the one-stop operator. This repeats the eligible entities from WIOA sec. 121(d)(2)(B), adding paragraph (c)(6) which states that a Local WDB, with the approval of the CEO and the Governor, may serve as a one-stop operator. Paragraph (c)(7) states that an interested organization of any other type that is capable of carrying out the duties of one-stop operator may serve as the operator. A single entity that is also a one-stop partner may serve as operator, but in cases where more than one partner form a consortia to serve as operator, WIOA requires that the consortia contain a minimum of at least three one-stop partners. The Department declines to make any substantive change to the regulatory text and will be issuing guidance on this topic, as well as for competition for one-stop operators.

Comments: A few commenters requested clarification on the phrase, ''practices that create disincentives to providing services to individuals with barriers to employment that may require longer-term career and training services.'' Paragraph (e)(2) requires that State and Local WDBs ensure that one-stop operators do not establish practices that create disincentives to providing services to individuals with barriers to employment who may require longer-term career and training services. One commenter specifically recommended that one such practice that should be ''barred'' is sending older workers to self-service or the Senior Community Services Employment Program, both of which would prevent those workers from being counted in performance evaluations.

Department's Response: The Departments have reiterated throughout the proposed regulations that all individuals with barriers to employment must be fairly evaluated for services, and services are to be made available and accessible in an equitable manner throughout the one-stop delivery system. Local WDBs must ensure that

one-stop operators do not create barriers that limit services to such individuals. WIOA sec. 188 and the corresponding regulations provide guidance on such issues for protected classes.

Comments: A few commenters expressed concern about the selection of certain entities as one-stop operators. For example, one commenter expressed concern that private entity management would not be efficient or cost-effective for rural areas. Further, the commenter stated that a private entity could have difficulty providing quality service to rural areas due to inadequate expertise, models, or knowledge of living and working in such areas.

Department's Response: The final regulations guard against the concerns expressed by the commenters. Section 678.605 requires that the Local WDB is to make the ultimate selection of the one-stop operator based on the principles of full and open competition. A sound competitive process will objectively evaluate bidders' proposals on factors that may consider costs and the ability to meet the needs of the local area.

Comments: A commenter expressed concern that partner infrastructure and one-stop operating costs could be impacted by the profit motivation of a private for-profit entity acting as a one-stop operator.

Department's Response: The Department does not share this concern. Procurement standards under the Uniform Guidance at 2 CFR 200.323(b), require that profit must be negotiated separately from the price in addition to a cost analysis and/or price analysis. Records documenting or detailing the procurement history including the negotiation and analysis of profit must be maintained by all entities (2 CFR 300.318(h)(i)). This provides transparency in the actual operating costs versus profits for any entity, including for-profit entities, selected under a competitive procurement. Section 683.295 of the DOL WIOA Final Rule addresses the earning of profit. WIOA allows private for-profit entities to be one-stop operators (sec. 121(d)(2)(B)(iv)); therefore, the regulations are consistent with WIOA.

Private for-profit entities also are required to adhere to the Uniform Guidance at 2 CFR part 200. DOL's adoption of the Uniform Guidance at 2 CFR 2900.2 expands the definition of 'non-Federal entity' to include 'for-profit' and 'foreign' entities. As such, any private for-profit entity that is a direct grant recipient or subrecipient of a DOL award must adhere to the Uniform Guidance.

Comments: A commenter urged the Departments to provide maximum flexibility and more defined authority to State WDBs to select the one-stop operator. Additionally, the commenter asked what it means to be an operator, how the operator will be paid, and how firewalls and conflicts of interest are defined.

Department's Response: These final regulations provide maximum flexibility to States and local areas in selecting one-stop operators for the one-stop delivery system as long as the competitive process is consistent with the Uniform Guidance at 2 CFR part 200 and/or with State procurement policies. WIOA sec. 121(d)(1) states that Local WDBs select the one-stop operator, but they must have the agreement of the CEO. Governors and CEOs must concur in cases where the Local WDB acts as the operator itself. In single-area States, the State WDB fulfills the requirements of a Local WDB by selecting the one-stop operator. A competitive selection process creates a level playing field where applicants must propose how to respond to the unique needs and requirements set forth by the Local WDB. Competition is the most effective way to ensure that providers can effectively and efficiently serve as one-stop operators. No changes to the regulatory text were made in response to this comment.

Regarding the role of a one-stop operator, § 678.620(a) only requires that the one-stop operator must coordinate the service delivery of required one-stop partners and service providers. A nonexclusive list of other roles that can be assigned to the one-stop operator also exists in paragraph (a) of § 678.620, but the assignment of these or other roles is always at the discretion of the Local WDB.

Comments: One commenter requested clarity regarding who may approve the Local WDB serving as the one-stop operator when the CEO and the Governor are the same individual.

Department's Response: The comment appears to be addressing concerns about the treatment of single-area States. In single-area States and outlying areas where the CEO and Governor are the same individual, the Governor approves the designation of the Local WDB as one-stop operator after the completion of a competitive process. Single area States will follow their own procurement policies per the Uniform Guidance at 2 CFR 200.317. State procurement policies may include additional procurement methods beyond those included in the Uniform Guidance or may allow for a non-competitive selection of a government entity. In cases where there is no competition, the State and State WDB must work together to establish necessary internal controls and firewalls to provide the public with assurances that although a competitive process is not conducted, there is no conflict of interest. The Department will be issuing guidance on this topic and will follow the issuance of guidance with technical assistance.

As stated above, the competitive process applies to both State and locally operated one-stop delivery systems; WIOA is clear that neither Governors nor State WDBs have the sole authority to designate one-stop operators, except under the conditions of a sole source method of procurement as stated in WIOA sec. 123(b). States are expected to conduct a competitive process for the selection of a one-stop operator, with appropriate protections from conflict of interest, per the State's own procurement policies and procedures.

Section 678.605 How is the one-stop operator selected?

Comments on the Proposed Competition Process

DOL examined the comments received and reviewed the statutory provisions upon which this section is based. WIOA made significant changes to the requirements regarding the selection of one-stop operators. As noted in the preamble to the NPRM, unlike the situation under WIA, WIOA sec. 121(d)(2)(A) only allows selection of a one-stop operation to be made through a competitive process.

Comments: A number of commenters generally questioned the complexities and specificities of the process described in the NPRM.

Department's Response: After considering those comments, the Department has revised the regulatory text by deleting much of the specific contract-related language in the proposed regulations as applied to non-Federal entities other than States. The language now more generally requires that those entities follow the competitive process in accordance with local policies and procedures and the principles of competitive procurement in the Uniform Guidance at 2 CFR 200.318 through 200.326. This provides maximum flexibility in implementing the competition requirement. Furthermore, as noted in revised paragraph (c) of § 678.605, any reference to ''noncompetitive proposals'' in the Uniform Guidance should be read as ''sole source selection'' for the purposes of § 678.605(c).

The competitive selection process permits more than one method of procurement, and procurement options are outlined in the Uniform Guidance at 2 CFR 300.320. Discussions based on comments made evident that there are many different methods of procurement used appropriately throughout the public workforce system. Moreover, such methods are generally based on the Uniform Guidance when Federal funds are involved. The Department has determined that it is unnecessary to be overly prescriptive in defining the methods of procurement in these regulations. It is the intention of the Department to provide extensive guidance and technical assistance on acceptable methods of procurement, using the Uniform Guidance as a basis. The Department responds to specific substantive public comments on this topic in the remainder of this Final Rule preamble section.

Comments: Many commenters suggested that existing one-stop operators that are performing well should be grandfathered into WIOA and permitted to continue operating without competitive procurement, which would reduce the burden of the competitive process and ensure continued system stability during the transition to WIOA. Some of the commenters further recommended that Local WDBs and CEOs should have the authority to waive the competitive procurement process after 4 years based on performance and accountability and only conduct a competitive procurement if their evaluations determine it is warranted.

Department's Response: The requirement in WIOA to use a competitive process for the selection of the one-stop operator is an unequivocal statutory requirement, which is clearly set out in WIOA sec. 121(d)(2)(A). Because of this statutory requirement, the competitive selection process for one-stop operators in all local areas cannot be waived. No changes to the regulatory text were made in response to these comments. Past performance, however, is an evaluation factor that may be considered in the competitive process, potentially giving weight to those bidders demonstrating successful performance as a one-stop operator.

Comments: A commenter stated that requiring competitive procurement for its one-stop operators would be detrimental to the State's workforce because any new operator would have to invest in new infrastructure, which would take time and money away from implementing programs. Further, this commenter stated that the existing State employees, who are unionized, could be laid off if new operators were selected.

Department's Response: Costs and burdens placed on the one-stop delivery system by the selection of a new one-stop operator is one of many factors that may be taken into account by a Local WDB or State WDB under the terms of the competitive selection process. Other factors may include, but are not limited to, performance results, performance results by targeted population, certification results, and price. Single-area States will follow their own procurement process per the Uniform Guidance at 2 CFR 200.317. State procurement policies may include additional procurement methods beyond those included in the Uniform Guidance, including sole source procurement. In appropriate instances, the State and State WDB must work together to establish necessary internal controls and firewalls to provide the public with assurances that there are no conflicts of interest. Further, the Department hopes that any disruption to existing public workforce system employees will be limited under the new competitive procurement policies. However, the Department is also confident that the intent of Congress in these provisions was to increase competition among the publicly funded WIOA programs. The implications of collective bargaining agreements will have to be taken into consideration within the provisions of State or Federal procurement and other legal requirements. As such, no changes were made to the regulatory text in response to this comment.

Comments: A few commenters suggested that sole sourcing should be permitted when a public agency is selected as the one-stop operator, reasoning that a competitive process would disrupt delivery of workforce services to job seekers and employers. Another commenter urged that rural areas should be exempt from the competitive process, while a different commenter recommended that single-area States should be exempt from the competitive process.

Department's Response: As stated above, sole source selection is allowable as long as the situation falls within the guidelines and requisite conditions of State and local procurement policies and procedures and the conditions outlined in the Uniform Guidance. The Local WDB must be able to demonstrate that it conducted sufficient market research and outreach to justify sole source selection. No change to the regulatory text was made in response to these comments.

Comments: Some commenters stated that requiring a competitive process would divert resources away from delivery of services.

Department's Response: While the Department recognizes the challenges associated with competitive selection, including the additional costs, the statutory requirement for a competitive process for selection of a one-stop operator is clear. Additionally, competitive procurement processes are not uncommon in State and local government, and the Department encourages the consideration of methods used by other State and local government entities in streamlining their own processes, as well as State and local procurement laws and the Uniform Guidance. No change was made to the regulatory text in response to these comments.

Comments: A commenter recommended that the regulations permit Local WDB personnel to staff one-stop operators and service providers, with the agreement of the CEO and Governor, which would provide more flexibility to the CEO to determine the most efficient and effective one-stop delivery system for their area.

Department's Response: The Department has determined that such staffing is allowable, as long as the Local WDB is selected in accordance with the requirements of the regulations and proper firewalls are in place. As the commenter noted, in such circumstances the agreement of the Governor and CEO is required as an additional step in the approval of the Board as the one-stop operator.

Comments: One commenter recommended that if there is no cost associated with the selection of a consortium as a one-stop operator, there should be no competition.

Department's Response: As noted, WIOA imposes the requirement of a competitive process. The fact that a particular entity, such as the consortium mentioned by the commenter, would be at no cost, however, might be taken into account by the Local WDB under the terms of the selection.

Comments: Several commenters disagreed with the Department's interpretation of the relationship between WIOA secs. 107(g)(2) and 121(d)(2)(A). The commenters asserted that WIOA sec. 107(g)(2), which states that a Local WDB may be designated or certified as a one-stop operator only with the agreement of the CEO and the Governor, is a separate and unrelated provision from WIOA sec. 121(d)(2)(A), which requires a competitive selection process for the one-stop operator. They

suggested that a Local WDB can be designated as a one-stop operator solely under WIOA sec. 107(g)(2), without having to undergo the competitive process described in WIOA sec. 121(d)(2)(A).

Department's Response: The Departments received and evaluated numerous public comments on this topic. It is the conclusion of the Departments that the requirement to use a competitive process for the selection of the one-stop operator is required by statute, as is the requirement for continuous improvement through evaluation of operator performance and regularly scheduled competitions. Competition is intended to promote efficiency and effectiveness of the one-stop operator by regularly examining performance and costs.

The relationship between these two provisions of WIOA was duly noted and considered by the Departments. After extensive consideration, the Departments have not changed their interpretation of the relationship between WIOA secs. 107(g)(2) and 121(d)(2)(A) as providing that a Local WDB may be designated or certified as a one-stop operator, with the agreement of the CEO and the Governor, only after being selected through a competitive process for the one-stop operator. In the Departments' view, the two provisions read together implement Congress' emphasis on increasing competition among the publicly funded WIOA programs, while also giving the CEO and the Governor the flexibility to approve the competitive selection of a Local WDB as a one-stop operator. The Departments read sec. 121(d)(2)(A) as establishing the governing requirement for competitive selection of one-stop operators with sec. 107(g)(2) imposing an additional requirement when the competitive process results in the selection of the Local WDB. No change to the regulatory text was made in response to these comments.

Comments: A few commenters also stated that the Governor should have the authority to designate the one-stop operator in single-area States or States that have a statewide planning region.

Department's Response: All areas, even single-area States, must use a competitive process to determine the one-stop operator by following the Uniform Guidance and State procurement procedures. Sole source selection is available but only if the applicable conditions exist under the State procurement policies and procedures. No change to the regulatory text was made in response to these comments.

Comments: One commenter also recommended that the Department establish a workgroup of single-area States to provide advice for the Final Rule.

Department's Response: Because of the extensive participation of stakeholders, including single-area States and representatives of State governments in the development of the NPRM and in the opportunity to comment on the NPRM before issuance of this Final Rule, the Department determined that it is not necessary to establish a separate workgroup, although workgroups aimed at serving other purposes may still be established.

Comments: Several commenters described potential issues that could arise from a mandate for competitive procurements. They said that there could be: (1) Issues with organized labor representing local workers; (2) delays in service due to staff time being spent on the procurement process; (3) CEOs, who have liability for funding who are unable to choose the best solution for their local area; and (4) loss of local control. A few commenters suggested that requiring competition would increase the liability of the CEO, contribute to loss of local control, and increase the overall cost of operation by dismantling existing, efficient systems that utilize leveraged funding.

Department's Response: The Department is required by WIOA sec. 121(d)(2)(A) to mandate competitive selection of one-stop operators and cannot waive that requirement. Local WDBs should evaluate risk during all stages of the competitive selection process. Leveraged funding or a pledge for matching funds may be considered as a scoring factor when evaluating bidders' proposals for one-stop operator selection, if the solicitation describes how such scoring will be awarded. By following the Uniform Guidance, any such liability of CEOs is mitigated by corresponding protections in the eventual contract. Additionally, the Department encourages Local WDBs to work with local partners and one-stop operators to use innovative and creative ways of mitigating these issues. No change to the regulatory text was made in response to these comments.

Comments: A commenter remarked that while there are likely situations in which there is cause to procure one-stop operators competitively, it is not always the case that Local WDBs are unable to oversee the local workforce system while also serving as the one-stop operator.

Department's Response: The Department agrees, as did Congress. WIOA allows Local WDBs to serve as a one-stop operator with the concurrence of the CEO and the Governor, if the Board is selected under a competitive process as provided in the Final Rule. No change to the regulatory text was made in response to this comment.

Comments: A few commenters asked for clarification on whether the rule for competitive bidding is applied only at the regional or State sub-area level (such as a workforce development area), or if it also applies to operators who are site managers of one-stop sites.

Department's Response: The requirements for the competitive selection of one-stop operators under WIOA would apply only to those procurements carried out by State or Local WDBs. All direct grant recipients and subrecipients of a Federal award must adhere to the procurement standards found in the Uniform Guidance. No change to the regulatory text was made in response to these comments.

Comments: Several commenters expressed concerns about the financial impact of requiring Local WDBs to conduct competitive procurements, as this would be a new cost that could significantly impact limits on administrative costs. A few commenters also asserted that the proposed process of essentially vetting possible candidates prior to issuing a RFP is costly and repetitive. Some commenters said that having a one-stop operator at all is not cost effective.

Department's Response: The Department recognizes that there is a cost burden associated with conducting competitive procurements. Both WIOA and the Uniform Guidance encourage efficiencies in administrative operations through streamlining of services or building from an existing network of services. To the maximum extent practical, the Department encourages States and local areas to leverage their administrative support for procurement to reduce burden.

Comments: A few commenters stated that Congress was intentional in requiring one-stop operators to be selected through a competitive process. These commenters suggested that the Final Rule should not allow contracts to be awarded to entities who then subcontract the work back to State or local agencies on a noncompetitive basis.

Department's Response: The Department agrees that the requirement of using a competitive process for the selection of the one-stop operator cannot be subverted by subcontracting the position of one-stop operator on a noncompetitive basis. By aligning the one-stop operator competitive process

with the procurement requirements in the Uniform Guidance, there are stringent conflicts of interest and documentation requirements that will also apply to one-stop operator competitions. The Uniform Guidance requirements also apply to the award of subcontracts. Application of the Uniform Guidance requirements will ensure the integrity of the process. For this reason, the Department sees no need to change the regulatory language in response to this comment.

Comments: A few commenters also said that the regulations should clarify that one-stop service providers must also be competitively procured. One commenter recommended that the final regulations should ensure that either the adult and dislocated worker service provider is also required to perform the responsibilities of the one-stop operator, and the Local WDB must hold a competition to procure a provider to fill this mixed role; or, if operator and service provider contracts are bid separately, an entity must be allowed to compete for and perform both roles. The commenter went on to recommend that Local WDBs should be required to bid every contract competitively, or request letters of intent at a minimum, and only select an operator through a noncompetitive method if there are no qualified candidates.

Department's Response: The competitive processes outlined in the Uniform Guidance are applicable to procurement transactions with a contractor and not to a sub-awardee such as an adult or dislocated workers service provider. It is when WIOA requires competitive procurement process such as with the one-stop operators and youth service providers that States and Local WDBs must adhere to such requirements.

Comments: A commenter stated that there are competitive selection processes available other than those listed in the proposed regulations. The commenter suggested that invitations to negotiate, professional services solicitations, and other approaches that emphasize performance over price should be considered. Another commenter requested clarity regarding whether ''competitive process'' requires an RFP. They recommended that ''competitive process'' be defined to include all methods permitted under State procurement laws.

Department's Response: The commenters are correct in stating that a variety of competitive selection processes exist within approved procurement practices. As a result, the regulatory text has been changed from what was proposed in the NPRM to allow for greater flexibility in defining the competitive process to be followed by non-Federal entities other than States. The regulations now state that where States are engaging in a competitive process, competitions should be based on the State procurement policies as defined in State administrative procedures and should be the same process used for procurement with non-Federal funds. The policies and procedures may encompass many of the areas suggested by the commenters. The regulations also state that where local areas or Local WDBs are engaging in a competitive process, competitions should be based on the local procurement policies as defined in local administrative procedures that must be consistent with all provisions of the Uniform Guidance. The policies and procedures may encompass many of the areas suggested by the commenters. All other entity types follow the Uniform Guidance requirements for procurement, which also contain flexibility in procurement methods, as well as the type of contract vehicle used. For example, the Uniform Guidance does permit sole source as a method of procurement under certain conditions. It was determined to be unnecessary for the Department to be overly prescriptive in defining the methods of procurement in these regulations.

The Department has determined that this approach provides sufficient flexibility to enable a range of operators, including current one-stop operators, State agencies, Local WDBs, or consortia of required partners to be selected under a competitive process as one-stop operators.

Comments: Another commenter asked for clarification on whether ''selection'' is the same as ''procurement,'' and whether the selection of a one-stop operator is always ''procurement,'' and which parts of the Uniform Guidance apply to such a selection process.

Department's Response: While selection is typically understood as being a part of the procurement process—which typically goes through a series of phases that may include planning, evaluation, negotiation, selection, implementation and closeout—when discussing WIOA one-stop operators in this Final Rule, selection refers to the competitive process by which one-stop operators are chosen. This process may involve a number of methods of procurement as they are described in the Uniform Guidance. The Uniform Guidance describes the process and methods that must be followed to conduct procurement.

Comments: The commenter further stated that the solicitation announcements need to reach a minimum number of vendors to ensure a variety of capable vendors have the ability to bid. In addition, the commenter suggested that selection of one-stop operators should include the ability to serve linguistically and culturally diverse participants.

Department's Response: The Department declines to change the regulatory text in response to this comment. Determining the number of vendors is best left to the Local WDB, based on the needs identified in the local area. Typically, two or more vendors or bidders would be adequate in meeting the minimum requirement of competition, which may already be specified in the State procurement process.

Comments: Another commenter asked how providers of career services are selected. The commenter also asked whether this must involve a competitive process.

Department's Response: Career services are provided by the various partner programs participating in the one-stop center, the details of which are set out and agreed upon in the MOU. As mentioned above, these partners are not required to be procured in a competitive process under WIOA, but they may be under State or local procurement policies.

Comments: Other commenters stated that the Governor should be allowed to recommend the RFP process for their State.

Department's Response: The Governor, in consultation with the State WDB and chief elected official does have the authority under these regulations to choose the type of RFP process for their State that is consistent with State policy and the Uniform Guidance. No change to the regulatory was made text in response to these comments.

Comments: A few commenters requested additional guidance on how a WDB could compete in the procurement process, either alone or as part of a consortium. Another commenter asked if, in single-area States, the State WDB assumes the responsibilities in WIOA sec. 107(d)(10)(A), or if the Governor is authorized to identify a State entity to conduct the competition.

Department's Response: As noted, the Department has revised the regulatory text to allow greater flexibility in defining the competition process for non-Federal entities other than a State, deleting much of the language related to specific procurement methods in the proposed regulations. The Department

provides this flexibility because, as it became apparent through the discussion of comments, there are many different methods of procurement throughout the public workforce system, which are generally based on the Uniform Guidance when Federal funds are involved and which the Department would consider sufficient to meet the requirement for competitive selection of the one-stop operator. It was unnecessary for the Department to be overly prescriptive in defining the methods of procurement in these regulations, and provisions of proposed § 678.605(c) prescribing certain methods have been removed.

Length of Time Required Between Competitions

Comments: A few commenters addressed the Department's question seeking comments regarding the length of time required between competitions for one-stop operators. In particular, a few commenters recommended that the timelines should be determined by States. Other commenters stated that 4 years, as proposed in the NPRM, is appropriate. A few commenters agreed that 4 years between competitions is appropriate, but they suggested that there be an option to extend additional years if performance expectations are met or exceeded. A few commenters suggested allowing more flexibility for States regarding the length of contracts, such as providing guidance that recommends contracts of 3 to 5 years, or allowing the award of 5-year contracts that have an initial base year followed by 4 option years that can be executed if the operator is performing well. A few commenters recommended 6 years between competitions, as that timeline would align with two 3-year certification periods for one-stop operators. Another commenter suggested that local areas should be permitted to extend an operator's contract once by 2 years to reward high performance.

Department's Response: After considering these comments and recommendations, the Department decided to retain the period of 4 years as it is consistent with the other time periods contained in WIOA for resubmission of State Plans as well as re-certification of one-stop centers. The Department has determined that there is not a sufficient reason to shorten this period to 3 years, extend it beyond 4 years, or to leave the timeline determination to individual States. Instead, maintaining the proposed 4 years between competitions is consistent with WIOA's goals of a periodic reexamination of local plans and supporting successfully performing one-stop centers.

Comments: A commenter remarked that, given the timelines for competitive procurement and certification criteria updates, both processes will be conducted simultaneously every 12th year. The commenter suggested that the Department adjust these timelines to be event-driven, rather than simply time dependent.

Department's Response: While the Department recognizes the difficulties that the timing may cause, after considering the comments and suggested changes, the Department concluded that leaving these processes on set timelines, as opposed to event-driven timelines, is the best way to insure integrity in the process and will reap the best outcomes for the one-stop delivery system. As such, the Department has made no changes to the regulatory text in response to this comment. Guidance and technical assistance on this section regarding competition will be made available to all parts of the public workforce system.

Section 678.610 When is the sole-source selection of one-stop operators appropriate, and how is it conducted?

Section 678.610 explains when and how sole-source selection of one-stop operators is appropriate as a part of a competitive procurement process. The text has been changed from the NPRM to delete the references to the specific acceptable processes in proposed § 678.605(d)(3) and to indicate that State and local entities must follow their own procurement rules in addition to the Uniform Guidance, as appropriate. It also includes requirements about maintaining written documentation regarding the entire selection process, and developing appropriate conflict of interest policies. It states that a Local WDB may be selected as one-stop operator through sole source procurement only with the agreement of the CEO in the local area and the Governor. The Governor must approve the conflict of interest policies and procedures the Local WDB has in place when also serving as the one-stop operator. This is consistent with the Departments' interpretation of sec. 107(g)(2) of WIOA—the section adds an additional check in situations where a Local WDB is selected to be operator.

Comments: Several commenters recommended allowing the Governor to designate the one-stop operator when the State is a single-area State, particularly if the State has a history of meeting performance standards. Several commenters also recommended allowing CEOs to designate the one-stop operator without a competitive process so as not to interrupt program continuity, particularly if the operator is already performing well.

Department's Response: WIOA requires the selection of one-stop operators through a competitive process. The Governor or CEOs may not designate an operator without a competitive process. No change to the regulatory text was made in response to these comments. It is possible for the Governor to select an organization, such as the State WDB, by sole source selection after a competitive process. Otherwise, Local WDBs are responsible for conducting a competitive process to select a one-stop operator, which must also be consistent with the Uniform Guidance. The Department encourages Local WDBs to plan for the competitive process and allow for transition time to minimize any disruption and ensure program continuity. Local WDBs can be selected as one-stop operator through sole source procurement only with the agreement of the CEO in the local area and the Governor. Under § 678.610(d), the Governor must approve the conflict of interest policies and procedures that the Local WDB has in place when also serving as one-stop operator. This is consistent with DOL's interpretation of WIOA sec. 107(g)(2)—the section adds an additional check in the situations where a Local WDB is selected to be operator.

Comments: One commenter also suggested that local areas already operating under a consortia model with demonstrated success be permitted to be sole sourced. Another commenter stated that very large, complex local areas should be able to sole source a ''system operator'' provided that the individual one-stop operators are procured through a competitive process.

Department's Response: While WIOA requires selection of the one-stop operator through a competitive process, under the Uniform Guidance there is the flexibility for sole source as a method of procurement; however, there are conditions that must be met to allow for sole source selection. The Local WDB must be able to demonstrate it conducted sufficient market research and outreach to make that determination. Additionally, § 678.615(b) and (c) require robust conflict of interest policies and procedures as well as internal firewalls within the State agency to address the real and perceived conflicts of interest that could arise for a State or local agency applying to a competition run by a Local WDB.

The Department notes that this section is particularly relevant to the

first competitions that are conducted after these regulations are promulgated for one-stop operators. With appropriate firewalls and conflict of interest policies and procedures to provide a fair and open competitive process, entities serving as one-stop operators at the time these regulations are promulgated, including Local WDBs and other current one-stop operators, may compete and be selected as operator under the competition requirements in this subpart if they are able to do so under applicable procurement policies and procedures. However, appropriate firewalls must be in place to ensure that the current operator is not involved in conducting the competitive process, as that would be an inherent conflict of interest. No change to the regulatory text was made in response to this comment.

Comments: A commenter stated that the Department should reconcile §§ 678.610 through 678.625 with 20 CFR 679.410 to ensure that both one-stop operations and career services are awarded competitively. The commenter provided one exception to this rule: that the Governor and CEO agree that there are insufficient providers available for a competition.

Department's Response: WIOA does not link one-stop operator competition with competition for career services providers. That decision is left to the State and/or Local WDB, and the Department declines to require this by regulation. Competitions for certain types of services are neither expressly prohibited nor required by WIOA. State and Local WDBs are in the best position to determine how extensively to require service provider competitions in their respective areas.

Section 678.615 May an entity currently serving as one-stop operator compete to be a one-stop operator under the procurement requirements of this subpart?

Section 678.615(a) states that Local Boards may compete for and be selected as one-stop operators, as long as appropriate firewalls and conflict of interest policies and procedures are in place. Section 678.615(b) allows State or local agencies to compete for, and be selected as, one-stop operators. However, there must also be strong firewalls, internal controls, and conflict of interest policies and procedures in place.

Comments: A few commenters stated that they interpret the Uniform Guidance on conflict of interest to mean simply that the specifications and requirements for the procurement must be drawn up by a neutral third-party, and that Local and State WDB members can take part in the selection, award, or administration of the one-stop operator contract so long as no member will see an increase in pay or benefits upon award of the contract.

Department's Response: Competitions must be undertaken pursuant to § 678.605. States are required to follow the same policies and procedures used for procurement with non-Federal funds while other non-Federal entities are required to follow local procurement policies and procedures and the requirements in the Uniform Guidance at 2 CFR 200.318 through 200.326. These policies and procedures may allow or require many of the commenter's suggestions. For example, the Uniform Guidance does permit sole source as a method of procurement under certain conditions. The Local WDB must be able to demonstrate it conducted sufficient market research and outreach to make that determination. With appropriate firewalls and conflict of interest policies and procedures to provide a fair and open competitive process, entities serving as one-stop operators at the time these regulations are promulgated, including Local WDBs and other current one-stop operators, may compete and be selected as operator under the competition requirements in this subpart if they are able to do so under the relevant procurement policies and procedures. In the alternative, they may be selected under appropriate sole source processes. However, appropriate firewalls must be in place to provide that the current operator is not involved in conducting the competitive process, as that would be an inherent conflict of interest.

The Department wants to make clear that this approach provides sufficient flexibility to enable a range of operators to compete and be selected, including current one-stop operators, State agencies, Local WDBs, or consortia of required partners.

Comments: Several commenters also asserted that effective firewalls, internal controls, and conflict of interest policies already exist in the workforce development system and have been reviewed by the States and DOL.

Department's Response: While the Department agrees that some effective firewalls, internal controls, and conflict of interest policies already exist in the workforce development system, no change to the regulatory text was made in response to this comment. The procurement standard in the Uniform Guidance provides guidance on written codes of conduct covering real, apparent, and organizational conflicts of interest for persons involved in the procurement process.

Comments: One commenter stated that one-stop operators can be staffed by Local WDBs as long as firewalls and conflict of interest policies are in place, which can include a WDB/CEO agreement with organizational charts.

Department's Response: The Department agrees that, as long as the requisite firewalls and conflict of interest policies and procedures are in place, a Local WDB can compete to fill the one-stop operator position. To be placed in this position, of course, the Local WDB must win the competition and then be approved by the Governor and CEO. While such agreements and organizational charts are a useful tool to define firewalls, proper firewalls must go beyond these tools.

Comments: One commenter asked the Department to define the term ''firewall'' as it relates to this section. A group of Federal elected officials urged the Departments to establish strong organizational conflict of interest provisions in the Final Rule to ensure fair competition.

Department's Response: The Department has determined that the Uniform Guidance, used in concert with State procurement procedures, establishes adequate standards for conflict of interest policies. Also, § 678.615(b) and (c) require robust conflict of interest policies, as well as internal firewalls within the State agency, to address the real and apparent conflicts of interest that could arise for a State or local agency applying to a competition run by a Local WDB. In order to ensure flexibility for State and local entities in designing one-stop delivery systems, the Department declines to define these terms further in the final regulations.

Comments: A few commenters said that they do not believe it is possible for a sufficient firewall to be established to eliminate a real or apparent conflict of interest when a Local WDB competes to be a one-stop operator. Even if an alternate entity were involved in developing the procurement requirements, according to these commenters, the Local WDB would still need to be involved in developing and approving them. Other commenters agreed and requested that single-area States be granted flexibility on, and waivers of, this provision. Two commenters asserted that in small States where there is very little competition (*e.g.*, a one-stop operator may also be a service provider), it is not cost effective to implement firewalls.

Department's Response: While the Uniform Guidance does provide

flexibility, some State and local procurement policies may prevent a Local WDB from competing under an RFP if it is not possible to establish a sufficient firewall to avoid a real or apparent conflict of interest. The Department declines to revise § 678.615 to provide for a waiver or other flexibility concerning the requirement for firewalls and conflict of interest policies and procedures because avoiding a real or apparent conflict of interest is essential to a fair competitive process. The Department encourages States and local areas to review their procurement policies and procedures to ensure that they are consistent and contain appropriate firewalls and conflict of interest policies and procedures to provide a fair and open competitive process.

Comments: A few commenters suggested that because the Governor has the authority, in agreement with the CEO, to select the Local WDB as the one-stop operator, firewalls and conflict of interest policies are not necessary. Another commenter agreed with this suggestion, adding that firewalls and conflict of interest policies are not necessary because the CEO would have oversight responsibilities.

Department's Response: The Department disagrees. The Uniform Guidance, where applicable, calls for a written code of conduct policy that includes real, apparent, and organizational conflict of interest procedures to provide a fair and open competitive process. Entities serving as one-stop operators at the time these regulations are promulgated, including States, Local WDBs, and other current one-stop operators, may compete and be selected as the operator under the competition requirements in this subpart, if allowable under applicable procurement policies and procedures. Appropriate firewalls, however, must be in place to ensure that the current operator is not involved in conducting the competitive process, as that would be an inherent conflict of interest. Such firewalls pertain to the elected leadership of the State or local area as well as to the Boards. The Uniform Guidance, where applicable, and § 678.615(b) and (c) require robust conflict of interest policies that will create internal firewalls within the State agency to address the real and perceived conflicts of interest that could arise when a State or local agency applies to a competition run by a Local WDB. No change to the regulatory text was made in response to these comments.

Comments: One commenter expressed support for the Department's requirement to establish appropriate firewalls and internal controls.

Section 678.620 What is the one-stop operator's role?

Section 678.620(a) describes the role of the one-stop operator without prescribing a specific and uniform role across the system. The minimum role that an operator must perform is coordination of all one-stop partners and service providers.

A change was made to this section for clarity. The regulatory text was revised to modify the list of potential roles for the one-stop operator, as chosen by the Local WDB, changing it from ''coordinating service providers within the center and across the one-stop system . . .'' to ''coordinating service providers across the one-stop delivery system.''

Comments: Several commenters addressed the Department's question regarding whether all of the functions listed in proposed § 678.620(b) are accurately described as inherently the responsibility of the Local WDB. Some commenters agreed that all of these items are inherently the responsibility of the Local WDB. One commenter stated that some of the Local WDB responsibilities may have changed or been devolved to the operator or fiscal agent as the one-stop delivery system has evolved under WIA. A Local WDB recommended that the Department remove this paragraph because it adds confusion, particularly when the Local WDB or fiscal agent is also the one-stop operator. The commenter suggested that CEOs should be responsible for determining who is responsible for each function. Another commenter also stated that, rather than prohibiting certain actions, the NPRM should provide guidance to operators regarding how to deal with conflicting responsibilities. The commenter stated that this is particularly necessary for small States and single area States where agencies serve multiple roles in the system.

Department's Response: The Department considers these provisions necessary and consistent with WIOA. The Department is aware that the requirements related to formally procuring the one-stop operator may be new in many areas, and that the roles and responsibilities for Boards, operators, and service providers under WIOA may differ from those under WIA. Some roles will continue and others will be modified in response to the new requirements and vision presented by WIOA. Transitioning to a new, more integrated system of service under WIOA will take time and technical assistance from all agencies involved. Some guidance is already available to the system in the form of TEGLs on a variety of subjects, such as ''*Workforce Innovation and Opportunity Act Transition Authority for Immediate Implementation of Governance Provisions*'' (TEGL No. 27–14), ''*Vision for the Workforce System and Initial Implementation of the Workforce Innovation and Opportunity Act*'' (TEGL No. 4–15), ''*Guidance on Services Provided through the Adult and Dislocated Worker Program under the Workforce Innovation and Opportunity Act (WIOA or Opportunity Act) and Wagner Peyser, as Amended by WIOA, and Guidance for the Transition to WIOA Services*'' (TEGL No. 3–15), and ''*Workforce Innovation and Opportunity Act (WIOA) Youth Program Transition*'' (TEGL Nos. 23–14 and 8–15), among others, which can be found at *http://wdr.doleta.gov/directives/All_WIOA_Related_Advisories.cfm*.

Furthermore, WIOA does not permit CEOs to be solely responsible for selecting who carries out each function of a one-stop center; this is something to be set forth in the MOU, as agreed upon by all the local partners and the Local WDB. No change to the regulatory text was made in response to these comments.

Comments: Several commenters stated that the requirement in § 678.620(b) that one-stop operators establish firewalls and conflict of interest policies if they are also a service provider implies that the organization's head would need to establish firewalls between himself and his own staff who are delivering services.

Department's Response: The Department would like to stress that there must be appropriate firewalls between staff providing services and staff responsible for oversight and monitoring of services. The same person or department cannot both provide services and oversee the provision of those services. This may require examination of the organizational structure of a State or local system to ensure that adequate firewalls are in place to ensure appropriate oversight and monitoring of services. Because the WIA system operated under similar internal controls for nearly 2 decades, the Department does not anticipate that the WIOA requirements regarding firewalls, conflict of interest policies, and procurement procedures will be major obstacles to WIOA implementation. The Department also has determined that the provisions of the Uniform Guidance at 2 CFR part 200 sufficiently address these issues. No

change to the regulatory text was made in response to these comments.

Comments: Commenters also asked whether, if the organization that wins the one-stop operator competition is not also the WIOA title I service provider, there would have to be another competition for this service provider and thus another level of administration.

Department's Response: The Department has concluded that State and Local WDBs are in the best position to determine how extensively to require service provider competitions in their respective areas, and the Department encourages States and local areas to review their procurement policies and procedures against the Uniform Guidance to ensure that they are consistent and contain appropriate conflict of interest policies and procedures to provide a fair and open competitive process.

Comments: A commenter suggested that when there is a potential conflict of interest, the State WDB should be required to certify those one-stop centers. Another commenter asked how one-stop operators will be audited to ensure that internal controls are utilized.

Department's Response: The State sets the criteria for certification of one-stop centers, and Federal representatives and State agencies will continue to monitor the entire public workforce system under WIOA. As part of such monitoring and oversight responsibilities, States and Federal representatives will review an entity's compliance with the Uniform Guidance, the soundness of its internal controls, and its internal control framework. Further, States and local agencies are audited either independently or under a State's comprehensive audit on an annual or biannual basis, which includes an examination of the State and local agencies' internal controls and internal controls framework. No change to the regulatory text was made in response to this comment.

Comments: One commenter said that there was not enough clarity regarding staff oversight in one-stop centers. The commenter asked who is responsible for performance outcomes and operations when there are Combined Plan partners, and also, that CEOs be permitted to make this determination. Another commenter agreed that Governors should be able to determine appropriate roles for one-stop operators and Boards.

Department's Response: Some operating guidance on this subject has already been released in TEGL No. 27–14 (''*Workforce Innovation and Opportunity Act Transition Authority for Immediate Implementation of Governance Provisions*''), and much more is in development, especially around performance outcomes of Combined State Plan partners. The Department presumes that staff oversight and other roles and responsibilities of WDBs and operators will be set in each State and local area by the WDB, in accordance with guidance provided by the Department, the Governor, and the provisions of the Uniform Guidance in 2 CFR part 200 regarding the use of Federal funds. There must be appropriate firewalls between staff providing services and staff responsible for oversight and monitoring of services; however to ensure this, the Department has concluded that additional regulatory language is not required. Having proper firewalls in place will ensure that the same person or department does not oversee its own provision of services. This may require examination of the organizational structure of an organization to ensure that adequate firewalls are in place to ensure appropriate oversight and monitoring of services. No change to the regulatory text was made in response to these comments.

Comments: A few commenters requested clarification of the term ''another capacity'' in § 678.620(b).

Department's Response: The text from § 678.620(b) in the NPRM reads, in part, ''[a]n entity serving as a one-stop operator may perform some or all of these functions if it also serves in another capacity, if it has established sufficient firewalls and conflict of interest policies. The policies must conform to the specifications in 20 CFR 679.430 of this chapter for demonstrating internal controls and preventing conflict of interest.'' The Department has clarified this language, which now refers to ''acting in its other role,'' instead of ''serves in another capacity.'' As revised, § 678.620(b) now reads, ''An entity serving as a one-stop operator, that also serves a different role within the one-stop delivery system, may perform some or all of these functions when it is acting in its other role, if it has established sufficient firewalls and conflict of interest policies and procedures. The policies and procedures must conform to the specifications in 20 CFR 679.430 of this chapter for demonstrating internal controls and preventing conflict of interest.'' The Department has determined that the term ''other roles'' is more readily understood. These could include such roles as service providers, State agencies, or Local WDBs.

Comments: One commenter suggested that the Department should define the role of a ''system coordinator,'' which would unify a network of one-stop operators in large local areas into a more cohesive local system.

Department's Response: The Department has declined to revise the regulatory text to define such a role, as this is a function of the Local WDB. WIOA does not identify a system coordinator role. Local areas have the ability to coordinate regionally and develop local or regional plans. Any coordination would be established as part of the local planning process.

Comments: One commenter stated that one-stop operators should be allowed to participate in the local plan development only if there are appropriate firewalls and conflict of interest policies in place.

Department's Response: The one-stop operator will be a contractor under the Local WDB. The Local WDB is tasked with oversight and monitoring of the one-stop operator. Therefore, if the operator participates in the development of the local plan, there must be adequate conflict of interest policies and firewalls in place to ensure the one-stop operator staff who are participating do not provide input on any policies associated with oversight and monitoring of their own actions. The Department has determined that this does not require the addition of regulatory language to this section, as §§ 678.615, 678.620, and 678.625 require firewalls and conflict of interest policies to prevent conflicts of interest in the selection of a one-stop operators, in the one-stop operator's role, and in the functioning of the State and Local WDBs.

Comments: One commenter recommended that the regulations should clarify that the one-stop operator chosen through the competitive procurement process is responsible for carrying out the required activities of WIOA sec. 134(c)(1)(A), both directly and through the one-stop required partners.

Department's Response: The Department has determined that it is important to provide flexibility to local areas to define the role of one-stop operator to meet the needs of the local area and that § 678.620 provides this flexibility. No change to the regulatory text was made in regard to this comment.

Section 678.625 Can a one-stop operator also be a service provider?

Section 678.625 allows a one-stop operator to also be a service provider. However, the section clarifies that there

must be firewalls in place to ensure that the operator is not conducting oversight of itself as a service provider. There also must be proper internal controls and firewalls in place to ensure that the entity, in its role as operator, does not conflict with its role as a service provider.

Comments: Some commenters expressed that the process described in the NPRM for the grant recipient to operate the one-stop center and/or provide career services is difficult to follow. They expressed concern that the process as described could lead to ''unintended, questionable procurements.''

Department's Response: After considering these comments and examining the language of WIOA sec. 121(d), the Departments have determined that the process for separating the functions of operator and service provider is clear. A one-stop operator cannot participate in the selection of a provider to perform services in which the operator intends to compete. Specifically, the operator cannot participate in the planning, development, review, negotiation, and selection phases of the competitive procurement process and then also submit its own proposal. Moreover, proper firewalls must be in place, as well as internal controls, to separate the functions of oversight, monitoring, and evaluation of its role as service provider in order for a one-stop operator to also serve as a service provider. The Department will continue to provide guidance and technical assistance to the public workforce system in this regard.

Comments: One commenter asserted that Congress could not have intended for the WIOA competition provision to be the catalyst for a regulatory structure that would entrench service providers and insulate them from competition while competing out only the more tangential oversight position of one-stop operator, which typically has a much smaller total impact on the quality of services delivered to one-stop users. The commenter remarked that the one-stop operator and service provider roles have been ''substantially intertwined'' over the years, with WIA sec. 117(d)(2)(D) even suggesting that operators were also expected to be service providers. The commenter stated that it has been common practice at many one-stop centers for the roles of operator and service provider to be bid concurrently, and common practice in other one-stop centers for service providers to be assigned various operator duties as part of their service provider role.

Department's Response: The Departments encourage Local WDBs to review current service providers strategically and plan for the competitive process, allowing for a period of transition to minimize any disruption and ensure program continuity. WIOA does not link one-stop operator competition with competition of providers of services in the one-stop. That decision is left to the State and/or Local WDB. No change to the regulatory text was made in response to this comment.

Section 678.630 Can State merit staff still work in a one-stop center where the operator is not a governmental entity?

Section 678.630 addresses the concern about whether State merit staff can continue to work in a one-stop center where the operator is an entity other than the State. State merit staff support numerous programs at the one-stop center, including Wagner-Peyser Act programs, VR, UI, and the JVSG program. Section 678.630 clarifies that State merit staff may continue to work in the one-stop center so long as a system for the management of merit staff in accordance with State policies and procedures is established. Similar to State merit staff, nothing would prevent local government staff from being employees in the one-stop center, although the Department recognizes that local government employees are not equivalent to the State merit staff, as State merit staff are governed by the requirements attached to specific programs that must be in the one-stop center regardless of operator.

In response to concerns about staffing, the last sentence of § 678.630 has been revised to clarify that continued use of State merit staff for the provision of Wagner-Peyser Act services or services from other programs with merit staffing requirements must be included in the competition for and final contract with the one-stop operator when Wagner-Peyser Act services or services from other programs with merit staffing requirements are being provided.

Comments: Several commenters remarked that local staff do not have the same protections as State merit staff, and new contractors often bring in their own staff when taking over programs. Additionally, these commenters asserted that it would be cost-prohibitive for potential applicants to retain many public employees because they are typically fully vested and may be unionized.

Department's Response: DOL acknowledges the concerns and points regarding the State merit staffing requirement. The benefits of merit staffing in promoting greater consistency, efficiency, accountability, and transparency have been well established, and the Department intends to continue the respective UI, Wagner-Peyser Act, and VR merit staffing requirements under WIOA. While there is no merit staffing requirement under other WIOA core programs, the Department has determined, consistent with 20 CFR 652.215 that Wagner-Peyser Act and VR staff must meet the requirements of merit staff. A revision to the regulatory text, as discussed above, has been made to § 678.630 to respond to concerns about staff.

Comments: Some commenters, including a few unions, urged the Department to require that UI and ES agencies be parties and agree to the establishment of the NPRM's ''system for management of merit staff.''

Department's Response: UI and Wagner-Peyser Act programs will be party to the establishment of such a system through their participation and decision-making on State or Local WDBs as required partners, and through their good-faith negotiations during the MOU process. The Department has made no changes to the regulatory text in response to these comments.

Comments: Some of these commenters also suggested that the Department should revise § 678.630 to require UI and ES agencies to agree to inclusion of local merit staff in the competition and final contract, to be consistent with proposed 20 CFR 652.216.

Department's Response: The Departments decline to make revisions to policies regarding local merit staffing.

Comments: One commenter stated that the NPRM, which includes VR in the list of State merit staff, conflicts with the responsibility of the designated State agency (DSA) or designated State unit (DSU) in sec. 101(a)(2) of the Rehabilitation Act of 1973 ''by inferring that the State Board and one-stop operator may establish State policies regarding the management of'' VR staff. The commenter also stated that the NPRM may conflict with RSA Technical Assistance Circulars 12–03 and 13–02. Another commenter expressed support for including VR as State merit staff, as this will provide flexibility for States to integrate VR staff within one-stop centers.

Department's Response: In accordance with this section, State VR personnel are permitted to perform functions and activities in a one-stop center where the one-stop operator is a non-governmental entity.

This section does not circumvent the requirements governing the State VR Program at 34 CFR part 361. In particular, if State VR personnel are

performing functions and activities in a one-stop center operated by a non-governmental entity, the requirements related to the responsibility for administration and the non-delegable functions of the designated State unit at 34 CFR 361.13(c) remain in place.

Contrary to the commenter's suggestion, neither the State WDB nor the one-stop operator would assume sole management of State VR personnel employed by the designated State unit responsible for the administration of the VR services program, because such responsibility rests fully with the designated State unit for the VR program. Rather, the State WDB and the one-stop operator would establish a system for management of State VR personnel in accordance with State policies and procedures, consistent with program specific requirements such as that described in 34 CFR 361.13(c).

Comments: A few commenters recommended that CEOs or Local WDBs should be permitted to determine the best staffing mix for their local areas.

Department's Response: WIOA sec. 107(f) and 20 CFR 679.400 of the DOL Final Rule describe the Local WDB's authority to hire and the appropriate roles for Board staff and § 678.620 describes the role of the one-stop operator in comparison to Local WDB functions. Local WDBs may establish appropriate staffing within the confines of these requirements, but nothing in these provisions would change staffing requirements established pursuant to other laws, such as the Wagner-Peyser Act merit-staffing requirement. The Department made no changes to the regulatory text in response to these comments.

Comments: One commenter asserted that, because WIOA does not specifically amend, address, or rescind the Employment Services merit staff exemption granted to Colorado, Massachusetts, and Michigan under the Wagner-Peyser Act, this exemption remains in full effect.

Department's Response: The benefits of merit staffing in promoting greater consistency, efficiency, accountability, and transparency have been well established and DOL has proposed continuing Wagner-Peyser Act merit staffing requirements under WIOA. Nonetheless, WIOA is silent on the continuation of this exemption, and there is no need to address it in these regulations. However, to prevent significant disruptions in service delivery and to help facilitate implementation of WIOA, the Secretary of Labor has elected to continue all current exemptions to the Wagner-Peyser Act merit staffing requirement. This continuation applies only to the current exemptions; the Department has no immediate plans to expand this authority within States that have been granted this administrative flexibility or to additional States, and such grants could be subject to termination in the future at the discretion of future DOL leadership.

Section 678.635 What is the compliance date of the provisions of this subpart?

While no significant policy changes have been made to this section, the date by which Local WDBs must demonstrate they are preparing for the one-stop operator competition process has been changed from June 30, 2016 to [90 days from publication of this Final Rule], in order to give Local WDBs an adequate amount of time to actively respond to the requirements of these regulations.

Comments: A few commenters requested flexibility to delay competitive selection if a State determines that breaking a lease in existence prior to PY 2014 exceeds the three percent funding cap for that local area's title I or Wagner-Peyser Act funding for PY 2016. The commenters requested guidance or technical assistance if the cost of maintaining current programming in existing one-stop centers exceeds the caps.

Department's Response: DOL has issued operational guidance on the continuation of contracts during the WIA to WIOA transition, and depending on the State or local interpretation of a lease agreement, this guidance may be relevant. Please see TEGL No. 38–14, ''*Operational Guidance to Support the Orderly Transition of Workforce Investment Act Participants, Funds, and Subrecipient Contracts to the WIOA*,'' which can be found at *http://wdr.doleta.gov/directives/All_WIOA_Related_Advisories.cfm*.

Comments: A commenter stated that DOL should adjust the implementation date of this provision to July 1, 2017 from June 30, 2017 to coincide with the beginning of the new program year, instead of the last day of the previous program year.

Department's Response: After considering this comment, the Department has adjusted the date in § 678.635(a) to July 1, 2017 in order to be consistent with the program year.

Comments: A few commenters expressed support for regulatory language that would allow Local WDBs to continue competitively procured one-stop operator contracts that are executed before the June 30, 2017 effective date.

Department's Response: No regulatory text changes were made in response to these comments. The Department recommends following the guidance that has been released for continuing, adapting, and terminating (if necessary) one-stop services contracts that can be applied to one-stop operator contracts, which can be found in TEGL No. 38–14, ''*Operational Guidance to Support the Orderly Transition of Workforce Investment Act Participants, Funds, and Subrecipient Contracts to the Workforce Innovation and Opportunity Act*,'' which can be found at *http://wdr.doleta.gov/directives/All_WIOA_Related_Advisories.cfm*.

Other Comments on One-Stop Operators

Comments: A few commenters stated that neither WIOA nor the NPRM state that the Local WDB is required to pay the one-stop operators. They also recommended that Governors be able to set policies for one-stop operators.

Department's Response: A competitive process is required for the selection of the one-stop operator by the Local WDB, and it is expected that a sizable portion of the bid-on costs would be the salary of the one-stop operator's staff. One-stop operator roles and responsibilities are defined in WIOA and these regulations, and existing and future operational guidance and rules will delineate how these policies are set at the local level. WIOA sec. 121(d)(1) delegates the majority of the authority to set these policies to the Local WDB. No change to the regulatory text was made in response to these comments.

Comments: A commenter recommended making this section more collaborative with ED, to be consistent with the rest of the NPRM. The commenter expressed concern that this topic is only under DOL's auspices when both Departments oversee the entities involved in the one-stop delivery system.

Department's Response: The Department agrees; this is a joint regulation and the comment responses, in addition to most existing operational policies, have been developed through collaboration between the Departments of Labor and Education. It is the intention of the Departments to continue to provide joint guidance and training to our respective systems of service in a collaborative manner.

Comments: Another commenter suggested that the Department should establish labor standards for staff working in the one-stop delivery system.

Department's Response: The Department appreciates the concerns giving rise to this suggestion, but the establishment of labor standards for

occupations in State or local governmental entities carrying out the provisions of WIOA is outside the scope of these regulations, as well as the Departments' administrative authority. No change to the regulatory text was made in response to this comment.

6. One-Stop Operating Costs (20 CFR Part 678, Subpart E; 34 CFR 361.700 Through 361.760; 34 CFR 463.700 Through 463.760)

The regulations governing one-stop partner funding of infrastructure costs and other shared costs are intended to:

(1) Maintain the one-stop delivery system to meet the needs of the local areas;

(2) Reduce duplication by improving program effectiveness through the sharing of services, resources and technologies among partners;

(3) Reduce overhead by streamlining and sharing financial, procurement, and facilities costs;

(4) Encourage efficient use of information technology to include, where possible, the use of machine readable forms and shared management systems;

(5) Ensure that costs are appropriately shared by one-stop partners by basing contributions on proportionate use of the one-stop centers and relative benefit received, and requiring that all funds are spent solely for allowable purposes in a manner consistent with the applicable authorizing statute and all other applicable legal requirements, including the OMB's Uniform Guidance set forth in 2 CFR chapter II, part 200 (Uniform Guidance); and

(6) Ensure that services provided by the one-stop partners to reduce duplication or to increase financial efficiency at the one-stop centers are allowable under the partner's program.

Infrastructure costs are the responsibility of all one-stop partner programs, whether they are physically located in the one-stop center or not. Each partner's contribution to these costs, however, may vary, as these contributions are to be based on the proportionate use and relative benefit received by each program, consistent with the partner programs' authorizing laws and regulations and the Uniform Guidance at 2 CFR part 200. Section 121(h)(1)(A) of WIOA establishes two funding mechanisms—a local funding mechanism and a State funding mechanism. Under WIOA sec. 121(c), the Local WDBs must enter into MOUs that cover, in part, the amount each partner will contribute toward the one-stop center's infrastructure costs. The Departments strongly encourage Local WDBs to reach agreement. If the Local WDB fails to reach agreement with each of the partners with regard to the amount each partner will contribute to the one-stop delivery system's infrastructure costs pursuant to WIOA sec. 121(h)(1)(A)(i)(I), the local area is considered to be at an impasse. When a local area fails to reach such agreement, the State funding mechanism is triggered pursuant to WIOA sec. 121(h)(1)(A)(ii).

As discussed in more detail in the analysis of comments regarding § 678.725, the State funding mechanism, in the event a local area fails to reach agreement with the one-stop partners, will not be triggered prior to PY 2017. In other words, the failure of a local area to reach an agreement with regard to the funding of the one-stop centers' infrastructure costs for PY 2017 (which begins July 1, 2017), would trigger the State funding mechanism, in order to provide that funds are available to pay for the one-stop delivery system's infrastructure costs in PY 2017. In specific instances, the triggering of the State funding mechanism will be based on the guidance developed by the Governor under § 678.705(b)(3) as to the timeline for notifying the Governor that the local area was unable to reach agreement. The same would be true for each subsequent program year. States and local areas may continue to negotiate local funding agreements as they have under WIA for the purposes of PY 2016.

The Departments have determined this interpretation is most consistent with the plain meaning of the statutory provision, because all negotiations for purposes of the one-stop delivery system's infrastructure costs for PY 2016, which begins on July 1, 2016, as well as the implementation of a State funding mechanism, would need to occur well before the start of PY 2016 in order to provide funding for the one-stop delivery system in PY 2016. However, sec. 121(h)(1)(A)(ii) makes clear that the State funding mechanism does not apply until negotiations fail to result in an agreement after the start of PY 2016, which, by necessity, would make it applicable beginning with PY 2017, and then for all subsequent program years.

For PY 2017 and all subsequent program years, when a local area fails to reach an agreement, thereby triggering the implementation of the State funding mechanism pursuant to sec. 121(h)(1)(A)(ii), the Governor, or in some cases other officials as described in § 678.730(c)(2) and in more detail below, after consultation with State and Local WDBs and CEOs, will determine the amount each partner must contribute to assist in paying the infrastructure costs of one-stop centers. The Governor, or other official in consultation with the Governor, as appropriate, must calculate amounts based on the proportionate use of the one-stop centers and relative benefit received by each partner and other factors stated in § 678.737(b). The amounts contributed by each one-stop partner in a local area will be based on an infrastructure cost budget determined either by local agreement, as stated in § 678.735(a), or by formula, as stated in § 678.735(b)(3) and in accordance with the remainder of § 678.745 and sec. 121(h)(3)(B) of WIOA. Section 678.738(c) sets forth the limitation for one-stop partners' contributions under the State funding mechanism, based on a percentage of their statewide funding allocation, in accordance with WIOA sec.121(h)(2)(D)(ii).

Comments: A commenter expressed support for the proposed regulations in this subpart. Another commenter requested technical assistance and additional clarity on these provisions. One commenter asked that the Departments describe the expectations in this subpart and in subpart C for each one-stop partner program, individually and separately, because each program has its own requirements for administrative costs and infrastructure contributions based on its authorizing statute.

Departments' Response: The Departments have issued operating guidance that describes the Departments' views on how these provisions will work. The expectations for each partner program will be further defined in guidance on one-stop infrastructure negotiations, and technical assistance will be provided to the public workforce system following publication of these regulations. To describe these details in regulatory language would be overly prescriptive; the Departments decline to change the regulatory text in response to this comment. Required Federal partner programs often operate under different authorizing statutes in addition to WIOA. Those administering agencies will issue program-specific guidance and technical assistance on infrastructure costs and negotiating MOUs in addition to any joint guidance regarding WIOA implementation. The costs of the one-stop delivery system are not only supported by infrastructure funding, but also by the payment of other shared costs that may be part of the MOU.

Comments: A commenter stated that this subpart would have the effect of

worsening or reducing collaboration between local programs. The commenter went on to say that partners do not know how to implement WIOA's options for sharing local infrastructure costs.

Departments' Response: The Departments disagree with this general assessment, and the Departments are aware of many States and local areas where infrastructure and cost sharing agreements have been working well for some time. The intent of WIOA is to continue and enhance the collaboration of partners, with more specific guidelines, and the Departments intend to provide further guidance and technical assistance regarding the sharing of local infrastructure costs and other shared costs. No change to the regulatory text was made in response to this comment.

Comments: A few commenters expressed support for a separate funding line item for one-stop infrastructure costs.

Departments' Response: Since a separate line item was not authorized in WIOA, nor included in any of the Departments' appropriations, the Departments are not authorized to implement separate funding for infrastructure costs. No change to the regulatory text was made in response to these comments.

Section 678.700 What are the one-stop infrastructure costs?

Section 678.700 provides the definition for infrastructure costs based on sec. 121(h)(4) of WIOA. In addition, the section adds common one-stop delivery system identifier costs. These costs are those associated with signage and other expenses related to the one-stop common identifier, as required by subpart G of this part.

Jointly funding services is a necessary foundation for an integrated service delivery system. Section 678.700(c) explains that a partner's contributions to the costs of operating and providing services within the one-stop delivery system must adhere to the partner program's Federal authorizing statute, and to all other applicable legal requirements, including the Federal cost principles that require that costs must be allowable, reasonable, necessary and allocable. These requirements and principles will help one-stop partners identify an appropriate cost allocation methodology for determining partner contributions. There are a variety of methods to allocate costs, for instance: based on the proportion of a partner program's occupancy percentage of the one-stop center (square footage); the proportion of a partner program's customers compared to all customers served by the one-stop; the proportion of partner program's staff compared to all staff at the one-stop; or based on a partner program's use of equipment or other items that support the local one-stop delivery system. A detailed discussion of the Departments' responses to public comments received on this section follows immediately below.

Comments: One commenter asked whether infrastructure costs are applicable only to partners physically located in the one-stop centers or to all partners.

Departments' Response: Infrastructure costs are applicable to all one-stop partner programs, whether they are physically located in the one-stop center or not. Each partner's contribution to these costs, however, may vary, as these contributions are based on the proportionate use and relative benefit received, consistent with the partner programs' authorizing laws and regulations and the Uniform Guidance at 2 CFR part 200.

Comments: Another commenter said that the Departments need to provide sufficient guidance on the expectations for certain programs to ensure that cost negotiations take place and contributions occur.

Departments' Response: Since the issuance of the NPRM, infrastructure funding guidance has been released by the Departments, and more guidance and technical assistance documents will be released throughout the operational lifetime of the regulations.

Comments: One commenter suggested that because the NPRM essentially requires title I programs to police the participation of other programs regarding infrastructure costs, they would discourage optional one-stop partners from participating at all.

Departments' Response: Governors and State WDBs must create the framework for funding and required partner programs must operate within that framework, both at the State and local levels. Local WDBs will follow this framework, which must be inclusive of required partner programs as well as other programs that are additional partners in the one-stop centers in that local area. Once negotiated MOUs are in place, the State will monitor their operations, along with the other fiscal procedures of local areas, as they do now. The Local WDBs will be responsible for ensuring that all of the one-stop infrastructure costs are paid according to the provisions of the MOU, as they are the entity with which the partner programs will be signing the MOU. No change to the regulatory text was made in response to this comment.

Comments: A commenter said that proposed § 678.700(c) should begin, ''Each entity described in . . .'' to clearly indicate that partners must contribute funds for infrastructure, regardless of whether a partner wants to have a service delivery mechanism separate from the one-stop center.

Departments' Response: The Departments have determined that the regulation is clear as proposed, and have concluded that this change is not needed and would cause unnecessary confusion.

Comments: Another commenter suggested that Perkins Act funds should not be shifted to infrastructure support.

Departments' Response: As a statutorily required partner of the one-stop center under WIOA, a Perkins eligible recipient at the postsecondary level, or a consortium of eligible recipients at the postsecondary level in a local area, will now be involved in the development of local MOUs, which spell out the services to be provided through the one-stop centers. All partners must contribute to the one-stop infrastructure costs according to WIOA, as is described in more detail in § 678.720(a). No change to the regulatory text was made in response to this comment.

Comments: One commenter expressed concern that, given the ''proportionate use by or benefit to the partner program'' clause in this part, TANF or Basic Food Employment and Training could incur a significant cost due to the volume of clients served by these programs. The commenter also asked if this funding is in addition to the funds already provided for employment services.

Departments' Response: With regard to the TANF program, only those funds used for the provision or administration of employment and training programs are considered in infrastructure and MOU negotiations under WIOA. The Departments wish to clarify that there are numerous methods for allocating costs, of which a proportion of customers is only one. One-stop partners will negotiate MOU's and infrastructure funding agreements that meet the needs of the local areas and the partner programs.

Comments: A few commenters objected to the funding structure described in the NPRM, stating that there is a discrepancy in how contributions are calculated and how funds are reallocated. Specifically, the commenter suggested that the State WDB formula—as discussed in § 678.745—redistribute funds under

what was proposed as the State funding mechanism in the NPRM using different factors than what is used to calculate proportionate share.

Departments' Response: The Departments have determined that the referenced discrepancy does not exist. There will be differences in the application of the framework for infrastructure funding used among local areas, but required partner programs will have consistent requirements across all programs. As the commenter suggested, however, the use of the State WDB formula as proposed in the NPRM created ambiguities in determining what local partner programs should contribute. Because of this and other comments, the formula has been reworked to provide a more stable, and practicable tool for the Governor to use. These changes are detailed in § 678.745 and the associated Preamble discussion.

Comments: A few commenters said that contributions from partner programs must be consistent with their authorizing statutes and all other legal requirements under WIOA.

Departments' Response: The Departments agree that all required partner programs must also comply with the provisions of their own authorizing statutes, in addition to WIOA, and have determined that the regulations reflect this requirement.

Comments: A few commenters asked if only partners colocated within the one-stop must contribute, or if all partners that benefit from the centers must also contribute.

Departments' Response: As mentioned above, all one-stop partners must contribute to infrastructure funding, but will do so based upon a reasonable cost allocation methodology whereby infrastructure costs are charged based on each partner's proportionate use of the one-stop centers and relative benefit received. This would still apply even if the program is not located at the one-stop center, if it is a required partner.

Comments: A commenter asked why the UI system is not a mandatory funding partner.

Departments' Response: This is an incorrect assumption. As a required one-stop partner under WIOA sec. 121(b)(1)(B)(xi), a partner providing UI services must contribute its proportionate share of the infrastructure costs, as is required by WIOA sec. 121(b)(1)(A)(ii).

Comments: Another commenter recommended that TANF should not be required to pay infrastructure costs.

Departments' Response: As a one-stop partner, a TANF program must provide infrastructure cost funding according to its proportionate use of the one-stop centers and relative benefit received, as is required by WIOA, unless the Governor exercises the option not to include TANF as a required partner. See WIOA sec. 121(b)(1)(C). If the Governor has exercised the option so that an entity carrying out a TANF program is not a required one-stop partner, but it chooses to become one voluntarily, the program must provide its share of infrastructure costs as do all required partners. No change to the regulatory text was made in response to this comment.

Comments: A few commenters said that the Departments should make it clear that title I funds can support title II based on the definition of ''training'' in WIOA sec. 134(c)(3).

Departments' Response: Program funds are for the benefit of the participants enrolled in training authorized in that particular title. Funds provided by partners to support infrastructure and shared costs of the one-stop delivery system are intended to benefit the participants of all programs. Guidance also has been released on the subject in both TEGL No. 2–15, ''*Operational Guidance for National Dislocated Worker Grants pursuant to the Workforce Innovation and Opportunity Act,''* and TEGL No. 04–15 ''*Vision for the One-Stop Delivery System under WIOA,''* among others, as well as corresponding ED documents, such as TAC–15–01 and Program Memorandum OCTAE 15–3, which are associated with TEGL No. 04–15. All DOL WIOA operating guidance can be found at *http://wdr.doleta.gov/directives/All_WIOA_Related_Advisories.cfm*, and all associated ED documents may be found at *www2.ed.gov/about/offices/list/osers/rsa/wioa-reauthorization.html* and *www2.ed.gov/policy/adulted/guid/memoranda.html*.

Furthermore, an additional section of regulatory text on this subject was added to the DOL WIOA Final Rule at 20 CFR 680.350. No change to the regulatory text was made in response to these comments.

Comments: Multiple commenters urged the elimination of the one-stop delivery system proposed infrastructure payments, and some remarked that the NFJP should be exempt from this requirement because NFJP grantees often operate in satellite locations in rural areas where the communities face transportation barriers. Some of these commenters discussed the extensive outreach necessary in these communities and remarked that NFJP grantees would not have to sacrifice their identity or their close partnerships with one-stop delivery systems if the Departments allow them this exemption.

Departments' Response: The Departments cannot eliminate the one-stop delivery system infrastructure payments for any of the required partner programs, as the infrastructure cost contributions are required by sec. 121(b)(1)(A)(ii) of WIOA. While NFJP grantees are required partners and are required to provide infrastructure funding for the one-stop centers, they will contribute amounts in direct proportion to their use in accordance with the provisions of these regulations and Departmental guidance. No change to the regulatory text was made in response to these comments.

Comments: Several commenters stated that, if deemed necessary, infrastructure payments should be no greater than the value received by NFJP programs, and some commenters suggested that in-kind contributions should be considered as a valid form of payment.

Departments' Response: WIOA requires partners to contribute infrastructure funds according to the partners' proportionate use and relative benefit received. The regulations allow noncash and third-party in-kind contributions as valid forms of payment for infrastructure costs. The Uniform Guidance related to in-kind contributions applies here, and additional guidance regarding noncash and in-kind contributions and shared costs has been released by the Departments. No change to the regulatory text was made in response to these comments.

Comments: A commenter suggested that NFJP grantees should continue to be required partners on State and Local WDBs if NFJP is forced to make a financial contribution.

Departments' Response: The Departments recognize that many important system partners with experience with specific populations—such as certain required one-stop partner programs, tribal organizations, other Department program grantees, and those serving the disadvantaged and disabled populations—are no longer required members of WDBs. However, 20 CFR 679.320(c) of the DOL-only Final Rule requires that the Local WDB must be comprised of workforce representatives that can include one or more representatives of community-based organizations that have demonstrated experience and expertise in addressing the employment, training, or education needs of individuals with barriers to employment. Further, 20 CFR 679.320(e)(4) says the CEO has the

flexibility to appoint ''other appropriate individuals,'' which does not preclude any organization that the CEO deems appropriate. The Departments encourage the CEO to ensure that Local WDB members represent the diversity of job seekers and employers in their local areas, which includes ensuring adequate representation on the Local WDB. Section 679.320 in the DOL WIOA Final Rule implements the WIOA sec. 107(b) Local WDB membership requirements. No change to the regulatory text was made in response to this comment.

Comments: Several commenters addressed the Departments' request for comment on the types of costs that should be included as infrastructure costs. One commenter reasoned that staff development and training is an appropriate use of funds to maintain the one-stop delivery system as described in § 678.700(c). The commenter also asked if the Departments are acknowledging that costs described in paragraphs (a) and (b) are allowed by the required program authorizing statutes. Another commenter asked if infrastructure costs include personnel costs such as facility maintenance, and one commenter asked if they include copy machine leases. A different commenter suggested that infrastructure costs should include one-stop marketing, IT and communication costs, and administrative costs of operating one-stop centers. A couple of commenters suggested that certain one-stop operation personnel costs, such as receptionist, IT support, building security, and manager, should be funded from infrastructure costs. Another commenter agreed, reasoning that if they are not, such costs would fall on WIOA title I–B funds.

Departments' Response: Section 121(h)(4) of WIOA defines one-stop infrastructure costs as ''the nonpersonnel costs that are necessary for the general operation of the one-stop center, including rental costs of the facilities, the costs of utilities and maintenance, equipment (including assessment-related products and assistive technology for individuals with disabilities), and technology to facilitate access to the one-stop center, including the center's planning and outreach activities.'' This definition is also in § 678.700(a). The Departments will provide additional guidance regarding infrastructure costs, but addressing all potential specific items of cost that could be included or excluded from infrastructure costs, based on this definition, is beyond the scope of these regulations.

WIOA allocates equitably the cost responsibility for operating the one-stop delivery system across partner programs; therefore, it is not the intention that any one partner bear a disproportionate share of the costs. The Departments do not agree with the conclusion that if the costs identified by the commenters are not included in infrastructure costs they will fall on WIOA title I funds. Costs that are related to services shared by partners that do not fall into the definition of infrastructure costs should be treated as other shared costs according to WIOA sec. 121(i)(2) and § 678.760 of these regulations.

Comments: One commenter stated that infrastructure costs should be aggregated and addressed at the State level.

Departments' Response: It is not possible to accomplish this by Federal regulation. Funds are separately appropriated to States under a variety of authorizing statutes. The Governor, in working with the State WDB, will develop guidance that, among other things, outlines a framework for identifying infrastructure contribution from each required partner, as discussed in § 678.705 of these regulations. If consensus cannot be reached on an infrastructure funding agreement locally, the Governor will implement the State funding mechanism to determine one-stop partner contributions, as discussed in §§ 678.725 through 678.745. No change to the regulatory text was made in response to this comment.

Comments: A commenter expressed support for including assistive technology as a required infrastructure cost.

Departments' Response: Section 121(h)(4) and § 678.700(a)(3) provide that equipment, including assistive technology for individuals with disabilities, is an infrastructure cost. However, neither of these provisions describes assistive technology as a required infrastructure cost, and the Departments have determined that designating any particular cost as a required infrastructure cost is beyond the scope of these regulations. As previously indicated in this Preamble, the Departments intend to issue guidance regarding specific items of allowable infrastructure costs and will address one-stop center accessibility costs in that guidance. No change to the regulatory text was made in response to this comment.

Comments: A few commenters recommended that costs associated with adopting the common identifier should be funded by the Departments, not from infrastructure costs. One commenter asked for examples of common identifier costs. Another commenter agreed that common identifier costs should be included as common infrastructure costs.

Departments' Response: Costs associated with the common identifier may be included as infrastructure as well, however there is no separate source of funding to allocate from the Federal level for common identifier costs. Examples of common identifier costs would be the cost of new signage, changing material templates, and changing electronic resources, but it would not include any sort of advertising campaign promoting the one-stop center under the new common identifier. No change to the regulatory text was made in response to these comments.

Comments: Several commenters stated that infrastructure cost levels should be set at the State level for adult education programs, rather than requiring local negotiations between each adult education program and each one-stop partner.

Departments' Response: Section 678.415(b) of the regulation specifies that the appropriate entity to serve as a partner for the adult education program is the State eligible agency or entity and the State eligible agency or entity for AEFLA may delegate its responsibilities to act as a local one-stop partner to one or more eligible providers or consortium of eligible providers. As part of these delegated responsibilities to serve as a one-stop partner, a local adult education entity would assume the roles and responsibilities of one-stop partners under sec. 121(b)(1)(A), which would include contributing to infrastructure costs. No change to the regulatory text was made in response to these comments.

Section 678.705 What guidance must the Governor issue regarding one-stop infrastructure funding?

Section 678.705 includes certain requirements for the Governor's guidance, including establishing roles, defining equitable and efficient methods for negotiating around infrastructure costs, and establishing timelines for local areas. These requirements are essential to ensuring a consistent approach to the Governors' guidance across States. This allows for one-stop certification, competition of the one-stop operator, and inclusion of infrastructure funding agreement terms into the local State Plan in appropriate timeframes. Based on comments received, the Departments have concluded that the Governor's guidance and technical assistance will be of greatest value to the public workforce system in implementing the provisions

of the sections that follow. A detailed discussion of the Departments' responses to public comments received on this section follows immediately below.

Comments: A commenter asked whether the Governor may dictate the cost categories and allocation methods, or whether the Governor may provide flexibility to local partners in these areas. Another commenter said that the Departments should issue guidance on cost sharing, allocation, and allowable costs. One commenter recommended that in cases where the Governor needs to intervene to establish local contributions, the contributions should be supported with similar funding sources for all contributors. Another commenter said that guidance on funding should allow for flexible contributions from required partners.

Departments' Response: The Departments have determined that the language in § 678.705 is consistent with the cost principles contained in the Uniform Guidance and those of the authorizing statutes and, thus, provides sufficient parameters within which to define costs, cost allocation, and other principles of cost sharing. For purposes of clarity, specific references to the Uniform Guidance have been added to § 678.705. Furthermore, paragraph (b)(2) also has been revised to clarify that cost allocation should be based on proportionate use of the one-stop centers and relative benefit received. The Governor may not dictate cost categories or allocation methods that are not consistent with the Uniform Guidance. There are a variety of methods to allocate costs that are consistent with the Uniform Guidance, for instance, based on: The proportion of a partner program's occupancy percentage of the one-stop center (square footage); the proportion of a partner program's customers benefitting by coming to the one-stop; the proportion of partner program's staff among all staff at the one-stop center; or the percentage of a partner program's use of equipment at the one-stop center. This portion of the regulation can be complex, and the Departments will continue to issue guidance and provide technical assistance to the public workforce system.

The DOL's previous Financial Management Technical Assistance Guide published for WIA remains useful for an overview of cost allocation methodologies. See *http://www.doleta.gov/grants/pdf/TAG_PartI.pdf* and *http://www.doleta.gov/grants/pdf/TAG_PartII_July2011.pdf*. The Departments jointly will work to update this guide and provide technical assistance on cost allocation in the future.

Comments: A few commenters said there needs to be guidance for local partners to contribute to the one-stop infrastructure costs. The commenter said that these costs need to be defined as program costs.

Departments' Response: In addition to the provisions of these regulations, guidance for local partner contributions will be available from Departmental policy guidance documents, and from the State agencies administering partner funds. However, local required partners and their CEOs also must recognize that funds must be used in accordance with the related authorizing statutes, and consistent with the requirements of the Uniform Guidance. While infrastructure costs may be considered as program costs for DOL WIOA programs—which are primarily WIOA title I programs—this is not the case for all local area partner programs. Other authorizing statutes may have differing interpretations. Further guidance and technical assistance is forthcoming on this issue.

Comments: A few commenters requested additional guidance for the Governor to assist in establishing roles and defining equitable and efficient methods for negotiation. A commenter said that the rule should give guidance on what roles the Departments envision to ensure that the Governors' recommendations are appropriate.

Departments' Response: Since the issuance of the NPRM, the Departments have released infrastructure funding guidance that includes roles and responsibilities, and more guidance and technical assistance documents will be released throughout the operational lifetime of the regulations. No change to the regulatory text was made in response to these comments.

Comments: A commenter said that this section should refer to WIOA sec. 121, concerning infrastructure spending ceilings for certain programs.

Departments' Response: The Departments decline to adopt this recommendation. While the infrastructure funding caps for certain programs under the State funding mechanism are covered in § 678.738(c), they do not apply to contributions of local programs pursuant to the local funding mechanism. No change to the regulatory text was made in response to this comment.

Comments: A couple of commenters said that the regulations need to provide a ''fail safe'' for local areas in case the State is not negotiating in good faith or fails to meet the requirements of the MOU. The commenter recommended that this would be a plan consisting of MOU terms and cost allocation plans that would go into effect if either condition above occurs.

Departments' Response: The Departments are not authorized by WIOA to implement a ''fail safe'' plan as the commenter suggested. WIOA and this Joint WIOA Final Rule (at § 678.750) require that the Governor have an appeals process for the State funding mechanism that would allow one-stop partners to appeal a Governor's funding determination. In addition, 20 CFR 683.600 of the DOL WIOA Final Rule would include Local WDBs and CEOs as ''other interested parties'' that may file grievances under the State established procedures required by WIOA sec. 181(c)(1). No change to the regulatory text was made in response to these comments.

Section 678.710 How are infrastructure costs funded?

Section 678.710 indicates that sec. 121(h)(1)(A) of WIOA establishes two methods for funding the infrastructure costs of one-stop centers: A local funding mechanism and a State funding mechanism. Both methods utilize the funds provided to one-stop partners by their authorizing statutes. There is no separate funding source for one-stop infrastructure costs. The Departments received no comments on this section and made no changes to the regulatory text.

Section 678.715 How are one-stop infrastructure costs funded in the local funding mechanism?

To use the local funding mechanism, Local WDBs, in consultation with CEOs, must engage one-stop partners early in discussions about one-stop center locations, costs, and other services, so that all parties can make decisions cooperatively and reach consensus about funding infrastructure costs. WIOA does not place any limitations on contributions under the local mechanism; however, partner programs' contributions must be in compliance with their Federal authorizing statutes and other applicable legal requirements, including administrative cost limitations, and represent each partner's proportionate share, consistent with the Uniform Guidance. Under this section, agreement is achieved when all of the one-stop partners sign an MOU with the Local WDB, which includes a final agreement regarding funding of infrastructure that includes the elements listed in § 678.755, or an interim funding agreement that includes as many of these elements as possible. A detailed discussion of the Departments'

responses to public comments received on this section follows immediately below.

Comments: One commenter said that partners should pay an equitable share of the infrastructure costs, not a proportionate share based on relative benefits.

Departments' Response: WIOA sec. 121(h)(1)(B)(i) and sec. 121(h)(2)(C) specifically require funding allocations under both the local or State funding options to be based on proportionate use and relative benefit received. The first and preferred option is through methods agreed on by the Local WDB, CEOs, and one-stop partners. If no agreement can be made, then the State funding mechanism applies. Both mechanisms are based upon Federal cost principles contained in the Uniform Guidance. No change to the regulatory text was made in response to this comment.

Comments: A commenter stated that the regulations should clarify that the Local WDB has the responsibility for maintaining and preparing the records necessary to periodically review and reconcile partner shares of infrastructure costs against actual expenditures to ensure equity.

Departments' Response: The Departments disagree; specifics of the roles and responsibilities of local entities is something to be worked out in the MOU, not in Federal regulation. Additionally, MOUs are required to be reviewed no less than once every 3 years as required by WIOA sec. 121(c)(2)(A)(v). No change to the regulatory text was made in response to this comment.

Comments: Another commenter asked for a definition of ''proportionate share.'' One commenter said that the Governor should set policy regarding ''proportionate benefit.'' Another commenter requested guidance on calculating proportionate use.

Departments' Response: There is no specific Federal definition of proportionate share, proportionate benefit, or proportionate use, and none of these terms are defined in WIOA. In a general sense, proportionate share is the share of each partner program's infrastructure costs based upon its proportionate use of the one-stop centers and relative benefit received from that use. The concept of proportionate share, consistent with the partner programs' authorizing statutes and regulations and the Uniform Guidance at 2 CFR part 200, is used by Federal cost principles in the Uniform Guidance, among others. The Departments are aware of the complex nature of arriving at a generally accepted method of calculating proportionate share in a given State or local area and will address this issue through additional fiscal guidance and training. No additional regulatory text is required.

Comments: Several commenters in the adult education field asked for guidance regarding the duties and functions of the Local and State WDBs in small States and single-area States.

Departments' Response: Because WIOA is an evolving system, there is no standard list of all of the possible duties and functions of Local and State WDBs. While WIOA establishes required duties and functions for State and Local WDBs, discussed further in this subpart, each State and Local WDB will develop State and local plans that define their visions and roles and may expand upon these duties and functions. Pursuant to WIOA's Sunshine Provisions, the State and local plans are available for public inspection and Board meetings must be open to the public, which ensures transparency and accountability for all State and Local WDBs.

Comments: A few commenters said that the Departments should issue guidance on simply bypassing the local infrastructure funding process and using the State funding process instead.

Departments' Response: WIOA does not provide authority for bypassing the local funding mechanism. The State funding mechanism is only triggered after the Governor is informed that consensus could not be reached at the local level.

Comments: Many commenters said that the Departments should clarify that both cash and in-kind contributions are permitted in both the local and State funding mechanisms. One commenter asked for clarification on how in-kind contributions should be calculated as an alternative to direct payments. A few commenters asked for clarification of the phrase ''fairly evaluated in-kind contributions'' and also asked to know who makes this determination. Another commenter said that infrastructure funding should be cash-only. One commenter said that the Departments should update their guidance for in-kind contributions to ensure that such contributions are weighted appropriately. A few other commenters said that provision of alternative communication services (*e.g.,* Braille, deaf interpreters) should be considered an in-kind contribution for the VR program.

Departments' Response: These comments assisted the Departments in making certain adjustments in this part of the regulations. WIOA sec. 121(c)(2) outlines the required content of the local MOU. This includes a description of how the costs of operation of the one-stop delivery system will be funded. Operating budgets for one-stop centers encompass two types of costs that are specifically outlined in the law: Infrastructure costs, defined in WIOA sec. 121(h)(4), and additional costs relating to the operation of the one-stop delivery system that do not constitute infrastructure costs, described in WIOA sec. 121(i)(1), which includes the cost of career services under WIOA sec. 134(c)(2) and may include shared services, defined in WIOA sec. 121(i)(2). WIOA sec. 121(c)(2)(A)(ii)(I) establishes in-kind contributions as valid forms of payment for operations.

The regulatory text in § 678.715 has been revised to clarify that cash, non-cash, and third-party in-kind contributions may be provided by, or on behalf of, one-stop partners to cover their proportionate share of infrastructure costs and to provide further agreement on the terms with definitions provided in the Uniform Guidance. These terms are further defined in § 678.720(c).

Non-cash contributions, which are separate from third-party in-kind contributions, are comprised of receipts for current expenditures incurred by one-stop partners on behalf of the one-stop center and non-cash resources such as goods or services, or the documentation of supporting costs for items owned by the partner's program and used by the one-stop center.

For example, imagine a partner's proportionate share of the one-stop operating costs is $15,000. The partner does not have sufficient cash or other resources to fund its share fully, and wishes to donate (not for its own individual use) gently used surplus computer equipment. The computers at the time of the donation have a value determined in accordance with the requirements of 2 CFR 200.306 of $10,000. The partner would be able to use the $10,000 value as part of the resources provided to fund the shared costs.

Third-party in-kind contributions are contributions of space, equipment, technology, nonpersonnel services, or other like items to support the infrastructure costs associated with one-stop center operations, by a non-one-stop partner to support the one-stop center in general (rather than a specific partner), or contributions by a non-one-stop partner of space, equipment, technology, nonpersonnel services, or other like items to support the infrastructure costs associated with one-stop center operations, to a one-stop partner to support its proportionate share of one-stop infrastructure costs.

There are two types of third-party in-kind contributions: General contributions to one-stop operations (*i.e.,* those not connected to any individual one-stop partner) and specific contributions made to a particular one-stop partner program.

For example, a general in-kind contribution could be a city government allowing the one-stop to use city space rent-free. These in-kind contributions would not be associated with one specific partner, but rather would go to support the one-stop generally and would be factored into the underlying budget and cost pools used to determine proportionate share. The result would be a decrease in amount of funds each partner contributes, as the overall budget will have been reduced.

The second type of in-kind contribution could be a third-party contribution to a specific partner to support one-stop infrastructure. For example, an employer partner provides assistive technology to a VR program that then gives it to the one-stop center. So long as assistive technology was in the one-stop operating budget's infrastructure costs, the partner could then value the assistive technology in accordance with the Uniform Guidance and use the value to count towards its proportionate share. Prior to accepting in-kind contributions from a partner (via a third-party donor), there would need to be agreement among the partners on cost allocation methodology to ensure that other infrastructure operating costs are sufficiently covered through cash and noncash contributions.

Both non-cash and in-kind contributions must be valued consistent with 2 CFR 200.306 and reconciled on a regular basis to ensure that they are fairly evaluated and meeting the partners' proportionate share.

All partner contributions, regardless of the type, must be reconciled on a regular basis (*i.e.,* monthly or quarterly) to ensure each partner program is contributing no more than its proportionate share, in accordance with the Uniform Guidance at 2 CFR part 200. No other change to the regulatory text is made in response to these comments.

Section 678.720 What funds are used to pay for infrastructure costs in the local one-stop infrastructure funding mechanism?

Section 678.720 explains the funds that one-stop partners may use to pay for one-stop infrastructure costs. In funding the one-stop infrastructure costs, partner programs must satisfy the requirements of their authorizing statutes and regulations. Further, all one-stop partners must work together to administer the partner programs and the one-stop and other activities of the core programs under WIOA as efficiently and effectively as possible. This will ensure that, as recipients and stewards of Federal funds for all of these programs, the partners and their subrecipients, when allowable under a partner program's authorizing statute, administer these programs and activities to meet all applicable legal requirements and goals. It is important to note that the different Federal statutes and regulations of partner programs define administrative costs slightly differently. Some programs' statutes and regulations define all of the infrastructure costs listed in § 678.700 as administrative costs, while other programs' statutes and regulations define some of the infrastructure costs as administrative costs, and some as program costs. Under § 678.720 of these final regulations, one-stop partner programs must adhere to the administrative and program cost limitations and requirements to which they are subject.

Several changes were made to this section in response to public comments received by the Departments on the NPRM. In § 678.720(a), language was added clarifying that, for WIOA title I programs, infrastructure costs may be considered program costs. Also in paragraph (a), a distinction was made between title II programs and programs authorized under the Perkins Act. Because the proposed Joint Final Rule had designated the State eligible agency under the Perkins Act as the required one-stop partner, it consequently required that infrastructure costs be paid from the funds reserved by the State eligible agency for State administrative expenses. The joint Final Rule, instead, designates that the Perkins one-stop partner is the eligible recipient at the postsecondary level, or a consortium of eligible recipients at the postsecondary level in a local area. Consequently, the joint Final Rule requires that infrastructure costs under the Perkins Act be paid from funds available for Perkins postsecondary recipients' local administrative expenses, or from other funds made available by the State. The Joint Final Rule also changes the source of infrastructure funding for the title II program, specifying that these costs be paid from the funds available for local administrative expenses or from non-Federal resources that are cash, in-kind or third-party contributions.

Also the Departments added a new paragraph (c) and associated subparagraphs to § 678.720 in response to requests for further clarification, which cover the distinctions between and definitions of cash, non-cash, and third-party in-kind contributions to meet partner programs' infrastructure costs contribution obligations. In addition, the Departments provided operating guidance and technical assistance to the public workforce system, and will continue to provide such assistance, as needed. A detailed discussion of the Departments' responses to public comments received on this section follows immediately below.

Comments: A commenter indicated that this section ''is in error in its implication of Perkins State administration funding to support local one-stop infrastructure.'' This commenter asserted that directing Perkins Act State administration is a violation of the uses of funds for such dollars as articulated in Perkins Act sec. 112(a)(3). The commenter recommended revising § 678.720(a) to read: ''In the case of partners administering the Carl D. Perkins Career and Technical Education Act of 2006, these funds shall include local administrative funds available to local eligible institutions or consortia of such institutions.'' The commenter further stated that Perkins Act funds are not divided among secondary and postsecondary career and technical education programs; the distribution between the eligible recipients only takes place at the local level, and this section and § 678.740(d) should be revised to apply only to local-level funding instead of the Perkins eligible agency and the State's administrative dollars. Another commenter agreed, stating that the regulations appear to require duplicate Perkins funds, including both State and local Perkins administrative funds. The commenter similarly indicated that this is a new use of Perkins State administrative funds. Another commenter interpreted the intent of this section to mean that when the Perkins State eligible agency delegates authority to local entities to serve as one-stop partners, the State agency may require the use of local administrative funds in lieu of State administrative funds.

Departments' Response: The Joint WIOA NPRM designated the State eligible agency under the Perkins Act as the required one-stop partner, and consequently required that infrastructure costs be paid from the funds reserved by the State eligible agency for State administrative expenses. The Final Rule instead designates that the Perkins one-stop partner is the eligible recipient at the postsecondary level, or a consortium of eligible recipients at the postsecondary

level in the local area. The Departments have determined that this change is consistent with WIOA sec. 121(b)(1)(B)(iv) which designates local one-stop Perkins partners as the entity that carries out career and technical education programs at the postsecondary level, authorized under the Perkins Act, in a local area. However, the Departments have concluded the State's involvement could be valuable at the negotiation stage and have modified §§ 678.415(e) and 678.720(a) to provide that the local recipients at the postsecondary level may request assistance from the State eligible agency in completing its responsibilities in negotiating local MOUs. To meet their obligations to cover their proportionate share of infrastructure costs, Perkins postsecondary recipients may use funds available for local administrative costs under the Perkins Act, or draw from other funds made available by the State, at the State's discretion.

Comments: A commenter stated that Perkins funds are not divided among secondary and postsecondary career and technical education programs; rather, the distribution between the eligible recipients only takes place at the local level, and §§ 678.720 and 678.740(d) of the NPRM should be revised to apply only to local-level funding instead of the Perkins eligible agency and the State's administrative dollars.

Departments' Response: As stated above, this comment was taken into consideration in making the final regulatory text changes indicating that the Perkins one-stop partner is the eligible recipient at the postsecondary level, or a consortium of eligible recipients at the postsecondary level in the local area.

Comments: A commenter stated that the regulations appear to require duplicate Perkins funding, including both State and local Perkins administrative funds. The commenter said that this is a new use of Perkins State administrative funds.

Departments' Response: Perkins State funds are no longer required to be used to pay for infrastructure costs, as outlined above, but may be made available by the State, at the State's discretion.

Comments: A commenter said that § 678.720(a) of the NPRM limits title II contributions to no more than five percent of the Federal AEFLA funds received by the State. The commenter said that the Departments should direct States to distribute a share of other title II funds to local partners to pay for infrastructure costs.

Departments' Response: The Departments do not have the authority to direct the States to do this. Section 233(a)(2) of WIOA specifically provides that up to five percent of the AEFLA funds allocated to local eligible providers shall be used for administrative costs, including costs related to the one-stop partner responsibilities in sec. 121(b)(1)(A). These responsibilities include contributing to infrastructure costs. Under sec. 233(a)(1), 95 percent of the funds allocated to local eligible providers must be used for carrying out adult education and literacy activities. However, under sec. 233(b), if the five percent cost limit is too restrictive to permit the local eligible provider to cover the local administrative costs, including the payment of infrastructure costs, the local eligible provider negotiates with the State eligible agency to determine an adequate amount to be used for non-instructional purposes. No change to the regulatory text was made in response to this comment.

Comments: A few commenters asked if the approach described in § 678.720(a) would allow ''the Federal funding stream to sidestep its responsibility to cover costs relative to the benefit received by the program.''

Departments' Response: As described at the beginning of this section, changes have been made to the local funding mechanism to explain partner responsibilities and make clear that programs must contribute their proportionate share based on proportionate use and relative benefit received.

Comments: Some commenters stated that because WIOA sec. 121 does place a cap on infrastructure funding for the VR program, § 678.720 should not state that there is no cap on the funding a one-stop partner may contribute.

Departments' Response: The caps on infrastructure funding, which are addressed in § 678.738, apply to what the Governor can require partner programs to contribute under the State funding mechanism, triggered when local partners cannot reach consensus on the local-funding mechanism. If a partner program chooses to contribute more than the cap for its program under the State funding mechanism, it can do so, as long as such contributions reflect its proportionate share, consistent with the Uniform Guidance. On the other hand, if the State funding mechanism is not triggered, neither WIOA sec. 121 nor § 678.720 of these final regulations impose a limitation on how much a core program may contribute for infrastructure costs. No change to the regulatory text was made in response to these comments.

Comments: A commenter said that infrastructure costs should use only a portion of the available administrative cost amount, otherwise there will be no funds available for other administrative costs associated with operating the program.

Departments' Response: A one-stop partner program's contributions to infrastructure costs under the local funding mechanism is limited in that contributions for administrative costs may not exceed the amount available for administrative costs under the authorizing statute of the partner program. In addition, the amounts contributed for infrastructure costs must be allowable and based on proportionate use of the one-stop centers and relative benefit received by the partner program, and must be consistent with 2 CFR part 200, including the Federal cost principles. No change to the regulatory text was made in response to this comment.

Comments: Another commenter requested additional clarification on the process and role of adult education programs in contributing to infrastructure costs.

Departments' Response: Upon further review, the Departments note that sec. 233(a)(2) of WIOA specifically provides that adult education program local administrative funds, rather than the State administration funds referenced in the NPRM, are to be used for one-stop partner responsibilities under WIOA sec. 121(b)(1)(A). These responsibilities include contributing toward one-stop infrastructure costs. Further, while AEFLA caps the amount that may be used for local administrative expenses at five percent under sec. 233(a)(2) of WIOA, the State adult education agency may increase the amount that can be spent on local administration in cases where the cost limits are too restrictive to allow for specified activities. This may include funding one-stop center infrastructure that would be part of the one-stop partner responsibilities to be carried out by the eligible provider in a local area.

The NPRM permitted the State eligible agency to use non-Federal funds that it contributes to meeting the program's matching or maintenance of effort requirements for infrastructure costs under both the local and State-level infrastructure funding mechanisms. Upon further review, the Departments have determined that providing States and local entities even greater flexibility to leverage non-Federal resources to pay infrastructure costs is appropriate.

The text of §§ 678.720 and 678.740 have been revised to provide that funds for infrastructure costs for the adult education programs under the local funding mechanism and State funding mechanisms, respectively, must include Federal funds available for local administration of the programs and non-Federal resources that are cash, non-cash, or in-kind or third-party contributions.

Comments: A few commenters said that in times of limited resources, requiring one-stop partners to pay for infrastructure costs out of administrative funds could have the effect of limiting their participation in the one-stop delivery system.

Departments' Response: Each one-stop partner will enter negotiations around the MOU and infrastructure funding agreement with the knowledge of their budgets and the requirements of their program statutes. The Departments hope that all partners find that developing a truly integrated one-stop center system results in efficiencies and enables partners to provide services in a cost effective manner that allows them to support the infrastructure costs of the one-stop center. No change to the regulatory text was made in response to these comments.

Comments: A commenter expressed support for the flexibility provided to partners to use State or local funding options as long as there is minimal administrative burden. A couple of commenters expressed support for State and Local WDBs to have flexibility to determine how to meet their cost sharing requirements.

Departments' Response: The Departments agree that these final regulations provide flexibility to one-stop partners in determining infrastructure funding contributions.

Comments: A commenter asked if there is a difference between administrative and overall funding for one-stop partners.

Departments' Response: As discussed above, the Federal statutes and regulations governing each of the partner programs define ''administrative costs'' differently; therefore, partners must comply with program-specific requirements governing the expenditure of funds for such purpose.

Comments: A commenter supported only administrative funds being used for one-stop infrastructure costs. Another commenter suggested that workforce development funds should not be co-mingled with career and technical education funds for purposes of funding and allocating one-stop infrastructure costs.

Departments' Response: WIOA does not require or authorize blending or co-mingling of partner funds. Rather, the local MOU and infrastructure funding agreement will identify the infrastructure and operating costs of the one-stop center and develop a cost allocation methodology to determine each partner's proportionate share for both types of costs, consistent with the Uniform Guidance set forth in 2 CFR part 200. This process is similar to what has been done by one-stop partners for several years and it has been working well among one-stop centers in many local areas. Partners can contribute cash, noncash, or third-party in-kind contributions to the Local WDB to satisfy their share. However, infrastructure costs, unlike other shared operating costs, do not include personnel costs and therefore may not be paid for with in-kind personnel time. No change to the regulatory text was made in response to these comments.

Section 678.725 What happens if consensus on infrastructure funding is not reached at the local level between the Local Workforce Development Board, chief elected officials, and one-stop partners?

The Departments have concluded that WIOA sec. 121(h)(1)(A)(i) requires that consensus agreement on the methods of sufficiently funding the costs of infrastructure be reached in negotiations, beginning July 1, 2016. The Departments informed the public and all relevant parties that this section of the WIOA regulations will not be implemented for PY 2016. The workforce development system was informed of this decision through the issuance of a Frequently Asked Question (FAQ) that was posted on agency Web sites on January 28, 2016 (see *https://www.doleta.gov/wioa/FAQs.cfm*). The regulatory text of this section has been revised to further clarify these provisions and to provide that the provisions outlined in this section on the State funding mechanism will be applicable to program years beginning with PY 2017. Before that time, State agencies of the Governor will have issued the mechanism to follow if a local area fails to reach a local infrastructure funding agreement through the process of negotiating MOUs with the required programs.

Section 678.725 states that failure to sign the MOU containing the final infrastructure funding agreement or interim agreement by the beginning of each program year would trigger the State funding mechanism. This section states that Local WDBs must notify the Governor by the deadline established by the Governor's infrastructure guidance developed under § 678.705(b)(3) if the local partners cannot reach consensus. The State will monitor the local areas to address violations of the Governor's guidance. The Governor's guidance might establish an earlier date for notification of a lack of consensus to the State, or of milestones or decision points in the negotiation process, to ensure the uninterrupted services of the one-stop services in the local area. A detailed discussion of the Departments' responses to public comments received on this section follows immediately below.

Comments: A commenter suggested that the regulations should state that if the Governor has to intervene to establish local contributions, that the contribution will be supported with similar funding sources for all contributors.

Departments' Response: The State funding mechanism will be made public prior to application in any local area, and the framework used to determine contributions is the same for all contributors (see § 678.730). There is no statutory requirement in WIOA sec. 121(h) that partners contribute funds for one-stop infrastructure costs under the State funding mechanism from similar sources, as the commenter recommends. The State funding mechanism is developed at the State—not the Federal—level; it would not be appropriate to accept the commenter's suggestion. The Departments decline to do so.

The framework used to determine contributions, however, would be the same for all contributors statewide (see § 678.730). It also should be noted that, while under the local funding mechanism partner programs may contribute through any funds allowed by their authorizing statutes, under the State funding mechanism, infrastructure funds must come from administrative funds for the majority of partner programs.

Section 678.730 What is the State one-stop infrastructure funding mechanism?

This section—as well as §§ 678.735 and 678.740—has undergone significant changes from the NPRM in both content and structure, although the core principles of the State funding mechanism remain the same. Several sections have been added to both break the previous section into more concise parts and to provide further clarity and structure to the State funding mechanism regulations, including § 678.731, which outlines the steps to implement the State mechanism. The Departments recognize that the State

funding mechanism is still complex, and further guidance regarding its design and implementation will be released.

As outlined in § 678.730(b)(1) through (3) of this section, the framework for the State funding mechanism consists of three essential steps to be performed by the Governor once the State mechanism has been triggered by the submission of a notice by the Local WDB that no consensus could be reached in the MOU negotiations:

(1) A budget must be determined for the infrastructure costs for one-stop centers in the local area (§ 678.735).

(2) Each partner's proportionate share must be determined (§§ 678.736 and 678.737).

(3) The calculation of the required funding caps must be made, along with any associated reconsiderations and adjustments to the budget or partner's proportionate share (§ 678.738).

These steps are detailed in §§ 678.731 and 678.735 through 678.738 of the regulatory text and the associated discussion sections below, which include an example scenario. A detailed discussion of the Departments' responses to public comments received on this section follows immediately below. Minor changes were made to NPRM § 678.735(b), which covered instances in which the Governor does not determine the infrastructure funding contribution for certain partners, and this section was moved to § 678.730(c) of the Final Rule.

Comments: One commenter remarked that the requirements in this section are complex, onerous, and will be costly to administer. Specifically, the commenter expressed concern with (1) the annual identification of each partner's required share based on proportionate use, in the absence of a data collection system to accurately track program participants for each partner; (2) collecting and accounting for the funds; (3) ongoing administration, including tracking each partner's contributions; and (4) periodically reviewing costs charged to each partner to ensure they are still in line with proportionate use and benefit.

Departments' Response: As mentioned above, the Departments recognize the complexities of the State funding mechanism and have taken steps to address this. While there will be a cost associated with implementing the State funding mechanism, this cost will be mitigated by the provision of all negotiation materials and documents from the local area to the Governor, as is required by § 678.735(a).

As to the collecting and accounting for funds, the Governor never actually takes possession of any funds, but instead determines a local budget in accordance with § 678.735, as well as partner contributions, and directs partners to pay for their share of infrastructure costs from the individual partner program's funds, as is specified by §§ 678.736 and 678.737. Furthermore, the Governor will not be managing the local plans; the Local WDB and one-stop operator will carry on their duties as under any locally reached agreement. The only difference in the State funding mechanism is that the Governor determines what the infrastructure funding agreement portion of the MOU looks like.

Comments: One commenter expressed confusion over how the State funding mechanism will operate. The commenter stated that in some provisions, it seems that the Governor would assemble a single statewide fund consisting of local contributions, and then distribute them to local areas using the formula established by the State WDB. In other provisions, according to the commenter, it appears that the Governor would decide on an area-by-area basis what the contributions from each partner should be, and collect and allocate those funds to that local area only. Another commenter requested additional clarity on how this mechanism would work, particularly when there is potential for conflict between the partners. A Local WDB requested examples of creating and implementing the one-stop funding provisions.

Departments' Response: The Governor and the State WDB are required to develop and issue guidance to be used by the local areas in negotiating agreements for the funding of the one-stop delivery system, particularly guidance about the roles of one-stop partners and approaches to facilitate equitable and efficient cost allocation for infrastructure costs. The guidance, as required by § 678.705, also would include the development of a State funding mechanism that will be used only in the event that a local area fails to reach an agreement. As to the collecting and accounting for funds, the Governor never actually takes possession of any funds, but they instead determine a local budget in accordance with § 678.735, as well as partner contributions, and direct partners to pay for their share of infrastructure costs from the individual partner program's funds, as is stated by §§ 678.736 and 678.737.

Section 678.731 What are the steps to determine the amount to be paid under the State one-stop infrastructure funding mechanism?

This section was not in the NPRM; and therefore, the Departments did not receive any comments on it directly, but it was created in response to comments that said the State funding mechanism was confusing and overly complex. This section lists the individual steps that must be taken by the Local WDB and the Governor in order to implement the State funding mechanism in order to clarify this process.

Section 678.735 How are infrastructure cost budgets for the one-stop centers in a local area determined in the State one-stop infrastructure funding mechanism?

In response to comments pointing out the complexity of the State funding mechanism regulations, the original § 678.735 (''How are partner contributions determined in the State one-stop funding mechanism?'') was broken up into four separate sections and considerably expanded to provide more assistance in explaining how this process will work. Section 678.735 now covers the Governor's determination of the one-stop infrastructure budget under the State funding mechanism. This includes a requirement for the Local WDB to provide the Governor with all pertinent materials from the failed local negotiations (§ 678.735(a)), and provisions for a Governor adopting a budget that was agreed upon at the local level (§ 678.735(b)(1) and (2)), as well as for situations when the adoption of such a budget would not be appropriate or is impossible because one was never locally agreed upon (§ 678.735(b)(3)). In the case of the later situation, the Governor must use the formula created by the State WDB for determining the budget, as is described in § 678.745. A detailed discussion of the Departments' responses to public comments received on proposed § 678.735 follows immediately below.

In this section of the NPRM preamble, the Departments stated that Native American programs must contribute to infrastructure funding as required one-stop partners and must negotiate with the Local WDB on that contribution amount. Upon further review, the Departments have determined that Native American programs are not required to contribute to infrastructure funding, but as required one-stop partners they are encouraged to contribute. Any agreement regarding the contribution or non-contribution to infrastructure funding by Native

American programs must be recorded in the signed MOU (see WIOA sec. 121(h)(2)(D)(iv)). The Departments have determined that the regulatory text proposed in the NPRM is supported by WIOA and the revised statement above properly reflects both the regulatory text and WIOA. As such, no change to the regulatory text was necessary to address this issue.

Comments: Many commenters requested clarification on whether the 1.5 percent cap on funding one-stop infrastructure funds for title II is calculated from the State administration funds, or from the total adult education grant. The commenters stated that if it is 1.5 percent of the total grant, and the funds must be taken from the State administration funds within the grant, that would require 30 percent of the State administration funds to be used for one-stop infrastructure. The commenters asked the Departments to clarify that the cap is 1.5 percent of State administration funds, not the total grant.

Departments' Response: The calculation of the percentage of funds to be used for infrastructure is from the total State grant award. The 1.5 percent cap on contributions of funds from the adult education program is a statewide cap, as implemented in § 678.738. In accordance with § 678.738(b)(1), the Governor must ensure that the funds required to be contributed by each partner program in the local areas in the State under the State funding mechanism, in aggregate, do not exceed the statewide cap for each program. Thus, the amount of funds contributed by each AEFLA partner program in the local areas in the State, in aggregate, cannot exceed the 1.5 percent statewide cap for the AEFLA program, as calculated under § 678.738(a). The funds that the local AEFLA partners contribute toward infrastructure costs must be paid from funds that are available for local administration or from State or other non-Federal resources that are cash, in-kind, or third-party contributions.

Comments: Many of these commenters also stated that it is not fiscally practical for programs such as adult education and NFJP that cover multiple Local WDB regions to give 1.5 percent to each Local WDB. These commenters asked the Departments to clarify that a local program only needs to provide a maximum of 1.5 percent of its administration funds to infrastructure costs.

Departments' Response: For the State funding mechanism, infrastructure costs for the adult education program authorized by title II of WIOA must be paid from funds that are available for local administration or from State or other non-Federal resources that are cash, in-kind, or third-party contributions. No matter the program, be it NFJP, adult education, or other, the percentage cap mentioned in the comment does not apply at the local level or to areas under the local funding mechanism, but to the aggregate amount of funds for local partners of a particular program across the entire State which are in local areas operating under the State funding mechanism.

Comments: A commenter said that because only postsecondary Perkins is a mandatory partner, the 1.5 percent cap is the amount used for administration of postsecondary programs and activities. Another commenter agreed but also said that at the State level there is no distinction between funds available for postsecondary programs and those available for secondary programs. Another commenter asked whether the predetermined amounts are in addition to the ''fair share'' allocation formulas in § 678.730.

Departments' Response: To clarify, because only local postsecondary Perkins programs are mandatory one-stop partners, the 1.5 percent cap is calculated based upon the amount made available by the State for postsecondary level programs and activities under sec. 132 of the Perkins Act (distribution of Perkins funds for postsecondary education programs) and the amount of funds used by the State under Perkins Act sec. 112(a)(3) during the prior year to administer postsecondary level programs and activities, as applicable. The Departments have clarified the regulatory text to reflect this. As a reminder, the Final Rule designates that the Perkins one-stop partner is the eligible recipient at the postsecondary level, or a consortium of eligible recipients at the postsecondary level in the local area. To meet their obligations to pay infrastructure costs, Perkins postsecondary recipients may use funds available for local administrative costs under the Perkins Act, or draw from other funds made available by the State.

Comments: Some commenters expressed support for the cap for the VR contribution.

A few commenters stated that the Wagner-Peyser Act and VR program do not distinguish between administrative and programmatic funds, resulting in Wagner-Peyser Act programs in particular providing a disproportionate share of infrastructure costs. The commenters recommended the Departments study the allocation percentages no later than WIOA reauthorization in 2020.

Departments' Response: The commenters are correct that the Wagner-Peyser Act program does not make a distinction between the program funds that must be used for the provision of services and those funds that must be used for administrative costs.

WIOA requires partner contributions determined through the State funding mechanism to come from administrative sources. The ED's Rehabilitation Services Administration (RSA) has revised 34 CFR 361.5(c)(2)(viii) to clarify that the definition of ''administrative costs'' includes those costs associated with the infrastructure of the one-stop delivery system, regardless of whether the VR partner contribution is determined through the local or State funding mechanism (see ED Office of Special Education and Rehabilitative Services Final Rule, RIN 1820–AB70, Docket No. ED–2015–OSERS–0001). Historically, infrastructure costs were considered administrative based upon the statutory and regulatory provisions of the VR program. This clarification will ensure one-stop costs are treated in accordance with long-standing practices in the VR program and will ensure that similar costs are not treated differently based upon which funding mechanism is utilized to determine the VR partner infrastructure contribution.

The Departments want to make clear, however, that each program may contribute only an amount that does not exceed its proportionate share in accordance with the Uniform Guidance set forth in 2 CFR part 200 and an agreed-upon cost allocation methodology developed by the one-stop partners. In so doing, neither partner should be paying a disproportionate share because it would not be an allowable cost under the Uniform Guidance and could not be allocable to the program. The question of studying the allocation percentages in advance of the WIOA reauthorization is not pertinent to these regulations.

Comments: A few commenters said that there is an inherent inequity among the caps for various programs such that some programs' contributions to infrastructure costs, when spread across multiple local areas and one-stop centers, would be negligible.

Departments' Response: The Departments want to clarify that the statutory caps on administrative funds apply only when the State funding mechanism is triggered due to the inability of one or more Local WDBs in a State to reach consensus regarding the funding of local one-stop centers. The Departments encourage Local WDBs to develop MOUs among each of the one-

stop partners that sufficiently fund the one-stop delivery system so that the State funding mechanism, and hence the funding caps, are not needed. Because the administrative caps apply only when the State funding mechanism is triggered, partner programs may contribute more than the cap amount under the local funding mechanism. The partners' shares may be contributed in cash, non-cash, and, in certain aforementioned circumstances, in-kind contributions. However, the partners may not contribute more than their proportionate share.

Comments: A commenter remarked that the Departments should provide a more clear definition of ''proportionate benefit,'' as some partners may claim no benefit from the one-stop delivery system and therefore not contribute to infrastructure costs.

Departments' Response: The allocation of infrastructure costs by partner program must be based on methodologies that are driven by proportionate use of the one-stop centers and relative benefit received, as determined by the Uniform Guidance principles at 2 CFR part 200. The benefit is not subjective, as the commenter suggests, but rather the benefit is based on a cost allocation methodology that determines the proportion of the costs that are allocable to the use of the partner program at the one-stop center.

Comments: Another commenter urged the Departments to recognize that the Perkins Act funds systems and programs instead of individuals, so the proportionality determination will be difficult to implement because there are no data to determine relative benefit on a per-student basis.

Departments' Response: The allocation of infrastructure costs by partner program must be based on methodologies that are driven by proportionate use of the one-stop centers and relative benefit received, as determined by the Uniform Guidance principles at 2 CFR part 200. When making this determination, the calculation is per-program, rather than per-individual. The Departments do not conclude that the fact that Perkins funds systems and programs, rather than individuals, will present an issue for Governors when making this determination. In addition, the Governor has discretion to determine a reasonable cost allocation methodology provided that the calculation of proportionate share is consistent with the Uniform Guidance in 2 CFR part 200, particularly that all costs charged to partners, including Perkins partners, are in proportion to use of the one-stop center, and constitute allowable, reasonable, necessary and allocable costs. No change to the regulatory text was made in response to this comment.

Comments: One commenter hoped the funding obligations for a particular program are determined in the context of program resources and any in-kind support the one-stop receives from program participants.

Departments' Response: Infrastructure funding contributions are either determined using the local or State mechanism. Under each, the proportionate share principle is key; the partners should be contributing an amount proportionate to their use of the one-stop center. Determining this under the local mechanism is completely left up to the local partners and Local WDB to work out in the MOU, as long as it follows the Federal cost principles of the Uniform Guidance. Under the State mechanism, specific language in § 678.737(b)(2) requires the Governor to take into consideration program resources in determining proportionate share. Under both mechanisms, third-party in-kind contributions are acceptable contributions to infrastructure funding, as is detailed in § 678.720. No change to the regulatory text was made in response to this comment.

Comments: One commenter asserted that there would be many administrative difficulties for Wagner-Peyser Act contributions if they are required to be calculated on a fiscal year basis, because Wagner-Peyser Act funds are provided on a program year basis.

Departments' Response: The Departments want to make clear that there is no requirement in WIOA or these final regulations that the one-stop delivery system be funded on a fiscal year, as the commenter seems to suggest. Many of the required partners are funded on different fiscal periods (*e.g.,* some are funded on a program year basis while others are funded on a Federal fiscal year basis); so, accounting methodologies will have to be employed to resolve such differences.

Comments: A commenter encouraged the Departments to clarify their guidelines for infrastructure cost sharing, including in-kind contributions, and the use of administrative vs. program funds.

Departments' Response: The Departments acknowledge that guidance will assist stakeholders in the public workforce system with understanding how to negotiate infrastructure cost sharing agreements and understand other aspects of funding the one-stop delivery system, such as in-kind contributions and the allocation of costs. Some of this guidance is currently available in the form of TEGLs on a variety of subjects, such as, the ''*Operational Guidance to Support the Orderly Transition of Workforce Investment Act Participants, Funds, and Subrecipient Contracts to the Workforce Innovation and Opportunity Act''* (TEGL No. 38–14), ''*Workforce Innovation and Opportunity Act Transition Authority for Immediate Implementation of Governance Provisions''* (TEGL No. 27–14), ''*Vision for the One-Stop Delivery System under the Workforce Innovation and Opportunity Act (WIOA)''* (TEGL No. 4–15), ''*Guidance on Services Provided through the Adult and Dislocated Worker Program under the Workforce Innovation and Opportunity Act (WIOA or Opportunity Act) and Wagner Peyser, as Amended by WIOA, and Guidance for the Transition to WIOA Services''* (TEGL No. 3–15), ''*Workforce Innovation and Opportunity Act (WIOA) Youth Program Transition''* (TEGL Nos. 23–14 and 8–15), among others. All DOL WIOA operating guidance can be located at *www.doleta.gov/wioa*, and all associated ED documents may be found at *www2.ed.gov/about/offices/list/osers/rsa/wioa-reauthorization.html* and *www2.ed.gov/policy/adulted/guid/memoranda.html*.

In addition, cost principle guidance is provided in the Uniform Guidance at 2 CFR part 200 on the use of Federal funds, and in the existing financial Technical Assistance Guide (TAG) handbooks previously issued by DOL, which are still applicable to WIOA (*see http://wdr.doleta.gov/directives/All_WIOA_Related_Advisories.cfm*). Nevertheless, the Departments' intention is to continue to provide system guidance and technical assistance on all aspects of WIOA throughout the life of this authorizing legislation.

Comments: A commenter said that for the TANF program, the cap of 1.5 percent of the Federal funds provided to ''carry out that education program or employment and training program'' should instead state ''education program or employment and training activities.'' The commenter also urged the Departments to clarify that ''education program'' only refers to the TANF funds used to serve adults or teen heads of households in needy families, not dependent children in low-income households.

Departments' Response: The addition of § 678.738(c)(5) provides that for purposes of TANF, the cap on contributions is determined based on total Federal TANF funds expended by the State for ''work, education, and training activities'' during the prior

Federal fiscal year as reported by States to HHS on the Quarterly TANF Financial Report form (and associated administrative expenditures).

Section 678.736 How does the Governor establish a cost allocation methodology used to determine the one-stop partner programs' proportionate shares of infrastructure costs under the State one-stop infrastructure funding mechanism?

This new section was created from portions of proposed § 678.735 in the NPRM in response to comments regarding the complexity of the State funding mechanism. The new § 678.736 details how the Governor is to establish a cost allocation methodology for determining partner programs' proportionate shares of one-stop infrastructure costs. The idea that partner programs should make contributions to infrastructure costs that are proportionate to the benefit they receive from one-stop centers is central to the funding of the one-stop delivery system under WIOA. There are a variety of methods that may be used—*e.g.,* square footage occupied, number of staff present, number of people served—to make the determination of partner programs' proportionate share. It is important that the Governor choose a methodology that is consistent with the requirements of the Uniform Guidance found at 2 CFR part 200.

Section 678.737 How are one-stop partner programs' proportionate shares of infrastructure costs determined under the State one-stop infrastructure funding mechanism?

This new section is another created from the NPRM's proposed § 678.735 in response to comments regarding the complexity of the State funding mechanism, and details the steps that should be taken by the Governor to determine partner programs' proportionate share of the one-stop infrastructure costs. In addition to the methodology determined in § 678.736, § 678.737(b)(2) states that the Governor must take into account a number of factors, including the costs of administration of the one-stop delivery system for purposes not related to one-stop centers for each partner, costs associated with maintaining the Local WDB or information technology systems, as well as the statutory requirements for each partner program, all other applicable legal requirements, and the partner program's ability to fulfill such requirements. The Governor may also take into account the extent to which proportionate shares were agreed upon in the failed local negotiations, as well as any other elements of the negotiation process provided to the Governor per § 678.735(a).

Section 678.738 How are statewide caps on the contributions for one-stop infrastructure funding determined in the State one-stop infrastructure funding mechanism?

This is the final new section created from proposed § 678.735 in response to comments regarding the complexity of the State funding mechanism, covering the caps that apply to program funding that can be designated by the Governor as one-stop infrastructure funding. Paragraph (a) of § 678.738 is a step-by-step instruction on how the Governor is to calculate the cap for each program. First, the Governor determines the maximum potential cap amount in the State by determining the amount of Federal funds provided to the State to carry out a one-stop partner program for the applicable fiscal year multiplied by the cap percentage applicable to that program under paragraph (c) of § 678.738. Second, the Governor selects a factor or factors that reasonably indicates the use of one-stop centers in the State (such as the total population). The Governor then determines the percentage of that factor applicable to the local areas that reached consensus under the local funding mechanism (for example, 70 percent of the State population resides in those areas). This percentage is applied to the amount of the maximum potential cap. The resulting amount (70 percent of the maximum potential amount) is then deducted from the maximum potential cap amount to produce the applicable cap amount for the local areas subject to the State funding mechanism. This approach recognizes that the statewide caps only apply to those local areas that do not reach consensus, and are not applicable to the local areas that reach agreement. Therefore, the actual amounts of infrastructure agreed to in those local areas that reach agreement should not affect the cap amounts available to those local areas that do not reach agreement. Instead, the applicable cap is determined by selection and application of a factor or factors that would reflect the relative expected use of one-stop centers in the local areas subject to the cap.

Paragraph (b) details the requirement that, in aggregate, a program statewide does not exceed the caps, including only those local partner programs in areas under the State funding mechanism (§ 678.738(b)(1)), as well as the steps to be taken in the event that the proportionate share of a partner causes a program's aggregate infrastructure funding to exceed the cap (§ 678.738(b)(1) through (4)).

Paragraph (c) of § 678.738 sets out the specific limitations put on infrastructure funding from each program, and § 678.738(d) gives instructions on calculating the caps for programs for which it is not feasible to determine the amount of Federal funding used by the program until the end of the fiscal or programmatic year. While the methodologies of these programs somewhat differ in application, the methodologies for the CSBG and TANF programs are similar to that used for the Perkins program because in each case the State is asked to make a determination regarding the amount of administrative costs that are related to relevant education, employment, and training activities carried out within the respective program.

The following is an example scenario to determine one partner program's cap: Partner Program A (a WIOA formula program) receives [*x*]—in this example, $30 million—to carry out its program in the State in the applicable year. There are seven local areas in the State, two of which have not been able to reach consensus through the local funding mechanism. Because Partner Program A is a WIOA formula program, the limitation percentage [*p*] given in § 678.738(c)(1) is applied to the Federal dollars received in total by the program statewide. The example below uses three percent for [*p*], resulting in a maximum potential cap of $900,000 [*y*]. The maximum potential cap [*y*] is calculated by multiplying the program dollars [*x*] by the percentage [*p*], in this example yielding $900,000.

$$px = y$$

$$.03 \times 30{,}000{,}000 = 900{,}000$$

The Governor then selects a factor [*f*] that reasonably indicates the use of one-stop centers in the State—such as total population. The Governor then determines the percentage of the total population that resides in the local areas that have reached agreement. In this example, local areas that have reached agreement represent 70 percent of the State's total population. Next the Governor applies this percentage to the maximum potential cap [*y*], $900,000, giving the amount of these dollars represented by the local areas in agreement [*z*]: $630,000.

$$fy = z$$

$$0.7 \times 900{,}000 = 630{,}000$$

Finally, the Governor subtracts this amount [*z*], $630,000, from maximum potential cap [*y*], $900,000, giving the amount of the cap to be used for those two areas under the State funding mechanism [*c*], $270,000.

$y - z = c$

900,000 − 630,000 = 270,000

This means that the aggregate of the infrastructure contributions made by the two local partner programs in local areas operating under the State funding mechanism must not exceed $270,000. This calculation must then be done for all the other partner programs in those local areas.

For the VR program, WIOA sec. 121(h)(2)(D)(ii)(III) and § 678.738(c)(3) establishes the limitations for the amount the VR program can be required to contribute toward the funding of the one-stop delivery system's infrastructure costs. In the first year that the State funding mechanism could be applicable—*e.g.,* PY 2017 beginning July 1, 2017 (see explanation above)—the VR program may contribute no more than 0.75 percent of the State's FY 2016 VR allotment (see sec. 121(h)(2)(D)(ii)(III)(aa)). If a local area fails to reach an agreement for purposes of PY 2018, the VR program cannot be required to pay more than one percent of its FY 2017 VR allotment (see sec. 121(h)(2)(D)(ii)(III)(bb) of WIOA). If a local area fails to reach agreement for purposes of PY 2019, the VR program cannot be required to contribute more than 1.25 percent of its FY 2018 VR allotment (WIOA sec. 121(2)(D)(ii)(III)(cc)). Finally, if a local area fails to reach an agreement for PY 2020 and all subsequent years, the VR program cannot be required to contribute more than 1.5 percent of its FY 2019 or, as appropriate, any subsequent year's VR allotment (WIOA sec. 121(h)(2)(D)(ii)(III)(dd)). In States where there are two VR agencies (a general agency and a blind agency), the combined contribution from these programs cannot be required to exceed the cap, which is based on the total VR allotment to the State. In addition to this specific funding limitation, each program, including the VR program, must comply with the requirements of the program's authorizing statute, all other applicable legal requirements, and the requirements in this subpart when contributing funds to cover one-stop center infrastructure costs.

In determining the maximum amount that a VR program could contribute toward the one-stop infrastructure costs under the State funding mechanism, the Governor would first have to determine the amount of the VR allotment to the State for the applicable year as described above. Because the allotment amount to any given State could change throughout a Federal fiscal year due to reductions made for maintenance of effort deficits, funds returned for reallotment to other States, and additional funds received by a State in reallotment, a Governor should base the limitations for infrastructure costs on the final VR allotment amount for the State for the applicable Federal fiscal year (WIOA sec. 110 and 111 of the Rehabilitation Act, as amended by title IV of WIOA). The final VR allotment for any Federal fiscal year may not be determined until September 30 of that fiscal year. Prior to that time and for planning purposes, the Governor can use historical data to estimate or project its contributions. However, these fluctuations of the VR allotment in any particular Federal fiscal year should not affect the VR program's percentage that can be attributed to the infrastructure costs under the State funding mechanism because the final VR allotment for any year would be known well before the implementation of the State funding mechanism for any applicable program year.

It is important to note that WIOA sec. 121(h)(2)(D)(ii)(III) refers to a program year (July 1 through June 30), not a Federal fiscal year (October 1 through September 30). However, because the VR program funds are provided to a State on a Federal fiscal year basis, the Departments have interpreted ''program year'' in this context, for purposes of determining the VR program's funding limitations, as meaning the funds provided to the State to operate the VR program in a Federal fiscal year.

As this section did not exist in the NPRM, the Departments did not receive any comments that directly refer to it, but did receive comments referring to some of the contributing material, which are discussed under § 678.635 of the Final Rule part 678 discussion.

Section 678.740 What funds are used to pay for infrastructure costs in the State one-stop infrastructure funding mechanism?

This section describes the funding sources that are used under the State funding mechanism by WIOA title I programs, adult education programs, the Carl D. Perkins program, and other WIOA authorized programs. Changes were made in response to comments to § 678.740(d), which addresses Carl D. Perkins program infrastructure funding sources. Because the State is no longer the default Perkins program partner, the Departments' modified this section to state that Perkins postsecondary recipient one-stop partners may use funds available for administrative expenses to pay infrastructure costs and that these funds may be supplemented by any additional funds the State chooses to make available. A detailed discussion of the Departments' responses to public comments received on this section follows immediately below.

Comments: A commenter expressed concern that § 678.740(d) implies an incentive for local areas to fail to develop a local MOU, as defaulting to the State funding mechanism could result in local areas gaining access to State administrative funds. The commenter suggested that the Departments should revise this paragraph to clarify that this is not the case, particularly with regard to Perkins funds, and also revise other paragraphs in the State funding mechanism sections to emphasize local contributions.

Departments' Response: As stated above, § 678.740(d) has been reworded, which has taken the emphasis away from State funds and put more on local entities funding infrastructure costs. No further change to the regulatory text is being made in response to this comment.

Comments: Another commenter made the opposite argument, saying that because this section is about a State funding mechanism, State funds should be used. The commenter also said that in cases where the local Perkins partner is entering into an MOU in the local funding mechanism option, the regulations should clarify that no local recipient is required to contribute more than the cap percentage (*e.g.,* 1.5 percent) in local administrative funds if other partners in that local area are unable to negotiate an MOU and the State process is used for those partners.

Departments' Response: As the State is no longer the default Perkins partner, the suggested course of action no longer applies to the situation. No change to the regulatory text was made in response to this comment.

Comments: A commenter said that Combined State Plan partner programs such as TANF would be limited to the administrative funds at their disposal. Another commenter said that as long as the costs of Senior Community Service Employment Program (SCSEP) funds spent on participants and enrollees assigned to the one-stop is counted toward the cost allocation, the regulations will minimize the impact on this program.

Departments' Response: The TANF program is not a Combined State Plan partner program in the one-stop delivery system, but rather it is a required partner pursuant to WIOA sec. 121(b) unless exempted per sec. 121(b)(1)(C). The SCSEP program is a required partner and must contribute to the infrastructure costs of the local one-stop delivery system. The allocation

methodology agreed upon by the partner programs or the Governor may include participant counts served by the one-stop center. No change to the regulatory text was made in response to this comment.

Section 678.745 What factors does the State Workforce Development Board use to develop the formula described in Workforce Innovation and Opportunity Act sec. 121(h)(3)(B), which is used by the Governor to determine the appropriate one-stop infrastructure budget for each local area operating under the State infrastructure funding mechanism, if no reasonably implementable locally negotiated budget exists?

This section also underwent significant changes in response to public comments received that stated that the State WDB formula provisions were confusing, overly complicated, and could violate authorizing statutes. In order to reduce the confusion centered around the formula, step-by-step instructions are provided on how to apply the formula when a locally negotiated budget does not exist. The new provisions only require the use of the formula in specific situations regarding the determination of the one-stop budget by the Governor (*i.e.,* when the Governor cannot, or has chosen not to, accept a locally agreed upon one-stop budget). The formula is to identify factors and the associated weights of these factors that the Governor must consider when determining the one-stop budget under these situations. Included in these factors are those statutorily required by WIOA and any other factors related to the operation of the one-stop delivery system that the State WDB sees as appropriate. A detailed discussion of the Departments' responses to public comments received on this section follows immediately below.

Comments: A commenter asked how ''a redirection of Federal funds from one program to another will not negatively impact the calculation of the Perkins Act's 'maintenance of effort' provisions or Federal 'supplement not supplant' provisions.'' The commenter said that these provisions would likely be violated if any Perkins State administrative funds are redirected to one-stop infrastructure.

Departments' Response: Because of changes to this provision, the commenter's concerns regarding Perkins State administrative funds are no longer applicable. Additionally, partner contributions must not exceed the partner's proportionate share.

Comments: Likewise, the commenter stated that the Departments need to ensure that the reallocation formula in this part ensures that local Perkins funds return to the local area from which they were derived in order to adhere to the within-State allocation formula of the Perkins Act, sec. 132(a)(2).

Departments' Response: Again, because of the changes to the formula provision, that is that the Governor will never actually collect and re-allocate funds, this commenter's concerns are no longer applicable.

Comments: A commenter said that § 678.745 should include a descriptor of the type of one-stop center (*e.g.,* comprehensive, affiliate, satellite) in the funding formula policy.

Departments' Response: The formula applies to all one-stop center and affiliated sites under the State mechanism where the Governor has not accepted a locally agreed upon budget. Therefore, it is not necessary to specify the type of one-stop center.

Section 678.755 What are the required elements regarding infrastructure funding that must be included in the one-stop Memorandum of Understanding?

Comments: A couple of commenters urged the Departments to encourage shared staffing for similar partner positions (*e.g.,* business development). These commenters said that encouraging partnerships beyond infrastructure could avoid duplication of efforts, particularly with respond to employer services.

Departments' Response: The Departments encourage the partners to consider all available means of integration at the one-stop centers, thereby improving the effectiveness and efficiency of the partner programs in the one-stop delivery system. There is nothing in WIOA or these final regulations that prohibit partner programs in sharing certain key staff positions. However, the Departments caution that such sharing of staff would necessitate the retention of adequate records supporting the allocation of personnel costs between the programs, which also must be consistent with the Uniform Guidance. Furthermore, the Departments reiterate that the sharing of staff will not be considered an infrastructure cost, but it may be paid with other funds in accordance with WIOA sec. 121(i).

Section 678.760 How do one-stop partners jointly fund other shared costs under the Memorandum of Understanding?

The Departments added paragraph (c) to explain that contributions to the additional costs related to operation of the one-stop delivery system may be cash, non-cash, or third-party in-kind contributions. This addition is consistent with the changes made in § 678.720(c). As a result the remaining paragraphs were renumbered.

Comments: Multiple commenters expressed confusion about whether the 1.5 percent spending cap for infrastructure costs for the title II program includes the joint contribution to funding the costs of career services. One commenter recommended that it include the cost of career services so that more funds are available to provide AEFLA services.

Departments' Response: Contribution to shared cost including career services are separate from contributions for infrastructure cost and thus the 1.5 percent cap on contributions does not apply to shared cost.

Comments: Two commenters requested a definition of ''additional costs relating to the operation of the one-stop delivery system.'' Another commenter asked whether this phrase includes the cost for the one-stop operator.

Departments' Response: The Departments will not define additional costs. By allowing States to define additional costs, they will be in a better position of assisting their local areas in meeting the demand and challenges of operating a one-stop delivery system. No change to the regulatory text was made in response to these comments.

7. One-Stop Certification (20 CFR Part 678, Subpart F [678.800]; 34 CFR 361.800; 34 CFR 463.800)

Subpart F of part 678 implements the requirements in WIOA sec. 121(g) that the Local WDB certify the one-stop center every 3 years. The certification process is important to setting a minimum level of quality and consistency of services in one-stop centers across a State. The certification criteria allow States to set standard expectations for customer-focused seamless services from a network of employment, training, and related services that help individuals overcome barriers to becoming and staying employed.

The one major change to this section from what was published in the NPRM was made in response to comments regarding the use of the provision of services beyond regular business hours as a certification factor for one-stop centers. While the Departments have retained this as a certification criterion, the language has been changed at § 678.800(b) to make the consideration of this factor conditional on the Local

WDB determining that there is a need in the local area for such an extension of service hours. The Departments also would like to assure readers that it is highly unlikely that a one-stop center's certification would hinge on such a factor, as there are many criteria that must be taken into account in the certification process.

Section 678.800 How are one-stop centers and one-stop delivery systems certified for effectiveness, physical and programmatic accessibility, and continuous improvement?

General Comments About One-Stop Certification

Comments: Several commenters addressed the proposed timelines for one-stop certification and updates to the evaluation criteria. A commenter stated that the proposed timelines could conflict or overlap. A few commenters suggested that all reviews should be on a 4-year cycle. A few State and Local WDBs recommended that the certification criteria be updated every 3 years to match the certification process. A few commenters asserted that it is impractical for all Local WDBs to update the local additional certification criteria every 2 years as part of the local plan update process. Another commenter suggested that both timelines should be event-dependent.

Departments' Response: The Departments have made no substantive changes to this section other than the changes to § 678.800(a)(1) and (b) discussed below. The timelines related to one-stop certification are statutory: Certification every 3 years from WIOA sec. 121(g)(1) and updated criteria every 2 years from WIOA sec. 121(g)(5). However, the regulations require certification ''at least'' every 3 years, and Local WDBs may certify more often if it helps align timelines with other efforts. No change to the regulatory text was made in response to this comment.

Comments: One commenter asserted that giving Local WDBs the authority to certify one-stop centers creates a conflict of interest. Another commenter stated that Local WDBs that are one-stop operators are currently permitted to certify themselves.

Departments' Response: The Departments agree that Local WDBs should not certify themselves but have not made changes to this section as § 678.800(a)(3) already stated that State WDBs must certify one-stop centers when the Local WDB is the one-stop operator.

Comments: A commenter suggested that the Departments should provide guidance to State WDBs on developing objective criteria and training or assistance the State WDBs can share with Local WDBs on implementing certification procedures.

Departments' Response: On August 13, 2015, the Departments issued a joint vision for the implementation of American Job Centers as TEGL No. 04–15, and have released other technical assistance materials since then as well. All of these guidance documents and other pieces of guidance relating to WIOA may be found at *http://wdr.doleta.gov/directives/All_WIOA_Related_Advisories.cfm, www2.ed.gov/about/offices/list/osers/rsa/wioa-reauthorization.html*, and *www2.ed.gov/policy/adulted/guid/memoranda.html*. The Departments' staffs continue to remain available for technical assistance.

Comments: A commenter stated that the State Plan should define the certification process for the one-stop delivery system.

Departments' Response: The State Plan may include the one-stop certification process if a State wishes to include it, but the Departments do not consider it appropriate or necessary to require such an inclusion in the State Plan. No change to the regulatory text was made in response to this comment.

Comments: Another commenter recommended that certification criteria focus on system performance instead of program performance; effective communication and data sharing across systems while safeguarding information; and availability of diverse and necessary resources at one-stops.

Departments' Response: States that wish to focus on certain aspects of one-stop center quality can establish criteria for those aspects, but the statutorily required criteria at WIOA sec. 121(g)(2) must be included. The State WDB-established criteria create a baseline of consistency across the State, and States can establish policies about processes and methods. No change to the regulatory text was made in response to this comment.

Comments: A few commenters suggested that the State WDB should consult with Local WDBs when updating certification criteria.

Departments' Response: The Departments agree and have revised § 678.800(a)(1) to clarify that the State WDB must consult with chief elected officials and Local WDBs when it reviews and updates criteria, not only when it establishes criteria.

Comments: A few commenters requested flexibility for States to determine the certification method, while other commenters stated that all Local WDBs should use the same process to certify one-stops.

Departments' Response: While all Local WDBs within a State must use the State required certification criteria, WIOA sec. 121(g)(3) allows Local WDBs to establish additional criteria to be used in that local area as well. The Departments have concluded that Local WDBs should be able to choose the process for certifying one-stop centers that works best for each local area. No change to the regulatory text was made in response to these comments.

Comments: A commenter asked whether the State WDB has discretion to determine the method of certification, and whether the State WDB can delegate the certification process.

Departments' Response: The State WDB does not certify, but it must set the certification criteria. The Departments have determined that this responsibility is an important strategy to establish quality one-stop centers and have not incorporated the suggestion to allow the State WDB to delegate it. The State WDB must approve the final certification criteria.

Comments: Another commenter asked whether the intent is to certify each one-stop center or the local area one-stop delivery system.

Departments' Response: WIOA sec. 121(g)(4) and this section of the regulation state that the Local WDB must certify one-stop centers, not the one-stop delivery system. Although the same criteria used to make this certification are to be used in evaluating a local area's one-stop delivery system, there is no certification process for the one-stop delivery systems themselves, only the one-stop centers that together make up the one-stop delivery system.

Comments: A few commenters asked what would happen if the one-stop center does not meet the evaluation criteria or get certified.

Departments' Response: Paragraph (d) of § 678.800 and WIOA sec. 121(g)(4) state that local areas that do not certify their one-stop centers are not eligible to use infrastructure funding under the State infrastructure option until such certification is complete. Local WDBs can consider ramifications for failing one-stop certifications in their one-stop operator contracts.

Comments: One commenter asked whether technical assistance will be provided to one-stop centers that fail certification.

Departments' Response: States may provide technical assistance to one-stop centers that fail certification or to any other one-stop center that may require or ask for it.

Evaluations of Effectiveness

Comments: Several commenters expressed concern regarding the requirement to include the provision of service outside of regular business hours as a factor to be considered when evaluating one-stop center effectiveness, stating that many one-stop centers may not be able to provide such services and that an inability to do so should not count against them.

Departments' Response: The Departments considered these concerns, and have determined that this should still remain one of the many factors to be considered in evaluating one-stop center effectiveness. Paragraph (b) of § 678.800, however, was revised to include that the consideration of this factor is conditional on whether the applicable Local WDB has determined there is a workforce need for the provision of service outside of regular business hours. The Departments stress that this is one of many factors to be taken into account when evaluating effectiveness, and that it is very unlikely that a one-stop center will fail to qualify for certification solely for not providing services outside of regular business hours.

Comments: Several commenters remarked that the NPRM's inclusion of customer satisfaction in the evaluation of a one-stop center's effectiveness goes beyond what is included in WIOA. The commenters stated that, while this is an important measure, it is not necessarily a measure of effectiveness, and it is also subjective.

Departments' Response: This provision is supported by the statutory requirement to consider how well a one-stop center meets the workforce development needs of local employers and participants in WIOA sec. 121(g)(2)(B)(iii). The Departments have determined that reviewing customer satisfaction is an important part of knowing whether services to employers and participants are effective and meet their needs, and will aid one-stop operators, Local WDBs, and State WDBs in the continued improvement of the one-stop delivery system required by WIOA. For this reason, the Departments have not removed this requirement from the regulations. No change to the regulatory text was made in response to these comments.

Comments: Another commenter stated that Local WDBs could assess customer satisfaction through surveys centered on the one-stop center's responsiveness to the needs of employers and customers, the availability and quality of workshops, and the repeat usage over a period of time.

Departments' Response: The regulations are not specific on how customer satisfaction must be measured and the Departments have concluded that State WDBs and Local WDBs can determine how best to include it as a component of a one-stop certification criteria.

Comments: Two commenters said that the proposed performance accountability metrics already address customer satisfaction.

Departments' Response: To clarify, the proposed accountability metrics concerning customer satisfaction and the requirements in § 678.800 related to customer satisfaction are referring to the same mechanism. This section gives the requirement to review and apply the customer satisfaction data to measure the effectiveness of one-stop centers; the actual measure, its technical aspects, and the timing of the data collection are outlined in § 677.160 (see Joint WIOA Final Rule).

Comments: A few commenters asserted that the most efficient and effective systems are where the Local WDB is the one-stop operator.

Departments' Response: The Departments have determined that regular measurements of effectiveness and efficiency will assist States in determining the most effective one-stop operator, including whether it is effective and efficient for a Local WDB to be the operator.

Evaluations of Accessibility

Comments: Several commenters expressed support for the Departments' dedication to ensuring accessibility to individuals with disabilities. A few commenters also stated that the requirement for one-stop centers to be programmatically and physically accessible should be reiterated in this part.

Departments' Response: The Departments agree and have updated § 678.800(e) to clarify that all one-stop centers must be programmatically, as well as physically, accessible.

Comments: A few commenters also suggested that the language on programs being in integrated settings should be stronger and use the phrase ''in an integrated setting'' rather than ''in the most integrated setting appropriate.'' The commenters also stated that programs should be in community-based settings.

Departments' Response: The Departments have retained the phrase ''in the most integrated setting appropriate'' to describe our expectations for integrated and community-based settings in order to remain consistent with WIOA sec. 188 and the Americans with Disabilities Act.

Comments: One commenter stated that the Departments should provide full accessibility and be in full compliance with civil rights laws, the Americans with Disabilities Act, and secs. 504 and 508 of the Rehabilitation Act. The commenter further stated that one-stop operators should have additional training on the importance of full accessibility to individuals with disabilities for all services.

Departments' Response: The Departments are fully committed to accessibility and adhering to civil rights laws. The regulation reiterates the requirement for full accessibility in §§ 678.800(e), 678.305, and 678.310. The Departments have provided, and will continue to provide, technical assistance on accessibility. No change to the regulatory text was made in response to this comment.

Comments: Another commenter stated that there should be transparency in reporting States' performance in physical and programmatic access.

Departments' Response: The DOL currently is conducting a study of accessibility in one-stop centers, which will be published and made available to the public when completed in the summer of 2016. Potential violations of civil rights laws, including the inadequate provision of programmatic and physical accessibility, are investigated by DOL's Civil Rights Center, which may share major findings with the public. States also can improve transparency by making certification results public.

Comments: One commenter expressed concern that accessibility evaluation criteria and guidelines will be determined by the State and Local WDBs. The commenter recommended the Departments establish general guidelines for minimum standards, targets, and metrics.

Departments' Response: The regulations keep the determination of accessibility criteria as a responsibility of the State and Local WDBs, as required by statute, but such criteria must meet, at a minimum, the legal standards established by the regulations implementing WIOA sec. 188, set forth at 29 CFR part 38. DOL has issued best practices in how recipients can comply with accessibility laws in a guide shared in Training and Employment Notice No. 01–15, ''Promising Practices in Achieving Universal Access and Equal Opportunity: A Section 188 Disability Reference Guide.''

Evaluations of Continuous Improvement

Comments: A commenter expressed concern about the use of performance outcome data in evaluations of continuous improvement because it may not be timely enough to identify and resolve issues.

Departments' Response: States have the flexibility to add additional data to the criteria that are more timely if they wish, but the Departments have determined that no additional data other than that which is already included in the regulations should be required.

8. Common Identifier (20 CFR part 678, subpart G [678.900]; 34 CFR 361.900; 34 CFR 463.900)

The regulations in 20 CFR part 678, subpart G and 34 CFR 361.900 and 463.900 promote increased public identification of the one-stop delivery system through use of a common identifier across the nation, consistent with WIOA sec. 121(e)(4). Section 678.900 designates the name ''American Job Center'' as the common identifier for the one-stop delivery system. This designation was made by the Secretaries after consulting with the heads of other appropriate departments and agencies, representatives of State WDBs and Local WDBs, and other stakeholders in the one-stop delivery system through various means. This was a process started under WIA, and many one-stop centers are already incorporating use of either the ''American Job Center'' title or the associated tag line ''proud partner of the American Job Center network'' into their branding.

The major changes in this section in response to comments relate to the date by which rebranding of the one-stop centers is to be complete. The date by which one-stop centers are required to rebrand all of their primary electronic resources, such as Web sites has been changed to [90 days from the publication of this Final Rule] instead of July 1, 2016, which will provide a reasonable time to effectuate this provision. Additionally, any new products and materials printed, purchased or created after [90 days from the publication of this Final Rule] must comply with the new branding requirements. However the Departments have determined that extending the deadline to July 1, 2017 for other branding, including activities, physical products and signage, would allow an appropriate amount of time for the rebranding to be completed. Additionally, the Departments will not object if the one-stop centers continue to use materials not using the ''American Job Center'' branding which are created before [90 days from the publication of this Final Rule] until those supplies are exhausted.

Section 678.900 What is the common identifier to be used by each one-stop delivery system?

Comments: Many commenters expressed opposition to the use of American Job Center as a common identifier. Several commenters said that they already have a common brand used in their State, and it would be confusing to the public to discontinue the use of an existing brand and begin utilizing new logos and branding. A few Local WDBs asked that States have flexibility in branding, such as by utilizing ''American Job Centers of [State name].'' Another commenter suggested that centers should be permitted to utilize their program name, followed by ''a partner in America's Workforce System.'' One commenter requested a waiver for States that already have a widely known brand. Another Local WDB commented that the Departments should allow States with approved names under WIA be able to continue to use those names.

Departments' Response: The Departments are not requiring that any State or local area discontinue use of their existing name or brand. The Departments recognize that many States and local areas use their own brand, some of which are well known. The requirement in § 678.900(c) to use either the ''American Job Center'' identifier or ''a proud partner of the American Job Center network'' as a tag line already allows the usage of other identifiers or brands or logos. One-stop centers that want to use their existing name followed by a tagline may use their name along with ''a proud partner of the American Job Center network;'' the use of ''a partner in America's Workforce System'' alone would not meet the requirement. The Departments have concluded that this section adequately states that the use of additional identifiers is permitted, and what the tagline requirement is, and so have not made changes in response to these comments. States that wish to use ''American Job Center of [State name]'' would be including the American Job Center identifier, and thus in compliance with this regulation. While the Departments did not make a change to list different permutations that would be allowed, the Departments will issue guidance on the usage of the identifier.

Comments: Some commenters suggested that the identifier use ''career'' instead of ''jobs.'' Some commenters also stated that American Job Center implies that only citizens can be served. One commenter asked what ''American'' means in this context. Another commenter stated that American Job Center implies that only one service—job placement assistance—is available, and does not address the other services available at one-stop centers.

Departments' Response: The Departments considered the concerns about ''Job'' and ''American'' shared by commenters but have maintained the name American Job Center. The Departments see value in both ''Job'' for its simplicity, directness, and description of the end goal of virtually all services; the Departments also see value in ''Career'' for its emphasis on growth. In deciding between the two, the Departments have chosen to continue to use ''job'' because many States and local areas have already adopted ''American Job Center'' or have incorporated the ''proud partner of the American Job Center network'' tag line into their established branding. Additionally, ''American'' is not meant to imply that only citizens can be served, but used to communicate that the centers are part of a nation-wide system.

Comments: A few commenters asked the Departments what the logo is for the common identifier. Some commenters asked that the new logo or icon be something simple that can be added to existing signage without changing the names of existing centers. Some commenters stated that they needed clearer expectations to implement the common identifier.

One commenter expressed support for the proposed common identifier. A few commenters expressed support for the flexibility provided by the use of ''a proud partner of the American Job Center network'' alongside existing brands. Another commenter supported the use of a common identifier, but cautioned that improper use of the logo, brand, or tagline could dilute the brand or mislead the public. This commenter stated that American Job Center should be utilized only for comprehensive one-stop centers, with ''A proud partner of the American Job Center Network'' permitted to be used at other sites. The commenter also recommended that the Departments trademark the common identifier.

Departments' Response: The logo for American Job Center is available at *www.dol.gov/ajc* and its use, implementation expectations, and suggestions for adoption at various price points will be released in upcoming guidance and technical assistance. In order to allow job seekers and employers to find all the locations that

could assist them, the Departments are continuing to allow all one-stop centers, comprehensive and affiliate, to use ''American Job Center'' or the tagline ''a proud partner of the American Job Center network.'' The DOL has trademarked the identifier American Job Center, as a commenter suggested.

Comments: A few commenters asserted that this will be an expensive unfunded mandate for most States, and requested that the Departments provide funding to States to help pay for the cost to print new materials and change signage, or else make this requirement optional. One commenter also asked that the Departments phase in the change more slowly. Other commenters urged the Departments to allow one-stop centers to phase in the change as they print new materials.

A few commenters requested clarification regarding the deadline for implementation. They stated that the NPRM regulatory text indicated one-stop centers must utilize the new identifier by July 1, 2016, but the NPRM preamble stated that the identifier be in place during PY 2016, or by June 30, 2017. The commenter requested the later date, reasoning that changing signage and materials by July 1, 2016 would be cost prohibitive.

Departments' Response: The Departments recognize that there is a cost associated with adopting the common identifier, and has extended the timeframe in which one-stop centers must include the identifier, to require that one-stop centers use it on Web sites and online materials by [90 days from the publication of this Final Rule], on new products and materials purchased or created after July 1, 2016 and on all other activities, materials, buildings, and signs by July 1, 2017. These changes are reflected in § 678.900(b) and (c). Implementing the identifier is an allowable use of WIOA title I funds. The Departments will release suggestions for adopting the identifier at various price points in upcoming guidance and technical assistance.

While one-stop centers will be expected to provide the ''American Job Center'' or ''proud partner of the American Job Center network'' branding on any newly printed, purchased or created materials after [90 days from the publication of this Final Rule], this does not require one-stop centers to discard previously obtained materials. The Departments will not object to use of any materials lacking the branding that were printed, purchased, or created before this initial deadline until supplies are exhausted, regardless of the final implementation date of July 1, 2017. Paragraphs (b) and (c) of § 678.900 have been modified to reflect the revision of the date when this policy goes into effect.

In addition to the regulatory text changes discussed above, various non-substantive changes have been made for purposes of correcting typographical errors and improving clarity that have not been necessary to note elsewhere.

V. Rulemaking Analyses and Notices

A. Executive Orders 12866 and 13563: Regulatory Planning and Review

Executive Order (E.O.) 12866 directs agencies, in deciding whether and how to regulate, to assess all costs and benefits of available regulatory alternatives, including the alternative of not regulating. E.O. 13563 is supplemental to and reaffirms E.O. 12866. It emphasizes the importance of quantifying current and future costs and benefits; directs that regulations be developed with public participation; and, where relevant and feasible, directs that regulatory approaches be considered that reduce burdens, harmonize rules across agencies, and maintain flexibility and freedom of choice for the public. Costs and benefits should include both quantifiable measures and qualitative assessments of possible impacts that are difficult to quantify. If regulation is necessary, agencies should select regulatory approaches that maximize net benefits. The OMB determines whether a regulatory action is significant and, therefore, is subject to review.

Section 3(f) of E.O. 12866 defines a ''significant regulatory action'' as any action that is likely to result in a rule that could:

(1) Have an annual effect on the economy of $100 million or more or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities;

(2) Create a serious inconsistency or otherwise interfere with an action taken or planned by another agency;

(3) Materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof; or

(4) Raise novel legal or policy issues arising from legal mandates, the President's priorities, or the principles set forth in E.O. 12866.

The Final Rule is a significant regulatory action under sec. 3(f) of E.O. 12866. The economic effects of the costs that will result from the changes in this Final Rule are economically significant.

Outline of the Analysis

Section V.A.1 describes the need for the Joint WIOA Final Rule and section V.A.2 describes the alternatives that were considered in this rule's NPRM. Section V.A.3 summarizes the public comments received related to the NPRM, and comments received related to the VR program-specific requirements set forth in the NPRM on ''State Vocational Rehabilitation Services Program; State Supported Employment Services Program; Limitations on Use of Subminimum Wage.'' Section V.A.3 also provides the Departments' responses to the comments. Section V.A.4 describes the process used to estimate the costs of this Final Rule and the general inputs used, such as wages and number of affected entities. Section V.A.5 explains updates made to the assumptions and inputs used in the analysis of this Final Rule relative to the assumptions and inputs used in the analysis of the NPRM. Section V.A.5 also describes how these changes affected the costs of this Final Rule. Section V.A.6 describes how the provisions of this Final Rule will result in quantifiable costs and presents the calculations the Departments used to estimate them. Finally, section V.A.7 summarizes the estimated first-year and 10-year total costs and describes the benefits and transfers that may result from this Final Rule.

Summary of the Analysis

The DOL and ED, hereafter collectively referred to as ''the Departments,'' provide the following summary of the Regulatory Impact Analysis (RIA):

(1) This Final Rule is a ''significant regulatory action'' under sec. 3(f)(4) of E.O. 12866 and, accordingly, OMB has reviewed the Final Rule.

(2) This Final Rule is not expected to have a significant cost impact on a substantial number of small entities.

The Departments estimate that this Final Rule will generate benefits (including some that take the form of cost reductions). Because of the nature of these benefits, the Departments are not able to quantify them, but rather describe them qualitatively in the ''Regulatory Benefits'' section. As shown in Exhibit 1, over the 10-year period, this Final Rule is estimated to have an undiscounted total cost of $626.8 million. This is equivalent to an estimated annual cost of $62.7 million. With 7-percent discounting over the 10-year period, the Final Rule will result in an estimated total cost of $495.2 million. This is equivalent to an

estimated annualized cost of $70.5 million (with 7-percent discounting).

EXHIBIT 1—ESTIMATED MONETIZED COSTS OF THE DEPARTMENTS OF LABOR AND EDUCATION FINAL RULE (2015 DOLLARS) ($ MIL)

Undiscounted 10-Year Total	$626.8
10-Year Total with 3% Discounting	558.9
10-Year Total with 7% Discounting	495.2
10-Year Average	62.7
Annualized with 3% Discounting	65.5
Annualized with 7% Discounting	70.5

The largest contributor to the total cost of the rule is the implementation of performance accountability requirements contained in sec. 116 of WIOA. The largest of these costs include the development and updating of State performance accountability systems, followed by performance reporting requirements, and adjusting levels of performance. See section V.A.6 (Subject-by-Subject Cost-Benefit Analysis) for a detailed explanation.

The Departments were unable to quantify several important benefits to society due to data limitations and lack of existing data or evaluation findings. We qualitatively describe the benefits related to increased alignment of training with local labor markets using economic, education, and workforce data. In addition, based on a review of empirical studies (primarily studies published in peer-reviewed academic publications and studies we sponsored), we identified the following societal benefits: (1) Training services increase job placement rates; (2) participants in occupational training experience higher reemployment rates; (3) training is associated with higher earnings; and (4) State performance accountability measures, combined with the Board membership provision requiring employer/business representation, can be expected to improve the quality of the training and, ultimately, the number and caliber of job placements. We identified several channels through which these benefits might be achieved, including: (1) Better information about training providers enables workers to make more informed choices about programs to pursue; and (2) enhanced services for dislocated workers, self-employed individuals, and workers with disabilities will lead to the benefits discussed above.

In addition, the Departments qualitatively describe an ancillary benefit to the DOL-administered core programs that is expected to result from the integration of DOL program participant records. While the integration of these participant records is not required by WIOA or these implementing regulations, it is highly encouraged. For a detailed description of the regulatory and ancillary benefits of the Final Rule, see section V.A.7 (Summary of Analysis).

1. Need for Regulation

Section 503(f)(1) of WIOA requires publication of implementing regulations. These regulations will ensure that States implement requirements under WIOA efficiently and effectively. In addition, such regulations will provide Congress and others with uniform information necessary to evaluate the outcomes of WIOA.

2. Alternatives to the Required Publication of Regulations

OMB Circular A–4, which outlines best practices in regulatory analysis, directs agencies to analyze alternatives outside the scope of their current legal authority if such alternatives best satisfy the philosophy and principles of E.O. 12866. Although WIOA provides little regulatory discretion, the Departments assessed, to the extent feasible, alternatives to the regulations.

As described in the NPRM, the Departments considered alternatives to accomplish the objectives of WIOA, which also would minimize any significant economic impact on small entities. This analysis considered the extent to which WIOA's prescriptive language presented regulatory options that also would allow for achieving WIOA's programmatic goals. In many instances, we have reiterated WIOA's language in the regulatory text, and have expanded some language to provide clarification and guidance. The additional regulatory guidance should result in more efficient program administration by reducing ambiguities caused by unclear statutory language.

In addition, the Departments considered the issuance of sub-regulatory guidance in lieu of additional regulations. This policy option has two primary benefits to the regulated community. First, sub-regulatory guidance will be issued following publication of the Final Rule, thereby allowing States and local areas additional time to adhere to additional guidance. Second, sub-regulatory guidance is more flexible, allowing for faster modifications and any subsequent issuances, as necessary.

The Departments considered three possible alternatives in the NPRM:

(1) Implement the legislative changes prescribed in WIOA, as noted in this Final Rule, thereby satisfying the legislative mandate;

(2) Take no action, that is, attempt to implement WIOA using existing regulations promulgated under WIA; or

(3) Publish no regulation and rescind existing WIA regulations, which would result in non-compliance with the WIOA requirement to publish implementing regulations.

The Departments considered these three options in accordance with the provisions of E.O. 12866 and concluded that publishing the WIOA Final Rule—that is, the first alternative—was the only appropriate option. We considered the second alternative—retaining existing WIA regulations as the guide for WIOA implementation—but WIOA has changed WIA's requirements substantially enough that new implementing regulations are necessary for the public workforce system to achieve compliance. We considered, but rejected, the third alternative—not to publish implementing regulations and rescind existing WIA regulations—because this option, inherently, does not provide sufficient detailed guidance to implement the statutory requirements effectively.

In addition to the regulatory alternatives noted above, the Departments also considered phasing in certain elements of WIOA over time (different compliance dates), thereby allowing States and localities more time for planning and successful implementation. As a policy option, this alternative appears appealing in a broad theoretical sense and, where feasible, we have recognized and made allowances for different implementation schedules. However, with the exception of these allowances, we are not implementing an alternative that delays certain requirements for the following two reasons: (1) Implementation delays are not operationally feasible because many critical WIOA elements depend on the implementation of other provisions, and (2) the costs associated with additional implementation delays beyond those noted in this Final Rule could outweigh the benefits of alternative starting dates.

3. General Comments Received on the Economic Analysis in the NPRM

The Departments received several public comments regarding the economic analysis, presented RIA in the NPRM for this rule, and a few other comments regarding the economic analysis related to the VR program specifically as set forth in the NPRM on ''State Vocational Rehabilitation Services Program; State Supported Employment Services Program; Limitations on Use of Subminimum

Wage'' (80 FR 21059 (April 16, 2015)).[1] We considered all comments received. The significant comments and summaries of the Departments' analyses of those comments are discussed in the following two sections, depending on whether the comments relate to jointly administered requirements set forth in the NPRM for this Final Rule or the comments relate to VR program-specific requirements as set forth in the NPRM on ''State Vocational Rehabilitation Services Program; State Supported Employment Services Program; Limitations on Use of Subminimum Wage.'' Comments that pertain only to the VR program, and not jointly administered requirements, will be summarized here, but ED will address them directly in the Final Rule for ''State Vocational Rehabilitation Services Program; State Supported Employment Services Program; Limitations on Use of Subminimum Wage,'' which is published in this edition of the **Federal Register**.

a. Discussion of Public Comments Related to This Rule's NPRM

i. Contextualizing the Costs of WIOA

To provide context for the costs of the NPRM in the RIA, the Departments expressed the annual cost of the NPRM relative to the average annual amount made available to the six core programs in Fiscal Years (FYs) 2012, 2013, and 2014 under WIA.[2] Based on an average annual total Federal appropriation of $6.4 billion for the 3 fiscal years for these programs, the proportional annual cost of the NPRM was between 2.6 percent and 2.7 percent (using 3-percent and 7-percent discounting, respectively).

Comments: A commenter asserted that the incremental cost burden should not be compared to the total funds made available for these six programs under WIA, but instead should be compared to the administrative funds available to the States because this will be the funding source for a majority of the new requirements.

Departments' Response: In section V.A.7 (Summary of Analysis) of this Final Rule, the Departments present the incremental burden of WIOA both as a proportion of the average annual appropriation for carrying out these programs under WIA and as a proportion of the administrative and transition funds that might be used for WIOA implementation.

ii. The Value of Common Exit

In the NPRM, the Departments sought public comments on the value of a cross-program definition of exit (*i.e.,* a ''common exit'') that is based on the last date of service (other than self-service or information only activities) from all core programs, rather than a program-specific exit as proposed in the NPRM. Under a common exit, an individual would have to complete services from all core programs from which he or she received services to exit from the system.

Comments: Several commenters stated that a common exit approach would be costly. Specifically, some of these commenters asserted that a requirement to report a common exit would be prohibitive to States because a single Management Information System (MIS) does not exist for all core programs. Another commenter indicated that, in addition to the very large costs that would result from the interfaces that would need to be built across programs, additional labor hours would be required to track the exit dates of other programs. Other commenters indicated that some of their clients who cannot complete instructional services might continue to use their services for years if other options are not developed. These commenters further stated that data systems would need to have the capacity to hold clients' data for years, which could result in significant costs.

On the other hand, one commenter remarked that the lack of a common exit would result in the need for more information technology (IT) resources, such as increased storage space.

Departments' Response: The Departments have revised these final regulations to permit—but not require—WIOA title I and Wagner-Peyser Act Employment Service DOL programs to collect and report common exit data. Common exit data collection and reporting will not be permitted or required for core programs under titles II and IV of WIOA.

Although the Departments have concluded an integrated system that would track common exits for an individual is a vision for the workforce development system, an integrated system is not a requirement under WIOA or these final regulations. Furthermore, because the common exit approach is optional, we have not concluded that it would cause providers to extend the duration of program services artificially. In addition, we have no way to anticipate how many, if any, States will implement the common exit approach. For these reasons, no costs are included in this analysis related to the implementation of the optional common exit approach, including the cost of developing integrated systems or artificially extending the duration of services.

iii. Primary Indicators of Performance

Several commenters addressed the costs of implementing proposed requirements related to some of the primary indicators of performance.

Comments: A few commenters indicated concerns about tracking program participants to determine if they had attained a postsecondary credential or a secondary school diploma within 1 year after exiting the program. These commenters stated that no system is in place to collect and track such information and asserted that doing so would be very staff intensive and costly. Commenters also expressed concern that major changes would be needed to their MISs to track data on individuals who had exited the program.

Departments' Response: Although the Departments understand the concerns expressed by commenters, we want to make clear that the performance indicators proposed in the NPRM and contained in these final regulations are consistent with the statutory requirements set forth in sec. 116(b)(2)(A) of WIOA. Moreover, we have concluded that these requirements will not lead to a burden increase for most core programs because similar—although not identical—information was tracked by these programs for performance purposes under WIA. We acknowledge that for some programs, such as the VR program, post-exit data, including credential attainment, is not collected under the current data system. Consequently, States will have to collect such data with the informed written consent of the participant through follow-up with the exited participant or

[1] The NPRM for ''State Vocational Rehabilitation Services Program; State Supported Employment Services Program; Limitations on Use of Subminimum Wage'' was published at 80 FR 21059 on April 16, 2015. It can be accessed at *http://regulations.gov*.

[2] U.S. Department of Labor, Employment and Training Administration. (2015). Archive of State Statutory Formula Funding. Retrieved from: *https://www.doleta.gov/budget/py01_py09_arra_archive.cfm.* The Departments used data from the following files to estimate the average annual WIA budget: WIA Adult Activities Program (Program Years [PYs] 2011, 2012, 2013, and 2014); WIA Dislocated Worker Activities Program (PYs 2011, 2012, 2013, and 2014); and WIA Youth Activities (PYs 2012, 2013, and 2014). Note that for the adult and dislocated worker activities programs, each fiscal year's funding is calculated as the sum of the program year's July funding and the previous program year's October funding. The youth activities funding is obligated to States in April and corresponds to the fiscal year in which it is obligated.

U.S. Department of Education. (2016). Department of Education Budget Tables. Retrieved from: *http://www2.ed.gov/about/overview/budget/tables.html?src=ct.* The Departments used data from the following files to estimate the average annual WIA budget: Congressional Action (FYs 2012, 2013, and 2014).

the educational institution or entity where the individual was receiving training. We have concluded this process will not be overly burdensome to the VR program, as suggested by the commenters, however, because the VR program provides postsecondary education and training only as a necessary service to support an employment goal on the individualized plan for employment. As a result, in the vast majority of cases, a credential will be obtained prior to employment and prior to exit from the VR program. Very few individuals will obtain postsecondary credentials after exiting the VR program. Hence, only a small percentage of cases will need to be tracked manually.

Comments: In response to the Departments seeking comments on clarifications that might be needed to implement the credential attainment rate performance indicator, one commenter indicated that implementing and tracking the time frames would be an immense reporting burden on States.

Departments' Response: The Departments did not establish a time frame for obtaining a credential for purposes of the performance indicator required by sec. 116(b)(2)(A)(i)(IV) of WIOA, except for that required by WIOA—specifically that the credential be attained during the participant's participation in the program or within 1 year after exit from the program. Given that WIOA requires this particular time frame, there is no statutory authority to eliminate it from these final regulations or eliminate any burden estimate related to its implementation. Therefore, the estimated burden related to implementing the statutorily required time frame is maintained. During the development of the NPRM, the Departments considered the extent of the work required for data collection and reporting on this indicator and incorporated the level of effort for those follow-up activities in the burden estimates that were published in the NPRM. These costs will not be substantial because the time frame for participants to obtain a credential was lengthened from only 3 quarters from exit under WIA to 4 quarters under WIOA.

Comments: The NPRM proposed that States would be required to report information on the career and training services provided by title I core programs, as well as the percentage of those participants who obtain training-related employment. One commenter said that the States' administrative data do not indicate whether employment is related to training. The commenter asserted that such data would be costly to collect directly from each participant on a case-by-case basis.

Departments' Response: Although the Departments understand the commenter's concern, we want to make clear that the requirement to collect and report this information is required by sec. 116(d)(2)(G) of WIOA. We do not agree that collecting and reporting the required data will be as costly or burdensome as the commenter suggests. Currently, State (UI) agencies provide wage data that, at a minimum, include a North American Industry Classification System (NAICS) code that generally provides an indication of whether employment outcomes were training related. In addition, costs for follow-ups to determine if training was related to employment were already accounted for in the baseline because they were collected under WIA. The other core programs are not required to collect and report such data.

Comments: One commenter suggested that some of the performance measures proposed for INA supplemental youth service programs are burdensome—particularly given the disparity in funding between the INA youth grants and State grants. The commenter remarked that it would cost $1 million to update its Bear Tracks performance reporting system, which is currently used by INA grantees to collect data for performance measures. The performance reporting system would have to be upgraded because: (1) It is not a Web-based application; (2) it does not provide an adequate level of data security; and (3) it soon could be incompatible with the Departments' new technology. In addition, training would be required for the INA grantees across the United States. Furthermore, the commenter warned that its program only might be able to handle the additional reporting burden by keeping participants as ''active participants'' by not exiting them from the program until they graduate from high school. The commenter stated that this would create a significant burden because grantees would have to provide qualified follow-up service every 90 days to keep the participants active.

Departments' Response: The Departments acknowledge that some grantees, including grantees awarded funding under WIOA, title I, subtitle D—National Programs, could experience higher burdens than other entities. We want to make clear that the cost estimates presented in the NPRM and these final regulations represent the cost for a single representative State, not potential cost burden that could be realized by individual grantees because such effects are based on a variety of factors specific to each program. Furthermore, we point out that data for a credential attainment measure are currently being collected by the INA program (under WIA) that is similar to the education and credential indicators under WIOA and, therefore, the burden associated with such requirements is not new but rather is burden already accounted for in the baseline presented in the RIA for the NPRM and these final regulations.

iv. Additional State Performance Indicators

Comments: A commenter questioned why the NPRM's RIA projected burdens for only five States with regard to establishing additional performance accountability indicators and asked for clarification on which five States were expected to submit these data. The commenter asserted that if all States were expected to submit data, by accounting only for five, the Departments were significantly underestimating the cost of this requirement in the NPRM.

Departments' Response: Under WIA, States were permitted to establish performance indicators in addition to the required indicators. No State, however, established additional performance indicators under WIA. Based on this past practice, the Departments estimate that very few States, if any, will establish additional performance indicators and report related data under WIOA. In an effort to estimate all potential costs where quantifiable, however, we provided burden estimates based on as many as five States choosing to establish additional performance indicators. To be clear, the five States referenced in the NPRM's RIA were intended as an upper-level estimate of the number of States expected to establish additional State performance indicators, and were not intended to mean that we knew which States, if any, would choose to do so. Burden estimates associated with collection and reporting of data for the primary indicators of performance include all States and are accounted for elsewhere in provision (c) Performance Accountability System of the RIA for these final regulations. For the foregoing reasons, we have concluded the burden estimates proposed in the NPRM, and revised for these final regulations, reflect an accurate representation of the expected cost burden of WIOA in the event that as many as five States decide to implement and report on additional performance indicators.

Comments: In the NPRM, the Departments estimated that seven VR agencies each would experience $5,000

in one-time software and IT systems costs and annual labor costs for 60 technical staff members at 9 hours each to obtain additional information for new data fields for those States, if any, choosing to establish additional performance indicators under WIOA. A commenter noted that the $35,000 first-year software and IT systems costs associated with programming designated State unit systems (*i.e.,* VR agencies) accounted for only 7 VR agencies not 80. In addition, the commenter indicated that the Departments underestimated the level of effort per entity to modify the State-developed case management system (CMS) so that designated State agencies and VR agencies could report on the required performance measures.

Departments' Response: The Departments want to make clear that the estimates referenced by the commenter reflect the increased burden to the VR program should a few States adopt additional performance indicators. As stated in the response to another commenter, no State established additional performance indicators under WIA, even though each was permitted to do so. To avoid underestimating costs, however, the NPRM estimated the burden to the State if up to five States—two of which have a separate agency for the individuals who are blind (*i.e.,* seven VR agencies)—choose to adopt additional performance indicators. After further Departmental review of the proposed burden estimate, we have reduced the estimated number of affected entities from seven to five VR agencies and reduced the estimated labor cost per entity, as indicated in Exhibit 33.

In response to public comments and based on additional information received, the Departments have also eliminated the estimated burden for the revision of existing CMSs to accommodate the collection of data to support additional State indicators. We have concluded that such indicators likely would not require the collection of additional new data. In addition, any changes needed to State CMSs for such measures already would be subsumed by the one-time costs of revising their existing systems to collect required data to support the primary indicators of performance, reported under the Development and Updating of State Performance Accountability Systems subsection of provision (c) ''Performance Accountability System'' displayed in Exhibit 18.

iv. State Performance Reports

Comments: In the NPRM, the Departments proposed that States would be required to submit a State performance report, which would describe, among other things, the amount of funds spent on career and training services, respectively, for the current program year and the 3 preceding program years. Several commenters asserted that breaking out the funds spent by service would be too costly.

One commenter expressed opposition to tracking and reporting the amount of funds spent on each type of career and training service. The commenter stated that the NPRM did not take into account the expense of doing so. Citing their own experiences, multiple commenters noted that costs incurred for programming in addition to the ongoing administrative costs related to IT systems would be prohibitive.

Another commenter stated that the existing CMSs do not track funds spent on each type of career and training service. The commenter indicated that this would require the costly and time-intensive integration of the State's CMS with the financial systems in place in each of the local areas.

A commenter expressed that, in addition to tracking specific payments to training providers, it would have to track indirect costs such as benefits paid to staff, building space, and the cost of devices used in delivering services (*e.g.,* computers). The commenter concluded that the effort to determine these specific cost breakouts greatly would exceed the value gained from this information.

Departments' Response: The Departments want to make clear that the statutory requirement and these final regulations are less burdensome than the commenters appear to believe. Section 116(d)(2)(D) of WIOA requires the State to report on the amount of funds spent on ''each type of service,'' which we have interpreted to mean career services, as one type, and training services, as the other type—not each *individual* type of career or training services, provided to participants. Therefore, the NPRM's RIA did not account for burden associated with tracking each individual type of career service and training service provided because such tracking is not required by WIOA or these final regulations. Moreover, the cost estimates in the NPRM and these final regulations do not account for IT system integration because the Departments concluded that States are unlikely to update their IT systems to allow for the integration of fiscal, case management, and performance data.

The Departments agree with the commenters that such micro-level reporting would be burdensome to the States. Before publishing the NPRM, we consulted with States and concluded that this type of tracking would be extremely burdensome. Therefore, we have concluded that affected entities are likely to use a model that divides the total cost spent on career services or training services by the total number of participants who received career services or training services to determine the cost per participant.

v. Underestimated Burden for Development of Strategies for Aligning Technology and Data Systems Across One-Stop Partner Programs To Enhance Service Delivery and Improved Efficiencies

In the NPRM, the Departments estimated that State WDBs would incur a one-time cost of $1.2 million and that State- and local-level AEFLA programs and VR agencies would incur annual costs of $35.5 million related to the development of strategies for aligning technology and data systems across one-stop partner programs. This includes costs for design implementation of common intake, data collection, case management information, performance accountability measurement, reporting processes, and incorporation of local input into design and implementation to improve coordination of services across one-stop partner programs.

Comments: A few commenters asserted that the cost of aligning data and data systems to collect data on performance measures across programs was understated in the NPRM. One of these commenters stated that the Departments underestimated the burden for coordinating service delivery across all of the relevant programs given the large array of data systems, software platforms, and partners involved. Another commenter suggested that aligning technology and data systems might prove expensive for State agencies due to changing or integrated data system and collection methods. The commenter concluded that full integration of technology and data systems would be a costly and time-consuming process.

Departments' Response: First, the Departments want to make clear that WIOA has no statutory requirement that data systems be integrated across all core programs, as some of the commenters appear to believe. State WDBs are required to assist Governors in developing strategies to align technology and data systems across one-stop partner programs to enhance service delivery. Therefore, the NPRM and these final regulations reflect the estimated burden for the DOL-

administered and VR programs associated with the future implementation of integrated IT systems across core programs and the burden for State agencies to enhance their AEFLA program participation in the Statewide Longitudinal Data Systems (SLDS) Grant Program. Because States are at varying stages in the data alignment process, the cost estimates for DOL-administered and VR programs presented in the NPRM represent the national average costs for ''low-'' and ''high-effort'' States, while the cost estimates for the AEFLA program do not adopt such a classification of States and, instead, use a standard cost estimate for all States. The Departments understand that some States could experience higher actual costs, while actual costs could be lower for others.

vi. Integrating Record Collection and Performance Reporting

Comments: One commenter stated that the Departments underestimated the cost of integrating record collection across ED and between DOL and ED in terms of time and resources. In particular, the commenter indicated that the costs would be greater for the VR program because the VR program has the most disparate system (*i.e.,* WISPR is a DOL-specific platform), according to the commenter. Furthermore, the commenter suggested that the burden for integrating data for performance reporting across core programs belongs at the Federal level because DOL and ED receive records from each State for their respective programs. To have Federal agencies work out the integration of data elements and then push this integration to the States that are integrating their systems based on Federal recommendations would be more efficient. In addition, the commenter stated that costs are associated with the guidance and technical assistance that would be needed to bridge the gap between workforce partners' current systems and the Final Rule requirements before the data could be integrated.

Departments' Response: The Departments acknowledge that some affected entities would experience higher burdens than other entities. Following additional consultation with program experts in the affected DOL and ED program areas, and based on the best available evidence, we calculated the compliance costs of each component of this Final Rule based on a range of burden estimates by States, a standard burden estimate per State, or an estimate for a single representative State that was used as a proxy for the average cost per State in the analysis. Please note, however, that this Final Rule does not require the integration of data collection and reporting systems across DOL and ED programs. Under WIOA, State VR programs will continue to submit RSA–911 data to RSA, except that data will be submitted quarterly on open and closed service records instead of annually on closed service records as had been done historically. RSA will use these four quarterly reports to generate the annual WIOA performance report, which will be sent to the State agencies, reducing the burden on State VR agencies.

Concerning the comment about burden for integrated reporting belonging at the Federal level, as part of the implementation of this rule, DOL and ED jointly are proposing an Information Collection for the WIOA Performance Management, Information, and Reporting System (OMB Control Number 1205–0526). This ICR (WIOA Joint Performance ICR) and associated documents, including the WIOA Participant Individual Record Layout (PIRL), provides a standardized set of data elements, definitions, and reporting instructions that will be used to describe the characteristics, activities, and outcomes of WIOA participants.

vii. Reductions in State VR Agency Resources and the Impact of WIOA Implementation

Comments: One commenter stated that the cost estimates for the VR program in the NPRM did not appear to account for the current reductions in agency staff and State funding.

Departments' Response: Although the Departments understand the concern expressed by the commenter, we want to make clear that the burden estimates are based on the estimation of what implementing new requirements under WIOA, including both jointly administered requirements and program-specific requirements, will cost States. The burden estimates do not account for circumstances individual States face at the State level, such as reductions in staff or reductions in State funds for match purposes.

viii. Benefits Due To Reduced Youth Unemployment

Comments: One commenter said that WIOA includes improvements that would ensure low-income workers have the skills and support needed for full participation in the workforce. Specifically, the commenter expressed that provisions that increase the focus on comprehensive programming for out-of-school youth should reduce the effect youth unemployment has on Federal and State governments. The commenter cited a 2014 report, which found that the average unemployed 18- to 24-year-old costs taxpayers over $4,000 annually and the average unemployed 25- to 34-year-old costs taxpayers approximately $9,000 annually.

Departments' Response: WIOA provides additional opportunities to coordinate education and employment services for youth across the core programs. The Departments will continue to encourage these partnerships and the benefits that result from their implementation. The study cited by the commenter evaluates impacts resulting from reduced welfare and unemployment benefits being paid out, as well as increased tax revenue. The Departments considered these outcomes in evaluating the impact of WIOA, and described these and other impacts resulting from training and employment services, such as re-engagement of dislocated workers, in the Regulatory Benefits discussion and the Transfers discussion in section V.A.7 (Summary of Analysis) of this RIA.

ix. Inability to Quantify Benefits

In the NPRM, the Departments stated that they were unable to quantify the benefits associated with the NPRM because of data limitations and a lack of operational WIOA data or evaluation findings on the provisions of the NPRM. The Departments invited comments regarding how the benefits described qualitatively in the NPRM could be estimated.

Comments: Several commenters stated that State workforce and business agencies have developed a set of performance measures designed to capture the financial impact of services delivered at the local community, workforce area, regional, and State levels. The measures also allow for the calculation of return on investment. The commenters remarked that the measures would allow the economic value of services delivered to local communities to be expressed, attainable goals that align with staff activities to be set, and staff to understand the value of their work. These tools are in the initial stages of development and implementation.

Departments' Response: The Departments acknowledge that the tools described by the commenters are currently being developed and tested. We understand, however, that these tools were developed for use at the State, local, and regional levels and have not been applied for similar purposes at the national level. Therefore, modifying these tools to

obtain information in the limited time frame for this analysis was not feasible.

b. Discussion of Public Comments Related to the Proposed Program-Specific Rules for the VR Program

i. Underestimated Costs to the VR Program

Comments: The Departments received a few comments related to one of ED's three WIOA-related NPRMs, which, among other things, covered VR program-specific requirements.

Departments' Response: The public comments pertaining to estimates provided in the NPRM specific to the VR program will be responded to directly by ED in the Final Rule governing, among other things, the VR program published elsewhere in this issue of the **Federal Register**.

4. Analysis Considerations

The Departments estimated the additional costs, benefits, and transfers associated with implementing this WIOA-required Final Rule from the existing baseline, that is, the practices complying with, at a minimum, the 2000 WIA Final Rule (65 FR 49294, Aug. 11, 2000).

The Departments explain how the required actions of States, Local WDBs, employers and training entities, government agencies, and other related entities were linked to the estimated costs and expected benefits. We also consider, when appropriate, the unintended consequences of the regulations introduced by this Final Rule. We have made every effort to quantify and monetize the costs and benefits of the Final Rule. We were unable to quantify benefits associated with the Final Rule because of data limitations and a lack of operational data or evaluation findings on the provisions of the Final Rule or WIOA in general. Therefore, we describe some benefits qualitatively.

The Departments have made every effort to quantify all incremental costs associated with the implementation of WIOA's requirements as distinct from those that already exist under WIA, WIOA's predecessor statute. Despite our best efforts, however, we might be double counting some activities that occurred under WIA. Thus, the costs itemized below represent an upper bound for the potential cost of implementing WIOA.

In addition to this Final Rule, the Departments are publishing separate final rules to implement program-specific requirements of WIOA that fall under each Department's purview; see section I of this Joint WIOA Final Rule (Executive Summary). We acknowledge that these final rules and their associated impacts might not be fully independent from one another, but we are unaware of a reliable method to quantify the effects of this interdependence. Therefore, this analysis does not capture the correlated impacts of the costs and benefits of this Final Rule and those associated with the other Final Rules. We have made an effort to ensure no duplication of benefits and costs between this and the other Final Rules.

In accordance with the regulatory analysis guidance articulated in Circular A–4, and consistent with the Departments' practices in previous rulemakings, this regulatory analysis focuses on the likely consequences (*i.e.,* costs and benefits that accrue to citizens and residents of the United States) of this WIOA-required Final Rule. The analysis covers 10 years (2016 through 2025) to ensure it captures major additional costs and benefits that accrue over time. The Departments express all quantifiable impacts in 2015 dollars and use 3-percent and 7-percent discounting following Circular A–4.

Exhibit 2 presents the estimated number of entities expected to experience a change in level of effort (workload) due to the regulations included in this Final Rule. The Departments provide these estimates and use them extensively throughout this analysis to estimate the cost of each provision, where feasible.

EXHIBIT 2—NUMBER OF AFFECTED ENTITIES BY TYPE

Entity type	Number of entities
DOL Program:	
States [3]	[4] 57
States establishing additional performance indicators	[5] 5
Local WDBs	[6] 580
AEFLA Program:	
States	[7] 57
States establishing additional performance indicators	[8] 5
Local AEFLA providers	[9] 2,396
Local AEFLA providers establishing additional performance indicators	[10] 200
RSA Program:	
VR agencies	[11] 80
VR agencies establishing additional performance indicators	[12] 5
