FEDERAL REGISTER

Vol. 81 Friday,
No. 223 November 18, 2016

Book 1 of 3 Books

Pages 81641–82270

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, Washington, DC 20402 is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see *www.ofr.gov.*

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at *www.fdsys.gov*, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 59, 1 (January 2, 1994) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, *gpocusthelp.com.*

The annual subscription price for the **Federal Register** paper edition is $749 plus postage, or $808, plus postage, for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $165, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register,** including postage, is based on the number of pages: $11 for an issue containing less than 200 pages; $22 for an issue containing 200 to 400 pages; and $33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for $3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see *bookstore.gpo.gov.*

How To Cite This Publication: Use the volume number and the page number. Example: 81 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

Standards of Ethical Conduct for Employees of the Executive Branch; Amendment to the Standards Governing Solicitation and Acceptance of Gifts from Outside Sources

AGENCY: Office of Government Ethics (OGE).

ACTION: Final rule.

SUMMARY: The U.S. Office of Government Ethics is issuing a final rule revising the portions of the Standards of Ethical Conduct for Executive Branch Employees that govern the solicitation and acceptance of gifts from outside sources. The final rule modifies the existing regulations to more effectively advance public confidence in the integrity of Federal officials. The final rule also incorporates past interpretive guidance, adds and updates regulatory examples, improves clarity, updates citations, and makes technical corrections.

DATES: This final rule is effective January 1, 2017.

FOR FURTHER INFORMATION CONTACT: Leigh J. Francis, Assistant Counsel, or Christopher J. Swartz, Assistant Counsel, Office of Government Ethics, Suite 500, 1201 New York Avenue NW., Washington, DC 20005–3917; Telephone: 202–482–9300; TTY: 800–877–8339; FAX: 202–482–9237.

SUPPLEMENTARY INFORMATION:

I. Rulemaking History

On November 27, 2015, the U.S. Office of Government Ethics (OGE) published for public comment a proposed rule setting forth comprehensive revisions to subpart B of the Standards of Ethical Conduct for Employees of the Executive Branch (Standards of Ethical Conduct), 5 CFR part 2635. 80 FR 74004 (Nov. 27, 2015). Subpart B of part 2635 contains the regulations governing the solicitation and acceptance of gifts from outside sources by officers and employees of the Executive Branch. These regulations implement the gift restrictions set forth in 5 U.S.C. 7353 and section 101(d) of Executive Order 12674, as modified by Executive Order 12731. The proposed rule was issued following OGE's retrospective review of the regulations found in subpart B, pursuant to section 402(b)(12) of the Ethics in Government Act of 1978, Public Law 95–521, codified at 5 U.S.C. Appendix IV, sec. 402(b)(12). Prior to publishing the proposed rule, OGE consulted with the Office of Personnel Management and the Department of Justice in accordance with section 402(b) of the Ethics in Government Act and section 201(a) of Executive Order 12674, as modified by Executive Order 12731, and with other officials throughout the Federal Government.

The proposed rule provided a 60-day comment period, which ended on January 26, 2016. OGE received ten timely and responsive comments, which were submitted by four individuals, three professional associations, two Federal agencies, and a law firm. After carefully considering all comments and making appropriate modifications, and for the reasons set forth below and in the preamble to the proposed rule at *https://www.gpo.gov/fdsys/pkg/FR-2015-11-27/pdf/2015-29208.pdf,* OGE is publishing this final rule.

II. Summary of Comments and Changes to Proposed Rule

General Comments

OGE received one comment from an individual observing that various references to spousal and dating relationships in the examples used dual-gendered relationships and gender-specific pronouns. The commenter expressed concern that such examples could be read as excluding same-sex marriages or relationships. OGE treats same-sex spouses the same as opposite-sex spouses for the purposes of all of its regulations. OGE Legal Advisory LA–13–10 (Aug. 19, 2013). OGE has therefore reviewed the examples highlighted by the commenter and has replaced the terms ''husband'' and ''wife'' with the gender-neutral term ''spouse.''

Various commenters suggested that one or more of the proposed amendments to the rule might negatively impact the ability of the public to interact with Federal employees. These commenters pointed out the beneficial impact of this interaction and encouraged OGE to consider this equity in drafting gift regulations. As a general matter, OGE agrees with the commenters' proposition that communication between the Government and the public is vital to ensuring that Government decisions are responsive to citizen needs. Public interaction done in a non-preferential manner may: (1) Provide executive branch decisionmakers with information and data they may not otherwise possess; (2) identify policy options and alternatives that may not have been raised internally; and (3) produce better and more thoughtful decisions. These interactions must, however, occur in an environment that promotes the public's confidence in the integrity of Government decisionmaking. When Federal employees accept or solicit gifts from members of the public who have interests that are affected by the employee's agency, the public's confidence can be eroded as ''[s]uch gifts may well provide a source of illicit influence over the government official; in any case they create a suspicious and unhealthy appearance.'' *The Association of the Bar of the City of New York, Conflict of Interest and Federal Service* 219 (1960). When drafting this final rule, OGE has carefully considered the commenters' concerns in light of the important objective of promoting the public's confidence in the impartial administration of the Government.

§ 2635.201 Overview and Considerations for Declining Otherwise Permissible Gifts

OGE received comments from three sources on proposed § 2635.201(b)(1). Section 2635.201(b)(1) establishes a non-binding standard that can assist employees in considering whether to decline an otherwise permissible gift. The standard encourages employees to consider whether their acceptance of a gift that would otherwise be permissible to accept would nonetheless create the appearance that their integrity or ability to act impartially may be compromised. The duty to avoid such appearances is a responsibility of all executive branch employees. *See* 5 CFR 2635.101(b)(1); (14).

Based on past experience with executive branch agencies applying subpart B of part 2635, OGE is concerned that employees and ethics officials may not be sufficiently analyzing appearance concerns and, instead, may be focusing exclusively on whether a gift can be accepted under a regulatory gift exception. This kind of analysis may unintentionally overlook other important considerations, such as ''whether acceptance of the gift could affect the perceived integrity of the employee or the credibility and legitimacy of [an] agency's programs.'' 80 FR 74004, 74004 (Nov. 27, 2015). The non-binding standard in § 2635.201(b)(1) was explicitly included in subpart B to correct for this tendency and to enhance the overall quality of employees' ethical decisionmaking.

Commenters on this section raised concerns with the new standard and the factors for applying the standard. OGE appreciates the concerns raised by commenters, which are examined in detail below. OGE has addressed these concerns by making appropriate adjustments to the standard, rather than adopting some of the commenters' requests for the outright removal of this section. The changes make the standard easier for employees to understand and apply.

A few commenters suggested that ethics training would be more effective than a regulatory change in ensuring that employees consider appearance issues before accepting gifts. OGE fully agrees with the commenters' suggestions that ethics education is important. Without this amendment of the regulation, however, there would not be a uniform standard upon which to base ethics training regarding appearance issues in connection with gifts. Prior to this amendment, the regulation cautioned only that ''it is never inappropriate and frequently prudent for an employee to decline a gift,'' but the regulation did not articulate an applicable standard or any factors for employees to use in identifying the frequently arising circumstances when it would be prudent to decline a gift. OGE believes it is imperative that the regulatory framework itself enable and encourage employees to meaningfully consider the appearances of accepting gifts. By articulating the standard and relevant factors, the amended § 2635.201(b)(1) will increase the value and uniformity of agency ethics training because that standard and those factors will become a focus of ethics training.

One commenter believed that the proposed standard creates confusion because it moves away from the previous system of bright-line rules regarding gift acceptance. Specifically, the commenter requested that OGE amend the regulation in a way that sets out definitive rules as to whether ''a gift is simply permissible or impermissible, without further parsing the permissible gifts into additional categories, *i.e.,* technically permissible and actually permissible.'' OGE does not believe that the non-binding standard will create confusion because OGE has maintained the clear, uniform, and objective rules that are found in the current regulation. Section 2635.201(b)(1) augments those rules by encouraging employees to consider the appearances of their actions. The posited distinction between ''technically permissible'' and ''actually permissible'' is inaccurate because an employee will not face disciplinary action in the event that someone later subjectively disagrees with the employee's analysis. The bright-line rules provide a floor for ethical behavior, and the appearance analysis under § 2635.201(b) provides a mechanism with which to reach for a stronger, values-based ethical culture. This framework provides the certainty and uniformity of the existing rules, while furthering the underlying objective of increasing public trust by improving the ethical decisionmaking of employees.

The commenters also suggested that employees will feel compelled by this non-binding standard to always decline legally permissible gifts. OGE does not agree that the standard creates a presumption that all legally permissible gifts should be declined. Although some employees will decline legally permissible gifts after carefully analyzing them under the standard that § 2635.201(b)(1) establishes, the standard does not change the fact that the determination as to whether a legally permissible gift should be accepted is the employee's to make. Section 2635.201(b)(1) is designed to increase uniformity and promote public trust by articulating factors, which are informed by the ethical values consistent with the executive branch's Principles of Ethical Conduct, in order to guide the employee's decisionmaking process. This section provides employees an effective means of adequately assessing whether, notwithstanding a gift exception, the specific factual circumstances may raise appearance concerns weighing against acceptance of a gift.

In light of the comments referenced above, however, OGE has streamlined the language of § 2635.201(b). OGE has also clarified the overarching objective of that provision by placing the emphasis in § 2635.201(b)(1) on an assessment as to whether ''a reasonable person with knowledge of the relevant facts would question the employee's integrity or impartiality.'' In the proposed rule, substantially similar language appeared in the list of factors in § 2635.201(b)(2). Because this language articulates the standard to be applied, however, it is more appropriately included in paragraph (b)(1), which establishes the standard, than in paragraph (b)(2), which provides factors for determining whether the standard has been met. Using this ''reasonable person'' language in the articulated standard has the added benefit of addressing a commenter's concern regarding the potential for confusion, as executive branch employees have extensive experience applying this particular standard, which has long been used to address appearance concerns under § 2635.502. At the end of § 2635.201(b)(1), OGE has also added ''as a result of accepting the gift'' in order to tie the appearance concerns to the specific action giving rise to them.

As a final note, one commenter was concerned that the application of the reasonable person standard could vary, resulting in the ''unequal application'' of the standard. Reliance on a reasonable person standard, however, is not a novel approach in Government ethics. The Standards of Ethical Conduct at part 2635 have successfully employed the reasonable person standard for over two decades. *See* 5 CFR 2635.101(b)(14); 2635.502(a); *cf.* 2635.702(b) (''that could reasonably be construed''). In fact, when OGE first proposed the Standards of Ethical Conduct in 1991, OGE noted that the use of the reasonable person standard reflected both ''case law and longstanding practice,'' which ''temper the appearance standard by reference to the perspective of a reasonable person with knowledge of the relevant facts.'' 56 FR 33778, 33779 (July 23, 1991). OGE explained that the use of the reasonable person standard ''is intended to ensure that the conduct of employees is judged by a standard of reasonableness.'' *Id.* That reasoning continues to hold today.

Factors for Applying the § 2635.201(b)(1) Standard

Two commenters requested that OGE remove § 2635.201(b)(2), which sets out factors that employees may consider when determining whether to decline an otherwise permissible gift. These commenters requested the factors be removed because of their concern that the factors listed in § 2635.201(b)(2) are too complex and confusing, and will inevitably lead employees to decline permissible gifts. OGE is sensitive to these concerns and has revised the language to address them.

OGE reviewed each of the proposed factors closely to determine whether any could be removed, streamlined, or changed to eliminate unnecessary complexity or confusion. OGE removed several factors that appeared in the proposed rule on the basis that clarification of the reasonable person standard in § 2635.201(b)(1) in the final rule has rendered them unnecessary:

- Whether acceptance of the gift would lead the employee to feel a sense of obligation to the donor;
- Whether acceptance of the gift would cause a reasonable person to question the employee's ability to act impartially; and
- Whether acceptance of the gift would interfere with the employee's conscientious performance of official duties.

See 80 FR 74004, 74010 (Nov. 27, 2015). At the same time, OGE has added a straightforward factor focusing on whether ''[t]he timing of the gift creates the appearance that the donor is seeking to influence an official action,'' in order to provide a concrete example intended to remind employees that the timing of a gift can create the appearance that a person is seeking to influence the decisionmaking process.

OGE has also revised the factor articulated at § 2635.201(b)(2)(iv). The proposed language read: ''Whether acceptance of the gift would reasonably create an appearance that the employee is providing the donor with preferential treatment or access to the Government.'' OGE's intent was that the word ''preferential'' would be read to modify both ''treatment'' and ''access.'' In light of concerns the commenters expressed regarding the clarity of § 2635.201(b)(2) generally, OGE has determined that the proposed language could have been clearer in this respect. In reviewing this language, OGE also noted that the phrase ''preferential treatment'' is redundant of the phrase ''preferential . . . access to the Government,'' in that the specific preferential treatment at issue is the preferential access that the donor may be perceived as having received. The concern is that a donor may offer a gift that, by its nature, would provide the donor with significantly disproportionate access to the employee. This concern can arise in connection with gifts such as frequent lunches, trips, social invitations, free attendance at widely attended gatherings, and other items. If such gifts were to result in an employee spending considerable time with a donor, the donor may appear to have inordinate opportunities to discuss matters of interest to the donor and, thereby, unduly influence the employee. Accordingly, OGE has simplified this language and made it more specific. The language at § 2635.201(b)(2)(iv) now reads: ''Acceptance of the gift would provide the donor with significantly disproportionate access.'' This language should not be read as discouraging employees from attending events merely because they present opportunities to discuss official business. There is no requirement to provide exact parity in all cases with regard to the level of access afforded to those with competing viewpoints, but there is a value in guarding against any person, or multiple persons with a common interest or viewpoint, from enjoying significantly disproportionate access as a result of having given gifts to employees. An employee who is concerned about the level of access provided to those with a particular viewpoint may choose to decline the offered gifts or may take steps to ensure that those with different viewpoints are able to communicate with the employee, such as by taking their telephone calls, agreeing to meet with them in the employee's office, or convening a public forum.

OGE has also removed the following two factors:

- With regard to a gift of free attendance at an event, whether the Government is also providing persons with views or interests that differ from those of the donor with access to the Government;
- With regard to a gift of free attendance at an event, whether the event is open to interested members of the public or representatives of the news media.

80 FR 74004, 74010 (Nov. 27, 2015). Although OGE continues to believe these factors are important when an employee considers any gift of free attendance, their inclusion in § 2635.201(b)(2) is unnecessary given their more limited application. Furthermore, these factors often are most relevant to free attendance at widely attended gatherings under § 2635.204(g), where similar factors already exist.

OGE believes that these changes to § 2635.201(b)(2) diminish the potential for confusion created by the longer list of factors included in the proposed rule while continuing to provide guidance as to how employees should apply the standard in § 2635.201(b)(1) in the areas that OGE believes raise the greatest potential for appearance problems.

Receipt of Independent Advice From an Ethics Official Under § 2635.201(b)(4)

One commenter raised a concern about the language OGE used in § 2635.201(b)(4), which reminds employees to contact an appropriate agency ethics official if they have questions regarding whether acceptance of a gift is permissible and advisable. The commenter was concerned that the statement ''[e]mployees who have questions regarding . . . whether the employee *should* decline a gift that would otherwise be permitted under an exception [emphasis in original],'' seemed to indicate that there are ''right and wrong'' conclusions. OGE has not deleted the reference to advice from an ethics official because the regulation is sufficiently clear that the decision to decline or accept an otherwise permissible gift is the employee's to make. Although consulting an ethics official may assist the employee in making that decision, the regulation does not require such consultation. Section 2635.201(b)(3) explicitly states that an employee who does not decline a permissible gift under § 2635.201(b) has not violated the Standards of Ethical Conduct. At the same time, OGE believes that the reminder as to the availability of ethics advice will prove helpful to employees. Ethics officials can provide employees with valuable insights and guidance in assessing the reasonable person standard in individual cases because they possess experience in Government ethics, awareness as to how the Standards of Ethical Conduct are applied across the agency and across the executive branch, and knowledge of circumstances relevant to evaluating the effect on the public's trust of accepting certain gifts.

Nevertheless, to partly address the commenter's concern, OGE has deleted the reference to § 2635.107(b) at the end of § 2635.201(b)(4). After considering the commenter's concern, OGE recognized that the reference to § 2635.107(b) was potentially confusing because that section provides a safe harbor against disciplinary action in certain circumstances when an employee has consulted an agency ethics official. As § 2635.201(b)(3) makes clear, however, employees may not be disciplined under this provision and have no need for the safe harbor provision in connection with the appearance analysis under § 2635.201(b).

Examples to § 2635.201(b)

One commenter suggested that OGE should add examples to the regulation to indicate how to apply new § 2635.201(b). OGE has added Example 1 to paragraph (b) in order to illustrate how an employee may use the standard and factors found in § 2635.201(b). The same commenter also suggested that OGE provide additional guidance documents to further assist agency officials and employees in understanding how to apply the standard found in § 2635.201(b). OGE intends to provide additional guidance and training as needed on an ongoing basis.

5 CFR 2635.202 General Prohibition on Solicitation or Acceptance of Gifts

OGE received no comments on § 2635.202. OGE is adopting the amendments to this section as proposed for the reasons described in the preamble to the proposed rule. A small change to Example 1 to paragraph (c) was made after the Supreme Court's recent decision in *McDonnell* v. *United States,* 579 U.S. __1 195 L. Ed. 2d 639 (2016), which limited the scope of the term ''official act'' as used in 18 U.S.C. 201(a)(3).

5 CFR 2635.203 Definitions

OGE received a number of comments on the definitions of the terms ''gift,'' ''market value,'' ''indirectly solicited or accepted,'' and ''free attendance.'' In regard to the definition of ''gift,'' all comments focused on the exclusions to the definition. The comments for these terms are separately addressed in greater detail below.

Definition of ''Gift'': Exclusion for Modest Items of Food and Refreshment

OGE received three comments on proposed Example 1 to § 2635.203(b)(1). Section 2635.203(b)(1) explains that the definition of ''gift'' for purposes of subpart B excludes ''[m]odest items of food and refreshments, such as soft drinks, coffee and donuts, offered other than as part of a meal.'' Proposed Example 1 to paragraph (b)(1) was included for the purpose of making explicit OGE's longstanding interpretation that alcohol is not a modest item of refreshment under § 2635.203(b)(1). Because none of the beverages currently listed in the regulation are alcoholic and the exclusion specifically refers to ''soft,'' meaning non-alcoholic drinks, OGE has long treated alcoholic beverages as not being part of the class of modest refreshments covered by the exclusion.

All three of the commenters were concerned that the example seemed to indicate that attendance at an event where alcohol is served is *per se* ''improper.'' To address this concern, OGE has removed the example altogether and amended the regulatory text of § 2635.203(b)(1) to exclude from the definition of ''gift'' ''[m]odest items of food and non-alcoholic refreshments, such as soft drinks, coffee and donuts, offered other than as part of a meal.'' This amendment codifies the interpretation that was previously set out in the proposed example. Although the carve-out from the definition of ''gift'' at § 2635.203(b)(1) for modest refreshments is limited to non-alcoholic beverages, this limitation does not impact the gift exceptions at 5 CFR 2635.204.

Definition of ''Gift'': Exclusion for Greeting Cards and Presentation Items With Little Intrinsic Value

OGE received two comments on the proposed revisions to § 2635.203(b)(2). The first comment, from a professional association, was in favor of the proposal to modify the exclusion for presentation items. The second comment, from an individual, requested that OGE further amend the regulation to state that ''items with little intrinsic value . . . intended primarily for presentation'' are excluded from the definition of ''gift'' only if they ''do not have significant independent use.'' The individual noted that OGE used this phrase in proposed Example 2 to paragraph (b)(2) when explaining why a $25 portable music player would not be excluded from the definition of ''gift'' under this provision. OGE has decided not to adopt this change. As evidenced by the example, the fact that an item lacks other uses is a legitimate consideration in support of a finding that the item is intended ''primarily for presentation.'' The regulation does not, however, require that an item lack any potential other use in order to qualify as an item intended ''primarily for presentation.''

Definition of ''Gift'': Exclusion for Items Purchased by the Government or Secured Under Government Contract

OGE received one comment on the proposed example to § 2635.203(b)(7), which states that Federal employees may retain certain ''travel promotional items, such as frequent flyer miles, received as a result of [] official travel, if done in accordance with 5 U.S.C. 5702, note, and 41 CFR part 301–53.'' The commenter explained: (1) That employees who receive such frequent flyer miles should be encouraged to use such frequent flyer miles for subsequent official travel; and (2) that no personal use should be allowed for employees of the Federal Aviation Administration. OGE has not changed the substance of this example. As explained in the example, Congress passed a statute specifically permitting employees to accept these types of travel-related benefits. The General Services Administration (GSA) has primary authority for implementing that statute, and has done so through regulations found at 41 CFR part 301–53. To partly address the commenter's concern, however, OGE revised the language ''if done in accordance with 5 U.S.C. 5702, note, and 41 CFR part 301–53,'' to read ''to the extent permitted by 5 U.S.C. 5702, note, and 41 CFR part 301–53,'' in order to clarify that OGE's regulation does not create any new authority for accepting these travel related benefits beyond what Congress and GSA provided for in the statute and the regulation.

Definition of ''Gift'': Exclusion for Free Attendance Provided to Employees Speaking in Their Official Capacity and Extension to Personal Capacity Speaking Events

One commenter requested that OGE expand § 2635.203(b)(8) to exclude from the definition of ''gift'' free attendance at events where employees are speaking in their personal capacity on matters that are unrelated to their duties. The commenter noted that § 2635.203(b)(8) excludes free attendance in connection with official speaking engagements and requested a parallel exclusion for personal speaking engagements. OGE has not adopted this change. Normally, the Standards of Ethical Conduct would not prohibit an employee from accepting free attendance at an event at which the employee has a *bona fide* arrangement to speak in a personal capacity. This subject is addressed in § 2635.807(a)(2)(iii)(B), which permits employees to accept a waiver of attendance fees for speeches related to their official duties, and OGE has traditionally applied § 2635.202 consistently with that provision of § 2635.807 for speeches unrelated to official duties.

Definition of ''Market Value''

OGE received two comments on the proposed amendments to the definition of ''market value,'' as used throughout the regulation, as well as the examples following the definition. OGE proposed to amend ''market value'' to mean ''the cost that a member of the general public would reasonably expect to incur to purchase the gift.'' One commenter was generally in favor of the amendment, as well as the examples illustrating how the definition would be applied in various circumstances. The other commenter noted that Example 4 to paragraph (c) did not explicitly state that the tickets offered to the employee lacked a face value. OGE has amended Example 4 to indicate that the tickets provided to the employee in the example do not have a face value, and therefore the general rule used for calculating the market value of a ticket would not apply. OGE also amended Example 4 to further clarify the method of calculating the market value of such tickets.

Definition of ''Indirectly Solicited or Accepted''

OGE received one comment on § 2635.203(f), which establishes when a gift will be deemed to have been accepted or solicited indirectly. The commenter was in favor of OGE's amendment at § 2635.203(f)(2). OGE has adopted the language as proposed for the reasons set forth in the preamble to the proposed rule.

Definition of ''Free Attendance''

OGE received two comments in favor of the proposed subpart-wide definition of ''free attendance'' at § 2635.203(g). Both commenters supported OGE's amendment allowing employees who are presenting at an event to accept attendance at ''speakers' meals'' provided by the sponsor of the event. OGE has adopted the language as proposed for the reasons set forth in the preamble to the proposed rule.

§ 2635.204 Exceptions to the Prohibition for the Acceptance of Certain Gifts

Although OGE did not receive a specific comment on the title of the regulation, OGE has made a technical change to the title of this section for clarity and to more closely track the substance of the regulation.

OGE has also revised the introductory text to remind employees to consider the standard found in § 2635.201(b) when determining whether to rely on an exception. The revised language is modeled on the introductory text found in the current version of § 2635.204, but cross-references § 2635.201(b).

Gifts of $20 or Less

OGE received two comments requesting that OGE raise the regulatory dollar thresholds found in the gift exception at § 2635.204(a). Pursuant to § 2635.204(a), an employee may accept otherwise prohibited gifts not exceeding $20 per occasion so long as he or she does not accept more than $50 worth of gifts from the same person per year. In support of this request, one commenter pointed out the effect that inflation has had on the value of this *de minimis* threshold.

OGE carefully considered these commenters' suggestions. As OGE explained when it issued the final gift regulations, the *de minimis* exception was included to remove the need for a ''laundry list of exceptions for small, unobjectionable gifts.'' 57 FR 35006, 35016 (Aug. 7, 1992). The *de minimis* exception was intended to provide a uniform means for employees to accept only inexpensive and innocuous gifts on an infrequent basis. *Id.* OGE believes that the current dollar threshold continues to meet that narrow objective. OGE is concerned that raising the *de minimis* would encourage employees to accept, and private citizens to give, more expensive and more frequent gifts than employees are currently able to accept. Although some gifts that once fell at the higher end of the spectrum may now be precluded, OGE believes that the $20 threshold continues to be workable, permitting employees to accept on an infrequent basis most of the types of items that can be characterized as inexpensive and innocuous. In addition, the existing exclusions and exceptions from the gift rules permit employees to accept targeted items that are over $20 in carefully restricted circumstances (*e.g.,* a gift from an employee's spouse). *See* 5 CFR 2635.204(b). Although $20 may not buy the sort of lunch that it bought in 1992 when the regulation was issued, no compelling argument has been made to support a conclusion that raising the cap on the blanket *de minimis* exception, in order to allow employees to accept more expensive and more frequent gifts, would strengthen the integrity of the executive branch's operations. Accordingly, OGE has decided not to adopt the commenters' suggestions to increase the cap.

Gifts Based on a Personal Relationship

OGE received one comment in support of the new Example 3 to § 2635.204(b), which provides guidance on assessing whether a gift provided by a social media contact falls within the bounds of the gift exception. OGE has adopted the text of § 2635.204(b) substantially as proposed for the reasons set forth in the preamble to the proposed rule.

Awards and Honorary Degrees

OGE did not make changes based on comments received from two individuals on proposed § 2635.204(d). Section 2635.204(d) permits employees to accept gifts of certain awards and honorary degrees, including items incident to such awards and degrees. The first commenter suggested that OGE relocate the two examples following paragraph (d)(1) so that they would appear after paragraph (d)(2). OGE has not adopted the suggestion. These examples address paragraph (d)(1), which establishes the several requirements for accepting awards, and do not specifically address paragraph (d)(2), which defines the term ''established program of recognition.''

The second commenter addressed the acceptance of qualifying honorary degrees from certain ''foreign institution[s] of higher education.'' *See* 80 FR 74004, 74007 (Nov. 27, 2015). The commenter suggested that OGE clarify the basis of the Government's concerns regarding the acceptance of emoluments from foreign governments. OGE has not adopted this change because the prohibition stems from the Emoluments Clause of the United States Constitution. *See* U.S. Const., art. 1, sec. 9, cl. 8. OGE is not the appropriate authority to delineate the basis for specific provisions of the Constitution.

Gifts Based on Outside Business or Employment Relationships

OGE received one comment on the proposed amendments to § 2635.204(e), which sets forth various exceptions to the general prohibitions on accepting and soliciting gifts when such gifts are offered as a result of an outside business or employment relationship. The commenter was generally in favor of the amendments. OGE has retained the exception as proposed for the reasons set out in the preamble to the proposed rule.

Gifts of Free Attendance to Widely Attended Gatherings

OGE received a number of comments related to the exception at § 2635.204(g), permitting employees to accept offers of free attendance to widely attended gatherings (WAGs) if certain criteria are met. In the proposed rule, OGE presented a number of amendments to the WAG, including changes to: (1) Make it clear that an event does not qualify as a WAG if it does not present ''an opportunity to exchange ideas and views among invited persons''; (2) require employees to obtain written authorizations before accepting gifts of free attendance at WAGs; and (3) require agency designees to weigh the agency's interest in employees' attendance at WAGs against the possibility that acceptance of gifts of free attendance will influence their decisionmaking or create the appearance that they will be influenced in their decisionmaking.

One commenter expressed concern about the proposed amendment to the definition of ''widely attended gatherings.'' The proposed language clarifies that events do not qualify as WAGs unless there is ''an opportunity to exchange ideas and views among invited persons.'' The commenter suggested that this language would narrow the rule to apply to only ''panel or roundtable events.'' OGE believes that this is a mischaracterization of the regulatory amendment. Nothing in the amendment would narrow the definition exclusively to roundtable or panel events. The amendment reflects only OGE's longstanding interpretation that the event must present an opportunity for an ''exchange'' or ''interchange'' of ideas among attendees. *See* OGE Informal Advisory Opinion 07 x 14 (Dec. 5, 2007).

Several commenters objected to the change requiring written authorizations because it might increase the workload of ethics officials. Three commenters raised workload concerns in connection with the requirement that an employee obtain a written authorization from an agency designee prior to accepting free attendance to a WAG, though one commenter acknowledged that a requirement to obtain written authorization ''protects both the employee and the private sector sponsors.'' OGE has not eliminated the requirement to obtain written authorization before an employee attends a WAG. Any additional burden on ethics officials will not be so substantial as to outweigh the potential benefits of recording WAG authorizations. In this regard, it is worth noting that agency ethics officials have long been required to make several of the findings required by § 2635.204(g)(3), as proposed. In addition, some agencies have already adopted the practice of recording all WAG authorizations in writing. In any case, most of the work required of ethics officials under the amended regulation will stem from the requirement to make a number of determinations that have always been required under the regulation. After making these determinations, ethics officials have discretion to determine the level of detail to include in the written authorization. The amended regulation does not, however, require a ''formal written opinion'' as one commenter suggested.

One commenter noted that the amended rule requires agencies to determine in all cases whether ''[t]he agency's interest in the employee's attendance outweighs the concern that the employee may be, or may appear to be, improperly influenced in the performance of [his or her] official duties.'' The regulation did not previously require this determination in every case, but agency officials have always been charged with evaluating ''all the relevant circumstances of any proposed WAG before an employee is authorized to accept free attendance.'' OGE Informal Advisory Opinion 07 x 14 (Dec. 5, 2007). The determination now required in all cases is consistent with this preexisting requirement, inasmuch as improper influence, or the appearance of improper influence, would necessarily have been a relevant circumstance to be analyzed under the regulation even prior to the current amendment.

Two commenters expressed concern that ethics officials will approve attendance at fewer events for substantive reasons. However, the new regulation does not significantly change the substantive analysis, which remains focused, as it always has been, on the potential for improper influence and the appearance of improper influence. Disapproval of a gift of free attendance, when an agency has determined that an employee's acceptance of the gift would result in improper influence or the appearance of improper influence, is a proper outcome under any responsible ethics regime.

OGE received two additional comments related to § 2635.204(g). One commenter posited a hypothetical case under § 2635.204(g)(1). OGE is not in a position to assess the interests of a hypothetical agency or other relevant factual circumstances not specified in the commenter's hypothetical. At the request of the other commenter, however, OGE has inserted a reference to the written determination requirement in proposed Example 4 to paragraph (g).

Social Invitations

OGE received one comment from an agency on proposed § 2635.204(h), which permits an employee and accompanying guests to accept certain benefits that are provided at a ''social event'' so long as the person extending the invitation is not a prohibited source. The proposed rule added a requirement that employees receive a written determination that such attendance would not cause a reasonable person to question the employee's integrity if the event is sponsored by, or the invitation is from, an organization. The commenting agency questioned the purpose of this amendment and suggested that it could increase the workload of agency ethics officials.

Although OGE understands the programmatic consideration raised by the commenter, OGE does not believe that those concerns weigh significantly against the written determination requirement. In many cases, OGE believes that the analysis as to whether a reasonable person would question the employee's integrity or impartiality in attending will be relatively easy to assess, particularly given that the offeror cannot be a prohibited source. Likewise, the standard should be easier to meet if the circumstances indicate that the event is for purely social reasons or is open to a wide variety of attendees. Moreover, ethics officials have discretion to determine the level of detail to include in the written authorization and to choose an appropriate means, such as email, for transmitting the authorization. OGE does not, therefore, believe that the amended regulation will substantially increase the burden on ethics officials. At the same time, there is a heightened risk for, at a minimum, an appearance that the motivation for the gift is to advance a business objective when the sponsor of the event, or offeror of the invitation, is an organization. For this reason, OGE believes that the additional requirement with regard to organizations is warranted.

OGE has made three technical changes to the language of this exception for consistency with other sections and for clarity. First, OGE added the phrase ''with knowledge of the relevant facts'' to the language in § 2635.204(h)(3), which establishes a reasonable person standard for consistency with the wording of the reasonable person standard in § 2635.201(b) and elsewhere in the Standards of Ethical Conduct. *See* 5 CFR 2635.101(b)(14); 2635.501; 2635.502(a); 2635.502(c). Second, OGE changed ''makes'' to ''has made'' in § 2635.204(h)(3) in order to clarify that the determination to allow an employee to attend the social event must be made before the employee actually attends the event. Third, OGE replaced the legal citation to § 2635.201(b) at the end of the social invitations exception with the following plain language phrase: ''consistent with § 2635.201(b).'' None of these three technical changes alters what OGE intended to be the substantive meaning of the regulation.

Gifts Accepted Under Specific Statutory Authority

OGE has made a technical correction to § 2635.204(l)(1) so that the language tracks the interpreting regulation for 5 U.S.C. 4111 at part 410 of this title.

Informational Materials

Two professional associations and an individual commented on the new exception at § 2635.204(m). The exception permits employees to accept qualifying gifts of informational materials. The exception also sets out certain procedural safeguards and defines what constitutes ''informational materials'' for the purposes of this provision.

One professional association welcomed the addition of the new exception on the basis that it will allow a flow of useful information to employees. The second professional association also supported the new exception, but requested that OGE amend the rule in two ways: (1) Clarify that the rule would permit the acceptance of ''marketing and promotional materials''; and (2) clarify that when a gift of informational materials exceeds $100, an agency may authorize the employee to accept the gift on behalf of the agency if the agency has separate statutory authority. OGE has decided not to revise the proposed exception to include ''marketing and promotional materials'' as a specific category of acceptable informational materials. Whether an item qualifies for the exception will depend on whether the factual circumstances support a determination that the item offered meets the specific criteria set forth in § 2635.204(m). OGE has likewise decided not to amend the regulatory text to clarify that agencies may accept gifts of informational materials when the gift exceeds $100. Agencies with gift acceptance authorities have established their own procedures and policies regarding the acceptance of such gifts consistent with their interpretations of those authorities, and OGE is not in a position to direct another agency on the use of its gift acceptance authority.

Another commenter raised two general concerns with the regulatory exception. The first concern is that employees who accept informational materials might sell them. Although it might prove somewhat difficult to sell used informational materials, OGE is generally sensitive to the underlying concern expressed by the commenter. To address this concern, OGE has amended the regulation to add an additional limitation on the use of this exception. As revised, the exception will now require employees to obtain written authorization from the agency designee before accepting informational materials from a single person that in the aggregate exceed $100 in a calendar year. The commenter's other concern is that gifts relating to an employee's official duties, the agency's mission, or a subject matter of interest to the agency ''ought to be a gift to the Agency.'' The commenter questions whether such gifts might be construed as augmenting an agency's appropriations. Such gifts would not implicate augmentation concerns, however, because, as with all of OGE's regulatory gift exceptions, the items accepted are for personal use, not the agency's use.

Following careful review of the regulation, OGE has also reorganized § 2635.204(m) to move the limitations on what constitutes permissible ''informational materials'' to § 2635.204(m)(2), which contains the definition of ''informational materials.'' OGE refined the language indicating that, to qualify as ''informational material,'' an item must be ''primarily provided for educational or instructive purposes,'' changing it to state more clearly that the item must be ''educational or instructive in nature.'' As previously written, the regulation could have been misconstrued as requiring employees to ascertain the donor's intent in offering an item. As modified, the regulation now makes clear that the focus is on the objective nature of the gift, and not the subjective intent of the donor. A corresponding change replaces ''not including,'' with ''Are not primarily,'' at the beginning of the phrase ''Are not primarily created for entertainment, display, or decoration.'' This change is intended to avoid excluding items that are clearly educational or instructive in nature but may have some tangential or incidental qualities that could arguably be characterized as entertaining or visually attractive. OGE believes this modification will make the rule easier to understand and apply.

OGE further reorganized the exception to reduce its structural complexity. As proposed, § 2635.204(m) had several tiers, including: a first tier denoted by numbers, such as the number ''(2)''; a second tier denoted by lowercase roman numerals, such as the numeral ''(ii)''; a third tier denoted by capital letters, such as the letter ''(B)''; and a fourth tier denoted again by numbers, such as the number ''(2).'' By reorganizing the language of this section, OGE was able to eliminate the fourth tier.

OGE has made four other technical changes for consistency and clarity. First, OGE used the word ''person'' in paragraphs (m)(1)(i) and (ii) to be consistent with the language in § 2635.204(a), when aggregating gifts. Second, OGE changed the language ''an agency designee makes a written determination that,'' at § 2635.204(m)(1)(ii)(B) of the proposed rule, to ''an agency designee has made a written determination after finding that,'' now at § 2635.204(m)(1)(ii). The change makes the language of this paragraph consistent with the language used in § 2635.204(g)(3) and § 2635.204(h)(3). Third, OGE has added ''provided that'' to the opening language of § 2635.204(m)(1) in order to clarify that the $100 limit in § 2635.204(m)(1)(i) applies in every case unless an employee first obtains a written determination under § 2635.204(m)(1)(ii). Fourth, OGE has revised the reference to ''programs and operations'' of the agency so that it reads ''programs or operations'' of the agency. It was not OGE's intention to require that the subject matter relate to both a program and an operation, or to require that employees somehow distinguish ''programs'' from ''operations.''

5 CFR 2635.205 Limitations on Use of Exceptions

OGE received no comments on § 2635.205. OGE is adopting the amendments to this section as proposed for the reasons set forth in the preamble to the proposed rule. OGE, however, has replaced the period with a semi-colon in the phrase: ''Accept a gift in violation of any statute; relevant statutes applicable to all employees include, but are not limited to,'' found at § 2635.205(d). OGE has made this change for clarity because paragraph (d) in that section is part of a longer list that is connected by a semi-colon and the word ''or'' after paragraph (e) in that same section. By eliminating the period, OGE seeks to ensure that the period is not misconstrued as invalidating paragraphs (e) and (f) in the remainder of that list.

5 CFR 2635.206 Proper Disposition of Prohibited Gifts

OGE received four comments on § 2635.206, which explains what steps an employee must take to properly dispose of a prohibited gift. OGE amended this section to provide additional guidance on what steps are required to comply with the disposition authorities. One commenter was generally supportive of the additional guidance provided by OGE. Three commenters expressed concern that OGE's amendment of § 2635.206(a)(1) to allow employees to destroy prohibited tangible gifts worth $100 or less was wasteful. These three commenters also recommended that OGE amend § 2635.206(a)(1) to permit employees to donate prohibited tangible gifts worth $100 or less to charity.

For the following reasons, OGE has not accepted the commenters' suggestions. Allowing the destruction of relatively low-value, tangible gifts provides useful flexibility, while continuing to prohibit employees from retaining impermissible gifts. Setting the value threshold at $100 establishes a reasonable range that imposes minimal administrative burden in determining whether most low value items qualify for destruction. Setting the threshold far below that level would increase transaction costs because official time would necessarily have to be expended researching the precise market value of inexpensive items in order to determine whether they could be destroyed. It bears noting that, as is explained in § 2635.206(a), an employee is not required to destroy prohibited gifts; destruction is only one of several authorized options for disposition. Other options include returning the gift to the donor, paying the donor the gift's market value, or not accepting the gift in the first instance. Whenever the value of an item approaches the higher end of the $100 range, employees and agency ethics officials may be disinclined to destroy the item; in fact, the administrative burden of researching the item's precise market value in order to avoid exceeding the permissible value threshold creates a natural incentive to choose another option for disposition of more expensive items.

Authorizing donations to charity in lieu of destruction would present other problems. OGE has considered and rejected this option in the past. *See* 57 FR 35006, 35015 (Aug. 7, 1992). Allowing an employee to direct that a gift be donated to a charity of the employee's choosing would be tantamount to permitting constructive receipt of the gift by the employee. OGE is concerned that employees may be able to claim tax deductions under the Internal Revenue Code for gifts donated to charity, in essence receiving the "gift" of a tax deduction in lieu of the original gift. OGE has also explained in the past that permitting donations "would create an incentive for donors to offer employees items they cannot accept and, in the case of highly visible employees, might result in their favorite charities profiting from their official positions." *Id.* OGE remains concerned that authorizing donations to charity as a means to dispose of impermissible gifts could incentivize some employees to intentionally accept impermissible gifts for the purpose of donating them to their favorite charities.

OGE has, however, revised § 2635.206(a)(1) for clarity. In the proposed regulation, the first sentence read: "The employee must promptly return any tangible item to the donor, or pay the donor its market value, or, in the case that the tangible item has a market value not in excess of $100, the employee may destroy the item." In the final regulation, that sentence now reads: "The employee must promptly return any tangible item to the donor or pay the donor its market value; or, in the case of a tangible item with a market value of $100 or less, the employee may destroy the item." The meaning of the sentence is unchanged, but the revised sentence is easier to understand. In addition, OGE has removed the legal citation at the end of that paragraph, which referred to the definition of "market value" at § 2635.203(c), because the cross reference was unnecessary and potentially confusing to the reader.

III. Matters of Regulatory Procedure

Regulatory Flexibility Act

As Director of the Office of Government Ethics, I certify under the Regulatory Flexibility Act (5 U.S.C. chapter 6) that this final rule would not have a significant economic impact on a substantial number of small entities because it primarily affects current Federal executive branch employees.

Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. chapter 35) does not apply because this regulation does not contain information collection requirements that require approval of the Office of Management and Budget.

Unfunded Mandates Reform Act

For purposes of the Unfunded Mandates Reform Act of 1995 (2 U.S.C. chapter 5, subchapter II), this final rule would not significantly or uniquely affect small governments and will not result in increased expenditures by State, local, and tribal governments, in the aggregate, or by the private sector, of $100 million or more (as adjusted for inflation) in any one year.

Executive Order 13563 and Executive Order 12866

Executive Orders 13563 and 12866 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select the regulatory approaches that maximize net benefits (including economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This rule has been designated as a "significant regulatory action," although not economically significant, under section 3(f) of Executive Order 12866. Accordingly, this rule has been reviewed by the Office of Management and Budget.

Executive Order 12988

As Director of the Office of Government Ethics, I have reviewed this final rule in light of section 3 of Executive Order 12988, Civil Justice Reform, and certify that it meets the applicable standards provided therein.

List of Subjects in 5 CFR Part 2635

Conflict of interests, Executive Branch standards of ethical conduct, Government employees.

Approved: November 3, 2016.

Walter M. Shaub, Jr.,

Director, Office of Government Ethics.

Accordingly, for the reasons set forth in the preamble, the Office of Government Ethics is amending 5 CFR part 2635, as set forth below:

PART 2635—STANDARDS OF ETHICAL CONDUCT FOR EMPLOYEES OF THE EXECUTIVE BRANCH

■ 1. The authority citation for part 2635 continues to read as follows:

Authority: 5 U.S.C. 7301, 7351, 7353; 5 U.S.C. App. (Ethics in Government Act of 1978); E.O. 12674, 54 FR 15159, 3 CFR, 1989 Comp., p. 215, as modified by E.O. 12731, 55 FR 42547, 3 CFR, 1990 Comp., p. 306.

■ 2. Revise subpart B of part 2635 to read as follows:

Subpart B—Gifts From Outside Sources

Subpart B—Gifts From Outside Sources

§ 2635.201 Overview and considerations for declining otherwise permissible gifts.

(a) *Overview.* This subpart contains standards that prohibit an employee from soliciting or accepting any gift from a prohibited source or any gift given because of the employee's official position, unless the item is excluded from the definition of a gift or falls within one of the exceptions set forth in this subpart.

(b) *Considerations for declining otherwise permissible gifts.* (1) Every employee has a fundamental responsibility to the United States and its citizens to place loyalty to the Constitution, laws, and ethical principles above private gain. An employee's actions should promote the public's trust that this responsibility is being met. For this reason, employees should consider declining otherwise permissible gifts if they believe that a reasonable person with knowledge of the relevant facts would question the employee's integrity or impartiality as a result of accepting the gift.

(2) An employee who is considering whether acceptance of a gift would lead a reasonable person with knowledge of the relevant facts to question his or her integrity or impartiality may consider, among other relevant factors, whether:

(i) The gift has a high market value;

(ii) The timing of the gift creates the appearance that the donor is seeking to influence an official action;

(iii) The gift was provided by a person who has interests that may be substantially affected by the performance or nonperformance of the employee's official duties; and

(iv) Acceptance of the gift would provide the donor with significantly disproportionate access.

(3) Notwithstanding paragraph (b)(1) of this section, an employee who accepts a gift that qualifies for an exception under § 2635.204 does not violate this subpart or the Principles of Ethical Conduct set forth in § 2635.101(b).

(4) Employees who have questions regarding this subpart, including whether the employee should decline a gift that would otherwise be permitted under an exception found in § 2635.204, should seek advice from an agency ethics official.

Example 1 to paragraph (b): An employee of the Peace Corps is in charge of making routine purchases of office supplies. After a promotional presentation to highlight several new products, a vendor offers to buy the employee lunch, which costs less than $20. The employee is concerned that a reasonable person may question her impartiality in accepting the free lunch, as the timing of the offer indicates that the donor may be seeking to influence an official action and the company has interests that may be substantially affected by the performance or nonperformance of the employee's duties. As such, although acceptance of the gift may be permissible under § 2635.204(a), the employee decides to decline the gift.

§ 2635.202 General prohibition on solicitation or acceptance of gifts.

(a) *Prohibition on soliciting gifts.* Except as provided in this subpart, an employee may not, directly or indirectly:

(1) Solicit a gift from a prohibited source; or

(2) Solicit a gift to be given because of the employee's official position.

(b) *Prohibition on accepting gifts.* Except as provided in this subpart, an employee may not, directly or indirectly:

(1) Accept a gift from a prohibited source; or

(2) Accept a gift given because of the employee's official position.

(c) *Relationship to illegal gratuities statute.* A gift accepted pursuant to an exception found in this subpart will not constitute an illegal gratuity otherwise prohibited by 18 U.S.C. 201(c)(1)(B), unless it is accepted in return for being influenced in the performance of an official act. As more fully described in § 2635.205(d)(1), an employee may not solicit or accept a gift if to do so would be prohibited by the Federal bribery statute, 18 U.S.C. 201(b).

Example 1 to paragraph (c): A Government contractor who specializes in information technology software has offered an employee of the Department of Energy's information technology acquisition division a $15 gift card to a local restaurant if the employee will recommend to the agency's contracting officer that she select the contractor's products during the next acquisition. Even though the gift card is less than $20, the employee may not accept the gift under § 2635.204(a) because it is conditional upon official action by the employee. Pursuant to §§ 2635.202(c) and 2635.205(a), notwithstanding any exception to the rule, an employee may not accept a gift in return for being influenced in the performance of an official act.

§ 2635.203 Definitions.

For purposes of this subpart, the following definitions apply:

(a) *Agency* has the meaning set forth in § 2635.102(a). However, for purposes of this subpart, an executive department, as defined in 5 U.S.C. 101, may, by supplemental agency regulation, designate as a separate agency any component of that department which the department determines exercises distinct and separate functions.

(b) *Gift* includes any gratuity, favor, discount, entertainment, hospitality, loan, forbearance, or other item having monetary value. It includes services as well as gifts of training, transportation, local travel, lodgings and meals, whether provided in-kind, by purchase of a ticket, payment in advance, or reimbursement after the expense has been incurred. The term excludes the following:

(1) Modest items of food and non-alcoholic refreshments, such as soft drinks, coffee and donuts, offered other than as part of a meal;

(2) Greeting cards and items with little intrinsic value, such as plaques, certificates, and trophies, which are intended primarily for presentation;

Example 1 to paragraph (b)(2): After giving a speech at the facility of a pharmaceutical company, a Government employee is presented with a glass paperweight in the shape of a pill capsule with the name of the company's latest drug and the date of the speech imprinted on the side. The employee may accept the paperweight because it is an item with little intrinsic value which is intended primarily for presentation.

Example 2 to paragraph (b)(2): After participating in a panel discussion hosted by an international media company, a Government employee is presented with an inexpensive portable music player emblazoned with the media company's logo. The portable music player has a market value of $25. The employee may not accept the portable music player as it has a significant independent use as a music player rather than being intended primarily for presentation.

Example 3 to paragraph (b)(2): After giving a speech at a conference held by a national association of miners, a Department of Commerce employee is presented with a block of granite that is engraved with the association's logo, a picture of the Appalachian Mountains, the date of the speech, and the employee's name. The employee may accept this item because it is similar to a plaque, is designed primarily for presentation, and has little intrinsic value.

(3) Loans from banks and other financial institutions on terms generally available to the public;

(4) Opportunities and benefits, including favorable rates and commercial discounts, available to the public or to a class consisting of all Government employees or all uniformed military personnel, whether or not restricted on the basis of geographic considerations;

(5) Rewards and prizes given to competitors in contests or events, including random drawings, open to the public unless the employee's entry into the contest or event is required as part of the employee's official duties;

Example 1 to paragraph (b)(5): A Government employee is attending a free trade show on official time. The trade show is held in a public shopping area adjacent to the employee's office building. The employee voluntarily enters a drawing at an individual vendor's booth which is open to the public. She fills in an entry form on the vendor's display table and drops it into the contest box. The employee may accept the resulting prize because entry into the contest was not required by or related to her official duties.

Example 2 to paragraph (b)(5): Attendees at a conference, which is not open to the public, are entered in a drawing for a weekend getaway to Bermuda as a result of being registered for the conference. A Government employee who attends the conference in his official capacity could not accept the prize under paragraph (b)(5) of this section, as the event is not open to the public.

(6) Pension and other benefits resulting from continued participation in an employee welfare and benefits plan maintained by a current or former employer;

(7) Anything which is paid for by the Government or secured by the Government under Government contract;

Example 1 to paragraph (b)(7): An employee at the Occupational Safety and Health Administration is assigned to travel away from her duty station to conduct an investigation of a collapse at a construction site. The employee's agency is paying for her travel expenses, including her airfare. The employee may accept and retain travel promotional items, such as frequent flyer miles, received as a result of her official travel, to the extent permitted by 5 U.S.C. 5702, note, and 41 CFR part 301–53.

(8) Free attendance to an event provided by the sponsor of the event to:

(i) An employee who is assigned to present information on behalf of the agency at the event on any day when the employee is presenting;

(ii) An employee whose presence on any day of the event is deemed to be essential by the agency to the presenting employee's participation in the event, provided that the employee is accompanying the presenting employee; and

(iii) The spouse or one other guest of the presenting employee on any day when the employee is presenting, provided that others in attendance will generally be accompanied by a spouse or other guest, the offer of free attendance for the spouse or other guest is unsolicited, and the agency designee, orally or in writing, has authorized the presenting employee to accept;

Example 1 to paragraph (b)(8): An employee of the Department of the Treasury who is assigned to participate in a panel discussion of economic issues as part of a one-day conference may accept the sponsor's waiver of the conference fee. Under the separate authority of § 2635.204(a), the employee may accept a token of appreciation that has a market value of $20 or less.

Example 2 to paragraph (b)(8): An employee of the Securities and Exchange Commission is assigned to present the agency's views at a roundtable discussion of an ongoing working group. The employee may accept free attendance to the meeting under paragraph (b)(8) of this section because the employee has been assigned to present information at the meeting on behalf of the agency. If it is determined by the agency that it is essential that another employee accompany the presenting employee to the roundtable discussion, the accompanying employee may also accept free attendance to the meeting under paragraph (b)(8)(ii) of this section.

Example 3 to paragraph (b)(8): An employee of the United States Trade and Development Agency is invited to attend a cocktail party hosted by a prohibited source. The employee believes that he will have an opportunity to discuss official matters with other attendees while at the event. Although the employee may voluntarily discuss official matters with other attendees, the employee has not been assigned to present information on behalf of the agency. The employee may not accept free attendance to the event under paragraph (b)(8) of this section.

(9) Any gift accepted by the Government under specific statutory authority, including:

(i) Travel, subsistence, and related expenses accepted by an agency under the authority of 31 U.S.C. 1353 in connection with an employee's attendance at a meeting or similar function relating to the employee's official duties which take place away from the employee's duty station, provided that the agency's acceptance is in accordance with the implementing regulations at 41 CFR chapter 304; and

(ii) Other gifts provided in-kind which have been accepted by an agency under its agency gift acceptance statute; and

(10) Anything for which market value is paid by the employee.

(c) *Market value* means the cost that a member of the general public would reasonably expect to incur to purchase the gift. An employee who cannot ascertain the market value of a gift may estimate its market value by reference to the retail cost of similar items of like quality. The market value of a gift of a ticket entitling the holder to food, refreshments, entertainment, or any other benefit is deemed to be the face value of the ticket.

Example 1 to paragraph (c): An employee who has been given a watch inscribed with the corporate logo of a prohibited source may determine its market value based on her observation that a comparable watch, not inscribed with a logo, generally sells for about $50.

Example 2 to paragraph (c): During an official visit to a factory operated by a well-known athletic footwear manufacturer, an employee of the Department of Labor is offered a commemorative pair of athletic shoes manufactured at the factory. Although the cost incurred by the donor to manufacture the shoes was $17, the market value of the shoes would be the $100 that the employee would have to pay for the shoes on the open market.

Example 3 to paragraph (c): A prohibited source has offered a Government employee a ticket to a charitable event consisting of a cocktail reception to be followed by an evening of chamber music. Even though the food, refreshments, and entertainment provided at the event may be worth only $20, the market value of the ticket is its $250 face value.

Example 4 to paragraph (c): A company offers an employee of the Federal Communication Commission (FCC) free attendance for two to a private skybox at a ballpark to watch a major league baseball game. The skybox is leased annually by the company, which has business pending before the FCC. The skybox tickets provided to the employee do not have a face value. To determine the market value of the tickets, the employee must add the face value of two of the most expensive publicly available tickets to the game and the market value of any food, parking or other tangible benefits provided in connection with the gift of attendance that are not already included in the cost of the most expensive publicly available tickets.

Example 5 to paragraph (c): An employee of the Department of Agriculture is invited to a reception held by a prohibited source. There is no entrance fee to the reception event or to the venue. To determine the market value of the gift, the employee must add the market value of any entertainment, food, beverages, or other tangible benefit provided to attendees in connection with the reception, but need not consider the cost incurred by the sponsor to rent or maintain the venue where the event is held. The employee may rely on a per-person cost estimate provided by the sponsor of the event, unless the employee or an agency designee has determined that a reasonable person would find that the estimate is clearly implausible.

(d) *Prohibited source* means any person who:

(1) Is seeking official action by the employee's agency;

(2) Does business or seeks to do business with the employee's agency;

(3) Conducts activities regulated by the employee's agency;

(4) Has interests that may be substantially affected by the performance or nonperformance of the employee's official duties; or

(5) Is an organization a majority of whose members are described in paragraphs (d)(1) through (4) of this section.

(e) *Given because of the employee's official position.* A gift is given because of the employee's official position if the gift is from a person other than an employee and would not have been given had the employee not held the status, authority, or duties associated with the employee's Federal position.

Note to paragraph (e): Gifts between employees are subject to the limitations set forth in subpart C of this part.

Example 1 to paragraph (e): Where free season tickets are offered by an opera guild to all members of the Cabinet, the gift is offered because of their official positions.

Example 2 to paragraph (e): Employees at a regional office of the Department of Justice (DOJ) work in Government-leased space at a private office building, along with various private business tenants. A major fire in the building during normal office hours causes a traumatic experience for all occupants of the building in making their escape, and it is the subject of widespread news coverage. A corporate hotel chain, which does not meet the definition of a prohibited source for DOJ, seizes the moment and announces that it will give a free night's lodging to all building occupants and their families, as a public goodwill gesture. Employees of DOJ may accept, as this gift is not being given because of their Government positions. The donor's motivation for offering this gift is unrelated to the DOJ employees' status, authority, or duties associated with their Federal position, but instead is based on their mere presence in the building as occupants at the time of the fire.

(f) *Indirectly solicited or accepted.* A gift which is solicited or accepted indirectly includes a gift:

(1) Given with the employee's knowledge and acquiescence to the employee's parent, sibling, spouse, child, dependent relative, or a member of the employee's household because of that person's relationship to the employee; or

(2) Given to any other person, including any charitable organization, on the basis of designation, recommendation, or other specification by the employee, except the employee has not indirectly solicited or accepted a gift by the raising of funds or other support for a charitable organization if done in accordance with § 2635.808.

Example 1 to paragraph (f)(2): An employee who must decline a gift of a personal computer pursuant to this subpart may not suggest that the gift be given instead to one of five charitable organizations whose names are provided by the employee.

(g) *Free attendance* includes waiver of all or part of the fee for an event or the provision of food, refreshments, entertainment, instruction or materials furnished to all attendees as an integral part of the event. It does not include travel expenses, lodgings, or entertainment collateral to the event. It does not include meals taken other than in a group setting with all other attendees, unless the employee is a presenter at the event and is invited to a separate meal for participating presenters that is hosted by the sponsor of the event. Where the offer of free attendance has been extended to an accompanying spouse or other guest, the market value of the gift of free attendance includes the market value of free attendance by both the employee and the spouse or other guest.

§ 2635.204 Exceptions to the prohibition for acceptance of certain gifts.

Subject to the limitations in § 2635.205, this section establishes exceptions to the prohibitions set forth in § 2635.202(a) and (b). Even though acceptance of a gift may be permitted by one of the exceptions contained in this section, it is never inappropriate and frequently prudent for an employee to decline a gift if acceptance would cause a reasonable person to question the employee's integrity or impartiality. Section 2635.201(b) identifies considerations for declining otherwise permissible gifts.

(a) *Gifts of $20 or less.* An employee may accept unsolicited gifts having an aggregate market value of $20 or less per source per occasion, provided that the aggregate market value of individual gifts received from any one person under the authority of this paragraph (a) does not exceed $50 in a calendar year. This exception does not apply to gifts of cash or of investment interests such as stock, bonds, or certificates of deposit. Where the market value of a gift or the aggregate market value of gifts offered on any single occasion exceeds $20, the employee may not pay the excess value over $20 in order to accept that portion of the gift or those gifts worth $20. Where the aggregate value of tangible items offered on a single occasion exceeds $20, the employee may decline any distinct and separate item in order to accept those items aggregating $20 or less.

Example 1 to paragraph (a): An employee of the Securities and Exchange Commission and his spouse have been invited by a representative of a regulated entity to a community theater production, tickets to which have a face value of $30 each. The aggregate market value of the gifts offered on this single occasion is $60, $40 more than the $20 amount that may be accepted for a single event or presentation. The employee may not accept the gift of the evening of entertainment. He and his spouse may attend the play only if he pays the full $60 value of the two tickets.

Example 2 to paragraph (a): An employee of the National Geospatial-Intelligence Agency has been invited by an association of cartographers to speak about her agency's role in the evolution of missile technology. At the conclusion of her speech, the association presents the employee a framed map with a market value of $18 and a ceramic mug that has a market value of $15. The employee may accept the map or the mug, but not both, because the aggregate value of these two tangible items exceeds $20.

Example 3 to paragraph (a): On four occasions during the calendar year, an employee of the Defense Logistics Agency (DLA) was given gifts worth $10 each by four employees of a corporation that is a DLA contractor. For purposes of applying the yearly $50 limitation on gifts of $20 or less from any one person, the four gifts must be aggregated because a person is defined at § 2635.102(k) to mean not only the corporate entity, but its officers and employees as well. However, for purposes of applying the $50 aggregate limitation, the employee would not have to include the value of a birthday present received from his cousin, who is employed by the same corporation, if he can accept the birthday present under the exception at paragraph (b) of this section for gifts based on a personal relationship.

Example 4 to paragraph (a): Under the authority of 31 U.S.C. 1353 for agencies to accept payments from non-Federal sources in connection with attendance at certain meetings or similar functions, the Environmental Protection Agency (EPA) has accepted an association's gift of travel expenses and conference fees for an employee to attend a conference on the long-term effect of radon exposure. While at the conference, the employee may accept a gift of $20 or less from the association or from another person attending the conference even though it was not approved in advance by the EPA. Although 31 U.S.C. 1353 is the authority under which the EPA accepted the gift to the agency of travel expenses and conference fees, a gift of $20 or less accepted under paragraph (a) of this section is a gift to the employee rather than to her employing agency.

Example 5 to paragraph (a): During off-duty time, an employee of the Department of Defense (DoD) attends a trade show involving companies that are DoD contractors. He is offered software worth $15 at X Company's booth, a calendar worth $12 at Y Company's booth, and a deli lunch worth $8 from Z Company. The employee may accept all three of these items because they do not exceed $20 per source, even though they total more than $20 at this single occasion.

Example 6 to paragraph (a): An employee of the Department of Defense (DoD) is being promoted to a higher level position in another DoD office. Six individuals, each employed by a different defense contractor, who have worked with the DoD employee over the years, decide to act in concert to pool their resources to buy her a nicer gift than each could buy her separately. Each defense contractor employee contributes $20 to buy a desk clock for the DoD employee that has a market value of $120. Although each of the contributions does not exceed the $20 limit, the employee may not accept the $120 gift because it is a single gift that has a market value in excess of $20.

Example 7 to paragraph (a): During a holiday party, an employee of the Department of State is given a $15 store gift card to a national coffee chain by an agency contractor. The employee may accept the card as the market value is less than $20. The employee could not, however, accept a gift card that is issued by a credit card company or other financial institution, because such a card is equivalent to a gift of cash.

(b) *Gifts based on a personal relationship.* An employee may accept a gift given by an individual under circumstances which make it clear that the gift is motivated by a family relationship or personal friendship rather than the position of the employee. Relevant factors in making such a determination include the history and nature of the relationship and whether the family member or friend personally pays for the gift.

Example 1 to paragraph (b): An employee of the Federal Deposit Insurance Corporation (FDIC) has been dating an accountant employed by a member bank. As part of its ''Work-Life Balance'' program, the bank has given each employee in the accountant's division two tickets to a professional basketball game and has urged each to invite a family member or friend to share the evening of entertainment. Under the circumstances, the FDIC employee may accept the invitation to attend the game. Even though the tickets were initially purchased by the member bank, they were given without reservation to the accountant to use as she wished, and her invitation to the employee was motivated by their personal friendship.

Example 2 to paragraph (b): Three partners in a law firm that handles corporate mergers have invited an employee of the Federal Trade Commission (FTC) to join them in a golf tournament at a private club at the firm's expense. The entry fee is $500 per foursome. The employee cannot accept the gift of one-quarter of the entry fee even though he and the three partners have developed an amicable relationship as a result of the firm's dealings with the FTC. As evidenced in part by the fact that the fees are to be paid by the firm, it is not a personal friendship but a business relationship that is the motivation behind the partners' gift.

Example 3 to paragraph (b): A Peace Corps employee enjoys using a social media site on the internet in his personal capacity outside of work. He has used the site to keep in touch with friends, neighbors, coworkers, professional contacts, and other individuals he has met over the years through both work and personal activities. One of these individuals works for a contractor that provides language services to the Peace Corps. The employee was acting in his official capacity when he met the individual at a meeting to discuss a matter related to the contract between their respective employers. Thereafter, the two communicated occasionally regarding contract matters. They later also granted one another access to join their social media networks through their respective social media accounts. However, they did not communicate further in their personal capacities, carry on extensive personal interactions, or meet socially outside of work. One day, the individual, whose employer continues to serve as a Peace Corps contractor, contacts the employee to offer him a pair of concert tickets worth $30 apiece. Although the employee and the individual are connected through social media, the circumstances do not demonstrate that the gift was clearly motivated by a personal relationship, rather than the position of the employee, and therefore the employee may not accept the gift pursuant to paragraph (b) of this section.

(c) *Discounts and similar benefits.* In addition to those opportunities and benefits excluded from the definition of a gift by § 2635.203(b)(4), an employee may accept:

(1) A reduction or waiver of the fees for membership or other fees for participation in organization activities offered to all Government employees or all uniformed military personnel by professional organizations if the only restrictions on membership relate to professional qualifications; and

(2) Opportunities and benefits, including favorable rates, commercial discounts, and free attendance or participation not precluded by paragraph (c)(3) of this section:

(i) Offered to members of a group or class in which membership is unrelated to Government employment;

(ii) Offered to members of an organization, such as an employees' association or agency credit union, in which membership is related to Government employment if the same offer is broadly available to large segments of the public through organizations of similar size; or

(iii) Offered by a person who is not a prohibited source to any group or class that is not defined in a manner that specifically discriminates among Government employees on the basis of type of official responsibility or on a basis that favors those of higher rank or rate of pay.

Example 1 to paragraph (c)(2): A computer company offers a discount on the purchase of computer equipment to all public and private sector computer procurement officials who work in organizations with over 300 employees. An employee who works as the computer procurement official for a Government agency could not accept the discount to purchase the personal computer under the exception in paragraph (c)(2)(i) of this section. Her membership in the group to which the discount is offered is related to Government employment because her membership is based on her status as a procurement official with the Government.

Example 2 to paragraph (c)(2): An employee of the Consumer Product Safety Commission (CPSC) may accept a discount of $50 on a microwave oven offered by the manufacturer to all members of the CPSC employees' association. Even though the CPSC is currently conducting studies on the safety of microwave ovens, the $50 discount is a standard offer that the manufacturer has made broadly available through a number of employee associations and similar organizations to large segments of the public.

Example 3 to paragraph (c)(2): An Assistant Secretary may not accept a local country club's offer of membership to all members of Department Secretariats which includes a waiver of its $5,000 membership initiation fee. Even though the country club is not a prohibited source, the offer discriminates in favor of higher ranking officials.

(3) An employee may not accept for personal use any benefit to which the Government is entitled as the result of an expenditure of Government funds, unless authorized by statute or regulation (*e.g.,* 5 U.S.C. 5702, note, regarding frequent flyer miles).

Example 1 to paragraph (c)(3): The administrative officer for a field office of U.S. Immigration and Customs Enforcement (ICE) has signed an order to purchase 50 boxes of photocopy paper from a supplier whose literature advertises that it will give a free briefcase to anyone who purchases 50 or more boxes. Because the paper was purchased with ICE funds, the administrative officer cannot keep the briefcase which, if claimed and received, is Government property.

(d) *Awards and honorary degrees*—(1) *Awards.* An employee may accept a *bona fide* award for meritorious public service or achievement and any item incident to the award, provided that:

(i) The award and any item incident to the award are not from a person who has interests that may be substantially affected by the performance or nonperformance of the employee's official duties, or from an association or other organization if a majority of its members have such interests; and

(ii) If the award or any item incident to the award is in the form of cash or an investment interest, or if the aggregate value of the award and any item incident to the award, other than free attendance to the event provided to the employee and to members of the employee's family by the sponsor of the event, exceeds $200, the agency ethics official has made a written determination that the award is made as part of an established program of recognition.

Example 1 to paragraph (d)(1): Based on a written determination by an agency ethics official that the prize meets the criteria set forth in paragraph (d)(2) of this section, an employee of the National Institutes of Health (NIH) may accept the Nobel Prize for Medicine, including the cash award which accompanies the prize, even though the prize was conferred on the basis of laboratory work performed at NIH.

Example 2 to paragraph (d)(1): A defense contractor, ABC Systems, has an annual award program for the outstanding public employee of the year. The award includes a cash payment of $1,000. The award program is wholly funded to ensure its continuation on a regular basis for the next twenty years and selection of award recipients is made pursuant to written standards. An employee of the Department of the Air Force, who has duties that include overseeing contract performance by ABC Systems, is selected to receive the award. The employee may not accept the cash award because ABC Systems has interests that may be substantially affected by the performance or nonperformance of the employee's official duties.

Example 3 to paragraph (d)(1): An ambassador selected by a nonprofit organization as a recipient of its annual award for distinguished service in the interest of world peace may, together with his spouse and children, attend the awards ceremony dinner and accept a crystal bowl worth $200 presented during the ceremony. However, where the organization has also offered airline tickets for the ambassador and his family to travel to the city where the awards ceremony is to be held, the aggregate value of the tickets and the crystal bowl exceeds $200, and he may accept only upon a written determination by the agency ethics official that the award is made as part of an established program of recognition.

(2) *Established program of recognition.* An award and an item incident to the award are made pursuant to an established program of recognition if:

(i) Awards have been made on a regular basis or, if the program is new, there is a reasonable basis for concluding that awards will be made on a regular basis based on funding or funding commitments; and

(ii) Selection of award recipients is made pursuant to written standards.

(3) *Honorary degrees.* An employee may accept an honorary degree from an institution of higher education, as defined at 20 U.S.C. 1001, or from a similar foreign institution of higher education, based on a written determination by an agency ethics official that the timing of the award of the degree would not cause a reasonable person to question the employee's impartiality in a matter affecting the institution.

Note to paragraph (d)(3): When the honorary degree is offered by a foreign institution of higher education, the agency may need to make a separate determination as to whether the institution of higher education is a foreign government for purposes of the Emoluments Clause of the U.S. Constitution (U.S. Const., art. I, sec. 9, cl. 8), which forbids employees from accepting emoluments, presents, offices, or titles from foreign governments, without the consent of Congress. The Foreign Gifts and Decorations Act, 5 U.S.C. 7342, however, may permit the acceptance of honorary degrees in some circumstances.

Example 1 to paragraph (d)(3): A well-known university located in the United States wishes to give an honorary degree to the Secretary of Labor. The Secretary may accept the honorary degree only if an agency ethics official determines in writing that the timing of the award of the degree would not cause a reasonable person to question the Secretary's impartiality in a matter affecting the university.

(4) *Presentation events.* An employee who may accept an award or honorary degree pursuant to paragraph (d)(1) or (3) of this section may also accept free attendance to the event provided to the employee and to members of the employee's family by the sponsor of an event. In addition, the employee may also accept unsolicited offers of travel to and from the event provided to the employee and to members of the employee's family by the sponsor of the event. Travel expenses accepted under this paragraph (d)(4) must be added to the value of the award for purposes of determining whether the aggregate value of the award exceeds $200.

(e) *Gifts based on outside business or employment relationships.* An employee may accept meals, lodgings, transportation and other benefits:

(1) Resulting from the business or employment activities of an employee's spouse when it is clear that such benefits have not been offered or enhanced because of the employee's official position;

Example 1 to paragraph (e)(1): A Department of Agriculture employee whose spouse is a computer programmer employed by a Department of Agriculture contractor may attend the company's annual retreat for all of its employees and their families held at a resort facility. However, under § 2635.502, the employee may be disqualified from performing official duties affecting her spouse's employer.

Example 2 to paragraph (e)(1): Where the spouses of other clerical personnel have not been invited, an employee of the Defense Contract Audit Agency whose spouse is a clerical worker at a defense contractor may not attend the contractor's annual retreat in Hawaii for corporate officers and members of the board of directors, even though his spouse received a special invitation for herself and the employee.

(2) Resulting from the employee's outside business or employment activities when it is clear that such benefits are based on the outside business or employment activities and have not been offered or enhanced because of the employee's official status;

Example 1 to paragraph (e)(2): The members of an Army Corps of Engineers environmental advisory committee that meets six times per year are special Government employees. A member who has a consulting business may accept an invitation to a $50 dinner from her corporate client, an Army construction contractor, unless, for example, the invitation was extended in order to discuss the activities of the advisory committee.

(3) Customarily provided by a prospective employer in connection with *bona fide* employment discussions. If the prospective employer has interests that could be affected by performance or nonperformance of the employee's duties, acceptance is permitted only if the employee first has complied with the disqualification requirements of subpart F of this part applicable when seeking employment; or

Example 1 to paragraph (e)(3): An employee of the Federal Communications Commission with responsibility for drafting regulations affecting all cable television companies wishes to apply for a job opening with a cable television holding company. Once she has properly disqualified herself from further work on the regulations as required by subpart F of this part, she may enter into employment discussions with the company and may accept the company's offer to pay for her airfare, hotel, and meals in connection with an interview trip.

(4) Provided by a former employer to attend a reception or similar event when other former employees have been invited to attend, the invitation and benefits are based on the former employment relationship, and it is clear that such benefits have not been offered or enhanced because of the employee's official position.

Example 1 to paragraph (e)(4): An employee of the Department of the Army is invited by her former employer, an Army contractor, to attend its annual holiday dinner party. The former employer traditionally invites both its current and former employees to the holiday dinner regardless of their current employment activities. Under these circumstances, the employee may attend the dinner because the dinner invitation is a result of the employee's former outside employment activities, other former employees have been asked to attend, and the gift is not offered because of the employee's official position.

(5) For purposes of paragraphs (e)(1) through (4) of this section, ''employment'' means any form of non-Federal employment or business relationship involving the provision of personal services.

(f) *Gifts in connection with political activities permitted by the Hatch Act Reform Amendments.* An employee who, in accordance with the Hatch Act Reform Amendments of 1993, at 5 U.S.C. 7323, may take an active part in political management or in political campaigns, may accept meals, lodgings, transportation, and other benefits, including free attendance at events, for the employee and an accompanying spouse or other guests, when provided, in connection with such active participation, by a political organization described in 26 U.S.C. 527(e). Any other employee, such as a security officer, whose official duties require him or her to accompany an employee to a political event, may accept meals, free attendance, and entertainment provided at the event by such an organization.

Example 1 to paragraph (f): The Secretary of the Department of Health and Human

Services may accept an airline ticket and hotel accommodations furnished by the campaign committee of a candidate for the United States Senate in order to give a speech in support of the candidate.

(g) *Gifts of free attendance at widely attended gatherings*—(1) *Authorization.* When authorized in writing by the agency designee pursuant to paragraph (g)(3) of this section, an employee may accept an unsolicited gift of free attendance at all or appropriate parts of a widely attended gathering. For an employee who is subject to a leave system, attendance at the event will be on the employee's own time or, if authorized by the employee's agency, on excused absence pursuant to applicable guidelines for granting such absence, or otherwise without charge to the employee's leave account.

(2) *Widely attended gatherings.* A gathering is widely attended if it is expected that a large number of persons will attend, that persons with a diversity of views or interests will be present, for example, if it is open to members from throughout the interested industry or profession or if those in attendance represent a range of persons interested in a given matter, and that there will be an opportunity to exchange ideas and views among invited persons.

(3) *Written authorization by the agency designee.* The agency designee may authorize an employee or employees to accept a gift of free attendance at all or appropriate parts of a widely attended gathering only if the agency designee issues a written determination after finding that:

(i) The event is a widely attended gathering, as set forth in paragraph (g)(2) of this section;

(ii) The employee's attendance at the event is in the agency's interest because it will further agency programs or operations;

(iii) The agency's interest in the employee's attendance outweighs the concern that the employee may be, or may appear to be, improperly influenced in the performance of official duties; and

(iv) If a person other than the sponsor of the event invites or designates the employee as the recipient of the gift of free attendance and bears the cost of that gift, the event is expected to be attended by more than 100 persons and the value of the gift of free attendance does not exceed $375.

(4) *Determination of agency interest.* In determining whether the agency's interest in the employee's attendance outweighs the concern that the employee may be, or may appear to be, improperly influenced in the performance of official duties, the agency designee may consider relevant factors including:

(i) The importance of the event to the agency;

(ii) The nature and sensitivity of any pending matter affecting the interests of the person who extended the invitation and the significance of the employee's role in any such matter;

(iii) The purpose of the event;

(iv) The identity of other expected participants;

(v) Whether acceptance would reasonably create the appearance that the donor is receiving preferential treatment;

(vi) Whether the Government is also providing persons with views or interests that differ from those of the donor with access to the Government; and

(vii) The market value of the gift of free attendance.

(5) *Cost provided by person other than the sponsor of the event.* The cost of the employee's attendance will be considered to be provided by a person other than the sponsor of the event where such person designates the employee to be invited and bears the cost of the employee's attendance through a contribution or other payment intended to facilitate the employee's attendance. Payment of dues or a similar assessment to a sponsoring organization does not constitute a payment intended to facilitate a particular employee's attendance.

(6) *Accompanying spouse or other guest.* When others in attendance will generally be accompanied by a spouse or other guest, and where the invitation is from the same person who has invited the employee, the agency designee may authorize an employee to accept an unsolicited invitation of free attendance to an accompanying spouse or one other accompanying guest to participate in all or a portion of the event at which the employee's free attendance is permitted under paragraph (g)(1) this section. The authorization required by this paragraph (g)(6) must be provided in writing.

Example 1 to paragraph (g): An aerospace industry association that is a prohibited source sponsors an industry-wide, two-day seminar for which it charges a fee of $800 and anticipates attendance of approximately 400. An Air Force contractor pays $4,000 to the association so that the association can extend free invitations to five Air Force officials designated by the contractor. The Air Force officials may not accept the gifts of free attendance because (a) the contractor, rather than the association, provided the cost of their attendance; (b) the contractor designated the specific employees to receive the gift of free attendance; and (c) the value of the gift exceeds $375 per employee.

Example 2 to paragraph (g): An aerospace industry association that is a prohibited source sponsors an industry-wide, two-day seminar for which it charges a fee of $25 and anticipates attendance of approximately 50. An Air Force contractor pays $125 to the association so that the association can extend free invitations to five Air Force officials designated by the contractor. The Air Force officials may not accept the gifts of free attendance because (a) the contractor, rather than the association, provided the cost of their attendance; (b) the contractor designated the specific employees to receive the gift of free attendance; and (c) the event was not expected to be attended by more than 100 persons.

Example 3 to paragraph (g): An aerospace industry association that is a prohibited source sponsors an industry-wide, two-day seminar for which it charges a fee of $800 and anticipates attendance of approximately 400. An Air Force contractor pays $4,000 in order that the association might invite any five Federal employees. An Air Force official to whom the sponsoring association, rather than the contractor, extended one of the five invitations could attend if the employee's participation were determined to be in the interest of the agency and he received a written authorization.

Example 4 to paragraph (g): An employee of the Department of Transportation is invited by a news organization to an annual press dinner sponsored by an association of press organizations. Tickets for the event cost $375 per person and attendance is limited to 400 representatives of press organizations and their guests. If the employee's attendance is determined to be in the interest of the agency and she receives a written authorization from the agency designee, she may accept the invitation from the news organization because more than 100 persons will attend and the cost of the ticket does not exceed $375. However, if the invitation were extended to the employee and an accompanying guest, the employee's guest could not be authorized to attend for free because the market value of the gift of free attendance would exceed $375.

Example 5 to paragraph (g): An employee of the Department of Energy (DOE) and his spouse have been invited by a major utility executive to a small dinner party. A few other officials of the utility and their spouses or other guests are also invited, as is a representative of a consumer group concerned with utility rates and her spouse. The DOE official believes the dinner party will provide him an opportunity to socialize with and get to know those in attendance. The employee may not accept the free invitation under this exception, even if his attendance could be determined to be in the interest of the agency. The small dinner party is not a widely attended gathering. Nor could the employee be authorized to accept even if the event were instead a corporate banquet to which forty company officials and their spouses or other guests were invited. In this second case, notwithstanding the larger number of persons expected (as opposed to the small dinner party just noted) and despite the presence of the consumer group representative and her spouse who are not officials of the utility, those in attendance would still not represent a diversity of views or interests. Thus, the company banquet would not qualify as a widely attended gathering under those circumstances either.

Example 6 to paragraph (g): An Assistant U.S. Attorney is invited to attend a luncheon meeting of a local bar association to hear a distinguished judge lecture on cross-examining expert witnesses. Although members of the bar association are assessed a $15 fee for the meeting, the Assistant U.S. Attorney may accept the bar association's offer to attend for free, even without a determination of agency interest. The gift can be accepted under the $20 gift exception at paragraph (a) of this section.

Example 7 to paragraph (g): An employee of the Department of the Interior authorized to speak on the first day of a four-day conference on endangered species may accept the sponsor's waiver of the conference fee for the first day of the conference under § 2635.203(b)(8). If the conference is widely attended, the employee may be authorized to accept the sponsor's offer to waive the attendance fee for the remainder of the conference if the agency designee has made a written determination that attendance is in the agency's interest.

Example 8 to paragraph (g): A military officer has been approved to attend a widely attended gathering, pursuant to paragraph (g) of this section, that will be held in the same city as the officer's duty station. The defense contractor sponsoring the event has offered to transport the officer in a limousine to the event. The officer may not accept the offer of transportation because the definition of ''free attendance'' set forth in § 2635.203(g) excludes travel, and the market value of the transportation would exceed $20.

(h) *Social invitations.* An employee may accept food, refreshments, and entertainment, not including travel or lodgings, for the employee and an accompanying spouse or other guests, at a social event attended by several persons if:

(1) The invitation is unsolicited and is from a person who is not a prohibited source;

(2) No fee is charged to any person in attendance; and

(3) If either the sponsor of the event or the person extending the invitation to the employee is not an individual, the agency designee has made a written determination after finding that the employee's attendance would not cause a reasonable person with knowledge of the relevant facts to question the employee's integrity or impartiality, consistent with § 2635.201(b).

Example 1 to paragraph (h): An employee of the White House Press Office has been invited to a social dinner for current and former White House Press Officers at the home of an individual who is not a prohibited source. The employee may attend even if she is being invited because of her official position.

(i) *Meals, refreshments, and entertainment in foreign areas.* An employee assigned to duty in, or on official travel to, a foreign area as defined in 41 CFR 300–3.1 may accept unsolicited food, refreshments, or entertainment in the course of a breakfast, luncheon, dinner, or other meeting or event provided:

(1) The market value in the foreign area of the food, refreshments or entertainment provided at the meeting or event, as converted to U.S. dollars, does not exceed the per diem rate for the foreign area specified in the U.S. Department of State's Maximum Per Diem Allowances for Foreign Areas, Per Diem Supplement Section 925 to the Standardized Regulations (GC–FA), available on the Internet at *www.state.gov;*

(2) There is participation in the meeting or event by non-U.S. citizens or by representatives of foreign governments or other foreign entities;

(3) Attendance at the meeting or event is part of the employee's official duties to obtain information, disseminate information, promote the export of U.S. goods and services, represent the United States, or otherwise further programs or operations of the agency or the U.S. mission in the foreign area; and

(4) The gift of meals, refreshments, or entertainment is from a person other than a foreign government as defined in 5 U.S.C. 7342(a)(2).

Example 1 to paragraph (i): A number of local business owners in a developing country are eager for a U.S. company to locate a manufacturing facility in their province. An official of the Overseas Private Investment Corporation may accompany the visiting vice president of the U.S. company to a dinner meeting hosted by the business owners at a province restaurant where the market value of the food and refreshments does not exceed the per diem rate for that country.

(j) *Gifts to the President or Vice President.* Because of considerations relating to the conduct of their offices, including those of protocol and etiquette, the President or the Vice President may accept any gift on his or her own behalf or on behalf of any family member, provided that such acceptance does not violate § 2635.205(a) or (b), 18 U.S.C. 201(b) or 201(c)(3), or the Constitution of the United States.

(k) *Gifts authorized by supplemental agency regulation.* An employee may accept any gift when acceptance of the gift is specifically authorized by a supplemental agency regulation issued with the concurrence of the Office of Government Ethics, pursuant to § 2635.105.

(l) *Gifts accepted under specific statutory authority.* The prohibitions on acceptance of gifts from outside sources contained in this subpart do not apply to any item which a statute specifically authorizes an employee to accept. Gifts which may be accepted by an employee under the authority of specific statutes include, but are not limited to:

(1) Free attendance, course or meeting materials, transportation, lodgings, food and refreshments or reimbursements therefor incident to training or meetings when accepted by the employee under the authority of 5 U.S.C. 4111. The employee's acceptance must be approved by the agency in accordance with part 410 of this title; or

(2) Gifts from a foreign government or international or multinational organization, or its representative, when accepted by the employee under the authority of the Foreign Gifts and Decorations Act, 5 U.S.C. 7342. As a condition of acceptance, an employee must comply with requirements imposed by the agency's regulations or procedures implementing that Act.

(m) *Gifts of informational materials.* (1) An employee may accept unsolicited gifts of informational materials, provided that:

(i) The aggregate market value of all informational materials received from any one person does not exceed $100 in a calendar year; or

(ii) If the aggregate market value of all informational materials from the same person exceeds $100 in a calendar year, an agency designee has made a written determination after finding that acceptance by the employee would not be inconsistent with the standard set forth in § 2635.201(b).

(2) *Informational materials* are writings, recordings, documents, records, or other items that:

(i) Are educational or instructive in nature;

(ii) Are not primarily created for entertainment, display, or decoration; and

(iii) Contain information that relates in whole or in part to the following categories:

(A) The employee's official duties or position, profession, or field of study;

(B) A general subject matter area, industry, or economic sector affected by or involved in the programs or operations of the agency; or

(C) Another topic of interest to the agency or its mission.

Example 1 to paragraph (m): An analyst at the Agricultural Research Service receives an edition of an agricultural research journal in the mail from a consortium of private farming operations concerned with soil toxicity. The journal edition has a market value of $75. The analyst may accept the gift.

Example 2 to paragraph (m): An inspector at the Mine Safety and Health Administration receives a popular novel with a market value of $25 from a mine operator. Because the novel is primarily for entertainment purposes, the inspector may not accept the gift.

Example 3 to paragraph (m): An employee at the Department of the Army is offered an encyclopedia on cyberwarfare from a prohibited source. The cost of the encyclopedia is far in excess of $100. The agency designee determines that acceptance of the gift would be inconsistent with the standard set out in § 2635.201(b). The employee may not accept the gift under paragraph (m) of this section.

§ 2635.205 Limitations on use of exceptions.

Notwithstanding any exception provided in this subpart, other than § 2635.204(j), an employee may not:

(a) Accept a gift in return for being influenced in the performance of an official act;

(b) Use, or permit the use of, the employee's Government position, or any authority associated with public office, to solicit or coerce the offering of a gift;

(c) Accept gifts from the same or different sources on a basis so frequent that a reasonable person would be led to believe the employee is using the employee's public office for private gain;

Example 1 to paragraph (c): A purchasing agent for a Department of Veterans Affairs medical center routinely deals with representatives of pharmaceutical manufacturers who provide information about new company products. Because of his crowded calendar, the purchasing agent has offered to meet with manufacturer representatives during his lunch hours Tuesdays through Thursdays, and the representatives routinely arrive at the employee's office bringing a sandwich and a soft drink for the employee. Even though the market value of each of the lunches is less than $6 and the aggregate value from any one manufacturer does not exceed the $50 aggregate limitation in § 2635.204(a) on gifts of $20 or less, the practice of accepting even these modest gifts on a recurring basis is improper.

(d) Accept a gift in violation of any statute; relevant statutes applicable to all employees include, but are not limited to:

(1) 18 U.S.C. 201(b), which prohibits a public official from, directly or indirectly, corruptly demanding, seeking, receiving, accepting, or agreeing to receive or accept anything of value personally or for any other person or entity in return for being influenced in the performance of an official act; being influenced to commit or aid in committing, or to collude in, or allow, any fraud, or make opportunity for the commission of any fraud, on the United States; or for being induced to do or omit to do any action in violation of his or her official duty. As used in 18 U.S.C. 201(b), the term ''public official'' is broadly construed and includes regular and special Government employees as well as all other Government officials; and

(2) 18 U.S.C. 209, which prohibits an employee, other than a special Government employee, from receiving any salary or any contribution to or supplementation of salary from any source other than the United States as compensation for services as a Government employee. The statute contains several specific exceptions to this general prohibition, including an exception for contributions made from the treasury of a State, county, or municipality;

(e) Accept a gift in violation of any Executive Order; or

(f) Accept any gift when acceptance of the gift is specifically prohibited by a supplemental agency regulation issued with the concurrence of the Office of Government Ethics, pursuant to § 2635.105.

§ 2635.206 Proper disposition of prohibited gifts.

(a) Unless a gift is accepted by an agency acting under specific statutory authority, an employee who has received a gift that cannot be accepted under this subpart must dispose of the gift in accordance with the procedures set forth in this section. The employee must promptly complete the authorized disposition of the gift. The obligation to dispose of a gift that cannot be accepted under this subpart is independent of an agency's decision regarding corrective or disciplinary action under § 2635.106.

(1) *Gifts of tangible items.* The employee must promptly return any tangible item to the donor or pay the donor its market value; or, in the case of a tangible item with a market value of $100 or less, the employee may destroy the item. An employee who cannot ascertain the actual market value of an item may estimate its market value by reference to the retail cost of similar items of like quality.

Example 1 to paragraph (a)(1): A Department of Commerce employee received a $25 T-shirt from a prohibited source after providing training at a conference. Because the gift would not be permissible under an exception to this subpart, the employee must either return or destroy the T-shirt or promptly reimburse the donor $25. Destruction may be carried out by physical destruction or by permanently discarding the T-shirt by placing it in the trash.

Example 2 to paragraph (a)(1): To avoid public embarrassment to the seminar sponsor, an employee of the National Park Service did not decline a barometer worth $200 given at the conclusion of his speech on Federal lands policy. To comply with this section, the employee must either promptly return the barometer or pay the donor the market value of the gift. Alternatively, the National Park Service may choose to accept the gift if permitted under specific statutory gift acceptance authority. The employee may not destroy this gift, as the market value is in excess of $100.

(2) *Gifts of perishable items.* When it is not practical to return a tangible item in accordance with paragraph (a)(1) of this section because the item is perishable, the employee may, at the discretion of the employee's supervisor or the agency designee, give the item to an appropriate charity, share the item within the recipient's office, or destroy the item.

Example 1 to paragraph (a)(2): With approval by the recipient's supervisor, a floral arrangement sent by a disability claimant to a helpful employee of the Social Security Administration may be placed in the office's reception area.

(3) *Gifts of intangibles.* The employee must promptly reimburse the donor the market value for any entertainment, favor, service, benefit or other intangible. Subsequent reciprocation by the employee does not constitute reimbursement.

Example 1 to paragraph (a)(3): A Department of Defense employee wishes to attend a charitable event to which he has been offered a $300 ticket by a prohibited source. Although his attendance is not in the interest of the agency under § 2635.204(g), he may attend if he reimburses the donor the $300 face value of the ticket.

(4) *Gifts from foreign governments or international organizations.* The employee must dispose of gifts from foreign governments or international organizations in accordance with 41 CFR part 102–42.

(b) An agency may authorize disposition or return of gifts at Government expense. Employees may use penalty mail to forward reimbursements required or permitted by this section.

(c) An employee who, on his or her own initiative, promptly complies with the requirements of this section will not be deemed to have improperly accepted an unsolicited gift. An employee who promptly consults his or her agency ethics official to determine whether acceptance of an unsolicited gift is proper and who, upon the advice of the ethics official, returns the gift or otherwise disposes of the gift in accordance with this section, will be considered to have complied with the requirements of this section on the employee's own initiative.

(d) Employees are encouraged to record any actions they have taken to properly dispose of gifts that cannot be accepted under this subpart, such as by sending an electronic mail message to the appropriate agency ethics official or the employee's supervisor.

BILLING CODE 6345–03–P

DEPARTMENT OF AGRICULTURE

Commodity Credit Corporation

7 CFR Part 1471

RIN 0551–AA90

Pima Agriculture Cotton Trust Fund and Agriculture Wool Apparel Manufacturers Trust Fund

AGENCY: Foreign Agricultural Service and Commodity Credit Corporation (CCC), USDA.

ACTION: Final rule.

SUMMARY: This final rule makes amendments to the final rule, with request for comments, published in the **Federal Register** on March 9, 2015, that established regulations for the Pima Agriculture Cotton Trust Fund (Agriculture Pima Trust) and the Agriculture Wool Apparel Manufacturers Trust Fund (Agriculture Wool Trust) programs. This final rule is amended based on comments received and to add details for the Refund of Duties Paid on Imports of Certain Wool Products (Wool Duty Refund) payment. The administration of the Wool Duty Refund payment was transferred to the United States Department of Agriculture (USDA) beginning in calendar year (CY) 2016 and assigned to the Foreign Agricultural Service (FAS). It was previously administered by the Customs and Border Protection Agency of the Department of Homeland Security.

DATES: This final rule is effective November 18, 2016.

FOR FURTHER INFORMATION CONTACT: Peter W. Burr, Import Policies and Export Reporting Division, Office of Trade Programs, Foreign Agricultural Service, USDA; email: *pimawool@fas.usda.gov,* 202–720–3274.

SUPPLEMENTARY INFORMATION:

Background

On March 9, 2015, FAS published a final rule, with request for comments, in the **Federal Register** (80 FR 12321) for the Agriculture Pima Trust and the Agriculture Wool Trust programs. The final rule, with request for comments, was published under RIN 0551–AA86. The final rule, with request for comments, established regulations and sought comments for the Agriculture Pima Trust program and for three of the four payments under the Agriculture Wool Trust program. The Agriculture Pima Trust and Agriculture Wool Trust programs were established in the Agricultural Act of 2014 (Farm Bill). The Farm Bill transferred to USDA the responsibility for administering the Agriculture Pima Trust and three of the four payments under the Agriculture Wool Trust beginning in 2015, but transferred the fourth payment, the Wool Duty Refund, beginning in 2016.

Discussion of Comments

The following is a summary and discussion of the comments received relative to the Agriculture Pima Trust and the Agriculture Wool Trust programs along with the reasoning for the revisions made.

General

A commenter suggested that applicants not be required as noted in § 1471.1(b)(3)(iii), § 1471.1(b)(4), § 1471.10(b)(3)(iii), and § 1471.10(b)(4), to annually file IRS forms W–9 (U.S. person or resident alien) or the 1199A (direct deposit) with an application for either the Agriculture Pima Trust or Agriculture Wool Trust programs unless a change in the applicant's W–9 or 1199A information had occurred when compared to their previous year's application. This was deemed to be reasonable. Beginning in 2017, IRS forms W–9 and 1199A will only need to be filed if changes in the information have occurred.

A commenter noted that a technical correction is necessary in paragraphs (1) and (2) of § 1471.2(c) by closing the parentheticals after the word ''insurance.'' This correction will be made.

Payments to Manufacturers of Certain Worsted Wool Fabrics

A commenter identified an error common to paragraphs (b)(1)(ii) and (b)(2)(ii) of § 1471.11, Payments to manufacturers of certain worsted wool fabrics. The payment formula for payments to eligible persons is provided for under this section. The payment formula mistakenly states in paragraph (ii) that payments will be calculated based on the eligible person's production in the preceding year. However, the payments are actually based on the eligible person's production of qualifying worsted wool fabric during calendar years 1999, 2000, and 2001. This correction will be made.

Free Trade Zones

A commenter suggested that the scope of the monetization of the wool tariff rate quota payment as noted under § 1471.13(a)(2)(i) be expanded to include eligible entities, that are manufacturers and would otherwise be eligible for monetization payments, that import qualifying worsted wool into a free trade zone (FTZ), cut the wool and use it to make worsted wool suits for men and boys within the FTZ.

The monetization payment requires that the eligible entities receiving a monetization payment (1) import into the Customs territory of the United States the qualifying worsted wool directly or indirectly; (2) manufacture in the United States the qualifying worsted wool into worsted wool suits for men and boys; and (3) own the worsted wool at the time it's cut and manufactured.

An entity that manufactures the suits in an FTZ and does not export from the FTZ into the Customs territory of the United States the qualifying worsted wool directly or indirectly, does not qualify for this benefit because by definition the entity avoided paying the import duty on the qualifying worsted wool. However, an eligible entity that manufacturers the suits in an FTZ and exports into the Customs territory of the United States the qualifying worsted wool directly or indirectly and thus pays the import duty on the qualifying worsted wool, does qualify for this benefit. For the purpose of the monetization payment, the worsted wool suits for men and boys are manufactured in the U.S. and all environmental, worker safety, and wage protection laws, etc., would apply to this manufacturer.

USDA will also broaden the scope of eligible entities as it pertains to the wool yarn, wool fiber, and wool top compensation payment found at § 1471.14(a)(2)(i) to include those operating within a FTZ.

Definition of Eligible Person

A commenter suggested that the definition of an eligible person found at § 1471.13(a)(2)(i) in the monetization of the wool tariff rate quota payment be modified to allow an eligible person to claim the annual dollar value and quantity of imported qualifying worsted wool fabric cut and sewn if the eligible person owned the wool at the time it was cut and sewn, whether the person actually cut and sewed the imported qualifying worsted wool or another person cut and sewed the wool on behalf of the eligible person. This was deemed reasonable and is already allowed under § 1471.13(d)(3)(i)(A) and (d)(3)(ii)(A).

USDA will also make this change as it pertains to the wool yarn, wool fiber, and wool top duty compensation payment found at § 1471.14(a)(2)(i).

Reporting of Direct Imports

A commenter suggested that applicants for the monetization of the wool tariff rate quota payment not be required to include direct imports on their annual application for this payment. The commenter's suggestion was based on their observance that countries of origin of imported qualifying worsted wool by direct importers is included on the Customs and Border Protection (CBP) form #7501, which is provided to the Secretary of Treasury every year, and thus it was redundant to also require this information to be included on the affirmation part of the annual application. Even though this information is provided to CBP each year, USDA will maintain the requirement as found at § 1471.13(d)(2)(iii)(A) and (B) that applicants for the monetization of the wool tariff rate quota payment include their direct and indirect imports on their annual application. Including direct and indirect imports on the application for this payment will make it easier for USDA to process the annual payments and to distribute them in a timely manner.

Importers Versus Manufacturers

Regarding the monetization of the wool tariff rate quota payment, found at § 1471.13(a)(2), a commenter suggested that the definitions of eligible person and qualifying worsted wool, a provision eliciting specific business information, and the scope of the affirmation, be expanded to include all importers of qualifying worsted wool suitable for worsted wool suits, as opposed to importers of qualifying worsted wool that actually used the wool to make suits for men or boys. To support the commenter's position, the commenter cited statutory references to types of worsted wool fabrics categorized under the harmonized tariff schedule (HTS). However the commenter conflates statutory provisions authorizing the tariffs for HTS categories of worsted wool suitable for wool suits with defining the universe of eligible manufacturers who import qualifying worsted wool and are eligible for payments under this program. The wool tariff rate quota administered by the Secretary of Commerce, until its statutory sunset in 2014, in fact required that to benefit from the tariff reduction, the worsted wool had to be actually used for worsted wool suits. This monetization program provides payments to manufacturers who formerly benefitted from the tariff reduction. The requirement in the monetization payment that the qualifying worsted wool must be used by the manufacturer receiving the payment to make suits for men and boys will remain unchanged.

A commenter made a suggestion regarding the wool yarn, wool fiber, and wool top duty compensation payment found at § 1471.14(a)(2) that is similar to the comment above. The commenter suggested that the definitions of eligible person and qualifying wool, a provision eliciting specific business information, and the scope of the affirmation, be expanded from manufacturers that directly or indirectly imported qualifying wool and manufactured the qualifying wool, to include all importers of qualifying wool (whether or not the importer was also the manufacturer of the wool). To support this position, the commenter referred to statutory authority that did not require importers of qualifying wool to also be manufacturers of the qualifying wool. The commenter further stated that the wool duty refund program, of which only manufacturers of qualifying wool have participated, did not impose the requirement that the entity actually manufacture the qualifying wool. However the commenter is incorrect about what the statutory authority actually provides, and conflates extension of the duty suspension (that was applicable to all importers, regardless of whether they also manufactured men's and boy's wool suits) in section 5102 of the Trade Act of 2002, Public Law 107–210 and the wool duty refund payment program (that applied only to manufacturers of men's and boy's wool suits) in section 5101 of the Trade Act of 2002. The duty refund program administered by the U.S. Customs Service and by Customs and Border Protection in the Department of Homeland Security from 2002–2014 required that the importer must also be the manufacturer of the qualifying wool. The requirements in the wool yarn, wool fiber, and wool top duty compensation payment that the qualifying wool must be imported and must also be used for further manufacturing by the importing manufacturer will remain unchanged.

Refund of Duties Paid on Imports of Certain Wool Products

The Wool Duty Refund payment found at § 1471.12 was administered by the Department of Homeland Security's Customs and Border Protection (CBP) through 2015. In the Farm Bill, the Wool Duty Refund payment was established for the year 2016 through 2019 and was transferred to USDA. The Wool Duty Refund payment is open to U.S. entities that manufactured certain wool articles made with certain imported wool products during calendar years 2000, 2001 and 2002; received a 2005 payment under section 505 of the Trade and Development Act of 2000; and as of January 1st of the payment year, continues to be a manufacturer in the U.S. as provided for in Section 505(a) of the Trade and Development Act of 2000. FAS will administer the Wool Duty Refund payment for 2016–2019 exactly the same as it was administered by CBP.

Executive Order 12630

This Executive Order requires careful evaluation of governmental actions that interfere with constitutionally protected property rights. This rule does not interfere with any property rights and, therefore, does not need to be evaluated on the basis of the criteria outlined in Executive Order 12630.

Executive Order 12866

This final rule is issued in conformance with Executive Order 12866 and Administrative Procedure Act (5 U.S.C. 553). It has been determined to be not significant for the purposes of Executive Order 12866 and was not reviewed by OMB for this purpose. A cost-benefit assessment of this rule was not completed.

Executive Order 12372

This final rule is not subject to Executive Order 12372, which requires intergovernmental consultation with State and local officials. See the notice related to 7 CFR part 3015, subpart V, published at 48 FR 29115 (June 24, 1983).

Executive Order 12988

This final rule has been reviewed in accordance with Executive Order 12988. This rule would not preempt State or local laws, regulations, or policies unless they present an irreconcilable conflict with this rule. This rule would not be retroactive.

Executive Order 13132

This final rule has been reviewed under Executive order 13132, ''Federalism.'' The policies contained in this final rule do not have any substantial direct effect on States, on the relationship between the Federal government and the States, or on the distribution of power and responsibilities among the various levels of government, nor does this final rule impose substantial direct compliance costs on State and local governments. Therefore, consultation with the States is not required.

Executive Order 13175

This final rule has been reviewed for compliance with E.O. 13175. The policies contained in this final rule do not have tribal implications that preempt tribal law.

Regulatory Flexibility Act

The Regulatory Flexibility Act does not apply to this final rule because FAS is not required by 5 U.S.C. 553 or any other law to publish a notice of proposed rulemaking with respect to the subject matter of this final rule.

Civil Rights Impact Statement

No major civil rights impact is likely to result from the announcement of this final rule. It will not have a negative civil rights impact on very-low income, low income, moderate income, and minority populations.

Environmental Assessment

The environmental impacts of this rule have been considered in a manner consistent with the provisions of the National Environmental Policy Act (NEPA, 42 U.S.C. 4321–4347), the regulations of the Council on Environmental Quality (40 CFR parts 1500–1508), and FAS regulations for compliance with NEPA (7 CFR part 799). FAS has determined that NEPA does not apply to this final rule and that no environmental assessment or environmental impact statement will be prepared.

Unfunded Mandates Reform Act

This final rule does not impose any enforceable duty or contain any unfunded mandate as described under Title II of the Unfunded Mandates Reform Act of 1995 (UMRA). Therefore, this rule is not subject to the requirements of sections 202 and 205 of UMRA.

E-Government Act Compliance

FAS is committed to complying with the E-Government Act to promote the use of the Internet and other information technologies to provide increased opportunities for citizen access to Government information, services, and for other purposes. The forms, regulations, and other information collection activities required to be utilized by a person subject to this final rule are available at: *http://www.fas.usda.gov.*

List of Subjects in 7 CFR Part 1471

Agricultural commodities, imports.

Accordingly, 7 CFR part 1471 is amended as follows:

PART 1471—PIMA AGRICULTURE COTTON TRUST FUND (AGRICULTURE PIMA TRUST) AND AGRICULTURE WOOL APPAREL MANUFACTURERS TRUST FUND (AGRICULTURE WOOL TRUST)

■ 1. The authority citation for part 1471 continues to read as follows:

Authority: Sections 501–506, Pub. L. 106–200, (114 Stat. 299–304); Section 4002, Pub. L. 108–429 (7 U.S.C. 7101 note); Section 1633, Pub. L. 109–280 (120 Stat. 1166); Section 325, Pub. L. 110–343 (122 Stat. 3875); Sections 12314 and 12315, Pub. L. 113–79 (7 U.S.C. 2101 note and 7101 note).

Subpart A—Agriculture Pima Trust

■ 2. Amend § 1471.1 to revise paragraphs (b)(3)(iii) and (b)(4) to read as follows:

§ 1471.1 Provisions common to this subpart.

* * * * *

(b) * * *

(3) * * *

(iii) A W–9 providing the Federal tax identification number of the person (if the information required by Form W–9 has changed since the previous application).

(4) Standard Form 1199A. Every person claiming a payment must provide Standard Form 1199A, a direct deposit sign-up form, to facilitate any transfer of funds (if the information required by Form 1199A has changed since the previous application).

* * * * *

§ 1471.2 [Amended]

■ 3. Amend § 1471.2(c)(1) and (2) by removing "(excluding duty, shipping, and insurance" and adding in its place "(excluding duty, shipping, and insurance)".

* * * * *

■ 4. Revise § 1471.5 to read as follows:

§ 1471.5 Affidavit of pima cotton trade associations.

In addition to applicable information requirements in § 1471.1, trade associations filing a claim for a payment must electronically provide a statement which states that during the calendar year immediately preceding the payment they were, as determined by the Secretary, a domestic nationally recognized association established and operating for the promotion of pima cotton for domestic use in textile and apparel goods.

Subpart B—Agriculture Wool Trust

■ 5. Amend § 1471.10 to revise paragraphs (b)(3)(iii) and (b)(4) to read as follows:

§ 1471.10 Provisions common to this subpart.

* * * * *

(b) * * *

(3) * * *

(iii) A W–9 providing the Federal tax identification number of the person (if the information required by Form W–9 has changed since the previous application).

(4) Every person claiming a payment must provide Standard Form 1199A, a direct deposit sign-up form, to facilitate any transfer of funds (if the information required by Form 1199A has changed since the previous application).

* * * * *

■ 6. Amend § 1471.11 to revise paragraphs (b)(1)(ii) and (b)(2)(ii) to read as follows:

§ 1471.11 Payments to manufacturers of certain worsted wool fabrics.

* * * * *

(b) * * *

(1) * * *

(ii) *Payment amounts.* A total of $2,666,000 will be allocated annually among eligible persons covered by this paragraph on the basis of the percentage of each eligible person's total production (actual production, not estimates) of qualifying worsted wool fabric described in paragraph (b)(1)(i) of this section for each of the calendar years 1999, 2000, and 2001 in relation to the total production of such fabric by all eligible persons who qualify for payments under this paragraph for each of the calendar years 1999, 2000, and 2001.

* * * * *

(2) * * *

(ii) *Payment amounts.* A total of $2,666,000 will be allocated annually among eligible persons covered by this paragraph on the basis of the percentage of each eligible person's total production (actual production, not estimates) of qualifying worsted wool fabric described in paragraph (b)(2)(i) of this section for each of the calendar years 1999, 2000, and 2001 in relation to the total production of such fabric by all eligible persons who qualify for payments under this paragraph for each of the calendar years 1999, 2000, and 2001.

* * * * *

■ 7. Add § 1471.12 to read as follows:

§ 1471.12 Refund of duties paid on imports of certain wool products.

(a) *Eligible wool.* Eligible wool under the Duty Refund program means imported wool yarn of the kind described in section 505 of the Trade and Development Act of 2000 Public Law 106–200 (May 18, 2000).

(b) *Payments*—(1) *Eligibility.* Persons eligible for a Duty Refund payment are manufacturers who, in the year immediately preceding the payment, were actively engaged in manufacturing wool (as determined by FAS), and in calendar years 2000, 2001, and 2002—

(i) Imported eligible wool directly or indirectly; and

(ii) Used the imported wool to make men's or boy's suits; or

(iii) Further manufactured the eligible imported wool.

(2) *Payment amount.* Persons eligible for a Duty Refund payment shall be paid the same amounts that were made to the persons by CBP through FY 2015.

■ 8. Amend § 1471.13 to revise paragraphs (a)(2)(i), (d)(3)(i)(A), and (d)(3)(ii)(A) to read as follows:

§ 1471.13 Monetization of the wool tariff rate quota.

(a) * * *

(2) * * *

(i) *In general.* The term ''eligible person'' means a manufacturer (or a successor-in-interest to the manufacturer) in the U.S. or in a Foreign-Trade Zone authorized under the Foreign-Trade Zones Act of 1934 (19 U.S.C. 81a–81u) during the calendar year immediately preceding the payment that:

(A) Imported qualifying worsted wool fabric; and

(B) Used the imported qualifying worsted wool fabric directly or had another person use the qualifying worsted wool fabric providing the eligible person owned the qualifying worsted wool fabric at the time it was used:

(*1*) In the case of wool of the kind described in subheadings 9902.51.11 or 9902.51.15 of the 2014 HTS, to produce worsted wool suits, suit-type jackets and trousers for men and boys; or

(*2*) In the case of wool fabric of the kind described in subheading 9902.51.16 of the 2014 HTS, used such wool fabric in manufacturing.

* * * * *

(d) * * *

(3) * * *

(i) * * *

(A) *In general.* When reporting the annual dollar value and quantity of imported qualifying worsted wool fabric, an eligible person may either have cut and sewn the wool on its own behalf or had another person cut and sew the wool on behalf of the eligible person, provided the eligible person owned the wool at the time it was cut and sewn.

* * * * *

(ii) * * *

(A) *In general.* When reporting the annual dollar value and quantity of imported qualifying worsted wool fabric, an eligible person may either have manufactured the wool on its own behalf or had another person manufacture the wool on behalf of the eligible person, provided the eligible person owned the wool at the time of manufacture.

* * * * *

■ 9. Amend § 1471.14 to revise paragraph (a)(2)(i) to read as follows:

§ 1471.14 Wool yarn, wool fiber, and wool top duty compensation payment.

(a) * * *

(2) * * *

(i) *In general.* The term ''eligible person'' means a manufacturer (or a successor-in-interest to the manufacturer) in the U.S. or in a Foreign-Trade Zone authorized under the Foreign-Trade Zones Act of 1934 (19 U.S.C. 81a–81u) during the calendar year immediately preceding the payment that

(A) Imported qualifying wool; and

(B) Manufactured the qualifying wool directly or had another person manufacture the qualifying wool providing the eligible person owned the qualifying wool at the time it was manufactured.

* * * * *

Dated: November 2, 2016.

Philip C. Karsting,

Administrator, Foreign Agricultural Service, and Vice President, Commodity Credit Corporation.

BILLING CODE 3410–10–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2016–9000; Directorate Identifier 2016–CE–027–AD; Amendment 39–18713; AD 2016–23–06]

RIN 2120–AA64

Airworthiness Directives; Various Aircraft Equipped With BRP-Powertrain GmbH & Co KG 912 A Series Engine

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: We are adopting a new airworthiness directive (AD) for various aircraft equipped with a BRP-Powertrain GmbH & Co KG (formerly Rotax Aircraft Engines) 912 A series engine. This AD results from mandatory continuing airworthiness information (MCAI) issued by an aviation authority of another country to identify and correct an unsafe condition on an aviation product. The MCAI describes the unsafe condition as a manufacturing defect found in certain carburetor floats where an in-flight engine shutdown and forced landing could occur when the affected cylinder had reduced or blocked fuel supply. We are issuing this AD to require actions to address the unsafe condition on these products.

DATES: This AD is effective December 23, 2016.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of December 23, 2016.

ADDRESSES: You may examine the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–9000; or in person at Document Management Facility, U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.

For service information identified in this AD, contact BRP-Powertrain GmbH & Co. KG, Welser Strasse 32, A–4623 Gunskirchen, Austria; phone: +43 7246 601 0; fax: +43 7246 601 9130; Internet: *www.rotax-aircraft-engines.com.* You may view this referenced service information at the FAA, Small Airplane Directorate, 901 Locust, Kansas City, Missouri 64106. For information on the availability of this material at the FAA, call (816) 329–4148. It is also available on the Internet at *http://www.regulations.gov* by searching for Docket No. FAA–2016–9000.

FOR FURTHER INFORMATION CONTACT: Jim Rutherford, Aerospace Engineer, FAA, Small Airplane Directorate, 901 Locust, Room 301, Kansas City, Missouri 64106; telephone: (816) 329–4165; fax: (816) 329–4090; email: *jim.rutherford@faa.gov.*

SUPPLEMENTARY INFORMATION:

Discussion

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to various aircraft equipped with a BRP-Powertrain GmbH & Co KG (formerly Rotax Aircraft Engines) 912 A series engine. The NPRM was published in the **Federal Register** on September 8, 2016 (81 FR 62037). The NPRM proposed to correct an unsafe condition for the specified products and was based on mandatory continuing airworthiness information (MCAI) originated by an aviation authority of another country. The MCAI states:

Due to a quality escape in the manufacturing process of certain floats, Part Number (P/N) 861185, a partial separation of the float outer skin may occur during engine operation. Separated particles could lead to a restriction of the jets in the carburetor, possibly reducing or blocking the fuel supply to the affected cylinder.

This condition, if not detected and corrected, could lead to in-flight engine shutdown and forced landing, possibly resulting in damage to the aeroplane and injury to occupants.

To address this potential unsafe condition, BRP-Powertrain published Alert Service Bulletin (ASB) ASB–912–069/ASB–914–051 (single document, hereafter referred to as 'the ASB' in this AD), providing instructions for identification and replacement of the affected parts.

For the reasons stated above, this AD required identification and replacement of the affected floats with serviceable parts.

This AD is republished to correct one typographical error in Table 2 of Appendix 2, and to include reference to revision 1 of the ASB in the Referenced Publications.

You may examine the MCAI on the Internet at *https://www.regulations.gov/document?D=FAA-2016-9000-0002.*

Comments

We gave the public the opportunity to participate in developing this AD. We received no comments on the NPRM or on the determination of the cost to the public.

Conclusion

We reviewed the relevant data and determined that air safety and the public interest require adopting this AD as proposed except for minor editorial changes. We have determined that these minor changes:

- Are consistent with the intent that was proposed in the NPRM for correcting the unsafe condition; and
- Do not add any additional burden upon the public than was already proposed in the NPRM.

Related Service Information Under 1 CFR Part 51

We reviewed BRP-Powertrain GmbH & CO KG Rotax Aircraft Engines BRP Alert Service Bulletin ASB–912–069R1/ASB–914–051R1 (co-published as one document), Revision 1, dated July 22, 2016. The service information describes procedures for identifying and replacing defective carburetor floats. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section of this AD.

Costs of Compliance

We estimate that this AD will affect 65 products of U.S. registry. We also estimate that it will take about 2 work-hours per product to comply with the basic requirements of this AD. The average labor rate is $85 per work-hour. Required parts will cost about $100 per product.

Based on these figures, we estimate the cost of this AD on U.S. operators to be $17,550, or $270 per product.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. ''Subtitle VII: Aviation Programs,'' describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in ''Subtitle VII, Part A, Subpart III, section 44701: General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979),

(3) Will not affect intrastate aviation in Alaska, and

(4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–9000; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains the NPRM, the regulatory evaluation, any comments received, and other information. The street address for the Docket Office (telephone (800) 647–5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new AD:

2016–23–06 Various Aircraft: Amendment 39–18713; Docket No. FAA–2016–9000; Directorate Identifier 2016–CE–027–AD.

(a) Effective Date

This airworthiness directive (AD) becomes effective December 23, 2016.

(b) Affected ADs

None.

(c) Applicability

This AD applies to all serial numbers (S/N) of the airplanes listed in table 1 of paragraph (c) of this AD, certificated in any category, that incorporate one of the following:

(1) A BRP-Powertrain GmbH & Co KG (formerly Rotax Aircraft Engines) 912 A series engine having a serial number with a carburetor part number (P/N) and S/N listed in table 2 of paragraph (c) of this AD, installed as noted, in cylinder head position 1 through 4; or

(2) an engine that, after May 8, 2016, has had an affected float, P/N 861185, installed in service as part of the airframe. Affected floats were initially delivered between May 9, 2016, and July 17, 2016, and do not have three dots stamped on the surface, as shown in paragraph 3.3) of the Accomplishment/Instructions in Rotax Aircraft Engines BRP Alert Service Bulletin ASB–912–069R1/ASB–914–051R1 (co-published as one document), Revision 1, dated July 22, 2016. A certification document (*e.g.,* Form 1), delivery document or record of previous installation of the float are acceptable to determine an initial delivery on or before May 8, 2016.

TABLE 1 OF PARAGRAPH (C)—AFFECTED AIRPLANES

Type certificate holder	Aircraft model	Engine model
Aeromot-Indústria; Mecânico-Metalúrgica Ltda	AMT–200	912 A2
Diamond Aircraft Industries	HK 36 R "SUPER DIMONA"	912 A
DIAMOND AIRCRAFT INDUSTRIES GmbH	HK 36 TS and HK 36 TC	912 A3
Diamond Aircraft Industries Inc.	DA20–A1	912 A3
HOAC-Austria	DV 20 KATANA	912 A3
Iniziative Industriali Italiane S.p.A.	Sky Arrow 650 TC	912 A2
SCHEIBE-Flugzeugbau GmbH	SF 25C	912 A2, 912 A3

TABLE 2 OF PARAGRAPH (C)—AFFECTED CARBURETORS

Engine	Cylinder position	Carburetor P/N and S/N
912A1, 912A2, 912A3, 912A4	1 or 3	P/N 892500—S/Ns 161138 through 161143, 161483 through 161490, 161493 through 161507, 161516 through 161518, and 161526.
	2 or 4	P/N 892505—S/Ns 162193, 162194, 162196 through 162199, and 162205.

(d) Subject

Air Transport Association of America (ATA) Code 73: Engine—Fuel and Control.

(e) Reason

This AD was prompted by mandatory continuing airworthiness information (MCAI) originated by an aviation authority of another country to identify and correct an unsafe condition on an aviation product. The MCAI describes the unsafe condition as a manufacturing defect found in certain carburetor floats. We are issuing this AD to require actions to prevent the fuel supply to the affected cylinder from becoming reduced or blocked, which could cause an in-flight engine shutdown and result in a forced landing and damage to the airplane or injury to the occupants.

(f) Actions and Compliance

Unless already done, do the following actions:

(1) Within the next 25 hours time-in-service after December 23, 2016 (the effective date of this AD) or within the next 30 days after December 23, 2016 (the effective date of this AD), whichever occurs first, replace all affected floats with a serviceable float following paragraph (3) Accomplishment/Instructions in Rotax Aircraft Engines BRP Alert Service Bulletin ASB–912–069R1/ASB–914–051R1 (co-published as one document), Revision 1, dated July 22, 2016.

(2) As of December 23, 2016 (the effective date of this AD), do not install a float, P/N 861185, that does not have three dots stamped on the surface, as shown in paragraph (3.3) of the Accomplishment/Instructions in Rotax Aircraft Engines BRP Alert Service Bulletin ASB–912–069R1/ASB–914–051R1 (co-published as one document), Revision 1, dated July 22, 2016.

(g) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, Standards Office, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. Send information to ATTN: Jim Rutherford, Aerospace Engineer, FAA, Small Airplane Directorate, 901 Locust, Room 301, Kansas City, Missouri 64106; telephone: (816) 329–4165; fax: (816) 329–4090; email: *jim.rutherford@faa.gov.* Before using any approved AMOC on any airplane to which the AMOC applies, notify your appropriate principal inspector (PI) in the FAA Flight Standards District Office (FSDO), or lacking a PI, your local FSDO.

(2) *Airworthy Product:* For any requirement in this AD to obtain corrective actions from a manufacturer or other source, use these actions if they are FAA-approved. Corrective actions are considered FAA-approved if they are approved by the State of Design Authority (or their delegated agent). You are required to assure the product is airworthy before it is returned to service.

(h) Related Information

Refer to MCAI European Aviation Safety Agency (EASA) AD No.: 2016–0144, correction dated July 25, 2016, and BRP-Powertrain GmbH & CO KG Rotax Aircraft Engines BRP Alert Service Bulletin ASB–912–069/ASB–914–051 (co-published as one document), dated July 14, 2016, for related information. You may examine the MCAI on the Internet at *https://www.regulations.gov/document?D=FAA-2016-9000-0002.*

(i) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

DEPARTMENT OF COMMERCE

Bureau of Industry and Security

15 CFR Part 744

[Docket No. 160106014–6728–04]

RIN 0694–AG82

Temporary General License: Extension of Validity

AGENCY: Bureau of Industry and Security, Commerce.

ACTION: Final rule.

SUMMARY: On March 24, 2016, the Bureau of Industry and Security (BIS) published a final rule, Temporary General License. The March 24 final rule created a temporary general license that restored, for a specified time period, the licensing requirements and policies under the Export Administration Regulations (EAR) for exports, reexports, and transfers (in-country) as of March 7, 2016, to two entities (ZTE Corporation and ZTE Kangxun) that were added to the Entity List on March 8, 2016. At this time, the U.S. Government has decided to extend the temporary general license until February 27, 2017. In order to implement this decision, this final rule revises the temporary general license to remove the expiration date of November 28, 2016, and to substitute the date of February 27, 2017. This final rule makes no other changes to the EAR.

DATES: This rule is effective November 18, 2016 through February 27, 2017. The expiration date of the final rule published on March 24, 2016 (81 FR 15633) is extended until February 27, 2017.

FOR FURTHER INFORMATION CONTACT: Chair, End-User Review Committee, Office of the Assistant Secretary, Export Administration, Bureau of Industry and Security, Department of Commerce, Phone: (202) 482–5991, Email: *ERC@bis.doc.gov.*

SUPPLEMENTARY INFORMATION:

Background

On March 24, 2016, the Bureau of Industry and Security (BIS) published a final rule, Temporary General License (81 FR 15633). The March 24 final rule amended the EAR by adding Supplement No. 7 to part 744 to create a temporary general license that returned, until June 30, 2016, the licensing and other policies of the EAR regarding exports, reexports, and transfers (in-country) to Zhongxing Telecommunications Equipment (ZTE) Corporation and ZTE Kangxun to that which were in effect prior to their addition to the Entity List on March 8, 2016.

On June 28, 2016, BIS published a final rule, Temporary General License: Extension of Validity (81 FR 41799), which extended the validity of the temporary general license until August 30, 2016. On August 19, 2016, BIS published a final rule, Temporary General License: Extension of Validity (81 FR 55372), which extended, for a second time, the validity of the Temporary General License until November 28, 2016. Details regarding the scope of the listing are at 81 FR 12004 (Mar. 8, 2016), (''Additions to the Entity List''). Details regarding the Temporary General License can be found in the March 24 final rule and in Supplement No. 7 to Part 744—Temporary General License.

BIS issued the March 24 final rule, and the June 28 and August 19 extension of validity final rules, in connection with a request to remove or modify the listings. The March 24 final rule, and the June 28 and August 19 final rules, specified that the temporary general license was renewable if the U.S. Government determined, in its sole discretion, that ZTE Corporation and ZTE Kangxun were performing their undertakings to the U.S. Government in a timely manner and otherwise cooperating with the U.S. Government in resolving the matter which led to the two entities' listing.

At this time, the U.S. Government has decided to extend the temporary general license until February 27, 2017. In order to implement this U.S. Government decision, this final rule revises the temporary general license to remove the date of November 28, 2016, and substitute the date of February 27, 2017. This final rule makes no other changes to the EAR.

Export Administration Act

Although the Export Administration Act expired on August 20, 2001, the President, through Executive Order 13222 of August 17, 2001, 3 CFR, 2001 Comp., p. 783 (2002), as amended by Executive Order 13637 of March 8, 2013, 78 FR 16129 (March 13, 2013) and as extended by the Notice of August 4, 2016, 81 FR 52587 (August 8, 2016), has continued the Export Administration Regulations in effect under the International Emergency Economic Powers Act. BIS continues to carry out the provisions of the Export Administration Act, as appropriate and to the extent permitted by law, pursuant to Executive Order 13222, as amended by Executive Order 13637.

Rulemaking Requirements

1. Executive Orders 13563 and 12866 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This rule has been determined to be not significant for purposes of Executive Order 12866.

2. Notwithstanding any other provision of law, no person is required to respond to or be subject to a penalty for failure to comply with a collection of information, subject to the requirements of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*) (PRA), unless that collection of information displays a currently valid Office of Management and Budget (OMB) Control Number. This regulation involves collections previously approved by OMB under control number 0694–0088, Simplified Network Application Processing System, which includes, among other things, license applications and carries a burden estimate of 43.8 minutes for a manual or electronic submission. Total burden hours associated with the PRA and OMB control number 0694–0088 are not expected to increase as a result of this rule. You may send comments regarding the collection of information associated with this rule, including suggestions for reducing the burden, to Jasmeet K. Seehra, Office of Management and Budget (OMB), by email to *Jasmeet_K._Seehra@omb.eop.gov,* or by fax to (202) 395–7285.

3. This rule does not contain policies with Federalism implications as that term is defined in Executive Order 13132.

4. The provisions of the Administrative Procedure Act (5 U.S.C. 553) requiring notice of proposed rulemaking, the opportunity for public comment, and a delay in effective date are inapplicable because this regulation involves a military or foreign affairs function of the United States. (*See* 5

U.S.C. 553(a)(1)). If this rule were delayed to allow for notice and comment and a delay in effective date, then the national security and foreign policy objectives of this rule would be harmed. Because a notice of proposed rulemaking and an opportunity for public comment are not required to be given for this rule by 5 U.S.C. 553, or by any other law, the analytical requirements of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.,* are not applicable. Accordingly, no regulatory flexibility analysis is required and none has been prepared.

BILLING CODE 3510–33–P

FEDERAL TRADE COMMISSION

16 CFR Part 455

RIN 3084–AB05

Used Motor Vehicle Trade Regulation Rule

AGENCY: Federal Trade Commission.

ACTION: Final rule.

SUMMARY: The Federal Trade Commission (''FTC'' or ''Commission'') amends the Used Motor Vehicle Trade Regulation Rule (''Rule'' or ''Used Car Rule''). The Final Rule adopts the following proposals: adding a Buyers Guide statement recommending that consumers obtain a vehicle history report (''VHR''), and directing them to an FTC website for more information about VHRs and safety recalls; revising the Buyers Guide statement describing the meaning of an ''As Is'' sale in which a dealer offers a vehicle for sale without a warranty; adding boxes to the front of the Buyers Guide where dealers can indicate additional warranty and service contract coverage; adding a Spanish statement to the English Buyers Guide advising consumers to ask for a copy of the Buyers Guide in Spanish if the dealer is conducting the sale in Spanish (and providing a Spanish translation of the optional consumer acknowledgment of receipt of the Buyers Guide); and adding air bags and catalytic converters to the list of major defects on the back of the Buyers Guide.

DATES: This Rule is effective on January 27, 2017.

ADDRESSES: Copies of this document are available on the Commission's website, *www.ftc.gov.*

FOR FURTHER INFORMATION CONTACT: John C. Hallerud, (312) 960–5634, Attorney, Midwest Region, Federal Trade Commission, 55 West Monroe Street, Suite 1825, Chicago, IL 60603.

SUPPLEMENTARY INFORMATION:

I. Background

The Used Car Rule requires dealers to display on used cars offered for sale a window sticker called a ''Buyers Guide'' containing warranty and other information. The Commission promulgated the Used Car Rule in 1984, and the Rule became effective in 1985.[1] One of the principal goals of the Used Car Rule is to prevent oral misrepresentations and unfair omissions of material facts by used car dealers concerning warranty coverage. To accomplish that goal, the Rule provides a uniform method for disclosing warranty information on the ''Buyers Guide.'' The Rule requires used car dealers to disclose on the Buyers Guide whether they are offering a used car for sale with a dealer's warranty and, if so, the basic terms, including the duration of coverage, the percentage of total repair costs to be paid by the dealer, and the exact systems covered by the warranty. The Rule additionally provides that the Buyers Guide disclosures are to be incorporated by reference into the sales contract, and are to govern in the event of an inconsistency between the Buyers Guide and the sales contract. The Rule requires Spanish language versions of the Buyers Guide when dealers conduct sales in Spanish. The Rule also requires other disclosures that must be printed directly on the Buyers Guide, including: a suggestion that consumers ask the dealer if a pre-purchase inspection is permitted; a warning against reliance on spoken promises that are not confirmed in writing; and a list of fourteen major systems of a used motor vehicle and the major defects that may occur in these systems (''List of Systems'').

In July 2008, the Commission commenced its periodic regulatory review of the Rule (''Regulatory Review'') to examine its efficacy, costs, and benefits, and to determine whether to retain, to modify, or to rescind the Rule.[2] The Commission also asked for public comments on the Spanish translation of the Buyers Guide, the List of Systems and defects on the back of the Buyers Guide, and whether to revise the Buyers Guide by adding boxes where dealers could disclose non-dealer warranties offered by third parties.[3] The Commission received twenty-five comments from twenty-one commenters, including an automobile auction firm, an automotive repair firm, an online seller of used cars, automobile dealers, individual consumers, a consumer protection attorney, a group of consumer advocacy organizations, national automobile dealers' associations, state automobile dealers' associations, suppliers of dealer forms, county consumer protection agencies, the National Association of Attorneys General, the International Association of Lemon Law Administrators, and the Wisconsin Department of Transportation.[4] Among other things, commenters recommended that the Commission require dealers to provide consumers with VHRs.[5]

In December 2012, the FTC issued a notice of proposed rulemaking (''NPRM'') with proposed changes to the Rule.[6] In the NPRM, the Commission proposed adding a statement to the Buyers Guide advising consumers about

[1] 49 FR 45692 (Nov. 19, 1984).

[5] *https://www.ftc.gov/policy/public-comments/initiative-259; https://www.ftc.gov/policy/public-comments/initiative-294.*

[6] 77 FR 74746 (Dec. 17, 2012).

the availability of VHRs and directing consumers to an FTC website for more information about those reports; changing the statement on the Buyers Guide that describes the meaning of ''As Is'' when a dealer offers to sell a used vehicle without a warranty; and adding a statement, in Spanish, to the English Buyers Guide advising Spanish-speaking consumers to ask for a Spanish Buyers Guide if they could not read the English version. The NPRM also requested comments on revising the Buyers Guide to include non-dealer warranty boxes and a revised List of Systems that contained airbags and catalytic converters. In response to the NPRM, the Commission received nearly 150 comments from members of the public, including automobile dealers, consumer attorneys, consumer advocacy organizations, automobile dealer associations, providers of VHRs, legal aid agencies, consumer protection agencies, and state attorneys general.[7]

After reviewing the comments, the Commission published a supplemental notice of proposed rulemaking (''SNPRM'').[8] In the SNPRM, the Commission proposed additional modifications to address concerns raised by commenters and sought comments on alternative proposals and issues that commenters identified in response to the NPRM. The Commission proposed amending the Rule to require that dealers who had obtained a VHR on an individual vehicle indicate on the Buyers Guide that they had obtained such a report and would provide a copy to consumers who requested one. The proposal retained, with modifications, the statement proposed in the NPRM to encourage consumers to obtain VHRs, to search for safety recalls, and to visit a proposed FTC website for more information. The proposed amended Rule would not have required dealers to obtain VHRs and would not have mandated a specific type of VHR or designated a specific provider of the reports.

The Commission also proposed modifying the Buyers Guide statement that describes the meaning of an ''As Is'' sale in light of comments concerning a revision of the statement proposed in the NPRM. The ''As Is'' statement is meant to clarify that a dealer is offering the vehicle for sale without a warranty, *i.e.,* without any undertaking or promise by the dealer to be responsible for post-sale repairs to the vehicle. The Commission also sought comments on providing boxes on the front of the Buyers Guide where dealers could disclose manufacturer and other non-dealer warranties, a Spanish statement on the English Buyers Guide advising Spanish-speaking consumers to ask for a Spanish Buyers Guide, and a revision to the descriptive language on the ''Implied Warranties Only'' Buyers Guide.

After reviewing the entire record, the Commission declines to adopt the approach proposed in the SNPRM, which would have required dealers that had obtained a VHR to check a new Buyers Guide box indicating that they had obtained a VHR and would provide a copy upon request. Instead, similar to what was proposed in the NPRM, the Commission has decided to add a statement to the Buyers Guide encouraging consumers to seek vehicle history information and directing consumers to an FTC website for more information. The Commission is aware that the marketplace for vehicle history information is changing rapidly and will continue to monitor developments in this area.

The Commission also has decided to revise the ''As Is'' statement proposed in the SNPRM. The revised statement in the Final Rule is:

AS IS—NO DEALER WARRANTY

THE DEALER DOES NOT PROVIDE ANY WARRANTY FOR ANY REPAIRS AFTER SALE.

(See Figure 1). The Commission is also adopting the revised ''Implied Warranties Only'' disclosure proposed in the NPRM for use in jurisdictions that prohibit ''As Is'' used vehicle sales.[9] (Figure 2).

The Commission has decided to modify the Buyers Guide in other ways proposed in the NPRM and SNPRM. The modified Buyers Guide in the Final Rule includes boxes on the front of the Buyers Guide where dealers can disclose manufacturer and other non-dealer warranties. The Commission is also reformatting the Service Contract box on the front of the Buyers Guide to make it flush with the non-dealer warranty boxes.

The Commission is adding a statement in Spanish to the front of the English Buyers Guide. The statement alerts Spanish-speaking consumers who cannot read the English Buyers Guide to ask for a Spanish Buyers Guide, if the dealer conducts the sale in Spanish. The additional Spanish statement is not intended to change the Rule's existing requirement that dealers provide a Spanish Buyers Guide if the dealer conducts a sale in Spanish.

II. Basis for Final Rule and Analysis of Public Comments

The Commission received forty-one comments during the SNPRM comment period from groups and individuals. The Commission has considered those comments as well as the comments submitted in response to the NPRM and the 2008 Regulatory Review in promulgating the Final Rule. Commenters on the three notices include consumer advocacy groups, industry trade associations, state attorneys general (''State AGs''),[10] state regulatory agencies, attorneys who practice consumer law, and individual consumers.

A. Vehicle History Information

i. Commission Decision and Summary

The Commission has decided to modify the Buyers Guide by adding a statement that advises consumers to obtain VHRs and to visit an FTC website for more information. The Final Rule is similar to the approach proposed in the NPRM, in which the Commission proposed a Buyers Guide containing a statement that advised consumers to obtain VHRs and directed consumers to an FTC website for more information.[11] In the SNPRM, the Commission proposed an alternative approach that would have required dealers who had obtained VHRs to check a box so indicating and to provide a copy of the report to consumers upon request. As described in greater detail below, commenters provided a range of views about both proposals and discussed various other approaches to disclosing vehicle history information.

The informational approach to VHRs adopted here should help reduce deception and consumer injury that could result from undisclosed or deceptive disclosure of title brands or other pieces of problematic history. It

[7] Public comments on the NPRM are available at: *https://www.ftc.gov/policy/public-comments/initiative-460.*

[8] 79 FR 70804 (Nov. 28, 2014). Public comments on the SNPRM are available at: *https://www.ftc.gov/policy/public-comments/initiative-583.* Comments cited in this notice are identified by the name of the commenter (organization or individual) followed by the year of the comment. The designation (2015) identifies comments made in reference to the SNPRM and (2013) identifies comments made in reference to the NPRM (*e.g.,* Center for Auto Safety (''CAS'') (2015) is the CAS comment on the SNPRM).

[9] *See* 16 CFR 455.2(b)(ii), 77 FR at 74768, 74770 (Figure 2). The Commission did not receive comments on the proposed revision to the ''Implied Warranties Only'' disclosure.

[10] Although the state attorneys general commented collectively, the group of state attorneys general who joined the comment on the NPRM differs from the group who commented on the SNPRM. State AG Group (2015) refers to the Mar. 17, 2015, SNPRM comment, and State AG Group (2013) refers to the Mar. 13, 2013, NPRM comment.

[11] 77 FR at 74754–74756.

reduces the potential that, under the SNPRM approach, consumers will rely too much on particular VHRs and dealers as a source of mechanical condition information, and instead directs consumers to a source of information on the FTC's website which is independent of the dealer. Moreover, the informational approach does not appreciably increase the burden on dealers beyond that already imposed by the Rule. By recommending that consumers obtain their own VHRs from whatever source best suits their needs, the Buyers Guide may make consumers more educated about VHRs and prompt more consumers to make appropriate use of them.

In reaching this decision, the Commission has considered the differences in VHRs and providers, the strengths and limitations of VHRs, and the evolving development of the collection and distribution of vehicle history information. The Commission notes that consumers currently can gain access to VHRs at no cost from many dealers, automobile market websites, buying services, and other sources and can purchase VHRs at a nominal cost from commercial vendors. This approach balances the benefits to consumers of vehicle history information and the burden of requiring dealers to procure and disclose vehicle history information.

ii. Sources of Vehicle History Information

Vehicle history information is available from a variety of public and private sources. These sources include state titling agencies (*e.g.,* departments of motor vehicles (''DMVs'')), the National Motor Vehicle Title Identification System (''NMVTIS''), and commercial vehicle history providers, such as CARFAX and Experian's AutoCheck.

NMVTIS is a nationwide electronic database of vehicle history information created pursuant to the Anti-Car Theft Act of 1992.[12] NMVTIS was created to prevent the introduction or reintroduction of stolen motor vehicles into interstate commerce, to protect states and individual and commercial consumers from fraud, to reduce the use of stolen vehicles for illicit purposes including funding of criminal enterprises, and to provide consumers protection from unsafe vehicles.[13] It is designed to enable nationwide access to title information submitted by state titling agencies, and information concerning junk or salvage vehicles that insurers, recyclers, and salvage yards are required by law to submit.[14] It is intended to serve as a reliable source of title and brand history.[15] NMVTIS is limited to providing data on five key indicators associated with preventing auto fraud and theft: Current title information, brand history, odometer reading, total loss history, and salvage history.[16]

Although NMVTIS is intended to be a reliable source of vehicle brand and title history, it does not contain detailed repair history and may not include significant damage history.[17] For example, information on previous significant damage may not be included in NMVTIS if a vehicle was never determined to be a ''total loss'' by an insurer (or other appropriate entity) or branded by a DMV.[18] On the other hand, an insurer may be required to report a vehicle as a ''total loss'' even if the state's titling agency does not brand it as ''junk'' or ''salvage.'' [19]

The NMVTIS Web site, *www.vehiclehistory.gov,* contains live links to the Web sites of approved commercial vendors that sell NMVTIS reports to the public.[20] Consumers can purchase NMVTIS reports from these vendors for a few dollars. Approved vendors to both consumers and dealers are subject to quality control standards designed to ensure consistency with the intent and purpose of the Anti-Car Theft Act and its implementing regulations.

Title and other vehicle history information are also available in commercial reports from vendors such as CARFAX and Experian's AutoCheck. CARFAX and AutoCheck enable consumers to purchase VHRs, and some dealers distribute them to consumers free of charge. CARFAX and AutoCheck obtain data from state titling agencies, insurers, repair facilities, automobile auctions, salvage facilities, and fleet rental firms. These reports can include information on prior ownership, usage, damage, repair history, etc. They may even disclose whether a vehicle has had regular oil changes. Both CARFAX and AutoCheck offer mobile apps that allow real-time access to their reports. In addition, both CARFAX and AutoCheck offer consumers an option to pay a flat fee to receive multiple reports.

Commercial VHRs may include vehicle condition data from sources other than NMVTIS.[21] According to CARFAX, NMVTIS reports carry limited title, odometer, brand, and salvage/total loss information, whereas commercial reports may contain ''a wealth of information about brands, total losses, prior wrecks, airbag deployments, open recalls, odometer readings, and even maintenance history.'' [22] Experian noted that its AutoCheck VHRs can include information about fire and flood damage; accident damage, including the number and severity of any accidents; number of prior owners; auction inspection announcements; salvage, theft, or lemon; [23] fleet or rental use; frame damage; service and maintenance records; and manufacturer recalls.[24]

iii. Summary of Procedural History and Vehicle History Proposals

In the NPRM, the Commission proposed a statement on the Buyers Guide informing consumers about the availability of VHRs and advising consumers to obtain the reports. In response, many consumer advocacy groups, the State AG Group, and some NMVTIS vendors recommended that the Commission require dealers to obtain NMVTIS reports and/or adopt California Assembly Bill 1215 (''AB 1215'') (codified as Cal. Vehicle Code 11713.26), or some variation of it.[25] AB

---

[12] 49 U.S.C. 30501–30505. The United States Department of Justice published the final rule implementing NMVTIS in 2009. 28 CFR part 25, subpart B, 74 FR 5740 (Jan. 30, 2009). For a detailed discussion of NMVTIS information, and limitations of that information, *see http://www.vehiclehistory.gov/nmvtis_consumers.html.*

[18] *See Id.*

[19] *Id.*

[20] The American Association of Motor Vehicle Administrators (''AAMVA'') operates NMVTIS under the oversight of the Department of Justice. AAMVA is responsible for approving vendors. Approved NMVTIS vendors must comply with quality control standards and are monitored by AAMVA.

[21] Consumer Access Product Disclaimer available through: *http://www.vehiclehistory.gov/index.html.*

[22] CARFAX (2013) at 1.

[23] State ''lemon'' laws typically require a manufacturer to buy back a new vehicle if defects in the vehicle cannot be repaired after a reasonable number of attempts. *See Lemon Law Basics* available from the Int'l Ass'n of Lemon Law Administrators (''IALLA'') at *http://ialla.net/pub_1.htm.* Some states use the title brands lemon, lemon law buyback, or manufacturer buyback, or similar terms, to designate vehicles that have been reacquired by a manufacturer under a state lemon law.

[24] Experian (2013) at 3.

[25] *E.g.,* Consumers for Auto Reliability and Safety (''CARS''), *et al.* (2013) (fourteen consumer advocacy groups joined the comment); Legal Aid

1215 requires dealers to obtain NMVTIS reports and to affix a warning label to a vehicle if the NMVTIS report shows a previous salvage or other state title brand or contains some other reported event, such as a total loss report from an insurance company. Broadly speaking, dealers' groups and the leading vendors of commercial VHRs opposed requiring dealers to obtain NMVTIS or commercial reports, or a regulation that would effectively choose one type of provider of VHRs over others.[26]

Rather than issuing a final rule based on the NPRM or AB 1215, the Commission published the SNPRM to seek comments on requiring dealers to disclose on the Buyers Guide if they had a VHR and to provide a copy of whatever report they had to requesting consumers. The SNPRM also invited public comments on several other approaches to vehicle history information proposed in the comments on the NPRM. The various approaches ranged from recommending that the Rule not address vehicle history information at all to approaches that generally fell somewhere between the NPRM's informational approach and the required disclosures of AB 1215.

iv. Analysis of Comments

a. The Commission's Authority To Promulgate a Rule Addressing Vehicle History Information

The National Automobile Dealers Association (''NADA'') and the National Independent Automobile Dealers Association (''NIADA'') argue that a rule provision dealing with VHRs would exceed the Commission's authority.[27] Specifically, they contend that the Used Car Rule was promulgated under Title I of the Magnuson-Moss Warranty Act, 15 U.S.C. 2309(b), which directs the Commission to initiate ''a rulemaking proceeding dealing with warranties and warranty practices in connection with the sale of used motor vehicles,'' and that vehicle history information is unrelated to warranty and warranty practices.[28]

NADA, but not NIADA, further argues that the Commission must use more elaborate rulemaking procedures than those specified by the Administrative Procedure Act (''APA'')[29] in order to reach certain independent dealers that sell used cars but (under NADA's interpretation) do not ''service'' them.[30] Section 1029 of the Dodd-Frank Act (''DFA'')[31] authorizes the FTC to use the more informal APA rulemaking procedures to prescribe rules with respect to motor vehicle dealers that are ''predominantly engaged in the sale and servicing of motor vehicles, the leasing and servicing of motor vehicles, or both.'' 12 U.S.C. 5519(a), (d). According to NADA, certain entities that are subject to the Used Car Rule (although apparently none of NADA's members themselves) are not ''predominantly engaged in the sale and servicing'' of motor vehicles because they only sell and do not service vehicles.[32] NADA thus argues that, to reach these entities, any amendments affecting all dealers subject to the Used Car Rule must be promulgated using the heightened procedures required by section 18 of the FTC Act.[33]

(1) The Commission Has Statutory Authority To Issue These Rule Amendments

NADA and NIADA argue that the Commission lacks statutory authority to issue these Rule amendments. That argument, however, founders on the mistaken premise that the Rule rests solely on the Magnuson-Moss Warranty Act and not also on the FTC Act. As discussed in more detail below, the Rule has historically rested on *both* Title I of the Magnuson-Moss Warranty Act and the Commission's authority under the FTC Act to issue rules addressing deceptive acts or practices. In the current proceeding, the Commission is issuing the rule amendments solely under the latter authority.

Ever since the Used Car Rule was promulgated, the Commission has made clear that the authority for the Rule ''is derived from two sources'': Title I of the Magnuson-Moss Warranty Act and the FTC Act.[34] The specific authority under the FTC Act is section 18, which authorizes the FTC to issue trade regulation rules that ''define with specificity acts or practices which are unfair or deceptive'' within the meaning of section 5 of the FTC Act.

The dual bases of statutory authority are also reflected in the Rule's existing provisions and the procedures that the Commission used to promulgate the Rule. Some of the current provisions in the Used Car Rule deal with unfair or deceptive acts or practices that are not directly related to warranties or warranty practices.[35] Moreover, given that the Rule is in part a trade regulation rule, the Commission followed the more elaborate procedures in section 18 of the FTC Act when promulgating the Used Car Rule, not the simpler procedures that would have been available if the Rule had been issued solely under the Magnuson-Moss Warranty Act.

NADA and NIADA are thus incorrect in arguing that the VHR amendments exceed the FTC's rulemaking authority.

Justice Center (''LAJC'') (2013) (CARS joined the comment); Nat'l Salvage Vehicle Reporting Program (''NSVRP'') (2013); Nat'l Vehicle Service (''NVS'') (2013); CARCO (2013); ADD (2013) at 3–4; State AG Group (2015) (''we encourage the FTC to require dealers to obtain a NMVTIS report'').

[26] CARFAX (2013) at 3 (FTC should not choose ''exclusive technology and system by only providing information about a single public or private source of vehicle history''); Experian (2013) at 5–6 (NPRM ''strikes a good balance in protecting used car consumers without being overly burdensome;'' FTC should not promote one provider or source of vehicle history information over another; NMVTS statute defines what information is included in a NMVTIS report and therefore NMVTIS reports are not likely to be as ''robust'' as commercial reports); NADA (2013) at 3 (questioning whether Rule permits NPRM proposed VHR statement and commenting that proposed Web site should not endorse, link to, or otherwise imply legitimacy of any particular vehicle history company, report, or service); NIADA (2013) at 3 (commending Commission for not requiring dealers to provide vehicle history reports/damage history).

[27] *See* NADA (2015) at 3–4; NIADA (2015) at 3. NADA is the national trade association of manufacturer-franchised new vehicle dealers. NIADA is the national trade association of independent non-franchised used vehicle dealers.

[28] Public Law No. 93–637, formally known as the Magnuson-Moss Warranty—Federal Trade Commission Improvements Act, has two titles. Title I concerns consumer product warranties and includes a provision directing the FTC to ''initiate within one year after the date of enactment of this Act a rulemaking proceeding dealing with warranties and warranty practices in connection with the sale of used motor vehicles.'' 15 U.S.C. 2309(b). Title II amended various parts of the FTC Act and added what is currently section 18 of the FTC Act, which specifies the applicable procedures when the Commission issues a trade regulation rule.

Section 18 rulemakings are sometimes called Magnuson-Moss rulemakings, after the name of the bill that created section 18 of the FTC Act. But rulemakings under *Title I* of the Magnuson-Moss Warranty Act—that is, rulemakings related to warranties—are governed by the procedural requirements described in 15 U.S.C. 2309(a), not by the procedural requirements described in section 18 of the FTC Act. For warranty rulemakings under 15 U.S.C. 2309(a), the Commission is required to follow the notice-and-comment procedures in 5 U.S.C. 553 and additionally to provide ''interested persons an opportunity for oral presentations of data, views, and arguments.'' 15 U.S.C. 2309(a).

[29] 5 U.S.C. 500–596.

[30] *See* NADA (2015) at 4.

[31] Dodd-Frank Wall Street Reform and Consumer Protection Act, Public Law 111–203, sec. 1029 (codified at 12 U.S.C. 5519).

[32] *See* NADA (2015) Exh. A at 6 & n.6.

[33] NADA (2015) Exh. A at 1, 8. NADA also argues that, ''[a]t the very least, the FTC cannot go below'' the hybrid rulemaking procedures found in 15 U.S.C. 2309(a)—*i.e.,* the notice-and-comment procedures of 5 U.S.C. 553 plus an opportunity for oral presentations. NADA (2015) Exh. A at 6 n.7.

[34] *See* Trade Regulation Rule; Sale of Used Motor Vehicles, 49 FR 45692, 45703 (Nov. 19, 1984). For this same reason, the authority citation for part 455 has always cited both statutes. *See id.* at 45725; Regulatory Flexibility Act and Periodic Review of Used Motor Vehicle Trade Regulation Rule, 60 FR 62195, 62205 (Dec. 5, 1995).

[35] *See, e.g.,* 16 CFR 455.1(a)(1) (making it a deceptive act or practice for any used vehicle dealer to misrepresent the mechanical condition of a used vehicle).

The rule amendments are based solely on the Commission's authority under the FTC Act to issue rules addressing deceptive acts or practices. In particular, the VHR amendments will help prevent deception in the market for used vehicles, as previously discussed in the NPRM and as further explained herein.[36] The Commission has properly acted under sections 5 and 18 of the FTC Act in promulgating the VHR amendments.

(2) The DFA Authorizes the Commission To Issue These Rule Amendments Pursuant to APA Procedures

Section 1029 of the DFA authorizes standard APA rulemaking procedures when the Commission uses its section 5 and section 18 rulemaking authority to address unfair or deceptive acts or practices by motor vehicle dealers. The DFA defines a ''motor vehicle dealer'' to mean someone who is (1) licensed by a State or territory to sell motor vehicles, and (2) takes title, owns, or has physical custody of them.[37]

Section 1029(d) authorizes the FTC ''to prescribe rules under sections 5 and 18(a)(1)(B) of the Federal Trade Commission Act'' with respect to motor vehicle dealers that are ''predominantly engaged in the sale and servicing of motor vehicles, the leasing and servicing of motor vehicles, or both.''[38] The DFA authorizes the Commission to promulgate such rules ''in accordance with'' the APA procedures in 5 U.S.C. 553, ''[n]otwithstanding section 18 of the Federal Trade Commission Act.'' DFA 1029(d).

NADA argues that some non-franchised used car dealers are outside the scope of DFA 1029(a) because they sell but do not ''service'' vehicles.[39] This argument, however, relies on an unduly narrow interpretation of ''servicing.'' Although the DFA does not define ''servicing,'' the plain meaning of that term, along with the statutory language in DFA 1029(b)(3), suggests that the term should be read broadly to encompass activities such as ''repair, refurbishment, [or] maintenance,'' as well as other services.[40]

That definition captures activities undertaken by essentially all used car dealers. For example, whether or not they offer *post*-sale repair or maintenance services, used car dealers routinely prepare vehicles for sale by addressing any obvious mechanical problems and, as the Commission has previously noted, by undertaking the ''general industry practice of appearance reconditioning.''[41] Such activities are a type of ''servicing'' within the plain meaning of that term and fall easily within the category of ''refurbishment'' activities mentioned in DFA 1029(b)(3). Because the Commission previously determined that used car dealers ''routinely'' recondition vehicles, *id.,* and NADA has not offered any evidence that used car dealers have stopped engaging in this ''general industry practice,'' the Commission finds that dealers' practice of reconditioning vehicles is sufficient to satisfy DFA 1029(a)'s ''and servicing'' language.

The legislative history of DFA 1029 likewise confirms that Congress intended to preserve the FTC's existing rulemaking authority over auto dealers but streamline the procedures applicable to all such dealers, not only to an arbitrarily defined subset of them. When Congress enacted section 1029 of DFA, Congress sought to achieve two ends. First, Congress was aware of and intended to preserve the FTC's existing authority over auto dealers. For example, Representative Frank said, ''We are not increasing the authority that the FTC has. There is no further grant of powers other than what the FTC already has.''[42] Senator Dodd similarly stated, ''The Federal Trade Commission has jurisdiction on—on automobile dealerships so we're not breaking new ground. We're just, in fact, providing some tools for them to do this job.''[43]

Second, Congress was aware that the FTC's existing section 18 rulemaking process is time consuming and wanted to speed up the FTC's rulemaking process with respect to auto dealers. As Representative Frank explained, the reason for section 1029 was to ''expedite the ability of the FTC to act responding to'' concerns about dealers' unfair or deceptive acts or practices.[44] Representative Watt noted that requiring the FTC to use its existing section 18 procedures ''that could take up to eight years before you can do something to respond to some predatory practice'' might create ''very bad consequences.''[45]

Congress never suggested that it intended to apply the expedited rulemaking procedures to only a subset of the car dealers who are subject to the FTC's jurisdiction. Moreover, Congress had no clear basis for requiring different rulemaking procedures for different used-car dealers depending on what types of post-sale services those dealers happened to offer. In short, NADA's argument not only conflicts with the statutory text and legislative history, but would serve no rational policy objective.

Finally, as discussed, NADA's argument about the scope of the FTC's APA rule-making authority rests on an unduly narrow interpretation of ''servicing'' that includes only post-sale activities and excludes pre-sale activities such as refurbishing. But NADA's members are franchised dealers who are required to offer *post*-sale or *post*-lease servicing and warranty work as part of their franchise agreements. NADA's procedural argument could thus apply only to a subset of the non-franchised dealers separately represented in part by NIADA, which, notably, does *not* make the argument. The record contains no data to support NADA's assumption that many non-franchised dealers provide no post-sale ''servicing,'' which suggests that NADA's argument on this point may have limited applicability even if the term ''servicing'' were construed narrowly to include only post-sale activities.

b. Incorporating the Disclosure of Vehicle History Information Into the Rule

Some commenters raised arguments against including vehicle history information in the Buyers Guide. First,

[37] DFA 1029(f)(2).

[38] DFA 1029(a), (d).

[39] *See* NADA (2015) Exh. A at 6 & n.6. It is unclear from NADA's comment whether NADA is separately arguing that certain entities subject to the Used Car Rule fall outside the DFA's definition of ''motor vehicle dealer'' which is limited to entities licensed by a State or territory to sell motor vehicles. 12 U.S.C. 5519(f)(2)(A). To the extent that NADA is making this assertion, NADA does not develop it and the Commission therefore declines to address it. In any event, many, if not all, used vehicle sellers subject to the Rule are also required to be licensed by the state or territory in which they do business.

[40] *See* DFA 1029(b)(3) (creating a category of persons who offer or provide ''a consumer financial product or service not involving or related to the sale, financing, leasing, rental, repair, refurbishment, maintenance, *or other servicing* of motor vehicles, motor vehicle parts, or any related or ancillary product or service'' (emphasis added)).

[41] 49 FR at 45701. The record contains no evidence that the industry practice of reconditioning used vehicles is less widespread today than it was in 1984 when the Commission adopted the Rule.

[45] *Id.*

NADA and NIADA commented that the Rule and the Buyers Guide are limited to warranty disclosures and that the disclosure of vehicle history information is outside the scope of the Rule.[46] As explained above in subsection (a), this argument is based on a misunderstanding of the Rule's purpose. From its inception, the Rule has addressed unfair or deceptive acts or practices as well as warranty practices.[47] For this reason, the Buyers Guide already contains information that is primarily intended to help prevent consumer deception and that is not directly related to warranty disclosures, such as the spoken promises warning, the list of major defects and systems, and the advice to ask about a pre-purchase inspection.

The Commission concludes that incorporating vehicle history information into the Rule fits within the general framework of the existing Rule and would benefit consumers by reducing deception in the used car market. Encouraging consumers to obtain VHRs independently will serve to direct consumers to an additional source of pre-sale information that is not controlled by the dealer and thereby lessen the consumer's reliance on dealers for information. The incorporation of vehicle history information should help reduce deception by unscrupulous dealers, because any misrepresentations will be contradicted by information that consumers have obtained independently.

Second, NADA and CARFAX commented that including vehicle history information on the Buyers Guide is not necessary because dealers already obtain and share commercial VHRs with consumers.[48] Of course, not all dealers obtain and share VHR information, and the prevalence of the practice among non-franchised independent dealers is unclear.[49] In addition, unscrupulous dealers might provide out-of-date reports or pick reports that contain the least amount of negative data. A statement on the Buyers Guide about the availability of VHRs will help ensure that consumers are not deceived by such practices.

Finally, some commenters expressed doubt about the reliability of vehicle history information.[50] NADA commented that, although general information related to vehicle history might be appropriate on a Commission website, a reference to specific commercial providers would not.[51] NADA argued that consumers could gain a false sense of security from the reports, especially if they are required by the government and impliedly have the Commission's imprimatur on them.[52] For those reasons, NADA commented that the FTC should include a disclaimer about the limitations of VHRs, if the reports are mentioned at all.[53]

A disclaimer, however, is unnecessary because the reports are typically dated and contain disclaimers about the limits of the data in them.[54] In addition, the website listed on the Buyers Guide includes information about the limits of data in VHRs.

Some commenters approved of the informational approach proposed by the NPRM, *i.e.,* adding a statement to the Buyers Guide advising consumers to obtain a VHR and directing consumers to an FTC website.[55] Two vehicle history vendors commented that the FTC should avoid promoting a particular vendor or type of technology to deliver VHRs.[56] In addition, the auto dealer associations recommended that the Rule not favor a particular source of vehicle history information.[57] NIADA commented that the NPRM's proposed approach of directing consumers to a website and advising an independent inspection is ''an acceptable compromise.'' [58] Experian commented that the NPRM proposal ''strikes a good balance in protecting used car consumers without being overly burdensome.'' [59]

The Commission has decided to use an informational approach to vehicle history that reduces consumer reliance on dealers for information. The chosen approach does not endorse any type of or vendor of vehicle history information. Encouraging consumers to obtain VHRs independently will reduce deception in the marketplace by directing consumers to sources of information about the vehicles that they are considering buying that are not controlled by the selling dealer and thereby reduce the potential for consumers to rely upon misrepresentations from unscrupulous dealers.

c. Alternative Approaches to Incorporating Vehicle History Information Into the Rule

The commenters who recommended incorporating vehicle history information into the Rule proposed several different approaches. Some favored an informational approach; some recommended a Rule that, like AB 1215, would require dealers to obtain VHRs and to disclose information about them to consumers; some suggested various approaches in between. Below, the Commission discusses why it has declined to adopt three of the alternative approaches recommended by commenters.

First, in response to the NPRM and the SNPRM, the State AG Group, other regulators, and consumer advocacy groups stated that they prefer an approach like AB 1215 along with a requirement that dealers obtain and provide consumers with NMVTIS reports.[60] For example, the National Consumer Law Center commented that dealers should be required to obtain a report that includes up-to-date vehicle history information from NMVTIS.[61] Otherwise dealers might pick reports that contain the least amount of negative data, and VHR vendors might produce

[61] NCLC (2015) at 4.

reports to cater to dealer demand for more favorable reports.[62]

The Commission, however, has decided that it will not adopt an amended Rule modeled on AB 1215 for the reasons already stated in the SNPRM.[63] In addition, the Commission cannot give dealers the protection from liability for inaccuracies in NMVTIS reports provided by AB 1215.[64] The Commission recognizes the limitations of VHR information as an indicator of a vehicle's current mechanical condition and does not wish to over-emphasize the value of VHR information over other potentially more probative sources of information, such as a pre-purchase mechanical inspection. In addition, requiring dealers to provide NMVTIS reports might discourage consumers from investigating other types of VHRs from other vendors.

Second, as an alternative to the AB 1215 approach, the State AG Group proposed a vehicle history disclosure model similar to the SNPRM with the addition of a ''branded title checkbox'' that the dealer would be required to check to indicate that the vehicle's title had a brand.[65] Like the SNPRM, the State AG Group's proposal would not require dealers to obtain VHRs or designate a type of or vendor of VHRs.[66]

The ''branded title check box'' proposal from the State AG Group suffers from a number of practical problems if dealers are not also required to obtain either NMVTIS reports or other VHRs. Without a requirement that dealers obtain a VHR, the branded title check box could encourage dealers to forego VHRs entirely or to acquire only favorable ones. In addition, if an unchecked box, indicating that the dealer is unaware that the vehicle has a branded title, is incorporated into the contract as the dealer's affirmative representation that the vehicle in fact does not have a branded title, the dealer could face liability if a subsequent VHR shows a branded title. The lack of a checkmark could also suggest to consumers that the vehicle is in good condition when the lack of a checkmark is actually the far more limited representation that the dealer does not know whether the vehicle has a branded title.

Third, CAS commented that its preferred approach is ''something of a hybrid'' between AB 1215 and the State AG Group's approach.[67] CAS would require dealers to obtain and to disclose NMVTIS reports, as required by AB 1215, and to check a box, similar to the branded title box suggested by the State AG Group, disclosing if the vehicle has a title brand.[68] CAS envisions an improved disclosure box along with information about vehicle histories on the Buyers Guide and the FTC websites.[69] Dealers who check the box would be required to provide a copy of any reports that they have obtained to requesting consumers.[70] CAS would require dealers to keep any report that they view for as long as the dealer possesses the vehicle to which the report applies.[71]

As noted, the Commission has decided against following AB 1215 and requiring dealers to obtain NMVTIS reports.[72] The Commission is also not adopting the branded title check box proposed by the State AG Group, and favored by CAS, for the reasons previously discussed.

The Commission is also not adopting the CAS approach because of the recordkeeping that it seems to necessarily entail. The CAS approach would impose new recordkeeping obligations by requiring dealers to keep copies of any reports that they view. The purpose of the CAS recordkeeping requirement is to prevent dealers from selecting favorable reports or from, for example, viewing reports online, but not printing or storing them, or obtaining information orally without ever viewing, or possessing, an actual report. But it is not clear how the Commission could construct detailed rules about when a dealer will be deemed to have viewed a report that would encompass all situations or how the Commission would enforce those rules if they could be devised.

d. Comments on the SNPRM Approach to Vehicle History Reports

As noted above, in the SNPRM, the Commission proposed requiring dealers who had obtained VHRs to check a box so indicating and to provide a copy of the report to consumers upon request. The SNPRM proposal also contained additional text recommending that consumers obtain a VHR, regardless of whether the box was checked, and advising that consumers visit an FTC website for information on how to obtain a VHR, how to search for safety recalls, and other topics. Many commenters criticized the SNPRM approach.

Consumer advocacy groups identified several problems with the SNPRM vehicle history approach. CAS, other consumer advocacy groups, and the State AG Group note that dealers could avoid revealing negative information in VHRs by, for example, picking and choosing among reports to select the most favorable report, discarding older (or newer) reports, selecting a report that showed the fewest problems, or selecting a vendor that generates reports showing minimal problems.[73] As noted, CAS commented that it prefers the State AG Group's approach (requiring a title brand disclosure on the Buyers Guide and providing a copy of the most recent report from each vendor) if the Commission does not require dealers to provide NMVTIS reports.[74] CAS notes that either approach could be supplemented with a requirement that dealers provide copies of the VHRs that the dealer possesses, but also tacitly acknowledges the difficulty in devising and implementing such a requirement.[75]

NADA further questioned the value of VHRs to consumers. NADA reiterated its earlier comments that VHRs are unreliable and of limited utility, which NADA states VHR vendors acknowledge in their own disclaimers about the accuracy, reliability, or completeness of the data in the reports.[76] Given these

[62] NCLC (2015) at 3. *See also* NIADA (2015) at 3 (unscrupulous dealers may engage in VHR shopping); NSVRP (2015) at 3 (allowing any commercial report, instead of NMVTIS, would enable VHR shopping); Boyer (Nov. 20, 2014) (will companies evolve ''to provide less objective and more 'positively spun' reports for dealers?'').

limitations, NADA, and others, commented that the SNPRM's checkbox proposal could raise the prominence of VHR information in consumers' minds to an inappropriately high level.[77]

Dealers' groups identified several additional problems with the vehicle history approach proposed in the SNPRM. NADA questioned the need for a rule about VHRs in the first instance because most franchised dealers, and potentially other dealers, already provide VHRs to consumers and because of a lack of evidence that dealers fail to disclose known title brands.[78] NADA commented that requiring dealers to indicate on the Buyers Guide whether they have a report and requiring dealers to provide it would make it less likely that dealers will continue to obtain and to distribute the reports because of the risk that the VHR information will be incorporated into the contract and that the dealer will be construed to have made a warranty about it.[79] NIADA also raised concerns about dealer exposure to liability for third-party VHR information that the dealer does not control,[80] which is potentially compounded by unreported repairs, poor reporting procedures, and different brands/classifications in each state.[81]

Both NADA and NIADA commented that the SNPRM does not define a VHR.[82] NIADA stated that, without a definition, dealers would have to guess when to check a box indicating that they have a report.[83] NIADA also noted that, in addition to the well-known providers of VHRs such as NMVTIS and commercial vendors, other sources, such as banks, insurers, and service facilities potentially have information on used cars that could be construed to constitute VHRs.[84] NADA proposed defining VHRs as third-party reports from state titling agencies, NMVTIS, or commercial vendors.[85]

The commenters disagreed about whether dealers or consumers should be required to pay for copies of the VHRs contemplated by the SNPRM. Dealers' groups commented that dealers should be permitted to pass along their costs to consumers.[86] That cost could increase depending upon how often dealers must provide the reports because, dealers' groups and others commented, the SNPRM does not identify the point in a transaction when a dealer would become obligated to provide the reports.[87] Although NADA indicates that franchised dealers now routinely share VHR information with consumers,[88] NADA questioned whether licensing agreements would permit dealers to share those reports with all potential customers if doing so were to be required by the Rule.[89]

Consumer advocacy groups, the State AG Group, and other commenters would place the costs of VHRs on dealers.[90] NCLC commented that the dealer would need to purchase only one report per vehicle, and provide the reports to successive consumers, whereas those same consumers would each need to purchase a separate report for the same vehicle.[91] Moreover, consumers who looked at several vehicles when shopping would need to purchase multiple reports.[92] NCLC commented that asking consumers to obtain reports on their own is impractical because of the cost of the reports, especially multiple reports.[93] NCLC and Consumers Union commented that some consumers might have Internet access only away from the dealership, at home or work, and would have to review the reports off-site and then return to the dealership to use the information.[94]

The American Association of Motor Vehicle Administrators supported disclosure of vehicle history data at the point of sale. Both it and the Virginia DMV commented that the FTC should recommend or reference only VHRs that integrate NMVTIS data because NMVTIS is a congressionally mandated database.[95]

e. Incorporating Safety Recall Information

A number of commenters urged the Commission to address safety recalls in an amended Rule. Several recommended that the Commission prohibit the sale of vehicles with open recalls.[96] Other commenters urged the Commission to require dealers to disclose if a vehicle is subject to an unrepaired (*i.e.,* ''open'') recall[97] or at least to check if a vehicle is subject to an open recall.[98] Consumers Union

(2015) (Commission should require dealers to disclose open recalls and require franchised dealers to repair open recalls on franchise brand vehicles that they sell).

[97] State AG Group (2015) at 8 (proposing revised statement that places greater emphasis on recalls than the SNPRM statement); U.S. D.O.T. (2015) at 2–3 (recommending a Buyers Guide box for dealers to check if they have found safety recalls that have not been completed and directing consumers to check for open recalls at *www.safercar.gov*); Strassburger (Alliance of Automobile Manufacturers) (2015) (recommending that the Buyers Guide direct consumers to *safercar.gov* to check for open safety recalls).

[98] Spiller (NVS) (2015) at 2; Frias (North American Export Committee) (2015) at 2.

recommended two boxes where dealers would indicate whether they had (or had not) repaired a vehicle in compliance with any applicable recall notices.[99]

Rather than adopt these proposals, the Commission has decided to address safety recalls by including a Buyers Guide statement directing consumers to check for open safety recalls by visiting *safercar.gov.* The Commission recognizes the significant public safety concerns associated with vehicle recalls, including in the used car marketplace, and is aware that potential legislation to address this public safety issue is under consideration and has NHTSA's support.[100] We believe that legislative bodies and NHTSA, as the federal agency primarily tasked with ensuring motor vehicle safety, are best situated to consider and resolve the many issues implicated by such proposals—including, for example, the competitive effects they would have on independent dealerships that are not authorized to make repairs, the effect they could have on used vehicle trade-ins, the fact that remedies for some recalls may remain unavailable for significant periods of time, and other factors affecting the costs and benefits to consumers.

The Commission does note, however, that under the FTC Act's existing prohibition on deceptive acts and practices, an advertiser's claims may trigger the need for the advertiser to disclose information about open safety recalls. For example, the Commission approved for public comment proposed consent orders concerning advertising that, according to the Commission's complaints, touted the benefits of rigorous inspections of used vehicles, but failed to disclose adequately that some of the vehicles were subject to open safety recalls.[101] Those proposed settlements would curb deceptive conduct by requiring the respondents to qualify their inspection claims, wherever they make them, with clear and conspicuous disclosures informing consumers that their used vehicles may be subject to unrepaired recalls for safety issues and explaining how to determine whether an individual vehicle is subject to an open recall. Further, the proposed orders would prohibit the respondents from making misrepresentations regarding recall status or safety, and require them to notify recent past consumers regarding recalls.

f. Final Rule on Vehicle History Reports and Safety Recall Information

The Commission has considered the comments and entire record and has decided to adopt a final rule similar to what it initially proposed in the NPRM. Accordingly, the Commission is revising the Buyers Guide to include a statement advising consumers to obtain a VHR and directing consumers to an FTC website for more information. The Buyers Guide VHR statement appears in Figures 1 and 2. The Spanish translation appears in Figures 4 and 5.

As described above, the views expressed by the commenters include those advocating that the Rule and the Buyers Guide should not address vehicle history information at all, those favoring an informational approach, and those favoring an approach that, like AB 1215, would require dealers to obtain VHRs (specifically a NMVTIS report in the case of AB1215) and to disclose information about them to consumers, and various approaches in between.

The Final Rule incorporates an informational approach to VHRs. Revising the Buyers Guide by directing consumers to obtain a vehicle history report should help reduce consumer injury and deception that could result from undisclosed or deceptive disclosure of title brands or other pieces of problematic history. The SNPRM approach could encourage consumers to rely too much on particular VHRs and dealers for mechanical condition information to the neglect of information available from sources independent of dealers. On the other hand, specifying the source of or type of VHR that consumers consult, such as AB 1215 does, could discourage consumers from choosing VHRs that best suit their needs. Finally, an informational approach to VHR disclosures should not increase the burden on dealers much beyond what the Rule already imposes.

The Commission agrees that the SNPRM approach to VHR disclosures suffers from practical problems raised by the commenters. Among these is whether the Commission must define a VHR, or adopt a standard, such as NMVTIS, for the minimum amount of information that a VHR must contain to comply with a VHR disclosure requirement. Another question is whether the Commission would have to define what it means to obtain a report and whether the Commission can prevent dealers from viewing a report online or discarding reports. Other problematic issues also would arise, such as whether consumers or dealers should bear the cost of the reports. If dealers bear the cost, should they be required to produce reports to all requesting consumers, or should they be required to provide reports only to *bona fide* potential customers rather than, for example, to all casual shoppers? The Commission notes that the SNPRM approach could create an incentive for dealers to shop for reports that minimize or do not include negative information and for vendors to produce such reports.

In addition, requiring dealers to produce any VHRs that the dealer possesses, as proposed by the SNPRM, could reduce the availability of VHRs that dealers currently provide because of dealer liability concerns. Such a requirement would likely necessitate an extensive, and potentially unwieldy, rule defining what constitutes a VHR and when a dealer will be deemed to have obtained a VHR that would likely be difficult to apply in all situations.

Moreover, the marketplace for VHRs is evolving rapidly. Consumers currently can purchase the reports from commercial vendors for between $2 and $40 per report and can also gain access to them at no cost from many dealers, automobile market websites, buying services, etc.[102] The Commission is concerned that a mandatory approach to vehicle history information disclosure could have the unintended effect of impeding these developments and reducing consumer access to current and reliable vehicle history information.

The Commission is also adding language to the Buyers Guide statement directing consumers to check for open safety recalls by visiting *safercar.gov.* In its comment on the SNPRM, NHTSA recommended treating safety recalls in a manner similar to the SNPRM's treatment of VHRs. NHTSA proposed a box that dealers would check if they had searched for information about open recalls, which dealers would then be obligated to provide to consumers upon request.[103] Given that the Commission is adopting an informational approach to VHRs by directing consumers to obtain them independently, the Commission is also adopting a similar approach to safety recall information.[104]

[104] As suggested by CAS, the Buyers Guide in the Final Rule uses the term ''check for'' safety recalls instead of ''search'' for recalls. CAS (2015), note 8.

B. ''As Is'' Statement

i. Summary

The existing Buyers Guide contains a box that dealers who offer to sell a used car without a warranty are required to mark to indicate that the vehicle is offered ''As Is,'' *i.e.,* without a warranty from the dealer. Adjacent to that box is a statement describing the meaning of the term ''As Is.'' In the NPRM, the Commission proposed modifying that statement to make it easier to read and to understand, but not to change the statement's meaning. In the SNPRM, the Commission proposed a revised formulation of the ''As Is'' statement and sought comments on other ''As Is'' statements.

After reviewing the comments that addressed the ''As Is'' statement, the Commission has decided to adopt the following ''As Is'' statement on the Buyers Guide which will appear next to a box that dealers would check in appropriate circumstances:

AS IS—NO DEALER WARRANTY

THE DEALER DOES NOT PROVIDE A WARRANTY FOR ANY REPAIRS AFTER SALE.

The statement is intended to convey nothing more than that the dealer does not intend to provide post-sale repairs under a warranty. Dealer groups strenuously objected to the Commission's SNPRM proposal to include the statement, ''But you may have other legal rights and remedies for dealer misconduct.'' [105] Consumer advocacy groups raised concerns that the SNPRM revision misstated dealers' potential obligations in some circumstances. The Commission has attempted to balance these concerns with a simple statement that concerns the warranty responsibilities that the dealer intends to disclaim. The fact that the dealer does not provide a warranty does not foreclose the possibility that a dealer could have post-sale repair obligations in some circumstances.

ii. Existing ''As Is'' Statement

The existing ''As Is'' statement on the Buyers Guide has been part of the Buyers Guide since the Rule's promulgation in 1984. The ''As Is'' statement was formulated to correct consumer misunderstanding of the term ''As Is.'' [106] The existing Buyers Guide states:

AS IS—NO WARRANTY

YOU WILL PAY ALL COSTS FOR ANY REPAIRS. The dealer assumes no responsibility for any repairs regardless of any oral statements about the vehicle. The Commission identified dealer oral misrepresentations regarding both mechanical condition and dealer after-sale repair responsibility in adopting the existing ''As Is'' disclosure.[107] The Commission concluded that a clear ''As Is'' disclosure would reduce consumer reliance on oral promises to repair problems that arise after sale, which may be difficult to enforce.[108]

iii. NPRM ''As Is'' Statement

In the NPRM, the Commission proposed revising the Buyers Guide ''As Is'' statement to improve readability and to clarify the meaning of the term ''As Is.'' The Buyers Guide in the NPRM stated:

AS IS—NO DEALER WARRANTY

THE DEALER WON'T PAY FOR ANY REPAIRS. The dealer is not responsible for any repairs, regardless of what anybody tells you. (''NPRM 'As Is' Statement'').[109]

iv. SNPRM ''As Is'' Statement

After reviewing the comments filed in response to the NPRM, the Commission, in the SNPRM, proposed retaining the ''regardless of any oral statements about the vehicle'' from the existing Rule and added ''but you may have other legal rights and remedies for dealer misconduct.'' Thus, the Buyers Guide in the SNPRM contains the following ''As Is'' statement:

AS IS—NO DEALER WARRANTY

THE DEALER WILL NOT PAY FOR ANY REPAIRS. The dealer does not accept responsibility to make or to pay for any repairs to this vehicle after you buy it regardless of any oral statements about the vehicle. But you may have other legal rights and remedies for dealer misconduct. (''SNRPRM 'As Is' Statement'').

v. Comments and Analysis

NCLC commented that the phrase ''regardless of any oral statements'' is ''troubling'' because ''[i]t is likely to convey to consumers that the dealer has the right not to stand behind its oral statements.'' [110] According to NCLC, however, ''under most states' laws, when the dealer has made statements about a vehicle's condition, it no longer has the ability to decline to accept responsibility for repairs necessary to bring the vehicle up to that condition.'' [111] Attorneys representing consumers agreed that the language could understate a dealer's potential liability for oral misrepresentations.[112]

The State AG Group proposed eliminating the use of ''As Is'' entirely.[113] The group observed that the focus of the statement should be on the ''fact that the dealer is not providing a warranty, rather than the potentially confusing or misleading statements that the dealer is selling a vehicle 'as is' or that it 'will not pay for any repairs.' '' [114] Dealers' groups likewise emphasized that the disclosure should be about whether the dealer is providing a warranty.[115]

The Commission agrees that the description of an ''As Is'' sale should focus on whether the dealer is offering a warranty rather than on an affirmative statement that the dealer will not pay for repairs. Likewise, the disclosure should not focus on an affirmative statement about a consumer's likely obligation in an ''As Is'' sale (''you will pay all costs for any repairs.''). Accordingly, the Commission has decided to delete the affirmative statements concerning the dealer's and consumer's respective obligations. Instead, the Commission has revised the Buyers Guide to add the explanatory statement, ''the dealer does not provide a warranty for any repairs after sale.''

The Commission, however, has decided to retain the term ''As Is.'' As noted in the 1984 rulemaking, the Uniform Commercial Code specifically identifies using ''As Is'' as a method to disclaim implied warranties.[116]

To balance the potential of the ''regardless of oral statements'' language to insulate dealers from liability and to dissuade consumers from pursuing remedies for oral misrepresentations that may be available in some circumstances, the Commission, in the SNPRM, proposed adding ''but you may

[114] State AG Group (2015) at 5.

[115] NADA (2015) at 18 (''should be one and only one goal in including this language [an explanatory phrase], and that is to explain that the dealer is not offering a warranty on the used vehicle.'').

[116] 49 FR 45697 note 59; Uniform Commercial Code 2–316(3)(a).

have other legal rights and remedies for dealer misconduct.'' [117] The proposed language was a variation of language suggested by the State AG Group [118] and, with several formulations, favored by various consumer advocacy organizations.[119]

Dealers' organizations strongly objected to the proposed language. NIADA commented that ''one is hard pressed not to read the third sentence as anything more than a provocation of consumers to search for dealer misconduct whether it exists or not.'' [120] NADA commented that the proposed language is ''gratuitous'' and implies that dealers ''are engaged in 'misconduct' because they are offering a vehicle 'as is' and without a warranty.'' [121]

The Commission has decided against including the phrase ''but you may have other legal rights and remedies for dealer misconduct,'' as it had proposed in the SNPRM. The Commission agrees that the phrase may suggest that dealer misconduct exists or that consumers should look for it when none exists. Simplifying the description of an ''As Is'' sale to one in which the ''dealer does not provide a warranty'' should lessen the likelihood of consumer confusion and provide clearer guidance on whether a dealer affirmatively offers a warranty.

The Commission has decided to adopt a simplified ''As Is'' statement to address comments about whether the existing statement on the Buyers Guide clearly conveys that the dealer is not offering a warranty. The Commission has also considered the comments critical of various formulations of the phrase ''regardless of any oral statements about the vehicle'' and has decided to delete the phrase. The Commission notes that the Buyers Guide will continue to warn consumers that oral promises are difficult to enforce and to advise that consumers ask the dealer to put all promises in writing.

C. Non-Dealer Warranty Boxes

The proposed Buyers Guide in the SNPRM included boxes (''non-dealer warranty boxes'') that dealers could check to indicate whether an unexpired manufacturer warranty, a manufacturer used car warranty, or some other warranty applies, and whether a service contract is available. The version of the Buyers Guide proposed in the NPRM included similar boxes on the back of the Buyers Guide.[122] NPRM commenters who addressed the non-dealer warranty boxes uniformly recommended moving the disclosures to the front of the Buyers Guide where they will be more accessible to consumers.[123] SNPRM commenters also favored the boxes and placing them on the front, although some of these commenters proposed modifications to the boxes and making disclosure of unexpired manufacturers' warranties mandatory.

As suggested by the comments, the Commission has decided to make the non-dealer warranty boxes more prominent and accessible by moving them to the front of the Buyers Guide, as proposed in the SNPRM and shown in Figures 1 and 2. The Commission is also modifying the existing Rule's description of a service contract as proposed in the SNPRM and making the service contract box flush with the non-dealer warranty boxes.[124]

The Commission has also decided to modify the statement that dealers may use on the Buyers Guide to disclose the applicability of an unexpired manufacturer's warranty.[125] In its NPRM comment, CAS suggested that the unexpired manufacturer's warranty box should state that ''[t]he manufacturer's original warranty has not expired on some components of the vehicle'' because, according to CAS, that language is ''more consistent with the different coverages that are in current warranties.'' [126] The AG Group also supported CAS's proposed language.[127] In its comments on the SNPRM, CAS proposed an alternative, the ''manufacturer's warranty coverage period has not expired.'' [128] As noted by CAS, the current language suggests that a manufacturer's unexpired warranty is bumper-to-bumper coverage whereas only some components may be covered.[129]

The Commission has decided to adopt the language initially proposed by CAS to disclose unexpired manufacturer's warranties because the language more accurately describes that an unexpired manufacturer's warranty typically refers to warranty coverage over some components of a used vehicle rather than the bumper-to-bumper coverage associated with a new vehicle. Accordingly, the amended Final Rule will provide dealers the ability to disclose that a ''manufacturer's original warranty has not expired on some components of the vehicle.''

For the reasons discussed in the NPRM, the Commission declines to make the disclosure of non-dealer warranties mandatory on the Buyers Guide.[130] The Commission believes that a statement on the Buyers Guide encouraging consumers to request more information about non-dealer warranties will help ensure that consumers are not deceived if the dealer chooses to use the existence of a non-dealer warranty as a selling point. To ensure that consumers understand the scope of any non-dealer warranty, the disclosure advises consumers to ''ask the dealer for a copy of the warranty document and an

[117] 79 FR at 70809.

[118] The State AG Group proposed ''But, you may have legal rights if the dealer concealed problems with the vehicle or its history.'' State AG Group (2013) at 5.

[119] Various commenters proposed additional revisions but also approved of the phrase ''but you may have other legal rights and remedies for dealer misconduct.'' *E.g.,* NCLC (2015) at 6–7; Steinbach (consumer attorney) (2015) at 7; State AG Group 015 at 4–5 (listing three acceptable alternatives: ''however, you may have legal rights if the dealer concealed problems with the vehicle or its history''; ''but you may have other legal rights if the dealer misrepresents the vehicle's condition or engages in other misconduct''; ''but you may have other legal rights and remedies for dealer misconduct'').

[124] The State AG Group suggested making the service contract box flush and clearly separated from the non-dealer warranty boxes. State AG (2015) at 5.

[125] 16 CFR 455.2(b)(v) permits dealers that wish to disclose the applicability of an unexpired manufacturer's warranty to state ''The manufacturer's original warranty has not expired on the vehicle.''

The Final Rule permits dealers to use their existing stock of Buyers Guides for up to one year after the effective date of the Rule amendments. It includes a revised disclosure that dealers must use if they choose to disclose unexpired manufacturers' warranties, or other non-dealer warranties, using those Buyers Guides.

[126] CAS (2013) at 3.

[127] State AG Group (2015) at 3–6.

[128] CAS (2015) at 3. CAS also commented that the disclosure of an unexpired manufacturer's warranty should be mandatory, and, if not made mandatory, the space on the front of the Buyers Guide should not be wasted on the disclosure.

[129] CAS (2015) at 4.

[130] 77 FR at 74753. As the Commission noted when it adopted the Rule in 1984, dealers subject to the Used Car Rule should be aware that the provisions of the Magnuson-Moss Warranty Act (''MMWA'') and the Commission's rules interpreting the MMWA are fully applicable to any written warranty offered in connection with the sale of a used car. Used vehicle dealers should therefore consult the terms of the MMWA and the Commission's rules interpreting the MMWA for a clear explanation of the duties arising under the MMWA. See 49 FR at 45,709 (citing 15 U.S.C. 2302–2308; 16 CFR parts 700 (interpretations of the MMWA); 701 (disclosure of written consumer product warranty terms and conditions); 702 (presale availability of written warranty terms); and 703 (informal dispute settlement procedures)).

explanation of warranty coverage, exclusions, and repair obligations.'' [131]

D. Spanish Sales

The Commission has decided to add a revised statement, in Spanish, to the front of the English Buyers Guide advising Spanish-speaking consumers who cannot read the English Buyers Guide to ask for a copy of the Spanish Buyers Guide if the dealer conducts the sale in Spanish. A proposed Spanish statement was included in the Buyers Guide published with the NPRM and incorporated into the SNPRM Buyers Guide.[132] The Rule prescribes a Spanish Buyers Guide and requires its use if a dealer conducts a sale in Spanish.[133] Dealers' groups commented that the proposed statement (''if you are unable to read this document in English, ask your salesperson for a copy in Spanish'') potentially could have expanded dealers' obligation to use Spanish Guides.[134] Recognizing this concern and not intending any change in the Rule's requirement regarding Spanish Buyers Guides, the Commission has changed the statement to advise consumers to ask for the Buyers Guide in Spanish if the dealer is conducting the sale in Spanish.

The Rule permits dealers to add an optional signature line to the back of the Buyers Guide where consumers can acknowledge receipt of the Buyers Guide.[135] As recommended by the Texas Automobile Dealers Association, the Commission has adopted a translation of the acknowledgment statement into the Final Rule.[136]

E. Miscellaneous NPRM Buyers Guide Modifications Incorporated in the Final Rule

The Final Rule and Buyers Guide incorporate text and other modifications to the Buyers Guide that the Commission proposed in the NPRM. The Buyers Guide's statement advising consumers to ask the dealer about a mechanical inspection has been relocated above the proposed vehicle history information box to enhance its prominence.[137] The Final Rule retains the use of the terms ''dealer warranty'' and ''non-dealer warranty'' proposed in the NPRM. Finally, the Buyers Guide incorporates the NPRM's proposed modifications to the description of ''Implied Warranties Only'' on the version of the Buyers Guide for use in jurisdictions that prohibit dealers from waiving implied warranties [138] and the description of a service contract on the front of the Buyers Guide.[139]

In the NPRM, the Commission proposed adding air bags and catalytic converters, as part of the exhaust system, to the list of some major defects that may occur in used vehicles.[140] The Commission did not receive comments on the proposal. The revised Buyers Guide includes air bags and catalytic converters in the list of major defects.[141]

F. Modification of Service-Contract Provisions

When the Commission promulgated the Rule in 1984, the Commission noted that it did not intend to regulate those service contracts that are ''excluded from the Commission's jurisdiction by the McCarran-Ferguson Act.'' [142] Consistent with that intent, the Commission has decided to adopt the revisions proposed in the SNPRM.[143] Therefore, § 455.1(d)(7) and § 455.2(b)(3) will be amended so that they correspond more closely with the statutory language of the McCarran-Ferguson Act.[144]

III. Regulatory Flexibility Act

The Regulatory Flexibility Act (''RFA'') [145] requires that the Commission conduct an initial and a final analysis of the anticipated economic impact of the amendments on small entities. The purpose of a regulatory flexibility analysis is to ensure the agency considers the impacts on small entities and examines regulatory alternatives that could achieve the regulatory purpose while minimizing burdens on small entities. The RFA [146] provides that such an analysis is not required if the agency head certifies that the regulatory action will not have a significant economic impact on a substantial number of small entities.

The Commission believes that the amendments will not have a significant economic impact on small entities, although they will likely affect a substantial number of small entities. The Rule, and the amendments, apply primarily to independent used vehicle dealers and franchised new vehicle dealers, which typically also sell used vehicles, such as vehicles traded for new car purchases. Most dealers would be classified as small businesses, as explained *infra.*

The amendments revise the Buyers Guide that the Rule requires dealers to display on used vehicles by changing pre-printed disclosures that appear on the Buyers Guide and adding boxes that dealers can check if they choose to disclose additional information concerning non-dealer warranties. Although the amendments will require that dealers eventually substitute the revised Buyers Guides, the amendments permit dealers to use their existing stock of Buyers Guides for up to one year after the effective date of these Rule amendments before doing so. The Rule already permits dealers to make the disclosures in the check boxes, but the check boxes will make the disclosures easier for those dealers who choose to make them. Therefore, the Commission certifies that amending the Rule will not have a significant economic impact on a substantial number of small businesses.

The Final Rule is similar to the rule proposed in the NPRM. In its Initial Regulatory Flexibility Analysis (''IRFA''), the Commission determined that the NPRM Proposed Rule was not likely to have a significant economic impact on a substantial number of small entities.[147] The only additional burden that the Final Rule, like the Proposed Rule, places on dealers is the substitution of new Buyers Guides for the ones that dealers currently use, but dealers will be permitted to use their existing stock of Buyers Guides for up to one year after the effective date of these Rule amendments. The new Buyers Guide makes disclosing non-dealer warranties easier for those dealers who choose to disclose them, but does not require additional disclosures regarding non-dealer warranties.

Although the Commission certifies under the RFA that the amendments will not have a significant impact on a substantial number of small entities, the Commission nonetheless has determined that publishing a final regulatory flexibility analysis (FRFA) is appropriate to ensure that the impact of the amendments is fully addressed.

[146] 5 U.S.C. 605.

[147] 77 FR 74765.

Therefore, the Commission has prepared the following analysis:

A. Need for and Objectives of the Amendments

The purpose of the amendments is to provide material information about vehicle histories and used car warranties to help protect consumers from dealer misrepresentations and to aid consumers in making informed choices when purchasing a used vehicle. In particular, the amendments seek to promote consumer awareness of vehicle history information, to clarify the meaning of ''as is'' in the sale of used vehicles without warranties, to make disclosures concerning non-dealer warranties more prominent, to improve Spanish-speaking consumers' access to the Spanish Buyers Guide during sales conducted in Spanish, and to provide additional information about defects that may be found in used vehicles.

B. Significant Issues Raised in Public Comments

None of the comments disputed the Initial Regulatory Flexibility Analysis in the NPRM or in the SNPRM. In the SNPRM, the Commission proposed that dealers indicate on the Buyers Guide that they had obtained a VHR and, if so, provide a copy of the VHR to consumers upon request. Commenters questioned whether the cost of providing copies of VHRs to consumers should be borne by consumers or dealers. The Final Rule does not require dealers to provide copies of VHRs to consumers, but instead a pre-printed statement on the Buyers Guide recommends that consumers visit an FTC website to learn more about obtaining VHRs. Accordingly, the amendments will not require dealers to bear the cost of providing VHRs to consumers.

The Commission did not receive any comments from the Small Business Administration Chief Counsel for Advocacy.

C. Small Entities to Which the Amendments Will Apply

The Used Car Rule primarily applies to ''dealers'' defined as ''any individual or business which sells or offers for sale a used vehicle after selling or offering for sale five (5) or more used vehicles in the previous twelve months.'' [148] The Commission believes that many of these dealers are small businesses according to the applicable Small Business Administration (''SBA'') size standards. Under those standards, the SBA would classify as small businesses independent used car dealers having annual receipts of less than $25 million and franchised new car dealers, which also typically sell used cars, having fewer than 200 employees each.[149]

Most independent used vehicle dealers would be classified as small businesses. In 2012, the United States' 37,892 independent used vehicle dealers [150] had average total sales of $4,228,137.[151] These used vehicle dealers' average annual revenue is well below the maximum $25 million in annual sales established by the SBA for classification as a small business. Therefore, these used vehicle dealers would be classified as small businesses.

The SBA would also classify many franchised new car dealers as small businesses. In 2015, the nation's 16,545 franchised new car dealers [152] had an average of sixty-seven employees,[153] well below the 200-employee maximum established by the SBA for classification as a small business.[154]

D. Projected Reporting, Recordkeeping, and Other Compliance Requirements, Including Classes of Covered Small Entities and Professional Skills Needed To Comply

The Used Car Rule imposes disclosure obligations on used vehicle dealers, but does not impose any reporting or recordkeeping requirements. Specifically, the Rule requires dealers to complete and to display a Buyers Guide on each used car offered for sale. Neither the existing Rule nor the Final Rule requires dealers to disclose non-dealer warranties. Under the existing Rule, dealers who choose to disclose non-dealer warranties, in particular, unexpired manufacturer's warranties, may do so by adding a statement to the Buyers Guide that is prescribed by the Rule. The Final Rule permits dealers to disclose unexpired manufacturer's warranties and other third-party warranties, but does not require that dealers make those disclosures. For those dealers who choose to disclose non-dealer warranties, the Final Rule should make the disclosure easier because dealers can make the disclosures by checking a box on the Buyers Guide rather than adding a statement prescribed by the Rule.

In other **Federal Register** submissions, the Commission has concluded that professional skills needed to comply with the rule are possessed by clerical or administrative staff.[155] The professional skills necessary to comply with the Rule as modified by the amendments are the same as those necessary to comply with the existing Rule.

E. Significant Alternatives to the Amendments

The Commission has not proposed any specific small entity exemption or other significant alternatives because the amendments simply modify the pre-printed disclosures that dealers are already required to make in connection with offering used cars for sale.

The Commission believes that the Final Rule will help reduce potential deception by promoting consumer awareness of vehicle history information, consumer understanding of the meaning of ''As Is'' in used vehicle sales transactions in which a dealer disclaims warranties, and consumer awareness of warranties that may apply to a used vehicle. The revised Buyers Guide contains pre-printed statements that direct consumers to consumer-oriented websites for additional information, including live links to outside sources of information. The Rule also requires dealers to complete parts of the Buyers Guide by, among other things, listing the VIN and indicating the warranty coverage, if any, that applies to the vehicle. A downloadable, fillable version of the revised Buyers Guide is available on the Commission's Web site.

The Rule also provides that the Buyers Guide is incorporated into the sales contract. The Rule requires that dealers complete a Buyers Guide for each used vehicle offered for sale, display a physical Buyers Guide on the vehicle, and provide a copy of that Buyers Guide to consumers. Therefore, consumers are able to see the Buyers Guide disclosures upon even a casual inspection of a used vehicle that they are considering buying. Consumers likely expect to see a physical label on used cars because disclosure labels (''Monroney'' stickers) are required to be affixed to new cars.[156] In staff's enforcement experience, used vehicle dealers routinely place point of sale

[156] *See* 15 U.S.C. 1232.

advertising statements (e.g., ''low miles,'' ''one owner'') directly on vehicles to capture consumers' attention. Similarly, the Commission continues to believe that a Buyers Guide displayed on a used vehicle will most effectively capture a consumer's attention.

The Commission considered several different approaches to vehicle history information discussed in the comments. In the SNPRM, the Commission proposed requiring dealers who have VHRs to disclose that fact on the Buyers Guide and to provide copies of the reports to requesting consumers. In the NPRM, the Commission proposed placing a statement on the Buyers Guide that would advise consumers about the availability of vehicle history information and direct consumers to an FTC website for more information. The Commission also considered requiring dealers to obtain VHRs. such as NMVTIS reports, and requiring dealers to make disclosures similar to those required by California's AB 1215. Currently consumers can gain access to VHRs at no cost from many dealers, automobile marketplace websites, buying services, etc., and from commercial vendors at a nominal cost. Given the availability of various sources for and types of VHRs, the Commission has chosen not to require that dealers obtain reports or to designate specific types of reports or specific vendors. In doing so, the Commission sought to balance the burden placed on dealers with the goals of promoting consumer choice and access to vehicle history information.

The Commission considered comments on the Buyers Guide ''As Is'' statement and the various formulations of the statement proposed by the comments. The Commission chose the ''As Is'' statement in this Final Rule because the Commission believes that the statement clearly and accurately describes the meaning of ''As Is.''

The Commission considered comments on the non-dealer warranty boxes proposed in the NPRM. In response to those comments, the Commission has moved those boxes to the front of the Buyers Guide.

Under these circumstances, the Commission does not believe a special exemption for small entities or significant compliance alternatives are necessary or appropriate to minimize the compliance burden, if any, on small entities while achieving the intended purposes of the amendments.

IV. Regulatory Analysis

Under section 22 of the FTC Act, the Commission must issue a regulatory analysis for a proceeding to amend a rule only when it: (1) Estimates that the amendment will have an annual effect on the national economy of $100,000,000 or more; (2) estimates that the amendment will cause a substantial change in the cost or price of certain categories of goods or services; or (3) otherwise determines that the amendment will have a significant effect upon covered entities or upon consumers.

After careful consideration of the comments, and the record as a whole, the Commission has determined that there are no facts in the record, or other reasons to believe, that these amendments will have significant effects on the national economy, on the cost of goods or services, or on covered parties or consumers. No commenter provided a cost estimate of the amendments. Moreover, none indicated that the amendments would have an annual impact of more than $100,000,000, cause substantial change in the cost of goods or services, or otherwise have a significant effect upon covered entities or consumers.

In any event, to the extent, if any, these final rule amendments will have such effects, the Commission has explained above the need for, and the objectives of, the final amendments; the regulatory alternatives that the Commission considered; the projected benefits and adverse economic or other effects, if any, of the amendments; the reasons that the final amendments will attain their intended objectives in a manner consistent with applicable law; the reasons for the particular amendments that the agency has adopted; and the significant issues raised by public comments, including the Commission's assessment of and response to those comments on those issues.

V. Paperwork Reduction Act

The existing Rule contains no recordkeeping or reporting requirements, but it does contain disclosure requirements that constitute ''information collection requirements'' as defined by 5 CFR 1320.3(c) under the Office of Management and Budget (''OMB'') regulations that implement the Paperwork Reduction Act (''PRA''). OMB has approved the Rule's existing information collection requirements through Jan. 31, 2017 (OMB Control No. 3084–0108).

As discussed above, the Commission is retaining the requirement that dealers must display a Buyers Guide on used cars offered for sale and is updating the text of the disclosures that dealers must provide in the Buyers Guide. The Commission is also amending the Buyers Guide to provide dealers with a method to disclose optional additional information about non-dealer warranties. The amendments about non-dealer warranties do not require dealers to disclose this additional information nor do they alter the Rule's existing disclosure requirements or impose recordkeeping requirements.

The Commission has made amended Buyers Guides available on its Web site for downloading by dealers free of charge. The Commission expects that current suppliers of Buyers Guides, such as commercial vendors and dealer trade associations, will supply dealers with amended Buyers Guides. Accordingly, individual dealer cost to obtain amended Buyers Guides should increase only marginally, if at all.

As explained in the NPRM, FTC staff has estimated that dealers will make the optional disclosures on 25% of used cars offered for sale. Dealers who choose to make the optional disclosures should obtain amended Buyers Guides and complete them by checking additional boxes not appearing on the current Buyers Guide. Staff has in the past estimated that completing Buyers Guides requires approximately 2 minutes per vehicle for vehicles sold without a warranty and 3 minutes per vehicle for vehicles sold with a warranty.[157] Staff believes that checking the additional boxes should require dealers no more than an additional 30 seconds per vehicle.[158] Thus, based on 27,966,551 used cars sold,[159] making the optional disclosures presented by the amendments would increase estimated burden by 58,264 hours (25% $\times$ 27,966,551 vehicles sold $\times$ 1/120 hour per vehicle).

Staff also anticipates that dealers can use lower level clerical staff at a mean hourly wage of $15.33 per hour[160] to

[157] *See, e.g.,* 78 FR 59032, 59032 (Sept. 25, 2013) (Notice: ''Agency Information Collection Activities; Proposed Collection; Comment Request; Extension.'').

[158] Previously, dealers who opted to disclose the applicability of manufacturers' warranties could do so by adding a statement to the Buyers Guide, 16 CFR 455.2(2)(b)(v), which likely would take longer than simply checking a box to make the same disclosure. The projected increment of 30 seconds is a combined reflection of time saved through the latter means and the incremental time accorded to checking off additional boxes tied to new disclosures under the Final Rule.

[159] *NIADA's Used Car Industry Report 2016,* at 31 (*citing* NADA data for the total number of used vehicles sold by franchised and independent dealers in 2015).

[160] The hourly rate is based on the Bureau of Labor Statistics estimate of the mean hourly wage for office clerks, general. *Occupational Employment and Wages, May 2015, 43–9061 Office Clerks,* Continued

complete the Buyers Guides, so incremental labor costs associated with making the optional disclosures will total $893,187 per year [58,264 hours × $15.33 per hour].

Estimating, as stated above, that dealers will make the optional disclosures on 25% of the 27,966,551 used cars offered for sale, and assuming further a cost of thirty cents per preprinted Buyers Guide, incremental purchase costs per year will total $2,097,491. Any other capital costs associated with the amendments are likely to be minimal. This analysis is consistent with the analysis provided in the NPRM, but has been updated with more recent data regarding the number of used vehicles sold and labor costs tied to making the optional disclosures for those sales. None of the comments disputed the PRA analysis in the NPRM.

List of Subjects in 16 CFR Part 455

Motor vehicles, Trade practices.

For the reasons set forth in the preamble, the Federal Trade Commission amends part 455 of title 16, Code of Federal Regulations, as follows:

PART 455—USED MOTOR VEHICLE TRADE REGULATION RULE

■ 1. The authority citation for part 455 continues to read as follows:

Authority: 15 U.S.C. 2309; 15 U.S.C. 41–58.

■ 2. Amend § 455.1 by revising paragraph (d)(7) to read as follows:

§ 455.1 General duties of a used vehicle dealer; definitions.

* * * * *

(d) * * *

(7) *Service contract* means a contract in writing for any period of time or any specific mileage to refund, repair, replace, or maintain a used vehicle and provided at an extra charge beyond the price of the used vehicle, unless offering such contract is ''the business of insurance'' and such business is regulated by State law.

* * * * *

■ 3. Amend § 455.2 by revising paragraph (a) introductory text, paragraph (a)(2), and paragraph (b) to read as follows:

§ 455.2 Consumer sales—window form.

(a) *General duty.* Before you offer a used vehicle for sale to a consumer, you must prepare, fill in as applicable and display on that vehicle the applicable ''Buyers Guide'' illustrated by Figures 1–2 at the end of this part. Dealers may use remaining stocks of the version of the Buyers Guide in effect prior to the effective date of this Rule for up to one year after that effective date (*i.e.,* until January 27, 2018). Dealers who opt to use their existing stock and choose to disclose the applicability of a non-dealer warranty, must add the following as applicable below the ''Full/Limited Warranty'' disclosure: ''Manufacturer's Warranty still applies. The manufacturer's original warranty has not expired on the vehicle;'' ''Manufacturer's Used Vehicle Warranty Applies;'' or ''Other Used Vehicle Warranty Applies,'' followed by the statement, ''Ask the dealer for a copy of the warranty document and an explanation of warranty coverage, exclusions, and repair obligations.''

* * * * *

(2) The capitalization, punctuation and wording of all items, headings, and text on the form must be exactly as required by this Rule. The entire form must be printed in 100% black ink on a white stock no smaller than 11 inches high by 7¼ inches wide in the type styles, sizes and format indicated. When filling out the form, follow the directions in paragraphs (b) through (f) of this section and § 455.4.

(b) *Warranties*—(1) *No Implied Warranty*—''*As Is*''/*No Dealer Warranty.* (i) If you offer the vehicle without any implied warranty, *i.e.,* ''as is,'' mark the box appearing in Figure 1. If you offer the vehicle with implied warranties only, substitute the IMPLIED WARRANTIES ONLY disclosure specified in paragraph (b)(1)(ii) of this section, and mark the IMPLIED WARRANTIES ONLY box illustrated by Figure 2. If you first offer the vehicle ''as is'' or with implied warranties only but then sell it with a warranty, cross out the ''As Is—No Dealer Warranty'' or ''Implied Warranties Only'' disclosure, and fill in the warranty terms in accordance with paragraph (b)(2) of this section.

(ii) If your State law limits or prohibits ''as is'' sales of vehicles, that State law overrides this part and this rule does not give you the right to sell ''as is.'' In such States, the heading ''As Is—No Dealer Warranty'' and the paragraph immediately accompanying that phrase must be deleted from the form, and the following heading and paragraph must be substituted as illustrated in the Buyers Guide in Figure 2. If you sell vehicles in States that permit ''as is'' sales, but you choose to offer implied warranties only, you must also use the following disclosure instead of ''As Is—No Dealer Warranty'' as illustrated by the Buyers Guide in Figure 2. *See* § 455.5 for the Spanish version of this disclosure.

IMPLIED WARRANTIES ONLY

The dealer doesn't make any promises to fix things that need repair when you buy the vehicle or afterward. But *implied warranties* under your state's laws may give you some rights to have the dealer take care of serious problems that were not apparent when you bought the vehicle.

(2) *Full/Limited Warranty.* If you offer the vehicle with a warranty, briefly describe the warranty terms in the space provided. This description must include the following warranty information:

(i) Whether the warranty offered is ''Full'' or ''Limited.'' Mark the box next to the appropriate designation. A ''Full'' warranty is defined by the Federal Minimum Standards for Warranty set forth in section 104 of the Magnuson-Moss Act, 15 U.S.C. 2304 (1975). The Magnuson-Moss Act does not apply to vehicles manufactured before July 4, 1975. Therefore, if you choose not to designate ''Full'' or ''Limited'' for such vehicles, cross out both designations, leaving only ''Warranty.''

(ii) Which of the specific systems are covered (for example, ''engine, transmission, differential''). You cannot use shorthand, such as ''drive train'' or ''power train'' for covered systems.

(iii) The duration (for example, ''30 days or 1,000 miles, whichever occurs first'').

(iv) The percentage of the repair cost paid by you (for example, ''The dealer will pay 100% of the labor and 100% of the parts.'')

(v) You may, but are not required to, disclose that a warranty from a source other than the dealer applies to the vehicle. If you choose to disclose the applicability of a non-dealer warranty, mark the applicable box or boxes beneath ''NON-DEALER WARRANTIES FOR THIS VEHICLE'' to indicate: ''MANUFACTURER'S WARRANTY STILL APPLIES. The manufacturer's original warranty has not expired on some components of the vehicle,'' ''MANUFACTURER'S USED VEHICLE WARRANTY APPLIES,'' and/or ''OTHER USED VEHICLE WARRANTY APPLIES.''

If, following negotiations, you and the buyer agree to changes in the warranty coverage, mark the changes on the form, as appropriate. If you first offer the vehicle with a warranty, but then sell it without one, cross out the offered warranty and mark either the ''As Is—No Dealer Warranty'' box or the ''Implied Warranties Only'' box, as appropriate.

(3) *Service contracts.* If you make a service contract available on the vehicle,

General, available at: *http://www.bls.gov/oes/current/oes439061.htm.*

you must add the following heading and paragraph below the Non-Dealer Warranties Section and mark the box labeled ''Service Contract,'' unless offering such service contract is ''the business of insurance'' and such business is regulated by State law. *See* § 455.5 for the Spanish version of this disclosure.

☐ SERVICE CONTRACT. A service contract on this vehicle is available for an extra charge. Ask for details about coverage, deductible, price, and exclusions. If you buy a service contract within 90 days of your purchase of this vehicle, *implied warranties* under your state's laws may give you additional rights.

* * * * *

■ 3. Revise § 455.5 to read as follows:

§ 455.5 Spanish language sales.

(a) If you conduct a sale in Spanish, the window form required by § 455.2 and the contract disclosures required by § 455.3 must be in that language. You may display on a vehicle both an English language window form and a Spanish language translation of that form. Use the translation and layout for Spanish language sales in Figures 4, 5, and 6.

(b) Use the following language for the ''Implied Warranties Only'' disclosure when required by § 455.2(b)(1) as illustrated by Figure 5:

SOLO GARANTÍAS IMPLÍCITAS

El concesionario no hace ninguna promesa de reparar lo que sea necesario cuando compre el vehículo o posteriormente. Sin embargo, las *garantías implícitas* según las leyes estatales podrían darle algunos derechos para hacer que el concesionario se encargue de ciertos problemas que no fueran evidentes cuando compró el vehículo.

(c) Use the following language for the ''Service Contract'' disclosure required by § 455.2(b)(3) as illustrated by Figures 4 and 5:

CONTRATO DE MANTENIMIENTO. Con un cargo adicional, puede obtener un contrato de mantenimiento para este vehículo. Pregunte acerca de los detalles de la cobertura, los deducibles, el precio y las exclusiones. Si compra un contrato de mantenimiento dentro de los 90 días desde el momento en que compró el vehículo, las *garantías implícitas* según las leyes de su estado podrían darle derechos adicionales.

(d) Use the following language if you choose to use the Optional Signature Line provided by § 455.2(f):

Por este medio confirmo que he recibido copia de la Guía del Comprador al momento de la compraventa.

■ 4. Add Figures 1 through 6 to part 455 to read as follows:

BILLING CODE 6750–01–P

A continuación podrá encontrar una lista de los defectos principales que podrían ocurrir en vehículos usados.

Chasis y carrocería
Grietas en el chasis, soldaduras correctivas u oxidadas
Descuadrado: chasis doblado o torcido

Motor
Pérdidas de aceite, excepto las filtraciones normales
Bloque o cárter con grietas
Correas ausentes o fuera de servicio
Golpes o fallas relacionados con levantadores de levas o bielas
Descarga del escape fuera de lo normal

Transmisión y eje motor
Nivel inadecuado de fluido o pérdidas excepto filtraciones normales
Grietas o daños visibles en la caja.
Ruidos o vibraciones fuera de lo normal ocasionadas por la transmisión o el eje motor
Cambios o funcionamiento inadecuados en cualquier velocidad
Patinados o vibraciones del embrague manual

Diferencial
Nivel inadecuado de fluido o pérdidas excepto filtraciones normales
Grietas o daños visibles en el cárter del diferencial
Ruidos o vibraciones fuera de lo normal ocasionadas por fallas en el diferencial.

Sistema de enfriamiento
Pérdidas, incluidas las del radiador
Funcionamiento inadecuado de la bomba de agua

Sistema eléctrico
Pérdidas en la batería
Funcionamiento inadecuado del alternador, generador, batería o arrancador

Sistema de combustible
Pérdidas visibles

Accesorios fuera de servicio
Indicadores o dispositivos de advertencia
Aire acondicionado
Calefacción y Desempañador

Sistema de frenos
Luz de advertencia de fallas rota
Falta de firmeza cuando se presiona el pedal (según especificaciones del Departamento de Transporte [DOT])
Distancia insuficiente del pedal (según especificaciones del DOT)
El vehículo no se detiene en línea recta (según especificaciones del DOT)
Mangueras dañadas
Tambor o rotor muy delgados (según especificaciones del fabricante)
Grosor de la placa o del revestimiento inferior que 1/32 pulgadas
Unidad de potencia fuera de servicio o con pérdidas
Partes estructurales o mecánicas dañadas

Bolsas de aire

Sistema de dirección
Demasiado juego en el volante (según especificaciones del DOT)
Juego mayor a 1/4 de pulgada en el varillaje.
El mecanismo de dirección se traba
Alineación inadecuada de las ruedas frontales (según especificaciones del DOT)
Grietas o deslizamientos en las correas de la unidad de potencia
Nivel inadecuado de fluidos de la unidad de potencia

Sistema de suspensión
Juntas de rótula dañadas
Partes estructurales dobladas o dañadas
Barra estabilizadora desconectada
Resorte roto
Cojinete del amortiguador suelto
Cojinetes de caucho dañados o ausentes
Biela dañada o ausente
Amortiguador con pérdidas o con funcionamiento inadecuado

Neumáticos
Profundidad de las ranuras menor que 2/32 de pulgada
Tamaños que no corresponden
Daños visibles

Ruedas
Grietas, daños o reparaciones visibles
Tornillos de sujeción sueltos o ausentes

Sistema de escape

[Docket No. FDA–2005–N–0343]

RIN 0910–AC53

Medical Gas Containers and Closures; Current Good Manufacturing Practice Requirements

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA or the Agency) is amending its current good manufacturing practice (CGMP) and labeling regulations regarding medical gases. FDA is requiring that portable cryogenic medical gas containers not manufactured with permanent gas use outlet connections have gas-specific use outlet connections that cannot be readily removed or replaced except by the manufacturer. FDA is also requiring that portable cryogenic medical gas containers and high-pressure medical gas cylinders meet certain labeling, naming, and color requirements. These requirements are intended to increase the likelihood that the contents of medical gas containers are accurately identified and reduce the likelihood of the wrong gas being connected to a gas

supply system or container. FDA is also revising an existing regulation that conditionally exempts certain medical gases from certain otherwise-applicable labeling requirements in order to add oxygen and nitrogen to the list of gases subject to the exemption, and to remove cyclopropane and ethylene from the list.

DATES: This rule is effective January 17, 2017. See section V of this document for the compliance date of this final rule.

FOR FURTHER INFORMATION CONTACT: J. Patrick Raulerson, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, Rm. 6260, Silver Spring, MD 20993–0002, 301–796–3522.

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Executive Summary

A. Purpose of the Final Rule

On April 10, 2006, FDA issued a proposed rule to amend our regulations on CGMP to include new or revised requirements for the labeling, color, dedication, and design of medical gas containers and closures (71 FR 18039). The chief impetus for the proposed rule was a number of incidents in which a medical gas container holding a gas other than oxygen was erroneously connected to a health care facility's oxygen supply system, leading to serious injuries and deaths. In addition, FDA recognized that the regulation that conditionally exempts certain medical gases from certain otherwise-applicable prescription drug labeling regulations did not reflect either industry best practices or FDA's current regulatory expectations.

Following consideration of comments received and further internal deliberation, we are finalizing this rule as described in this document. The final rule is intended to increase the likelihood that the contents of medical gas containers are accurately identified and reduce the likelihood of the wrong gas being connected to a gas supply system or container. The final rule also modifies the medical gas conditional labeling exemption regulation such that it now largely reflects existing industry best practices and FDA's current regulatory expectations regarding the labeling of medical gases.

B. Summary of the Major Provisions of the Final Rule

We received approximately 50 comments on the proposed rule. The most detailed comments were from industry trade associations. The other comments were largely from individual medical gas firms, consultants, or other industry stakeholders, and they generally expressed agreement with the trade associations' comments. We discuss all significant comments in section IV.

The final rule requires that portable cryogenic medical gas containers not manufactured with permanent gas use outlet connections have gas-specific use outlet connections that cannot be readily removed or replaced except by the manufacturer. The rule further requires that portable cryogenic medical gas containers and high-pressure medical gas cylinders meet certain labeling, naming, and color requirements. Principally, portable cryogenic medical gas containers are required to bear a 360° wraparound label identifying the contents of the container, and high-pressure medical gas cylinders are required to be colored on the shoulder of the container in the FDA-designated color or colors associated with the gas or gases held in the container. These requirements are intended to increase the likelihood that the contents of medical gas containers are accurately identified and reduce the likelihood of the wrong gas being connected to a gas supply system or container.

The final rule also revises the medical gas conditional labeling exemption regulation to add oxygen and nitrogen to the list of medical gases subject to the exemption, and to remove cyclopropane and ethylene from the list. The final rule further revises this regulation by adding new warning statement content to be included in oxygen labeling and by expanding the scope of the regulation to include medically appropriate mixtures of medical gases.

C. Legal Authority

Medical gases are generally regulated as prescription drugs under sections 201(g)(1) and 503(b)(1) of the Federal Food, Drug, and Cosmetic Act (the FD&C Act) (21 U.S.C. 321(g)(1) and 353(b)(1)) (though oxygen may be dispensed without a prescription for certain uses specified at section 576(b)(2) of the FD&C Act (21 U.S.C. 360ddd–1(b)(2)), and are subject to regulation under section 501(a)(2)(B) of the FD&C Act (21 U.S.C. 351(a)(2)(B)). Sections 575 and 576 of the FD&C Act (21 U.S.C. 360ddd and 360ddd–1) address the regulation of medical gases and designated medical gases. FDA is invoking its authority under sections 501(a)(2)(B), 502(f) (21 U.S.C. 352(f)), 576(a), and 701(a) (21 U.S.C. 371(a)) of the FD&C Act to create or modify CGMP and labeling regulations applicable to medical gases to ensure that they meet the requirements of the FD&C Act as to safety and have the identity and strength, and meet the quality and purity characteristics, that they purport or are represented to possess, and are labeled with adequate warnings and instructions for use.

D. Costs and Benefits

The rule is expected to provide a modest net social benefit (estimated benefits minus estimated costs) to society. Costs are attributed to coloring medical gas containers, complying with the 360° wraparound label requirement for portable cryogenic containers, and requiring gas-specific use outlet connections on portable cryogenic containers to be permanently attached to the valve body (*e.g.,* by silver brazing) or attached to the valve body using a locking mechanism or other appropriate device so that only the manufacturer can readily remove or replace them. Using a standard 10 year time period, we estimate annualized costs to range between $180,000 and $1.5 million using a 3 percent discount rate and between $210,000 and $1.8 million using a 7 percent discount rate. Benefits are attributed to reducing the probability that medical personnel accidentally administer the wrong gas to patients, resulting in serious injury or death. We estimate annualized benefits to range between $800,000 and $2.8 million using a 3 percent discount rate, and between $2.5 million and $8.3 million using a 7 percent discount rate. Together we estimate annualized net benefits to range between $620,000 and $1.3 million using a 3 percent discount rate, and between $2.3 million and $6.5 million using a 7 percent discount rate.

II. Background

A. History of the Rulemaking

In the **Federal Register** of April 10, 2006, FDA issued a proposed rule to amend our regulations on CGMP to include new requirements for the labeling, color, dedication, and design of medical gas containers and closures. The chief impetus for issuance of the proposed rule was a number of incidents in which a medical gas container holding a gas other than oxygen was erroneously connected to a health care facility's oxygen supply system, leading to serious injuries and deaths. FDA was also concerned with reports of serious injuries attributable to contamination of high-pressure medical gas cylinders with residue of industrial cleaning solvents, likely as a result of inadequate cleaning during conversion of the cylinder from industrial to medical use. For a detailed account of these incidents, please refer to the proposed rule (71 FR 18039 at 18040–18041).

Accordingly, FDA proposed certain regulatory requirements intended to (1) reduce the likelihood of the wrong gas being attached to a gas supply system or container (and in particular to reduce the likelihood of a gas other than oxygen being connected to an oxygen supply system), (2) make the contents of medical gas containers more easily and accurately identifiable, and (3) reduce the risk of contamination of medical gases. Additionally, FDA proposed including medical air, oxygen, and nitrogen among, and excluding cyclopropane and ethylene from, the list of gases that are conditionally exempt from certain labeling requirements as described in § 201.161 (21 CFR 201.161). FDA solicited written comments on the proposed rule.

Following publication of the proposed rule, the Food and Drug Administration Safety and Innovation Act (FDASIA) was enacted (Pub. L. 112–144 (July 9, 2012)). Title XI, Subtitle B of FDASIA, ''Medical Gas Product Regulation,'' added new sections 575, 576, and 577 to the FD&C Act (21 U.S.C. 360ddd, 360ddd–1, and 360ddd–2), creating a new certification process for certain ''designated'' medical gases, including all of the gases listed at § 201.161 as amended by this rule. Section 575 of the FD&C Act defines the term ''designated medical gas'' to include oxygen, nitrogen, nitrous oxide, carbon dioxide, helium, carbon monoxide, and medical air that meet the standards set forth in an official compendium. Section 576 of the FD&C Act permits any person to file a request for certification of a medical gas as a designated medical gas for certain specified indications. A designated medical gas for which a certification is granted is deemed to have in effect an approved application under section 505 (New Drug Application) or 512 (New Animal Drug Application) of the FD&C Act (21 U.S.C. 355 or 360b) (*see* FD&C Act section 576(a)(3)(A)(i)). This approval applies to the designated medical gas alone or in combination, as medically appropriate, with one or more other designated medical gases for which certifications have been granted (Id.).

Section 576 of the FD&C Act also addresses the labeling and prescription drug status of designated medical gases. Section 576(a)(3)(A)(ii) of the FD&C Act, similar to the conditional labeling exemption at § 201.161(a), specifies how the labeling of designated medical gases may meet certain generally applicable statutory labeling requirements. Specifically, section 576(a)(3)(A)(ii) of the FD&C Act provides that the requirements of sections 503(b)(4) of the FD&C Act (regarding labeling of a drug as a prescription drug) and 502(f) of the FD&C Act (regarding inclusion of adequate directions for use and adequate warnings in drug labeling) are deemed to have been met for a designated medical gas if the labeling on the final use container for the medical gas bears: (1) The information required by section 503(b)(4); (2) a warning statement concerning the use of the medical gas as determined by the Secretary by regulation; and (3) appropriate directions and warnings concerning storage and handling. Section 576(b)(2)(B) of the FD&C Act further provides that, in the case of oxygen provided for certain uses specified at section 576(b)(2)(A), the requirements of section 503(b)(4) of the FD&C Act are deemed to have been met if the labeling bears a warning that the oxygen can be used for emergency use only and for all other medical applications a prescription is required. Finally, section 576(b) of the FD&C Act provides that designated medical gases shall generally be subject to the requirements of section 503(b)(1) of the FD&C Act (requiring that drugs meeting certain specified conditions be dispensed only upon prescription), while also providing that oxygen may be dispensed without a prescription for certain specified uses.

B. Summary of Comments to the Proposed Rule

FDA received approximately 50 written comments on the proposed rule. Comments were submitted by trade associations representing the medical gas and home health care industries, medical gas firms, medical gas industry consultants and other industry stakeholders, and one State regulatory body.

The comments addressed the following topics, among others:

- The appropriate warning statements to be included in oxygen and medical air labeling.
- Safety issues associated with converting a gas container from industrial to medical use and how best to address them.
- The utility and appropriateness of coloring medical gas containers in whole or in part.
- The appropriate content and configuration of wraparound labeling on portable cryogenic medical gas containers.
- Estimated costs to comply with the proposed rule and whether such costs are justified under a cost-benefit analysis.

C. General Overview of the Final Rule

This final rule includes many of the provisions of the April 2006 proposed rule, with certain modifications described in section IV.C of this document. In particular, the final rule adds oxygen and nitrogen to, and removes cyclopropane and ethylene from, the list of medical gases in § 201.161(a) that are conditionally exempt from the labeling requirements of § 201.100(b)(2) and (3), and (c)(1). The final rule also requires that portable cryogenic medical gas containers and high-pressure medical gas cylinders meet certain labeling, naming, and coloring requirements as provided in new § 201.328. The final rule further requires that portable cryogenic medical gas containers not manufactured with permanent gas use outlet connections have gas-specific use outlet connections that cannot be readily removed or replaced except by the manufacturer by amending § 211.94 (21 CFR 211.94) through the addition of new paragraph (e).

This final rule also reflects revisions FDA is making to the April 2006 proposed rule in light of comments received. In addition to other changes discussed in section IV.C of this document, FDA is making the following significant changes to the proposed rule:

- Revisions to Conditional Labeling Exemptions for Medical Gases

FDA is making additional revisions to § 201.161 in response to concerns raised by comments. First, in response to a comment questioning § 201.161(b)'s exclusion of gas mixtures from the scope of the § 201.161(a) conditional labeling exemptions applicable to certain medical gases, FDA is removing this exclusion. Second, in response to comments that oxygen labeling should bear a different warning statement from other medical gases listed at § 201.161, paragraph (a) of § 201.161 now includes new warning statement requirements specific to oxygen. Third, in response to comments that medical air labeling should bear a different warning statement from other medical gases listed at § 201.161, FDA has determined that medical air should be removed from the scope of the final rule, for the reasons discussed in section IV.C of this document. Fourth, FDA is also revising the regulation such that the warning statement that must be included on labeling to qualify for the labeling exemption must contain certain specified information, but need not consist of the exact words used in the regulation.

If the labeling on a final use container of a designated medical gas (or medically appropriate mixture of designated medical gases) includes the information required by section 503(b)(4) of the FD&C Act as well as the information required to obtain the conditional labeling exemptions provided at § 201.161(a) as revised by this rule, FDA will consider such labeling to meet the conditions set forth at section 576(a)(3)(A)(ii) of the FD&C Act, and, therefore, to have met the requirements of sections 503(b)(4) and 502(f) of the FD& C Act.

- Proposed Prohibition on Conversion of Cryogenic Containers and High-Pressure Cylinders From Industrial to Medical Use

In § 211.94(e)(1) of the proposed rule, FDA proposed generally prohibiting cryogenic containers and high-pressure cylinders used to hold industrial gases from being converted to medical use to minimize the risk of contamination of medical gases by industrial contaminants or cleaning solvents. As discussed further in section IV.C of this document, FDA agrees with comments stating that such a prohibition would be unnecessarily costly, as these types of contamination incidents appear to be rare and existing regulations regarding cleaning and inspection of drug containers and closures are sufficient to address this issue. Accordingly, FDA is not finalizing this proposed requirement.

III. Legal Authority

Medical gases are generally regulated as prescription drugs under sections 201(g)(1) and 503(b)(1) of the FD&C Act (though oxygen may be dispensed without a prescription for certain uses specified at section 576(b)(2) of the FD&C Act, and are subject to regulation under section 501(a)(2)(B) of the FD&C Act. Sections 575 and 576 of the FD&C Act address the regulation of medical gases and designated medical gases. Under sections 501(a)(2)(B), 502(f), and 701(a) of the FD&C Act, FDA has the authority to create and modify CGMP and labeling regulations to ensure that drugs meet the requirements of the FD&C Act as to safety and have the identity and strength, and meet the quality and purity characteristics, that they purport or are represented to possess, and are labeled with adequate warnings and instructions for use. Medical gas containers, closures, and labeling are integral parts of medical gas drug products and play a critical role in ensuring that these products are safe and have the appropriate identity, strength, quality, and purity. Medical gas mix-ups have caused deaths and serious injuries. These incidents have occurred despite current regulations and guidance addressing the safe handling of medical gases. FDA is therefore invoking the authority granted by sections 701(a), 501(a)(2)(B), 502(f), and 576(a) of the FD&C Act to issue CGMP and labeling regulations designed to facilitate the safe use of medical gases and to ensure that medical gases are labeled with adequate warnings and instructions for use. The specific requirements in these regulations will help to ensure the safety of these products.

IV. Comments on the Proposed Rule and FDA Response

A. Introduction

We describe and respond to comments on the proposed rule in this section. We respond to certain comments on the Preliminary Regulatory Impact Analysis (PRIA) in the Final Regulatory Impact Analysis (see Section VI). For ease of identification, the word ''Comment,'' in parentheses, will appear before the comment's description, and the word ''Response,'' in parentheses, will appear before our response. The number assigned to each comment is purely for organizational purposes and does not signify the comment's value or importance or the order in which it was received. Many of the comments voiced the same or highly similar concerns and made the same or highly similar recommendations; these comments have been consolidated where possible.

B. Description of General Comments and FDA Response

(Comment 1) Many comments contend that FDA's proposal does not reflect the risk-based principles that have historically been enunciated in connection with recent CGMP policy. These comments state that risk-based principles focus regulation on critical areas that are likely to achieve the greatest public health impact. Thus, these comments state that because the impact of FDA's proposed rule is disproportionate to and beyond the scope of any public health risk associated with medical gases, it is inconsistent with the Agency's risk-based approach for CGMP. The comments further contend that the incidents cited in the preamble of the proposed rule do not support the number of requirements proposed, and that a single requirement in the proposed rule—requirement for secure connections on portable containers—would have prevented all but one of the fatalities cited in the preamble.

(Response 1) FDA agrees in part with these comments and has, following reanalysis of expected costs and benefits, declined to adopt certain provisions in the proposed rule and has revised other proposed provisions to more efficiently achieve public health objectives. Many of the requirements in the final rule are consistent with what we understand to be industry practices (Refs. 1–3). We continue to believe that medical gas containers and closures, such as portable cryogenic containers and high-pressure cylinders, are integral parts of the drug product and play a critical role in ensuring that the drug provided to the patient has the appropriate identity, strength, quality, and purity. Accordingly, we believe that this rule, as finalized, is fully consistent with FDA's risk-based approach to CGMP regulation.

(Comment 2) Many comments contend that FDA significantly underestimated the costs to industry imposed by the rule as proposed. These comments estimate these potential costs to be in the range of $855 million to $1.3 billion, as opposed to FDA's estimate of $950,000 to $1.2 million. These comments request that the cost assumptions and conclusions contained in the preamble to the proposed rule be critically reexamined by the Department of Health and Human Services and the Office of Management and Budget (OMB).

(Response 2) We considered these concerns, as appropriate, in preparing the Final Regulatory Impact Analysis (see Section VI).

C. Specific Comments and FDA Response

• Revisions To Labeling Exemptions for Certain Medical Gases (§ 201.161)

FDA proposed adding medical air, oxygen, and nitrogen to the list of gases conditionally exempted by § 201.161(a) from the labeling requirements of § 201.100(b)(2) and (3), and (c)(1). FDA proposed these changes because, based on its years of regulatory experience with these gases, FDA believed that compliance with § 201.100(b)(2) and (3), and (c)(1) would be unnecessary if the warning statement and storage and handling directions required to obtain the conditional § 201.161(a) labeling exemptions were included in the labeling of such gases and the labeling and coloring requirements found in proposed § 211.94(e)(4) were met. FDA also proposed removing cyclopropane and ethylene from § 201.161(a), as these gases are no longer used in medical procedures because they are flammable and pose a risk of explosion or fire.

Comments support these proposed changes to the list of exempted gases. Many comments expressed concern, however, over how these proposed changes would affect the labeling of oxygen and medical air. These concerns are set forth in comments 3 and 4, followed by FDA's response.

(Comment 3) Many comments express significant concerns with FDA's proposal to add oxygen to the list of gases at § 201.161(a) without providing a warning statement specific to oxygen. The warning statement at § 201.161(a)(1) previously provided that the gas may only be used by or under the supervision of a licensed practitioner. These comments argue that requiring this statement for oxygen could eliminate the ability of first responders to administer oxygen without a prescription. These comments also note that the labeling on oxygen containers that has long been in use by the industry, which provides for use without a prescription in certain situations when administered by properly trained personnel, would no longer be acceptable and would need to be changed. These comments state that further changes are needed to address these issues.

(Comment 4) Many comments further note that the warning statement at § 201.161(a) does not include certain warnings currently included on oxygen labels. For instance, widely used oxygen labeling warns that uninterrupted use of high concentrations of oxygen over a long duration without monitoring its effect on oxygen content of arterial blood may be harmful and that oxygen should not be used on patients who have stopped breathing unless used in conjunction with resuscitative equipment.

(Response to Comments 3 and 4) FDA is further revising § 201.161(a)(1) in response to these comments.

Prior to the revisions finalized in this rule, § 201.161(a) provided that if the labeling of the medical gases listed in the rule—carbon dioxide, cyclopropane, ethylene, helium, and nitrous oxide intended for drug use—bore a specified warning statement and any needed directions concerning the conditions for storage and warnings against the inherent dangers in the handling of the specific compressed gas, those gases would be exempt from certain otherwise-applicable labeling requirements concerning the recommended or usual dosage, the drug's route of administration, and adequate directions for use. Section 201.161(b) provided that the exemption in § 201.161(a) did not apply to any mixture of the gases covered by the regulation with oxygen or with each other. In the 2006 proposed rulemaking FDA proposed adding oxygen, medical air, and nitrogen, and removing cyclopropane and ethylene, from the scope of § 201.161, but proposed no other changes to the rule.

As many comments point out, the warning statement previously specified at § 201.161(a)(1) differs significantly from the warning statement that has long been in use on oxygen labeling. FDA agrees with these comments that this oxygen-specific warning statement is more useful and appropriate for oxygen than the general warning statement previously specified at § 201.161(a)(1).

FDA further agrees with these comments that conditioning the § 201.161(a) labeling exemptions on inclusion of a warning statement limiting oxygen to prescription use would be inconsistent with the longstanding use of oxygen without a prescription in certain situations. It would also be inconsistent with new section 576(b)(2)(B) of the FD&C Act which, as discussed in section II.A of this document, provides that, in the case of oxygen provided without a prescription for certain uses specified at section 576(b)(2)(A), the requirements of section 503(b)(4) of the FD&C Act shall be deemed to have been met if the labeling bears a warning that the oxygen can be used for emergency use only and for all of other medical applications a prescription is required.

Therefore, § 201.161(a)(1)(i) of this final rule provides warning statement requirements specific to oxygen, as well as an additional warning statement requirement for oxygen that may be provided for certain uses without a prescription. FDA believes most oxygen containers currently marketed in the United States bear labeling that satisfies these new requirements (Ref. 1).

(Comment 5) Some comments express concerns with FDA's proposal to add medical air to the list of gases at § 201.161(a) without providing a warning statement specific to medical air. These comments point out that widely used medical air labeling indicates that medical air may be used without a prescription by properly trained personnel for breathing support, while for all other uses a prescription is required. These comments note that such labeling would be inconsistent with the warning statement previously specified at § 201.161(a)(1), which provided that the gas may only be used by or under the supervision of a licensed practitioner.

(Response 5) FDA acknowledges the comments that certain non-prescription uses of medical air are medically appropriate, and, accordingly, that the 'prescription only' warning statement at § 201.161(a)(1)(i) as finalized by this rule is not appropriate for medical air. FDA is not finalizing the proposal to add medical air to the list of gases at § 201.161, and the question of what constitutes an appropriate warning statement for medical air remains under consideration by FDA.

(Comment 6) Many comments note that the proposed rule does not address labeling for medical gas mixtures, but rather leaves in place § 201.161(b)'s exclusion of gas mixtures from the scope of the § 201.161(a) conditional labeling exemptions. These comments recommend for the short term that § 201.161(b) remain as currently published but that FDA nonetheless permit these medical gas mixtures to be labeled consistent with industry practice, which utilizes the warning statement previously specified at § 201.161(a)(1).

(Response 6) FDA notes that, as discussed in section II.A of this document, following publication of the proposed rule new section 576(a)(3)(A)(i) was added to the FD&C Act by FDASIA. This new section provides that designated medical gases for which a certification is granted are deemed alone or in combination, as medically appropriate, with one or more other designated medical gases for which certifications have been granted to have in effect an approved application.

Accordingly, FDA is further revising § 201.161(a)(1) in response to these comments. Specifically, FDA has determined that medically appropriate mixtures of the gases listed at § 201.161(a) should be eligible for the conditional labeling exemptions provided by § 201.161(a). Accordingly, in this final rule FDA is removing the § 201.161(b) exclusion and is specifying that the general warning statement requirements applicable to the gases listed at § 201.161(a) (other than oxygen) are also applicable to medically appropriate mixtures of the listed gases (see § 201.161(a)(1)(ii) of this final rule).

(Comment 7) A comment requests that medical xenon be added to the list of exempted gases in § 201.161(a) as it is used clinically as a general anesthetic and as a diagnostic and test agent.

(Response 7) FDA disagrees that medical xenon should be added to the list of gases for which the § 201.161(a) conditional labeling exemptions are available. Xenon is not a designated medical gas and is not otherwise approved for use as a general anesthetic. Certain xenon gas radioisotopes have been approved as diagnostic agents, but these products have approved prescription drug labeling. Accordingly, it would be inappropriate to add xenon gas to the list of gases at § 201.161(a).

(Comment 8) Many comments contend that the content in proposed § 211.94(e)(4) is misplaced by being located in part 211 (21 CFR part 211, CGMP requirements) rather than part 201 (21 CFR part 201, labeling requirements). These comments recommend that any proposed labeling requirements be included in part 201.

(Response 8) FDA largely agrees with these comments and is reorganizing this content in the final rule. Specifically, the labeling content requirements in proposed § 211.94(e)(4) are being finalized under new § 201.328, while requirements that medical gas labels and coloring materials be resistant to wear and, in the case of labels, not susceptible to inadvertent removal, have been retained in § 211.94(e).

• Requirement for 360° Wraparound Label for Portable Cryogenic Medical Gas Containers (§ 201.328(a)(1))

In § 211.94(e)(4) of the proposed rule (renumbered as § 201.328(a)(1) in this final rule), FDA proposed to require portable cryogenic containers to bear 360° wraparound labeling that meets naming, lettering, and placement specifications.

(Comment 9) Many comments expressed concern about the proposed requirement that the word ''Medical'' precede the name of the gas on the wraparound label. These comments state that there is a risk that users would focus on the ''Medical'' designation and ignore the more significant information, *i.e.,* the identity of the gas itself (*e.g.,* oxygen versus nitrogen). Therefore, these comments recommend removing this requirement from the final rule. Some of these comments also state that this naming requirement would be inconsistent with the ''established name'' of the gas, *e.g.,* Oxygen USP or Nitrogen NF (see definition of ''established name'' at section 502(e)(3) of the FD&C Act). As an alternative, one comment proposes that the rule refer to the product name and provide that either the word ''Medical'' may precede, or ''USP'' or ''NF'' may follow, the product name.

(Response 9) FDA proposed adding the word ''Medical'' to the wraparound label to distinguish containers labeled with medical gases from containers holding industrial gases. This proposed requirement was intended to make the contents of the containers more readily and accurately identified by persons responsible for handling and connecting them to medical gas supply systems in hospitals or other health care facilities and thereby reduce the likelihood of medical gas mix-ups. However, FDA agrees with the comments that inclusion of the word ''Medical'' in the name of the gas would be inconsistent with the established names of medical gases.

Accordingly, as set forth in § 201.328(a)(2), FDA will instead require that the portable cryogenic containers bear a label (either the wraparound label or a separate label) near the top of the container but below the top seam weld that includes the phrase ''For Medical Use,'' ''Medical Gas,'' or some similar phrase that indicates the gas is for medical use in conspicuous lettering.

FDA has also reconsidered the proposed requirement that gases be identified on the wraparound label by their ''standard names.'' Section 502(e) of the FD&C Act provides that a drug product is misbranded unless its label bears the established name of the drug, if there is such a name. All of the gases listed at § 201.328(c) have established names. Thus, the proposed requirement regarding ''standard names'' is not necessary, and we are removing this concept from the final rule.

(Comment 10) A few of the parties providing comments state that while they agree with the proposed requirement at § 211.94(e)(4)(i)(E) that the label be placed ''as close to the top of the container as possible but below the top weld seam'', they object to the following phrase: ''. . . so that it cannot be easily detached or worn'' (§ 211.94(e)(4)(i)(F)). These comments express concern that if the label is worn or detached by the user, for whatever reason, the manufacturer may be considered to be not in compliance with the proposed rule requirements, when in fact the firm may have properly placed the label.

(Response 10) FDA agrees that this proposed requirement should be revised. The key issue is that the wraparound label be affixed such that it is not susceptible to wear or to being inadvertently removed during normal use, and FDA is revising this requirement accordingly (see § 211.94(e)(2) of this final rule).

(Comment 11) Many comments note that the minimum lettering height requirement for the name of the gas on the wraparound label in the proposed rule (2¾ inches) is inconsistent with the industry practice (minimum letter height of 2 inches). According to these comments, requiring 2¾ inch letters will reduce the number of times the name can be fully printed on the label, and will come at a considerable expense to those suppliers that currently comply with the 2-inch industry practice.

(Response 11) FDA is revising the minimum letter height requirement in consideration of these comments. The final rule states that the lettering height for the name of the gas on the label must be at least 2 inches high (see § 201.328(a)(1)(ii) of this final rule).

• Color Requirements for Medical Gas Cylinders (§ 201.328(a)(1)(v) and (b))

(Comment 12) Many comments support color-coding high-pressure cylinders, but are concerned that FDA may be placing undue emphasis on this means of identification. These comments contend that health care personnel should primarily rely on the label to identify the gas or gases in a container, and argue that reliance on color is problematic because of the variability of lighting conditions, color fading, and potential personnel colorblindness. Other comments state that reliance on color coding would appear to contradict training programs that industry and FDA have implemented to prevent mix-ups, as the consistent and fundamental themes of these training programs has been to emphasize that the label should be the primary indicator of a container's contents.

(Response 12) FDA agrees that the wording on the label should be used as the primary means of identifying a drug product. Requiring color coding of high-pressure cylinders, which we understand is already industry practice (Ref. 2), simply provides an additional safeguard to facilitate accurate identification of the drug product and detection of potential errors. Additionally, § 211.25 addresses the need to train qualified personnel in the manufacture, processing, packing, or holding of a drug product. Proper training should help mitigate against the possibility that users might improperly rely solely on the cylinder's color to identify its contents.

(Comment 13) Many comments recommend removing the requirement of ''colored in whole'' for non-aluminum high-pressure cylinders. These comments state that the current industry practice is to paint the shoulder to match the designated color for that medical gas. This is based on manufacturer recommendations that some non-aluminum high-pressure cylinders should not be painted in whole due to concerns about concealing defects.

(Response 13) FDA agrees with these comments. Thus, the final rule requires only that high-pressure medical gas cylinders be colored on the shoulder portion of the cylinder (see § 201.328(b)), which is consistent with what FDA understands to be industry practice (Ref. 2).

(Comment 14) Many comments dispute FDA's assumption that a large majority of high-pressure medical gas cylinders are already in compliance with the proposed coloring requirements. These comments note that portions of the shoulders of many cylinders are painted white to make retest information more visible, and that the upper neck portion of many cylinders are not painted a color based on the contents of the cylinder.

(Response 14) The cylinder coloring requirement in the final rule (see § 201.328(b)) would not require recoloring of cylinders colored in the manner described in the comments. As long as the cylinder shoulder is colored in the FDA-designated color or colors, the upper neck portion of the cylinder need not be that same color and use of white to make retesting information on a portion of the shoulder of the cylinder more visible is acceptable.

(Comment 15) Many comments recommend removal of the requirement that high-pressure medical gas cylinders containing mixtures of gases be painted in rough proportion to the fractions of gases contained in the mixture. These comments express concern that this method may cause the end user to ignore the label and rely on color proportions to identify the contents of a mixture. Additionally, these comments recommend that the following language be incorporated in the regulation: ''when color marking consists of 2 or more colors, the pattern shall permit a portion of the colors to be seen together when viewed from the top,'' which is consistent with industry practice.

(Response 15) FDA agrees with these comments. Therefore, FDA is revising the rule to require that the color for every constituent gas be visible when the cylinder is viewed from the top, and to remove the proportionality requirement.

(Comment 16) Many comments recommend removing the proposed requirement (at § 211.94(e)(4)(i)(G) in the proposed rule) that if the shoulder portion of a portable cryogenic medical gas container is colored, the color used must be the FDA-designated color of the gas held in the container. These comments point out that painting cryogenic containers with dark colors causes increased heat absorption, accelerating the rate of product venting, which could lead to unsafe conditions. These comments also note that large cryogenic containers made from carbon steel are painted in whole (including on the shoulder) in a light-reflective color, which would not necessarily correspond to the FDA-designated color or colors of the gas or gases held in the container.

(Response 16) FDA agrees with these concerns and is revising the proposed coloring requirement for portable cryogenic medical gas containers. As set forth in § 201.328(a)(1)(v) of the final rule, a portable cryogenic medical gas container may only be colored, in whole or in part, in the color or colors designated at § 201.328(c) if the gas or gases held in the container correspond to that color or those colors. The container may still be colored in a light-reflective color such as white (or some other color that is not an FDA-designated gas color), or simply not colored at all.

Finally, FDA is revising color requirements for the wraparound label such that they only apply to portable cryogenic medical gas containers that hold a single gas (see § 201.328(a)(1)(i) of this final rule). FDA believes that multiple colors on a single wraparound label—either in the lettering or in the background—may be impractical. Firms may still choose to follow the color scheme at § 201.328(a)(1)(i) for portable cryogenic medical gas containers that hold gas mixtures or blends, but will not be required to do so.

• Proposed Prohibition on Conversion of Cryogenic Containers and High-Pressure Cylinders From Industrial to Medical Use (Proposed § 211.94(e)(1))

In § 211.94(e)(1) of the proposed rule, FDA proposed prohibiting cryogenic containers and high-pressure cylinders used to hold industrial gases from being converted to medical use, subject to limited exceptions.

(Comment 17) Many comments oppose any requirements to dedicate high-pressure cylinders and cryogenic containers to solely one use—industrial or medical. These comments contend that the root cause of the contamination incidents involving high-pressure cylinders discussed in the preamble to the proposed rule was the improper cleaning of cylinders, regardless of whether the cylinders previously held gases intended for medical or industrial use. These comments argue that the costs that would be associated with implementing this rule are not justified considering that the preamble to the proposed rule identified only two contamination incidents leading to injuries. According to these comments, these costs would include procuring additional containers (and associated assets), tracking individual containers over their useful life, marking containers for industrial or medical use, and increased distribution expenses. These comments further argue that FDA significantly underestimated the costs associated with this requirement in the economic analysis provided in the preamble to the proposed rule.

Many comments state that the proposed prohibition on conversion of medical gas containers from industrial to medical use is unwarranted because existing CGMP requirements, particularly § 211.94(c) (requiring cleaning of containers and closures to assure they are suitable for their intended use) and § 211.100(a) (requiring written procedures for process and production control designed to assure drug products have the identity, strength, quality, and purity they purport or are represented to possess), are adequate to prevent contamination associated with such conversion. These comments further argue that the proposed rule is inconsistent with FDA's past advice that medical gas assets can be converted from industrial to medical use and need not be dedicated to industrial use provided the items in question undergo validated cleaning procedures when converted to medical use.

(Response 17) FDA has reevaluated this proposed requirement in light of these concerns. FDA has determined that the risk of contamination associated with converting gas containers from industrial to medical use is relatively low, and can be fully addressed if the manufacturer, in compliance with §§ 211.84(a), 211.94(c), 211.100, and other applicable CGMP regulations, employs adequate, validated cleaning and production control strategies when performing such conversion. FDA also agrees with the comments that the proposed requirement to dedicate containers to either industrial or medical use would be quite expensive to implement, and, in light of our assessment that existing regulations are adequate to address this concern, not cost-justified. Accordingly, we are removing this requirement from the final rule.

(Comment 18) One comment states that the incidents dated March 20, 1998, and March 27, 1996, attributed in the proposed rule to contamination likely associated with conversion of high-pressure cylinders from industrial to medical use, could have been ignition events involving polytetraethylene seals or sealing tape. The comment suggests that a more detailed description of these events should be provided in order to make clear that the odors and compounds detected were from improper cleaning and not from ignition events.

(Response 18) As stated, FDA has reevaluated the necessity of the proposed non-conversion requirement and is removing it from the final rule.

• Requirement for Secure Gas-Specific Use Outlet Connections on Portable Cryogenic Medical Gas Containers (§ 211.94(e)(1))

In § 211.94(e)(3) of the proposed rule, FDA proposed to require that portable cryogenic medical gas containers not manufactured with permanent gas use outlet connections have gas-specific use outlet connections that cannot be readily removed or replaced except by the manufacturer. FDA is finalizing this provision (renumbered as § 211.94(e)(1)) with certain minor modifications explained in this document.

(Comment 19) Many comments support this requirement, as it would have a positive impact on patient safety by making medical gas mix-ups less likely. In fact, these comments recommend that the rule be extended to other outlets typically found on portable cryogenic medical gas containers, namely, the vent outlet and liquid fill/withdrawal outlet.

(Response 19) FDA is not aware of mix-up incidents involving the vent outlet valves or with liquid fill/withdrawal outlets, and such hypothetical mix-ups do not seem likely, given that the gas use outlet connection should be the only connection used to connect a portable cryogenic container to a health care facility's gas supply system. Accordingly, FDA believes that it is not necessary to extend the secure gas-specific use outlet connection requirement to vent outlets or liquid fill/withdrawal outlets.

(Comment 20) Some comments propose that the Agency slightly modify the exemption for ''small cryogenic gas containers for use by individual patients'' from the proposed definition of ''portable cryogenic medical gas containers.'' These comments note that some liquid oxygen home units designed for use by individual patients are, in fact, also used in certain situations to fill other containers for use by patients. These comments are concerned that if the exemption is not clarified, these liquid oxygen home units may be subject to the secure gas use outlet connection rule if they are used to fill other containers. Accordingly, these comments propose that the exemption be revised to include ''small cryogenic gas containers *designed* for use by individual patients *at their residence, including health care facilities*'' (emphasis added).

(Comment 21) Many comments propose that FDA clarify in the rule that the requirement for secure gas-specific use outlet connections is inapplicable to cryogenic containers that are too large (*e.g.,* tank trucks, trailers, rail cars) to be connected to a medical gas supply system.

(Response to Comments 20 and 21) FDA agrees that the definition of ''portable cryogenic medical gas container'' as used in the rule should be clarified. As such, we are clarifying in the final rule that cryogenic gas containers not designed to be connected to a medical gas supply system, including tank trucks, trailers, rail cars, and liquid oxygen home units, are exempt from the secure gas-specific use outlet connection requirement.

(Comment 22) A comment recommends that base units used to fill portable containers for use by patients in hospitals and other health care facilities, and large cryogenic containers that may be placed on trailers along with vaporizers and that are used as emergency backup when repairs are performed on the health care facility's permanent storage system, also be excluded from the rule. The comment states that because these base units and containers remain within the control of the medical gas manufacturer, and not the consumer, the risk of an improper connection is substantially reduced.

(Response 22) FDA does not agree that base units used to fill portable containers for use by patients in hospitals and other health care facilities and large cryogenic containers that may be placed on trailers along with vaporizers and that are used as emergency backup when repairs are performed on the health care facility's permanent storage system should be excluded from the rule. We believe that requiring such containers (which are designed to be connected to a medical gas supply system) to have secure gas-specific use outlet connections will help minimize the likelihood that an incorrect gas is connected to a gas distribution system or container.

(Comment 23) Many comments express concern with the discussion of records maintenance in the proposed rule. The PRIA indicated that there could be a slight increase in the medical gas industry's container closure records maintenance activities under § 211.184 if the industry chooses to use locking valves or devices to bring portable cryogenic containers into compliance with the secure gas-specific use outlet connection requirement. The proposed rule stated that under existing § 211.184(b), records of the results of any test or examination of a container closure under § 211.82(a) must be maintained, and that under existing § 211.184(c), an individual inventory record must be maintained for each container closure. FDA estimated that about 10 percent of the existing inventory of portable cryogenic containers would need to be modified to comply with the secure gas-specific use outlet connection requirement, that the industry would choose to comply through use of locking valves or devices (rather than silver brazing, which is more expensive), and that the records maintenance activities associated with this work would amount to about 2 minutes per locking device per year, resulting in an annualized records maintenance cost of about $54,000 dollars per year. The estimate of 2 minutes per locking device per year includes time associated with the initial inspection of the locking valve or device by the manufacturer (71 FR 18039 at 18048–18049).

The comments express concern that the proposed rule's reference to § 211.184(c) in particular entails a change of policy from FDA's historic application of records maintenance regulations to the medical gas industry and amounts to a new records maintenance expectation for medical gas containers and closures that would cost the industry between $376 and $665 million dollars to meet. The comments appear to reach this much higher number by assuming that it would be necessary to serialize valves and/or permanently mark all valves and connections on portable cryogenic containers to meet what they contend are FDA's new records maintenance expectations.

(Response 23) FDA does not believe that serializing or permanently marking all valves and connections on portable cryogenic containers is necessary to satisfy the requirements of § 211.184. FDA did not intend to announce new or heightened records maintenance expectations for medical gas container closures in the proposed rule. While FDA believes that the records maintenance activities used to arrive at the estimate in the PRIA section for the records maintenance costs associated with the secure gas-specific use outlet connection requirement are appropriate, medical gas manufacturers may employ alternative records maintenance procedures to document any work performed to bring container closures into compliance with the secure gas-specific use outlet connection requirement.

As discussed in the Final Regulatory Impact Analysis (see Section VI), the estimated records maintenance costs associated with the secure gas use outlet connections requirements have been revised to range between $70 and $3,500. This reduction in estimated costs is largely driven by updated information showing that the number of portable cryogenic containers in the market is much lower than was thought at the time the proposed rule was issued.

• Miscellaneous Comment

(Comment 24) A comment requests that the final rule include a requirement that all personnel handling medical gases have documented competency training. This comment states that medical gases are USP listed and should be delivered by qualified personnel, such as respiratory therapists (who, according to this comment, are the only health care professionals specifically educated and competency-tested in all aspects of oxygen therapy).

(Response 24) In § 211.25 individuals engaged in the manufacture, processing, packing, or holding of a drug product (which would include a medical gas manufacturer's delivery personnel) are required to have the education, training, and experience necessary to perform assigned functions. Further, we are not aware that actual administration of medical gases to patients is part of the function of medical gas delivery personnel, so it is not clear why such personnel would need to be trained to administer gases to patients. We believe the existing regulation (§ 211.25) is sufficient to address any issues that may arise regarding the qualifications of a medical gas manufacturer's delivery personnel.

V. Compliance Date

This rule is effective January 17, 2017. Affected firms and persons are encouraged to comply as soon as possible after the effective date. We recognize, however, that while most of the requirements of this final rule are already industry practices (Refs. 1–3), such practices are not ubiquitous. Accordingly, the compliance date is May 17, 2017. We believe it would be reasonable for affected firms and persons to fully implement this final rule in that amount of time.

(Comment 25) FDA received several comments that the 60-day time period proposed for implementation of the proposed rule is insufficient. These comments state that the proposal will impact every portable cryogenic container and request that FDA provide a reasonable transition period consistent with FDA precedents.

(Response 25) FDA agrees, and is establishing a compliance date that is 180 days after publication of the final rule in the **Federal Register**, as noted previously. The Agency believes that it would be reasonable for affected firms and persons to fully implement the final rule in this amount of time. Furthermore, to avoid any contradiction with this compliance date, and for purposes of clarity, FDA is removing paragraph (c) of § 201.161, which states that regulatory action may be initiated with respect to any article shipped within the jurisdiction of the FD&C Act contrary to the provisions of this section after 60 days following publication of this section in the **Federal Register**.

VI. Economic Analysis of Impacts

A. Introduction

We have examined the impacts of the final rule under Executive Order 12866, Executive Order 13563, the Regulatory Flexibility Act (5 U.S.C. 601–612), and the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4). Executive Orders 12866 and 13563 direct us to assess all costs and benefits of available regulatory alternatives and, when regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety, and other advantages; distributive impacts; and equity). We believe that this final rule is not a significant regulatory action as defined by Executive Order 12866.

The Regulatory Flexibility Act requires us to analyze regulatory options that would minimize any significant impact of a rule on small entities. Because the final rule imposes new burdens on small entities, we cannot certify that the final rule will not have a significant economic impact on a substantial number of small entities.

The Unfunded Mandates Reform Act of 1995 (section 202(a)) requires us to prepare a written statement, which includes an assessment of anticipated costs and benefits, before issuing "any rule that includes any Federal mandate that may result in the expenditure by State, local, and tribal governments, in the aggregate, or by the private sector, of $100,000,000 or more (adjusted annually for inflation) in any 1 year." The current threshold after adjustment for inflation is $146 million, using the most current (2015) Implicit Price Deflator for the Gross Domestic Product. FDA does not expect this final rule to result in an expenditure in any year that meets or exceeds this amount.

B. Summary of Costs and Benefits

This final rule amends the CGMP and labeling regulations for medical gases. These amendments include the following: (1) Portable cryogenic medical gas containers not manufactured with permanent gas use outlet connections must have gas-specific use outlet connections that cannot be readily removed or replaced except by the manufacturer; (2) portable cryogenic medical gas containers must have a 360° wraparound label that clearly identifies the container's contents and conforms to certain placement, lettering, and other requirements; (3) high-pressure medical gas cylinders (and portable cryogenic medical gas containers, if colored) must be colored using an FDA-designated standard color (or colors in the case of gas mixtures); (4) the list of medical gases that are conditionally exempt from certain otherwise-applicable labeling requirements has been revised; and (5) the warning statements required to be on final use containers to qualify for the conditional exemption from certain otherwise-applicable labeling requirements have been modified for oxygen and medical air.

The rule is expected to provide a modest net social benefit (estimated benefits minus estimated costs) to society. Costs are attributed to coloring medical gas containers, complying with the 360° wraparound label requirement for portable cryogenic containers, and requiring gas-specific use outlet connections on portable cryogenic containers to be permanently attached to the valve body (*e.g.,* by silver brazing) or attached to the valve body using a locking mechanism or other appropriate device so that only the manufacturer can readily remove or replace them. Using a standard 10 year time period, we estimate annualized costs to range between $0.18 million to $1.5 million using a 3 percent discount rate and $0.21 million to $1.8 million using a 7 percent discount rate. Benefits are attributed to reducing the probability that medical personnel accidentally administer the wrong gas to patients, resulting in serious injury or death. We estimate annualized benefits to approximately range between $0.8 million to $2.8 million using a 3 percent discount rate, and $2.5 million to $8.3 million using a 7 percent discount rate. Together we estimate annualized net benefits to range between $0.62 million to $1.3 million using a 3 percent discount rate, and $2.3 million to $6.5 million using a 7 percent discount rate.

FDA also examined the economic implications of the rule as required by the Regulatory Flexibility Act. If a rule will have a significant economic impact on a substantial number of small entities, the Regulatory Flexibility Act requires us to analyze regulatory options that would lessen the economic effect of the rule on small entities. The rule imposes new costs to small entities. We estimate the rule's one-time costs to roughly range between 0.0001 percent and 0.13 percent of average annual revenues.

The full analysis of economic impacts is available in the docket for this final rule (Ref. 4) and at *http://www.fda.gov/AboutFDA/ReportsManualsForms/Reports/EconomicAnalyses/default.htm.*

VII. Analysis of Environmental Impact

We have determined under 21 CFR 25.30(j) and (k) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

VIII. Paperwork Reduction Act of 1995

This final rule contains information collection requirements that are subject to review by the OMB under the Paperwork Reduction Act of 1995 (the PRA) (44 U.S.C. 3501–3520). The title, description, and respondent description of the information collection provisions are shown in this section with an estimate of the third-party disclosure and recordkeeping burdens. Included in the estimate is the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing each collection of information.

Title: Medical Gas Containers and Closures; Current Good Manufacturing Practice Requirements.

Description: The final rule revises FDA's labeling and CGMP regulations to include new requirements for the label, color, and design of medical gas containers and closures. These requirements are intended to make the contents of medical gas containers more readily identifiable and to reduce the likelihood that the wrong gas will be connected to a medical gas supply system.

Description of Respondents: Persons and businesses, including small businesses and manufacturers, involved in the processing, manufacturing, transportation, handling, and administration of designated medical gases. FDA's database of establishments that manufacture medical gases includes about 2,500 such establishments.

We estimate the burden for the collection of information as follows:

Third-party disclosure: Table 1 shows the estimated one-time third-party disclosure burden. Upon implementation of the requirements under the final rule, we expect respondents will have realized the associated burden. In our subsequent PRA evaluation conducted in connection with requesting a renewal of OMB's approval of the information collection associated with this rule (assuming that initial approval occurs), we will adjust our estimate accordingly.

TABLE 1—ESTIMATED ONE-TIME THIRD-PARTY DISCLOSURE BURDEN [1]

21 CFR sections	Number of respondents	Number of disclosures per respondent	Total disclosures	Average burden per disclosure	Total hours
201.328(a)(1) and (2) and 211.94(e)(2) Portable Cryogenic Medical Gas Container Labels and Colors.	2,500	14	35,000	0.10 (6 minutes)	3,500
201.328(b) and 211.94(e)(2) High-Pressure Medical Gas Cylinder Colors.	2,500	984	2,460,000	0.10 (6 minutes)	246,000
Total	2,500	998	2,495,000	0.10 (6 minutes)	249,500

[1] There are no capital costs or operating and maintenance costs associated with this collection of information.

A gas listed at § 201.161(a) is exempt from certain labeling requirements if its labeling bears, among other things, a warning statement that conforms to § 201.161(a)(1). Section 201.161(a)(1)(i) specifies the content to be included in a warning statement for oxygen and § 201.161(a)(1)(ii) specifies the content to be included in a warning statement for nitrogen, carbon dioxide, helium, nitrous oxide, and any medically appropriate combinations of any of the gases listed in § 201.161(a). FDA believes most medical gases are already labeled in a manner that complies with § 201.161(a) as finalized. Furthermore, because § 201.161(a) provides the warning statement content to be included in medical gas labeling, the inclusion of these warning statements on medical gas labeling is not considered a ''collection of information'' subject to review under the PRA. See 5 CFR 1320.3(c)(2) (providing that ''the public disclosure of information originally supplied by the Federal government to the recipient for the purpose of disclosure to the public is not included'' within the definition of ''collection of information'').

Under § 201.328(a)(1), each portable cryogenic medical gas container must be conspicuously marked with a 360° wraparound label identifying its contents. The identity of the medical gas held in the container must be printed on the label in one of the following ways: Using lettering that appears in the standard color designated for the gas in § 201.328(c) and that is printed against a white background, or using lettering that appears in white against a background that is painted in the standard color for the gas as designated in § 201.328(c). The lettering for the name of the gas on the label must be at least 2 inches high; the name of the gas must be printed continuously around the label and be capable of being read around the entire container; the label must be on the sidewall of the container, as close to the top of the container as possible but below the top weld seam; and, if the shoulder portion of a portable cryogenic gas container is colored, the color used must be the standard color or colors designated in § 201.328(c) for the gas or gases held within the container.

Under § 201.328(a)(2), the 360° wraparound label required in § 201.328(a)(1), or a separate label, must include in conspicuous lettering the phrase ''For Medical Use,'' ''Medical Gas,'' or some similar phrase that indicates the gas is for medical use. Finally, under § 211.94(e)(2), the wraparound label must be affixed to the container in a manner that does not interfere with other labeling and such that it is not susceptible to becoming worn or inadvertently detached during normal use, and the wraparound label must be reasonably resistant to fading, durable when exposed to atmospheric conditions, and not readily soluble in water.

We estimate that there are approximately 35,000 portable cryogenic containers in medical gas service that are subject to the labeling requirements at § 201.328(a). As discussed in the Economic Analysis of Impacts, FDA conservatively estimates that all manufacturers will choose to comply with § 201.328(a) by removing any existing wraparound labels from all portable cryogenic containers and replacing them with wraparound labels that meet all of the requirements at § 201.328(a). Thus, on average, each manufacturer would need to add labels to (or re-label) approximately 14 containers (35,000 ÷ 2,500). FDA estimates that approximately 6 minutes would be required to remove any existing wraparound label and attach a new wraparound label to each container. Thus, the total burden third-party disclosure burden hours associated with § 201.328(a)(1) and (2) is approximately 3,500 hours (2,500 × 14 × 0.10 hours).

Section 201.328(a)(1)(v) also provides that a portable cryogenic cylinder may only be colored in the color or colors designated in § 201.328(c) if the gas or gases held within the container correspond to that color or those colors. Alternatively, the container may be colored in a light-reflective color such as white (or some other color which is not an FDA-designated gas color), or simply not colored at all. Based on discussions with subject matter experts, we believe that few to no cryogenic containers will require recoloring as a result of this requirement, and therefore we estimate no third-party disclosure burden associated with this requirement.

Under § 201.328(b), high-pressure medical gas cylinders must be colored on the shoulder with the colors designated in § 201.328(c) for the gas contained in the cylinder, and such colors must be visible when viewed from the top of the cylinder. Under § 211.94(e)(2), the materials used for coloring medical gas containers must be reasonably resistant to fading, durable when exposed to atmospheric conditions, and not readily soluble in water. Based on information contained in the Economic Analysis of Impacts (see Section VI), we estimate that as many as 10 percent of the estimated 24.6 million high-pressure cylinders in medical service will require coloring or recoloring to comply with § 201.328(b). Thus, on average, each manufacturer would need to color 984 containers (2.46 million ÷ 2,500). We conservatively estimate that it will take an average of 6 minutes to color a cylinder. Thus, the total third-party disclosure burden hours associated with § 201.328(b) is approximately 246,000 hours (2,500 × 984 × 0.10 hours).

Recordkeeping: Table 2 shows the estimated annual recordkeeping burden associated with the information collection.

TABLE 2—ESTIMATED ANNUAL RECORDKEEPING BURDEN [1]

21 CFR Section	Number of recordkeepers	Number of records per recordkeeper	Total annual records	Average burden per recordkeeping	Total hours
211.184 and 211.94(e)(1) Records Maintenance of Secure Gas Use Outlet Connection Requirement	2,500	0.7	1,750	0.033 (2 minutes)	58

[1] There are no capital costs or operating and maintenance costs associated with this collection of information.

Section 211.94(e)(1) requires that portable cryogenic medical gas containers that are not manufactured with permanent gas use outlet connections must have gas-specific use outlet connections that are attached to the valve body so that they cannot be readily removed or replaced except by the manufacturer. A small portion of the existing inventory of portable cryogenic containers would need to be modified to comply with this requirement, and manufacturers must maintain records in accordance with § 211.184 for drug product containers. As discussed in the Economic Analysis of Impacts (see Section VI), FDA conservatively estimates that manufacturers will need to secure the gas use outlets of as many as 1,750 portable cryogenic containers to bring them into compliance with the final rule. As a result each manufacturer would incur annual recordkeeping under § 211.184 incident to bringing, on average, 0.7 containers into compliance with the secure gas use outlet connection requirement (1,750 ÷ 2,500). Consistent with our estimate in the proposed rule, this should require an average of 2 minutes (0.033 hours) per container. This results in an annual burden of 58 hours (2,500 × 0.7 × 0.033 hours) for 1,750 records.

The information collection provisions of this final rule have been submitted to OMB for review, as required by section 3507(d) of the PRA. Before the effective date of this final rule, FDA will publish a notice in the **Federal Register** announcing OMB's decision to approve, modify, or disapprove the information collection provisions in this final rule. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

IX. Federalism

We have analyzed this final rule in accordance with the principles set forth in Executive Order 13132. FDA has determined that the rule does not contain policies that have substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. Accordingly, we conclude that the rule does not contain policies that have federalism implications as defined in the Executive order and, consequently, a federalism summary impact statement is not required.

List of Subjects

21 CFR Part 201

Drugs, Labeling, Reporting and recordkeeping requirements.

21 CFR Part 211

Drugs, Labeling, Laboratories, Packaging and containers, Prescription drugs, Reporting and recordkeeping requirements, Warehouses.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, 21 CFR parts 201 and 211 are amended as follows:

PART 201—LABELING

■ 1. The authority citation for part 201 continues to read as follows:

Authority: 21 U.S.C. 321, 331, 351, 352, 353, 355, 358, 360, 360b, 360gg–360ss, 371, 374, 379e; 42 U.S.C. 216, 241, 262, 264.

■ 2. Revise § 201.161 to read as follows:

§ 201.161 Medical gases.

(a) Oxygen, nitrogen, carbon dioxide, helium, and nitrous oxide gases intended for drug use, and medically appropriate combinations of any of these gases intended for drug use, are exempted from the requirements of § 201.100(b)(2) and (3), and (c)(1), provided that, where applicable, the requirements of §§ 201.328 and 211.94(e)(2) of this chapter are met and the labeling bears, in addition to any other information required by the Federal Food, Drug, and Cosmetic Act, the following:

(1)(i) In the case of oxygen, a warning statement providing that uninterrupted use of high concentrations of oxygen over a long duration, without monitoring its effect on oxygen content of arterial blood, may be harmful; that oxygen should not be used on patients who have stopped breathing unless used in conjunction with resuscitative equipment; and, in the case of oxygen that may be provided without a prescription for use in the event of depressurization or other environmental oxygen deficiency, or for oxygen deficiency or for use in emergency resuscitation when administered by properly trained personnel, a warning statement providing that oxygen may be used for emergency use only when administered by properly trained personnel for oxygen deficiency and resuscitation, and that for all other medical applications a prescription is required.

(ii) In the case of nitrogen, carbon dioxide, helium, nitrous oxide, and medically appropriate combinations of any of the gases listed in paragraph (a) of this section, a warning statement providing that the administration of the gas or gas combination (as applicable) may be hazardous or contraindicated; and that the gas or gas combination (as applicable) should be used only by or under the supervision of a licensed practitioner who is experienced in the use and administration of the gas or gas combination (as applicable) and is familiar with the indications, effects, dosages, methods, and frequency and duration of administration, and with the hazards, contraindications, and side effects and the precautions to be taken.

(2) Any needed directions concerning the conditions for storage and warnings against the inherent dangers in the handling of the specific compressed gas.

(b) [Reserved]

■ 3. Add new § 201.328 to read as follows:

§ 201.328 Labeling of medical gas containers.

(a) *Portable cryogenic medical gas containers.* For the purposes of this section a ''portable cryogenic medical gas container'' is one that is capable of being transported and is intended to be attached to a medical gas supply system within a hospital, health care entity, nursing home, other facility, or home health care setting, or is a base unit used to fill small cryogenic gas containers for use by individual patients. The term does not include cryogenic containers that are not designed to be connected to a medical gas supply system, *e.g.,* tank trucks, trailers, rail cars, or small cryogenic gas containers for use by individual patients (including portable liquid oxygen units as defined at § 868.5655 of this chapter).

(1) Each portable cryogenic medical gas container must be conspicuously marked with a 360° wraparound label identifying its contents. Such label must meet the requirements of § 211.94(e)(2) of this chapter and the following additional requirements.

(i) If the container holds a single gas, the name of the gas held in the container must be printed on the label in one of the following ways:

(A) Using lettering that appears in the color designated for the gas in paragraph (c) of this section and that is printed against a white background, or

(B) Using lettering that appears in white against a background that is painted in the color for the gas designated in paragraph (c) of this section.

(ii) The lettering for the name of the gas on the label must be at least 2 inches high.

(iii) The name of the gas must be printed continuously around the label and be capable of being read around the entire container.

(iv) The label must be on the sidewall of the container, as close to the top of the container as possible but below the top weld seam.

(v) A portable cryogenic medical gas container may only be colored in the color or colors designated in paragraph (c) of this section if the gas or gases held within the container correspond to that color or those colors.

(2) A label on the container (either the 360° wraparound label required in paragraph (a)(1) of this section or a separate label) must include, in conspicuous lettering, the phrase ''For Medical Use'', ''Medical Gas,'' or some similar phrase that indicates the gas is for medical use.

(b) *High-pressure medical gas cylinders.* Each high-pressure medical gas cylinder must be colored on the shoulder portion of the cylinder in the color or colors designated in paragraph (c) of this section. The color or colors must be visible when viewed from the top of cylinder.

(c) *Medical gas colors.* The colors required to identify medical gases under paragraph (a) and (b) of this section are:

Medical gas	Color
Medical Air	Yellow.
Carbon Dioxide	Gray.
Helium	Brown.
Nitrogen	Black.
Nitrous Oxide	Blue.
Oxygen	Green.
Mixture or Blend	Colors corresponding to each component gas.

PART 211—CURRENT GOOD MANUFACTURING PRACTICE FOR FINISHED PHARMACEUTICALS

■ 4. The authority citation for part 211 continues to read as follows:

Authority: 21 U.S.C. 321, 351, 352, 355, 360b, 371, 374; 42 U.S.C. 216, 262, 263a, 264.

■ 5. Amend § 211.94 by adding new paragraph (e) to read as follows:

§ 211.94 Drug product containers and closures.

* * * * *

(e) *Medical gas containers and closures must meet the following requirements*—(1) *Gas-specific use outlet connections.* Portable cryogenic medical gas containers that are not manufactured with permanent gas use outlet connections (*e.g.,* those that have been silver-brazed) must have gas-specific use outlet connections that are attached to the valve body so that they cannot be readily removed or replaced (without making the valve inoperable and preventing the containers' use) except by the manufacturer. For the purposes of this paragraph, the term ''manufacturer'' includes any individual or firm that fills high-pressure medical gas cylinders or cryogenic medical gas containers. For the purposes of this section, a ''portable cryogenic medical gas container'' is one that is capable of being transported and is intended to be attached to a medical gas supply system within a hospital, health care entity, nursing home, other facility, or home health care setting, or is a base unit used to fill small cryogenic gas containers for use by individual patients. The term does not include cryogenic containers that are not designed to be connected to a medical gas supply system, *e.g.,* tank trucks, trailers, rail cars, or small cryogenic gas containers for use by individual patients (including portable liquid oxygen units as defined at § 868.5655 of this chapter).

(2) *Label and coloring requirements.* The labeling specified at § 201.328(a) of this chapter must be affixed to the container in a manner that does not interfere with other labeling and such that it is not susceptible to becoming worn or inadvertently detached during normal use. Each such label as well as materials used for coloring medical gas containers must be reasonably resistant to fading, durable when exposed to atmospheric conditions, and not readily soluble in water.

■ 6. Amend § 211.125 by adding a sentence to the end of paragraph (c) to read as follows:

§ 211.125 Labeling issuance.

* * * * *

(c) * * * Labeling reconciliation is also waived for 360° wraparound labels on portable cryogenic medical gas containers.

* * * * *

Dated: November 15, 2016.

Leslie Kux,

Associate Commissioner for Policy.

Medicare Program; Revisions to Payment Policies Under the Physician Fee Schedule and Other Revisions to Part B for CY 2017; Medicare Advantage Bid Pricing Data Release; Medicare Advantage and Part D Medical Loss Ratio Data Release; Medicare Advantage Provider Network Requirements; Expansion of Medicare Diabetes Prevention Program Model; Medicare Shared Savings Program Requirements

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Final rule; correction.

SUMMARY: This document corrects technical errors in the final rule that was placed on public inspection at the Office of the Federal Register on November 2, 2016 and scheduled for publication in the **Federal Register** on November 15, 2016. That rule is entitled, ''Medicare Program; Revisions to Payment Policies under the Physician Fee Schedule and Other Revisions to Part B for CY 2017; Medicare Advantage Bid Pricing Data Release; Medicare Advantage and Part D Medical Loss Ratio Data Release; Medicare Advantage Provider Network Requirements; Expansion of Medicare Diabetes Prevention Program Model; Medicare Shared Savings Program Requirements.''

DATES: This correcting document is effective January 1, 2017.

FOR FURTHER INFORMATION CONTACT: Terri Plumb, (410) 786–4481, Gaysha Brooks, (410) 786–9649, or Annette Brewer (410) 786–6580.

SUPPLEMENTARY INFORMATION:

I. Background

In FR Doc 2016–26668, that was placed on public inspection at the Office of the Federal Register on November 2, 2016 and scheduled for publication in the **Federal Register** on November 15, 2016, there were technical errors that are identified and corrected in this correcting document.

II. Summary of Errors in the Regulations Text

In the CY 2017 PFS final rule, we inadvertently omitted or included language in § 410.79(b), (c)(1)(ii) and (iv), (c)(2)(i) and § 424.59(a)(1) and (5), (b)(4)(i), and (e)(2)(i).

III. Waiver of Proposed Rulemaking and Delay in Effective Date

Under 5 U.S.C. 553(b) of the Administrative Procedure Act (APA), the agency is required to publish a notice of the proposed rule in the **Federal Register** and provide a period for public comment before the provisions of a rule take effect. In addition, section 553(d) of the APA mandates a 30-day delay in effective date after issuance or publication of a rule. Sections 553(b)(B) and 553(d)(3) of the APA provide for exceptions from the APA notice and comment, and delay in effective date requirements. Section 553(b)(B) of the APA authorizes an agency to dispense with normal notice and comment rulemaking procedures for good cause if the agency makes a finding that the notice and comment process is impracticable, unnecessary, or contrary to the public interest; and includes a statement of the finding and the reasons for it in the rule. In addition, section 553(d)(3) of the APA allows the agency to avoid the 30-day delay in effective date where such delay is contrary to the public interest and the agency includes in the rule a statement of the finding and the reasons for it.

In our view, this correcting document does not constitute a rulemaking that would be subject to these requirements. This document merely corrects technical errors in the CY 2017 PFS final rule. The corrections contained in this document are consistent with, and do not make substantive changes to, the policies and payment methodologies that were proposed subject to notice and comment procedures in the CY 2017 PFS final rule. As a result, the correction made through this correcting document is intended to resolve inadvertent errors so that the rule accurately reflects the policies in the final rule.

Even if this were a rulemaking to which the notice and comment and delayed effective date requirements applied, we find that there is good cause to waive such requirements. Undertaking further notice and comment procedures to incorporate the corrections in this document into the CY 2017 PFS final rule or delaying the effective date of the corrections would be contrary to the public interest because it is in the public interest to ensure that the rule accurately reflects the public comment period. Further, such procedures would be unnecessary, because we are not making any substantive revisions to the final rule, but rather, we are simply correcting the **Federal Register** document to reflect the policies in the final rule. For these reasons, we believe there is good cause to waive the requirements for notice and comment and delay in effective date.

IV. Correction of Errors in the Regulations Text

In FR Doc. 16–26668 appearing on page 80170 in the **Federal Register** of Tuesday, November 16, 2016, the following corrections are made:

■ 1. On pages 80552 and 80553, correct § 410.79 by—

■ a. In paragraph (b):

■ i. Removing the definition of ''Evaluation weight'';

■ ii. Revising the definitions of ''MDPP supplier'', ''Medicare Diabetes Prevention Program (MDPP)'', and ''Required minimum weight loss'';

■ iii. In the definition of ''National Diabetes Prevention Program, removing ''(DPP)'' and adding in its place the term ''(National DPP) ''; and

■ b. Revising paragraphs (c)(1)(ii), (c)(1)(iv) and (c)(2)(i).

The revisions read as follows:

§ 410.79 Medicare diabetes prevention program expanded model: Conditions of coverage.

* * * * *

(b) * * *

MDPP supplier refers to an entity that has enrolled in Medicare to furnish MDPP services.

Medicare Diabetes Prevention Program (MDPP) refers to a model test expanded under section 1115A(c) of the Act that makes MDPP services available to MDPP eligible beneficiaries.

* * * * *

Required minimum weight loss refers to the percentage by which the beneficiary's updated weight is less than the baseline weight. The required minimum weight loss percentage is 5 percent.

(c) * * *

(1) * * *

(ii) Have as of the date of attendance at the first core session a body mass index (BMI) of at least 25 if not self-identified as Asian or a BMI of at least 23 if self-identified as Asian.

* * * * *

(iv) Have no previous diagnosis of type 1 or type 2 diabetes (other than gestational diabetes).

* * * * *

(2) * * *

(i) *Core sessions and core maintenance sessions.* MDPP suppliers must furnish to MDPP eligible beneficiaries the MDPP core benefit. Sixteen core sessions must be furnished at least a week apart over the first 6 months. At least one core maintenance session must be furnished in each of the second 6 months. All core sessions and core maintenance sessions must have a duration of approximately one hour. MDPP suppliers must address at least 16 different curriculum topics in the core sessions and at least 6 different curriculum topics in the core maintenance sessions.

* * * * *

■ 2. On page 80558, correct § 424.59 by revising paragraphs (a)(1) and (5), (b)(4)(i), and (e)(2)(i) to read as follows:

§ 424.59 Requirements for Medicare diabetes prevention program suppliers.

(a) * * *

(1) At the time of enrollment has full CDC DPRP recognition.

* * * * *

(5) Submits a roster of all coaches who will be furnishing MDPP services on the entity's behalf that includes the coaches' first and last names, SSN, and NPI.

(b) * * *

(4) * * *

(i) Has attended one, four or nine core sessions, or

* * * * *

(e) * * *

(2) * * *

(i) Become eligible to bill for MDPP services again if it meets the requirements of paragraph (a)(1) of this section, and enrolls again in Medicare as an MDPP supplier subject to paragraph (a) of this section.

* * * * *

Dated: November 14, 2016.

Madhura Valverde,

Executive Secretary to the Department, Department of Health and Human Services.

[FR Doc. 2016–27733 Filed 11–15–16; 11:15 am]

BILLING CODE 4120–01–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 648

[Docket No. 151211999–6343–02]

RIN 0648–XF002

Fisheries of the Northeastern United States; Northeast Multispecies Fishery; Georges Bank Cod Trimester Total Allowable Catch Area Closure and Possession and Trip Limit Reductions for the Common Pool Fishery

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; area closure and inseason adjustment.

SUMMARY: This action closes the Georges Bank Cod Trimester Total Allowable Catch Area to Northeast multispecies common pool vessels and adjusts the Georges Bank cod possession and trip limit for common pool vessels for the remainder of Trimester 2, through December 31, 2016. The common pool fishery is projected to catch 90 percent of its Trimester 2 quota for Georges Bank cod. The closure and possession and trip limit reductions are intended to prevent an overage of the common pool's quota for this stock.

DATES: This action is effective November 15, 2016, through December 31, 2016.

FOR FURTHER INFORMATION CONTACT: Liz Sullivan, Fishery Management Specialist, (978) 282–8493.

SUPPLEMENTARY INFORMATION: Federal regulations at 50 CFR 648.82(n)(2)(ii) require the Regional Administrator to close a common pool Trimester Total Allowable Catch (TAC) Area for a stock when 90 percent of the Trimester TAC is projected to be caught. The closure applies to all common pool vessels fishing with gear capable of catching that stock for the remainder of the trimester.

As of November 5, 2016, the common pool fishery has caught approximately 87 percent of the Trimester 2 TAC (4.2 mt) for Georges Bank (GB) cod. We project that 90 percent of the Trimester 2 TAC was caught by November 7.

Effective November 15, 2016, the GB Cod Trimester TAC Area is closed for the remainder of Trimester 2, through December 31, 2016, to all common pool vessels fishing with trawl gear, sink gillnet gear, and longline/hook gear. The GB Cod Trimester TAC Area consists of statistical areas 521, 522, 525, and 561. The area reopens at the beginning of Trimester 3 on January 1, 2017.

The intent of the trimester TAC area closure is to close the area where 90 percent of the catch of the stock has occurred. However, data indicate that common pool vessels have caught approximately 35 percent of the total catch in Trimester 2 from outside the statistical areas that will be affected by the closure described above. Federal regulations at § 648.86(o) authorize the Regional Administrator to adjust the possession and trip limits for common pool vessels to prevent the overharvest or underharvest of the common pool quotas. Therefore, the possession and trip limits for GB cod, are reduced as shown in Table 1, effective November 15, 2016, through December 31, 2016. This is intended to prevent the common pool from exceeding its sub-annual catch limit, but still allow for landing incidental catch of GB cod in areas not affected by the closure.

On January 1, 2017, common pool possession and trip limits for GB cod will return to the initial limits set by Framework Adjustment 55 to the Northeast Multispecies Fishery Management Plan (FMP).

TABLE 1—REDUCED COMMON POOL POSSESSION AND TRIP LIMITS FOR GB COD

Permit	Initial 2016 limits	Reduced limits
A DAS * (outside of the Eastern U.S./Canada Area)	500 lb per DAS up to 2,500 lb per trip	25 lb per DAS up to 50 lb per trip.
A DAS (Eastern U.S./Canada Area)	100 lb per DAS up to 500 lb per trip	25 lb per DAS up to 50 lb per trip.
A DAS (Special Access Programs)	1,000 lb per trip	50 lb per trip.
Handgear A	300 lb per trip	25 lb per trip.
Handgear B	25 lb per trip	25 lb per trip (unchanged).
Regular B DAS Program	100 lb per DAS up to 1,000 lb per trip	25 lb per DAS up to 50 lb per trip.

* Day-at-sea (DAS).

If a vessel declared its trip through the Vessel Monitoring System (VMS) or the interactive voice response system, and crossed the VMS demarcation line prior to November 15, 2016, it may complete its trip within the Trimester TAC Area. Additionally, such vessels are not subject to the new possession and trip limits for that trip. A vessel that has set gillnet gear prior to November 15, 2016, may complete its trip by hauling such gear.

Any overage of the Trimester 1 or 2 TACs must be deducted from the Trimester 3 TAC. Any uncaught portion of the Trimester 1 and Trimester 2 TACs is carried over into the next trimester. If the common pool fishery exceeds its sub-ACL for the 2016 fishing year, the overage must be deducted from the common pool's sub-ACL for fishing year 2017. However, any uncaught portion of the common pool's sub-ACL may not be carried over into the following fishing year.

Weekly quota monitoring reports for the common pool fishery are on our Web site at: *http://www.greateratlantic.fisheries.noaa.gov/ro/fso/MultiMonReports.htm.* We will continue to monitor common pool catch through vessel trip reports, dealer-reported landings, VMS catch reports, and other available information, and, if necessary, we will make additional adjustments to common pool management measures.

Classification

This action is required by 50 CFR part 648 and is exempt from review under Executive Order 12866.

The Assistant Administrator for Fisheries, NOAA, finds good cause pursuant to 5 U.S.C. 553(b)(B) and 5 U.S.C. 553(d)(3) to waive prior notice and the opportunity for public comment and the 30-day delayed effectiveness period because it would be impracticable and contrary to the public interest.

Regulations require the Regional Administrator to close a trimester TAC area to the common pool fishery when 90 percent of the Trimester TAC for a stock has been caught. Updated catch information only recently became available indicating that the common pool fishery caught 90 percent of its Trimester 2 TAC for GB cod by November 7, 2016. The time necessary to provide for prior notice and comment, and a 30-day delay in effectiveness, prevents the immediate closure of the GB Cod Trimester 2 TAC Area and reduction of the common pool's GB cod possession and trip limits. Delaying the effective date of a closure and possession and trip limit reduction increases the likelihood that the common pool fishery will exceed its quota of GB cod to the detriment of this stock, which could undermine management objectives of the Northeast Multispecies FMP.

Additionally, an overage of the common pool quota could cause negative economic impacts to the common pool fishery as a result of overage paybacks in a future trimester or fishing year.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: November 15, 2016.

Emily H. Menashes,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

50 CFR Part 648

[Docket No. 130919816–4205–02]

RIN 0648–XF044

Fisheries of the Northeastern United States; Atlantic Herring Fishery; 2016 Management Area 1B Directed Fishery Closure

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; directed fishery closure.

SUMMARY: NMFS is closing the directed herring fishery in management Area 1B, limiting catch from that area to 2,000 lb (907.2 kg) per trip and prohibiting landing more than once per calendar day, because it projects that 92 percent of the 2016 annual seasonal catch limit for that area will have been caught by the effective date. This action is

necessary to comply with the regulations implementing the Atlantic Herring Fishery Management Plan and is intended to prevent over harvest of herring in Area 1B.

DATES: Effective 0001 hr local time, November 18, 2016, through December 31, 2016.

FOR FURTHER INFORMATION CONTACT: Daniel Luers, Fishery Management Specialist, (978) 282–8457.

SUPPLEMENTARY INFORMATION: The reader can find regulations governing the herring fishery at 50 CFR part 648. The regulations require annual specification of the overfishing limit, acceptable biological catch, annual catch limit (ACL), optimum yield, domestic harvest and processing, U.S. at-sea processing, border transfer, and sub-ACLs for each management area. The 2016 Domestic Annual Harvest is 103,045 metric tons (mt); the 2016 sub-ACL allocated to Area 1B is 4,600 mt, and 138 mt of the Area 1B sub-ACL is set aside for research (78 FR 61828, October 4, 2013). The 2016 Area 1B sub-ACL was decreased to 2,941 mt to account for the 1,521 mt overage in 2014 catch. For management Area 1B, the catch of sub-ACL is currently allocated to the seasonal period from May 1 through December 31. There is no catch currently allocated to the seasonal period from January 1 through April 30. Therefore, under current regulations, vessels are prohibited from fishing for herring in or from Area 1B during the January 1 through April 30 period.

The regulations at § 648.201 require that when the NMFS Administrator of the Greater Atlantic Region (Regional Administrator) projects herring catch will reach 92 percent of the sub-ACL allocated in any of the four management areas designated in the Atlantic Herring Fishery Management Plan (FMP), NMFS will prohibit herring vessel permit holders from fishing for, catching, possessing, transferring, or landing more than 2,000 lb (907.2 kg) of herring per trip and landing more than once per calendar day in or from the specified management area for the remainder of the directed fishery closure period. The Regional Administrator monitors the herring fishery catch in each of the management areas based on dealer reports, state data, and other available information. NMFS publishes notification in the **Federal Register** of the date that the catch is projected to reach 92 percent of the management area sub-ACL, and of the closure of the directed fishery and a 2,000-lb (907.2-kg) trip possession limit in the management area for the remainder of the seasonal closure period. Vessels that have entered port before the closure date may offload and sell more than 2,000 lb (907.2 kg) of herring from Area 1B, from that trip. During the directed fishery closure, vessels may transit Area 1B with more than 2,000 lb (907.2 kg) of herring on board only under the conditions specified below.

The Regional Administrator has determined, based on dealer reports and other available information, that the herring fleet will catch 92 percent of the total herring sub-ACL allocated to Area 1B for the 2016 seasonal period from May 1 through December 31, 2016, by November 18, 2016. Therefore, effective 0001 hr local time, November 18, 2016, federally permitted vessels may not fish for, catch, possess, transfer, or land more than 2,000 lb (907.2 kg) of herring per trip and land more than once per calendar day, in or from Area 1B through December 31, 2016, except that vessels that have entered port before 0001 hr on November 18, 2016, may offload and sell more than 2,000 lb (907.2 kg) of herring from Area 1B from that trip after the closure. During the directed fishery closure, November 18, 2016, through December 31, 2016, a vessel may transit through Area 1B with more than 2,000 lb (907.2 kg) of herring on board, provided the vessel did not catch more than 2,000 lb (907.2 kg) of herring in Area 1B and its fishing gear is not available for immediate use as defined by § 648.2. Effective 0001 hr, November 18, 2016, federally permitted dealers may not receive herring from federally permitted herring vessels that harvest more than 2,000 lb (907.2 kg) of herring from Area 1B through 2400 hr local time, December 31, 2016, unless it is from a trip landed by a vessel that entered port before 0001 hr on November 18, 2016. Under current regulations during the seasonal period from January 1, 2017, through April 30, 2017, vessels are prohibited from fishing for, catching, possessing, transferring, or landing herring from Area 1B during this seasonal period. Vessels may transit area 1B with herring on board provided such herring were caught in an area or areas with sub-ACL available and that all fishing gear is stowed and not available for immediate use as defined in § 648.2, and the vessel is issued a permit that authorizes the amount of herring on board for the area where the herring was harvested. Beginning on May 1, 2017, the 2017 allocation for Area 1B is expected to become available.

Classification

This action is required by 50 CFR part 648 and is exempt from review under Executive Order 12866.

NMFS finds good cause pursuant to 5 U.S.C. 553(b)(B) to waive prior notice and the opportunity for public comment because it would be contrary to the public interest and impracticable. The herring fishery opened for the 2016 fishing year on January 1, 2016, and Management Area 1B opened on May 1, 2016. Data indicating the herring fleet will have landed at least 92 percent of the 2016 sub-ACL allocated to Area 1B have only recently become available. Landings data is updated on a weekly basis, and NMFS monitors catch data on a daily basis as catch increases toward the limit for the area. Further, high-volume catch and landings in this fishery increase total catch relative to the sub-ACL quickly. This action is a required response to that recently available data and closes the directed herring fishery and imposes a 2,000-lb (907.2-kg) possession limit for Management Area 1B through December 31, 2016, under current regulations. The regulations at § 648.201(a) require such action to ensure that herring vessels do not exceed the 2016 sub-ACL allocated to Area 1B. If implementation of this closure is delayed to solicit prior public comment, the sub-ACL for Area 1B for this fishing year may be exceeded, thereby undermining the conservation objectives of the FMP. If sub-ACLs are exceeded, the excess must also be deducted from a future sub-ACL and would reduce future fishing opportunities. Also, the public had prior notice and full opportunity to comment on this process when these provisions were put in place. Based on these considerations, NMFS further finds, pursuant to 5 U.S.C. 553(d)(3), good cause to waive the 30-day delayed effectiveness period for the reasons stated above.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: November 15, 2016.

Emily H. Menashes,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

Friday, November 18, 2016

DEPARTMENT OF ENERGY

10 CFR Part 835

[Docket No. AU–RM–16–ORP]

RIN 1992–AA51

Occupational Radiation Protection

AGENCY: Office of Environment, Health, Safety and Security, U.S. Department of Energy.

ACTION: Notice of proposed rulemaking.

SUMMARY: The U.S. Department of Energy (DOE) proposes to amend the values listed in two appendices to its current occupational radiation protection regulations. The proposed amendment to appendix C would correct the derived air concentration value for any single radionuclide not listed in the appendix C table with a decay mode other than alpha emission or spontaneous fission and with radioactive half-life less than two hours, adjusted for an 8-hr work day. The proposed amendments to appendix E would correct the activity information of two radionuclides, Rh–102 and Rh–102m.

DATES: The comment period for this proposed rule will end on December 19, 2016.

ADDRESSES: You may submit comments, identified by docket number AU–RM–16–ORP, and/or Regulation Identification Number (RIN) 1992–AA51 in one of four ways (please select only one of the ways listed):

1. *Federal e-Rulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.

2. *Email: James.dillard@hq.doe.gov.* Include docket number AU–RM–16–ORP and/or RIN 1992–AA51 in the subject line of the email. Please include the full body of your comments in the text of the message or as an attachment. If you have additional information such as studies or journal articles and cannot attach them to your electronic submission, please send them on a CD or USB flash drive to the address listed in paragraph 4. The additional material must clearly identify your electronic comments by name, date, subject, and docket number AU–RM–16–ORP.

3. *Mail:* Address written comments to James Dillard, U.S. Department of Energy, Office of Environment, Health, Safety and Security, Mailstop AU–11, Docket Number AU–RM–16–ORP, 1000 Independence Ave. SW., Washington, DC 20585 (due to potential delays in DOE's receipt and processing of mail sent through the U.S. Postal Service, we encourage respondents to submit comments electronically to ensure timely receipt). If possible, please submit all items on a CD or USB flash drive, in which case it is not necessary to include printed copies.

4. *Hand Delivery/Courier:* James Dillard, U.S. Department of Energy, Office of Environment, Health, Safety and Security, 19901 Germantown Road, Germantown, MD 20874. Telephone 301–903–1165. If possible, please submit all items on a CD or USB flash drive, in which case it is not necessary to include printed copies.

For detailed instructions on submitting comments and additional information on the rulemaking process, see Section IV of this document (Public Participation).

Docket: The docket, which includes **Federal Register** notices, public meeting attendee lists and transcripts, comments, and other supporting documents/materials, is available for review at *http://www.regulations.gov.* All documents in the docket are listed in the *www.regulations.gov* index. However, some documents listed in the index, such as those containing information that is exempt from public disclosure, may not be publicly available. A link to the docket Web page can be found at: *http://www.ecfr.gov/cgi-bin/text-idx?tpl=/ecfrbrowse/Title10/10cfr835_main_02.tpl.* The *www.regulations.gov* Web page contains instructions on how to access all documents, including public comments, in the docket. See Section IV of this document (Public Participation) for further information on how to submit comments through *http://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: James Dillard, U.S. Department of Energy, Office of Environment, Health, Safety and Security, Mailstop AU–11, 1000 Independence Ave. SW., Washington, DC 20585. Telephone: 301–903–1165. Email: *james.dillard@hq.doe.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

The requirements in title 10, Code of Federal Regulations, part 835 (10 CFR part 835), *Occupational Radiation Protection,* are designed to protect the health and safety of individuals from ionizing radiation resulting from the conduct of U.S. Department of Energy (DOE) activities. One situation that DOE's regulations address is the exposure of workers to radioactive material dispersed in the air. Based on calculations involving doses to the organs of the body, levels of contamination in the air that will not cause the dose limits for workers to be exceeded are established for specified radionuclides. These values are provided in appendix C of part 835. On April 13, 2011, the Department published updated Derived Air Concentration (DAC) values in appendix C for determining radiation dose from inhaled radioactive material (76 FR 20489). The updated dose conversion factors were based on an 8 hour work day exposure time instead of the previously assumed 24 hour calendar day exposure, which is consistent with other occupational scenarios, such as those used in developing appendix A DACs. In that update, the DAC values for radionuclides not listed in the appendix C table with a decay mode other than alpha emission or spontaneous fission and with radioactive half-life less than two hours were inadvertently not revised for the 8 hour work day exposure time. The proposed amendment to appendix C would provide the correct DAC values for this group of radioactive materials.

Title 10 CFR part 835 appendix E values were developed to ensure the proper accountability of sealed radioactive sources, as well as radioactive material posting and labeling requirements (63 FR 59662, November 4, 1998). DOE most recently amended the values of appendix E to part 835 on June 8, 2007 (72 FR 31904), using the International Commission on Radiological Protection (ICRP) Publication 60 methodology (ref. 1) and the same exposure scenarios discussed in a 1998 amendment to 10 CFR part 835 (63 FR 59662, November 4, 1998). The values were based on the more limiting of the quantity of radioactive material which results in either an external or internal whole body dose, from either inhalation or ingestion, of 100 millirems. However, the final rule incorrectly listed values for two radionuclides. This proposed amendment to appendix E would provide the correct activity values for these two radionuclides (Rh-102 and Rh-102m), calculated from internal exposure scenario derived from ICRP Publication 119 (ref. 2).

II. Discussion of Proposed Amendments

A. Appendix C—Derived Air Concentration (DAC) for Workers from External Exposure During Immersion in a Cloud of Airborne Radioactive Material. The proposed amendment would provide a correction to the derived air concentration value for any single radionuclide not listed in the Appendix C table with a decay mode other than alpha emission or spontaneous fission and with radioactive half-life less than two hours to 1E–06 μCi/mL (7E+04 Bq/m^3).

B. Appendix E—Values for Establishing Sealed Radioactive Source Accountability and Radioactive Material Posting and Labeling Requirements. The proposed amendment would correct the activity for Rh-102 to 6.4E+05 μCi and the activity from Rh-102m to 3.0E+05 μCi.

III. Procedural Requirements

A. Review Under Executive Order 12866

This regulatory action has been determined not to be ''not significant'' under Executive Order 12866, ''Regulatory Planning and Review'' (58 FR 51735, October 4, 1993). Accordingly, this action was not subject to review under that Executive Order by the Office of Information and Regulatory Affairs (OIRA) of the Office of Management and Budget (OMB).

B. Review Under the Regulatory Flexibility Act

The Regulatory Flexibility Act of 1980 (5 U.S.C. 601 *et seq.*) requires that a Federal agency prepare an initial regulatory flexibility analysis for any regulation for which a general notice of proposed rulemaking is required, unless the agency certifies that the rule, if promulgated, will not have a significant economic impact on a substantial number of small entities (5 U.S.C. 605(b)).

This proposed rule would amend DOE requirements for nuclear safety and occupational radiation protection at DOE sites. The requirements of part 835 are primarily implemented by contractors who conduct work at DOE facilities. DOE considered whether these contractors are ''small businesses'' as the term is defined in the Regulatory Flexibility Act (5 U.S.C. 601(3)). The Regulatory Flexibility Act's definition incorporates the definition of small business concerns in the Small Business Act, which the Small Business Administration (SBA) has developed through size standards in 13 CFR part 121. The DOE contractors subject to this rule exceed the SBA's size standards for small businesses. In addition, DOE expects that any potential economic impact of this rule would be negligible because DOE activities are conducted by contractors who are reimbursed through their contracts with DOE for the costs of complying with DOE nuclear safety and radiation protection requirements, including the costs of complying with the proposed rule. For these reasons, DOE certifies that this proposed rule, if promulgated, would not have a significant economic impact on a substantial number of small entities, and therefore, no regulatory flexibility analysis has been prepared. DOE's certification and supporting statement of factual basis will be provided to the Chief Counsel of Advocacy of the SBA pursuant to 5 U.S.C. 605(b).

C. Review Under the Paperwork Reduction Act

This proposed rule does not impose a collection of information requirement subject to the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*).

D. Review Under the National Environmental Policy Act

DOE has concluded that promulgation of this rule falls into a class of actions that would not individually or cumulatively have a significant impact on the human environment, as determined by DOE's regulations implementing the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*). Specifically, this rule amends existing regulations without changing the potential environmental effect of the regulations being amended, and, therefore, is covered under the Categorical Exclusion in paragraph A5 of appendix A to subpart D, 10 CFR part 1021. Accordingly, neither an environmental assessment nor an environmental impact statement is required.

E. Review Under Executive Order 12988

With respect to the review of existing regulations and the promulgation of new regulations, section 3(a) of Executive Order 12988, ''Civil Justice Reform'' (61 FR 4729, February 7, 1996), imposes on Federal agencies the general duty to adhere to the following requirements: (1) Eliminate drafting errors and ambiguity; (2) write regulations to minimize litigation; and (3) provide a clear legal standard for affected conduct rather than a general standard and promote simplification and burden reduction. Section 3(b)(2) of Executive Order 12988 specifically requires that Executive agencies make every reasonable effort to ensure that the regulation: (1) Clearly specifies the preemptive effect, if any, to be given to the regulation; (2) clearly specifies any effect on existing Federal law or regulation; (3) provides a clear legal standard for affected conduct while promoting simplification and burden reduction; (4) specifies the retroactive effect, if any, to be given to the regulation; (5) defines key terms; and (6) addresses other important issues affecting clarity and general draftsmanship under any guidelines issued by the Attorney General. Section 3(c) of Executive Order 12988 requires Executive agencies to review regulations in light of applicable standards in section 3(a) and section 3(b) to determine whether they are met or it is unreasonable to meet one or more of the standards. DOE has completed the required review and determined that, to the extent permitted by law, this proposed rule meets the relevant standards of Executive Order 12988.

F. Review Under Executive Order 13132

Executive Order 13132, ''Federalism'' (64 FR 43255, August 4, 1999), imposes certain requirements on agencies formulating and implementing policies or regulations that preempt State law or that have federalism implications. Agencies are required to examine the constitutional and statutory authority supporting any action that would limit the policymaking discretion of the States and carefully assess the necessity for such actions. DOE has examined this proposed rule and has determined that it would not preempt State law and would not have a substantial direct effect on the States, the relationship between the national government and the States, or the distribution of power and responsibilities among the various levels of government. No further action is required by Executive Order 13132.

G. Review Under Executive Order 13175

Under Executive Order 13175 (65 FR 67249, November 6, 2000) on ''Consultation and Coordination with Indian Tribal Governments,'' DOE may not issue a discretionary rule that has ''tribal'' implications and imposes substantial direct compliance costs on Indian tribal governments. DOE has determined that the proposed rule would not have such effects and concluded that Executive Order 13175 does not apply to this proposed rule.

H. Review Under the Unfunded Mandates Reform Act of 1995

Title II of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4), 2 U.S.C. 1531 *et seq.,* requires each Federal agency to prepare a written assessment of the effects of any Federal mandate in a proposed or final agency regulation that may result in the expenditure by states, tribal, or local governments, on the aggregate, or by the private sector, of $100 million in any one year. The Act also requires a Federal agency to develop an effective process to permit timely input by elected officials of state, tribal, or local governments on a proposed ''significant intergovernmental mandate,'' and requires an agency plan for giving notice and opportunity to provide timely input to potentially affected small governments before establishing any requirements that might significantly or uniquely affect small governments. DOE has determined that the proposed rule published does not contain any Federal mandates affecting small governments, so these requirements do not apply.

I. Review Under Executive Order 13211

Executive Order 13211, ''Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use,'' 66 FR 28355 (May 22, 2001) requires Federal agencies to prepare and submit to the OMB a Statement of Energy Effects for any proposed significant energy action. A ''significant energy action'' is defined as any action by an agency that promulgated or is expected to lead to promulgation of a final rule, and that: (1) Is a significant regulatory action under Executive Order 12866, or any successor order; and (2) is likely to have a significant adverse effect on the supply, distribution, or use of energy, or (3) is designated by the Administrator of OIRA as a significant energy action. For any proposed significant energy action, the agency must give a detailed statement of any adverse effects on energy supply, distribution, or use should the proposal be implemented, and of reasonable alternatives to the action and their expected benefits on energy supply, distribution, and use. This regulatory action would not have a significant adverse effect on the supply, distribution, or use of energy and is therefore not a significant energy action. Accordingly, DOE has not prepared a Statement of Energy Effects.

J. Review Under the Treasury and General Government Appropriations Act, 1999

Section 654 of the Treasury and General Government Appropriations Act, 1999 (Pub. L. 105–277) requires Federal agencies to issue a Family Policymaking Assessment for any proposed rule that may affect family well-being. The proposed rule would not have any impact on the autonomy or integrity of the family as an institution. Accordingly, DOE has concluded that it is not necessary to prepare a Family Policymaking Assessment.

K. Review Under the Treasury and General Government Appropriations Act, 2001

The Treasury and General Government Appropriations Act, 2001 (44 U.S.C. 3516 note) provides for agencies to review most disseminations of information to the public under guidelines established by each agency pursuant to general guidelines issued by OMB.

OMB's guidelines were published at 67 FR 8452 (February 22, 2002), and DOE's guidelines were published at 67 FR 62446 (October 7, 2002). DOE has reviewed this proposed rule under the OMB and DOE guidelines and has concluded that it is consistent with applicable policies in those guidelines.

IV. Public Participation

Submission of Comments

DOE will accept comments, data and information regarding this proposed rule before or after the public hearings, but no later than the date provided in the **DATES** section at the beginning of this proposed rule. Interested individuals are invited to participate in this proceeding by submitting data, views, or arguments with respect to this proposed rule using any of the methods described in the **ADDRESSES** section at the beginning of this proposed rule. To help the Department review the submitted comments, commenters are requested to reference the paragraph(s), *e.g.,* § 835.3(a), to which they refer where possible.

1. *Submitting comments via www.regulations.gov.* The *www.regulations.gov* Web page will require you to provide your name and contact information. Your contact information will be viewable to DOE's Office of Environment, Health, Safety and Security staff only. Your contact information will not be publicly viewable except for your first and last names, organization name (if any), and submitter representative name (if any). If your comment is not processed properly because of technical difficulties, DOE will use this information to contact you. If DOE cannot read your comment due to technical difficulties and cannot contact you for clarification, DOE may not be able to consider your comment. However, your contact information will be publicly viewable if you include it in the comment itself or in any documents attached to your comment. Any information that you do not want to be publicly viewable should not be included in your comment, nor in any document attached to your comment. Otherwise, persons viewing comments will see only first and last names, organization names, correspondence containing comments, and any documents submitted with the comments.

Do not submit to *www.regulations.gov* information for which disclosure is restricted by statute, such as trade secrets and commercial or financial information (hereinafter referred to as Confidential Business Information (CBI)). Comments submitted through *www.regulations.gov* cannot be claimed as CBI. Comments received through the

Web site will waive any CBI claims for the information submitted. For information on submitting CBI, see the Confidential Business Information section below.

DOE processes submissions made through *www.regulations.gov* before posting them. Normally, comments will be posted within a few days of being submitted. However, if large volumes of comments are being processed simultaneously, your comment may not be viewable for up to several weeks. Please keep the comment tracking number that *www.regulations.gov* provides after you have successfully uploaded your comment.

2. *Submitting comments via email, mail or hand delivery/courier.* Comments and documents submitted via email, mail, or hand delivery/courier, also will be posted to *www.regulations.gov.* If you do not want your personal contact information to be publicly viewable, do not include it in your comment or any accompanying documents. Instead, provide your contact information in a cover letter. Include your first and last names, email address, telephone number, and optional mailing address. The cover letter will not be publicly viewable as long as it does not include any comments.

Include contact information each time you submit comments, data, documents, and other information to DOE. If you submit via mail or hand delivery/courier, please provide all items on a CD or USB flash drive, if feasible. It is not necessary to submit printed copies. No facsimiles (faxes) will be accepted.

Comments, data, and other information submitted to DOE electronically should be provided in PDF (preferred), Microsoft Word or Excel, WordPerfect, or text (ASCII) file format. Provide documents that are not secured, that are written in English, and that are free of any defects or viruses. Documents should not contain special characters or any form of encryption and, if possible, they should carry the electronic signature of the author.

3. *Confidential Business Information.* Pursuant to the provisions of 10 CFR 1004.11, anyone submitting information or data he or she believes to be confidential and exempt by law from public disclosure should submit via email, or postal mail two well-marked copies: One copy of the document marked ''CONFIDENTIAL BUSINESS INFORMATION'' including all the information believed to be confidential, and one copy of the document marked ''NO CONFIDENTIAL BUSINESS INFORMATION'' with the information believed to be confidential deleted. Submit these documents via email or CD, if feasible. DOE will make its own determination as to the confidentiality of the information and treat it accordingly. Factors of interest to DOE when evaluating requests to treat submitted information as confidential include: (1) A description of the items; (2) whether and why such items are customarily treated as confidential within the industry; (3) whether the information is generally known by or available from other sources; (4) whether the information has previously been made available to others without obligation concerning its confidentiality; (5) an explanation of the competitive injury to the submitting person which would result from public disclosure; (6) when such information might lose its confidential character due to the passage of time; and (7) why disclosure of the information would be contrary to the public interest.

It is DOE's policy that all comments may be included in the public docket, without change and as received, including any personal information provided in the comments (except information deemed to be exempt from public disclosure).

4. *Campaign form letters.* Please submit campaign form letters by the originating organization in batches of between 50 to 500 form letters per PDF or as one form letter with a list of supporters' names compiled into one or more PDFs. This reduces comment processing and posting time.

Appendix A—References

V. Approval of the Office of the Secretary

The Secretary of Energy has approved publication of this proposed rule.

List of Subjects in 10 CFR Part 835

Federal buildings and facilities, Nuclear energy, Nuclear materials, Nuclear power plants and reactors, Nuclear safety, Occupational safety and health, Radiation protection, and Reporting and recordkeeping requirements.

Issued in Washington, DC, on October 31, 2016.

Matthew B. Moury,

Associate Under Secretary for Environment, Health, Safety and Security.

For the reasons set forth in the preamble, the Department of Energy proposes to amend part 835 of chapter III of title 10 of the Code of Federal Regulations as set forth below:

PART 835—OCCUPATIONAL RADIATION PROTECTION

■ 1. The authority citation for part 835 continues to read as follows:

Authority: 42 U.S.C. 2201, 7191, 50 U.S.C. 2410.

Appendix C to Part 835—[Amended]

■ 2. At the end of the table, in appendix C, the last sentence is amended by removing ''6 E–06 μCi/mL (2 E+04 Bq/m^3)'' and adding in its place ''1 E–06 μCi/mL (7 E+04 Bq/m^3)''.

Appendix E to Part 835—[Amended]

■ 3. Appendix E is amended by removing the activity value in the second column for:

■ a. Rh–102, value of ''3.0E+05'' and adding in its place ''6.4E+05''; and

■ b. Rh–102m, value of ''6.4E+05'' and adding in its place ''3.0E+05''.

Airworthiness Directives; Learjet Inc. Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: We propose to adopt a new airworthiness directive (AD) for certain Learjet Inc. Model 36A airplanes. This proposed AD was prompted by a report indicating that an aileron cable failed on an airplane during a tension check and a determination that Model 36A airplanes were not included in AD 2005–13–36, which addresses this issue for other Learjet Inc. airplanes. This proposed AD would require a one-time inspection of the center ball of the aileron control cables for a defective

swage, and corrective actions if necessary. We are proposing this AD to prevent the unsafe condition on these products.

DATES: We must receive comments on this proposed AD by January 3, 2017.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this NPRM, contact Learjet, Inc., One Learjet Way, Wichita, KS 67209–2942; telephone 316–946–2000; fax 316–946–2220; email *ac.ict@aero.bombardier.com;* Internet *http://www.bombardier.com.* You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–9388; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this proposed AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Office (phone: 800–647–5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Donald Ristow, Aerospace Engineer, Systems and Propulsion Branch, ACE–116W, FAA, Wichita Aircraft Certification Office (ACO), 1801 Airport Road, Room 100, Dwight D. Eisenhower National Airport, Wichita, Kansas 67209; phone: 316–946–4120; fax: 316–946–4107; email: *donald.ristow@faa.gov.*

SUPPLEMENTARY INFORMATION:

Comments Invited

We invite you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under the **ADDRESSES** section. Include ''Docket No. FAA–2016–9388; Directorate Identifier 2016–NM–145–AD'' at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this proposed AD. We will consider all comments received by the closing date and may amend this proposed AD because of those comments.

We will post all comments we receive, without change, to *http://www.regulations.gov,* including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this proposed AD.

Discussion

We received a report indicating that an aileron cable failed on a Learjet Inc. Model 35A (C–21A) airplane when the cable underwent a tension check while being installed. Further investigation showed that an over-sized ball was swaged onto the cable during manufacture. Swaging an over-sized ball onto a cable allows excess material into the swaging die, which causes the ball to over-swage and then sever the cable strands. This condition, if not corrected, could result in severe weakening of the aileron cable, and consequent reduced controllability of the airplane.

The subject area on Learjet Inc. Model 36A airplanes is identical to that on the affected Model 35A (C–21A) airplane. Therefore, Model 36A airplanes may be subject to the same unsafe condition.

We previously issued AD 2005–13–36, Amendment 39–14173 (70 FR 38578, July 5, 2005) (''AD 2005–13–36''), for Learjet Inc. Model 23, 24, 24A, 24B, 24B–A, 24C, 24D, 24D–A, 24E, 24F, 24F–A, 25, 25A, 25B, 25C, 25D, 25F, 28, 29, 31, 31A, 35, 35A (C–21A), and 36 airplanes. Model 36A airplanes were inadvertently omitted from the applicability of that AD. The applicability of AD 2005–13–36 referred to Bombardier Alert Service Bulletin A35/36–27–42, dated December 23, 2002, for Model 35, 35A (C–21A), and 36 airplanes. However, Model 36A airplanes are also identified in that service information.

Related Service Information Under 1 CFR Part 51

We reviewed Bombardier Alert Service Bulletin A35/36–27–42, dated December 23, 2002. The service information describes procedures for a one-time inspection of the center ball of the aileron control cables for a defective swage, and replacement of defective cables. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

FAA's Determination

We are proposing this AD because we evaluated all the relevant information and determined the unsafe condition described previously is likely to exist or develop in other products of the same type design.

Proposed AD Requirements

This proposed AD would require accomplishing the actions specified in the service information described previously, except as described in ''Differences between this Proposed AD and the Service Information.''

Differences Between This Proposed AD and the Service Information

Bombardier Alert Service Bulletin A35/36–27–42, dated December 23, 2002, recommends that operators accomplish the actions within 10 flight hours after receipt. This proposed AD would require that operators accomplish the actions within 100 flight hours, or 90 days after the effective date of the AD, whichever occurs first. We find that the proposed compliance time addresses the unsafe condition soon enough to maintain an adequate level of safety for the affected fleet. In developing an appropriate compliance time for this proposed AD we considered the degree of urgency associated with addressing the unsafe condition, and the maximum interval of time allowable for all affected airplanes to continue to operate without compromising safety.

Costs of Compliance

We estimate that this proposed AD affects 21 airplanes of U.S. registry. We estimate the following costs to comply with this proposed AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Inspection	1 work-hour × $85 per hour = $85	$0	$85	$1,785

We estimate the following costs to do any necessary replacement that would be required based on the results of the proposed inspection. We have no way of determining the number of aircraft that might need this replacement:

ON-CONDITION COSTS

Action	Labor cost	Parts cost	Cost per product
Cable Replacement	[1] Up to 48 work-hours × $85 per hour = up to $4,080	[1] Up to $2,020	[1] Up to $6,100.

[1] These costs assume replacement of all 5 cables.

According to the manufacturer, some of the costs of this proposed AD may be covered under warranty, thereby reducing the cost impact on affected individuals. We do not control warranty coverage for affected individuals. As a result, we have included all costs in our cost estimate.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: "General requirements." Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

(1) Is not a "significant regulatory action" under Executive Order 12866,

(2) Is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979),

(3) Will not affect intrastate aviation in Alaska, and

(4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

Learjet Inc.: Docket No. FAA–2016–9388; Directorate Identifier 2016–NM–145–AD.

(a) Comments Due Date

We must receive comments by January 3, 2017.

(b) Affected ADs

None.

(c) Applicability

This AD applies to Learjet Inc. Model 36A airplanes, certificated in any category, as identified in Bombardier Alert Service Bulletin A35/36–27–42, dated December 23, 2002.

(d) Subject

Air Transport Association (ATA) of America Code 27, Flight controls.

(e) Unsafe Condition

This AD was prompted by a report indicating that an aileron cable failed on an airplane during a tension check. We are issuing this AD to prevent severe weakening of the aileron cable, and consequent reduced controllability of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Inspection

Within 100 flight hours or 90 days after the effective date of this AD, whichever occurs first, do a detailed inspection of the center ball of the aileron control cables for a defective swage, and before further flight, replace any damaged or defective cable with a new cable, in accordance with the Accomplishment Instructions of Bombardier Alert Service Bulletin A35/36–27–42, dated December 23, 2002. For the purposes of this AD, a detailed inspection is: An intensive examination of a specific item, installation, or assembly to detect damage, failure, or irregularity. Available lighting is normally supplemented with a direct source of good lighting at an intensity deemed appropriate. Inspection aids such as mirrors, magnifying lenses, etc., may be necessary. Surface cleaning and elaborate procedures may be required.

(h) Parts Installation Limitation

As of the effective date of this AD, no person may install on any airplane an aileron control cable unless it has been inspected in accordance with paragraph (g) of this AD.

(i) No Reporting or Parts Return Requirement

Although Bombardier Alert Service Bulletin A35/36–27–42, dated December 23, 2002, has procedures for submitting a report showing compliance and for returning any discrepant parts to the manufacturer, this AD does not include those requirements.

(j) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Wichita Aircraft Certification Office (ACO), FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the ACO, send it to the attention of the person identified in paragraph (k)(1) of this AD.

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(k) Related Information

(1) For more information about this AD, contact Donald Ristow, Aerospace Engineer, Systems and Propulsion Branch, ACE–116W, FAA, Wichita ACO, 1801 Airport Road, Room 100, Dwight D. Eisenhower National Airport, Wichita, Kansas 67209; phone: 316–946–4120; fax: 316–946–4107; email: *donald.ristow@faa.gov.*

(2) For service information identified in this AD, contact Learjet, Inc., One Learjet Way, Wichita, KS 67209–2942; telephone 316–946–2000; fax 316–946–2220; email *ac.ict@aero.bombardier.com;* Internet *http://www.bombardier.com.* You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221.

Issued in Renton, Washington, on November 7, 2016.

Michael Kaszycki,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

Airworthiness Directives; The Boeing Company Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: We propose to adopt a new airworthiness directive (AD) for all The Boeing Company Model 737–300, –400, and –500 series airplanes. This proposed AD was prompted by a report of a crack in a certain body station (BS) frame inboard chord during supplemental structural inspection document (SSID) inspections. This proposed AD would require repetitive detailed and high frequency eddy current (HFEC) inspections for any crack at the frame inboard chords, and repair if necessary. We are proposing this AD to prevent the unsafe condition on these products.

DATES: We must receive comments on this proposed AD by January 3, 2017.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this NPRM, contact Boeing Commercial Airplanes, Attention: Contractual & Data Services (C&DS), 2600 Westminster Blvd., MC 110–SK57, Seal Beach, CA 90740; telephone: 562–797–1717; Internet: *https://www.myboeingfleet.com.* You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221. It is also available on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–9391.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–9391; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this proposed AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Office (phone: 800–647–5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Galib Abumeri, Aerospace Engineer, Airframe Branch, ANM 120L, FAA, Los Angeles Aircraft Certification Office (ACO), 3960 Paramount Boulevard, Lakewood, CA 90712–4137; phone: 562–627–5324; fax: 562–627–5210; email: *galib.abumeri@faa.gov.*

SUPPLEMENTARY INFORMATION:

Comments Invited

We invite you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under the **ADDRESSES** section. Include ''Docket No. FAA–2016–9391; Directorate Identifier 2016–NM–129–AD'' at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this proposed AD. We will consider all comments received by the closing date and may amend this proposed AD because of those comments.

We will post all comments we receive, without change, to *http://www.regulations.gov,* including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this proposed AD.

Discussion

We have received a report indicating a crack of approximately 1.00 inch was found in the BS 616 frame inboard chord during SSID inspections. The crack was located at the lowest fastener hole of the inboard chord inboard strap below stringer S–11R. The airplane had accumulated 75,584 total flight hours and 63,570 total flight cycles. Cracking in the inboard chord is the result of fatigue caused by cyclic pressurization of the fuselage. This condition, if not corrected, could result in structural failure of the frame and possible rapid decompression.

Related Service Information Under 1 CFR Part 51

We reviewed Boeing Alert Service Bulletin 737–53A1366, dated May 17, 2016. The service information describes procedures for repetitive detailed and HFEC inspections for cracking at the frame inboard chords, and repair. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

FAA's Determination

We are proposing this AD because we evaluated all the relevant information and determined the unsafe condition described previously is likely to exist or develop in other products of the same type design.

Proposed AD Requirements

This proposed AD would require accomplishing the actions specified in the service information described previously, except as discussed under ''Differences Between this Proposed AD and the Service Information.'' For information on the procedures and compliance times, see this service information at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–9391.

Differences Between This Proposed AD and the Service Information

Boeing Alert Service Bulletin 737–53A1366, dated May 17, 2016, specifies to contact the manufacturer for certain instructions, but this proposed AD would require using repair methods, modification deviations, and alteration deviations in one of the following ways:

- In accordance with a method that we approve; or
- Using data that meet the certification basis of the airplane, and that have been approved by the Boeing Commercial Airplanes Organization Designation Authorization (ODA) whom we have authorized to make those findings.

Costs of Compliance

We estimate that this proposed AD affects 400 airplanes of U.S. registry. We estimate the following costs to comply with this proposed AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Detailed and HFEC Inspections.	8 work-hours × $85 per hour = $680 per inspection cycle.	$0	$680 per inspection cycle.	$272,000 per inspection cycle.

We have received no definitive data that would enable us to provide cost estimates for the on-condition actions specified in this proposed AD.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: ''General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979),

(3) Will not affect intrastate aviation in Alaska, and

(4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

The Boeing Company: Docket No. FAA–2016–9391; Directorate Identifier 2016–NM–129–AD.

(a) Comments Due Date

We must receive comments by January 3, 2017.

(b) Affected ADs

None.

(c) Applicability

This AD applies to all The Boeing Company Model 737–300, –400, and –500 series airplanes, certificated in any category.

(d) Subject

Air Transport Association (ATA) of America Code 53, Fuselage.

(e) Unsafe Condition

This AD was prompted by a report of a crack in the body station (BS) 616 frame inboard chord during supplemental structural inspection document (SSID) inspections; the crack was located at the lowest fastener hole of the inboard chord inboard strap below stringer S–11R. We are issuing this AD to detect and correct any crack in the inboard chord of the BS 616 frame below stringers S–11L or S–11R, which could result in structural failure of the frame and possible rapid decompression.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Repetitive Detailed and High Frequency Eddy Current (HFEC) Inspections

Except as required by paragraph (i) of this AD, at the applicable times specified in table 1 of paragraph 1.E., ''Compliance,'' of Boeing Alert Service Bulletin 737–53A1366, dated May 17, 2016: Do detailed and HFEC inspections for any crack at the frame inboard chords, in accordance with the Accomplishment Instructions of Boeing Alert Service Bulletin 737–53A1366, dated May 17, 2016. Repeat the inspections thereafter at the time specified in table 1 of paragraph 1.E., ''Compliance,'' of Boeing Alert Service Bulletin 737–53A1366, dated May 17, 2016.

(h) Repair

If any crack is found during any inspection required by paragraph (g) of this AD, repair before further flight using a method approved in accordance with the procedures specified in paragraph (j) of this AD. Although Boeing Alert Service Bulletin 737–53A1366, dated May 17, 2016, specifies to contact Boeing for repair instructions, and specifies that action as ''RC'' (Required for Compliance), this AD requires repair as specified in this paragraph.

(i) Service Information Exceptions

Where Boeing Alert Service Bulletin 737–53A1366, dated May 17, 2016, specifies a compliance time ''after the original issue date of this service bulletin,'' this AD requires compliance within the specified compliance time after the effective date of this AD.

(j) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Los Angeles Aircraft Certification Office (ACO), FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the ACO, send it to the attention of the person identified in paragraph (k) of this AD. Information may be emailed to *9-ANM-LAACO-AMOC-Requests@faa.gov.*

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(3) An AMOC that provides an acceptable level of safety may be used for any repair, modification, or alteration required by this AD if it is approved by the Boeing Commercial Airplanes Organization Designation Authorization (ODA) that has been authorized by the Manager, Los Angeles ACO, to make those findings. To be approved, the repair method, modification deviation, or alteration deviation must meet the certification basis of the airplane, and the approval must specifically refer to this AD.

(4) Except as required by paragraph (h) of this AD: For service information that contains steps that are labeled as Required for Compliance (RC), the provisions of paragraphs (j)(4)(i) and (j)(4)(ii) of this AD apply.

(i) The steps labeled as RC, including substeps under an RC step and any figures identified in an RC step, must be done to comply with the AD. If a step or sub-step is labeled ''RC Exempt,'' then the RC requirement is removed from that step or sub-step. An AMOC is required for any deviations to RC steps, including substeps and identified figures.

(ii) Steps not labeled as RC may be deviated from using accepted methods in accordance with the operator's maintenance or inspection program without obtaining approval of an AMOC, provided the RC steps, including substeps and identified figures, can still be done as specified, and the airplane can be put back in an airworthy condition.

(k) Related Information

(1) For more information about this AD, contact Galib Abumeri, Aerospace Engineer, Airframe Branch, ANM 120L, FAA, Los Angeles ACO, 3960 Paramount Boulevard, Lakewood, CA 90712–4137; phone: 562–627–5324; fax: 562–627–5210; email: *galib.abumeri@faa.gov.*

(2) For service information identified in this AD, contact Boeing Commercial Airplanes, Attention: Contractual & Data Services (C&DS), 2600 Westminster Blvd., MC 110–SK57, Seal Beach, CA 90740; telephone: 562–797–1717; Internet: *https://www.myboeingfleet.com.* You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221.

Issued in Renton, Washington, on November 7, 2016.

Michael Kaszycki,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

Airworthiness Directives; Zodiac Aero Evacuation Systems

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: We propose to adopt a new airworthiness directive (AD) for Zodiac Aero Evacuation Systems fusible plugs installed on emergency evacuation equipment for various transport category airplanes. This proposed AD was prompted by reports indicating that affected fusible plugs activated (vented gas) below the rated temperature. This proposed AD would require an inspection of the fusible plugs to determine the part number, and lot number and replacement of all affected fusible plugs. We are proposing this AD to prevent the unsafe condition on these products.

DATES: We must receive comments on this proposed AD by January 3, 2017.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–9392; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this proposed AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Office (phone: 800–647–5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Cesar Gomez, Aerospace Engineer, Airframe and Mechanical Systems Branch, ANE–171, FAA, New York Aircraft Certification Office (ACO), 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone: 516–228–7318; fax: 516–794–5531.

Comments Invited

We invite you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under the **ADDRESSES** section. Include ''Docket No. FAA–2016–9392; Directorate Identifier 2016–NM–003–AD'' at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this proposed AD. We will consider all comments received by the closing date and may amend this proposed AD because of those comments.

We will post all comments we receive, without change, to *http://www.regulations.gov,* including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this proposed AD.

Discussion

We have received reports indicating that certain fusible plugs installed on emergency evacuation equipment activated below the rated temperature. Fusible plugs are safety devices that vent air from charged inflation systems if the inflation systems encounter excessive temperatures. Tests conducted on affected fusible plugs revealed that the plugs activated (vented gas) between 130 and 150 degrees Fahrenheit (°F) instead of the rated temperature of 174 °F. The affected fusible plugs shipped from Air Cruisers, which is a component of Zodiac Aero Evacuation Systems, from October 1, 2008, through

October 1, 2009, and have part number (P/N) B13984–3, stamped with Lot PA–21 or PA–22. Currently there are 158 affected fusible plugs that have not been accounted for. Affected fusible plugs could be installed on emergency evacuation equipment, which includes all inflation valves, reservoir and valve assemblies, and evacuation slides, slides/rafts and liferafts. Activation of the fusible plugs vents all of the gas from the inflation system reservoir (inflation bottle), rendering the evacuation system unusable.

Related Service Information

We reviewed Air Cruisers Service Information Letter 25–246, Rev. No. 1, dated February 21, 2014. The service information provides information regarding affected fusible plugs and provides guidance on fusible plug replacement.

FAA's Determination

We are proposing this AD because we evaluated all the relevant information and determined the unsafe condition described previously is likely to exist or develop in other products of the same type design.

Proposed AD Requirements

This proposed AD would require an inspection of the fusible plugs to determine the part number and lot number, and replacement of all affected fusible plugs. This proposed AD also would require, for affected part and lot numbers only, sending the part number identification results to Air Cruisers.

Costs of Compliance

We estimate that this proposed AD affects 3,384 airplanes of U.S. registry. We estimate the following costs to comply with this proposed AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Determining part number	1 work-hour × $85 per hour = $85	$0	$85	$287,640

We estimate the following costs to do any necessary replacements that would be required based on the results of the proposed inspection. We have no way of determining the number of aircraft that might need these replacements:

ON-CONDITION COSTS

Action	Labor cost	Parts cost	Cost per product
Replacing	1 work-hour × $85 per hour = $85	Not available	$85
Reporting	1 work-hour × $85 per hour = $85	$0	85

According to the manufacturer, some of the costs of this proposed AD may be covered under warranty, thereby reducing the cost impact on affected individuals. We do not control warranty coverage for affected individuals. As a result, we have included all available costs in our cost estimate.

Paperwork Reduction Act

A federal agency may not conduct or sponsor, and a person is not required to respond to, nor shall a person be subject to penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a current valid OMB control number. The control number for the collection of information required by this AD is 2120–0056. The paperwork cost associated with this AD has been detailed in the Costs of Compliance section of this document and includes time for reviewing instructions, as well as completing and reviewing the collection of information. Therefore, all reporting associated with this AD is mandatory. Comments concerning the accuracy of this burden and suggestions for reducing the burden should be directed to the FAA at 800 Independence Ave. SW., Washington, DC 20591, ATTN: Information Collection Clearance Officer, AES–200.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: ''General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979),

(3) Will not affect intrastate aviation in Alaska, and

(4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

Zodiac Aero Evacuation Systems: Docket No. FAA–2016–9392; Directorate Identifier 2016–NM–003–AD.

(a) Comments Due Date

We must receive comments by January 3, 2017.

(b) Affected ADs

None.

(c) Applicability

This AD applies to Zodiac Aero Evacuation Systems fusible plugs installed on emergency evacuation equipment. These affected fusible plugs might be installed on the emergency evacuation equipment of various transport airplanes, certificated in any category, including, but not limited to, the airplanes of manufacturers specified in paragraphs (c)(1), (c)(2), (c)(3), and (c)(4) of this AD.

(1) Airbus.

(2) The Boeing Company.

(3) BAE Systems (Operations) Limited.

(4) Fokker Services B.V.

(d) Subject

Air Transport Association (ATA) of America Code 25, Equipment/furnishings.

(e) Unsafe Condition

This AD was prompted by reports indicating that affected fusible plugs activated (vented gas) below the rated temperature. We are issuing this AD to detect and correct fusible plugs that might activate below the rated temperature, which renders the evacuation system unusable.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Fusible Plug Identification, and Replacement

Within 30 days after the effective date of this AD: Do an inspection to determine the part number and lot number of the fusible plugs installed in the emergency evacuation equipment (including all inflation valves, reservoir and valve assemblies, and evacuation slides, slides/rafts and liferafts). A review of airplane maintenance records is acceptable to make this determination if the part number and lot number of the fusible plugs can be conclusively determined from that review. If any fusible plug has part number (P/N) B13984–3, stamped with Lot PA–21 or PA–22: Before further flight, replace the fusible plug with a new part.

Note 1 to paragraph (g) of this AD: Guidance can be found in the applicable component maintenance manual for the replacement. In addition, Air Cruisers Service Information Letter 25–246, Rev. No. 1, dated February 21, 2014, provides information regarding affected fusible plugs and guidance on the replacement.

(h) Reporting

If any fusible plug having P/N B13984–3, stamped with Lot PA–21 or PA–22, is identified during the inspection required by paragraph (g) of this AD: At the time specified in paragraph (h)(1) or (h)(2) of this AD, report the finding to Air Cruisers, Attention Kelly Schmidt, 1747 State Route 34, Wall Township, NJ 07727–3935; fax: 732–681–9163; email: *aircruisers@zodiacaerospace.com.* Include the quantity of fusible plugs scrapped and the name of the company or service center.

(1) If any affected fusible plug was identified on or after the effective date of this AD: Submit the report within 30 days after the part number identification.

(2) If any affected fusible plug was identified before the effective date of this AD: Submit the report within 30 days after the effective date of this AD.

(i) Parts Installation Prohibition

As of the effective date of this AD, no person may install on any airplane any fusible plug having P/N B13984–3, stamped with Lot PA–21 or PA–22.

(j) Paperwork Reduction Act Burden Statement

A federal agency may not conduct or sponsor, and a person is not required to respond to, nor shall a person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a current valid OMB Control Number. The OMB Control Number for this information collection is 2120–0056. Public reporting for this collection of information is estimated to be approximately 5 minutes per response, including the time for reviewing instructions, completing and reviewing the collection of information. All responses to this collection of information are mandatory. Comments concerning the accuracy of this burden and suggestions for reducing the burden should be directed to the FAA at: 800 Independence Ave. SW., Washington, DC 20591, Attn: Information Collection Clearance Officer, AES–200.

(k) Alternative Methods of Compliance (AMOCs)

(1) The Manager, New York Aircraft Certification Office (ACO), ANE–170, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the ACO, send it to ATTN: Program Manager, Continuing Operational Safety, FAA, New York ACO, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone: 516–228–7300; fax: 516–794–5531.

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(l) Related Information

For more information about this AD, contact Cesar Gomez, Aerospace Engineer, Airframe and Mechanical Systems Branch, ANE–171, FAA, New York ACO, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone: 516–228–7318; fax: 516–794–5531.

Issued in Renton, Washington, on November 8, 2016.

Michael Kaszycki,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

Revisions to the Prevention of Significant Deterioration (PSD) and Title V Greenhouse Gas (GHG) Permitting Regulations and Establishment of a Significant Emissions Rate (SER) for GHG Emissions Under the PSD Program

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule; extension of comment period.

SUMMARY: On August 26, 2016, the Environmental Protection Agency (EPA) issued a proposed rule to revise provisions in the Prevention of Significant Deterioration (PSD) and title V permitting regulations applicable to greenhouse gases (GHGs) to fully conform with recent court decisions. The EPA is extending the comment period on this proposed rule that was scheduled to close on December 2, 2016. The EPA received a letter requesting the extension of the proposed rule public comment period to allow the public additional time to review the rule and supporting documentation.

DATES: The public comment period on the proposed rule published in the **Federal Register** on October 3, 2016 (81 FR 68110), is being extended. Written comments must be received on or before December 16, 2016.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–HQ–OAR–2015–0355, at *http://www.regulations.gov.* Follow the online instructions for submitting comments.

Once submitted, comments cannot be edited or removed from *Regulations.gov*. The EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.,* on the Web, Cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *http://www2.epa.gov/dockets/commenting-epa-dockets.*

FOR FURTHER INFORMATION CONTACT: For additional information on this action, contact Jessica Montañez, Office of Air Quality Planning and Standards, Environmental Protection Agency (C504–03), Research Triangle Park, North Carolina 27711; telephone number (919) 541–3407; fax number (919) 541–5509; email address: *montanez.jessica@epa.gov.*

SUPPLEMENTARY INFORMATION: After considering the request to extend the public comment period, the EPA has decided to extend the public comment period by 2 weeks, until December 16, 2016. This extension will ensure that the public has additional time to review the proposed rule and its supporting documents.

Dated: November 9, 2016.

Mary Henigin,

Acting Director, Office of Air Quality Planning and Standards.

Approval and Disapproval and Promulgation of Air Quality Implementation Plans; Interstate Transport for Wyoming

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing action on the portions of six submissions from the State of Wyoming that are intended to demonstrate that the State Implementation Plan (SIP) meets certain interstate transport requirements of the Clean Air Act (Act or CAA). These submissions address the 2006 and 2012 fine particulate matter ($PM_{2.5}$) National Ambient Air Quality Standards (NAAQS), 2008 ozone NAAQS, 2008 lead (Pb) NAAQS, 2010 sulfur dioxide (SO_2) NAAQS and 2010 nitrogen dioxide (NO_2) NAAQS. The interstate transport requirements under the CAA consist of four elements: Significant contribution to nonattainment (prong 1) and interference with maintenance (prong 2) of the NAAQS in other states; and interference with measures required to be included in the plan for other states to prevent significant deterioration of air quality (prong 3) or to protect visibility (prong 4). Specifically, the EPA is proposing to approve interstate transport prongs 1 and 2 for the 2008 Pb and 2010 NO_2 NAAQS, and proposing to approve prong 1 and disapprove prong 2 for the 2008 ozone NAAQS. The EPA is also proposing to approve interstate transport prong 4 for the 2008 Pb and 2010 SO_2 NAAQS, and proposing to disapprove prong 4 for the 2006 $PM_{2.5}$, 2008 ozone, 2010 NO_2 and 2012 $PM_{2.5}$ NAAQS.

DATES: Comments must be received on or before December 19, 2016.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R08–OAR–2016–0521 at *http://www.regulations.gov.* Follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from *www.regulations.gov.* The EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.,* on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *http://www2.epa.gov/dockets/commenting-epa-dockets.*

FOR FURTHER INFORMATION CONTACT: Adam Clark, Air Program, U.S. Environmental Protection Agency, Region 8, Mail Code 8P–AR, 1595 Wynkoop Street, Denver, Colorado 80202–1129. (303) 312–7104, *clark.adam@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. General Information

What should I consider as I prepare my comments for EPA?

1. *Submitting Confidential Business Information (CBI).* Do not submit CBI to EPA through *http://www.regulations.gov* or email. Clearly mark the part or all of the information that you claim to be CBI. For CBI information on a disk or CD–ROM that you mail to the EPA, mark the outside of the disk or CD–ROM as CBI and then identify electronically within the disk or CD–ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for preparing your comments.* When submitting comments, remember to:

- Identify the rulemaking by docket number and other identifying information (subject heading, **Federal Register** volume, date, and page number);
- Follow directions and organize your comments;
- Explain why you agree or disagree;
- Suggest alternatives and substitute language for your requested changes;
- Describe any assumptions and provide any technical information and/or data that you used;
- If you estimate potential costs or burdens, explain how you arrived at your estimate in sufficient detail to allow for it to be reproduced;
- Provide specific examples to illustrate your concerns, and suggest alternatives;
- Explain your views as clearly as possible, avoiding the use of profanity or personal threats; and
- Make sure to submit your comments by the comment period deadline identified.

II. Background

On September 21, 2006, the EPA revised the primary 24-hour NAAQS for $PM_{2.5}$ to 35 micrograms per cubic meter (μg/m³). 71 FR 61144 (Oct. 17, 2006). On March 12, 2008, the EPA revised the levels of the primary and secondary 8-hour ozone standards to 0.075 parts per million (ppm). 73 FR 16436 (Mar. 27, 2008). On October 15, 2008, the EPA revised the level of the primary and secondary Pb NAAQS to 0.15 μg/m³. 73 FR 66964 (Nov. 12, 2008). On January 22, 2010, the EPA promulgated a new 1-hour primary NAAQS for NO_2 at a level of 100 parts per billion (ppb) while retaining the annual standard of 53 ppb. 75 FR 6474 (Feb. 9, 2010). The secondary NO_2 NAAQS remains unchanged at 53 ppb. On June 2, 2010, the EPA promulgated a revised primary 1-hour SO_2 standard at 75 ppb. 75 FR 35520 (June 22, 2010). Finally, on December 14, 2012, the EPA promulgated a revised annual $PM_{2.5}$ standard by lowering the level to 12.0 μg/m³ and retaining the 24-hour $PM_{2.5}$ standard at a level of 35 μg/m³. 78 FR 3086 (Jan. 15, 2013).

Pursuant to section 110(a)(1) of the CAA, states are required to submit SIPs meeting the applicable requirements of section 110(a)(2) within three years after promulgation of a new or revised NAAQS or within such shorter period as the EPA may prescribe. Section 110(a)(2) requires states to address structural SIP elements such as requirements for monitoring, basic program requirements, and legal authority that are designed to provide for implementation, maintenance and enforcement of the NAAQS. The SIP submission required by these provisions is referred to as the ''infrastructure'' SIP. Section 110(a) imposes the obligation upon states to make a SIP submission to the EPA for a new or revised NAAQS, but the contents of individual state submissions may vary depending upon the facts and circumstances.

CAA Section 110(a)(2)(D)(i)(I) requires SIPs to include provisions prohibiting any source or other type of emissions activity in one state from emitting any air pollutant in amounts that will contribute significantly to nonattainment, or interfere with maintenance, of the NAAQS in another state. The two provisions of this section are referred to as prong 1 (significant contribution to nonattainment) and prong 2 (interfere with maintenance). Section 110(a)(2)(D)(i)(II) requires SIPs to contain adequate provisions to prohibit emissions that will interfere with measures required to be included in the applicable implementation plan for any other state under part C to prevent significant deterioration of air quality (prong 3) or to protect visibility (prong 4).

The Wyoming Department of Environmental Quality (Department or WDEQ) submitted the following: A certification of Wyoming's infrastructure SIP for the 2006 $PM_{2.5}$ NAAQS on August 19, 2011; a certification of Wyoming's infrastructure SIP for the 2008 Pb SIP on October 12, 2011; a certification of Wyoming's infrastructure SIP for the 2008 ozone NAAQS on February 6, 2014; a certification of Wyoming's infrastructure SIP for the 2010 NO_2 NAAQS on January 24, 2014; a certification of Wyoming's infrastructure SIP for the 2010 SO_2 NAAQS on March 6, 2015; and a certification of Wyoming's infrastructure SIP for the 2012 $PM_{2.5}$ on June 24, 2016.

Each of these infrastructure certifications addressed all of the infrastructure elements including section 110(a)(2)(D)(i)(I), referred to as infrastructure element (D).[1] In this action, we are only addressing element (D) prongs 1, 2 and 4 for the 2008 Pb certification, 2008 ozone certification and 2010 NO_2 certification, and prong 4 from the 2010 SO_2 and 2006 and 2012 $PM_{2.5}$ certifications. All other infrastructure elements from these certifications, including element (D) prong 3 (prevent significant deterioration of air quality), have been or will be addressed in separate actions.

III. Evaluation of Significant Contribution to Nonattainment and Interference With Maintenance of the NAAQS

2008 Ozone NAAQS

In its February 6, 2014 infrastructure submittal for the 2008 ozone NAAQS, WDEQ addressed 110(a)(2)(D)(i)(I) prongs 1 and 2 by presenting ambient monitoring and wind rose data, among other information,[2] to determine that emissions from Wyoming do not significantly contribute to nonattainment or interfere with maintenance of the 2008 ozone NAAQS in any other state. WDEQ focused its analysis on nearby designated nonattainment areas, and in particular, on a nonattainment area in and around Denver, Colorado.[3] Specifically, WDEQ pointed to the attaining ozone data at a Cheyenne, Wyoming monitor, which is the monitor in Wyoming that is geographically located closest to the Denver, Colorado 2008 ozone nonattainment area. WDEQ also provided wind rose data in Cheyenne, Wyoming, which showed that prevailing winds in Cheyenne came from the west and northwest, which WDEQ asserts indicates the transport of air pollutants is away from the Denver nonattainment area, which is located 30 miles south of the southeastern Wyoming border. WDEQ concludes that the combination of low ozone monitor values in Cheyenne, Wyoming, and prevailing winds provided evidence that emissions from Wyoming do not significantly influence air quality in the Denver ozone nonattainment area. WDEQ also noted that downwind states Kansas, Nebraska, North Dakota and South Dakota did not contain nonattainment areas to which Wyoming could significantly contribute. Accordingly, WDEQ concludes that emissions from Wyoming do not contribute to nonattainment or interfere with maintenance for the 2008 ozone NAAQS in any other state.

WDEQ's approach to evaluating its compliance with the CAA section 110(a)(2)(D)(i)(I) as to the 2008 ozone NAAQS is incomplete for two reasons. First, transported emissions may cause an area to measure exceedances of the standard even if that area is not formally designated nonattainment by the EPA. While WDEQ considered its potential impact to the Denver nonattainment area based on general wind patterns, the State did not provide analysis showing that it did not contribute to ozone levels in the Denver nonattainment area on the particular days with measured exceedances. Moreover, while the State considered whether there were designated nonattainment areas in four of several nearby states, WDEQ did not evaluate whether it contributed to ozone levels elsewhere in Colorado or in other nearby states (*e.g.,* in Utah) on the days with measured exceedances, whether or not those exceedances occurred in designated nonattainment areas. The EPA has routinely interpreted the obligation to prohibit emissions that ''significantly contribute to nonattainment'' of the NAAQS in downwind states to be independent of formal designations because exceedances can happen in any area.[4]

[1] For discussion of other infrastructure elements, see EPA's ''Guidance on Infrastructure State Implementation Plan (SIP) Elements under Clean Air Act Sections 110(a)(1) and (2),'' September 13, 2013.

[2] The State also provided census data and geographic information to support their assertion regarding prongs 1 and 2 in the February 6, 2014 submittal.

[3] The Denver area, including 7 full counties and 2 partial counties, was designated as a marginal nonattainment area in a final action dated May 21, 2012. See 77 FR 30110.

[4] *See, e.g.,* Clean Air Interstate Rule, 70 FR 25162, 25265 (May 12, 2005) (''As to impacts, CAA section 110(a)(2)(D) refers only to prevention of 'nonattainment' in other States, not to prevention of nonattainment in designated nonattainment areas or

Continued

Thus, WDEQ did not fully evaluate whether emissions from the State significantly contribute to nonattainment in other states as required by prong 1 of element (D).

Second, WDEQ's submission does not provide any technical analysis demonstrating that the SIP contains adequate provisions prohibiting emissions that will interfere with maintenance of the 2008 ozone NAAQS in any other state (prong 2). In remanding the Clean Air Interstate Rule (CAIR) to the EPA in *North Carolina* v. *EPA,* the D.C. Circuit explained that the regulating authority must give the ''interfere with maintenance'' clause of section 110(a)(2)(D)(i)(I) ''independent significance'' by evaluating the impact of upwind state emissions on downwind areas that, while currently in attainment, are at risk of future nonattainment, considering historic variability.[5] Wyoming does not give the ''interfere with maintenance'' clause of section 110(a)(2)(D)(i)(I) independent significance because its analysis did not evaluate the potential impact of Wyoming emissions on areas that are currently measuring clean data, but that may have issues maintaining that air quality.

The EPA developed technical information and a related analysis to assist states with meeting section 110(a)(2)(D)(i)(I) requirements for the 2008 ozone NAAQS, and used this technical analysis to support the recently finalized Cross-State Air Pollution Rule Update for the 2008 Ozone NAAQS (''CSAPR Update'').[6] As explained below, this analysis supports the conclusions of WDEQ's analysis for prong 1 and contradicts the conclusions of WDEQ's analysis regarding prong 2.

In the technical analysis supporting the CSAPR Update, the EPA used detailed air quality analyses to determine where projected nonattainment or maintenance areas would be and whether emissions from an eastern state contribute to downwind air quality problems at those projected nonattainment or maintenance receptors.[7] Specifically, the EPA determined whether a state's contributing emissions were at or above a specific threshold (*i.e.,* one percent of the ozone NAAQS). If a state's contribution did not exceed the one percent threshold, the state was not considered ''linked'' to identified downwind nonattainment and maintenance receptors and was therefore not considered to significantly contribute to nonattainment or interfere with maintenance of the standard in those downwind areas. If a state's contribution was equal to or exceeded the one percent threshold, that state was considered ''linked'' to the downwind nonattainment or maintenance receptor(s) and the state's emissions were further evaluated, taking into account both air quality and cost considerations, to determine what, if any, emissions reductions might be necessary to address the state's obligation pursuant to CAA section 110(a)(2)(D)(i)(I).

As discussed in the CSAPR Update, the air quality modeling contained in the EPA's technical analysis (1) identified locations in the U.S. where the EPA anticipates nonattainment or maintenance issues in 2017 for the 2008 ozone NAAQS (these are identified as nonattainment and maintenance receptors), and (2) quantified the projected contributions from emissions from upwind states to downwind ozone concentrations at the receptors in 2017. *See* CSAPR Update at 81 FR 74526. This modeling used the Comprehensive Air Quality Model with Extensions (CAMx version 6.11) to model the 2011 base year, and the 2017 future base case emissions scenarios to identify projected nonattainment and maintenance sites with respect to the 2008 8-hour ozone NAAQS in 2017. The EPA used nationwide state-level ozone source apportionment modeling (the CAMx Ozone Source Apportionment Technology/Anthropogenic Precursor Culpability Analysis technique) to quantify the contribution of 2017 base case nitrogen oxides (NO_X) and volatile organic compounds (VOC) emissions from all sources in each state to the 2017 projected receptors. The air quality model runs were performed for a modeling domain that covers the 48 contiguous states in the U.S. and adjacent portions of Canada and Mexico. *Id.* at 81 FR 74526 through 74527. The updated modeling data released to support the final CSAPR Update are the most up-to-date information the EPA has developed to inform our analysis of upwind state linkages to downwind air quality problems for the 2008 ozone NAAQS. *See* ''Air Quality Modeling Final Rule Technical Support Document for the Final CSAPR Update'' in the docket for this action for more details regarding the EPA's modeling analysis.

Consistent with the framework established in the original CSAPR rulemaking, the EPA's technical analysis in support of the CSAPR Update applied a threshold of one percent of the 2008 ozone NAAQS of 75 ppb (0.75 ppb) to identify linkages between upwind states and the downwind nonattainment and maintenance receptors. *See* CSAPR Update at 81 FR 74518 through 74519. The EPA considered eastern states whose contributions to a specific receptor meet or exceed the threshold ''linked'' to that receptor and we analyzed these states further to determine if emissions reductions might be required from each state to address the downwind air quality problem. The EPA determined that one percent was an appropriate threshold to use in that analysis because there were important, even if relatively small, contributions to identified nonattainment and maintenance receptors from multiple upwind states. In response to commenters who advocated a higher or lower threshold than one percent, the EPA compiled the contribution modeling results for the CSAPR Update to analyze the impact of different possible thresholds for the eastern United States. The EPA's analysis showed that the one percent threshold captures a high percentage of the total pollution transport affecting downwind states. The EPA's analysis further showed that the application of a lower threshold would result in relatively modest increases in the overall percentage of ozone transport pollution captured, while the use of higher thresholds would result in a relatively large reduction in the overall percentage of ozone pollution transport captured relative to the levels captured at one percent at the majority of the receptors. *Id.; See also* Air Quality Modeling Final Rule Technical Support Document for the Final CSAPR Update, Appendix F, Analysis of Contribution Thresholds. This approach is consistent with the use of a one percent threshold to identify those states ''linked'' to air quality

any similar formulation requiring that designations for downwind nonattainment areas must first have occurred.''); Cross-State Air Pollution Rule, 76 FR 48208, 48211 (Aug. 8, 2011) (evaluating nonattainment and maintenance concerns based on modeled projections); Brief for Respondents U.S. Environmental Protection Agency at 23–24, *EME Homer City Generation, L.P.* v. *EPA,* Case No. 11–1302 (D.C. Cir. Jan. 16, 2015), ECF No. 1532516 (defending the EPA's identification of air quality problems in CSAPR independent of area designations). *Cf.* Final Response to Petition from New Jersey Regarding SO_2 Emissions From the Portland Generating Station, 76 FR 69052 (Nov. 7, 2011) (finding facility in violation of the prohibitions of CAA section 110(a)(2)(D)(i)(I) with respect to the 2010 SO_2 NAAQS prior to issuance of designations for that standard).

[5] 531 F.3d 896, 910–11 (D.C. Cir. 2008) (holding that the EPA must give ''independent significance'' to each prong of CAA section 110(a)(2)(D)(i)(I)).

[6] 81 FR 74504 (Oct. 26, 2016).

[7] For purposes of the CSAPR Update, ''eastern'' states refer to all contiguous states east of the Rocky Mountains, specifically not including: Montana, Wyoming, Colorado and New Mexico.

problems with respect to the 1997 ozone NAAQS in the original CSAPR rulemaking, wherein the EPA noted that there are adverse health impacts associated with ambient ozone even at low levels. 76 FR 48208, 48236 through 48237 (August 8, 2011).

As to western states, the EPA noted in the CSAPR Update that there may be geographically specific factors to consider in evaluating interstate transport, and given the near-term 2017 implementation timeframe, the EPA focused the final CSAPR Update on eastern states. *See* CSAPR Update at 81 FR 74523. Consistent with our statements in the CSAPR Update, the EPA intends to address western states, like Wyoming, on a case-by-case basis.

The EPA's air quality modeling as updated for the final CSAPR Update projects that for the Western U.S. (outside of California), there are no nonattainment receptors and only three maintenance receptors located in the Denver, Colorado area. Wyoming emissions are projected to contribute above one percent of the NAAQS at one of these receptors (the ''Douglas County maintenance receptor''; see Table 1, below). The modeling also shows that multiple upwind states would collectively contribute to the projected Douglas County maintenance receptor in Colorado. The EPA found that the contribution to ozone concentrations from all states upwind of the Douglas County maintenance receptor in Colorado is about 9.7 percent.[8] Thus, the collective contribution of emissions from upwind states represents a large portion of the ozone concentrations at the projected Douglas County maintenance receptor in Colorado.

As noted, the Agency has historically found that the one percent threshold is appropriate for identifying interstate transport linkages for states collectively contributing to downwind ozone nonattainment or maintenance problems because that threshold captures a high percentage of the total pollution transport affecting downwind receptors. The EPA believes contribution from an individual state equal to or above one percent of the NAAQS could be considered significant where the collective contribution of emissions from one or more upwind states is responsible for a considerable portion of the downwind air quality problem regardless of where the receptor is geographically located. In this case, three states contributing to the Douglas County maintenance receptor, including Wyoming, contribute emissions greater than or equal to one percent of the 2008 ozone NAAQS. Given these data, the EPA is proposing to find that the one percent threshold is also appropriate to determine the linkage from Wyoming to the Douglas County maintenance receptor in Colorado with respect to the 2008 ozone NAAQS.

The EPA is not necessarily determining that one percent of the NAAQS is always an appropriate threshold for identifying interstate transport linkages for all states in the West. For example, the EPA recently evaluated the impact of emissions from Arizona on two projected nonattainment receptors identified in California and concluded that even though Arizona's modeled contribution was greater than one percent of the 2008 ozone NAAQS, Arizona did not significantly contribute to nonattainment or interfere with maintenance at those receptors. *See* Proposed Rule, 81 FR 15202 (March 22, 2016); Final Rule, 81 FR 31513 (May 19, 2016). The EPA evaluated the nature of the ozone nonattainment problem at the California receptors and determined that, unlike the receptors identified in the East and unlike the Douglas County maintenance receptor to which Wyoming contributes, only one state—Arizona—contributed above the one percent threshold to the California receptors and that the total contribution from all states linked to the receptors was negligible. *See* 81 FR at 15203. Considering this information, along with emissions inventories and emissions projections showing Arizona emissions decreasing over time, the EPA determined that Arizona had satisfied the requirements of section 110(a)(2)(D)(i)(I) with respect to the 2008 ozone NAAQS. *Id.* Accordingly, where the facts and circumstances support a different conclusion, the EPA has not directly applied the one percent threshold to identify states which may significantly contribute to nonattainment or interfere with maintenance of the 2008 ozone NAAQS in other states.

Likewise, the EPA is not determining that because Wyoming contributes above the one percent threshold, it is necessarily making a significant contribution that warrants further reductions in emissions. As noted above, the one percent threshold identifies a state as ''linked,'' prompting further inquiry into whether the contributions are significant and whether there are cost-effective controls that can be employed. That inquiry with regard to Wyoming's SIP submittal is provided below.

In summary, Table 1 shows the air quality modeling results from the final modeling in support of the CSAPR Update. The modeling indicates that Wyoming contributes emissions above the one percent threshold of 0.75 ppb with respect to the Douglas County maintenance receptor in the Denver, Colorado area.

TABLE 1—MAINTENANCE RECEPTOR WITH WYOMING CONTRIBUTION MODELED ABOVE

Monitor I.D.	State	County	Wyoming modeled contribution (ppb)
80350004	Colorado	Douglas ..	1.18

Wyoming's largest contribution to any projected downwind maintenance-only site is 1.18 ppb, which is approximately 1.57% of the 2008 ozone NAAQS of 75 ppb. Thus, the final modeling in support of the CSAPR Update indicates that the contributions from Wyoming are above the one percent threshold of 0.75 ppb with respect to the Douglas County maintenance receptor in the Denver, Colorado area, and the State's emissions require further evaluation, taking into account both air quality and cost considerations, to determine what, if any, emissions reductions might be necessary to address the State's emission reduction obligation pursuant to 110(a)(2)(D)(i)(I). However, WDEQ in its SIP submittal neither identified nor included any ozone or ozone precursor emission reduction measures that the EPA could evaluate to determine whether the state has fully addressed these transport impacts. Accordingly, the EPA cannot conclude that Wyoming's SIP contains sufficient provisions to prohibit emissions that will interfere with maintenance of the 2008 ozone NAAQS in the Denver, Colorado area.

WDEQ's analysis regarding prong 1 is also incomplete as previously described, but the EPA's modeling indicates that Wyoming does not contribute above the one percent threshold to any nonattainment receptors. As discussed above, while the EPA is not necessarily determining that one percent of the NAAQS is always an appropriate threshold for identifying interstate transport linkages for all states in the West, this low level of contribution suggests that Wyoming does not contribute significantly to nonattainment of the 2008 ozone NAAQS in any other state. Thus, the EPA is proposing that the Wyoming SIP meets the 110(a)(2)(D)(i) prong 1 requirement for the 2008 ozone NAAQS.

[8] Please see the spreadsheet titled ''Final CSAPR Update—Ozone Design Values & Contributions,'' in the docket for this action.

Based on WDEQ's SIP submittal and the EPA's most recent modeling, the EPA proposes to approve prong 1 and disapprove the prong 2 portion of the February 6, 2014, 2008 ozone NAAQS infrastructure submittal. The EPA is soliciting public comments on this proposed action and will consider public comments received during the comment period.

2008 Pb NAAQS

WDEQ's analysis of potential interstate transport for the 2008 Pb NAAQS discussed the lack of sources with significant Pb emissions near the State's borders. As noted in our October 14, 2011 Infrastructure Guidance Memo, there is a sharp decrease in Pb concentrations, at least in the coarse fraction, as the distance from a Pb source increases. *See* ''Guidance on Infrastructure SIP Elements Required Under Sections 110(a)(1) and (2) for the 2008 Lead (Pb) National Ambient Air Quality Standards (NAAQS).'' October 14, 2011 at 8. For this reason, the EPA found that the requirements of subsection 110(a)(2)(D)(i)(I) (prongs 1 and 2) could be satisfied through a state's assessment as to whether or not emissions from Pb sources located in close proximity to their state borders have emissions that impact the neighboring state such that they contribute significantly to nonattainment or interfere with maintenance in that state. *Id.* at 8. In that guidance document, the EPA further specified that any source appeared unlikely to contribute significantly to nonattainment unless it was located less than two miles from a state border and emitted at least 0.5 tons per year of Pb. WDEQ's 110(a)(2)(D)(i)(I) analysis noted that there are no Pb sources within two miles of the State's borders. The EPA concurs with the Department's analysis and conclusion that no Wyoming sources have the combination of Pb emission levels and proximity to nearby nonattainment or maintenance areas to contribute significantly to nonattainment in or interfere with maintenance by other states for this NAAQS. Since Wyoming's SIP is therefore adequate to ensure that such impacts do not occur, the EPA is proposing to approve WDEQ's submittal with regard to the requirements of section 110(a)(2)(D)(i) prongs 1 and 2 for the 2008 Pb NAAQS.

2010 NO_2 NAAQS

Wyoming's 2010 NO_2 transport analysis for elements 1 and 2 of section 110(a)(2)(D)(i) describes how all NO_2 monitors within the State and elsewhere in the U.S. showed no violations of the NO_2 NAAQS. WDEQ asserted that because the entire country had been designated unclassifiable/attainment for the 2010 NO_2 NAAQS, Wyoming sources do not contribute significantly to nonattainment or interfere with maintenance of the NAAQS in other states. The Department's analysis is available in the docket for this action.

The EPA does not agree with the Wyoming's reliance on area designations for purposes of determining whether the State has met the requirements of section 110(a)(2)(D)(i)(I) with respect to the 2010 NO_2 NAAQS. As noted above, the EPA has routinely interpreted the obligation to prohibit emissions that significantly contribute to nonattainment or interfere with maintenance of the NAAQS in downwind states to be independent of formal designations because exceedances can happen in any area. However, for the reasons explained below, the EPA concurs with the conclusion that emissions from the state do not significantly contribute to nonattainment or interfere with maintenance of the 2010 NO_2 NAAQS in any other state.

Due to the State's limited technical analysis, the EPA evaluated NO_2 monitoring data from Wyoming and surrounding states in reaching its conclusion. The EPA notes that the highest monitored NO_2 design values in each state bordering or near Wyoming are significantly below the NAAQS (see Table 2).[9] The EPA has determined that this information supports the State's contention that it does not significantly contribute to nonattainment or interfere with maintenance of the NO_2 NAAQS. As shown in Table 2, the maximum design values in states bordering Wyoming are well below the 2010 NO_2 NAAQS. As the states near Wyoming are not only attaining, but also maintaining the NAAQS, there are no areas to which Wyoming could significantly contribute to nonattainment or interfere with maintenance of the 2010 NO_2 NAAQS.

TABLE 2—HIGHEST MONITORED 2010 NO_2 NAAQS DESIGN VALUES

State	2013–2015 design value (ppb)	% of NAAQS (100 ppb)
Colorado	72	72
Idaho	43	43
Montana	[10] 29	29
South Dakota	37	37
Utah	65	65

***Source:** *https://www.epa.gov/air-trends/air-quality-design-values*.

In addition to the monitored levels of NO_2 in states near Wyoming being well below the NAAQS, Wyoming's highest official design value from 2013–2015 was also significantly below this NAAQS – 49 ppb, compared to the NAAQS level of 100 ppb.[11]

Based on all of these factors, EPA concurs with the State's conclusion that Wyoming does not contribute significantly to nonattainment or interfere with maintenance of the 2010 NO_2 NAAQS in other states. The EPA is therefore proposing to determine that Wyoming's SIP includes adequate provisions to prohibit sources or other emission activities within the State from emitting NO_2 in amounts that will contribute significantly to nonattainment in or interfere with maintenance by any other state with respect to the NO_2 NAAQS.

IV. Evaluation of Interference With Measures To Protect Visibility

State Submissions

In Wyoming's 2008 ozone, 2010 SO_2, 2010 NO_2 and 2012 $PM_{2.5}$ NAAQS infrastructure certifications, the Department pointed to both its Regional Haze SIP and Wyoming Air Quality Standards and Regulations (WAQSR) Chapter 9, Section 2, ''Visibility,'' to certify that the State meets the visibility requirements of section 110(a)(2)(D)(i)(II) (prong 4). As explained below, this information is relevant in determining whether Wyoming's SIP will achieve the emission reductions that the Western Regional Air Partnership (WRAP) states mutually agreed are necessary to avoid interstate visibility impacts in Class I areas. *See* ''Guidance on Infrastructure State Implementation Plan (SIP) Elements under Clean Air Act Sections 110(a)(1) and (2),'' September 13, 2013, (''2013 Guidance'') at 34.

WDEQ addressed visibility for the 2008 Pb NAAQS by pointing to the lack of significant sources of Pb in Wyoming near the State's border. *Id.* at 33. The

[9] There is not an NO_2 design value presented for Nebraska, as none is available in EPA's Air Trends or AirData Web sites.

[10] The design values for Montana and Utah were derived using EPA's AirData Web site at *https://www3.epa.gov/airdata/ad_rep_mon.html.* These are not official design values.

[11] *https://www.epa.gov/air-trends/air-quality-design-values.*

State did not point to any visibility-related state regulations in its 2006 $PM_{2.5,}$ certification, but generally indicated that they met this requirement.

Wyoming's Regional Haze SIP

As stated in the EPA's 2013 Guidance, ''[o]ne way in which prong 4 may be satisfied for any relevant NAAQS is through an air agency's confirmation in its infrastructure SIP submission that it has an approved regional haze SIP that fully meets the requirements of 40 CFR 51.308 or 51.309. 40 CFR 51.308 and 51.309 specifically require that a state participating in a regional planning process include all measures needed to achieve its apportionment of emission reduction obligations agreed upon through that process.'' *Id.* at 33.

On January 12, 2011 and April 19, 2012, Wyoming submitted to the EPA SIP revisions to address the requirements of the regional haze program. The EPA approved Wyoming's April 19, 2012 submittal and partially approved Wyoming's January 12, 2011 submittal in a final action published December 12, 2012. 77 FR 73926. This included EPA approval of Wyoming's BART alternative for SO_2, which relied on the State's participation in the backstop SO_2 trading program under 40 CFR 51.309.[12] In a separate action, the EPA partially approved and partially disapproved the remainder of Wyoming's January 12, 2011 SIP revision. 79 FR 5032 (Jan. 30, 2014). In that action, the EPA disapproved the following portions of the submittal: Wyoming's NO_X Best Available Retrofit Technology (BART) determinations for five units at three facilities; the State's reasonable progress goals; monitoring, recordkeeping and reporting requirements; portions of the long term strategy, and; the provisions necessary to review reasonably attributable visibility improvement. *Id.* at 5038. The EPA also promulgated a final federal implementation plan (FIP) to address these deficiencies. *Id.*

EPA's Assessment

The 2013 Guidance states that section 110(a)(2)(D)(i)(II)'s prong 4 requirements can be satisfied by approved SIP provisions that the EPA has found to adequately address a state's contribution to visibility impairment in other states. The EPA interprets prong 4 to be pollutant-specific, such that the infrastructure SIP submission need only address the potential for interference with protection of visibility caused by the pollutant (including precursors) to which the new or revised NAAQS applies. *See* 2013 Guidance at 33.

The 2013 Guidance lays out two ways in which a state's infrastructure SIP submittal may satisfy prong 4. As explained above, one way is through a state's confirmation in its infrastructure SIP submittal that it has an EPA approved regional haze SIP in place. Alternatively, in the absence of a fully approved regional haze SIP, a state can make a demonstration in its infrastructure SIP submittal that emissions within its jurisdiction do not interfere with other states' plans to protect visibility. Such a submittal should point to measures in the state's SIP that limit visibility-impairing pollutants and ensure that the resulting reductions conform to any mutually agreed emission reductions under the relevant regional haze regional planning organization (RPO) process.[13]

WDEQ worked through its RPO, the WRAP, to develop strategies to address regional haze. To help states in establishing reasonable progress goals for improving visibility in Class I areas, the WRAP modeled future visibility conditions based on the mutually agreed emissions reductions from each state. The WRAP states then relied on this modeling in setting their respective reasonable progress goals. As a result, we consider emissions reductions from measures in Wyoming's SIP that conform with the level of emission reductions the State agreed to include in the WRAP modeling to meet the visibility requirement of CAA section 110(a)(2)(D)(i)(II).

With regard to the 2010 SO_2 NAAQS, the EPA proposes to find that the State's implementation of the Western Backstop Sulfur Dioxide Trading Program and the agreed upon SO_2 reductions achieved through that program sufficient to meet the requirements of prong 4.[14] Under 40 CFR 51.309, certain states, including Wyoming, can satisfy their SO_2 BART requirements by adopting an alternative program consisting of SO_2 emission milestones and a backstop trading program. *See* 40 CFR 51.309. Wyoming Air Quality Standards and Regulations (WAQSR) Chapter 14, section 2 implements the backstop trading program provisions and the EPA has approved the State's rules, including the SO_2 reduction milestones, as satisfying its regional haze SO_2 obligations. 77 FR 73926 (Dec. 12, 2012). Wyoming's SIP thus contains measures requiring reductions of SO_2 consistent with what the State agreed to achieve under the WRAP process in order to protect visibility. As a result, the EPA is proposing to approve 110(a)(2)(D)(i)(II) prong 4 for the 2010 SO_2 NAAQS.

The EPA is also proposing to approve Wyoming's prong 4 SIP submittal for the 2008 Pb NAAQS. The EPA has found that significant impacts from Pb emissions from stationary sources are expected to be limited to short distances from the source. The State noted that it does not have any major sources of Pb located near any bordering state. Further, when evaluating the extent to which Pb could impact visibility, the EPA has found Pb-related visibility impacts insignificant (*e.g.,* less than 0.10 percent). *See* 2013 Guidance, at 33. The EPA proposes to approve prong 4 for the 2008 Pb NAAQS based on Wyoming's conclusion that it does not have any significant sources of lead emissions near another state's border and that it, therefore, does not have emissions of Pb that would interfere with the requirements of section 110(a)(2)(D)(i)(II) with respect to visibility.

The EPA is proposing to disapprove Wyoming's prong 4 infrastructure SIP submittals for the 2006 $PM_{2.5}$, 2008 ozone, 2010 NO_2, and 2012 $PM_{2.5}$ NAAQS. The EPA's disapproval of Wyoming's NO_X BART determination in our January 30, 2014 final rulemaking included the specific disapproval of the NOx control measures the State submitted for PacifiCorp Dave Johnston Unit 3, PacifiCorp Wyodak Unit 1, and Basin Electric Laramie River Units 1, 2 and 3. *See* 79 FR 5038.

As noted, Wyoming referenced both its Regional Haze SIP and WAQSR Chapter 9, Section 2 as justification for the approvability of prong 4 for the 2008 ozone, 2010 NO_2 and 2012 $PM_{2.5}$ NAAQS. Because the Department did not provide an alternative demonstration that its SIP contains measures to limit NO_X emissions in accordance with the emission reductions it agreed to under the WRAP,[15] the EPA's disapproval of portions of Wyoming's NOx BART determination means that Wyoming's SIP does not include measures needed to ensure that its emissions will not

[12] Wyoming's ''Western Backstop Sulfur Dioxide Trading Program'' can be found in Wyoming Air Quality Standards and Regulations (WAQSR) Chapter 14, Section 2.

[13] *See id.* at 34, and also 76 *FR* 22036 (April 20, 2011) containing EPA's approval of the visibility requirement of 110(a)(2)(D)(i)(II) based on a demonstration by Colorado that did not rely on the Colorado Regional Haze SIP.

[14] Specifically, the State is required to reach its ''emissions milestone'' for this program by keeping its SO_2 emissions below 141,849 tons/SO_2 in 2018 and each year thereafter.

[15] The Visibility section of WAQSR Chapter 9, Section 2 does not address NOx emissions reductions.

interfere with other states' plans to protect visibility from the effects of NAAQS pollutants impacted by NOx. Specifically, NOx is a precursor of $PM_{2.5}$ and ozone, and is also a term which refers to both NO (nitrogen oxide) and NO_2. The EPA is therefore proposing to disapprove prong 4 of Wyoming's infrastructure certifications with regard to the 2006 $PM_{2.5}$, 2008 ozone, 2010 NO_2 and 2012 $PM_{2.5}$ NAAQS.

If the EPA disapproves an infrastructure SIP submission for prong 4, as we are proposing for the 2006 $PM_{2.5}$, 2008 ozone, 2010 NO_2 and 2012 $PM_{2.5}$ NAAQS, a FIP obligation will be created. However, as noted previously, the EPA has promulgated a FIP for Wyoming that corrects all regional haze SIP deficiencies. 79 FR 5032. Therefore, there will be no additional practical consequences from the disapproval for WDEQ, the sources within its jurisdiction, or the EPA, and the EPA will not be required to take further action with respect to these prong 4 disapprovals, if finalized, because the FIP already in place would satisfy the requirements with respect to prong 4. *See* 2013 Guidance at 34–35. Additionally, since the infrastructure SIP submission is not required in response to a SIP call under CAA section 110(k)(5), mandatory sanctions under CAA section 179 would not apply because the deficiencies are not with respect to a submission that is required under CAA title I part D. *Id.*

V. Proposed Action

The EPA is proposing to approve CAA section 110(a)(2)(D)(i)(I) prongs 1, 2 and 4 for the 2008 Pb NAAQS, prong 1 for the 2008 ozone NAAQS, and prong 4 for the 2010 SO_2 NAAQS, as shown in Table 3, below. The EPA is also proposing to disapprove prong 4 for the 2006 $PM_{2.5}$, 2008 ozone, 2010 NO_2 and 2012 $PM_{2.5}$ NAAQS, and prong 2 for the 2008 ozone NAAQS, as shown in Table 4. The EPA is soliciting public comments on this proposed action and will consider public comments received during the comment period.

VI. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, the EPA's role is to approve state actions, provided that they meet the criteria of the Clean Air Act. Accordingly, this proposed action merely proposes approval of some state law as meeting federal requirements and proposes disapproval of other state law because it does not meet federal requirements; this proposed action does not propose additional requirements beyond those imposed by state law. For that reason, this proposed action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the Clean Air Act; and
- Does not provide the EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, the SIP does not apply on any Indian reservation land or in any other area where the EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the proposed rule does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

DEPARTMENT OF AGRICULTURE

Submission for OMB Review; Comment Request

November 15, 2016.

The Department of Agriculture has submitted the following information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104–13. Comments are requested regarding (1) whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Comments regarding this information collection received by December 19, 2016 will be considered. Written comments should be addressed to: Desk Officer for Agriculture, Office of Information and Regulatory Affairs, Office of Management and Budget (OMB), New Executive Office Building, 725 17th Street NW., Washington, DC 20502. Commenters are encouraged to submit their comments to OMB via email to: *OIRA_Submission@OMB.EOP.GOV* or fax (202) 395–5806 and to Departmental Clearance Office, USDA, OCIO, Mail Stop 7602, Washington, DC 20250–7602. Copies of the submission(s) may be obtained by calling (202) 720–8958.

An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

Food Safety and Inspection Service

Title: Interstate Shipment of Meat and Poultry.

OMB Control Number: 0583–0143.

Summary of Collection: The Food Safety and Inspection Service (FSIS) has been delegated the authority to exercise the functions of the Secretary as provided in the Federal Meat Inspection Act (FMIA) (21 U.S.C. 601 *et seq.*) and the Poultry Products Inspection Act (PPIA) (21 U.S.C. 451 *et seq.*). These statutes mandate that FSIS protect the public by ensuring that meat and poultry products are safe, wholesome, not adulterated, and properly labeled and packaged. Section 11015 of the Food, Conservation, and Energy Act, enacted on June 18, 2008, and amended the FMIA and PPIA to provide for cooperative programs whereby meat and poultry state-inspected establishments will be eligible to ship meat and poultry products in interstate commerce.

Need and Use of the Information: FSIS coordinates a voluntary cooperative program under which participating state-inspected establishments with 25 or fewer employees are eligible to ship meat and poultry products in interstate commerce. States that are interested in participating in the cooperative interstate shipment program must submit a request for an agreement to establish such a program through the appropriate FSIS District Office. In their requests, States must agree to comply with certain conditions in order to qualify for the interstate shipment program. In their request, States must also: (1) Identify establishments in the State that the State recommends for initial selection into the program and (2) include documentation to demonstrate that the State is able to provide necessary inspections services to selected establishments in the State and conduct any related activities that would be required under a cooperative interstate shipment program.

Description of Respondents: Business or other for-profit.

Number of Respondents: 80.

Frequency of Responses: Reporting: On occasion.

Total Burden Hours: 2,005.

Ruth Brown,

Departmental Information Collection Clearance Officer.

[FR Doc. 2016–27774 Filed 11–17–16; 8:45 am]

BILLING CODE 3410–DM–P

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. APHIS–2016–0060]

International Sanitary and Phytosanitary Standard-Setting Activities

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice and request for comments.

SUMMARY: In accordance with legislation implementing the results of the Uruguay Round of negotiations under the General Agreement on Tariffs and Trade, we are informing the public of the international standard-setting activities of the World Organization for Animal Health, the Secretariat of the International Plant Protection Convention, and the North American Plant Protection Organization, and we are soliciting public comment on the standards to be considered.

ADDRESSES: You may submit comments by either of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov/#!docketDetail;D=APHIS-2016-0060.*
- *Postal Mail/Commercial Delivery:* Send your comment to Docket No. APHIS–2016–0060, Regulatory Analysis and Development, PPD, APHIS, Station 3A–03.8, 4700 River Road Unit 118, Riverdale, MD 20737–1238.

Supporting documents and any comments we receive on this docket may be viewed at *http://www.regulations.gov/#!docketDetail;D=APHIS-2016-0060* or in our reading room, which is located in room 1141 of the USDA South Building, 14th Street and Independence Avenue SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 7997039 before coming.

FOR FURTHER INFORMATION CONTACT: For general information on the topics covered in this notice, contact Ms. Jessica Mahalingappa, Assistant Deputy Administrator for Trade and Capacity Building, International Services, APHIS, room 1132, USDA South Building, 14th Street and Independence Avenue SW., Washington, DC 20250; (202) 799–7121.

For specific information regarding standard-setting activities of the World Organization for Animal Health, contact Dr. Michael David, Director, International Animal Health Standards Team, National Import Export Services, VS, APHIS, 4700 River Road Unit 33, Riverdale, MD 20737–1231; (301) 851–3302.

For specific information regarding the standard-setting activities of the International Plant Protection Convention, contact Dr. Marina Zlotina, PPQ's IPPC Technical Director, International Phytosanitary Standards, PPQ, APHIS, 4700 River Road Unit 130, Riverdale, MD 20737; (301) 851–2200.

For specific information on the North American Plant Protection Organization, contact Ms. Patricia Abad, PPQ's NAPPO Technical Director, International Phytosanitary Standards, PPQ, APHIS, 4700 River Road Unit 130, Riverdale, MD, 20737; (301) 851–2264.

SUPPLEMENTARY INFORMATION:

Background

The World Trade Organization (WTO) was established as the common international institutional framework for governing trade relations among its members in matters related to the Uruguay Round Agreements. The WTO is the successor organization to the General Agreement on Tariffs and Trade. U.S. membership in the WTO was approved by Congress when it enacted the Uruguay Round Agreements Act (Pub. L. 103–465), which was signed into law on December 8, 1994. The WTO Agreements, which established the WTO, entered into force with respect to the United States on January 1, 1995. The Uruguay Round Agreements Act amended Title IV of the Trade Agreements Act of 1979 (19 U.S.C. 2531 *et seq.*). Section 491 of the Trade Agreements Act of 1979, as amended (19 U.S.C. 2578), requires the President to designate an agency to be responsible for informing the public of the sanitary and phytosanitary (SPS) standard-setting activities of each international standard-setting organization. The designated agency must inform the public by publishing an annual notice in the **Federal Register** that provides the following information: (1) The SPS standards under consideration or planned for consideration by the international standard-setting organization; and (2) for each SPS standard specified, a description of the consideration or planned consideration of that standard, a statement of whether the United States is participating or plans to participate in the consideration of that standard, the agenda for U.S. participation, if any, and the agency responsible for representing the United States with respect to that standard.

''International standard'' is defined in 19 U.S.C. 2578b as any standard, guideline, or recommendation: (1) Adopted by the Codex Alimentarius Commission (Codex) regarding food safety; (2) developed under the auspices of the World Organization for Animal Health (OIE, formerly known as the Office International des Epizooties) regarding animal health and welfare, and zoonoses; (3) developed under the auspices of the Secretariat of the International Plant Protection Convention (IPPC) in cooperation with the North American Plant Protection Organization (NAPPO) regarding plant health; or (4) established by or developed under any other international organization agreed to by the member countries of the North American Free Trade Agreement (NAFTA) or the member countries of the WTO.

The President, pursuant to Proclamation No. 6780 of March 23, 1995 (60 FR 15845), designated the Secretary of Agriculture as the official responsible for informing the public of the SPS standard-setting activities of Codex, OIE, IPPC, and NAPPO. The United States Department of Agriculture's (USDA's) Food Safety and Inspection Service (FSIS) informs the public of Codex standard-setting activities, and USDA's Animal and Plant Health Inspection Service (APHIS) informs the public of OIE, IPPC, and NAPPO standard-setting activities.

FSIS publishes an annual notice in the **Federal Register** to inform the public of SPS standard-setting activities for Codex. Codex was created in 1962 by two United Nations organizations, the Food and Agriculture Organization (FAO) and the World Health Organization. It is the major international organization for encouraging international trade in food and protecting the health and economic interests of consumers.

APHIS is responsible for publishing an annual notice of OIE, IPPC, and NAPPO activities related to international standards for plant and animal health and representing the United States with respect to these standards. Following are descriptions of the OIE, IPPC, and NAPPO organizations and the standard-setting agenda for each of these organizations. We have described the agenda that each of these organizations will address at their annual general sessions, including standards that may be presented for adoption or consideration, as well as other initiatives that may be underway at the OIE, IPPC, and NAPPO.

The agendas for these meetings are subject to change, and the draft standards identified in this notice may not be sufficiently developed and ready for adoption as indicated. Also, while it is the intent of the United States to support adoption of international standards and to participate actively and fully in their development, it should be recognized that the U.S. position on a specific draft standard will depend on the acceptability of the final draft. Given the dynamic and interactive nature of the standard-setting process, we encourage any persons who are interested in the most current details about a specific draft standard or the U.S. position on a particular standard-setting issue, or in providing comments on a specific standard that may be under development, to contact APHIS. Contact information is provided at the beginning of this notice under **FOR FURTHER INFORMATION CONTACT**.

OIE Standard-Setting Activities

The OIE was established in Paris, France, in 1924 with the signing of an international agreement by 28 countries. It is currently composed of 180 Members, each of which is represented by a delegate who, in most cases, is the chief veterinary officer of that country or territory. The WTO has recognized the OIE as the international forum for setting animal health standards, reporting global animal disease events, and presenting guidelines and recommendations on sanitary measures relating to animal health.

The OIE facilitates intergovernmental cooperation to prevent the spread of contagious diseases in animals by sharing scientific research among its Members. The major functions of the OIE are to collect and disseminate information on the distribution and occurrence of animal diseases and to ensure that science-based standards govern international trade in animals and animal products. The OIE aims to achieve these through the development and revision of international standards for diagnostic tests, vaccines, and the safe international trade of animals and animal products.

The OIE provides annual reports on the global distribution of animal diseases, recognizes the free status of Members for certain diseases, categorizes animal diseases with respect to their international significance, publishes bulletins on global disease status, and provides animal disease control guidelines to Members. Various OIE commissions and working groups undertake the development and preparation of draft standards, which are then circulated to Members for consultation (review and comment). Draft standards are revised accordingly and are then presented to the OIE World Assembly of Delegates (all the Members) during the General Session, which meets annually every May, for review and adoption. Adoption, as a general rule, is based on consensus of the OIE membership.

The next OIE General Session is scheduled for May 21 to May 26, 2017, in Paris, France. Currently, the Chief Trade Advisor for APHIS' Veterinary Services program is the official U.S. Delegate to the OIE. The Chief Trade Advisor for APHIS' Veterinary Services program intends to participate in the proceedings and will discuss or comment on APHIS' position on any standard up for adoption. Information about OIE draft Terrestrial and Aquatic Animal Health Code chapters may be found on the Internet at *http://www.aphis.usda.gov/animal-health/export-animals-oie* or by contacting Dr. Michael David (see **FOR FURTHER INFORMATION CONTACT** above).

OIE Terrestrial and Aquatic Animal Health Code Chapters Adopted during the May 2016 General Session.

More than 26 Code chapters were amended, rewritten, or newly proposed and presented for adoption at the General Session. The following Code chapters are of particular interest to the United States:

1. Glossary

Text was not changed in this Code chapter for the definition of ''casings.'' The proposal to include esophagi and stomachs in the definition of ''casings'' was rejected because these contain striated muscle, which is not used in the production of casings.

2. User's Guide

Text in this Code chapter was modified for clarity.

3. Chapter 1.1., Notification of diseases, Infections, Infestations and Provision of Epidemiological information

Text in this Code chapter was modified for clarity and consistency.

4. Chapter 1.2., Criteria for the Inclusion of Diseases, Infections, and Infestations Listed by the OIE

Text in this Code chapter was modified for clarity and consistency.

5. Chapter 1.2., Criteria for the Inclusion of Diseases, Infections and Infestations in the OIE List

Text in this Code chapter was modified for clarity and consistency.

6. *Chapter 1.3., Prescribed and alternative Diagnostic tests*

This Code chapter was deleted from the Terrestrial Code because the noted tests are included in the Terrestrial Manual.

7. *Chapter 3.2, Evaluation of Veterinary Services*

A minor change was adopted and approved by Member Countries.

8. *Chapter 6.8., Monitoring of the Quantities and Usage Patterns of Antimicrobial Agents in Food Producing Animals*

The text in this chapter was modified to clarify the therapeutic use of antimicrobial agents means the administration of antimicrobial agents to animals for treating and controlling infectious diseases.

9. *Chapter 7.5., Slaughter of Animals*

The diagrams of the heads of animals detailing the specific locations for the use of captive bolts for the purpose of slaughtering were proposed for removal from the chapter. The diagrams are to be relocated to the OIE Web site.

10. *Chapter 7.6., Killing of Animals for Disease Control Purposes*

References to the use of penetrating and non-penetrating captive bolts as procedures for killing adult poultry were added.

11. *Chapter 7.10., Animal Welfare and Broiler Chicken Production Systems*

Some outcome-based measurables were added, as well as minor editorial changes.

12. *Chapter 7.11, Animal Welfare and Dairy Cattle Production Systems*

This Code chapter includes prescriptive language regarding the housing of dairy cattle to which the United States continues to object and challenge.

13. *Chapter 7.X., Welfare of Working Equids*

This is a new Code chapter that was adopted this year. The United States noted an area of concern that will be considered by the Code Commission for future review.

14. *Chapter 8.3., Infection with Bluetongue Virus*

The current chapter received minor updates that were adopted.

15. *Chapter 8.7., Infection with Epizootic Hemorrhagic Disease Virus*

This chapter was adopted in 2015 and received minor updates to make it consistent with other vector borne diseases.

16. *Chapter 8.13., Infection with Rift Valley Fever virus*

Minor changes were made to create harmonization among the vector-borne disease chapters.

17. *Chapter 8.16., Infection with Trichinella spp.*

A minor addition referencing the pertinent Codex Guideline was made and the chapter was adopted.

18. *Chapter 14.7., Infection with Peste des Petits Ruminants Virus*

An editorial change was made to correct an error in Article 14.7.21. and the chapter was adopted.

19. *Chapter 15.X., Infection with Taenia solium*

An addition referencing the prevention of *T. solium* in humans was made and the chapter was adopted.

The following Aquatic Manual chapters were revised and adopted, and are of particular interest to the United States:

Chapter 2.2.2. Infectious hypodermal and haematopoietic necrosis
Chapter 2.2.4. Necrotising hepatopancreatitis
Chapter 2.2.5. Taura syndrome
Chapter 2.2.8. Infection with yellow head virus
Chapter 2.4.7. Infection with *Perkinsus olseni*

OIE Terrestrial Animal Health Code Chapters for Upcoming and Future Review

- Glossary.
- Chapter 1.4., Animal health surveillance.
- Chapter 2.X., Criteria for assessing the safety of commodities.
- Chapter 4.3., Zoning and compartmentalization.
- Chapter 4.16., High Health Status Horse Subpopulation.
- Chapter 5.3., OIE procedures relevant to the WTO/SPS Agreement.
- Chapter 6.1., The role of veterinary services in food safety.
- Chapter 6.X., Prevention and control of *Salmonella* in commercial cattle production systems.
- Chapter 6.Y., Prevention and control of *Salmonella* in commercial cattle production systems.
- Chapter 7.5., Slaughter of animals.
- Chapter 8.8., Foot and mouth disease virus.
- Chapter 8.X., Infection with Mycobacterium tuberculosis complex.
- Chapter 10.4., Infection with avian influenza virus.
- Chapter 10.5., Avian mycoplasmosis (*Mycoplasma gallisepticum*).

- Chapter 11.11., Infection with lumpy skin disease.
- Chapter 12.10., Glanders.
- Chapter 15.1., Infection with African swine fever virus.
- Chapter 15.X., Infection with porcine reproductive and respiratory syndrome virus.

IPPC Standard-Setting Activities

The IPPC is a multilateral convention adopted in 1952 for the purpose of securing common and effective action to prevent the spread and introduction of pests of plants and plant products and to promote appropriate measures for their control. The WTO has recognized the IPPC as the standard setting body for plant health. Under the IPPC, the understanding of plant protection has been, and continues to be, broad, encompassing the protection of both cultivated and non-cultivated plants from direct or indirect injury by plant pests. Activities addressed by the IPPC include the development, adoption and implementation of international phytosanitary (or plant health) standards (ISPMs), the harmonization of phytosanitary activities through emerging standards, the facilitation of the exchange of official and scientific information among countries, and the furnishing of technical assistance to developing countries that are contracting parties to the IPPC.

The IPPC is deposited with the Food and Agriculture Organization (FAO), and is an international agreement of 182 contracting parties (CPs). The Convention is implemented by national plant protection organizations (NPPOs) in cooperation with regional plant protection organizations (RPPOs), the Commission on Phytosanitary Measures (CPM), and the Secretariat of the IPPC. The IPPC has been, and continues to be, administered at the national level by plant quarantine officials whose primary objective is to safeguard plant resources from injurious pests. In the United States, the NPPO is APHIS' Plant Protection and Quarantine (PPQ) program.

The Eleventh Session of the CPM took place from April 4 to 8, 2016, at FAO Headquarters in Rome, Italy. The Deputy Administrator for APHIS' PPQ program was the U.S. delegate to the CPM. The Deputy Administrator participated in the proceedings and discussed or commented on APHIS' position on any standards up for adoption.

The following standards were adopted by the CPM at its 2016 meeting. The United States, represented by the Deputy Administrator for APHIS' PPQ program, participated in consideration of these standards. The U.S. position on each of these issues were developed prior to the CPM session and were based on APHIS' analysis, information from other U.S. Government agencies, and relevant scientific information from interested stakeholders:

- Revisions to ISPM 5: Glossary of Phytosanitary Terms
- ISPM 37: Determination of host status of fruit to fruit flies (Tephritidae)
- Annexes to ISPM 28: Phytosanitary treatments:
  - 20: Irradiation treatment for *Ostrinia nubilalis*
  - 21: Vapor heat treatment for *Bactrocera melanotus* and *B. xanthodes* on *Carica papaya*
- Annexes to ISPM 27: Diagnostic Protocols
  - 08: *Ditylenchus dipsaci* and *D. destructor*
  - 09: Genus *Anastrepha Schiner*
  - 10: *Bursaphelenchus xylophilus*
  - 11: *Xiphinema americanum sensu lato*
  - 12: *Phytoplasmas*

Other APHIS key achievements from the 2016 CPM meeting were:

- Continued development of a global electronic phytosanitary system, including to proceed with a pilot study immediately with 14 selected countries, including the United States;
- Worked towards an International Year of Plant Health (IYPH) in 2020, including the establishment of a steering committee to plan and guide the process for securing a United Nations proclamation for an IYPH and to identify and plan plant health activities and events that will occur in the lead up to and during the international year. The United States will be an active supporter of this initiative;
- Established a focus group to analyze, develop, and recommend a coherent IPPC program aimed at improving the implementation of adopted standards and to recommend an appropriate committee to oversee this new area of work at the IPPC;
- Held a special CPM session on phytosanitary risks of sea containers where the CPs agreed to temporarily suspend work on an international standard on sea containers, but consider other actions that IPPC contracting parties can take to continue addressing the sea container pathway for the introduction of plant pests; and
- Agreed on a path forward on commodity specific standards, which allows countries interested in such standards to resubmit proposals for such work.

New Standard-Setting Initiatives, Including Those in Development

A number of expert working group (EWG) meetings or other technical consultations took place during 2016 on the topics listed below. These standard-setting initiatives are under development and may be considered for future adoption. APHIS intends to participate actively and fully in each of these working groups. The U.S. position on each of the topics to be addressed by these various working groups will be developed prior to these working group meetings and will be based on APHIS' technical analysis, information from other U.S. Government agencies, and relevant scientific information from interested stakeholders:

- EWG on the international movement of grain
- Technical Panel on Fruit Flies
- Technical Panel for the Glossary of Phytosanitary Terms
- Technical Panel on Diagnostic Protocols
- Technical Panel on Phytosanitary Treatments
- Technical Panel on Forest Quarantine

For more detailed information on the above, contact Dr. Marina Zlotina (see **FOR FURTHER INFORMATION CONTACT** above).

APHIS posts links to draft standards on the Internet as they become available and provides information on the due dates for comments.[1] Additional information on IPPC standards (including the standard setting process and adopted standards) is available on the IPPC Web site.[2] For the most current information on official U.S. participation in IPPC activities, including U.S. positions on standards being considered, contact Dr. Marina Zlotina (see **FOR FURTHER INFORMATION CONTACT** above). Those wishing to provide comments on any of the areas of work being undertaken by the IPPC may do so at any time by responding to this notice (see **ADDRESSES** above) or by providing comments through Dr. Zlotina.

NAPPO Standard-Setting Activities

NAPPO, a regional plant protection organization created in 1976 under the IPPC, coordinates the efforts among the United States, Canada, and Mexico to protect their plant resources from the entry, establishment, and spread of harmful plant pests, while facilitating

[1] For more information on the IPPC draft ISPM member consultation: *https://www.aphis.usda.gov/aphis/ourfocus/planthealth/sa_international/sa_phytostandards/ct_draft_standards.*

[2] IPPC Web site: *https://www.ippc.int/.*

intra- and inter-regional trade. NAPPO conducts its work through priority-driven, annual projects conducted by expert groups. Project results and updates are provided during the NAPPO annual meeting. The NAPPO Executive Committee issues a call for project proposals, in general, each year. Projects can include the development of positions, policies, or technical documents, or the development or revision of regional standards for phytosanitary measures (RSPMs). Projects can also include implementation of standards or other capacity development activities such as workshops. After the NAPPO region selects the projects for the year, per approval of NAPPO's Executive Committee, expert groups are formed with subject matter experts from each member country, as well as representatives from key industries or commodity groups (*e.g.* nursery, seed, forestry, grains, potato, citrus, etc.). In the United States, draft standards are circulated to industry, States, and various government agencies for consideration and comment. The draft documents are posted on the NAPPO Web site.[3] Once revisions are made, the updated draft is sent to the NAPPO Advisory and Management Committee for technical review, and then to the Executive Committee for final approval, which is granted by consensus.

The 40th NAPPO annual meeting was held October 31 to November 3, 2016, in Montreal, Canada. The NAPPO Executive Committee meetings took place on October 31, 2016. The Deputy Administrator for PPQ is the U.S. member of the NAPPO Executive Committee.

Below is a summary of the current NAPPO work program as it relates to the ongoing development of NAPPO standards and projects. The United States (*i.e.,* USDA/APHIS) intends to participate actively and fully in the NAPPO work program. The U.S. position on each topic will be guided and informed by the best scientific information available. For each of the following, the United States will consider its position on any draft standard after it reviews a prepared draft. Information regarding the following NAPPO projects, assignments, activities, and updates on meeting times and locations may be obtained from the NAPPO Web site or by contacting Ms. Patricia Abad (see **FOR FURTHER INFORMATION CONTACT** above).

The 2016 work program includes the following topics being worked on by NAPPO expert groups:

1. *Asian Gypsy Moth: Validate specified risk periods for regulated Asian gypsy moth (AGM) in countries of origin.* Review available data in AGM-regulated countries to determine whether any changes in specified risk period for oviposition, flight, and establishment of AGM should be considered and whether such changes would potentially have an impact on the requirements of the vessel certification program.

2. *Biological Control: Develop an online English course to provide training on preparing a petition for first release of an entomophagous biological control agent.* Adapt into an online module the material used for the 2015 NAPPO workshop on the topic, which was based on the requirements outlined in NAPPO RSPM 12, *Guidelines for petition for first release of non-indigenous entomophagous biological control agents.* This online course was completed in October 2016.

3. *Electronic Phytosanitary Certification: Provide assistance and technical support to the IPPC ePhyto Steering Group.* Provide input to the IPPC ePhyto Steering Group, especially to help address mechanisms of exchange, security and secure transmission, and standardization of data.

4. *Forestry: Organize a multi-region conference on ISPM 15 implementation, following the recommendation that came out of the NAPPO-Asia and Pacific Plant Protection Commission (APPPC) workshop.* In 2016, NAPPO partnered with the Inter-American Institute for Cooperation on Agriculture (IICA) and other regional plant protection organizations (RPPOs) in the Americas to hold a regional workshop aimed at enhancing global compliance with the international standard for wood packaging materials (known as ISPM 15) and thereby further reduce the threat of wood and forest pests in trade. The workshop was held at IICA Headquarters in San Jose, Costa Rica, from August 29 to September 2, 2016. Approximately 40 plant health government and industry experts representing 18 countries in the Americas attended the event in addition to 14 officials who organized, presented, and/or supported logistics. The workshop provided an opportunity for participants to interact and share experiences and approaches to improve the global implementation ISPM 15, as well as to develop follow-up steps aimed to enhance implementation. The event also included a site visit near San Jose to observe a demonstration of the process for inspecting wood based on the standard.

Develop a NAPPO standard on the potential use of systems approaches to manage pest risks associated with the movement of wood. Develop an integrated measures approach which may include: inspections (at harvest, during production, prior to and or following export), prescribed production activities; laboratory diagnostics; the application of treatments; the relationship between infested areas and pest free areas and general aspects of surveillance. The specification for this standard was approved by NAPPO in 2015.

5. *Grain: Finalize the review of RSPM 13, Guidelines to establish, maintain and verify Karnal bunt pest free areas in North America.* Reach consensus on how to manage the issue of pest free areas in this case in order to finalize the revision of the standard. On July 6, 2016, NAPPO's Executive Committee approved and signed a revised version of the standard developed by the expert group, thereby completing this project.

Develop a NAPPO discussion document in preparation for the IPPC Expert Working Group tasked with the development of an ISPM on International Movement of Grain. On August 12, 2016, NAPPO submitted a discussion document to the IPPC on the shared perspectives of NAPPO member countries on this topic.

Develop a NAPPO discussion document on a North American approach to preventing introduction, establishment, and spread of Khapra beetle (Trogoderma granarium) in various pathways. Evaluate each NAPPO country's current regulatory approach to khapra beetle (prevention, detection, and response) to identify similarities, differences and gaps and determine the feasibility of closing gaps and streamlining the approach.

6. *Lymantriids: Develop a NAPPO Science and Technology paper on the risks associated with Lymantriids of potential concern to the NAPPO region, identifying potential species and pathways of concern.* Continue the development of a comprehensive examination of *Lymantriids* to identify species of potential concern to North America which may travel on the same pathway as AGM in order to help inform regulatory decisionmaking by all NAPPO member countries.

7. *Phytosanitary Alert System: Manage the NAPPO pest reporting system (Phytosanitary Alert System-PAS).* Meet reporting obligations under the IPPC and facilitate awareness, detection, prevention, and management of exotic plant pest species within North America.

[3] NAPPO Web site: *http://www.nappo.org/.*

8. *Advancing key phytosanitary concepts: Prepare a discussion document on diversion from intended use.* Clearly organize the concepts of diversion from intended use into a discussion document to serve as future reference. The reference document was presented to the NAPPO Executive Committee on October 31, 2016.

Provide guidance on assessing the likelihood of establishment component of a pest risk analysis (PRA) for quarantine pests. Assess feasibility of developing harmonized regional guidance to assess the likelihood of pest establishment when developing a PRA. The results are aimed to refocus the application of risk management measures on only those pests that are likely to cause harm. During the first half of 2016, upon thorough assessment of relevant standards and existing guidance, the expert group determined that existing guidance was adequate. Therefore, the expert group proposed a change in project scope, approved by the NAPPO Executive Committee in July 6, 2016, to instead develop a NAPPO discussion paper on interpretation of existing guidance in standards for the evaluation of the likelihood of establishment in PRAs.

Organize an international symposium on inspection sampling to support proper and harmonized implementation of ISPMs 23 (Guidelines for Inspection) and 31 (Methodologies for sampling of consignments) in the NAPPO region and internationally. The international symposium on risk-based sampling, targeted to take place in the summer of 2017, will examine the relevant scientific and statistical concepts associated with inspection sampling, the operational and regulatory challenges of implementation, the outreach/in-reach efforts needed for acceptance and capacity building, and opportunities for harmonization. The purpose of the symposium is to bring together government agencies, researchers and analysts, industries and international organizations to collaborate in the development and implementation of risk based sampling methods for phytosanitary inspection. Symposium proceedings will be created as an enduring reference.

9. *Potato: Revise the pest list for RSPM 3, Movement of potatoes into a NAPPO member country.* Undertake the annual revision of the pest list.

Work to finalize the *review of the existing RSPM 3, Movement of potatoes into a NAPPO member country, to align it with ISPM 33, Pest free potato (Solanum sp.) micropropagative material and minitubers for international trade,* and discuss any adjustments required by NAPPO member countries. Review comments received from the country consultation of the draft revision and make adjustments as required.

Revise Annex 6, *Pre-shipment testing for PVY^N,* while undertaking a full 5-year review of RSPM 3, *Movement of potatoes into a NAPPO member country.* Update the current Annex 6 of RSPM 3, based on the PVY TAG Science and Technology document finalized in 2013, while undertaking the 5-year review of RSPM 3.

10. *Seeds: Develop harmonized criteria for evaluating phytosanitary seed treatments.* Develop a discussion document providing a list of criteria for evaluating phytosanitary seed treatments, as well as the identification of data gaps and research needs where they may exist.

11. *Foundational/Procedural documents: Revision/update of various foundational or procedural documents.* In 2016, NAPPO's Advisory and Management Committee has been working to update various NAPPO foundational and procedural documents. On July 6, 2016, NAPPO's Executive Committee approved an updated version of NAPPO's Constitution and By-Laws as well as the 2016–2020 NAPPO Strategic Plan. Edits in the Constitution and By-Laws were minor in nature to update terms and practices and to streamline the document. The new Strategic Plan outlines how NAPPO will be guided by regional priorities, core goals, and focus over the next 5 years. The documents were signed during the 2016 NAPPO Annual Meeting.

The PPQ Deputy Administrator, as the official U.S. delegate to NAPPO, intends to participate in the adoption of these regional plant health standards and projects, including the work described above, once they are completed and ready for such consideration.

The information in this notice contains all the information available to us on NAPPO standards under development or consideration. For updates on meeting times and for information on the expert groups that may become available following publication of this notice, visit the NAPPO Web site or contact Ms. Patricia Abad (see **FOR FURTHER INFORMATION CONTACT** above). Information on official U.S. participation in NAPPO activities, including U.S. positions on standards being considered, may also be obtained from Ms. Abad. Those wishing to provide comments on any of the topics being addressed in the NAPPO work program may do so at any time by responding to this notice (see **ADDRESSES** above) or by transmitting comments through Ms. Abad.

Done in Washington, DC, this 14th day of November 2016.

Kevin Shea,

Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410–34–P

DEPARTMENT OF AGRICULTURE

Rural Business-Cooperative Service

Applications for Licensing as a Non-Leveraged Rural Business Investment Company Under the Rural Business Investment Program

AGENCY: Rural Business-Cooperative Service, USDA.

ACTION: Notice.

SUMMARY: This Notice announces the acceptance of applications from newly-formed Rural Business Investment Companies (RBICs) or new funds from existing RBICs who are interested in obtaining a licensed fund as non-leveraged RBICs under the Agency's Rural Business Investment Program (RBIP).

DATES: The Agency began accepting applications for non-leveraged status on August 6, 2012, and will continue to accept applications for non-leveraged status on a continuous basis until such time the Agency determines otherwise.

ADDRESSES:

Address for Application Submission: Completed applications must be sent to Specialty Programs Division, U.S. Department of Agriculture, Room Number 4204–S, 1400 Independence Avenue SW., Washington, DC 20250–3226.

Address for Requesting Information: Application materials and other information may be requested by writing to Kristi Kubista-Hovis, Acting Director, Specialty Programs Division, U.S. Department of Agriculture, Room 4204–S, 1400 Independence Avenue SW., Washington, DC 20250–3226.

FOR FURTHER INFORMATION CONTACT: Detailed information on the RBIP, including application materials and instructions, can be found on the Agency's Web site at *http://www.rd.usda.gov/programs-services/rural-business-investment-program.* You also may request information from the Agency by contacting David Chesnick, Program Manager, Rural Business Investment Program, Specialty Programs Division, U.S. Department of Agriculture, Room 4221–S, 1400

Independence Avenue SW., Washington, DC 20250–3226, at (202) 690–0433.

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

The Paperwork Reduction Act of 1995 defines ''collection of information'' as a requirement for ''answers to * * * identical reporting or recordkeeping requirements imposed on ten or more persons'' (44 U.S.C. 3502(3)(A)). The collection requirement associated with this Notice is expected to receive less than 10 respondents and therefore the Act does not apply.

Overview Information

Federal Agency Name. Rural Business-Cooperative Service.

Opportunity Title. RBIP for Non-leveraged RBICs.

Announcement Type. Subsequent announcement.

Catalog of Federal Domestic Assistance (CFDA) Number. The CFDA number for the program impacted by this action is 10.860, Rural Business Investment Program.

Dates. The Agency began accepting applications for non-leveraged status on August 6, 2012, and will continue to accept applications for non-leveraged status until such time the Agency determines otherwise. *Availability of Notice.* This Notice is available on the USDA Rural Development Web site at: *http://www.rd.usda.gov/programs-services/rural-business-investment-program.*

I. Opportunity Description

A. *Background.* The purpose of Subtitle H of the Consolidated Farm and Rural Development Act, as amended (7 U.S.C. 2009*cc et seq.*) is to promote economic development and the creation of wealth and job opportunities in rural areas and among individuals living in those areas through venture capital investments by for-profit RBICs.

Prior to August 6, 2012, the Agency issued licenses to qualified RBICs as leveraged RBICs only. A notice published in the **Federal Register** on July 5, 2012, (77 FR 39675), informed the public that the Agency would begin accepting non-leveraged RBIC license applications on August 6, 2012.

The purpose of this current Notice is to notify interested RBICs that the Agency is still accepting applications from qualified RBICs for licensing as non-leveraged RBICs under the RBIP. The Agency will continue to accept such applications until such other time the Agency determines otherwise.

B. *Program Authority.* Subtitle H of the Consolidated Farm and Rural Development Act, as amended (7 U.S.C. 2009cc *et seq.*) establishes the RBIP.

C. *Definition of Terms.* The terms defined in 7 CFR part 4290 are applicable to this Notice.

II. Licensing Information

A. *Number of Licenses.* The Agency intends to issue approximately two non-leveraged RBIC licenses a year, subject to sufficient resources. However, additional applications for licenses may be considered if sufficient resources are made available.

B. *Type of License.* Non-leveraged.

III. Eligibility Information

Applicants and their applications are subject to the provisions of this Notice and to the provisions of 7 CFR part 4290. In order to be eligible for non-leveraged status under this Notice, the applicant must demonstrate that one or more Farm Credit System (FCS) institution(s) will invest in the RBIC and, individually or collectively, hold 10 percent or more the applicant's total capital.

IV. Application and Submission Information

A. *Where to Obtain Applications.* Applicants may obtain applications and other applicable application material from the Agency's Specialty Programs Division, as provided in the **ADDRESSES** section of this Notice. Because applications will be selected on a first-come, first-served basis, the Agency recommends that potential applicants who plan to request application materials via mail request such materials as soon as possible.

Application materials may also be obtained via *http://www.rd.usda.gov/programs-services/rural-business-investment-program* or by contacting the Agency at the address and phone number provided in the **ADDRESSES** section of this Notice.

B. *Prior to Preparing Application.* The Agency recommends that those interested in applying for non-leveraged licensing contact the Agency at the address and phone number provided in the **ADDRESSES** section of this Notice to determine the status of the non-leveraged program in order to avoid unnecessary expenditure of resources by the applicant. As noted earlier in this Notice, the Agency intends to issue approximately two non-leveraged licenses a year, due to limited resources, the Agency may not be able to review more than the two applications in any 1 fiscal year.

C. *Content and Form of Submission.* Applications must be submitted in accordance with the application instructions contained in this Notice and in 7 CFR 4290. Applicants must submit complete initial applications in order to be considered. Applications must be submitted in hard copy form and on a USB flash drive; applications sent by facsimile will not be accepted.

Contents of the initial application include RD Form 4290–1, ''Rural Business Investment Program (RBIP) Application,'' Part I, Management Assessment Questionnaire (MAQ), and RD Form 4290–2, ''Rural Business Investment Program (RBIP) Application,'' Part II, Exhibits (exhibits A, B, C, D, E, F, G, H, K, L, P, V, and Z).

Submit two complete, original hard copy sets of the RD Form 4290–1 and RD Form 4290–2 (excluding Exhibit P, which is required in electronic form only). Place each of the two original sets in a large 3-ring binder. Label the binders with the RBIC's name. Submit one complete and unbound one-sided hard copy of the MAQ and Exhibits suitable for photocopying (*i.e.,* no hole punches, staples, paper clips, tabs, or binders).

Applicants must enclose in their submission a nonrefundable licensing fee of $500 in the form of a check payable to USDA.

D. *When to Submit.* The Agency is accepting applications for non-leveraged status until such time the Agency determines otherwise.

E. *Where to Submit.* The applicant must submit the application material to the Agency's Specialty Programs Division as specified in the **ADDRESSES** section of this Notice.

F. *How to Submit.* Applicants are encouraged to submit their applications via package/parcel service.

V. Program Provisions

This section of the Notice identifies the procedures the Agency will use to process and select applicants for licensing as a non-leveraged RBIC. More information about the RBIP is available in the regulation at 7 CFR part 4290.

The Agency will review each application it receives in response to this Notice with regard to eligibility and completeness. If the application is incomplete, the Agency will notify the applicant of the information that is missing. The applicant must then provide the missing information in order for the Agency to further review the application.

The Agency will select applicants for licensing as a non-leveraged RBIC on a first-come, first-served basis. The Agency will determine the order of applications based on the date the Agency receives a complete application.

For example, if an application is received on July 1, but is incomplete, and the applicant supplies the Agency with the missing information on August 1, then that application will be considered for selection on the basis of the August 1 date—the date on which the application was complete. Therefore, the Agency encourages applicants to ensure their applications are complete prior to submitting them.

Only those applications that are eligible will be processed further for determining whether the applicant will be licensed as a non-leveraged RBIC. However, not all applications received in response to this Notice will receive this further processing. For each application that receives further processing, the Agency or its designee will focus its assessment of the application on the consistency of the newly formed RBIC's business plan with the goals of the RBIP program and on the applicant's management team's qualifications. Following this assessment, if the initial recommendation is favorable, the Agency or its designee will interview the applicant's management team.

Based on the assessment and interview, a preliminary determination will be made as to whether or not to select the applicant for non-leveraged status. If the preliminary determination is favorable, the Agency will send to the applicant a Letter of Conditions (also known as a ''Green Light'' letter) and the applicant will be invited to submit an updated RD Form 4290–1, Part I, Management Assessment Questionnaire, and RD Form 4290–2, Part II, Exhibits. Upon receipt of the Letter of Conditions, the applicant has 24 months to raise their private equity capital. Once a selected applicant has achieved full compliance with the regulations governing licensing as an RBIC, the Agency will issue the non-leveraged license to the RBIC.

VI. Administrative Information Applicable to This Notice

A. Notifications

1. *Eligibility.* The Agency will notify the applicant in writing whether or not the application is determined to be eligible for participation in the RBIP. If an applicant is determined by the Agency to be ineligible, the Agency will provide the reason(s) the applicant was rejected. Such applicant will have review and appeal rights as specified in this Notice.

2. *License.* Each applicant receiving a ''Green Light'' letter will be notified whether or not the RBIC will be licensed after the Agency's review of the updated RD Form 4290–1, Part I, Management Assessment Questionnaire, and RD Form 4290–2, Part II, Exhibits.

B. Administrative and National Policy Requirements

1. *Review or Appeal Rights.* A person may seek a review of an adverse Agency decision under this Notice or appeal to the National Appeals Division in accordance with 7 CFR part 11.

2. *Notification of Unfavorable Decisions.* If at any time prior to license approval it is decided that favorable action will not be taken, the Agency will notify the applicant in writing of the decision and of the reasons why issuing a non-leveraged license was not favorably considered. The notification will inform the applicant of its rights to an informal review, mediation, and appeal of the decision in accordance with 7 CFR part 11.

VII. Agency Contacts

For further information about this Notice or for assistance with the program requirements, please contact the Specialty Programs Division, U.S. Department of Agriculture, Room 4204–S, 1400 Independence Avenue SW., Washington, DC 20250–3226. Telephone: (202) 720–1400.

VIII. Nondiscrimination

In accordance with Federal civil rights law and U.S. Department of Agriculture (USDA) civil rights regulations and policies, the USDA, its Agencies, offices, and employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, gender identity (including gender expression), sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Persons with disabilities who require alternative means of communication for program information (*e.g.,* Braille, large print, audiotape, American Sign Language, etc.) should contact the responsible Agency or USDA's TARGET Center at (202) 720–2600 (voice and TTY) or contact USDA through the Federal Relay Service at (800) 877–8339. Additionally, program information may be made available in languages other than English.

To file a program discrimination complaint, complete the USDA Program Discrimination Complaint Form, AD–3027, found online at *http://www.ascr.usda.gov/complaint_filing_cust.html* and at any USDA office or write a letter addressed to USDA and provide in the letter all of the information requested in the form. To request a copy of the complaint form, call (866) 632–9992. Submit your completed form or letter to USDA by:

(1) *Mail:* U.S. Department of Agriculture Office of the Assistant Secretary for Civil Rights: 1400 Independence Avenue SW., Washington, DC 20250–9410;

(2) *Fax:* (202) 690–7442; or

(3) *Email: program.intake@usda.gov.*

USDA is an equal opportunity provider, employer, and lender.

Dated: November 9, 2016.

Samuel H. Rikkers,

Administrator, Rural Business-Cooperative Service.

DEPARTMENT OF AGRICULTURE

Rural Business-Cooperative Service

Notice of Solicitation of Applications (NOSA) Inviting Applications for the Rural Business Development Grant Program To Provide Technical Assistance for Rural Transportation Systems

AGENCY: Rural Business-Cooperative Service, USDA.

ACTION: Notice.

SUMMARY: This Notice is to invite applications for grants to provide Technical Assistance for Rural Transportation (RT) systems under the Rural Business Development Grant (RBDG) program pursuant to 7 CFR part 4280, subpart E, 2 CFR chapter IV and 2 CFR part 200 for fiscal year (FY) 2017, subject to the availability of funding to provide Technical Assistance for RT systems and for RT systems to Federally Recognized Native American Tribes' (FRNAT) (collectively ''Programs'') and the terms provided in such funding. This Notice is being issued before the FY 2017 appropriation has been enacted in order to allow applicants sufficient time to leverage financing, prepare and submit their applications, and give the Agency time to process applications in FY 2017. This Notice is based on the assumption that the FY 2017 appropriation will be identical to its successors. Should that not be the case, this Notice will be amended to reflect those changes. Successful applications will be selected by the Agency for

funding and subsequently awarded to the extent that funding may ultimately be made available to the Agency through appropriations. Awards under both grant Programs will be competitively awarded to eligible applicant(s) which historically has been a qualified national Nonprofit organization. It is expected that one grant will be for the provision of Technical Assistance to RT Projects and that the other grant will be for the provision of Technical Assistance to RT Projects operated by FRNATs only.

All applicants are responsible for any expenses incurred in developing their applications.

All initially capitalized terms in this Notice, other than proper names, are defined in 7 CFR 4280.403.

DATES: Completed applications must be received in the USDA Rural Development State Office no later than 4:30 p.m. (local time) on March 31, 2017. Applications received at a USDA Rural Development State Office after this date will not be considered for FY 2017 funding.

ADDRESSES: Submit applications in paper format to the USDA Rural Development State Office for the State where the Project is located. A list of the USDA Rural Development State Office contacts can be found at: *http://www.rd.usda.gov/contact-us/state-offices*.

FOR FURTHER INFORMATION CONTACT: Specialty Programs Division, Business Programs, Rural Business-Cooperative Service, U.S. Department of Agriculture, 1400 Independence Avenue SW., MS 3226, Room 4204-South, Washington, DC 20250–3226, or call 202–720–1400. For further information on this Notice, please contact the USDA Rural Development State Office in the State in which the applicant's headquarters is located.

SUPPLEMENTARY INFORMATION:

Overview

Solicitation Opportunity Title: Rural Business Development Grants.

Announcement Type: Initial Solicitation Announcement.

Catalog of Federal Domestic Assistance Number: 10.351.

Dates: Completed applications must be received in the USDA Rural Development State Office no later than 4:30 p.m. (local time) on March 31, 2017, to be eligible for FY 2017 grant funding. Applications received after this date will not be eligible for FY 2017 grant funding.

A. Program Description

1. *Purpose of the Program.* The purpose of this program is to improve the economic conditions of Rural Areas.

2. *Statutory Authority.* This program is authorized under section 310B(c) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1932(c)). Regulations are contained in 7 CFR part 4280, subpart E. The program is administered on behalf of Rural Business-Cooperative Service (RBS) at the State level by the USDA Rural Development State Offices. Assistance provided to Rural Areas under the program has historically included the provision of on-site Technical Assistance to local and regional governments, public transit agencies, and related Nonprofit and for-profit organizations in Rural Areas; the development of training materials; and the provision of necessary training assistance to local officials and agencies in Rural Areas.

Awards under the RBDG passenger transportation program will be made on a competitive basis using specific selection criteria contained in 7 CFR part 4280, subpart E, and in accordance with section 310B(c) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1932(c)). Information required to be in the application package includes Standard Form (SF) 424, ''Application for Federal Assistance;'' environmental documentation in accordance with 7 CFR part 1970, ''Environmental Policies and Procedures;'' Scope of Work Narrative; Income Statement; Balance Sheet or Audit for previous 3 years; AD–1047, ''Debarment/Suspension Certification;'' AD–1048, ''Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion;'' AD–1049, ''Certification Regarding Drug-Free Workplace Requirements;'' SF LLL, ''Disclosure of Lobbying Activities;'' RD 400–1, ''Equal Opportunity Agreement;'' RD 400–4, ''Assurance Agreement;'' and a letter providing Board authorization to obtain assistance. For the FRNAT grant, which must benefit FRNATs, at least 75 percent of the benefits of the Project must be received by members of FRNATs. The Project that scores the greatest number of points based on the RBDG selection criteria and the discretionary points will be selected for each grant.

Applicants must be qualified national Nonprofit organizations with experience in providing Technical Assistance and training to Rural communities nationwide for the purpose of improving passenger transportation service or facilities. To be considered ''national,'' RBS requires a qualified organization to provide evidence that it operates RT assistance programming nation-wide. There is not a requirement to use the grant funds in a multi-State area. Grants will be made to qualified national non-profit organizations for the provision of Technical Assistance and training to Rural communities for the purpose of improving passenger transportation services or facilities.

3. *Definition of Terms.* The definitions applicable to this Notice are published at 7 CFR 4280.403.

4. *Application Awards.* The Agency will review, evaluate, and score applications received in response to this Notice based on the provisions in 7 CFR 4280, subpart E and as indicated in this Notice. However, the Agency advises all interested parties that the applicant bears the burden in preparing and submitting an application in response to this Notice.

B. Federal Award Information

Type of Award: Grants.

Fiscal Year Funds: FY 2017.

Available Funds: Anyone interested in submitting an application for funding under this program is encouraged to consult the Rural Development Web Newsroom Web site at *http://www.rd.usda.gov/newsroom/notices-solicitation-applications-nosas* for funding information.

Approximate Number of Awards: To be determined based on the number of qualified applications received. Historically two awards have been made.

Maximum Awards: Will be determined by the specific funding provided for the Programs in the FY 2017 Appropriations Act.

Award Date: Prior to September 30, 2017.

Performance Period: October 1, 2017, through September 30, 2018.

Renewal or Supplemental Awards: None.

C. Eligibility Information

1. *Eligible Applicants.*

To be considered eligible, an entity must be a qualified national Nonprofit organization serving Rural Areas as evidenced in its organizational documents and demonstrated experience, per 7 CFR part 4280, subpart E. Grants will be competitively awarded to qualified national Nonprofit organizations.

The Agency requires the following information to make an eligibility determination that an applicant is a national Nonprofit organization. These applications must include, but are not limited to, the following:

(a) An original and one copy of SF 424, ''Application for Federal Assistance (For Non-construction);''

(b) Copies of applicant's organizational documents showing the applicant's legal existence and authority to perform the activities under the grant;

(c) A proposed scope of work, including a description of the proposed Project, details of the proposed activities to be accomplished and timeframes for completion of each task, the number of months duration of the Project, and the estimated time it will take from grant approval to beginning of Project implementation;

(d) A written narrative that includes, at a minimum, the following items:

(i) An explanation of why the Project is needed, the benefits of the proposed Project, and how the Project meets the grant eligible purposes;

(ii) Area to be served, identifying each governmental unit, *i.e.,* town, county, etc., to be affected by the Project;

(iii) Description of how the Project will coordinate Economic Development activities with other Economic Development activities within the Project area;

(iv) Businesses to be assisted, if appropriate, and Economic Development to be accomplished;

(v) An explanation of how the proposed Project will result in newly created, increased, or supported jobs in the area and the number of projected new and supported jobs within the next 3 years;

(vi) A description of the applicant's demonstrated capability and experience in providing the proposed Project assistance, including experience of key staff members and persons who will be providing the proposed Project activities and managing the Project;

(vii) The method and rationale used to select the areas and businesses that will receive the service;

(viii) A brief description of how the work will be performed, including whether organizational staff or consultants or contractors will be used; and

(ix) Other information the Agency may request to assist it in making a grant award determination.

(e) The latest 3 years of financial information to show the applicant's financial capacity to carry out the proposed work. If the applicant is less than 3 years old, at a minimum, the information should include all balance sheet(s), income statement(s) and cash flow statement(s). A current audited report is required if available;

(f) Documentation regarding the availability and amount of other funds to be used in conjunction with the funds from RBDG;

(g) A budget which includes salaries, fringe benefits, consultant costs, indirect costs, and other appropriate direct costs for the Project.

2. *Cost Sharing or Matching.* Matching funds are not required.

3. *Other.*

Applications will only be accepted from qualified national Nonprofit organizations to provide Technical Assistance for RT. There are no ''responsiveness,'' or ''threshold'' eligibility criteria for these grants. There is no limit on the number of applications an applicant may submit under this announcement. In addition to the forms listed under program description, Form AD–3030 ''Representations Regulation Felony Conviction and Tax Delinquent Status for Corporate Applicants,'' must be completed in the affirmative.

None of the funds made available may be used to enter into a contract, memorandum of understanding, or cooperative agreement with, make a grant to, or provide a loan or loan guarantee to, any corporation that has any unpaid Federal tax liability that has been assessed, for which all judicial and administrative remedies have been exhausted or have lapsed, and that is not being paid in a timely manner pursuant to an agreement with the authority responsible for collecting the tax liability, where the awarding agency is aware of the unpaid tax liability, unless a Federal agency has considered suspension or debarment of the corporation and has made a determination that this further action is not necessary to protect the interests of the Government.

None of the funds made available may be used to enter into a contract, memorandum of understanding, or cooperative agreement with, make a grant to, or provide a loan or loan guarantee to, any corporation that was convicted of a felony criminal violation under any Federal law within the preceding 24 months, where the awarding agency is aware of the conviction, unless a Federal agency has considered suspension or debarment of the corporation and has made a determination that this further action is not necessary to protect the interests of the Government.

4. *Completeness Eligibility.*

Applications will not be considered for funding if they do not provide sufficient information to determine eligibility or are missing required elements.

D. Application and Submission Information

1. *Address to Request Application Package.*

For further information, entities wishing to apply for assistance should contact the USDA Rural Development State Office provided in the **ADDRESSES** section of this Notice to obtain copies of the application package.

Applications must be submitted in paper format. Applications submitted to a USDA Rural Development State Office must be received by the closing date and local time.

2. *Content and Form of Application Submission.*

An application must contain all of the required elements. Each application received in a USDA Rural Development State Office will be reviewed to determine if it is consistent with the eligible purposes contained in section 310B(c) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1932(c)). Each selection priority criterion outlined in 7 CFR 4280.435 must be addressed in the application. Failure to address any of the criterion will result in a zero-point score for that criterion and will impact the overall evaluation of the application. Copies of 7 CFR part 4280, subpart E, will be provided to any interested applicant making a request to a USDA Rural Development State Office.

All Projects to receive Technical Assistance through these passenger transportation grant funds are to be identified when the applications are submitted to the USDA Rural Development State Office. Multiple Project applications must identify each individual Project, indicate the amount of funding requested for each individual Project, and address the criteria as stated above for each individual Project.

For multiple-Project applications, the average of the individual Project scores will be the score for that application.

The applicant documentation and forms needed for a complete application are located in the PROGRAM DESCRIPTION section of this notice, and 7 CFR part 4280, subpart E.

(a) There are no specific formats, specific limitations on number of pages, font size and type face, margins, paper size, number of copies, and the sequence or assembly requirements.

(b) The component pieces of this application should contain original signatures on the original application.

(c) Since these grants are for Technical Assistance for transportation purposes, no additional information requirements other than those described in this Notice and 7 CFR part 4280, subpart E are required.

3. *Unique entity identifier and System for Award Management.*

All applicants must have a Dun and Bradstreet Data Universal Numbering System (DUNS) number which can be obtained at no cost via a toll-free request line at (866) 705–5711 or at *http://fedgov.dnb.com/webform.* Each applicant (unless the applicant is an individual or Federal awarding agency that is excepted from the requirements under 2 CFR 25.110(b)) or (c) or has an exception approved by the Federal awarding agency under 2 CFR 25.110(d) is required to: (i) Be registered in the System for Award Management (SAM) before submitting its application; (ii) provide a valid unique entity identifier in its application; and (iii) continue to maintain an active SAM registration with current information at all times during which it has an active Federal award or an application or plan under consideration by a Federal awarding agency. The Federal awarding agency may not make a Federal award to an applicant until the applicant has complied with all applicable unique entity identifier and SAM requirements and, if an applicant has not fully complied with the requirements by the time the Federal awarding agency is ready to make a Federal award, the Federal awarding agency may determine that the applicant is not qualified to receive a Federal award and use that determination as a basis for making a Federal award to another applicant.

4. *Submission Dates and Times.*

(a) Application Deadline Date: No later than 4:30 p.m. (local time) on March 31, 2017.

Explanation of Deadlines: Applications must be in the USDA Rural Development State Office by the local deadline date and time as indicated above. If the due date falls on a Saturday, Sunday, or Federal holiday, the application is due the next business day.

(b) The deadline date means that the completed application package must be received in the USDA Rural Development State Office by the deadline date established above. All application documents identified in this Notice are required.

(c) If complete applications are not received by the deadline established above, the application will neither be reviewed nor considered under any circumstances.

(d) The Agency will determine the application receipt date based on the actual date postmarked.

(e) This Notice is for RT Technical Assistance grants only and therefore, intergovernmental reviews are not required.

(f) These grants are for RT Technical Assistance grants only, no construction or equipment purchases are permitted. If the grantee has a previously approved indirect cost rate, it is permissible, otherwise, the applicant may elect to charge the 10 percent indirect cost permitted under 2 CFR 200.414(f) or request a determination of its Indirect Cost Rate. Due to the time required to evaluate Indirect Cost Rates, it is likely that all funds will be awarded by the time the Indirect Cost Rate is determined. No foreign travel is permitted. Pre-Federal award costs will only be permitted with prior written approval by the Agency.

(g) Applicants must submit applications in hard copy format as previously indicated in the APPLICATION AND SUBMISSION INFORMATION section of this notice. If the applicant wishes to hand deliver its application, the addresses for these deliveries can be located in the **ADDRESSES** section of this Notice.

(h) If you require alternative means of communication for program information (*e.g.,* Braille, large print, audiotape, etc.) please contact USDA's TARGET Center at (202) 720–2600 (voice and TDD).

E. Application Review Information

1. *Criteria.*

All eligible and complete applications will be evaluated and scored based on the selection criteria and weights contained in 7 CFR 4280.435 and will select grantees subject to the grantees' satisfactory submission of the additional items required by 7 CFR part 4280, subpart E and the USDA Rural Development Letter of Conditions. Failure to address any one of the criteria in 7 CFR 4280.435 by the application deadline will result in the application being determined ineligible, and the application will not be considered for funding. The amount of an RT grant may be adjusted, at the Agency's discretion, to enable the Agency to award RT grants to the applications with the highest priority scores in each category.

2. *Review and Selection Process.*

The State Offices will review applications to determine if they are eligible for assistance based on requirements contained in 7 CFR 4280.416 and 4280.417. If determined eligible, your application will be submitted to the National Office. Funding of Projects is subject to the applicant's satisfactory submission of the additional items required by that subpart and the USDA Rural Development Letter of Conditions. The Agency reserves the right to award additional discretionary points under 7 CFR 4280.435(k).

In awarding discretionary points, the Agency scoring criteria regularly assigns points to applications that direct loans or grants to Projects based in or serving census tracts with poverty rates greater than or equal to 20 percent. This emphasis will support Rural Development's mission of improving the quality of life for Rural Americans and commitment to directing resources to those who most need them.

F. Federal Award Administration Information

1. *Federal Award Notices.*

Successful applicants will receive notification for funding from their USDA Rural Development State Office. Applicants must comply with all applicable statutes and regulations before the grant award will be approved. Unsuccessful applications will receive notification by mail.

2. *Administrative and National Policy Requirements.*

Additional requirements that apply to grantees selected for this program can be found in 7 CFR 4280.408, 4280.410, and 4280.439. Awards are subject to USDA Departmental Grant Regulations at 2 CFR Chapter IV which incorporates the new Office of Management and Budget (OMB) regulations at 2 CFR part 200.

All successful applicants will be notified by letter, which will include a Letter of Conditions, and a Letter of Intent to Meet Conditions. This letter is not an authorization to begin performance. If the applicant wishes to consider beginning performance prior to the grant being officially closed, all pre-award costs must be approved in writing and in advance by the Agency. The grant will be considered officially awarded when all conditions in the Letter of Conditions have been met and the Agency obligates the funding for the Project.

Additional requirements that apply to grantees selected for this program can be found in 7 CFR part 4280, subpart E; the Grants and Agreements regulations of the U.S. Department of Agriculture codified in 2 CFR Chapter IV, and successor regulations.

In addition, all recipients of Federal financial assistance are required to report information about first-tier sub-awards and executive compensation (see 2 CFR part 170). You will be required to have the necessary processes and systems in place to comply with the Federal Funding Accountability and Transparency Act of 2006 (Pub. L. 109–282) reporting requirements (see 2 CFR 170.200(b), unless you are exempt under 2 CFR 170.110(b)). More information on these requirements can be found at *http://www.rd.usda.gov/programs-services/value-added-producer-grants.*

The following additional requirements apply to grantees selected for this program:

(a) Form RD 4280–2 ''Rural Business-Cooperative Service Financial Assistance Agreement.''

(b) Letter of Conditions.

(c) Form RD 1940–1, ''Request for Obligation of Funds.''

(d) Form RD 1942–46, ''Letter of Intent to Meet Conditions.''

(e) Form AD–1047, ''Certification Regarding Debarment, Suspension, and Other Responsibility Matters-Primary Covered Transactions.''

(f) Form AD–1048, ''Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion-Lower Tier Covered Transactions.''

(g) Form AD–1049, ''Certification Regarding a Drug-Free Workplace Requirement (Grants).''

(h) Form AD–3030, ''Assurance Regarding Felony Conviction or Tax Delinquent Status for Corporate Applicants.'' Must be signed by corporate applicants who receive an award under this Notice.

(i) Form RD 400–4, ''Assurance Agreement.'' Each prospective recipient must sign Form RD 400–4, Assurance Agreement, which assures USDA that the recipient is in compliance with Title VI of the Civil Rights Act of 1964, 7 CFR part 15 and other Agency regulations. That no person will be discriminated against based on race, color or national origin, in regard to any program or activity for which the re-lender receives Federal financial assistance. That nondiscrimination statements are in advertisements and brochures.

Collect and maintain data provided by ultimate recipients on race, sex, and national origin and ensure Ultimate Recipients collect and maintain this data. Race and ethnicity data will be collected in accordance with OMB **Federal Register** notice, ''Revisions to the Standards for the Classification of Federal Data on Race and Ethnicity,'' (62 FR 58782), October 30, 1997. Sex data will be collected in accordance with Title IX of the Education Amendments of 1972. These items should not be submitted with the application but should be available upon request by the Agency.

The applicant and the ultimate recipient must comply with Title VI of the Civil Rights Act of 1964, Title IX of the Education Amendments of 1972, Americans with Disabilities Act (ADA), Section 504 of the Rehabilitation Act of 1973, Age Discrimination Act of 1975, Executive Order 12250, Executive Order 13166 Limited English Proficiency (LEP), and 7 CFR part 1901, subpart E.

(j) SF LLL, ''Disclosure of Lobbying Activities,'' if applicable.

(k) Form SF 270, ''Request for Advance or Reimbursement.''

3. *Reporting.*

(a) A Financial Status Report and a Project performance activity report will be required of all grantees on a quarterly basis until initial funds are expended and yearly thereafter, if applicable, based on the Federal fiscal year. The grantee will complete the Project within the total time available to it in accordance with the Scope of Work and any necessary modifications thereof prepared by the grantee and approved by the Agency. A final Project performance report will be required with the final Financial Status Report. The final report may serve as the last quarterly report. The final report must provide complete information regarding the jobs created and supported as a result of the grant if applicable. Grantees must continuously monitor performance to ensure that time schedules are being met, projected work by time periods is being accomplished, and other performance objectives are being achieved. Grantees must submit an original of each report to the Agency no later than 30 days after the end of the quarter. The Project performance reports must include, but not be limited to, the following:

(1) A comparison of actual accomplishments to the objectives established for that period;

(2) Problems, delays, or adverse conditions, if any, which have affected or will affect attainment of overall Project objectives, prevent meeting time schedules or objectives, or preclude the attainment of particular Project work elements during established time periods. This disclosure shall be accompanied by a statement of the action taken or planned to resolve the situation;

(3) Objectives and timetable established for the next reporting period;

(4) Any special reporting requirements, such as jobs supported and created, businesses assisted, or Economic Development which results in improvements in median household incomes, and any other specific requirements, should be placed in the reporting section in the Letter of Conditions; and

(5) Within 90 days after the conclusion of the Project, the grantee will provide a final Project evaluation report. The last quarterly payment will be withheld until the final report is received and approved by the Agency. Even though the grantee may request reimbursement on a monthly basis, the last 3 months of reimbursements will be withheld until a final Project, Project performance, and financial status report are received and approved by the Agency.

G. Federal Awarding Agency Contact(s)

For general questions about this announcement, please contact your USDA Rural Development State Office provided in the **ADDRESSES** section of this Notice.

H. Civil Rights Requirements

All grants made under this Notice are subject to Title VI of the Civil Rights Act of 1964 as required by the USDA (7 CFR part 15, subpart A) and Section 504 of the Rehabilitation Act of 1973, Title VIII of the Civil Rights Act of 1968, Title IX, Executive Order 13166 (Limited English Proficiency), Executive Order 11246, and the Equal Credit Opportunity Act of 1974.

I. Other Information

Paperwork Reduction Act

In accordance with the Paperwork Reduction Act of 1995, the information collection requirement contained in this Notice is approved by OMB under OMB Control Number 0570–0070.

Federal Funding Accountability and Transparency Act

All applicants, in accordance with 2 CFR part 25, must have a DUNS number, which can be obtained at no cost via a toll-free request line at (866) 705–5711 or online at *http://fedgov.dnb.com/webform.* Similarly, all applicants must be registered in SAM prior to submitting an application. Applicants may register for the SAM at *http://www.sam.gov.* All recipients of Federal financial assistance are required to report information about first-tier sub-awards and executive total compensation in accordance with 2 CFR part 170.

I. Nondiscrimination Statement

In accordance with Federal civil rights law and U.S. Department of Agriculture (USDA) civil rights regulations and policies, the USDA, its Agencies, offices, and employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, gender identity (including gender expression), sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Persons with disabilities who require alternative means of communication for program information (*e.g.,* Braille, large print, audiotape, American Sign Language, etc.) should contact the responsible Agency or USDA's TARGET Center at (202) 720–2600 (voice and TTY) or contact USDA through the Federal Relay Service at (800) 877–8339. Additionally, program information may be made available in languages other than English.

To file a program discrimination complaint, complete the USDA Program Discrimination Complaint Form, AD 3027, found online at *http://www.ascr.usda.gov/complaint_filing_cust.html* and at any USDA office or write a letter addressed to USDA and provide in the letter all of the information requested in the form. To request a copy of the complaint form, call (866) 632–9992. Submit your completed form or letter to USDA by:

(1) Mail: U.S. Department of Agriculture, Office of the Assistant Secretary for Civil Rights, 1400 Independence Avenue SW., Washington, DC 20250–9410;
(2) Fax: (202) 690–7442; or
(3) Email: *program.intake@usda.gov.*

USDA is an equal opportunity provider, employer, and lender.

Dated: November 9, 2016.

Samuel H. Rikkers,

Administrator, Rural Business-Cooperative Service.

BILLING CODE 3410–XY–P

DEPARTMENT OF COMMERCE

Bureau of Industry and Security

Order Denying Export Privileges

In the Matter of: Luis Alberto Najera-Citalan, Inmate Number: 10656–279, FCI Beaumont Low, Federal Correctional Institution, P.O. Box 26020, Beaumont, TX 77720.

On June 9, 2015, in the U.S. District Court for the Southern District of Texas, Luis Alberto Najera-Citalan (''Najera-Citalan''), was convicted of violating Section 38 of the Arms Export Control Act (22 U.S.C. 2778 (2012)) (''AECA''). Specifically, Najera-Citalan intentionally and knowingly conspired to knowingly and willfully export, attempt to export, and cause to be exported to Mexico from the United States a defense article, that is, to wit: approximately five (5) AR–15 style rifles which were designated as defense articles on the United States Munitions List, without having first obtained from the Department of State a license for such export or written authorization for such export. Najera-Citalan was sentenced to 60 months in prison, three years of supervised release, and a $100 assessment.

Section 766.25 of the Export Administration Regulations (''EAR'' or ''Regulations'')[1] provides, in pertinent part, that ''[t]he Director of the Office of Exporter Services, in consultation with the Director of the Office of Export Enforcement, may deny the export privileges of any person who has been convicted of a violation of the Export Administration Act (''EAA''), the EAR, or any order, license or authorization issued thereunder; any regulation, license, or order issued under the International Emergency Economic Powers Act (50 U.S.C. 1701–1706); 18 U.S.C. 793, 794 or 798; section 4(b) of the Internal Security Act of 1950 (50 U.S.C. 783(b)), or section 38 of the Arms Export Control Act (22 U.S.C. 2778).'' 15 CFR 766.25(a); *see also* Section 11(h) of the EAA, 50 U.S.C. 4610(h). The denial of export privileges under this provision may be for a period of up to 10 years from the date of the conviction. 15 CFR 766.25(d); *see also* 50 U.S.C. 4610(h). In addition, Section 750.8 of the Regulations states that the Bureau of Industry and Security's Office of Exporter Services may revoke any Bureau of Industry and Security (''BIS'') licenses previously issued in which the person had an interest in at the time of his conviction.

BIS has received notice of Najera-Citalan's conviction for violating the AECA, and has provided notice and an opportunity for Najera-Citalan to make a written submission to BIS, as provided in Section 766.25 of the Regulations. BIS has not received a submission from Najera-Citalan.

Based upon my review and consultations with BIS's Office of Export Enforcement, including its Director, and the facts available to BIS, I have decided to deny Najera-Citalan's export privileges under the Regulations for a period of 10 years from the date of Najera-Citalan's conviction. I have also decided to revoke all licenses issued pursuant to the Act or Regulations in which Najera-Citalan had an interest at the time of his conviction.

Accordingly, it is hereby Ordered:

First, from the date of this Order until June 9, 2025, Luis Alberto Najera-Citalan, with a last known address of Inmate Number: 10656–279, FCI Beaumont Low, Federal Correctional Institution, P.O. Box 26020, Beaumont, TX 77720, and when acting for or on his behalf, his successors, assigns, employees, agents or representatives (the ''Denied Person''), may not, directly or indirectly, participate in any way in any transaction involving any commodity, software or technology (hereinafter collectively referred to as ''item'') exported or to be exported from the United States that is subject to the Regulations, including, but not limited to:

A. Applying for, obtaining, or using any license, License Exception, or export control document;

B. Carrying on negotiations concerning, or ordering, buying, receiving, using, selling, delivering, storing, disposing of, forwarding, transporting, financing, or otherwise servicing in any way, any transaction involving any item exported or to be exported from the United States that is subject to the Regulations, or in any other activity subject to the Regulations; or

C. Benefitting in any way from any transaction involving any item exported or to be exported from the United States that is subject to the Regulations, or in any other activity subject to the Regulations.

Second, no person may, directly or indirectly, do any of the following:

A. Export or reexport to or on behalf of the Denied Person any item subject to the Regulations;

B. Take any action that facilitates the acquisition or attempted acquisition by the Denied Person of the ownership, possession, or control of any item subject to the Regulations that has been or will be exported from the United States, including financing or other support activities related to a transaction whereby the Denied Person acquires or attempts to acquire such ownership, possession or control;

C. Take any action to acquire from or to facilitate the acquisition or attempted acquisition from the Denied Person of any item subject to the Regulations that has been exported from the United States;

[1] The Regulations are currently codified in the Code of Federal Regulations at 15 CFR parts 730–774 (2016). The Regulations issued pursuant to the Export Administration Act (50 U.S.C. 4601–4623 (Supp. III 2015) (available at *http://uscode.house.gov*)). Since August 21, 2001, the Act has been in lapse and the President, through Executive Order 13222 of August 17, 2001 (3 CFR, 2001 Comp. 783 (2002)), which has been extended by successive Presidential Notices, the most recent being that of August 4, 2016 (81 FR 52,587 (Aug. 8, 2016)), has continued the Regulations in effect under the International Emergency Economic Powers Act (50 U.S.C. 1701, *et seq.* (2006 & Supp. IV 2010)).

D. Obtain from the Denied Person in the United States any item subject to the Regulations with knowledge or reason to know that the item will be, or is intended to be, exported from the United States; or

E. Engage in any transaction to service any item subject to the Regulations that has been or will be exported from the United States and which is owned, possessed or controlled by the Denied Person, or service any item, of whatever origin, that is owned, possessed or controlled by the Denied Person if such service involves the use of any item subject to the Regulations that has been or will be exported from the United States. For purposes of this paragraph, servicing means installation, maintenance, repair, modification or testing.

Third, after notice and opportunity for comment as provided in Section 766.23 of the Regulations, any other person, firm, corporation, or business organization related to Najera-Citalan by ownership, control, position of responsibility, affiliation, or other connection in the conduct of trade or business may also be made subject to the provisions of this Order in order to prevent evasion of this Order.

Fourth, in accordance with Part 756 of the Regulations, Najera-Citalan may file an appeal of this Order with the Under Secretary of Commerce for Industry and Security. The appeal must be filed within 45 days from the date of this Order and must comply with the provisions of Part 756 of the Regulations.

Fifth, a copy of this Order shall be delivered to the Najera-Citalan. This Order shall be published in the **Federal Register**.

Sixth, this Order is effective immediately and shall remain in effect until June 9, 2025.

Dated: November 9, 2016.

Karen H. Nies-Vogel,

Director, Office of Exporter Services.

DEPARTMENT OF COMMERCE

Bureau of Industry and Security

Order Denying Export Privileges

In the Matter of: Jorge Santana, Jr., Inmate Number: 00927–180, FCI Beaumont Low, Federal Correctional Institution, P.O. Box 26020, Beaumont, TX 77720.

On May 5, 2014, in the U.S. District Court for the Southern District of Texas, Jorge Santana, Jr. (''Santana''), was convicted of violating Section 38 of the Arms Export Control Act (22 U.S.C. 2778 (2012)) (''AECA''). Specifically, Santana knowingly and willfully attempted to export and caused to be exported from the United States to Mexico a defense article, that is, a .357 caliber magazine, two (2) 9mm magazines, a Smith & Wesson .40 caliber magazine, approximately 5,440 rounds of 7.62 caliber ammunition, 200 rounds of .40 caliber ammunition, and 400 rounds of .38 super caliber ammunition, which were designed as a defense article on the United States Munitions List, without having first obtained from the Department of State a license for such export or written authorization for such export. Santana was sentenced to 66 months in prison, three years of supervised release, 100 hours of community service, and a $100 assessment.

Section 766.25 of the Export Administration Regulations (''EAR'' or ''Regulations'') [1] provides, in pertinent part, that ''[t]he Director of the Office of Exporter Services, in consultation with the Director of the Office of Export Enforcement, may deny the export privileges of any person who has been convicted of a violation of the Export Administration Act (''EAA''), the EAR, or any order, license or authorization issued thereunder; any regulation, license, or order issued under the International Emergency Economic Powers Act (50 U.S.C. 1701–1706); 18 U.S.C. 793, 794 or 798; section 4(b) of the Internal Security Act of 1950 (50 U.S.C. 783(b)), or section 38 of the Arms Export Control Act (22 U.S.C. 2778).'' 15 CFR 766.25(a); *see also* Section 11(h) of the EAA, 50 U.S.C. 4610(h). The denial of export privileges under this provision may be for a period of up to 10 years from the date of the conviction. 15 CFR 766.25(d); *see also* 50 U.S.C. 4610(h). In addition, Section 750.8 of the Regulations states that the Bureau of Industry and Security's Office of Exporter Services may revoke any Bureau of Industry and Security (''BIS'') licenses previously issued in which the person had an interest in at the time of his conviction.

BIS has received notice of Santana's conviction for violating the AECA, and has provided notice and an opportunity for Santana to make a written submission to BIS, as provided in Section 766.25 of the Regulations. BIS has not received a submission from Santana.

Based upon my review and consultations with BIS's Office of Export Enforcement, including its Director, and the facts available to BIS, I have decided to deny Santana's export privileges under the Regulations for a period of 10 years from the date of Santana's conviction. I have also decided to revoke all licenses issued pursuant to the Act or Regulations in which Santana had an interest at the time of his conviction.

Accordingly, it is hereby ordered:

First, from the date of this Order until May 5, 2024, Jorge Santana, Jr., with a last known address of Inmate Number: 00927–180, FCI Beaumont Low, Federal Correctional Institution, P.O. Box 26020, Beaumont, TX 77720, and when acting for or on his behalf, his successors, assigns, employees, agents or representatives (the ''Denied Person''), may not, directly or indirectly, participate in any way in any transaction involving any commodity, software or technology (hereinafter collectively referred to as ''item'') exported or to be exported from the United States that is subject to the Regulations, including, but not limited to:

A. Applying for, obtaining, or using any license, License Exception, or export control document;

B. Carrying on negotiations concerning, or ordering, buying, receiving, using, selling, delivering, storing, disposing of, forwarding, transporting, financing, or otherwise servicing in any way, any transaction involving any item exported or to be exported from the United States that is subject to the Regulations, or in any other activity subject to the Regulations; or

C. Benefitting in any way from any transaction involving any item exported or to be exported from the United States that is subject to the Regulations, or in any other activity subject to the Regulations.

Second, no person may, directly or indirectly, do any of the following:

A. Export or reexport to or on behalf of the Denied Person any item subject to the Regulations;

B. Take any action that facilitates the acquisition or attempted acquisition by the Denied Person of the ownership, possession, or control of any item subject to the Regulations that has been

[1] The Regulations are currently codified in the Code of Federal Regulations at 15 CFR parts 730–774 (2016). The Regulations issued pursuant to the Export Administration Act (50 U.S.C. 4601–4623 (Supp. III 2015) (available at *http://uscode.house.gov*)). Since August 21, 2001, the Act has been in lapse and the President, through Executive Order 13222 of August 17, 2001 (3 CFR, 2001 Comp. 783 (2002)), which has been extended by successive Presidential Notices, the most recent being that of August 4, 2016 (81 FR 52,587 (Aug. 8, 2016)), has continued the Regulations in effect under the International Emergency Economic Powers Act (50 U.S.C. 1701, *et seq.* (2006 & Supp. IV 2010)).

or will be exported from the United States, including financing or other support activities related to a transaction whereby the Denied Person acquires or attempts to acquire such ownership, possession or control;

C. Take any action to acquire from or to facilitate the acquisition or attempted acquisition from the Denied Person of any item subject to the Regulations that has been exported from the United States;

D. Obtain from the Denied Person in the United States any item subject to the Regulations with knowledge or reason to know that the item will be, or is intended to be, exported from the United States; or

E. Engage in any transaction to service any item subject to the Regulations that has been or will be exported from the United States and which is owned, possessed or controlled by the Denied Person, or service any item, of whatever origin, that is owned, possessed or controlled by the Denied Person if such service involves the use of any item subject to the Regulations that has been or will be exported from the United States. For purposes of this paragraph, servicing means installation, maintenance, repair, modification or testing.

Third, after notice and opportunity for comment as provided in Section 766.23 of the Regulations, any other person, firm, corporation, or business organization related to Santana by ownership, control, position of responsibility, affiliation, or other connection in the conduct of trade or business may also be made subject to the provisions of this Order in order to prevent evasion of this Order.

Fourth, in accordance with Part 756 of the Regulations, Santana may file an appeal of this Order with the Under Secretary of Commerce for Industry and Security. The appeal must be filed within 45 days from the date of this Order and must comply with the provisions of Part 756 of the Regulations.

Fifth, a copy of this Order shall be delivered to the Santana. This Order shall be published in the **Federal Register**.

Sixth, this Order is effective immediately and shall remain in effect until May 5, 2024.

Issued this 9th day of November, 2016.

Karen H. Nies-Vogel,

Director, Office of Exporter Services.

BILLING CODE P

DEPARTMENT OF COMMERCE

Submission for OMB Review; Comment Request

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: Bureau of Industry and Security.

Title: Foreign Availability Procedures.

Form Number(s): N/A.

OMB Control Number: 0694–0004.

Type of Request: Regular.

Burden Hours: 510.

Number of Respondents: 2.

Average Hours Per Response: 255.

Needs and Uses: This information is collected in order to respond to requests by Congress and industry to make foreign availability determinations in accordance with Section 768 of the Export Administration Regulations. Exporters are urged to voluntarily submit data to support the contention that items controlled for export for national security reasons are available-in-fact, from a non-U.S. source, in sufficient quantity and of comparable quality so as to render the control ineffective.

Affected Public: Businesses and other for-profit institutions.

Frequency: On occasion.

Respondent's Obligation: Voluntary.

OMB Desk Officer: Jasmeet Seehra, FAX number (202) 395–7285.

Copies of the above information collection proposal can be obtained by calling or writing Jennifer Jessup, Departmental Paperwork Clearance Officer, (202) 482–0266, Department of Commerce, Room 7845, 14th and Constitution Avenue NW., Washington, DC 20230 (or via the Internet at *dHynek@doc.gov*).

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to Jasmeet Seehra, Office of Management and Budget (OMB), by email to *jseehra@omb.eop.gov,* or by fax to (202) 395–7285.

Sheleen Dumas,

PRA Departmental Lead, Office of the Chief Information Officer.

Bureau of Industry and Security

Order Denying Export Privileges

In the Matter of: Hassan Jamil Salame, Inmate Number: 40903–039, FCI Elkton, Federal Correctional Institution, P.O. Box 10, Lisbon, OH 44432

On November 3, 2015, in the U.S. District Court for the District of South Carolina, Hassan Jamil Salame (''Salame''), was convicted of violating Section 38 of the Arms Export Control Act (22 U.S.C. 2778 (2012)) (''AECA''). Specifically, Salame knowingly and willfully attempted to export and caused to be exported, defense articles, that is, firearms and ammunition, including a Ruger .44 Magnum revolver, two Bushmaster .223 caliber rifles, a Ruger .45 caliber pistol, a Glock .45 caliber pistol, and a Beretta 9mm pistol from the United States to Lebanon, without first having obtained a license or written approval from the United States Department of State. Salame was sentenced to 45 months in prison, three years of supervised release, and a $300 assessment.

Section 766.25 of the Export Administration Regulations (''EAR'' or ''Regulations'') [1] provides, in pertinent part, that ''[t]he Director of the Office of Exporter Services, in consultation with the Director of the Office of Export Enforcement, may deny the export privileges of any person who has been convicted of a violation of the Export Administration Act (''EAA''), the EAR, or any order, license or authorization issued thereunder; any regulation, license, or order issued under the International Emergency Economic Powers Act (50 U.S.C. 1701–1706); 18 U.S.C. 793, 794 or 798; section 4(b) of the Internal Security Act of 1950 (50 U.S.C. 783(b)), or section 38 of the Arms Export Control Act (22 U.S.C. 2778).'' 15 CFR 766.25(a); *see also* Section 11(h) of the EAA, 50 U.S.C. 4610(h). The denial of export privileges under this provision may be for a period of up to 10 years from the date of the conviction. 15 CFR 766.25(d); *see also* 50 U.S.C. 4610(h). In

[1] The Regulations are currently codified in the Code of Federal Regulations at 15 CFR parts 730–774 (2016). The Regulations issued pursuant to the Export Administration Act (50 U.S.C. 4601–4623 (Supp. III 2015) (available at *http://uscode.house.gov*)). Since August 21, 2001, the Act has been in lapse and the President, through Executive Order 13222 of August 17, 2001 (3 CFR, 2001 Comp. 783 (2002)), which has been extended by successive Presidential Notices, the most recent being that of August 4, 2016 (81 FR 52587 (Aug. 8, 2016)), has continued the Regulations in effect under the International Emergency Economic Powers Act (50 U.S.C. 1701, *et seq.* (2006 & Supp. IV 2010)).

addition, Section 750.8 of the Regulations states that the Bureau of Industry and Security's Office of Exporter Services may revoke any Bureau of Industry and Security (''BIS'') licenses previously issued in which the person had an interest in at the time of his conviction.

BIS has received notice of Salame's conviction for violating the AECA, and has provided notice and an opportunity for Salame to make a written submission to BIS, as provided in Section 766.25 of the Regulations. BIS has not received a submission from Salame.

Based upon my review and consultations with BIS's Office of Export Enforcement, including its Director, and the facts available to BIS, I have decided to deny Salame's export privileges under the Regulations for a period of 10 years from the date of Salame's conviction. I have also decided to revoke all licenses issued pursuant to the Act or Regulations in which Salame had an interest at the time of his conviction.

Accordingly, it is hereby *ordered*:

First, from the date of this Order until November 3, 2025, Hassan Jamil Salame, with a last known address of Inmate Number: 40903–039, FCI Elkton, Federal Correctional Institution, P.O. Box 10, Lisbon, OH 44432, and when acting for or on his behalf, his successors, assigns, employees, agents or representatives (the ''Denied Person''), may not, directly or indirectly, participate in any way in any transaction involving any commodity, software or technology (hereinafter collectively referred to as ''item'') exported or to be exported from the United States that is subject to the Regulations, including, but not limited to:

A. Applying for, obtaining, or using any license, License Exception, or export control document;

B. Carrying on negotiations concerning, or ordering, buying, receiving, using, selling, delivering, storing, disposing of, forwarding, transporting, financing, or otherwise servicing in any way, any transaction involving any item exported or to be exported from the United States that is subject to the Regulations, or in any other activity subject to the Regulations; or

C. Benefitting in any way from any transaction involving any item exported or to be exported from the United States that is subject to the Regulations, or in any other activity subject to the Regulations.

Second, no person may, directly or indirectly, do any of the following:

A. Export or reexport to or on behalf of the Denied Person any item subject to the Regulations;

B. Take any action that facilitates the acquisition or attempted acquisition by the Denied Person of the ownership, possession, or control of any item subject to the Regulations that has been or will be exported from the United States, including financing or other support activities related to a transaction whereby the Denied Person acquires or attempts to acquire such ownership, possession or control;

C. Take any action to acquire from or to facilitate the acquisition or attempted acquisition from the Denied Person of any item subject to the Regulations that has been exported from the United States;

D. Obtain from the Denied Person in the United States any item subject to the Regulations with knowledge or reason to know that the item will be, or is intended to be, exported from the United States; or

E. Engage in any transaction to service any item subject to the Regulations that has been or will be exported from the United States and which is owned, possessed or controlled by the Denied Person, or service any item, of whatever origin, that is owned, possessed or controlled by the Denied Person if such service involves the use of any item subject to the Regulations that has been or will be exported from the United States. For purposes of this paragraph, servicing means installation, maintenance, repair, modification or testing.

Third, after notice and opportunity for comment as provided in Section 766.23 of the Regulations, any other person, firm, corporation, or business organization related to Salame by ownership, control, position of responsibility, affiliation, or other connection in the conduct of trade or business may also be made subject to the provisions of this Order in order to prevent evasion of this Order.

Fourth, in accordance with Part 756 of the Regulations, Salame may file an appeal of this Order with the Under Secretary of Commerce for Industry and Security. The appeal must be filed within 45 days from the date of this Order and must comply with the provisions of Part 756 of the Regulations.

Fifth, a copy of this Order shall be delivered to the Salame. This Order shall be published in the **Federal Register**.

Sixth, this Order is effective immediately and shall remain in effect until November 3, 2025.

Dated: November 9, 2016.

Karen H. Nies-Vogel,

Director, Office of Exporter Services.

Bureau of Industry and Security

Order Denying Export Privileges

In the Matter of: Daniel Miranda-Mendoza, Inmate Number: 73420–379, Great Plains, Correctional Institution, P.O. Box 400, Hinton, OK 73047

On August 25, 2015, in the U.S. District Court for the Southern District of Texas, Daniel Miranda-Mendoza (''Miranda-Mendoza''), was convicted of violating Section 38 of the Arms Export Control Act (22 U.S.C. 2778 (2012)) (''AECA''). Specifically, Miranda-Mendoza intentionally and knowingly conspired to knowingly and willfully export, attempt to export, and caused to be exported from the United States to Mexico, a defense article, that is, to wit: Approximately one Kel-Tec pistol, Model PMR–30, .22 caliber, one Remington rifle, Model 7400, .30–06 caliber, and one Browning rifle, Model X-bolt, .270 caliber, which were designated as defense articles on the United States Munitions List, without having first obtained from the Department of State a license for such export or written authorization for such export. Miranda-Mendoza was sentenced to 37 months in prison and a $100 assessment.

Section 766.25 of the Export Administration Regulations (''EAR'' or ''Regulations'') [1] provides, in pertinent part, that ''[t]he Director of the Office of Exporter Services, in consultation with the Director of the Office of Export Enforcement, may deny the export privileges of any person who has been convicted of a violation of the Export Administration Act (''EAA''), the EAR, or any order, license or authorization issued thereunder; any regulation, license, or order issued under the International Emergency Economic

[1] The Regulations are currently codified in the Code of Federal Regulations at 15 CFR parts 730–774 (2016). The Regulations issued pursuant to the Export Administration Act (50 U.S.C. 4601–4623 (Supp. III 2015) (available at *http://uscode.house.gov*)). Since August 21, 2001, the Act has been in lapse and the President, through Executive Order 13222 of August 17, 2001 (3 CFR, 2001 Comp. 783 (2002)), which has been extended by successive Presidential Notices, the most recent being that of August 4, 2016 (81 FR 52,587 (Aug. 8, 2016)), has continued the Regulations in effect under the International Emergency Economic Powers Act (50 U.S.C. 1701, *et seq.* (2006 & Supp. IV 2010)).

Powers Act (50 U.S.C. 1701–1706); 18 U.S.C. 793, 794 or 798; section 4(b) of the Internal Security Act of 1950 (50 U.S.C. 783(b)), or section 38 of the Arms Export Control Act (22 U.S.C. 2778).'' 15 CFR 766.25(a); *see also* Section 11(h) of the EAA, 50 U.S.C. 4610(h). The denial of export privileges under this provision may be for a period of up to 10 years from the date of the conviction. 15 CFR 766.25(d); *see also* 50 U.S.C. 4610(h). In addition, Section 750.8 of the Regulations states that the Bureau of Industry and Security's Office of Exporter Services may revoke any Bureau of Industry and Security (''BIS'') licenses previously issued in which the person had an interest in at the time of his conviction.

BIS has received notice of Miranda-Mendoza's conviction for violating the AECA, and has provided notice and an opportunity for Miranda-Mendoza to make a written submission to BIS, as provided in Section 766.25 of the Regulations. BIS has not received a submission from Miranda-Mendoza.

Based upon my review and consultations with BIS's Office of Export Enforcement, including its Director, and the facts available to BIS, I have decided to deny Miranda-Mendoza's export privileges under the Regulations for a period of 10 years from the date of Miranda-Mendoza's conviction. I have also decided to revoke all licenses issued pursuant to the Act or Regulations in which Miranda-Mendoza had an interest at the time of his conviction.

Accordingly, it is hereby *ordered:*

First, from the date of this Order until August 25, 2025, Daniel Miranda-Mendoza, with a last known address of Inmate Number: 73420–379, Great Plains, Correctional Institution, P.O. Box 400, Hinton, OK 73047, and when acting for or on his behalf, his successors, assigns, employees, agents or representatives (the ''Denied Person''), may not, directly or indirectly, participate in any way in any transaction involving any commodity, software or technology (hereinafter collectively referred to as ''item'') exported or to be exported from the United States that is subject to the Regulations, including, but not limited to:

A. Applying for, obtaining, or using any license, License Exception, or export control document;

B. Carrying on negotiations concerning, or ordering, buying, receiving, using, selling, delivering, storing, disposing of, forwarding, transporting, financing, or otherwise servicing in any way, any transaction involving any item exported or to be exported from the United States that is subject to the Regulations, or in any other activity subject to the Regulations; or

C. Benefitting in any way from any transaction involving any item exported or to be exported from the United States that is subject to the Regulations, or in any other activity subject to the Regulations.

Second, no person may, directly or indirectly, do any of the following:

A. Export or reexport to or on behalf of the Denied Person any item subject to the Regulations;

B. Take any action that facilitates the acquisition or attempted acquisition by the Denied Person of the ownership, possession, or control of any item subject to the Regulations that has been or will be exported from the United States, including financing or other support activities related to a transaction whereby the Denied Person acquires or attempts to acquire such ownership, possession or control;

C. Take any action to acquire from or to facilitate the acquisition or attempted acquisition from the Denied Person of any item subject to the Regulations that has been exported from the United States;

D. Obtain from the Denied Person in the United States any item subject to the Regulations with knowledge or reason to know that the item will be, or is intended to be, exported from the United States; or

E. Engage in any transaction to service any item subject to the Regulations that has been or will be exported from the United States and which is owned, possessed or controlled by the Denied Person, or service any item, of whatever origin, that is owned, possessed or controlled by the Denied Person if such service involves the use of any item subject to the Regulations that has been or will be exported from the United States. For purposes of this paragraph, servicing means installation, maintenance, repair, modification or testing.

Third, after notice and opportunity for comment as provided in Section 766.23 of the Regulations, any other person, firm, corporation, or business organization related to Miranda-Mendoza by ownership, control, position of responsibility, affiliation, or other connection in the conduct of trade or business may also be made subject to the provisions of this Order in order to prevent evasion of this Order.

Fourth, in accordance with Part 756 of the Regulations, Miranda-Mendoza may file an appeal of this Order with the Under Secretary of Commerce for Industry and Security. The appeal must be filed within 45 days from the date of this Order and must comply with the provisions of Part 756 of the Regulations.

Fifth, a copy of this Order shall be delivered to the Miranda-Mendoza. This Order shall be published in the **Federal Register**.

Sixth, this Order is effective immediately and shall remain in effect until August 25, 2025.

Issued this __9____d day of ____ November________, 2016.

Order Denying Export Privileges

In the Matter of: Javier Nenos Rea, Inmate Number: 06713–104, D. Ray James, Correctional Institution, P.O. Box 2000, Folkston, GA 31537

On January 13, 2015, in the U.S. District Court for the Southern District of Florida, Javier Nenos Rea (''Nenos Rea''), was convicted of violating Section 38 of the Arms Export Control Act (22 U.S.C. 2778 (2012)) (''AECA''). Specifically, Nenos Rea knowingly and willfully attempted to export defense articles, that is, AK–47 assault rifles and a .40 caliber semi-automatic pistol, from the United States to Bolivia without having first obtained a license or written approval from the United States Department of State. Nenos Rea was sentenced to 46 months in prison, two years of supervised release, and a $100 assessment.

Section 766.25 of the Export Administration Regulations (''EAR'' or ''Regulations'') [1] provides, in pertinent part, that ''[t]he Director of the Office of Exporter Services, in consultation with the Director of the Office of Export Enforcement, may deny the export privileges of any person who has been convicted of a violation of the Export Administration Act (''EAA''), the EAR,

[1] The Regulations are currently codified in the Code of Federal Regulations at 15 CFR parts 730–774 (2016). The Regulations issued pursuant to the Export Administration Act (50 U.S.C. 4601–4623 (Supp. III 2015) (available at *http://uscode.house.gov*)). Since August 21, 2001, the Act has been in lapse and the President, through Executive Order 13222 of August 17, 2001 (3 CFR, 2001 Comp. 783 (2002)), which has been extended by successive Presidential Notices, the most recent being that of August 4, 2016 (81 FR 52587 (Aug. 8, 2016)), has continued the Regulations in effect under the International Emergency Economic Powers Act (50 U.S.C. 1701, *et seq.* (2006 & Supp. IV 2010)).

or any order, license or authorization issued thereunder; any regulation, license, or order issued under the International Emergency Economic Powers Act (50 U.S.C. 1701–1706); 18 U.S.C. 793, 794 or 798; section 4(b) of the Internal Security Act of 1950 (50 U.S.C. 783(b)), or section 38 of the Arms Export Control Act (22 U.S.C. 2778).'' 15 CFR 766.25(a); *see also* Section 11(h) of the EAA, 50 U.S.C. 4610(h). The denial of export privileges under this provision may be for a period of up to 10 years from the date of the conviction. 15 CFR 766.25(d); *see also* 50 U.S.C. 4610(h). In addition, Section 750.8 of the Regulations states that the Bureau of Industry and Security's Office of Exporter Services may revoke any Bureau of Industry and Security (''BIS'') licenses previously issued in which the person had an interest in at the time of his conviction.

BIS has received notice of Nenos Rea's conviction for violating the AECA, and has provided notice and an opportunity for Nenos Rea to make a written submission to BIS, as provided in Section 766.25 of the Regulations. BIS has not received a submission from Nenos Rea.

Based upon my review and consultations with BIS's Office of Export Enforcement, including its Director, and the facts available to BIS, I have decided to deny Nenos Rea's export privileges under the Regulations for a period of 10 years from the date of Nenos Rea's conviction. I have also decided to revoke all licenses issued pursuant to the Act or Regulations in which Nenos Rea had an interest at the time of his conviction.

Accordingly, it is hereby *ordered:*

First, from the date of this Order until January 13, 2025, Javier Nenos Rea, with a last known address of Inmate Number: 06713–104, D. Ray James, Correctional Institution, P.O. Box 2000, Folkston, GA 31537, and when acting for or on his behalf, his successors, assigns, employees, agents or representatives (the ''Denied Person''), may not, directly or indirectly, participate in any way in any transaction involving any commodity, software or technology (hereinafter collectively referred to as ''item'') exported or to be exported from the United States that is subject to the Regulations, including, but not limited to:

A. Applying for, obtaining, or using any license, License Exception, or export control document;

B. Carrying on negotiations concerning, or ordering, buying, receiving, using, selling, delivering, storing, disposing of, forwarding, transporting, financing, or otherwise servicing in any way, any transaction involving any item exported or to be exported from the United States that is subject to the Regulations, or in any other activity subject to the Regulations; or

C. Benefitting in any way from any transaction involving any item exported or to be exported from the United States that is subject to the Regulations, or in any other activity subject to the Regulations.

Second, no person may, directly or indirectly, do any of the following:

A. Export or reexport to or on behalf of the Denied Person any item subject to the Regulations;

B. Take any action that facilitates the acquisition or attempted acquisition by the Denied Person of the ownership, possession, or control of any item subject to the Regulations that has been or will be exported from the United States, including financing or other support activities related to a transaction whereby the Denied Person acquires or attempts to acquire such ownership, possession or control;

C. Take any action to acquire from or to facilitate the acquisition or attempted acquisition from the Denied Person of any item subject to the Regulations that has been exported from the United States;

D. Obtain from the Denied Person in the United States any item subject to the Regulations with knowledge or reason to know that the item will be, or is intended to be, exported from the United States; or

E. Engage in any transaction to service any item subject to the Regulations that has been or will be exported from the United States and which is owned, possessed or controlled by the Denied Person, or service any item, of whatever origin, that is owned, possessed or controlled by the Denied Person if such service involves the use of any item subject to the Regulations that has been or will be exported from the United States. For purposes of this paragraph, servicing means installation, maintenance, repair, modification or testing.

Third, after notice and opportunity for comment as provided in Section 766.23 of the Regulations, any other person, firm, corporation, or business organization related to Nenos Rea by ownership, control, position of responsibility, affiliation, or other connection in the conduct of trade or business may also be made subject to the provisions of this Order in order to prevent evasion of this Order.

Fourth, in accordance with Part 756 of the Regulations, Nenos Rea may file an appeal of this Order with the Under Secretary of Commerce for Industry and Security. The appeal must be filed within 45 days from the date of this Order and must comply with the provisions of Part 756 of the Regulations.

Fifth, a copy of this Order shall be delivered to the Nenos Rea. This Order shall be published in the **Federal Register**.

Sixth, this Order is effective immediately and shall remain in effect until January 13, 2025.

BILLING CODE P

DEPARTMENT OF COMMERCE

Bureau of Industry and Security

Proposed Information Collection; Comment Request; Voluntary Self-Disclosure of Violations of the Export Administration Regulations

AGENCY: Bureau of Industry and Security.

ACTION: Notice.

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995.

DATES: Written comments must be submitted on or before January 17, 2017.

ADDRESSES: Direct all written comments to Jennifer Jessup, Departmental Paperwork Clearance Officer, Department of Commerce, Room 6616, 14th and Constitution Avenue NW., Washington, DC 20230 (or via the Internet at *JJessup@doc.gov*).

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument and instructions should be directed to Mark Crace, BIS ICB Liaison, (202) 482–4895, *Mark.Crace@bis.doc.gov.*

SUPPLEMENTARY INFORMATION:

I. Abstract

This collection of information is needed to detect violations of the Export Administration Act and Regulations, and determine if an investigation or prosecution is necessary and to reach a settlement with violators. Voluntary self-disclosure of EAR violations strengthens BIS's enforcement efforts by allowing BIS to conduct investigations of the disclosed incidents faster than would be the case if BIS had to detect the violations without such disclosures. BIS evaluates the seriousness of the violation and either (1) Informs the person making the is closure that no action is warranted; (2) issues a warning letter; (3) issues a proposed charging letter and attempts to settle the matter; (4) issues a charging letter if settlement is not reached; and/or (5) refers the matter to the U.S. Department of Justice for criminal prosecution.

II. Method of Collection

Submitted on paper.

III. Data

OMB Control Number: 0694–0058.

Form Number(s): N/A.

Type of Review: Regular submission.

Affected Public: Business or other for-profit organizations.

Estimated Number of Respondents: 388.

Estimated Time per Response: 10 hours.

Estimated Total Annual Burden Hours: 3880.

Estimated Total Annual Cost to Public: $194,000.

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Sheleen Dumas,

PRA Departmental Lead, Office of the Chief Information Officer.

Bureau of Industry and Security

Order Denying Export Privileges

In the Matter of: Julio Cesar Solis-Castilleja, Inmate Number: 56152–379, FCI Victorville Medium I, Federal Correctional Institution, Correctional Institution, P.O. Box 3725, Adelanto, CA 92301.

On June 30, 2014, in the U.S. District Court for the Southern District of Texas, Julio Cesar Solis-Castilleja (''Solis-Castilleja''), was convicted of violating Section 38 of the Arms Export Control Act (22 U.S.C. 2778 (2012)) (''AECA''). Specifically, Solis-Castilleja knowingly and willfully attempted to export and caused to be exported from the United States to Mexico a defense article, that is, a Norinco MAK 90 Sporter 7.62 × 39mm caliber rifle, a Bushmaster .308 caliber rifle, a DPMS Panther .308 caliber rifle, a FN Herstal .308 caliber rifle, a PTR 91C .308 caliber rifle, four (4) 7.62 × 51mm magazines, and one (1) 7.62 × 39mm magazine, which were designated as a defense article on the United States Munitions List, without having first obtained from the Department of State a license for such export or written authorization for such export. Solis-Castilleja was sentenced to 46 months in prison, three years of supervised release, and a $100 assessment.

Section 766.25 of the Export Administration Regulations (''EAR'' or ''Regulations'')[1] provides, in pertinent part, that ''[t]he Director of the Office of Exporter Services, in consultation with the Director of the Office of Export Enforcement, may deny the export privileges of any person who has been convicted of a violation of the Export Administration Act (''EAA''), the EAR, or any order, license or authorization issued thereunder; any regulation, license, or order issued under the International Emergency Economic Powers Act (50 U.S.C. 1701–1706); 18 U.S.C. 793, 794 or 798; section 4(b) of the Internal Security Act of 1950 (50 U.S.C. 783(b)), or section 38 of the Arms Export Control Act (22 U.S.C. 2778).'' 15 CFR 766.25(a); *see also* Section 11(h) of the EAA, 50 U.S.C. 4610(h). The denial of export privileges under this provision may be for a period of up to 10 years from the date of the conviction. 15 CFR 766.25(d); *see also* 50 U.S.C. 4610(h). In addition, Section 750.8 of the Regulations states that the Bureau of Industry and Security's Office of Exporter Services may revoke any Bureau of Industry and Security (''BIS'') licenses previously issued in which the person had an interest in at the time of his conviction.

BIS has received notice of Solis-Castilleja's conviction for violating the AECA, and has provided notice and an opportunity for Solis-Castilleja to make a written submission to BIS, as provided in Section 766.25 of the Regulations. BIS has not received a submission from Solis-Castilleja.

Based upon my review and consultations with BIS's Office of Export Enforcement, including its Director, and the facts available to BIS, I have decided to deny Solis-Castilleja's export privileges under the Regulations for a period of 10 years from the date of Solis-Castilleja's conviction. I have also decided to revoke all licenses issued pursuant to the Act or Regulations in which Solis-Castilleja had an interest at the time of his conviction.

Accordingly, it is hereby ordered:

First, from the date of this Order until June 30, 2024, Julio Cesar Solis-Castilleja, with a last known address of Inmate Number: 56152–379, FCI Victorville Medium I, Federal Correctional Institution, P.O. Box 3725, Adelanto,CA 92301, and when acting for or on his behalf, his successors, assigns, employees, agents or representatives (the ''Denied Person''), may not, directly or indirectly, participate in any way in any transaction involving any commodity, software or technology (hereinafter collectively referred to as ''item'') exported or to be exported from the United States that is subject to the Regulations, including, but not limited to:

A. Applying for, obtaining, or using any license, License Exception, or export control document;

B. Carrying on negotiations concerning, or ordering, buying, receiving, using, selling, delivering, storing, disposing of, forwarding, transporting, financing, or otherwise servicing in any way, any transaction involving any item exported or to be exported from the United States that is subject to the Regulations, or in any other activity subject to the Regulations; or

---

[1] The Regulations are currently codified in the Code of Federal Regulations at 15 CFR parts 730–774 (2016). The Regulations issued pursuant to the Export Administration Act (50 U.S.C. 4601–4623 (Supp. III 2015) (available at *http://uscode.house.gov*)). Since August 21, 2001, the Act has been in lapse and the President, through Executive Order 13222 of August 17, 2001 (3 CFR, 2001 Comp. 783 (2002)), which has been extended by successive Presidential Notices, the most recent being that of August 4, 2016 (81 FR 52,587 (Aug. 8, 2016)), has continued the Regulations in effect under the International Emergency Economic Powers Act (50 U.S.C. 1701, *et seq.* (2006 & Supp. IV 2010)).

C. Benefitting in any way from any transaction involving any item exported or to be exported from the United States that is subject to the Regulations, or in any other activity subject to the Regulations.

Second, no person may, directly or indirectly, do any of the following:

A. Export or reexport to or on behalf of the Denied Person any item subject to the Regulations;

B. Take any action that facilitates the acquisition or attempted acquisition by the Denied Person of the ownership, possession, or control of any item subject to the Regulations that has been or will be exported from the United States, including financing or other support activities related to a transaction whereby the Denied Person acquires or attempts to acquire such ownership, possession or control;

C. Take any action to acquire from or to facilitate the acquisition or attempted acquisition from the Denied Person of any item subject to the Regulations that has been exported from the United States;

D. Obtain from the Denied Person in the United States any item subject to the Regulations with knowledge or reason to know that the item will be, or is intended to be, exported from the United States; or

E. Engage in any transaction to service any item subject to the Regulations that has been or will be exported from the United States and which is owned, possessed or controlled by the Denied Person, or service any item, of whatever origin, that is owned, possessed or controlled by the Denied Person if such service involves the use of any item subject to the Regulations that has been or will be exported from the United States. For purposes of this paragraph, servicing means installation, maintenance, repair, modification or testing.

Third, after notice and opportunity for comment as provided in Section 766.23 of the Regulations, any other person, firm, corporation, or business organization related to Solis-Castilleja by ownership, control, position of responsibility, affiliation, or other connection in the conduct of trade or business may also be made subject to the provisions of this Order in order to prevent evasion of this Order.

Fourth, in accordance with Part 756 of the Regulations, Solis-Castilleja may file an appeal of this Order with the Under Secretary of Commerce for Industry and Security. The appeal must be filed within 45 days from the date of this Order and must comply with the provisions of Part 756 of the Regulations.

Fifth, a copy of this Order shall be delivered to the Solis-Castilleja. This Order shall be published in the **Federal Register**.

Sixth, this Order is effective immediately and shall remain in effect until June 30, 2024.

Issued this 9th day of November, 2016.

Karen H. Nies-Vogel,

Director, Office of Exporter Services.

Solid Urea From Russia: Final Results of Antidumping Duty Administrative and New Shipper Reviews; 2014–2015

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: On August 12, 2016, the Department of Commerce (the Department) published the preliminary results of the administrative review and new shipper review of the antidumping duty order on solid urea from Russia. The period of review (POR) is July 1, 2014, through June 30, 2015. For the final results of these reviews, we continue to find that subject merchandise has not been sold at less than normal value.

DATES: Effective November 18, 2016.

FOR FURTHER INFORMATION CONTACT: Michael A. Romani or Andre Gziryan, AD/CVD Operations, Office I, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482–0198, and (202) 482–2201, respectively.

SUPPLEMENTARY INFORMATION:

Background

On August 12, 2016, the Department published the *Preliminary Results* of the administrative review and new shipper review of the antidumping duty order on solid urea from Russia.[1] The administrative review covers MCC EuroChem; the new shipper review covers Joint Stock Company PhosAgro-Cherepovets (PhosAgro). The Department gave interested parties an opportunity to comment on the *Preliminary Results.* We received no comments. The Department conducted these reviews in accordance with section 751(a)(2) of the Tariff Act of 1930, as amended (the Act).

Scope of the Order

The merchandise subject to the order is solid urea, a high-nitrogen content fertilizer which is produced by reacting ammonia with carbon dioxide. The product is currently classified under the Harmonized Tariff Schedules of the United States (HTSUS) item number 3102.10.0010. Previously such merchandise was classified under item number 480.3000 and 3102.10.0000 of the HTSUS. Although the HTSUS subheading is provided for convenience and customs purposes, the written description of the merchandise subject to the order is dispositive.

Final Results of the Administrative Review

The Department made no changes to its calculations announced in the *Preliminary Results.* As a result of this administrative review, we determine that an estimated weighted-average dumping margin of 0.00 percent exists for MCC EuroChem for the period July 1, 2014, through June 30, 2015.

Final Results of the New Shipper Review

The Department made no changes to its calculations announced in the *Preliminary Results.* As a result of this new shipper review, we determine that an estimated weighted-average dumping margin of 0.00 percent exists for merchandise produced and exported by PhosAgro for the period July 1, 2014, through June 30, 2015.

Assessment

In accordance with 19 CFR 351.212 and the *Final Modification,*[2] the Department will instruct U.S. Customs and Border Protection (CBP) to liquidate all appropriate entries for MCC EuroChem and PhosAgro without regard to antidumping duties.

For entries of subject merchandise during the period of review produced by MCC EuroChem and PhosAgro for which they did not know their merchandise was destined for the United States, we will instruct CBP to liquidate unreviewed entries at the all-others rate if there is no rate for the

[2] *See Antidumping Proceedings: Calculation of the Weighted-Average Dumping Margin and Assessment Rate in Certain Antidumping Duty Proceedings; Final Modification,* 77 FR 8101, 8102 (February 14, 2012) (*Final Modification*).

intermediate company(ies) involved in the transaction.[3]

We intend to issue instructions to CBP 15 days after publication of the final results of this review.

Cash Deposit Requirements

The following cash deposit requirements will be effective upon publication of the notice of final results of the administrative and new shipper reviews for all shipments of solid urea from Russia entered, or withdrawn from warehouse, for consumption on or after the date of publication as provided by section 751(a)(2) of the Act: (1) The cash deposit rate with respect to the administrative review respondent, MCC EuroChem, will be 0.00 percent, the weighted average dumping margin established in the final results of the administrative review; (2) for merchandise exported by manufacturers or exporters not covered in this administrative review but covered in a prior segment of the proceeding, the cash deposit rate will continue to be the company-specific rate published for the most recently completed segment of this proceeding in which that manufacturer or exporter participated; (3) if the exporter is not a firm covered in this administrative review, a prior review, or the original investigation, but the manufacturer is, the cash deposit rate will be the rate established for the most recently completed segment of this proceeding for the manufacturer of subject merchandise; and (4) the cash deposit rate for all other manufacturers or exporters will continue to be 64.93 percent, the all-others rate established in the original less-than-fair-value investigation.[4]

With respect to PhosAgro, the new shipper respondent, the Department established a combination cash deposit rate for this company, consistent with its practice, as follows: (1) For subject merchandise produced and exported by PhosAgro, the cash deposit rate will be 0.00 percent; (2) for subject merchandise exported by PhosAgro, but not produced by PhosAgro, the cash deposit rate will be the rate for the all-others established in the less-than-fair-value investigation; and (3) for subject merchandise produced by PhosAgro but not exported by PhosAgro, the cash deposit rate will be the rate applicable to the exporter.

These cash deposit requirements, when imposed, shall remain in effect until further notice.

Notification to Importers

This notice serves as a final reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

Notification Regarding Administrative Protective Orders

This notice also serves as a reminder to parties subject to administrative protective order (APO) of their responsibility concerning the destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely written notification of the return or destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a sanctionable violation.

We are issuing and publishing these results of administrative and new shipper reviews in accordance with sections 751(a)(1) 751(a)(2)(B)(iii), 751(a)(3)and 777(i)(1) of the Act and 19 CFR 351.213(h), 351.214 and 351.221(b)(5).

Dated: November 14, 2016.

Paul Piquado,

Assistant Secretary for Enforcement and Compliance.

DEPARTMENT OF COMMERCE

Submission for OMB Review; Proposed Information Collection; Comment Request; Limited Access Death Master File Accredited Conformity Assessment Body Application for Firewalled Status

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: National Technical Information Service (NTIS), Commerce.

Title: Limited Access Death Master File Accredited Conformity Assessment Body Application for Firewalled Status (Firewalled Status Application Form).

OMB Control Number: [0692–XXXX].

Form Number(s): NTIS FM101.

Type of Request: New information collection.

Number of Respondents: NTIS expects to receive approximately 560 applications and renewals for certification every year for access to the Limited Access Death Master File, of which it expects that approximately 20% of the required assessments will be provided by Accredited Conformity Assessment Bodies that will seek firewalled status in a given year. Accordingly, NTIS estimates that it will receive approximately 112 Firewalled Status Application Forms.

Average Hours Per Response: 1 hour.

Burden Hours: 112 (112 × 1 hour = 112)

Needs and Uses: NTIS issued a final rule establishing a program through which persons may become eligible to obtain access to Death Master File (DMF) information about an individual within three years of that individual's death. The final rule was promulgated under Section 203 of the Bipartisan Budget Act of 2013, Pub. L. 113–67 (Act). The Act prohibits the Secretary of Commerce (Secretary) from disclosing DMF information during the three-year period following an individual's death (Limited Access DMF), unless the person requesting the information has been certified to access the Limited Access DMF pursuant to certain criteria in a program that the Secretary establishes. The Secretary delegated the authority to carry out Section 203 to the Director of NTIS.

The final rule requires that, in order to become certified, a Person or Certified Person must submit a written attestation from an ''Accredited Conformity Assessment Body'' (ACAB), as defined in the final rule, that such Person has information security systems, facilities and procedures in place to protect the security of the Limited Access DMF, as required under Section 1110.102(a)(2) of the final rule. A Certified Person also must provide a new written attestation periodically for renewal of its certification as specified in the final rule. The ACAB must be independent of the Person or Certified Person seeking certification, unless it is a third party conformity assessment body which qualifies for ''firewalled status'' pursuant to Section 1110.502 of the final rule.

The Firewalled Status Application Form collects information that NTIS will use to evaluate whether the respondent qualifies for ''firewalled status'' under the rule, and, therefore, can provide a written attestation in lieu of an independent ACAB's attestation. This information includes specific requirements of Section 1110.502(b) of the final rule, which the respondent ACAB must certify are satisfied, and the provision of specific information by the respondent ACAB, such as the identity of the Person or Certified Person that would be the subject of the attestation and the basis upon which the certifications were made.

Affected Public: ACABs seeking firewalled status under 15 CFR 1110.502 because they are ''owned, managed or controlled'' by the Person or Certified Person for whom they are providing assessment(s) and/or audit(s) under the final rule for ''Certification Program for Access to the Death Master File.''

Frequency: Once per attestation.

Respondent's Obligation: Voluntary.

This information collection request may be viewed at reginfo.gov. Follow the instructions to view Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *OIRA_Submission@omb.eop.gov* or fax to (202) 395–5806.

Sheleen Dumas,

PRA Departmental Lead, Office of the Chief Information Officer.

DEPARTMENT OF COMMERCE

National Technical Information Service

Proposed Information Collection; Comment Request; Limited Access Death Master File Systems Safeguards Attestation Forms

AGENCY: National Technical Information Service (NTIS), Commerce.

ACTION: Notice.

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995. The purpose of this notice is to allow for 60 days of public comment.

DATES: Written comments must be submitted on or before January 17, 2017.

ADDRESSES: Direct all written comments to Jennifer Jessup, Departmental Paperwork Clearance Officer, Department of Commerce, Room 6616, 14th and Constitution Avenue NW., Washington, DC 20230 (or via the Internet at *JJessup@doc.gov*).

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument and instructions should be directed to John W. Hounsell, Business and Industry Specialist, Office of Product and Program Management, National Technical Information Service, Department of Commerce, 5301 Shawnee Road, Alexandria, VA 22312, email: *jhounsell@ntis.gov* or telephone: 703–605–6184.

SUPPLEMENTARY INFORMATION:

I. Abstract

This notice informs the public that the National Technical Information Service (NTIS) is requesting approval of a new information collection described in Section II for use in connection with the final rule for the ''Certification Program for Access to the Death Master File.'' The final rule was published on June 1, 2016 (81 FR 34882), with the rule to become effective on November 28, 2016. The new information collection described in Section II, if approved, will become effective on the effective date of the final rule.

II. Method of Collection

Title of Information Collection

(A) ''Limited Access Death Master File (LADMF) Accredited Conformity Assessment Body Systems Safeguards Attestation Form'' (ACAB Systems Safeguards Attestation Form)

(B) ''Limited Access Death Master File (LADMF) State or Local Government Auditor General (AG) or Inspector General (IG) Systems Safeguards Attestation Form'' (AG or IG Systems Safeguards Attestation Form)

Description of the need for the information and the proposed use: NTIS issued a final rule establishing a program through which persons may become eligible to obtain access to Death Master File (DMF) information about an individual within three years of that individual's death. The final rule was promulgated under Section 203 of the Bipartisan Budget Act of 2013, Public Law 113–67 (Act). The Act prohibits the Secretary of Commerce (Secretary) from disclosing DMF information during the three-year period following an individual's death (Limited Access DMF), unless the person requesting the information has been certified to access the Limited Access DMF pursuant to certain criteria in a program that the Secretary establishes. The Secretary delegated the authority to carry out Section 203 to the Director of NTIS.

On December 30, 2014, NTIS initially described a ''Limited Access Death Master File Systems Safeguards Attestation Form'' in the notice of proposed rulemaking (79 FR 78314 at 78321). To accommodate the requirements of the final rule, NTIS is using both the ACAB Systems Safeguards Attestation Form and the AG or IG Systems Safeguards Attestation Form.

The ACAB Systems Safeguards Attestation Form requires an ''Accredited Conformity Assessment Body'' (ACAB), as defined in the final rule, to attest that a Person seeking certification or a Certified Person seeking renewal of certification has information security systems, facilities and procedures in place to protect the security of the Limited Access DMF, as required under Section 1110.102(a)(2) of the final rule. The ACAB Systems Safeguards Attestation Form collects information based on an assessment by the ACAB conducted within three years prior to the date of the Person or Certified Person's submission of a completed certification statement under Section 1110.101(a) of the final rule. This collection includes specific requirements of the final rule, which the ACAB must certify are satisfied, and the provision of specific information by the ACAB, such as the date of the assessment and the auditing standard(s) used for the assessment.

Section 1110.501(a)(2) of the final rule provides that a state or local government office of AG or IG and a Person or Certified Person that is a department or agency of the same state or local government, respectively, are not considered to be owned by a common ''parent'' entity under Section 1110.501(a)(1)(ii) for the purpose of determining independence, and attestation by the AG or IG is possible. The AG or IG Systems Safeguards Attestation Form is for the use of a state or local government AG or IG to attest on behalf of a state or local government department or agency Person or Certified Person. The AG or IG Systems Safeguards Attestation Form requires the state or local government AG or IG to attest that a Person seeking certification or a Certified Person seeking renewal of certification has information security systems, facilities and procedures in place to protect the security of the Limited Access DMF, as required under Section 1110.102(a)(2) of the final rule. The AG or IG Systems Safeguards Attestation Form collects information based on an assessment by the state or local government AG or IG conducted within three years prior to the date of the Person or Certified Person's submission of a completed certification statement under Section 1110.101(a) of the final rule. This collection includes specific requirements of the final rule, which the state or local government AG or IG must certify are satisfied, and the provision of specific information by the state or local government AG or IG, such as the date of the assessment.

III. Data

OMB Control Number: [*0692–XXXX*].

Form Number(s): NTIS FM100A and NTIS FM100B.

Type of Review: New information collection.

Affected Public: Accredited Conformity Assessment Bodies and state or local government Auditors General or Inspectors General attesting that a Person seeking certification or a Certified Person seeking renewal of certification under the final rule for the ''Certification Program for Access to the Death Master File'' has information security systems, facilities and procedures in place to protect the security of the Limited Access DMF, as required by the final rule.

Estimated Number of Respondents

ACAB Systems Safeguards Attestation Form: NTIS expects to receive approximately 500 ACAB Systems Safeguards Attestation Forms from Persons and Certified Persons annually.

AG or IG Systems Safeguards Attestation Form: NTIS expects to receive approximately 60 AG or IG Systems Safeguards Attestation Forms from Persons and Certified Persons annually.

Estimated Time per Response

ACAB Systems Safeguards Attestation Form: 3 hours.

AG or IG Systems Safeguards Attestation Form: 3 hours.

Estimated Total Annual Burden Hours: 1680.

ACAB Systems Safeguards Attestation Form: 1500 (500 × 3 hours = 1500 hours).

AG or IG Systems Safeguards Attestation Form: 180 (60 × 3 hours = 180 hours).

Estimated Total Annual Cost to Public

ACAB Systems Safeguards Attestation Form: NTIS expects to receive approximately 500 ACAB Systems Safeguards Attestation Forms annually at a fee of $525 per form, for a total cost of $262,500. This total annual cost reflects the cost to the Federal Government for the ACAB Systems Safeguards Attestation Forms, which consists of the expenses associated with NTIS personnel reviewing and processing these forms. NTIS estimates that it will take an ACAB's senior auditor three hours to complete the form at a rate of approximately $135 per hour, for a total additional cost to the public of $202,500 (1500 burden hours × $135/hour = $202,500). NTIS estimates the total annual cost to the public for the ACAB Systems Safeguards forms to be $465,000 ($262,500 in fees + $202,500 in staff time = $465,000).

AG or IG Systems Safeguards Attestation Form: NTIS expects to receive approximately 60 AG or IG Systems Safeguards Attestation Forms annually at a fee of $525 per form, for a total cost of $31,500. This total annual cost reflects the cost to the Federal Government for the AG or IG Systems Safeguards Attestation Forms, which consists of the expenses associated with NTIS personnel reviewing and processing these forms. NTIS estimates that it will take an AG or IG senior auditor three hours to complete the form at a rate of approximately $100 per hour, for a total additional cost to the public of $18,000 (180 burden hours × $100/hour = $18,000). NTIS estimates the total annual cost to the public for AG or IG Systems Safeguards Attestation Forms to be $49,500 ($31,500 in fees + $18,000 in staff time = $49,500).

NTIS estimates the total annual cost to the public for both the ACAB Systems Safeguards Attestation Forms and the AG or IG Systems Safeguards Attestation Forms to be $514,500 ($465,000 for ACAB Systems Safeguards Attestation Forms + $49,500 for AG or IG Systems Safeguards Attestation Forms.

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Sheleen Dumas,

PRA Departmental Lead, Office of the Chief Information Officer.

BILLING CODE 3510–13–P

DEPARTMENT OF COMMERCE

Patent and Trademark Office

[Docket No.: PTO–P–2016–0046]

Request for Comments and Notice of Public Meeting on a Preliminary Draft Convention on the Recognition and Enforcement of Foreign Judgments Currently Being Negotiated at The Hague Conference on Private International Law

AGENCY: United States Patent and Trademark Office, Department of Commerce.

ACTION: Notice of public meeting; request for comments.

SUMMARY: The Hague Conference on Private International Law (''The Hague Conference''), an international organization in the Netherlands, is sponsoring negotiations for a convention on the recognition and enforcement of foreign judgments in civil and commercial matters. In February 2016, the Council on General Affairs and Policy of The Hague Conference created a Special Commission on the Recognition and Enforcement of Foreign Judgments (''the Special Commission'') to prepare a preliminary draft text of the convention, which is subject to a formal diplomatic negotiation open to member States of The Hague Conference. At its first session in June 2016, the Special Commission produced a Preliminary Draft Convention that contains general and specific provisions that would apply to the recognition and enforcement of judgments arising from transnational intellectual property disputes. The United States Patent and Trademark Office (USPTO) seeks public comments on the June 2016 Preliminary Draft Convention (the ''Preliminary

Draft'') as it relates to intellectual property matters.

To assist the USPTO in determining the best way to address this topic, the USPTO will host a public meeting to obtain public input. The meeting will be open to the public and will provide a forum for discussion of the questions identified in this notice. Written comments in response to the questions set forth in this notice also are requested.

DATES: The public meeting will be held on January 12, 2017, beginning at 1:00 p.m. Eastern Standard Time (EST) and ending at 4:00 p.m. EST.

Public Meeting Registration Deadline: Registration to attend the public meeting in person or via webcast is required by January 5, 2017. Additionally, requests to participate in the public meeting as a speaker must be submitted in writing no later than December 29, 2016. See the ''Event Registration Information'' section of this notice for additional details on how to register and how to request to present as a speaker.

Written Comments: Written comments must be received on or before January 9, 2017.

ADDRESSES:

Event Address: The public meeting will be held in the USPTO Headquarters, Global Intellectual Property Academy (GIPA), Madison Building (East), Second Floor, 600 Dulany Street, Alexandria, Virginia 22314.

Written Comments: Interested parties are encouraged to file written comments electronically by email to *judgmentsproject@uspto.gov.* Comments submitted by email should be machine-searchable and should not be copy-protected. Written comments also may be submitted by mail to the Office of Policy and International Affairs, United States Patent and Trademark Office, Mail Stop International Affairs, P.O. Box 1450, Alexandria, Virginia 22313–1450. Responders should include the name of the person or organization filing the comment, as well as a page number, on each page of their submissions. Paper submissions should also include a CD or DVD containing the submission in MS Word®, WordPerfect®, or pdf format. CDs or DVDs should be labeled with the name and organizational affiliation of the filer, and the name of the word processing program used to create the document. All personally identifiable information (for example, name, address, etc.) voluntarily submitted by the commenter may be publicly accessible. Do not submit confidential business information or otherwise sensitive or protected information. The USPTO will accept anonymous written comments (enter ''N/A'' in the required fields if you wish to remain anonymous).

All comments received are part of the public record and will be available for public inspection without change via the USPTO's Web site at *www.uspto.gov/learning-and-resources/ip-policy/hague-conference-private-international-law* and at the Office of the Director, Policy and International Affairs, located in Madison West, Tenth Floor, 600 Dulany Street, Alexandria, Virginia 22314, upon request. Because comments will be available for public inspection, information that is not desired to be made public, such as name, an address or phone number, etc., should not be included in the written comments.

FOR FURTHER INFORMATION CONTACT: Requests for additional information should be directed to the attention of Michael Shapiro, Senior Counsel, Office of Policy and International Affairs, USPTO, by telephone at 571–272–9300, or by email to *judgmentsproject@uspto.gov.*

SUPPLEMENTARY INFORMATION:

Background

The Hague Conference is sponsoring negotiations for a convention on the recognition and enforcement of foreign judgments. Following preparatory work on the draft convention by a Working Group beginning in 2012, in February 2016, the Council on General Affairs and Policy of The Hague Conference established a Special Commission to prepare a preliminary draft convention on the recognition and enforcement of foreign judgments in civil and commercial matters. The first meeting of the Special Commission took place June 1–9, 2016, at The Hague, Netherlands. The second meeting of the Special Commission is scheduled to take place February 16–24, 2017, at The Hague. The text of the Preliminary Draft produced at the first session of the Special Commission, along with other documents relating to the convention is available at: *https://www.hcch.net/en/projects/legislative-projects/judgments/special-commission1.*

Brief Summary of the Draft Convention

The Preliminary Draft currently contains 16 articles organized into two chapters. Chapter I (Articles 1–3) sets forth the scope and definitions for the draft treaty. Chapter II (Articles 4–16) sets forth the basic rules governing the recognition and enforcement of judgments under the treaty.

Scope, Exclusions From Scope, and Definitions

The Preliminary Draft applies to the recognition and enforcement of judgments in a Contracting State of judgments relating to civil or commercial matters in another Contracting State (Article 1). The term ''judgment'' means any decision on the merits, including determinations of costs or expenses related to such decisions (Article 3). Judgments related to revenue, customs, and administrative matters are excluded from the scope of the Convention (Article 1) as well as more specific subject matter such as family law matters, wills and succession, and insolvency, but judgments related to intellectual property matters (Article 2) are not excluded.

Bases for Recognition and Enforcement

The Preliminary Draft requires that a judgment of a court in a Contracting State (the ''State of origin'') be recognized and enforced in another Contracting State (the ''requested State'') without reviewing its merits (Article 4). Recognition and enforcement, however, may be refused but only under the grounds set forth in the treaty. The Preliminary Draft sets forth the bases for recognition and enforcement of judgments (Article 5).

Of particular importance to the intellectual property community are paragraphs 5(1)(k) and 5(1)(l), which set forth the bases for the recognition and enforcement of judgments for infringements of a patent, trademark, design, or other similar right, and judgments on the validity or infringement of a copyright or a related right, respectively. It should also be noted (subject to Article 6, discussed below), a judgment in such an infringement case might also be enforceable if one of the other bases for recognition and enforcement of the judgment set forth in Article 5 exists (for example, the person against whom recognition or enforcement is sought brought the claim on which the judgment is based) applies.

Exclusive Bases for Recognition and Enforcement

Notwithstanding Article 5, a judgment on the registration or validity of patents, trademarks, designs, or other similar rights that are required to be deposited or registered is eligible for recognition and enforcement in a requested State ''if and only if'' the State of origin is the State where the deposit or registration took place, or is deemed to have taken place under an international or regional instrument (Article 6). Judgments on the validity of copyrights or related rights, however, are not subject to the exclusive jurisdiction rule in Article 6. The Preliminary Draft also lists several bases on which a court of a Contracting State may refuse to recognize and enforce foreign judgments (Article 7).

Preliminary Questions

The Preliminary Draft bars the recognition and enforcement of rulings on the registration or validity of patents, trademarks, and designs, or other similar rights that arose as a preliminary question in courts other than those with exclusive jurisdiction under Article 6 (Article 8(1)). The Explanatory Note Providing Background on the Proposed Draft Text and Identifying Outstanding Issues (Prel. Doc. No. 2) provides the following example of a preliminary question: a ruling on the validity of a patent raised as a defense to an infringement claim (Prel. Doc. No. 2, para. 111). In such instances, however, a court may refuse or postpone the recognition or enforcement of a ruling on validity only (1) where the ruling is inconsistent with a judgment or a decision of a competent authority on the matter or (2) where the proceedings on validity took place in the State with exclusive jurisdiction under Article 6 (Article 8(3)). A court may refuse to recognize a judgment ''if, and to the extent that, it was based on'' a ruling on registration or validity as a preliminary question by in courts other than those with exclusive jurisdiction under Article 6.

Damages and Other Remedies

The Preliminary Draft allows the court of the requested State to refuse recognition and enforcement of judgment awarding damages if and to the extent that those damages (including exemplary or punitive damages) do not compensate a party for actual loss or harm suffered (Article 9). The Preliminary Draft does not expressly address enforcement of judgments for injunctive relief. However, the Explanatory on the Preliminary Draft notes, without expressly mentioning injunctive relief, that ''non-money judgments have been included in the scope of the Proposed Draft Text'' (Prel. Doc. No 2, para. 52).

Questions Posed

The USPTO is seeking comments on the Preliminary Draft as it relates to intellectual property. Interested members of the public are invited to present written comments on any issues they believe to be relevant to protection of intellectual property or any aspect of the proposed Convention as it relates to intellectual property. Comments also are invited on any or all of the questions listed below.

As used in the Preliminary Draft, the term ''intellectual property rights'' includes patents, trademarks, designs, and copyrights or related rights. If your response does not apply to all of these intellectual property rights, please state the specific intellectual property right, or rights, to which your response applies. Other intellectual property rights that are outside the scope of the current text of the Preliminary Draft, such as trade secrets, are identified separately in this notice where appropriate.

With respect to these and any other issues raised by the Preliminary Draft, in your responses, please: (1) Clearly identify the matter being addressed; (2) provide examples where appropriate; (3) identify any relevant legal authorities to support your comment; (4) indicate approaches and provisions that are unacceptable; and (5) express preferences for approaches, effective solutions to specific challenges, and drafting recommendations to address the matter being addressed.

1. What are your experiences in having U.S. judgments involving intellectual property matters recognized and enforced in foreign courts?

2. What are the benefits, if any, of increasing the recognition and enforcement of U.S. judgments involving intellectual property matters in foreign courts through joining a multilateral treaty?

3. What are your experiences in having foreign judgments recognized in U.S. courts, including on the basis of comity or under state statutes?

4. What are the risks, if any, of increasing the recognition and enforcement of foreign judgments involving intellectual property matters by U.S. courts through joining a multilateral treaty?

5. Are uniform rules for international enforcement of intellectual property judgments desirable?

6. What impact, if any, would the territorial nature of intellectual property rights have on enforcing rights across borders?

7. What impact, if any, would differences in procedural practices across borders have on enforcing intellectual property rights across borders?

8. What impact, if any, would differences in substantive law have on enforcing intellectual property rights across borders?

9. Would this convention have any disproportionate effects on a particular technology sector? If so, which ones and how?

10. Please identity problems that could occur from recognizing or enforcing judgments rendered on intellectual property matters in other Contracting States that have policies or laws that are inconsistent with U.S. intellectual property laws and policies.

11. Please identify any challenges with respect to enforcement in foreign courts of U.S. judgments, or in U.S. courts of foreign judgments, involving intellectual property matters.

12. How often are U.S. nationals also foreign intellectual property owners who would then be able to use this Convention to have judgments they obtain in foreign courts enforced by U.S. courts? Would that be useful for U.S. nationals?

13. What changes, if any, to U.S. law would be needed to implement the proposed convention? Please identify any drawbacks and/or advantages to such changes.

14. What effect, if any, would the Preliminary Draft have on the enforcement of intellectual property rights in the digital environment? In particular, should the language in the Preliminary Draft be revised to take into account issues that arise in connection with infringement and enforcement of intellectual property rights on the Internet?

Exclusions From Scope

15. Should judgments on the validity and/or the infringements of intellectual property rights, other than copyright and related rights, be excluded from the scope of the treaty under Article 2(2)? Please identify the specific intellectual property right at issue and the specific concerns, if any, raised by including it within the scope of this convention?

16. Should judgments on the validity, ownership, subsistence, and/or the infringement of copyright and related rights be excluded from the scope of the treaty under Article 2(2)? Please state the specific concerns, if any, raised by including copyrights or related rights within the scope of this convention.

17. Should judgments on the validity or misappropriation and/or theft of trade secrets be excluded from the scope of the treaty under Article 2(2)? Please state the specific concerns, if any, raised by including judgments on the validity or misappropriation and/or theft of trade secrets within the scope of this convention.

Bases for Recognition and Enforcement

18. Should judgments on the infringement of intellectual property rights, other than copyright and related

rights, be included as bases for recognition and enforcement in Article 5(1)(k)?

19. Should judgments on the infringements of plant breeders' rights be included in Article 5(1)(k)?

20. Should judgments on the infringements of service marks, trade dress, and geographical indications rights be expressly included in Article 5(1)(k)?

21. Should judgments on the validity or infringement of unregistered designs and trademarks be included in Article 5(1)(l)?

22. Should judgments on the validity or the misappropriation and/or theft of trade secrets be included in Article 5(1)(l)?

23. Should the bracketed language in Article 5(1)(l) be included?

24. Should judgments on the validity, ownership, subsistence or infringement of copyright or related rights be included in Article 5(1)(l) in cases where the right arose under the law of the State of origin?

25. Should such judgments be included in Article 5(1)(l) where the right did not arise under the law of the State of origin but where another basis for jurisdiction set forth in Article 5 is satisfied?

Exclusive Jurisdiction

26. With respect to a judgment on the registration or validity of patents, trademarks, designs, or other similar rights that are required to be deposited, registered, or issued, the Preliminary Draft provides for exclusive jurisdiction of the court in the State of origin where the right issued or registration took place, or is deemed to have taken place under an international or regional instrument (Article 6). Please comment on the appropriateness of this rule.

27. Should a judgment on the registration or validity of mask works or vessel designs that are required to be deposited, registered, or issued be included in Article 6?

Preliminary Matters

28. What are your experiences in having U.S. rulings on preliminary questions, or judgments based on such rulings, involving the registration or validity of patents, trademarks, and designs, or other similar rights, by courts other than those with exclusive jurisdiction recognized and enforced by a foreign court?

29. Should a judgment on the registration or validity of mask works or vessel designs that are required to be deposited, registered, or issued be included in Article 8?

30. Does Article 8 provide an appropriate framework for resolving problems, if any, related to recognition and enforcement of rulings on preliminary questions and judgments based on such rulings?

31. How much discretion should a court in the requested State have to refuse or postpone the recognition or enforcement of a ruling on the validity of a patent, trademark, design, and other similar rights raised as preliminary matter in a court in the State of origin?

Remedies

32. Article 9 provides that recognition or enforcement of a judgment may be refused if, and to the extent that, the judgment awards damages, including exemplary or punitive damages, that do not compensate a party for actual loss or harm suffered. Should the court in a requested State be allowed to recognize and enforce non-compensatory damages in judgments involving intellectual property matters?

33. Does Article 9 include the types of damages that would provide effective relief for intellectual property right owners? If not, what other types of damages or other remedies ought to be included? Why?

34. How should statutory damages for copyright infringement be treated under this Article, and should Article 9 be amended to address statutory damages expressly?

35. When a judgment for infringement of an intellectual property covered by the convention includes injunctive relief, should a court in the requested State be required to recognize and enforce the award of injunctive relief?

36. If so, should there be any limitation on the circumstances under which such awards should be recognized and enforced (for example, by specifying the limitation in Article 5)? If not, should a judgment for infringement of an intellectual property right covered by the convention that includes injunctive relief be excluded as a basis for recognition and enforcement, or whole or in part, under Article 5?

Event Registration Information: To register to attend or to request to present as a speaker, please send an email message to *judgmentsproject@uspto.gov* and provide the following information: (1) Your name, title, company or organization (if applicable), address, phone number, and email address; (2) whether you wish to attend in person or via webcast; and (3) whether you wish to make an oral presentation at the meeting and, if so, which question(s) identified in the supplementary information section of this notice will be addressed and the approximate desired length of your presentation. Each attendee, even if from the same organization, must register separately. In order to give all speakers a meaningful opportunity to speak, the USPTO may not be able to accommodate all persons who wish to make a presentation. However, the USPTO will attempt to accommodate as many persons as possible who wish to make a presentation. After reviewing the speaker requests and the information regarding the presentations provided in the requests, the USPTO will contact each speaker prior to the event with the amount of time available and the approximate time that the speaker's presentation is scheduled to begin. The amount of time available for each speaker presentation and selected speakers without a formal presentation may be limited to ensure that all persons selected to speak will have a meaningful opportunity to do so. Speakers who opt to employ slides as part of their presentation must send final electronic copies of the slides in Microsoft PowerPoint® to *judgmentsproject@uspto.gov* by January 5, 2017, so that the slides can be displayed at the meeting. Additionally, and only if time allows, the USPTO will provide an opportunity for persons in the audience, who did not register as speakers or were not selected as speakers, to speak at the meeting without a formal presentation. For more information on the meeting, including webcast access instructions, agenda, and a list of speakers, please visit USPTO's Web site at *www.uspto.gov/learning-and-resources/ip-policy/hague-conference-private-international-law.* If special accommodations due to a disability are needed, please inform the contact person(s) identified under the heading FOR FURTHER INFORMATION CONTACT.

Dated: November 14, 2016.

Michelle K. Lee,

Under Secretary of Commerce for Intellectual Property and Director of the United States Patent and Trademark Office.

BILLING CODE 3510–16–P

COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY; DISABLED

Procurement List; Proposed Deletions

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Proposed Deletions from the Procurement List.

SUMMARY: The Committee is proposing to delete products previously furnished by a nonprofit agency employing persons who are blind or have other severe disabilities.

DATES: *Comments must be received on or before:* December 18, 2016.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, 1401 S. Clark Street, Suite 715, Arlington, Virginia 22202–4149.

FOR FURTHER INFORMATION CONTACT: Barry S. Lineback, Telephone: (703) 603–7740, Fax: (703) 603–0655, or email *CMTEFedReg@AbilityOne.gov.*

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 8503 (a)(2) and 41 CFR 51–2.3. Its purpose is to provide interested persons an opportunity to submit comments on the proposed actions.

Deletions

The following products are proposed for deletion from the Procurement List:

Products

NSN(s)—Product Name(s)—

7510–01–545–3778—DAYMAX System, 2015, Calendar Pad, Type II
7510–01–545–3782—DAYMAX System, 2015, Calendar Pad, Type I
Mandatory Source(s) of Supply: Anthony Wayne Rehabilitation Center for Handicapped and Blind, Inc., Fort Wayne, IN
Contracting Activity: General Services Administration, New York, NY

Barry S. Lineback,

Director, Business Operations.

COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

Procurement List; Additions

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Additions to the Procurement List.

SUMMARY: This action adds products to the Procurement List that will be furnished by a nonprofit agency employing persons who are blind or have other severe disabilities.

DATES: *Effective Date:* 12/18/2016.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled,1401 S. Clark Street, Suite 715, Arlington Virginia, 22202–4149.

FOR FURTHER INFORMATION CONTACT: Barry S. Lineback, Telephone: (703) 603–7740, Fax: (703) 603–0655, or email *CMTEFedReg@AbilityOne.gov.*

SUPPLEMENTARY INFORMATION:

ADDITIONS

On 9/23/2016 (81 FR 65629–65630), the Committee for Purchase From People Who Are Blind or Severely Disabled published notice of proposed additions to the Procurement List.

After consideration of the material presented to it concerning capability of qualified nonprofit agencies to provide the products and impact of the additions on the current or most recent contractors, the Committee has determined that the products listed below are suitable for procurement by the Federal Government under 41 U.S.C. 8501–8506 and 41 CFR 51–2.4.

Regulatory Flexibility Act Certification

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organization that will furnish the products to the Government.

2. The action will result in authorizing a small entity to furnish the products to the Government.

3. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 8501–8506) in connection with the products proposed for addition to the Procurement List.

End of Certification

Accordingly, the following products are added to the Procurement List:

Products

Product Name(s)

NSN: 7520–00–SAM–0208—File Folder, Expanding, 12 Tab, Flap and Cord Closure, Polypropylene, Smoke Gray
NSN: 7520–00–SAM–0209—File Folder, Expanding, 12 Tab, Flap and Cord Closure, Polypropylene, Blue
NSN: 7520–00–SAM–0210—File Folder, Expanding, 12 Tab, Flap and Cord Closure, Polypropylene, Purple
NSN: 7520–00–SAM–0212—File Storage Box, Expanding, Flap and Cord Closure, Polypropylene, Black
NSN: 7520–00–SAM–0216—File Storage Box, Expanding, 19 Tab, Alpha/Subject, Latch Closure, Pressboard and Kraft Paper, Black
NSN: 7520–00–SAM–0218—File Folder, Expanding, 7 Tab with Pockets, Flap and Cord Closure, Polypropylene, Black
Mandatory for: Total Government Requirement
Mandatory Source(s) of Supply: Exceptional Children's Foundation, Culver City, CA
Contracting Activity: General Services Administration, New York, NY
Distribution: A-List

Barry S. Lineback,

Director, Business Operations.

BILLING CODE 6353–01–P

BUREAU OF CONSUMER FINANCIAL PROTECTION

Fair Credit Reporting Act Disclosures

AGENCY: Bureau of Consumer Financial Protection.

ACTION: Notice regarding charges for certain disclosures under the Fair Credit Reporting Act.

SUMMARY: The Bureau of Consumer Financial Protection (Bureau) announces that the ceiling on allowable charges under section 612(f) of the Fair Credit Reporting Act (FCRA) will remain unchanged at $12.00, effective for 2017. The Bureau is required to increase the $8.00 amount referred to in section 612(f)(1)(A)(i) of the FCRA on January 1 of each year, based proportionally on changes in the Consumer Price Index for All Urban Consumers (CPI–U), with fractional changes rounded to the nearest fifty cents. The CPI–U increased 49.77 percent between September 1997, when the FCRA amendments took effect, and September 2016. This increase in the CPI–U, and the requirement that any increase be rounded to the nearest fifty cents, result in a maximum allowable charge of $12.00.

DATES: Effective January 1, 2017.

FOR FURTHER INFORMATION CONTACT: Jaclyn Maier, Counsel, Office of Regulations, Consumer Financial Protection Bureau, 1700 G Street NW., Washington, DC 20552, at (202) 435–7700.

SUPPLEMENTARY INFORMATION: Section 612(f)(1)(A) of the Fair Credit Reporting Act (FCRA) provides that a consumer reporting agency may charge a consumer a reasonable amount for making a disclosure to the consumer pursuant to section 609 of the FCRA. Section 612(f)(1)(A)(i) of the FCRA provides that, where a consumer reporting agency is permitted to impose a reasonable charge on a consumer for making a disclosure to the consumer pursuant to section 609 of the FCRA, the charge shall not exceed $8.00 and shall be indicated to the consumer before making the disclosure. Section 612(f)(2) of the FCRA states that the Bureau shall increase the $8.00 maximum amount on

January 1 of each year, based proportionally on changes in the Consumer Price Index, with fractional changes rounded to the nearest fifty cents. The Bureau's calculations are based on the CPI–U, which is the most general Consumer Price Index and covers all urban consumers and all items.

Section 612(a) of the FCRA gives consumers the right to a free disclosure upon request once every 12 months. The maximum allowable charge established by this notice does not apply to requests made under that provision. The charge does apply when a consumer who orders a file disclosure has already received a free annual disclosure and does not otherwise qualify for an additional free disclosure.

The Bureau is using the $8.00 amount set forth in section 612(f)(1)(A)(i) of the FCRA as the baseline for its calculation of the increase in the ceiling on reasonable charges for certain disclosures made under section 609 of the FCRA. Since the effective date of section 612(a) was September 30, 1997, the Bureau calculated the proportional increase in the CPI–U from September 1997 to September 2016. The Bureau then determined what modification, if any, from the original base of $8.00 should be made effective for 2017, given the requirement that fractional changes be rounded to the nearest fifty cents.

Between September 1997 and September 2016, the CPI–U increased by 49.77 percent from an index value of 161.2 in September 1997 to a value of 241.428 in September 2016. An increase of 49.77 percent in the $8.00 base figure would lead to a figure of $11.98. However, because the statute directs that the resulting figure be rounded to the nearest $0.50, the maximum allowable charge is $12.00. The Bureau therefore determines that the maximum allowable charge for the year 2017 will remain at $12.00, effective January 1, 2017.

Dated: November 8, 2016.

Richard Cordray,

Director, Bureau of Consumer Financial Protection.

BILLING CODE 4810–AM–P

DEPARTMENT OF DEFENSE

Department of the Army

Notice of Intent To Grant Exclusive Patent License to Per Vivo Labs, Inc.; Kingsport, TN

AGENCY: Department of the Army, DoD.

ACTION: Notice of intent.

SUMMARY: The Department of the Army hereby gives notice of its intent to grant to Per Vivo Labs, Inc.; a corporation having its principle place of business at 2002 Brookside Lane, Kingsport, TN 37660, an exclusive license.

DATES: Written objections must be filed not later than 15 days following publication of this announcement.

ADDRESSES: Send written objections to U.S. Army Research Laboratory Technology Transfer and Outreach Office, RDRL–DPT/Thomas Mulkern, Building 321 Room 110, Aberdeen Proving Ground, MD 21005–5425.

FOR FURTHER INFORMATION CONTACT: Thomas Mulkern, (410) 278–0889, E-Mail: *ORTA@arl.army.mil.*

SUPPLEMENTARY INFORMATION: The Department of the Army plans to grant an exclusive license to Per Vivo Labs, Inc., in the field of use related to physical therapy/rehabilitation resistance bands incorporating rate-actuated tethers (RATs) relative to the following:

- ''Rate-Responsive, Stretchable Devices'', US Patent No.: 9,303,717, Filing Date June 26, 2013, Issue Date April 5, 2016.
- ''Rate-Responsive, Stretchable Devices (Further Improvements)'', US Patent Application No.: 15/057,944, Filing Date March 1, 2016.

The prospective exclusive license may be granted unless within fifteen (15) days from the date of this published notice, the U.S. Army Research Laboratory receives written objections including evidence and argument that establish that the grant of the license would not be consistent with the requirements of 35 U.S.C. 209(e) and 37 CFR 404.7(a)(1)(i),. Competing applications completed and received by the U.S. Army Research Laboratory within fifteen (15) days from the date of this published notice will also be treated as objections to the grant of the contemplated exclusive license.

Objections submitted in response to this notice will not be made available to the public for inspection and, to the extent permitted by law, will not be released under the Freedom of Information Act, 5 U.S.C. 552.

Brenda S. Bowen,

Army Federal Register Liaison Officer.

[FR Doc. 2016–27782 Filed 11–17–16; 8:45 am]

DEPARTMENT OF DEFENSE

Department of the Army

Lake Eufaula Advisory Committee Meeting Notice

AGENCY: Department of the Army, U.S. Army Corps of Engineers, DoD.

ACTION: Notice of open committee meeting.

SUMMARY: The Department of the Army is publishing this notice to announce the following Federal advisory committee meeting of the Lake Eufaula Advisory Committee (LEAC). The meeting is open to the public.

DATES: The Committee will meet from 10:00 a.m.–12:00 p.m. on Monday, December 12, 2016.

ADDRESSES: The meeting will be held at Three Forks Harbor, 5201 Three Forks Road, Fort Gibson, OK 74434.

FOR FURTHER INFORMATION CONTACT: Mr. Jeff Knack; Designated Federal Officer (DFO) for the Committee, in writing at Eufaula Lake Office, 102 E. BK 200 Rd, Stigler, OK 74462–1829, or by email at *Jeff.Knack@usace.army.mil,* or by phone at 1–918–484–5135.

SUPPLEMENTARY INFORMATION: This meeting is being held under the provisions of the Federal Advisory Committee Act of 1972 (5 U.S.C., Appendix, as amended), the Sunshine in the Government Act of 1976 (U.S.C. 552b, as amended) and 41 Code of the Federal Regulations (CFR 102–3.150).

Purpose of the Meeting: The Lake Eufaula Advisory Committee is an independent Federal advisory committee established as directed by Section 3133(b) of the Water Resources Development Act of 2007 (WRDA 2007) (Pub. L. 110–114). The committee is advisory in nature only with duties to include providing information and recommendations to the Corps of Engineers regarding operations of Eufaula Lake, Oklahoma for project purposes. In accordance with Sections 3133(c)(2) and 3133(d)(1) of WRDA 2007, the committee will also provide recommendations on a reallocation study concerning current and future use of the Lake Eufaula storage capacity for authorized project purposes as well as a subsequent pool management plan.

Agenda: This will be the second meeting of the LEAC. The committee will nominate a new committee member to replace the chair currently authorized for the Muscogee Creek Nation, have a question and answer session with U.S. Army Corps of Engineers representatives about Eufaula Lake's development and management, discuss white papers generated from first meeting about what each member hopes to see this committee accomplish, and discuss future direction.

Public's Accessibility to the Meeting: Pursuant to 5 U.S.C. 552b and 41 CFR 102–3.140 through 102–3.165, and the availability of space, this meeting is open to the public. Seating is on a first-come basis. The Three Forks Harbor is readily accessible to and usable by persons with disabilities. For additional information about public access procedures, contact Mr. Jeff Knack, the Committee's Designated Federal Officer, at the email address or telephone number listed in the **FOR FURTHER INFORMATION CONTACT** section.

Written Comments and Statements: Pursuant to 41 CFR 102–3.105(j) and 102–3.140 and section 10(a)(3) of the Federal Advisory Committee Act, the public or interested organizations may submit written comments or statements to the Committee, in response to the stated agenda of the open meeting or in regard to the Committee's mission in general. Written comments or statements should be submitted to Mr. Knack, the Committee's Designated Federal Officer, via electronic mail, the preferred mode of submission, at the address listed in the **FOR FURTHER INFORMATION CONTACT** section. Each page of the comment or statement must include the author's name, title or affiliation, address, and daytime phone number. Written comments or statements being submitted in response to the agenda set forth in this notice must be received by the Designated Federal Officer at least seven business days prior to the meeting to be considered by the Committee. The Designated Federal Officer and the Committee Chair will review all timely submitted written comments or statements and ensure the comments are provided to all members of the Committee before the meeting. Written comments or statements received after this date may not be provided to the Committee until its next meeting. Please note that because the LEAC operates under the provisions of the Federal Advisory Committee Act, as amended, all written comments will be treated as public documents and will be made available for public inspection.

Pursuant to 41 CFR 102–3.140d, the Committee is not obligated to allow a member of the public to speak or otherwise address the Committee during the meeting. Members of the public will be permitted to make verbal comments during the Committee meeting only at the time and in the manner described below. If a member of the public is interested in making a verbal comment at the open meeting, that individual must submit a request, with a brief statement of the subject matter to be addressed by the comment, at least three (3) days in advance to the Committee's Designated Federal Officer, via electronic mail, the preferred mode of submission, at the addresses listed in the **FOR FURTHER INFORMATION CONTACT** section. The Designated Federal Officer will log each request, in the order received, and in consultation with the Committee Chair determine whether the subject matter of each comment is relevant to the Committee's mission and/or the topics to be addressed in this public meeting. A 15-minute period near the end of meeting will be available for verbal public comments. Members of the public who have requested to make a verbal comment and whose comments have been deemed relevant under the process described above, will be allotted no more than three (3) minutes during this period, and will be invited to speak in the order in which their requests were received by the Designated Federal Officer.

Brenda S. Bowen,

Army **Federal Register** *Liaison Officer.*

BILLING CODE 3720–58–P

DEPARTMENT OF DEFENSE

Office of the Secretary

Government-Industry Advisory Panel; Notice of Federal Advisory Committee Meeting

AGENCY: Office of the Under Secretary of Defense (Acquisition, Technology, and Logistics), Department of Defense (DoD).

ACTION: Federal advisory committee meeting notice.

SUMMARY: The Department of Defense is publishing this notice to announce the following Federal advisory committee meeting of the Government-Industry Advisory Panel. This meeting is open to the public.

DATES: The meeting will be held from 9:00 a.m. to 5:00 p.m. on Tuesday, November 29, 2016. Public registration will begin at 8:45 a.m. For entrance into the meeting, you must meet the necessary requirements for entrance into the Pentagon. For more detailed information, please see the following link: *http://www.pfpa.mil/access.html.*

ADDRESSES: Pentagon Library, Washington Headquarters Services, 1155 Defense Pentagon, Washington, DC 20301–1155. The meeting will be held in Room B7. The Pentagon Library is located in the Pentagon Library and Conference Center (PLC2) across the Corridor 8 bridge.

FOR FURTHER INFORMATION CONTACT: LTC Andrew Lunoff, Office of the Assistant Secretary of Defense (Acquisition), 3090 Defense Pentagon, Washington, DC 20301–3090, email: *andrew.s.lunoff.mil@mail.mil,* phone: 571–256–9004.

SUPPLEMENTARY INFORMATION: Due to circumstances beyond the control of the Designated Federal Officer and the Department of Defense, the Government-Industry Advisory Panel is unable to provide public notification, as required by 41 CFR 102–3.150(a), for its meeting on Tuesday, November 29, 2016. Accordingly, the Advisory Committee Management Officer for the Department of Defense, pursuant to 41 CFR 102–3.150(b), waives the 15-calendar day notification requirement.

Purpose of the Meeting: This meeting is being held under the provisions of the Federal Advisory Committee Act of 1972 (FACA) (5 U.S.C., Appendix, as amended), the Government in the Sunshine Act of 1976 (5 U.S.C. 552b, as amended), and 41 CFR 102–3.150. The Government-Industry Advisory Panel will review sections 2320 and 2321 of title 10, United States Code (U.S.C.), regarding rights in technical data and the validation of proprietary data restrictions and the regulations implementing such sections, for the purpose of ensuring that such statutory and regulatory requirements are best structured to serve the interest of the taxpayers and the national defense. The scope of the panel is as follows: (1) Ensuring that the Department of Defense (DoD) does not pay more than once for the same work, (2) Ensuring that the DoD contractors are appropriately rewarded for their innovation and invention, (3) Providing for cost-effective reprocurement, sustainment, modification, and upgrades to the DoD systems, (4) Encouraging the private sector to invest in new products, technologies, and processes relevant to the missions of the DoD, and (5) Ensuring that the DoD has appropriate access to innovative products, technologies, and processes developed by the private sector for commercial use.

Agenda: This will be the tenth meeting of the Government-Industry Advisory Panel with a series of meetings planned through December 14, 2016. The panel will cover details of 10 U.S.C. 2320 and 2321, begin understanding the implementing regulations and detail the necessary groups within the private sector and government to provide supporting documentation for their review of these codes and regulations during follow-on meetings. Agenda items for this meeting will include the following: (1) Final discussions and deliberations on 10 U.S.C. 2320 and 2321 tension points; (2) Report framework and collaboration; (3) Comment Adjudication and Planning for follow-on meeting.

Availability of Materials for the Meeting: A copy of the agenda or any updates to the agenda for the November 29, 2016 meeting will be available as requested or at the following site: *https://database.faca.gov/committee/meetings.aspx?cid=2561.* It will also be distributed upon request.

Minor changes to the agenda will be announced at the meeting. All materials will be posted to the FACA database after the meeting.

Public Accessibility to the Meeting: Pursuant to 5 U.S.C. 552b, as amended, and 41 CFR 102–3.140 through 102–3.165, and subject to the availability of space, this meeting is open to the public. Registration of members of the public who wish to attend the meeting will begin upon publication of this meeting notice and end three business days (November 23) prior to the start of the meeting. All members of the public must contact LTC Lunoff at the phone number or email listed in the **FOR FURTHER INFORMATION CONTACT** section to make arrangements for Pentagon escort, if necessary. Public attendees should arrive at the Pentagon's Visitor's Center, located near the Pentagon Metro Station's south exit and adjacent to the Pentagon Transit Center bus terminal with sufficient time to complete security screening no later than 8:30 a.m. on November 29. To complete security screening, please come prepared to present two forms of identification of which one must be a pictured identification card. Government and military DoD CAC holders are not required to have an escort, but are still required to pass through the Visitor's Center to gain access to the Building. Seating is limited and is on a first-to-arrive basis. Attendees will be asked to provide their name, title, affiliation, and contact information to include email address and daytime telephone number to the Designated Federal Officer (DFO) listed in the **FOR FURTHER INFORMATION CONTACT** section. Any interested person may attend the meeting, file written comments or statements with the committee, or make verbal comments from the floor during the public meeting, at the times, and in the manner, permitted by the committee.

Special Accommodations: The meeting venue is fully handicap accessible, with wheelchair access.

Individuals requiring special accommodations to access the public meeting or seeking additional information about public access procedures, should contact LTC Lunoff, the committee DFO, at the email address or telephone number listed in the **FOR FURTHER INFORMATION CONTACT** section, at least five (5) business days prior to the meeting so that appropriate arrangements can be made.

Written Comments or Statements: Pursuant to 41 CFR 102–3.105(j) and 102–3.140 and section 10(a)(3) of the Federal Advisory Committee Act, the public or interested organizations may submit written comments or statements to the Government-Industry Advisory Panel about its mission and/or the topics to be addressed in this public meeting. Written comments or statements should be submitted to LTC Lunoff, the committee DFO, via electronic mail, the preferred mode of submission, at the email address listed in the **FOR FURTHER INFORMATION CONTACT** section in the following formats: Adobe Acrobat or Microsoft Word. The comment or statement must include the author's name, title, affiliation, address, and daytime telephone number. Written comments or statements being submitted in response to the agenda set forth in this notice must be received by the committee DFO at least five (5) business days prior to the meeting so that they may be made available to the Government-Industry Advisory Panel for its consideration prior to the meeting. Written comments or statements received after this date may not be provided to the panel until its next meeting. Please note that because the panel operates under the provisions of the Federal Advisory Committee Act, as amended, all written comments will be treated as public documents and will be made available for public inspection.

Verbal Comments: Members of the public will be permitted to make verbal comments during the meeting only at the time and in the manner allowed herein. If a member of the public is interested in making a verbal comment at the open meeting, that individual must submit a request, with a brief statement of the subject matter to be addressed by the comment, at least three (3) business days in advance to the committee DFO, via electronic mail, the preferred mode of submission, at the email address listed in the **FOR FURTHER INFORMATION CONTACT** section. The committee DFO will log each request to make a comment, in the order received, and determine whether the subject matter of each comment is relevant to the panel's mission and/or the topics to be addressed in this public meeting. A 30-minute period near the end of the meeting will be available for verbal public comments. Members of the public who have requested to make a verbal comment and whose comments have been deemed relevant under the process described in this paragraph, will be allotted no more than five (5) minutes during this period, and will be invited to speak in the order in which their requests were received by the DFO.

Dated: November 15, 2016.

Aaron Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 5001–06–P

DEPARTMENT OF DEFENSE

Department of the Navy

Notice of Public Meetings for the Draft Environmental Impact Statement for EA–18G "Growler" Airfield Operations at the Naval Air Station Whidbey Island Complex, Washington

AGENCY: Department of the Navy, DoD

ACTION: Notice.

SUMMARY: Pursuant to Section 102(2)(c) of the National Environmental Policy Act of 1969 and regulations implemented by the Council on Environmental Quality (40 Code of Federal Regulations parts 1500–1508), the Department of the Navy (DoN) has prepared and filed with the U.S. Environmental Protection Agency a Draft Environmental Impact Statement (EIS) to assess the potential environmental impacts of adding up to 36 Growler aircraft at the Naval Air Station (NAS) Whidbey Island complex, and continuing and increasing Growler airfield operations. The NAS Whidbey Island complex is located in Island County, Washington, on Whidbey Island, in the northern Puget Sound region. The complex includes the main air station (Ault Field), which is in the north-central part of the island, adjacent to the city of Oak Harbor, and Outlying Landing Field (OLF) Coupeville. The OLF is approximately 10 miles south of Ault Field and is dedicated primarily to Field Carrier Landing Practice (FCLP).

With the filing of the Draft EIS, the DoN is initiating an extended public comment period of 75 days, beginning on November 10, 2016 and ending on January 25, 2017. Public meetings are scheduled to inform the public and receive comments on the environmental analysis presented in the Draft EIS. This notice announces the dates, times, and

locations of the public meetings and provides supplementary information about the Draft EIS.

DATES AND ADDRESSES: The DoN will hold public meetings to inform the public about the Draft EIS and the proposed action and alternatives under consideration and to provide opportunities for the public to comment on the Draft EIS. Federal, state, and local agencies and officials, Native American Indian Tribes and Nations, and interested organizations and individuals are encouraged to provide comments in person at the public meetings or in writing during the 75-day public review period. Public meetings will be held at the following dates, times, and locations:

1. Monday, December 5, 2016, from 3:00 p.m. to 6:00 p.m., at the Fort Worden State Park Conference Center, USO Hall, 200 Battery Way, Port Townsend, Washington 98368.

2. Tuesday, December 6, 2016, from 4:00 p.m. to 7:00 p.m., at the Oak Harbor Elks Lodge Grande Hall, 155 NE Ernst Street, Oak Harbor, Washington 98277.

3. Wednesday, December 7, 2016, from 3:00 p.m. to 6:00 p.m., at the Lopez Center for Community and the Arts, 204 Village Road, Lopez Island, Washington 98261.

4. Thursday, December 8, 2016, from 3:00 p.m. to 6:00 p.m., at the Seafarers' Memorial Park Building, 601 Seafarers Way, Anacortes, Washington 98221.

5. Friday, December 9, 2016, from 4:00 p.m. to 7:00 p.m., at the Coupeville High School Commons, 501 South Main Street, Coupeville, Washington 98239.

The public meetings will be open house sessions with informational poster stations. Members of the public will have the opportunity to ask questions of DoN representatives and subject matter experts. Attendees will also be able to provide verbal comments to a stenographer or submit written comments during the public meetings. In addition to participating in the public meetings, members of the public may submit comments via the U.S. Postal Service using the mailing address identified in the contact information later in this notice or electronically using the project Web site (*http://www.whidbeyeis.com*). All comments made at the public meetings or postmarked or received online by January 25 will become part of the public record and be considered in the Final EIS.

The DoN may release the city, state, and 5-digit zip code of individuals who provide comments during the Draft EIS public review period. However, the names, street addresses, email addresses and screen names, telephone numbers, or other personally identifiable information of those individuals will not be released by the DoN unless required by law. Prior to each commenter making verbal comments to the stenographer at the public meetings the commenter will be asked whether he/she agrees to a release of their personally identifiable information. Those commenters submitting written comments, either using comment forms or via the project Web site, will be asked whether they authorize release of personally identifiable information by checking a ''release'' box.

FOR FURTHER INFORMATION CONTACT: EA–18G EIS Project Manager, Naval Facilities Engineering Command (NAVFAC) Atlantic, Attention: Code EV21/SS; 6506 Hampton Boulevard, Norfolk, Virginia 23508.

SUPPLEMENTARY INFORMATION: On September 5, 2013, the DoN published a notice of intent (NOI) in the **Federal Register** (78 FR 54635) to analyze the potential addition of 13 Growler aircraft to the existing Growler community stationed at NAS Whidbey Island. A revised NOI was published in the **Federal Register** on October 10, 2014 (79 FR 61296), which modified the proposed action by increasing the number of aircraft analyzed to 36 in order to account for the possible procurement of additional aircraft. Comments received during the two scoping periods were used to shape the analysis contained in the Draft EIS.

The DoN's proposed action is to: (1) Continue and expand existing Growler operations at Ault Field and OLF Coupeville; (2) increase capabilities to accommodate up to 36 additional aircraft, including the construction and renovation of facilities at Ault Field; (3) support flight operations of other aircraft, and (4) station additional personnel in the region.

The purpose of the proposed action is to augment the DoN's existing Electronic Attack community at NAS Whidbey Island by operating additional Growler aircraft as appropriated by Congress. The DoN needs to effectively and efficiently increase electronic attack capabilities in order to counter increasingly sophisticated threats and provide more aircraft per squadron in order to give operational commanders more flexibility in addressing future threats and missions. The need for the proposed action is to maintain and expand Growler operational readiness to support national defense requirements under Title 10, United States Code (U.S.C.), Section 5062.

In developing the proposed range of alternatives that meet the purpose of and need for the proposed action, the DoN carefully reviewed important considerations unique to the Growler community that is single-sited at NAS Whidbey Island, as well as Growler squadron training in light of Title 10 responsibilities; existing training requirements and regulations; existing DoN infrastructure; and Chief of Naval Operations guidance to support operating Naval Forces. Furthermore, the DoN evaluated past home basing decisions, reconsidered alternatives previously eliminated from analysis, and thoughtfully considered basing and training options suggested by the public during the two scoping periods. The Draft EIS explains the DoN's reasons for eliminating some alternatives and suggested options from further consideration. In addition, the Draft EIS explains why some alternatives presented in the October 10, 2014 revised NOI were not carried forward.

The action alternatives evaluated in the Draft EIS vary in terms of force structure and operations to accommodate the proposed increase in Growler aircraft. In addition, three operational scenarios (sub-alternatives) are evaluated, all of which focus on the distribution of annual FCLP airfield operations between Ault Field and OLF Coupeville.

In addition to the action alternatives, the DoN evaluated the potential environmental effects of the No Action Alternative. Under this alternative, the proposed action would not occur. Although the No Action Alternative would not meet the purpose of or need for the proposed action, the conditions associated with the No Action Alternative serve as reference points for describing and quantifying the potential environmental impacts associated with the proposed action alternatives. For this Draft EIS, the DoN is using the year 2021 for the No Action Alternative because it represents conditions when events at Ault Field affecting aircraft loading, facility and infrastructure assets, personnel levels, and number of aircraft are expected to be fully implemented and complete from previous aircraft home basing, aircraft retirement, and other related decisions.

The Draft EIS provides an analysis of the potential environmental effects of the proposed action on the following resources: Airspace and airfield operations; noise; public health and safety; air quality; land use; cultural resources; American Indian traditional resources; biological resources; water resources; socioeconomics; environmental justice; transportation;

infrastructure; geological resources; hazardous materials and wastes; and climate change and greenhouse gases. Consultation with the Washington State Historic Preservation Officer under Section 106 of the National Historic Preservation Act is pending. The Navy will also engage in consultations with the U.S. Fish and Wildlife Service, National Marine Fisheries Service, Washington State Department of Ecology, and Native American Tribes and Nations.

The Draft EIS was distributed to federal, state, and local agencies and elected officials, Native American Indian Tribes and Nations, and other interested individuals and organizations. The Draft EIS is available for public electronic viewing or download at the project Web site (*http://www.whidbeyeis.com*). A paper copy of the Draft EIS may be reviewed at 22 public libraries in the northern Puget Sound region. The full list of and addresses for each of the libraries may be found at the project Web site.

To be included on the DoN's mailing list for future updates on the EIS, submit a request electronically using the project Web site or submit a written request to the address previously identified for further information. The same policy for release of personally identifiable information as identified above will be maintained by the DoN for individuals requesting to be included on the EIS mailing list.

Dated: November 9, 2016.

C.D. Mora,

Commander, Judge Advocate General's Corps, U.S. Navy, Federal Register Liaison Officer.

BILLING CODE 3810–FF–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 2082–062; Project No. 2082–063; Project No. 14803–000; Project No. 14803–001]

PacifiCorp, Klamath River Renewal Corporation; Notice of Applications Filed With the Commission

Take notice that the following hydroelectric applications have been filed with the Commission and are available for public inspection:

a. *Types of Applications:* Application for Amendment and Partial Transfer of License; Application for Surrender of License.

b. *Project Nos.:* 2082–062 and 14803–000 (amendment and transfer application); 2082–063 and 14803–001 (surrender application).

c. *Date Filed:* September 23, 2016.

d. *Applicants:* For license amendment and transfer: PacifiCorp (transferor) and Klamath River Renewal Corporation (transferee).

For license surrender: Klamath River Renewal Corporation.

e. *Name of Projects:* Klamath Project (P–2082).

Lower Klamath Project (P–14803).

f. *Locations:* Klamath Project—on the Klamath River in Klamath County, Oregon, and on the Klamath River and Fall Creek in Siskiyou County, California. The project includes about 477 acres of federal lands administered by the Bureau of Reclamation and the Bureau of Land Management.

Lower Klamath Project—on the Klamath River in Klamath County, Oregon, and Siskiyou County, California. The project would include about 395 acres of federal lands administered by the Bureau of Land Management.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791a–825r.

h. *Applicants Contact:* Sarah Kamman, Vice President and General Counsel, PacifiCorp, 825 NE Multnomah Street, Suite 2000, Portland, OR 97232, (503) 813–5865, sarah *kamman@pacificorp.com.*

Michael Carrier, President, Klamath River Renewal Corporation, 423 Washington Street, 3rd Floor, San Francisco, CA 94111, (415) 820–4441, *michael@klamathrenewal.org.*

i. *FERC Contacts:* Amendment and Transfer: Steve Hocking, (202) 502–8753, *Steve.Hocking@ferc.gov.*

Surrender: John Mudre: (202) 502–8902, *john.mudre@ferc.gov.*

j. *Description of Amendment and Transfer Request:* The applicants request that the Commission transfer the J.C. Boyle, Copco No. 1, Copco No. 2, and Iron Gate developments of the existing Klamath Project No. 2082 from PacifiCorp to the Klamath River Renewal Corporation (Renewal Corporation) and create a new project, the Lower Klamath Project, for the transferred developments with the Renewal Corporation as the sole licensee. PacifiCorp requests that the license for Project No. 2082 be amended to delete references to the four transferred developments. The applicants state that they will make a supplemental filing on or before March 1, 2017, demonstrating the legal, technical, and financial capabilities of the Renewal Corporation to perform its responsibilities as transferee. Applicants further request that the Commission act on the amendment and transfer application by December 31, 2017, and allow the Renewal Corporation six months from the issuance date of the order approving transfer to submit proof of its acceptance of license transfer.

k. *Description of Surrender Request:* The Renewal Corporation's request to surrender and decommission the Lower Klamath Project, including removal of the project dams is contingent upon a Commission order amending PacifiCorp's existing Klamath Project (P–2082) license to create a new project, the Lower Klamath Project, and transferring the Lower Klamath Project to the Renewal Corporation, as described in item (j), above. The Lower Klamath Project, as envisioned by the Renewal Corporation, would consist of the J.C. Boyle, Copco No. 1, Copco No. 2, and Iron Gate developments of the existing Klamath Project No. 2082, and the Renewal Corporation would be the sole licensee. The Renewal Corporation requests that the Commission not act on this request until it is ready to accept license transfer and states that it will file, by December 31, 2017, its decommissioning plan to serve as the basis for Commission staff's environmental and engineering review of the surrender application. Because only a licensee may file to surrender a license and the Commission does not accept contingent applications, the surrender application is deemed to be filed by both PacifiCorp and the Renewal Corporation. *See* 18 CFR 6.1 and 4.32(j). Therefore, while action on the amendment and transfer application is pending, the Commission will maintain both applications in the dockets for both project numbers. If the Commission approves the transfer and the Renewal Corporation accepts the license, following which the Renewal Corporation would become the sole licensee, the surrender proceeding would continue solely in Project No. 14803.

l. With this notice, we are initiating informal consultation with: (a) the U.S. Fish and Wildlife Service and NOAA Fisheries under section 7 of the Endangered Species Act and the joint agency implementing regulations at 50 CFR part 402; (b) NOAA Fisheries under section 305(b) of the Magnuson-Stevens Fishery Conservation and Management Act and implementing regulations at 50 CFR 600.920; and (c) the California and Oregon State Historic Preservation Officers, as required by section 106 of the National Historic Preservation Act, and the implementing regulations of the Advisory Council on Historic Preservation at 36 CFR part 800.

m. With this notice, we are designating PacifiCorp and the Renewal

Corporation as the Commission's non-federal representative for carrying out informal consultation, pursuant to section 7 of the Endangered Species Act, section 305(b) of the Magnuson-Stevens Fishery Conservation and Management Act, and section 106 of the National Historic Preservation Act and the Advisory Council's regulations at 36 CFR 800.2(c)(4).

n. *Locations of the Applications:* Copies of the applications are available for inspection and reproduction at the Commission's Public Reference Room, located at 888 First Street, NE., Room 2A, Washington, DC 20426, or by calling (202) 502–8371. These filings may also be viewed on the Commission's Web site at *http://www.ferc.gov/docs-filing/elibrary.asp.* Enter the docket number excluding the last three digits in the docket number field to access the document. You may also register online at *http://www.ferc.gov/docs-filing/esubscription.asp* to be notified via email of new filings and issuances related to this or other pending projects. For assistance, call 1–866–208–3676 or email *FERCOnlineSupport@ferc.gov,* for TTY, call (202) 502–8659. Copies are also available for inspection and reproduction at the addresses in item (h), above.

o. Individuals desiring to be included on the Commission's mailing list for these proceedings should so indicate by writing to the Secretary of the Commission.

p. *Additional Information:* We are not requesting comments at this time. After receiving the applicants' supplemental filings on or before March 1, 2017, for the license transfer and December 31, 2017, for the surrender, the Commission will issue notices requesting comments, protests, and motions to intervene.

Kimberly D. Bose,

Secretary

[FR Doc. 2016–27806 Filed 11–17–16; 8:45 am]

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 12514–074]

Northern Indiana Public Service Company; Notice of Availability of Final Environmental Assessment

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission or FERC's) regulations, 18 Code of Federal Regulations (CFR) Part 380, the Office of Energy Projects has reviewed Northern Indiana Public Service Company's application for amendment of the license for the Norway-Oakdale Hydroelectric Project (FERC Project No. 12514–074), on the Tippecanoe River near the city of Monticello in Carroll and White Counties, Indiana, and prepared a final environmental assessment (EA) for the project. The project does not occupy any federal lands.

The final EA contains staff's analysis of the potential environmental effects of implementing the proposed modified definition of abnormal flow conditions that would be included in a revised article 403, which defines the operation of the project. Staff concludes that authorizing the amendment, with staff's recommended modification to the definition of abnormal river conditions, would not constitute a major federal action that would significantly affect the quality of the human environment.

A copy of the final EA is available for review at the Commission in the Public Reference Room or may be viewed on the Commission's Web site at *www.ferc.gov* using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. For assistance, contact FERC Online Support at *FERCOnlineSupport@ferc.gov* or toll-free at 1–866–208–3676, or for TTY, 202–502–8659.

You may also register online at *www.ferc.gov/docs-filing/esubscription.asp* to be notified via email of new filings and issuances related to this or other pending projects. For assistance, contact FERC Online Support.

For further information, contact Mark Pawlowski at 202–502–6052.

Combined Notice of Filings #1

Take notice that the Commission received the following electric corporate filings:

Docket Numbers: EC17–30–000.
Applicants: Kelly Creek Wind, LLC.
Description: Application for Authorization under Section 203 of the Federal Power Act and Request for Expedited Consideration and Confidential Treatment of Kelly Creek Wind, LLC.
Filed Date: 11/9/16.
Accession Number: 20161109–5161.
Comments Due: 5 p.m. ET 11/30/16.

Take notice that the Commission received the following electric rate filings:

Docket Numbers: ER14–1193–002.
Applicants: West Deptford Energy, LLC.
Description: Compliance filing: Informational Filing Regarding Planned Transfer to be effective N/A.
Filed Date: 11/7/16.
Accession Number: 20161107–5254.
Comments Due: 5 p.m. ET 11/28/16.

Docket Numbers: ER15–1682–005.
Applicants: TransCanyon DCR, LLC.
Description: Compliance filing: Formula Rate Template Compliance Filing to be effective 7/6/2015.
Filed Date: 11/9/16.
Accession Number: 20161109–5152.
Comments Due: 5 p.m. ET 11/30/16.

Docket Numbers: ER17–336–000.
Applicants: Duke Energy Florida, LLC.
Description: § 205(d) Rate Filing: Mount Dora NITSA–NOA Amendment SA No. 151 to be effective 1/1/2017.
Filed Date: 11/10/16.
Accession Number: 20161110–5060.
Comments Due: 5 p.m. ET 12/1/16.

Take notice that the Commission received the following electric reliability filings:

Docket Numbers: RR17–1–000.
Applicants: North American Electric Reliability Corporation.
Description: Petition of the North American Electric Reliability Corporation for Approval of Amendments to the Florida Reliability Coordinating Council Regional Reliability Standard Development Process Manual.
Filed Date: 11/10/16.
Accession Number: 20161110–5072.
Comments Due: 5 p.m. ET 12/1/16.

The filings are accessible in the Commission's eLibrary system by clicking on the links or querying the docket number.

Any person desiring to intervene or protest in any of the above proceedings must file in accordance with Rules 211 and 214 of the Commission's Regulations (18 CFR 385.211 and 385.214) on or before 5:00 p.m. Eastern time on the specified comment date. Protests may be considered, but intervention is necessary to become a party to the proceeding.

eFiling is encouraged. More detailed information relating to filing requirements, interventions, protests, service, and qualifying facilities filings can be found at: *http://www.ferc.gov/docs-filing/efiling/filing-req.pdf.* For other information, call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. ER17–243–000]

Lawrenceburg Power, LLC; Supplemental Notice That Initial Market-Based Rate Filing Includes Request For Blanket Section 204 Authorization

This is a supplemental notice in the above-referenced proceeding Lawrenceburg Power, LLC's application for market-based rate authority, with an accompanying rate tariff, noting that such application includes a request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability.

Any person desiring to intervene or to protest should file with the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant.

Notice is hereby given that the deadline for filing protests with regard to the applicant's request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability, is November 30, 2016.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at *http://www.ferc.gov.* To facilitate electronic service, persons with Internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically should submit an original and 5 copies of the intervention or protest to the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

The filings in the above-referenced proceeding are accessible in the Commission's eLibrary system by clicking on the appropriate link in the above list. They are also available for electronic review in the Commission's Public Reference Room in Washington, DC. There is an eSubscription link on the Web site that enables subscribers to receive email notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please email *FERCOnlineSupport@ferc.gov.* or call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

Dated: November 10, 2016.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. ER17–318–000]

Three Peaks Power, LLC; Supplemental Notice That Initial Market-Based Rate Filing Includes Request for Blanket Section 204 Authorization

This is a supplemental notice in the above-referenced proceeding Three Peaks Power, LLCs application for market-based rate authority, with an accompanying rate tariff, noting that such application includes a request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability.

Any person desiring to intervene or to protest should file with the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant.

Notice is hereby given that the deadline for filing protests with regard to the applicant's request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability, is November 30, 2016.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at *http://www.ferc.gov.* To facilitate electronic service, persons with Internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically should submit an original and 5 copies of the intervention or protest to the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

The filings in the above-referenced proceeding are accessible in the Commission's eLibrary system by clicking on the appropriate link in the above list. They are also available for electronic review in the Commission's Public Reference Room in Washington, DC. There is an eSubscription link on the Web site that enables subscribers to receive email notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please email *FERCOnlineSupport@ferc.gov.* or call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

Dated: November 10, 2016.

[Docket No. EL16–66–000]

Midwest Generation, LLC; Notice of Filing

Take notice that on November 14, 2016, Midwest Generation, LLC submitted tariff filing per: Refund Report to be effective N/A, pursuant to Federal Energy Regulatory Commission's (Commission) October 11, 2016 Order.[1]

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. Such notices, motions, or protests must be filed on or before the comment date. On or before the comment date, it is not necessary to serve motions to intervene or protests on persons other than the Applicant.

The Commission encourages electronic submission of protests and interventions in lieu of paper using the ''eFiling'' link at *http://www.ferc.gov.* Persons unable to file electronically should submit an original and 5 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

[1] *Order Directing Refunds,* 157 FERC ¶ 61,016 (2016).

This filing is accessible on-line at *http://www.ferc.gov,* using the ''eLibrary'' link and is available for review in the Commission's Public Reference Room in Washington, DC. There is an ''eSubscription'' link on the Web site that enables subscribers to receive email notification when a document is added to a subscribed docket(s). BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 271–146]

Entergy Arkansas, Inc.; Notice of Application Accepted for Filing, Soliciting Comments, Motions To Intervene, and Protests

Take notice that the following hydroelectric application has been filed with the Federal Energy Regulatory Commission and is available for public inspection:

a. *Type of Application:* Non-project use of project lands and water.

b. *Project No:* 271–146.

c. *Date Filed:* October 11, 2016.

d. *Applicant:* Entergy Arkansas Inc. (licensee).

e. *Name of Project:* Carpenter-Remmel Hydroelectric Project.

f. *Location:* Lake Catherine in Garland County, Arkansas.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791a–825r.

h. *Applicant Contact:* Eugene Knighten, Manager, Entergy Arkansas, Inc., 141 West County Line Road, Malvern, Arkansas 72104; phone (501) 844–2168.

i. *FERC Contact:* Ms. Joy Kurtz at 202–502–6760, or *joy.kurtz@ferc.gov.*

j. Deadline for filing comments, motions to intervene, and protests is 30 days from the issuance of this notice by the Commission. The Commission strongly encourages electronic filing. Please file motions to intervene, protests, and comments using the Commission's eFiling system at *http://www.ferc.gov/docs-filing/efiling.asp.* Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at *http://www.ferc.gov/docs-filing/ecomment.asp.* You must include your name and contact information at the end of your comments. For assistance, please contact FERC Online Support at *FERCOnlineSupport@ferc.gov,* (866) 208–3676 (toll free), or (202) 502–8659 (TTY). In lieu of electronic filing, please send a paper copy to: Secretary, Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426. The first page of any filing should include docket number P–271–146.

k. *Description of Request:* The licensee requests Commission approval to grant the City of Hot Springs, Arkansas permission to use project lands and water within the project boundary to increase its discharge of treated sewage effluent from the Hot Springs Wastewater Treatment Plant into Lake Catherine from the currently-approved 12 million gallons per day (mgd) to 16 mgd. There are no physical improvements or additions to the treatment plant proposed within the project boundary, hence no ground-disturbing work is necessary within the project boundary to facilitate the discharge increase. All discharge would be subject to meeting the Arkansas Department of Environmental Quality's discharge permit requirements. The increase in discharge is necessary to support the growth of the City of Hot Springs and its service area.

l. *Locations of the Application:* A copy of the application is available for inspection and reproduction at the Commission's Public Reference Room, located at 888 First Street NE., Room 2A, Washington, DC 20426, or by calling 202–502–8371. This filing may also be viewed on the Commission's Web site at *http://www.ferc.gov* using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. You may also register online at *http://www.ferc.gov/docs-filing/esubscription.asp* to be notified via email of new filings and issuances related to this or other pending projects. For assistance, call 866–208–3676 or email *FERCOnlineSupport@ferc.gov,* for TTY, call 202–502–8659. A copy is also available for inspection and reproduction at the address in item (h) above.

m. Individuals desiring to be included on the Commission's mailing list should so indicate by writing to the Secretary of the Commission.

n. *Comments, Protests, or Motions to Intervene:* Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, .211, .214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

o. *Filing and Service of Responsive Documents:* Any filing must (1) bear in all capital letters the title ''COMMENTS''; ''PROTEST'', or ''MOTION TO INTERVENE'' as applicable; (2) set forth in the heading the name of the applicant and the project number of the application to which the filing responds; (3) furnish the name, address, and telephone number of the person protesting or intervening; and (4) otherwise comply with the requirements of 18 CFR 385.2001 through 385.2005. All comments, motions to intervene, or protests must set forth their evidentiary basis and otherwise comply with the requirements of 18 CFR 4.34(b). All comments, motions to intervene, or protests should relate to the non-project use application. Agencies may obtain copies of the application directly from the applicant. A copy of any protest or motion to intervene must be served upon each representative of the applicant specified in the particular application. If an intervener files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency. A copy of all other filings in reference to this application must be accompanied by proof of service on all persons listed in the service list prepared by the Commission in this proceeding, in accordance with 18 CFR 4.34(b) and 385.2010.

Dated: November 10, 2016.

Kimberly D. Bose,

Secretary.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. IC16–13–000]

Commission Information Collection Activities (FERC–547); Comment Request

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Comment request.

SUMMARY: In compliance with the requirements of the Paperwork Reduction Act of 1995, 44 U.S.C. 3507(a)(1)(D), the Federal Energy Regulatory Commission (Commission or FERC) is submitting its information collection FERC–547 (Gas Pipeline Rates: Refund Report Requirements) to the Office of Management and Budget (OMB) for review of the information collection requirements. Any interested person may file comments directly with OMB and should address a copy of those comments to the Commission as explained below. The Commission previously issued a Notice in the **Federal Register** (81 FR 49970, 7/29/2016) requesting public comments. The Commission received no comments on the FERC–547 and is making this notation in its submittal to OMB.

DATES: Comments on the collection of information are due by December 19, 2016.

ADDRESSES: Comments filed with OMB, identified by the OMB Control No. 1902–0084, should be sent via email to the Office of Information and Regulatory Affairs: *oira_submission@omb.gov.* Attention: Federal Energy Regulatory Commission Desk Officer. The Desk Officer may also be reached via telephone at 202–395–4718.

A copy of the comments should also be sent to the Commission, in Docket No. IC16–13–000, by either of the following methods:

- eFiling at Commission's Web site: *http://www.ferc.gov/docs-filing/efiling.asp.*
- *Mail/Hand Delivery/Courier:* Federal Energy Regulatory Commission, Secretary of the Commission, 888 First Street NE., Washington, DC 20426.

Instructions: All submissions must be formatted and filed in accordance with submission guidelines at: *http://www.ferc.gov/help/submission-guide.asp.* For user assistance contact FERC Online Support by email at *ferconlinesupport@ferc.gov,* or by phone at: (866) 208–3676 (toll-free), or (202) 502–8659 for TTY.

Docket: Users interested in receiving automatic notification of activity in this docket or in viewing/downloading comments and issuances in this docket may do so at *http://www.ferc.gov/docs-filing/docs-filing.asp.*

FOR FURTHER INFORMATION CONTACT: Ellen Brown may be reached by email at *DataClearance@FERC.gov,* by telephone at (202) 502–8663, and by fax at (202) 273–0873.

SUPPLEMENTARY INFORMATION:

Title: Gas Pipeline Rates: Refund Report Requirements.

OMB Control No.: 1902–0084.

Type of Request: Three-year extension of the FERC–547 information collection requirements with no changes to the reporting requirements.

Abstract: The Commission uses FERC–547 (Gas Pipeline Rates: Refund Report Requirements) to implement the statutory refund provisions governed by Sections 4, 5 and 16 of the Natural Gas Act (NGA).[1] Sections 4 and 5 authorize the Commission to order a refund (with interest) for any portion of a natural gas company's increased rate or charge found to be unjust or unreasonable. Refunds may also be instituted by a natural gas company as a stipulation to a Commission-approved settlement agreement or a provision under the company's tariff. Section 16 of the NGA

[1] 15 U.S.C. 717–717w.

authorizes the Commission to prescribe rules and regulations necessary to administer its refund mandates. The Commission's refund reporting requirements are located in 18 CFR 154.501 and 154.502.

The Commission uses the data to monitor refunds owed by natural gas companies to ensure that the flow-through of refunds owed by these companies are made as expeditiously as possible and to assure that refunds are made in compliance with the Commission's regulations.

Type of Respondents: Natural gas companies.

Estimate of Annual Burden [2]*:* The Commission estimates the annual public reporting burden for the information collection as:

FERC–547—GAS PIPELINE RATES: REFUND REPORT REQUIREMENTS

	Number of respondents (1)	Annual number of responses per respondent (2)	Total number of Responses (1)*(2)=(3)	Average burden and cost per response [3] (4)	Total annual burden hours and total annual cost (3)*(4)=(5)	Cost per respondent ($) (5)÷(1)
Natural Gas Pipelines	11	1	11	75 hrs.; $5,587.50	825 hrs.; $61,462.50	$5,587.50

Comments: Comments are invited on: (1) whether the collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Dated: November 14, 2016.

Kimberly D. Bose,

Secretary.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. ER17–196–000]

Pima Energy Storage System, LLC; Supplemental Notice That Initial Market-Based Rate Filing Includes Request For Blanket Section 204 Authorization

This is a supplemental notice in the above-referenced proceeding Pima Energy Storage System, LLC's application for market-based rate authority, with an accompanying rate tariff, noting that such application includes a request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability.

Any person desiring to intervene or to protest should file with the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant.

Notice is hereby given that the deadline for filing protests with regard to the applicant's request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability, is November 30, 2016.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at *http://www.ferc.gov.* To facilitate electronic service, persons with Internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically should submit an original and 5 copies of the intervention or protest to the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

The filings in the above-referenced proceeding are accessible in the Commission's eLibrary system by clicking on the appropriate link in the above list. They are also available for electronic review in the Commission's Public Reference Room in Washington, DC. There is an eSubscription link on the Web site that enables subscribers to receive email notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please email *FERCOnlineSupport@ferc.gov.* or call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

Dated: November 10, 2016.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP17–11–000]

Columbia Gas Transmission, LLC; Notice of Request Under Blanket Authorization

Take notice that on November 3, 2016 Columbia Gas Transmission, LLC (Columbia Gas), 5151 San Felipe, Suite 2500, Houston, Texas 77056 filed a prior notice request pursuant to sections 157.205 and 157.213(b) of the Commission's regulations under the Natural Gas Act for authorization to construct and operate certain natural gas storage facilities located in Jackson County, West Virginia. Specifically, Columbia proposes to construct and operate three new storage wells and related pipeline to tie the wells into existing pipelines at Columbia's Ripley Storage Field. It is estimated that the three new directional wells will provide a combined total of 15 MMcf per day of improved deliverability to the Columbia system, all as more fully set forth in the application which is on file with the Commission and open to public inspection. The filing may also be viewed on the web at *http://www.ferc.gov* using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. For assistance, contact FERC at *FERCOnlineSupport@ferc.gov* or call toll-free, (866) 208–3676 or TTY, (202) 502–8659.

Any questions regarding this Application should be directed to Robert D. Jackson, Manager, Certificates & Regulatory Administration, Columbia Gas Transmission, LLC, 700 Louisiana Street, Suite 700, Houston, Texas 77002, by calling (832) 320–5487, or by fax (832) 320–6487, or by email at *Robert_jackson@transcanada.com.*

Any person may, within 60 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention. Any person filing to intervene or the Commission's staff may, pursuant to section 157.205 of the Commission's Regulations under the NGA (18 CFR 157.205) file a protest to the request. If no protest is filed within the time allowed therefore, the proposed activity shall be deemed to be authorized effective the day after the time allowed for protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the NGA.

Pursuant to section 157.9 of the Commission's rules, 18 CFR 157.9, within 90 days of this Notice the Commission staff will either: Complete its environmental assessment (EA) and place it into the Commission's public record (eLibrary) for this proceeding; or issue a Notice of Schedule for Environmental Review. If a Notice of Schedule for Environmental Review is issued, it will indicate, among other milestones, the anticipated date for the Commission staff's issuance of the final environmental impact statement (FEIS) or EA for this proposal. The filing of the EA in the Commission's public record for this proceeding or the issuance of a Notice of Schedule for Environmental Review will serve to notify federal and state agencies of the timing for the completion of all necessary reviews, and the subsequent need to complete all federal authorizations within 90 days of the date of issuance of the Commission staff's FEIS or EA.

Persons who wish to comment only on the environmental review of this project should submit an original and two copies of their comments to the Secretary of the Commission. Environmental commenter's will be placed on the Commission's environmental mailing list, will receive copies of the environmental documents, and will be notified of meetings associated with he Commission's environmental review process. Environmental commenter's will not be required to serve copies of filed documents on all other parties. However, the non-party commentary, will not receive copies of all documents filed by other parties or issued by the Commission (except for the mailing of environmental documents issued by the Commission) and will not have the right to seek court review of the Commission's final order.

The Commission strongly encourages electronic filings of comments, protests, and interventions via the internet in lieu of paper. See 18 CFR 385.2001(a) (1) (iii) and the instructions on the Commission's Web site (*www.ferc.gov*) under the ''e-Filing'' link. Persons unable to file electronically should submit original and 5 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

Dated: November 10, 2016.

Kimberly D. Bose,

Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. IC16–12–000]

Commission Information Collection Activities (FERC–511, FERC–515, & FERC–574); Comment Request

AGENCY: Federal Energy Regulatory Commission, Department of Energy.

ACTION: Comment request.

SUMMARY: In compliance with the requirements of the Paperwork Reduction Act of 1995, 44 U.S.C. 3507(a)(1)(D), the Federal Energy Regulatory Commission (Commission or FERC) is submitting its information collections [FERC–511 (Transfer of Electric License), FERC–515 (Rules of Practice and Procedure: Declaration of Intention), and FERC–574 (Gas Pipeline Certificates: Hinshaw Exemption)] to the Office of Management and Budget (OMB) for review of the information collection requirements. Any interested person may file comments directly with OMB and should address a copy of those comments to the Commission as explained below. The Commission previously issued a Notice in the **Federal Register** (81 FR 45145, 7/12/2016) requesting public comments. The Commission received no comments on the FERC–511, the FERC–515, or the FERC–574 and is making this notation in its submittal to OMB.

DATES: Comments on the collection of information are due by December 19, 2016.

ADDRESSES: Comments filed with OMB, identified by the OMB Control No. 1902–0069 (FERC–511), 1902–0079 (FERC–515), or 1902–0116 (FERC–574) should be sent via email to the Office of Information and Regulatory Affairs: *oira_submission@omb.gov.* Attention: Federal Energy Regulatory Commission Desk Officer. The Desk Officer may also be reached via telephone at 202–395–4718.

A copy of the comments should also be sent to the Commission, in Docket No. IC16–12–000, by either of the following methods:

- *eFiling at Commission's Web site: http://www.ferc.gov/docs-filing/efiling.asp.*
- *Mail/Hand Delivery/Courier:* Federal Energy Regulatory Commission, Secretary of the Commission, 888 First Street NE., Washington, DC 20426.

Instructions: All submissions must be formatted and filed in accordance with submission guidelines at: *http://www.ferc.gov/help/submission-guide.asp.* For user assistance contact FERC Online Support by email at *ferconlinesupport@ferc.gov,* or by phone at: (866) 208–3676 (toll-free), or (202) 502–8659 for TTY.

Docket: Users interested in receiving automatic notification of activity in this docket or in viewing/downloading comments and issuances in this docket may do so at *http://www.ferc.gov/docs-filing/docs-filing.asp.*

FOR FURTHER INFORMATION CONTACT: Ellen Brown may be reached by email at *DataClearance@FERC.gov,* by telephone at (202) 502–8663, and by fax at (202) 273–0873.

SUPPLEMENTARY INFORMATION:

Type of Request: Three-year extension of the information collection requirements for all collections described below with no changes to the current reporting requirements. Please note that each collection is distinct from the next.

Comments: Comments are invited on: (1) Whether the collections of information are necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency's estimates of the burden and cost of the collections of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collections; and (4) ways to minimize the burden of the collections of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

FERC–511, Transfer of Electric License

OMB Control No.: 1902–0069.

Type of Request: Three-year extension of the FERC–511 information collection requirements with no changes to the current reporting requirements.

Abstract: The Commission uses the information collected under the requirements of FERC–511 to implement the statutory provisions of Sections 4(e) and 8 of the Federal Power Act (FPA).[1] Section 4(e) authorizes the Commission to issue licenses for the construction, operation and maintenance of reservoirs, powerhouses, and transmission lines or other facilities necessary for the development and improvement of navigation and for the development, transmission, and utilization of power.[2] Section 8 of the FPA provides that the voluntary transfer of any license is made only with the written approval of the Commission. Any successor to the licensee may assign the rights of the original licensee but is subject to all of the conditions of the license. The information filed with the Commission is a mandatory requirement contained in the format of a written application for transfer of license, executed jointly by the parties of the proposed transfer. The sale or merger of a licensed hydroelectric project may occasion the transfer of a license. The Commission's staff uses the information collection to determine the qualifications of the proposed transferee to hold the license and to prepare the transfer of the license order. Approval by the Commission of transfer of a license is contingent upon the transfer of title to the properties under license, delivery of all license instruments, and evidence that such transfer is in the public interest. The Commission implements these filing requirements in the Code of Federal Regulations (CFR) under 18 CFR part 9.

Type of Respondents: Hydropower Project Licensees.

Estimate of Annual Burden: The Commission estimates the annual public reporting burden for the information collection as:

[1] 16 U.S.C. 797(e) and 801.

[2] Refers to facilities across, along, from, or in any of the streams or other bodies of water over which Congress has jurisdiction under its authority to regulate commerce with foreign nations and among the several States, or upon any part of public lands and reservations of the United States, or for the purpose of utilizing the surplus water or water power from any Government dam.

FERC–511—TRANSFER OF ELECTRIC LICENSE

	Number of respondents (1)	Annual number of responses per respondent (2)	Total number of responses (1) * (2) = (3)	Average burden hrs. & cost per response (4)	Total annual burden hours & total annual cost (3) * (4) = (5)	Cost per respondent (5) ÷ (1)
Hydropower Project Licensees	46	1	46	40 hrs.; $2,980	1,840 hrs.; $137,080.	$2,980

FERC–515, Rules of Practice and Procedure: Declaration of Intention

OMB Control No.: 1902–0079.

Type of Request: Three-year extension of the FERC–515 information collection requirements with no changes to the current reporting requirements.

Abstract: The Commission uses the information collected under the requirements of FERC–515 to implement the statutory provisions of Section 23(b) of the Federal Power Act (FPA).[3] Section 23(b) authorizes the Commission to make a determination as to whether it has jurisdiction over a proposed water project[4] not affecting navigable waters[5] but across, along, over, or in waters over which Congress has jurisdiction under its authority to regulate commerce with foreign nations and among the several States. Section 23(b) requires that any person intending to construct project works on such waters must file a declaration of their intention with the Commission. If the Commission finds the proposed project will have an impact on interstate or foreign commerce, then the entity intending to construct the project must obtain a Commission license or exemption before starting construction.[6] The information is collected in the form of a written application, containing sufficient details to allow the Commission staff to research the jurisdictional aspects of the project. This research includes examining maps and land ownership records to establish whether or not there is Federal jurisdiction over the lands and waters affected by the project. A finding of non-jurisdictional by the Commission eliminates a substantial paperwork burden for the applicant who might otherwise have to file for a license or exemption application. The Commission implements these filing requirements under 18 CFR part 24.

Type of Respondents: Persons intending to construct project works on certain waters described above.

Estimate of Annual Burden: The Commission estimates the annual public reporting burden for the information collection as:

FERC–515—RULES OF PRACTICE AND PROCEDURE: DECLARATION OF INTENTION

Number of respondents (1)	Annual number of responses per respondent (2)	Total number of responses (1) * (2) = (3)	Average burden hrs. & cost per response (4)	Total annual burden hours & total annual cost (3) * (4) = (5)	Cost per respondent ($) (5) ÷ (1)
6	1	6	80 hrs.; $5,960	480 hrs.; $35,760.	$5,960

FERC–574, Gas Pipeline Certificates: Hinshaw Exemption

OMB Control No.: 1902–0116.

Type of Request: Three-year extension of the FERC–574 information collection requirements with no changes to the current reporting requirements.

Abstract: The Commission uses the information collected under the requirements of FERC–574 to implement the statutory provisions of Sections 1(c), 4 and 7 of the Natural Gas Act (NGA).[7] Natural gas pipeline companies file applications with the Commission furnishing information in order to facilitate a determination of an applicant's qualification for an exemption under the provisions of the Section 1(c). If the Commission grants exemption, the natural gas pipeline company is not required to file certificate applications, rate schedules, or any other applications or forms prescribed by the Commission.

The exemption applies to companies engaged in the transportation, sale, or resale of natural gas in interstate commerce if: (a) They receive gas at or within the boundaries of the state from another person at or within the boundaries of that state; (b) such gas is ultimately consumed in such state; (c) the rates, service and facilities of such company are subject to regulation by a State Commission; and (d) that such State Commission is exercising that jurisdiction. 18 CFR part 152 specifies the data required to be filed by pipeline companies for an exemption.

Type of Respondents: Pipeline companies.

Estimate of Annual Burden: The Commission estimates the annual public reporting burden for the information collection as:

[3] 16 U.S.C. 817

[4] Dams or other project works. (See 16 U.S.C. 817.)

[5] See 16 U.S.C. 796 (8) for the definition of ''Navigable Waters.''

[6] Upon a finding of non-jurisdictional by the Commission, and if the project does not utilize surplus water or waterpower from a government dam and no public lands or reservations are affected, permission is granted upon compliance with State laws.

[7] 15 U.S.C. 717–717w.

FERC–574—GAS PIPELINE CERTIFICATES: HINSHAW EXEMPTION

	Number of respondents (1)	Annual number of responses per respondent (2)	Total number of responses (1) * (2) = (3)	Average burden hrs. & cost per response (4)	Total annual burden hours & total annual cost (3) * (4) = (5)	Cost per respondent (5) ÷ (1)
Pipeline Companies	1	1	1	60 hrs.; $4,470	60 hrs.; $4,470	$4,470

[Docket No. AD16–25–000]

Utilization In the Organized Markets of Electric Storage Resources as Transmission Assets Compensated Through Transmission Rates, for Grid Support Services Compensated in Other Ways, and for Multiple Services; Notice Inviting Post-Technical Conference Comments

On November 9, 2016, the Federal Energy Regulatory Commission staff convened a technical conference to discuss the utilization of electric storage resources as transmission assets compensated through transmission rates, for grid support services that are compensated in other ways, and for multiple services.

All interested persons are invited to file post-technical conference comments on the topics discussed in the Supplemental Notice of Technical Conference issued in this proceeding on November 1, 2016 (Supplemental Notice), including the questions listed therein. Commenters need not respond to all topics or questions asked. Commenters should organize responses consistent with the organization of the topics and questions in the Supplemental Notice. Commenters may reference material previously filed in this docket, including the technical conference transcript, but are encouraged to submit new or additional information rather than reiterate information that is already in the record. In particular, commenters are encouraged, when possible, to provide examples in support of their answers. These comments are due within 30 days of the date of this notice.

For more information about this notice, please contact:

BILLING CODE 6717–01–P

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OPP–2016–0577; FRL–9953–55]

Notice of Receipt of Requests to Voluntarily Cancel Certain Pesticide Registrations and Amend Registrations To Terminate Certain Uses

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In accordance with the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), EPA is issuing a notice of receipt of requests by the registrants to voluntarily cancel their registrations and to amend product registrations to terminate uses.

EPA intends to grant these requests at the close of the comment period for this announcement unless the Agency receives substantive comments within the comment period that would merit its further review of the requests, or unless the registrants withdraw its requests. If these requests are granted, any sale, distribution, or use of products listed in this notice will be permitted after the registrations have been cancelled and uses terminated only if such sale, distribution, or use is consistent with the terms as described in the final order.

DATES: Comments must be received on or before December 19, 2016.

ADDRESSES: Submit your comments, identified by docket identification (ID) number EPA–HQ–OPP–2016–0577, by one of the following methods:

• *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

• *Mail:* OPP Docket, Environmental Protection Agency Docket Center (EPA/DC), (28221T), 1200 Pennsylvania Ave. NW., Washington, DC 20460–0001.

• *Hand Delivery:* To make special arrangements for hand delivery or delivery of boxed information, please follow the instructions at *http://www.epa.gov/dockets/contacts.html.*

Additional instructions on commenting or visiting the docket, along with more information about dockets generally, is available at *http://www.epa.gov/dockets.*

FOR FURTHER INFORMATION CONTACT: Christopher Green, Information Technology and Resources Management Division (7502P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460–0001; telephone number: (703) 347–0367; email address: *green.christopher@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this action apply to me?

This action is directed to the public in general, and may be of interest to a wide range of stakeholders including environmental, human health, and agricultural advocates; the chemical industry; pesticide users; and members of the public interested in the sale, distribution, or use of pesticides. Since others also may be interested, the Agency has not attempted to describe all the specific entities that may be affected by this action.

B. What should I consider as I prepare my comments for EPA?

1. *Submitting CBI.* Do not submit this information to EPA through *regulations.gov* or email. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD–ROM that you mail to EPA, mark the outside of the disk or CD–ROM as CBI and then identify electronically within the disk or CD–ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for preparing your comments.* When preparing and submitting your comments, see the commenting tips at *http://www.epa.gov/dockets/comments.html.*

II. What action is the agency taking?

This notice announces receipt by EPA of requests from registrants to cancel certain pesticide products and amend product registrations to terminate certain uses. The affected products and the registrants making the requests are identified in Tables 1–3 of this unit.

Unless a request is withdrawn by the registrant or if the Agency determines that there are substantive comments that warrant further review of this request, EPA intends to issue an order in the **Federal Register** canceling and amending the affected registrations.

TABLE 1—PRODUCT REGISTRATIONS WITH PENDING REQUESTS FOR CANCELLATION

Registration No.	Company No.	Product name	Active ingredient
100–951	100	Hurricane	Metalaxyl-M & Fludioxonil.
100–1051	100	Talon-G Rodenticide Bait Pack Pellets with Bitrex	Brodifacoum.
100–1052	100	Talon-G Rodenticide Pellets with Bitrex	Brodifacoum.
100–1057	100	Talon-G Rodenticide Mini-Pellets with Bitrex	Brodifacoum.
100–1064	100	Diquat Weed Killer 'D'	Diquat dibromide.
100–1095	100	Lambda-Cyhalothrin TC Insecticide	Lambda-Cyhalothrin.
100–1114	100	Rapid Kill #1	Diquat dibromide.
100–1115	100	Rapid Kill #1 Concentrate	Diquat dibromide.
100–1143	100	Touchdown Ready-To-Use Herbicide	Glyphosate.
100–1144	100	Touchdown Home and Garden Concentrate	Glyphosate.
100–1170	100	Optigard ZT Insecticide	Thiamethoxam.
100–1180	100	Touchdown Diquat Home and Garden Ready To Use.	Diquat dibromide & Glyphosate.
100–1209	100	Abamectin Granular Fire Ant Killer	Abamectin.
100–1302	100	Cypermethrin ME 2.0% Concentrate	Cypermethrin.

89461	Global Chem Tech, LLC, 34 Lake Havasu Avenue N.—14–204, Lake Havasu City, AZ 86403.

III. What is the agency's authority for taking this action?

Section 6(f)(1) of FIFRA (7 U.S.C. 136d(f)(1)) provides that a registrant of a pesticide product may at any time request that any of its pesticide registrations be canceled or amended to terminate one or more uses. FIFRA further provides that, before acting on the request, EPA must publish a notice of receipt of any such request in the **Federal Register**.

Section 6(f)(1)(B) of FIFRA (7 U.S.C. 136d(f)(1)(B)) requires that before acting on a request for voluntary cancellation, EPA must provide a 30-day public comment period on the request for voluntary cancellation or use termination. In addition, FIFRA section 6(f)(1)(C) (7 U.S.C. 136d(f)(1)(C)) requires that EPA provide a 180-day comment period on a request for voluntary cancellation or termination of any minor agricultural use before granting the request, unless:

1. The registrants request a waiver of the comment period, or

2. The EPA Administrator determines that continued use of the pesticide would pose an unreasonable adverse effect on the environment.

The registrants listed in Table 3 of Unit II have requested that EPA waive the 180-day comment period. Accordingly, EPA will provide a 30-day comment period on the proposed requests.

IV. Procedures for Withdrawal of Requests

Registrants who choose to withdraw a request for product cancellation or use termination should submit the withdrawal in writing to the person listed under **FOR FURTHER INFORMATION CONTACT**. If the products(s) have been subject to a previous cancellation action, the effective date of cancellation and all other provisions of any earlier cancellation action are controlling.

V. Provisions for Disposition of Existing Stocks

Existing stocks are those stocks of registered pesticide products that are currently in the United States and that were packaged, labeled, and released for shipment prior to the effective date of the action. If the requests for voluntary cancellation and amendments to terminate uses are granted, the Agency intends to publish the cancellation order in the **Federal Register**.

In any order issued in response to these requests for cancellation of product registrations and for amendments to terminate uses, EPA proposes to include the following provisions for the treatment of any existing stocks of the products listed in Tables 1 and 2 of Unit II.

For voluntary product cancellations, registrants will be permitted to sell and distribute existing stocks of voluntarily canceled products for 1 year after the effective date of the cancellation, which will be the date of publication of the cancellation order in the **Federal Register**. Thereafter, registrants will be prohibited from selling or distributing the products identified in Table 1 of Unit II., except for export consistent with FIFRA section 17 (7 U.S.C. 136o) or for proper disposal.

Once EPA has approved the product labels reflecting the requested amendments to terminate uses, registrants will be permitted to sell or distribute the products under the previously approved labeling for a period of 18 months after the date of **Federal Register** publication of the cancellation order, unless other restrictions have been imposed. Thereafter, the registrants will be prohibited from selling or distributing the products whose labels include the terminated uses identified in Table 2 of Unit II., except for export consistent with FIFRA section 17 or for proper disposal.

Authority: 7 U.S.C. 136 *et seq.*

Dated: October 13, 2016.

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OPP–2009–0317; FRL–9955–18]

Registration Review; Draft Malathion Human Health Risk Assessment; Extension of Comment Period

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice; extension of comment period.

SUMMARY: EPA issued a notice in the **Federal Register** of September 22, 2016 (81 FR 65355) (FRL–9952–53), opening a 60-day comment period for the draft malathion human health risk assessment. This document extends that comment period for 30 days. The new closing date will be December 21, 2016 rather than November 21, 2016. The comment period is being extended in response to a request from FMC Corporation citing the scope and complexity of the assessments, including the use of new models, risk assessment approaches, and science policy issues that require additional review time.

DATES: Comments, identified by docket identification (ID) number EPA–HQ–OPP–2009–0317, must be received on or before December 21, 2016.

ADDRESSES: Follow the detailed instructions provided under **ADDRESSES** in the **Federal Register** document of September 22, 2016.

FOR FURTHER INFORMATION CONTACT: Richard Dumas, Pesticide Re-Evaluation Division (7508P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460–0001; telephone number: (703) 308–8015; email address: *dumas.richard@epa.gov.*

SUPPLEMENTARY INFORMATION: This document extends the public comment period established in the **Federal Register** document of September 22, 2016. In that document, EPA opened a 60-day comment period for a draft human health risk assessment for the registration review of malathion. EPA is hereby extending the closing date of the comment period by 30 days from November 21, 2016, to December 21, 2016.

To submit comments, or access the docket, please follow the detailed instructions provided under **ADDRESSES** in the **Federal Register** document of September 22, 2016. If you have questions, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

Authority: 7 U.S.C. 136 *et seq.*

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

SES Performance Review Board—Appointment of Members

AGENCY: Equal Employment Opportunity Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given of the appointment of members to the Performance Review Board of the Equal Employment Opportunity Commission.

FOR FURTHER INFORMATION CONTACT: Traci M. DiMartini, Chief Human Capital Officer, U.S. Equal Employment Opportunity Commission, 131 M Street NE., Washington, DC 20507, (202) 663–4306.

SUPPLEMENTARY INFORMATION: Publication of the Performance Review Board (PRB) membership is required by 5 U.S.C. 4314(c)(4). The PRB reviews and evaluates the initial appraisal of a senior executive's performance by the supervisor, and makes recommendations to the Chair, EEOC, with respect to performance ratings, pay level adjustments and performance awards.

The following are the names and titles of executives appointed to serve as members of the SES PRB. Members will serve a 12-month term, which begins on November 29, 2016.

PRB Chair:

- Ms. Germaine P. Roseboro, Chief Financial Officer, Equal Employment Opportunity Commission.

Members:

- Ms. Peggy R. Mastroianni, Legal Counsel, Equal Employment Opportunity Commission;
- Mr. Bryan C. Burnett, Chief Information Officer, Equal Employment Opportunity Commission;
- Ms. Veronica Venture, Director, EEO and Diversity, Department of Homeland Security;
- Mr. John M. Robinson, Director, Office of Civil Rights/Chief Diversity Officer, U.S. State Department.

By the direction of the Commission.

Dated: November 14, 2016.

Jenny R. Yang,

Chair.

FEDERAL DEPOSIT INSURANCE CORPORATION

Notice to All Interested Parties of Intent To Terminate the Receivership of 10400, Sun Security Bank, Ellington, Missouri

Notice is hereby given that the Federal Deposit Insurance Corporation (''FDIC'') as Receiver for Sun Security Bank, Ellington, Missouri (''the Receiver'') intends to terminate its receivership for said institution. The FDIC was appointed receiver of Sun Security Bank on October 7, 2011. The liquidation of the receivership assets has been completed. To the extent permitted by available funds and in accordance with law, the Receiver will be making a final dividend payment to proven creditors.

Based upon the foregoing, the Receiver has determined that the continued existence of the receivership will serve no useful purpose. Consequently, notice is given that the receivership shall be terminated, to be effective no sooner than thirty days after the date of this Notice. If any person wishes to comment concerning the termination of the receivership, such comment must be made in writing and sent within thirty days of the date of this Notice to: Federal Deposit Insurance Corporation, Division of Resolutions and Receiverships, Attention: Receivership Oversight Department 34.6, 1601 Bryan Street, Dallas, TX 75201.

No comments concerning the termination of this receivership will be considered which are not sent within this time frame.

Dated: November 15, 2016.

Federal Deposit Insurance Corporation.

Valerie J. Best,

Assistant Executive Secretary.

FEDERAL HOUSING FINANCE AGENCY

[No. 2016–N–11]

Proposed Collection; Comment Request

AGENCY: Federal Housing Finance Agency.

ACTION: 60-day notice of submission of information collection for approval from Office of Management and Budget.

SUMMARY: In accordance with the requirements of the Paperwork Reduction Act of 1995 (PRA), the Federal Housing Finance Agency (FHFA or the Agency) is seeking public comments concerning a new information collection known as ''Contractor Workforce Inclusion Good Faith Efforts.'' This information collection has not yet been assigned a control number by the Office of Management and Budget (OMB). FHFA intends to submit the information collection to OMB for review and approval of a three-year control number.

DATES: Interested persons may submit comments on or before January 17, 2017.

ADDRESSES: Submit comments to FHFA, identified by ''Proposed Collection; Comment Request: 'Contractor Workforce Inclusion Good Faith Efforts, (No. 2016–N–11)' '' by any of the following methods:

- *Agency Web site: www.fhfa.gov/open-for-comment-or-input.*
- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments. If you submit your comment to the *Federal eRulemaking Portal,* please also send it by *email* to FHFA at *RegComments@fhfa.gov* to ensure timely receipt by the agency.
- *Mail/Hand Delivery:* Federal Housing Finance Agency, Eighth Floor, 400 Seventh Street SW., Washington, DC 20219, ATTENTION: Proposed Collection; Comment Request: ''Contractor Workforce Inclusion Good Faith Efforts, (No. 2016–N–11)''.

We will post all public comments we receive without change, including any personal information you provide, such as your name and address, email address, and telephone number, on the FHFA Web site at *http://www.fhfa.gov.* In addition, copies of all comments received will be available for examination by the public on business days between the hours of 10 a.m. and 3 p.m., at the Federal Housing Finance Agency, Eighth Floor, 400 Seventh Street SW., Washington, DC 20219. To make an appointment to inspect comments, please call the Office of General Counsel at (202) 649–3804.

FOR FURTHER INFORMATION CONTACT: Eric Howard, Diversity and Inclusion Principal Advisor, Office of Minority and Women Inclusion, *Eric.Howard@fhfa.gov,* (202) 649–3009; Karen Lambert, Associate General Counsel, *Karen.Lambert@fhfa.gov,* (202) 649–3094; or Eric Raudenbush, Associate General Counsel, *Eric.Raudenbush@fhfa.gov,* (202) 649–3084 (these are not toll-free numbers); Federal Housing Finance Agency, 400 Seventh Street SW., Washington, DC 20219. The Telecommunications Device for the Hearing Impaired is (800) 877–8339.

SUPPLEMENTARY INFORMATION:

A. Need for and Use of the Information Collection

Section 342(a)(1)(A) of the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (the Dodd-Frank Act) requires FHFA and certain other Federal agencies each to establish an Office of Minority and Women Inclusion (OMWI) responsible for all matters of the agency relating to diversity in management, employment, and business activities.[1] Section 342(c)(1) requires the OMWI Director at each agency to develop and implement standards and procedures to ensure, to the maximum extent possible, the fair inclusion and utilization of minorities, women, and minority- and women-owned businesses in all business and activities of the agency at all levels, including procurement, insurance, and all types of contracts. Section 342(c)(2) requires that the OMWI Director include in the agency's procedures for evaluating contract proposals and hiring service providers a component that gives consideration to the diversity of an applicant, to the extent consistent with applicable laws. That statutory provision also requires that each agency's procedures include a written statement that a contractor shall ensure, to the maximum extent possible, the fair inclusion of women and minorities in the workforce of the contractor and, as applicable, subcontractors.

Further, section 342(c)(3)(A) of the Dodd-Frank Act requires that each agency's standards and procedures include a procedure for determining whether an agency contractor or subcontractor has failed to make a good faith effort to include minorities and women in its workforce. If the OMWI Director determines that a contractor or subcontractor has failed to make such a good faith effort, section 342(c)(3)(B)(i) provides that the OMWI Director shall recommend to the agency administrator that the contract be terminated. Section 342(c)(3)(B)(ii) provides that, upon receipt of such a recommendation, the agency administrator may either terminate the contract, make a referral to the Office of Federal Contract Compliance Programs (OFCCP) of the

[1] 12 U.S.C. 5452.

Department of Labor, or take other appropriate action.

As a means of implementing the requirements of section 342(c) of the Dodd-Frank Act, FHFA developed a Minority and Women Inclusion Clause (MWI Clause) that it now includes in all Agency contracts with a dollar value greater than the ''simplified acquisition threshold'' (currently, $150,000) established in the Federal Acquisition Regulation (FAR).[2] The MWI Clause requires a contractor to confirm its commitment to equal opportunity in employment and contracting, and to implement that commitment by ensuring, to the maximum extent possible consistent with applicable law, the fair inclusion of minorities and women in its workforce. The MWI Clause also requires that a contractor include the substance of the MWI Clause in all subcontracts with a dollar value greater than $150,000 awarded under the contract. (Hereinafter subcontractors that are subject to the MWI Clause are referred to as ''covered'' subcontractors.)

Finally, the MWI Clause requires a contractor to provide, when requested by FHFA, documentation demonstrating that it and any covered subcontractor has made a good faith effort to ensure the fair inclusion of minorities and women in its workforce. The MWI Clause provides that such documentation may include, but is not limited to: (1) The contractor's total number of employees, and the number of minority and women employees, by race, ethnicity, and gender (*e.g.,* an EEO–1 Employer Information Report (Form EEO–1)); (2) a list of the subcontracts the contractor awarded including the dollar amount, date of the award, and the ownership status of the subcontractor by race, ethnicity, and/or gender; (3) information similar to that required under item 1 above for each subcontractor; and (4) the contractor's plan to ensure that minorities and women have appropriate opportunities to enter and advance within its workforce, including outreach efforts (hereinafter, a ''workforce inclusion plan''). A request for documentation by FHFA pursuant to this provision of the MWI Clause would constitute a ''collection of information'' within the meaning of the PRA.

While FHFA has included the MWI Clause in all contracts with a dollar value greater than $150,000 consummated since November 7, 2013, the Agency has not, to this point, asked any contractor or covered subcontractor to provide documentation pursuant to the clause. FHFA is now developing procedures that the OMWI Director will follow in determining whether its contractors and covered subcontractors have made good faith efforts to comply with the MWI Clause. The Agency expects that, once it adopts those procedures, it will begin to request the types of documentation described in the MWI Clause from contractors and covered subcontractors.

The purpose of this information collection is to fulfill the requirements of section 342(c)(3)(B) of the Dodd-Frank Act. The collected information will allow FHFA's OMWI Director to determine whether contractors and covered subcontractors have complied with their obligations to make good faith efforts to ensure, to the maximum extent possible consistent with applicable law, the fair inclusion of minorities and women in their respective workforces.

B. Burden Estimate

FHFA estimates that the average annual burden imposed on all respondents by this information collection over the next three years will be 368 hours. All of the assumptions and calculations underlying the total burden estimate are described in detail below.

Because, as explained below, the amount of burden imposed upon a contractor by this information collection will differ depending upon whether the contractor has 50 or more employees, FHFA has based its total burden estimate on two separate sets of calculations—(I) one for contractors with 50 or more employees; and (II) another for contractors with fewer than 50 employees.

FHFA includes the MWI Clause in Agency contracts with a dollar value greater than $150,000. Under the MWI Clause, the FHFA may also request information about covered subcontractors' ownership status, workforce demographics, and workforce inclusion plans. Contractors would request this information from their covered subcontractors, who, because the substance of the MWI Clause would be included in their subcontracts, would have an obligation to keep records and report data as required under the MWI Clause.

FHFA data on the dollar value of contracts awarded by the Agency from the beginning of fiscal year 2013 through the third quarter of fiscal year 2016 shows that 63 contractors were subject to the MWI Clause. FHFA believes that 44 of those contractors have 50 or more employees, while 19 contractors have fewer than 50 employees. FHFA estimates that no more than two subcontracts with a dollar value of $150,000 or more were awarded by Agency contractors during that same time period. Both of those subcontractors have 50 or more employees each. Thus, over the preceding three years, a total of 65 contractors and subcontractors were subject to the MWI Clause—46 of which have 50 or more employees and 19 of which have fewer than 50 employees.

Based on these figures, FHFA estimates that, on average over the next three years, 48 contractors and subcontractors with 50 or more employees and 20 contractors or subcontractors with fewer than 50 employees will be subject to the MWI Clause at any given time. For purposes of these burden estimates, FHFA has assumed that each contractor or subcontractor will provide documentation under the MWI Clause once per year, although it is unlikely that the Agency will actually request documentation from every contractor in every year. (In the interest of brevity, the word ''contractor'' is intended also to include covered subcontractors in the explanation of the burden estimates that follows.)

I. Documentation Submitted by Contractors With 50 or More Employees

FHFA estimates that the average annual burden on contractors with 50 or more employees will be 48 hours (0 recordkeeping hours + 48 reporting hours).

Because Federal contractors with 50 or more employees are already required to maintain the same types of records that may be requested pursuant to the MWI Clause under regulations implementing Title VII of the Civil Rights Act of 1964[3] and Executive Order 11246 (E.O. 11246),[4] this information collection will not impose new recordkeeping burdens on such contractors. FAR 52.222–26, Equal Opportunity, requires that such contractors' contracts and subcontracts include a clause implementing E.O. 11246. OFCCP regulations require each contractor with 50 or more employees and a Federal contract or subcontract of $50,000 or more to maintain records on the race, ethnicity, gender, and EEO–1 job category of each employee.[5] OFCCP regulations also require each such contractor to: (1) Demonstrate that it has made a good faith effort to remove identified barriers, expand employment

[2] *See* FAR 2.101. The FAR appears at 48 CFR chapter 1.

[3] 42 U.S.C. 2000e, *et seq.*

[4] Exec. Order No. 11246, 30 FR 12319 (Sept. 28, 1965).

[5] *See* 41 CFR 60–1.7.

opportunities, and produce measureable results;[6] and (2) develop and maintain a written program summary describing the policies, practices, and procedures that the contractor uses to ensure that applicants and employees received equal opportunities for employment and advancement.[7] In lieu of creating and maintaining a separate workforce inclusion plan to submit in satisfaction of the MWI Clause, a contractor with 50 or more employees could submit the written program summary that it is already required to maintain under the OFCCP regulations to demonstrate its good faith efforts to ensure the fair inclusion of minorities and women in its workforce.

With respect to reporting burden, FHFA estimates that it will take each contractor approximately one hour to retrieve and submit to the FHFA the documentation specified in the MWI Clause. Thus, the estimate of the annual burden upon contractors with 50 or more employees associated with reporting requirements under this information collection is 48 hours (48 contractors × 1 hour per contractor).

II. Documentation Submitted by Contractors With Fewer Than 50 Employees

FHFA estimates that the average annual burden on contractors with fewer than 50 employees will be 320 hours (300 recordkeeping hours + 20 reporting hours).

OFCCP regulations require contractors with fewer than 50 employees to maintain records on the race, ethnicity, and gender of each employee.[8] FHFA believes that such contractors also keep EEO–1 job category information in the normal course of business, despite the fact that they are not required by law to do so. However, contractors with fewer than 50 employees may not have the type of written program summary that is required of larger contractors under the OFCCP regulations or any similar document that could be submitted as a workforce inclusion plan under the MWI Clause. Accordingly, such contractors may need to create a workforce inclusion plan to comply with the MWI Clause.

In order to estimate the burden associated with creating a workforce inclusion plan, FHFA considered the OFCCP's burden estimates for the time needed to develop the written program summaries required under its regulations.[9] In its OMB Supporting Statement, the OFCCP estimated that a contractor with 1 to 100 employees would take approximately 73 burden hours to create an initial written program summary. While the OFCCP regulations require contractors to perform time-consuming quantitative analyses when developing their written program summaries, such analyses would not be required in connection with the creation of a workforce inclusion plan. For this reason, FHFA believes that a contractor could develop a workforce inclusion plan in about one-third of the time that it would take to develop the written program summary required under the OFCCP regulations.

FHFA estimates that a contractor with fewer than 50 employees would spend approximately 25 hours creating a workforce inclusion plan for the first time. The Agency estimates that each contractor would then spend approximately 10 hours annually in updating and maintaining its plan. This results in an estimated average annual recordkeeping burden over the next three years on each contractor with fewer than 50 employees of 15 hours [(25 + 10 + 10)/3 years]. Thus, FHFA estimates that the average annual recordkeeping burden on all contractors with fewer than 50 employees over the next three years will be 300 hours (20 contractors × 15 hours per contractor).

FHFA estimates that it will take each contractor approximately one hour to retrieve and submit to FHFA the documentation specified in the MWI Clause. Thus, the estimate of the annual burden upon contractors with fewer than 50 employees associated with reporting requirements under this information collection is 20 hours (20 contractors × 1 hour per contractor).

C. Comments Request

FHFA requests written comments on the following: (1) Whether the collection of information is necessary for the proper performance of FHFA functions, including whether the information has practical utility; (2) the accuracy of FHFA's estimates of the burdens of the collection of information; (3) ways to enhance the quality, utility, and clarity of the information collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

BILLING CODE 8070–01–P

FEDERAL RESERVE SYSTEM

Notice of Proposals To Engage in or To Acquire Companies Engaged in Permissible Nonbanking Activities

The companies listed in this notice have given notice under section 4 of the Bank Holding Company Act (12 U.S.C. 1843) (BHC Act) and Regulation Y, (12 CFR part 225) to engage *de novo,* or to acquire or control voting securities or assets of a company, including the companies listed below, that engages either directly or through a subsidiary or other company, in a nonbanking activity that is listed in § 225.28 of Regulation Y (12 CFR 225.28) or that the Board has determined by Order to be closely related to banking and permissible for bank holding companies. Unless otherwise noted, these activities will be conducted throughout the United States.

Each notice is available for inspection at the Federal Reserve Bank indicated. The notice also will be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether the proposal complies with the standards of section 4 of the BHC Act.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than December 13, 2016.

A. Federal Reserve Bank of Chicago (Colette A. Fried, Assistant Vice President) 230 South LaSalle Street, Chicago, Illinois 60690–1414:

1. *West Town Bancorp,* Raleigh, North Carolina; to acquire 43.5 percent of Windsor Advantage, LLC, Indianapolis, Indiana and thereby indirectly engage de novo in extending credit and servicing loans pursuant to section 225.28 (b)(1) of Regulation Y.

Board of Governors of the Federal Reserve System, November 15, 2016.

Yao-Chin Chao,

Assistant Secretary of the Board.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Agency for Healthcare Research and Quality

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Agency for Healthcare Research and Quality, HHS.

ACTION: Notice.

SUMMARY: This notice announces the intention of the Agency for Healthcare Research and Quality (AHRQ) to request that the Office of Management and Budget (OMB) approve the proposed information collection project: ''*Pharmacy Survey on Patient Safety Culture Comparative Database.*'' In accordance with the Paperwork Reduction Act, 44 U.S.C. 3501–3521, AHRQ invites the public to comment on this proposed information collection.

DATES: Comments on this notice must be received by January 17, 2017.

ADDRESSES: Written comments should be submitted to: Doris Lefkowitz, Reports Clearance Officer, AHRQ, by email at *doris.lefkowitz@AHRQ.hhs.gov.*

Copies of the proposed collection plans, data collection instruments, and specific details on the estimated burden can be obtained from the AHRQ Reports Clearance Officer.

FOR FURTHER INFORMATION CONTACT: Doris Lefkowitz, AHRQ Reports Clearance Officer, (301) 427–1477, or by email at *doris.lefkowitz@AHRQ.hhs.gov.*

SUPPLEMENTARY INFORMATION:

Proposed Project

Pharmacy Survey on Patient Safety Culture Comparative Database

In 1999, the Institute of Medicine called for health care organizations to develop a ''culture of safety'' such that their workforce and processes focus on improving the reliability and safety of care for patients (IOM, 1999; To Err is Human: Building a Safer Health System). To respond to the need for tools to assess patient safety culture in health care, AHRQ developed and pilot tested the Pharmacy Survey on Patient Safety Culture with OMB approval (OMB NO. 0935–0183; Approved 08/12/2011). The survey is designed to enable pharmacies to assess staff opinions about patient and medication safety and quality-assurance issuesand includes 36 items that measure 11 dimensions of patient safety culture. AHRQ made the survey publicly available along with a Survey User's Guide and other toolkit materials in October 2012 on the AHRQ Web site.

The AHRQ Pharmacy Survey on Patient Safety Culture (Pharmacy SOPS) Comparative Database consists of data from the AHRQ Pharmacy Survey on Patient Safety Culture. Pharmacies in the U.S. are asked to voluntarily submit data from the survey to AHRQ, through its contractor, Westat. The Pharmacy SOPS Database is modeled after three other SOPS databases: Hospital SOPS [OMB NO. 0935–0162; Approved 05/04/2010]; Medical Office SOPS [OMB NO. 0935–0196; Approved 06/12/12]; and Nursing Home SOPS [OMB NO. 0935–0195; Approved 06/12/12] that were originally developed by AHRQ in response to requests from hospitals, medical offices, and nursing homes interested in knowing how their patient safety culture survey results compare to those of other similar health care organizations.

Rationale for the information collection. The Pharmacy SOPS survey and the Pharmacy SOPS Comparative Database will support AHRQ's goals of promoting improvements in the quality and safety of health care in pharmacy settings. The survey, toolkit materials, and comparative database results are all made publicly available on AHRQ's Web site. Technical assistance is provided by AHRQ through its contractor at no charge to pharmacies, to facilitate the use of these materials for pharmacy patient safety and quality improvement.

Request for information collection approval. The Agency for Healthcare Research and Quality (AHRQ) requests that the Office of Management and Budget (OMB) reapprove, under the Paperwork Reduction Act of 1995, AHRQ's collection of information for the AHRQ Pharmacy Survey on Patient Safety Culture (Pharmacy SOPS) Comparative Database; OMB NO. 0935–0218, last approved on June 12, 2014.

This database will:

(1) Allow pharmacies to compare their patient safety culture survey results with those of other pharmacies,

(2) provide data to pharmacies to facilitate internal assessment and learning in the patient safety improvement process, and

(3) provide supplemental information to help pharmacies identify their strengths and areas with potential for improvement in patient safety culture.

This study is being conducted by AHRQ through its contractor, Westat, pursuant to AHRQ's statutory authority to conduct and support research on health care and on systems for the delivery of such care, including activities with respect to the quality, effectiveness, efficiency, appropriateness and value of health care services; quality measure and development, and database development. 42 U.S.C. 299a(a)(1), (2), and 8.

Method of Collection

To achieve the goal of this project the following activities and data collections will be implemented:

(1) Pharmacy Eligibility and Registration Form—The point of contact (POC), often the pharmacy manager of a participating organization, completes a number of data submission steps and forms, beginning with completion of an online Eligibility and Registration Form. The purpose of this form is to collect basic demographic information about the pharmacy and initiate the registration process.

(2) Data Use Agreement—The purpose of the data use agreement, completed by the pharmacy POC, is to state how data submitted by pharmacies will be used and provides confidentiality assurances.

(3) Pharmacy Site Information Form—The purpose of this form, completed by the pharmacy POC, is to collect background characteristics of the pharmacy. This information will be used to analyze data collected with the Pharmacy SOPS survey.

(4) Data Files Submission—POCs upload their data file(s), using the community pharmacy or hospital pharmacy data file specifications, to ensure that users submit standardized and consistent data in the way variables are named, coded, and formatted.

The number of submissions to the database is likely to vary each year because pharmacies do not administer the survey and submit data every year. Data submission is typically handled by one POC who is either a pharmacy manager or a survey vendor who contracts with a pharmacy to collect and submit its data. POCs submit data on behalf of 3 pharmacies, on average, because many pharmacies are part of a multi-pharmacy system, or the POC is a vendor that is submitting data for multiple pharmacies.

Survey data from the AHRQ Pharmacy Survey on Patient Safety Culture are used to produce three types of products: (1) A Pharmacy SOPS Comparative Database Report that is made publicly available on the AHRQ Web site (see *http://www.ahrq.gov/professionals/quality-patient-safety/patientsafetyculture/pharmacy/pharm-reports.html*), (2) Individual Pharmacy Survey Feedback Reports that are confidential, customized reports produced for each pharmacy that submits data to the database (the number of reports produced is based on the number of pharmacies submitting each year); and (3) Research data sets of individual-level and pharmacy-level de-identified data to enable researchers to conduct analyses. Pharmacies are asked to voluntarily submit their Pharmacy SOPS survey data to the comparative database. The data are then cleaned and aggregated and used to produce a Comparative Database Report that displays averages, standard deviations, and percentile scores on the survey's 36 items and 11 patient safety culture dimensions, as well as displaying these results by pharmacy characteristics (pharmacy type, number of locations, average number of prescriptions dispensed per week, etc.) and respondent characteristics (staff position, tenure, and hours worked per week).

Data submitted by pharmacies are also used to give each pharmacy its own customized survey feedback report that presents the pharmacy's results compared to the latest comparative database results. If a pharmacy submits data more than once, its survey feedback report also presents trend data, comparing its previous and most recent data.

Estimated Annual Respondent Burden

Exhibit 1 shows the estimated annualized burden hours for the respondents' time to participate in the database. An estimated 100 POCs from community pharmacies and 50 POCs from hospital pharmacies, each representing an average of 3 individual pharmacies, will complete the database submission steps and forms. Completing the eligibility and registration form will take about 5 minutes. The Pharmacy Site Information Form is completed by all POCs for each of their pharmacies ($150 \times 3 = 450$ forms in total) and is estimated to take 5 minutes to complete. Each POC will complete a data use agreement which takes 3 minutes to complete and submitting the data will take an hour on average. The total burden is estimated to be 209 hours.

Exhibit 2 shows the estimated annualized cost burden based on the respondents' time to submit their data. The cost burden is estimated to be $11,222 annually.

EXHIBIT 1—ESTIMATED ANNUALIZED BURDEN HOURS

Form name	Number of respondents/ POCs	Number of responses per POC	Hours per response	Total burden hours
Eligibility and Registration Form	150	1	5/60	13
Data Use Agreement	150	1	3/60	8
Pharmacy Site Information Form	150	3	5/60	38
Data Files Submission	150	1	1	150
Total	NA	NA	NA	209

EXHIBIT 2—ESTIMATED ANNUALIZED COST BURDEN

Form name	Number of respondents/ POCs	Total burden hours	Average hourly wage rate *	Total cost burden
Eligibility and Registration Form	150	13	$53.69	$698
Data Use Agreement	150	8	53.69	430
Pharmacy Site Information Form	150	38	53.69	2,040
Data Files Submission	150	150	53.69	8,054
Total	NA	209	NA	11,222

* Based on the weighted average hourly wage in community pharmacies for 100 General and Operations Managers (11–1021; $49.26) and 50 General and Operations Managers (11–1021; $62.56) obtained from the May 2015 National Industry-Specific Occupational Employment and Wage Estimates: NAICS 446110—Pharmacies and Drug Stores (located at *http://www.bls.gov/oes/current/naics5_446110.htm*) and NAICS 622000—Hospitals (located at *http://www.bls.gov/oes/current/naics3_622000.htm*).

Request for Comments

In accordance with the Paperwork Reduction Act, comments on AHRQ's information collection are requested with regard to any of the following: (a) Whether the proposed collection of information is necessary for the proper performance of AHRQ health care research and health care information dissemination functions, including whether the information will have practical utility; (b) the accuracy of AHRQ's estimate of burden (including hours and costs) of the proposed collection(s) of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information upon the respondents, including the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and included in the Agency's subsequent request for OMB approval of the proposed information collection. All comments will become a matter of public record.

Sharon B. Arnold,

Deputy Director.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[Document Identifier: CMS–R–244]

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Centers for Medicare & Medicaid Services, HHS.

ACTION: Notice.

SUMMARY: The Centers for Medicare & Medicaid Services (CMS) is announcing an opportunity for the public to comment on CMS' intention to collect information from the public. Under the Paperwork Reduction Act of 1995 (the PRA), federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information (including each proposed extension or reinstatement of an existing collection of information) and to allow 60 days for public comment on the proposed action. Interested persons are invited to send comments regarding our burden estimates or any other aspect of this collection of information, including any of the following subjects: (1) The necessity and utility of the proposed information collection for the proper performance of the agency's functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

DATES: Comments must be received by January 17, 2017.

ADDRESSES: When commenting, please reference the document identifier or OMB control number. To be assured consideration, comments and recommendations must be submitted in any one of the following ways:

1. *Electronically.* You may send your comments electronically to *http://www.regulations.gov.* Follow the instructions for ''Comment or Submission'' or ''More Search Options'' to find the information collection document(s) that are accepting comments.

2. *By regular mail.* You may mail written comments to the following address: CMS, Office of Strategic Operations and Regulatory Affairs, Division of Regulations Development, Attention: Document Identifier/OMB Control Number ______, Room C4–26–05, 7500 Security Boulevard, Baltimore, Maryland 21244–1850.

To obtain copies of a supporting statement and any related forms for the proposed collection(s) summarized in this notice, you may make your request using one of following:

1. Access CMS' Web site address at *http://www.cms.hhs.gov/PaperworkReductionActof1995.*

2. Email your request, including your address, phone number, OMB number, and CMS document identifier, to *Paperwork@cms.hhs.gov.*

3. Call the Reports Clearance Office at (410) 786–1326.

FOR FURTHER INFORMATION CONTACT: Reports Clearance Office at (410) 786–1326.

SUPPLEMENTARY INFORMATION:

Contents

This notice sets out a summary of the use and burden associated with the following information collections. More detailed information can be found in each collection's supporting statement and associated materials (see **ADDRESSES**).

CMS–R–244 Programs for All-Inclusive Care of the Elderly (PACE) and Supporting Regulations in 42 CFR Part 460

Under the PRA (44 U.S.C. 3501–3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. The term ''collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA requires federal agencies to publish a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, CMS is publishing this notice.

Information Collection

1. *Type of Information Collection Request:* Revision of a currently approved collection; *Title of Information Collection:* Programs for All-inclusive Care of the Elderly (PACE) and Supporting Regulations in 42 CFR part 460; *Use:* This information collection addresses all operational components of the PACE program (as defined in 42 CFR part 460) with the exception of the application process (§ 460.12). In this iteration the application is removed from this control number and moved under a new information collection request with a new CMS identification number (CMS–10631). An OMB control number specific to the application process is pending.

The CMS–10631 information collection request was submitted to OMB on October 6, 2016, under ICR Reference No: 201610–0938–001. When approved, the control number can be found on *www.reginfo.gov/public/.*

We are removing the application requirements and burden since this CMS–R–244 package is lengthy and we recognize that it can be somewhat time consuming to review. We believe the change will help streamline the public and OMB's review of the application as well as the remaining requirements and burden under this CMS–R–244 package. *Form Number:* CMS–R–244 (OMB control number: 0938–0790); *Frequency:* Once and occasionally; *Affected Public:* Private sector (Business or other for-profits and Not-for-profit institutions); *Number of Respondents:* 130; *Total Annual Responses:* 145,455; *Total Annual Hours:* 61,350. (For policy questions regarding this collection contact Debbie Van Hoven at 410–786–6625).

Dated: November 15, 2016.

William N. Parham, III,

Director, Paperwork Reduction Staff, Office of Strategic Operations and Regulatory Affairs.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2013–N–0804]

Agency Information Collection Activities; Proposed Collection; Comment Request; Premarket Notification

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing an opportunity for public comment on the

proposed collection of certain information by the Agency. Under the Paperwork Reduction Act of 1995 (the PRA), Federal Agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, and to allow 60 days for public comment in response to the notice. This notice solicits comments on medical device premarket notification.

DATES: Submit either electronic or written comments on the collection of information by January 17, 2017.

ADDRESSES: You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2013–N–0804 for ''Agency Information Collection Activities; Proposed Collection; Comment Request; Premarket Notification.'' Received comments will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

- Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *http://www.fda.gov/regulatoryinformation/dockets/default.htm.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: FDA PRA Staff, Office of Operations, Food and Drug Administration, Three White Flint North, 10A63, 11601 Landsdown St., North Bethesda, MD 20852, *PRAStaff@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION: Under the PRA (44 U.S.C. 3501–3520), Federal Agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. ''Collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes Agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires Federal Agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, FDA is publishing notice of the proposed collection of information set forth in this document.

With respect to the following collection of information, FDA invites comments on these topics: (1) Whether the proposed collection of information is necessary for the proper performance of FDA's functions, including whether the information will have practical utility; (2) the accuracy of FDA's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques, when appropriate, and other forms of information technology.

Premarket Notification—21 CFR Part 807, Subpart E OMB Control Number 0910–0120—Extension

Section 510(k) of the Federal Food, Drug, and Cosmetic Act (the FD&C Act) (21 U.S.C. 360(k)) and the implementing regulation under part 807 (21 CFR part 807, subpart E) requires a person who intends to market a medical device to submit a premarket notification submission to FDA at least 90 days before proposing to begin the introduction, or delivery for introduction into interstate commerce, for commercial distribution of a device intended for human use. Based on the information provided in the notification, FDA must determine whether the new device is substantially equivalent to a legally marketed device, as defined in § 807.92(a)(3) (21 CFR 807.92(a)(3)). If the device is determined to be not substantially equivalent to a legally marketed device, it must have an approved premarket approval application (PMA), product development protocol, humanitarian device exemption (HDE), petition for Evaluation of Automatic Class III Designation (de novo), or be reclassified into class I or class II before being marketed. FDA makes the final decision of whether a device is substantially equivalent or not equivalent.

Section 807.81 states when a premarket notification is required. A premarket notification is required to be submitted by a person who is: (1) Introducing a device to the market for the first time; (2) introducing a device into commercial distribution for the first time by a person who is required to register; and (3) introducing or reintroducing a device which is significantly changed or modified in design, components, method of manufacturer, or the intended use that could affect the safety and effectiveness of the device.

Form FDA 3514, a summary cover sheet form, assists respondents in categorizing administrative 510(k) information for submission to FDA. This form also assists respondents in categorizing information for other FDA medical device programs such as PMAs, investigational device exemptions, and HDEs. Under § 807.87(h), each 510(k) submitter must include in the 510(k) either a summary of the information in the 510(k) as required by § 807.92 (510(k) summary) or a statement certifying that the submitter will make available upon request the information in the 510(k) with certain exceptions as per § 807.93 (510(k) statement). If the 510(k) submitter includes a 510(k) statement in the 510(k) submission, § 807.93 requires that the official correspondent of the firm make available within 30 days of a request all information included in the submitted premarket notification on safety and effectiveness. This information will be provided to any person within 30 days of a request if the device described in the 510(k) submission is determined to be substantially equivalent. The information provided will be a duplicate of the 510(k) submission including any safety and effectiveness information, but excluding all patient identifiers and trade secret and commercial confidential information.

Section 204 of the Food and Drug Administration Modernization Act (FDAMA) (Pub. L. 105–115) amended section 514 of the FD&C Act (21 U.S.C. 360d). Amended section 514 allows FDA to recognize consensus standards developed by international and national organizations for use in satisfying portions of device premarket review submissions including premarket notifications or other requirements. FDA has published and updated the list of recognized standards regularly since enactment of FDAMA and has allowed 510(k) submitters to certify conformance to recognized standards to meet the requirements of § 807.87. Form FDA 3654, the 510(k) Standards Data Form, standardizes the format for submitting information on consensus standards that a 510(k) submitter chooses to use as a portion of their premarket notification submission (Form FDA 3654 is not for declarations of conformance to a recognized standard). FDA believes that use of this form will simplify the 510(k) preparation and review process for 510(k).

Under § 807.90, submitters may request information on their 510(k) review status 90 days after the initial login date of the 510(k). Thereafter, the submitter may request status reports every 30 days following the initial status request. To obtain a 510(k) status report, the submitter should complete the status request form, Form FDA 3541, and fax it to the Center for Devices and Radiological Health office identified on the form.

FDA estimates the burden of this collection of information as follows:

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN[1]

Activity and 21 CFR Part/Section	Form No.	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response	Total hours
510(k) submission (807 subpart E).		3,900	1	3,900	79	308,100
Summary cover sheet (807.87)	FDA 3514	1,956	1	1,956	0.5 (30 minutes)	978
Status request (807.90(a)(3))	FDA 3541	218	1	218	0.25 (15 minutes)	55
Standards (807.87(d) and (f))	FDA 3654	2,700	1	2,700	10	27,000
510(k) statement (807.93)		225	10	2,250	10	22,500
Total						358,633

[1] There are no capital costs or operating and maintenance costs associated with this collection of information.

Dated: November 15, 2016.

Leslie Kux,

Associate Commissioner for Policy.

Food and Drug Administration

[Docket No. FDA–2012–D–0880]

Generic Drug User Fee Amendments of 2012: Questions and Answers Related to User Fee Assessments; Guidance for Industry; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing the availability of guidance for industry entitled ''Generic Drug User Fee Amendments of 2012: Questions and Answers Related to User Fee Assessments.'' This guidance provides updated answers to common questions from the generic drug industry and other interested parties involved in the development and/or testing of generic drug products regarding GDUFA user fees and finalizes the revised version of the guidance.

DATES: Submit either electronic or written comments on Agency guidances at any time.

ADDRESSES: You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

• *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *http://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *http://www.regulations.gov.*

• If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

• *Mail/Hand delivery/Courier (for written/paper submissions):* Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

• For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2012–D–0880 for ''Generic Drug User Fee Amendments of 2012: Questions and Answers Related to User Fee Assessments.'' Received comments will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *http://www.regulations.gov* or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

• *Confidential Submissions*—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *http://www.regulations.gov.* Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *http://www.fda.gov/regulatoryinformation/dockets/default.htm.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *http://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

Submit written requests for single copies of this guidance to the Division of Drug Information, Center for Drug Evaluation and Research, Food and Drug Administration, 10001 New Hampshire Ave., Hillandale Building, 4th Floor, Silver Spring, MD 20993–0002. Send one self-addressed adhesive label to assist that office in processing your requests. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the guidance document.

FOR FURTHER INFORMATION CONTACT: Mehrban Iranshad, Division of User Fee Management and Budget Formulation staff, Center for Drug Evaluation and Research, Food and Drug Administration, 10001 New Hampshire Ave., Hillandale Bldg., Rm. 4145, Silver Spring, MD 20993, 301–796–7900, *AskGDUFA@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a guidance for industry entitled ''Generic Drug User Fee Amendments of 2012: Questions and Answers Related to User Fee Assessments.'' GDUFA (Pub. L. 112–144, Title III) was signed into law by the President on July 9, 2012. GDUFA is designed to speed the delivery of safe and effective generic drugs to the public and improve upon the predictability of the review process. GDUFA enables FDA to assess user fees to support critical and measurable enhancements to FDA's generic drugs program. GDUFA establishes fees for abbreviated new drug applications (ANDAs), prior approval supplements (PASs) to ANDAs, and drug master files (DMFs), annual facility fees, and a one-time fee for original ANDAs pending with FDA on October 1, 2012 (backlog fees). Fees are incurred for ANDAs and PASs submitted on or after October 1, 2012. An application fee is also incurred the first time a DMF is referenced in an ANDA or PAS submitted on or after October 1, 2012.

FDA previously announced GDUFA fees for fiscal year 2017 in the **Federal Register**. ANDA, PAS, DMF, and facility fees were published on July 27, 2016 (81 FR 49225), and the backlog fee was published on October 25, 2012 (77 FR 65199). On August 27, 2012, FDA announced the availability of a draft guidance for industry entitled ''Generic Drug User Fee Amendments of 2012: Questions and Answers'' (77 FR 51814). In response to comments received in the docket and to address additional questions that have arisen since the launch of the GDUFA program, FDA revised the draft guidance and re-issued it as ''Draft Guidance for Industry on Generic Drug User Fee Amendments of 2012: Questions and Answers (Revision 1)'' on September 10, 2013 (78 FR 55261). The guidance announced in this notice finalizes the section of Revision 1 relating to user fees, updating and clarifying the responses in some cases and adding questions and answers based on comments received from the public. Questions and answers related to GDUFA's self-identification, review of generic drug submissions, and inspections and compliance provisions that appeared in draft versions of this guidance will appear in updated form in a separately issued final guidance.

This guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The guidance represents the Agency's current thinking on ''Generic Drug User Fee Amendments of 2012: Questions and Answers Related to User Fee Assessments.'' It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

II. Electronic Access

Persons with access to the Internet may obtain the guidance at either *http://www.fda.gov/Drugs/GuidanceComplianceRegulatoryInformation/Guidances/default.htm* or *http://www.regulations.gov*.

Dated: November 14, 2016.

Leslie Kux,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2016–N–3535]

Agency Information Collection Activities: Proposed Collection; Comment Request; Guidance for Industry on Special Protocol Assessment

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing an opportunity for public comment on the proposed collection of certain information by the Agency. Under the Paperwork Reduction Act of 1995 (the PRA), Federal Agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, and to allow 60 days for public comment in response to the notice. This notice solicits comments on the information collection in the guidance for industry on special protocol assessment.

DATES: Submit either electronic or written comments on the collection of information by January 17, 2017.

ADDRESSES: You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

- Federal eRulemaking Portal: *https://www.regulations.gov*. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov*.
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- Mail/Hand delivery/Courier (for written/paper submissions): Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2016–N–3535 for ''Agency Information Collection Activities: Proposed Collection; Comment Request; Guidance for Industry on Special Protocol Assessment.'' Received comments will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

- Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov*. Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *http://www.fda.gov/regulatoryinformation/dockets/default.htm*.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: FDA PRA Staff, Office of Operations, Food and Drug Administration, Three White Flint North, 11601 Landsdown St., 10A–12M, North Bethesda, MD 20852, *PRAStaff@fda.hhs.gov*.

SUPPLEMENTARY INFORMATION: Under the PRA (44 U.S.C. 3501–3520), Federal Agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. ''Collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes Agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires Federal Agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, FDA is publishing notice of the proposed collection of information set forth in this document.

With respect to the following collection of information, FDA invites comments on these topics: (1) Whether the proposed collection of information is necessary for the proper performance of FDA's functions, including whether the information will have practical utility; (2) the accuracy of FDA's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques, when appropriate, and other forms of information technology.

Guidance for Industry on Special Protocol Assessment—OMB Control Number 0910–0470—Extension

The ''Guidance for Industry on Special Protocol Assessment'' describes Agency procedures to evaluate issues related to the adequacy (*e.g.,* design, conduct, analysis) of certain proposed studies. The guidance describes procedures for sponsors to request special protocol assessment and for the Agency to act on such requests. The guidance provides information on how the Agency interprets and applies provisions of the Food and Drug Administration Modernization Act of 1997 and the specific Prescription Drug User Fee Act of 1992 (PDUFA) goals for special protocol assessment associated with the development and review of PDUFA products. The guidance describes the following two collections of information: (1) The submission of a notice of intent to request special protocol assessment of a carcinogenicity protocol and (2) the submission of a request for special protocol assessment.

I. Notification for a Carcinogenicity Protocol

As described in the guidance, a sponsor interested in Agency assessment of a carcinogenicity protocol should notify the appropriate division in FDA's Center for Drug Evaluation and Research (CDER) or the Center for Biologics Evaluation and Research (CBER) of an intent to request special protocol assessment at least 30 days prior to submitting the request. With such notification, the sponsor should submit relevant background information so that the Agency may review reference material related to carcinogenicity protocol design prior to receiving the carcinogenicity protocol.

II. Request for Special Protocol Assessment

The guidance asks that a request for special protocol assessment be submitted as an amendment to the investigational new drug application (IND) for the underlying product and that it be submitted to the Agency in triplicate with Form FDA 1571 attached. The guidance also suggests that the sponsor submit the cover letter to a request for special protocol assessment via fax to the appropriate division in CDER or CBER. Agency regulations (21 CFR 312.23(d)) state that information provided to the Agency as part of an IND is to be submitted in triplicate and with the appropriate cover form, Form FDA 1571. An IND is submitted to FDA under existing regulations in part 312 (21 CFR part 312), which specifies the information that manufacturers must submit so that FDA may properly evaluate the safety and effectiveness of investigational drugs and biological products. The information collection requirements resulting from the preparation and submission of an IND under part 312 have been estimated by FDA and the reporting and recordkeeping burden has been approved by OMB under OMB control number 0910–0014.

FDA suggests that the cover letter to the request for special protocol assessment be submitted via fax to the appropriate division in CDER or CBER to enable Agency staff to prepare for the arrival of the protocol for assessment. The Agency recommends that a request for special protocol assessment be submitted as an amendment to an IND for two reasons: (1) To ensure that each request is kept in the administrative file with the entire IND and (2) to ensure that pertinent information about the request is entered into the appropriate tracking databases. Use of the information in the Agency's tracking databases enables the appropriate Agency official to monitor progress on the evaluation of the protocol and to ensure that appropriate steps will be taken in a timely manner.

The guidance recommends that the following information should be submitted to the appropriate Center with each request for special protocol assessment so that the Center may quickly and efficiently respond to the request:

- Questions to the Agency concerning specific issues regarding the protocol; and
- All data, assumptions, and information needed to permit an adequate evaluation of the protocol, including: (1) The role of the study in the overall development of the drug; (2) information supporting the proposed trial, including power calculations, the choice of study endpoints, and other critical design features; (3) regulatory outcomes that could be supported by the results of the study; (4) final labeling that could be supported by the results of the study; and (5) for a stability protocol, product characterization and relevant manufacturing data.

Description of Respondents: A sponsor, applicant, or manufacturer of a drug or biologic product regulated by the Agency under the Federal Food, Drug, and Cosmetic Act or section 351 of the Public Health Service Act (42 U.S.C. 262) who requests special protocol assessment.

Burden Estimate: Table 1 of this document provides an estimate of the annual reporting burden for notifications for a carcinogenicity protocol and requests for a special protocol assessment.

Notification for a Carcinogenicity Protocol: Based on the number of notifications for carcinogenicity protocols and the number of carcinogenicity protocols currently submitted to CDER and CBER, CDER estimates that it will receive approximately 52 notifications of an intent to request special protocol assessment of a carcinogenicity protocol per year from approximately 28 sponsors. CBER estimates that it will receive approximately one notification of an intent to request special protocol assessment of a carcinogenicity protocol per year from approximately one sponsor. The hours per response, which is the estimated number of hours that a sponsor would spend preparing the notification and background information to be submitted in accordance with the guidance, is estimated to be approximately 8 hours.

Requests for Special Protocol Assessment: Based on the number of requests for special protocol assessment currently submitted to CDER and CBER, CDER estimates that it will receive approximately 211 requests for special protocol assessment per year from approximately 112 sponsors. CBER estimates that it will receive approximately nine requests from approximately seven sponsors. The hours per response is the estimated number of hours that a respondent would spend preparing the information to be submitted with a request for special protocol assessment, including the time it takes to gather and copy questions to be posed to the Agency regarding the protocol and data, assumptions, and information needed to permit an adequate evaluation of the protocol. Based on the Agency's experience with these submissions, FDA estimates approximately 15 hours on average would be needed per response.

FDA estimates the burden of this collection as follows:

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN [1]

Information collection activity	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response	Total hours
Notification for Carcinogenicity Protocols	29	1.8	53	8	424
Requests for Special Protocol Assessment	119	1.8	220	15	3,300
Total					3,724

[1] There are no capital costs or operating and maintenance costs associated with this collection.

Dated: November 15, 2016.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2016–D–3456]

Bacillus Calmette-Guerin—Unresponsive Nonmuscle Invasive Bladder Cancer: Developing Drugs and Biologics for Treatment; Draft Guidance for Industry; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: Summary: The Food and Drug Administration (FDA or Agency) is announcing the availability of a draft guidance for industry entitled ''Bacillus Calmette-Guerin (BCG)—Unresponsive Nonmuscle Invasive Bladder Cancer: Developing Drugs and Biologics for Treatment.'' The purpose of this guidance is to assist sponsors in the development of drugs and biologics to treat patients with a high-risk form of bladder cancer. The alternative is radical cystectomy, a surgical procedure with significant morbidity and mortality. This guidance will help overcome some of the obstacles in conducting the studies needed to establish efficacy of drugs and biologics for these patients with an unmet medical need.

DATES: Although you can comment on any guidance at any time (see 21 CFR 10.115(g)(5)), to ensure that the agency considers your comment on this draft guidance before it begins work on the final version of the guidance, submit either electronic or written comments on the draft guidance by February 16, 2017.

ADDRESSES: You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

• *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *http://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *http://www.regulations.gov.*

• If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

• *Mail/Hand delivery/Courier (for written/paper submissions):* Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

• For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. [FDA–2016–D–3456] for ''BCG-Unresponsive Nonmuscle Invasive Bladder Cancer: Developing Drugs and Biologics for Treatment; Draft Guidance for Industry; Availability.'' Received comments will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *http://www.regulations.gov* or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

• *Confidential Submissions*—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *http://www.regulations.gov.* Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *http://www.fda.gov/regulatoryinformation/dockets/default.htm.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *http://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

Submit written requests for single copies of the draft guidance to the

Division of Drug Information, Center for Drug Evaluation and Research, Food and Drug Administration, 10001 New Hampshire Ave., Hillandale Building, 4th Floor, Silver Spring, MD 20993–0002, or the Office of Communication, Outreach, and Development, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 3128, Silver Spring, MD 20993–0002. Send one self-addressed adhesive label to assist that office in processing your requests. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the draft guidance document.

FOR FURTHER INFORMATION CONTACT: V. Ellen Maher, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 22, Rm. 2352, Silver Spring, MD 20993–0002, 301–796–5017; or Stephen Ripley, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 7301, Silver Spring, MD 20993–0002, 240–402–7911.

SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a draft guidance for industry entitled ''BCG-Unresponsive Nonmuscle Invasive Bladder Cancer: Developing Drugs and Biologics for Treatment.'' This draft guidance is intended to provide a framework for industry to facilitate the development of drugs and biologics to treat patients with nonmuscle invasive bladder cancer (NMIBC). The focus is on the subset of patients with BCG-unresponsive disease. In addition, the pathological diagnosis and staging, risk stratification, and trial design, including assessment of appropriate clinical endpoints, are discussed.

The preferred trial design for demonstrating efficacy of drugs developed to treat NMIBC is a randomized, controlled trial with a time-to-event endpoint of recurrence-free survival. Single-arm trials are appropriate in clinical settings for which a randomized, controlled trial is either unethical or not feasible. Therefore, single-arm trials of patients with BCG-unresponsive carcinoma in situ with or without papillary disease using an endpoint of complete response rate (and duration) may be appropriate.

This draft guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the current thinking of FDA on developing drugs and biologics for the treatment of BCG-unresponsive NMIBC. It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

II. The Paperwork Reduction Act of 1995

This draft guidance refers to previously approved collections of information found in FDA regulations. These collections of information are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520). The collections of information in 21 CFR parts 312 and 314 have been approved under OMB control numbers 0910–0014 and 0910–0001, respectively.

III. Electronic Access

Persons with access to the Internet may obtain the draft guidance at *http://www.fda.gov/Drugs/GuidanceComplianceRegulatoryInformation/Guidances/default.htm, http://www.fda.gov/BiologicsBloodVaccines/GuidanceComplianceRegulatoryInformation/default.htm,* or *http://www.regulations.gov.*

Dated: November 14, 2016.

Leslie Kux,

Associate Commissioner for Policy.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2016–D–3750]

Revised Recommendations for Determining Eligibility of Donors of Human Cells, Tissues, and Cellular and Tissue-Based Products Who Have Received Human-Derived Clotting Factor Concentrates; Guidance for Industry; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing the availability of a document entitled ''Revised Recommendations for Determining Eligibility of Donors of Human Cells, Tissues, and Cellular and Tissue-Based Products Who Have Received Human-Derived Clotting Factor Concentrates; Guidance for Industry.'' The guidance document provides establishments that make donor eligibility (DE) determinations for donors of human cells, tissues, and cellular and tissue-based products (HCT/Ps) with information on infectious-disease risks related to receipt of FDA licensed human-derived clotting factor concentrates (HDCFCs). The guidance explains that FDA no longer considers FDA licensed HDCFCs as a risk factor for human immunodeficiency virus (HIV), Hepatitis B virus (HBV), or Hepatitis C virus (HCV). As such, receipt of FDA licensed HDCFCs, or sex with a person who has received FDA licensed HDCFCs, should not be considered a risk factor when determining eligibility of a donor of HCT/Ps. The guidance supplements the recommendations regarding HDCFCs that are contained in the guidance entitled ''Eligibility Determination for Donors of Human Cells, Tissues, and Cellular and Tissue-Based Products (HCT/Ps); Guidance for Industry'' dated August 2007.

DATES: The Agency is soliciting public comment, but is implementing this guidance immediately because the Agency has determined that prior public participation is not appropriate. Submit either electronic or written comments on Agency guidances at any time.

ADDRESSES: You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

• *Federal eRulemaking Portal: http://www.regulations.gov*. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *http://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *http://www.regulations.gov*.

• If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

• *Mail/Hand delivery/Courier (for written/paper submissions):* Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

• For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2016–D–3750 for ''Revised Recommendations for Determining Eligibility of Donors of Human Cells, Tissues, and Cellular and Tissue-Based Products Who Have Received Human-Derived Clotting Factor Concentrates; Guidance for Industry.'' Received comments will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *http://www.regulations.gov* or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

• Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *http://www.regulations.gov*. Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *http://www.fda.gov/regulatoryinformation/dockets/default.htm*.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *http://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

Submit written requests for single copies of the guidance to the Office of Communication, Outreach and Development, Center for Biologics Evaluation and Research (CBER), Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 3128, Silver Spring, MD 20993–0002. Send one self-addressed adhesive label to assist the office in processing your requests. The guidance may also be obtained by mail by calling CBER at 1–800–835–4709 or 240–402–8010. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the guidance document.

FOR FURTHER INFORMATION CONTACT: Melissa Segal, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 7301, Silver Spring, MD 20993–0002, 240–402–7911.

SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a document entitled ''Revised Recommendations for Determining Eligibility of Donors of Human Cells, Tissues, and Cellular and Tissue-Based Products Who Have Received Human-Derived Clotting Factor Concentrates; Guidance for Industry.'' The guidance document provides establishments that make DE determinations for donors of HCT/Ps with information on infectious disease risks related to receipt of HDCFCs. The guidance explains that FDA no longer considers FDA licensed HDCFCs as a risk factor for HIV, HBV, or HCV. As such, receipt of FDA licensed HDCFCs, or sex with a person who has received FDA licensed HDCFCs, should not be considered a risk factor when determining eligibility of a donor of HCT/Ps. The recommendations in the guidance supersede the recommendations contained in section IV.E.3. of the guidance entitled ''Eligibility Determination for Donors of Human Cells, Tissues, and Cellular and Tissue-Based Products (HCT/Ps); Guidance for Industry'' dated August 2007.

This guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). FDA is issuing this guidance for immediate implementation in accordance with 21 CFR 10.115(g)(2) without initially seeking prior comment because the Agency has determined that prior public participation is not appropriate. This guidance recommends a less burdensome policy that is consistent with the public health. The guidance represents the current thinking of FDA on ''Revised Recommendations for Determining Eligibility of Donors of Human Cells, Tissues, and Cellular and Tissue-Based Products Who Have Received Human-Derived Clotting Factor Concentrates.'' It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

II. Paperwork Reduction Act of 1995

This guidance refers to previously approved collections of information found in FDA regulations. These collections of information are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520). The collections of information in 21 CFR 1271.47 have been approved under OMB control number 0910–0543.

III. Electronic Access

Persons with access to the Internet may obtain the guidance at either *http://www.fda.gov/BiologicsBloodVaccines/GuidanceComplianceRegulatoryInformation/Guidances/default.htm* or *http://www.regulations.gov*.

Dated: November 14, 2016.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2016–N–3680]

Determination That BENEMID (Probenecid) Tablet and Other Drug Products Were Not Withdrawn From Sale for Reasons of Safety or Effectiveness

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA or Agency) has

determined that the drug products listed in this document were not withdrawn from sale for reasons of safety or effectiveness. This determination means that FDA will not begin procedures to withdraw approval of abbreviated new drug applications (ANDAs) that refer to these drug products, and it will allow FDA to continue to approve ANDAs that refer to the products as long as they meet relevant legal and regulatory requirements.

FOR FURTHER INFORMATION CONTACT: Stacy Kane, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, Rm. 6207, Silver Spring, MD 20993–0002, 301–796–8363, *Stacy.Kane@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION: In 1984, Congress enacted the Drug Price Competition and Patent Term Restoration Act of 1984 (Pub. L. 98–417) (the 1984 amendments), which authorized the approval of duplicate versions of drug products approved under an ANDA procedure. ANDA applicants must, with certain exceptions, show that the drug for which they are seeking approval contains the same active ingredient in the same strength and dosage form as the ''listed drug,'' which is a version of the drug that was previously approved. ANDA applicants do not have to repeat the extensive clinical testing otherwise necessary to gain approval of a new drug application (NDA).

The 1984 amendments include what is now section 505(j)(7) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(j)(7)), which requires FDA to publish a list of all approved drugs. FDA publishes this list as part of the ''Approved Drug Products With Therapeutic Equivalence Evaluations,'' which is generally known as the ''Orange Book.'' Under FDA regulations, a drug is removed from the list if the Agency withdraws or suspends approval of the drug's NDA or ANDA for reasons of safety or effectiveness, or if FDA determines that the listed drug was withdrawn from sale for reasons of safety or effectiveness (21 CFR 314.162).

Under § 314.161(a) (21 CFR 314.161(a)), the Agency must determine whether a listed drug was withdrawn from sale for reasons of safety or effectiveness: (1) Before an ANDA that refers to that listed drug may be approved, (2) whenever a listed drug is voluntarily withdrawn from sale and ANDAs that refer to the listed drug have been approved, and (3) when a person petitions for such a determination under 21 CFR 10.25(a) and 10.30. Section 314.161(d) provides that if FDA determines that a listed drug was withdrawn from sale for safety or effectiveness reasons, the Agency will initiate proceedings that could result in the withdrawal of approval of the ANDAs that refer to the listed drug.

FDA has become aware that the drug products listed in the table in this document are no longer being marketed.

Application No.	Drug name	Active ingredient(s)	Strength(s)	Dosage form/route	Applicant
NDA 007898	BENEMID	Probenecid	500 milligrams (mg)	Tablet; Oral	Merck and Co., Inc.
NDA 008048	XYLOCAINE	Lidocaine	5%	Ointment; Topical	AstraZeneca Pharmaceuticals LP.

NDA 050442	VIBRAMYCIN	Doxycycline Hyclate	EQ 100 mg Base/Vial; EQ 200 mg Base/Vial.	Injectable; Injection	Pfizer Inc.

Application No.	Drug name	Active ingredient(s)	Strength(s)	Dosage form/route	Applicant
NDA 050624	ROCEPHIN W/DEXTROSE IN PLASTIC CONTAINER.	Ceftriaxone Sodium	EQ 10 mg Base/mL; EQ 20 mg Base/mL; EQ 40 mg Base/mL.	Injectable; Injection	Hoffmann-La Roche, Inc.
NDA 050739	OMNICEF	Cefdinir	300 mg	Capsule; Oral	AbbVie Inc.
NDA 050749	OMNICEF	Cefdinir	125 mg/5 mL; 250 mg/5 mL	For Suspension; Oral	AbbVie Inc.
ANDA 060003	V–CILLIN K	Penicillin V Potassium	EQ 125 mg Base; EQ 250 mg Base; EQ 500 mg Base.	Tablet; Oral	Eli Lilly and Company.
ANDA 060463	GARAMYCIN	Gentamicin Sulfate	EQ 0.1% Base	Ointment; Topical	Schering-Plough Corp.
ANDA 086833	CYPROHEPTADINE HYDROCHLORIDE.	Cyproheptadine HCl	2 mg/5mL	Syrup; Oral	Actavis Mid Atlantic LLC.
ANDA 088877	BENZTROPINE MESYLATE.	Benztropine Mesylate	0.5 mg	Tablet; Oral	Lannett Holdings, Inc.
ANDA 088894	BENZTROPINE MESYLATE.	Benztropine Mesylate	1 mg	Tablet; Oral	Lannett Holdings, Inc.
ANDA 088895	BENZTROPINE MESYLATE.	Benztropine Mesylate	2 mg	Tablet; Oral	Lannett Holdings, Inc.

FDA has reviewed its records and, under § 314.161, has determined that the drug products listed in this document were not withdrawn from sale for reasons of safety or effectiveness. Accordingly, the Agency will continue to list the drug products listed in this document in the ''Discontinued Drug Product List'' section of the Orange Book. The ''Discontinued Drug Product List'' identifies, among other items, drug products that have been discontinued from marketing for reasons other than safety or effectiveness.

Approved ANDAs that refer to the NDAs and ANDAs listed in this document are unaffected by the discontinued marketing of the products subject to those NDAs and ANDAs. Additional ANDAs that refer to these products may also be approved by the Agency if they comply with relevant legal and regulatory requirements. If FDA determines that labeling for these drug products should be revised to meet current standards, the Agency will advise ANDA applicants to submit such labeling.

Dated: November 14, 2016.

Leslie Kux,

Associate Commissioner for Policy.

Medical Devices Regulated by the Center for Biologics Evaluation and Research; Availability of Safety and Effectiveness Summaries for Premarket Approval Applications

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is publishing a list of premarket approval applications (PMAs) that have been approved by the Center for Biologics Evaluation and Research (CBER). This list is intended to inform the public of the availability of safety and effectiveness summaries of approved PMAs through the Internet and the Agency's Division of Dockets Management.

ADDRESSES: You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

• *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *http://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *http://www.regulations.gov.*

• If you want to submit a comment with confidential information that you do not wish to be made available to the public submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

• *Mail/Hand delivery/Courier (for written/paper submissions):* Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

• For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket Nos. FDA–2015–M–3249, FDA–2015–M–3251, FDA–2015–M–3253, FDA–2015–M–4130, 2015–M–3254, FDA–2016–M–2210, FDA–2014–M–0740, FDA–2016–M–1072, FDA–2014–M–2304, FDA–2014–M–2305, FDA–2015–M–2100, FDA–2015–M–3255, FDA–2015–M–4981 for ''Medical Devices Regulated by the Center for Biologics Evaluation and Research; Availability of Safety and Effectiveness Summaries for Premarket Approval Applications.'' Received comments will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *http://www.regulations.gov* or at the Division of Dockets

Management between 9 a.m. and 4 p.m., Monday through Friday.

• Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *http://www.regulations.gov.* Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *http://www.fda.gov/regulatoryinformation/dockets/default.htm.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *http://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: Jonathan McKnight, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 7301, Silver Spring, MD 20993–0002, 240–402–7911.

SUPPLEMENTARY INFORMATION:

I. Background

In accordance with sections 515(d)(4) and (e)(2) of the Federal Food, Drug, and Cosmetic Act (the FD&C Act) (21 U.S.C. 360e(d)(4) and (e)(2)), notification of an order approving, denying, or withdrawing approval of a PMA will continue to include a notice of opportunity to request review of the order under section 515(g) of the FD&C Act. The 30-day period for requesting reconsideration of an FDA action under § 10.33(b) (21 CFR 10.33(b)) for notices announcing approval of a PMA begins on the day the notice is placed on the Internet. Section 10.33(b) provides that FDA may, for good cause, extend this 30-day period. Reconsideration of a denial or withdrawal of approval of a PMA may be sought only by the applicant; in these cases, the 30-day period will begin when the applicant is notified by FDA in writing of its decision.

The regulations (21 CFR 814.44(d) and 814.45(d)) provide that FDA publish a quarterly list of available safety and effectiveness summaries of PMA approvals and denials that were announced during that quarter. The following is a list of PMAs approved by CBER for which safety and effectiveness summaries were placed on the Internet from October 1, 2010, through September 30, 2016. There were no denial actions during this period. The list provides the manufacturer's name, the product's generic name or the trade name, and the approval date.

TABLE 1—LIST OF SAFETY AND EFFECTIVENESS SUMMARIES FOR APPROVED PMAS MADE AVAILABLE FROM OCTOBER 1, 2010, THROUGH SEPTEMBER 30, 2016

PMA No., Docket No.	Applicant	Trade name	Approval date
BP090032, FDA–2015–M–3249	bioLytical Laboratories Inc	INSTI HIV–1 Antibody Test Kit	November 29, 2010.
BP100064, FDA–2015–M–3251	Bio-Rad Laboratories, Inc	GS HIV Combo Ag/Ab EIA	July 22, 2011.
BP120001, FDA–2015–M–3253	OraSure Technologies, Inc	OraQuick® In-Home HIV Test	July 3, 2012.
BP120032, FDA–2015–M–4130	Chembio Diagnostic Systems, Inc	DPP HIV ½ Assay	December 12, 2012.
BP120037, FDA–2015–M–3254	Alere Scarborough, Inc	Alere Determine™ HIV–1/2 Ag/Ab Combo	August 9, 2013.
BH110018, FDA–2016–M–2210	Miltenyi Biotec, Inc	CliniMACs CD34 Reagent System	January 23, 2014.
BP130026, FDA–2014–M–0740	BioArray Solutions, Ltd	Immucor PreciseType™ Human Erythrocyte Antigen Molecular BeadChip Test.	May 21, 2014.
BP140120, FDA–2016–M–1072	Bio-Rad Laboratories, Inc	Bio-Rad Geenius HIV ½ Supplemental Assay	October 24, 2014.
BP130076, FDA–2014–M–2304	Cerus Corporation	INTERCEPT® Blood System for Plasma	December 16, 2014.
BP140143, FDA–2014–M–2305	Cerus Corporation	INTERCEPT® Blood System for Platelets	December 18, 2014.
BP140103, FDA–2015–M–2100	Siemens Healthcare Diagnostics, Inc	ADVIA Centaur HIV Ag/Ab Combo (CHIV) Assay.	June 8, 2015.
BP140111, FDA–2015–M–3255	Bio-Rad Laboratories, Inc	BioPlex® 2200 HIV Ag-Ab	July 22, 2015.
BP150262, FDA–2015–M–4981	Roche Molecular Systems, Inc	Cobas HIV–1	December 18, 2015.

II. Electronic Access

Persons with access to the Internet may obtain the documents at *http://www.fda.gov/BiologicsBloodVaccines/BloodBloodProducts/ApprovedProducts/PremarketApprovalsPMAs/default.htm.*

Dated: November 14, 2016.

Food and Drug Administration

[Docket No. FDA–2015–D–2148]

Submission of Premarket Notifications for Magnetic Resonance Diagnostic Devices; Guidance for Industry and Food and Drug Administration Staff; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA) is announcing the availability of the guidance entitled ''Submission of Premarket Notifications for Magnetic Resonance Diagnostic Devices.'' This guidance provides a detailed description of the information that should be included in a premarket notification for a magnetic resonance diagnostic device (MRDD).

DATES: Submit either electronic or written comments on this guidance at any time. General comments on Agency guidance documents are welcome at any time.

ADDRESSES: You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *http://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *http://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2015–D–2148 for ''Submission of Premarket Notifications for Magnetic Resonance Diagnostic Devices.'' Received comments will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *http://www.regulations.gov* or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

- Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *http://www.regulations.gov.* Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *http://www.fda.gov/regulatoryinformation/dockets/default.htm.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *http://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

An electronic copy of the guidance document is available for download from the Internet. See the **SUPPLEMENTARY INFORMATION** section for information on electronic access to the guidance. Submit written requests for a single hard copy of the guidance document entitled ''Submission of Premarket Notifications for Magnetic Resonance Diagnostic Devices'' to the Office of the Center Director, Guidance and Policy Development, Center for Devices and Radiological Health, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, Rm. 5431, Silver Spring, MD 20993–0002. Send one self-addressed adhesive label to assist that office in processing your request.

FOR FURTHER INFORMATION CONTACT: Jana Delfino, Center for Devices and Radiological Health, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, Rm. 4236, Silver Spring, MD 20993–0002, 301–796–6503; or Sunder Rajan, Center for Devices and Radiological Health, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 62, Rm. 1113, Silver Spring, MD 20993–0002, 301–796–4194.

SUPPLEMENTARY INFORMATION:

I. Background

The purpose of this guidance is to provide a detailed description of the information that should be included in a premarket notification for an MRDD. This guidance is a recommendation of how to comply with certain requirements contained in 21 CFR 807.87 and is intended to be used in conjunction with information regarding the content and format of a 510(k) premarket notification. The approach outlined in this guidance document is intended to facilitate the timely review and marketing clearance of MRDDs.

MRDDs are also electronic products under section 531(2) (21 U.S.C. 360hh(2)) of Subchapter C (Electronic Product Radiation Control (EPRC)) of the Federal Food, Drug and Cosmetic Act (FD&C Act). As such, MRDDs are subject to the radiological health requirements in Title 21, Subchapter J, parts 1000 through 1050 of the Code of Federal Regulations, including applicability of general and specific performance standards (parts 1010–1050) and other general requirements for reporting and recordkeeping (part 1002), notification and corrective actions for defective or non-compliant electronic products (parts 1003 and 1004), and importation (part 1005).

This guidance is applicable to MRDDs as defined in 21 CFR 892.1000. An MRDD is intended for general diagnostic use to present images that reflect the spatial distribution and/or magnetic resonance spectra that reflect frequency and distribution of nuclei exhibiting nuclear magnetic resonance. Other physical parameters derived from the images and/or spectra may also be produced. The device includes hydrogen-1 (proton) imaging, sodium-23 imaging, hydrogen-1 spectroscopy, phosphorus-31 spectroscopy, and chemical shift imaging (preserving simultaneous frequency and spatial information). MRDDs are class II medical devices that require premarket notification and an agency determination of substantial equivalence prior to marketing.

The principal components of current MRDDs include the main magnet, shim and gradient systems, radiofrequency transmitter and receiver, transmit and receive coils, power supplies, computer and software, patient supports, and physiological gating devices. This guidance document is applicable to premarket notifications for new magnetic resonance imaging (MRI) and magnetic resonance spectroscopy systems, components, and accessories, and modifications to systems, components, and accessories that could significantly affect the safety or effectiveness of the MRDD. The information in this guidance document is also applicable to the MRI system components of dual-modality devices, such as positron emission tomography/MRI systems.

In the **Federal Register** of July 14, 2015 (80 FR 41046), FDA announced the availability of the draft guidance and interested persons were invited to comment by October 13, 2015. FDA has considered the comments received, and has incorporated changes suggested by the comments, as appropriate.

This guidance supersedes FDA's guidance entitled ''Guidance for Industry: Guidance for the Submissions of Premarket Notifications for Magnetic Resonance Diagnostic Devices'' dated November 14, 1998.

II. Significance of Guidance

This guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The guidance represents the current thinking of FDA on ''Submission of Premarket Notifications for Magnetic Resonance Diagnostic Devices.'' It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

III. Electronic Access

Persons interested in obtaining a copy of the guidance may do so by downloading an electronic copy from the Internet. A search capability for all Center for Devices and Radiological Health guidance documents is available at *http://www.fda.gov/MedicalDevices/DeviceRegulationandGuidance/GuidanceDocuments/default.htm.* Guidance documents are also available at *http://www.regulations.gov.* Persons unable to download an electronic copy of ''Submission of Premarket Notifications for Magnetic Resonance Diagnostic Devices'' may send an email request to *CDRH-Guidance@fda.hhs.gov* to receive an electronic copy of the document. Please use the document number 340 to identify the guidance you are requesting.

IV. Paperwork Reduction Act of 1995

This guidance refers to previously approved collections of information found in FDA regulations. These collections of information are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520). The collections of information in 21 CFR part 807, subpart E (premarket notification), have been approved under OMB control number 0910–0120; the collections of information in 21 CFR part 801 (labeling) have been approved under OMB control number 0910–0485; the collections of information in parts 1002 through 1050 (electronic product requirements) have been approved under OMB control number 0910–0025; and the collections of information in the guidance document ''Requests for Feedback on Medical Device Submissions: The Pre-Submission Program and Meetings with Food and Drug Administration Staff'' have been approved under OMB control number 0910–0756.

Dated: November 15, 2016.

Leslie Kux,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2016–D–3004]

Use of The Seafood List To Determine Acceptable Seafood Names; Draft Compliance Policy Guide; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA or we) is announcing the availability of a draft guidance for FDA staff entitled ''Compliance Policy Guide Sec. 540.750 Use of *The Seafood List* to Determine Acceptable Seafood Names'' (the draft Compliance Policy Guide (CPG)). The draft CPG, when finalized, will provide guidance for FDA staff regarding use of *The Seafood List* to determine whether a seafood name is acceptable.

DATES: Although you can comment on any CPG at any time (see 21 CFR 10.115(g)(5)), to ensure that we consider your comment on the draft CPG before we begin work on the final version of the CPG, submit either electronic or written comments on the draft CPG by January 17, 2017.

ADDRESSES: You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *http://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *http://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2016–D–3004 for ''Compliance Policy Guide Sec. 540.750 Use of *The Seafood List* to Determine Acceptable Seafood Names.'' Received comments will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *http://www.regulations.gov* or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

- Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *http://www.regulations.gov.* Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *http://www.fda.gov/regulatoryinformation/dockets/default.htm.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *http://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

Submit written requests for single copies of the draft CPG to the Food and Feed Policy Staff, Office of Policy and Risk Management, Office of Regulatory Affairs, Food and Drug Administration, 12420 Parklawn Dr., Rockville, MD 20857. Send two self-addressed adhesive labels to assist that office in processing your request. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the draft CPG.

FOR FURTHER INFORMATION CONTACT: Spring C. Randolph, Center for Food Safety and Applied Nutrition (HFC–325), Food and Drug Administration, 5001 Campus Dr., College Park, MD 20740, 240–402–1421.

SUPPLEMENTARY INFORMATION:

I. Background

We are announcing the availability of the draft CPG entitled ''Compliance Policy Guide Sec. 540.750 Use of *The Seafood List* to Determine Acceptable Seafood Names.'' The draft CPG, if finalized, will update the previously issued ''CPG Sec. 540.750—Common or Usual Names for Seafood in Interstate Commerce.'' The draft CPG is intended to provide guidance for FDA staff regarding use of *The Seafood List* to determine whether a seafood name is acceptable. The draft CPG explains when we may consider a seafood product to be misbranded under section 403 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 343). The draft CPG also contains information that may be useful to the regulated industry and to the public.

We are issuing this draft CPG consistent with our good guidance practices regulation (21 CFR 10.115). The draft CPG, when finalized, will represent our current thinking on acceptable names for seafood in interstate commerce. It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternate approach if it satisfies the requirements of the applicable statutes and regulations.

II. Electronic Access

Persons with access to the Internet may obtain the draft CPG from FDA's Office of Regulatory Affairs CPG history page at *http://www.fda.gov/ICECI/ComplianceManuals/CompliancePolicyGuidanceManual/default.htm* or *http://www.regulations.gov.* Use the FDA Web site listed in the previous sentence to find the most current version of the guidance.

Dated: November 15, 2016.

Leslie Kux,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Notice of Joint Meeting by the Urology Interagency Coordinating Committee and the Diabetes Mellitus Interagency Coordinating Committee Meeting

SUMMARY: The Diabetes Mellitus Interagency Coordinating Committee (DMICC) and the Urology Interagency Coordinating Committee (UICC) will hold a joint meeting on December 16, 2016. The subject of the meeting will be ''The Urologic Complications of Diabetes.'' The meeting is open to the public.

DATES: The meeting will be held on December 16, 2016; from 9:00 a.m. to 12:00 p.m. Individuals wanting to present oral comments must notify the contact person at least 10 days before the meeting date.

ADDRESSES: The meeting will be held in the Democracy 2 Building at 6707 Democracy Blvd., Bethesda, MD, in Conference Room 7050.

FOR FURTHER INFORMATION CONTACT: For further information concerning this meeting, see the DMICC Web site, *www.diabetescommittee.gov,* or contact Dr. B. Tibor Roberts, Executive Secretary of the Diabetes Mellitus Interagency Coordinating Committee, National Institute of Diabetes and Digestive and Kidney Diseases, 31 Center Drive, Building 31A, Room 9A19, MSC 2560, Bethesda, MD 20892–2560, telephone: 301–496–6623; FAX: 301–480–6741; email: *dmicc@mail.nih.gov.*

SUPPLEMENTARY INFORMATION: The DMICC and the UICC, both chaired by the National Institute of Diabetes and Digestive and Kidney Diseases (NIDDK) comprising members of the Department of Health and Human Services and other federal agencies that support diabetes-related or urologic-related activities respectively, facilitate cooperation, communication, and collaboration on diabetes among government entities. The Committees' meetings, held several times a year, provide an opportunity for their members to learn about and discuss current and relevant future programs in their member organizations and to identify opportunities for collaboration. The December 16, 2016 joint meeting will focus on The Urologic Complications of Diabetes.

Any member of the public interested in presenting oral comments to the Committees should notify the contact person listed on this notice at least 10 days in advance of the meeting. Interested individuals and representatives or organizations should submit a letter of intent, a brief description of the organization represented, and a written copy of their oral presentation in advance of the meeting. Only one representative of an organization will be allowed to present; oral comments and presentations will be limited to a maximum of 5 minutes. Printed and electronic copies are requested for the record. In addition, any interested person may file written comments with the Committees by forwarding their statement to the contact person listed on this notice. The statement should include the name, address, telephone number and when applicable, the business or professional affiliation of the interested person. Because of time constraints for the meeting, oral comments will be allowed on a first-come, first-serve basis.

Members of the public who would like to receive email notification about future DMICC meetings should register for the listserv available on the DMICC Web site, *www.diabetescommittee.gov.*

Dated: November 9, 2016.

B. Tibor Roberts,

Executive Secretary, Office of Scientific Program and Policy Analysis, National Institute of Diabetes and Digestive and Kidney Diseases, National Institutes of Health.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Government-Owned Inventions; Availability for Licensing and/or Co-Development

AGENCY: National Institutes of Health, Department of Health and Human Services.

ACTION: Notice.

SUMMARY: The invention listed below is owned by an agency of the U.S. Government and is available for licensing and/or co-development in the U.S. to achieve expeditious commercialization of results of federally-funded research and development. Foreign patent applications are filed on selected inventions to extend market coverage for companies and may also be available for licensing and/or co-development.

ADDRESSES: Invention Development and Marketing Unit, Technology Transfer Center, National Cancer Institute, 9609 Medical Center Drive, Mail Stop 9702, Rockville, MD 20850–9702.

FOR FURTHER INFORMATION CONTACT: Information on licensing and co-development research collaborations, and copies of the U.S. patent applications listed below may be obtained by contacting: Attn. Invention Development and Marketing Unit, Technology Transfer Center, National Cancer Institute, 9609 Medical Center Drive, Mail Stop 9702, Rockville, MD 20850–9702, Tel. 240–276–5515 or email *ncitechtransfer@mail.nih.gov.* A signed Confidential Disclosure Agreement may be required to receive copies of the patent applications.

SUPPLEMENTARY INFORMATION: Technology description follows.

Title of invention: Methods of Making and Using Dopamine D3 Receptor Selective Antagonists/Partial Agonists

Summary of Technology: A library of novel compounds that selectively bind the dopamine D_3 receptor have been designed and characterized extensively. *In vivo* rodent studies indicate selected lead molecules may be useful to treat drug addiction/dependence.

Description of Technology: Dopamine is a major neurotransmitter in the central nervous system and among other functions is directly related to the rewarding effects of drugs of abuse. Dopamine signaling is mediated by D_1, D_2, D_3, D_4 and D_5 receptors. The dopamine D_3 receptor is a known target to treat a variety of neuropsychiatric disorders, including substance use disorders (*e.g.* cocaine and opioid), schizophrenia and depression. Despite extensive efforts, it has proven difficult to identify a lead molecule that selectively binds to D_3 receptors (versus D_2 receptors, for example), with the desired pharmacological and pharmacokinetic profile. For example, metabolic instability or predicted toxicity has precluded successful translation of previously reported D_3R-selective antagonists to clinical use for cocaine abuse.

The library of compounds is designed to have high affinity and specificity for the dopamine D_3 receptor. Preliminary studies at National Institute of Drug Abuse (NIDA) indicate that selected lead compounds have promising *in vivo* activity in rodents, including reduced acquisition to self-administration of oxycodone, inhibition of reinstatement to oxycodone seeking, and ameliorating naloxone-precipitated withdrawal from oxycodone dependence.

This invention is owned by an agency of the U.S. Government and is available for licensing and/or co-development in the U.S., in accordance with 35 U.S.C. 209 and 37 CFR part 404, to achieve expeditious commercialization of results of federally-funded research and development. Foreign patent applications are filed on selected inventions to extend market coverage for companies and may also be available for licensing and/or co-development.

Potential Commercial Applications:

- Treatment of Opioid Use Disorders
- Treatment of Schizophrenia
- Treatment of Bipolar Disorder
- Treatment of cannabis (Tetrahydrocannabinol, THC) dependence

Value Proposition: Despite extensive efforts to develop D_3 receptor-selective compounds, it has proven difficult to identify a ligand with the desired pharmacological and pharmacokinetic profile for translation to the clinic. The D_3 receptor ligands described herein may be useful to treat a variety of diseases, including opioid use disorders and schizophrenia.

Development Stage: Pre-clinical (in vivo validation).

Inventor(s): Amy Newman and Vivek Kumar (NIDA).

Intellectual Property: E–053–2016 United States Provisional Patent Application No. 62/307,600, filed March 14, 2016, titled ''Dopamine D3 Receptor Selective Antagonists/Partial Agonists; Methods of Making and Use Thereof''.

Publications: J Med Chem. 2016 Aug 25;59(16):7634–50. doi: 10.1021/acs.jmedchem.6b00860. Epub 2016 Aug 10.

Collaboration Opportunity: Researchers at the NIDA seek licensing and/or co-development research collaborations for development of Dopamine D3 ligands to treat opioid use disorders.

Contact Information: Requests for copies of the patent application or inquiries about licensing, research collaborations, and co-development opportunities should be sent to John D. Hewes, Ph.D., email: *john.hewes@nih.gov.*

Dated: November 10, 2016.

John D. Hewes,

Technology Transfer Specialist, Technology Transfer Center, National Cancer Institute.

BILLING CODE 4140–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Submission for OMB Review; 30-Day Comment Request: A National Survey of Nurse Coaches (NIH Clinical Center)

AGENCY: National Institutes of Health.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995, the National Institutes of Health (NIH) has submitted to the Office of Management and Budget (OMB) a request for review and approval of the information collection listed below. This proposed information collection was previously published in the **Federal Register** on August 22, 2016, pages 56668–9 (81 FR 56668) and allowed 60-days for public comment. No public comments were received. The purpose of this notice is to allow an additional 30 days for public comment.

DATES: Comments regarding this information collection are best assured of having their full effect if received by December 19, 2016.

ADDRESSES: Written comments and/or suggestions regarding the item(s) contained in this notice, especially regarding the estimated public burden and associated response time, should be directed to the: Office of Management and Budget, Office of Regulatory Affairs, *OIRA_submission@omb.eop.gov* or by fax to 202–395–6974, Attention: Desk Officer for NIH.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the data collection plans and instruments, contact: Dr. Alyson Ross, Nurse Researcher, Department of Nursing Research and Translational Science, NIH Clinical Center, Building 10, Room 2B07, MSC–1151, Bethesda, Maryland, 20892 or call non-toll-free number (301) 451–8338 or Email your request, including your address to: *Alyson.ross@nih.gov.* Formal requests for additional plans and instruments must be requested in writing.

SUPPLEMENTARY INFORMATION: The NIH Clinical Center, National Institutes of Health, may not conduct or sponsor, and the respondent is not required to respond to, an information collection that has been extended, revised, or implemented on or after October 1, 1995, unless it displays a currently valid OMB control number.

In compliance with Section 3507(a)(1)(D) of the Paperwork Reduction Act of 1995, the National Institutes of Health (NIH) has submitted to the Office of Management and Budget (OMB) a request for review and approval of the information collection listed below.

Proposed Collection: A National Survey of Nurse Coaches, 0925–NEW, National Institutes of Health Clinical Center (NIHCC), National Institutes of Health (NIH).

Need and Use of Information Collection: The purpose of this survey is to describe the role of Certified Nurse Coaches in order to gain insight into their clinical practice including: The settings in which they work, the types of clients/health conditions they see, the types of client records maintained and outcomes followed, as well as the personal benefits experienced by nurse coaches as a result of becoming a nurse coach. It provides information regarding two areas of interest to the Department of Nursing Research and Translational Science: The collection of patient-reported outcomes in novel clinical practice areas and the physical and psychosocial benefits of an intervention in nurses, a professional caregiver population. This study will provide preliminary data and guidance in: (1) Developing recommendations for collecting outcomes to longitudinally assess the effectiveness nurse coaching, and (2) developing an intervention to improve patient care and patient satisfaction targeting the nursing staff at the NIH Clinical Center.

OMB approval is requested for 1 year. There are no costs to respondents other than their time. The total estimated annualized burden hours are 104.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondent	Number of respondents	Number of responses per respondent	Average time per response (in hours)	Total annual burden hours
Certified Nurse Coaches	250	1	25/60	104
Total	250	250	....	104

Dated: November 9, 2016.

Laura M. Lee,

Project Clearance Liaison, NIH Clinical Center, National Institutes of Health.

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

[Docket No. USCG–2016–0965]

Certificate of Alternative Compliance for the TUG MAXWELL PAUL MORAN

AGENCY: Coast Guard, DHS.

ACTION: Notice.

SUMMARY: The Coast Guard announces that the First District Prevention Department's Inspections and Investigations Division has issued a Certificate of Alternate Compliance (COAC) from the International Regulations for Preventing Collisions at Sea, 1972 (72 COLREGS) for the TUG MAXWELL PAUL MORAN as required by statue. Due to its operations as a harbor assistance and escort vessel it cannot fully comply with the sidelight, stern light, and towing light provisions of the 72 COLREGS without interfering with its ability to make up and assist other vessels. This notice promotes the Coast Guard's maritime safety and stewardship missions.

ADDRESSES: Documents mentioned in the preamble are part of docket USCG–2016–0965. To view documents mentioned in this preamble as being available in the docket, go to the Federal eRulemaking Portal at *http://www.regulations.gov,* type the docket number in the ''SEARCH'' box and click ''SEARCH.'' Click on Open Docket Folder on the line associate with this notice.

FOR FURTHER INFORMATION CONTACT: For information or questions about this notice call or email Mr. Kevin Miller, First District Towing Vessel/Barge Safety Specialist, U.S. Coast Guard; telephone (617) 223–8272, email <*Kevin.L.Miller2@uscg.mil*>.

SUPPLEMENTARY INFORMATION:

The United States is signatory to the International Maritime Organization's International Regulations for Preventing Collisions at Sea, 1972 (72 COLREGS), as amended. The special construction or purpose of some vessels makes them unable to comply with the light, shape, and sound signal provisions of the 72 COLREGS. Under statutory law [1] and Coast Guard regulation,[2] a vessel may instead meet alternative requirements and the vessel's owner, builder, operator, or agent may apply for a COAC. For vessels of special construction, the cognizant Coast Guard District Office determines whether the vessel for which the COAC is sought complies as closely as possible with the 72 COLREGS, and decides whether to issue the COAC. Once issued, a COAC remains valid until information supplied in the COAC application or the COAC terms become inapplicable to the vessel. Under the governing statute [3] and regulation,[4] the Coast Guard must publish notice of this action.

The Prevention Department's Inspection and Investigation Division, U.S. Coast Guard First District hereby finds and certifies that the TUG MAXWELL PAUL MORAN is a vessel of special construction or purpose, and that, with respect to the position of the

[1] 33 U.S.C. 1605(c).

[2] 33 CFR 81.3.

[3] 33 U.S.C. 1605(c).

[4] 33 CFR 81.18.

navigation and towing lights, it is not possible to comply fully with the requirements of the provisions enumerated in the 72 COLREGS, without interfering with the normal operation of the vessel. The Prevention Department's Inspection and Investigation Division, U.S. Coast Guard First District further finds and certifies that the sidelights (13′ 5.25″ from the vessel's side mounted on the pilot house) and stern/towing lights (3′ 5.75″ aft of frame 20 mounted on top of the pilot house) are in the closet possible compliance with the applicable provisions of the 72 COLREGS and that full compliance with the 72 COLREGS would not significantly enhance the safety of the vessel's operation.

This notice is issued under authority of 33 U.S.C. 1605(c) and 33 CFR 81.

Dated: November 3, 2016.

B.L. Black,

Captain, Chief, Prevention Department, First District, U.S. Coast Guard.

BILLING CODE 9110–04–P

DEPARTMENT OF HOMELAND SECURITY

Customs and Border Protection

[1651–0027]

Agency Information Collection Activities: Record of Vessel Foreign Repair or Equipment Purchase

AGENCY: U.S. Customs and Border Protection, Department of Homeland Security.

ACTION: 30-Day notice and request for comments; extension of an existing collection of information.

SUMMARY: U.S. Customs and Border Protection (CBP) of the Department of Homeland Security will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act: Record of Vessel Foreign Repair or Equipment Purchase (CBP Form 226). CBP is proposing that this information collection be extended with no change to the burden hours or to the information collected. This document is published to obtain comments from the public and affected agencies.

DATES: Written comments should be received on or before December 19, 2016 to be assured of consideration.

ADDRESSES: Interested persons are invited to submit written comments on this proposed information collection to the Office of Information and Regulatory Affairs, Office of Management and Budget. Comments should be addressed to the OMB Desk Officer for Customs and Border Protection, Department of Homeland Security, and sent via electronic mail to *oira_submission@omb.eop.gov* or faxed to (202) 395–5806.

FOR FURTHER INFORMATION CONTACT: Requests for additional information should be directed to Paperwork Reduction Act Officer, U.S. Customs and Border Protection, Regulations and Rulings, Office of Trade, 90 K Street NE., 10th Floor, Washington, DC 20229–1177, or via email (*CBP_PRA@cbp.dhs.gov*). Please note contact information provided here is solely for questions regarding this notice. Individuals seeking information about other CBP programs please contact the CBP National Customer Service Center at 877–227–5511, (TTY) 1–800–877–8339, or CBP Web site at *https://www.cbp.gov/*. For additional help: *https://help.cbp.gov/app/home/search/1*.

SUPPLEMENTARY INFORMATION: This proposed information collection was previously published in the **Federal Register** (81 FR 51459) on August 4, 2016, allowing for a 60-day comment period. This notice allows for an additional 30 days for public comments. This process is conducted in accordance with 5 CFR 1320.10. CBP invites the general public and other Federal agencies to comment on proposed and/or continuing information collections pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3507). The comments should address: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimates of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden, including the use of automated collection techniques or the use of other forms of information technology; and (e) the annual costs to respondents or record keepers from the collection of information (total capital/startup costs and operations and maintenance costs). The comments that are submitted will be summarized and included in the CBP request for OMB approval. All comments will become a matter of public record. In this document, CBP is soliciting comments concerning the following information collection:

Title: Record of Vessel Foreign Repair or Equipment Purchase.

OMB Number: 1651–0027.

Form Number: CBP Form 226.

Abstract: 19 U.S.C. 1466(a) provides for a 50 percent *ad valorem* duty assessed on a vessel master or owner for any repairs, purchases, or expenses incurred in a foreign country by a commercial vessel registered in the United States. CBP Form 226, Record of Vessel Foreign Repair or Equipment Purchase, is used by the master or owner of a vessel to declare and file entry on equipment, repairs, parts, or materials purchased for the vessel in a foreign country. This information enables CBP to assess duties on these foreign repairs, parts, or materials. CBP Form 226 is provided for by 19 CFR 4.7 and 4.14 and is accessible at: *https://www.cbp.gov/document/forms/form-226-record-vessel-foreign-repair-or-equipment-purchase*.

Current Actions: This submission is being made to extend the expiration date with no change to the burden hours or to the information collected on Form 226.

Type of Review: Extension (without change).

Affected Public: Businesses.

Estimated Number of Respondents: 100.

Estimated Number of Responses per Respondent: 11.

Estimated Number of Total Annual Responses: 1,100.

Estimated Time per Response: 2 hours.

Estimated Total Annual Burden Hours: 2,200.

Dated: November 14, 2016.

Seth Renkema,

Branch Chief, Economic Impact Analysis Branch, U.S. Customs and Border Protection.

BILLING CODE 9111–14–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–5907–N–47]

Federal Property Suitable as Facilities To Assist the Homeless

AGENCY: Office of the Assistant Secretary for Community Planning and Development, HUD.

ACTION: Notice.

SUMMARY: This Notice identifies unutilized, underutilized, excess, and surplus Federal property reviewed by HUD for suitability for use to assist the homeless.

FOR FURTHER INFORMATION CONTACT: Juanita Perry, Department of Housing and Urban Development, 451 Seventh Street SW., Room 7266, Washington, DC

20410; telephone (202) 402–3970; TTY number for the hearing- and speech-impaired (202) 708–2565 (these telephone numbers are not toll-free), call the toll-free Title V information line at 800–927–7588 or send an email to *title5@hud.gov*.

SUPPLEMENTARY INFORMATION: In accordance with 24 CFR part 581 and section 501 of the Stewart B. McKinney Homeless Assistance Act (42 U.S.C. 11411), as amended, HUD is publishing this Notice to identify Federal buildings and other real property that HUD has reviewed for suitability for use to assist the homeless. The properties were reviewed using information provided to HUD by Federal landholding agencies regarding unutilized and underutilized buildings and real property controlled by such agencies or by GSA regarding its inventory of excess or surplus Federal property. This Notice is also published in order to comply with the December 12, 1988 Court Order in *National Coalition for the Homeless* v. *Veterans Administration,* No. 88–2503–OG (D.D.C.).

Properties reviewed are listed in this Notice according to the following categories: Suitable/available, suitable/unavailable, and suitable/to be excess, and unsuitable. The properties listed in the three suitable categories have been reviewed by the landholding agencies, and each agency has transmitted to HUD: (1) Its intention to make the property available for use to assist the homeless, (2) its intention to declare the property excess to the agency's needs, or (3) a statement of the reasons that the property cannot be declared excess or made available for use as facilities to assist the homeless.

Properties listed as suitable/available will be available exclusively for homeless use for a period of 60 days from the date of this Notice. Where property is described as for ''off-site use only'' recipients of the property will be required to relocate the building to their own site at their own expense. Homeless assistance providers interested in any such property should send a written expression of interest to HHS, addressed to: Ms. Theresa M. Ritta, Chief Real Property Branch, the Department of Health and Human Services, Room 12–07, Parklawn Building, 5600 Fishers Lane, Rockville, MD 20857, (301) -443–2265 (This is not a toll-free number.) HHS will mail to the interested provider an application packet, which will include instructions for completing the application. In order to maximize the opportunity to utilize a suitable property, providers should submit their written expressions of interest as soon as possible. For complete details concerning the processing of applications, the reader is encouraged to refer to the interim rule governing this program, 24 CFR part 581.

For properties listed as suitable/to be excess, that property may, if subsequently accepted as excess by GSA, be made available for use by the homeless in accordance with applicable law, subject to screening for other Federal use. At the appropriate time, HUD will publish the property in a Notice showing it as either suitable/available or suitable/unavailable.

For properties listed as suitable/unavailable, the landholding agency has decided that the property cannot be declared excess or made available for use to assist the homeless, and the property will not be available.

Properties listed as unsuitable will not be made available for any other purpose for 20 days from the date of this Notice. Homeless assistance providers interested in a review by HUD of the determination of unsuitability should call the toll free information line at 1–800–927–7588 or send an email to *title5@hud.gov* for detailed instructions, or write a letter to Ann Marie Oliva at the address listed at the beginning of this Notice. Included in the request for review should be the property address (including zip code), the date of publication in the **Federal Register**, the landholding agency, and the property number.

For more information regarding particular properties identified in this Notice (*e.g.,* acreage, floor plan, condition of property, existing sanitary facilities, exact street address), providers should contact the appropriate landholding agencies at the following address(es): AGRICULTURE: Ms. Debra Kerr, Department of Agriculture, OPPM, Property Management Division, Agriculture South Building, 300 7th Street SW., Washington, DC 20024, (202) 720–8873; COE: Ms. Brenda Johnson-Turner, HQUSACE/CEMP–CR, 441 G Street NW., Washington, DC 20314, (202) 761–7238; ENERGY: Mr. David Steinau, Department of Energy, Office of Asset Management (MA–50), 1000 Independence Ave. SW., Washington, DC 20585, (202) 287–1503; GSA: Mr. Flavio Peres, General Services Administration, Office of Real Property Utilization and Disposal, 1800 F Street NW., Room 7040, Washington, DC 20405, (202) 501–0084; NASA: Mr. William Brodt, National Aeronautics AND Space Administration, 300 E Street SW., Room 2P85, Washington, DC 20546, (202) 358–1117; NAVY: Ms. Nikki Hunt, Department of the Navy, Asset Management Division, Naval Facilities Engineering Command, Washington Navy Yard, 1330 Patterson Ave. SW., Suite 1000, Washington, DC 20374; (202) 685–9426 (These are not toll-free numbers).

Dated: November 10, 2016.

Brian P. Fitzmaurice,

Director, Division of Community Assistance, Office of Special Needs Assistance Programs.

Incidental Take Permit Applications for Alabama Beach Mouse; Gulf Shores, Alabama

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability; request for comments.

SUMMARY: Under the Endangered Species Act, we, the U.S. Fish and Wildlife Service, announce the receipt and availability of three proposed low-effect habitat conservation plans and accompanying incidental take permit applications for take of Alabama beach mouse habitat incidental to construction in Orange Beach and Gulf Shores, Alabama. We invite public comments on these documents.

DATES: We must receive any written comments at our Alabama Field Office (see **ADDRESSES**) on or before December 19, 2016.

ADDRESSES: *Obtaining Documents:* Documents are available for public inspection by appointment during normal business hours at the Fish and Wildlife Service's Alabama Field Office, 1208–B Main Street, Daphne, AL 36526. Please submit comments by U.S. mail to the Fish and Wildlife Service's Alabama Field Office.

Submitting Comments: For information on how to submit comments, see Public Comments under **SUPPLEMENTARY INFORMATION**, below.

FOR FURTHER INFORMATION CONTACT: Mr. Bill Lynn, Wildlife Biologist, Alabama Field Office (see **ADDRESSES**); telephone: 251–441–5868.

SUPPLEMENTARY INFORMATION:

Introduction

We announce the availability of three proposed low-effect habitat conservation plans (HCPs), which analyze the take of the Alabama beach mouse (*Peromyscus polionotus ammobates*) (ABM) incidental to construction of one single-family home by Charles L. Jones on a 0.779-acre lot in Orange Beach, Alabama, and construction of two single-family homes by Duane A. Baker and Joe Colich on two 0.68-acre lots in Gulf Shores, Alabama. The applicants request incidental take permits (ITP) under section 10(a)(1)(B) of the Endangered Species Act (Act; 16 U.S.C. 1531 *et seq.*). If we approve these three ITPs, Charles L. Jones anticipates the taking of up to 0.11 acres of ABM habitat over a 50-year ITP, and Duane Baker and Joe Colich anticipate the taking of up to 0.10 acres on each lot of ABM habitat over a 50-year ITP.

Applicants' Proposals

Charles L. Jones

The applicant proposes to minimize and mitigate the take of up to 0.11 acres of ABM habitat at a lot off Highway 182 in Orange Beach, Alabama, by using standard ABM conservation measures at the proposed development and by donating an ''in-lieu'' fee to the Alabama Coastal Heritage Trust (ACHT) group (ACHT). The lot proposed for development currently is undeveloped, but developers will utilize an existing driveway to minimize impacts. The ''in-lieu'' fee will be donated to the ACHT group, which will use the fee to either manage, maintain, or acquire ABM habitat within the Gulf State Park critical habitat unit and/or immediately adjacent lands.

Baker-Colich

The applicants propose to minimize and mitigate the take of up to 0.20 acres of ABM habitat at two lots off Dacus Lane in Gulf Shores, Alabama, by using standard ABM conservation measures at the proposed development (such as minimizing construction footprint, restoration of native vegetation, and measures to minimize effects to ABM during occupancy and use of the development) and by donating a 0.14-acre lot in the proposed Gulf Highlands conservation area of the Fort Morgan Peninsula. The lots proposed for development are interior scrub lots that are part of a subdivided larger lot. The lot proposed for mitigation is within the proposed Gulf Highlands conservation area, contains high-quality interior scrub habitat, and will be donated to ACHT. ACHT will either place a conservation easement on the lot or eventually convey it as part of the future Gulf Highlands Conservation Area.

Our Preliminary Determination

We have made a preliminary determination that the applicants' projects, including the mitigation measures, will individually and cumulatively have a minor or negligible effect on the species covered in the HCPs. Therefore, our proposed issuance of the requested ITPs qualifies as a categorical exclusion under the National Environmental Policy Act (NEPA), as provided by Department of the Interior implementing regulations in part 46 of title 43 of the Code of Federal Regulations (516 DM 8.5C(1)).

We base our determination that issuance of each ITP qualifies as a low-effect action on the following three criteria: (1) Implementation of the project would result in minor or negligible effects on federally listed, proposed, and candidate species and their habitats; (2) implementation of the project would result in minor or negligible effects on other environmental values or resources; and (3) impacts of the plan, considered together with the impacts of other past, present, and reasonably foreseeable similarly situated projects, would not result, over time, in cumulative effects to environmental values or resources that would be considered significant. As more fully explained in our environmental action statement and associated Low-Effect Screening Form, the applicants' proposed projects qualify as ''low-effect'' projects. This preliminary determination may be revised based on our review of public comments that we receive in response to this notice.

Public Comments

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

If you wish to comment, you may submit comments by any one of several methods. Please reference TE11097C–0 (Charles L. Jones), or TE11183C–0 (Duane A. Baker) and TE11182C–0 (Joe Colich) in such comments. You may mail comments to the Fish and Wildlife Service's Alabama Field Office (see **ADDRESSES**). Alternately, you may email comments to: *william_lynn@fws.gov*. Please include your name and return address in your email message. If you do not receive a confirmation from us that we have received your email message, contact us directly at the telephone number listed under **FOR FURTHER INFORMATION CONTACT**. Finally, you may hand-deliver comments to the Service's Alabama Field Office (see **ADDRESSES**).

Covered Area

The area encompassed by the HCPs and applications is the 0.779-acre lot located at 22756 Perdido Beach Boulevard, in Orange Beach, Alabama and the two 0.68-acre lots located off Dacus Lane, in Gulf Shores, Alabama.

Next Steps

We will evaluate the ITP applications, including the HCPs and any comments we receive, to determine whether the applications meet the requirements of section 10(a)(1)(B) of the Act. We will also evaluate whether issuance of a section 10(a)(1)(B) ITP complies with section 7 of the Act by conducting an intra-Service section 7 consultation. We will use the results of this consultation, in combination with the above findings, in our final analysis to determine whether or not to issue the ITPs. If we determine that the requirements are met, we will issue the ITPs for the incidental take of ABM habitat.

Authority

We provide this notice under section 10 of the Act (16 U.S.C. 1531 *et seq.*) and NEPA regulations (40 CFR 1506.6).

Dated: November 14, 2016.

William J. Pearson,

Field Supervisor, Alabama Ecological Services Field Office.

BILLING CODE 4333–15–P

DEPARTMENT OF THE INTERIOR

Invasive Species Advisory Committee; Meeting

AGENCY: Office of the Secretary, Interior.

ACTION: Notice of public meetings of the Invasive Species Advisory Committee.

SUMMARY: Pursuant to the provisions of the Federal Advisory Committee Act, notice is hereby given of meetings of the Invasive Species Advisory Committee (ISAC). Comprised of 25 nonfederal invasive species experts and stakeholders from across the nation, the purpose of the Advisory Committee is to provide advice to the National Invasive Species Council, as authorized by Executive Order 13112, on a broad array of issues related to preventing the introduction of invasive species and providing for their eradication and

control. The Council is co-chaired by the Secretary of the Interior, the Secretary of Agriculture, and the Secretary of Commerce. The duty of the Council is to provide national leadership regarding invasive species issues.

Purpose of Meeting: To convene the full ISAC and to provide expert input and recommendations to NISC federal agencies and their partners on invasive species matters of national importance. While in session, ISAC will continue work on NISC priority initiatives through subcommittees (task teams) focused on: (a) Strengthening Federal/State coordination; (b) strengthening Federal/Tribal coordination; (c) identifying risks and opportunities for the application of advanced biotechnologies for the eradication or control of invasive species; (d) compiling case studies of invasive species that impact infrastructure; and, (e) compiling case studies of invasive species that impact wildlife health. Two additional task teams will be tentatively instituted to explore managed relocation policy and practice from an invasive species perspective, as well as the movement of watercraft. The meeting agenda is available on the NISC Web site at *http://www.invasivespecies.gov.* Supplemental reference materials will be posted on or about Tuesday, November 22, 2016.

DATES: Meeting of the Invasive Species Advisory Committee: Tuesday, December 6, 2016: 8:30 a.m. to 5:00 p.m.; Wednesday, December 7, 2016: 8:30 a.m. to 5:30 p.m.; Thursday, December 8, 2016; 8:00 a.m.–12:00 p.m.

ADDRESSES: Smithsonian Institution National Museum of the American Indian, 4th and Independence Avenue SW., Washington, DC 20560. The general session will be held in the Conference Center (4th Floor). **Note:** All meeting participants and interested members of the public must register their attendance online at *https://goo.gl/forms/K1kYHgeuqf15zAik2.* Attendees must pass through security screening upon entering the facility.

FOR FURTHER INFORMATION CONTACT: Kelsey Brantley, National Invasive Species Council Program Specialist and ISAC Coordinator, Phone: (202) 208–4122; Fax: (202) 208–4118, email: *Kelsey_Brantley@ios.doi.gov.*

Dated: November 14, 2016.

Jamie K. Reaser,

Executive Director, National Invasive Species Council (NISC) Secretariat.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[LLOR957000–L63100000–BJ0000–17XL1109AF: HAG 17–0034]

Filing of Plats of Survey: Oregon/Washington

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The plats of survey of the following described lands are scheduled to be officially filed in the Bureau of Land Management, Oregon State Office, Portland, Oregon, 30 days from the date of this publication.

Willamette Meridian, Oregon

Tps. 23 & 24 S., R. 1 W., accepted October 14, 2016.

ADDRESSES: A copy of the plats may be obtained from the Public Room at the Bureau of Land Management, Oregon State Office, 1220 SW. 3rd Avenue, Portland, Oregon 97204, upon required payment.

FOR FURTHER INFORMATION CONTACT: Kyle Hensley, (503) 808–6124, Branch of Geographic Sciences, Bureau of Land Management, 1220 SW. 3rd Avenue, Portland, Oregon 97204. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Relay Service at 1–800–877–8339 to contact the above individual during normal business hours. The service is available 24 hours a day, 7 days a week, to leave a message or question with the above individual. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: A person or party who wishes to protest against this survey must file a written notice with the Oregon State Director, Bureau of Land Management, stating that they wish to protest. A statement of reasons for a protest may be filed with the notice of protest and must be filed with the Oregon State Director within thirty days after the protest is filed. If a protest against the survey is received prior to the date of official filing, the filing will be stayed pending consideration of the protest. A plat will not be officially filed until the day after all protests have been dismissed or otherwise resolved. Before including your address, phone number, email address, or other personally identifying information in your comment, you should be aware that your entire comment—including your personally identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personally identifying information from public review, we cannot guarantee that we will be able to do so.

Mary J.M. Hartel,

Chief Cadastral Surveyor of Oregon/Washington.

Notice of Proposed Withdrawal and Notice of Public Meeting; California

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: On behalf of the National Park Service (NPS) and subject to valid existing rights, the Secretary of the Interior proposes to withdraw approximately 22,462 acres of public lands for 20 years from all forms of entry, appropriation, or disposal under the public land laws; from location, entry, and patent under the United States mining laws; and from disposition under all laws pertaining to mineral and geothermal leasing, and mineral materials, and all amendments thereto and to transfer administrative jurisdiction over such lands from the Bureau of Land Management (BLM) to the NPS for administration as part of Joshua Tree National Park (JTNP). This notice temporarily segregates the lands for up to 2 years, gives the public an opportunity to comment on the proposed withdrawal application, and announces the date and time of a public meeting.

DATES: Comments must be received by February 16, 2017. A public meeting on the proposed withdrawal will be held on January 18, 2017 from 6:00 to 9:00 p.m. at UC Riverside Palm Desert, 75080 Frank Sinatra Drive, Palm Desert, California 92211.

ADDRESSES: Comments should be sent to the Superintendent, Joshua Tree National Park, 74485 National Park Drive, Twentynine Palms, California 92277.

FOR FURTHER INFORMATION CONTACT: David Smith, Superintendent, Joshua Tree National Park, 760–367–5502 or Doug Herrema, Field Manager, Bureau of Land Management, Palm Springs South Coast Field Office, 760–833–7100. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Relay

Service at 800–877–8339 to contact either of the above individuals. The Service is available 24 hours a day, 7-days a week, to leave a message or question with either of the above individuals. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: The applicant is the NPS and its petition/application requests that the Secretary of the Interior: (i) Withdraw, subject to valid existing rights, the following public lands adjacent to JTNP from all forms of entry, appropriation, or disposal under the public land laws; from location, entry, and patent under the United States mining laws; and from disposition under all laws pertaining to mineral and geothermal leasing, and mineral materials, and all amendments thereto; and, (ii) transfer jurisdiction over such lands to the NPS for administration as part of JTNP.

All that land situated within the Eagle Mountain Area Segregation boundary, located in Townships 3 and 4 South, Ranges 13, 14, and 15 East, San Bernardino Meridian, Riverside County, California; said boundary more particularly described as follows:

Commencing at the corner of sections 16, 17, 20, and 21 in T. 3 S., R. 15 E., San Bernardino Meridian, on the Joshua Tree National Park Boundary;

Thence, westerly on the line between sections 17 and 20, coincident with said Park boundary, to the ¼ section corner of sections 17 and 20, said corner being the Point Of Beginning;

Thence, leaving said Park boundary, southerly on the north-south centerline of section 20, to the center ¼ section corner;

Thence, westerly on the east-west centerline of section 20, to the ¼ section corner of sections 19 and 20;

Thence, southerly on the line between sections 19 and 20, to the corner of sections 19, 20, 29 and 30;

Thence, westerly on the line between sections 19 and 30, to the ¼ section corner of sections 19 and 30;

Thence, southerly on the north-south centerline of section 30, to the center ¼ section corner;

Thence, westerly on the east-west centerline of section 30, to the center west 1/16 section corner;

Thence, southerly on the north-south centerline of the southwest ¼ of section 30, to the southwest 1/16 section corner;

Thence, westerly on the east-west centerline of the southwest ¼ of section 30, to the south 1/16 section corner of section 30 only, on the range line between Tp. 3 S., Rs. 14 and 15 E.;

Thence, southerly on said range line, to the corner of sections 30 and 31 only, Tp. 3 S., R. 15 E.;

Thence, along the following 19 courses as shown on the map recorded January 4, 1998 in Records of Survey, book 103, pages 76 thru 80, Riverside County, California:

1. North 89°56′01″ East on the line between sections 30 and 31, a distance of 1426.96 feet, to a ¾″ rebar with a 2″ aluminum cap stamped ''R.C.E. 30846'', at the west 1/16 section corner of sections 30 and 31;
2. South 0°50′38″ West on the north-south centerline of the northwest ¼ of section 31, a distance of 272.58 feet, to a ¾″ rebar with a 2″ aluminum cap stamped ''R.C.E. 30846'';
3. South 82°58′51″ West, a distance of 162.64 feet, to a 2½″ diameter stainless steel post with a brass cap marked ''T3S R15E AP8 S31 MWD 1991'';
4. South 50°34′58″ East, a distance of 206.07 feet, to a ¾″ rebar, with a 2″ aluminum cap, stamped ''R.C.E. 30846'', at the point of intersection with the north-south centerline of the northwest ¼ of section 31;
5. South 0°50′38″ West on the north-south centerline of the northwest ¼ of section 31, a distance of 906.11 feet, to a ¾″ rebar, with a 2″ aluminum cap, stamped ''R.C.E. 30846'', at the northwest 1/16 section corner;
6. North 89°52′22″ East on the east-west centerline of the northwest ¼ of section 31, a distance of 1112.67 feet, to a 2½″ diameter stainless steel post with a brass cap marked ''T3S R15E S31 MWD N–N 1991'';
7. South 50°35′17″ East, a distance of 501.65 feet, to a 2½″ diameter stainless steel post with a brass cap marked ''T3S R15E AP4 S31 MWD 1991'', being the beginning of a non-tangent curve concave easterly, having a radius of 825.0 feet, to which beginning of curve a radial line bears South 89°13′53″ West;
8. Southerly along said curve through a central angle of 3°58′07″, a distance of 57.14 feet, to a 2½″ diameter stainless steel post with a brass cap marked ''T3S R15E AP3 S31 MWD 1991'';
9. South 4°44′14″ East, a distance of 954.13 feet, to a 2½″ diameter stainless steel post with a brass cap marked ''T3S R15E S31 MWD C–C 1991'', at the point of intersection with the east-west centerline of section 31;
10. South 89°47′42″ West on the east-west centerline of section 31, a distance of 268.59 feet, to a 2½″ diameter stainless steel post with a brass cap marked ''T3S R15E C ¼ S31 1991'', at the center ¼ section corner;
11. Continuing South 89°47′42″ West on the east-west centerline of section 31, a distance of 666.27 feet, to a 2½″ diameter stainless steel post with a brass cap marked ''T3S R15E S31 CEW 1/64 1991'', at the center east west 1/64 section corner;
12. South 0°49′44″ West on the north-south centerline of the northeast ¼ of the southwest ¼ of section 31, a distance of 1329.96 feet, to a 2½″ diameter stainless steel post with a brass cap erroneously marked ''T3S R15E S31 CE SE 1/64 1991'', at the center east southwest 1/64 section corner;
13. North 89°45′56″ East on the east-west centerline of the southwest ¼ of section 31, a distance of 665.4 feet, to a 2½″ diameter stainless steel post with a brass cap marked ''T3S R15E S 1/16 C–C S31 1991'', at the center south 1/16 section corner;
14. North 89°44′23″ East on the east-west centerline of the southeast ¼ of section 31, a distance of 398.72 feet, to a 2½″ diameter stainless steel post with a brass cap marked ''T3S R15E MWD S–S S31 1991'';
15. South 4°43′20″ East, a distance of 356.97 feet, to a 2½″ diameter stainless steel post with a brass cap marked ''T3S R15E AP2 S31 MWD 1991'';
16. South 12°45′10″ East, a distance of 892.3 feet, to a 2½″ diameter stainless steel post with a brass cap marked ''T3S R15E AP1 S31 MWD 1991'';
17. South 5°52′24″ East, crossing the township line between Tps. 3 and 4 S., R. 15 E., a distance of 2621.95 feet, to a 2½″ diameter stainless steel post with a brass cap marked ''T4S R15E AP2 S6 MWD 1991'' in section 6, Tp. 4 S., R. 15 E.;
18. South 2°12′31″ East, crossing the east-west centerline of section 6, a distance of 1467.27 feet, to a 2½″ diameter stainless steel post with a brass cap marked ''T4S R15E AP1 S6 MWD 1991'';
19. South 14°34′05″ West, on the line between a 2½″ diameter stainless steel post with a brass cap marked ''T4S R15E AP1 S6 MWD 1991'' and a 2½″ diameter stainless steel post with a brass cap marked ''T4S R15E AP3 S7 MWD 1991'', a distance of 1292.87 feet, to a ¾″ rebar, with a 2″ aluminum cap, stamped ''R.C.E. 30846'', at the point of intersection with the line between sections 6 and 7, from which a 2″ I.P. with partially illegible 2″ bronze tablet stamped ''T4S R15E ¼ S6 S7 L.S. 4339'' bears North 88°38′08″ West a distance of 765.31 feet, and a 2½″ diameter stainless steel post with a brass cap marked ''E 1/16 S6 S7 1991'' bears South 88°38′08″ East a distance of 555.26 feet;

Thence, along the following 8 courses as shown on the map recorded January 20, 1994 in Records of Survey, book 95, pages 97 thru 105, Riverside County, California, having a new basis of bearing:

1. Continuing on the line between a 2½″ diameter stainless steel post with a brass cap marked ''T4S R15E AP1 S6 MWD 1991'' and a 2½″ diameter stainless steel post with a brass cap marked ''T4S R15E AP3 S7 MWD 1991'', South 14°09′14″ West, a distance of 392.44 feet, to the 2½″ diameter stainless steel post with a brass cap marked ''T4S R15E AP3 S7 MWD 1991'';
2. South 17°42′07″ West, a distance of 2113.85 feet, to the point of intersection with the north-south centerline of section 7;
3. Continuing South 17°42′07″ West, a distance of 133.81 feet, to a 2½″ diameter stainless steel post with a brass cap marked ''T4S R15E AP2 S7 MWD 1991'';
4. South 0°37′28″ West, a distance of 1808.72 feet, to a 2½″ diameter stainless steel post with a brass cap marked ''T4S R15E AP1 S7 MWD 1991'';

5. South 15°13′54″ West, a distance of 1078.45 feet, to a point of intersection with the line between sections 7 and 18, from which a 2½″ diameter stainless steel post with a brass cap marked ''T4S R15E ¼ S7 S18 1991'' bears North 88°07′45″ East, a distance of 376.92 feet;
6. South 88°07′45″ West on the line between sections 7 and 18, a distance of 933.31 feet, to a 2½″ diameter stainless steel post with a brass cap marked ''T4S R15E W 1/16 S7 S18 1991'', at the west 1/16 section corner of sections 7 and 18;
7. South 0°21′46'' West a distance of 5204.46 feet, to a 2'' I.P. with brass cap stamped ''T4S MWD R15E W 1/16 S18 S19 1992 L.S. 5113'', at the west 1/16 section corner of section 18 and partially unsurveyed section 19;
8. South 86°53′42'' West on the line between section 18 and partially unsurveyed section 19, a distance of 1399.76 feet, to a 2'' diameter iron post with a brass cap marked ''T4S T4S R14E S13 S18 S19 R15E 1956'', at the corner of section 18 and partially unsurveyed section 19 only, T. 4 S., R.15 E.;

Thence, southerly on the range line between partially unsurveyed section 19 and unsurveyed section 24, T. 4 S., Rs. 14 and 15 E., to the ¼ section corner of section 19 only, T. 4 S., R. 15 E.;

Thence, southerly on said range line, to the south south 1/64 section corner of unsurveyed section 24 only, T. 4 S., R. 15 E.;

Thence, westerly on the east-west centerline of the southeast ¼ of the southeast ¼ of unsurveyed section 24, to the center south southeast 1/64 section corner;

Thence, southerly on the north-south centerline of the southeast ¼ of unsurveyed section 24, to the east 1/16 section corner of unsurveyed sections 24 and 25;

Thence, westerly on the line between unsurveyed sections 24 and 25, to a point of intersection with the boundary of Joshua Tree National Park;

Thence, along the following 12 courses coincident with the Joshua Tree National Park boundary as specified in the final legal description of said National Park dated July 18, 1996:

1. Northwesterly, through unsurveyed section 24, to the corner of unsurveyed sections 13, 14, 23 and 24;
2. Northerly on the line between unsurveyed sections 13 and 14, to the corner of sections 11 and 12 and unsurveyed sections 13 and 14;
3. Westerly on the line between section 11 and unsurveyed section 14, to the corner of section 11 and unsurveyed sections 10, 14 and 15;
4. Northwesterly, through unsurveyed section 10, to the corner of unsurveyed sections 3, 4, 9 and 10;
5. Westerly on the line between unsurveyed sections 4 and 9, 5 and 8, and 6 and 7, Tp. 4 S., R. 14 E., and between unsurveyed sections 1 and 12 and 2 and 11, Tp. 4 S., R. 13 E., to the corner of unsurveyed sections 2, 3, 10, and 11;
7. Northwesterly, through unsurveyed section 3, to the ¼ section corner of unsurveyed sections 3 and 4;
8. Northerly between unsurveyed sections 3 and 4, T. 4 S., R. 13 E., and unsurveyed sections 33 and 34, T. 3 S., R. 13 E. to a point parallel with and 30 feet northerly of the centerline of Black Eagle Mine Road;
9. Westerly, changing to northerly, parallel with and 30 feet northerly, changing to easterly, of the centerline of said road following the northern fork towards Mystery Mine, the fork of these roads occurs very close to the section line between unsurveyed sections 33 and 34, to the intersection with the line between unsurveyed sections 16 and 21 on the old Joshua Tree National Monument boundary;
10. Easterly along the Old Joshua Tree National Monument boundary as depicted on the 1977 survey maps 156–41035A between unsurveyed sections 16 and 21, 15 and 22, 14 and 23, and 13 and 24, T. 3 S., R. 13 E., and between section 18 and unsurveyed section 19, section 20 and unsurveyed section 17, unsurveyed sections 16 and 21, 15 and 22, 14 and 23, and 13 and 24, T. 3 S., R. 14 E., to the corner of unsurveyed sections 13 and 24 only;
11. Northerly between section 19, T. 3 S., R. 15 E., and unsurveyed section 13, T. 3 S., R. 14 E., to the corner of section 19 and unsurveyed section 18 only;
12. Easterly between section 19 and unsurveyed section 18 and between sections 17 and 20, T. 3 S., R. 15 E., to the ¼ section corner of sections 17 and 20, said corner being the Point Of Beginning.

Excepting therefrom all privately owned or state school lands with the lands described above.

Said excepted parcels encompass 5,566 acres, more or less.

Also excepting therefrom all the land situated within the project boundary of FERC Project No. 13123 as described in Figure G–1- entitled ''Exhibit G-Project Boundary FERC Project No. 13123, Sheet 1, Eagle Mountain Pumped Storage, Eagle Mountain, California, Eagle Crest Energy Company,'' dated August 2014 within the sections described below:

T. 3 S., R. 14 E.,
Sections 26, 27, 28, 29, 32, 33, 34, 35, 36
T. 3 S., R. 15 E.,
Section 31
T. 4 S., R. 14 E.,
Sections 1, 2, 4, 11, 12
T. 4 S., R. 15 E.,
Section 6, 7, 18

Said excepted parcels encompass 627 acres, more or less.

The area described above contains approximately 22,462 acres in Riverside County. Records and maps relating to this application can be examined by interested parties at the following locations: NPS, Pacific West Region, 333 Bush Street, Suite 600, San Francisco, California 94104, and BLM, Palm Springs South Coast Field Office, 1201 Bird Center Drive, Palm Springs, California 92262.

The Deputy Secretary of the Interior approved the NPS's petition/application to withdraw the above-described lands. The Deputy Secretary's approval of the application constitutes his proposal to withdraw the subject lands and transfer administrative jurisdiction over them to the NPS for inclusion in and management as part of JTNP.

The purpose of the proposed withdrawal is to transfer administrative jurisdiction of the described public lands from the BLM to the NPS for administration as part of JTNP. These lands were included within the original boundary of the JTNM in 1936, but were removed from the JTNM in 1950 for iron ore development. Most of the lands within the proposed withdrawal boundary are untrammeled and retain the characteristics that led to their inclusion in the original boundary of the former JTNM. In particular, the area contains valuable habitat for desert species, including important habitat linkages for bighorn sheep, and provides landscape scale conservation opportunities.

If transferred, the lands would be included in an expanded national park boundary and administered as part of the JTNP in accordance with the NPS Organic Act and other applicable laws. The Secretary is authorized by 54 U.S.C. 100506(c)(1)(B) to acquire lands adjacent to units of the NPS by transfer from another Federal agency and to expand the park boundary accordingly.

The NPS is preparing a boundary study for JTNP that is related to the proposed withdrawal. The boundary study will explore whether it would be appropriate and feasible to transfer the segregated lands to JTNP and manage them for national park purposes. As part of that process, the NPS is preparing an environmental assessment under the National Environmental Policy Act that will serve as the environmental analysis of boundary alternatives and the proposed withdrawal. The NPS will coordinate public involvement in the boundary study process with public involvement in the proposed withdrawal process to the extent feasible.

The use of a right-of-way, interagency, or cooperative agreement, or surface management by the BLM instead of withdrawal may not adequately constrain nondiscretionary uses which could result in permanent loss of significant values and irreplaceable resources at the site. They also would not transfer jurisdiction over the lands to the NPS for administration as part of JTNP.

Licenses, permits, cooperative agreements, or other discretionary land use authorizations may be allowed with the approval of an authorized officer of the BLM during the temporary segregative period, after coordination with the NPS. The lands included within FERC Project No. 13123, which is licensed by FERC, are not proposed for withdrawal and the Department does not intend to include any additional lands ultimately included in the associated BLM right-of-way in the final withdrawal, if approved.

Subject to analysis under the NEPA, 42 U.S.C. 4321 *et seq.,* the NPS is not aware of any alternatives that would provide protection of the cultural, natural, and scenic resources, and values fundamental to the established purpose of JTNP. At this time, the uses contemplated by the NPS would not require water to fulfill the purposes of the requested withdrawal action.

Comments, including names and street addresses of respondents, will be available for public review on the following Web site *http://parkplanning.nps.gov/eaglemountain.* Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Notice is hereby given that a public meeting will be held in connection with the proposed withdrawal at the time and location indicated in the **DATES** section above. A notice about this public meeting will also be published in a local newspaper at least 30 days before the scheduled date of the meeting.

Records relating to the application may be examined by contacting JTNP park superintendent David Smith at 760–367–5502 or BLM Field Manager at 760–833–7100.

For a period until February 16, 2017, all persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal may present their views in writing to the JTNP Superintendent or the BLM Field Manager at the **ADDRESSES** noted above.

For a period until November 19, 2018, the lands described in this notice will be segregated from all forms of entry, appropriation, or disposal under the public land laws; from location, entry, and patent under the United States mining laws; and from disposition under all laws pertaining to mineral and geothermal leasing, and mineral materials, and all amendments thereto, unless the application is denied or canceled or the withdrawal is approved prior to that date. The 2 years also allows time for the NPS to conduct the necessary analyses under FLPMA, the statutes pertaining to the NPS, and the NEPA. It is intended that these analyses will support a final decision on whether to expand the park boundary to complete the proposed withdrawal and to modify accordingly the boundary of JTNP.

The application will be processed in accordance with the regulations set forth in 43 CFR part 2300.

Jerome E. Perez,

State Director, Bureau of Land Management, California.

Bureau of Land Management

[LLES964000.L54100000.FR0000]

Notice of Realty Action: Application for Conveyance of Federally Owned Mineral Interests in Lee County, FL

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of realty action.

SUMMARY: The Bureau of Land Management (BLM) is processing an application under the Federal Land Policy and Management Act of 1976 (FLPMA), to convey the undivided phosphate mineral interest owned by the United States in 160 acres located in Lee County, Florida, to the surface owner, Stonewater II, LLC, a Michigan Limited Liability Company. The fair market value of the phosphate mineral interest has been determined to be $4,000.

DATES: Interested persons may submit written comments to the BLM at the address listed below. Comments must be received no later than January 3, 2017.

ADDRESSES: Bureau of Land Management, Eastern States State Office, 20 M Street SE., Suite 950, Washington, DC 20003. Detailed information concerning this action is available for review at this address.

FOR FURTHER INFORMATION CONTACT: Charles Johnson, Land Law Examiner, by telephone at 202–912–7737 or by email at *c35johns@blm.gov.* Persons who use a telecommunications device for the deaf (TDD) may call the Federal Relay Service at 1–800–877–8339 to contact the above individuals during normal business hours. The Service is available 24 hours a day, 7 days a week, to leave a message or question for the above individuals. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: Stonewater II, LLC, the surface owner, has applied to purchase the undivided federally owned phosphate mineral interest located in Lee County, Florida, in a parcel described as follows:

Tallahassee Meridian, Florida

T. 44 S., R. 23 E.,
sec. 10, NE¼.
The area described contains 160 acres.

As required under Section 209(3)(i) of FLPMA, the applicant deposited a sum of money determined sufficient to cover administrative costs, including, but not limited to, the cost for the Mineral Potential Report. The objective of Section 209 is to allow consolidation of the surface and mineral interests when either one of the following conditions exists: (1) There are no known mineral values in the land; or (2) Where continued Federal ownership of the mineral interests interferes with or precludes appropriate non-mineral development and such development is a more beneficial use of the land than mineral development.

Stonewater II, LLC, a Michigan Limited Liability Company, the surface owner, filed an application for the conveyance of federally owned phosphate mineral interests in the above-described tract of land, subject to valid existing rights.

On November 18, 2016 the federally owned mineral interests in the lands described above are hereby segregated from all forms of appropriation under the public land laws, including the mining laws, while the application is being processed to determine if either one of the two specified conditions exists and, if so, to otherwise comply with the procedural requirements of 43 CFR part 2720. The segregation shall terminate: (1) Upon issuance of a patent or other document of conveyance as to such mineral interests; (2) upon final rejection of the application; or (3) on November 19, 2018, whichever occurs first.

Please submit all comments in writing to the address listed above.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment, including your personal identifying information, may be made available to the public at any time. While you can ask in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Authority: 43 CFR 2720.1–1(b).

Karen Mouritsen,

State Director, Eastern States Office.

Filing of Plats of Survey; NV

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The purpose of this notice is to inform the public and interested State and local government officials of the filing of Plats of Survey in Nevada.

DATES: *Effective Dates:* Unless otherwise stated filing is effective at 10:00 a.m. on the dates indicated below.

FOR FURTHER INFORMATION CONTACT: Michael O. Harmening, Chief, Branch of Geographic Sciences, Bureau of Land Management, Nevada State Office, 1340 Financial Blvd., Reno, NV 89502–7147, phone: 775–861–6490. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 to contact the above individual during normal business hours. The FIRS is available 24 hours a day, 7 days a week, to leave a message or question with the above individual. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION:

1. The Plat of Survey of the following described lands was officially filed at the Bureau of Land Management (BLM) Nevada State Office, Reno, Nevada on August 25, 2016:

The plat, in 1 sheet, representing the dependent resurvey of a portion of the subdivisional lines, the subdivision or section 24, and a metes-and-bounds survey of a portion of the centerline of Nevada State Route 147 (Lake Mead Blvd.) in section 24, Township 20 South, Range 62 East, Mount Diablo Meridian, Nevada, under Group No. 944, was accepted August 24, 2016. This survey was executed to identify the boundaries for disposal of certain public lands for the Las Vegas Police Shooting Range, authorized under Public Law 113–291.

2. The Plat of Survey of the following described lands was officially filed at the Bureau of Land Management (BLM) Nevada State Office, Reno, Nevada on August 26, 2016:

The plat, in 1 sheet, representing the dependent resurvey of a portion of the north boundary, a portion of the subdivisional lines and portions of Mineral Survey No. 4960, Township 20 South, Range 59 East, Mount Diablo Meridian, Nevada, under Group No. 950, was accepted August 25, 2016. This survey was executed to locate specific high-risk boundaries and to describe additions to the Red Rock Canyon National Conservation Area authorized by Public Law 113–291.

3. The Plat of Survey of the following described lands was officially filed at the Bureau of Land Management (BLM) Nevada State Office, Reno, Nevada on September 12, 2016:

The plat, in 3 sheets, representing the dependent resurvey of a portion of the east boundary and a portion of the subdivisional lines, the subdivision of sections 14, 24 and 25, a metes-and-bounds survey through sections 13 and 14, and a metes-and-bounds survey of a portion of the centerline of Las Vegas Boulevard in section 25, Township 19 South, Range 62 East, Mount Diablo Meridian, Nevada, under Group No. 959, was accepted September 1, 2016. This survey was executed to identify lands to be withdrawn for addition to Nellis Air Force Base, authorized by Public Law 113–291 and shown on the maps entitled ‘‘Nellis Dunes OHV Recreation Area’’, dated June 26, 2012 and ‘‘North Las Vegas Valley Overview’’, dated November 5, 2013.

4. The Plat of Survey of the following described lands was officially filed at the Bureau of Land Management (BLM) Nevada State Office, Reno, Nevada on September 30, 2016:

The plat, in 1 sheet, representing the dependent resurvey of a portion of the south boundary, a portion of the subdivisional lines and the subdivision of section 34, Township 43 North, Range 26 East, Mount Diablo Meridian, Nevada, under Group No. 936, was accepted September 28, 2016. This survey was executed to meet certain administrative needs of the Bureau of Land Management.

The surveys listed above are now the basic record for describing the lands for all authorized purposes. These records have been placed in the open files in the BLM Nevada State Office and are available to the public as a matter of information. Copies of the surveys and related field notes may be furnished to the public upon payment of the appropriate fees.

Dated: November 9, 2016.

Michael O. Harmening,

Chief Cadastral Surveyor, Nevada.

DEPARTMENT OF THE INTERIOR

National Park Service

[NPS–WASO–CONC–22082; PPWOBSADC0, PPMVSCS1Y.Y00000]

Notice of Extension of Concession Contracts

AGENCY: National Park Service, Interior.

ACTION: Public notice.

SUMMARY: The National Park Service hereby gives public notice that it proposes to extend the expiring concession contracts listed below for the period specified, or until the effective date of a new contract, whichever occurs sooner.

DATES: Effective January 1, 2017.

FOR FURTHER INFORMATION CONTACT: Brian Borda, Program Chief, Commercial Services Program, National Park Service, 1201 Eye Street NW., 11th Floor, Washington, DC 20005, Telephone: 202–513–7156.

SUPPLEMENTARY INFORMATION: All of the listed concession authorizations will expire by their terms on or before December 31, 2016. The National Park Service has determined the proposed extensions are necessary to avoid interruption of visitor services and has taken all reasonable and appropriate steps to consider alternatives to avoid such interruption. The publication of this notice merely reflects the intent of the National Park Service and does not bind the National Park Service to extend any of the contracts listed below.

The information in the first table shows concession contracts intended to be extended until December 31, 2017, or until the effective date of a new concession contract, whichever occurs first. The information in the second table shows concession contracts intended to be extended until December 31, 2018, or until the effective date of a new concession contract, whichever occurs first. Under the provisions of current concession contracts, the National Park Service authorizes extension of visitor services for the contracts below under the terms and conditions of the current contract (as amended if applicable). The extension of operations does not affect any rights with respect to selection for award of a new concession contract.

DEPARTMENT OF THE INTERIOR

National Park Service

[NPS–WASO–CONC–22177; PPWOBSADC0, PPMVSCS1Y.Y0000]

Notice of Temporary Concession Contracts for Certain Visitor Services in Acadia National Park

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: The National Park Service intends to award two temporary concession contracts to a qualified person for the conduct of certain visitor services within Acadia National Park for a term not to exceed 3 years. The visitor services include guided bus tours.

FOR FURTHER INFORMATION CONTACT: Judy Bassett, Northeast Regional Concession Chief, Northeast Region, 200 Chestnut Street, Suite 502, Philadelphia, PA 19106; Telephone (215) 597–4903, by email at *judy_bassett@nps.gov*.

SUPPLEMENTARY INFORMATION: The National Park Service intends to award each contract to a concessioner currently operating under a long-term concessions contract. If the National Park Service is unable to reach acceptable terms, however, it may find other qualified persons for the award of each of the temporary contracts. The National Park Service has determined that the issuance of temporary concession contracts not to exceed 3 years is necessary to avoid interruption of visitor services and has taken all reasonable and appropriate steps to consider alternatives to avoid an interruption of visitor services in accordance with 36 CFR 51.24.

Authority: This action is issued pursuant to 36 CFR 51.24(a). This is not a request for proposals.

Dated: November 1, 2016.

Michael Reynolds,

Deputy Director, Operations.

Notice of Continuation of Concession Contracts

AGENCY: National Park Service, Interior.

ACTION: Public notice.

SUMMARY: Pursuant to the terms of existing concession contracts, public notice is hereby given that the National Park Service intends to request a continuation of visitor services for a period not to exceed one year.

DATES: Effective January 1, 2017.

FOR FURTHER INFORMATION CONTACT: Brian Borda, Chief, Commercial Services Program, National Park Service, 1201 Eye Street NW., 11th Floor, Washington, DC 20005, Telephone: 202–513–7156.

SUPPLEMENTARY INFORMATION: The contracts listed below have been extended to the maximum allowable under 36 CFR 51.23. Under the provisions of the respective concession contracts and pending the completion of the public solicitation of a prospectus for a new concession contract, the National Park Service authorizes continuation of visitor services for a period not-to-exceed 1 year under the terms and conditions of the current contract as amended. The continuation of operations does not affect any rights with respect to selection for award of a new concession contract. The publication of this notice merely reflects the intent of the National Park Service but does not bind the National Park Service to continue any of the contracts listed below.

INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 701–TA–558 and 731–TA–1316 (Final)]

1-Hydroxyethylidene-1,1-Diphosphonic Acid from China; Scheduling of the Final Phase of Countervailing Duty and Antidumping Duty Investigations

AGENCY: United States International Trade Commission.

ACTION: Notice.

SUMMARY: The Commission hereby gives notice of the scheduling of the final phase of antidumping and countervailing duty investigation Nos. 701–TA–558 and 731–TA–1316 (Final) pursuant to the Tariff Act of 1930 (''the Act'') to determine whether an industry in the United States is materially injured or threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports of 1-hydroxyethylidene-1,1-diphosphonic acid (''HEDP'') from China, provided for in subheading 2931.90.90 of the Harmonized Tariff Schedule of the United States, preliminarily determined by the Department of Commerce to be

subsidized and sold at less-than-fair-value.[1]

EFFECTIVE DATE: November 4, 2016.

FOR FURTHER INFORMATION CONTACT: Edward Petronzio (202–205–3176), Office of Investigations, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000. General information concerning the Commission may also be obtained by accessing its internet server (*https://www.usitc.gov*). The public record for these investigations may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov*.

SUPPLEMENTARY INFORMATION:

Background.—The final phase of these investigations is being scheduled pursuant to sections 705(b) and 731(b) of the Tariff Act of 1930 (19 U.S.C. 1671d(b) and 1673d(b)), as a result of affirmative preliminary determinations by the Department of Commerce that certain benefits which constitute subsidies within the meaning of section 703 of the Act (19 U.S.C. 1671b) are being provided to manufacturers, producers, or exporters in China of HEDP, and that such products are being sold in the United States at less than fair value within the meaning of section 733 of the Act (19 U.S.C. 1673b). The investigations were requested in petitions filed on March 31, 2016, by Compass Chemical International LLC, Smyrna, Georgia.

For further information concerning the conduct of this phase of the investigations, hearing procedures, and rules of general application, consult the Commission's Rules of Practice and Procedure, part 201, subparts A and B (19 CFR part 201), and part 207, subparts A and C (19 CFR part 207).

Participation in the investigations and public service list.—Persons, including industrial users of the subject merchandise and, if the merchandise is sold at the retail level, representative consumer organizations, wishing to participate in the final phase of these investigations as parties must file an entry of appearance with the Secretary to the Commission, as provided in section 201.11 of the Commission's rules, no later than 21 days prior to the hearing date specified in this notice. A party that filed a notice of appearance during the preliminary phase of the investigations need not file an additional notice of appearance during this final phase. The Secretary will maintain a public service list containing the names and addresses of all persons, or their representatives, who are parties to the investigations.

Limited disclosure of business proprietary information (BPI) under an administrative protective order (APO) and BPI service list.—Pursuant to section 207.7(a) of the Commission's rules, the Secretary will make BPI gathered in the final phase of these investigations available to authorized applicants under the APO issued in the investigations, provided that the application is made no later than 21 days prior to the hearing date specified in this notice. Authorized applicants must represent interested parties, as defined by 19 U.S.C. 1677(9), who are parties to the investigations. A party granted access to BPI in the preliminary phase of the investigations need not reapply for such access. A separate service list will be maintained by the Secretary for those parties authorized to receive BPI under the APO.

Staff report.—The prehearing staff report in the final phase of these investigations will be placed in the nonpublic record on March 9, 2017, and a public version will be issued thereafter, pursuant to section 207.22 of the Commission's rules.

Hearing.—The Commission will hold a hearing in connection with the final phase of these investigations beginning at 9:30 a.m. on Thursday, March 23, 2017, at the U.S. International Trade Commission Building. Requests to appear at the hearing should be filed in writing with the Secretary to the Commission on or before March 17, 2017. A nonparty who has testimony that may aid the Commission's deliberations may request permission to present a short statement at the hearing. All parties and nonparties desiring to appear at the hearing and make oral presentations should participate in a prehearing conference to be held on March 21, 2017, at the U.S. International Trade Commission Building, if deemed necessary. Oral testimony and written materials to be submitted at the public hearing are governed by sections 201.6(b)(2), 201.13(f), and 207.24 of the Commission's rules. Parties must submit any request to present a portion of their hearing testimony *in camera* no later than 7 business days prior to the date of the hearing.

Written submissions.—Each party who is an interested party shall submit a prehearing brief to the Commission. Prehearing briefs must conform with the provisions of section 207.23 of the Commission's rules; the deadline for filing is March 16, 2017. Parties may also file written testimony in connection with their presentation at the hearing, as provided in section 207.24 of the Commission's rules, and posthearing briefs, which must conform with the provisions of section 207.25 of the Commission's rules. The deadline for filing posthearing briefs is March 30, 2017. In addition, any person who has not entered an appearance as a party to the investigations may submit a written statement of information pertinent to the subject of the investigations, including statements of support or opposition to the petition, on or before March 30, 2017. On April 14, 2017, the Commission will make available to parties all information on which they have not had an opportunity to comment. Parties may submit final comments on this information on or before April 18, 2017, but such final comments must not contain new factual information and must otherwise comply with section 207.30 of the Commission's rules. All written submissions must conform with the provisions of section 201.8 of the Commission's rules; any submissions that contain BPI must also conform with the requirements of sections 201.6, 207.3, and 207.7 of the Commission's rules. The Commission's *Handbook on E-Filing,* available on the Commission's Web site at *https://edis.usitc.gov,* elaborates upon the Commission's rules with respect to electronic filing.

Additional written submissions to the Commission, including requests pursuant to section 201.12 of the Commission's rules, shall not be accepted unless good cause is shown for accepting such submissions, or unless the submission is pursuant to a specific request by a Commissioner or Commission staff.

In accordance with sections 201.16(c) and 207.3 of the Commission's rules, each document filed by a party to the investigations must be served on all other parties to the investigations (as identified by either the public or BPI service list), and a certificate of service must be timely filed. The Secretary will not accept a document for filing without a certificate of service.

Authority: These investigations are being conducted under authority of title VII of the

[1] For purposes of these investigations, the Department of Commerce has defined the subject merchandise as ''all grades of aqueous, acidic (non–neutralized) concentrations of 1-hydroxyethylidene-1,1-diphosphonic acid, also referred to as hydroxethlylidenendiphosphonic acid, hydroxyethanediphosphonic acid, acetodiphosphonic acid, and etidronic acid. The Chemical Abstract Service (CAS) registry number for HEDP is 2809–21–4.''

Tariff Act of 1930; this notice is published pursuant to section 207.21 of the Commission's rules.

By order of the Commission.

Issued: November 14, 2016.

Lisa R. Barton,

Secretary to the Commission.

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–1029]

Certain Mobile Electronic Devices; Institution of Investigation

AGENCY: U.S. International Trade Commission

ACTION: Notice

SUMMARY: Notice is hereby given that a complaint was filed with the U.S. International Trade Commission on October 14, 2016, under section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. 1337, on behalf of Qualcomm Incorporated of San Diego, California. The complaint alleges violations of section 337 based upon the importation into the United States, the sale for importation, and the sale within the United States after importation of certain mobile electronic devices by reason of infringement of certain claims of U.S. Patent No. 8,095,082 (''the '082 patent''); U.S. Patent No. 7,999,384 (''the '384 patent''); U.S. Patent No. 7,548,407 (''the '407 patent''); U.S. Patent No. 8,497,928 (''the '928 patent'') and U.S. Patent No. 7,949,367 (''the '367 patent''). The complaint further alleges that an industry in the United States exists as required by subsection (a)(2) of section 337.

The complainant requests that the Commission institute an investigation and, after the investigation, issue a limited exclusion order and cease and desist orders.

ADDRESSES: The complaint, except for any confidential information contained therein, is available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street SW., Room 112, Washington, DC 20436, telephone (202) 205–2000. Hearing impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at (202) 205–2000. General information concerning the Commission may also be obtained by accessing its internet server at *https://www.usitc.gov.* The public record for this investigation may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.*

FOR FURTHER INFORMATION CONTACT: The Office of the Secretary, U.S. International Trade Commission, telephone (202) 205–2000.

AUTHORITY: The authority for institution of this investigation is contained in section 337 of the Tariff Act of 1930, as amended, and in section 210.10 of the Commission's Rules of Practice and Procedure, 19 CFR 210.10 (2016).

SCOPE OF INVESTIGATION: Having considered the complaint, the U.S. International Trade Commission, on November 14, 2016, ORDERED THAT –

(1) Pursuant to subsection (b) of section 337 of the Tariff Act of 1930, as amended, an investigation be instituted to determine whether there is a violation of subsection (a)(1)(B) of section 337 in the importation into the United States, the sale for importation, or the sale within the United States after importation of certain mobile electronic devices by reason of infringement of one or more of claims 1–4, 7, 8, and 11 of the '082 patent; claims 44, 45, 50, and 53 of the '384 patent; claims 1–13 of the '407 patent; claims 1, 2, 4, and 6 of the '928 patent; and claims 6 and 7 of the '367 patent, and whether an industry in the United States exists as required by subsection (a)(2) of section 337;

(2) For the purpose of the investigation so instituted, the following are hereby named as parties upon which this notice of investigation shall be served:

(a) The complainant is: Qualcomm Incorporated, 5775 Morehouse Drive, San Diego, CA 92121.

(b) The respondents are the following entities alleged to be in violation of section 337, and are the parties upon which the complaint is to be served:

Zhuhai Meizu Technology Co., Ltd., Meizu Science & Technology Building, Technology Innovation Coast, Zhuhai, Guangdong, China 519085.

Zhuhai Meizu Telecom Equipment Co., Ltd., Meizu Science & Technology Building, Technology Innovation Coast, Zhuhai, Guangdong, China 519085.

Dest Technology Limited, Huang Pu 1506, Nan Xian Commercial Plaza A, MeiLong Road, LongHua Town, Bao An District, Shenzhen, China.

LGYD Limited, 3/F, New Factory Building, Guanghui Tech Park, Minqing District, 518028, Shenzhen, China.

Overseas Electronics, Inc., 309 W. Washington Street, Suite 1250, Chicago, IL 60606.

(3) For the investigation so instituted, the Chief Administrative Law Judge, U.S. International Trade Commission, shall designate the presiding Administrative Law Judge.

The Office of Unfair Import Investigations will not be named as a party to this investigation.

Responses to the complaint and the notice of investigation must be submitted by the named respondents in accordance with section 210.13 of the Commission's Rules of Practice and Procedure, 19 CFR 210.13. Pursuant to 19 CFR 201.16(e) and 210.13(a), such responses will be considered by the Commission if received not later than 20 days after the date of service by the Commission of the complaint and the notice of investigation. Extensions of time for submitting responses to the complaint and the notice of investigation will not be granted unless good cause therefor is shown.

Failure of a respondent to file a timely response to each allegation in the complaint and in this notice may be deemed to constitute a waiver of the right to appear and contest the allegations of the complaint and this notice, and to authorize the administrative law judge and the Commission, without further notice to the respondent, to find the facts to be as alleged in the complaint and this notice and to enter an initial determination and a final determination containing such findings, and may result in the issuance of an exclusion order or a cease and desist order or both directed against the respondent.

By order of the Commission.

Issued: November 15, 2016.

Lisa R. Barton,

Secretary to the Commission.

BILLING CODE 7020–02–P

DEPARTMENT OF JUSTICE

[OMB Number 1110–0052]

Agency Information Collection Activities; Proposed eCollection eComments Requested; Applicant Information Form (1–783)

AGENCY: Federal Bureau of Investigation, Department of Justice.

ACTION: 30-day notice.

SUMMARY: The Department of Justice (DOJ), Federal Bureau of Investigation (FBI), Criminal Justice Information Services (CJIS) Division, will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995. The proposed information collection was published in the **Federal Register** at 81 FR 62535, on September 9, 2016, allowing for a 60 day comment period.

DATES: Comments are encouraged and will be accepted for an additional 30 days until December 19, 2016.

FOR FURTHER INFORMATION CONTACT: If you have additional comments especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please contact Gerry Lynn Brovey, Supervisory Information Liaison Specialist, FBI, CJIS, Resources Management Section, Administrative Unit, Module C–2, 1000 Custer Hollow Road, Clarksburg, West Virginia 26306 (facsimile: 304–625–5093). Written comments and/or suggestions can also be directed to the Office of Management and Budget, Office of Information and Regulatory Affairs, Attention Department of Justice Desk Officer, Washington, DC 20530 or sent to *OIRA_submissions@omb.eop.gov.*

SUPPLEMENTARY INFORMATION: Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

—Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
—Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
—Enhance the quality, utility, and clarity of the information to be collected; and/or
—Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Overview of This Information Collection

(1) *Type of Information Collection:* Extension of a currently approved collection.

(2) *The Title of the Form/Collection:* Applicant Information Form.

3 *The agency form number, if any, and the applicable component of the Department sponsoring the collection:* 1–783.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract:* Primary: Individuals. This collection is necessary for individuals to request a copy of their personal identification record to review it or to obtain a change, correction, or an update to the record.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* Annually, the FBI receives 275,000 identification requests, therefore there are 275,000 respondents. The form requires 3 minutes to complete.

(6) *An estimate of the total public burden (in hours) associated with the collection:* There are an estimated 13,750 total annual burden hours associated with this collection.

If additional information is required contact: Jerri Murray, Department Clearance Officer, United States Department of Justice, Justice Management Division, Policy and Planning Staff, Two Constitution Square, 145 N Street NE., 3E.405B, Washington, DC 20530.

Dated: November 15, 2016.

Jerri Murray,

Department Clearance Officer for PRA, U.S. Department of Justice.

[FR Doc. 2016–27779 Filed 11–17–16; 8:45 am]

BILLING CODE 4410–02–P

DEPARTMENT OF JUSTICE

[OMB Number 1117–0042]

Agency Information Collection Activities; Proposed eCollection eComments Requested; Extension of a Currently Approved Collection: National Clandestine Laboratory Seizure Report

AGENCY: Drug Enforcement Administration, Department of Justice.

ACTION: 30-Day notice.

SUMMARY: The Department of Justice (DOJ), Drug Enforcement Administration, will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995. This collection was previously published in the **Federal Register** at 81 FR 63224, on September, 14, 2016, allowing for a 60 day comment period.

DATES: Comments are encouraged and will be accepted for 30 days until December 19, 2016.

FOR FURTHER INFORMATION CONTACT: If you have additional comments especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please contact Catherine J. Cmiel-Acevido, Lead IT Specialist, or Jesus Oswaldo ''Waldo'' Contreras, IT Specialist, El Paso Intelligence Center, Drug Enforcement Administration, 11339 SSG Sims Blvd., El Paso, TX 79918. Written comments and/or suggestions can also be directed to the Office pf Management and Budget, Office of Information and Regulatory Affairs, Attention Department of Justice Desk Officer, Washington, DC 20530 or sent to *OIRA_submissions@OMB.eop.gov.*

SUPPLEMENTARY INFORMATION: Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

—Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Bureau of Justice Statistics, including whether the information will have practical utility;
—Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
—Evaluate whether and if so how the quality, utility, and clarity of the information to be collected can be enhanced; and
—Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Overview of This Information Collection

(1) *Type of Information Collection:* Extension of a currently approved collection.

(2) *The Title of the Form/Collection:* National Clandestine Laboratory Seizure Report.

(3) *The agency form number, if any, and the applicable component of the Department sponsoring the collection:* EPIC–143.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract:* State, Local or Tribal government law enforcement agencies. Records reported in the National Seizure System include clandestine laboratory seizure information managed by the El Paso Intelligence Center, Drug Enforcement Administration, and available to other law enforcement agencies in the discharge of their law enforcement duties and responsibilities.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* It is estimated that approximately 7930 respondents will complete the survey within approximately one hour.

(6) *An estimate of the total public burden (in hours) associated with the collection:* The estimated public burden associated with this collection is 7930 hours. It is estimated that respondents will take one hour to complete the survey. In order to calculate the public burden for the survey, EPIC multiplied one hour by 7930 which equals 7930 total annual burden hours.

If additional information is required contact: Jerri Murray, Department Clearance Officer, United States Department of Justice, Justice Management Division, Policy and Planning Staff, Two Constitution Square, 145 N Street NE., 3E.405B, Washington, DC 20530.

Dated: November 15, 2016.

Jerri Murray,

Department Clearance Officer for PRA, U.S. Department of Justice.

[FR Doc. 2016–27778 Filed 11–17–16; 8:45 am]

BILLING CODE 4410–09–P

DEPARTMENT OF JUSTICE

Federal Bureau of Prisons

Notice of Intent To Prepare a Supplemental Revised Final Environmental Impact Statement for the Proposed United States Penitentiary and Federal Prison Camp in Letcher County, Kentucky

AGENCY: Federal Bureau of Prisons, U.S. Department of Justice.

ACTION: Notice of Intent.

SUMMARY: Pursuant to the National Environmental Policy Act (NEPA) of 1969, as implemented by the Council on Environmental Quality regulations, the Federal Bureau of Prisons (Bureau) announces its intent to prepare a Supplement to the March 2016 Revised Final Environmental Impact Statement (RFEIS) for ''Proposed United States Penitentiary and Federal Prison Camp Letcher County, Kentucky.''

FOR FURTHER INFORMATION CONTACT: Issac Gaston, Site Selection Specialist; U.S. Department of Justice, Federal Bureau of Prisons, 320 First Street NW., Washington, DC 20534; email: *igaston@bop.gov.*

SUPPLEMENTARY INFORMATION: The Supplemental RFEIS is being prepared to address substantial changes to the proposed action that are relevant to environmental concerns, as required under NEPA [40 CFR 1502.9(c)], and will assess any new circumstances or information relevant to potential environmental impacts.

In March 2016, the Bureau completed the Revised Final EIS for the Proposed United States Penitentiary and Federal Prison Camp, Letcher County, Kentucky, which evaluated the potential environmental impacts from the acquisition of property and construction and operation of a new United States Penitentiary, Federal Prison Camp, ancillary facilities, and access roads in Letcher County. The RFEIS analyzed two potential locations: An approximately 753-acre site in eastern Letcher County (Alternative 1-Payne Gap), and an approximately 700-acre site in western Letcher County (Alternative 2-Roxana). The RFEIS identified Alternative 2-Roxana as the preferred alternative because it best meets the project needs and, on balance, would have fewer impacts to the natural and built environment.

The Bureau was originally considering acquiring approximately 700 acres at the Roxana site for this project. In an effort to reduce potentially impacted property, the Bureau is removing two parcels of land at the Roxana site from acquisition consideration, resulting in a proposed site of approximately 570 acres. This reduction in site size has necessitated modifying the facilities layout evaluated for Alternative 2-Roxana in the RFEIS. The environmental impacts of the modified Alternative 2-Roxana will be analyzed in the Supplemental RFEIS. The alternatives to be evaluated in the Supplemental RFEIS include the No Action Alternative and Alternative 2-Roxana.

The Supplemental RFEIS will analyze potential environmental impacts that may result from the modified alternative, including, but not limited to, land use and zoning; topography, geology, and soils; air quality; noise; cultural resources; water resources; and biological resources. The Supplemental RFEIS analysis will evaluate direct, indirect, and cumulative impacts. Relevant and reasonable measures that could avoid or mitigate environmental impacts will also be analyzed. Additionally, the Bureau will undertake any consultations required by applicable laws or regulations.

The Bureau will issue a Draft Supplemental RFEIS for a 45-day public comment period, during which a public meeting will be held in the community of Whitesburg. A notice of availability of the Draft Supplemental RFEIS and a notice of public meeting will be published in the **Federal Register** and in area newspapers in advance of the release of the Draft Supplemental RFEIS and the public meeting. Those notices will identify further details about the public meeting and the specific opportunities and methods for the public to provide comments on the Draft Supplemental RFEIS.

The mailing list for the Draft Supplemental RFEIS will be based on the mailing list in the 2016 RFEIS. Those on this list will receive a copy of the Draft Supplemental RFEIS. This list includes local, state, and federal agencies with jurisdiction, elected officials and community leaders, businesses and organizations, and other interested parties and individuals. Anyone wishing to be added to the mailing list to receive a copy of the Draft Supplemental RFEIS may request to be added by contacting the Bureau's Site Selection Specialist at the address below.

Following issuance of the Draft Supplemental RFEIS and completion of the 45-day public comment period on the Draft Supplemental RFEIS, the Bureau will issue a Final Supplemental RFEIS that will include comments received during the public comment period on the Draft Supplemental RFEIS. The Final Supplemental RFEIS will also include the Bureau's response to substantive comments received on the Draft Supplemental RFEIS. Following publication of the Final Supplemental RFEIS, a 30-day review period will be provided. No action will be taken to implement any of the proposed alternatives until completion of the 30-day review period on the Final Supplemental RFEIS and issuance of a Record of Decision on behalf of the Bureau by its Director or Acting Director.

Dated: November 4, 2016.

Issac Gaston,

Site Selection Specialist, Capacity, Planning and Construction, U.S. Department of Justice, Federal Bureau of Prisons.

BILLING CODE P

DEPARTMENT OF LABOR

Mine Safety and Health Administration

Petitions for Modification of Application of Existing Mandatory Safety Standards

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Notice.

SUMMARY: Section 101(c) of the Federal Mine Safety and Health Act of 1977 and Title 30 of the Code of Federal Regulations Part 44 govern the application, processing, and disposition of petitions for modification. This notice is a summary of petitions for modification submitted to the Mine Safety and Health Administration (MSHA) by the parties listed below.

DATES: All comments on the petitions must be received by MSHA's Office of Standards, Regulations, and Variances on or before December 19, 2016.

ADDRESSES: You may submit your comments, identified by ''docket number'' on the subject line, by any of the following methods:

1. *Electronic Mail: zzMSHA-comments@dol.gov.* Include the docket number of the petition in the subject line of the message.
2. *Facsimile:* 202–693–9441.
3. *Regular Mail or Hand Delivery:* MSHA, Office of Standards, Regulations, and Variances, 201 12th Street South, Suite 4E401, Arlington, Virginia 22202–5452, Attention: Sheila McConnell, Director, Office of Standards, Regulations, and Variances. Persons delivering documents are required to check in at the receptionist's desk in Suite 4E401. Individuals may inspect copies of the petitions and comments during normal business hours at the address listed above.

MSHA will consider only comments postmarked by the U.S. Postal Service or proof of delivery from another delivery service such as UPS or Federal Express on or before the deadline for comments.

FOR FURTHER INFORMATION CONTACT: Barbara Barron, Office of Standards, Regulations, and Variances at 202–693–9447 (Voice), *barron.barbara@dol.gov* (Email), or 202–693–9441 (Facsimile). [These are not toll-free numbers.]

SUPPLEMENTARY INFORMATION:

I. Background

Section 101(c) of the Federal Mine Safety and Health Act of 1977 (Mine Act) allows the mine operator or representative of miners to file a petition to modify the application of any mandatory safety standard to a coal or other mine if the Secretary of Labor determines that:

1. An alternative method of achieving the result of such standard exists which will at all times guarantee no less than the same measure of protection afforded the miners of such mine by such standard; or
2. That the application of such standard to such mine will result in a diminution of safety to the miners in such mine.

In addition, the regulations at 30 CFR 44.10 and 44.11 establish the requirements and procedures for filing petitions for modification.

II. Petitions for Modification

Docket Number: M–2016–031–C.

Petitioner: S & J Coal Mine, 15 Motter Drive, Pine Grove, Pennsylvania 17963–8854.

Mine: Slope #2 Mine, MSHA I.D. No. 36–09963, located in Schuylkill County, Pennsylvania.

Regulation Affected: 30 CFR 75.1002(a) (Installation of electric equipment and conductors; permissibility).

Modification Request: The petitioner requests a modification of the existing standard to permit use of nonpermissible electric equipment within 150 feet of the pillar line to include drags and battery locomotives. The request is due in part to the method of mining used in pitching anthracite mines and the alternative evaluation of the mine air quality for methane on an hourly basis during operation, with one of the gas test results to be recorded in the on-shift examination record. The petitioner also proposes to suspend equipment operation any time methane concentration at the equipment reaches 0.5 percent methane either during operation or when found during a preshift examination. The petitioner states that:

(1) The equipment will be operated in the working section's only intake entry (gangway), which is regularly traveled and examined.

(2) The use of drags on less than moderate pitching veins (less than 20 degrees pitch) is the only practical system of mining in use.

(3) Permissible drags are not commercially available, and due in part to their small size, permissible locomotives are not commercially available either.

(4) As a result of low daily production rates and full timbering support, in-rushes of methane due to massive pillar falls are unlikely to occur.

(5) Recovery of the pillars above the first miner heading is usually accomplished on the advance within 150 feet of the section intake (gangway) and the remaining mineable pillars recovered from the deepest point of penetration outby.

(6) The 5,000 cubic feet per minute of required intake airflow is measured just outby the nonpermissible equipment with the ventilating air passing over the equipment to ventilate the pillar being mined.

(7) The electrical equipment is attended during operation and either power to the unit deenergized at the intersection of the working gangway and intake slope or equipment moved to that area when production ceases, minimizing any ignition potential from the pillar recovery area.

(8) Where more than one active line of pillar breasts recovery exists, the locomotive may travel to a point just outby the deepest active chute/breast (room) workings or last open crosscut in a developing set of entries.

The petitioner asserts that the proposed alternative method will at all times guarantee no less than the same measure of protection to the miners as would be provided by the existing standard.

Docket Number: M–2016–032–C.

Petitioner: S & J Coal Mine, 15 Motter Drive, Pine Grove, Pennsylvania 17963–8854.

Mine: Slope #2 Mine, MSHA I.D. No. 36–09963, located in Schuylkill County, Pennsylvania.

Regulation Affected: 30 CFR 75.1400 (Hoisting equipment; general).

Modification Request: The petitioner seeks to permit the use of a gunboat to transport persons without safety catches or other no less effective devices because to date, no such safety catch or device is available for steeply pitching and undulating slopes with numerous curves and knuckles present in the main haulage slopes of anthracite mines. The mines range in length from 30 to 4,200 feet and vary in pitch from 12 degrees and 75 degrees. The petitioner states that:

(1) A functional safety catch has not been developed. Makeshift devices, if installed, would be activated on knuckles and curves when no emergency exists causing a tumbling effect on the conveyance, which would increase rather than decrease the hazard to miners.

(2) As an alternative, the petitioner proposes to operate the man-cage or steel gunboat with secondary safety connections securely fastened around the gunboat and to the hoisting rope above the main connecting device, and use hoisting ropes having a factor of safety in excess of the 4 to 8 to 1 as suggested in the American Standards Specifications for Use of Wire Ropes for Mines.

The petitioner asserts that the proposed alternative method will provide no less than the same measure of protection afforded the miners under the existing standard.

Docket Number: M–2016–033–C.

Petitioner: Mach Mining, LLC, P.O. Box 300, Johnston City, Illinois 62951.

Mine: Mach No. 1 Mine, MSHA I.D. No. 11–03141, located in Williamson County, Illinois.

Regulation Affected: 30 CFR 75.503 (Permissible electric face equipment; maintenance) and 30 CFR 18.35 (Portable trailing cables and cords).

Modification Request: The petitioner requests a modification of the existing standard to allow the use of trailing cables longer than permitted under the existing standard. The petitioner states that:

(1) The maximum lengths of the 995-volt trailing cables will be 1,000 feet and not smaller than No. 2 American Wire Gauge (AWG).

(2) All circuit breakers used to protect No. 2 AWG trailing cables exceeding 700 feet in length will have instantaneous trip units calibrated to trip at 800 amperes. The trip setting of these circuit breakers will be sealed or locked so that the setting cannot be changed and these circuit breakers will have permanent, legible labels. Each label will identify the circuit breaker as being suitable for protecting No. 2 AWG cables. The labels will be maintained legible.

(3) Replacement instantaneous trip units used to protect No. 2 AWG trailing cables will be calibrated to trip at 800 amperes, and this setting will be sealed and locked.

(4) All components that provide short-circuit protection will have a sufficient interruption rating in accordance with the maximum calculated fault currents available.

(5) Short-circuit settings must not exceed the setting specified in the approval documentation or 70 percent of the maximum available current, whichever is less.

(6) Any trailing cable that is not in safe operating condition will be removed from service immediately and repaired or replaced.

(7) Each splice or repair in the trailing cable will be made in a workmanlike manner and in accordance with the instructions of the manufacturer of the splice or repair kit. The outer jacket of each splice or repair will be vulcanized with flame-resistant material or made with material that has been accepted by MSHA as flame resistant.

(8) In the event the mining methods or operating procedures cause or contribute to the damage of any trailing cable, the trailing cable will be removed from service immediately and repaired or replaced, and additional precautions will be taken to ensure that in the future, the cable is protected and maintained in safe operating condition.

(9) During each production day, persons designated by the mine operator will visually examine the trailing cables to ensure that the cables are in safe operating condition. The instantaneous settings of the specially calibrated circuit breakers will be visually examined to ensure that the seals or locks have not been removed and do not exceed the settings stipulated in items (2) and (3).

(10) Permanent warning labels will be installed and maintained on the cover of the power center identifying the location of each sealed short-circuit protective device. These labels will warn miners not to change or alter these sealed short-circuit settings.

(11) The alternative method will not be implemented until all miners who have been designated to examine the integrity of seals or locks, verify the short-circuit settings, and examine trailing cables for defects have received their training.

(12) Within 60 days after the proposed decision and order becomes final, the petitioner will submit proposed revisions for their approved 30 CFR part 48 training plans to the District Manager for the area in which the mine is located. The training will include the following elements:

(a) Mining methods and operating procedures that will protect the trailing cables against damage;

(b) Proper procedures for examining the trailing cables to ensure that the cables are in safe operating condition;

(c) The hazards of setting the short circuit interrupting device too high to adequately protect the trailing cables; and

(d) How to verify that the circuit interrupting device(s) protecting the trailing cable(s) are properly set and maintained.

The procedures as specified in 30 CFR 48.3 for approval of proposed revisions to already approved training plans will apply.

The petitioner asserts that the proposed alternative method will at all times guarantee no less than the same measure of protection to the miners as would be provided by the existing standard.

Docket Number: M–2016–034–C.

Petitioner: Warrior Coal, LLC, 57 J.E. Ellis Rd., Madisonville, Kentucky 42431.

Mine: Warrior's Cardinal Mine, MSHA I.D. No. 15–14335, located in Hopkins County, Kentucky.

Regulation Affected: 30 CFR 75.500(d) (Permissible electric equipment).

Modification Request: The petitioner requests a modification of the existing standard to permit the use of nonpermissible electronic testing or diagnostic equipment inby the last open crosscut. The petitioner states that:

(1) Nonpermissible electronic testing and diagnostic equipment to be used includes: Laptop/tablet computers, oscilloscopes, vibration analysis machines, cable fault detectors, point temperature probes, infrared temperature devices, insulation testers (meggers), voltage, current, resistance meters and power testers, and electronic tachometers. Other testing and diagnostic equipment may be used if approved in advance by the MSHA District Manager.

(2) All nonpermissible testing and diagnostic equipment used in or inby

the last open crosscut will be examined by a qualified person (as defined in 30 CFR 75.153) prior to use to ensure the equipment is being maintained in a safe operating condition. The examination results will be recorded weekly in the examination book and will be made available to MSHA and the miners at the mine.

(3) A qualified person as defined in existing 30 CFR 75.151 will continuously monitor for methane immediately before and during the use of nonpermissible electronic testing and diagnostic equipment in or inby the last open crosscut.

(4) Nonpermissible electronic testing and diagnostic equipment will not be used if methane is detected in concentrations at or above 1.0 percent. When 1.0 percent or more methane is detected while the nonpermissible electronic equipment is being used, the equipment will be deenergized immediately and withdrawn outby the last open crosscut.

(5) All hand-held methane detectors will be MSHA-approved and maintained in permissible and proper operating condition as defined in 30 CFR 75.320.

(6) Except for time necessary to troubleshoot under actual mining conditions, coal production on MMU will cease. However, coal may remain in or on the equipment to test and diagnose the equipment under ''load.''

(7) All electronic testing and diagnostic equipment will be used in accordance with the manufacturer's recommendations.

(8) Qualified personnel who use electronic testing and diagnostic equipment will be properly trained to recognize the hazards and limitations associated with use of the equipment.

The petitioner asserts that under the terms and conditions of the petition for modification, the use of nonpermissible electronic testing and diagnostic equipment will at all times guarantee no less than the same measure of protection afforded by the existing standard.

Docket Number: M–2016–035–C.

Petitioner: Warrior Coal, LLC, 57 J.E. Ellis Rd., Madisonville, Kentucky 42431.

Mine: Warrior's Cardinal Mine, MSHA I.D. No. 15–14335, located in Hopkins County, Kentucky.

Regulation Affected: 30 CFR 75.507–1(a) (Electric equipment other than power-connection points; outby the last open crosscut; return air; permissibility requirements).

Modification Request: The petitioner requests a modification of the existing standard to permit the use of nonpermissible electronic testing or diagnostic equipment in return air outby the last open crosscut. The petitioner states that:

(1) Nonpermissible electronic testing and diagnostic equipment to be used includes: Laptop/tablet computers, oscilloscopes, vibration analysis machines, cable fault detectors, point temperature probes, infrared temperature devices, insulation testers (meggers), voltage, current, resistance meters and power testers, and electronic tachometers. Other testing and diagnostic equipment may be used if approved in advance by the MSHA District Manager.

(2) All nonpermissible testing and diagnostic equipment used in return air outby the last open crosscut will be examined by a qualified person (as defined in 30 CFR 75.153) prior to use to ensure the equipment is being maintained in a safe operating condition. The examination results will be recorded weekly in the examination book and will be made available to MSHA and the miners at the mine.

(3) A qualified person as defined in existing 30 CFR 75.151 will continuously monitor for methane immediately before and during the use of nonpermissible electronic testing and diagnostic equipment in return air outby the last open crosscut.

(4) Nonpermissible electronic testing and diagnostic equipment will not be used if methane is detected in concentrations at or above 1.0 percent. When 1.0 percent or more methane is detected while the nonpermissible electronic equipment is being used, the equipment will be deenergized immediately and withdrawn from the return air outby the last open crosscut.

(5) All hand-held methane detectors will be MSHA-approved and maintained in permissible and proper operating condition as defined in 30 CFR 75.320.

(6) All electronic testing and diagnostic equipment will be used in accordance with the manufacturer's recommendations.

(7) Qualified personnel who use electronic testing and diagnostic equipment will be properly trained to recognize the hazards and limitations associated with use of the equipment.

The petitioner asserts that under the terms and conditions of the petition for modification, the use of nonpermissible electronic testing and diagnostic equipment will at all times guarantee no less than the same measure of protection afforded by the existing standard.

Sheila McConnell,

Director, Office of Standards, Regulations, and Variances.

BILLING CODE 4520–43–P

DEPARTMENT OF LABOR

Mine Safety and Health Administration

Petitions for Modification of Application of Existing Mandatory Safety Standards

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Notice.

SUMMARY: Section 101(c) of the Federal Mine Safety and Health Act of 1977 and Title 30 of the Code of Federal Regulations Part 44 govern the application, processing, and disposition of petitions for modification. This notice is a summary of petitions for modification submitted to the Mine Safety and Health Administration (MSHA) by the parties listed below.

DATES: All comments on the petitions must be received by MSHA's Office of Standards, Regulations, and Variances on or before December 19, 2016.

ADDRESSES: You may submit your comments, identified by ''docket number'' on the subject line, by any of the following methods:

1. *Electronic Mail: zzMSHA-comments@dol.gov.* Include the docket number of the petition in the subject line of the message.

2. *Facsimile:* 202–693–9441.

3. *Regular Mail or Hand Delivery:* MSHA, Office of Standards, Regulations, and Variances, 201 12th Street South, Suite 4E401, Arlington, Virginia 22202–5452, Attention: Sheila McConnell, Director, Office of Standards, Regulations, and Variances. Persons delivering documents are required to check in at the receptionist's desk in Suite 4E401. Individuals may inspect copies of the petitions and comments during normal business hours at the address listed above.

MSHA will consider only comments postmarked by the U.S. Postal Service or proof of delivery from another delivery service such as UPS or Federal Express on or before the deadline for comments.

FOR FURTHER INFORMATION CONTACT: Barbara Barron, Office of Standards, Regulations, and Variances at 202–693–9447 (Voice), *barron.barbara@dol.gov* (Email), or 202–693–9441 (Facsimile). [These are not toll-free numbers.]

SUPPLEMENTARY INFORMATION:

I. Background

Section 101(c) of the Federal Mine Safety and Health Act of 1977 (Mine Act) allows the mine operator or representative of miners to file a petition to modify the application of any mandatory safety standard to a coal or other mine if the Secretary of Labor determines that:

1. An alternative method of achieving the result of such standard exists which will at all times guarantee no less than the same measure of protection afforded the miners of such mine by such standard; or

2. That the application of such standard to such mine will result in a diminution of safety to the miners in such mine.

In addition, the regulations at 30 CFR 44.10 and 44.11 establish the requirements and procedures for filing petitions for modification.

II. Petitions for Modification

Docket Number: M–2016–007–M.

Petitioner: Vulcan Construction Materials, LLC, 11020 David Taylor Drive, Suite 105, Charlotte, NC 28262.

Mines: Enka Quarry, MSHA I.D. No. 31–00084, located in Buncombe County, North Carolina; Rockingham Quarry, MSHA I.D. No. 31–00198, located in Richmond County, North Carolina; Lenoir Quarry, MSHA I.D. No. 31–01094, located in Caldwell County, North Carolina; Penrose Quarry, MSHA I.D. No. 31–00111, located in Transylvania County, North Carolina; East Forsyth Quarry, MSHA I.D. No. 31–01919, located in Forsyth County, North Carolina; Cabarrus Quarry, MSHA I.D. No. 31–01357, located in Cabarrus County, North Carolina; and Clear Creek Quarry, MSHA I.D. No. 31–02087, located in Mecklenburg County, North Carolina.

Regulation Affected: 30 CFR 56.13010 (Reciprocating-type air compressors).

Modification Request: The petitioner requests a modification of the existing standard to allow the designated compressors outlined in this petition to be considered in compliance with the existing standard. The petitioner states that:

(1) The compressor industry guidance has shown that the high temperature shutoff switch is not offered as a standard safety feature on an electrically motor-driven reciprocating-type air compressor between 2 horsepower and 30 horsepower. The only time a high temperature shutoff switch is used on a reciprocating-type compressor is when very large compressors (100 horsepower and up) are housed in buildings or containers that could allow intake air to be heated by other environmental influences. However, a high temperature shutoff switch has always been standard for a rotary or screw type compressor that is working off of a combustion engine. When discussing this standard with compressor manufacturers, the first statement that is often made is ''are you sure we are referring to a rotary compressor not a reciprocating compressor''.

(2) The petitioner states the following facts related to electric motor-driven reciprocating air compressors:

(a) The electric motor does not affect the temperature of the air in the compressor. The compressor and motor are only connected to sheaves on both sides.

(b) Existing 30 CFR 56.13010 states that the temperature switch must be adjusted to shut down the compressor when the normal operating temperature is exceeded by more than 25 percent. This would be virtually impossible because the normal operating temperature is affected by the intake air temperature which can fluctuate by 30 percent or more depending on the geographic location of the air compressor and the time of the year. According to manufacturers, the temperatures of supplied air can typically range from 32 degrees Fahrenheit to 115 degrees Fahrenheit. Due to the fluctuation in temperature ranges, the system could almost never be set to the actual 25 percent above normal temperature. In addition, the temperature of the intake air affects the density of the air which changes the amount of air being compressed during the process. The phenomenon directly affects the output temperature of the air.

(c) High temperature shutoff switches are considered unreliable in many applications because there is no true way to test whether the switch is actually working. To test a high temperature shutoff switch, the temperature would have to be altered to determine if the switch is working properly, which raises safety concerns.

(d) High temperature switches are also very costly and in cases where it was not provided as standard equipment by the manufacturer, installing a switch could void warranty and UL listing of a compressor if not installed by a certified manufacturer's representative. Not all States have compressor inspection programs, which could potentially allow an unqualified person to install a switch to meet the MSHA standard resulting in potential hazards to persons from a possible faulty installation.

(e) The units included in this petition currently are equipped with multiple safety features that include most of the following:

—Magnetic starter—prevents motor from electrical overload.
— Low oil level switch—prevents unit from operating in low oil conditions.
— Aftercoolers—cools discharge air that allows moisture to condense in the tank.
—Automatic condensate drain—ensures removal of water from tank.
—Unloader valve—relieves pressure on compressor head when unit shuts off. This prevents unit starting underload.
—Safety relief valves—relieves tank pressure at a set PSI to prevent over pressurization of tank. Line pressure relief valves are also utilized at aftercoolers.
—Tank pressure switch—cuts off pressure at a set normal PSI range.
—High amp fuse—cuts off motor if high amps are achieved.

The petitioner further asserts that industry data suggests that the current safety devices as equipped on the compressors offer equal protection to the standard even if they are not equipped with the automatic temperature actuated shutoff mechanism.

Sheila McConnell,
Director, Office of Standards, Regulations, and Variances.

LEGAL SERVICES CORPORATION

Sunshine Act Meeting: Board of Directors and Operations & Regulations Committee Telephonic Meetings

AGENCY: Legal Services Corporation

ACTION: Change Notice

SUMMARY: On November 6, 2016, the Legal Services Corporation (LSC) published a notice in the **Federal Register** (81 FR 80686) titled ''Board of Directors will meet telephonically on November 22, 2016. The meeting will commence at 2:00 Eastern Standard Time (EST). Immediately following the Board of Directors telephonic meeting, the Operations and Regulations Committee will hold a telephonic meeting.'' A correction to change item #2 on the Board of Directors Agenda to read; Consider and act on the Board of Directors' transmittal to accompany the Inspector General's Semiannual Report to Congress for the period of April 1, 2016 through September 30, 2016, all other items remain consecutively the same. This document changes the notice by revising the Board of Directors Agenda by changing item #2 of the agenda to read; Consider and act on the Board of Directors' transmittal to accompany the Inspector General's Semiannual Report to Congress for the period of April 1, 2016 through September 30, 2016

CHANGES IN THE MEETING: Item #2 of the Board of Directors Agenda.

DATES: This change is effective November 16, 2016.

FOR FURTHER INFORMATION CONTACT: Katherine Ward, Executive Assistant to the Vice President for Legal Affairs and General Counsel, Legal Services Corporation, 3333 K Street NW., Washington, DC 20007; (202) 295–1500; *kward@lsc.gov.*

Dated: November 16, 2016.

Katherine Ward,

Executive Assistant to the Vice President for Legal Affairs and General Counsel.

BILLING CODE 7050–01–P

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice (16–082)]

Applied Sciences Advisory Committee; Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Public Law 92–463, as amended, the National Aeronautics and Space Administration (NASA) announces a meeting of the Applied Sciences Advisory Committee (ASAC). This Committee functions in an advisory capacity to the Director, Earth Science Division, in the NASA Science Mission Directorate. The meeting will be held for the purpose of soliciting, from the applied sciences community and other persons, scientific and technical information relevant to program planning.

DATES: Wednesday, December 7, 2016, 9:00 a.m. to 5:00 p.m., and Thursday, December 8, 2016, 9:00 a.m. to 5:00 p.m., Local Time.

ADDRESSES: NASA Headquarters, Room 7Q46, 300 E Street SW., Washington, DC 20546.

FOR FURTHER INFORMATION CONTACT: Ms. KarShelia Henderson, Science Mission Directorate, NASA Headquarters, Washington, DC 20546, (202) 358–2355, fax (202) 358–2779, or *khenderson@nasa.gov.*

SUPPLEMENTARY INFORMATION: The meeting will be open to the public up to the capacity of the room. This meeting will also be available telephonically and via WebEx. You must use a touch-tone phone to participate in this meeting. Any interested person may dial the USA toll free conference call number 1–888–324–7118, passcode 7154341, followed by the # sign, to participate in this meeting by telephone, for both days. The WebEx link is *https://nasa.webex.com;* the meeting number on December 7 is 997 590 459 and the password is @December7 (case sensitive); the meeting number on December 8 is 992 751 297 and the password is @December8 (case sensitive).

The agenda for the meeting includes the following topics:

- Earth Science and Applied Sciences Program Activities
- Continuity Study
- Earth Science Decadal Survey
- Flight Projects and Applications

Attendees will be requested to sign a register and to comply with NASA Headquarters security requirements, including the presentation of a valid picture ID to Security before access to NASA Headquarters. Due to the Real ID Act, Public Law 109–13, any attendees with drivers licenses issued from non-compliant states/territories must present a second form of ID. [Federal employee badge; passport; active military identification card; enhanced driver's license; U.S. Coast Guard Merchant Mariner card; Native American tribal document; school identification accompanied by an item from LIST C (documents that establish employment authorization) from the ''List of the Acceptable Documents'' on Form I–9]. Non-compliant states/territories are: Kentucky, Maine, Minnesota, Missouri, Oklahoma, Pennsylvania, South Carolina, and Washington. Foreign nationals attending this meeting will be required to provide a copy of their passport and visa in addition to providing the following information no less than 10 days prior to the meeting: Full name; gender; date/place of birth; citizenship; passport information (number, country, telephone); visa information (number, type, expiration date); employer/affiliation information (name of institution, address, country, telephone); title/position of attendee. To expedite admittance, attendees with U.S. citizens and Permanent Residents (green card holders) can provide full name and citizenship status 3 working days in advance by contacting KarShelia Henderson via email at *khenderson@nasa.gov* or by fax at (202) 358–2779.

It is imperative that the meeting be held on these dates to accommodate the scheduling priorities of the key participants.

Patricia D. Rausch,

Advisory Committee Management Officer, National Aeronautics and Space Administration.

BILLING CODE 7510–13–P

NATIONAL SCIENCE FOUNDATION

Notice of Permit Applications Received Under the Antarctic Conservation Act of 1978

AGENCY: National Science Foundation.

ACTION: Notice of permit applications received under the Antarctic Conservation Act of 1978, Public Law 95–541.

SUMMARY: The National Science Foundation (NSF) is required to publish a notice of permit applications received to conduct activities regulated under the Antarctic Conservation Act of 1978. NSF has published regulations under the Antarctic Conservation Act at Title 45 Part 671 of the Code of Federal Regulations. This is the required notice of permit applications received.

DATES: Interested parties are invited to submit written data, comments, or views with respect to this permit application by December 19, 2016. This application may be inspected by interested parties at the Permit Office, address below.

ADDRESSES: Comments should be addressed to Permit Office, Room 755, Division of Polar Programs, National Science Foundation, 4201 Wilson Boulevard, Arlington, Virginia 22230.

FOR FURTHER INFORMATION CONTACT: Nature McGinn, ACA Permit Officer, at the above address or *ACApermits@nsf.gov.*

SUPPLEMENTARY INFORMATION: The National Science Foundation, as directed by the Antarctic Conservation Act of 1978 (Pub. L. 95–541), as amended by the Antarctic Science, Tourism and Conservation Act of 1996, has developed regulations for the establishment of a permit system for various activities in Antarctica and designation of certain animals and certain geographic areas a requiring special protection. The regulations establish such a permit system to designate Antarctic Specially Protected Areas.

Application Details

Permit Application: 2017–027

1. *Applicant:* Prash Karnik, Director Maritime Operations, Seabourn Quest, Seabourn Cruise Line Ltd., 300 Elliot Avenue West, WA 98119 U.S.A.

Activity for Which Permit is Requested: Waste management. The applicant wishes to fly small, battery operated, remotely controlled copters equipped with a cameras to take scenic photos and film of the Antarctic. The UAVs would not be flown over concentrations of birds or mammals or over Antarctic Specially Protected Areas. The UAVs would only be flown by operators with extensive experience (≤20 hours), who are pre-approved by the Expedition Leader. Several measures would be taken to prevent against loss of the UAV including painting the them a highly visible color; only flying when the wind is less than 25 knots; flying for only 15 minutes at a time to preserve battery life; having prop guards on propeller tips, a flotation device if operated over water, and a ''go home'' feature in case of loss of control link or low battery; having an observer on the lookout for wildlife, people, and other hazards; and ensuring that the separation between the operator and UAV does not exceed an operational range of 500 meters. The applicant is seeking a Waste Permit to cover any accidental releases that may result from flying a UAV.

Location: Antarctic Peninsula region.

Dates: November 1, 2016–March 31, 2017.

Permit Application: 2017–028

2. *Applicant:* James Drony, Vice President, Itinerary and Destination Planning, The World of Residensea II, Ltd., 1551 Sawgrass Corporate Parkway, Suite 200, Fort Lauderdale, FL 33323.

Activity for Which Permit is Requested: Waste management. The applicant wishes to fly small, battery operated, remotely controlled copters equipped with a cameras to take scenic photos and film of the Antarctic. The UAVs would not be flown over concentrations of birds or mammals or over Antarctic Specially Protected Areas. The UAVs would only be flown by operators with extensive experience (>20 hours), who are pre-approved by the Expedition Leader. Several measures would be taken to prevent against loss of the UAV including painting the them a highly visible color; only flying when the wind is less than 25 knots; flying for only 15 minutes at a time to preserve battery life; having prop guards on propeller tips, a flotation device if operated over water, and a ''go home'' feature in case of loss of control link or low battery; having an observer on the lookout for wildlife, people, and other hazards; and ensuring that the separation between the operator and UAV does not exceed an operational range of 500 meters. The applicant is seeking a Waste Permit to cover any accidental releases that may result from flying a UAV.

Location: Balleny Islands; Cape Adare; Cape Hallett; Terra Nova Bay; Ross Sea; Bay of Whales; Possession Islands.

Dates: January 15, 2017—March 31, 2017.

Permit Application: 2017–030

3. *Applicant:* John Durban, Marine Mammal and Turtle Division, NOAA, NMFS, Southwest Fisheries Science Center, 8901 La Jolla Shores Dr., La Jolla CA USA 92037.

Activity for Which Permit is Requested: Waste management. Short <20 minute flights will be conducted with a small (32'' across) unmanned hexacopter (APH–22) to collect photogrammetry images and blow samples from whales. Flights will only be conducted over open water off the coast of the Antarctic Peninsula, and all flights will be within line-of-site (<1600’, 500m) of the pilot who will operate the hexacopter using radio control from a Zodiac boat. The hexacopter will be hand deployed and caught by a ground station operator on the same boat. All flights will be in daylight hours, and only during good weather (winds and seas calm and visibility >1nm). The hexacopter is powered by a 4-cell Lithium Polumner (LiPo) battery, so there will be no exhaust discharges. Additional measures to mitigate loss of the aircraft include: Firmware modifcations, ''come home'' feature, and high-visibility buoyancy devices.

Location: Antarctic Peninsula region.

Dates: January 1, 2017–May 31, 2021.

Permit Application: 2017–031

4. *Applicant:* Ashley Perrin, Antarctic Ice Pilot, PO Box 623, Mill Valley, CA 94942.

Activity for Which Permit is Requested: Waste management. Applicant requests that the yacht M/Y CaryAli be allowed to operate in the Antarctic Treaty area, to cruise along the Antarctic Peninsula for tourism and sightseeing purposes. Applicant proposes to make select stops at non-protected area landings, for day-time sightseeing. Applicant intends to follow Appendix 2 for all food waste and garbage, and the boat has an onboard sewage treatment plant that meets MARPOL 6 standards. Contingency plans are in place in case of accidental releases to the environment.

Location: South Shetland Islands; Antarctic Peninsula region.

Dates: February 4–March 4, 2017.

Permit Application: 2017–035

5. *Applicant:*

Bob Simpson, Vice President, Expedition Cruising, Abercrombie & Kent USA LLC, 1411 Opus Place, Executive Towers West II, Suite #300, Downers Grove, Illinois 60515–1182.

Activity for Which Permit is Requested: Waste management. The applicant wishes to fly small, battery operated, remotely controlled copters equipped with a cameras to take scenic photos and film of the Antarctic. The UAVs would not be flown over concentrations of birds or mammals or over Antarctic Specially Protected Areas. The UAVs would only be flown by operators with extensive experience (≤20 hours), who are pre-approved by the Expedition Leader. Several measures would be taken to prevent against loss of the UAV including painting the them a highly visible color; only flying when the wind is less than 25 knots; flying for only 15 minutes at a time to preserve battery life; having prop guards on propeller tips, a flotation device if operated over water, and a ''go home'' feature in case of loss of control link or low battery; having an observer on the lookout for wildlife, people, and other hazards; and ensuring that the separation between the operator and UAV does not exceed an operational range of 500 meters. The applicant is seeking a Waste Permit to cover any accidental releases that may result from flying a UAV.

Location: Antarctic Peninsula region.

Dates: December 23–30, 2016.

Nadene G. Kennedy,

Polar Coordination Specialist, Division of Polar Programs.

BILLING CODE 7555–01–P

NATIONAL SCIENCE FOUNDATION

Notice of Permit Modification Received Under the Antarctic Conservation Act of 1978

AGENCY: National Science Foundation.

ACTION: Notice of permit modification request received and permit issued under the Antarctic Conservation Act of 1978, P.L. 95–541.

SUMMARY: The National Science Foundation (NSF) is required to publish a notice of requests to modify permits issued to conduct activities regulated and permits issued under the Antarctic Conservation Act of 1978. NSF has published regulations under the Antarctic Conservation Act at Title 45 Part 671 of the Code of Federal Regulations. This is the required notice of a requested permit modification and permit issued.

FOR FURTHER INFORMATION CONTACT: Nature McGinn, ACA Permit Officer, Division of Polar Programs, Rm. 755, National Science Foundation, 4201 Wilson Boulevard, Arlington, VA 22230. Or by email: *ACApermits@nsf.gov*.

SUPPLEMENTARY INFORMATION: The Foundation issued a permit (ACA 2016–020) to Laura K.O. Smith, Owner & Operator of Quixote Expeditions, LLC (Quixote), on December 23, 2015. The issued permit allows the applicant to operate the ''Ocean Tramp,'' a reinforced ketch rigged sailing yacht in the Antarctic Peninsula region. Activities to be conducted by Quixote include: Passenger landings, hiking, photography, wildlife viewing, and possible station visits.

Now the applicant proposes a permit modification to continue permitted activities, including minimization, mitigation, and monitoring of waste, for the 2016–2017 Antarctic season. The Environmental Officer has reviewed the modification request and has determined that the amendment is not a material change to the permit, and it will have a less than a minor or transitory impact.

December 23, 2015 to February 6, 2021

The permit modification was issued on November 9, 2016.

Nadene G. Kennedy,

Polar Coordination Specialist, Division of Polar Programs.

[FR Doc. 2016–27788 Filed 11–17–16; 8:45 am]

BILLING CODE 7555–01–P

NATIONAL SCIENCE FOUNDATION

Notice of Permit Modification Received Under the Antarctic Conservation Act of 1978

AGENCY: National Science Foundation.

ACTION: Notice of Permit Modification Request Received and Permit Issued under the Antarctic Conservation Act of 1978, Public Law 95–541.

SUMMARY: The National Science Foundation (NSF) is required to publish a notice of requests to modify permits issued to conduct activities regulated and permits issued under the Antarctic Conservation Act of 1978. NSF has published regulations under the Antarctic Conservation Act at Title 45 Part 671 of the Code of Federal Regulations. This is the required notice of a requested permit modification and permit issued.

FOR FURTHER INFORMATION CONTACT: Nature McGinn, ACA Permit Officer, Division of Polar Programs, Rm. 755, National Science Foundation, 4201 Wilson Boulevard, Arlington, VA 22230. Or by email: *ACApermits@nsf.gov*

SUPPLEMENTARY INFORMATION:

1. The Foundation issued a permit (ACA 2016–014) to Dwayne Stevens, Marine Operations Manager, Lindblad Expeditions on November 1, 2015. The issued permit allows the applicant to operate small, battery-operated, remotely controlled unmanned aerial vehicles (UAVs) equipped with cameras for educational, outreach, and commercial purposes.

Now the applicant proposes a permit modification to update the guidelines regarding the hiring and experience of UAV pilots and to include two additional pilot profiles. The Environmental Officer has reviewed the modification request and has determined that the amendment is not a material change to the permit, and it will have a less than a minor or transitory impact.

The permit modification was issued on November 10, 2016.

2. The Foundation issued a permit (ACA 2014–006) to Eric Strangeland, VP Operations, Quark Expeditions Inc. on September 18, 2013. The issued permit allows the applicant to conduct waste management activities associated with tourism activities including shore excursions, kayaking, camping, cross country skiing, ice climbing and mountaineering in the Antarctic Peninsula region.

A recent modification to this permit, dated November 7, 2014, permitted the applicant to allow for the conduct of waste management activities associated with downhill skiing, polar plunging, and stand-up paddleboarding.

Now the applicant proposes a permit modification to update their schedule of activities for 2016–17, clarify their kayaking and camping procedures, and change the named permit holder to Bill Davis, VP Operations, Quark Expeditions Inc. The Environmental Officer has reviewed the modification request and has determined that the amendment is not a material change to the permit, and it will have a less than a minor or transitory impact.

DATES: November 1, 2013 to March 31, 2017.

The permit modification was issued on November 10, 2016.

Nadene G. Kennedy,

Polar Coordination Specialist, Division of Polar Programs.

BILLING CODE 7555–01–P

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards (ACRS) Meeting of the ACRS Subcommittee on Planning and Procedures; Notice of Meeting

The ACRS Subcommittee on Planning and Procedures will hold a meeting on November 30, 2016, Room T–2B3, 11545 Rockville Pike, Rockville, Maryland.

The meeting will be open to public attendance with the exception of a portion that may be closed pursuant to 5 U.S.C. 552b(c)(2) and (6) to discuss organizational and personnel matters that relate solely to the internal personnel rules and practices of the ACRS, and information the release of which would constitute a clearly unwarranted invasion of personal privacy.

The agenda for the subject meeting shall be as follows:

Wednesday, November 30, 2016—12:00 p.m. until 1:00 p.m.

The Subcommittee will discuss proposed ACRS activities and related matters. The Subcommittee will gather information, analyze relevant issues and facts, and formulate proposed positions and actions, as appropriate, for deliberation by the Full Committee.

Members of the public desiring to provide oral statements and/or written comments should notify the Designated Federal Official (DFO), Quynh Nguyen (Telephone 301–415–5844 or Email: *Quynh.Nguyen@nrc.gov*) five days prior to the meeting, if possible, so that arrangements can be made. Thirty-five hard copies of each presentation or handout should be provided to the DFO thirty minutes before the meeting. In addition, one electronic copy of each presentation should be emailed to the DFO one day before the meeting. If an electronic copy cannot be provided within this timeframe, presenters should provide the DFO with a CDcontaining each presentation at least thirty minutes before the meeting. Electronic recordings will be permitted only during those portions of the meeting that are open to the public.

Detailed procedures for the conduct of and participation in ACRS meetings were published in the **Federal Register** on October 21, 2015 (80 FR 63846).

Information regarding changes to the agenda, whether the meeting has been canceled or rescheduled, and the time allotted to present oral statements can be obtained by contacting the identified DFO. Moreover, in view of the possibility that the schedule for ACRS meetings may be adjusted by the Chairman as necessary to facilitate the conduct of the meeting, persons planning to attend should check with the DFO if such rescheduling would result in a major inconvenience.

If attending this meeting, please enter through the One White Flint North building, 11555 Rockville Pike, Rockville, MD. After registering with security, please contact Mr. Theron Brown (240–888–9835) to be escorted to the meeting room.

Dated: November 8, 2016.

Mark L. Banks,

Chief, Technical Support Branch, Advisory Committee on Reactor Safeguards.

[FR Doc. 2016–27792 Filed 11–17–16; 8:45 am]

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards (ACRS), Meeting of the ACRS Subcommittee on Fukushima; Notice of Meeting

The ACRS Subcommittee on Fukushima will hold a meeting on November 30, 2016, Room T–2B1, 11545 Rockville Pike, Rockville, Maryland 20852.

The meeting will be open to public attendance.

The agenda for the subject meeting shall be as follows:

Wednesday, November 30, 2016–8:30 a.m. until 12:00 p.m.

The Subcommittee will receive information briefings on the National Academy of Sciences (NAS) Phase 2 study on lessons learned from the Fukushima nuclear accident for improving safety and security of U.S. Nuclear Plants. The Subcommittee will hear presentations by and hold discussions with the NAS Phase 2 study Chair and the NRC staff regarding this matter. The Subcommittee will gather information, analyze relevant issues and facts, and formulate proposed positions and actions, as appropriate, for deliberation by the Full Committee.

Members of the public desiring to provide oral statements and/or written comments should notify the Designated Federal Official (DFO), Christiana Lui (Telephone: 301–415–2492 or Email: *Christiana.Lui@nrc.gov*) five days prior to the meeting, if possible, so that appropriate arrangements can be made. Thirty-five hard copies of each presentation or handout should be provided to the DFO thirty minutes before the meeting. In addition, one electronic copy of each presentation should be emailed to the DFO one day before the meeting. If an electronic copy cannot be provided within this timeframe, presenters should provide the DFO with a CD containing each presentation at least thirty minutes before the meeting. Electronic recordings will be permitted only during those portions of the meeting that are open to the public. Detailed procedures for the conduct of and participation in ACRS meetings were published in the **Federal Register** on October 17, 2016 (81 FR 71543).

Detailed meeting agendas and meeting transcripts are available on the NRC Web site at *http://www.nrc.gov/reading-rm/doc-collections/acrs.* Information regarding topics to be discussed, changes to the agenda, whether the meeting has been canceled or rescheduled, and the time allotted to present oral statements can be obtained from the Web site cited above or by contacting the identified DFO. Moreover, in view of the possibility that the schedule for ACRS meetings may be adjusted by the Chairman as necessary to facilitate the conduct of the meeting, persons planning to attend should check with these references if such rescheduling would result in a major inconvenience.

If attending this meeting, please enter through the One White Flint North building, 11555 Rockville Pike, Rockville, Maryland 20852. After registering with Security, please contact Mr. Theron Brown (Telephone: 240–888–9835) to be escorted to the meeting room.

Dated: November 8, 2016.

Mark Banks,

Chief, Technical Support Branch, Advisory Committee on Reactor Safeguards.

PEACE CORPS

Information Collection Request; Submission for OMB Review

AGENCY: Peace Corps.

ACTION: 60-day notice and request for comments.

SUMMARY: The Peace Corps will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval. The purpose of this notice is to allow 60 days for public comment in the **Federal Register** preceding submission to OMB. We are conducting this process in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35).

DATES: Submit comments on or before January 17, 2017.

ADDRESSES: Comments should be addressed to Denora Miller, FOIA/Privacy Act Officer. Denora Miller can be contacted by telephone at 202–692–1236 or email at *pcfr@peacecorps.gov.* Email comments must be made in text and not in attachments.

FOR FURTHER INFORMATION CONTACT: Denora Miller at Peace Corps address above.

SUPPLEMENTARY INFORMATION:

Title: Peace Corps Report of Physical Examination (PC 1790S).

OMB Control Number: 0420–0549.

Type of Request: Revision.

Affected Public: Individuals/Physicians.

Respondents Obligation to Reply: Voluntary.

Respondents: Potential and current volunteers.

Burden to the Public:

a. Estimated number of respondents.	5,600/5,600.
b. Estimated average burden per response.	45 min/90 min.
c. Frequency of response	One time.
d. Annual reporting burden ..	4,200 hours/ 8,400 hours.

General description of collection: The information in this form will be used by the Peace Corps Office of Medical Services to determine whether an Applicant will, with reasonable accommodation, be able to perform the essential functions of a Peace Corps Volunteer assignment and complete a tour of service without unreasonable disruption due to health problems and, if so, to establish the level of medical and other support, if any, that may be required to reasonably accommodate the Applicant. The information in this form is also used as a baseline assessment for the Peace Corps Medical Officers overseas who are responsible for the Volunteer's medical care. Finally, the Peace Corps may use the information in this form as a point of reference in the event that, after completion of the Applicant's service as a Volunteer, he or she makes a worker's compensation claim under the Federal Employee Compensation Act (FECA).

Request for comment: Peace Corps invites comments on whether the proposed collections of information are necessary for proper performance of the functions of the Peace Corps, including whether the information will have practical use; the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the information to be collected; and, ways to minimize the burden of the collection of information on those who are to respond, including through the use of automated collection techniques, when appropriate, and other forms of information technology.

This notice is issued in Washington, DC on November 15, 2016.

Monique Harris,

FOIA/Privacy Act Officer, Management.

I. Introduction

The Commission gives notice that the Postal Service filed request(s) for the Commission to consider matters related to negotiated service agreement(s). The request(s) may propose the addition or removal of a negotiated service agreement from the market dominant or the competitive product list, or the modification of an existing product currently appearing on the market dominant or the competitive product list.

Section II identifies the docket number(s) associated with each Postal Service request, the title of each Postal Service request, the request's acceptance date, and the authority cited by the Postal Service for each request. For each request, the Commission appoints an officer of the Commission to represent the interests of the general public in the proceeding, pursuant to 39 U.S.C. 505 (Public Representative). Section II also establishes comment deadline(s) pertaining to each request.

The public portions of the Postal Service's request(s) can be accessed via the Commission's Web site (*http://www.prc.gov*). Non-public portions of the Postal Service's request(s), if any, can be accessed through compliance with the requirements of 39 CFR 3007.40.

The Commission invites comments on whether the Postal Service's request(s) in the captioned docket(s) are consistent with the policies of title 39. For request(s) that the Postal Service states concern market dominant product(s), applicable statutory and regulatory requirements include 39 U.S.C. 3622, 39 U.S.C. 3642, 39 CFR part 3010, and 39 CFR part 3020, subpart B. For request(s) that the Postal Service states concern competitive product(s), applicable statutory and regulatory requirements include 39 U.S.C. 3632, 39 U.S.C. 3633, 39 U.S.C. 3642, 39 CFR part 3015, and 39 CFR part 3020, subpart B. Comment deadline(s) for each request appear in section II.

II. Docketed Proceeding(s)

1. *Docket No(s).:* MC2017–17 and CP2017–36; *Filing Title:* Request of the United States Postal Service to Add Priority Mail Contract 256 to Competitive Product List and Notice of Filing (Under Seal) of Unredacted Governors' Decision, Contract, and Supporting Data; *Filing Acceptance Date:* November 14, 2016; *Filing Authority:* 39 U.S.C. 3642 and 39 CFR 3020.30 *et seq.; Public Representative:* Kenneth R. Moeller; *Comments Due:* November 22, 2016.

2. *Docket No(s).:* MC2017–18 and CP2017–37; *Filing Title:* Request of the United States Postal Service to Add Priority Mail Contract 257 to Competitive Product List and Notice of Filing (Under Seal) of Unredacted Governors' Decision, Contract, and Supporting Data; *Filing Acceptance Date:* November 14, 2016; *Filing Authority:* 39 U.S.C. 3642 and 39 CFR 3020.30 *et seq.; Public Representative:* Kenneth R. Moeller; *Comments Due:* November 22, 2016.

3. *Docket No(s).:* MC2017–19 and CP2017–38; *Filing Title:* Request of the United States Postal Service to Add Priority Mail Contract 258 to Competitive Product List and Notice of Filing (Under Seal) of Unredacted Governors' Decision, Contract, and Supporting Data; *Filing Acceptance Date:* November 14, 2016; *Filing Authority:* 39 U.S.C. 3642 and 39 CFR 3020.30 *et seq.; Public Representative:* Katalin K. BILLING CODE 7710–FW–P

SECURITIES AND EXCHANGE COMMISSION

Order Approving Public Company Accounting Oversight Board Supplemental Budget for Calendar Year 2016

Securities Act of 1933, Release No. 10255/November 14, 2016
Securities Exchange Act of 1934, Release No. 79303/November 14, 2016

The Sarbanes-Oxley Act of 2002, as amended (the ''Sarbanes-Oxley Act''),[1] established the Public Company Accounting Oversight Board (''PCAOB'') to oversee the audits of companies that are subject to the securities laws, and related matters, in order to protect the interests of investors and further the public interest in the preparation of informative, accurate and independent audit reports. Section 982 of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the ''Dodd-Frank Act'') [2] amended the Sarbanes-Oxley Act to provide the PCAOB with explicit authority to oversee auditors of broker-dealers registered with the Commission. The PCAOB is to accomplish these goals through registration of public accounting firms and standard setting, inspection, and disciplinary programs. The PCAOB is subject to the comprehensive oversight of the Securities and Exchange Commission (the ''Commission'').

Section 109(b) of the Sarbanes-Oxley Act directs the PCAOB to establish a budget for each fiscal year in accordance with the PCAOB's internal procedures, subject to approval by the Commission. Rule 190 of Regulation P facilitates the Commission's review and approval of PCAOB budgets and annual accounting support fees.[3] This budget rule provides, among other things, limits on the PCAOB's ability to incur expenses and obligations except as provided in the approved budget as well as the procedures for the submission of supplemental budgets when it is forecasted that the limits to incur expenses and obligations will be exceeded in a given year. The Commission previously determined that the PCAOB's 2016 budget of $257.7 million was consistent with Section 109 of the Sarbanes-Oxley Act and accordingly, it approved the PCAOB's 2016 Budget on March 14, 2016.[4]

During 2016, the PCAOB determined that it had under budgeted for inspections related travel for the year, and, on October 14, 2016 it submitted a supplemental budget request to the Commission. The PCAOB's 2016 supplemental budget requests Commission approval to transfer $1 million of FY 2016 funding from certain program areas where the PCAOB has a 2016 underspend to the Inspections program area to cover the projected overspend in inspections related travel costs. The supplemental budget does not request an increase to the PCAOB's previously approved 2016 Budget of $257.7 million.

The Commission has determined that the PCAOB's 2016 supplemental budget is consistent with Section 109 of the Sarbanes-Oxley Act. Accordingly,

It is ordered, pursuant to Section 109 of the Sarbanes-Oxley Act, that the PCAOB supplemental budget for calendar year 2016 is approved.

By the Commission.

Brent J. Fields,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79310; File No. SR–NYSEArca–2016–142]

Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change Amending the Fees for NYSE Arca BBO and NYSE Arca Trades To Lower the Enterprise Fee

November 14, 2016.

Pursuant to Section 19(b)(1) [1] of the Securities Exchange Act of 1934 (the ''Act'') [2] and Rule 19b–4 thereunder,[3] notice is hereby given that, on November 1, 2016, NYSE Arca, Inc. (the ''Exchange'' or ''NYSE Arca'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of the Substance of the Proposed Rule Change

The Exchange proposes to amend the fees for NYSE Arca BBO and NYSE Arca Trades to lower the Enterprise Fee. The proposed rule change is available on the Exchange's Web site at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend the fees for NYSE Arca BBO and NYSE Arca Trades market data products,[4] as set forth on the NYSE Arca Equities Proprietary Market Data Fee Schedule (''Fee Schedule''). Specifically, the Exchange proposes to lower the Enterprise Fee. The Exchange proposes to make the fee change effective November 1, 2016.

The Exchange currently charges an enterprise fee of $170,000 per month for an unlimited number of professional and non-professional users for each of NYSE Arca BBO and NYSE Arca Trades.[5] A single Enterprise Fee applies for clients receiving both NYSE Arca BBO and NYSE Arca Trades.[6] The Exchange proposes to lower the enterprise fee to $34,500 per month.

As an example, under the current fee structure for per user fees, if a firm had 40,000 professional users who each received NYSE Arca Trades at $4 per month and NYSE Arca BBO at $4 per month, without the Enterprise Fee, the firm would be subject to $320,000 per month in professional user fees. Under the current pricing structure, the charge would be capped at $170,000 and effective November 1, 2016 it would be capped at $34,500.

Under the proposed enterprise fee, the firm would pay a flat fee of $34,500 for an unlimited number of professional and non-professional users for both products. As is the case currently, a data recipient that pays the enterprise fee would not have to report the number of such users on a monthly basis.[7] However, every six months, a data recipient must provide the Exchange with a count of the total number of natural person users of each product, including both professional and non-professional users.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with the provisions of Section 6 of the Act,[8] in general, and Sections 6(b)(4) and 6(b)(5) of the Act,[9] in particular, in that it provides an equitable allocation of reasonable fees among users and recipients of the data and is not designed to permit unfair discrimination among customers, issuers, and brokers.

The proposed fee change is also equitable and not unfairly discriminatory because it would apply to all data recipients that choose to subscribe to NYSE Arca BBO and NYSE Arca Trades.

The proposed enterprise fees for NYSE Arca BBO and NYSE Arca Trades are reasonable because they could result in a fee reduction for data recipients with a large number of professional and non-professional users, as described in the example above. If a data recipient has a smaller number of professional users of NYSE Arca BBO and/or NYSE Arca Trades, then it may continue to use the per user fee structure. By reducing prices for data recipient with a large number of professional and non-professional users, the Exchange believes that more data recipients may choose to offer NYSE Arca BBO and NYSE Arca Trades, thereby expanding the distribution of this market data for the benefit of investors. The Exchange also believes that offering an enterprise fee expands the range of options for offering NYSE Arca BBO and NYSE Arca Trades and allows data recipients greater choice in selecting the most appropriate level of data and fees for the professional and non-professional users they are servicing.

The Exchange notes that NYSE Arca BBO and NYSE Arca Trades are entirely optional. The Exchange is not required to make NYSE Arca BBO and NYSE Arca Trades available or to offer any specific pricing alternatives to any customers, nor is any firm required to purchase NYSE Arca BBO and NYSE Arca Trades. Firms that do purchase NYSE Arca BBO and NYSE Arca Trades do so for the primary goals of using them to increase revenues, reduce expenses, and in some instances compete directly with the Exchange (including for order flow); those firms are able to determine for themselves whether NYSE Arca BBO and NYSE Arca Trades or any other similar products are attractively priced or not.[10]

Firms that do not wish to purchase NYSE Arca BBO and NYSE Arca Trades have a variety of alternative market data products from which to choose,[11] or if NYSE Arca BBO and NYSE Arca Trades do not provide sufficient value to firms as offered based on the uses those firms have or planned to make of it, such firms may simply choose to conduct their business operations in ways that do not use NYSE Arca BBO and NYSE Arca Trades or use them at different levels or in different configurations. The Exchange notes that broker-dealers are not required to purchase proprietary market data to comply with their best execution obligations.[12]

The decision of the United States Court of Appeals for the District of Columbia Circuit in *NetCoalition* v. *SEC,* 615 F.3d 525 (D.C. Cir. 2010), upheld reliance by the Securities and Exchange Commission (''Commission'') upon the existence of competitive

[12] *See* FINRA Regulatory Notice 15–46, ''Best Execution,'' November 2015.

market mechanisms to set reasonable and equitably allocated fees for proprietary market data:

> In fact, the legislative history indicates that the Congress intended that the market system 'evolve through the interplay of competitive forces as unnecessary regulatory restrictions are removed' and that the SEC wield its regulatory power 'in those situations where competition may not be sufficient,' such as in the creation of a 'consolidated transactional reporting system.'

Id. at 535 (quoting H.R. Rep. No. 94–229 at 92 (1975), *as reprinted in* 1975 U.S.C.C.A.N. 323). The court agreed with the Commission's conclusion that ''Congress intended that 'competitive forces should dictate the services and practices that constitute the U.S. national market system for trading equity securities.' '' [13]

As explained below in the Exchange's Statement on Burden on Competition, the Exchange believes that there is substantial evidence of competition in the marketplace for proprietary market data and that the Commission can rely upon such evidence in concluding that the fees established in this filing are the product of competition and therefore satisfy the relevant statutory standards. In addition, the existence of alternatives to these data products, such as consolidated data and proprietary data from other sources, as described below, further ensures that the Exchange cannot set unreasonable fees, or fees that are unreasonably discriminatory, when vendors and subscribers can select such alternatives.

As the *NetCoalition* decision noted, the Commission is not required to undertake a cost-of-service or ratemaking approach. The Exchange believes that, even if it were possible as a matter of economic theory, cost-based pricing for proprietary market data would be so complicated that it could not be done practically or offer any significant benefits.[14]

In addition, the Exchange believes that the proposed fees are reasonable when compared to fees for comparable products offered by at least one other exchange. For example, Bats BZX Exchange (''BZX'') charges an enterprise fee of $15,000 per month for each of BZX Top and BZX Last Sale, which includes best bid and offer and last sale data, respectively.[15] While the Exchange is proposing enterprise fees that would be higher than the fees currently charged by BZX, the Exchange believes the proposed fees, which would be lower than current fees, are appropriate and would be beneficial to firms with a large number of users.

For these reasons, the Exchange believes that the proposed fees are reasonable, equitable, and not unfairly discriminatory.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. An exchange's ability to price its proprietary market data feed products is constrained by actual competition for the sale of proprietary market data products, the joint product nature of exchange platforms, and the existence of alternatives to the Exchange's proprietary data.

The Existence of Actual Competition

The market for proprietary data products is currently competitive and inherently contestable because there is fierce competition for the inputs necessary for the creation of proprietary data and strict pricing discipline for the proprietary products themselves. Numerous exchanges compete with one another for listings and order flow and sales of market data itself, providing ample opportunities for entrepreneurs who wish to compete in any or all of those areas, including producing and distributing their own market data. Proprietary data products are produced and distributed by each individual exchange, as well as other entities, in a vigorously competitive market. Indeed, the U.S. Department of Justice (''DOJ'') (the primary antitrust regulator) has expressly acknowledged the aggressive actual competition among exchanges, including for the sale of proprietary market data. In 2011, the DOJ stated that exchanges ''compete head to head to offer real-time equity data products. These data products include the best bid and offer of every exchange and information on each equity trade, including the last sale.'' [16]

Moreover, competitive markets for listings, order flow, executions, and transaction reports provide pricing discipline for the inputs of proprietary data products and therefore constrain markets from overpricing proprietary market data. Broker-dealers send their order flow and transaction reports to multiple venues, rather than providing them all to a single venue, which in turn reinforces this competitive constraint. As a 2010 Commission Concept Release noted, the ''current market structure can be described as dispersed and complex'' with ''trading volume . . . dispersed among many highly automated trading centers that compete for order flow in the same stocks'' and ''trading centers offer[ing] a wide range of services that are designed to attract different types of market participants with varying trading needs.'' [17] More recently, SEC Chair Mary Jo White has noted that competition for order flow in exchange-listed equities is ''intense'' and divided among many trading venues, including exchanges, more than 40 alternative trading systems, and more than 250 broker-dealers.[18]

---

[13] *NetCoalition,* 615 F.3d at 535.

[14] The Exchange believes that cost-based pricing would be impractical because it would create enormous administrative burdens for all parties and the Commission to cost-regulate a large number of participants and standardize and analyze extraordinary amounts of information, accounts, and reports. In addition, and as described below, it is impossible to regulate market data prices in isolation from prices charged by markets for other services that are joint products. Cost-based rate regulation would also lead to litigation and may distort incentives, including those to minimize costs and to innovate, leading to further waste. Under cost-based pricing, the Commission would be burdened with determining a fair rate of return, and the industry could experience frequent rate increases based on escalating expense levels. Even in industries historically subject to utility regulation, cost-based ratemaking has been discredited. As such, the Exchange believes that cost-based ratemaking would be inappropriate for proprietary market data and inconsistent with Congress's direction that the Commission use its authority to foster the development of the national market system, and that market forces will continue to provide appropriate pricing discipline. *See* Appendix C to NYSE's comments to the Commission's 2000 Concept Release on the Regulation of Market Information Fees and Revenues, which can be found on the Commission's Web site at *http://www.sec.gov/rules/concept/s72899/buck1.htm.*

Abandoning Their Bid for NYSE Euronext (May 16, 2011), *available at http://www.justice.gov/iso/opa/atr/speeches/2011/at-speech-110516.html; see also* Complaint in U.S. v. Deutsche Borse AG and NYSE Euronext, Case No. 11–cv–2280 (DC Dist.) ¶ 24 (''NYSE and Direct Edge compete head-to-head . . . in the provision of real-time proprietary equity data products.'').

[17] Concept Release on Equity Market Structure, Securities Exchange Act Release No. 61358 (Jan. 14, 2010), 75 FR 3594 (Jan. 21, 2010) (File No. S7–02–10). This Concept Release included data from the third quarter of 2009 showing that no market center traded more than 20% of the volume of listed stocks, further evidencing the dispersal of and competition for trading activity. *Id.* at 3598. Data available on ArcaVision show that from June 30, 2013 to June 30, 2014, no exchange traded more than 12% of the volume of listed stocks by either trade or dollar volume, further evidencing the continued dispersal of and fierce competition for trading activity. *See https://www.arcavision.com/Arcavision/arcalogin.jsp.*

[18] Mary Jo White, Enhancing Our Equity Market Structure, Sandler O'Neill & Partners, L.P. Global Exchange and Brokerage Conference (June 5, 2014) (available on the Commission Web site), citing Tuttle, Laura, 2014, ''OTC Trading: Description of

If an exchange succeeds in competing for quotations, order flow, and trade executions, then it earns trading revenues and increases the value of its proprietary market data products because they will contain greater quote and trade information. Conversely, if an exchange is less successful in attracting quotes, order flow, and trade executions, then its market data products may be less desirable to customers in light of the diminished content and data products offered by competing venues may become more attractive. Thus, competition for quotations, order flow, and trade executions puts significant pressure on an exchange to maintain both execution and data fees at reasonable levels.

In addition, in the case of products that are also redistributed through market data vendors, such as Bloomberg and Thompson Reuters, the vendors themselves provide additional price discipline for proprietary data products because they control the primary means of access to certain end users. These vendors impose price discipline based upon their business models. For example, vendors that assess a surcharge on data they sell are able to refuse to offer proprietary products that their end users do not or will not purchase in sufficient numbers. Vendors will not elect to make available NYSE Arca BBO or NYSE Arca Trades unless their customers request it, and customers will not elect to pay the proposed fees unless NYSE Arca BBO and NYSE Arca Trades can provide value by sufficiently increasing revenues or reducing costs in the customer's business in a manner that will offset the fees. All of these factors operate as constraints on pricing proprietary data products.

Joint Product Nature of Exchange Platform

Transaction execution and proprietary data products are complementary in that market data is both an input and a byproduct of the execution service. In fact, proprietary market data and trade executions are a paradigmatic example of joint products with joint costs. The decision of whether and on which platform to post an order will depend on the attributes of the platforms where the order can be posted, including the execution fees, data availability and quality, and price and distribution of data products. Without a platform to post quotations, receive orders, and execute trades, exchange data products would not exist.

Non-ATS OTC Trading in National Market System Stocks,'' at 7–8.

The costs of producing market data include not only the costs of the data distribution infrastructure, but also the costs of designing, maintaining, and operating the exchange's platform for posting quotes, accepting orders, and executing transactions and the cost of regulating the exchange to ensure its fair operation and maintain investor confidence. The total return that a trading platform earns reflects the revenues it receives from both products and the joint costs it incurs.

Moreover, an exchange's broker-dealer customers generally view the costs of transaction executions and market data as a unified cost of doing business with the exchange. A broker-dealer will only choose to direct orders to an exchange if the revenue from the transaction exceeds its cost, including the cost of any market data that the broker-dealer chooses to buy in support of its order routing and trading decisions. If the costs of the transaction are not offset by its value, then the broker-dealer may choose instead not to purchase the product and trade away from that exchange.

Other market participants have noted that proprietary market data and trade executions are joint products of a joint platform and have common costs.[19] The Exchange agrees with and adopts those discussions and the arguments therein. The Exchange also notes that the economics literature confirms that there is no way to allocate common costs between joint products that would shed any light on competitive or efficient pricing.[20]

[19] *See* Securities Exchange Act Release No. 72153 (May 12, 2014), 79 FR 28575, 28578 n.15 (May 16, 2014) (SR–NASDAQ–2014–045) (''[A]ll of the exchange's costs are incurred for the unified purposes of attracting order flow, executing and/or routing orders, and generating and selling data about market activity. The total return that an exchange earns reflects the revenues it receives from the joint products and the total costs of the joint products.''). *See also* Securities Exchange Act Release No. 62907 (Sept. 14, 2010), 75 FR 57314, 57317 (Sept. 20, 2010) (SR–NASDAQ–2010–110), and Securities Exchange Act Release No. 62908 (Sept. 14, 2010), 75 FR 57321, 57324 (Sept. 20, 2010) (SR–NASDAQ–2010–111).

[20] *See generally* Mark Hirschey, Fundamentals of Managerial Economics, at 600 (2009) (''It is important to note, however, that although it is possible to determine the separate marginal costs of goods produced in variable proportions, it is impossible to determine their individual average costs. This is because common costs are expenses necessary for manufacture of a joint product. Common costs of production—raw material and equipment costs, management expenses, and other overhead—cannot be allocated to each individual by-product on any economically sound basis.. . . Any allocation of common costs is wrong and arbitrary.''). This is not new economic theory. *See, e.g.,* F. W. Taussig, ''A Contribution to the Theory of Railway Rates,'' *Quarterly Journal of Economics* V(4) 438, 465 (July 1891) (''Yet, surely, the division is purely arbitrary. These items of cost, in fact, are jointly incurred for both sorts of traffic; and I cannot share the hope entertained by the statistician of the Commission, Professor Henry C. Adams, that we shall ever reach a mode of apportionment that will lead to trustworthy results.'').

Analyzing the cost of market data product production and distribution in isolation from the cost of all of the inputs supporting the creation of market data and market data products will inevitably underestimate the cost of the data and data products because it is impossible to obtain the data inputs to create market data products without a fast, technologically robust, and well-regulated execution system, and system and regulatory costs affect the price of both obtaining the market data itself and creating and distributing market data products. It would be equally misleading, however, to attribute all of an exchange's costs to the market data portion of an exchange's joint products. Rather, all of an exchange's costs are incurred for the unified purposes of attracting order flow, executing and/or routing orders, and generating and selling data about market activity. The total return that an exchange earns reflects the revenues it receives from the joint products and the total costs of the joint products.

As noted above, the level of competition and contestability in the market is evident in the numerous alternative venues that compete for order flow, including 13 equities self-regulatory organization (''SRO'') markets, as well as various forms of alternative trading systems (''ATSs''), including dark pools and electronic communication networks (''ECNs''), and internalizing broker-dealers. SRO markets compete to attract order flow and produce transaction reports via trade executions, and two FINRA-regulated Trade Reporting Facilities compete to attract transaction reports from the non-SRO venues.

Competition among trading platforms can be expected to constrain the aggregate return that each platform earns from the sale of its joint products, but different trading platforms may choose from a range of possible, and equally reasonable, pricing strategies as the means of recovering total costs. For example, some platforms may choose to pay rebates to attract orders, charge relatively low prices for market data products (or provide market data products free of charge), and charge relatively high prices for accessing posted liquidity. Other platforms may choose a strategy of paying lower rebates (or no rebates) to attract orders, setting relatively high prices for market data products, and setting relatively low prices for accessing posted liquidity. For example, Bats Global Markets (''Bats'') and Direct Edge, which previously operated as ATSs and obtained exchange status in 2008 and 2010, respectively, provided certain market data at no charge on their Web sites in order to attract more order flow, and used revenue rebates from resulting additional executions to maintain low execution charges for their users.[21] In this environment, there is no economic basis for regulating maximum prices for one of the joint products in an industry in which suppliers face competitive constraints with regard to the joint offering.

Existence of Alternatives

The large number of SROs, ATSs, and internalizing broker-dealers that currently produce proprietary data or are currently capable of producing it provides further pricing discipline for proprietary data products. Each SRO, ATS, and broker-dealer is currently permitted to produce and sell proprietary data products, and many currently do, including but not limited to the Exchange, New York Stock Exchange LLC, NYSE MKT LLC, NASDAQ, Bats, and Direct Edge.

The fact that proprietary data from ATSs, internalizing broker-dealers, and vendors can bypass SROs is significant in two respects. First, non-SROs can compete directly with SROs for the production and sale of proprietary data products. By way of example, Bats and NYSE Arca both published proprietary data on the Internet before registering as exchanges. Second, because a single order or transaction report can appear in an SRO proprietary product, a non-SRO proprietary product, or both, the amount of data available via proprietary products is greater in size than the actual number of orders and transaction reports that exist in the marketplace. Indeed, in the case of NYSE Arca BBO and NYSE Arca Trades, the data provided through these products appears both in (i) real-time core data products offered by the Securities Information Processors (SIPs) for a fee, and (ii) free SIP data products with a 15-minute time delay, and finds a close substitute in similar products of competing venues.[22] Because market data users can find suitable substitutes for most proprietary market data products, a market that overprices its market data products stands a high risk that users may substitute another source of market data information for its own.

Those competitive pressures imposed by available alternatives are evident in the Exchange's proposed pricing.

In addition to the competition and price discipline described above, the market for proprietary data products is also highly contestable because market entry is rapid and inexpensive. The history of electronic trading is replete with examples of entrants that swiftly grew into some of the largest electronic trading platforms and proprietary data producers: Archipelago, Bloomberg Tradebook, Island, RediBook, Attain, TrackECN, BATS Trading and Direct Edge. A proliferation of dark pools and other ATSs operate profitably with fragmentary share of consolidated market volume.

In determining the proposed changes to the fees for the NYSE Arca BBO and NYSE Arca Trades, the Exchange considered the competitiveness of the market for proprietary data and all of the implications of that competition. The Exchange believes that it has considered all relevant factors and has not considered irrelevant factors in order to establish fair, reasonable, and not unreasonably discriminatory fees and an equitable allocation of fees among all users. The existence of numerous alternatives to the Exchange's products, including proprietary data from other sources, ensures that the Exchange cannot set unreasonable fees, or fees that are unreasonably discriminatory, when vendors and subscribers can elect these alternatives or choose not to purchase a specific proprietary data product if the attendant fees are not justified by the returns that any particular vendor or data recipient would achieve through the purchase.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change is effective upon filing pursuant to Section 19(b)(3)(A)[23] of the Act and subparagraph (f)(2) of Rule 19b–4[24] thereunder, because it establishes a due, fee, or other charge imposed by the Exchange.

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B)[25] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSEArca–2016–142 on the subject line.

Paper Comments

- Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSEArca–2016–142. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of

[21] This is simply a securities market-specific example of the well-established principle that in certain circumstances more sales at lower margins can be more profitable than fewer sales at higher margins; this example is additional evidence that market data is an inherent part of a market's joint platform.

[22] *See supra* note 15.

SECURITIES AND EXCHANGE COMMISSION

Proposed Collection; Comment Request

Upon Written Request, Copies Available From: Securities and Exchange Commission, Office of Investor Education and Advocacy, Washington, DC 20549–0213.

Extension:

Rule 12d3–1, SEC File No. 270–504, OMB Control No. 3235–0561

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (the ''Commission'') is soliciting comments on the collections of information summarized below. The Commission plans to submit these existing collections of information to the Office of Management and Budget (''OMB'') for extension and approval.

Section 12(d)(3) of the Investment Company Act of 1940 (15 U.S.C. 80a) generally prohibits registered investment companies (''funds''), and companies controlled by funds, from purchasing securities issued by a registered investment adviser, broker, dealer, or underwriter (''securities-related businesses''). Rule 12d3–1 (''Exemption of acquisitions of securities issued by persons engaged in securities related businesses'' (17 CFR 270.12d3–1)) permits a fund to invest up to five percent of its assets in securities of an issuer deriving more than fifteen percent of its gross revenues from securities-related businesses, but a fund may not rely on rule 12d3–1 to acquire securities of its own investment adviser or any affiliated person of its own investment adviser.

A fund may, however, rely on an exemption in rule 12d3–1 to acquire securities issued by its subadvisers in circumstances in which the subadviser would have little ability to take advantage of the fund, because it is not in a position to direct the fund's securities purchases. The exemption in rule 12d3–1(c)(3) is available if (i) the subadviser is not, and is not an affiliated person of, an investment adviser that provides advice with respect to the portion of the fund that is acquiring the securities, and (ii) the advisory contracts of the subadviser, and any subadviser that is advising the purchasing portion of the fund, prohibit them from consulting with each other concerning securities transactions of the fund, and limit their responsibility in providing advice to providing advice with respect to discrete portions of the fund's portfolio.

Based on an analysis of third-party information, the staff estimates that approximately 319 fund portfolios enter into subadvisory agreements each year.[1] Based on discussions with industry representatives, the staff estimates that it will require approximately 3 attorney hours to draft and execute additional clauses in new subadvisory contracts in order for funds and subadvisers to be able to rely on the exemptions in rule 12d3–1. Because these additional clauses are identical to the clauses that a fund would need to insert in their subadvisory contracts to rely on rules 10f–3, 17a–10, and 17e–1 and because we believe that funds that use one such rule generally use all of these rules, we apportion this 3 hour time burden equally to all four rules. Therefore, we estimate that the burden allocated to rule 12d3–1 for this contract change would be 0.75 hours.[2] Assuming that all 319 funds that enter into new subadvisory contracts each year make the modification to their contract required by the rule, we estimate that the rule's contract modification requirement will result in 239.25 burden hours annually.[3]

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid control number.

[1] Based on information available from Morningstar and the ICI Fact Book, we estimate that 37 percent of funds are advised by subadvisers.

[2] This estimate is based on the following calculation (3 hours ÷ 4 rules = .75 hours).

[3] This estimate is based on the following calculation: (0.75 hours × 319 portfolios = 239.25 burden hours).

Written comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted in writing within 60 days of this publication.

Please direct your written comments to Pamela Dyson, Director/Chief Information Officer, Securities and Exchange Commission, C/O Remi Pavlik-Simon, 100 F Street NE., Washington, DC 20549; or send an email to: *PRA_Mailbox@sec.gov.*

Dated: November 14, 2016.

Brent J. Fields,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79304; File No. SR–DTC–2016–013]

Self-Regulatory Organizations; The Depository Trust Company; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Modify the DTC Settlement Service Guide and Distributions Guide Relating to the Anticipated U.S. Market Transition to a Shortened Settlement Cycle

November 14, 2016.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1] and Rule 19b–4, thereunder[2] notice is hereby given that on November 7, 2016, The Depository Trust Company (''DTC'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II and III below, which Items have been prepared by the clearing agency. DTC filed the proposed rule change pursuant to Section 19(b)(3)(A)[3] of the Act and Rule 19b–4(f)(4)[4] thereunder. The proposed rule change was effective upon filing with the Commission. The Commission is

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] 15 U.S.C. 78s(b)(3)(A).

[4] 17 CFR 240.19b–4(f)(4).

publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Clearing Agency's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change would amend the Settlement Service Guide (''Settlement Guide'') [5] and the Distributions Guide (''Distributions Guide'') [6] (collectively, ''Guides'') of The Depository Trust Company (''DTC'') to make technical revisions to the Guides in anticipation of the U.S. market transition to ''T+2'' settlement and other revisions, as described below.[7] The proposed rule changes to the Guides would not become effective until DTC has submitted a subsequent proposed rule change under Rule 19b–4.[8] Therefore, DTC would not implement versions of the Guides reflecting the proposed rule change until an effective date is established by the subsequent proposed rule change.[9]

II. Clearing Agency's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the clearing agency included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The clearing agency has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

(A) Clearing Agency's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The standard settlement cycle for certain securities has not changed since 1993, when the Commission adopted the current version of Rule 15c6–1(a) under the Act,[10] which (subject to certain exceptions) prohibits any broker-dealer from entering into a contract for the purchase or sale of a security that provides for payment and delivery later than three business days after the trade date, unless otherwise expressly agreed to by the parties at the time of the transaction.

In an effort to reduce counterparty risk, decrease clearing capital requirements, reduce liquidity demands and harmonize the settlement cycle globally, the financial services industry, in coordination with its regulators, has been working on shortening the standard settlement cycle from T+3 to T+2. In connection therewith, the Commission has proposed a rule change to shorten the standard settlement cycle from T+3 to T+2.[11]

Effect on DTC

DTC provides depository and book-entry services pursuant to its Rules and Procedures, including its service guides and operational arrangements.[12] DTC services include custody of securities certificates and other instruments, and settlement and asset services for types of eligible securities including, among others, equities, warrants, rights, corporate debt and notes, municipal bonds, government securities, asset-backed securities, depositary receipts and money market instruments. As the holder of securities *vis a vis* issuers, DTC receives distributions, dividends, and corporate actions and passes them to its Participants.

DTC processes transactions for settlement, subject to its risk controls, on the same day it receives them. Distributions on securities held at DTC on behalf of its Participants pass through DTC and are credited to the accounts of Participants on the same day that they are paid to DTC. As a result, DTC's Rules and Procedures are not generally affected by the industry's move to T+2.

However, certain provisions in the Settlement Guide and Distributions Guide, respectively, relating to the DTC ID Net Service (''ID Net'') [13] and distributions on securities held at DTC include a presumption that transactions settle on a three-day settlement cycle (*i.e.,* T+3). This is expected to change as the securities industry switches to a standard T+2 settlement cycle in 2017. Pursuant to the proposed rule change, DTC would revise the texts of Guides to make conforming and technical changes as described below.

Settlement Guide Changes

DTC would modify the Settlement Guide relating to ID Net to accommodate the eventual move to T+2.

First, the deadline for submission of affirmed ID Net trades by a Matching Utility would be changed to 11:30 a.m. eastern time on settlement date minus one (''SD–1'') rather than specifically stating the deadline at 9 p.m. on T+2. The move to T+2 necessitates this change since ID transactions must enter the ID Net processing on the date prior to settlement date to realize processing efficiencies in relation to related CNS transactions settling on settlement date, as set forth in the Settlement Guide.[14]

Second, the Settlement Guide would be revised to state that ID Net Firms may exempt a receive obligation from ID Net before the night of SD–1 rather than before the night of T+2 as is currently stated. The move to T+2 necessitates this change because transactions are staged for ID Net on the night before settlement date.

DTC would also delete a reference in the Settlement Guide that states that ID Net trades must settle in the ''regular way'' and defines ''regular way'' as T+3. This provision is obsolete as DTC does not include scheduled settlement date as a criteria for ID Net processing.

Distributions Guide Changes

DTC would modify the Distributions Guide text relating to the DTC interim accounting process to account for the Shortened Settlement Cycle.

Interim accounting is an important part of the entitlement and allocation process relating to distributions. During the interim accounting period, DTC facilitates the entitlements and allocation process systematically for both the buyer and seller of a transaction conducted in the marketplace and submitted to CNS.[15] The interim accounting period is defined as the time period during which a trade settling has income or a due bill attached to it.[16] The due bill period is

[6] *Available at http://www.dtcc.com/~/media/Files/Downloads/legal/service-guides/Distributions%20Service%20Guide%20FINAL%20November%202014.pdf.*

[7] Capitalized terms not otherwise defined herein have the respective meanings set forth in the DTC Rules, By-laws and Organization Certificate (''Rules''), *available at http://www.dtcc.com/legal/rules-and-procedures.aspx,* the Settlement Guide and the Distributions Guide.

[8] 17 CFR 240.19b–4.

[9] DTC will post versions of the relevant sections of the respective Guides reflecting the changes as they would appear upon the effectiveness of the subsequent proposed rule change mentioned above and will include a note on the cover page of the Guides to advise Participants of these changes.

[10] 17 CFR 240.15c6–1.

[11] Amendment to Securities Transaction Settlement Cycle. *See* Securities Exchange Act Release No. 78962 (September 28, 2016), 81 FR 69240 (October 5, 2016) (S7–22–16).

[12] *Available at www.dtcc.com.*

[13] ID Net allows DTC Participants that are also members of National Securities Clearing Corporation (''NSCC'') to realize certain processing efficiencies with respect to institutional transactions processed at DTC for which related broker transactions are processed through NSCC's Continuous Net Settlement System (''CNS''). *See* Settlement Guide, *supra* note 5, at 35–43.

[14] *Id.*

[15] Securities movements for transactions processed through CNS occur free of payment at DTC. *See* Settlement Guide, *supra* note 5, at 15.

[16] In the absence of DTC's interim accounting process, trades scheduled to settle after the record date ''with distribution'' (those that entitle the

determined in accordance with market rules[17] and currently extends for the time from the record date[18] plus one day up to the ex-date plus two days.[19]

In order to prepare for the migration to T+2 settlement, DTC would modify the interim accounting process to account for the shortened period. In this regard, DTC would revise the Distributions Guide to reflect that the interim accounting period would reflect the anticipated due bill period that would be recognized by the industry, such that the interim accounting period would extend from the record date plus one day up to the ex-date plus one day. The proposed change to the interim accounting period would be reflected in the text of the subsections of the Interim Accounting section of the Distributions Guide.

DTC would also adjust the table in the Distributions Guide which describes the date on which certain stock distributions, the timing for which are tied to the settlement cycle, are allocated. Specifically, the table would be revised for affected distribution types, as follows to account for the shortening of the settlement cycle:

For this type of distribution[20]	Allocation normally occurs[21]
Stock dividends with a late ex-date	On the payable date or ex-date +*32,* whichever comes later.
Stock splits, with ex-distribution beginning on the business day following the payable date.	For the split shares on ex-date +*32.*
Stock spinoffs to a DTC-eligible security	On the payable date, or ex-date +*32,* whichever comes later.

DTC would also revise the text of the Distributions Guide to make a grammatical correction.

Implementation Date

The proposed rule changes to the Guides would not become effective until DTC has submitted a subsequent proposed rule change under Rule 19b–4.[22] Therefore DTC would not implement the proposed changes until an effective date is established by the subsequent proposed rule change. DTC anticipates that the implementation date would correspond with the industry's transition to a T+2 settlement cycle, which is currently anticipated to be in September 2017. It is anticipated by DTC that the proposed rule changes to the Guides would become effective immediately unless further regulatory action is required.

2. Statutory Basis

Section 17A(b)(3)(F) of the Act[23] requires that the rules of the clearing agency be designed, *inter alia,* to promote the prompt and accurate clearance and settlement of securities transactions. DTC believes that the proposed rule change is consistent with this provision because it would allow ID Net transactions and distributions to continue to be processed when the U.S. market standard settlement cycle is shortened. Thus, by allowing processing of transactions through ID Net and the Distributions Service in accordance with standard U.S. settlement timeframes (including when the standard settlement cycle is shortened), the proposed rule changes would promote the prompt and accurate clearance and settlement of securities transactions.

(B) Clearing Agency's Statement on Burden on Competition

DTC does not believe that the proposed rule change have any impact on competition because the proposed rule change consists of conforming and technical changes to the texts of the Guides that would correspond with the industry's transition to a T+2 settlement cycle.

(C) Clearing Agency's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

DTC has not solicited and does not intend to solicit comments regarding the proposed rule change. DTC has not received any unsolicited written comments from interested parties. To the extent DTC receives written comments on the proposed rule change, DTC will forward such comments to the Commission.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)[24] of the Act and paragraph (f) of Rule 19b–4[25] thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–DTC–2016–013 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549.

All submissions should refer to File Number SR–DTC–2016–013. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will

receiver to the distribution) would have a due bill or income payment that attached to document the entitlement and associated obligations between the seller and buyer relating to the distribution. The distribution entitlement would then need to be handled between the seller and the buyer of the security outside of DTC's Distributions Service.

[17] *E.g.,* New York Stock Exchange (''NYSE'') Rules 255–259, *available at http://nyserules.nyse.com/nyse/rules/nyse-rules/chp_1_3/chp_1_3_16/default.asp.*

[18] The record date is the date when an investor must be on the issuer's books as a shareholder to receive a distribution.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79306; File No. SR–BatsEDGX–2016–63]

Self-Regulatory Organizations; Bats EDGX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change to Fees for Use of Bats EDGX Exchange, Inc.

November 14, 2016.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 1, 2016, Bats EDGX Exchange, Inc. (the "Exchange" or "EDGX") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II and III below, which Items have been prepared by the Exchange. The Exchange has designated the proposed rule change as one establishing or changing a member due, fee, or other charge imposed by the Exchange under Section 19(b)(3)(A)(ii) of the Act[3] and Rule 19b–4(f)(2) thereunder,[4] which renders the proposed rule change effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange filed a proposal to amend the fee schedule applicable to Members[5] and non-members of the Exchange pursuant to EDGA Rules 15.1(a) and (c).

The text of the proposed rule change is available at the Exchange's Web site at *www.batstrading.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

Fee Code Z

The Exchange proposes to increase the fee for orders yielding fee code Z, which is yielded on orders routed to a non-exchange destination using ROUZ[6] routing strategy, from $0.00100 to $0.00120 per share for securities priced at or above $1.00. The Exchange does not propose to amend the rate for orders yielding fee code Z in securities priced below $1.00.

Fee Code O

The Exchange also proposes to amend footnote 5 of its Fee Schedule to increase the fee cap for orders yielding fee code O from $20,000 to $35,000 per month per Member. Fee code O is appended to orders that are touted to participate in the listing market's opening or re-opening cross and are charged a fee of $0.00100 per share for orders in securities priced at or above $1.00 and 0.30% of the transaction dollar value for securities priced below $1.00. When the Exchange routes to a listing exchange's opening cross, such as the Nasdaq Stock Market LLC ("Nasdaq"), the Exchange passes through the tier saving that Bats Trading, Inc. ("Bats Trading"), the Exchange's routing broker-dealer, achieves on an away exchange to its Members. This tier savings takes the form of a cap of Member's fees at $20,000 per month for using fee code O. The proposed increase in the fee cap under footnote 5 is in response to the September 2016 fee cap change by Nasdaq for orders that participate in their opening cross processes.[7] Nasdaq's September 2016 fee cap increase requires that members add, at a minimum, one million shares of liquidity to Nasdaq, on average per day, during the month to be eligible for its existing fee cap of $35,000 for orders that participate in the opening cross. When Bats Trading routes to Nasdaq's opening cross, it will now be subject to the increase fee cap and new tier requirement. The proposed increase to the fee cap under footnote 5 would enable the Exchange to equitably allocate its costs among all Members utilizing fee code O. Therefore, the Exchange proposes to amend footnote 5 to increase the fee cap for orders yielding fee code O from $20,000 to $35,000 per month per Member in response to Nasdaq's September 2016 increased fee cap and related requirements.

Implementation Date

The Exchange proposes to implement this amendment to its Fee Schedule November 1, 2016.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] 15 U.S.C. 78s(b)(3)(A)(ii).

[4] 17 CFR 240.19b–4(f)(2).

[5] The term "Member" is defined as "any registered broker or dealer that has been admitted to membership in the Exchange." *See* Exchange Rule 1.5(n).

[6] *See* Exchange Rule 11.11(g)(3).

[7] *See* Securities Exchange Act Release No. 78977 (September 29, 2016), 81 FR 691140 [sic] (October 5, 2016) (SR–Nasdaq–2016–132) (increasing the fee cap for orders executed in its opening cross from $30,000 to $35,000).

the objectives of Section 6 of the Act,[8] in general, and furthers the objectives of Section 6(b)(4),[9] in particular, as it is designed to provide for the equitable allocation of reasonable dues, fees and other charges among its Members and other persons using its facilities.

Fee Code Z

The Exchange believes that its proposal to increase the fee for orders routed to a non-exchange destination that yield fee code Z represents an equitable allocation of reasonable dues, fees, and other charges among Members and other person using its facilities in that they are designed in part to cover the costs of routing. While Members that route to a non-exchange destination using ROUZ routing strategy will be paying higher fees due to the proposal, the increased revenue received by the Exchange will be used to fund the Exchange generally, including the cost of maintaining and improving the technology used to handle and route orders from the Exchange as well as programs that the Exchange believes help to attract additional liquidity and thus improve the depth of liquidity available on the Exchange. Accordingly, although the cost of routing is increasing, the Exchange believes that the increase is a modest increase and that higher routing fees will benefit Members in other ways. Furthermore, the Exchange notes that routing through the Exchange is voluntary. Lastly the Exchange also believes that the proposed amendment is non-discriminatory because it applies uniformly to all Members.

Fee Code O

The Exchange believes that its proposal to amend footnote 5 to increase the fee cap for orders yielding fee code O from $20,000 to $35,000 per month per Member represents an equitable allocation of reasonable dues, fees, and other charges among Members and other persons using its facilities. The proposed increase in the fee cap under footnote 5 is in response to September 2016 fee cap increase by Nasdaq for orders that participate in their opening cross process. Prior to Nasdaq's September 2016 fee cap increase, Nasdaq capped Bats Trading monthly fees for participating in it's opening cross at $30,000. Nasdaq capped Bats Trading monthly fees for participating in its opining cross at $30,000. Nasdaq has now increased that cap to $35,000.[10] The proposed increase to the fee cap under footnote 5 would enable the Exchange to equitably allocate its costs among all Member who utilize fee code O. Therefore, the Exchange believes that the proposed change to footnote 5 is equitable and reasonable because it accounts for the increased Nasdaq fee cap, which enables the Exchange to apply to its Member similar fee caps. The Exchange notes that routing though Bats Trading is voluntary and believes that the proposed change is non-discriminatory because it applies uniformly to all Members.

B. Self-Regulatory Organization's Statement on Burden on Competition

This proposed rule change does not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange does not believe that this change represents a significant departure from previous pricing offered by the Exchange or from pricing offered by the Exchange's competitors. Additionally, Members may opt to disfavor the Exchange's pricing if they believe that alternatives offer them better value. Accordingly, the Exchange does not believe that the proposed changes will impair the ability of Members or competing venues to maintain their competitive standing in the financial markets. The Exchange believes that its proposal would not burden intramarket competition because the proposed rates would apply uniformly to all Members.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange has not solicited, and does not intend to solicit, comments on this proposed rule change. The Exchange has not received any written comments from members or other interested parties.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act[11] and paragraph (f) of Rule 19b–4 thereunder.[12] At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–BatsEDGX–2016–63 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–BatsEDGX–2016–63. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–BatsEDGX–2016–63, and should be submitted on or before December 9, 2016.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79297; File No. SR–DTC–2016–012]

Self-Regulatory Organizations; The Depository Trust Company; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Modify the DTC Settlement Service Guide With Respect to Settlement Instructions Provided to DTC by Matching Utilities

November 14, 2016.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'') [1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 3, 2016, The Depository Trust Company (''DTC'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II and III below, which Items have been prepared by the clearing agency. DTC filed the proposed rule change pursuant to Section 19(b)(3)(A) [3] of the Act and Rule 19b–4(f)(4) [4] thereunder. The proposed rule change was effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Clearing Agency's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change by DTC would make technical and clarifying changes to text in the DTC Settlement Service Guide (''Guide'') [5] with respect to settlement instructions provided to DTC by Matching Utilities (as defined below) on behalf of Participants.[6]

II. Clearing Agency's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the clearing agency included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The clearing agency has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

(A) Clearing Agency's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

DTC may accept eligible affirmed institutional transactions (''Institutional Transactions'') [7] from an entity providing a matching service [8] (''Matching Utility'') that is (i) a clearing agency registered pursuant to Section 17A of the Act, (ii) an entity that has obtained an exemption from such registration from the Commission, or (iii) a ''qualified vendor'' for trade confirmation/affirmation services as defined by the rules of a self-regulatory organization.[9] In addition, a Matching Utility must establish a connection to DTC in accordance with DTC's reasonable requirements in order to be able to submit Affirmed Transactions.

Currently, Omgeo Global Joint Venture Matching Services—US, LLC (hereinafter ''Omgeo'') [10] is the only Matching Utility that has established a connection with DTC. This is reflected in the text of the Guide which contains specific references to Omgeo with respect to DTC functions that are accessible to any Matching Utility that satisfies the connection requirements.

The Commission recently approved two applications by two separate entities, for exemption from registration as a Clearing Agency to provide post-trade matching services for fixed income and equity trades (''Approved Exemptions'').[11] According to the Commission's notice of the Approved Exemptions, these entities each indicated an intention to offer matching services that connect to DTC for settlement.[12]

DTC proposes to revise the Guide to generalize references to Matching Utilities and make other changes, as set forth below.

First, DTC would replace specific references to Omgeo in sections describing procedures for the ID Net Service (''ID Net'') and Shareholder Tracking Service to refer to a ''Matching Utility'' and delete provisions referencing to Omgeo by name.[13]

Second, text in the ID Net section of the Guide regarding DTC's acceptance of affirmed institutional transactions from Matching Utilities would be moved to a new section describing Affirmed Transactions more generally. The proposed new section would incorporate the definition of Affirmed Transactions, and expressly state DTC's current requirement that in order for a Matching Utility to establish and maintain a connection with DTC the Matching Utility must be able to balance with DTC in an automated way [14] and

[13] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] 15 U.S.C. 78s(b)(3)(A).

[4] 17 CFR 240.19b–4(f)(4).

[5] *Available at http://www.dtcc.com/~/media/Files/Downloads/legal/service-guides/Settlement.pdf.*

[6] Capitalized Terms not otherwise defined herein have the meaning set forth in the DTC Rules, By-laws and Organization Certificate (''DTC Rules''), *available at http://www.dtcc.com/legal/rules-and-procedures.aspx*, and the Guide, *supra* note 5.

[7] An Institutional Transaction is a securities transaction between a broker-dealer and its institutional customer (*e.g.,* sell-side firms, buy-side institutions, and custodians).

[8] A matching service is an electronic service by which an intermediary matches (*i.e.,* reconciles) trade information from the counterparties to an Institutional Transaction, to generate an affirmed transaction (''Affirmed Transaction'') which is then used to provide settlement instructions for the Affirmed Transactions to the central securities depository, such as DTC, at which the Affirmed Transaction settles.

[9] *See* Securities Exchange Act Release No. 39829 (April 6, 1998), 63 FR 17943 (April 13, 1998) at 17946 (providing interpretive guidance on types of entities that may provide a matching service).

[10] See [sic] Securities Exchange Act Release No. 44188 (April 17, 2001), 66 FR 20494 (April 23, 2001) (600–31) for the order of the Commission granting Omgeo an exemption from registration as a clearing agency. Omgeo is a global provider of post-trade, pre-settlement processing services for the institutional market.

[11] Securities Exchange Act Release No. 76514 (November 24, 2015), 80 FR 75387 (December 1, 2015) (600–33, 600–34) (Bloomberg STP LLC; SS&C Technologies, Inc.; Order of the Commission Approving Applications for an Exemption from Registration as a Clearing Agency; Notice).

[12] *Id.*

[13] In this regard, the term Matching Utility would be defined in the Guide reflecting the definition provided above in this Form 19b–4. The Commission notes that Form 19b–4 is attached to the filing, not to this Notice. The definition of Affirming Agency which appears in the ID Net section of the Guide and is the functional equivalent of the definition of Matching Utility as it relates to ID Net would be removed. Consistent with this change, references in the Guide to the term Affirming Agency would be replaced to use the term Matching Utility.

[14] For each Matching Utility interfacing with DTC, DTC would require the Matching Utility to deliver a daily message on each business day shortly after noon from the Matching Utility with their accepted item counts of institutional delivery and ID Net (defined below) transaction totals for Settlement Date minus one transactions. DTC's system would compare the totals from the Matching Utility to its accepted item counts. If the totals match, an ''acknowledged balance'' balance file would be sent to the Matching Utility. If the totals do not match, DTC would respond with the list of Settlement Date minus one control numbers received from the Matching Utility, along with their respective transaction types for the originating Matching Utility to compare.

communicate transactions to and from DTC with the necessary mandated fields, *i.e.,* transaction control number, DTC receiver and deliverer account number, CUSIP, message type, share quantity, market type, buy-sell indicator, broker ID, ID agent internal account number, broker internal account number, agent bank ID, settlement amount, origination entity, recipient of message, institution, and settlement date.[15]

Third, the Guide would clarify that (i) a Participant that is a counterparty to an Affirmed Transaction, as submitted to DTC by a Matching Utility, is deemed to have authorized the Matching Utility to provide an instruction to DTC, on the Participant's behalf, to process the Affirmed Transaction in accordance with DTC's Rules and Procedures[16] and (ii) the submission of an Affirmed Transaction to DTC by the Matching Utility, on behalf of the Participant, constitutes the duly authorized instruction of the Participant to DTC to process the Affirmed Transaction in accordance with the Rules and Procedures.[17]

Fourth, the Guide would state that a Matching Utility that elects to enter into an arrangement to interoperate with another Matching Utility (''Interoperability Arrangement'') maintains the sole responsibility to ensure that its customers, including but not limited to DTC Participants that are customers of the Matching Utility, are operationally prepared to process Affirmed Transactions relating to the Interoperability Arrangement prior to the submission of such Affirmed Transactions to DTC.

Finally, the proposed rule change would make technical and clarifying changes to the Guide to:

(1) Clarify and streamline the text to improve readability;

(2) Add background information regarding the Affirmed Transactions accepted by DTC;

(3) Correct spelling, grammatical and typographical errors throughout and update tenses from future to present with respect to functions of ID Net and the Shareholder Tracking Service; and

(4) Add a title page to the Guide.

Implementation Date

The proposed rule change would become effective as of November 3, 2016.

2. Statutory Basis

Section 17A(b)(3)(F)[18] of the Act requires that the rules of the clearing agency be designed, *inter alia,* to promote the prompt and accurate clearance and settlement of securities transactions. DTC believes that the proposed rule change is consistent with this provision because it would (i) clarify the text of the Guide with respect to fair access to DTC for those Matching Utilities that satisfy DTC's reasonable requirements so that DTC may accept Affirmed Transactions from them, (ii) clarify the responsibilities of Matching Utilities that intend to interoperate and submit related Affirmed Transactions to DTC, and (iii) clarify the terms pursuant to which a Participant's duly authorized instructions to process Affirmed Transactions are provided to DTC by a Matching Utility. Thus, by facilitating transparency in the Guide with respect to DTC's requirements for acceptance of Affirmed Transactions from Matching Utilities and clarifying the responsibilities of interoperating Matching Utilities in this regard, as well as by clarifying the terms pursuant to which a Participant's duly authorized instructions to process Affirmed Transactions are provided to DTC by a Matching Utility, the proposed rule change would promote the prompt and accurate clearance and settlement of securities transactions.

(B) Clearing Agency's Statement on Burden on Competition

DTC does not believe that the proposed rule change would have any impact or impose any burden on competition because it would merely update the Guide to make technical and clarifying changes and updates with respect to DTC's acceptance of Affirmed Transactions from Matching Utilities.

(C) Clearing Agency's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

DTC has not solicited and does not intend to solicit comments regarding the proposed rule change. DTC has not received any unsolicited written comments from interested parties. To the extent DTC receives written comments on the proposed rule change, DTC will forward such comments to the Commission. DTC has discussed the proposed rule change with Matching Utilities that have contacted DTC specifically with respect to establishing a connection with DTC.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)[19] of the Act and paragraph (f) of Rule 19b–4[20] thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

• Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or

• Send an email to *rule-comments@sec.gov.* Please include File Number SR–DTC–2016–012 on the subject line.

Paper Comments

• Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549.

All submissions should refer to File Number SR–DTC–2016–012. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/*

[15] A Matching Utility that intends to establish a new connection with DTC must promptly contact DTC in order to establish a plan to establish a connection and allow adequate time to develop and adequately test the interface prior to the date it expects to implement its connection to DTC.

[16] Pursuant to the Rules, the term ''Procedures'' means the Procedures, service guides, and regulations of the Corporation adopted pursuant to Rule 27, as amended from time to time. Rule 1, Section 1, supra [sic] note 6, at 13.

[17] DTC will attempt to process an eligible transaction in accordance with a duly authorized instruction of the Delivering Participant provided to DTC in this regard. *See* Rule 6, *supra* note 6. Processing by DTC of the Delivery of the Securities subject of the transaction is subject to satisfaction of risk controls by the Participants to the transaction. Rule 9(B), Section 1, *supra* note 6. A Delivery is also subject to approval by the Receiver in the Receiver Authorized Delivery system before DTC will process the Delivery. Guide, *supra* note 5, at 57.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79305; File No. SR–BatsEDGA–2016–26]

Self-Regulatory Organizations; Bats EDGA Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change Related to Fees for Use of Bats EDGA Exchange, Inc.

November 14, 2016.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 1, 2016, Bats EDGA Exchange, Inc. (the ''Exchange'' or ''EDGA'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II and III below, which Items have been prepared by the Exchange. The Exchange has designated the proposed rule change as one establishing or changing a member due, fee, or other charge imposed by the Exchange under Section 19(b)(3)(A)(ii) of the Act[3] and Rule 19b–4(f)(2) thereunder,[4] which renders the proposed rule change effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange filed a proposal to amend the fee schedule applicable to Members[5] and non-members of the Exchange pursuant to EDGA Rules 15.1(a) and (c).

The text of the proposed rule change is available at the Exchange's Web site at *www.batstrading.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend its Fee Schedule to: (i) Delete references to the ROOC routing strategy, which was previously, removed from the Exchange's rulebook;[6] and (ii) increase the fees associate for orders in securities priced at or above $1.00 that yield fee codes RT, RX, or Z.

Deletion of References to the ROOC Routing Strategy

The Exchange previously submitted a proposed rule change for immediate effectiveness to discontinue the ROOC routing strategy and to remove references to the ROOC routing strategy from its rulebook.[7] The Exchange now proposes to delete three references to the ROOC routing strategy from its Fee Schedule, as those associated rates and references have not been applicable since the Exchange discontinued the ROOC routing strategy. These changes are to delete:

- Fee code RN and its associate rates, which is appended to orders routed to the Nasdaq Stock Market LLC using the ROOC routing strategy and add liquidity.
- a reference to ROOC in fee code RT, which is appended to orders routed using the ROUT or ROOC routing strategy; and
- a reference to the ROOC routing strategy in footnote 12, which lists the routing strategies eligible for fee code CR.

Fee Codes RT, RX, and Z

The Exchange also proposes to increase the fees associated with orders in securities priced at or above $1.00 that yield fee codes RT, RX, or Z.[8] First the Exchange proposes to increase the fee for orders yielding fee code RT, which are routed using a ROUT[9] or ROOC[10] routing strategy, from $0.00250 to $0.00260 per share. Second, the Exchange proposes to increase the fee for orders yielding fee code RX, which are routed using a ROUX[11] routing strategy, from $0.00270 to $0.00280 per share. Lastly, the Exchange proposes to increase the fee for orders yielding fee code Z, which are routed to a non-exchange destination using ROCO[12] or ROUZ[13] routing strategy, from $0.00100 to $0.00120 per share.

Implementation Date

The Exchange proposes to implement these amendments to its Fee Schedule November 1, 2016.

[11] *See* Exchange Rule 11.11(g)(3).

[12] *Id.*

[13] *Id.*

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with the objectives of Section 6 of the Act,[14] in general, and furthers the objectives of Section 6(b)(4),[15] in particular, as it is designed to provide for the equitable allocation of reasonable dues, fees and other charges among its Members and other persons using its facilities.

Deletion of References to the ROOC Routing Strategy

The Exchange believes it is equitable, reasonable, and not unfairly discriminatory to delete references to the ROOC routing strategy from its Fee Schedule because it is removing reference and rates for a product that the Exchange no longer provides.[16] The Exchange believes that the proposed changes will make the Fee Schedule clearer and eliminate potential investor confusion, thereby removing impediments to and perfecting the mechanism of a free and open market and a national market system, and, in general, protecting investors and the public interest.

Fee Codes RT, RX, and Z

The Exchange believes that its proposal to increase the fee for orders that yield fee codes RT, RX, or Z represents an equitable allocation of reasonable dues, fees, and other charges among Members and other persons using its facilities in that they are designed in part to cover the costs of routing. While the affected Members' orders will be charged higher fees due to the proposal, the increased revenue received by the Exchange will be used to fund the Exchange generally, including the cost of maintaining and improving the technology used to handle and route orders from the Exchange as well as programs that the Exchange believes help to attract additional liquidity and thus improve the depth of liquidity available on the Exchange. Accordingly, although the cost of routing is increasing, the Exchange believes that he increase is modest and that higher routing fees will benefit Members in other ways. Furthermore, the Exchange notes that routing through the Exchange is voluntary. Lastly, the Exchange also believes that the proposed amendment is non-discriminatory because it applies uniformly to all Members.

[14] 15 U.S.C. 78f.

[15] 15 U.S.C. 78f(b)(4).

[16] *See supra* note 4.

B. Self-Regulatory Organization's Statement on Burden on Competition

This proposed rule change does not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange does not believe that the changes to fee codes RT, RX, and Z represent a significant departure from previous pricing offered by the Exchange or from pricing offered by the Exchange's competitors. Additionally, Members may opt to disfavor the Exchange's pricing if they believe that alternatives offer them better value. Accordingly, the Exchange does not believe that the proposed changes will impair the ability of Members or competing venues to maintain their competitive standing in the financial markets. The Exchange believes that its proposal would not burden intramarket competition because the proposed rates would apply uniformly to all Members.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange has not solicited, and does not intend to solicit, comments on this proposed rule change. The Exchange has not received any written comments from members or other interested parties.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act [17] and paragraph (f) of Rule 19b–4 thereunder.[18] At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or

[17] 15 U.S.C. 78s(b)(3)(A).

[18] 17 CFR 240.19b–4(f).

- Send an email to *rule-comments@sec.gov.* Please include File Number SR–BatsEDGA–2016–26 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–BatsEDGA–2016–26. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–BatsEDGA–2016–26, and should be submitted on or before December 9, 2016.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[19]

Brent J. Fields,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79308; File No. SR–BOX–2016–52]

Self-Regulatory Organizations; BOX Options Exchange LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend the Fee Schedule on the BOX Market LLC (“BOX”) Options Facility

November 14, 2016.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ‘‘Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 8, 2016, BOX Options Exchange LLC (the ‘‘Exchange'') filed with the Securities and Exchange Commission (‘‘Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Exchange filed the proposed rule change pursuant to Section 19(b)(3)(A)(ii) of the Act,[3] and Rule 19b–4(f)(2) thereunder,[4] which renders the proposal effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of the Substance of the Proposed Rule Change

The Exchange is filing with the Securities and Exchange Commission (‘‘Commission'') a proposed rule change to amend the Fee Schedule on the BOX Market LLC (‘‘BOX'') options facility. The text of the proposed rule change is available from the principal office of the Exchange, at the Commission's Public Reference Room and also on the Exchange's Internet Web site at *http://boxexchange.com.*

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] 15 U.S.C. 78s(b)(3)(A)(ii).

[4] 17 CFR 240.19b–4(f)(2).

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend the Fee Schedule for trading on BOX. Specifically, the Exchange proposes to revise certain qualification thresholds in Sections I.B.1 of the BOX Fee Schedule, Primary Improvement Order and I.B.2 of the BOX Fee Schedule, the BOX Volume Rebate (‘‘BVR'').

Primary Improvement Order

Under the tiered fee schedule for Primary Improvement Orders, the Exchange assesses a per contract execution fee to all Primary Improvement Order executions where the corresponding PIP or COPIP Order is from the account of a Public Customer. Percentage thresholds are calculated on a monthly basis by totaling the Initiating Participant's Primary Improvement Order volume submitted to BOX, relative to the total national Customer volume in multiply-listed options classes. The Exchange proposes to adjust the percentage thresholds in Tiers 4 and 5. Specifically, the Exchange proposes to change Tier 4 from ‘‘0.500% to 0.999%'' to ‘‘0.500% to 0.949%'' and Tier 5 from ‘‘1.000% and Above'' to ‘‘0.950% and Above.'' The Exchange notes that it is not proposing any changes to the fees within the Primary Improvement Order fee structure and the quantity submitted will continue to be calculated on a monthly basis by totaling the Initiating Participant's Primary Improvement Order volume submitted to BOX, relative to the total national Customer volume in multiply-listed options classes.

BVR

Next, the Exchange proposes to adjust certain percentage thresholds within the BVR. Under the BVR, the Exchange offers a tiered per contract rebate for all Public Customer PIP Orders and COPIP Orders of 100 and under contracts that do not trade solely with their contra order. Percentage thresholds are calculated on a monthly basis by totaling the Participant's PIP and COPIP volume submitted to BOX, relative to the total national Customer volume in multiply-listed options classes. The Exchange proposes to adjust the percentage thresholds in Tiers 3 and 4. Specifically, the Exchange proposes to change Tier 3 from ‘‘0.340% to 0.999%'' to ‘‘0.340% to 0.949%'' and Tier 4 from ‘‘1.000% and Above'' to ‘‘0.950% and Above.'' The Exchange notes that is it not proposing any changes to the fees within the BVR. The quantity submitted will continue to be calculated on a monthly basis by totaling the Participant's PIP and COPIP volume submitted to BOX, relative to the total national Customer volume in multiply-listed options classes.

2. Statutory Basis

The Exchange believes that the proposal is consistent with the requirements of Section 6(b) of the Act, in general, and Section 6(b)(4) and 6(b)(5)of the Act,[5] in particular, in that it provides for the equitable allocation of reasonable dues, fees, and other charges among BOX Participants and other persons using its facilities and does not unfairly discriminate between customers, issuers, brokers or dealers.

BOX believes it is reasonable, equitable and not unfairly discriminatory to adjust the monthly Percentage Thresholds of National Customer Volume in Multiply-Listed Options Classes. The volume thresholds with their tiered fees and rebates are meant to incentivize Participants to direct order flow to the Exchange to obtain the benefit of the lower fee or higher rebate, which in turn benefits all market participants by increasing liquidity on the Exchange.

The Exchange believes the proposed amendments to the Primary Improvement Order percentage thresholds are reasonable, equitable and not unfairly discriminatory. The proposed changes to the thresholds are equitable and not unfairly discriminatory as they are available to all BOX Participants that initiate Auction Transactions, and Participants may choose whether or not to take advantage of the percentage thresholds and their applicable discounted fees. Further, the Exchange believes that the proposed changes are reasonable and competitive as they will further incentivize Participants to direct order flow to the Exchange, benefiting all market participants.

The Exchange also believes the proposed amendments to the BVR in Section I.B.2 of the BOX Fee Schedule are reasonable, equitable and not unfairly discriminatory. The BVR was adopted to attract Public Customer order flow to the Exchange by offering these Participants incentives to submit their PIP and COPIP Orders to the Exchange and the Exchange believes it is appropriate to now amend the BVR. The Exchange believes it is equitable and not unfairly discriminatory to amend the BVR, as all Participants have the ability

[5] 15 U.S.C. 78f(b)(4) and (5).

to qualify for a rebate, and rebates are provided equally to qualifying Participants. Other exchanges employ similar incentive programs; [6] and the Exchange believes that the proposed changes to the volume thresholds are reasonable and competitive when compared to incentive structures at other exchanges. Finally, the Exchange believes it is reasonable and appropriate to continue to provide incentives for Public Customers, which will result in greater liquidity and ultimately benefit all Participants trading on the Exchange.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. The Exchange is simply proposing to amend certain percentage thresholds for Auction Transaction fees and rebates in the BOX Fee Schedule. The Exchange believes that the volume based rebates and fees increase intermarket and intramarket competition by incenting Participants to direct their order flow to the exchange, which benefits all participants by providing more trading opportunities and improves competition on the Exchange.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Exchange Act [7] and Rule 19b–4(f)(2) thereunder,[8] because it establishes or changes a due, or fee.

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend the rule change if it appears to the Commission that the action is necessary or appropriate in the public interest, for the protection of investors, or would otherwise further the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–BOX–2016–52 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–BOX–2016–52. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–BOX–2016–52, and should be submitted on or before December 9, 2016.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[9]

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79309; File No. SR–BatsBZX–2016–76]

Self-Regulatory Organizations; Bats BZX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change Related to Fees for Use of Bats BZX Exchange, Inc.

November 14, 2016.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 7, 2016, Bats BZX Exchange, Inc. (the ''Exchange'' or ''BZX'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Exchange has designated the proposed rule change as one establishing or changing a member due, fee, or other charge imposed by the Exchange under Section 19(b)(3)(A)(ii) of the Act [3] and Rule 19b–4(f)(2) thereunder,[4] which renders the proposed rule change effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange filed a proposal to amend the fee schedule applicable to Members [5] and non-members of the Exchange pursuant to BZX Rules 15.1(a) and (c).

The text of the proposed rule change is available at the Exchange's Web site at *www.batstrading.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] 15 U.S.C. 78s(b)(3)(A)(ii).

[4] 17 CFR 240.19b–4(f)(2).

[5] The term ''Member'' is defined as ''any registered broker or dealer that has been admitted to membership in the Exchange.'' *See* Exchange Rule 1.5(n).

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to increase the fee for orders yielding fee code Z, which results from an order routed to a dark liquidity venue (except through the SLIM [6] routing strategy), from $0.00250 to $0.00280 per share for securities priced at or above $1.00 and for securities priced below $1.00. The Exchange proposes to implement this amendment to its Fee Schedule immediately.[7]

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with the objectives of Section 6 of the Act,[8] in general, and furthers the objectives of Section 6(b)(4),[9] in particular, as it is designed to provide for the equitable allocation of reasonable dues, fees and other charges among its Members and other persons using its facilities. The Exchange believes that its proposal to increase the fee for orders routed to a dark liquidity venue that yield fee code Z represents an equitable allocation of reasonable dues, fees, and other charges among Members and other person using its facilities in that they are designed in part to cover the costs of routing. While Members that route orders to a dark liquidity venue will be paying higher fees due to the proposal, the increased revenue received by the Exchange will be used to fund the Exchange generally, including the cost of maintaining and improving the technology used to handle and route orders from the Exchange as well as programs that the Exchange believes help to attract additional liquidity and thus improve the depth of liquidity available on the Exchange. Accordingly, although the cost of routing is increasing, the Exchange believes that the increase is a modest increase and that higher routing fees will benefit Members in other ways. Furthermore, the Exchange notes that routing through the Exchange is voluntary. Lastly the Exchange also believes that the proposed amendment is non-discriminatory because it applies uniformly to all Members.

[6] *See* Exchange Rule 11.13(b)(3).

[7] The Exchange initially submitted the proposed rule change on October 28, 2016. (SR–BatsBZX–2016–70). On November 3, 2016, the Exchange withdrew SR–BatsBZX–2016–70 and submitted SR–BatsBZX–2016–72. On November 7, 2016, the Exchange withdrew SR–BatsBZX–2016–72 and submitted this filing.

[8] 15 U.S.C. 78f.

[9] 15 U.S.C. 78f(b)(4).

B. Self-Regulatory Organization's Statement on Burden on Competition

This proposed rule change does not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange does not believe that this change represents a significant departure from previous pricing offered by the Exchange or from pricing offered by the Exchange's competitors. Additionally, Members may opt to disfavor the Exchange's pricing if they believe that alternatives offer them better value. Accordingly, the Exchange does not believe that the proposed changes will impair the ability of Members or competing venues to maintain their competitive standing in the financial markets. The Exchange believes that its proposal would not burden intramarket competition because the proposed rate would apply uniformly to all Members.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange has not solicited, and does not intend to solicit, comments on this proposed rule change. The Exchange has not received any written comments from members or other interested parties.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act [10] and paragraph (f) of Rule 19b–4 thereunder.[11] At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

[10] 15 U.S.C. 78s(b)(3)(A).

[11] 17 CFR 240.19b–4(f).

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

• Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or

• Send an email to *rule-comments@sec.gov.* Please include File Number SR–BatsBZX–2016–76 on the subject line.

Paper Comments

• Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–BatsBZX–2016–76. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–BatsBZX–2016–76, and should be submitted on or before December 9, 2016.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[12]

Brent J. Fields,

Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79295; File No. SR–MSRB–2016–15]

Self-Regulatory Organizations; Municipal Securities Rulemaking Board; Notice of Filing of a Proposed Rule Change To Extend the MSRB's Customer Complaint and Related Recordkeeping Rules to Municipal Advisors and To Modernize Those Rules

November 14, 2016.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Exchange Act'' or ''Act'') [1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 1, 2016, the Municipal Securities Rulemaking Board (the ''MSRB'' or ''Board'') filed with the Securities and Exchange Commission (the ''SEC'' or ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the MSRB. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The MSRB filed with the Commission a proposed rule change consisting of (i) proposed amendments to Rule G–10, on delivery of investor brochure, Rule G–8, on books and records to be made by brokers, dealers, and municipal securities dealers and municipal advisors, and Rule G–9, on preservation of records, and (ii) a proposed Board notice regarding electronic delivery and receipt of information by municipal advisors under Rule G–32, on disclosures in connection with primary offerings (collectively, the ''proposed rule change''). The MSRB requests that the proposed rule change be approved with an implementation date of six months after the Commission approval date for all changes.

The text of the proposed rule change is available on the MSRB's Web site at *www.msrb.org/Rules-and-Interpretations/SEC-Filings/2016-Filings.aspx,* at the MSRB's principal office, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the MSRB included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The MSRB has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

Background

Following the financial crisis of 2008, Congress enacted the Dodd-Frank Wall Street Reform and Consumer Protection Act (the ''Dodd-Frank Act'').[3] The Dodd-Frank Act amended Section 15B of the Exchange Act to establish a new federal regulatory regime requiring municipal advisors to register with the Commission, deeming them to owe a fiduciary duty to their municipal entity clients and granting the MSRB rulemaking authority over them. The MSRB, in the exercise of that rulemaking authority, has been developing a comprehensive regulatory framework for municipal advisors and their associated persons.[4]

Further, and concurrent with its efforts to develop a comprehensive regulatory framework for municipal advisors and their associated persons, the MSRB initiated a review of its rules and related interpretive guidance for brokers, dealers and municipal securities dealers (collectively, ''dealers'') and municipal advisors (municipal advisors, together with dealers, ''regulated entities''). The MSRB initiated that review in the context of the Board's obligation to protect investors, municipal entities, obligated persons, and the public interest. As part of that review, the MSRB solicited comments from market participants.[5] In response, market participants recommended that the Board update Rule G–10.[6] The proposed rule change, consisting of amendments to Rule G–10 and its related recordkeeping rules, Rules G–8 and G–9, and guidance under Rule G–32, is an important element of both MSRB regulatory initiatives.

Proposed Rule Change

To extend its customer complaint and recordkeeping rules to municipal advisors and to modernize those rules, the Board is filing this proposed rule change with the Commission. Specifically, the proposed rule change would (i) extend the Board's customer complaint recordkeeping requirements to all municipal advisors (*i.e.,* non-solicitor and solicitor municipal advisors) as well as align those recordkeeping requirements more closely with the customer complaint recordkeeping requirements of other financial regulators, (ii) require that all regulated entities retain their customer or municipal advisory client [7] complaint records for six years, (iii) overhaul Rule G–10 so that the rule would more closely focus on customer and municipal advisory client education and protection as well as align that rule with customer education and protection rules of other financial regulators, and (iv)

[1] 15 U.S.C. 78s(b)(i).

[2] 17 CFR 240.19b–4.

[3] Public Law 111–203, 124 Stat. 1376 (2010).

[4] MSRB Rule D–11 defines ''associated persons'' as follows:

Unless the context otherwise requires or a rule of the Board otherwise specifically provides, the terms ''broker,'' ''dealer,'' ''municipal securities broker,'' ''municipal securities dealer,'' ''bank dealer,'' and ''municipal advisor'' shall refer to and include their respective associated persons. Unless otherwise specified, persons whose functions are solely clerical or ministerial shall not be considered associated persons for purposes of the Board's rules.

[5] MSRB Notice 2012–63, Request for Comment on MSRB Rules and Interpretive Guidance (Dec. 18, 2012).

[6] *See, e.g.,* Letter from David L. Cohen, Managing Director and Associate General Counsel, Securities Industry and Financial Markets Association, dated February 19, 2013, to Ronald W. Smith, Corporate Secretary, Municipal Securities Rulemaking Board (commenting that (i) the requirement to deliver an investor brochure under Rule G–10 should be eliminated, (ii) the investor brochure is of limited value, if any, to institutional investors as well as investors in municipal fund securities, and (iii) alternatively, the MSRB could accomplish the objective of Rule G–10 by posting the investor brochure on its Web site); Letter from Gerald K. Mayfield, Senior Counsel, Wells Fargo & Company Law Department, dated February 19, 2013, to Ronald W. Smith, Corporate Secretary, Municipal Securities Rulemaking Board (commenting that (i) the requirement to deliver an investor brochure under Rule G–10 should be eliminated, (ii) the investor brochure is of limited value, if any, to institutional investors as well as investors in municipal fund securities, and (iii) alternatively, the MSRB could accomplish the objective of Rule G–10 by posting the investor brochure on its Web site).

[7] The proposed rule change, in Rule G–8(e)(ii), would define a municipal advisory client as a municipal entity or an obligated person for whom the municipal advisor engages in activities that would cause the municipal advisor to be a municipal advisor, as defined in Section 15B(e)(4) of the Exchange Act, 15 U.S.C. 78*o*–4(e)(4).

extend the Board's guidance under Rule G–32, Notice Regarding Electronic Delivery and Receipt of Information by Brokers, Dealers and Municipal Securities Dealers (Nov. 20, 1998) (the ''1998 Notice''), to municipal advisors.

In summary, by regulated entity, the proposed rule change would:

Municipal Advisors

- Amend Rule G–8 to exclude municipal advisors from the definition of ''customers;''
- amend Rule G–8 to include the definition of ''municipal advisory client;''
- amend Rule G–8 to extend the requirements that are similar to the rule's customer complaint recordkeeping requirements to municipal advisory client complaint recordkeeping;
- amend Rule G–8 to provide guidance in supplementary material that would define electronic recordkeeping;
- amend Rule G–8 to provide guidance in supplementary material that would remind a municipal advisor that it may be required to promptly report certain municipal advisory client complaints to other regulatory authorities;
- amend Rule G–9 to require that the records of municipal advisory client complaints be kept for at least six years;
- amend Rule G–10 to extend requirements that are similar to the rule's dealer customer protection and education requirements to municipal advisory client protection and education; and
- extend to municipal advisors, under Rule G–32, the guidance provided by the 1998 Notice, as relevant.

Dealers

- Amend Rule G–8 to require that dealers keep a standardized complaint log electronically, using product and problem codes tailored for municipal securities, to document the written complaints of customers;
- amend Rule G–8 to define written customer complaints to include complaints received electronically by the dealer;
- amend Rule G–8 to provide guidance in supplementary material that would define electronic recordkeeping;
- amend Rule G–8 to provide guidance in supplementary material that would remind a dealer that it may be required to promptly report certain written customer complaints to other regulatory authorities; and
- amend Rule G–10 in its entirety so that the rule would more clearly focus on customer protection and education.

A detailed rule discussion of the proposed rule change's recordkeeping requirements, customer and municipal advisory client education and protection requirements, and electronic delivery guidance to municipal advisors follows.

A. Recordkeeping Requirements

Rule G–8 currently requires that a dealer keep a record of all written complaints from customers and what action, if any, has been taken by the dealer in connection with those complaints. Under the proposed rule change, the Board would amend Rule G–8 to enhance its current recordkeeping requirements and then would extend those enhanced recordkeeping requirements to municipal advisors. More specifically, the proposed rule change would require regulated entities to retain additional detailed information about complaints electronically using a standard set of complaint product and problem codes. Supplementary Material would define electronic recordkeeping, and would remind regulated entities of their complaint reporting obligations to other regulatory authorities.

The three major components of the proposed rule change relating to complaint recordkeeping enhancements—namely, the application of those requirements to municipal advisors, the electronic complaint log, and supplementary material—are discussed below.

(i) Application of Customer Complaint Recordkeeping Requirements to Municipal Advisors

Under the proposed rule change, the Board would amend Rule G–8 to extend its complaint recordkeeping requirements to all municipal advisors. To accomplish this, the Board would (i) define municipal advisory client and (ii) require that a municipal advisor keep a record of written municipal advisory client complaints similar to the record that would be required for dealers to keep of customer complaints (*see* discussion under ''Electronic Complaint Log'' below).[8] The Board also would extend the record retention period applicable to customer complaints under Rule G–9(a)(v) to municipal advisory client complaints under the proposed amendment to Rule G–9(h)(iii).

A municipal advisory client, as previously noted, would include a municipal entity or obligated person for whom the municipal advisor engages in activities that cause the municipal advisor to be within the definition of a municipal advisor set forth in Section 15B(e)(4) of the Exchange Act.[9] Consistent with the Board's mandate under the Dodd-Frank Act to protect investors, municipal entities, and obligated persons,[10] the proposed rule change's definition of municipal advisory client would include clients of non-solicitor and solicitor municipal advisors.

The definition of a municipal advisor set forth in Section 15B(e)(4)(A) [11] is broad and includes non-solicitor and solicitor municipal advisors. Section 15B(e)(4)(A)(ii),[12] in turn, references the definition of ''solicitation of a municipal entity or obligated person'' set forth in Section 15B(e)(9) of the Exchange Act.[13] Section 15B(e)(9),[14] in part, defines a solicitation of a municipal entity or obligated person to mean ''a direct or indirect communication with a municipal entity or obligated person made by a person, for direct or indirect compensation, on behalf of a broker, dealer, municipal securities dealer, municipal advisor, or investment adviser . . . that does not control . . . the person undertaking such solicitation . . . .'' As such, the potential pool of written complaints could, for example, include a written complaint made by a municipal advisory client relating to an advertisement of the solicitor municipal advisor. Nonetheless, to protect municipal entity clients and obligated persons, the Board believes that it is important to capture the written complaints made by the full spectrum of municipal advisory clients of a solicitor municipal advisor.

Further, under the proposed rule change, the Board would amend Rule G–9 to extend the record retention period for municipal advisory client complaints to six years. Without such an extension, records of customer complaints would be kept for six years, while records of municipal advisory

[8] ''Written'' would include electronic correspondence. ''Complaint'' would mean any written statement alleging a grievance involving the activities of the dealer or municipal advisor or any of their associated persons with respect to any matter involving a customer's or the municipal entity client's account. *See* the proposed amendments to Rule G–8(a)(x)(ii) and (h).

[9] 15 U.S.C. 78*o*(e)(4).

[10] *See supra* note 3.

[11] Section 15B(e)(4), 15 U.S.C. 78*o*–4(e), provides, in part, that the term municipal advisor:

(A) Means a person (who is not a municipal entity or an employee of a municipal entity) that—

(i) provides advice to or on behalf of a municipal entity or obligated person with respect to municipal financial products or the issuance of municipal securities, including advice with respect to the structure, timing, terms, and other similar matters concerning such financial products or issues; or

(ii) undertakes a solicitation of a municipal entity . . .

[12] 15 U.S.C. 78*o*(e)(4)(A)(ii).

[13] 15 U.S.C. 78*o*(e)(9).

[14] *Id.*

client complaints would be kept for five years. Because of the potential importance of municipal advisory client complaints to informing other regulators on inspections of regulated entities and on the potential enforcement of MSRB rules (*see* discussion under ''Electronic Complaint Log'' below), the MSRB believes that the retention period for such municipal advisory client complaint records should correspond to that of customer complaint records.[15]

(ii) Electronic Complaint Log

Under the proposed rule change, the Board would amend Rule G–8 to require that all regulated entities keep an electronic complaint log of all written complaints of customers or municipal advisory clients and persons acting on behalf of such customers or municipal advisory clients. There would be no option to keep the complaint log in a paper format. The electronic complaint log would include identifying information about the customer or municipal advisory client (*i.e.,* his, her or its name, address, and account number), the date the complaint was received, the date of the activity that gave rise to the complaint, and the person whom the customer or municipal advisory client names in his or her complaint. The record also would include a description of the nature of complaint, and the action, if any, the dealer or municipal advisor has taken concerning the complaint. The log would require that the regulated entity code the complaint using a standard set of product and problem codes.

By enhancing the information about customer and municipal advisory client complaints that a regulated entity would be required to keep, as well as by requiring that the regulated entity keep those records electronically using standard codes, the Board would align Rule G–8 with the recordkeeping requirements of other financial regulators. For example, Rule 17a–3(18) under the Exchange Act[16] and FINRA Rule 4513[17] each require information about customer complaints similar to what would be required under the proposed rule change. Those rules require identifying information about the customer, the date the complaint was received, the name of any associated person named in the complaint, a description of the nature of the complaint and the disposition of the complaint.[18] Further, FINRA Rule 4530 requires that dealers use product and problem codes to code their electronic logs of customer complaints.[19]

In addition, by requiring that customer and municipal advisory client complaint records be kept electronically using standard codes, the Board believes that the proposed rule change would enhance the ability of other financial regulators to conduct more cost-effective and efficient inspections and surveillance of regulated entities. The Board understands that other financial regulators conduct certain portions of their inspections and monitoring of dealers electronically. Under the proposed rule change, the Board would ensure that inspections of certain dealers and municipal advisors that are not members of FINRA also could be accomplished in a more cost-effective and efficient manner.

As noted above, under the proposed rule change, the Board would develop codes for the electronic complaint log that would be based on the product and problem codes required by FINRA Rule 4530, but would be tailored to address municipal securities and municipal advisory activities.[20] The Board would make such codes available in a manual that would be posted on its Web site. A regulated entity, similar to FINRA Rule 4530, would be required to select the most prominent product and the most egregious problem discussed in the complaint. In the future, however, the Board may require that all products and problems be coded in the electronic customer or municipal advisory client complaint log.

While the electronic complaint log requirement would impose a burden on dealers and municipal advisors, the Board anticipates that the electronic complaint log requirement would impose little additional burden on dealers that are FINRA members. The proposed rule change's complaint log recordkeeping requirements are similar to the requirements relating to customer complaints set forth in Rule 17a–3 under the Exchange Act.[21] Under Rule G–8(f), dealers in compliance with Rule 17a–3 will be deemed to be in compliance with Rule G–8 as long as certain information is maintained, including information relating to customer complaints.[22] In addition, dealers that are FINRA members currently must comply with FINRA Rule 4530, the rule, in part, with which the Board is seeking to align the proposed rule change. Further, as discussed under ''Self-Regulatory Organization's Statement on Burden on Competition'' below, the recordkeeping burden imposed on dealers and municipal advisors would be necessary to help protect customers and municipal advisory clients.

(iii) Supplementary Material

The proposed rule change would include supplementary material under Rule G–8 that would (i) provide guidance as to the term ''electronic format'' used in the proposed amendments to Rules G–8(a) and (h) and (ii) remind regulated entities of their reporting obligations to other regulatory authorities. The supplementary material, in .01, would make clear that a regulated entity could use any electronic format, *i.e.,* computer software that allows for the storing, organization and manipulation of data, as long as the software would allow for the electronic complaint log to be

[15] The Board notes, however, that there are instances where the record retention requirements between dealers and municipal advisors differ. For example, dealers are required to retain records of gifts and gratuities under Rule G–20 for six years, while municipal advisors only are required to retain such records for five years.

[16] Rule 17a–3(a)(18), 17 CFR 240.17a–3(a)(18), provides, in part, that every member of a national securities exchange who transacts a business in securities directly with others than members of a national securities exchange, and every broker or dealer who transacts a business in securities through the medium of any such member, and every broker or dealer registered pursuant to section 15 of the Securities Exchange Act of 1934, as amended, shall make and keep current the following books and records relating to its business:

A record:

(i) As to each associated person of each written customer complaint received by the member, broker or dealer concerning that associated person. The record shall include the complainant's name, address, and account number; the date the complaint was received; the name of any other associated person identified in the complaint; a description of the nature of the complaint; and the disposition of the complaint . . .

(ii) Indicating that each customer of the member, broker or dealer has been provided with a notice containing the address and telephone number of the department of the member, broker or dealer to which any complaints as to the account may be directed.

[17] FINRA Rule 4513(a) provides, in part, that:

[e]ach member shall keep and preserve in each office of supervisory jurisdiction either a separate file of all written customer complaints that relate to that office (including complaints that relate to activities supervised from that office) and action taken by the member, if any, or a separate record of such complaints and a clear reference to the files in that office containing the correspondence connected with such complaints.

[18] *See supra* notes 16 and 17.

[19] *See* FINRA Rule 4530(d). The product and problem codes used under Rule 4530 as of August 29, 2016 are available at *http://www.finra.org/sites/default/files/Web%20-%20Complaints%20%20Problem%20and%20Product%20Codes_0.pdf.*

[20] *Id.*

[21] *See supra* note 16.

[22] Specifically, Rule G–8(f) provides that:

Brokers, dealers and municipal securities dealers other than bank dealers which are in compliance with rule 17a–3 of the Commission will be deemed to be in compliance with the requirements of this rule, provided that the information required by subparagraph (a)(iv)(D) of this rule as it relates to uncompleted transactions involving customers; paragraph (a)(viii); and paragraphs (a)(xi) through (a)(xxvi) shall in any event be maintained.

provided promptly upon request to a financial regulatory authority. The supplementary material, in .02, also would remind a regulated entity that it may have the duty to report certain complaints, such as complaints involving theft, to other regulatory authorities, such as to FINRA or to the SEC.

B. Customer and Municipal Advisory Client Education and Protection

Under the proposed rule change, the Board would amend and overhaul Rule G–10 to replace the current Rule G–10 with a more modern customer and municipal advisory client education and protection rule. The proposed rule change's amendments to Rule G–10 would apply to dealers and municipal advisors.

At its core, the Board designed Rule G–10 to protect investors by providing investors with the information necessary through the investor brochure to file a complaint about their dealers with the appropriate regulatory authority. That information also includes an overview of the investor protections provided by MSRB rules. However, investors currently do not receive this information until after they have made a complaint to or about the dealer; at that point, the information in the investor brochure may arrive at a point in time that would impede the investor from making the best use of the information provided in the investor brochure. The proposed rule change solves that problem through modernization of the rule.

Under the proposed rule change, Rule G–10 would remain a rule that is focused on investor education and protection. However, instead of an investor receiving the educational material and information about filing a complaint only after he or she has made a complaint, the customer or municipal advisory client would receive more regular notifications from its regulated entity about the availability of such materials. Specifically, a dealer would be required to notify a customer about its registration status and the availability of the educational material annually, and a municipal advisor would be required to notify a municipal advisory client [23] about its registration and the availability of educational material promptly but no less than once each calendar year during the course of a municipal advisory relationship. The notifications would require that the regulated entity disclose (i) that the regulated entity is registered with the MSRB and the SEC, (ii) the MSRB's Web site address, and (iii) that there is a brochure available on the MSRB Web site that describes the protections available under MSRB rules and how to file a complaint with financial regulatory authorities.

By requiring these notifications, the Board believes that a customer or municipal advisory client would be able to receive detailed and relevant information about its regulated entity, the protections provided by MSRB rules, and how to make a complaint in a more timely and consistent fashion.[24] Further, by reminding the customer or municipal advisory client about the regulated entity's registration with the SEC, the Board believes that a customer or municipal advisory client might be more likely to access the information and educational materials that are available from the SEC, the regulatory authority that may examine the regulated entity and/or enforce the MSRB's rules. The notifications would address concerns raised by market participants that the investor brochure may be of limited, if any, use to certain investors, such as institutional investors and investors in municipal fund securities, by directing investors to the most complete range of relevant information about the regulated entity, including the regulation of that regulated entity.[25]

Under the proposed rule change, the Board would not specify, other than in writing, how the customer or municipal advisory client would receive the notifications. The proposed rule change assumes that the regulated entity could include the notifications with other materials. Further, as suggested by commenters to Regulatory Notice 2012–63, unlike with the current Rule G–10, a regulated entity would not be required to deliver an investor brochure to the customer. The notifications would replace that requirement.[26]

The proposed amendments to Rule G–10 would align Rule G–10 with FINRA Rule 2267, Investor Education and Protection. That rule contains similar notification requirements, but the notifications under FINRA Rule 2267 refer the investor to the BrokerCheck Hotline Number and to FINRA's Web site address.[27] Because dealers that are FINRA members are required to provide annual notifications to investors, the Board anticipates that it would not be a significant burden for most dealers to provide the annual notifications that would be required under the proposed amendments to Rule G–10. In addition, the Board believes that it would be a reasonable requirement for a municipal advisor to provide such notifications promptly but no less than once each calendar year during the course of a municipal advisory relationship.

C. Electronic Delivery Guidance for Municipal Advisors

In 1998, the Board published guidance under Rule G–32 regarding the electronic delivery and receipt of information by dealers. The Board, in part, based that guidance on guidance that the SEC had provided about electronic delivery of information. However, since that time, the Dodd-Frank Act has granted the Board with rulemaking authority over municipal advisors.[28] To ensure that municipal advisors could take full advantage of the

[23] The term ''municipal advisory client'' under the proposed amendments to Rule G–10 would be more narrow than how the term would be defined under the proposed amendments to Rule G–8. Under the proposed rule change, the Board would define solicitation of a municipal entity or obligated person under Rule G–10 by reference to Rule 15Ba1–1(n), 17 CFR 240.15Ba1–1(n), under the Exchange Act. For purposes of that rule, solicitation does not include:

(1) Advertising by a broker, dealer, municipal securities dealer, municipal advisor, or investment adviser; or

(2) Solicitation of an obligated person, if such person is not acting in the capacity of an obligated person or the solicitation of the obligated person is not in connection with the issuance of municipal securities or with respect to municipal financial products.

By using the narrower definition of solicitation of a municipal entity or obligated person, the Board would be able to better ensure that the notifications are sent to actual solicitor municipal advisory clients and not just to an entity that reviewed an advertisement. For purposes of the proposed amendments to Rule G–10, the set of non-solicitor municipal advisory clients would remain the same as it is for the proposed amendments to Rule G–8.

[24] The Board would increase the visibility of the brochure, and other relevant information, on the MSRB's Web site.

[25] *See supra* note 6.

[26] The Board believes that by no longer requiring that the investor brochure be sent after the investor has made a complaint, the investor may have an improved ''complaint'' experience. The Board understands that investors may have been frustrated by the timing of their receipt of the investor brochure. Some investors may have believed that the brochure was not germane and helpful to the complaint, particularly when they would have preferred information about resolving the issue and/or the actual resolution of the issue. Those investors, in turn, may have complained to their dealers about the investor brochure, and their dealers, in response, may have sent yet another investor brochure to be in compliance with Rule G–10. *See id.*

[27] FINRA Rule 2267(a) provides, in part, that:

Except as otherwise provided in this Rule, each member shall once every calendar year provide in writing (which may be electronic) to each customer the following items of information:

(1) FINRA BrokerCheck Hotline Number;

(2) FINRA Web site address; and

(3) A statement as to the availability to the customer of an investor brochure that includes information describing FINRA BrokerCheck.

[28] *See supra* note 3.

Board's electronic delivery guidance, as well as to ensure that the proposed amendments to Rule G–10 would work as intended, the proposed rule change would extend the Board's guidance provided by the 1998 Notice to municipal advisors.

2. Statutory Basis

Section 15B(b)(2) of the Exchange Act [29] provides that:

[t]he Board shall propose and adopt rules to effect the purposes of this title with respect to transactions in municipal securities effected by brokers, dealers, and municipal securities dealers and advice provided to or on behalf of municipal entities or obligated persons by brokers, dealers, municipal securities dealers, and municipal advisors with respect to municipal financial products, the issuance of municipal securities, and solicitations of municipal entities or obligated persons undertaken by brokers, dealers, municipal securities dealers, and municipal advisors.

Section 15B(b)(2)(C) of the Exchange Act [30] provides that the MSRB's rules shall:

be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in municipal securities and municipal financial products, to remove impediments to and perfect the mechanism of a free and open market in municipal securities and municipal financial products, and, in general, to protect investors, municipal entities, obligated persons, and the public interest.

The MSRB believes that the proposed rule change is consistent with Sections 15B(b)(2) [31] and 15B(b)(2)(C) [32] of the Exchange Act. The proposed rule change would help prevent fraudulent and manipulative practices, promote just and equitable principles of trade, foster cooperation and coordination with persons engaged in regulating transactions in municipal securities and municipal financial products, and protect investors, municipal entities, obligated persons and the public interest by developing more comprehensive and modern customer and municipal advisory client complaint and recordkeeping rules. The proposed rule change would overhaul Rule G–10 so that the rule would more clearly focus on customer and municipal advisory client education and protection. Further, the proposed rule change would enhance the Board's related recordkeeping requirements under Rule G–8 about written customer and municipal advisory client complaints to require that regulated entities keep more detailed information about written customer or municipal advisory client complaints in an electronic format.

The proposed rule change would align the Board's customer and municipal advisory client complaint rules and related recordkeeping requirements with those of other financial regulators. By so doing, the proposed rule change will likely promote compliance with Board rules by providing regulated entities with the opportunity to streamline their compliance procedures, and thus promote compliance with MSRB rules and reduce their compliance costs.

In addition, the proposed amendments to Rules G–8 and G–9 would enhance the ability of other financial regulators to conduct more cost-effective and efficient inspections and surveillance of regulated entities by requiring that all regulated entities keep and maintain their electronic records of written customer or municipal advisory client complaints for six years. The Board believes that the ability to more cost-effectively and efficiently monitor written customer and municipal advisory client complaints will promote compliance with Board rules. Increased compliance with Board rules will likely reduce the frequency and magnitude of compliance issues that could potentially result in harm to investors, municipal entities, or obligated persons, or undermine the public's confidence in the municipal securities market.

Section 15B(b)(2)(L)(iv) of the Exchange Act [33] requires that rules adopted by the Board:

not impose a regulatory burden on small municipal advisors that is not necessary or appropriate in the public interest and for the protection of investors, municipal entities, and obligated persons, provided that there is robust protection of investors against fraud.

The proposed rule change's extension of Rule G–10's customer education and protection requirements and the related Rules G–8 and G–9 recordkeeping requirements to municipal advisors does represent an additional burden on municipal advisors, including small municipal advisors. However, the Board believes that the regulatory burden will be relatively limited and is necessary to protect municipal entity and obligated person clients, and the integrity of the municipal securities and municipal advisory marketplaces.

The MSRB also believes that the proposed rule change is consistent with Section 15B(b)(2)(G) of the Exchange Act,[34] which provides that the MSRB's rules shall

prescribe records to be made and kept by municipal securities brokers, municipal securities dealers, and municipal advisors and the periods for which such records shall be preserved.

The proposed rule change would enhance the current customer complaint recordkeeping requirements under Rule G–8 by requiring that dealers keep more detailed information about written customer complaints in an electronic format and then would extend those recordkeeping requirements to municipal advisors. Further, the proposed rule change would extend the six-year record retention period applicable to customer complaints to municipal advisory client complaints. As noted above, the MSRB believes that the proposed amendments to Rule G–8 related to books and records, and Rule G–9 related to the retention of those records, will promote compliance with and facilitate enforcement of MSRB rules, including Rule G–10 and other applicable securities laws and regulations.

B. Self-Regulatory Organization's Statement on Burden on Competition

Section 15B(b)(2)(C) of the Exchange Act [35] requires that MSRB rules not be designed to impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Exchange Act. In addition, Section 15B(b)(2)(L)(iv) of the Exchange Act [36] provides that MSRB rules may not impose a regulatory burden on small municipal advisors that is not necessary or appropriate in the public interest and for the protection of investors, municipal entities, and obligated persons, provided that there is robust protection of investors against fraud.

In determining whether these standards have been met, the MSRB was guided by the Board's Policy on the Use of Economic Analysis in MSRB Rulemaking.[37] In accordance with this policy, the Board has evaluated the potential impacts on competition of the proposed rule change, including in comparison to reasonable alternative regulatory approaches, relative to the

[29] 15 U.S.C. 78*o*–4(b)(2).

[30] 15 U.S.C. 78*o*–4(b)(2)(C).

[31] 15 U.S.C. 78*o*–4(b)(2).

[32] 15 U.S.C. 78*o*–4(b)(2)(C).

[33] 15 U.S.C. 78*o*–4(b)(2)(L)(iv).

[34] 15 U.S.C. 78*o*–4(b)(2)(G).

[35] 15 U.S.C. 78*o*–4(b)(2)(C).

[36] 15 U.S.C. 78*o*–4(b)(2)(L)(iv).

[37] Policy on the Use of Economic Analysis in MSRB Rulemaking, available at, *http://msrb.org/Rules-and-Interpretations/Economic-Analysis-Policy.aspx*.

baseline. The MSRB also considered other economic impacts of the proposed rule change and has addressed any comments relevant to these impacts in other sections of this document.

The MSRB does not believe that the proposed rule change will impose any additional burdens on competition, relative to the baseline, that are not necessary or appropriate in furtherance of the purposes of the Exchange Act.

While the MSRB believes that the proposed rule changes represent a reduction in burden compared to the existing Rule G–10, the MSRB recognizes that the recordkeeping requirements associated with the proposed rule change may impose some initial costs on dealers that currently comply with FINRA Rule 4530 but need to adopt a new set of complaint codes. The MSRB also recognizes that dealers that are not currently FINRA members may experience a greater burden as the proposed recordkeeping requirements may constitute a new activity that they have not previously performed. The MSRB does not believe, however, that the potentially greater burden on dealers that are not FINRA members is significant enough to constitute a burden on competition.

The MSRB recognizes that the proposal represents a new requirement on municipal advisors and that the recordkeeping requirements in particular may disproportionately impact small municipal advisors. However, the MSRB does not believe that the overall burden of the proposed rule change is significant or that the impact on small municipal advisors will materially alter the competitive landscape. To the extent the proposed rule changes do lead some firms to exit the market or consolidate, based on the SEC's analysis in its order adopting the municipal advisor rules, the MSRB believes that the market for municipal advisory activities is likely to remain competitive.[38]

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period of up to 90 days (i) as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve or disapprove such proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov*. Please include File Number SR–MSRB–2016–15 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549.

All submissions should refer to File Number SR–MSRB–2016–15. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the MSRB. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–MSRB–2016–15 and should be submitted on or before December 9, 2016.

For the Commission, pursuant to delegated authority.[39]

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79307; File No. SR–BatsBYX–2016–34]

Self-Regulatory Organizations; Bats BYX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change Related to Fees for Use of Bats BYX Exchange, Inc.

November 14, 2016.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 7, 2016, Bats BYX Exchange, Inc. (the ''Exchange'' or ''BYX'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Exchange has designated the proposed rule change as one establishing or changing a member due, fee, or other charge imposed by the Exchange under Section 19(b)(3)(A)(ii) of the Act[3] and Rule 19b–4(f)(2) thereunder,[4] which renders the proposed rule change effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange filed a proposal to amend the fee schedule applicable to Members[5] and non-members of the Exchange pursuant to BYX Rules 15.1(a) and (c).

The text of the proposed rule change is available at the Exchange's Web site at *www.batstrading.com,* at the

principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to increase the fee for orders yielding fee code Z, which results from an order routed to a dark liquidity venue (except through the SLIM [6] routing strategy), from $0.00200 to $0.00220 per share for securities priced at or above $1.00 and for securities priced below $1.00. The Exchange proposes to implement this amendment to its Fee Schedule immediately.[7]

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with the objectives of Section 6 of the Act,[8] in general, and furthers the objectives of Section 6(b)(4),[9] in particular, as it is designed to provide for the equitable allocation of reasonable dues, fees and other charges among its Members and other persons using its facilities. The Exchange believes that its proposal to increase the fee for orders routed to a dark liquidity venue that yield fee code Z represents an equitable allocation of reasonable dues, fees, and other charges among Members and other person using its facilities in that they are designed in part to cover the costs of routing. While Members that route orders to a dark liquidity venue will be paying higher fees due to the proposal, the increased revenue received by the Exchange will be used to fund the Exchange generally, including the cost of maintaining and improving the technology used to handle and route orders from the Exchange as well as programs that the Exchange believes help to attract additional liquidity and thus improve the depth of liquidity available on the Exchange. Accordingly, although the cost of routing is increasing, the Exchange believes that the increase is a modest increase and that higher routing fees will benefit Members in other ways. Furthermore, the Exchange notes that routing through the Exchange is voluntary. Lastly the Exchange also believes that the proposed amendment is non-discriminatory because it applies uniformly to all Members.

B. Self-Regulatory Organization's Statement on Burden on Competition

This proposed rule change does not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange does not believe that this change represents a significant departure from previous pricing offered by the Exchange or from pricing offered by the Exchange's competitors. Additionally, Members may opt to disfavor the Exchange's pricing if they believe that alternatives offer them better value. Accordingly, the Exchange does not believe that the proposed changes will impair the ability of Members or competing venues to maintain their competitive standing in the financial markets. The Exchange believes that its proposal would not burden intramarket competition because the proposed rate would apply uniformly to all Members.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange has not solicited, and does not intend to solicit, comments on this proposed rule change. The Exchange has not received any written comments from members or other interested parties.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act [10] and paragraph (f) of Rule 19b–4 thereunder.[11] At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov*. Please include File Number SR–BatsBYX–2016–34 on the subject line.

Paper Comments

- Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–BatsBYX–2016–34. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–BatsBYX–2016–34, and should be submitted on or before December 9, 2016.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79296; File No. SR–FINRA–2016–029]

Self-Regulatory Organizations; Financial Industry Regulatory Authority, Inc.; Order Approving Rule Change Amending the Code of Arbitration Procedure for Customer Disputes and the Code of Arbitration Procedure for Industry Disputes To Require All Parties Other Than Pro Se Customers To File and Serve Pleadings and Documents Through the FINRA Office of Dispute Resolution's Party Portal and To Permit Mediation Parties To Use the Portal

November 14, 2016.

I. Introduction

On July 27, 2016, Financial Industry Regulatory Authority, Inc. (''FINRA'') filed with the Securities and Exchange Commission (''Commission''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Exchange Act'')[1] and Rule 19b–4 thereunder,[2] a proposed rule change to amend the Code of Arbitration Procedure for Customer Disputes (''Customer Code'') and the Code of Arbitration Procedure for Industry Disputes (''Industry Code'' and, together with the Customer Code, ''Codes''), to require all parties, except customers who are not represented by an attorney or other person (''*pro se* customers''), to use the FINRA Office of Dispute Resolution's Party Portal (''Party Portal'') to file initial statements of claim and to file and serve pleadings and other documents on FINRA or any other party. Under the proposed rule change, FINRA would require parties to use the Party Portal to file and serve correspondence relating to discovery requests, but would not permit parties to file documents produced in response to discovery requests through the Party Portal. FINRA is also proposing to amend the Code of Mediation Procedure (''Mediation Code'') to permit mediation parties to agree to use the Party Portal to submit and retrieve all documents and other communications. In addition, FINRA is revising other provisions in the Codes to conform to existing practice.

The proposed rule change was published for comment in the **Federal Register** on August 17, 2016.[3] The public comment period closed on September 7, 2016. On September 26, 2016, FINRA extended the time period in which the Commission must approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether to approve or disapprove the proposed rule change to November 15, 2016.[4] The Commission received five comment letters in response to the Notice.[5] On October 28, 2016, FINRA responded to the comment letters received in response to the Notice.[6] This order grants approval of the proposed rule change.

II. Description of the Proposed Rule Change [7]

Background

In 2004, FINRA implemented an online, web-based arbitration claim notification and filing system that allowed a claimant [8] or claimant's counsel to file voluntarily an arbitration claim through that system (''online claim filing system'').[9] Currently, the Codes allow a claimant to file a claim [10] either in hard copy or by using the online claim filing system.[11] The online claim filing system allows a claimant to complete forms, submit documents, and pay filing fees online.

In June 2013, FINRA introduced a separate secure, online service called the Dispute Resolution Portal (''DR Portal'') to facilitate interactions among parties, arbitrators, mediators, and FINRA staff on arbitration case-related matters. As further discussed below, the DR Portal includes both a Party Portal and an Arbitrator and Mediator Portal. The Party Portal uses an invitation/registration process that provides a way to send and receive arbitration and mediation case documents. For example, once a party notifies FINRA of the name of the person who should be given access to the arbitration or mediation case file (typically the party's representative), FINRA sends an email to the named person with an invitation to register on the Party Portal via a personalized web address link that provides complete access to the specified case. Once registered, the representative can provide other individuals (such as legal assistants and co-counsel) with access to appropriate cases on the Party Portal.

FINRA initially opened the Party Portal to a small number of firms to gain experience with the technology and to incorporate user feedback. Over time, FINRA expanded access to the Party Portal, and as of July 20, 2015, FINRA allowed all parties to use the Party Portal voluntarily in all arbitration and mediation cases filed as of that date. Through the Party Portal, parties can, among other things, receive documents from and send documents to FINRA, receive service [12] of a claim, submit an answer to a claim, submit additional case documents, view the status of a case, and select arbitrators.

FINRA has periodically upgraded the Party Portal to allow parties to, among other things, schedule hearings, receive automated messages when new documents are posted, see an indication of received documents not yet viewed, and send documents to other Party Portal case participants. FINRA believes that using the online claim filing system improves the forum by hastening the

[12] Service is the process of delivering a pleading (*e.g.,* the statement of claim or answer) or other documents to the opposing party.

processing of claims, and reducing the burden of using hard-copy documents by parties and FINRA staff. Accordingly, FINRA believes that it would be appropriate to require parties, with limited exceptions, to use the Party Portal on a mandatory basis.

The Arbitrator and Mediator Portal is open to all FINRA arbitrators and mediators to use on a voluntary basis. In this portal, arbitrators and mediators can view and update their profile and disclosure information, access information about their assigned cases, schedule hearing dates, and view case documents. FINRA believes that use of the Arbitrator and Mediator Portal has enhanced efficiencies at the forum.

Proposed Rule Change

FINRA is proposing to require parties to use the Party Portal to submit documents and view their arbitration case information and documents in most instances. There would be an exception for *pro se* customers.[13] FINRA would invite *pro se* customers to use the Party Portal, but would not require them to do so. However, if a *pro se* customer files a claim using the Party Portal, then FINRA would require the customer to use the Party Portal for the duration of the arbitration process.

FINRA would require parties to use the Party Portal to file and serve correspondence relating to discovery requests, but would not permit parties to file documents produced in response to discovery requests through the Party Portal. FINRA believes that maintaining the correspondence in the Party Portal makes sense because it is part of the case record. However, depending on the subject of a case, discovery production can be voluminous, and FINRA does not believe it would be efficient for the Party Portal to be used as the receptacle for parties' exchanged discovery. FINRA states that this approach is consistent with its current practice.

Finally, under the proposed rule change, because mediation is voluntary in all instances, FINRA would permit parties to a mediation proceeding to use the Party Portal on a voluntary basis to submit and view their mediation case information and documents.

FINRA is proposing to amend each of the rules in the Codes affected by required use of the Party Portal. The changes would update the rule language to reflect how parties comply with the Codes through use of the Party Portal. FINRA Rules 12300 and 13300 describe how parties file pleadings[14] and documents with FINRA and serve pleadings and documents on other parties through the Party Portal. The terms ''file'' and ''serve''—terms associated with use of the Party Portal—are used throughout the Codes. Under the proposed rule change, when a party submits pleadings or documents through the Party Portal, the party would accomplish both filing with the Director[15] and, in most instances, service on all other parties and the arbitrators.[16] Therefore, in most of the proposed rule amendments, FINRA would delete references to parties filing pleadings and documents with the Director at the same time as on other parties, and providing copies for arbitrators.

For reader convenience, the discussion below only details the proposed changes to the FINRA rules in the Customer Code. However, FINRA is proposing to make substantively similar amendments to the Industry Code. The primary difference between the proposed amendments to the Customer Code and the Industry Code is that the Customer Code provides an exemption from required use of the Party Portal for *pro se* customers. The Industry Code would not provide an exemption for any party.

As a result of the proposed rule change, FINRA would need to update several cross-references in the Codes. The proposed updates are noted as applicable. In addition, FINRA states that its forum users have indicated that for ease of citation, they would prefer that FINRA use numbers and letters instead of bullets. Therefore, FINRA is proposing to replace bullets with numbers or letters in each of the rules affected by the proposed rule change. The proposed replacements are noted where applicable.

In addition to changes in the Codes, FINRA is proposing to amend the Mediation Code to permit parties to agree to use the Party Portal to submit and retrieve all documents and other communications and to view mediation case information. The proposed amendments are discussed below.

Customer Code

FINRA Rule 12100—Definitions

FINRA is proposing to amend FINRA Rule 12100 to add new definitions and to amend several definitions in the Customer Code relating to the required use of the Party Portal.

Arbitrator and Mediator Portal—FINRA is proposing to add a new definition to the rule to define ''Arbitrator and Mediator Portal'' as the web-based system that allows invited arbitrators and mediators to access a secure section of FINRA's Web site to submit documents and information and to view their arbitration and mediation case information and documents.[17]

Claim Notification Letter—FINRA is proposing to add a new definition to the rule to define ''Claim Notification Letter'' as the notice that FINRA would send respondents indicating that they have been named as a party in a statement of claim.[18] The new definition would specify that the Claim Notification Letter will provide information about accessing the Party Portal to obtain a copy of the statement of claim filed by the claimants and information about the arbitration, including the hearing location selected by the Director and the deadline for filing a statement of answer.

Day—In the current rule, FINRA defines the term ''day'' as a calendar day.[19] The definition provides that if a deadline specified in the Code falls on a Saturday, Sunday or any FINRA holiday, the deadline is extended until the next business day. Under the proposed rule change, other than the statement of claim, which FINRA serves upon all respondents, parties will be able to serve documents on each other through the Party Portal on any day and at any time. Service would occur immediately after FINRA receives a document, regardless of the day or time of receipt. If, for example, a party submits a document on a Saturday, the Party Portal will immediately transmit the documents to the appropriate parties on that day. Certain deadlines in the Code are triggered by a party's receipt of

[13] FINRA would define *pro se* in the Customer Code as a party that is not represented by an attorney or others during an arbitration or mediation. FINRA would not define *pro se* in the Industry Code. Under the proposed rule change, FINRA would not exempt *pro se* parties from the requirement under the Industry Code to submit documents through the Party Portal.

[14] FINRA Rule 12100 defines a pleading as ''a statement describing a party's causes of action or defense. Documents that are considered pleadings are: A statement of claim, an answer, a counterclaim, a cross claim, a third party claim, and any replies.''

[15] The Director refers to the FINRA Office of Dispute Resolution Director as described in FINRA Rule 12103 (Director of Dispute Resolution).

[16] For example, FINRA Rule 12304 (Answering Counterclaims) currently provides that a claimant must directly serve any answer to a counterclaim on each other party and at the same time must file the answer to the counterclaim with the Director with additional copies for the arbitrator. Under the proposed rule change, as described further in the discussion, once the claimant submits the answer through the Party Portal, the claimant has also filed the answer with the Director.

[17] *See* proposed FINRA Rule 12100(a).

[18] *See* proposed FINRA Rule 12100(f).

[19] *See* FINRA Rule 12100(j).

a pleading.[20] FINRA does not believe it would be appropriate to trigger a deadline based on an opposing party's weekend use of the Party Portal. Therefore, FINRA is proposing to amend the definition of ''day'' to clarify that if a party receives pleadings or other documents on a Saturday, Sunday or any FINRA holiday, the date of receipt shall be the next business day.

Non-Public Arbitrator—FINRA is proposing to amend the definition of non-public arbitrator [21] to update cross-references in the rule.

Party Portal—FINRA is proposing to add a new definition to the rule to define ''Party Portal'' as the Web-based system that is accessible by arbitration and mediation parties and their representatives. The Party Portal allows invited participants to access a secure section of FINRA's Web site to submit documents and view their arbitration and mediation case information and documents.[22]

Pro Se—FINRA is proposing to add a new definition to the rule to define ''*Pro Se*'' to mean a party that is not represented by an attorney or others during an arbitration or mediation.[23]

Public Arbitrator—FINRA is proposing to amend the definition of Public Arbitrator [24] to update cross-references in the rule.

In addition, FINRA would reletter the definitions to reflect the addition of the new terms.

FINRA Rule 12211—Direct Communication Between Parties and Arbitrators

Subject to specified limitations, FINRA allows parties that are represented by counsel to communicate directly with arbitrators during an arbitration proceeding. FINRA Rule 12211, which outlines the procedures that parties and arbitrators must follow when they agree to direct communication, currently indicates that parties may send items by regular mail, overnight courier, facsimile, or email. Under the proposed rule change, because parties would be required to use the Party Portal for transmitting documents to each other, and would continue to use other methods to send items to the arbitrators, FINRA is proposing to: (1) Amend FINRA Rule 12211(e) to specify that parties are allowed to send items to the arbitrators by first-class mail, overnight mail service, overnight delivery service, hand delivery, email, or facsimile as specified in an order issued by the arbitrators; (2) amend Rule 12211(f) to delete the requirement that the parties send copies of the materials they sent to the arbitrators to each other and the Director at the same time and in the same manner, requiring instead that they serve the materials on each other and filed with the Director through the Party Portal; and (3) amend Rule 12211(g) to clarify that parties must file copies of arbitrator orders and decisions with the Director through the Party Portal.

Rule 12211(b) provides that if at some point during an arbitration a party chooses to appear *pro se,* which the rule defines in a parenthetical as meaning ''without counsel,'' then the rule no longer applies. As stated above, FINRA is proposing to amend Rule 12100 to define *pro se* to mean a party that is not represented by an attorney *or others* during an arbitration or mediation. FINRA believes that the new definition of *pro se* in Rule 12100 is inconsistent with the current definition in Rule 12211. Therefore, FINRA is proposing to amend Rule 12211(b) to delete the reference to ''*pro se.*'' Instead, the rule would provide that if a party chooses to appear without counsel, then the rule would no longer apply.[25]

FINRA Rule 12300—Filing and Serving Documents

FINRA is proposing to delete the content in FINRA Rule 12300 (Filing and Serving Documents) in its entirety and replace it with new language which describes how filing and service, among other things, would operate when FINRA requires parties to use the Party Portal.

Party Portal—New Rule 12300(a)(1) would provide that parties must use the Party Portal to file initial statements of claim and to file and serve pleadings and any other documents on the Director or any other party. The rule would also provide that the Director may exercise authority to permit the use of other means of filing or service in the case of an extended Party Portal outage or in other extraordinary circumstances.[26]

Rule 12300(a)(2) would provide an exemption for *pro se* customers and would outline the procedures for *pro se* customers who do not wish to use the Party Portal. While a *pro se* customer would not be required to take any affirmative steps to opt out of using the Party Portal, if a *pro se* customer files a claim using the Party Portal, then the *pro se* customer must use the Party Portal for the duration of the arbitration process. The Party Portal would include a warning to *pro se* customers that if they file their claim using the online filing facility, they will be required to use the Party Portal for the remainder of the arbitration proceeding.

Concerning *pro se* customers who opt out of using the Party Portal, Rule 12300(a) would provide that they: (1) May file claims and serve documents by first-class mail, overnight mail service, overnight delivery service, hand delivery, email or facsimile; (2) must comply with the provisions relating to filing an initial statement of claim outlined in FINRA Rule 12302 (Filing an Initial Statement of Claim); and (3) must provide proof of service for any documents served outside of the Party Portal (except for the initial statement of claim because the Director will serve the Claim Notification Letter or initial statement of claim on the respondents).

FINRA stated that it does not want parties to use the Party Portal to submit documents they produce during discovery because FINRA does not believe that it would be efficient, particularly in cases where discovery production is voluminous. Therefore, FINRA is proposing to provide in Rule 12300(a)(3) that parties shall not file with FINRA or serve on any other party, through the Party Portal, documents produced during discovery pursuant to the Rule 12500 Series. Available service methods for such documents are first-class mail, overnight mail service, overnight delivery service, hand delivery, email, or facsimile. FINRA states that this approach is consistent with its current practice.

Filing—New Rule 12300(b) would provide that with the exception of *pro se* customers who opt out of using the Party Portal, parties must file initial statements of claim and all pleadings and other documents with the Director through the Party Portal. This includes pleadings and documents served on *pro se* customers and other parties by other means. The rule would provide that parties must file with the Director any written responses relating to discovery requests under Rules 12506 and 12507, but must not file any of the documents produced in response to discovery

[20] *See* FINRA Rules 12304 and 12305 for examples of deadlines triggered by receipt of a pleading.

[21] *See* proposed FINRA Rule 12100(r).

[22] *See* proposed FINRA Rule 12100(t).

[23] *See* proposed FINRA Rule 12100(x). FINRA does not define *pro se* in the Industry Code because there would not be an exemption for any *pro se* parties in intra-industry disputes.

[24] *See* proposed FINRA Rule 12100(y).

[25] FINRA is proposing to amend FINRA Rule 13211 to remove the reference to *pro se* in the rule. Although FINRA is not proposing to define *pro se* in the Industry Code, FINRA believes the amendment would add clarity to the rule and avoid forum user confusion because FINRA is proposing to define *pro se* in the Customer Code.

[26] As an example of an extraordinary circumstance, FINRA referenced a severe weather event causing an extended power outage.

requests as provided in Rule 12300(a)(3).

The rule would also provide that parties must file arbitrator ranking lists [27] through the Party Portal, and that filing is accomplished on the day of submission through the Party Portal. Filing by first-class mail or overnight mail is accomplished on the date of mailing, and filing by any other means is accomplished on the date of delivery as is provided in the current rules.

Service—New Rule 12300(c) would provide that the Director will serve the Claim Notification Letter or initial statement of claim on the respondents. In practice, this means that as a first step FINRA would serve only the Claim Notification Letter on respondents that are not identified as customers. If a respondent does not access the Party Portal and view the statement of claim, FINRA would contact the respondent and ask if they received the Claim Notification Letter. If the respondent indicates that they did not receive the letter, FINRA staff would offer to serve the statement of claim in another manner such as by email or regular mail to afford the respondent an additional opportunity to receive the statement of claim and instructions on how to access the Party Portal.

Concerning customers, upon receipt of an initial statement of claim, where a customer is a claimant, FINRA states that it would know if the customer is represented by counsel or another person. However, where a customer is a respondent, FINRA states that it would not know if the customer intends to be represented by counsel or any other individual. Therefore, FINRA would serve all customer respondents with the initial statement of claim along with the Claim Notification Letter explaining that parties other than *pro se* customers are required to use the Party Portal, and that *pro se* customers are invited to use the Party Portal.

The Claim Notification Letter would specify that except for *pro se* customers who opt out of using the Party Portal, parties must serve all pleadings and other documents, except as provided in Rule 12300(a)(3) relating to documents produced in discovery, through the Party Portal. It would explain that parties serve *pro se* parties who opt out of using the Party Portal by first-class mail, overnight mail service, overnight delivery service, hand delivery, email or facsimile. Under the proposed rule, service would be accomplished on the day of submission through the Party Portal, on the date of mailing by first-class mail or overnight mail service,[28] and on the date of delivery by other means. Finally, for documents not served through the Party Portal, parties would have to provide proof of service to the Director through the Party Portal.

General Rules—FINRA is proposing to incorporate into proposed Rule 12300(d)(1)(A), the current provision in Rule 12300(g)(1) concerning the redaction of personal confidential information. The current provision in Rule 12300(g)(2) specifying that the redaction requirements do not apply to documents that parties exchange with each other and do not file with the Director, or to documents parties submit to a panel at a hearing would be renumbered as Rule 12300(d)(1)(B). The current provision in Rule 12300(g)(3) providing that the redaction requirements do not apply to Simplified Arbitrations would be renumbered as Rule 12300(d)(1)(C).

Proposed Rule 12300(d)(2) would provide that a party must serve any change of email or mailing address during an arbitration on all other parties and file this information with the Director. The former rule referred only to ''address'' changes.

FINRA Rule 12301—Service on Associated Persons

FINRA is proposing to amend FINRA Rule 12301 relating to service on associated persons to delete the reference to the Director serving the initial statement of claim on a respondent associated person. As explained above, under the proposed rule change, associated persons who are parties to an arbitration would be required to use the Party Portal. Therefore, FINRA would serve an associated person with a Claim Notification Letter instead of a statement of claim.

FINRA states that in practice its staff will know if an associated person did not access the Party Portal to view the statement of claim. FINRA states that in such an instance it would contact the associated person and ask if he or she received the Claim Notification Letter. If the associated person indicates that he or she did not receive the letter, FINRA states that its staff would offer to serve the statement of claim in another manner such as by email or regular mail to afford the respondent an additional opportunity to receive the statement of claim and instructions on how to access the Party Portal.

If a member and an associated person who is currently associated with the member are named as respondents in the same arbitration, and the Director cannot complete service directly on the associated person as described above, then the proposed rule would provide that the Director may serve the member with the Claim Notification Letter on behalf of the associated person.

12302—Filing and Serving an Initial Statement of Claim

FINRA is proposing to amend FINRA Rule 12302 to reflect how: (1) Parties would file an initial statement of claim; (2) parties would submit required fees; and (3) FINRA would serve the initial statement of claim through the Party Portal.

Filing—Because most parties would be required to file an initial statement of claim through the Party Portal as provided in Rule 12300(a), FINRA is proposing to amend Rule 12302(a) to delete the reference to filing documents in hard copy or electronically through the Online Arbitration Claim Filing system. FINRA is also proposing to amend Rule 12302(b) to delete the instruction to parties to file enough copies for the Director, each arbitrator and each other party. Once a party files the initial statement of claim through the Party Portal, FINRA states that its staff would handle service through the Party Portal or Arbitrator and Mediator Portal as applicable. FINRA states that if it needs to provide copies of the documents in another manner, *e.g.,* because a *pro se* customer has opted out of using the Party Portal, or an arbitrator is not using the Arbitrator and Mediator Portal, then FINRA staff would handle reproduction and distribution of the documents.

Fees—FINRA is proposing to amend Rule 12302(c) to require the claimant to pay all required filing fees by credit card or automated clearing house (''ACH'') through the Party Portal unless the party is a *pro se* customer who opts out of using the Party Portal. FINRA states that these payment options are currently available to forum users and requiring payment through the Party Portal would make case administration more efficient. FINRA states that its staff would know immediately if a filing was deficient for lack of payment and would not have to ensure that checks that parties submit separately, by U.S. mail or other method, are correctly matched up to statements of claim submitted through the Party Portal.

[27] *See* FINRA Rules 12402(d) and 12403(c).

[28] FINRA states that ''overnight mail'' service includes, for example, overnight delivery by Federal Express. FINRA also identifies common methods parties use at the forum for overnight mail delivery as Federal Express, United Parcel Service, and United States Postal Service. FINRA also states that ''other means'' includes, for example, hand delivery.

Service—Currently, Rule 12301(d) provides that unless the statement of claim is deficient, FINRA will send a copy of the Submission Agreement, the statement of claim, and any additional materials the claimant submits, to the other parties and the arbitrators. FINRA is proposing to amend the rule to specify how staff would serve each subset of participants in the arbitration case. Specifically, FINRA would:

• Send the Claim Notification Letter to all non-customer respondent(s) pursuant to Rule 12302; and

• Send the Claim Notification Letter along with a copy of the Submission Agreement, the statement of claim, and any additional materials filed by the claimant, to each customer respondent. The Director would inform the customer that if the customer is *pro se,* the customer is not required to use the Party Portal; and

• Send a copy of the Submission Agreement, the statement of claim, and any additional materials filed by the claimant to each arbitrator by first-class mail, overnight mail service, overnight delivery service, hand delivery, email, facsimile or through the Arbitrator and Mediator Portal, once the panel has been appointed.

Additional conforming changes—FINRA would amend the title of Rule 12302 to add a reference to ''Service'' because the rule addresses both filing and service of the initial statement of claim. FINRA is proposing to reletter the rule and to replace the bullets in Rule 12302(a) with numbers.

12303—Answering the Statement of Claim

FINRA is proposing to amend FINRA Rule 12303 to reflect how respondents would answer a statement of claim using the Party Portal.

Because most parties would be required to serve each other through the Party Portal, FINRA would eliminate the instruction in Rule 12303(a) for parties to ''directly'' serve each other with the executed Submission Agreement and answer. FINRA would amend Rule 12303(b) to provide that if an answer contains a third party claim,[29] a respondent must serve the third party with the answer containing the third party claim and all documents previously served by any party, or sent to the parties by the Director, by first-class mail, overnight mail service, overnight delivery service, hand delivery, email or facsimile, and must file proof of service with the Director through the Party Portal. The respondent must file the third party claim with the Director through the Party Portal except as provided in Rule 12300(a)(2). In addition, because parties would file their Submission Agreement and answer through the Party Portal, FINRA would amend Rule 12303(c) to delete the instruction for a party to file sufficient copies for the Director and arbitrators. Finally, FINRA is proposing to replace the bullets in Rule 12303(a) with numbers.

12304—Answering Counterclaims

FINRA is proposing to amend FINRA Rule 12304(a) relating to answering counterclaims to eliminate the instruction for parties to ''directly'' serve each other with the answer to a counterclaim, as well as the requirement to file sufficient copies for the Director and arbitrators.

12305—Answering Cross Claims

As with answering counterclaims, FINRA is proposing to amend FINRA Rule 12305(a) relating to answering cross claims to eliminate the instruction for parties to ''directly'' serve each other with the answer to a cross claim, as well as the requirement to file sufficient copies for the Director and arbitrators because filing instructions would be covered by proposed Rule 12300.

12306—Answering Third Party Claims

FINRA is proposing to amend FINRA Rule 12306 to reflect how FINRA would handle a third party claim in the Party Portal.

As explained in the above discussion on Rule 12303, if a respondent's answer contains a third party claim, the respondent serves the third party with the claim and all documents previously served by the parties or filed with FINRA outside of the Party Portal. FINRA states that once it is notified of the third party claim, it can invite the third party to use the Party Portal.

Because most parties would be using the Party Portal, FINRA would eliminate the instruction in Rule 12306(a) for parties to ''directly'' serve each other with the executed Submission Agreement and answer. Similarly, FINRA would amend Rule 12306(b) to provide that if an answer to a third party claim also contains a third party claim, a respondent would be required serve the third party with the answer containing the third party claim and all documents previously served by any party, or sent to the parties by the Director, by first-class mail, overnight mail service, overnight delivery service, hand delivery, email or facsimile, and must file proof of service with the Director through the Party Portal. In addition, because parties would file their Submission Agreement and answer through the Party Portal, FINRA would amend Rule 12306(c) to delete the instruction for a party to file sufficient copies for the Director and arbitrators. Finally, FINRA is proposing to replace the bullets in Rule 12306(a) with numbers.

12307—Deficient Claims

The Customer Code provides that the Director will not serve any claim that is deficient. Current FINRA Rule 12307(a) sets forth various reasons that a claim might be deficient. FINRA is proposing to amend Rule 12307(a) to delete a deficiency that would not be applicable in the Party Portal—that the claimant did not file the correct number of copies of the Submission Agreement, statement of claim or supporting documents for service on respondents and for the arbitrators. FINRA is also proposing to amend the rule relating to the deficiency concerning a failure to specify the customer's home address at the time of the events giving rise to the dispute. FINRA would replace home address with ''city and state,'' to conform to its stated current practice.[30]

FINRA is also proposing to replace the bullets in Rule 12307(a) with numbers and to correct cross-references in the Rule.

12309—Amending Pleadings

Current FINRA Rule 12309 specifies procedures for parties to amend pleadings. Rule 12309(a) applies to amendments made to a statement of claim or any other pleading before FINRA appoints a panel of arbitrators. Rule 12309(c) applies to amendments made to add a party to the case once the ranked arbitrator lists are due to the Director. In both sections, FINRA is proposing to amend the rule to reflect how amendments operate in the Party Portal.

As stated above, Rule 12309(a) describes how parties amend pleadings before FINRA appoints a panel. FINRA is proposing to amend Rule 12309(a) to clarify that panel appointment occurs when the Director sends notice to the parties of the names of the arbitrators on the panel.

FINRA would amend Rule 12309(a)(1) to eliminate the requirement for parties to file sufficient copies of an amended pleading for the arbitrators and other parties, and to provide that the Director

[29] *See* current FINRA Rule 12100(y), which defines ''Third Party Claim'' to mean a claim asserted against a party not already named in the statement of claim or any other previous pleading.

[30] Industry Code Rule 13307 differs from the Customer Code rule because there is no reference to a customer's home address.

will serve either the Claim Notification Letter, or the amended statement of claim, as applicable, under Rules 12300 and 12301. The rule would also provide that if an amended pleading adds a party to the arbitration, the party amending the pleading must serve the new party with the amended pleading and all documents previously served by any party, or sent to the parties by the Director, by first-class mail, overnight mail service, overnight delivery service, hand delivery, email or facsimile, and must file proof of service with the Director through the Party Portal. The party amending the pleading must file the amended pleading with the Director through the Party Portal except as provided in Rule 12300(a)(2).

Current Rule 12309(c) explains that after ranked arbitrator lists are due to the Director, parties may not amend the pleadings to add new parties until FINRA appoints a panel and the panel grants a motion to add a new party. Motions to add a party after panel appointment must be served on all parties, including the party that is the subject of the motion. The process for serving the new party under Rule 12309(c) is the same as it is in Rule 12309(a). FINRA is proposing to amend Rule 12309(c) to provide that the party seeking to amend the pleading to add a party may serve the party to be added by first-class mail, overnight mail service, overnight delivery service, hand delivery, email or facsimile. Service by first-class mail or overnight mail service would be accomplished on the date of mailing. Service by any other means would be accomplished on the date of delivery. FINRA would permit the party to be added to file a response with the Director and serve the response on all other parties by first-class mail, overnight mail service, overnight delivery service, hand delivery, email or facsimile. Because the arbitrators may ultimately decline the motion to add a new party, FINRA believes it makes sense to allow service by methods other than the Party Portal while the arbitrators consider the motion.[31]

12310—Answering Amended Claims

Current FINRA Rule 12310 describes how parties answer amended claims. Rule 12310(b) provides that if a claim is amended after it has been answered, but before a panel has been appointed, the respondent has 20 days from ''the time the amended claim is served'' to serve an amended answer. Because parties would be serving each other through the Party Portal, FINRA is proposing to amend Rule 12310(b) to delete the phrase ''the time the amended claim is served'' to provide instead that the respondent has 20 days from ''receipt of the amended claim'' to serve an amended answer. FINRA uses time of receipt in the rules relating to parties' time to respond to answers, among other matters, and believes consistent language would add clarity to the rule.[32]

FINRA is also proposing to amend Rule 12310(d) relating to serving an amended answer to delete the reference to ''directly'' serving each other party, and providing copies of the pleading for the arbitrators.

Finally, FINRA is proposing to add clarity to Rule 12310(e) concerning when a new party's answer is due, by stating that the new party's ''time to'' answer is governed by Rules 12303 or Rule 12306 (which include a 45 day period for answers).

12400—Neutral List Selection System and Arbitrator Rosters

FINRA is proposing to amend FINRA Rule 12400(b) relating to its arbitrator rosters and Rule 12400(c) concerning eligibility for chairperson roster to update cross-references and replace bullets with numbers.

12402—Cases With One Arbitrator and 12403—Cases With Three Arbitrators

FINRA is proposing to amend FINRA Rules 12402(d)(3) and 12403(c)(3) concerning striking and ranking arbitrators to provide that parties must complete arbitrator ranking through the Party Portal unless a party is a *pro se* customer who opted out of using the Party Portal. The rule would list the approved methods for *pro se* customers to return ranked lists. FINRA is also proposing to amend to Rule 12402(e) to replace bullets with numbers.[33]

12404—Additional Parties

Current FINRA Rule 12404 describes procedures for newly added parties to rank and strike arbitrators. FINRA is proposing to amend Rule 12404(a) to reflect that because parties would complete the ranking and striking process in the Party Portal, they would no longer ''return'' lists to the Director. FINRA would also amend this provision to correct a typographical error by adding ''(s)'' to the term ''list'' in the paragraph's last sentence because in cases with three arbitrators, parties return three lists of arbitrators, not just one.

Current Rule 12404(b) explains that after ranked arbitrator lists are due to the Director, parties may not amend pleadings to add new parties until FINRA appoints a panel and the panel grants a motion to add a new party. Motions to add a party must be served on all parties. FINRA is proposing to amend Rule 12404(b) to provide that the party seeking to amend the pleading must serve the party to be added by first-class mail, overnight mail service, overnight delivery service, hand delivery, email or facsimile. Service by first-class mail or overnight mail service would be accomplished on the date of mailing. Service by any other means would be accomplished on the date of delivery. FINRA would permit the party to be added to file a response with the Director and serve the response on all other parties by first-class mail, overnight mail service, overnight delivery service, hand delivery, email or facsimile. Because the arbitrators may ultimately decline the motion to add a new party, FINRA believes it makes sense to allow service by methods other than the Party Portal while the arbitrators consider the motion.

12500—Initial Prehearing Conference

Current FINRA Rule 12500(c) describes the subject matter of the initial prehearing conference and provides that parties may forgo the conference if they provide certain information (as described in accompanying bullets) in writing to the Director. FINRA is proposing to amend the rule to delete the requirement that parties provide copies of the written submission for the arbitrators. FINRA is also proposing to replace the bullets with numbers.

12502—Recording Prehearing Conferences and 12606—Record of Proceedings

Current FINRA Rule 12502 provides that FINRA does not record prehearing conferences unless the panel orders a recording, and FINRA Rule 12606(a) specifies that FINRA records hearings. Both rules provide that the Director will provide copies of a tape, digital, or other recording to parties for a nominal fee.

[31] FINRA Rule 13309(c) in the Industry Code contains an erroneous cross-reference to Rule 13404(c). FINRA is proposing to amend Rule 13309(c) to refer to Rule 13404(d) which relates to the time frame when ranked lists are due.

[32] *See* FINRA Rules 12303 (Answering the Statement of Claim), 12304 (Answering Counterclaims), 12305 (Answering Cross Claims), and 12306 (Answering Third Party Claims).

[33] The Industry Code rules relating to arbitrator appointment, while substantially similar to the Customer Code rules, are not identical to the Customer Code and are numbered differently. FINRA is proposing to amend FINRA Rule 13404(d) concerning striking and ranking arbitrators, to provide that parties must complete arbitrator ranking through the Party Portal. FINRA is proposing to amend FINRA Rule 13406 relating to appointment of arbitrators to update a cross-reference and to replace bullets with letters. FINRA is also proposing to amend FINRA Rule 13411 concerning replacing arbitrators to update a cross-reference.

FINRA is proposing to amend the rules to delete the reference to a fee because FINRA currently provides parties with copies of recordings free of charge. Current Rule 12606(a) also provides that the panel may order parties to provide a transcription of the recording. FINRA is proposing to amend Rule 12606(a) to clarify that if the arbitrators order the parties to provide a transcript, the parties must provide copies for the arbitrators and must file the transcript with the Director and serve it on the other parties. Current Rule 12606(b) provides that parties may make stenographic records of a hearing. FINRA is proposing to amend Rule 12606(b) to clarify that if the stenographic record is the official record of the proceeding, the parties must provide copies for the arbitrators and must file the transcript with the Director and serve it on the other parties.

FINRA states that some arbitrators have indicated a preference to review long documents in hard copy. Therefore, FINRA would continue to require parties to provide copies of transcripts for the arbitrators.

12503—Motions

Current FINRA Rule 12503 specifies how parties make motions at the forum. Under the proposed rule change, parties would be required to file motions with the Director and serve other parties through the Party Portal. Therefore, FINRA is proposing to amend Rule 12503(a)(2) to delete the requirement that parties serve motions on each other directly, at the same time and in the same manner, and provide FINRA with copies for each arbitrator. FINRA would make the same deletions to Rule 12503(b) relating to responding to motions and Rule 12503(c) concerning replying to responses to motions.

FINRA is also proposing to amend Rule 12503(a)(4) to delete the text specifying how parties make motions to amend a pleading to add a party to a case, because these motions would be addressed in Rule 12309(c) (discussed above). FINRA would add a cross-reference to Rule 12309(c).

12506—Document Production Lists

Current FINRA Rule 12506(a) provides that when the Director serves respondents with the statement of claim, the Director notifies parties of the location of the FINRA Discovery Guide and Document Production Lists on FINRA's Web site. In view of the Party Portal, FINRA is proposing to amend the rule to delete the reference to ''when the Director serves the statement of claim.'' The rule would continue to state that the Director will notify parties of the location of the FINRA Discovery Guide and Document Production Lists on FINRA's Web site.

Current FINRA Rule 12506(b) specifies, among other matters, the time for parties to respond to the Document Production Lists. FINRA wants parties to file through the Party Portal their explanations about why they are not timely producing documents and why they are objecting to production. FINRA believes that having this correspondence in the Party Portal would be efficient for FINRA staff and the parties. However, as stated above, FINRA does not want the parties to file with the Director the documents and information that they produce during discovery. Therefore, FINRA is proposing to amend Rule 12506(b) to specify that parties must serve each other with documents produced pursuant to the rule by first-class mail, overnight mail service, overnight delivery service, hand delivery, email or facsimile as provided in Rule 12300(a)(3). The proposed rule would also provide that parties are required to file any written responses relating to discovery, such as objections to producing items in the Document Production Lists, with the Director through the Party Portal.

FINRA is also proposing to amend to Rule 12506(b) to replace bullets with letters.[34]

12507—Other Discovery Requests

Current FINRA Rule 12507(a) provides that parties may request additional documents from a party by serving the party directly with a written request. The rule requires the requesting party to serve copies of the request on all other parties at the same time. Because parties would be serving each other through the Party Portal, FINRA is proposing to amend the rule to delete the requirement for direct service in Rule 12507(a)(1) and the requirement to serve all other parties at the same time in Rule 12507(a)(2).

Current FINRA Rule 12507(b) specifies how parties may respond to an additional discovery request. The parties can: (1) Produce the documents or information (Rule 12507(b)(1)(A)); (2) identify specific documents that will not be produced within the required time and state when the documents will be produced (Rule 12507(b)(1)(B)); or (3) object to the request (Rule 12507(b)(1)(C)). As explained earlier, FINRA does not want parties to file with the Director the documents and information that they produce during discovery. Therefore, FINRA is proposing to amend Rule 12507(b)(1)(A) to specify that if a party produces documents or information pursuant to a request, the party must serve all other parties with copies of the requested documents or information by first-class mail, overnight mail service, overnight delivery service, hand delivery, email or facsimile.

However, FINRA wants to receive party explanations about why they are not timely producing documents and why they are objecting to production. Therefore, FINRA would amend Rule 12507(b)(1)(B) concerning non-production to provide that a party must file a response with the Director and serve it on all other parties (through the Party Portal). FINRA would also amend Rule 12507(b)(1)(C) concerning objections to provide that a party must file the objection with the Director and serve it on all other parties (through the Party Portal).

Finally, FINRA is proposing to replace the bullets in Rule 12507 with numbers.

12508—Objecting to Discovery; Waiver of Objection

Current FINRA Rule 12508 addresses party objections to producing documents and information during discovery. To reflect how parties will be serving each other through the Party Portal, FINRA is proposing to amend the rule to delete the requirement that parties serve their objections on each other at the same time and in the same manner. Because FINRA wants to receive party explanations through the Party Portal about why parties object to production, FINRA is proposing to amend the rule to delete the statement that objections should not be filed with the Director.

12512—Subpoenas

Current FINRA Rule 12512 specifies that a party may make a written motion requesting that an arbitrator issue subpoenas to parties and non-parties for the production of documents and evidence, and outlines how FINRA handles motions for subpoenas at the forum. To reflect how motion practice would operate through the Party Portal, FINRA is proposing to amend Rule 12512(b) to delete the requirements that parties provide copies of the subpoena to the arbitrator, and serve the motion on each other at the same time and in

[34] The FINRA Discovery Guide and related Document Production Lists apply only to customer arbitrations. Therefore, the Industry Code does not contain Document Production Lists. The discovery rules in the Industry Code that are substantially similar to Rule 12507 in the Customer Code are Rule 13506 (Discovery Requests) and Rule 13507 (Responding to Discovery Requests). The proposed amendments to Rules 13506 and 13507 are substantively identical to those in Rule 12507.

the same manner. FINRA would make the same amendment to Rule 12512(c) concerning party objections to subpoenas.

Current FINRA Rule 12512(d) addresses service of an executed subpoena. FINRA is proposing to amend the rule to delete the requirement that parties serve the subpoena on each other at the same time and in the same manner. In addition, because non-parties do not have access to the Party Portal, FINRA would amend the rule to specify that when an arbitrator issues a subpoena to a non-party, the party must serve the subpoena on the non-party by first-class mail, overnight mail service, overnight delivery service, hand delivery, email or facsimile.

Current FINRA Rule 12512(e) provides for a non-party's objection to a subpoena. If a non-party receiving a subpoena objects to the scope or propriety of the subpoena, FINRA permits the non-party to file written objections with the Director. Under the rule, the party that requested the subpoena may respond to the objection. FINRA is proposing to amend the rule to provide that the non-party may file the objection by first-class mail, overnight mail service, overnight delivery service, hand delivery, email or facsimile, and that the party must serve the response on the non-party and file proof of service with the Director.

Current FINRA Rule 12512(f) outlines procedures for parties to follow when they receive subpoenaed documents from non-parties. Specifically, the rule provides that any party that receives documents in response to a subpoena served on a non-party has five days to provide notice of the receipt to the other parties. Other parties to the case may request copies of the documents, and the party in receipt of the documents must provide them within ten (10) calendar days of receipt of the request. FINRA is proposing to amend the rule to specify that a party that receives documents from a non-party in response to a subpoena must serve the other parties with notice that the party received the documents. Other parties to the case may request copies of the subpoenaed documents. Because FINRA does not want the parties to submit the documents to the Director, FINRA would amend the rule to provide that the party must serve the documents on the other parties by first-class mail, overnight mail service, overnight delivery service, hand delivery, email or facsimile. The proposed rule would also expressly prohibit parties from filing the documents with the Director.

12513—Authority To Direct Appearances of Associated Person Witnesses and Production of Documents Without Subpoenas

Current FINRA Rule 12513 authorizes arbitrators to order the appearance of firm employees and associated persons, and the production of documents from firms and their employees and associated persons without issuing a subpoena. FINRA is proposing to amend several provisions in the rule to reflect how FINRA would handle a party's motion for an arbitrator order using the Party Portal.

FINRA is proposing to amend Rule 12513(b) concerning filing the motion to delete the requirement that a party provide a copy for the arbitrator and that the party serve the motion on all other parties at the same time and in same manner as on the Director. FINRA is proposing to make the same changes to Rule 12513(c) relating to an opposing party's objection to the motion, and to Rule 12513(d) relating to party service of an order.

In addition, because FINRA will not invite a non-party to use the Party Portal, FINRA is proposing to amend Rule 12513(d) to provide that if a party obtains an arbitrator's order for a non-party's production, then the party must serve the order on the non-party. FINRA would also amend Rule 12513(e) to provide that if the non-party files an objection to the arbitrator's order, and the party requesting the order wants to file a response to the objection, then the party must serve the response on the non-party and provide the Director with proof of service. Finally, FINRA is proposing to amend Rule 12513(f) to provide that any party receiving documents from a non-party must serve notice on all other parties. If any other party requests copies of the documents, the requesting party must serve them by first-class mail, overnight mail service, overnight delivery service, hand delivery, email or facsimile. The amendments would also specify that parties must not file with the Director the documents produced pursuant to the order.

12514—Prehearing Exchange of Documents and Witness Lists, and Explained Decision Requests

Current FINRA Rule 12514 sets forth procedures for exchanging documents and witness lists prior to the first scheduled hearing date and for making joint party requests for an explained decision. FINRA is proposing to amend Rule 12514(b) to delete the requirement that parties file their witness lists with the Director at the same time as they notify other parties and provide the Director with enough copies for the arbitrators. Instead, proposed Rule 12514(b) would require that all parties file their witness lists only with the Director. FINRA would also amend Rule 12514(d) to provide that parties must file with the Director requests for an explained decision as opposed to submitting them to the arbitrators.

12701—Settlement

Current FINRA Rule 12701 requires parties to notify the Director of settlements. FINRA is proposing to amend Rule 12701(a) to reflect use of the Party Portal by replacing ''notify'' with ''file notice with'' the Director.

12800—Simplified Arbitration

Current FINRA Rule 12800 provides special procedures for the administration of disputes involving $50,000 or less, including procedures for parties to request documents and other information from each other. FINRA is proposing to amend Rule 12800(d) to provide that parties receiving the request must produce the requested documents or information to all other parties by serving the requested documents or information by first-class mail, overnight mail service, overnight delivery service, hand delivery, email or facsimile. The proposed rule would specify that parties must not file the documents with the Director.

12801—Default Proceedings

Current FINRA Rule 12801 specifies procedures for initiating default proceedings against certain respondents (*e.g.,* terminated members). Because parties would be using the Party Portal to file notice with the Director and serve other parties with their request to initiate a default proceeding, FINRA is proposing to amend Rule 12801(b) to delete the requirements for parties to notify the Director in writing, and send a copy of the notification to other parties at the same time and in the same manner. FINRA is also proposing to amend Rule 12801(a) to replace bullets with numbers.

12901—Member Surcharge

Current FINRA Rule 12901 provides that FINRA will assess surcharges against members under specified circumstances. Rule 12901(a)(3) states that if the claim is filed by a member, the surcharge is due when the claim is filed. If the claim is filed against a member, or against an associated person employed by a member at the time of the events giving rise to the dispute, the surcharge is due when the claim is served. FINRA is proposing to amend the rule to provide that if a claim is filed against a member or associated person, the surcharge is due when the Director serves the Claim Notification Letter or the initial statement of claim. FINRA is also proposing to amend Rule 12901(a) and 12901(b) to replace bullets with letters.

12094—Awards

Current FINRA Rule 12904 concerns arbitrator awards and includes, among other matters, procedures for the Director to serve awards on parties. The rule provides that the Director serves an award using any method available and convenient to the parties and the Director, and that is reasonably expected to cause the award to be delivered to all parties, or their representative, on the same day. Under the rule, the Director may serve an award by first class, registered or certified mail, hand delivery, and facsimile or other electronic transmission. Because the Director will serve the award through the Party Portal in most instances, FINRA is proposing to amend Rule 12904(c) to provide that only the Director will serve the award on each party, or their representative through the Party Portal.

Industry Code Specific Amendments

As explained earlier, while the discussion details the proposed amendments to the FINRA rules in the Customer Code, FINRA is also proposing to make substantively similar amendments to the Industry Code. In addition to the amendments discussed, FINRA is proposing to amend rules in the Industry Code that are unique to intra-industry disputes.

13802—Statutory Employment Discrimination Claims

FINRA is proposing to amend FINRA Rule 13802(a) relating to statutory employment discrimination claims to update a cross-reference concerning the definition of statutory employment discrimination. FINRA would also amend Rule 13802(c) to replace bullets with numbers.

13804—Temporary Injunctive Orders; Requests for Permanent Injunctive Relief

The Industry Code has special procedures for handling temporary injunctions with respect to an industry or clearing dispute. FINRA is proposing to amend FINRA Rule 13804(a) to provide that parties seeking temporary injunctive relief from a court must file with the Director a statement of claim requesting permanent injunctive and all other relief with respect to the same dispute through the Party Portal, and must serve the statement of claim requesting permanent injunctive and all other relief on all other parties by overnight delivery service, hand delivery, email or facsimile. The proposed rule would require parties to serve all parties at the same time and in the same manner, unless the parties agree otherwise.

FINRA states that cases involving injunctive relief operate on an accelerated time schedule. FINRA also states, however, that it takes FINRA staff some time to review an initial submission and invite respondent parties to use the Party Portal. In view of the need to expedite these matters, FINRA believes that parties should serve each other outside of the Party Portal until FINRA establishes the identities of all relevant parties and their representatives, and invites them to access the Party Portal.

Mediation Code

Under the proposed rule change, FINRA would permit parties to a mediation proceeding to use the Party Portal on a voluntary basis. FINRA is proposing to amend the Mediation Code to reflect use of the Party Portal.

14100—Definitions

FINRA is proposing to amend FINRA Rule 14100 to define ''Arbitrator and Mediator Portal'' and ''Party Portal.'' The definitions would be identical to the definitions in the Codes. FINRA would re-letter the definitions because of the new additions.

14109—Mediation Ground Rules

FINRA also is proposing to amend FINRA Rule 14109 to provide that the parties may agree to use the Party Portal to submit all documents and other communications to each other, to retrieve all documents and other communications, and view mediation case information.

III. Comment Summary and FINRA's Response

As noted above, the Commission received five comment letters on the proposed rule change [35] and a response letter from FINRA.[36] As discussed in more detail below, two strongly support the proposal; [37] two generally support the proposal but recommend modifications; [38] and one appears to be unrelated to substance of the proposal.[39]

Two commenters strongly supported the proposal, stating that the proposal ''would facilitate interactions among parties, arbitrators, mediators, and FINRA staff on arbitration case-related matters,'' [40] ''further promote the efficiency of the participant experience in the FINRA arbitration forum,'' [41] and would result in ''more efficient and equitable arbitration proceedings.'' [42] One of those commenters noted that some of its members had been invited by FINRA to participate in a beta test of the Party Portal, and stated that those members ''reported that the system was efficient, simplified responses to communications, and allowed for easier tracking of progress in the dispute.'' [43]

Two additional commenters generally supported the proposal, with both commenters stating their belief that use of the Party Portal would improve efficiency.[44] One of those commenters noted that, in addition to enhancing efficiency, use of the Party Portal would ''allow the [arbitration] panel to be more actively engaged in the discovery process[,]'' and ''provide[] FINRA with additional enforcement capability concerning potential firm rule violations relating to discovery.'' [45] However, both commenters expressed concerns about the effect of the proposed rule change on claimants with smaller claims, specifically with respect to protection of personal confidential information and payment of forum fees.[46]

Personal confidential information. As stated in the Notice, current FINRA Rule 12800 provides special procedures for ''simplified arbitration,'' disputes where the amount at issue is $50,000 or less.[47] One commenter noted that under Rule 12800, ''simplified proceedings are exempt from the redaction of Social Security, tax id, and financial accounts numbers.'' [48] One commenter additionally noted that much of the personal confidential information ''involved in a simplified proceeding is of the type that, according to the FBI, can be used by criminals to engage in identity theft, including financial account numbers, birth dates, addresses, and Social Security numbers.'' [49] Consequently, these two commenters expressed concern that exempting

simplified proceedings from FINRA's redaction requirements, while requiring claimants to file documents electronically through the Party Portal, puts claimants in simplified proceedings at greater risk of identity theft and/or other information security breaches.[50] For these reasons, both commenters urged FINRA to extend the redaction requirements for personal confidential information to all documents submitted through the Party Portal.[51]

In response to these comments, FINRA, although it declined to amend the proposed rule change as suggested by the two commenters, stated that it ''is concerned about identity theft'' and that it ''believes that the Party Portal provides parties with enhanced security over other methods of document transmittal.'' [52] FINRA further noted that the Party Portal is a ''secure, encrypted environment'' and that parties in simplified arbitration are not prevented from redacting their documents, but that they are simply not required to do so.[53] Finally, FINRA noted that it ''has a dedicated Web page encouraging parties to take steps to protect their [personal confidential information] regardless of any exemptions in the Codes.'' [54]

Payment of forum fees. As stated in the Notice, FINRA is proposing to amend Rule 12302(c) to require the claimant to pay all required filing fees by credit card or automated clearing house (''ACH'') through the Party Portal, unless the party is a *pro se* customer who opts out of using the Party Portal.[55] Two commenters expressed concern about this portion of the proposal.[56] One commenter urged FINRA to allow payment of fees by personal check for all parties, explaining that ''it is not uncommon for individual claimants, even when represented, to pay their filing and other forum fees by personal check,'' and noting that ''some law school securities arbitration centers do not have the ability to pay by credit card or ACH.'' [57] Another commenter urged FINRA to revise the proposal to allow parties with damages under $100,000 to pay by personal check, expressing concern that the proposal as drafted may adversely affect smaller claimants and/or claimants that are only able to proceed if they obtain fee waivers.[58] In particular, this commenter expressed concern that ''[w]ithout an exception allowing payment of fees by check for these small claims,'' the proposal will encourage parties to evade the Party Portal requirement by initiating a *pro se* claim or discourage firms from representing clients with smaller claims.[59]

In its response, FINRA stated its belief that ''requiring payment through the Party Portal would make case administration more efficient.'' [60] In particular, FINRA stated that the electronic payment system would, among other benefits, immediately alert FINRA staff if a filing was deficient for lack of payment.[61] In addition, FINRA stated that it ''designed the ACH feature in the Party Portal to be self-contained and easy to use,'' and that a ''clinic or law firm representing a party does not need any special facility to remit payment via ACH.'' [62] FINRA further explained that the ''Party Portal User Guide contains detailed instructions, including screen shots from the system, on how to pay by ACH'' and further noted that a ''party can provide the [ABA routing number and bank account number that appear on a personal check] to a representative over the phone, or a voided check with the numbers, for entry into the Party Portal.'' [63] Because of ''the efficiencies afforded by electronic payment, and that any Party Portal user can remit fees, FINRA declines to amend the proposed rule change as suggested by the commenters.'' [64]

Discovery correspondence. As stated in the Notice, FINRA is proposing to require parties to file discovery correspondence through the Party Portal.[65] One commenter, although generally supportive of this requirement, expressed concern that the ''proposal is unclear as to how matters involving *pro se* parties who chose not to utilize the Portal should be handled'' and suggested that those parties be required to file discovery correspondence with FINRA outside the Party Portal.[66] The commenter ''believes that brokerage firms could be less likely to engage in discovery abuse against *pro se* parties if they know FINRA can still keep an eye on the discovery process.'' [67]

In its response, FINRA clarified that under the proposal, *pro se* parties who opt out of the Party Portal would still be required to file discovery correspondence using one of the methods enumerated in Rule 12300(a)(2)(C).[68] FINRA stated that acceptable methods of service include first-class mail, overnight mail service, overnight service, hand delivery, email, or facsimile.[69]

Service. Although not a specific concern or suggestion about the proposal itself, one commenter noted that ''the service requirements are spread through a number of different rules,'' and suggested that FINRA consider issuing a Notice to Members ''setting forth a list of the specific filings which must be made outside of the Party Portal once the rule is implemented'' in order to ''allow practitioners an opportunity to review all the exceptions to filing via the Portal in one place.'' [70]

In its response, FINRA agreed that such a list would be helpful and stated in its response that ''[i]f the Commission approves the proposed rule change, FINRA will provide a list of such filings in a Regulatory Notice announcing approval of the proposed rule change as well as in guidance on the FINRA Web site.'' [71]

IV. Discussion and Commission Findings

The Commission has carefully considered the proposal, the comments received, and FINRA's response to the comments. Based on its review of the record, the Commission finds that the proposal is consistent with the requirements of the Exchange Act and the rules and regulations thereunder that are applicable to a national

[50] *See id.* at 1–2; *see* IAC Letter at 2–3.

[51] *See* IAC Letter at 3; *see also* PIABA Letter at 2. One commenter urged FINRA to go one step further and extend the redaction requirements to *pro se* customers not using the Party Portal, though the commenter acknowledged ''that the risk of misuse may not be as significant (though not non-existent) if the information is not sent, received, or stored electronically via the Party Portal.'' *See* IAC Letter at 3.

[52] *See* FINRA Letter at 3.

[53] *See* FINRA Letter at 3. Similarly, FINRA also notes that an ''exemption from the redaction requirements does not mean that *pro se* parties . . . cannot redact [personal confidential information] from their documents.''

securities association.[72] In particular, the Commission finds that the proposed rule change is consistent with Section 15A(b)(6) of the Exchange Act,[73] which requires, among other things, that FINRA rules be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest.

The Commission notes that two commenters strongly supported the proposal, two commenters generally supported the proposal but had some recommended modifications, and one commenter did not appear to address the substance of the proposed rule change. With respect to payment of fees, the Commission recognizes the recommendations by two commenters that FINRA allow payment by personal check, either for parties for damages under $100,000 or for all parties.[74] The Commission also recognizes, however, FINRA's efforts to clarify and streamline the electronic payment process for its users, including, among other things, permitting Party Portal users to remit payment by phone if needed by providing the ABA routing number and bank account number found on the user's personal check.[75] The Commission further recognizes the ''efficiencies afforded by electronic payment,'' [76] including the ability for FINRA staff to immediately discern whether a filing is deficient for lack of payment.

With respect to the protection of personal confidential information, the Commission recognizes the concerns expressed by two commenters that, under the proposal, FINRA's exemption of the redaction requirements in current Rule 12300 for parties in Simplified Arbitrations—disputes where the amount at issue is $50,000 or less—will remain unchanged.[77] The Commission recognizes the commenters' concerns that exempting Simplified Arbitrations from FINRA's redaction requirements, while requiring claimants to file documents electronically through the Party Portal, puts claimants in Simplified Arbitrations at greater risk of identity theft and/or other information security breaches.[78] The Commission also recognizes, however, FINRA's own concerns about identity theft, and its belief that ''the Party Portal provides parties with enhanced security over other methods of document transmittal.'' [79] The Commission further recognizes, as FINRA explained in its response to comments, that parties in Simplified Arbitrations (as well as *pro se* parties not using the Party Portal) are not restricted from redacting their documents should they choose to do so.[80] Finally, the Commission recognizes that ''FINRA has a dedicated Web page encouraging parties to take steps to protect their [personal confidential information] regardless of any exemptions in the Codes.'' [81]

With respect to the proposal's requirement that parties file discovery correspondence through the Party Portal, the Commission recognizes one commenter's concern that the ''proposal is unclear as to how matters involving *pro se* parties who chose not to utilize the Portal should be handled.'' [82] The Commission further recognizes FINRA's clarification that, under the proposal, *pro se* parties would be required to file discovery correspondence by an alternate method as enumerated in Rule 12300(a)(2)(C).[83]

With respect to rules regarding service, the Commission recognizes that one commenter's suggestion that FINRA issue a Notice to Members ''setting forth a list of the specific filings which must be made outside of the Party Portal once the rule is implemented'' in order to ''allow practitioners an opportunity to review all the exceptions to filing via the Portal in one place.'' [84] The Commission further recognizes FINRA's agreement with this suggestion and its intent to ''provide a list of such filings in a Regulatory Notice announcing approval of the proposed rule change as well as in guidance on the FINRA Web site.'' [85]

Finally, the Commission recognizes FINRA's statement that of the 13,562 parties invited to use the portal as of May 11, 2016 (including customers, firms, and associated persons), ''76 percent of customers, including *pro se* customers, have been using the Party Portal voluntarily and 82 percent of firms and associated persons, which includes firm representatives, have been using the Party Portal voluntarily (78 percent in total).'' [86]

Taking into consideration the comments and FINRA's response, the Commission believes that the proposal is consistent with the Exchange Act. The Commission believes that the proposal will help protect investors and the public interest by enhancing efficiencies for FINRA arbitration forum users and expediting case administration by FINRA staff by, among other things, improving the case intake process and helping ensure better data accuracy.[87] The Commission further believes that FINRA's response, as discussed in more detail above, appropriately addressed commenters' concerns and adequately explained its reasons for declining to modify its proposal to allow for payment by personal check or to extend FINRA's current redaction requirements to simplified proceedings. The Commission believes that the approach proposed by FINRA is appropriate and designed to protect investors and the public interest, consistent with Section 15A(b)(6) of the Exchange Act. For these reasons, the Commission finds that the proposed rule change is consistent with the Exchange Act and the rules and regulations thereunder.

V. Conclusion

It is therefore ordered, pursuant to Section 19(b)(2) of the Exchange Act,[88] that the proposed rule change (SR–FINRA–2016–029) be, and hereby is, approved.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[89]

Brent J. Fields,

Secretary.

on October 31, 2016, Miami International Securities Exchange LLC (''MIAX'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') a proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange is filing a proposal to amend the MIAX Options Fee Schedule (the ''Fee Schedule'').

The text of the proposed rule change is available on the Exchange's Web site at *http://www.miaxoptions.com/filter/wotitle/rule_filing,* at MIAX's principal office, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend the MIAX Select Symbols [3] section of the Priority Customer Rebate Program (the ''Program'') [4] to delete the option class ''AA'' associated with the corporation Alcoa Inc. (''Alcoa''). Alcoa announced a corporate transaction that will result in the company's separation into two independent publicly-traded companies, Alcoa Corporation and Arconic, Inc. (''Arconic'').[5] The separation is to become effective before the opening of the market on November 1, 2016 and is structured to be effected by means of a pro rata distribution by Alcoa of 80.1% of the outstanding common stock of Alcoa Corporation. Arconic will retain 19.9% of Alcoa Corporation common stock.[6] In connection with this distribution, on November 1, 2016, Alcoa will change its name to ''Arconic Inc.'' and its ticker symbol from ''AA'' to ''ARNC'' and Alcoa Corporation will trade as an independent company under the ticker symbol ''AA''.[7] The Exchange has decided not to include the surviving entity Arconic in the list of MIAX Select Symbols. The Exchange now proposes to amend the Fee Schedule to delete the symbol ''AA'' in the list of MIAX Select Symbols to correspond with this change. The change is designed to ensure that there is no confusion amongst market participants and to clarify that Arconic will not become a MIAX Select Symbol. The proposed change is to become effective November 1, 2016.

2. Statutory Basis

The Exchange believes that its proposal to amend its Fee Schedule is consistent with Section 6(b) of the Act [8] in general, and furthers the objectives of Section 6(b)(4) of the Act [9] in particular, in that it provides for the equitable allocation of reasonable dues, fees and other charges among members and issuers and other persons using any facility or system which the Exchange operates or controls. The Exchange also believes the proposal furthers the objectives of Section 6(b)(5) of the Act [10] in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest and is not designed to permit unfair discrimination between customers, issuers, brokers and dealers.

In particular, the proposal to delete the ''AA'' symbol from the list of MIAX Select Symbols is consistent with Section 6(b)(4) of the Act because the proposed change will allow for continued benefit to investors by providing them an updated list of Select Symbols in the Fee Schedule.

The Exchange believes that the proposal to amend an option class that qualifies for the credit for transactions in MIAX Select Symbols is fair, equitable and not unreasonably discriminatory. The credit for transactions in the select symbols is reasonably designed because it will incent providers of Priority Customer order flow to send that Priority Customer order flow to the Exchange in order to receive a credit in a manner that enables the Exchange to improve its overall competitiveness and strengthen its market quality for all market participants. The Program which provides increased incentives in high volume select symbols is also reasonably designed to increase the competitiveness of the Exchange with other options exchanges that also offer increased incentives to higher volume symbols.

The Exchange also believes that its proposal is consistent with Section 6(b)(5) of the Act because it will apply equally to all Priority Customer orders in the select symbols. All similarly situated Priority Customer orders in the select symbols are subject to the same rebate schedule, and access to the Exchange is offered on terms that are not unfairly discriminatory. In addition, the Program is equitable and not unfairly discriminatory because, while only Priority Customer order flow qualifies for the Program, an increase in Priority Customer order flow will bring greater volume and liquidity, which benefit all market participants by providing more trading opportunities and tighter spreads.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change is a not a competitive filing but rather is designed to update the list of Select Symbols in order to avoid potential confusion on the part of market participants.

---

[3] The term ''MIAX Select Symbols'' currently means options overlying AA, AAL, AAPL, AIG, AMAT, AMD, AMZN, BA, BABA, BBRY, BIDU, BP, C, CAT, CBS, CELG, CLF, CVX, DAL, EBAY, EEM, FB, FCX, GE, GILD, GLD, GM, GOOGL, GPRO, HAL, HTZ, INTC, IWM, JCP, JNJ, JPM, KMI, KO, MO, MRK, NFLX, NOK, NQ, ORCL, PBR, PFE, PG, QCOM, QQQ, RIG, S, SPY, SUNE, T, TSLA, USO, VALE, VXX, WBA, WFC, WMB, WY, X, XHB, XLE, XLF, XLP, XOM, XOP, and YHOO.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act,[11] and Rule 19b–4(f)(2)[12] thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

• Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or

• Send an email to *rule-comments@sec.gov.* Please include File Number SR–MIAX–2016–42 on the subject line.

Paper Comments

• Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–MIAX–2016–42. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–MIAX–2016–42 and should be submitted on or before December 9, 2016.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[13]

Brent J. Fields,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

Proposed Collection; Comment Request

Upon Written Request, Copies Available From: Securities and Exchange Commission, Office of Investor Education and Advocacy, Washington, DC 20549–0213.

Extension:

Rule 18f–1 and Form N–18f–1, SEC File No. 270–187, OMB Control No. 3235–0211

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520), the Securities and Exchange Commission (''Commission'') is soliciting comments on the collection of information summarized below. The Commission plans to submit this existing collection of information to the Office of Management and Budget for extension and approval.

Rule 18f–1 (17 CFR 270.18f–1) enables a registered open-end management investment company (''fund'') that may redeem its securities in-kind, by making a one-time election, to commit to make cash redemptions pursuant to certain requirements without violating section 18(f) of the Investment Company Act of 1940 (15 U.S.C. 80a–18(f)). A fund relying on the rule must file Form N–18F–1 (17 CFR 274.51) to notify the Commission of this election. The Commission staff estimates that 38 funds file Form N–18F–1 annually, and that each response takes one hour. Based on these estimates, the total annual burden hours associated with the rule is estimated to be 38 hours.

The estimate of average burden hours is made solely for the purposes of the Paperwork Reduction Act, and is not derived from a comprehensive or even a representative survey or study of the costs of Commission rules. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

Written comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the Commission, including whether the information has practical utility; (b) the accuracy of the Commission's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted in writing within 60 days of this publication.

Please direct your written comments to Pamela Dyson, Director/Chief Information Officer, Securities and Exchange Commission, C/O Remi Pavlik-Simon, 100 F Street NE., Washington, DC 20549; or send an email to: *PRA_Mailbox@sec.gov.*

Dated: November 14, 2016.

Brent J. Fields,

Secretary.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Sixteenth Meeting of the RTCA Tactical Operations Committee

AGENCY: Federal Aviation Administration (FAA), U.S. Department of Transportation (DOT).

ACTION: Sixteenth Meeting of the RTCA Tactical Operations Committee.

SUMMARY: The FAA is issuing this notice to advise the public of the Sixteenth Meeting of the RTCA Tactical Operations Committee.

DATES: The meeting will be held December 13, 2016, 01:00 p.m.–03:00 p.m.

ADDRESSES: The meeting will be held at: RTCA Headquarters, 1150 18th Street NW., Suite 910, Washington, DC 20036.

FOR FURTHER INFORMATION CONTACT: Trin Mitra at *tmitra@rtca.org* or 202–330–0655, the RTCA Secretariat, 1150 18th Street NW., Suite 910, Washington, DC, 20036, or by telephone at (202) 833–

9339, fax at (202) 833–9434, or Web site at *http://www.rtca.org.*

SUPPLEMENTARY INFORMATION: Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463, 5 U.S.C., App.), notice is hereby given for the Fifteenth Meeting of the RTCA Tactical Operations Committee. The agenda will include the following:

Tuesday, December 13, 2016—1:00 p.m.–3:00 p.m.

1. Opening of Meeting/Introduction of TOC Members—Co-Chairs Dale Wright and Bryan Quigley
2. Official Statement of Designated Federal Official—Elizabeth Ray
3. Approval of October 27, 2016 Meeting Summary
4. Graphical TFR Task Group—Recommendation
5. GPS Adjacent Band Compatibility Task Group—Ligado Proposal Review Recommendation
6. Updates on Future TOC Tasks
7. Other Business
8. Adjourn

Attendance is open to the interested public but limited to space availability. Given limited space on-site, members of the public that wish to participate virtually can request dial-in and online meeting information by contacting Trin Mitra, TOC Secretary, at *tmitra@rtca.org.* With the approval of the chairman, members of the public may present oral statements at the meeting. Persons wishing to present statements or obtain information should contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section. Members of the public may present a written statement to the committee at any time.

Issued in Washington, DC, on November 15, 2016.

Mohannad Dawoud,

Management & Program Analyst, Partnership Contracts Branch, ANG–A17 NextGen, Procurement Services Division, Federal Aviation Administration.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Maritime Administration

Maritime Environmental and Technical Assistance (META) Program Workshop on Battery Applications in Maritime Transportation

AGENCY: Maritime Administration, DOT.

ACTION: Notice of public workshop.

SUMMARY: The Maritime Administration (MARAD), in cooperation with Det Norske Veritas-Germanischer Lloyd, American Bureau of Shipping, and The American Society for Testing and Materials, will hold a workshop to share information and gather input related to the application of high-power batteries in maritime transportation. The workshop is being held as part of the Agency's Maritime Environmental and Technical Assistance (META) Program. Information received during the workshop will be used to enhance Agency and maritime industry stakeholders' understanding of the state of technology, potential design requirements for electric powered and hybrid electric vessels, and areas for future research, development and demonstration projects.

DATES: The workshop will be held on December 15 and 16, 2016, from 8:30 a.m. to 5:00 p.m.

ADDRESSES: The event will be held at the Department of Transportation Conference Center, 1200 New Jersey Ave. SE., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Sujit Ghosh, Maritime Administration, Office of Environment at (202) 366–1839 or via email at *Sujit.Ghosh@dot.gov.*

SUPPLEMENTARY INFORMATION: As additional information becomes available, MARAD will release further details on this event, including the agenda, on its Web page at *https://www.marad.dot.gov/environment-and-safety/office-of-environment.*

Registration

The meeting will be open to the public and streamed on the web. In order to attend the workshop in-person or to access the Web streaming you must register by emailing us at *META@dot.gov.* In your email, please indicate whether you would like to attend in-person or via web streaming, provide your full name, business affiliation, business address, telephone, and email address. In addition to the aforementioned required information, Foreign National registrants that plan to attend in-person must also provide their country of citizenship, date of birth, passport number, and passport expiration date. Please complete your registration with MARAD no later than 5:00 p.m. EST, December 2, 2016.

Capacity: Seating will be limited and available on a first-come-first-serve basis.

Arrival and Admission Information

1. Attendees are encouraged to arrive at least thirty minutes prior to the meeting for processing through building security. All attendees must enter through the New Jersey Avenue entrance (West Building—at the corner of New Jersey Avenue SE. and M Street SE.). Anyone exiting the building for any reason will be required to re-enter through the security checkpoint at the New Jersey Avenue Entrance.

2. Due to security requirements, all attendees must bring a Government-issued form of identification (*e.g.,* driver's license) to ensure access to the building. Foreign National attendees must bring their passports with them. To facilitate security screening, all in-person attendees are encouraged to limit bags and other items (*e.g.,* mobile phones, laptops, cameras, etc.) they bring into the building.

3. Due to space limitations, outside videotaping will not be allowed.

4. The Department of Transportation (DOT) and MARAD are not able to offer visitor parking; we suggest that attendees consider using alternative means of transportation to the building. DOT Headquarters/MARAD is served by Metrorail (Navy Yard station), Metro bus, DC Circulator, and taxi service. There are a number of private parking lots near the DOT building, but MARAD cannot guarantee the availability of parking spaces.

5. For information on facilities or services for persons with disabilities, or to request special assistance at the meeting, please contact Tom Thompson, Office of Environment, Maritime Administration, 1200 New Jersey Avenue SE., Washington, DC 20590; (202) 366–6045 as soon as possible.

Authority: 49 CFR 1.93

* * * * *

By Order of the Maritime Administrator.

Dated: November 15, 2016.

T. Mitchell Hudson, Jr.,

Secretary, Maritime Administration.

BILLING CODE 4910–81–P

DEPARTMENT OF THE TREASURY

Office of the Comptroller of the Currency

Agency Information Collection Activities: Information Collection Revision; Submission for OMB Review; Diversity Self-Assessment Template for OCC-Regulated Entities

AGENCY: Office of the Comptroller of the Currency (OCC), Treasury.

ACTION: Notice and request for comment.

SUMMARY: The OCC, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on a revised information

collection, as required by the Paperwork Reduction Act of 1995 (PRA). The OCC may not conduct or sponsor, and a respondent is not required to respond to, an information collection unless it displays a currently valid Office of Management and Budget (OMB) control number. The OCC previously received OMB approval for a voluntary information collection in the Final Interagency Policy Statement Establishing Joint Standards for Assessing the Diversity Policies and Practices of Entities Regulated by the Agencies (Policy Statement). The OCC now is soliciting comment on a revised information collection which adds a ''Diversity Self-Assessment Template for OCC-Regulated Entities'' (Template) to facilitate the self-assessment described in the Policy Statement. The OCC also is giving notice that it has sent the collection to OMB for review.

DATES: Comments must be submitted on or before December 19, 2016.

ADDRESSES: Because paper mail in the Washington, DC area and at the OCC is subject to delay, commenters are encouraged to submit comments by email, if possible. Comments may be sent to: Legislative and Regulatory Activities Division, Office of the Comptroller of the Currency, Attention: 1557–0334, 400 7th Street SW., Suite 3E–218, Mail Stop 9W–11, Washington, DC 20219. In addition, comments may be sent by fax to (571) 465–4326 or by electronic mail to *prainfo@occ.treas.gov.* You may personally inspect and photocopy comments at the OCC, 400 7th Street SW., Washington, DC 20219. For security reasons, the OCC requires that visitors make an appointment to inspect comments by calling (202) 649–6700 or, for persons who are deaf or hard of hearing, TTY, (202) 649–5597. Upon arrival, visitors will be required to present valid government-issued photo identification and submit to security screening in order to inspect and photocopy comments.

All comments received, including attachments and other supporting materials, are part of the public record and subject to public disclosure. Do not include any information with your comment, attachment, or supporting materials that you consider confidential or inappropriate for public disclosure.

Additionally, please send a copy of your comments by mail to: OCC Desk Officer, 1557–0334, U.S. Office of Management and Budget, 725 17th Street NW., #10235, Washington, DC 20503 or by email to: *oira submission@omb.eop.gov.*

FOR FURTHER INFORMATION CONTACT: Shaquita Merritt, OCC Clearance Officer, (202) 649–5490 or, for persons who are deaf or hard of hearing, TTY, (202) 649–5597, Legislative and Regulatory Activities Division, Office of the Comptroller of the Currency, 400 7th Street SW., Suite 3E–218, Mail Stop 9W–11, Washington, DC 20219.

SUPPLEMENTARY INFORMATION: Under the PRA (44 U.S.C. 3501–3520), certain Federal agencies must obtain approval from OMB for each collection of information that they conduct or sponsor. ''Collection of information'' is defined in 44 U.S.C. 3502(3) (and 5 CFR 1320.3(c) of the PRA implementing regulations) to include agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. The OCC is requesting that OMB approve its proposed revision to the collection of information.

Title: Diversity Self-Assessment Template for OCC-Regulated Entities.

OMB Control No.: 1557–0334.

Description: The OCC previously received OMB approval for a voluntary information collection with respect to the Policy Statement, pursuant to which entities regulated by the OCC voluntarily self-assess their diversity policies and practices.[1] This proposed revision to that collection would add the Template to assist with the self-assessment. The Template (1) asks for general information about a respondent; (2) includes a checklist of the standards set forth in the Policy Statement; (3) seeks additional diversity data; and (4) provides an opportunity for a respondent to provide other information regarding or comment on the self-assessment of its diversity policies and practices. A draft of this Template can be viewed at *www.occ.gov/divselfassessment.*

The OCC estimates that use of the Template would reduce the average response time for this collection per respondent from 12 hours to 8 hours. The OCC may use the information submitted by the entities it regulates to monitor progress and trends in the financial services industry with regard to diversity and inclusion in employment and contracting activities and to identify and highlight those policies and practices that have been successful. The OCC will continue to reach out to the regulated entities and other interested parties to discuss diversity and inclusion in the financial services industry and share leading practices. The OCC may also publish information disclosed by the entity, such as any identified leading practices, in any form that does not identify a particular institution or individual or disclose confidential business information.

Type of Review: Revision.

Affected Public: Businesses or other for-profit.

Burden Estimates:

Number of Respondents: 215.

Revised Annual Burden for Policy Statement and Template: 8 hours.

Total Burden: 1,720 hours.

Frequency of Response: Annual.

Comments: On August 25, 2016, the OCC issued a 60-day notice soliciting comments on the revision to the information collection. *See* 81 FR 58553. The comment period closed on October 24, 2016, and the OCC received one comment from an individual who raised several issues.

First, the commenter stated that use of the Template would not reduce a regulated entity's collection burden. We believe, however, that the structured format and layout of the Template is easy to use and thereby simplifies the information collection. We expect that this will reduce the time it takes to complete a self-assessment based on the Joint Standards. Furthermore, similar information currently provided in response to required EEOC and OFCCP annual reports, can be easily recorded on the self-assessment Template.

Second, the commenter stated that the OCC's publication of a Template creates the impression that the Policy Statement and Template set out mandatory, not voluntary, standards. The OCC does not intend to create this impression and notes that the Template itself states that ''a self-assessment by the organization is voluntary.'' The Policy Statement itself also makes the voluntary nature of a self-assessment clear. Third, the commenter asserted that the Template's yes/no structure is overly simplistic. The OCC notes, however, that while an entity's self-assessment of each standard begins with a yes/no response, the entity also is asked about the relevant successes and/or challenges associated with each standard. In addition, at the end of the Template, respondents are invited to provide any ''other important information or comments regarding the self-assessment of their diversity and inclusion policies and practices.''

Finally, the commenter asserts that by publishing the Template, the agency has effectively foreclosed the possibility of a better self-assessment framework. To the contrary, the Template invites a regulated entity to ''utilize this Template or its own assessment tool.'' In addition, the OCC specifically asked the public in its 60-day notice for ''[w]ays to enhance the quality, utility, and clarity of the information to be

[1] 80 FR 33016 (June 10, 2015).

collected'' and asks this same question again below. We welcome the public to share with us, and with other regulated entities, any framework or tool that facilitates a regulated entity's diversity self-assessment.

In addition, we continue to invite comments on the following:

(a) Whether the collection of information is necessary for the proper performance of the functions of the OCC, including whether the information has practical utility;

(b) The accuracy of the OCC's estimate of the information collection burden;

(c) Ways to enhance the quality, utility, and clarity of the information to be collected;

(d) Ways to minimize the burden of the collection on respondents, including through the use of automated collection techniques or other forms of information technology; and

(e) Estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Dated: November 10, 2016.

Karen Solomon,

Deputy Chief Counsel, office of the Comptroller of the Currency.

[FR Doc. 2016–27712 Filed 11–17–16; 8:45 am]

BILLING CODE 4810–33–P

DEPARTMENT OF THE TREASURY

Office of the Comptroller of the Currency

Agency Information Collection Activities: Information Collection Renewal; Comment Request; Reporting, Recordkeeping, and Disclosure Requirements Associated With Proprietary Trading and Certain Interests in and Relationships With Covered Funds

AGENCY: Office of the Comptroller of the Currency (OCC), Treasury.

ACTION: Notice and request for comment.

SUMMARY: The OCC, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on a continuing information collection as required by the Paperwork Reduction Act of 1995 (PRA).

In accordance with the requirements of the PRA, the OCC may not conduct or sponsor, and the respondent is not required to respond to, an information collection unless it displays a currently valid Office of Management and Budget (OMB) control number.

The OCC is soliciting comment concerning renewal of its information collection titled, ''Reporting, Recordkeeping, and Disclosure Requirements Associated with Proprietary Trading and Certain Interests in and Relationships with Covered Funds.''

DATES: Comments must be submitted on or before January 17, 2017.

ADDRESSES: Because paper mail in the Washington, DC area and at the OCC is subject to delay, commenters are encouraged to submit comments by email, if possible. Comments may be sent to: Legislative and Regulatory Activities Division, Office of the Comptroller of the Currency, Attention: 1557–00309, 400 7th Street SW., Suite 3E–218, Mail Stop 9W–11, Washington, DC 20219. In addition, comments may be sent by fax to (571) 465–4326 or by electronic mail to *prainfo@occ.treas.gov.* You may personally inspect and photocopy comments at the OCC, 400 7th Street SW., Washington, DC 20219. For security reasons, the OCC requires that visitors make an appointment to inspect comments. You may do so by calling (202) 649–6700 or, for persons who are deaf or hard of hearing, TTY, (202) 649–5597. Upon arrival, visitors will be required to present valid government-issued photo identification and submit to security screening in order to inspect and photocopy comments.

All comments received, including attachments and other supporting materials, are part of the public record and subject to public disclosure. Do not include any information in your comment or supporting materials that you consider confidential or inappropriate for public disclosure.

FOR FURTHER INFORMATION CONTACT: Shaquita Merritt, OCC Clearance Officer, (202) 649–5490 or, for persons who are deaf or hard of hearing, TTY, (202) 649–5597, Legislative and Regulatory Activities Division, Office of the Comptroller of the Currency, 400 7th Street SW., Suite 3E–218, Mail Stop 9W–11, Washington, DC 20219.

SUPPLEMENTARY INFORMATION: Under the PRA (44 U.S.C. 3501–3520), Federal agencies must obtain approval from the OMB for each collection of information that they conduct or sponsor. ''Collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) to include agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of title 44 requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, the OCC is publishing notice of the proposed collection of information set forth in this document.

Title: Reporting, Recordkeeping, and Disclosure Requirements Associated with Proprietary Trading and Certain Interests in and Relationships with Covered Funds.

OMB Control No.: 1557–0309.

Type of Review: Regular.

Description: This collection of information is established pursuant to a 2014 final rule [1] required by the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act), which was enacted on July 21, 2010.[2] Section 619 of the Dodd-Frank Act contains certain prohibitions and restrictions on the ability of a banking entity and nonbank financial company supervised by the Board of Governors of the Federal Reserve System (Board) to engage in proprietary trading and have certain interests in, or relationships with, a hedge fund or private equity fund.

Section 619 of the Dodd-Frank Act added a new section 13 to the Bank Holding Company Act (BHC Act) (codified at 12 U.S.C. 1851) that generally prohibits any banking entity from engaging in proprietary trading or from acquiring or retaining an ownership interest in, sponsoring, or having certain relationships with a hedge fund or private equity fund, subject to certain exemptions.

Section 44.12(e) states that, upon application by a banking entity, the Board may extend the period of time to meet the requirements on ownership limitations under § 44.12(a)(2)(i) for up to 2 additional years, if the Board finds that an extension would be consistent with safety and soundness and not detrimental to the public interest. An application for extension must: (1) Be submitted to the Board at least 90 days prior to the expiration of the applicable time period; (2) provide the reasons for application including information that addresses the factors in paragraph (e)(2) of § 44.12; and (3) explain the banking entity's plan for reducing the permitted investment in a covered fund through redemption, sale, dilution, or other methods as required in § 44.12(a)(2).

Section 44.20(d) provides that a banking entity engaged in proprietary trading activity permitted under subpart

[1] 79 FR 5536 (January 31, 2014).

[2] Dodd-Frank Wall Street Reform and Consumer Protection Act, Public Law 111–203, 124 Stat. 1376 (2010).

B of part 44 must comply with the reporting requirements described in Appendix A if (1) the banking entity (other than a foreign banking entity as provided in § 44.20(d)(1)(ii)) has, together with its affiliates and subsidiaries, trading assets and liabilities (excluding trading assets and liabilities involving obligations of or guaranteed by the United States or any agency of the United States) the average gross sum of which (on a worldwide consolidated basis) over the previous consecutive four quarters, as measured as of the last day of each of the four prior calendar quarters, equals or exceeds the threshold established in § 44.20(d)(2); (2) in the case of a foreign banking entity, the average gross sum of the trading assets and liabilities of the combined U.S. operations of the foreign banking entity (including all subsidiaries, affiliates, branches, and agencies of the foreign banking entity operating, located, or organized in the United States and excluding trading assets and liabilities involving obligations of or guaranteed by the United States or any agency of the United States) over the previous consecutive four quarters, as measured as of the last day of each of the four prior calendar quarters, equals or exceeds the threshold established in § 44.20(d)(2); or (3) the OCC notifies the banking entity in writing that it must satisfy the reporting requirements contained in Appendix A of part 44. The threshold for reporting is $50 billion beginning on June 30, 2014; $25 billion beginning on April 30, 2016; and $10 billion beginning on December 31, 2016. Under the 2014 final rule, a banking entity with $50 billion or more in trading assets and liabilities must report the information required by Appendix A for each calendar month within 30 days of the end of the relevant calendar month. Beginning with information for the month of January 2015, such information must be reported within 10 days of the end of that calendar month. The OCC may notify a banking entity in writing that it must report on a different basis. Any other banking entity subject to Appendix A shall report the information required by Appendix A for each calendar quarter within 30 days of the end of that calendar quarter unless the OCC notifies the banking entity in writing that it must report on a different basis. Appendix A requires banking entities to furnish the following quantitative measurements for each trading desk of the banking entity: (1) Risk and Position Limits and Usage; (2) Risk Factor Sensitivities; (3) Value-at-Risk (VaR) and stress VaR; (4) Comprehensive Profit and loss Attribution; (5) Inventory Turnover; (6) Inventory Aging; and (7) Customer-Facing Trade Ratio.

Section 44.3(d)(3) specifies that proprietary trading does not include any purchase or sale of a security by a banking entity for the purpose of liquidity management in accordance with a documented liquidity management plan of the banking entity that: (1) Specifically contemplates and authorizes the particular securities to be used for liquidity management purposes, the amount, types, and risks of these securities that are consistent with liquidity management, and the liquidity circumstances in which the particular securities may or must be used; (2) requires that any purchase or sale of securities contemplated and authorized by the plan be principally for the purpose of managing the liquidity of the banking entity, and not for the purpose of short-term resale, benefitting from actual or expected short-term price movements, realizing short-term arbitrage profits, or hedging a position taken for such short-term purposes; (3) requires that any securities purchased or sold for liquidity management purposes be highly liquid and limited to securities the market, credit, and other risks of which the banking entity does not reasonably expect to give rise to appreciable profits or losses as a result of short-term price movements; (4) limits any securities purchased or sold for liquidity management purposes, together with any other instruments purchased or sold for such purposes, to an amount that is consistent with the banking entity's near-term funding needs, including deviations from normal operations of the banking entity or any affiliate thereof, as estimated and documented pursuant to methods specified in the plan; (5) includes written policies and procedures, internal controls, analysis, and independent testing to ensure that the purchase and sale of securities that are not permitted under § 44.6(a) or § 44.6(b) are for the purpose of liquidity management and in accordance with the liquidity management plan described in this paragraph; and (6) is consistent with the OCC's supervisory requirements, guidance, and expectations regarding liquidity management.

Section 44.4(b)(3)(i)(A) provides that a trading desk or other organizational unit of another entity with $50 billion or more in trading assets and liabilities is not a client, customer, or counterparty unless the trading desk documents how and why a particular trading desk or other organizational unit of the entity should be treated as a client, customer, or counterparty of the trading desk for purposes of § 44.4(b)(2).

Section 44.5(c) requires documentation for any purchase or sale of financial instruments for risk-mitigating hedging purposes that is: (1) Not established by the specific trading desk establishing or responsible for the underlying positions, contracts, or other holdings the risks of which the hedging activity is designed to reduce; (2) established by the specific trading desk establishing or responsible for the underlying positions, contracts, or other holdings the risks of which the purchases or sales are designed to reduce, but that is effected through a financial instrument, exposure, technique, or strategy that is not specifically identified in the trading desk's written policies and procedures established under § 44.5(b)(1) or § 44.4(b)(2)(iii)(B) as a product, instrument, exposure, technique, or strategy such desk may use for hedging; or (3) established to hedge aggregated positions across two or more trading desks. In connection with any purchase or sale that meets these specified circumstances, a banking entity must, at a minimum and contemporaneously with the purchase or sale, document: (1) The specific, identifiable risk(s) of the identified positions, contracts, or other holdings of the banking entity that the purchase or sale is designed to reduce; (2) the specific risk-mitigating strategy that the purchase or sale is designed to fulfill; and (3) the trading desk or other business unit that is establishing and responsible for the hedge. The banking entity must also create and retain records sufficient to demonstrate compliance with § 44.5(c) for at least 5 years in a form that allows the banking entity to promptly produce such records to the OCC on request or such longer period as required under other law or part 44.

Section 44.11(a)(2) requires that covered funds generally must be organized and offered only in connection with the provision of *bona fide* trust, fiduciary, investment advisory, or commodity trading advisory services and only to persons that are customers of such services of the banking entity (or an affiliate thereof), pursuant to a written plan or similar documentation outlining how the banking entity or such affiliate intends to provide advisory or similar services to its customers through organizing and offering the covered fund.

Section 44.20(b) specifies the contents of the compliance program for a banking entity with total consolidated assets of $10 billion or more. It includes: (1) Written policies and procedures reasonably designed to document, describe, monitor, and limit trading activities (including those permitted under §§ 44.3 to 44.6), including setting, monitoring, and managing required limits set out in § 44.4 and § 44.5 and activities and investments with respect to a covered fund (including those permitted under §§ 44.11 through 44.14) conducted by the banking entity to ensure that all activities and investments conducted by the banking entity that are subject to section 13 of the BHC Act and part 44 comply with section 13 of the BHC Act and part 44; (2) a system of internal controls reasonably designed to monitor compliance with section 13 of the BHC Act and part 44 and to prevent the occurrence of activities or investments that are prohibited by section 13 of the BHC Act and part 44; (3) a management framework that clearly delineates responsibility and accountability for compliance with section 13 of the BHC Act and part 44 and includes appropriate management review of trading limits, strategies, hedging activities, investments, incentive compensation, and other matters identified in part 44 or by management as requiring attention; (4) independent testing and audit of the effectiveness of the compliance program conducted periodically by qualified personnel of the banking entity or by a qualified outside party; (5) training for trading personnel and managers, as well as other appropriate personnel, to effectively implement and enforce the compliance program; and (6) records sufficient to demonstrate compliance with section 13 of the BHC Act and part 44, which a banking entity must promptly provide to the OCC upon request and retain for a period of no less than 5 years or such longer period as required by the OCC.

Section 44.20(c) specifies that the compliance program of a banking entity must satisfy the requirements and other standards contained in Appendix B, if: (1) The banking entity engages in proprietary trading permitted under subpart B of part 44 and is required to comply with the reporting requirements of § 44.20(d); (2) the banking entity has reported total consolidated assets as of the previous calendar year end of $50 billion or more or, in the case of a foreign banking entity, has total U.S. assets as of the previous calendar year end of $50 billion or more (including all subsidiaries, affiliates, branches and agencies of the foreign banking entity operating, located or organized in the United States); or (3) the OCC notifies the banking entity in writing that it must satisfy the requirements and other standards contained in Appendix B. Appendix B provides enhanced minimum standards for compliance programs for banking entities that meet any of the thresholds in § 44.20(c) as described above. Appendix B sets forth standards with respect to the establishment, oversight, maintenance, and enforcement by banking entities of the enhanced compliance program for ensuring and monitoring compliance with the prohibitions and restrictions on proprietary trading and covered fund activities and investments set forth in section 13 of the BHC Act and part 44. The program must: (1) Be reasonably designed to identify, document, monitor, and report the permitted trading and covered fund activities and investments; identify, monitor, and promptly address the risk of these covered activities and investments and potential areas of noncompliance; and prevent activities or investments prohibited by, or that do not comply with, section 13 of the BHC Act and part 44; (2) establish and enforce appropriate limits on covered activities and investments, including limits on size, scope, complexity, and risks of individual activities or investments consistent with the requirements of section 13 of the BHC Act and part 44; (3) subject the effectiveness of the compliance program to periodic independent review and testing, and ensure that the entity's internal audit, corporate compliance, and internal control functions involved in review and testing are effective and independent; (4) make senior management and others accountable for effective implementation of compliance program and ensure that the board of directors and chief executive officer (or equivalent) of the banking entity review effectiveness of the compliance program; and (5) facilitate supervision and examination by the OCC of permitted trading and covered fund activities and investments.

Section 44.20(d) provides that a banking entity engaged in certain proprietary trading activity must comply with the reporting requirements described in Appendix A if the banking entity's trading activity meets or exceeds the thresholds set forth in § 44.20(d). A banking entity must also, for any quantitative measurement furnished to the OCC pursuant to § 44.20(d) and Appendix A, create and maintain records documenting the preparation and content of these reports, as well as such information as is necessary to permit the OCC to verify the accuracy of such reports, for a period of 5 years from the end of the calendar year for which the measurement was taken.

Section 44.20(e) specifies additional documentation required for covered funds. Any banking entity that has more than $10 billion in total consolidated assets as reported on December 31 of the previous two calendar years shall maintain records that include: (1) Documentation of the exclusions or exemptions other than sections 3(c)(1) and 3(c)(7) of the Investment Company Act of 1940 relied on by each fund sponsored by the banking entity (including all subsidiaries and affiliates) in determining that such fund is not a covered fund; (2) for each fund sponsored by the banking entity (including all subsidiaries and affiliates) for which the banking entity relies on one or more of the exclusions from the definition of covered fund provided by §§ 44.10(c)(1), 44.10(c)(5), 44.10(c)(8), 44.10(c)(9), or 44.10(c)(10), documentation supporting the banking entity's determination that the fund is not a covered fund pursuant to one or more of those exclusions; (3) for each seeding vehicle described in §§ 44.10(c)(12)(i) or 44.10(c)(12)(iii) that will become a registered investment company or SEC-regulated business development company, a written plan documenting the banking entity's determination that the seeding vehicle will become a registered investment company or SEC-regulated business development company; the period of time during which the vehicle will operate as a seeding vehicle; and the banking entity's plan to market the vehicle to third-party investors and convert it into a registered investment company or SEC-regulated business development company within the time period specified in § 44.12(a)(2)(i)(B); and (4) for any banking entity that is, or is controlled directly or indirectly by a banking entity that is, located in or organized under the laws of the United States or of any State, if the aggregate amount of ownership interests in foreign public funds that are described in § 44.10(c)(1) owned by such banking entity (including ownership interests owned by any affiliate that is controlled directly or indirectly by a banking entity that is located in or organized under the laws of the United States or of any State) exceeds $50 million at the end of two or more consecutive calendar quarters, beginning with the next succeeding calendar quarter, documentation of the value of the ownership interests owned by the banking entity (and such affiliates) in each foreign public fund and each jurisdiction in which any such foreign public fund is organized, calculated as of the end of each calendar quarter, which documentation must continue until the banking entity's aggregate amount of ownership interests in foreign public funds is below $50 million for two consecutive calendar quarters.

Section 44.20(f)(1) applies to banking entities with no covered activities. A banking entity that does not engage in activities or investments pursuant to subpart B or subpart C of part 44 (other than trading activities permitted pursuant to § 44.6(a)) may satisfy the requirements of § 44.20 by establishing the required compliance program prior to becoming engaged in such activities or making such investments (other than trading activities permitted pursuant to § 44.6(a)).

Section 44.20(f)(2) applies to banking entities with modest activities. A banking entity with total consolidated assets of $10 billion or less as reported on December 31 of the previous two calendar years that engages in activities or investments pursuant to subpart B or subpart C of part 44 (other than trading activities permitted under § 44.6(a)) may satisfy the requirements of § 44.20 by including in its existing compliance policies and procedures appropriate references to the requirements of section 13 of the BHC Act and part 44 and adjustments as appropriate given the activities, size, scope and complexity of the banking entity.

Section 44.11(a)(8)(i) requires that a banking entity clearly and conspicuously disclose, in writing, to any prospective and actual investor in the covered fund (such as through disclosure in the covered fund's offering documents): (1) That any losses in such covered fund will be borne solely by investors in the covered fund and not by the banking entity or its affiliates; therefore, the banking entity's losses in such covered fund will be limited to losses attributable to the ownership interests in the covered fund held by the banking entity and any affiliate in its capacity as investor in the covered fund or as beneficiary of a restricted profit interest held by the banking entity or any affiliate; (2) that such investor should read the fund offering documents before investing in the covered fund; (3) that the ownership interests in the covered fund are not insured by the FDIC, and are not deposits, obligations of, or endorsed or guaranteed in any way, by any banking entity (unless that happens to be the case); and (4) the role of the banking entity and its affiliates and employees in sponsoring or providing any services to the covered fund.

Affected Public: Businesses or other for-profit.

Burden Estimates:

Number of respondents: 381.

Total estimated annual burden: 28,016 hours (14,386 hours for initial setup and 13,630 hours for ongoing compliance).

Frequency of Response: On occasion.

Comments: Comments submitted in response to this notice will be summarized and included in the request for OMB approval. All comments will become a matter of public record. Comments are invited on:

(a) Whether the collection of information is necessary for the proper performance of the functions of the OCC, including whether the information has practical utility;

(b) The accuracy of the OCC's estimate of the information collection burden;

(c) Ways to enhance the quality, utility, and clarity of the information to be collected;

(d) Ways to minimize the burden of the collection on respondents, including through the use of automated collection techniques or other forms of information technology; and

(e) Estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Dated: November 10, 2016.

Karen Solomon,

Deputy Chief Counsel, Office of the Comptroller of the Currency.

DEPARTMENT OF THE TREASURY

Office of Foreign Assets Control

Sanctions Actions Pursuant to Executive Order 13660

AGENCY: Office of Foreign Assets Control, Treasury.

ACTION: Notice.

SUMMARY: The Treasury Department's Office of Foreign Assets Control (OFAC) is publishing the names of six persons whose property and interests in property are blocked pursuant to Executive Order (E.O.) 13660.

DATES: OFAC's actions described in this notice were effective on November 14, 2016, as further specified below.

FOR FURTHER INFORMATION CONTACT: The Department of the Treasury's Office of Foreign Assets Control: Assistant Director for Licensing, tel.: 202–622–2480, Assistant Director for Regulatory Affairs, tel.: 202–622–4855, Assistant Director for Sanctions Compliance & Evaluation, tel.: 202–622–2490; or the Department of the Treasury's Office of the Chief Counsel (Foreign Assets Control), Office of the General Counsel, tel.: 202–622–2410.

SUPPLEMENTARY INFORMATION:

Electronic Availability

The Specially Designated Nationals and Blocked Persons List and additional information concerning OFAC sanctions programs are available on OFAC's Web site (*www.treas.gov/ofac*).

Notice of OFAC Actions

On November 14, 2016, OFAC blocked the property and interests in property of the following persons pursuant to E.O. 13660, ''Blocking Property of Certain Persons Contributing to the Situation in Ukraine'':

Individuals

1. BAKHAREV, Konstantin Mikhailovich; DOB 20 Oct 1972; POB Ukraine; Gender Male (individual) [UKRAINE–EO13660].
2. BALBEK, Ruslan Ismailovich; DOB 28 Aug 1977; POB Uzbekistan; Gender Male (individual) [UKRAINE–EO13660].
3. BELIK, Dmitry Anatolievich; DOB 17 Oct 1969; POB Russia; Gender Male (individual) [UKRAINE–EO13660].
4. KOZENKO, Andrey Dmitrievich; DOB 03 Aug 1981; POB Ukraine Gender Male (individual) [UKRAINE–EO13660].
5. SAVCHENKO, Svetlana Borisovna; DOB 24 Jun 1965; POB Ukraine Gender Female (individual) [UKRAINE–EO13660].
6. SHPEROV, Pavel Valentinovich; DOB 04 Jul 1971; POB Ukraine; Gender Male (individual) [UKRAINE–EO13660].

Dated: November 14, 2016.

BILLING CODE 4810–AL–P

DEPARTMENT OF THE TREASURY

Submission for OMB Review; Comment Request

November 15, 2016.

The Department of the Treasury will submit the following information collection request(s) to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, Public Law 104–13, on or after the date of publication of this notice.

DATES: Comments should be received on or before December 19, 2016 to be assured of consideration.

ADDRESSES: Send comments regarding the burden estimates, or any other aspect of the information collection(s), including suggestions for reducing the burden, to (1) Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for Treasury, New Executive Office Building, Room 10235, Washington, DC 20503, or email at *OIRA_Submission@OMB.EOP.gov* and (2) Treasury PRA Clearance Officer, 1750 Pennsylvania Ave. NW., Suite 8142, Washington, DC 20220, or email at *PRA@treasury.gov.*

FOR FURTHER INFORMATION CONTACT: Copies of the submissions may be obtained by emailing *PRA@treasury.gov,* calling (202) 622–0934, or viewing the entire information collection request at *www.reginfo.gov.*

Departmental Offices (DO)

OMB Control Number: 1505–0146.

Type of Review: Revision of a currently approved collection.

Title: Survey of U.S. Ownership of Foreign Securities.

Forms: TIC–SHC, TIC–SHCA.

Abstract: The survey will collect information on U.S. holdings of foreign securities. The information will be used in the computation of the U.S. balance of payments accounts and international investments position, as well as in the formulation of U.S. financial and monetary policies. This survey is also part of an international effort coordinated by the IMF to improve worldwide balance of payments statistics. Respondents are primarily the largest custodians of securities, banks, securities dealers, and investors.

Affected Public: Businesses or other for-profits.

Estimated Total Annual Burden Hours: 53,260.

Bob Faber,

Acting Treasury PRA Clearance Officer.

DEPARTMENT OF VETERANS AFFAIRS

National Research Advisory Council; Notice of Meeting

The Department of Veterans Affairs (VA) gives notice under the Federal Advisory Committee Act, 5 U.S.C., App. 2, that the National Research Advisory Council will hold a meeting on Wednesday, December 7, 2016, in Conference Room 730 at 810 Vermont Ave NW., Washington, DC. The meeting will convene at 9:00 a.m. and end at 3:00 p.m. This meeting is open to the public.

The agenda will include reviews of the recommendations of the sub-committees on the Air Force Health Study and the Technology Transfer Program. Additionally, a briefing on the Office of Research and Development Communications Strategy will be given.

No time will be allocated at this meeting for receiving oral presentations from the public. Members of the public wanting to attend may contact Pauline Cilladi-Rehrer, Designated Federal Officer, ORD (10P9), Department of Veterans Affairs, 810 Vermont Avenue NW., Washington, DC 20420, at (202) 443–5607, or by email at *pauline.cilladi-rehrer@va.gov.* no later than close of business on November 30, 2016. Because the meeting is being held in a government building, a photo I.D. must be presented at the Guard's Desk as a part of the clearance process. Due to security protocols, and in order to prevent delays in clearance processing, you should allow an additional 30 minutes before the meeting begins. Any member of the public seeking additional information should contact Pauline Ciladi-Rehrer at the phone number or email address noted above.

Dated: November 14, 2016.

LaTonya L. Small,

Advisory Committee Management Officer.

Investment Company Reporting Modernization

AGENCY: Securities and Exchange Commission.

ACTION: Final rule.

SUMMARY: The Securities and Exchange Commission is adopting new rules and forms as well as amendments to its rules and forms to modernize the reporting and disclosure of information by registered investment companies. The Commission is adopting new Form N–PORT, which will require certain registered investment companies to report information about their monthly portfolio holdings to the Commission in a structured data format. In addition, the Commission is adopting amendments to Regulation S–X, which will require standardized, enhanced disclosure about derivatives in investment company financial statements, as well as other amendments. The Commission is adopting new Form N–CEN, which will require registered investment companies, other than face-amount certificate companies, to annually report certain census-type information to the Commission in a structured data format. The Commission is adopting amendments to Forms N–1A, N–3, and N–CSR to require certain disclosures regarding securities lending activities. Finally, the Commission is rescinding current Forms N–Q and N–SAR and amending certain other rules and forms. Collectively, these amendments will, among other things, improve the information that the Commission receives from investment companies and assist the Commission, in its role as primary regulator of investment companies, to better fulfill its mission of protecting investors, maintaining fair, orderly and efficient markets, and facilitating capital formation. Investors and other potential users can also utilize this information to help investors make more informed investment decisions.

DATES: *Effective Dates:* This rule is effective January 17, 2017, except for the following:

- The amendments to 17 CFR 200.800, 232.105, 232.301, 240.10A–1, 240.12b–25, 240.13a–10, 240.13a–11, 240.13a–13, 240.13a–16, 240.15d–10, 240.15d–11, 240.15d–13, 240.15d–16, 249.322, 249.330, 270.8b–16, 270.10f–3, 270.30a–1, 270.30a–4, 270.30b1–1, 270.30b1–2, 270.30b1–3, 274.101, and 274.218, and in Instruction 55 amending § 270.30d–1 are effective June 1, 2018; and
- The amendments to 17 CFR 232.401, 249.332, 270.8b–33, 270.30a–2, 270.30a–3, 270.30b1–5, and 274.130, and in Instruction 54 amending § 270.30d–1, Instruction 57 amending Form N–1A (referenced in §§ 239.15A and 274.11A), Instruction 59 amending Form N–2 (referenced in §§ 239.14 and 274.11a–1), and Instruction 61 amending Form N–3 (referenced in §§ 239.17a and 274.11b) are effective August 1, 2019.

Compliance Dates: The applicable compliance dates are discussed in section II.H. of this final rule.

FOR FURTHER INFORMATION CONTACT: Daniel K. Chang, Senior Counsel, J. Matthew DeLesDernier, Senior Counsel, Jacob D. Krawitz, Senior Counsel, Andrea Ottomanelli Magovern, Senior Counsel, Naseem Nixon, Senior Counsel, Michael C. Pawluk, Senior Special Counsel, or Sara Cortes, Assistant Director, at (202) 551–6792, Investment Company Rulemaking Office, Matt Giordano, Chief Accountant, or Kristy Von Ohlen, Assistant Chief Accountant, Chief Accountant's Office, at (202) 551–6918, Division of Investment Management, Securities and Exchange Commission, 100 F Street, NE., Washington, DC 20549–8549.

SUPPLEMENTARY INFORMATION: The Securities and Exchange Commission (the ''Commission'') is adopting new Form N–PORT [referenced in 17 CFR 274.150] and new Form N–CEN [referenced in 17 CFR 274.101] under the Investment Company Act of 1940 [15 U.S.C. 80a–1 *et seq.*] (''Investment Company Act''); new rules 30a–4 [17 CFR 270.30a–4] and 30b1–9 [17 CFR 270.30b1–9] under the Investment Company Act; rescinding rules 30b1–1 [17 CFR 270.30b1–1], 30b1–2 [17 CFR 270.30b1–2], 30b1–3 [17 CFR 270.30b1–3], and 30b1–5 [17 CFR 270.30b1–5] under the Investment Company Act; adopting amendments to rules 8b–16 [17 CFR 270.8b–16], 8b–33 [17 CFR 270.8b–33], 10f–3 [17 CFR 270.10f–3], 30a–1 [17 CFR 270.30a–1], 30a–2 [17 CFR 270.30a–2], 30a–3 [17 CFR 270.30a–3], and 30d–1 [17 CFR 270.30d–1], and Form N–8F [referenced in 17 CFR 274.218] under the Investment Company Act; adopting amendments to Forms N–1A [referenced in 17 CFR 274.11A], N–2 [referenced in 274.11a–1], N–3 [referenced in 274.11b], N–4 [referenced in 17 CFR 274.11c], and N–6 [referenced in 17 CFR 274.11d] under the Investment Company Act and the Securities Act of 1933 [15 U.S.C. 77a *et seq.*] (''Securities Act''); adopting amendments to Form N–14 [referenced in 17 CFR 239.23] under the Securities Act; rescinding Form N–SAR [referenced in 17 CFR 274.101 and Form N–Q [referenced in 17 CFR 274.130] and adopting amendments to Form N–CSR [referenced in 17 CFR 274.128] under the Investment Company Act and Securities Exchange Act of 1934 [15 U.S.C. 78a *et seq.*] (''Exchange Act''); adopting amendments to rules 10A–1 [17 CFR 240.10A–1], 12b–25 [17 CFR 240.12b–25], 13a–10 [17 CFR 240.13a–10], 13a–11 [17 CFR 240.13a–11], 13a–13 [17 CFR 240.13a–13], 13a–16 [17 CFR 240.13a–16], 15d–10 [17 CFR 240.15d–10], 15d–11 [17 CFR 240.15d–11], 15d–13 [17 CFR 240.15d–13], and 15d–16 [17 CFR 240.15d–16] under the Exchange Act; rescinding section 332 [17 CFR 249.332] and adopting amendments to sections 322 [17 CFR 249.322] and 330 [17 CFR 249.330] of 17 CFR part 249; adopting amendments to Article 6 [17 CFR 210.6–01 *et seq.*] and Article 12 [17 CFR 210.12–01 *et seq.*] of Regulation S–X [17 CFR 210]; adopting amendments to section 800 of 17 CFR part 200 [17 CFR 200.800]; and adopting amendments to rules 105 [17 CFR 232.105], 301 [17 CFR 232.301], and 401 [17 CFR 232.401] of Regulation S–T [17 CFR 232].

Table of Contents

I. Background

A. Changes in the Industry and Technology

As the primary regulator of the asset management industry, the Commission relies on information included in reports filed by registered investment companies (''funds'') [1] and investment advisers for a number of purposes, including monitoring industry trends, informing policy and rulemaking, identifying risks, and assisting Commission staff in examination and enforcement efforts. Over the years, however, as assets under management and complexity in the industry have grown, so too has the volume and complexity of information that the Commission must analyze to carry out its regulatory duties.

Commission staff estimates that there were approximately 17,052 funds registered with the Commission, as of December 2015.[2] Commission staff further estimates that there were nearly 12,000 investment advisers registered with the Commission, along with another 3,138 advisers that file reports with the Commission as exempt reporting advisers, as of January 2016.[3] At year-end 2015, assets of registered investment companies exceeded $18 trillion, having grown from about $5.8 trillion at the end of 1998.[4] At the same time, the industry has developed new product structures, such as ETFs,[5] new fund types, such as target date funds with asset allocation strategies,[6] and increased its use of derivatives and other alternative strategies.[7] These products and strategies can offer greater opportunities for investors to achieve their investment goals, but they can also add complexity to funds' investment strategies, amplify investment risk, or have other risks, such as counterparty credit risk.

While these changes have been taking place in the fund industry, there have also been significant advances in the technology that can be used to report and analyze information. We have started to use structured data formats to collect, aggregate, and analyze data reported by registrants and other filers.[8]

[1] For purposes of the preamble of this release, we use ''funds'' to mean registered investment companies other than face-amount certificate companies and any separate series thereof—*i.e.,* management companies and unit investment trusts. In addition, we use the term ''management companies'' or ''management investment companies'' to refer to registered management investment companies and any separate series thereof. We note that ''fund'' may be separately and differently defined in each of the new or amended forms or rules.

[2] Based on data obtained from the Investment Company Institute (''ICI'') and reports filed by registrants on Form N–SAR. The 17,052 funds include mutual funds (including funds of funds and money market funds), closed-end funds, exchange-traded funds (''ETFs''), and unit investment trusts (''UITs''). *See* ICI, 2016 Investment Company Fact Book (56th ed., 2016) (''2016 ICI Fact Book'') at 22, *available at https://www.ici.org/pdf/2016_factbook.pdf; see also infra* footnote 1259 and accompanying and following text.

[3] Based on Investment Adviser Registration Depository (''IARD'') system data. In 2010 Congress charged the Commission with implementing new reporting and registration requirements for certain investment advisers to private funds (known as ''exempt reporting advisers''). *See* Dodd-Frank Wall Street Reform and Consumer Protection Act, Pub. L. 111–203, 124 Stat. 1376, 1570–80 (2010).

Form ADV is used by registered investment advisers to register with the Commission and with the states and by exempt reporting advisers to report information to the Commission. Information on Form ADV is available to the public through the Investment Adviser Public Disclosure System, which allows the public to access the most recent Form ADV filing made by an investment adviser and is available at *http://www.adviserinfo.sec.gov.* The Commission recently adopted amendments to Form ADV. *See* Form ADV and Investment Adviser Act Rules, Investment Advisers Act Release No. 4509 (August 25, 2016) [81 FR 60417 (September 1, 2016)] (''Form ADV Release'').

[4] *See* 2016 ICI Fact Book, *supra* footnote 2, at 9.

[5] *See generally* Exchange-Traded Funds, Securities Act Release No. 8901 (Mar. 11, 2008) [73 FR 14618 (Mar. 18, 2008)] (''ETF Proposing Release'') at 14619; Request for Comment on Exchange-Traded Products, Securities Exchange Act Rel. No. 34–75165 (June 12, 2015); *see also* ICI, Exchange-Traded Funds April 2016 (May 27, 2016), *available at https://www.ici.org/research/stats/etf/etfs_04_16* (discussing April 2016 statistics on ETFs). As of April 2016, there were 1,630 ETFs with over $2 trillion in assets. Over the twelve-month period ending April 2016, assets of ETFs increased $89.63 billion. *See id.*

[8] *See* Proposing Release, *supra* footnote 7, at nn. 12–16 and accompanying text (discussing the use

Continued

These data formats for information collection have enabled us and other data users, including investors and other industry participants, to better collect and analyze reported information and have improved our ability to carry out our regulatory functions.

As we noted in the Proposing Release, we have historically acted to modernize our forms and the manner in which information is filed with the Commission and disclosed to the public in order to keep up with changes in the industry and technology.[9] In May 2015, we again acted to modernize our forms and the manner in which information is filed and disclosed by proposing a number of reforms for investment company reporting.[10] Our proposal included four sets of reforms: (1) The creation of a new portfolio holdings reporting form, Form N–PORT, and the rescission of Form N–Q; (2) the creation of a new census reporting form, Form N–CEN, and the rescission of Form N–SAR; (3) amendments to Regulation S–X, largely designed to improve derivatives disclosure; and (4) a proposed new rule, rule 30e–3, which would provide funds with an optional method to satisfy shareholder report transmission requirements by posting their reports online if they met certain conditions.

The proposed reforms were designed to help the Commission, investors, and other market participants better assess different fund products and to assist us in carrying out our mission to protect investors, maintain fair, orderly, and efficient markets, and facilitate capital formation. These reforms also sought to (1) increase the transparency of fund portfolios and investment practices both to the Commission and to investors, (2) take advantage of technological advances both in terms of the manner in which information is reported to the Commission and how it is provided to investors and other potential users, and (3) where appropriate, reduce duplicative or otherwise unnecessary reporting burdens on the industry.

B. Summary of Changes to Current Reporting Regime

We received 1,003 comments [11] on our proposed reforms from a variety of interested parties, including investment companies, industry groups, investors, academics and others. As discussed in greater detail below in the relevant sections of this release, commenters generally supported our efforts to modernize the investment company reporting regime, but had varying comments on a number of specific items in each of the respective sets of reforms. Commenters were generally supportive of proposed new Form N–PORT;[12] however, we received many comments relating to the data to be collected by the form, the frequency of filing reports on the form, and whether reports on the form or certain information in the reports should be made public. Commenters were also generally supportive of proposed new Form N–CEN,[13] agreeing that Form N–CEN will provide both the Commission and the public with enhanced and updated census-type information. Similar to Form N–PORT, however, commenters also provided many comments on the data to be collected by the form and whether certain information in reports on the form should be made public. In addition, commenters were largely supportive of our efforts to improve the information that funds report to shareholders and the Commission through the proposed amendments to Regulation S–X,[14] but had specific comments on certain disclosures. Comments on proposed rule 30e–3, which would allow funds to transmit reports to shareholders via the internet subject to a number of conditions, were mixed, with some commenters supporting the rule and others opposing it.[15]

Today, after consideration of the comments we received, we are adopting new Forms N–PORT and N–CEN, as well as amendments to Regulation S–X. We continue to believe that with the industry changes and technological advances that have occurred over the years, we need to improve the type and format of the information that funds provide to us and to investors, and the information that the Commission receives from funds in order to improve the Commission's monitoring of the fund industry in its role as the primary regulator of funds and investment advisers. We are not adopting proposed rule 30e–3 at this time as we believe, in light of the comments received, that additional consideration regarding the rule is appropriate. We are adopting amendments to Forms N–1A, N–3, and N–CSR to require certain disclosures regarding securities lending activities.[16]

1. Form N–PORT and Amendments to Regulation S–X

We are adopting Form N–PORT, largely as proposed, with certain modifications in response to commenters. We are also rescinding, as proposed, Form N–Q. Form N–PORT is a new portfolio holdings reporting form that will be filed by all registered management investment companies, other than money market funds and small business investment companies (''SBICs''),[17] and by UITs that operate as

of eXtensible Business Reporting Language (''XBRL'') with open-end fund risk/return summaries and the use of Extensible Markup Language (''XML'') with Forms N–MFP, PF and 13F, as well as in other contexts).

[9] *See supra* footnote 8 and accompanying text; *see also* Proposing Release, *supra* footnote 7, at nn. 8–9 and accompanying text (discussing the adoption of Form N–SAR and the adoption of rules requiring the use of the IARD for investment adviser filings); *see also* Derivatives Proposing Release, *supra* footnote 7 (proposing, among other things, reporting requirements in Forms N–PORT and N–CEN related to derivatives); Investment Company Liquidity Risk Management Programs; Investment Company Act Release No [x] (October 13, 2016) (''Liquidity Adopting Release''); Investment Company Swing Pricing; Investment Company Release No. [x] (October 13, 2016) (''Swing Pricing Adopting Release'').

We also note that in December 2014, the Financial Stability Oversight Council (''FSOC'') issued a notice requesting comment on aspects of the asset management industry, including on additional data or information that would be helpful to regulators and market participants. *See* FSOC, Notice Seeking Comment on Asset Management Products and Activities, Docket No. FSOC–2014–0001 (Dec. 24, 2014) (''FSOC Notice''), *available at http://www.treasury.gov/initiatives/fsoc/rulemaking/Documents/Notice%20Seeking%20Comment%20on%20Asset%20Management%20Products%20and%20Activities.pdf.* Although our proposal was independent of FSOC, several commenters responding to the notice discussed issues concerning data that were relevant to our proposal and those comments were discussed in the Proposing Release, as relevant. *See* Proposing Release, *supra* footnote 7, at nn. 17–18 and accompanying text.

[10] *See* Proposing Release, *supra* footnote 7.

[11] Of these, about 574 were individualized letters, and the rest were one of a number of types of form letters. *See* Comments on Investment Company Reporting Modernization, File No. S7–08–15, *available at http://www.sec.gov/comments/s7-08-15/s70815.shtml.* The comment period for the proposal closed on August 11, 2015, but was re-opened until January 13, 2016 when the Commission proposed liquidity risk management programs for open-end funds. *See* Open-End Fund Liquidity Risk Management Programs; Swing Pricing; Re-Opening of Comment Period for Investment Company Reporting Modernization Release, Investment Company Act Release No. 31835 (Sept. 22, 2015) [80 FR 62274 (Oct. 15, 2015)] (''Liquidity Proposing Release'').

[12] *See infra* footnotes 46, 64, 100, 115, 123, 145, 193, 197, 198, 245, 275, 283, 293, 330, 350, 379, 423, 432, 443, 455 and 475.

[13] *See infra* footnotes 745, 759, 769, 779, 819, 832, 857, 870, 883, 907, 940, 989, 1008, 1045, 1061, 1070, 1080, 1101 and 1107.

[14] *See infra* footnotes 527, 537, 556, 558, 566, 648, 665, 701 and 711.

[15] *See infra* footnotes 1178–1179.

[16] If any provision of these rules, or the application thereof to any person or circumstance, is held to be invalid, such invalidity shall not affect other provisions or application of such provisions to other persons or circumstances that can be given effect without the invalid provision or application.

[17] *See infra* footnote 49 (discussing why money market funds and SBICs will not be required to file reports on Form N–PORT).

ETFs.[18] Currently, management investment companies (other than SBICs) are required to report their complete portfolio holdings to the Commission on a quarterly basis on Forms N–Q [19] and N–CSR.[20]

Form N–PORT requires reporting of a fund's complete portfolio holdings. The form also requires additional information concerning fund portfolio holdings that is not currently required by Forms N–Q and N–CSR, and that will facilitate risk analyses and other Commission oversight. For example, Form N–PORT requires reporting of additional information relating to derivative investments. The form also includes certain risk metric calculations that measure a fund's exposure and sensitivity to changing market conditions, such as changes in asset prices, interest rates, or credit spreads. As was proposed, reports on Form N–PORT will be filed in a structured data format with the Commission on a monthly basis, with every third month available to the public 60 days after the end of the fund's fiscal quarter.

We continue to believe that more timely and frequent reporting of portfolio holdings information to the Commission, as well as the additional information Form N–PORT requires, will enable us to further our mission to protect investors by assisting the Commission and its staff in carrying out its regulatory responsibilities related to the asset management industry. These responsibilities include its examination, enforcement, and monitoring of funds, its formulation of policy, and the staff's review of fund registration statements and disclosures.

While Form N–PORT is primarily designed to assist the Commission and its staff, we also continue to believe that information in Form N–PORT will be beneficial to investors and other potential users. In particular, we believe that both sophisticated institutional investors and third-party users that provide services to investors may find the information required on Form N–PORT useful. For example, Form N–PORT's structured format will allow the Commission, investors, and other potential users to better collect and analyze portfolio holdings information.[21] While we do not anticipate that many individual investors will analyze data using Form N–PORT, although some may, we believe that individual investors will benefit indirectly from the information collected on reports on Form N–PORT, through enhanced Commission monitoring and oversight of the fund industry and through analyses prepared by third-party service providers and other parties, such as industry observers and academics.

In addition, we are adopting, largely as proposed, amendments to Regulation S–X with certain modifications in response to comments. These amendments in large part require standardized enhanced derivatives disclosures in fund financial statements. Currently, Regulation S–X does not prescribe specific information for most types of derivatives, including swaps, futures, and forwards. While many fund groups provide disclosures regarding the terms of their derivatives contracts, the lack of standard disclosure requirements has resulted in inconsistent disclosures in fund financial statements.

We continue to believe that the amendments to Regulation S–X to enhance and standardize derivatives disclosures in financial statements will allow comparability among funds and help all investors better assess funds' use of derivatives. Reports on Form N–PORT will contain similar derivatives disclosures to facilitate analysis of derivatives investments across funds. Because Form N–PORT is not primarily designed for individual investors, the amendments to Regulation S–X require disclosures concerning the fund's investments in derivatives in the financial statements that are provided to investors. We also have endeavored to mitigate burdens on the industry by conforming the derivatives disclosures that are required by both Regulation S–X and Form N–PORT.

2. Form N–CEN

We are adopting, substantially as proposed and with certain modifications in response to comments, Form N–CEN, a new form on which funds will report census-type information to the Commission. We are also rescinding, as proposed, Form N–SAR, the current form on which the Commission collects census-type information on management investment companies and UITs.[22] As we discussed in the Proposing Release, Form N–SAR was adopted in 1985 and, while Commission staff has indicated that the census-type information reported on Form N–SAR is useful in its support of the Commission's regulatory functions, staff has also indicated that in the thirty plus years since Form N–SAR's adoption, changes in the industry have reduced the utility of some of the currently required data elements.[23] Commission staff believes that obtaining certain additional census-type information not currently collected by Form N–SAR will improve the staff's ability to carry out regulatory functions, including risk monitoring and analysis of the industry.

Form N–CEN includes many of the same data elements as Form N–SAR, but, in order to improve the quality and utility of information reported, replaces those items that are outdated or of limited usefulness with items that we believe to be of greater relevance today. Where possible, we are also eliminating items that are reported on other Commission forms, or are available elsewhere. In addition, reports on Form N–CEN will be filed in a structured XML format, which, we believe, will reduce reporting burdens for current Form N–SAR filers and yield data that can be used more effectively by the Commission and other potential users.[24] Finally, reports on new Form N–CEN will be filed annually, rather than semi-annually as is required for reports on Form N–SAR by management companies, which will further reduce current burdens on funds.

II. Discussion

A. Form N–PORT

As discussed above, we are adopting a new monthly portfolio reporting form, Form N–PORT. Form N–PORT requires registered management investment companies and ETFs organized as UITs, other than money market funds and SBICs, to electronically file with the

[18] ETFs will be required to file reports on Form N–PORT, regardless of whether they are organized as management companies or UITs. UITs are a type of investment company which (a) are organized under a trust indenture contract of custodianship or agency or similar instrument, (b) do not have a board of directors, and (c) issue only redeemable securities. *See* section 4(2) of the Investment Company Act.

[19] Rule 30b1–5 under the Investment Company Act [17 CFR 270.30b1–5]. While SBICs file reports on Form N–CSR, SBICs are not required to file reports on Form N–Q.

[20] *See* rule 30b2–1 under the Investment Company Act [17 CFR 270.30b2–1].

[21] As we noted in the Proposing Release, portfolio holdings information currently filed on Form N–Q is filed in a plain text or hypertext format, which often requires labor-intensive manual reformatting by Commission staff and other potential users in order to prepare the reported data for analysis. *See* Proposing Release, *supra* footnote 7.

[22] *See* rules 30a–1 and 30b1–1 under the Investment Company Act [17 CFR 270.30a–1 and 17 CFR 270.30b1–1].

[23] *See* Proposing Release, *supra* footnote 7 (noting that when adopted, Form N–SAR was intended to reduce reporting burdens and better align the information that was required to be reported with the characteristics of the fund industry). Also as noted in the Proposing Release, the filing format that is required for reports on Form N–SAR limits our ability to use the reported information for analysis.

[24] *See infra* footnotes 750–752 and accompanying text.

Commission monthly portfolio investments information on reports in an XML format no later than 30 days after the close of each month.[25] Except as discussed below in section II.A.4, only information reported for the third month of each fund's fiscal quarter on Form N–PORT will be publicly available, and that information will not be made public until 60 days after the end of the fiscal quarter.[26]

As the primary regulator of the asset management industry, the Commission relies on information that funds file with us, including their registration statements, shareholder reports, and various reporting forms such as Form N–CSR. The Commission and its staff use this information to understand trends in the fund industry and carry out regulatory responsibilities, including formulating policy and guidance, reviewing fund registration statements, and assessing and examining a fund's regulatory compliance with the federal securities laws and Commission rules thereunder.

Information on fund portfolios is currently filed with the Commission quarterly with up to a 70-day delay.[27] Moreover, the reports are currently filed in a format that does not allow for efficient searches or analyses across portfolios, and even limits the ability to search or analyze a single portfolio. Based on staff experience with data analysis of funds, including staff experience using Form N–MFP, we believe, and commenters generally agreed, that more frequent and timely information concerning fund portfolios than we currently receive, will assist the Commission in its role as the primary regulator of funds, as discussed further below.[28]

The information we will collect on Form N–PORT will be important to the Commission and its staff in analyzing and understanding the various risks in a particular fund, as well as risks across specific types of funds and the fund industry as a whole. These risks can include the investment risk that the fund is undertaking as part of its investment strategy, such as interest rate risk, credit risk, volatility risk, other market risks, or risks associated with specific types of investments, such as emerging market debt or commodities. Additionally, as we discuss in the Liquidity Adopting Release that we are adopting concurrently Form N–PORT will help the Commission better understand liquidity risks through additional Form N–PORT disclosure requirements discussed in that release.[29] The information collected on Form N–PORT will also assist with understanding whether and to what extent a fund's exposure to price movements is leveraged, either through borrowings or the use of derivatives.

Many commenters generally agreed with us that the information required on Form N–PORT will assist the Commission in better understanding each of these risks in the fund industry.[30] These commenters also generally agreed with us that the ability to understand the risks that funds face will help Commission staff better understand and monitor risks and trends in the fund industry as a whole, facilitating the Commission's informed regulation of the fund industry.[31] We also believe, and some commenters agreed, that information obtained from Form N–PORT filings will facilitate the Commission's oversight of funds and assist Commission staff in examination, enforcement, and monitoring, as well as in formulating policy and in its review of fund registration statements and disclosures.[32] In this regard, we expect that Commission staff will use the data reported on Form N–PORT for many of the same purposes as Commission staff has used data reported on Form N–MFP by money market funds. The data received on Form N–MFP has been used extensively by Commission staff, including for purposes of assessing regulatory compliance, identifying funds for examination, and risk monitoring. Form N–MFP data has also informed Commission policy; for example, staff used Form N–MFP data in analyses that informed the Commission's considerations when it proposed and adopted money market fund reform rules in 2013 and 2014.[33]

In addition to assisting the Commission in its regulatory functions, we believe, and some commenters agreed, that investors and other potential users will benefit from the

[25] *See* new rule 30b1–9.

[26] As used throughout this section, the term ''fund'' generally refers to investment companies that will file reports on Form N–PORT.

As discussed further in section II.A.4, the Commission does not intend to make public the information reported on Form N–PORT for the first and second months of each fund's fiscal quarter that is identifiable to any particular fund or adviser or any information reported with regard to country of risk and economic exposure, delta, or miscellaneous securities, or explanatory notes related to any of those topics that is identifiable to any particular fund or adviser. However, the Commission may use such information in its regulatory programs, including examinations, investigations, and enforcement actions. *See infra* footnote 500; *see also* General Instruction F of Form N–PORT.

[27] Funds currently file with the Commission portfolio schedules for the fund's first and third fiscal quarters on Form N–Q, and shareholder reports, including portfolio schedules for the fund's second and fourth fiscal quarters, on Form N–CSR. These reports are available to the public and the Commission with either a 60- or 70-day delay. *See* rule 30b1–5 (requiring management companies, other than SBICs, to file reports on Form N–Q no more than 60 days after the close of the first and third quarters of each fiscal year); rule 30b2–1 (requiring management companies to file reports on Form N–CSR no later than 10 days after the transmission to stockholders of any report required to be transmitted to stockholders under rule 30e–1). *See also* rules 30e–1 and 30e–2 under the Investment Company Act [17 CFR 270.30e–1 and 17 CFR 270.30e–2] (requiring management companies and certain UITs to transmit to stockholders semi-annual reports containing, among other things, the fund's portfolio schedules, no more than 60 days after the close of the second and fourth quarters of each fiscal year). These reports include portfolio holdings information as required by Regulation S–X. *See* rule 12–12 of Regulation S–X [17 CFR 210.12–12], *et seq.*

[28] *See, e.g.,* Comment Letter of Morningstar, Inc. (Aug. 21, 2015) (''Morningstar Comment Letter'') (expressing belief that timelier information to investors through monthly public disclosures of portfolios would assist the Commission in monitoring the financial system, while also providing suggested revisions to enhance the proposal.); Comment Letter of Vanguard (Aug. 11, 2015) (''Vanguard Comment Letter'') (stating that the proposal strikes the appropriate balance between disclosures to the Commission and protecting funds and their investors from front-running, and providing suggested modifications to the proposal).

[29] *See generally* Liquidity Adopting Release, *supra* footnote 9.

[30] *See, e.g.,* Comment Letter of BlackRock (Aug. 11, 2015) (''BlackRock Comment Letter'') (''Importantly, the greater depth and frequency of information requested by the Commission will help the Commission better identify and monitor emerging risks associated with specific RICs or categories of RICs as well as asset management activities.''); Comment Letter of Wells Fargo Funds Management, LLC (Aug. 11, 2015) (''Wells Fargo Comment Letter'') (''we believe that the enhanced disclosure requirements of the Proposals represent appropriate valuable information for the Commission to have in order to assess trends in risks, for example, across the mutual fund industry.''); *but see, e.g.,* Comment Letter of Federated Investors, Inc. (January 13, 2016) (''Federated Comment Letter) (''A majority of the Commission's proposed amendments to Form N–1A, N–PORT, and N–CEN would require a large effort from funds while offering data that is, at best, of little utility, and, at worst, misleading. Many of these deficiencies relate to flaws inherent in a security-level disclosure scheme.''). We disagree with the commenter that a security-level disclosure scheme is of little utility. *See infra* footnote 1283 and accompanying and following text (discussing the utility of the security-level information that will be reported on Form N–PORT).

[31] *Id.*

[32] *Id.*

[33] *See, e.g.,* Money Market Fund Reform; Amendments to Form PF, Investment Company Act Release No. 30551 (June 5, 2013) [78 FR 36834 (June 19, 2013)]; Money Market Fund Reform; Amendments to Form PF, Investment Company Act Release No. 31166 (July, 23 2014) [79 FR 44076 (July 29, 2014)] (''Money Market Fund Reform 2014 Release'') at n. 502 and accompanying text (citing use of Form N–MFP data in discussing the Commission's decision to require basis point rounding) and at n. 651 and accompanying text (citing use of Form N–MFP data in discussing the Commission's decision regarding the size of the non-government securities basket for government money market funds).

periodic public disclosure of the information reported on Form N–PORT.[34] Form N–PORT is primarily designed for use by the Commission and its staff, and not for disclosing information directly to individual investors. The information we are requiring on Form N–PORT is more voluminous than on a schedule of investments. We believe, and some commenters agreed, however, that some investors, particularly institutional investors, could directly use the data from the information on Form N–PORT for their own quantitative analysis of funds, including to better understand the funds' investment strategies and risks, and to better compare funds with similar strategies.[35] Additionally, we believe, and some commenters agreed, that entities providing services to investors, such as investment advisers, broker-dealers, and entities that provide information and analysis for fund investors, will also utilize and analyze the information that will be required by Form N–PORT to help all investors make more informed investment decisions.[36] Accordingly, whether directly or through third parties, we believe, and some commenters agree, that the periodic public disclosure of the information on Form N–PORT will benefit all fund investors.[37] As discussed further below, in order to mitigate the risk that the information on Form N–PORT will be used in ways that might ultimately result in investor harm, we are limiting the public availability of Form N–PORT to reports filed as of quarter-end, as well as delaying public availability of those reports by 60 days and keep certain discrete information items nonpublic.

We intend to increase transparency of fund investments through Form N–PORT in several ways. First, Form N–PORT will improve reporting of fund derivative usage. As the Commission has previously noted, we have observed a dramatic growth in the volume and complexity of the derivatives markets over the past two decades.[38] Additionally, funds that are considered ''alternative'' funds, which often use derivatives for implementing their investment strategy, are becoming increasingly popular among investors.[39] Although Regulation S–X establishes general disclosure requirements for financial statements in fund registration statements and shareholder reports, based on staff review of fund filings, the lack of standardized requirements as to the terms of derivatives that must be reported has sometimes led to inconsistent approaches to reporting derivatives information and, in some cases, insufficient information concerning the terms and underlying reference assets of derivatives to allow the Commission or investors to better understand the investment.[40] This hinders both an analysis of a particular fund's investments, as well as comparability among funds.[41]

The information and reporting format required by Form N–PORT will create a more detailed, uniform, and structured reporting regime. We believe and several commenters agreed that this will allow the Commission and investors to better analyze and compare funds' derivatives investments and the exposures they create, which can be important to understanding funds' investment strategies, use of leverage, and potential for risk of loss.[42]

Furthermore, as discussed further below, Form N–PORT requires funds to report certain risk metrics that would provide measurements of a fund's exposure to changes in interest rates, credit spreads and asset prices, whether through investments in debt securities or in derivatives. Financial statement information provides historical information over a particular time period (*e.g.,* a statement of operations), or information about values of assets at a particular point in time (*e.g.,* a balance sheet including, for funds, a schedule of investments). Risk metrics, on the other hand, measure the change in value of an investment in response to small changes in the underlying reference asset of an investment, whether the underlying reference asset is a security (or index of securities), commodity, interest rate, or credit spread over an interest rate. Based on staff experience, as well as staff outreach to asset managers and entities that provide risk management services to asset managers (prior to the Commission issuing the Proposing Release), discussed further below, we believe that fund portfolio managers and risk managers commonly calculate risk metrics to analyze the exposures in their portfolios.[43] The Commission believes that staff can use these risk measures to better understand the exposures in the fund industry, thereby facilitating better monitoring of risks and trends in the fund industry as a whole.

Form N–PORT will also require information about certain fund transactions and activities such as securities lending, repurchase agreements, and reverse repurchase agreements, including information regarding the counterparties to which the fund is exposed in those transactions, as well as in over-the-counter derivatives transactions. We believe and several commenters agreed that such information will increase transparency concerning these transactions and activities and will

[34] *See, e.g.,* Comment Letter of Joseph A. Franco (Aug. 11, 2015) (''Franco Comment Letter''); Morningstar Comment Letter; *but see, e.g.,* Comment Letter of the Investment Company Institute (Aug. 11, 2015) (''ICI Comment Letter'').

[35] *Id.*

[36] *See id.*

[37] *See id.*

[38] *See* Derivatives Proposing Release, *supra* footnote 7, at n. 6 and accompanying text; *see also* Use of Derivatives by Investment Companies under the Investment Company Act of 1940, Investment Company Act Release No. 29776 (Aug. 31, 2011) [76 FR 55237 (Sept. 7, 2011)] (''Derivatives Concept Release'') at n. 7 and accompanying text.

[39] While there is no clear definition of ''alternative'' in the fund industry, an alternative fund is generally understood to be a fund whose primary investment strategy falls into one or more of the three following categories: (1) Non-traditional asset classes (for example, currencies); (2) non-traditional strategies (such as long/short equity positions); and/or (3) less liquid assets (such as private debt).

At the end of December 2015, alternative mutual funds and exchange-traded funds had more than $200 billion in assets. Although alternative mutual funds only accounted for 1.23% of the mutual fund market as of December 2015, the almost $17.3 billion of inflows into these funds in 2015 represented 7% of the inflows for the entire mutual fund industry in that year. These statistics were obtained from staff analysis of Morningstar Direct data, and are based on fund categories as defined by Morningstar.

[40] For example, we understand that some funds provide a description of all of the holdings in an index or custom basket underlying a swap contract, while others only provide a short description. *See also* Proposing Release, *supra* footnote 7, at n. 31 and accompanying text.

[41] *See, e.g.,* current rule 12–13 of Regulation S–X [17 CFR 210.12–13] (requiring funds to disclose ''other'' investments, which includes derivatives); rule 6–03 of Regulation S–X [17 CFR 210.6–03] (applying articles 1–4 of Regulation S–X to investment companies, but not specifying where derivative disclosures should be made for funds); FASB ASC 815, Disclosures about Derivative Instruments and Hedging Activities (''ASC 815'') (discussing general derivative disclosure); FASB ASC 820, Fair Value Measurements (''ASC 820'') (requiring disclosure of valuation information for major categories of investments). *See also infra* section II.C.

[42] *See, e.g.,* Comment Letter of Fidelity Investments (Aug. 10, 2015) (''Fidelity Comment Letter'') (generally supporting Commission's focus on modernizing the way data is collected from funds and reported to shareholders and providing suggestions for modifications to the final rule); Comment Letter of Capital Research and Management Company (Aug. 11, 2015) (''CRMC Comment Letter'') (supporting Commission's efforts to take advantage of technology in order to assist the staff, investors, and other market participants to better assess different fund products and assist the Commission in carrying out its mission; and providing suggestions for modifications to the final rule).

[43] *See generally* John C. Hull, Options, Futures, and Other Derivatives (9th ed., 2015) (discussing, for example, the function of duration, convexity, delta, and other calculations used for measuring changes in the value of bonds or derivatives as a result of changes in underlying asset prices or interest rates); Sheldon Natenberg, Option Volatility and Pricing (1994) (same).

provide better information regarding counterparties, which will be useful in assessing both individual and multiple fund exposures to a single counterparty.[44] This will allow the Commission to better assess and monitor counterparty risk for individual funds, as well as across the industry.

As discussed further below, Form N–PORT will be filed electronically in a structured, XML format. This format will enhance the ability of the Commission, as well as investors and other potential users, to analyze portfolio data both on a fund-by-fund basis and also across funds.[45] As a result, although we will collect certain information on Form N–PORT that may be similarly disclosed or reported elsewhere (*e.g.,* portfolio investments would continue to be included as part of the schedules of investments contained in shareholder reports, and filed on a semi-annual basis with the Commission on Form N–CSR), we believe that it is appropriate to also collect this information in a structured format for analysis by our staff as well as investors and other potential users.

Many commenters were generally supportive of our proposal.[46] However, we received many comments relating to the structure of the proposed form, data to be collected, frequency of filings, and whether reports on the form should be made public. We address these comments below and discuss modifications we made from the proposal in response to comments.

1. Who Must File Reports on Form N–PORT

We are adopting, as proposed, the requirement that each registered management investment company and each ETF organized as a UIT file a report on Form N–PORT.[47] Registrants offering multiple series will be required to file a report for each series separately, even if some information is the same for two or more series.[48] Money market funds and SBICs will not be required to file reports on Form N–PORT.[49]

We are adopting, as proposed, the requirement that all ETFs file reports on Form N–PORT, regardless of their form of organization. Although most ETFs today are structured as open-end management investment companies, there are several ETFs that are organized as UITs.[50] ETFs organized as UITs have significant numbers of investors who we believe can benefit from the disclosures required in Form N–PORT.[51] We received no comments on this aspect of the proposal.

One commenter suggested that reports on Form N–PORT should be filed by all registered investment companies, including UITs, in order to have comparable filing information across registered investment products, although the commenter did suggest that less frequent filing requirements might be appropriate based on the structure of the investment company.[52] We note that UITs have fixed portfolios that do not change over time, and thus, unlike most other investment companies which are required to file quarterly reports with their current portfolio holdings, UITs are not currently required to file periodic reports other than on an annual basis.[53] Based on these differences, as reflected in the current reporting regime, we have determined not to extend Form N–PORT filing requirements to UITs that are not ETFs at this time.

The same commenter also recommended that reports on Form N–PORT be filed by business development companies (''BDCs'').[54] BDCs are a category of closed-end funds that are operated for the purpose of investing in, and providing managerial assistance to, small and developing businesses, and financially troubled businesses. BDCs are not required to register as investment companies under the Investment Company Act although they do elect to be subject to certain specialized provisions, and they are subject to a different reporting regime than registered investment companies.[55] Based on these differences, and as reflected in the current reporting and registration regime, we have determined not to extend Form N–PORT filing requirements to BDCs at this time.[56]

Another commenter suggested that the Commission and the CFTC should agree on and implement a substituted

[44] *See, e.g.,* Morningstar Comment Letter (''By collecting and making available additional information about counterparty risk and other important factors, the SEC will make it easier for investors and financial advisors to monitor portfolio risks.'').

[45] *See, e.g.,* Fidelity Comment Letter (''Collecting data in a structured format should allow the Commission to use information from market participants in rigorous empirical examinations of the industry in furtherance of the SEC's goals.''); ICI Comment Letter (''Obtaining that information in a structured data format will help the SEC to better analyze information and improve its ability to carry out its regulatory mission.'').

[46] *See, e.g.,* Comment Letter of Charles Schwab Investment Management, Inc. (Aug. 11, 2015) (''Schwab Comment Letter'') (''Form N-Port [sic] will provide substantial additional information to the Commission and strengthen its ability to oversee and carry out its regulatory responsibilities for the asset management industry.''); Vanguard Comment Letter (''Vanguard generally supports the proposed reporting initiatives because we believe these reporting obligations will provide the Commission with the tools necessary to monitor portfolio composition and risk exposure among funds, without exposing fund investors to potentially harmful front-running activities.''); Comment Letter of Pioneer Investments (Aug. 11, 2015) (''Pioneer Comment Letter'') (''Pioneer supports the Commission's effort to modernize the regime whereby funds report information about their portfolio holdings to the Commission.''); Comment Letter of the Securities Industry and Financial Markets Association Asset Management Group (Aug. 11, 2015) (''SIFMA Comment Letter I'') (''We support the Commission's initiative in proposing monthly reports on Form N–PORT in order to strengthen its regulatory oversight of the asset management industry and protect investors by obtaining more frequent and substantially expanded information about funds, in a structured format.''); ICI Comment Letter (''ICI broadly supports the Commission's efforts to update fund reporting.'').

[47] *See* new rule 30b1–9.

[48] As further discussed below, in part to harmonize definitions between Forms N–PORT and N–CEN, and in part to parallel identical changes to the definition of ''exchange-traded fund'' in Form N–CEN, we have revised Form N–PORT's proposed definition of ''exchange-traded product'' to refer instead to ''exchange-traded fund,'' which as revised includes each series of a UIT that meets that definition. *See* General Instruction E of Form N–PORT; *infra* footnote 896 (discussing changes to definitions in Form N–CEN).

[49] Money market funds already file their monthly portfolio investments with the Commission. *See* Form N–MFP. SBICs are unique investment companies that operate differently and are subject to a different regulatory regime than other management investment companies. They are ''privately owned and managed investment funds, licensed and regulated by [the Small Business Administration (''SBA'')], that use their own capital plus funds borrowed with an SBA guarantee to make equity and debt investments in qualifying small businesses.'' *See* SBA, SBIC Program Overview, *available at https://www.sba.gov/content/sbic-program-overview.* As a result of these differences, SBICs are not required to file reports on Form N–Q. As of December 31, 2015, only one SBIC had publicly offered securities outstanding.

[50] There are currently eight ETFs organized as UITs that have registered with the Commission.

[51] Commission staff estimates that as of December 2015, ETFs organized as UITs represented 12% of all assets invested in registered ETFs. This analysis is based on data from Morningstar Direct.

[52] *See* Morningstar Comment Letter.

[53] UITs currently file annual reports on Form N–SAR. In contrast, management investment companies currently file reports for their first and third fiscal quarters on Forms N–Q and reports for their second and fourth fiscal quarters on Form N–CSR, as well as semi-annual reports on Form N–SAR. *See supra* footnotes 19–20 and accompanying text.

[54] *See* Morningstar Comment Letter (recommending that ''business development companies . . . and other [registered investment companies]'' should be required to file reports on Form N–PORT).

[55] *See* Adoption of Permanent Notification Forms for Business Development Companies; Statement of Staff Position, Investment Company Act Release No. 12274 (Mar. 5, 1982) [47 FR 10518–02 (Mar. 11, 1982)]; and Interim Notification Forms for Business Development Companies, Investment Company Act Release No. 11703 (Mar. 26, 1981) [46 FR 19459 (Mar. 31, 1981)] for a discussion of the regulatory system applicable to BDCs.

[56] Although BDCs will not be subject to Form N–PORT filing requirements, the amendments being adopted to Regulation S–X will apply to both registered investment companies and BDCs. *See infra* footnote 700.

compliance regime.[57] Although we recognize that there are various alternative reporting requirements imposed in other contexts and by other regulators, the reporting requirements imposed by Form N–PORT have been designed specifically to meet the Commission's regulatory needs with regards to monitoring and oversight of registered funds.

Finally, one commenter stated that we should not require funds to directly report information on their own behalf, but instead require other entities such as transfer agents and custodians to report information on behalf of funds.[58] Given our expertise and experience in regulating, examining, and overseeing funds, including fund reporting, recordkeeping, and compliance, we continue to believe that obtaining such information directly from funds is appropriate.

2. Information Required on Form N–PORT

We are adopting, substantially as proposed, the requirements in Form N–PORT to report certain information about the fund and the fund's portfolio investments as of the close of the preceding month, including: (a) General information about the fund; (b) assets and liabilities; (c) certain portfolio-level metrics, including certain risk metrics; (d) information regarding securities lending counterparties; (e) information regarding monthly returns; (f) flow information; (g) certain information regarding each investment in the portfolio; (h) miscellaneous securities (if any); (i) explanatory notes (if any), and (j) exhibits. We are adopting these information requirements substantially as proposed, although we are making some modifications from the proposal in response to comments. Each of these is discussed in more detail below.

a. General Information and Instructions

Part A of Form N–PORT requires, as proposed, general identifying information about the fund. This information includes the name of the registrant, name of the series, and relevant file numbers.[59] Funds will also report the date of their fiscal year end, the date as of which information is reported on the form, and indicate if they anticipate that this will be their final filing on Form N–PORT.[60] This information will be used to identify the registrant and series filing the report, track the reporting period, and identify final filings. No comments were received on this aspect of our proposal. We are adopting these elements as proposed.

As proposed, funds will also provide the Legal Entity Identifier (''LEI'') number of the registrant and series.[61] The LEI is a unique identifier generally associated with a single corporate entity and is intended to provide a uniform international standard for identifying counterparties to a transaction.[62] Fees are not imposed for the usage of or access to LEIs, and all of the associated reference data needed to understand, process, and utilize the LEIs is widely and freely available and not subject to any usage restrictions. Funds or registrants that have not yet obtained an LEI will be required to obtain one, which currently entails a one-time fee of $219 plus $119 per year in annual maintenance costs and fees.[63]

Commenters were generally supportive of this aspect of our proposal, with most endorsing the use of LEI for identification of funds, as well as for fund counterparties.[64] However, one commenter suggested that certain funds should be permanently exempted from such requirements as such funds would not need an LEI for any other purpose.[65] Lastly, another commenter suggested that, to better assist academic researchers with identification of entities, every filing by a mutual fund should require an exhaustive list of the tickers and CUSIPs associated with that mutual fund.[66]

We are adopting the requirement that funds report LEI information for the registrant and for each series, as proposed. We acknowledge that funds will incur some costs to obtain and maintain an LEI, although we believe the cost to obtain and maintain an LEI identifier is modest.[67] Uniform reporting of LEIs by funds, however, will help provide a consistent means of identification that will facilitate the linkage of data reported on Form N–PORT with data from other filings and sources that is or will be reported elsewhere as LEIs become more widely used by regulators and the financial industry.[68] Using alternate means of identification or providing exemptions to this requirement could hinder the ability of Commission staff as well as investors and other potential users of this information to use the data on Form N–PORT as discussed above. For these

[57] *See* SIFMA Comment Letter I (''Under our suggested approach, funds required to report on new Form N–PORT would be excused from reporting on Form CPO–PQR.'').

[58] *See* Federated Comment Letter (''It would also reduce the reporting burden on funds for the Commission to acquire information directly from custodians and transfer agents, which are proficient in maintaining and reporting portfolio holdings and other information.'').

[59] *See* Item A.1 and Item A.2 of Form N–PORT. Funds will provide the name of the registrant, the Investment Company Act and CIK file numbers for the registrant, and the address and telephone number of the registrant. Funds will also provide the name of and EDGAR identifier (if any) for the series.

[60] *See* Item A.3 and Item A.4 of Form N–PORT.

[61] *See* Item A.1.d and Item A.2.c of Form N–PORT. The Commission has begun to require disclosure of the LEI in other contexts. *See, e.g.,* Form PF, Reporting Form for Investment Advisers to Private Funds and Certain Commodity Pool Operators and Commodity Trading Advisors, *available at http://www.sec.gov/rules/final/2011/ia-3308-formpf.pdf*; Regulation SBSR—Reporting and Dissemination of Security-Based Swap Information, Securities Exchange Act Release No. 74244 (Feb. 11, 2015) [80 FR 14564 (Mar. 19, 2015)] (''Regulation SBSR Adopting Release'').

[62] The global LEI system operates under an LEI Regulatory Oversight Committee (''ROC'') that currently includes members that are official bodies from over 40 jurisdictions. The Commission is a member of the ROC and currently serves on its Executive Committee. The Commission notes that it would expect to revisit the requirement to report LEIs if the operation of the LEI system were to change significantly.

[63] As of June 30, 2016, the cost of obtaining an LEI from the Global Markets Entity Identifier (''GMEI'') Utility in the United States was $200, plus a $19 surcharge for the LEI Central Operating Unit. The annual cost of maintaining an LEI from the GMEI Utility was $100, plus a $19 surcharge for the LEI Central Operating Unit. *See* GMEI Utility, Frequently Asked Questions, *available at https://www.gmeiutility.org/frequentlyAskedQuestions.jsp*.

[64] *See, e.g.,* Comment Letter of State Street Corporation (Aug. 11, 2015) (''State Street Comment Letter''); Comment Letter of Depository Trust & Clearing Corporation (Aug. 11, 2015); Comment Letter of Interactive Data Pricing and Reference Data LLC (Aug. 10, 2015) (''Interactive Data Comment Letter''); Comment Letter of Global Legal Entity Identifier Foundation (Aug. 5, 2015).

[65] *See* Comment Letter of Carol Singer (June 24, 2015) (''Carol Singer Comment Letter'') (suggesting that a small closed-end fund that is not listed on an exchange should not be required to obtain an LEI identifier).

[66] *See* Comment Letter of Russ Wermers (Aug. 4, 2015) (''Russ Wermers Comment Letter'') (arguing that this information could help with the identification of entities. The commenter did not discuss the utility of the LEI specifically).

[67] *See supra* footnote 63.

[68] *See, e.g.,* Commodities Futures Trading Commission (''CFTC''), CFTC Announces Mutual Acceptance of Approved Legal Entity Identifiers, Press Release: PR6758–13 (Oct. 30, 2013), *available at http://www.cftc.gov/PressRoom/PressReleases/pr6758-13*; Letter from Kenneth Bentsen, President & CEO of SIFMA to Jacob Lew, Chairman of FSOC, re: Adoption of the Legal Entity Identifier (Apr. 11, 2014), *available at http://www.sifma.org/comment-letters/2014/sifma-submits-comments-to-fsoc-encouraging-us-regulators-to-adopt-and-use-the-legal-entity-identifiers*; Regulation SBSR Adopting Release, *supra* footnote 61.

Commenters to the FSOC Notice expressed support for regulatory acceptance of LEI identifiers. *See, e.g.,* Joint Comment Letter of SIFMA/Investment Adviser Association to FSOC Notice (Mar. 25, 2015) (''SIFMA/IAA FSOC Notice Comment Letter'') (expressing support for the LEI initiative, and noting that the use of LEIs has already enhanced the industry's ability to identify and monitor global market participants); Comment Letter of Fidelity to FSOC Notice (Mar. 25, 2015) (expressing the need to develop analytics to make data intelligible, such as the ability to map exposures across the financial system, such as through the use of LEIs).

reasons, we anticipate that the benefits of requiring funds to report the LEI number of the registrant and series on Form N–PORT will justify the costs of obtaining and reporting this information, and thus we are adopting this requirement as proposed.

Furthermore, in response to the request that an exhaustive list of the tickers and CUSIPs associated with the fund be reported to help with the identification of entities, we note that Form N–PORT requires funds to report various identifying information, including name of the registrant, Investment Company Act file number of the registrant, CIK number of the registrant, LEI of the registrant, name of each series, EDGAR identifier (if any) for each series, and LEI for each series.[69] We believe this information is sufficient for Commission staff, as the primary user of the form, to identify funds filing reports on Form N–PORT, and could also be useful for investors and other potential users. As discussed further below, funds will also be reporting additional identifying information on Form N–CEN in a structured format that can be used to identify those funds and link information reported by them on Forms N–PORT and N–CEN with information available in other Commission filings and sources that is similarly structured.[70]

Form N–PORT also includes general filing and reporting instructions, as well as definitions of specific terms referenced in the form.[71] These instructions and definitions are intended to provide clarity to funds and to assist them in filing reports on Form N–PORT.[72]

Proposed Form N–PORT would have required funds to report information about their portfolios as of the last business day, or calendar day, of the month, but did not provide specific instructions on the appropriate basis for reporting such information, such as whether the information should be reported as of the trade date (''T+0''), which is required for financial reporting purposes, or the trade date plus one day (''T+1''), which is currently permitted under rule 2a–4 for the calculation of funds' net asset values (''NAV''). Several commenters requested clarification on this issue and specifically requested that Form N–PORT allow reporting on a T+1 basis.[73]

Many commenters noted that most funds use T+1 accounting to record their day-to-day transactions, and only convert their records to T+0 for quarterly portfolio holdings reporting purposes on Forms N–CSR and N–Q.[74] These commenters further noted that our proposal would require funds to file monthly reports 30 days after each reporting period, whereas funds currently have at least 60 days after the end of each fiscal quarter to report similar information on a T+0 basis on Forms N–CSR and N–Q. Accordingly, commenters suggested that allowing funds to file on a T+1 basis would reduce filing burdens relative to requiring reporting on a T+0 basis, while not meaningfully changing the substance of the information reported. One commenter explicitly recommended that funds be allowed to choose whether to file on a T+0 or T+1 basis, so that funds that prefer to align their Form N–PORT reporting with their reporting on Forms N–Q and/or N–CSR could do so, while other commenters that suggested this modification did not specify whether all funds should be required to report on a T+1 basis uniformly.[75]

As discussed above, the Commission did not specify the appropriate basis for reporting, and we agree with commenters that an explicit instruction on the basis on which to report is appropriate. We are persuaded by commenters that explicitly instructing funds file on the same basis for which they calculate their NAV (generally a T+1 basis) would not be as burdensome as instructing all funds to file on a T+0 basis, and would still maintain the utility of the information reported. As noted by commenters, we acknowledge that reporting monthly information on Form N–PORT on a T+1 basis may result in differences between quarterly portfolio holdings information currently reported on a T+0 basis on Forms N–CSR and N–Q. However, any such differences are unlikely to affect the utility of the information for the Commission and other potential users, because our primary purpose for using the information is to analyze and assess the various risks in a particular fund and monitoring risks and trends in the fund industry as a whole, rather than to align the information reported with the fund's financial statements.

Nonetheless, we do not agree that funds should be permitted to file either on the basis of calculating its NAV (generally T+1) or on the basis of how they prepare financial reports (T+0) at the fund's option, as having funds report their portfolio holdings on different bases would reduce the comparability of the data reported on Form N–PORT among funds and across the industry. Accordingly, we have modified the proposal to add an instruction to Form N–PORT instructing funds that they must report portfolio information on Form N–PORT on the same basis they use to calculate their NAV, which we understand is generally T+1.[76]

Commenters also requested confirmation that different internal methodologies could be applied in responding to certain items on Form N–PORT, such as those that may require subjective judgments on the part of funds.[77] Furthermore, two commenters urged the Commission to explicitly state that funds may make and rely on reasonable assumptions in providing responses to information items on Form N–PORT.[78] In response to these comments, we have modified the proposal by adding an instruction clarifying that in reporting information on Form N–PORT, the fund may

[69] *See* Item A.1 and Item A.2 of Form N–PORT.

[70] Form N–CEN requires funds to report additional information for each share class outstanding, including name of the class, class identification number, and ticker symbol. *See* Item C.2.d of Form N–CEN.

[71] *See* General Instruction A (Rule as to Use of Form N–PORT), B (Application of General Rules and Regulations), C (Filing of Reports), D (Paperwork Reduction Act Information), E (Definitions), F (Public Availability) and G (Responses to Questions) of Form N–PORT.

[72] *See id.* For example, General Instructions A, B, C and G provide specific filing and reporting instructions (including how to report entity names, percentages, and dates), General Instructions D and F provide information about the Paperwork Reduction Act and the public availability of information reported on Form N–PORT, and General Instruction E provides definitions for specific terms referenced in Form N–PORT.

[73] *See, e.g.,* ICI Comment Letter; Fidelity Comment Letter; Schwab Comment Letter; Comment Letter of OppenheimerFunds (Aug. 10, 2015) (''Oppenheimer Comment Letter'').

[74] *See, e.g.,* Pioneer Comment Letter; Comment Letter of Invesco Advisers (Aug. 11, 2015) (''Invesco Comment Letter''); Schwab Comment Letter; ICI Comment Letter; Comment Letter of the Securities Industry and Financial Markets Association Asset Management Group (Jan. 13, 2016) (''SIFMA Comment Letter II'').

[75] *See* SIFMA Comment Letter I.

[76] See General Instruction A of Form N–PORT (''Reports on Form N–PORT must disclose portfolio information as calculated by the fund for the reporting period's ending net asset value (commonly, and as permitted by rule 2a–4, the first business day following the trade date).''). We understand that funds generally calculate their NAV on a T+1 basis pursuant to rule 2a-4, although under certain circumstances funds might record particular transactions on a T+0 basis, such as when correcting a pricing error. The instructions in Form N–PORT are intended to be flexible enough to allow funds to report information on Form N–PORT on the same basis used in calculating NAV.

[77] *See, e.g.,* SIFMA Comment Letter I (requesting confirmation that funds may use classifications generated by existing methodologies or available service providers in reporting country of risk for portfolio holdings); ICI Comment Letter (asserting that funds should have the flexibility to make country of risk determinations using their own good faith judgment).

[78] *See* ICI Comment Letter; Oppenheimer Comment Letter.

respond using its own methodology and the conventions of its service provider, so long as the methodology and conventions are consistent with the way the fund reports internally and to current and prospective investors.[79] This approach, which we have modeled after a similar instruction in Form PF, is intended to strike an appropriate balance between easing the reporting burden on funds by allowing them to rely on their existing practices, while still providing useful information to the Commission, investors, and other potential users.[80] The new instruction also explains that funds may explain any of their methodologies, including related assumptions, in Part E of Form N–PORT.[81]

One commenter recommended that we include a definition of ''forward contract,'' that references the settlement time of a contract, noting that from their experience, there are several interpretations of what constitutes a forward contract and without a standard definition, funds might categorize products inconsistently.[82] We disagree that we should define forward contracts with regard to the settlement time, and believe that adopting a specific definition like the one that the commenter suggested could be overbroad or under-inclusive based on the settlement time selected. Also, based on staff experience reviewing fund disclosures, we note that funds have generally been able to classify forwards in their current disclosures even though there is not a specific definition that references the settlement date of the contract. Finally, the approach we are adopting allows flexibility as forward products evolve.

Similarly, one commenter noted that it is unclear if a credit default swap should be reported as an option or a swap on Form N–PORT since it has the characteristics of both types of investments.[83] As discussed further below, we are revising Form N–PORT to include a clarification that specifically identifies that total return swaps, credit default swaps, and interest rate swaps should all be categorized under the ''swap'' instrument type.[84]

A few commenters also asked for guidance as to what investments would fall within the category of ''other derivatives'' in Item C.11.g.[85] The commenters noted that funds already rely upon the definition of ''derivatives'' provided in U.S. Generally Accepted Accounting Principles (''GAAP'') for financial statement reporting purposes and recommended that funds be allowed to rely upon the same definition for determining what to report as ''other derivatives'' on Form N–PORT (*i.e.,* investments reported as derivatives for financial statement reporting purposes, but that do not fall within the categories of derivatives enumerated in Form N–PORT such as futures, forwards, etc.).[86] We agree that this approach will generally promote consistency in how such information is reported and will provide more certainty to funds reporting ''other derivatives'' on Form N–PORT, and we understand that funds may choose to utilize this approach. However, we are not requiring that funds do so since we anticipate most derivative investments held by funds will fall within one of the categories of derivatives previously enumerated in Form N–PORT, and thus we expect few investments to be reported within the ''other derivatives'' category. Moreover, this ''other derivatives'' category is intentionally designed to be flexible enough to allow funds to capture and categorize investments in the future that are not currently traded by funds, and for these reasons we are not requiring funds to adhere to any specific process in determining what should fall within this category, provided that none of the previously enumerated categories apply.

Several commenters also asked that the definition of ''investment grade'' be revised to follow standards generally used by the industry by replacing references to liquidity with references to credit quality.[87] In response to these comments, we are removing the definition of ''investment grade'' that we proposed to be included in Form N–PORT. Consistent with our other changes discussed herein that permit funds to rely on their existing practices and methodologies, Form N–PORT provides funds with the flexibility, in determining what constitutes ''investment grade,'' to generally use their own methodology and the conventions of their service providers, as provided in General Instruction G. Given this clarification in the adopted form, we do not believe any definition of investment grade is necessary.[88]

We have also made several changes to certain definitions and instructions related to the way in which funds will provide information on Form N–PORT, largely relating to the formatting of the information reported. Among other things, we have revised the instruction in the proposal that directed funds to respond to every item of the form.[89] As proposed, the instruction would have required funds to respond to each sub-item and item on Form N–PORT even if the item was inapplicable. The revised instruction indicates that funds are not required to respond to items that are wholly inapplicable.[90] For example, no

[79] *See* General Instruction G of Form N–PORT (''Funds may respond to this Form using their own internal methodologies and the conventions of their service providers, provided the information is consistent with information that they report internally and to current and prospective investors. However, the methodologies and conventions must be consistently applied and the Fund's responses must be consistent with any instructions or other guidance relating to this Form.'').

[80] *See* General Instruction 15 of Form PF. Periodic reports on Form PF must be filed by registered investment advisers with at least $150 million in private fund assets under management. Form PF is designed, among other things, to assist the Financial Stability Oversight Council in its assessment of systemic risk in the U.S. financial system. *See generally* Reporting by Investment Advisers to Private Funds and Certain Commodity Pool Operators and Commodity Trading Advisors on Form PF, Investment Advisers Act Release No. 3308 (Oct. 31, 2011) [76 FR 71228 (Nov. 16, 2011)] (''Form PF Adopting Release'').

[81] *See* General Instruction G of Form N–PORT (''A Fund may explain any of its methodologies, including related assumptions, in Part E.'').

[82] *See* Comment Letter of T. Rowe Price (Aug. 21, 2015) (''T. Rowe Price Comment Letter'').

[83] *See* Morningstar Comment Letter.

[84] *See infra* footnote 340 and accompanying text.

[85] *See* ICI Comment Letter; T. Rowe Price Comment Letter.

[86] *See generally* ASC 815 (Derivatives and Hedging).

We note that definitions related to derivatives have been proposed in other contexts, for example ''derivatives transaction'' in our recent proposal regarding the use of derivatives by registered investment companies and BDCs. *See* Derivatives Proposing Release, *supra* footnote 7 (defining the term ''derivatives transaction'' to mean ''any swap, security-based swap, futures contract, forward contract, option, any combination of the foregoing, or any similar instrument ('derivatives instrument') under which a fund is or may be required to make any payment or delivery of cash or other assets during the life of the instrument or at maturity or early termination.'' However, that proposed definition is limited to derivatives transactions where the fund may be required to make a payment or delivery of cash or other assets. In contrast, for purposes of Form N–PORT, we seek to obtain information about all of a fund's derivative investments, regardless of whether the fund has a payment or delivery obligation. As a result of these differences, we continue to believe that it is preferable for Form N–PORT to not incorporate a specific definition, but rather to retain the flexibility to encompass the changing types of products that may evolve and emerge.

[87] *See* ICI Comment Letter; Oppenheimer Comment Letter; Pioneer Comment Letter; Comment Letter of MFS Investment Management (Aug. 11, 2015) (''MFS Comment Letter''); Comment Letter of the Dreyfus Corporation (Aug. 11, 2015) (''Dreyfus Comment Letter'').

[88] *See supra* footnote 79 and accompanying text.

[89] *See* General Instruction G of proposed Form N–PORT (''A Fund is required to respond to every item of this form. If an item requests information that is not applicable (for example, an LEI for a counterparty that does not have an LEI), respond N/A'').

[90] *See* General Instruction G of Form N–PORT (''A Fund is not required to respond to an item that is wholly inapplicable (for example, no response would be required for Item C.11 when reporting information about an investment that is not a

Continued

response is required for Item C.11, which concerns derivatives, when reporting information about an investment that is not a derivative. We believe this revision will decrease burdens upon filers and reduce the file size of Form N–PORT submissions, while still maintaining the clarity of the data reported on Form N–PORT.

We have also eliminated certain instructions from proposed Form N–PORT relating to the formatting of information reported on the form that, upon further consideration, we believe are unnecessary in Form N–PORT. In particular, we have eliminated instructions requiring the rounding of percentages, monetary values, and other numeric values.[91] Elimination of the instructions regarding the rounding of such figures should allow funds to report such information in the same way such information is currently recorded in their books and records. We also have eliminated instructions regarding the signature and filing of reports, because we believe that the general rules and regulations applicable under the Act provide sufficient guidance with regard to those issues.[92]

We have also made clarifying revisions to certain definitions. As discussed above, we have revised the proposed definition of ''exchange-traded product'' to refer instead to ''exchange-traded fund'' to harmonize the definitions used in Forms N–PORT and N–CEN.[93] The revision also clarifies that a separate report on Form N–PORT must be filed by each series of a UIT organized as an ETF, and parallels similar revisions to the definition of ETF in Form N–CEN.[94] We have also revised the definition of ''LEI'' to reflect new terminology regarding LEIs.[95]

Finally, regarding General Instruction F, which provides information regarding the public availability of the information in Form N–PORT, the final Instruction clarifies, similar to language that is contained in current Form PF, that we do not intend to make public certain information reported on Form N–PORT ''that is identifiable to any particular fund or adviser.'' [96] This modification makes clear, for example, that the Commission or Commission staff could issue analyses and reports that are based on aggregated, non-identifying Form N–PORT data, which would otherwise be nonpublic, such as information reported on Form N–PORT for the first and second months of each fund's fiscal quarter.

b. Information Regarding Assets and Liabilities

Part B of Form N–PORT seeks certain portfolio level information about the fund. As we proposed, Part B includes questions requiring funds to report their total assets, total liabilities, and net assets.[97] Funds will also separately report certain assets and liabilities, as follows. First, as we proposed, funds will report the aggregate value of any ''miscellaneous securities'' held in their portfolios.[98] As currently permitted by Regulation S–X, and as further discussed below, Form N–PORT permits funds to report an aggregate amount not exceeding 5 percent of the total value of their portfolio investments in one amount as ''Miscellaneous securities,'' provided that securities so listed are not restricted, have been held for not more than one year prior to the date of the related balance sheet, and have not previously been reported by name to the shareholders, or set forth in any registration statement, application, or report to shareholders or otherwise made available to the public.[99] We received only one comment on this aspect of our proposal, which supported the reporting of aggregate information for miscellaneous securities.[100]

Second, as we proposed, funds will also report any assets invested in a controlled foreign corporation for the purpose of investing in certain types of investments (''controlled foreign corporation'' or ''CFC'').[101] We received no comments on this aspect of the proposal. Some funds use CFCs for making certain types of investments, particularly commodities and commodity-linked derivatives, often for tax purposes. Form N–PORT requires funds to disclose each underlying investment in a CFC, rather than just the investment in the CFC itself, which will increase transparency on fund investments through CFCs.[102] These disclosures will allow investors to look through CFCs and understand the specific underlying holdings that they are investing in, which will in turn allow investors to better analyze their fund holdings and risk, and hence enable investors to make more informed investment decisions.

In addition, as discussed further below in section II.D.4, we believe it will be beneficial for the Commission to have certain information about funds' use of CFCs. The information we will be obtaining in Form N–PORT, combined with additional information we are requiring on Form N–CEN regarding CFCs, discussed below, will help the Commission better monitor funds' compliance with the Investment Company Act and assess funds' use of CFCs, including the extent of their use by reporting of total assets in CFCs.

Third, as we proposed, we are requiring that funds report the amounts of certain liabilities, in particular: (1) Borrowings attributable to amounts payable for notes payable, bonds, and similar debt, as reported pursuant to rule 6–04(13)(a) of Regulation S–X [17 CFR 210.6–04(13)(a)]; (2) payables for investments purchased either (i) on a delayed delivery, when-delivered, or other firm commitment basis, or (ii) on a standby commitment basis; and (3) liquidation preference of outstanding

derivative). If a sub-item requests information that is not applicable, for example, an LEI for a counterparty that does not have an LEI, respond N/A'').

[91] *See* General Instruction G of proposed Form N–PORT (instructions regarding rounding of percentages, monetary values, and other numerical values).

[92] *See* General Instruction B of Form N–PORT (''The General Rules and Regulations under the Act contain certain general requirements that are applicable to reporting on any form under the Act. These general requirements shall be carefully read and observed in the preparation and filing of reports on this Form, except that any provision in the Form or in these instructions shall be controlling.'') *See also* General Instruction H of proposed Form N–PORT (instructions regarding signature and filing of reports).

[93] *See supra* footnote 48 and accompanying text. Although the definition of ''exchange-traded fund'' being adopted on Form N–PORT is narrower than the definition of ''exchange-traded product'' as proposed on Form N–PORT, the universe of filers on Form N–PORT is not changing because exchange-traded managed funds that would have been encompassed in the proposed definition of ''exchange-traded product'' will be encompassed in the adoption through references to managed investment companies. *See* rule 30b1–9 (requiring certain funds to file reports on Form N–PORT); Form N–PORT (''Form N–PORT is to be used by a registered management investment company, or an exchange-traded fund organized as a unit investment trust, or series thereof ('Fund'). . . .'').

[94] *See infra* footnote 896.

[95] Form N–PORT's revised definition of ''LEI'' refers to the legal entity identifier ''endorsed'' by the Regulatory Oversight Committee Of The Global Legal Entity Identifier System (''LEI ROC'') or ''accredited'' by the Global Legal Entity Identifier Foundation (''GLEIF''), as opposed to ''assigned or recognized'' by those two entities.

[96] *See supra* footnote 26.

[97] *See* Item B.1 of Form N–PORT.

[98] *See* Item B.1.a and Item B.2.a of Form N–PORT. As discussed further below, Form N–PORT will require funds to also report information about miscellaneous securities on an investment-by-investment basis, although such information will be nonpublic and will be used for Commission use only. *See infra* footnote 420 and accompanying text.

preferred stock issued by the fund.[103] We received no comments on this aspect of the proposal. This information will allow Commission staff, as well as investors and other potential users, to better understand a fund's borrowing activities and payment obligations associated with these transactions. This in turn will facilitate analysis of the fund's use of financial leverage, as well as the fund's liquidity profile and ability to meet redemptions or share repurchases, which are important to understanding the risks such borrowings might create.

One commenter suggested that certain fee and expense information currently reported on Form N–SAR, and Item 75 of Form N–SAR in particular—which relates to average net assets during the current reporting period—be reported on Form N–PORT.[104] The commenter acknowledged that much of this information is already publicly reported in or can be derived from information reported in other fund documents filed with the Commission, but argued that this information should also be reported on Form N–PORT because the structured format of Form N–PORT would make information reported on Form N–PORT easier to aggregate and analyze.[105] We are not making this suggested change because similar and complementary information will be reported on Form N–PORT in a structured format going forward (*i.e.,* monthly net assets for funds more generally) and is currently available in a structured format for mutual funds in their risk/return summaries (certain fee and expense data).[106] Also, as discussed further below, we are revising Form N–CEN to require funds to report average net assets on an annual basis.[107]

For these reasons, we are adopting this aspect of Form N–PORT as proposed.

c. Portfolio Level Risk Metrics

One of the purposes of Form N–PORT is to provide the Commission with information regarding fund portfolios to help us better monitor trends in the fund industry, including investment strategies funds are pursuing, the investment risks that funds undertake, and how different funds might be affected by changes in market conditions. As discussed above, the Commission uses information from fund filings, including a fund's registration statement and reports on Form N–CSR (which includes the fund's shareholder report) and Form N–Q, to inform its understanding and regulation of the fund industry. Additionally our staff reviews fund disclosures—including registration statements, shareholder reports, and other documents—both on an ongoing basis as well as retroactively every three years.[108]

The disclosures in a fund's registration statement about its investment objective, investment strategies, and risks of investing in the fund, as well as the fund's financial statements, are fundamental to understanding a fund's implementation of its investment strategies and the risks in the fund. However, the financial statements and narrative disclosures in fund disclosure documents do not always provide a complete picture of a fund's exposure to changes in asset prices, particularly as fund strategies and fund investments become more complex.[109] The financial statements, including a fund's schedule of portfolio investments, provide data regarding investments' values as of the end of the reporting period—a ''snapshot'' of data at a particular point in time—or, in the case of the statement of operations, for example, historical data over a specified time period. By contrast, based on staff experience and the staff's outreach to funds prior to our proposal, we understand that funds commonly internally use multiple risk metrics that provide calculations that measure the change in the value of fund investments assuming a specified change in the value of underlying assets or, in the case of debt instruments and derivatives that provide exposure to interest rates and debt instruments, changes in interest rates or in credit spreads above the risk-free rate.[110]

Accordingly, we believe, and some commenters agreed, that it is appropriate to require funds to report quantitative measurements of certain risk metrics that will provide information beyond the narrative, often qualitative disclosures about investment strategies and risks in the fund's registration statement.[111] Monthly reporting on these risk measures, in particular, will help provide the Commission with more current information on how funds are implementing their investment strategies through particular exposures. Receiving this information on a monthly basis could help the Commission, for example, more efficiently analyze the potential effects of a market event on funds.[112]

Specifically, we proposed to require certain funds to report portfolio-level measures on Form N–PORT that will help Commission staff better understand and monitor funds' exposures to changes in interest rates and credit spreads across the yield curve.[113] As discussed in section II.A.2.g below, we proposed to require risk measures at the investment level for options and convertible bonds. We continue to believe that the staff can use these measures, for example, to determine whether additional guidance or policy measures are appropriate to improve disclosures in order to help investors better understand how changes in interest rate or credit spreads might affect their investment in a fund. As a result, we are adopting these risk measures substantially as proposed, subject to the modifications discussed below.[114]

While we received some comments generally supporting our proposal to require portfolio-level risk metrics,[115] some suggested alternative methods for collecting risk metrics,[116] or opposed

Position level reporting would provide the

Continued

our proposal to make certain of the risk metrics public.[117] These comments are discussed in more detail below.

We believe, and some commenters agreed, that institutional investors, as well as entities that provide services to both institutional and individual investors, could use these risk metrics to conduct their own analyses in order to help them better understand fund composition, investment strategy, and interest rate and credit spread risk the fund is undertaking. As discussed further below, however, other commenters, were mixed as to whether this information would be useful for investors and if this information should be made public.[118] These measures can complement the risk disclosures that are contained in the registration statement, thereby potentially helping investors to make more informed investment choices. Accordingly, we disagree with commenters that argued this information has no utility for investors. We also continue to believe that requiring funds to publicly disclose these measures quarterly, like other information in the schedule of investments will also help provide investors with more specific, quantitative information regarding the nature of a fund's exposure to debt than they currently have.[119] As discussed further in Section II.A.4 below, we are adopting, largely as proposed, the requirement that funds provide public disclosure of portfolio-level risk metrics on a quarterly basis.[120] For these reasons, and as discussed further below in section II.A.4, we were not persuaded by commenters that such information should be nonpublic.

In particular, for funds that invest in debt instruments, or in derivatives that provide exposure to debt or debt instruments, we believe it is important for the Commission staff, investors, and other potential users to have measures that can help them analyze how portfolio values might change in response to changes in interest rates or credit spreads.[121] To improve the ability of the Commission staff, investors, and other potential users to analyze how changes in interest rates and credit spreads might affect a fund's portfolio value, we proposed that a fund that invests in debt instruments, or derivatives that provide notional exposure to debt instruments or interest rates, representing at least 20% of the fund's net asset value as of the reporting date, provide a portfolio level calculation of duration and spread duration across the applicable maturities in the fund's portfolio.[122]

Commenters were generally supportive of our proposal to include a threshold.[123] However, several commenters requested that we increase the threshold for risk reporting from 20% and that the calculation of debt investments be made based on the fund's three-month average notional value of debt investments as a percentage of NAV.[124] Some commenters requested an increase in the threshold in order to make the risk metric threshold more consistent with the Commission's threshold for requiring funds to disclose industry concentration in their prospectus.[125] Additionally, some commenters argued that the three-month average would better reflect a fund's true investment strategy and mitigate short-term market fluctuations that could cause a fund to temporarily exceed the threshold.[126] We agree with both recommendations.

We believe that a 25% threshold, as several commenters suggested, will still allow the Commission to receive measurements of duration and spread duration from funds that make investments in debt instruments as a significant part of their investment strategy because we do not believe many, if any, funds that make investments in debt instruments as a significant part of their investment strategy have less than 25% of their NAV invested in such instruments. Commenters persuaded us that some funds that primarily invest in assets other than debt instruments, such as equities, could, at times, have more than 20% of the net asset value of the fund

Commission with greater insight into sources of risk within a portfolio.''); Comment Letter of Simpson Thacher & Bartlett LLP (Aug. 11, 2015) (''Simpson Thacher Comment Letter'') (derivatives reporting should focus on portfolio-level risk metrics, such as ''value at risk'' models)

[120] *See* Item B.3 of Form N–PORT; *see also generally* Proposing Release, *supra* footnote 7, at n. 56 and accompanying text.

[121] As discussed further below, the Commission also believes that there would be a benefit to collecting risk measures for derivatives that provide exposure to certain assets, such as equities and commodities. Due to the nature of these instruments, however, we believe that such information should be provided on an instrument-by-instrument basis, instead of as a portfolio level calculation.

[122] Specifically, as proposed, funds would have calculated notional value as the sum of the absolute values of: (i) The value of each debt security, (ii) the notional amount of each swap, including, but not limited to, total return swaps, interest rate swaps, and credit default swaps, for which the underlying reference asset or assets are debt securities or an interest rate; and (iii) the delta-adjusted notional amount of any option for which the underlying reference asset is an asset described in clause (i) or (ii). *See* proposed Instruction to Item B.3 of Form N–PORT.

The delta-adjusted notional value of options is needed to have an accurate measurement of the exposure that the option creates to the underlying reference asset. *See, e.g.,* Comment Letter of Morningstar to Derivatives Concept Release (Nov. 7, 2011) (''Morningstar Derivatives Concept Release Comment Letter'') (submitted in response to the Derivatives Concept Release, *supra* footnote 38, which sought comment regarding the use of derivatives by management investment companies).

[123] *See, e.g.,* Interactive Data Comment Letter (supporting 20% level as reasonable and stating belief that threshold should be measured by considering notional value for derivatives and market values for bonds); State Street Comment Letter (supporting 20% threshold and recommending that the Commission provide clarity on the threshold calculation); Fidelity Comment Letter; Franco Comment Letter; Simpson Thacher Comment Letter (20% threshold and holds more than 100 debt securities); Wells Fargo Comment Letter (supporting 20% threshold).

[124] *See, e.g.,* Oppenheimer Comment Letter (25% threshold consistent with prospectus disclosure of industry concentration); ICI Comment Letter (same); MFS Comment Letter (25% threshold); Pioneer Comment Letter (same); Dreyfus Comment Letter (''we believe the Commission should consider a 25% threshold because, at least, it would define a subset of 'balanced' and 'asset allocation' funds that would, by prospectus or name test mandate, for example, have to maintain a minimum fixed income exposure.''); SIFMA Comment Letter I (recommending a 30% threshold); Invesco Comment Letter (same); *but see* Morningstar Comment Letter (supporting 20% threshold).

[125] *See, e.g.,* ICI Comment Letter; Oppenheimer Comment Letter; MFS Comment Letter; Pioneer Comment Letter; Dreyfus Comment Letter; *see also* Instruction 4 to Item 9(b)(1) of Form N–1A (''Disclose any policy to concentrate in securities of issuers in a particular industry or group of industries (*i.e.* investing more than 25% of a Fund's net assets in a particular industry or group of industries).''); Registration Form Used by Open-End Management Investment Companies, Investment Company Act Release No. 23064 (Mar. 13, 1998) [63 FR 13916 (Mar. 23, 1998)] at nn. 100–101 and accompanying text (''. . . the Commission continues to believe that 25% is an appropriate benchmark to gauge the level of investment concentration that could expose investors to additional risk.'').

[126] *See, e.g.,* ICI Comment Letter; MFS Comment Letter; Dreyfus Comment Letter.

invested in debt instruments for cash management or other purposes.[127] Thus raising the threshold from 20% to 25% will relieve more funds of having to monitor each month whether they trigger the requirement for making such calculations, while still achieving the goal the Commission stated in the Proposing Release of requiring funds that make investments in debt instruments as a significant part of their investment strategy to report such metrics.[128]

We agree with commenters that using the same thresholds we use for discussing industry concentration in current prospectuses is appropriate as it will achieve an objective that is similar to the one in Form N–1A of requiring funds to disclose only where such investments are a central part of the fund's investment objectives. We are therefore adopting a 25% threshold for reporting portfolio-level risk metrics.[129]

We are also modifying the rule from the proposal to require funds to calculate this threshold on the *three-month average* of a fund's value as percentage of NAV (rather than, as proposed, value as percentage of NAV at the *reporting date* (*i.e.* month-end)) because we agree with commenters who pointed out that this should mitigate the chance that short-term market fluctuations could cause a fund that does not typically use such instruments as part of its investment strategy to temporarily exceed the threshold and be required to report the metrics.[130]

Finally, another commenter opposed requiring risk metrics data for index funds because it believed that this requirement would be unnecessarily burdensome for those funds.[131] However, index funds incorporate a wide variety of funds—some of which are primarily invested in debt securities, including derivatives based on debt securities. It is our view that if a fund is exposed to debt instruments or interest rates in amounts that trigger the reporting of risk metrics, they have an exposure large enough to warrant reporting. Moreover, some index funds have indexes that change weekly or daily. Accordingly, because we believe it is important to monitor the risk metrics for all funds with exposures to debt instruments exceeding the threshold, we do not believe it would be appropriate to exempt index funds from Form N–PORT's requirements for risk metric reporting.

For duration, we proposed to require that a fund calculate, the change in value in the fund's portfolio from a 1 basis point change in interest rates (commonly known as DV01) for each applicable key rate along the risk-free interest rate curve, *i.e.,* 1-month, 3-month, 6-month, 1-year, 2-year, 3-year, 5-year, 7-year, 10-year, 20-year, and 30-year interest rate, for each applicable currency in the fund.[132] We realized that funds might not have exposures for every applicable key rate. For example, a short-term bond fund is unlikely to have debt exposures with longer maturities. Accordingly, we proposed that a fund only report the key rates that are applicable to the fund. We proposed that funds report zero for maturities to which they have no exposure.[133] For exposures outside of the range of listed maturities listed on Form N–PORT, we proposed that funds include those exposures in the nearest maturity.

One commenter stated that calculating DV01 along key rates of the Treasury curve is ''common and intuitive'' to analyzing shifts of the yield curve.[134] However, some commenters suggested that calculating the DV01 and SDV01 for 11 proposed key rates could be burdensome, and requested that we limit the number of applicable key rates along the risk-free curve.[135] For example, commenters recommended that the Commission limit the calculations to the key rates to those most representative of bond fund overall exposures by limiting the calculation to the 1-, 2-, 5-, 10-, 20-, and 30-year rates.[136] Another commenter recommended collapsing the 1-, 3-, and 6-month exposures into the 1-year exposure, as a detailed breakout inside 1-year is not informative for most instruments.[137] Commenters argued that reducing the number of key rates will reduce burdens for fund companies while providing the Commission with sufficient information on yield curve exposures for staff analysis.[138] Finally, one commenter suggested that we only require a single measure of duration (*i.e.,* total portfolio duration) that is the weighted average of the top 5 currencies (including the base currency) rather than providing duration calculations for key rates along the Treasury curve, arguing that a single measure would capture the majority of a fund's portfolio risk.[139]

We continue to believe that requiring funds to provide further detail about their exposures to interest rate changes along the risk-free rate curve will provide the Commission with a better understanding of the risk profiles of funds with different strategies for achieving debt exposures. For example, funds targeting an effective duration of 5 years could achieve that objective in different ways—one fund could invest predominantly in intermediate-term debt; another fund could create a long position in longer-term bonds, matched with a short position in shorter-term bonds. While both funds would have intermediate-term duration, the risk profiles of these two funds, that is, their exposures to changes in long-term and short-term interest rates, are different. Having DV01 calculations along the risk-free interest rate curve, as opposed to a single measure of duration suggested by one commenter, will clarify this difference. Moreover, as one commenter noted, ''DV01 and SD01 [spread duration] are likely the measures that will be least subject to differences based on assumptions within risk models employed by fund companies'' and therefore minimizes variation based on the disparate risk metrics models used by funds.[140] The Commission staff will use this information to better understand how funds are achieving their exposures to interest rates, and to perform analysis across funds with similar strategies to identify outliers for potential further inquiry, as appropriate.

We were, however, persuaded by commenters that reducing the number of key rates that funds must report could reduce the reporting burden, while still

[127] *See, e.g.* Pioneer Comment Letter.

[128] *See, e.g.,* State Street Comment Letter.

[129] *See supra* footnote 125.

[130] *See* Item B.3 of Form N–PORT; *see, e.g.* Pioneer Comment Letter; Oppenheimer Comment Letter. One commenter requested that the threshold be based on the fund's net asset value and not notional value. *See* MFS Comment Letter. We continue to believe that basing the threshold on notional amount, especially for derivatives, is a better measure of a fund's exposure than the just the investment's value because some derivatives may have a negligible net asset value, but represent significant exposures to the fund. We have, however, made a clarifying change to the terminology from the proposal, and instruction B.3 now refer to ''value'' rather than ''notional value.'' *See infra* footnote 165.

[131] *See* ICI Comment Letter.

[132] *See* Item B.3.aof proposed Form N–PORT.

[133] For funds with exposures that fall between any of the listed maturities in the form, we proposed in the Instructions to Item B.3 that funds use linear interpolation to approximate exposure to each maturity listed above.

[138] *See id.;* Dreyfus Comment Letter.

[139] *See, e.g.,* ICI Comment Letter (suggesting as an alternative, a single duration measurement that is the weighted average of the top 5 currencies (including the base currency)); SIFMA Comment Letter I (duration disclosure should be limited to top 5 exposures); ICI Comment Letter (report only total portfolio duration and credit spread duration—*i.e.,* single measures—rather than multiple points along the yield curve).

[140] *See* Morningstar Comment Letter.

providing the staff with sufficient information and flexibility to analyze how debt portfolios will react to different interest rates and credit spreads along the Treasury curve. We are therefore modifying this requirement from the proposal to require fewer key rates—specifically 3-month, 1-year, 5-year, 10-year, and 30-year—which will provide, as commenters suggested, the rates most representative to bond funds' overall exposures. The key rates Form N–PORT will require, as adopted, are substantially similar to the key rates suggested by commenters; [141] however, we believe that some granularity for short term debt is important, especially in the context of short and ultra-short duration funds, and therefore, unlike the commenters' suggestions for collapsing all short-term exposures to one-year, Form N–PORT will require reporting for the 3-month maturity.[142]

Form N–PORT will also require, as proposed, funds to provide the key rate duration for each applicable currency in a fund. One commenter recommended that we limit the duration to the top 5 currencies.[143] Some commenters requested that we not include currency in the reporting of duration for funds because currency risk is not relevant to duration.[144] Others supported a *de minimis* reporting threshold for exposure to different currencies that would be based on the notional value of the instruments, relative to NAV.[145] These commenters noted that including all currency exposures, regardless of size, would result in a long list of exposures that would have little impact on a fund.[146] As a result, the commenters believed that the Commission would receive data that would add little to the staff's ability to understand a fund's portfolio risk, but would add significant reporting and compliance burdens to funds.[147]

We continue to believe that funds should generally be required to provide the key rate duration for each applicable currency in the fund in order to understand interest rate risk to funds with significant currency risk. Nonetheless, we were persuaded by commenters that a *de minimis* threshold is appropriate. Based on staff experience analyzing similar data, however, we believe that a 5% *de minimis,* as suggested by some commenters, could hinder the staff's ability to measure smaller fund exposures that could have large effects across the fund industry as a whole. We agree with one comment that Form N–PORT should provide for a 1% *de minimis* threshold, calculated as the notional value of relevant investments in each currency relative to the fund's NAV.[148] We believe that setting the *de minimis* at this level will balance the need for the staff to identify and monitor not only a fund's currency risk, but also the risks of small fund positions that could aggregate into large positions across the industry, as the Commission will still be receiving information about the majority of a fund's currency exposures with this threshold.

For both duration and spread duration, we proposed to require that funds provide the change in value in the fund's portfolio from a 1 basis point change in interest rates or credit spreads, rather than a larger change, such as 5 basis points or 25 basis points. As we noted in the Proposing Release, based on staff outreach, we believed that a 1 basis point change is the methodology that many funds currently use to calculate these risk measures at the position level for internal risk monitoring and would provide sufficient information to assist the Commission in analyzing fund exposures to changes in interest rate or credit spreads.[149] We requested comment on whether we should require or permit funds to report a larger change in interest rates or credit spreads, such as 5 or 25 basis points.

Additionally, while we did not propose requiring convexity, the Commission also considered and requested comment on whether funds should be required to report convexity, which facilitates more precise measurement of the change in a bond price with larger changes in interest rates because this measure captures changes in the shape of the yield curve.[150]

Commenters suggested that we adopt risk metrics that would provide a better measure of risk over time than just DV01.[151] For example, one commenter, noting that, while DV01 and SDV01 are typically used as daily risk measures, larger shifts in the curve, such as DV25 or DV50, may be appropriate for measures with a significant lag, such as reporting on Form N–PORT.[152]

We also received several comment letters recommending that we include a measure of convexity as it is a valuable method of measuring the change of the shifting yield curve, as well as a comment to require stress tests of the portfolio of small and large changes in spreads, interest rates, and volatility.[153] We agree with commenters that a measurement that captures larger changes in the yield curve will be useful. We additionally agree with commenters that argued that a measure for changes in the shape of the yield curve such as convexity would be useful, but are sensitive to the burdens that requiring a measurement of convexity may impose on filers that do not currently calculate convexity internally.

Accordingly we believe that requiring a risk measure that shows the effect of a larger change in interest rates, coupled with DV01 as we proposed, both provides information that commenters said would be useful (*i.e.,* how the exposure changes with different changes in interest rate), while not requiring filers that do not calculate convexity internally to begin to do so. We are therefore adopting a requirement that funds provide both DV01 [154] (a one basis point change in interest rate) and DV100 (a 100 basis point change in interest rates).[155] Based on staff experience, we believe that DV100 is among the most

[155] *See* B.3.b of Form N–PORT.

common measures of interest rate sensitivity and it will, in conjunction with DV01, provide more useful information about non-parallel shifts in the yield curve than smaller measures, such as DV25 and DV50. Moreover, DV100 will allow the staff to capture larger changes to interest rates (and corresponding ''shocks'' to the markets) than DV25 and DV50. Finally, based on staff experience, it is our belief that DV100 is a standard measure of interest rate sensitivity and is a common measure of duration and is therefore unlikely to require filers to change current internal measurement practices, thereby mitigating the increase in reporting costs relative to the proposal.

We also proposed to require that funds provide a measure of spread duration (commonly known as SDV01) at the portfolio level for each of the same maturities listed above, aggregated by non-investment grade and investment grade exposures.[156] This would measure the fund's sensitivity to changes in credit spreads (*i.e.,* a measure of spread above the risk-free interest rate). Again, similar to the example above regarding the potential use of the DV01 metric, SDV01 can provide more precise information regarding funds' exposures to credit spreads when they engage in a strategy investing in investment-grade or non-investment grade debt.

One commenter stated that spread duration is a more representative measure of bond fund portfolio risk than duration alone because it ''captures both interest rate risk and credit risk'' and that staff should therefore use spread duration when analyzing funds.[157] However, that commenter and others recommended that we require funds to report a single spread duration for the portfolio, as spread rates are generally calculated as a parallel shift, making calculations at key rates less useful than they are for analyzing shifts in interest rates.[158] Because credit spreads can vary based on the maturity of the bonds, we continue to believe that providing credit spread measures for the key rates along the yield curve, as with DV01, will help the Commission and its staff better analyze credit spreads of investments in funds than a single measure for the entire portfolio. For example, this data could be helpful for analyzing shifts in credit spreads for non-investment grade and investment grade debt, respectively, over the yield curve, as credit spreads for investment grade and non-investment grade debt do not always shift in parallel or in lock step, particularly during times of market stress.[159]

For the same reasons discussed above for interest rate risk, however, we are limiting the required key rates for credit spread risk to 3-month, 1-year, 5-year, 10-year, and 30-year.[160] Commenters also suggested either only requiring spread duration (as opposed to both credit and spread duration) or further refining the measure of credit spreads, for example, by breaking out government related spreads from other investment-grade spreads.[161] However, we continue to believe that our current measure of spread risk provides adequate information to the staff, investors, and other potential users to better understand industry and fund credit spreads, and the risk associated with credit spreads, while appropriately balancing the costs of calculating such measures. We are therefore adopting the credit spread risk as proposed, subject to the previously discussed key rate refinements discussed above.[162]

We also proposed to include an instruction to Item B.3 to assist funds with calculating the threshold and to allow better comparability among funds. One commenter recommended that our proposed calculation for the threshold, which the proposal defined as ''notional value,'' include the ''contract value of each futures contract for which the underlying reference asset or assets are debt securities or an interest rate.'' [163] The commenter noted that funds may use fixed income futures for similar purposes as fixed income swaps, for example, to adjust duration, and including futures in the calculation would give the Commission more accurate reporting and is consistent with how the industry typically does these types of calculations.[164] We agree and are modifying our instructions to require that funds include futures in the calculation of notional value.[165]

Another commenter noted that non-investment grade portfolios often hold ''equity-like securities,'' such as convertible bonds and preferred stocks.[166] The commenter argued that DV01 is not appropriate for these types of portfolios and requested that Form N–PORT clarify how funds should calculate interest-rates in such situations.[167] Other commenters suggested that we further refine our proposed methodology by providing more details relating to the relevant interest rate and credit spread calculations such as whether the credit spread to be shifted is the nominal or option adjusted spread (OAS).[168] In determining the proposed methodology for the measures of duration and spread duration, staff engaged in outreach to asset managers and risk service providers that provide risk management and other services to asset managers and

[156] As proposed, Form N–PORT would have included instructions stating that ''Investment Grade'' refers to an investment that is sufficiently liquid that it can be sold at or near its carrying value within a reasonably short period of time and is subject to no greater than moderate credit risk, and ''Non-Investment Grade'' refers to an investment that is not Investment Grade. *See* proposed General Instruction E of Form N–PORT. As discussed above in section H.A.2.a, we received comments relating to our proposed definition of ''Investment Grade''. For the reasons discussed above, we have determined to remove these definitions from the Form.

[157] *See* Dreyfus Comment Letter.

[158] *See supra* footnotes 134–137; *see, e.g.,* Wells Fargo Comment Letter (noting that, unlike interest rate spreads, credit spreads are not typically calculated at all key rates); Fidelity Comment Letter (''A single CR01 without reference to maturity is a standard risk metric and should be familiar to market participants.''); Dreyfus Comment Letter (recommending a single measure for spread duration); ICI Comment Letter (same).

[159] The delineation between non-investment grade and investment grade debt is similar to information regarding private fund exposures gathered on Form PF, which could be helpful for comparing and analyzing credit spreads between public and private funds. *See, e.g.,* Item 26 of Form PF.

[160] *See* B.3.c of Form N–PORT.

[161] *See, e.g.,* Fidelity Comment Letter (Suggesting breaking out government-related credit spreads from other investment-grade credit spreads because it would be more useful for monitoring fund credit risk); Dreyfus Comment Letter (''Spread duration is a more important measure of overall bond fund portfolio risk than duration alone because it captures both interest rate risk and credit risk.'').

[162] *See* Item B.3.c of Form N–PORT.

[163] *See* CRMC Comment Letter.

[164] *Id.*

[165] We have also decided to make a clarifying change by using the term ''value'' as opposed to the proposal's ''notional value.'' We believe that this could reduce confusion in the reporting of these measures. Since our proposed calculation of ''notional value'' requires the sum of ''absolute'' values, which may be different than how funds currently define ''notional value,'' we are changing the instructions from requiring notional value to requiring ''value,'' which is defined to include the notional value of certain derivatives instruments. *See* Instruction to Item B.3 of Form N–PORT. Moreover, this is consistent with Form PF which describes ''value'' in General Instruction 15. *See* General Instruction 15 of Form PF.

[166] *See* Fidelity Comment Letter.

[167] *Id.*

[168] *See, e.g.,* Interactive Data Comment Letter (Clarify whether interest rate shifts should be applied to a par yield curve or a spot yield curve and specify that the measurement procedure should include shifting rates both upward and downward. Clarify whether the curve segments should be defined based on maturity or average life, particularly for amortizing assets such as MBS and consider excluding certain issues, such as US treasuries; clarify whether the credit spread to be shifted is the nominal or option adjusted spread (OAS) and recommending OAS.); State Street Comment Letter (requesting clarity whether the Commission wants notional value versus delta adjusted or duration equivalent value, but also suggesting that the SEC should not be too prescriptive and give managers discretion within guidelines, so long as they can validate and justify their approach.).

institutional investors. The proposed methodology was based on staff experience in using duration and spread duration, as well as this outreach to better understand common fund practices for calculating such measures.

While the Commission continues to believe that the methodologies for reporting duration and spread duration will allow for better comparability across funds, as discussed above, we are adopting a new instruction to Form N–PORT, subject to the specific instruction in Item B.3 to calculate value, that funds may use their own internal methodologies and the conventions of their service providers, which should help minimize reporting burdens.[169] As in Form PF, we believe that this approach strikes an appropriate balance between easing the burdens on funds by allowing them to rely on their existing practices while still providing the Commission's staff with comparable data across the industry.[170] However, we agree with the commenter that requested that we clarify whether the shift is the nominal or option-adjusted spread. We believe that measuring credit risk by shifting option adjusted spread provides a more robust measure of credit risk for investments with embedded optionality because it captures how embedded options alter the payment obligations of counterparties.[171] Thus measuring credit risk by shifting the option adjusted spread will allow the Commission and other interested parties to more accurately monitor this effect. We are therefore adding one clarification to Item B.3.c., Credit Spread Risk, to clarify that funds should provide the change in value of the portfolio from a 1 basis point change in credit spreads where the shift is applied to the option adjusted spread.[172]

While we proposed that funds provide a calculation of each of these measures at a portfolio level, we also considered whether to require, and requested comment on the alternative that, instead, funds report these risk metrics for each debt instrument or derivative that has an interest rate or credit exposure.[173] We had asked what the benefits would be to having more precise data for analysis of various movements in interest rates and credit spreads.

Several commenters supported reporting at the portfolio-level rather than at the position-level.[174] One commenter suggested that, rather than report risk measures at the portfolio-level, funds should report risk exposures at the position-level, as this is current industry practice and would therefore not be burdensome.[175] Other commenters generally noted that providing position specific details would better enable investors and service providers to calculate risk, without relying on the reporting fund's models or assumptions.[176] Finally, another commenter recommended that the Commission, with respect to derivatives, focus on metrics based on a portfolio-level analysis, as such an analysis would more accurately reflect a fund's use of, and net exposure to, derivatives.[177]

As discussed in the Proposing Release, we believe that most funds likely calculate these risk metrics at a position-level. However, we recognize that even if such calculations are available at a position-level, reporting these metrics could cause funds to make additional systems changes to collect such position-level data for reporting, as well as potential burdens related to increased review time and quality control in submitting the reports. Therefore, on balance, we continue to believe that requiring funds to provide this information for each maturity at the portfolio level would provide a sufficient level of granularity for purposes of Commission staff analysis. We also believe that there are certain efficiencies for the Commission, its staff, investors, and other potential users to having funds report the portfolio-level calculations relative to reporting position-level calculations, as this could allow for more timely and efficient analysis of the data by not requiring users of the information to calculate the portfolio-level measures from the position-level measures.[178]

In order to allow better comparability among funds, some commenters recommended that the Commission omit risk metrics in favor of more data on the specific investments, stating that raw data would allow the staff, investors, and other potential users to perform their own risk calculations.[179] According to the commenters, providing position specific details would better enable investors and service providers to calculate risk, without relying on the reporting fund's models or assumptions.[180] While we agree that reporting raw data on specific investments would provide users of the data with more flexibility in calculating risk, we do not believe that the benefits of reporting this information sufficiently justify the burdens of requiring funds to report substantially more detailed information on Form N–PORT at this time. Moreover, as discussed above, we believe that requiring funds to report the portfolio-level risk measures required on Form N–PORT, as well as delta for options, warrants, and convertible securities, which is discussed further below in section II.A.2.g.iv, provides the Commission, investors, and other potential users with a sufficient level of granularity for purposes of analysis at this time.

Finally, commenters requested that we collect alternative risk metrics, such as the same interest rate and credit risk questions as are required by Form PF in order to improve the interoperability of the data collected for private funds and registered investment companies.[181]

[169] *See* General Instruction G of Form N–PORT.

[170] *See* Form PF Adopting Release, *supra* footnote 80, at n. 187 and accompanying text Based on staff experience, we believe that we will still find the data useful even when funds use different methodologies, despite the fact that varying methodologies could reduce the comparability of data across funds because this data will still provide information that can be compared to a fund's previous filings, as well as a baseline measurement for the industry that can be monitored for changes from one month to the next.

[171] *See also* Interactive Data Comment Letter.

[172] *See* Item B.3.c of Form N–PORT.

[173] *See* Proposing Release, *supra* footnote 7, at 33601.

[174] *See, e.g.,* SIFMA Comment Letter I (supporting the Commission's proposal to require funds to provide the Commission with portfolio level risk metrics and requesting that the information not be made public); Wells Fargo Comment letter (supporting the Commission's request for duration and spread duration, but suggesting that the calculation for providing risk metrics be defined differently).

[175] *See* Interactive Data Comment Letter (recommending that the Commission consider several alternatives, including requiring funds to report aggregate risk metrics at the asset class level and composite portfolio-level, and to require risk metric calculations to account for the ''interactions among the investments being aggregated.'').

[176] *See* Morningstar Comment Letter; Vanguard Comment Letter.

[177] *See* Simpson Thacher Comment Letter.

[178] Commenters also requested that we clarify that the fixed income exposure as calculated by a top tier in a fund-of-fund investment structure would not include the top tier fund's exposure to the underlying fund's exposure to debt. *See* ICI Comment Letter; MFS Comment Letter. Since Item B.3 requires aggregated portfolio-level risk metrics, we generally would not expect funds to look through to the underlying funds' holdings. Rather, funds only will need to look to the top level fund investments in calculating their exposure to risk measures.

[179] *See, e.g.,* Vanguard Comment Letter; Morningstar Comment Letter (''Rather than collecting model assumptions or additional standardization of the calculations, we believe providing additional detail with position information, specifically for bespoke derivatives and syndicated loans, will enable investors and service providers to independently calculate risk measures based on a model of the investor's choice.'').

[180] *Id.*

[181] *See, e.g.,* BlackRock Comment Letter (Commission should use the same interest rate and credit risk questions as is required in Item 42 of

However, while some of our Form N–PORT risk metric disclosures are based on Form PF, for the reasons stated above, the position-level information that we will receive in reports on Form N–PORT make more detailed reporting unnecessary for registered funds.[182] Another commenter suggested that we focus on alternative portfolio-level risk metrics, such as Value at Risk (''VaR'').[183] Based on staff experience, for purposes of monitoring a fund's sensitivity to changes in interest rates and credits spreads, we believe that requiring funds to calculate duration and spread duration along key rates will provide the Commission with more sensitive information than would be provided by an overall portfolio-level risk metric such as VaR. Accordingly, we are not adopting these suggested alternative risk metrics.

d. Securities Lending

To increase the rate of return on their portfolios, some funds engage in securities lending activities whereby a fund lends certain of its portfolio securities to other financial institutions such as broker-dealers. To protect the fund from the risk of borrower default (*i.e.,* the borrower failing to return the borrowed security or returning it late), the borrower posts collateral with the fund in an amount at least equal to the value of the borrowed securities, and this amount of collateral is adjusted daily as the value of the borrowed securities is marked to market.[184] Funds generally demand cash as collateral. A fund will typically invest cash collateral that it receives in short-term, highly liquid instruments, such as money market funds or similar pooled investment vehicles, or directly in money market instruments.

A fund's income from these activities may come from fees paid by the borrowers to the fund and/or from the reinvestment of collateral.[185] Many funds engage an external service provider—commonly called a ''securities lending agent''—to administer the securities lending program. The securities lending agent is typically compensated by being paid a share of the fund's securities lending revenue after the borrower has been paid any rebate owed to it.[186]

Securities lending may implicate certain provisions of the Investment Company Act, and funds that engage in securities lending do so in reliance on Commission staff no-action letters, and in some circumstances, exemptive orders.[187] Funds that rely on these letters and orders are subject to conditions on a number of aspects of their securities lending activities, including loan collateralization and termination, fees and compensation, board approval and oversight, and voting of proxies.

Currently, the information that funds are required to report about securities lending activity, whether in a structured format or otherwise, is limited. For example, funds disclose on Form N–SAR whether they are permitted under their investment policies to, and whether they did engage during the reporting period in, securities lending activities.[188] Funds generally also disclose additional information regarding their securities lending programs in their registration statements.[189] In addition, consistent with current industry practices, many funds identify particular securities that are on loan in their schedules of portfolio investments prepared pursuant to Regulation S–X. These disclosures do not address other pertinent considerations, such as the extent to which a fund lends its portfolio securities, the borrower to which the fund is exposed, the fees and revenues associated with those activities, and the significance of securities lending revenue to the investment performance of the fund.

As proposed, to address these data gaps and provide additional information to the Commission, investors, and other potential users regarding a fund's securities lending activities, we are requiring funds to report certain borrower information and position-level information monthly on Form N–PORT.[190] Also, as to other securities lending information for which annual reporting would be sufficient because it is unlikely to change on a frequent basis (*e.g.,* name and other identifying information for a fund's securities lending agent), funds will report such information annually on Form N–CEN, as proposed and as discussed below in section II.D. In addition, as discussed below in section II.C.6, we have made a modification from the proposal to require certain information about the income from and fees paid in connection with securities lending activities, and the monthly average of the value of portfolio securities on loan, be disclosed as part of the fund's Statement of Additional Information (or, for closed-end funds, reports on Form N–CSR) or in Form N–CEN, instead of a fund's financial statements as we had originally proposed.[191]

Form PF; Commission should consider implementing a reporting requirement to obtain a comprehensive measure of fund's use of leverage); Simpson Thacher Comment Letter. Item 42 of Form PF requires an adviser to report the impact on the fund's portfolio from specified changes to certain identified market factors, if regularly considered in formal testing in the fund's risk management, broken down by the long and short components of the qualifying fund's portfolio. *See* Item 42 of Form PF; *see also* Form PF Adopting Release, *supra* footnote 80, at nn. 270–272 and accompanying text.

[182] Unlike with Form PF, which does not require position-level reporting, with Form N–PORT the staff will be able to calculate alternative risk measures using the detailed position-level information provided in reports on Form N–PORT.

[183] *See* Simpson Thacher Comment Letter (derivatives reporting should focus on portfolio-level risk metrics, such as ''value-at-risk'' models).

[184] *See* SIFMA, Master Securities Loan Agreement, §§ 4 (Collateral), 9 (Mark to Market) (2000) (''Master Securities Loan Agreement''), *available at http://www.sifma.org/Services/Standard-Forms-and-Documentation/MRA,-GMRA,-MSLA-and-MSFTAs/MSLA_Master-Securities-Loan-Agreement-(2000-Version). See also* Division of Investment Management, SEC, *Securities Lending by U.S. Open-End and Closed-End Investment Companies* (2014) (''Securities Lending Summary''), *available at http://www.sec.gov/divisions/investment/securities-lending-open-closed-end-investment-companies.htm.*

[185] If a security is not in high demand, a lender typically pays the borrower a cash collateral fee, commonly called a ''rebate.'' The rebate is negotiated and can be negative (*i.e.,* a fee paid from the borrower to the lender) when demand for the loan of a particular security is especially great or its supply especially constrained. *See* Master Securities Loan Agreement, *supra* footnote 184, at § 5 (Fees for Loan).

[186] *See* Securities Lending Summary, *supra* footnote 184.

[187] For example, the transfer of a fund's portfolio securities to a borrower implicates section 17(f) of the Investment Company Act, which generally requires that a fund's portfolio securities be held by an eligible custodian. A fund's obligation to return collateral at the termination of a loan implicates section 18 of the Investment Company Act, which governs the extent to which a fund may incur indebtedness. *See id.*

[188] Item 70.N of Form N–SAR.

[189] *See, e.g.,* Item 9(c) (disclosures regarding risks), Item 16(b) (disclosures of investment strategies and risks), Item 17(f) (disclosures of proxy voting policy), and Item 28(h) (exhibits of other material contracts) of Form N–1A.

[190] *See infra* text following footnote 195 (discussing the reporting of counterparty information); section II.A.2.g (discussing the proposed requirements regarding position-level information). Commenters to the FSOC Notice also suggested that enhanced securities lending disclosures could be beneficial to investors and counterparties. *See, e.g.,* SIFMA/IAA FSOC Notice Comment Letter (''Disclosures related to securities lending practices, if appropriately tailored, could potentially assist investors and counterparties in making informed choices about where they deploy their assets and how they engage in lending practices.''); Comment Letter of the Vanguard Group, Inc. to FSOC Notice (Mar. 25, 2015) (''Vanguard FSOC Notice Comment Letter'') (asserting that securities lending as a whole suffers from a lack of readily available data, and supporting further efforts to gather data and study the practice of securities lending).

[191] *See infra* footnotes 724–725 and accompanying text (discussing new required disclosures in funds' Statement of Additional Information (or, for closed-end funds, funds' reports on Form N–CSR) that will allow investors to better understand the income generated from, as well as the expenses associated with, securities lending

Continued

The new reporting requirements we are adopting are intended, in part, to increase the transparency of information available related to the lending of securities by funds as a subset of the universe of market participants engaged in securities lending activities.[192] Commenters were generally supportive of increased reporting about securities lending activities, although they suggested modifications to certain aspects of the proposal and expressed concerns with some of the specific proposed reporting.[193] These comments, and the modifications we are making in response to comments, are discussed in more detail below.

Borrower Information.[194] One risk that funds engaging in securities lending are exposed to is counterparty risk because borrowers could fail to return the loaned securities. In this event, the lender would keep the collateral. In the U.S., cash collateral is more typical than non-cash collateral and loans are often over-collateralized. The collateral requirements thereby mitigate the extent of a fund's counterparty risk. This risk is further mitigated for the fund if the fund's securities lending agent indemnifies the fund against default by the borrower.

As we explained in the Proposing Release, while we believe there is value to having information on borrowers of fund securities to monitor risk, as well as information with which to evaluate compliance with conditions set forth in staff no-action letters and exemptive orders,[195] we proposed to require that funds report the full name and LEI (if any) of each borrower, as well as the aggregate value of all securities on loan to the particular borrower, rather than at the loan level.[196] We believe that reporting of borrower information at an aggregate portfolio level will provide the Commission, investors, and other potential users with information to better understand the level of potential counterparty risk assumed as part of the fund's securities lending program, with a lower relative burden on funds than requesting such information on a per loan level.

Commenters generally supported our proposal to increase reporting relating to securities lending borrowers, although one commenter questioned the usefulness of borrower information given that securities lending agreements are generally indemnified by securities lending agents.[197] Most commenters also specifically supported our approach of assessing the counterparty risk of securities lending transactions on an aggregate basis for each borrower, as opposed to a loan-by-loan or security-by-security basis.[198]

However, many commenters recommended limiting the collection of securities lending information to the top 5 or 10 securities lending borrowers presenting the greatest exposure.[199] These commenters argued that the top 5 securities lending borrowers generally represent the majority of a fund's securities lending exposure and that further disclosure would impose unnecessary costs on funds and shareholders to the extent it would be capturing borrowers to which the fund does not have material exposure.[200] Likewise, several commenters suggested that borrower information for securities lending transactions should only be reported by funds whose securities lending exposure exceeded a certain minimum threshold.[201]

We continue to believe that funds that engage in securities lending should be required to report information for all of its securities lending borrowers. In response to commenters' observations that many funds are indemnified for their securities lending transactions, we note that not all funds are so indemnified. Separately, we believe that information on borrowers is useful even if there is an indemnification by the agent. For example, such information is helpful in generally monitoring the degree to which funds are involved in securities lending transactions and the identities of borrowers engaged in such transactions. Allowing funds to exclude certain borrower information would limit the applicability and completeness of the information reported on Form N–PORT regarding counterparty risk, both to an individual fund and to the fund industry. We are not persuaded by commenters' arguments that reporting of all borrowers would be unduly burdensome or costly, as we believe funds would need to collect this information both to understand its own counterparty risk and for its own oversight of securities lending. For these reasons, we are requiring funds to report aggregate borrower exposure for all securities lending borrowers, as proposed.

Several commenters also suggested that borrower information for securities lending information should be nonpublic. In particular, these commenters expressed concerns that securities lending counterparties (*i.e.,* borrowers) may wish to avoid having details of their exposures being made public, including to competitors.[202] We are not persuaded by these arguments. First, we note that the new reporting requirements we are adopting today are intended, in part, to increase the transparency of information available related to the lending and borrowing of

activities) and 1224–1225 and accompanying text (discussing new required disclosures of monthly average value of portfolio securities on loan in Form N–CEN).

[192] *See, e.g.,* section 984(b) of the Dodd-Frank Wall Street Reform and Consumer Protection Act, Public Law 111–203, 124 Stat. 1376, 1933 (2010) (directing the Commission to promulgate rules designed to increase the transparency of information available to brokers, dealers, and investors, with respect to the loan or borrowing of securities).

[193] *See, e.g., infra* footnotes 199–201 and accompanying and following text (recommending that the collection of securities lending information should be limited to the top 5 or 10 securities lending borrowers with the greatest exposure) and footnotes 205–208 and accompanying and following text (suggestions regarding how to report non-cash collateral posted by securities lending borrowers).

[194] In the Proposing Release, we referred to ''securities lending counterparties,'' but have made a clarifying change to ''securities lending borrowers'' in the form. As discussed above, when funds are engaged in securities lending transactions, they are securities lenders because they lend their portfolio securities to other financial institutions, such as broker-dealers, who are securities borrowers. The change in terminology is not intended to alter the substance of reporting from what we proposed.

[195] *See generally* Securities Lending Summary, *supra* footnote 184.

[196] Item B.4 of proposed Form N–PORT.

[197] *See, e.g.,* Comment Letter of Independent Directors of the BlackRock Equity-Liquidity Funds (Oct. 2, 2015) (''Blackrock Directors Comment Letter'') (supporting this aspect of our proposal); BlackRock Comment Letter (same); Fidelity Comment Letter (same); Comment Letter of the Risk Management Association (Aug. 11, 2015) (''RMA Comment Letter'') (same); SIFMA Comment Letter I (same); Comment Letter of CFA Institute (Aug. 10, 2015) (''CFA Comment Letter'') (same). *But see* MFS Comment Letter (arguing that disclosure of borrower information may not be relevant in understanding a fund's counterparty exposure, because if the fund has been indemnified then the counterparty exposure rests with the lending agent).

[198] *See, e.g.,* BlackRock Comment Letter; Morningstar Comment Letter.

[199] *See, e.g.,* ICI Comment Letter (limit to the top 5 securities lending borrowers); RMA Comment Letter (top 5 or 10 borrowers); Fidelity Comment Letter (top 5 borrowers; broader securities lending disclosures would not provide a meaningful indicator of risk in securities lending because security loans are fully collateralized and also funds may be indemnified by lending agents); State Street Comment Letter (top 5 or ten borrowers). *But see* Morningstar Comment Letter (applauding the Commission's proposal to require counterparty information for all securities lending borrowers).

[200] *See, e.g.,* Invesco Comment Letter (the top 5 securities lending borrowers generally represent 68% of a fund's securities lending exposure); ICI Comment Letter (additional disclosures beyond the top 5 borrowers would impose unnecessary costs on funds and shareholders).

[201] *See* Wells Fargo Comment Letter (portfolio level reporting of aggregate securities lending activity should only be required for funds with a minimum threshold of 10% of assets on loan); Oppenheimer Comment Letter (funds should report only the top 5 borrowers and not disclose anything if outstanding securities loans do not exceed 1% of net assets).

[202] *See* BlackRock Comment Letter; SIFMA Comment Letter I; RMA Comment Letter.

securities.[203] Making borrower information for the securities lending information reported on Form N–PORT nonpublic would defeat this objective.

Second, based on our experience with securities lending, we are not persuaded by commenters claiming that a fund's activities in securities lending would be harmed because certain securities borrowers do not want to be identified. We note that we are not requiring identification of securities borrowers by loan, but rather on an aggregated basis. We also note that certain funds currently publicly identify securities lending borrowers twice per year in the notes to their annual and semi-annual financial statements, as permitted by GAAP.[204] We are unaware of any evidence that these disclosures have had any effects on borrowers' decisions to borrow from registered investment companies in the manner those commenters suggest, and thus we continue to believe that requiring funds to make such information publicly available is appropriate because these disclosures will improve transparency to investors and other users.

As discussed in greater detail below, we also received various suggestions regarding how to report non-cash collateral posted by securities lending borrowers.[205] One commenter pointed out that funds typically do not account for non-cash collateral as a fund asset because funds generally do not ''control'' the non-cash collateral and thus do not bear any investment risk for it.[206] For this reason, the commenter asserted that it would be inconsistent with accounting and reporting standards for funds to report non-cash collateral received for loaned securities as portfolio investments on Form N–PORT, as we proposed.[207] We agree with the commenter and are modifying Form N–PORT from the proposal to add a new Item requiring funds to report the aggregate principal amount and aggregate value of each type of non-cash collateral received for loaned securities that is not treated as a fund asset.[208]

Several commenters also requested that Form N–PORT collect additional information regarding securities lending activities. One commenter recommended that funds report average monthly aggregate dollar amounts on loan and fee split information, as well as a brief summary of the fund's securities lending program, including risk and strategy.[209] Another commenter suggested that the aggregate value of securities lent should be accompanied by the aggregate value of collateral pledged.[210] One commenter requested that funds report the average daily value of securities lending collateral over the reporting period, rather than a snapshot as of the last day of the reporting period, and asserted that securities lending collateral can be used as a proxy for the percentage of the portfolio that is on loan, which is the true quantity of interest.[211]

We are not adopting such additional reporting requirements on Form N–PORT. As discussed further below, the amendments to the Statement of Additional Information (and, for closed-end funds, Form N–CSR) that we are adopting today will require funds to make certain disclosures in connection with their securities lending activities and cash collateral management, and Form N–CEN also requires information about a fund's securities lending program, including the average monthly value of securities on loan. Although the additional information requested by commenters may be useful to certain investors or other users, we are sensitive to the burdens on funds of additional reporting requirements. Some of the information requested by commenters, such as a brief summary of the fund's securities lending program, including risk and strategy, is already disclosed in fund registration statements.[212] Certain other information requested by commenters, such as the aggregate value of securities lent and the aggregate value of collateral pledged, can be calculated by adding up the structured information reported for each individual securities lending transaction.[213] Furthermore, other information requested by commenters, such as the percentage of the portfolio securities on loan over the reporting period, can be derived from information that will be reported in a structured format as part of this rulemaking.[214] Although we understand that requiring funds to report additional information may be useful to certain users of such information, Form N–PORT is primarily designed to meet the data needs of the Commission and its staff. As such, the securities lending information we are requiring to be reported on Form N–PORT is designed to balance what we anticipate would be useful for our regulatory oversight purposes, namely obtaining more information specifically regarding counterparties, amounts on loan, and how collateral is reinvested, against the expected burdens of reporting such information. Accordingly, we decline to modify Form N–PORT to require the additional securities lending disclosures requested by commenters.

We also received several comments requesting that we revise Form N–PORT to phase in reporting of securities lending borrowers' LEIs. Commenters urged that this requirement be delayed until LEIs have been fully integrated into the global financial system and lending agents and funds have implemented the necessary systems enhancements to facilitate LEI reporting.[215] Commenters also expressed concerns that reporting LEI information for securities lending counterparties (*i.e.,* borrowers) may cause borrowers to become less likely to borrow from registered funds and more likely to borrow from lenders who are not required to make similar disclosures, in order to avoid having details of the borrowers' exposures being made public.[216]

For the same reasons discussed above regarding commenters' suggestions not to require disclosure of securities borrowers, we are not persuaded by such arguments. While the Commission is the primary user of the form, the new reporting requirements we are adopting today are intended, in part, to increase the transparency of information available related to the lending and borrowing of securities.[217] In particular, the uniform public reporting of borrowers' LEIs will facilitate the identification of such borrowers, which is part of the purpose of such reporting. As discussed above, providing exemptions or deferring implementation

of this requirement would hinder the ability of Commission staff as well as investors and other potential users of this information to use the data on Form N–PORT as discussed above.[218] Furthermore, as indicated above, Form N–PORT instructs funds to report LEIs ''if any'' for borrowers, and thus already acknowledges and makes accommodations for the fact that LEI identifiers may not be available in some contexts as LEIs are continuing to be integrated into the global financial system.

e. Return Information

As proposed, we are requiring funds to provide monthly total returns for each of the preceding three months.[219] If the fund is a multiple class fund, it will report returns for each class.[220] Funds with multiple classes will also report their class identification numbers.[221] Funds will calculate returns using the same standardized formulas required for calculation of returns as reported in the performance table contained in the risk-return summary of the fund's prospectus and in fund sales materials.[222]

We are requiring this information on Form N–PORT because we believe it will be useful to have such information in a structured format to facilitate comparisons across funds. For example, analysis of return information over time among similar funds could reveal outliers that might merit further inquiry by Commission staff, and this type of analysis can be done much more efficiently and timely when the information is reported in a structured format. Additionally, performance that appears to be inconsistent with a fund's investment strategy or other benchmarks can form a basis for further inquiry and monitoring.[223] Although mutual funds currently report certain return information in a structured format periodically as part of their risk/return summaries, we believe that having return information reported on a monthly basis by all registered funds will allow the Commission staff to more easily and effectively monitor the fund industry as a whole, as described above.[224]

Because only quarter-end reports on Form N–PORT will be made public, we are requiring, as proposed, that funds provide return information for each of the preceding three months.[225] This rolling three month requirement will provide investors and other potential users with monthly return information, so that they will have access to each month's return on a quarterly basis. Otherwise, we are concerned that investors might potentially confuse the month's disclosed return as representing the return for the full quarter.

Commenters had mixed reactions regarding the reporting of monthly total returns. Several commenters expressed concern that reporting three months of returns could cause investors to unduly focus on short-term results and recommended that returns for longer periods of time be reported instead.[226] One commenter recommended that funds should report only a single month of returns in order to lower compliance costs and because investors are likely to use other sources (such as fund or third-party Web sites) to find return information rather than Form N–PORT.[227] Another commenter agreed with our proposed approach of requiring funds to report total returns as opposed to gross returns, noted that monthly fund performance data is already generally publicly available, and concluded that the quarterly public release of monthly performance data reported on Form N–PORT would result in the release of information that had already been made available to the public.[228]

We are adopting this requirement as proposed. As acknowledged by commenters, many funds and market data providers already generally disclose monthly performance data to investors, and daily performance data is often available as well.[229] The greater granularity provided by monthly data will enhance the ability of Commission staff to use return information to reveal outliers and detect performance that appears to be inconsistent with a fund's investment strategy or other benchmarks, as discussed above. More generally, frequent disclosure of performance data over shorter time periods can better capture variations in performance that would not be apparent with returns reported over longer time periods.

Accordingly, we are not persuaded by commenters' recommendations to require funds to report return information on Form N–PORT over longer time horizons, as opposed to on a monthly basis. We are similarly not persuaded by arguments that reporting fund performance data for three months will ''[provide no] direct or indirect value to [fund] investors'' as opposed to reporting one month of fund performance information.[230] As discussed above, although Form N–PORT is primarily designed to assist the Commission and its staff, we believe that investors and other potential users may benefit from the information reported on Form N–PORT as well, either by analyzing Form N–PORT directly or through analyses prepared by third-party service providers. Because Form N–PORT will be available on a quarterly basis but will provide month-end return information, we remain

[218] *See supra* footnote 68 and accompanying and following text.

[230] *See* Confluence Comment Letter.

concerned that investors might potentially confuse one month's returns as representing the fund's returns for the full quarter. For each of these reasons, we are requiring funds to report monthly return information for each of the preceding three months, as proposed.

We are also requiring, substantially as proposed, that funds report, for each of the preceding three months, monthly net realized gain (or loss) and net change in unrealized appreciation (or depreciation) attributable to derivatives for certain categories. We proposed that this information would be reported by asset category (*i.e.,* commodity contracts, credit contracts, equity contracts, etc.). We are modifying the proposal to require funds to report this information by both asset category and also by type of derivative instrument (*i.e.,* forward, future, option, swap, etc.).[231] This information will help the Commission staff, investors, and other potential users better understand how a fund is using derivatives in accomplishing its investment strategy and the impact of derivatives on the fund's returns. In order to provide a point of comparison, and as proposed, we are also requiring that funds report, for each of the last three months, monthly net realized gain (or loss) and net change in unrealized appreciation (or depreciation) for investments other than derivatives.[232]

Comments on this aspect of the proposal were mixed. Some commenters opposed the reporting requirement, stating that it would not provide a valuable reference point from which to assess whether the derivatives included in a fund's portfolio have contributed to returns, especially when derivatives are used for hedging purposes.[233] One commenter expressed general support for the derivatives reporting requirements in N–PORT, including this proposed requirement, stating that this information would, among other things, allow the Commission to better assess trends, given the potential risks associated with certain uses of derivatives.[234]

Several commenters, in response to a request for comment, recommended that the Commission require funds to report the monthly net realized gain (or loss) and net change in unrealized appreciation (or depreciation) attributable to derivatives by type of derivative instrument (*i.e.,* forward, future, option, swap, etc.), rather than by asset category (*i.e.,* commodity contracts, credit contracts, equity contracts, etc.). This is because funds typically report derivatives in their financial statements by type of derivative instrument rather than asset category. As a result, according to commenters, systems are currently aligned to capture and report this information by instrument type, whereas reporting information by asset category would require large changes to the existing accounting systems, which these commenters believed would involve costs that would not be justified by the resulting benefits.[235] Finally, some commenters believed that gains (or losses) and appreciation (or depreciation) attributable to derivatives should not be made public because such information would not be meaningful to investors and could potentially convey proprietary information about the fund's trading strategies that could be used for predatory trading or to reverse engineer the fund's investment strategy.[236]

We disagree with commenters questioning the utility of reporting gains (or losses) and appreciation (or depreciation) attributable to derivatives. We continue to believe that this information will help Commission staff, investors, and other potential users better understand how a fund is using derivatives in accomplishing its investment strategy and the impact of derivatives on the fund's returns. We recognize that providing this information by asset category is not how funds currently maintain this data in their systems and therefore will involve more systems changes and costs relative to providing this information by type of derivative instrument alone; however, we disagree that such information does not have a benefit that justifies this burden. Providing this information by asset category will be helpful in understanding the relationship between derivatives—and, as discussed further below, the types of derivative instruments—that provide exposure to a particular asset category and direct investments in the same asset category. For example, information attributable to equity derivatives contracts could be compared to returns attributable to direct investments in equities. Further, reporting returns by derivative instrument alone would not provide any information about the market risk factors that had caused the gain or loss.

Although we recognize that there will be some initial burden in modifying systems to provide information by asset category, we note that funds are currently already required to compile this information by asset category twice a year, pursuant to FASB Topic ASC 815.[237] While we understand from the comments that many funds currently compile this manually, we believe, based on staff experience, that such processes could be automated over time to facilitate the more frequent reporting. In particular, we note that Form N–PORT, as proposed and adopted, will separately require funds to categorize each derivative investment by asset category, which should reduce the incremental burden of providing return information by asset category.[238]

Additionally, after consideration of the comments, we are modifying this item from the proposal to require funds to report this information by type of derivative instrument within each asset category. We believe that providing both elements—asset category and derivative instrument type—will make this information more informative than by reporting by either asset category or instrument type in isolation. For example, consider a fund that uses derivatives in two asset categories (*e.g.,* equities and commodities) and two types of derivative instruments (*e.g.,* futures and options). If the asset category or instrument type were reported alone, users of the information would be unable to discern if the fund is deriving its returns by using equity options and commodity futures or equity futures and commodity options—or in what proportion. Reporting both pieces of information together allows the Commission, investors, and other users to determine from which category-type combination the fund is drawing (or hedging) its exposure. Further, knowing the instrument type in combination with asset category can be important for understanding the risks associated with obtaining exposure to a particular asset category because different derivative instruments can have different risks associated with them, such as different counterparty risk, or a linear risk profile (*e.g.* futures) versus a non-linear risk profile (*e.g.,* options). Additionally, having such information by instrument and asset category will be useful in understanding situations ranging from a market

[237] *See* ASC 815 (Derivatives and Hedging).

[238] *See* Item C.4.a of Form N–PORT (requiring reporting of asset category of each investment among enumerated categories, including derivative-commodity, derivative-credit, derivative-equity, derivative-foreign exchange, derivative-interest rate, derivatives-other).

disruption for a particular type of derivative instrument (*e.g.,* a market disruption affecting a futures market) to a price shock impacting a particular asset category (*e.g.,* commodities). Consequently, we believe that requiring such information by both derivative instrument type and asset category will provide more complete information relative to providing either type in isolation to Commission staff, investors, and other potential users seeking to better understand how a fund is using derivatives in accomplishing its investment strategy and the impact of derivatives on the fund's returns.

Moreover, based on staff review of fund financial statements, we have observed that in compliance with the requirements of FASB Topic ASC 815, upon which this reporting requirement was based, funds generally show gains (losses) and appreciation (depreciation) in tabular format by both asset category and type of derivative instrument. Because, as noted by commenters, many funds already have systems in place to classify derivatives by instrument type, we believe that requiring such information to be reported on Form N–PORT along with asset category will not add a significant incremental burden relative to providing, as proposed, such information by asset category alone.[239]

Regarding comments concerning public disclosure of the information, we disagree with the commenter that argued such disclosures could reveal information that could be used for reverse engineering or predatory trading.[240] We are not aware of this information being used for such purposes, nor did the commenter explain how the disclosure of such information could reveal information about the fund's trading strategies that would allow traders to ''front-run'' or ''copycat'' the fund. Separately, we note that the information will be delayed in terms of public disclosure and that the return information will be aggregated, which should mitigate the possibility that such information could be used by predatory traders to the detriment of the fund.

Likewise, we disagree with the commenter that asserted such information would not be meaningful to investors.[241] The Commission believes, and one commenter agreed, that this information will be useful for identifying funds in which a significant amount of gains and losses came from exposures to derivative contracts, and will allow Commission staff, investors, and other potential users to better understand the relationship between the type of derivative instrument and asset category in terms of the impact on the fund's returns. Furthermore, we are not persuaded by commenters' arguments that such information would be misleading to investors if made publicly available. As discussed above, funds will also be reporting similar information attributable to investments other than derivatives, which we believe could help investors compare returns attributable to derivatives with returns attributable to a fund's other investments. Furthermore, although gains (or losses) and appreciation (or depreciation) from derivatives may have different implications depending on whether derivatives are being used for investment purposes or as a hedge for other positions in the portfolio, disclosure of such information should help improve the ability of investors to understand and assess the use of derivatives in funds' investment strategies.

f. Flow Information

As proposed, Form N–PORT will require funds to separately report, for each of the preceding three months, the total net asset value of: (1) Shares sold (including exchanges but excluding reinvestment of dividends and distributions); (2) shares sold in connection with reinvestments of dividends and distributions; and (3) shares redeemed or repurchased (including exchanges).[242] This information is similar to what is currently reported on Form N–SAR, and is generally to be reported subject to the same instructions that currently govern reporting of flow information on that form.[243] We are requiring this information on Form N–PORT because we believe that this information will be more helpful if reported on a monthly basis rather than retrospectively on an annual basis on Form N–CEN.

We believe that having flow information reported to us monthly will help us better monitor trends in the fund industry. For example, it could help us analyze types of funds that are becoming more popular among investors and areas of high growth in the industry. It could help us better examine investor behavior in response to market events. Finally, in combination with other information that will be reported on Form N–PORT regarding liquidity of fund positions pursuant to changes to Form N–PORT set forth in the Liquidity Adopting Release, which we are adopting today, flow information could also help us identify funds that might be at risk of experiencing liquidity stress due to increased redemptions.[244]

Commenters generally supported our proposed reporting requirements for monthly flow information.[245] However, many commenters noted that funds are generally unable to look through omnibus accounts to the underlying investors, and thus requested confirmation that flow information be reported on a net basis for shares of the fund held in omnibus accounts.[246] We agree with these commenters, and in response to these comments, Form N–PORT now includes a clarifying instruction to this effect.[247]

One commenter asked the Commission to mandate that transfer agents, distributors, or some other entity (*e.g.,* a central data repository) track omnibus flow information by type of underlying investor (*i.e.,* 401(k) plans/individual retirement accounts, pension funds, insurance companies, other institutional investors, and retail investors).[248] The commenter suggested that this information be provided to fund managers, who would then report

[239] *See* SIFMA Comment Letter I; ICI Comment Letter.

[240] *See* SIFMA Comment Letter I.

[241] *Id.*

[242] *See* Item B.6 of Form N–PORT.

[243] Similar to Form N–SAR, Form N–PORT will instruct funds to report amounts after any front-end sales loads had been deducted and before any deferred or contingent deferred sales loads or charges had been deducted. Shares sold will include shares sold by the fund to a registered UIT. Funds will also include as shares sold any transaction in which the fund acquired the assets of another investment company or of a personal holding company in exchange for its own shares. Funds will include as shares redeemed any transaction in which the fund liquidated all or part of its assets. Exchanges will be defined as the redemption or repurchase of shares of one fund or series and the investment of all or part of the proceeds in shares of another fund or series in the same family of investment companies. Form N–PORT will also include a new clarifying instruction, providing that if shares of the fund are held in omnibus accounts, funds will use net sales or redemptions/repurchases from such omnibus accounts for purposes of calculating the fund's sales, redemptions, and repurchases. *Cf.* Item B.6 of Form N–PORT and Item 28 of Form N–SAR (requiring reporting of monthly sales and repurchases of the Registrant's/Series' shares for the past six months).

[244] *See* Liquidity Adopting Release, *supra* footnote 9.

[245] *See* ICI Comment Letter; SIFMA Comment Letter I; Wells Fargo Comment Letter; BlackRock Comment Letter.

[246] *See* State Street Comment Letter; MFS Comment Letter; Wells Fargo Comment Letter; SIFMA Comment Letter I; ICI Comment Letter; Morningstar Comment Letter. *But see* BlackRock Comment Letter (recommending that the Commission mandate that transfer agents, distributors, or some other entity aggregate information by investor types redeeming from and subscribing to funds so that funds could look through omnibus accounts and report more detailed flow information).

[247] *See supra* footnote 243.

[248] *See* BlackRock Comment Letter.

this information on Form N–PORT. The commenter concluded that this information would help funds and others to create predictive models to better understand potential future redemptions, which in turn would help funds with liquidity risk management.

We acknowledge the merits of helping funds better manage potential redemption risks, and further note that better transparency into intermediary omnibus accounts by each type of underlying investor would help the Commission better understand subscription and redemption activity and how it varies across distribution platforms and market environments. However, the commenter's suggestion is beyond the scope of this rulemaking, although we note that the Commission is currently seeking a range of input with respect to omnibus intermediary account relationships, including through the recently issued advance notice of proposed rulemaking and concept release with respect to transfer agent regulations, which seeks comment in various areas including the processing of book entry securities, broker-dealer recordkeeping for beneficial owners, and the role of transfer agents to mutual funds.[249]

Another commenter recommended that monthly flow information be reported for only the last month of the reporting period, rather than for the three prior months, on the grounds that reporting this information for the three prior months would have ''no direct value to investors.'' [250] We are not persuaded by this suggestion. As discussed above, although Form N–PORT is primarily designed to assist the Commission and its staff, we believe that investors and other potential users may benefit from the information reported on Form N–PORT as well, either by analyzing Form N–PORT directly or through analyses prepared by third-party service providers. Unlike other information reported on Form N–PORT, which generally represents a snapshot ''as of'' a certain date, flows are calculated over a period of time. Because information reported on Form N–PORT will be publicly available on a quarterly basis but will provide monthly flow information, we are concerned that investors might potentially believe that one month's flows represent the fund's flows for the full quarter. For that reason, we are requiring funds to report monthly flow information for each of the preceding three months, as proposed.

g. Schedule of Portfolio Investments

Part C of Form N–PORT will require, as proposed, funds to report certain information on an investment-by-investment basis about each investment held by the fund and its consolidated subsidiaries as of the close of the preceding month. As proposed, funds will respond to certain questions that will apply to all investments (*i.e.,* the investment's identification, amount, payoff profile, asset and issuer type, country of investment or issuer, fair value level, and whether the investment was a restricted security). As proposed, funds will also respond, as applicable, to additional questions related to specific types of investments (*i.e.,* debt securities, repurchase and reverse repurchase agreements, derivatives, and securities lending).

Also, as proposed, funds will have the option of identifying any investments that are ''miscellaneous securities.'' [251] Unless otherwise indicated, funds will not report information related to those investments in Part C, but will instead report such information in Part D.[252]

i. Information for All Investments

Form N–PORT will require, as proposed, funds to report certain basic information about each investment held by the fund and its consolidated subsidiaries. In particular, funds will report the name of the issuer and title of issue or description of the investment, as they are currently required to do on their reported schedules of investments.[253] To facilitate analysis of fund portfolios, it is important for Commission staff to be able to identify individual portfolio securities, as well as the reference instruments of derivative investments through the use of an identifying code or number, which is not currently required to be reported on the schedule of investments. Fund shareholders and potential investors that are analyzing fund portfolios or investments across funds could similarly benefit from the clear identification of a fund's portfolio securities across funds. The staff has found that some securities reported by funds lack a securities identifier, and this absence has reduced the usefulness of other information reported.

To address this issue, and as proposed, we are requiring that funds report additional information about the issuer and the security. Funds will report certain securities identifiers, if available.[254] For example, for security-based swaps, funds may report the product ID if a product ID for that contract is used by one or more security-based swap data repositories.[255] Identifiers for other types of derivatives may also be used, if available.[256] If a unique identifier is reported, funds will also indicate the type of identifier used.[257] Such an identifier might be assigned by a security-based swap data repository or be internally generated by the fund or provided by a third party, but should be consistently used across the fund's filings for reporting that investment so that the Commission, investors, and other potential users of the information can track the investment from report to report.

We received comments regarding the use of unique identifiers generally, and LEI in particular. As discussed above, many commenters expressed support for the use of LEI for identification of funds, registrants, and counterparties.[258] However, one commenter asserted that a portfolio-based approach, including data on counterparties to whom funds have greatest exposures, would enable adequate monitoring of potential threats better than obtaining counterparty LEI and specific information for each bilateral transaction.[259] Other commenters expressed concerns regarding the ability of funds to verify the accuracy of LEIs provided by third-parties.[260] Another commenter suggested that each security held by a fund should be identified by ticker and CUSIP, or ISIN and SEDOL for foreign securities, together with the primary exchange where the security is traded at the date of the filing.[261] Another commenter urged the Commission not to mandate the use of certain unique identifiers for public and nonpublic funds, such as the Financial

[261] *See* Russ Wermers Comment Letter.

Instrumental Global Identifier (''FIGI'').[262]

As discussed above, we are adopting a portfolio-based approach in the securities lending context, including data on counterparties to whom funds have greatest exposures. However, we believe that the uniform reporting of LEIs by fund series and registrants, as well as securities issuers and fund counterparties, will further enhance our monitoring and analytical capabilities by providing a consistent means of identification that will facilitate the linkage of data reported on Form N–PORT with data from other filings and sources that is or will be reported elsewhere. We acknowledge that LEIs have not yet been fully integrated into the global financial system, and accordingly the form contains a qualifier that an LEI be reported, ''if any.'' We believe, however, that LEIs will become more widely used by regulators and the financial industry and note that our rulemaking will not require funds to report LEIs, if any, until 18 months following the effective date.

However, we understand that funds will in some instances be relying upon service providers and other third-parties who will be providing funds with LEI information to be reported to the Commission and publicly disclosed to investors and other possible users, and we understand that funds may find it difficult to verify such information other than to confirm that it has been generated and reported consistently with the methodologies of the fund's service providers. As discussed above, the fund may generally use its own methodology or the methodology of its service provider, so long as the methodology is consistently applied and is consistent with the way the fund reports internally and to current and prospective investors.[263] We do not believe, as some commenters suggested, that it is necessary to require specific alternative unique identifiers for securities or entities at this time, other than those identified in Form N–PORT, because we believe that allowing funds to select another identifier in the absence of an ISIN, CUSIP, or ticker gives funds appropriate flexibility in identifying such investments.

We are also requiring, as proposed, funds to report the amount of each investment as of the end of the reporting period, as is currently required under Regulation S–X.[264] Funds will report the number of units or principal amount for each investment, as well as the value of each investment at the close of the period, and the percentage value of each investment when compared to the net assets of the fund.[265] Funds will also report the currency in which the investment was denominated, and, if not denominated in U.S. dollars, the exchange rate used to calculate value.[266] We received no comments on this aspect of our proposal.

Also as proposed, we are requiring funds to report the payoff profile of the investment, indicating whether the investment is held long, short, or N/A, which will serve the same purpose as the current requirement in Regulation S–X to disclose investments sold short.[267] Funds will respond N/A for derivatives and will respond to relevant questions that indicate the payoff profile of each derivative in the derivatives portion of the form. These disclosures will identify short positions in investments held by funds. We received no comments on these disclosure requirements.

As proposed, funds will also report the asset type for the investment: short-term investment vehicle (*e.g.,* money market fund, liquidity pool, or other cash management vehicle), repurchase agreement, equity-common, equity-preferred, debt, derivative-commodity, derivative-credit, derivative-equity, derivative-foreign exchange, derivative-interest rate, structured note, loan, ABS-mortgage backed security, ABS-asset backed commercial paper, ABS-collateralized bond/debt obligation, ABS-other, commodity, real estate, other) and issuer type (corporate, U.S. Treasury, U.S. government agency, U.S. government sponsored entity, municipal, non-U.S. sovereign, private fund, registered fund, other).[268] We are also adopting a modification from the proposal to add a ''derivatives-other'' category to encompass derivatives that do not fall into the other categories of derivatives enumerated in this Item, so as to allow Commission staff, investors, and other users of the information reported on Form N–PORT to more easily aggregate the fund's derivative investments. We have based these categories in part on staff review of how funds currently categorize investments on their schedule of investments, and in part on the categories of investments required to be reported by private funds on Form PF.[269] These disclosures will allow the Commission, investors, and other potential users to assess the composition of fund portfolios in terms of asset and issuer types and also facilitate comparisons among similar types of investments.

One commenter recommended the use of a well-defined taxonomy for asset and issuer type, such as ISO 10962, or some truncation of the six-character ISO Classification of Financial Instruments code.[270] Although we acknowledge there could be benefits for data aggregation and analysis to using an existing standardized taxonomy for users of the form, Form N–PORT is primarily designed to meet the data needs of the Commission and its staff. We have drafted the asset categories in Form N–PORT specifically to address the Commission staff's data needs, whereas many of the existing taxonomies include extraneous information in some areas or insufficient information in other areas. For these reasons, we are adopting the asset categories on Form N–PORT largely as proposed.

Funds will also report, as proposed, for each investment, whether the investment is a restricted security.[271]

This disclosure will provide investors and the Commission staff with more information about liquidity risks associated with the fund's investments.

Also as proposed, each fund will report whether the investment is categorized by the fund as a Level 1, Level 2, or Level 3 fair value measurement in the fair value hierarchy under GAAP.[272] Commission staff could use this information to identify and monitor investments that may be more susceptible to increased valuation risk and identify potential outliers that warrant additional monitoring or inquiry.[273] In addition, Commission staff will be better able to identify anomalies in reported data by aggregating all fund investments industry-wide into the various level categories. These disclosures will also provide investors and the Commission staff with more information about which of the fund's investments are more actively traded, and which investments are less actively traded and thus potentially less liquid. Currently, funds are required to categorize the fair value measurement of each investment in the fair value hierarchy in their financial statements.[274] We believe that based on this requirement, funds should have pricing information available to determine the categorization of their portfolio investments as Level 1, Level 2, or Level 3 within the fair value hierarchy.

Several commenters supported this aspect of our proposal, noting it would enhance portfolio transparency and allow investors, plans, and fund fiduciaries to more accurately evaluate liquidity and valuation risks in funds.[275] Another commenter asserted that our proposal to report the fair value level measurement for each individual investment held by the fund would represent no incremental burden relative to the current burden of reporting the total value of each fair value level category, because reporting systems should already contain the necessary information at the individual security level.[276]

However, one commenter cautioned that different fund families currently employ different accounting practices when classifying similar investments into fair value level hierarchies, and warned that the Commission staff should reconsider expectations that disclosure of these fair value levels would create comparability among different funds with regards to fair value level hierarchy classifications.[277] Another commenter echoed the sentiment that fair value level determinations reported by funds would likely differ from one fund group to another, and concluded that these determinations should be disclosed in aggregate by fair value level hierarchy classification as opposed to on an individual security basis.[278]

Several commenters also recommended that additional related information be reported, such as the uncertainty of valuation for thinly-traded securities and identification of the primary pricing sources used in determining the fair value level hierarchy of the investments.[279] Lastly, one commenter noted that certain funds of funds' investments may not have fair value level hierarchies assigned to them pursuant to FASB Accounting Standards Update 2015–07, and requested that Form N–PORT be revised to allow funds to report ''null'' to account for such investments.[280]

In response to the last comment, we are revising Form N–PORT to allow funds to report ''N/A'' to this item if an investment does not have a fair value level hierarchy assigned to it pursuant to FASB Accounting Standards Update 2015–07. This revision will allow funds to report fair value hierarchy information consistently across Form N–PORT and their shareholder reports.[281]

More generally, we acknowledge that there may be differences among fair value level hierarchy classifications between funds, even for the same investments, but believe that reporting of this information could still help Commission staff, investors, and other potential users to identify and monitor investments that may be more susceptible to increased valuation risk and identify potential outliers that warrant additional monitoring or inquiry.

We decline to add the additional information suggested by commenters related to valuation, such as more information regarding thinly-traded securities or position-level information on price sources. We believe that, unlike fair value hierarchy information, which funds already need to track for reporting purposes, this information is not currently reported by funds in any form and could be burdensome to begin reporting relative to the additional value it may provide. Accordingly, we decline to revise Form N–PORT to require funds to report this additional information.

As proposed, Form N–PORT would have required funds to report the country that corresponds to the country of investment or issuer based on the concentrations of the investment's risk and economic exposure, and, if different, the country in which the issuer is organized. As adopted, Form N–PORT will switch the sequence of those disclosures, thus requiring funds to report the country in which the issuer is organized and, if different, the country that corresponds to the country of investment or issuer based on the concentrations of the investment's risk and economic exposure.[282] These disclosures will provide the Commission staff with more information about country-specific exposures associated with the fund's investments. Specifically, the Commission believes that providing both the country based

identify securities that are restricted. *Cf.* footnote 290 and accompanying and following text.

[272] *See* ASC 820. An investment is categorized in the same level of the fair value hierarchy as the lowest level input that is significant to its fair value measurement. Level 1 inputs include quoted prices (unadjusted) for identical investments in an active market (*e.g.,* active exchange-traded equity securities). Level 2 inputs include other observable inputs, such as: (i) Quoted prices for similar securities in active markets; (ii) quoted prices for identical or similar securities in non-active markets; and (iii) pricing models whose inputs are observable or derived principally from or corroborated by observable market data through correlation or other means for substantially the full term of the security. Level 3 inputs are unobservable inputs. We are amending Regulation S–X to require that funds identify those investments whose value was determined using significant unobservable inputs. *See infra* section II.C.3.

[273] For a discussion of some of the challenges regulators may face with respect to Level 3 accounting, *see, e.g.,* Konstantin Milbradt, *Level 3 Assets: Booking Profits and Concealing Losses,* 25 Rev. Fin. Stud. 55–95 (2011).

[274] ASC 820–10–50–2 (Fair Value Measurement-Disclosure-General) requires for each class of assets and liabilities measured at fair value, the level of the fair value hierarchy within which the fair value measurements are categorized in their entirety (Level 1, 2, or 3).

[278] *See* Wells Fargo Comment Letter.

[279] *See* Comment Letter of Markit (Aug. 11, 2015) (''Markit Comment Letter'') (for thinly-traded securities or investments in assets with thinly-traded underlying assets, consider a disclosure indicating the uncertainty of valuation); Harvest Comment Letter (information about primary pricing sources should be made available, and third-party pricing services used should be disclosed on an individual security basis).

[280] *See* State Street Comment Letter.

[281] *See* Item C.8 of Form N–PORT.

[282] *See* Item C.5 of Form N–PORT. Also, as discussed further below, we are making the country of risk and economic exposure a nonpublic field in all Form N–PORT filings. Under the proposal, this would have meant that funds would be publicly reporting nothing if the country of risk and economic exposure were the same as the country in which the issuer is organized, because in that situation funds would only be reporting the country of risk and economic exposure, which will be nonpublic in Form N–PORT. Accordingly, we are requiring funds to report the country in which the issuer is organized as the default, and, only if different, to also report the country of risk and economic exposure.

on concentrations of risk and economic exposure and also the country in which the issuer is organized will assist the Commission in understanding the country-specific risks associated with such investments. For example, knowing the country of risk and economic exposure, including the country in which an issuer is organized, is important for understanding the effect of such investments in a portfolio when that country might be going through times of economic stress (*e.g.,* monetary controls or sanctions) or political unrest or other emergency circumstances.

We received mixed comments on this aspect of our proposal. Commenters generally supported the requirement to report the country in which the issuer is organized.[283] Commenters generally viewed the determination of country of risk as inherently subjective, but differed in terms of whether the Commission should provide a particular standard for determining the country of risk or whether the Commission should permit funds to report differing information for the same securities as a result of the existing diversity of approaches currently used by funds and service providers.[284] Commenters also disagreed regarding whether this information should be publicly reported or even reported at all.[285]

Partly in response to these concerns, and as discussed above, we are revising Form N–PORT to include instructions clarifying that in reporting information on Form N–PORT, funds may generally use their own internal methodologies and the conventions of their service providers, provided that the information they report is consistent with information that they report elsewhere (*e.g.,* the fund's schedule of portfolio holdings as prepared pursuant to Regulation S–X).[286] For example, we understand that for issuers with operations in multiple countries, some funds commonly use the issuer's country of domicile for purposes of internal recordkeeping and analysis and may choose to do the same for reporting country of risk on Form N–PORT, whereas funds that utilize other methodologies may prefer to rely upon their own chosen methodologies instead. Additionally, as discussed further below in section II.A.4, we are making the country of risk and economic exposure a nonpublic field in all Form N–PORT filings.[287]

More generally, several commenters sought confirmation that funds would not be required to look through any entities in its portfolio holdings except as specifically instructed in Form N–PORT.[288] As discussed above, Form N–PORT requires funds to disclose information about ''each investment held by the Fund and its consolidated subsidiaries.'' [289] Thus, Form N–PORT requires funds to report information about each underlying investment in a CFC, because CFCs are consolidated subsidiaries in funds' financial statements for reporting purposes.

The proposed form also would have required funds to identify each investment that is ''illiquid.'' [290] We note that the Liquidity Adopting Release, which we are adopting today, addresses liquidity risk management programs for open-end funds, which, among other things, requires information about the liquidity of fund investments to be reported on Form N–PORT.[291]

ii. Debt Securities

In addition to the information required above, as proposed, Form N–PORT would require additional information about each debt security held by the fund in order to gain transparency into the payment flows and potential convertibility into equity of such investments, as such information can be used to better understand the payoff profile and credit risk of these investments. First, funds would report the maturity date and coupon (reporting the annualized interest rate and indicating whether fixed, floating, variable, or none).[292]

While commenters were generally supportive of this requirement, they requested that we provide clear standards for reporting or more granular classifications.[293] For example, commenters noted that a more granular classification scheme for debt instruments is useful for investors in understanding the nature of the obligation supporting the instrument, such as issuers, security type, guarantors, and the investment's structure.[294] However, while more granular classifications could be useful to investors, we do not believe that the additional information would be justified in light of the burdens imposed because we believe that the classification being adopted provides sufficient detail to allow the staff, investors, and other potential users, to understand the nature of the fund investments. As a result, we are adopting this requirement as proposed.[295] Another commenter recommended that we consider a minimum reporting threshold of 10% of

[283] *See, e.g.,* SIFMA Comment Letter I; Dreyfus Comment Letter; Morningstar Comment Letter.

[284] *See, e.g.,* Wells Fargo Comment Letter (the Commission should include guidance and instructions for determining the country with the greatest concentration of risks and economic exposure in order to achieve consistent reporting across funds); Interactive Data Comment Letter (the Commission should support the prevailing diversity of approaches towards identifying country of risk as a necessary consequence of such reporting); SIFMA Comment Letter I (the Commission should either limit the disclosure requirement to country of issuer organization or else clarify that funds may use classifications generated by existing methodologies or available service providers); ICI Comment Letter (it is important for funds to have the flexibility to make these determinations using their own good faith judgment).

[285] *See, e.g.,* Interactive Data Comment Letter (supporting the disclosure of country of risk); Schwab Comment Letter (public disclosure may lead to investor confusion); Fidelity Comment Letter (the Commission should require non-public disclosure of this information until it is standardized); Morningstar Comment Letter (opposing the reporting of country of risk to the extent this information is proprietary and subjective, but supporting country of issuance on the grounds that it is more objective).

[286] *See* General Instruction G of Form N–PORT (''Funds may respond to this Form using their own internal methodologies and the conventions of their service providers, provided the information is consistent with information that they report internally and to current and prospective investors. However, the methodologies and conventions must be consistently applied and the Fund's responses must be consistent with any instructions or other guidance relating to this Form.''). *See also supra* footnote 77 and accompanying and following text.

[287] *See infra* footnote 515 and accompanying and following text.

[288] *See* Invesco Comment Letter; Schwab Comment Letter; CRMC Comment Letter; SIFMA Comment Letter I.

[289] *See* Part C of Form N–PORT (''For each investment held by the Fund and its consolidated subsidiaries, disclose the information requested in Part C.'').

[290] As proposed, Form N–PORT would have defined ''illiquid asset'' as ''an asset that cannot be sold or disposed of by the Fund in the ordinary course of business within seven calendar days, at approximately the value ascribed to it by the Fund.'' This definition is the same definition used in the liquidity guidance issued by the Commission for open-end funds. *See* Revisions of Guidelines to Form N–1A, Investment Company Act Release No. 18612 (Mar. 12, 1992) [57 FR 9829 (Mar. 20, 1992)] (''1992 Release'').

[291] *See* Liquidity Adopting Release, *supra* footnote 9.

[292] *See* Item C.9.a and Item C.9.b of proposed Form N–PORT.

[293] *See* SIFMA Comment Letter I (supporting all required information with the exception of the disclosures relating to securities in defaults and arrears); Wells Fargo Comment Letter; Interactive Data Comment Letter (''In general, we believe that a more granular classification scheme for debt instruments is useful for investors in understanding the nature of the obligation supporting the instrument''); State Street Comment Letter; Morningstar Comment Letter.

[294] *See* Interactive Data Comment Letter (additional disclosures should include classification of debt securities (*e.g.,* corporate bonds, municipal securities), bond insurance, conduit municipal filings, letters of credit, and identification of debt ranking); State Street Comment Letter (additional disclosures should include issuer, security type, security structure, guarantor, country, sector, and rating).

[295] *See* Item C.9.a and Item C.9.b of Form N–PORT.

exposure to each security type for additional security-specific reporting for debt securities, convertible securities, repurchase and reverse repurchase agreements, and derivatives.[296] However, as we discuss below in section II.A.2.g.iv, we believe that it is important that the Commission and investors have transparency in a fund's investments and do not believe that a reporting threshold for such instruments is appropriate, as it would not allow the Commission and investors to fully understand a fund's risks. Moreover, security-level reporting of a fund's underlying investments in such securities are currently reported in a fund's financial statements.[297]

As proposed, funds would also indicate whether the security is currently in default, whether interest payments for the security are in arrears or whether any coupon payments have been legally deferred by the issuer, as well as whether any portion of the interest is paid in kind.[298] Several commenters raised concerns regarding these disclosures. For example, one commenter argued that the public disclosure on default, arrears, or deferred coupon payments raises competitive concerns when a debt security is issued by a borrower that is a private company, as private borrowers may avoid registered funds in order to limit public disclosure if the company becomes distressed.[299] The commenter noted that public disclosure that a borrower is or may be financially distressed could increase prepayment risk and be disruptive to the fund's or adviser's relationship with the borrower.[300] Moreover, this disclosure could also harm private issuers by disclosing their financial distress to vendors and key employees and customers.[301] While we recognize that the disclosure of a private issuer in distress could have a negative impact on the issuer, we believe that it is important that Commission staff have access to information relating to fund investments that are in default or arrears in order to monitor individual fund and industry risk. It is similarly important that fund's investors have access to this information so that they can make fully informed decisions regarding their investment. Moreover, default or arrears relating to a fund's investments in private issuer debt are already publicly available on a fund's quarterly financial statements.[302]

Another commenter recommended eliminating the requirements relating to whether a debt security is currently in default or any of the interest payments are in arrears or have been deferred.[303] The commenter noted that these items require a subjective legal analysis on an instrument-by-instrument basis, on which conclusions among funds may vary and thus would not provide meaningful comparable information.[304] For similar reasons, another commenter supported the proposal, but recommended that the Commission should establish a clear standard for designating when a security is deemed to be in arrears.[305] As we previously discussed, this type of analysis and public reporting is not new to funds, as they are required to report results in their financial statements and on their schedules of investments.[306] Rather than provide funds with a definition that may not be applicable in all situations, or inconsistent with their financial statement reporting, we believe that it is more appropriate to allow funds to continue to use their own methodology in responding to these items on Form N–PORT, subject to the limitations of General Instruction G.[307]

As we discuss in more detail in section II.C.3 below, commenters noted that in-kind payments where *the fund* elects to receive payments-in-kind (as opposed to cash) do not raise the same risks as *an issuer* that only makes in-kind payments, because such a scenario does not represent an issuer who may be in financial difficulties and cannot pay cash dividends, as opposed to an investor who merely chooses to receive in-kind dividends rather than cash.[308] We agree and are adding an additional clarifying clause to Item C.9.e that a fund should not designate interest as paid-in-kind if the fund has the option to elect an in-kind payment and has elected to be paid-in-kind [309]

Finally, we proposed to require additional information for convertible securities, to indicate whether the conversion is mandatory or contingent.[310] We also proposed to require funds to disclose for each convertible security: The conversion ratio; information about the asset into which the debt is convertible; and the delta, which is the ratio of the change in the value of the option to the change in the value of the asset into which the debt is convertible. This reflects the sensitivity of the debt's value to changes in the price of the asset into which the debt is convertible. For example, based upon staff experience, we believe that the risk and reward profiles for mandatory and contingent conversions vary considerably and, thus we proposed to require disclosure of the type of conversion in order to better understand these risks. Similarly, we proposed to require disclosure of the conversion ratio and information about the asset into which the debt is convertible. Furthermore, the proposed requirement to provide the delta was also proposed to be required for options, as discussed further below, because convertible securities have optionality.[311] For similar reasons discussed below regarding options, we expressed our belief that providing the delta for convertible securities is important to understand the extent of both the credit exposure of the debt portion of the convertible bond as well as the market price exposure relative to the underlying security into which it can be converted or exchanged.

We received several comments relating to the disclosures of convertible securities. One commenter requested that the securities be consistently reported across funds and include additional instructions for calculating delta.[312] Another commenter noted that calculating delta for convertible bonds using the Black-Scholes model, which is commonly used for calculating the delta for options would be impractical and therefore requested further clarification for calculating delta for convertible bonds.[313] As discussed above, while we believe that it is important to receive consistent reporting between funds, we have endeavored to limit burdens on funds, when possible. Thus, rather than provide prescriptive instructions for funds to calculate delta, General Instruction G to Form N–PORT now clarifies that funds may use their own

[312] *See* State Street Comment Letter (reporting delta should be consistent, but should include the following attributes to define the approach, such as: Volatility used, actual volatility used in the calculation, and attributes such as mandatory convertible.).

[313] *See* Morningstar Comment Letter.

current methodology.[314] For example, based on staff experience, we understand that delta for some instruments could be calculated using certain formulas, such as Black-Scholes, while funds might calculate the delta for convertible bonds using a different calculation.[315] Such variations in calculation among funds, or even by the same funds with different types of investments, are permissible so long as the calculations are consistent with how the fund reports information internally and to its current and prospective investors.[316] However, we agree with the commenter that calculating delta for certain convertible securities, such as contingent convertible bonds, may not be possible. We are therefore adding the clarifying instruction to Item C.9.f.v to only provide delta if it is applicable to that security.[317]

Another commenter suggested that we eliminate the additional information proposed in Form N–PORT for convertible securities as they do not represent significant data points from which to assess risk.[318] We, however, believe that the proposed information will not only assist staff with understanding the risks to a fund or the fund industry, it will also be used to better understand fund investments, industry trends, and new and emerging risks. We continue to believe that the items required for convertible securities will be valuable information for the staff, investors, and other potential users. As a result, we are adopting Item C.9 as proposed, subject to the clarifications in Item C.9.e and C.9.f.v. discussed above.[319]

iii. Repurchase and Reverse Repurchase Agreements

As we proposed, and in addition to the information required above for all investments, Form N–PORT requires each fund to report additional information for each repurchase and reverse repurchase agreement held by the fund. The fund will report the category that reflects the transaction from the perspective of the fund (repurchase, reverse repurchase), whether the transaction is cleared by a central counterparty—and if so the name of the central counterparty—or if not the name and LEI (if any) of the over-the-counter counterparty, repurchase rate, whether the repurchase agreement is tri-party (to distinguish from bilateral transactions), and the maturity date.[320] Funds will also report the principal amount and value of collateral, as well as the category of investments that most closely represents the collateral.[321]

These disclosures will enhance the information currently reported regarding funds' use of repurchase agreements and reverse repurchase agreements. Information regarding repurchase agreements will be comparable to similar disclosures currently required to be made by money market funds on Form N–MFP. The categories used for reporting collateral will track the categories currently used to report tri-party repurchase agreement information to the Federal Reserve Bank of New York. We believe that conforming the categories that will be used in Form N–PORT to categories used in other reporting contexts will ease reporting burdens and enhance comparability.[322]

One commenter agreed with our proposed reporting, but recommended, without further elaboration, that reporting of collateral be done on the basis of aggregate security type rather than at the individual security level.[323] Another commenter noted that our proposed reporting would align not only with information reported on Form N–MFP and collected by the Federal Reserve, but also with information reported by fund companies operating globally and offering managed products within Europe.[324]

In contrast, another commenter asserted that funds should apply the same taxonomy when reporting collateral that would be used when reporting the fund's portfolio investments on Form N–PORT, which would result in a more granular disclosure of collateral.[325] Other commenters expressed concerns about public disclosure of this information on a transaction-by-transaction basis and suggested that this information be collected on a firm-by-firm basis instead or be nonpublic, due in part to counterparties' concerns about the disclosure of such information to the public, including their competitors.[326]

After considering these comments, we are adopting this requirement as proposed. As mentioned above, the information that funds will report is aligned with similar information publicly reported on Form N–MFP by money market funds, reported to the Federal Reserve by banks, and publicly reported by fund companies operating globally and offering managed products in Europe. Uniform reporting of this information under the common taxonomy that has already been developed and is being used by other financial institutions will help facilitate the linkage of data reported on Form N–PORT with data from other filings and sources. For these reasons, we are not persuaded by the suggestions of one commenter to require collateral to be reported on an aggregate level,[327] nor are we persuaded by the commenter who suggested that funds should apply the same taxonomy when reporting collateral that would be required when reporting the fund's portfolio investments on Form N–PORT,[328] which would result in data that would be incompatible with collateral data reported more broadly elsewhere.

We are also not persuaded by assertions by commenters that this type of information could reveal any strategies competitors could use to their advantage. As indicated above, such information is currently routinely publicly disclosed in other contexts, and commenters did not specify how additional disclosure on Form N–PORT could result in harm. More generally, using a different taxonomy for funds with regards to repurchase and reverse repurchase agreements or keeping such information nonpublic or making it available on only an aggregated basis would hinder the ability of Commission

[314] *See* General Instruction G of Form N–PORT; *see also supra* section II.A.2.a.

staff as well as investors and other potential users of this information to use the data on Form N–PORT as discussed above.

iv. Derivatives

As discussed above and in the Proposing Release, the current reporting regime for derivatives has led to inconsistent approaches to reporting derivatives information and, in some cases, insufficient information concerning the terms and underlying reference assets of derivatives to allow the Commission or investors to understand the investment. Additionally, as discussed further below, for options, warrants, and certain convertible bonds, the Commission believes that it is important to have a measurement of ''delta,'' a measure not reported in the financial statements or schedule of investments, to better understand the exposure to the underlying reference asset that the options, warrants, and certain convertible bonds produce in the portfolio. Currently, the Commission and investors are sometimes unable to accurately assess funds' derivatives investments and the exposures they create, which can be important to understanding funds' investment strategies, use of leverage, and potential risk of loss.

With this rulemaking, we will increase transparency into funds' derivatives investments by requiring funds to disclose certain characteristics and terms of derivative contracts that are important to understand the payoff profile of a fund's investment in such contracts, as well as the exposures they create or hedge in the fund. This will include, for example, exposures to currency fluctuations, interest rate shifts, prices of the underlying reference asset, and counterparty credit risk. As discussed further below, we are also amending Regulation S–X to make similar changes to the reporting regime for derivatives disclosures in fund financial statements.[329]

While we received comments supporting our proposal to include specific information about position-level derivatives,[330] some commenters believed that portfolio-level reporting (as opposed to position-level reporting) would be more appropriate for understanding how funds use derivatives and funds' derivative-based risks.[331] Other commenters requested that certain position-level disclosures relating to derivatives not be publicly reported noting that this information could be confusing to investors, proprietary, or potentially used by competitors to harm fund investors through front-running or reverse engineering of fund investing strategies.[332] Another requested that derivatives disclosure be subject to certain *de minimis* thresholds.[333]

As we discuss more fully below in section II.A.4, we continue to believe that it is important that, in addition to the Commission, investors receive enough information in order to evaluate an investment and make appropriate investing decisions. Moreover, much of the information required in Form N–PORT is already reported in fund financial statements, or will be with our amendments to Regulation S–X, albeit in an unstructured format. As we describe more fully in section II.A.4 below, we generally believe that the reporting requirements of Form N–PORT are appropriate given the filer's status as a registered investment company with the Commission. Moreover, we generally believe that investors, directly and indirectly, should have access to portfolio information in a structured data format, to assist them with making more informed investing decisions. We thus believe that certain position-level information should be reported publicly on a quarterly basis.[334]

Consequently, in addition to the information required above for all investments, we proposed to require additional information about each derivative contract in the fund's portfolio. As proposed, funds would report the type of derivative instrument that most closely represents the investment (*e.g.,* forward, future, option, etc.).[335] As discussed above in section II.A.2.a, commenters requested that we provide definitions of certain items in the form, such as ''derivatives'' and ''forwards.''[336] For the reasons discussed above, we are not adopting definitions for these items. Finally, a commenter suggested that we organize the disclosure of derivatives as reflected in the recently adopted amendments to Form ADV or Item 30 of Form PF arguing that these items would standardize the organization and reporting of derivatives across different Commission forms.[337]

As discussed below in section II.C.2, the derivative instrument type categories identified in Form N–PORT are similar to the categories disclosed by funds in amended Regulation S–X. We designed these categories to enable funds to report position-level information on their investments in derivatives, while leaving enough flexibility to allow funds to categorize investments in the future that are not currently traded by funds.[338] In contrast, the categories used in the Form ADV Release and Item 30 of Form PF are designed to collect aggregated information at the portfolio level for investment advisers advising separately managed accounts and private funds, respectively. As a result, the categories for Forms PF and ADV must be more specific, as the Commission does not receive more detailed position-level information for these types of filers. However, in the case of registered funds, the current disclosure regime requires funds to disclose position-level information to the Commission and investors; thus it is not necessary for more standardization across funds regarding definitions, as the Commission and investors could always review the fund's specific holdings.[339]

In the case of Form N–PORT, in addition to the categories, the Commission will receive additional position-specific data, which will allow the user of the information to better understand each position, without solely relying on the instrument type. However, we acknowledge the potential for confusion regarding the categorization of different types of

[339] *See generally,* Form N–CSR and Form N–Q.

swaps and are therefore adopting the derivatives instrument type categorizes that we proposed, but subject to a modification in Item C.11.a to include a clarification that specifically identifies that total return swaps, credit default swaps, and interest rate swaps should all be categorized under the ''swap'' instrument type.[340] We are adopting the derivatives instrument categories subject to this modification.[341]

As proposed, funds would also report the name and LEI (if any) of the counterparty (including a central counterparty).[342] We believe, and some commenters agreed, that this identifying information should assist the Commission, investors, and other potential users in better identifying and monitoring derivatives held by funds and the associated counterparty risks.[343] Other than requests to keep counterparty information nonpublic [344] and requests to phase in the disclosure of counterparty LEI's,[345] which are discussed above, we generally received positive comments on our proposed counterparty and LEI disclosures and are adopting them, as proposed.[346]

As proposed, Form N–PORT would also require funds to report terms and conditions of each derivative investment that are important to understanding the payoff profile of the derivative.[347] For options and warrants, including options on a derivative (*e.g.,* swaptions), funds would report the type (*e.g.,* put), payoff profile (*e.g.,* written), number of shares or principal amount of underlying reference instrument per contract, exercise price or rate, expiration date, and the unrealized appreciation or depreciation of the option or warrant.[348] Proposed Form N–PORT would require funds to provide a description of the reference instrument, including name of issuer, title of issue, and relevant securities identifier.[349] We received comments supporting these items [350] and are adopting them as proposed.[351]

We recognize that some derivatives have underlying assets that are indexes of securities or other assets or a ''custom basket'' of assets, the components of which are not always publicly available. We proposed requirements to ensure that the Commission, investors, and other potential users are aware of the components of such indexes or custom baskets. As proposed, if the reference instrument is an index for which the components are publicly available on a Web site and are updated on that Web site no less frequently than quarterly, funds would identify the index and provide the index identifier, if any.[352] We proposed to require at least quarterly public disclosure for the components of the index because it matches the frequency with which funds are currently required and, as adopted in this release, would continue to be required, to disclose their portfolio investments.[353] We proposed that if the index's components are not publicly available as provided above, and the notional amount of the derivative represents 1% or less of the NAV of the fund, the fund would provide a narrative description of the index.[354] If the index's components are not publicly available in that manner, and the notional amount of the derivative represents more than 1% of the NAV of the fund, we proposed that the fund would provide the name, identifier, number of shares or notional amount or contract value as of the trade date (all of which would be reported as negative for short positions), value, and unrealized appreciation or depreciation of every component in the index.[355]

We received a number of comments on our proposal to publicly disclose the components of the underlying index or custom basket. While some commenters agreed with our proposal,[356] others requested that we include a higher threshold before requiring reporting.[357] Some commenters, for example, suggested that the threshold for requiring any reporting of components be 5% of net asset value of the fund.[358] Others agreed with our proposed 1% threshold but stated that reporting should be based on whether the *net asset value* of the derivative instrument that is relying on the index or custom basket exceeds 1% of the fund's net asset value, rather than the derivative instrument's *notional value* (as was proposed), as net asset value is a better indicator of materiality.[359]

We continue to believe that it is important for the Commission,

[340] *See* Item C.11.a of Form N–PORT.

[341] *See id.*

[342] *See* Item C.11.b of proposed Form N–PORT.

[343] *See generally* Morningstar Comment Letter (''More-frequent portfolio disclosures will improve the counterparty information available to market participants. As a result, market participants could assist the SEC in identifying emerging risks—and they would likely direct assets away from counterparties perceived as excessively risky.''); CFA Comment Letter (supporting aspects of the proposal that would require derivative counterparty information); Wells Fargo Comment Letter (same). Commenters to the FSOC Notice indicated that counterparty data for derivative disclosures is not often available and discussed the need to have more transparency in this regard. *See, e.g.,* Comment Letter of Americans for Financial Reform to FSOC Notice (Mar. 27, 2015) (''Americans For Financial Reform FSOC Notice Comment Letter'') (asserting that counterparty data in derivative disclosures is not often available); Comment Letter of the Systemic Risk Council to FSOC Notice (Mar. 25, 2015) (discussing the need to have information about investment vehicles that hold bank liabilities).

[344] *See, e.g.,* SIFMA Comment Letter I.

[345] *See, e.g.,* State Street Comment Letter; BlackRock Comment Letter; *see generally supra* section II.A.2.a.

[346] *See* Item C.11.b of Form N–PORT; *see also* Morningstar Comment Letter; CFA Comment Letter; Wells Fargo Comment Letter. As discussed below in section II.C.2.a, in response to commenters' suggestions, for Regulation S–X purposes, we are not requiring funds to disclose the counterparty for centrally cleared or exchange traded derivatives. *See, e.g.,* rule 12–13, n. 4 of Regulation S–X. This is because we believe it may be necessary to have information about the central counterparty for a derivative (for example, to compare data with other data available to regulators) but such information may not be necessary for financial statements, where the primary purpose for providing this information to fund investors is to make investors aware of the fund's counterparties and any associated credit risk.

[347] We are requiring similar information on a fund's schedule of investments. *See infra* section II.C.2.

[348] *See* Item C.11.c of proposed Form N–PORT. As discussed above, funds would report the number of option contracts in Item C.2.a of Form N–PORT. *See also supra* footnote 265 and accompanying text.

[349] *See* Item C.11.c.iii.2 and Item C.11.c.iii.3 of proposed Form N–PORT. For the securities identifier, funds would report, if available, CUSIP of the reference asset, ISIN (if CUSIP is not available), ticker (if CUSIP and ISIN are not available), or other unique identifier (if CUSIP, ISIN, and ticker are not available). *See also supra* footnote 254 and accompanying and following text.

[350] *See* Wells Fargo Comment Letter; *see also* MFS Comment Letter.

[351] *See* Item C.11.c.i, Item C.11.c.ii, and Item C.11.c.iii of Form N–PORT.

[352] *See* Item C.11.c.iii.2 of proposed Form N–PORT. If the reference instrument is a derivative, funds would also indicate the category of derivative (*e.g.,* swap) and will provide all information required to be reported on Form N–PORT for that type of derivative. We received no comments on this requirement and are adopting it as proposed.

[353] *See infra* section II.A.4 (discussing proposed rules concerning the public disclosure of reports on Form N–PORT).

[354] *See supra* footnote 352.

[355] *See id.* Short positions in the index, if any, would be reported as negative numbers. The identifier for each index component would include CUSIP, ISIN (if CUSIP is not available), ticker (if CUSIP and ISIN are not available), or other identifier (if CUSIP, ISIN, and ticker are not available). If other identifier is provided, the fund would indicate the type of identifier used.

[356] *See, e.g.,* Morningstar Comment Letter (''Index providers are earning revenues from the licensing fees embedded in the derivative cost that is born by the fund and therefore its shareholders.''); CFA Comment Letter (expressing general support for the proposed derivatives reporting requirements).

[357] *See, e.g.,* Wells Fargo Comment Letter (additional index reporting should only be triggered when a derivative represents 5% of NAV); ICI Comment Letter.

[358] *See id.*

[359] *See, e.g.,* SIFMA Comment Letter I (''The proposal of 1% notional value is entirely different from the predicate requirement on which the Commission says the proposal is based. We believe the original 1% value requirement is a far better indicator of materiality and should be adopted in this connection as well.''); Oppenheimer Comment Letter (1% of net (not notional) value of derivatives).

investors, and other potential users to have transparency into a fund's exposures to assets, regardless of whether the fund directly holds investments in those assets or chooses to create those exposures through a derivatives contract.[360] Our proposed one percent threshold was based on our experience with the summary schedule of investments, which requires funds to disclose investments for which the value exceeds 1% of the fund's NAV in that schedule.[361] Similar to the threshold in the summary schedule of investments, we believe that providing a 1% *de minimis* for disclosing the components of a derivative with nonpublic reference assets considers the need for the Commission, investors, and other potential users to have transparency into the exposures that derivative contracts create while not requiring extensive disclosure of multiple components in a nonpublic index for instruments that represent a small amount of the fund's overall value.

Moreover, for purposes of this calculation, we believe that it is appropriate to measure whether such derivative instrument exceeds the 1% threshold based on the derivative's notional value, as opposed to the current market value of the derivative, because derivatives with a small market value could have a much larger potential impact on a fund's performance than the current market value would suggest, and thus believe that a derivative's notional value better measures its potential contribution to the gains or losses of the fund.[362]

We also solicited comment on whether we should limit the required disclosure of index components to the top 50 components and/or components that represent more than 1% of the index. In response to this request for comment commenters suggested that once a nonpublic index crosses the reporting threshold, we limit disclosure to the top 50 components and components that represent more than one percent of the index based on the notional value of the derivatives, as this standard is analogous to the current reporting requirement to identify holdings in the summary schedule of investments. Commenters stated that this would reduce reporting burdens for funds that invest in indexes with a large number of components.[363]

Some commenters also objected to the public disclosure of the components underlying an index as that disclosure could harm the intellectual property rights that index providers might assert and, as a result, harm investors who may lose the benefit of index products that would no longer be available to them, should an index provider choose to no longer do business with a fund, rather than have its index's components made publicly available.[364] Other commenters urged the Commission to delete this requirement as information on non-public indexes or custom baskets may be difficult for funds to obtain.[365] As discussed below in section III.B.3., commenters also noted that disclosure of the components of custom baskets underlying swaps are considered by some as proprietary information regarding a fund's investment strategies and could lead to the indexing strategy being imitated, resulting in harm to the fund and its investors through reverse engineering and free-riding.[366]

We believe that it is fundamental to the reporting by funds that fund shareholders have access to the information necessary to understand the exposures of their fund's investments.[367] Moreover, we note that a fund whose investment objective tracks an index or custom basket is currently required to publicly disclose its direct holdings quarterly in its financial statements.[368] Likewise, funds should not be able to use proprietary indexes to mask exposures to investments underlying a custom basket for a swap or options contract.[369]

Moreover, while some commenters noted that obtaining information on the components of an underlying index may be difficult,[370] again, we believe that fund shareholders need sufficient information to understand their fund's exposures, even if such transparency requires the fund to renegotiate licensing agreements or, in some cases results in the fund having to forego investments in a custom basket or nonpublic index.[371] As discussed further in section II.A.4, below, we believe that we have mitigated the potential for harm to fund investors that some commenters believed could result from the public reporting of non-public indexes and custom baskets by delaying the public reporting of reports on Form N–PORT by 60-days.

For the reasons discussed above, we believe that it is important that the Commission and investors have full transparency into any index or custom basket that significantly contributes to a fund's NAV. However, we were also persuaded by commenters that, in cases of indexes with a large number of components, and where the index only constitutes a small portion of the fund's investments, disclosure of every component could yield information on underlying investments that constitute only a ''miniscule'' percentage of the fund's NAV.[372] In these cases, requiring complete reporting of all the components could be burdensome without providing information that is minimally helpful for understanding the role of the investment in the fund. In such situations, limiting component reporting to the largest holdings of an index or custom basket could appropriately reduce reporting burdens while still providing transparency into the investment.

Accordingly, we are adopting a tiered reporting structure for the reporting of the components of an index or custom basket underlying a derivative. For investments in a non-public index or custom basket that represent more than 1%, but less than 5%, of a fund's net assets, funds will be required to report the top 50 components of the basket and, in addition, those components that exceed 1% of the notional value of the

[360] We are also modifying Regulation S–X to require similar disclosures. *See infra* section II.C.2.a (discussing proposed rule 12–13, n. 3 of Regulation S–X).

[361] *See* rule 12–12C, n. 3 of Regulation S–X [17 CFR 210.12–12C].

[362] *See* Item C.11.c.iii.2 of Form N–PORT. As discussed more fully below, we received several comments relating to the appropriate calculation of notional amount for derivative instruments. *See infra* footnotes 546–550 and accompanying text. We acknowledge that there are multiple ways of calculating notional amount for certain investments. *See id.* While the staff has previously provided examples of acceptable notional amount calculations, *see id.,* funds may use other methods of calculating notional amount so long as the methodology is applied consistently and is consistent with the way the fund reports notional amount internally and to current and prospective investors. *See* General Instruction G of Form N–PORT.

[363] *See* current rule 12–12C of Regulation S–X; *see, e.g.,* ICI Comment Letter; Oppenheimer Comment Letter; *see also* SIFMA Comment Letter I (top 5 components or the components reflecting 50% of the index). Commenters also noted their belief that reporting should be based on a percentage of NAV, rather than notional value, as percentage of NAV is a better indicator of materiality. *See* SIFMA Comment Letter I; Oppenheimer Comment Letter; *contra* Morningstar Comment Letter (''Arbitrary limits on positions that should be disclosed for portfolios or reference indexes can mask the risk of an instrument.'').

[364] *See, e.g.,* SIFMA Comment Letter I; Comment Letter of MSCI (Aug. 10, 2015) (''MSCI Comment Letter'') (even provision of delayed data is a concern).

[365] *See* Simpson Thacher Comment Letter; Dreyfus Comment Letter.

[366] *See, e.g.,* SIFMA Comment Letter II; MSCI Comment Letter; *see also infra* section III.B.3.

[372] *See* ICI Comment Letter.

index. For investments in a non-public index or custom basket that exceed 5% of a fund's net assets, funds will be required to report all components.

We developed this tiered threshold in response to commenters, discussed above, that suggested a higher *de minimis* threshold of 5% of net assets for requiring any reporting of the underlying components. We recognize that this approach will be more burdensome for funds holding investments that fall within these thresholds than raising the *de minimis* for any reporting of components to 5% of net assets, which was suggested by some commenters. We believe, however, that investments representing between 1% and 5% of a fund's net assets are sufficiently significant to a fund that some reporting of individual components is appropriate and will help the Commission staff and investors to understand a fund's indirect exposures to investments that are the most significant components of the index. Further, limiting reporting for such derivative investments to the top 50 components and those components that exceed 1% of the notional value of the index, which is the same threshold used for the summary schedule of investments, will reduce the reporting burdens relative to the proposal for funds with such investments.[373] Conversely, we acknowledge that limiting the required reporting for those investments representing between 1% and 5% will not provide full transparency into such investments; we believe, however, that this approach appropriately balances providing information that is sufficient for the Commission and investors to understand the composition and risk of such investments, with reducing reporting burdens for funds. For investments in non-public indexes or custom baskets that exceed 5% of a fund net assets, funds will be required to report all components of the index or custom basket, as we believe that full transparency is appropriate for such investments because, as discussed above, funds should not be able to mask significant portions of their investment strategy by using a proprietary index or custom basket.

A commenter also objected to disclosure of unrealized appreciation or depreciation for each component of the index or custom basket arguing that such information would be costly to maintain as the fund would be required to create a record of the value of each underlying security in the index at the time the derivatives contract is entered into.[374] We agree. Moreover, we agree with the commenter that Form N–PORT will already require the fund to provide the unrealized appreciation and depreciation for the option or swap contract on a monthly basis, making the disclosure of unrealized appreciation and depreciation for components of the underlying index unnecessary.[375]

Thus, if the index's or custom basket's components are not publicly available and the notional amount of the derivative represents more than 1%, but less than 5%, of the net asset value of the fund, the fund will provide the name, identifier, number of shares or notional amount or contract value as of the trade date (all of which would be reported as negative for short positions), and value, for (i) the 50 largest components in the index or custom basket and (ii) any other components where the notional value for that component is over 1% of the notional value of the index or custom basket.[376] Likewise, if the index's or custom basket's components are not publicly available and the notional amount of the derivative represents more than 5% of the net asset value of the fund, the fund will provide the name, identifier, number of shares or notional amount or contract value as of the trade date (all of which would be reported as negative for short positions), and value, for all of the index's or custom basket's components.[377]

We also proposed to require funds to report the delta of options and warrants, which is the ratio of the change in the value of the option or warrant to the change in the value of the reference instrument.[378] This measure reflects the sensitivity of the value of the option or warrant to changes in the price of the reference instrument.

We requested comment on our proposal to require funds to report the delta for options and warrants. Some commenters supported our proposal to require funds to report delta for options and warrants.[379] Others objected to the Commission's proposal to collect delta because they believed it would provide little value because of the time delay between the end of the period date and the reporting date, and could be difficult to calculate.[380] Others did not specifically object to the Commission requiring delta, but requested that delta not be released to the public citing concerns of investor confusion regarding the subjectivity of delta (*i.e.* the calculation of delta is necessarily based upon inputs and assumptions that could vary between funds).[381]

We continue to believe that the reporting of delta for options and warrants will provide the Commission a more accurate measure of a fund's full exposure to the fund's investments in options and warrants. Accordingly, we believe that having the measurement of delta for options is important for the Commission to measure the impact, on a fund or group of funds that holds options on an asset, of a change in such asset's price. Also, as the Commission has previously observed, funds can use written options as a form of obtaining a leveraged position in an underlying reference asset.[382] Having a measurement of exposures created through this type of leverage can help the Commission better understand the risks that the fund faces as asset prices change, since the use of this type of leverage can magnify losses or gains in assets. Thus, while we acknowledge that the Commission will receive delta 30 days after the reporting date, it will still be a useful tool for the Commission and its staff to understand the fund's relative exposures to changes in the price of the underlying reference asset. Moreover, as discussed more fully below in section II.A.4, for the reasons discussed in that section, we have determined to make the reporting of delta non-public for all three months, which should mitigate commenters concerns regarding investor confusion relating to the subjectivity of calculating delta. Finally, based upon staff experience, we believe that it is general industry practice to calculate delta for options, warrants, and swaps.

As a result, we are adopting the requirement that funds report delta for options and warrants as proposed. While one commenter noted that there are a variety of models to calculate delta and requested a specific approach to calculating delta, based on staff

[373] *See* Morningstar Comment Letter; SIFMA Comment Letter I.

[374] *See, e.g.,* ICI Comment Letter.

[375] *See id.; see also* Item C.11.c.viii and Item C.11.f.v of Form N–PORT.

[376] *See* Item C.11.c.viii.2 of Form N–PORT. Short positions in the index, if any, will be reported as negative numbers. The identifier for each index component would include CUSIP, ISIN (if CUSIP is not available), ticker (if CUSIP and ISIN are not available), or other identifier (if CUSIP, ISIN, and ticker are not available). If other identifier is provided, the fund would indicate the type of identifier used.

[377] *Id.*

[378] *See* Item C.11.c.vii of proposed Form N–PORT.

[379] *See, e.g.,* Morningstar Comment Letter (requesting clarity on specific method to calculate delta); Wells Fargo Comment Letter.

[380] *See, e.g.,* Dreyfus Comment Letter (delta statistic may be of limited value because of the time lag associated with reporting); Simpson Thacher Comment Letter (obtaining information on delta may be difficult for funds).

[381] *See, e.g.,* ICI Comment Letter.

[382] *See* Derivatives Proposing Release, *supra* footnote 7, at 80886.

experience analyzing these metrics, we believe that such differences are not so large that the results would not be useful to the staff. Therefore we are not requiring specific delta formulas be used.[383] As a result, in order to reduce burdens and provide clarity to funds, as discussed above, we are adopting an instruction that will allow funds to use their own (or their service provider's) methodologies to calculate data for reports on Form N–PORT, including delta, subject to the instruction and other guidance relating to the Form.[384]

For futures and forwards (other than foreign exchange forwards, which share similarities with foreign exchange swaps and should be reported accordingly as discussed below), as proposed, Form N–PORT would require funds to report a description of the reference instrument, the payoff profile (*i.e.,* long or short), expiration date, aggregate notional amount or contract value as of the trade date, and unrealized appreciation or depreciation.[385] The description of the reference instrument would conform to the same requirements as the description of reference instruments for warrants and options.[386]

One commenter noted that the terms ''foreign exchange swaps'' and ''foreign exchange forwards'' are defined terms under the Commodity Exchange Act, as amended by the Dodd-Frank Act and such terms exclude non-deliverable forwards, which are included in the Commodity Exchange Act's definition of swaps. As the commenter pointed out, such distinctions between deliverable and non-deliverable forwards are not relevant in the context of reporting of forward contracts on Form N–PORT.[387] Accordingly, in order to avoid confusion, we are replacing the terms ''foreign exchange swaps'' and ''foreign exchange forwards'' with terms used in Regulation S–X, ''forward foreign currency contracts'' and ''foreign currency swaps,'' which make no distinction between deliverable and non-deliverable foreign exchange contracts.[388] Other than modifying these terms, which should have no effect on how information is reported on Form N–PORT, we received no other comments to this section of Form N–PORT. We are therefore adopting the reporting for futures and forwards as proposed.[389]

We also received no comments relating to our proposed elements for reporting of foreign forward foreign currency contracts and foreign currency swaps (other than the above-mentioned term changes) and are adopting it substantially as proposed with one clarifying instruction with respect to reporting depreciation.[390] Funds will therefore report the amount and description of currency sold, amount and description of currency purchased, settlement date, and unrealized appreciation or depreciation.[391]

For swaps (other than foreign currency swaps), as proposed, funds would report the description and terms of payments necessary for a user of financial information to understand the nature and terms of payments to be paid and received, including, as applicable: A description of the reference instrument, obligation, or index; financing rate to be paid or received; floating or fixed rates to be paid and received; and payment frequency.[392] The description of the reference instrument would conform to the same requirements as the description of reference instruments for forwards and futures.[393] Funds would also report upfront payments or receipts, unrealized appreciation or depreciation, termination or maturity date, and notional amount.[394]

Commenters expressed concern that publicly disclosing financing rates for swaps contracts could harm shareholders as financing rates are commercial terms of a deal that are negotiated between the fund and the counterparty to the swap.[395] As several commenters discussed, disclosure of favorable variable financing rates could result in costs to the fund in the form of less favorable variable financing rates for future transactions.[396] Counterparties could also choose not to transact with funds as a consequence of this disclosure, increasing the competition for the remaining counterparties resulting in higher fees for funds. However, the increased disclosure of a swap's terms may also improve the ability of other funds to negotiate more favorable terms resulting in more favorable fees and financing terms for funds. Further, we designed Form N–PORT to provide information sufficient to allow our staff, investors, and other potential users to better understand the investments held in a fund's portfolio. Without information like the payment terms for derivative instruments, valuing the risks and rewards of such an investment could be difficult for investors and other potential users. Moreover, in order for the Commission to understand such investments, the Commission staff must have access to the terms and conditions of such investments, of which the financing rates are a critical part.

One commenter noted that proposed Form N–PORT did not include certain data elements that relate to the detailed calculations of cash flows, such as inflation index based values and lags associated with principal resets for over-the-counter swaps and caps and floors embedded in swaps.[397]

As we discussed above, as proposed, Form N–PORT would require funds to provide a description and terms necessary for a user of financial information to understand the terms of payments to be paid and received.[398] We recognize that in complying with these instructions funds could determine that they should report terms like those suggested by the commenter for certain instruments. Given the variety of swaps instruments—for example, interest rate swaps, credit defaults swaps, total return swaps, each with its own respective terms and conditions—however, we do not believe that it is appropriate to specify the terms

[383] *See* Morningstar Comment Letter (''Academic research recommends the use of a variety of models to calculate delta depending on the instrument: Equity option, swaption, foreign exchange option, interest-rate options, and others. The proposal could be modified to define a specific approach with specific derivations of inputs for the most common type of derivatives.'').

of the swap with the level of granularity suggested by the commenter beyond what we specified in the instructions to Form N–PORT. As a result, we are adopting Form N–PORT's swaps reporting section substantially as proposed.[399]

Finally, for derivatives that do not fall into the categories enumerated in Form N–PORT, we proposed that funds would provide a description of information sufficient for a user of financial information to understand the nature and terms of the investment.[400] This description would include, as applicable, currency, payment terms, payment rates, call or put features, exercise price, and a description of the reference instrument, among other things.[401] As proposed, the description of the reference instrument would conform to the same requirements as the description of reference instruments for options and warrants.[402] Funds would also report termination or maturity (if any), notional amount(s), unrealized appreciation or depreciation, and the delta (if applicable).[403]

We received no comments on this aspect of the proposal other than one commenter that noted that the proposed list of derivative ''categories'' could leave major categories of derivatives to be reported as ''other.'' [404] As we discussed above, we continue to recognize that new derivatives products will evolve, and therefore Form N–PORT's derivatives reporting requirements are designed to be flexible enough to include the reporting of new investment products that may emerge. Moreover, funds may only categorize a derivatives as ''other'' if none of the identified categories applies, thus limiting the number of derivatives that will be categorized as ''other.'' [405] For these reasons, we are adopting the reporting requirements for other derivatives as proposed.[406]

v. Securities on Loan and Cash Collateral Reinvestment

As discussed above, and as we proposed, we will require funds to report on Form N–PORT, for each of their securities lending counterparties as of the reporting date, the full name and LEI of the counterparty (if any), as well as the aggregate value of all securities on loan to the counterparty.[407] We are also requiring, substantially as proposed, that funds report on Form N–PORT, on an investment-by-investment level, information about securities on loan and the reinvestment of cash collateral that secures the loans. For each investment held by the fund, a fund will report: (1) Whether any portion of the investment was on loan by the fund, and, if so, the value of the investment on loan; [408] (2) whether any amount of the investment represented reinvestment of the cash collateral and, if so, the dollar amount of such reinvestment; [409] and (3) whether any portion of the investment represented non-cash collateral treated as part of the fund's assets and received to secure loaned securities and, if so, the value of such non-cash collateral.[410]

These disclosures will provide information about how funds reinvest the cash collateral received from securities lending activity and should allow for more accurate determination of the value of collateral securing such loans. This information will also allow us to determine whether funds that are relying on exemptive orders or no-action assurances to engage in securities lending are complying with any associated conditions regarding collateral received for such activities. This will improve the ability of Commission staff, as well as investors, brokers, dealers, and other market participants to assess collateral reinvestment risks and associated potential liquidity risk and risk of loss, as well as better understand any potential leverage creation through the reinvestment of collateral.[411] These disclosures will also help identify those investments that funds might have to sell or redeem in the event of widespread termination or default by borrowers. More generally, we expect that this information will help to address concerns expressed by industry participants about the lack of transparency in funds' securities lending transactions.[412]

One commenter suggested that non-cash collateral information should not be publicly disclosed but did not elaborate on why such information should be kept nonpublic.[413] As discussed herein, we believe that disclosure of this information can serve many purposes, including improving the ability of Commission staff, as well as investors, brokers, dealers, and other market participants to better understand the collateral received by funds and the associated potential liquidity and loss risks, as well as identification of those instruments that one or more funds might have to sell in the event of default by borrowers. For these reasons, we are requiring, as proposed, that this information be publicly reported on Form N–PORT.

Several commenters recommended that non-cash collateral be reported in aggregate terms rather than as individual portfolio positions.[414] As discussed above in section II.A.2.d, one commenter explained that funds typically do not treat non-cash collateral as fund assets and consequently do not generally include non-cash collateral in their schedule of portfolio investments.[415] As discussed above, we are revising Form N–PORT to add a new Item requiring funds to report the aggregate principal amount and aggregate value of each type of non-cash collateral received for loaned securities that is not treated as a fund asset.[416] If the fund does treat the non-cash collateral as a fund asset and it is therefore included in the fund's schedule of portfolio investments, the fund will identify such assets on an investment-by-investment basis, as proposed.[417]

h. Miscellaneous Securities

In Part D of Form N–PORT, as we proposed, and as currently permitted by Regulation S–X, funds will have the option of identifying and reporting certain investments as ''miscellaneous securities.'' [418] Specifically, Form N–PORT permits funds to report an

aggregate amount not exceeding 5 percent of the total value of their portfolio investments in one amount as ''Miscellaneous securities,'' provided that securities so listed are not restricted, have been held for not more than one year prior to the date of the related balance sheet, and have not previously been reported by name to the shareholders, or set forth in any registration statement, application, or report to shareholders or otherwise made available to the public. Funds electing to separately report miscellaneous securities will use the same Item numbers and report the same information that would be reported for each investment if it were not a miscellaneous security.[419] Consistent with the disclosure regime under Regulation S–X, all such responses regarding miscellaneous securities will be nonpublic and will be used for Commission use only, notwithstanding the fact that all other information reported for the third month of each fund's fiscal quarter on Form N–PORT will otherwise be publicly available.[420] Keeping information related to these investments nonpublic may serve to guard against the premature release of those securities positions and thus deter front-running and other predatory trading practices, while still allowing the Commission to have a complete record of the portfolio for monitoring, analysis, and checking for compliance with Regulation S–X.[421] The only information publicly reported for miscellaneous securities will be their aggregate value, which is consistent with current practice as permitted by Regulation S–X.[422]

Commenters generally supported the separate nonpublic disclosure of individual miscellaneous securities, and noted that the current reporting provisions under Regulation S–X regarding miscellaneous securities have been effective and not abused.[423] One commenter sought clarification as to whether an investment identified as a miscellaneous security in reports filed on Form N–PORT for the third month of each fiscal quarter (*i.e.,* reports that would be made public) would also need to be identified as a miscellaneous security in reports for the first and second months of each fiscal quarter (*i.e.,* reports that would be nonpublic).[424] As discussed further below, all information reported on Form N–PORT for the first and second months of each fiscal quarter will be nonpublic. Consequently, there is no need for funds to designate any of their investments for those reporting periods as miscellaneous securities. For additional clarity, however, we are adopting a modification from the proposal to instruct funds to only identify miscellaneous securities in reports filed for the last month of each fiscal quarter.[425] Another commenter questioned whether miscellaneous securities should be measured at fair value or estimated exposure, and recommended that miscellaneous securities should be measured at notional, or delta-adjusted exposure, rather than book value.[426] As we noted in the proposal, our intent in allowing funds to designate certain investments as miscellaneous securities is to allow funds to continue to report such information consistent with current practice as permitted by Regulation S–X.[427] Accordingly, we continue to believe that value rather than exposure should be used in determining which investments qualify as miscellaneous securities (*i.e.,* investments totaling 5 percent or less of the total value of the fund's portfolio), which is consistent with current practice as permitted under Regulation S–X. For these reasons, we are adopting this aspect of Form N–PORT as proposed.

i. Explanatory Notes

In Part E of Form N–PORT, as was proposed, funds will have the option of providing explanatory notes relating to the filing.[428] Any notes provided in public reports on Form N–PORT (*i.e.,* reports on Form N–PORT for the third month of the fund's fiscal quarter) will be publicly available, whereas notes provided in nonpublic filings of Form N–PORT will remain nonpublic.[429] Funds will also report, as applicable, the Part or Item number(s) to which the notes are related.[430]

These notes, which will be optional, could be used to explain assumptions that funds made in responding to specific items in Form N–PORT. Funds could also provide context for seemingly anomalous responses that may benefit from further explanation or discuss issues that could not be adequately addressed elsewhere given the constraints of the form. Similar information in other contexts has assisted Commission staff in better understanding the information provided by funds, and we expect that explanatory notes provided on Form N–PORT would do the same.[431]

One commenter supported the proposal to allow funds to report explanatory notes, but requested that the notes remain nonpublic.[432] Likewise, another commenter recommended that funds be allowed to designate explanatory notes as nonpublic, on a case-by-case basis.[433] We are partially persuaded by these requests. We believe that to the extent the explanatory notes would be helpful to investors, such notes ideally should be publicly available. We also note that similar explanatory notes are available on Form N–MFP and are publicly available.[434] However, we recognize that certain items on Form N–PORT will involve nonpublic information, and thus we believe it is appropriate that explanatory notes related to those items should be nonpublic as well. As a result, we have determined that explanatory notes related to nonpublic items such as miscellaneous securities, country of risk and economic exposure, or delta for individual options, warrants, and convertible securities will be nonpublic.[435] However, explanatory notes related to other items on Form N–PORT will be publicly available.

As discussed above, funds may generally use their own internal methodologies and the conventions of their service providers in reporting information on Form N–PORT.[436] Funds may explain any of their methodologies,

including related assumptions, in Part E of Form N–PORT.[437]

j. Exhibits

In Part F of Form N–PORT, for reports filed for the end of the first and third quarters of the fund's fiscal year, as proposed, a fund will also attach the fund's complete portfolio holdings as of the close of the period covered by the report. These portfolio holdings will be presented in accordance with the schedules set forth in §§ 210.12–12 to 12–14 of Regulation S–X, and will not be required to be reported in a structured data format.

As discussed further below in section II.B, we are rescinding Form N–Q because reports on Form N–PORT for the first and third fiscal quarters will make similar reports on Form N–Q unnecessarily duplicative. While we recognize that the quarterly, publicly disclosed reports on Form N–PORT will provide structured data to investors and other potential users, we also recognize that some individual investors may not want to access the data in an XML format. We believe that such investors might prefer that portfolio holdings schedules for the first and third quarters continue to be presented using the form and content specified by Regulation S–X, which investors are accustomed to viewing in reports on Form N–Q and in shareholder reports. Therefore, as proposed, we are requiring that, for reports on Form N–PORT for the first and third quarters of a fund's fiscal year, the fund will attach its complete portfolio holdings for that fiscal quarter, presented in accordance with the schedules set forth in §§ 210.12–12 to 12–14 of Regulation S–X.

Requiring funds to attach these portfolio holdings schedules to reports on Form N–PORT will provide the Commission, investors, and other potential users with access to funds' current and historical portfolio holdings for those funds' first and third fiscal quarters. This will also consolidate these disclosures in a central location, together with other fund portfolio holdings disclosures in shareholder reports and reports on Form N–CSR for funds' second and fourth fiscal quarters.

Consistent with current practice and our proposal, funds will have until 60 days after the end of their second and fourth fiscal quarters to transmit reports to shareholders containing portfolio holdings schedules prepared in accordance with Regulation S–X for that reporting period.[438] In addition, although we proposed that funds would have 30 days after the end of their first and third fiscal quarters to file reports on Form N–PORT that would include portfolio holdings schedules prepared in accordance with Regulation S–X, we have modified this requirement from the proposal to allow funds 60 days.

Several commenters requested that funds be permitted to file Regulation S–X compliant portfolio holdings schedules within 60 days after the end of the reporting period for the first and third fiscal quarters consistent with how Form N–Q is filed today, rather than within 30 days after the end of the reporting period, as we proposed.[439] In light of the concerns raised by commenters about the time needed to prepare, validate, and file this information, as well as the fact that these schedules are designed for the benefit for investors rather than the Commission and regardless of when this information is filed with us it would not be made public to investors until 60 days after the end of the reporting period, we are extending the deadline to file such information until 60 days after the end of the relevant reporting period for the first and third fiscal quarters.[440]

3. Reporting of Information on Form N–PORT

As discussed above, we proposed that funds would report information on Form N–PORT in XML, so that Commission staff, investors, and other potential users could download structured data for immediate aggregation and comparison, for example by creating databases of fund portfolio information to be used for data analysis. Forms N–CSR and N–Q are not currently filed in a structured format, which results in reports that are comprehensible to a human reader, but are not suitable for automated processing, and generally require filers to reformat the required information from the way it is stored for normal business uses.[441] By contrast, requiring that reports on Form N–PORT be structured would allow the Commission and other potential users to combine information from more than one report in an automated way to, for example, construct a data base of fund portfolio investments without additional manual entry.[442]

Most commenters generally supported reporting in a structured format. Several commenters supported our proposal to require reports on Form N–PORT in XML,[443] while others advocated for the eXtensible Business Reporting Language (''XBRL''), a tagged system that is based on XML and was created specifically for the purpose of reporting financial and business information.[444] Another commenter noted that the Commission should standardize the formatting requirements across all fund reporting in order to ease the burden on funds that would have to comply with different formatting requirements (*i.e.,* ASCII/TXT, HTML, XBRL, XML).[445] Finally, another commenter noted that much of the information that will be reported in reports on Form N–PORT is already available in other Commission filings and is duplicative.[446]

Based upon our experiences with Forms N–MFP and PF, both of which require filers to report information in an XML format, we believe that requiring funds to report information on Form N–PORT in an XML format is the most appropriate method of structuring this type of data.[447] Moreover, the

[437] *See* Instruction G to Form N–PORT (''A Fund may explain any of its methodologies, including related assumptions, in Part E.'').

[438] *See supra* footnote 27 (discussing current requirements to transmit reports to shareholders)*; infra* section II.C (discussing our amendments to Regulation S–X).

[440] *See* Part F of Form N–PORT.

[441] Forms N–CSR and N–Q are required to be filed in HTML or ASCII/SGML. *See* rule 301 of Regulation S–T [17 CFR 232.301]; EDGAR, Filer Manual—Volume II, Version 27 (June 2014) at 5–1, *available at https://www.sec.gov/info/edgar/edgarfm-vol2-v27.pdf*.

[442] *See, e.g.,* IDC Comment Letter (''We fully support the SEC's efforts to collect information in a structured data format to enhance its ability to aggregate and analyze the information and data.''); *but see* Comment Letter of John Wahh (May 27, 2015) (''Wahh Comment Letter'') (questioning why the Commission needs to require structured data for funds); Comment Letter of L.A. Schnase (July 2, 2015) (''Schnase Comment Letter'') (questioning whether requiring structured reporting is appropriate or necessary for fund filings). *See also* Proposing Release, *supra* footnote 7, at 92–93.

[443] *See, e.g.,* SIFMA Comment Letter I; ICI Comment Letter; Morningstar Comment Letter (''We believe a single standard XML framework, as either an extension of current schema or an alignment with the emerging interoperability of the ISO standard, could ease reporting burdens.'').

[444] *See, e.g.,* Comment Letter of XBRL US (Aug. 11, 2015) (''XBRL US Comment Letter''); Comment Letter of Deloitte & Touche LLP (Aug. 11, 2015) (''Deloitte Comment Letter''); *but see* Morningstar Comment Letter (''Extensible Business Reporting Language has had very limited success, and certain aspects of the standard are too lenient for regular data validation.'').

[445] *See* Schnase Comment Letter (Commission should also ease the burdens on funds by allowing funds to input their data through a pre-formatted web portal or web form). Based on staff experience with XML filings, we believe that it is actually less burdensome for most funds to report fund information directly into an XML filing, rather than go through the time consuming exercise of manually entering fund data into a pre-formatted web form.

[446] *See* Wahh Comment Letter.

[447] We anticipate that the XML structured data file would be compatible with a wide range of open

interoperability of data between Forms N–MFP, PF, and N–PORT will aid the staff with cross-checking information reported to the Commission and in monitoring the fund industry.[448] As discussed further below in the economic analysis, the XML format will also improve the quality of the information disclosed by imposing constraints on how the information will be provided, by providing a built-in validation framework of the data in the reports.[449] While we acknowledge that some of the information we are requiring in Form N–PORT is duplicative to information filed in other forms, filing this information in an XML format will allow the staff to more efficiently review and analyze data for industry trends and risk monitoring purposes. We are therefore adopting the requirement that reports on Form N–PORT be filed in an XML format as proposed.[450]

We considered, as several commenters suggested, alternative formats to XML, such as XBRL. However, while XBRL allows issuers to capture the rich complexity of financial information presented in accordance with GAAP, we believe that XML is more appropriate for the reporting requirements that we are adopting. Form N–PORT, as well as Form N–CEN, as adopted, will contain a set of relatively simple characteristics of the fund's portfolio- and position-level data, such as fund and class identifying information, that is more suited for XML than XBRL, as explained further in section III.F below.

We also considered, as one commenter suggested, ways to standardize the formatting requirements across all fund reporting. However, based on staff experience reviewing fund filings, we believe that different filing formats (*e.g.,* PDF, HTML, XML) are appropriate for different types of filings, depending on their uses. For example, while PDF and HTML filings might be appropriate based on the filer, the content, and the end-user of the data, the PDF and HTML formats are not designed for conveying large quantities of data that require more robust validations to ensure data quality and consistency for aggregation, comparison, and analysis purposes.[451]

We proposed that funds report information on Form N–PORT on a monthly basis, no later than 30 days after the close of each month.[452] For the reasons discussed herein, and consistent with current disclosure practices, only information reported for the third month of each fund's fiscal quarter would be publicly available, and such information would not be made public until 60 days after the end of the third month of the fund's fiscal quarter.[453]

Several commenters requested that we instead require quarterly reporting, either permanently or for an initial period, citing to either data security concerns (discussed below), the increased filing burdens of Form N–PORT, or both.[454] However, the quarterly portfolio reports that the Commission currently receives on Forms N–Q and N–CSR can quickly become stale due to the turnover of portfolio securities and fluctuations in the values of portfolio investments. Monthly portfolio reporting will increase the frequency of portfolio reporting, which we believe will be useful to the staff for fund monitoring, particularly in times of market stress. This will also triple the frequency that data is reported to the Commission in a given year, as well as ensure that the Commission has more current information, which should in turn enhance the ability of staff to perform analyses of funds in the course of monitoring for industry trends, or identifying issues for examination or inquiry.

Notwithstanding data security concerns, which are discussed further below, commenters generally supported the proposed requirement for monthly reporting.[455] However, some commenters requested that we extend the monthly reporting deadline from 30 days to a longer period, such as 45 or 60 days.[456] Commenters noted that the data required by Form N–PORT resides on multiple platforms, including with third-party service providers, and that the time it will take to compile data, verify it, and convert it to an XML filing format is significant.[457] Additionally, one commenter stated that funds that have high volumes of as-of trades, such as funds that invest heavily in bonds and derivatives, could take longer to complete their month-end reconciliations.[458] Finally, the same commenter noted that retrieving information from multiple portfolio managers of sub-advised funds could also delay the process of month-end reconciliations.[459] Other commenters requested that we revise the filing periods for closed-end funds because closed-end funds may not have approved NAVs for 45-days or longer following month-end.[460]

We are requiring that funds file reports on Form N–PORT within 30 days of month-end. Based on staff experience with funds and fund filings, we believe that 30 days is sufficient time to report this information. Separately, we believe that requiring funds to file reports more than 30 days after month end will result in less timely data being submitted to the

source and proprietary information management software applications. Continued advances in structured data software, search engines, and other web-based tools may further enhance the accessibility and usability of the data. *See, e.g.,* Money Market Fund Reform, Investment Company Act Release No. 29132 (Feb. 23, 2010) [75 FR 10059 (Mar. 4, 2010)] (''Money Market Fund Reform 2010 Release'') at n. 341.

[448] *See* Morningstar Comment Letter.

[449] *See infra* section III.B.2.

[450] *See also infra* section II.D.1.

[451] *See id.*

[452] Commission staff understands that certain funds currently report their investments to shareholders as of the last business day of the reporting period, while other funds report their investments as of the last calendar day of the reporting period. In recognition of this fact, and in an effort to avoid disruptions to current fund operations, the information reported on Form N–PORT may reflect the fund's investments as of the last business day, or last calendar day, of the month for which the report is filed.

[453] As discussed above, portfolio schedules are currently available to the public in reports that are mailed to shareholders or filed with the Commission either 60 or 70 days following the end of each reporting period. *See supra* footnote 27 and accompanying text.

[454] *See, e.g.,* Comment Letter of Dodge & Cox (Aug. 7, 2015) (''Dodge & Cox Comment Letter'') (data security concerns); ICI Comment Letter (Commission should ensure that it is prepared to protect sensitive fund data before requiring monthly disclosures of fund holdings); MFS Comment Letter (same); Oppenheimer Comment Letter (data security concerns and burden of monthly filings); Carol Singer Comment Letter.

[455] Vanguard Comment Letter (''We generally support filing the new Form N–PORT on a monthly basis with a 30-day lag.''); Morningstar Comment Letter; Franco Comment Letter.

[456] *See, e.g.,* Vanguard Comment Letter (45 days after month end); MFS Comment Letter (same); ICI Comment Letter (same); T. Rowe Price Comment Letter (same); BlackRock Comment Letter (same); SIFMA Comment Letter I (45–60 day reporting window); SIFMA Comment Letter II (same); Dreyfus Comment Letter (45–60 days after month-end and move to bi-monthly or quarterly reporting); CRMC Comment Letter (60 days after close of month); Pioneer Comment Letter (same); Invesco Comment Letter (same); Dechert Comment Letter (longer period, generally); *but see* State Street Comment Letter (Supporting 30 day deadline, but requesting an additional 15 days for the first-year of reporting).

[457] *See, e.g.,* Vanguard Comment Letter; MFS Comment Letter.

[458] *See* State Street Comment Letter. The same commenter also noted that funds that have high volumes of over-the-counter derivatives trading would need more time to file reports on Form N–PORT because it would take the funds time to collect all of the fully executed derivatives contracts from counterparties before reporting at month-end.

[459] *See id.*

[460] *See* Comment Letter of UMB Fund Services, Inc. (Aug. 14, 2015); Carol Singer Comment Letter. Based upon staff experience, it is our understanding that most closed-end funds strike their NAV on at-least a monthly basis. Those that do not can do so, for Form N–PORT reporting purposes, by using the internal methodologies consistent with how they report internally and to current and prospective investors. *See* General Instruction G of Form N–PORT.

Commission, which will reduce the utility of portfolio information to the Commission. Therefore, we believe a 30-day filing period strikes the proper balance even though we recognize that preparing reports on Form N–PORT will initially require a significant effort by funds.[461] Moreover, as one commenter noted while advocating for bi-monthly or quarterly reporting, lag times of more than 30 days would make monthly reporting impractical, as reports would overlap with preparation time.[462] We also note that several commenters also noted that reporting on the same basis the fund uses to calculate NAV (which is generally on a T+1 basis), which the Form, as adopted, explicitly requires, will take less time relative to reporting on a T+0 basis, which is used for financial reporting.[463] For each of these reasons, we are adopting, as proposed, our requirement for reports on Form N–PORT to be filed with the Commission within 30 days of month-end.[464]

Several commenters discussed the need for appropriate data security practices for the data on Form N–PORT that will be kept nonpublic.[465] In many cases, these commenters stated that these data items could be competitively sensitive and that a breach could result in harm to the reporting funds. Some commenters also highlighted the need for appropriate data security safeguards should the Commission determine in the future to share any of the nonpublic information with one or more other regulatory agencies.[466] Some of these commenters believed that, before requiring nonpublic reports on Form N–PORT, the Commission should complete an independent, third-party review and verification of its data security practices and recommended that the Commission revisit its practices on an ongoing basis.[467] Some commenters suggested that the Commission provide additional information about its data security controls or its protocols for responding to an identified breach.[468] As discussed above, several commenters requested that we require quarterly, rather than monthly, reports on Form N–PORT, citing to data security concerns.[469]

The Commission recognizes the importance of sound data security practices and protocols for nonpublic information, including information that may be competitively sensitive. The Commission has substantial experience with the storage and use of nonpublic information reported on Form PF, delayed public disclosure of information on Form N–MFP (although the Commission no longer delays public disclosure of reports on Form N–MFP), as well as other nonpublic information that the Commission handles in its course of business. Commission staff is carefully evaluating the data security protocols that will apply to nonpublic data reported on Form N–PORT in light of the specific recommendations and concerns raised by commenters. Drawing on its experience, the staff is working to design controls and systems for the use and handling of Form N–PORT data in a manner that reflects the sensitivity of the data and is consistent with the maintenance of its confidentiality.[470] In advance of the compliance date, we expect that the staff will have reviewed the controls and systems in place for the use and handling of nonpublic information reported on Form N–PORT.

4. Disclosure of Information Reported on Form N–PORT

As discussed above, we proposed that the information reported on Form N–PORT for the third month of each fund's fiscal quarter be made publicly available 60 days after the end of the Fund's fiscal quarter.[471] We also proposed that the information reported on Form N–PORT for the first and second months of each fund's fiscal quarter, and any information reported in Part D of the Form, not be made public.[472]

Comments were mixed on this aspect of the proposal. We received a number of comments objecting to the public disclosure of any information on Form N–PORT on a quarterly basis.[473] Others generally supported, or did not oppose, quarterly public disclosure of Form N–PORT, but requested that certain information items be kept nonpublic.[474] In discussing these alternatives, several commenters noted similarity to the data that the Commission collects on a nonpublic basis from private funds on Form PF.[475] Finally, some commenters called for more frequent public disclosure of the information on Form N–PORT, as the information could assist intermediaries and market professionals with evaluating whether funds are

[461] *See infra* section III.B.3.

[462] Dreyfus Comment Letter (advocating for bi-monthly or quarterly reporting, with 45–60 days to file reports on Form N–PORT).

[463] *See* Schwab Comment Letter (reporting that converting from T+1 to T+0 accounting would add approximately 6–10 days to the process of compiling data for Form N–PORT). Commenters acknowledged that reporting holdings on a T+1 basis would save time and compiling data for month-end reporting. Some commenters stated that 45-days would be needed to file reports on Form N–PORT on a T+0 basis, however they suggested that 30 days could be sufficient with T+1 reporting. *See* Schwab Comment letter (urging the use of T+1 accounting or ''alternatively'' recommending a minimum of 45 days); Wells Fargo Comment Letter (recommending a 45 day reporting period if T+0 reporting is required); Others explicitly recommended a 45-day filing period even if we allow filing on T+1 basis. *See* ICI Comment Letter; Oppenheimer Comment Letter.

[464] *See* General Instruction A of proposed Form N–PORT.

[465] *See* CRMC Comment Letter; Dodge & Cox Comment Letter (recommending that the reporting requirement be suspended in the event of a data security breach); IDC Comment Letter; ICI Comment Letter; MFS Comment Letter; Comment Letter of Mutual Fund Directors Forum (Aug. 11, 2015) (''Mutual Fund Directors Forum Comment Letter'') (recommending that the Commission implement data security recommendations of the Government Accountability Office); Oppenheimer Comment Letter; SIFMA Comment Letter II; Simpson Thacher Comment Letter; State Street Comment Letter; Vanguard Comment Letter (recommending that the compliance period be extended to allow more time for the Commission to assess the data security of its systems).

[466] *See* CRMC Comment Letter; ICI Comment Letter.

[467] *See* IDC Comment Letter (noting recent report by the Government Accountability Office); ICI Comment Letter (noting recent reports by the Government Accountability Office and the Commission's Office of Inspector General and recommending specific data security practices); MFS Comment Letter; Oppenheimer Comment Letter (noting recent reports by the Government Accountability Office and the Commission's Office of Inspector General).

[468] *See* ICI Comment Letter (recommending that the Commission notify affected funds in the event of a breach); MFS Comment Letter; SIFMA Comment Letter II; Simpson Thacher Comment Letter (recommending that the Commission issue a release addressing data security and accepting public comments before adopting new reporting requirements).

[469] *See supra* footnote 454 and accompanying text.

[470] *See* Form PF Adopting Release, *supra* footnote 80. We recognize that there are differences between the N–PORT reporting requirements and the Form PF reporting requirements, such as frequency, granularity, and registration status, and our recognition of these differences guides our evaluation of appropriate measures for preservation of data security for reported information.

[471] *See* General Instruction F of proposed Form N–PORT.

[472] *Id.*

[473] *See* SIFMA Comment Letter II (''The fund's quarterly data could be mined for trading patterns in order to replicate the portfolio's underlying strategy (*e.g.,* the underlying analytics or equations behind a quantitative strategy.) This could lead to an attempt to front-run a fund.''); *see also* SIFMA Comment Letter I; Schwab Comment Letter; Fidelity Comment Letter; T. Rowe Price Comment Letter.

[474] *See, e.g.,* ICI Comment Letter (portfolio risk metrics, delta, liquidity determinations, country of risk and derivatives financing rates should be kept non-public.); BlackRock Comment Letter (risk metrics); Invesco Comment Letter (portfolio level risk metrics, derivatives information, illiquidity determinations, and securities lending information should remain non-public); Oppenheimer Comment Letter (risk metrics, illiquidity determinations, country of risk determinations, derivatives payment terms (including financing rates), and securities lending fees and revenue sharing splits should be kept non-public) SIFMA Comment Letter II (risk metrics; illiquidity determinations; country of risk; and derivative financing rates, custom baskets); BlackRock Derivatives Comment Letter (derivatives positions).

[475] *See, e.g.,* SIFMA Comment Letter I; ICI Comment Letter; BlackRock Comment Letter; *see also* AIMA Comment Letter; Confluence Comment Letter.

consistently executing their stated portfolio strategies.[476] These comments are addressed below.

Most commenters who addressed this issue did not support the public reporting of all Form N–PORT filings (*i.e.,* public disclosure on a monthly basis).[477] Such commenters generally believed that disclosure of all month-end Form N–PORT filings could increase the risk of front-running or free-riding, ultimately harming investors.[478] These commenters noted that more frequent disclosures would provide non-investors with free access to the research and analysis that investors pay advisers for through management and other fees.

As discussed further below, commenters that believed that Form N–PORT should remain nonpublic, or that believed certain information items should remain nonpublic, raised two concerns. First, some commenters argued that some of the information on Form N–PORT could potentially be proprietary, and lead to harm to the fund and its investors if publicly released. For example, for derivatives, payment terms, including financing rates, are negotiated rates; as a result, commenters expressed concern that public disclosure may harm a fund's ability to negotiate favorable terms on behalf of its investors.[479] Similarly commenters argued that disclosing detailed information on the components of nonpublic indexes could violate the intellectual property rights that index providers might assert and, as a result, harm investors who may lose the benefit of index products that would no longer be available to them, should an index provider choose to no longer do business with a fund, rather than have its index's components made publicly available.

Second, some commenters noted that if certain information items, such as the proposed risk metrics, monthly return information, and country of risk are publicly disclosed, it could potentially confuse and mislead investors.[480] For example, some commenters argued that risk metrics are calculated using inputs and assumptions that could make them subjective and investors could mistakenly seek to compare risk metrics across funds or believe that risk metric data represents a fund's overall risk.[481] Similarly, monthly return data (including monthly returns attributable to derivatives) could cause investors to mistakenly focus on short-term results or otherwise confuse investors.[482] Likewise, commenters noted that the country of risk determination is subjective and open to different determinations among funds and advisers which may lead to investor confusion.[483] Finally, some commenters that argued Form N–PORT should remain completely nonpublic questioned the utility of the information in Form N–PORT for investors.[484]

Subject to discrete information items discussed further below, the Commission is adopting as proposed the public disclosure of funds' quarter-end Form N–PORT with a 60-day delay from the reporting period. We decline to adopt the suggestion of some commenters that all reports filed on Form N–PORT remain nonpublic. The Commission believes that the public reporting requirements of Form N–PORT generally are appropriate given the filer's status as a registered investment company with the Commission, which is based on the tenets of disclosure and transparency to fund investors, and not as a private fund.[485] Moreover, as we discuss below, funds currently publicly report holdings information on a quarterly basis through Forms N–CSR and N–Q. We also note that Section 45(a) of the Investment Company Act requires information in reports filed with the Commission pursuant to the Investment Company Act be made public unless we find that public disclosure is neither necessary nor appropriate in the public interest or for the protection of investors.[486] For the reasons discussed above, we continue to believe that public disclosure of information about most of the items required on Form N–PORT is appropriate in the public interest, as well as for the protection of investors. Although Form N–PORT is not primarily designed for disclosing information to individual investors, we believe that many investors, particularly institutional investors, as well as academic researchers, financial analysts, and economic research firms, could use the information reported on Form N–PORT to evaluate fund portfolios and assess the potential for risks and returns of a particular fund.[487] Accordingly, whether directly or through third parties, we believe that the periodic public disclosure of the information to be reported on Form N–PORT could benefit fund investors. Moreover, we generally believe that investors should have access to portfolio information in a structured data format, and be given the opportunity to make their own decisions regarding the usefulness of the data. We have, however, made several modifications to our proposals, discussed above, in response to commenters.

We believe that, on balance, investors would benefit from the information that will be reported on Form N–PORT. Likewise, the Commission continues to believe that public availability of information, including the types of information that will be collected on Form N–PORT that may not currently be reported or disclosed by funds, can benefit investors and other potential users by assisting them in making more informed investment decisions.

We continue to recognize, however, that more frequent portfolio disclosure than is currently required could potentially harm fund shareholders by expanding the opportunities for professional traders to exploit this information by engaging in predatory trading practices, such as trading ahead of funds, often called ''front-running.'' [488] Similarly, the Commission is sensitive to concerns that more frequent portfolio disclosure may facilitate the ability of non-investors to ''free ride'' on a mutual fund's investment research, by allowing those investors to reverse engineer and

[476] *See* Franco Comment Letter (requesting that all portfolio filings be made public 180 to 360 days after filing); Morningstar Comment Letter (requesting public disclosure on a monthly basis reasoning that many fund complexes currently make portfolio holdings information public on at least a monthly basis).

[482] *See* CRMC Comment Letter; SIFMA Comment Letter I.

[483] *See, e.g.,* MFS Comment Letter; Pioneer Comment Letter; Schwab Comment Letter; Oppenheimer Comment Letter.

[484] *See, e.g.,* SIFMA Comment Letter I; Schwab Comment Letter; Fidelity Comment Letter.

[485] *See, e.g.,* section 45(a) of the Investment Company Act (requiring information in reports filed with the Commission pursuant to the Investment Company Act be made public unless we find that public disclosure is neither necessary nor appropriate in the public interest or for the protection of investors). Regarding those commenters that compared the information that Form N–PORT requires to that in Form PF, we note that Form PF is filed by private funds pursuant to Advisers Act section 204(b), making such data subject to the confidentiality protections applicable to data required to be filed under that section.

[486] *See id.*

[487] *See* Russ Wermers Comment Letter; *see generally* Franco Comment Letter (''. . . the Commission [should] adopt a more expansive view of its disclosure rulemaking mandate and more specifically a view that considers layered forms of its disclosure (and disclosure documents) that meet the needs of different constituent end-users of disclosure.'').

[488] *See, e.g.,* Quarterly Portfolio Holdings Adopting Release, *supra* footnote 421, at n. 128 and accompanying text.

''copycat'' the fund's investment strategies and obtain for free the benefits of fund research and investment strategies that are paid for by fund shareholders.[489] Both front-running and copycatting can adversely affect funds and their shareholders.[490] We raised such concerns in the Proposing Release, and, many commenters that discussed public disclosure of portfolio information agreed with these concerns.[491] However, one commenter argued that such effects were unlikely.[492]

We recognize that some free-riding and front running activity can occur even with quarterly disclosure, with the potential for investor harm.[493] Conversely, however, and as we noted in the Proposing Release, we previously received petitions for quarterly disclosures, noting numerous benefits that quarterly disclosure of portfolio schedules could provide, including allowing investors to better monitor the extent to which their funds' portfolios overlap, and hence enabling investors to make more informed asset allocation decisions, and providing investors with more information about how a fund is complying with its stated investment objective.[494] The Commission cited many of these benefits when it adopted Form N–Q, and based on staff experience and outreach, believes that the current practice of quarterly portfolio disclosures provides benefits to investors, notwithstanding the opportunities for front-running and reverse engineering it might create.[495]

We have considered both the benefits to the Commission, investors, and other potential users of public portfolio disclosures, including the reporting of such disclosures in a structured format and additional portfolio information that will be required on Form N–PORT, as well as the potential costs associated with making that information available to the public, which could be ultimately borne by investors.[496] Accordingly, in an attempt to minimize these potential costs and competitive harms from front-running and reverse engineering, we are requiring public disclosure of fund reports on Form N–PORT once each quarter, rather than monthly. This maintains the status quo regarding the frequency and timing of public portfolio disclosure, while providing investors and other potential users with the benefit of having more detailed portfolio information in a structured format.

As commenters pointed out, we recognize that we are requiring additional data points in Form N–PORT, as well as requiring the data to be structured, which represents a change regarding the scope of information available to the public. As discussed above, however, we believe that generally this additional information can benefit investors. Additionally, while we recognize that an increase in the amount of publicly available information has the potential to facilitate predatory trading, as discussed in section III.B.3 below, we do not believe that quarterly public disclosure with a 60-day lag will have a significant, additional competitive impact. We discuss commenters' concerns about specific data items below.

Funds are currently required to disclose their portfolio investments quarterly, via public filings with the Commission and semi-annual reports distributed to shareholders, with the exception of ''miscellaneous securities'' which funds are not required to disclose pursuant to Regulation S–X. Consequently, the Commission will not make public the information reported for the first and second months of each fund's fiscal quarter on Form N–PORT, nor any ''miscellaneous securities'' reported for the third month of each fund's fiscal quarter.[497] Only information reported for the third month of each fund's fiscal quarter on Form N–PORT will be made publicly available, and such information will not be made public until 60 days after the end of the third month of the fund's fiscal quarter.[498]

We continue to believe that maintaining the status quo with regard to the frequency and the time lag of portfolio reporting will allow the Commission, the fund industry, and the marketplace to assess the impact of the structured and more detailed data reported on Form N–PORT on the mix of information available to the public, and the extent to which these changes might affect the potential for predatory trading, before determining whether more frequent or more timely public disclosure would be beneficial to investors in funds.[499] For the reasons discussed above, we find that it is neither necessary nor appropriate in the public interest or for the protection of investors to make information reported for the first and second months of each fund's fiscal quarter on Form N–PORT or ''miscellaneous securities'' reported for the third month of each fund's fiscal quarter publicly available.[500]

As noted above, some commenters, while generally supporting quarterly

[489] *See, e.g., id.* at n. 129 and accompanying text.

[490] *See* ICI, *The Potential Effects of More Frequent Portfolio Disclosure on Mutual Fund Performance,* Perspective Vol. 7, No. 3 (June 2001) (''Potential Effects of More Frequent Disclosure''), *available at http://www.ici.org/pdf/per07-03.pdf.*

[491] See, *e.g.,* ICI Comment Letter (noting the risk of predatory trading with an increase in frequency of public disclosure of fund portfolio holdings); SIFMA Comment Letter I (same); Simpson Thacher Comment Letter (same); Vanguard Comment Letter (same); *see also* Proposing Release, *supra* footnote 7, at 33613–33614.

[492] *See* Morningstar Comment Letter (arguing that reverse-engineering concerns are largely unfounded).

[493] *See infra* section III.B.3

[494] *See* Quarterly Portfolio Holdings Adopting Release, *supra* footnote 421, at n. 32 and accompanying text (discussing prior investor petitions for rulemaking). Investors that petitioned for quarterly disclosure also argued that increasing the frequency of portfolio disclosure would expose ''style drift'' (when the actual portfolio holdings of a fund deviate from its stated investment objective) and shed light on and prevent several potential forms of portfolio manipulation, such as ''window dressing'' (buying or selling portfolio securities shortly before the date as of which a fund's holdings are publicly disclosed, in order to convey an impression that the manager has been investing in companies that have had exceptional performance during the reporting period) and ''portfolio pumping'' (buying shares of stock the fund already owns on the last day of the reporting period, in order to drive up the price of the stocks and inflate the fund's performance results).

[495] *See id.*

[496] In doing so, we also considered the various comment letters that we received regarding our proposal to make the third month's report public, and the costs and benefits of doing so. *See, e.g.,* SIFMA Comment Letter II; SIFMA Comment Letter I; Schwab Comment Letter; Fidelity Comment Letter; T. Rowe Price Comment Letter; *see also* Franco Comment Letter; Morningstar Comment Letter.

[497] *See* General Instruction F of Form N–PORT.

[498] We are maintaining the status quo of public disclosure of quarterly information based upon each fund's fiscal quarters, rather than calendar quarters, to ensure that public disclosure of information filed on Form N–PORT will be concurrent with the public portfolio disclosures reported on a semi-annual fiscal year basis on Form N–CSR. We believe that such overlap will minimize the risks of predatory trading, because otherwise funds with fiscal year-ends that fall other than on a calendar quarter- or year-end will have their portfolios publicly available more frequently than funds with fiscal year-ends that fall on a calendar quarter- or year-end, thus increasing the risks to those funds discussed above related to potential front-running or reverse engineering.

[499] *See also supra* footnote 360 and accompanying text (non-public indexes and custom baskets); *supra* footnotes 395–399 and accompanying text (derivatives financing rates); *supra* footnote 203 and accompanying text (securities lending counterparties); *supra* footnote 281 and accompanying text (repurchase and reverse repurchase agreements).

[500] *See* section 45(a) of the Investment Company Act. Form N–PORT has also been modified from the proposal to clarify that the Commission does not intend to make public the information reported on Form N–PORT for the first and second months of each fund's fiscal quarter that that is identifiable to any particular fund or adviser or any information reported with regards to country of risk and economic exposure, delta, or miscellaneous securities, or explanatory notes related to any of those topics that is identifiable to any particular fund or adviser. *See* General Instruction F of Form N–PORT. However, the SEC may use information reported on Form N–PORT in its regulatory programs, including examinations, investigations, and enforcement actions.

disclosure on Form N–PORT, believed that certain information items should remain nonpublic. Some commenters believed that some of the information in Form N–PORT could contain potentially proprietary information, and lead to harm to the fund and its investors if publicly released. For example, commenters expressed concern that public disclosure of negotiated payment terms for derivatives, such as financing rates, could harm a fund's ability to negotiate favorable terms.[501] However, as we discussed above in section II.A.2.g.iv, we designed Form N–PORT to provide information sufficient to allow our staff, investors, and other potential users to better understand the investments held in a fund's portfolio. This necessarily involves disclosing the payment terms for derivative instruments a fund invests in. Without such information, valuing the risks and rewards of such an investment could be difficult for investors and other potential users. We therefore do not believe that it would be necessary or appropriate in the public interest for the benefit of investors to mask such information for all reports on Form N–PORT.

Similarly, as discussed above, commenters noted that disclosing detailed information on the components of nonpublic indexes could violate the intellectual property rights that index providers might assert. This could result in harm to investors who may lose the benefit of index products that would no longer be available to them, should an index provider choose to no longer do business with a fund, rather than have its index's components made public and open the index to front-running and reverse engineering.[502] As we discussed more fully above in section II.A.2.g.iv, we continue to believe that it is important for the Commission, investors, and other potential users to have transparency into a fund's exposures to assets, regardless of whether the fund directly holds investments in those assets or chooses to create those exposures through a derivatives contract.[503]

Commenters also objected to the public disclosure of securities lending information, such as the identity of borrowers and the aggregate value of securities on loan to a counterparty, as such disclosures could cause securities lending counterparties, in an attempt to keep their securities lending exposures private, to be less willing to borrow securities from funds.[504] However, as we stated in section II.A.2.g.v, above, public disclosure of this information will improve the ability of Commission staff, as well as investors, brokers, dealers, and other market participants to better understand the collateral received by funds and associated potential liquidity and market risks, as well as identify those instruments that one or more funds might have to sell in the event of default by borrowers. For similar reasons, one commenter requested that the identity of counterparties to repurchase and reverse repurchase agreements be kept nonpublic.[505] However, as indicated above in section II.A.2.g.iii, such information is routinely publicly disclosed in other contexts, and we are unaware of any evidence that such disclosures have resulted in competitive disadvantages to the entities required to make such disclosures.

As we discussed in section II.A.2.g.ii, one commenter noted that public disclosure on default, arrears, or deferred coupon payments raises competitive concerns when a debt security relates to an issuer that is a private company, as private borrowers may avoid registered funds in order to avoid public disclosure if the company becomes distressed. However, as we noted in that section, we believe that it is important that a fund's investors have access to this information so that they can make fully informed decisions regarding their investment.

Finally, some commenters believed that certain items could be misinterpreted by investors, resulting in investors being misled or confused. Specifically, some commenters believed that monthly return data (including monthly returns attributable to derivatives) could cause investors to mistakenly focus on short-term results or otherwise confuse investors.[506] We disagree. As discussed in section II.A.2.e above, we agree with another commenter that believed such disclosures could improve information to investors, and noted that many funds already disclose monthly returns.[507]

Several commenters also believed that investors would be unduly confused by the disclosure of the portfolio-level and position-level risk metrics.[508] We decline to make the portfolio-level risk metrics (DV01/DV100 and SDV01/SDV100) nonpublic but have determined to keep the position-level risk metrics (delta) nonpublic for all N–PORT filings.[509] We agree with commenters that the calculation of delta can require a number of inputs and assumptions.[510] As a result, reported deltas for the same or similar investment products could vary because of complex differences in methodologies and assumptions that are not reported on the form nor easily explained to investors. Moreover, the disclosure of delta could, for some investors, imply a false sense of precision about how a particular investment's valuation will change in volatile market conditions. However, we continue to believe that such information is useful for the Commission's monitoring purposes, as the Commission has the ability to contact funds directly, when necessary, to better understand a fund's methodologies and assumptions. Thus, upon consideration of the comments, we find that it is neither necessary nor appropriate in the public interest or for the protection of investors to make delta publicly available at this time.[511] We recognize that, like delta, inputs and assumptions are used for calculating DV01, DV100, and SDV01. We believe, however, that the fact that these metrics will not be reported at the position-level sufficiently mitigates the potential risks discussed above. Because these measures will not be reported by position-level, investors and other potential users will not be comparing different risk metrics for the same investment in different funds. Similarly, we believe that portfolio level risk metrics are less likely to imply a false sense of precision for some investors because such measures are, by design, the aggregation of each investment's assumptions and projections.[512]

For similar reasons, we intend to keep information reported for country of risk and economic exposure nonpublic.[513] We are persuaded by commenters that this information is evaluated by funds using multiple factors, making it subjective, and acknowledge that, while useful to the Commission in terms of understanding the country-specific risks, may convey a false level of

[513] *See supra* footnote 287 and accompanying and following text.

precision.[514] We also acknowledge arguments by commenters that disclosure of such information could stifle divergences in determinations and incentivize funds to seek homogenized determinations from third party firms, potentially rendering the information less useful to Commission staff than if it were not publicly disclosed.[515] For these reasons, we find that it is neither necessary nor appropriate in the public interest or for the protection of investors to make information reported for country of risk and economic exposure publicly available at this time.[516]

Lastly, as discussed above, we recognize that explanatory notes related to nonpublic items should be nonpublic as well.[517] As a result, we find that it is neither necessary nor appropriate in the public interest or for the protection of investors to make explanatory notes reported for delta or country of risk and economic exposure publicly available at this time.[518] However, explanatory notes related to other items on Form N–PORT will be publicly available.

B. Rescission of Form N–Q and Amendments to Certification Requirements of Form N–CSR

1. Rescission of Form N–Q

Along with our adoption of new Form N–PORT, we are also rescinding Form N–Q, as we proposed. Management companies other than SBICs are currently required to report their complete portfolio holdings as of the end of their first and third fiscal quarters on Form N–Q. Because the data reported on Form N–PORT will include the portfolio holdings information contained in reports on Form N–Q, we believe that Form N–PORT will render reports on Form N–Q unnecessarily duplicative. Therefore, we believe it is appropriate to rescind Form N–Q rather than require funds to report similar information to the Commission on two separate forms.

However, as noted earlier, we believe that individual investors and other potential users might prefer that portfolio holdings schedules for the first and third quarters continue to be presented using the form and content specified by Regulation S–X, which investors are accustomed to viewing in reports on Form N–Q and in shareholder reports. Therefore, and as proposed, we are requiring that, for reports on Form N–PORT for the first and third quarters of a fund's fiscal year, the fund will attach its complete portfolio holdings for that fiscal quarter, presented in accordance with the schedules set forth in §§ 210.12–12 to 12–14 of Regulation S–X [17 CFR 210.12–12—12–14].

We requested comments on our proposed rescission of Form N–Q. One commenter supported our proposed rescission of Form N–Q.[519] Other commenters recommended maintaining Form N–Q, noting that Form N–PORT might not serve the interests of investors, while Form N–Q is an established channel through which funds currently provide pertinent information to shareholders.[520] We understand these concerns, but as noted above because the data reported on Form N–PORT will include the portfolio holdings information that would be contained in reports on Form N–Q, we believe that Form N–PORT will render reports on Form N–Q unnecessarily duplicative. We are also concerned about the possibility of investor confusion that may arise in the event of simultaneous public disclosure of portfolio reporting information for the same reporting periods on Form N–PORT as well as on Form N–Q. For these reasons, we are rescinding Form N–Q.

2. Amendments to Certification Requirements of Form N–CSR

In connection with the Commission's implementation of the Sarbanes-Oxley Act of 2002, Form N–Q and Form N–CSR currently require the principal executive and financial officers of the fund to make quarterly certifications relating to (1) the accuracy of information reported to the Commission, and (2) disclosure controls and procedures and internal control over financial reporting.[521] Rescission of Form N–Q will eliminate certifications as to the accuracy of the portfolio schedules reported for the first and third fiscal quarters.

Under today's amendments, and as we proposed, the certifications as to the accuracy of the portfolio schedules reported for the second and fourth fiscal quarters on Form N–CSR will remain. However, and as we proposed, we are amending the form of certification in Form N–CSR to require each certifying officer to state that he or she has disclosed in the report any change in the registrant's internal control over financial reporting that occurred during the most recent fiscal half-year, rather than the registrant's most recent fiscal quarter as currently required by the form.[522] Lengthening the look-back of this certification to six months, so that the certifications on Form N–CSR for the semi-annual and annual reports will cover the first and second fiscal quarters and third and fourth fiscal quarters, respectively, will fill the gap in certification coverage regarding the registrant's internal control over financial reporting that will otherwise occur once Form N–Q is rescinded. To the extent that certifications improve the accuracy of the data reported, removing such certifications could have negative effects on the quality of the data reported. Likewise, if the reduced frequency of the certifications affects the process by which controls and procedures are assessed, requiring such certifications semi-annually rather than quarterly could reduce the effectiveness of the fund's disclosure controls and procedures and internal control over financial reporting. However, we expect such effects, if any, to be minimal because certifying officers will continue to certify portfolio holdings for the fund's second and fourth fiscal quarters and will further provide semi-annual certifications concerning disclosure controls and procedures and internal control over financial reporting that would cover the entire year.

Commenters generally agreed with our proposed approach, although several commenters suggested maintaining Form N–Q on the grounds that Form N–PORT may not serve the interests of investors or because of their assertions that reports on Form N–PORT

[514] *See, e.g.,* ICI Comment Letter; Pioneer Comment Letter; Schwab Comment Letter; MFS Comment Letter; SIFMA Comment Letter II; Morningstar Comment Letter (commenting on the usefulness of this information to investors, but not offering an opinion as to whether this information should be publicly disclosed).

[515] *See, e.g.,* ICI Comment Letter; Oppenheimer Comment Letter.

[516] *See* section 45(a) of the Investment Company Act. We note that we are, for similar reasons, determining not to require disclosure of a fund's determination of the liquidity classification assigned to each investment as required to be reported on Form N–PORT. Liquidity Adopting Release, *supra* footnote 9.

[518] *See* section 45(a) of the Investment Company Act.

[519] *See* Schnase Comment Letter.

[520] *See* Schwab Comment Letter; Fidelity Comment Letter; SIFMA Comment Letter I.

[521] *See* Item 3 of Form N–Q (certification requirement); Form N–Q Adopting Release, *supra* footnote 421; Item 12 of Form N–CSR (certification requirement); Certification of Management Investment Company Shareholder Reports and Designation of Certified Shareholder Reports as Exchange Act Periodic Reporting Forms; Disclosure Required by Sections 406 and 407 of the Sarbanes-Oxley Act of 2002, Investment Company Act Release No. 24914 (Jan. 27, 2003) [68 FR 5348 (Feb. 3, 2003)] (adopting release for Form N–CSR).

[522] Amended Item 11(b) of Form N–CSR; amended paragraph 4(d) of certification exhibit of Item 12(a)(2) of Form N–CSR.

should be nonpublic.[523] For the reasons discussed above, and since we have determined not to make all filings of N–PORT nonpublic, we are rescinding Form N–Q and amending the certification requirements in Form N–CSR, as proposed.

C. Amendments to Regulation S–X

1. Overview

As part of our larger effort to modernize the manner in which funds report holdings information to investors, we are adopting amendments to Regulation S–X, which prescribes the form and content of financial statements required in registration statements and shareholder reports.[524] As discussed above, many of the amendments to Regulation S–X, particularly the amendments to the disclosures concerning derivative contracts, are similar to the requirements concerning disclosures of derivatives that will be required on reports on Form N–PORT.[525] The amendments to Regulation S–X will, among other things, require similar disclosures in a fund's financial statements in order to provide investors, particularly individual investors, with clear and consistently presented disclosures across funds concerning fund investments in derivatives in an unstructured format.

As outlined below, we are adopting amendments to Articles 6 and 12 of Regulation S–X that will: (1) Require new, standardized disclosures regarding fund holdings in open futures contracts, open forward foreign currency contracts, and open swap contracts,[526] and additional disclosures regarding fund holdings of written and purchased option contracts; (2) update the disclosures for other investments and investments in and advances to affiliates, as well as reorganize the order in which some investments are presented; and (3) amend the rules regarding the general form and content of fund financial statements. Our amendments will require prominent placement of details regarding investments in derivatives in a fund's schedule of investments, rather than allowing such schedules to be disclosed in the notes to the financial statements.

The comments that we received relating to our proposal to amend Regulation S–X were generally supportive of our efforts to improve the information that funds report to shareholders and the Commission.[527] However, commenters did provide comments on many aspects of our proposal, which we discuss below.

The rules that we are adopting will renumber the current schedules in Article 12 of Regulation S–X and break out the reporting of derivatives currently on Schedule 12–13 into separate schedules.[528] These changes are summarized in Figure 1, below.

---

[523] *See, e.g.,* ICI Comment Letter (agreeing with the proposed approach); State Street Comment Letter (same). *See also* Schwab Comment Letter (stating that Form N–PORT might not serve the interests of investors); Fidelity Comment Letter (same); SIFMA Comment Letter I (stating that reports on Form N–PORT should be nonpublic).

[524] *See* rule 1–01, *et seq.* of Regulation S–X [17 CFR 210.1–01, *et seq.*]. While ''funds'' are defined in the preamble as registered investment companies other than face-amount certificate companies, and any separate series thereof—*i.e.,* management companies and UITs—we note that our amendments to Regulation S–X apply to both registered investment companies and BDCs. *See infra* section II.C.6. Therefore, throughout this section, when discussing fund reporting requirements in the context of our amendments to Regulation S–X, we are also including changes to the reporting requirements for BDCs.

[525] *See supra* section II.A.2.g.iv.

[526] We recognize that under the federal securities laws, certain derivatives fall under the definition of securities, notwithstanding, for purposes of our amendments to Regulation S–X, we expect funds to adhere to the requirements of the disclosure schedules for the relevant derivative investment, regardless of how it would be defined under the federal securities laws. *See, e.g.,* rule 12–13C of Regulation S–X (Open swap contracts).

[527] *See, e.g.,* Comment Letter of Ernst & Young LLP (Aug. 10, 2015) (''EY Comment Letter'') (''We agree that many of these amendments would improve the transparency and comparability of investment company financial statements for their intended users.''); Deloitte Comment Letter (''We believe that the proposed rule related to the Commission's modernization project is consistent with the SEC's stated objective of improving the type and format of information regarding fund activities that investment companies provide to the Commission and investors . . . .''); SIFMA Comment Letter I (''We support the Commission's initiative to enhance and standardize the disclosure of derivatives and other portfolio investments in fund financial statements and believe that most of the proposed amendments to Regulation S–X will achieve that goal.''); *see also* AICPA Comment Letter. One commenter recommended that the Commission dispense with any requirement for position-level reporting of information regarding derivatives, as this information could confuse or mislead investors and could contain confidential information relating to a fund's investment strategy. Simpson Thacher Comment Letter. However, Article 12 of Regulation S–X already requires all position-level derivatives to be reported. Moreover, GAAP already requires a minimum level of position-level reporting of investments that does not distinguish between derivatives and securities. *See, e.g.,* FASB ASC 946–210–50–1 (Financial Services–Investment Companies-Disclosure—General-Schedule of Investments-Investment Companies Other than Nonregistered investments Partnerships).

[528] Throughout this release when we refer to a rule as it exists prior to any amendments we are making today, it is described as a ''current rule,'' while references to a rule as amended (or an existing rule that is not being amended today) are described as a ''rule'' or ''new rule.''

CHANGES TO ARTICLE 12 OF REGULATION S-X

CURRENT RULES	NEW RULES
12-12 (Investments in securities of unaffiliated issuers)	12-12 (Investments in securities of unaffiliated issuers)
12-12A (Investments—securities sold short)	12-12A (Investments—securities sold short)

Figure 1

We believe, and commenters agreed, that these amendments will assist comparability among funds, and increase transparency for investors regarding a fund's use of derivatives.[529] We have endeavored to mitigate burdens on the industry by requiring similar disclosures both on Form N–PORT and in a fund's financial statements.[530] As we discussed in the Proposing Release, we continue to believe that these amendments are generally consistent with how many funds are currently reporting investments (including derivatives).[531]

2. Enhanced Derivatives Disclosures

In 2011, as part of a wider effort to review the use of derivatives by management investment companies, we issued a concept release and request for comment on a range of issues.[532] We received comment letters on the concept release from a variety of stakeholders. Several commenters noted that holdings of derivative investments are not currently reported by funds in a consistent manner.[533] Commenters also suggested that more disclosure on underlying risks was necessary, including more information on counterparty exposure and reporting relating to the notional amount of certain derivatives.[534] Another commenter specifically requested that we revise Regulation S–X in order to keep ''financial reporting current with developments in the financial markets.'' [535]

We are adopting rules that will standardize the reporting of certain derivative investments for fund financial statements. While the current rules under Regulation S–X establish general requirements for portfolio holdings disclosures in fund financial statements, they do not prescribe standardized information to be included for derivative instruments other than options. Current rule 12–13 of Regulation S–X (Investments other than securities) requires limited information on the fund's investments other than securities—that is, the investments not disclosed under current rules 12–12, 12–12A, 12–12B, and 12–14.[536] Thus, currently, under Regulation S–X, a fund's disclosures of open futures contracts, open forward foreign currency contracts, and open swap contracts are generally reported in accordance with rule 12–13.

To address issues of inconsistent disclosures and lack of transparency as to derivative instruments, we are amending Regulation S–X by adopting new schedules for open futures contracts, open forward foreign currency contracts, and open swap contracts. We received several comments generally supporting the Commission's proposals to provide

[532] Derivatives Concept Release, *supra* footnote 38.

[533] Comments submitted in response to the Derivatives Concept Release are available at *http://www.sec.gov/comments/s7-33-11/s73311.shtml. See* Morningstar Derivatives Concept Release Comment Letter (''This is because fund companies are not reporting derivative holdings in a consistent manner and are not reporting derivative holdings in a manner that identifies the underlying risk exposure.''); Comment Letter of Rydex|SGI to Derivatives Concept Release (Nov. 7, 2011) (''Rydex|SGI Derivatives Concept Release Comment Letter'') (''However, the quality and extent of such derivatives disclosure still varies greatly from registrant to registrant.'').

[534] *See* Morningstar Derivatives Concept Release Comment Letter (''Notional exposure . . . is a better measure of risk''); Comment Letter of Oppenheimer Funds to Derivatives Concept Release (Nov. 7, 2011) (''Instead, counterparty risks incurred through the investments in derivatives . . . should be considered in a new SEC rulemaking that is primarily disclosure based.''); Rydex|SGI Derivatives Concept Release Comment Letter (recommending that funds that invest in derivatives should disclose notional exposure for non-exchanged traded derivatives and a fund's exposure to counterparties). Commenters to the FSOC Notice made similar observations relating to counterparty disclosures. *See, e.g.,* Americans for Financial Reform FSOC Notice Comment Letter (''Counterparty data is also often not available.''); Comment Letter of The Systematic Risk Council Comment to FSOC Notice (Mar. 25, 2015) (discussing the need to have information about investment vehicles that hold bank liabilities).

[535] Comment Letter of Stephen A. Keen to Derivatives Concept Release (Nov. 8, 2011).

[536] The current schedule to rule 12–13 requires disclosure of: (1) Description; (2) balance held at close of period—quantity; and (3) value of each item at close of period. *See* current rule 12–13 of Regulation S–X.

more information about derivatives.[537] Other commenters objected to the public reporting of position level derivatives reporting arguing instead that we should focus on portfolio-level metrics analysis as it would more accurately reflect an investment company's overall use of, and, more meaningfully reflect its net exposure to derivatives.[538] Funds are currently required to report their position-level derivatives in accordance with Article 12 of Regulation S–X.[539] We believe that it is important for funds to continue to report position-level data for all investments in order to allow investors and other interested parties to fully understand their fund's holdings.[540]

We are also modifying the current disclosure requirements for purchased and written option contracts. Finally, we are adopting certain instructions regarding the presentation of derivatives contracts that are generally consistent with instructions that are currently included, or that we are adding, in either rule 12–12 (Investments in securities of unaffiliated issuers) or current rule 12–13 (Investments other than securities).[541]

a. Open Option Contracts Written—Rule 12–13 (Current Rule 12–12B) and Rule 12–12 (as Applicable to Options Purchased)

We are amending the current disclosure of written option contracts substantially as proposed.[542] We proposed to add new columns to the schedule for written option contracts that would require a description of the contract (replacing the current column for name of the issuer), the counterparty to the transaction,[543] and the contract's notional amount, which we are adopting as proposed.[544] Thus, for rule 12–13, for each open written options contract, funds will be required to disclose: (1) Description; (2) counterparty; (3) number of contracts; (4) notional amount; (5) exercise price; (6) expiration date; and (7) value.[545]

We received several comments relating to the proposed requirement to disclose notional amounts for open options contracts. Some commenters recommended that the Commission either eliminate the proposed notional amount column for certain options contracts as they believed it was unnecessary because, unlike the notional amount of swaps and futures, which communicates economic exposure, the notional amount of an option, without a delta adjustment, may not represent an equivalent position in the underlying reference asset[546] or, in the alternative, provide a clear definition of notional amount.[547] As we previously stated in the Derivatives Proposing Release, we believe that, although derivatives vary widely in terms of structure, asset class, risk and potential uses, for most types of derivatives the notional amount generally serves as an important data point for investors that seek to determine a fund's economic exposure to an underlying reference asset or metric.[548] We do not believe that it is necessary to provide funds with a prescriptive formula for calculating notional amount because we understand funds today calculate their derivatives' notional amounts for risk management, reporting or other purposes, and that funds would be able to use these calculations for financial statement reporting. Moreover, the Commission has previously discussed different types of derivatives transactions that are commonly used by funds, together with the method by which we understood a fund, for risk management, reporting or other purposes, could calculate a derivatives notional amount.[549] We believe that Regulation S–X will allow a fund to use these calculations methods, as well as other reasonable methods, to determine notional amounts of such derivatives transactions.[550]

We also proposed to add an instruction (proposed instruction 3) to current rule 12–12, which is the schedule by which purchased options are required to be disclosed, that would require funds to provide all information required by proposed rule 12–13 for written option contracts.[551] One commenter noted that some options contracts allow for a range of underlying securities to be delivered and requested that funds only be required to identify the security type to be delivered, rather than the full description called for in instruction 3 to rules 12–12 and 12–13.[552] We believe that providing a description of the investment underlying an option is necessary in order to fully understand the risks and rewards of such investment. For example, an options contract could allow for a range of underlying investments to be delivered and at the time the option is exercised, some of the investments could be riskier than others. We are therefore adopting the instruction as proposed.

For options where the underlying investment would otherwise be presented in accordance with another provision of rule 12–12 or proposed rules 12–13 through 12–13D, we also proposed requiring that the presentation of that underlying investment must include a description, as required by those provisions.[553] For example, reporting for a swaption would include the disclosures required under both the swaps rule (proposed rule 12–13C) and the options rule (proposed rule 12–13). We received no comments on this aspect of the proposal, and we are adopting it as proposed.

In order to assist investors in identifying and monitoring the counterparty risks associated with a fund's investments in derivatives, we proposed to require funds to disclose

[537] *See, e.g.,* CFA Comment Letter; Wells Fargo Comment Letter.

[538] *See, e.g.,* Simpson Thacher Comment Letter.

[539] *See supra* footnote 536 and accompanying text.

[540] *See id.*

[541] *See, e.g.,* rule 12–12, n. 2 of Regulation S–X (instructions for categorizing investments).

[542] Under current rule 12–12B, funds are required to report, for open option contracts, the name of the issuer, number of contracts, exercise price, expiration date, and value. *See* current rule 12–12B of Regulation S–X [17 CFR 210.12–12B].

[543] *See infra* footnote 554–555 and accompanying text.

[544] While rule 12–13 is specific to open option contracts written, the same disclosures also apply for purchased options as required by proposed Instruction 3 to rule 12–12. *See also* proposed rule 12–12B, n. 5 of Regulation S–X.

[545] *See* rule 12–13 of Regulation S–X.

[546] *See* ICI Comment Letter (recommending the elimination of notional amount for written options because the exercise price component of an option contract makes the notional amount less relevant than other derivative instruments, such as swaps and futures); MFS Comment Letter (recommending that the Commission eliminate the proposed notional amount column in the options table).

[547] *See* EY Comment Letter (supporting disclosures of notional amounts for open options contracts and notional and value amounts for open futures contracts, but noting that such requirements should include clear definitions); MFS Comment Letter (suggesting that the Commission either eliminate the notional amount column for open options contracts or, if the requirement is retained, clarify the methodology for calculating the notional amount of an option.); ICI Comment Letter (recommending that the Commission eliminate this requirement, or, should the Commission require notional amount, specify the calculation as: [number of contracts] × [exercise price] × [contract multiplier]).

[548] *See* Derivatives Proposing Release, *supra* footnote 7, at, n. 159 and accompanying text. *See also* Derivatives Concept Release, *supra* footnote 38, at n. 19 and accompanying text.

[549] *See* Derivatives Proposing Release, *supra* footnote 7, at Table 1; *see also id.*

[550] *See id.*

[551] *See* proposed rule 12–12, n. 3 of Regulation S–X.

[552] *See* AICPA Comment Letter.

[553] *See* proposed rules 12–12, n. 3; 12–12B, n. 5; and 12–13, n. 3 of Regulation S–X. One commenter requested clarification whether Regulation S–X would require disclosure of *any* investment with optionality. *See* AICPA Comment Letter. We did not intend to extend this requirement to bonds or other non-derivative instruments that contain optionality features.

the counterparty to a derivative.[554] We also acknowledged that counterparty risk is mitigated for exchange-traded instruments and therefore proposed an instruction for options and swaps that funds need not disclose the counterparty for exchange-traded instruments.[555] Commenters agreed, but noted that, like exchange-traded instruments, centrally cleared derivatives also do not bear the same type of risks (such as counterparty risk), as over-the-counter instruments.[556] Based on the comments that we received, we agree that counterparty risk can also be mitigated through central clearance and are therefore changing instruction 4 to rule 12–13 (open options contracts) (and instruction 4 to rule 12–13C (open swaps contracts)) to not require disclosure of the counterparty for both exchange-traded options and swaps and centrally cleared options and swaps.[557]

Another commenter suggested that funds should be required to present counterparty exposures net of collateral received or margin posted.[558] While we agree that receiving collateral and posting margin may mitigate some counterparty risk, in order to simplify the disclosures for investors and limit the burden for funds, we continue to believe that it is appropriate for funds to limit disclosure to the counterparty to the transaction, without the additional burden of providing collateral or margin information.[559]

As required in Form N–PORT,[560] in the case of an option contract with an underlying investment that is an index or basket of investments for which components are publicly available on a Web site as of the fund's balance sheet date,[561] or if the notional amount of the investment does not exceed one percent of the fund's NAV as of the close of the period, we proposed that the fund provide information sufficient to identify the underlying investment.[562] If the underlying investment is an index whose components are not publicly available on a Web site as of the fund's balance sheet date, or is based upon a custom basket of investments, and the notional amount of the option contract exceeds one percent of the fund's NAV as of the close of the period, as proposed, the fund would list separately each of the investments comprising the index or basket of investments.[563] We continue to believe that disclosure of the underlying investments of an option contract is an important element to assist investors in understanding and evaluating the full risks of the investment. The disclosures will provide investors with more transparency into both the terms of the underlying investment and the terms of the option. We also proposed to include a similar instruction for swap contracts.[564]

We received a number of comments on our proposal to publicly disclose the components of an underlying index, both with respect to Form N–PORT (discussed above) and Regulation S–X.[565] While one commenter agreed with our proposal,[566] others requested that we include a higher threshold before requiring disclosure, such as 5 percent.[567] Others agreed with our proposed 1% threshold but stated that reporting should be based on a percentage of net asset value, rather than notional value, as percentage of net asset value is a better indicator of materiality.[568]

As stated in the Proposing Release and in the Form N–PORT discussion above, we continue to believe that it is important for the Commission, investors, and other potential users to have transparency into exposures to assets that the fund has, regardless of whether the fund directly holds investments in those assets or chooses to create those exposures through a derivatives contract.[569] The 1% threshold is based on our experience with the summary schedule of investments, which requires funds to disclose investments for which the value exceeds 1% of the fund's NAV in that schedule.[570] We believe that, similar to the 1% threshold in the summary schedule of investments, providing a 1% *de minimis* threshold for disclosing the components of a derivative with nonpublic reference assets considers the need for the Commission, investors, and other potential users to have transparency into the exposures that derivative contracts create while not requiring extensive disclosure of multiple components in a nonpublic index for instruments that represent a smaller risk to the fund's overall performance. Separately, as discussed further below, we believe that this modification mitigates concerns some commenters had about public disclosure of such indexes.[571]

We also believe that it is appropriate to measure whether such derivative instrument exceeds the 1% threshold based on the derivative's notional value, as opposed to the current market value because derivatives with a small market value and a large notional amount could magnify losses or gains in net assets as compared to derivatives with a smaller notional amount, and thus believe that a derivative's notional value better measures its potential contribution to the gains or losses of the fund. Furthermore, as in Form N–PORT, we believe that providing a 1% *de minimis* for disclosing the components of a derivative with nonpublic reference assets considers the need for investors and other potential users to have transparency into the exposures that derivative contracts create while not requiring extensive disclosure of multiple components in a nonpublic index for instruments that represent a

[555] *See* proposed rules 12–13, n. 4 and 12–13C, n. 4 of Regulation S–X.

[556] *See* State Street Comment Letter (requesting clarification on whether funds should report counterparty for exchange-traded derivatives); *see also* Morningstar Comment Letter (''The proposal to report counterparties for non-exchange-traded instruments is reasonable. Exposures to counterparties should be presented net of collateral received or margin posted.'').

[557] *See* rule 12–13, n. 4 of Regulation S–X; *see also* rule 12–13C, n. 4 of Regulation S–X; *supra* section II.A.2.g.iv.

[558] *See* Morningstar Comment Letter; *see also* CFA Comment Letter (generally supporting requirements for funds to report information relating to counterparty exposure).

[559] *See* rule 12–13, Column B; *see also* rule 12–13B, Column C; rule 12–13C, Column C.

[560] *See* Item C.11.c.iii of proposed Form N–PORT; *see also supra* section II.A.2.g.iv.

[561] As proposed, the components would be required to be publicly available on a Web site as of the fund's balance sheet date at the time of transmission to stockholders for any report required to be transmitted to stockholders under rule 30e–1. The components would be required to remain publicly available on a Web site as of the fund's balance sheet date until 70 days after the fund's next fiscal year-end. For example, components of an index underlying an option contract for a fund's 12/31/14 annual report must be made publicly available on a Web site as of 12/31/14 by the time that the 12/31/14 annual report is transmitted to stockholders. The components must remain publicly available until 3/10/16.

[562] *See* proposed rule 12–13, n. 3 of Regulation S–X. *See supra* footnotes 360–362 and accompanying text (discussing the rationale for similar proposed requirements in Form N–PORT).

[563] *See id.*

[564] *See* proposed rule 12–13C, n. 3 of Regulation S–X.

[565] *See also supra* section II.A.2.g.iv.

[566] *See, e.g.,* Morningstar Comment Letter (''Index providers are earning revenues from the licensing fees embedded in the derivative cost that is born by the fund and therefore its shareholders.'').

[567] *See, e.g.,* ICI Comment Letter; Wells Fargo Comment Letter (additional index reporting should only be triggered when a derivative represents 5% of NAV).

[568] *See, e.g.,* SIFMA Comment Letter I (''We believe the original 1% value requirement is a far better indicator of materiality and should be adopted in this connection as well.''); Oppenheimer Comment Letter (1% of net asset value).

[569] We are also modifying Form N–PORT to require similar disclosures. *See generally supra* section II.A.2.g.iv.

[570] *See* Instruction 3 to rule 12–12C of Regulation S–X; *see also* PwC Comment Letter.

[571] *See also supra* section II.A.2.g.iv.

small amount of the fund's overall value.

Commenters also suggested that funds should provide narrative disclosures about the components of a referenced index or custom basket, including any applicable industry or sector concentrations.[572] The same commenters and others suggested that once a nonpublic index crosses the reporting threshold, we limit disclosure to the top 50 components and components that represent more than one percent of the index based on the notional value of the derivatives, as this standard is analogous to the current reporting requirement to identify holdings in the summary schedule of investments.[573] As discussed above, we continue to believe that the notional amount generally serves as an appropriate measure of the index's economic exposure to an underlying reference asset or metric.[574]

While, as we discussed above, we believe that it is appropriate to adopt a tiered reporting requirement for reporting on Form N–PORT, we are not adopting a tiered reporting requirement for disclosures under Regulation S–X. Unlike Form N–PORT, which will be reported in a structured XML format, schedules of investments are designed to be investor friendly documents. By requiring the reporting in the schedule of investments of all components of an underlying index or custom basket, we agree with commenters that noted that requiring the potential volume of disclosing components in an index in financial statements could add considerable length to the schedule of investments, rendering them more difficult for investors to review than limiting such disclosures to the most significant components.[575] Additionally, such disclosures may minimize the importance to investors of direct portfolio holdings and increase reporting costs to funds.[576] Finally, investors or others interested in knowing all components of such indexes will still have access to such information on Form N–PORT, without adding the volume to the financial statements that could occur by requiring complete disclosure in the financial statements.[577]

As a result, we are making a modification from our proposed amendments to Regulation S–X to require funds to only report the top 50 components of the index or custom basket and any components that represent more than one percent of the notional value of the index or custom basket.[578] Thus, if the index's or custom basket's components are not publicly available and the notional amount of the derivative represents more than 1% of the net asset value of the fund, the fund will provide a description of the index or custom basket and list separately (i) the 50 largest components in the index or custom basket and (ii) any other components where the notional value for that component exceeds 1% of the notional value of the index or custom basket.[579] For each investment separately listed, the fund will include the description of the underlying investment as would be required by Article 12 of Regulation S–X as part of the description, the quantity held, the value at the close of the period, and the percentage value when compared to the custom basket's net assets.[580]

As discussed more fully above, commenters also objected to the public disclosure of the components underlying an index as that disclosure could harm the intellectual property rights that index providers might assert and, as a result, harm investors who may lose the benefit of index products that would no longer be available to them.[581] However, we believe that it is important that fund investors are provided with the information necessary to make informed investing decisions.[582] This necessarily means that investors and other potential users have access to relevant information relating to investments in derivatives, including the components underlying an index.[583] As discussed further in section II.A.4, above, we believe that the potential for harm to fund investors is mitigated through the current public reporting delays for fund shareholder reports.[584] We are also adopting, as proposed, but subject to the modifications discussed below,[585] certain instructions for rule 12–13 that are generally the same across all of the schedules for derivatives contracts.[586]

b. Open Futures Contracts—New Rule 12–13A

We are adopting as proposed new rule 12–13A, which will require standardized reporting of open futures contracts. Under current rule 12–13, many funds currently report for each open futures contracts a description of the futures contract (including its expiration date), the number of contracts held (under the balance held—quantity column), and any unrealized appreciation and depreciation (under the value column).[587] In order to allow investors to better understand the economics of a fund's investment in futures contracts, new rule 12–13A will require funds to also report notional amount and value.[588] Therefore, under new rule 12–13A, funds with open futures contracts will report: (1) Description; (2) number of contracts; (3) expiration date; (4) notional amount; (5) value; and (6) unrealized appreciation/depreciation.[589]

[572] *See, e.g.,* PwC Comment Letter; AICPA Comment Letter.

[573] *See, e.g.,* PwC Comment Letter; AICPA Comment Letter; ICI Comment Letter; MFS Comment Letter. Commenters also noted their belief that reporting should be based on a percentage of NAV, rather than notional value, as percentage of NAV is a better indicator of materiality. *See* SIFMA Comment Letter I; Oppenheimer Comment Letter (1% based on net, not notional, values); *contra* Morningstar Comment Letter (''Arbitrary limits on positions that should be disclosed for portfolios or reference indexes can mask the risk of an instrument.'').

Continued

We proposed a requirement that funds must reconcile the total of Column F (unrealized appreciation/depreciation) to the total variation margin receivable or payable on the related balance sheet.[590] Although we received no comment on this aspect of the proposal, upon further review, we recognize that there may be instances where the total unrealized appreciation or depreciation for the fund's futures contracts might not reconcile to the variation margin receivable or payable on the balance sheet. As a result, we are therefore not adopting this proposed instruction.

We received a comment that suggested that the Commission provide specific definitions for the terms ''notional amount'' and ''value'' for futures contracts.[591] According to the commenter, ''notional amount'' may reference either the notional amount at the time the futures contract was entered into or the current notional value. Since we believe, for Regulation S–X purposes, that it would be more useful for investors to understand the current notional amount for a futures contract, we are adopting rule 12–13A with a new instruction from the proposal that instructs funds to report ''current notional amount'' pursuant to Column D of new rule 12–13A.[592] For purposes of Article 12 of Regulation S–X, we note that section 2(a)(41) of the Investment Company Act currently contains a definition of ''value'' which is applicable to Regulation S–X.[593]

We are also adopting, as proposed, but subject to the modifications discussed below,[594] certain new instructions to the schedule for rule 12–13A that are similar to the other derivatives disclosure requirements.[595]

c. Open Forward Foreign Currency Contracts—New Rule 12–13B

We are also adopting as proposed new rule 12–13B, which requires standardized disclosures for open forward foreign currency contracts.[596] Under current rule 12–13, many funds reported for each open forward foreign currency contract, a description of the contract (including a description of what is to be purchased and sold under the contract and the settlement date), the amount to be purchased and sold on settlement date (under the balance held—quantity column), and any unrealized appreciation or depreciation (under the value column).[597] In order to allow investors to better understand counterparty risk for forward foreign currency contracts, we are adopting as proposed, a requirement that funds also disclose the counterparty to each transaction.[598] Under new rule 12–13B, funds holding open forward foreign currency contracts will therefore report the: (1) Amount and description of currency to be purchased; (2) amount and description of currency to be sold; (3) counterparty; (4) settlement date; (5) unrealized appreciation/depreciation.[599]

One commenter recommended that we include a clear definition of ''forward contract'' to avoid potential confusion and foster consistent derivatives disclosure under Form N–PORT, Regulation S–X, and Form ADV.[600] Many funds appear to be already classifying forward foreign currency contracts in their financial statements, and the approach we are adopting allows flexibility as products evolve. We are therefore declining to adopt a definition of ''forward contract.''

Commenters suggested that open forward foreign currency contracts be grouped by currencies purchased or sold, or more specifically by US dollars when US domiciled funds mark currency to the US dollar within financial statements.[601] We do not believe that further refinement to the grouping of forward foreign currency contracts is necessary, as the commenters suggested, as new rule 12–13B provides funds with the flexibility to organize foreign currency contracts in the manner that they believe provides the clearest presentation of their financial statements. For example, if a fund concentrates its investments in a country such that its investments are generally denominated in a currency other than the US dollar, it may determine that grouping its contracts, including cross-currency forwards, by that currency would provide a clearer presentation to investors. We are therefore adopting instruction 1 to rule 12–13B as proposed, which will require the fund to separately organize forward foreign currency contracts where the description of currency purchased, currency sold, counterparties, or settlement dates differ.[602]

One commenter suggested that since most funds report derivatives on a gross basis, appreciation and depreciation for the disclosures of non-exchange-traded derivatives such as forward foreign currency contracts and swaps contracts should be disclosed in two separate columns or include subtotals, rather than in one column, as was proposed.[603] We agree that in certain circumstances this change in format would assist with reconciling the unrealized appreciation and depreciation with the corresponding figures on the fund's balance sheet and would encourage this presentation to the extent it provides such assistance. In some cases, however, an extra column may not be necessary [604] and we are therefore not adopting the commenters' suggested modifications to the disclosure tables for those rules, although we note that the rules do not prevent a fund from presenting the information in two separate columns, if it so chooses.[605]

We are also adopting, as proposed, but subject to the modifications discussed below,[606] certain new instructions to the schedule for rule 12–13B that are similar to the other derivatives disclosure requirements.[607]

futures contract is a key characteristic that is used to evaluate the impact on the portfolio. The disclosure is relevant and informative for investors and for fiduciaries acting on the behalf of shareholders and other investors.'').

d. Open Swap Contracts—New Rule 12–13C

We are also adopting, substantially as proposed, rule 12–13C, which will standardize reporting of fund positions in open swap contracts.[608] Under current rule 12–13, for each open swaps contract, funds reported description (including a description of what is to be paid and received by the fund and the contract's maturity date), notional amount (under balance held—quantity column), and any unrealized appreciation or depreciation (under the value column).[609] Under new rule 12–13C, funds will also be required to report the counterparty to each transaction (except for exchange-traded and centrally cleared swaps), the contract's value, and any upfront payments or receipts.[610] This additional information will allow investors to both better understand the economics of the transaction, as well as its associated risks.[611] Therefore, funds will report for each swap the: (1) Description and terms of payments to be received from another party; (2) description and terms of payments to be paid to another party; (3) counterparty; (4) maturity date; (5) notional amount; (6) value; (7) upfront payments/receipts; and (8) unrealized appreciation/depreciation.[612] Commenters were generally supportive of this proposed disclosure, although some expressed concerns about some aspects of the disclosures, as discussed in more detail below. We are adopting rule 12–13C substantially as proposed in an effort to increase transparency of swap contracts, but are making some modifications in response to comments, which are discussed below. The final rules are designed to maintain enough flexibility for the variety of swap products that currently exist and future products that might come to market.

In addition to the major categories of swaps, commenters also recommended that centrally cleared swaps be grouped separately from over-the-counter swaps, as centrally cleared swaps do not bear the same types of risks as over-the-counter swaps.[613] While we do not believe that it is necessary to separately categorize centrally cleared swaps for purposes of Regulation S–X, as discussed more fully above, we are modifying proposed instruction 4 to Rule 12–13C to reflect that both exchange-traded and centrally cleared swaps need not list counterparty information.[614] Moreover, instruction 1 to rule 12–13C provides enough flexibility as drafted to allow funds to further categorize swaps contracts by over-the-counter or centrally cleared, should they choose to do so.[615]

We are also adopting instruction 3 of rule 12–13C as proposed, which will provide specific examples of the more common types of swap contracts (*e.g.,* credit default swaps, interest rate swaps, and total return swaps).[616] We recognize that other types of swaps exist (*e.g.,* currency swaps, commodity swaps, variance swaps, and subordinated risk swaps). For example, for a cross-currency swap, funds will report for purposes of Column A of rule 12–13C, a description of the interest rate to be received and the notional amount that the calculation of interest to be received is based upon. Column B of rule 12–13C will include a description of the interest rate to be paid and the notional amount that the calculation of interest to be paid is based upon. Column E will include both notional amounts and the currency in which each is denominated, or the same information could be presented in two separate columns.

In the context of providing comments on Form N–PORT, one commenter noted that credit default swaps are unique enough instruments that they should be treated separately from other types of swaps.[617] We designed our amendments to Regulation S–X with enough flexibility to allow funds to report the significant elements of current and future investments and believe that rule 12–13C adequately requires funds to disclose the information sufficient for a user of financial information to understand the terms of payments to be received and paid of a fund's investments in swaps contracts, including credit default swaps. We are therefore adopting this portion of instruction 3 as proposed and not providing a separate schedule for credit default swaps.[618]

Consistent with comparable reporting requirements that we proposed in connection with Form N–PORT and rule 12–13 (open options contracts), in the case of a swaps contract with an underlying investment that is an index or basket of investments for which components are publicly available on a Web site as of the fund's balance sheet date,[619] or if the notional amount of the investment does not exceed one percent of the fund's NAV as of the close of the period, we proposed that the fund provide information sufficient to identify the underlying investment.[620] We also proposed that if the underlying investment is an index whose components are not publicly available on a Web site as of the fund's balance sheet date, or is based upon a custom basket of investments, and the notional amount of the swaps contract exceeds one percent of the fund's NAV as of the close of the period, the fund would list separately each of the investments comprising the index or basket of investments.[621]

In a modification from the proposal, and as discussed more fully in the open option contracts[622] and the Form N–PORT sections of this release,[623] in the case of a swaps contract with a referenced asset that is an index whose components are publicly available on a

Regulation S–X; *see also infra* section II.C.4. Instruction 4 will clarify that Column E (unrealized appreciation/depreciation) should be totaled and agree with the total of correlative amounts shown on the related balance sheet. *See* rule 12–13B, n. 4 of Regulation S–X.

[608] *See* rule 12–13C of Regulation S–X.

[609] *See* rule 12–13 of Regulation S–X.

[610] *See* rule 12–13C, Columns C, F, and G of Regulation S–X.

[611] For example, upfront payments or receipts disclose whether cash was paid or received when entering into a swap contract, allowing investors to better understand the initial cost of the investment, if any.

[612] *See* rule 12–13C of Regulation S–X. The description and terms of payments to be paid and received (and other information) to and from another party should reflect the investment owned by the fund and allow an investor to understand the full nature of the transaction. One commenter suggested that, for over-the-counter swaps, appreciation and depreciation should be disclosed in two separate columns or include subtotals for appreciation and depreciation instead of one column. *See* BlackRock Comment Letter. But, for the same reasons as discussed in our discussion of rule 12–13B, we are not adopting the corresponding modification to the table for rule 12–13C, although the rules do not prevent a fund from presenting the information in two separate columns, if it so chooses.

[613] *See, e.g.,* State Street Comment Letter; BlackRock Comment Letter.

[614] *See supra* footnote 557 and accompanying text; *see also* rule 12–13C, n. 4 of Regulation S–X.

[615] *See* rule 12–13C, n. 1 of Regulation S–X.

[616] *See* rule 12–13C, n. 3 of Regulation S–X.

[617] *See* Morningstar Comment Letter (Commission should require disclosure of protection written and protection purchased with the description containing the underlying, as well as columns for notional, ongoing payment, initial payment, maturity, and value.); *see also supra* section II.A.2.g.iv.

[618] *See* rule 12–13C, n. 3 of Regulation S–X.

[619] As proposed, the components would be required to be publicly available on a Web site as of the fund's balance sheet date at the time of transmission to stockholders for any report required to be transmitted to stockholders under rule 30e–1. The components would be required to remain publicly available on a Web site as of the fund's balance sheet date until 70 days after the fund's next fiscal year-end. For example, components of an index underlying an option contract for a fund's 12/31/14 annual report must be made publicly available on a Web site as of 12/31/14 by the time that the 12/31/14 annual report is transmitted to stockholders. The components must remain publicly available until 3/10/16.

[620] *See* proposed rule 12–13, n. 3 of Regulation S–X. *See supra* footnotes 360–362 and accompanying text (discussing the rationale for similar proposed requirements in Form N–PORT).

[621] *See id.*

[622] *See supra* section II.C.2.a.

[623] *See supra* section II.A.2.g.iv.

Web site as of the fund's balance sheet date, or if the notional amount of the holding does not exceed one percent of the fund's NAV as of the close of the period, we are requiring that the fund provide information sufficient to identify the referenced asset, such as a description.[624] If the referenced asset is an index or custom basket whose components are not publicly available on a Web site as of the balance sheet date, and the notional amount of the derivative represents more than 1% of the net asset value of the fund as of the close of the period, the fund will provide a description of the index or custom basket and list separately (i) the 50 largest components in the index or custom basket and (ii) any other components where the notional value for that components is over 1% of the notional value of the index or custom basket.[625] For each investment separately listed, the fund will include the description of the underlying investment as would be required by Article 12 of Regulation S–X, as part of the description, the quantity held, the value at the close of the period, and the percentage value when compared to the custom basket's net assets.[626] As with underlying investments for option contracts, we believe that disclosure of the underlying referenced assets of a swap would assist investors in better understanding and evaluating the full risks of investments in swaps.

For swaps which pay or receive financing payments, we proposed that funds would disclose variable financing rates in a manner similar to disclosure of variable interest rates on securities in accordance with instruction 4 to proposed rule 12–12.[627] Commenters expressed concern that disclosing financing rates for swaps contracts could harm fund investors as financing rates are negotiated between parties.[628] We believe, however, that the Commission's objective to increase transparency and enhance investor understanding in these instruments by giving investors the opportunity to better understand the investments held in a fund's portfolio justifies the disclosure of financing rates for swaps contracts.[629] We are therefore adopting this portion of instruction 3 to rule 12–13C as proposed.[630]

We are also adopting, as proposed, but subject to the modifications discussed below,[631] other instructions to this rule that are similar across all of our rules for derivatives contracts, as well as one modification to our proposed instruction 7.[632]

e. Other Investments—Rule 12–13D (Current Rule 12–13)

We are also adopting, as proposed, amendments to current rule 12–13 and, for organization and consistency, are renumbering it as rule 12–13D.[633] Rule 12–13D will continue, as is currently required by rule 12–13, to be the schedule by which funds report investments not otherwise required to be reported pursuant to Article 12.[634] We received no comments on our proposed amendments to current rule 12–13 (and are adopting rule 12–13D as proposed). Thus rule 12–13D will require reporting of: (1) Description; (2) balance held at close of period-quantity; and (3) value of each item at close of period.[635] We expect that funds will report, among other holdings, investments in physical holdings, such as real estate or commodities, pursuant to rule 12–13D. As discussed below, we are amending current rule 12–13's requirement that funds disclose ''each investment not readily marketable'' [636] in favor of disclosures concerning whether an investment is restricted and if an investment's value was determined using significant unobservable inputs.[637] We are also adopting the proposed new instructions to the schedule that are generally the same across all the schedules for derivatives contracts, subject to the modifications discussed below.[638]

3. Amendments to Current Rules 12–12 Through 12–12C

While we did not propose changes to the current schedules for rules 12–12, 12–12A, and 12–12C, we proposed certain additional rule instructions that would include new reporting requirements, as well as certain clarifying changes, including renumbering several of the schedules. With the exception of the instructions discussed below, we are adopting the amendments to new rules 12–12 through 12–12B as proposed.

We proposed several modifications to the instructions to rule 12–12, the rule concerning disclosure of investments in securities of unaffiliated issuers. We proposed to modify instruction 2 to rule 12–12 (and the corresponding instructions to proposed rules 12–12A, 12–12B, 12–13D, and 12–14) which would require funds to categorize the schedule by type of investment, the related industry, *and* the related country, or geographic region.[639] Commenters noted that requiring categorization of both the industry *and* geographic region (as opposed to categorizing one factor) would add considerable length to the schedule of investments and make it more difficult to understand.[640] We were persuaded

[624] *See* rule 12–13C, n. 3 of Regulation S–X.

[625] *See* rule 12–13C, n. 3 of Regulation S–X.

[626] *See id.*

[627] *See* proposed rules 12–13C, n. 3; and 12–12, n. 4 of Regulation S–X.

[628] *See, e.g.,* MFS Comment Letter; Invesco Comment Letter; ICI Comment Letter (public benefit of disclosure does not outweigh potential competitive harm).

[629] For example, negotiated terms of an investment in a restricted security of a private company are required to be disclosed. *See* current rule 12–12, n. 6 of Regulation S–X. For the same reasons we discussed above, we believe that it is necessary for funds to report the specific terms for other derivatives holding information.

[630] *See* rule 12–13C, n. 3 of Regulation S–X.

[631] *See infra* section II.C.4.

[632] Instruction 5 will require the fund to indicate each investment which cannot be sold because of restrictions or conditions applicable to the investment. *See* rule 12–13C, n. 5 of Regulation S–X; *see also infra* section II.C.4. Instruction 6 will require the fund to indicate each investment whose value was determined using significant unobservable inputs. *See* rule 12–13C, n. 6 of Regulation S–X; *see also infra* section II.C.4. Instruction 7 will require that Columns G (upfront payments/receipts) and H (unrealized appreciation/depreciation) be totaled and agree with the totals of their respective amounts shown on the related balance sheet. *See* rule 12–13C, n. 7 of Regulation S–X. Note we proposed for instruction 7 to also include Column F (value) in the total, however, upon further review, we have determined that correlating the amounts from Columns F, in addition to Columns G and H would be duplicative and therefore unnecessary.

[633] *See* rule 12–13D of Regulation S–X.

[634] *See id.*

[635] *Id.*

[636] *See* rule 12–13, n. 4 of Regulation S–X.

[637] *See* proposed rule 12–13D, n. 6 of Regulation S–X (requiring the fund to indicate each investment which cannot be sold because of restrictions or conditions applicable to the investment); rule 12–13D, n. 7 (requiring the fund to indicate each issue of securities whose value was determined using significant unobservable inputs); *see also infra* section II.C.4.

[638] Instruction 1 will require the fund to organize each investment separately where any portion of the description differs. *See* rule 12–13D, n. 1 of Regulation S–X. Instruction 2 will require the fund to categorize the schedule by the type of investment, and related industry, country, or geographic region, as applicable. *See* rule 12–13D, n. 2 of Regulation S–X. Instruction 3 will require that the description of the asset include information sufficient for a user to understand the nature and terms of the investment. *See* rule 12–13D, n. 3 of Regulation S–X; *see also infra* section II.C.4.

[639] *See* proposed rule 12–12, n. 2 of Regulation S–X; *see also* proposed rules 12–12A, n. 2; 12–12B, n. 1; 12–13D, n. 2; and 12–14, n. 2 of Regulation S–X.

[640] *See, e.g.,* Oppenheimer Comment Letter; State Street Comment Letter; Vanguard Comment Letter; MFS Comment Letter; Wells Fargo Comment Letter (in chart or table); SIFMA Comment Letter I; ICI Comment Letter; BlackRock Comment Letter (results in additional costs to shareholders, without a corresponding benefit); AICPA Comment Letter. In response to our proposal to categorize investments by both industry and geographic regions, some commenters suggested as an alternative that funds should report the percentage of securities by country or geographic region as a separate schedule, graph, or chart. *See, e.g.,* State

that requiring categorization of both industry and geographic region would add unnecessary length and confusion to the schedule of investments, which could ultimately undermine the schedule's usefulness to investors, and are therefore not adopting these requirements.[641]

One commenter requested that, should we adopt the proposed instructions relating to categorization of both industry and geographic region (which, as discussed in the prior paragraph, we are not adopting), the instructions should be integrated into Regulation S–X that standardize how funds report geographic concentrations.[642] Others noted that the disclosure of country of risk or geographic region should be treated as nonpublic since it is subjective in nature and based on unique assumptions and inputs used by fund management.[643] Since we have decided to not adopt the proposed instructions which would have required funds to categorize investments by both industry and geographic regions, we do not think it is necessary to include specific instructions on how funds should report geographic concentrations or treat the disclosure as nonpublic. However, we note the current GAAP requirement to disclose significant concentrations of credit risk, which includes information about shared regions that identify the concentration remains unchanged.[644]

In order to provide more transparency to a fund's investments in debt securities, we are adopting, with certain modifications discussed below, our proposed instruction to rule 12–12 requiring a fund to indicate the interest rate or preferential dividend rate and maturity date for certain enumerated debt instruments.[645] When disclosing the interest rate for variable rate securities, we proposed that the fund describe the referenced rate and spread.[646] In proposing disclosures for variable rate securities, we requested comment on other alternatives, such as period-end interest rate (*e.g.* the investment's interest rate in effect at the end of the period).[647] We received several comments supporting our proposal to provide the reference rate and spread for variable rate securities, reasoning that the disclosure of the components of the variable rate would be easier for investors and other interested parties to determine the investment's current rate at any given time (as opposed to the rate at the end of the reporting period).[648] However, another commenter suggested that the period-end interest rate is the most appropriate variable rate security disclosure for shareholders.[649]

We continue to believe that disclosure of the referenced rate and spread will allow investors to better understand the economics of the fund's investments in variable rate debt securities. We are persuaded, however, that the period-end interest rate is also important for investors because it will provide investors with the actual interest rate of the investment at the period end, thereby giving investors both the ability to understand the investment's current return (through period-end rate) and to better understand how interest rate changes could affect the investment's future returns. Therefore, in a modification from the proposal, we are now including in the instruction a requirement that the fund both describe the referenced rate and spread and provide the end of period interest rate for each investment, or include disclosure of each referenced rate at the end of the period.[650] For securities with payments-in-kind, we proposed that the fund provide the rate paid in-kind in order to provide more transparency to investors when the fund is generating income that is not paid in cash.[651] We received no comments addressing this item and therefore are adopting as proposed.[652]

We also proposed to modify the current instruction to rule 12–12 [653] that requires a fund to identify each issue of securities held in connection with open put or call option contracts and loans for short sales, by adding the requirement to also indicate where any portion of the issue is on loan.[654] We received no comments on this item. This disclosure, which we believe is consistent with current industry practices, will increase the transparency of the fund's securities lending activities, and we are adopting the modification to the instruction as proposed.[655]

We proposed to modify current instruction 3 of rule 12–12 (proposed instruction 5 of rule 12–12) concerning the organization of subtotals for each category of investments, making the instructions consistent with those in proposed rule 12–12B (current rule 12–12C), Summary schedule of investments in securities of unaffiliated issuers.[656] We received no comments on this item and are adopting as proposed.[657]

Likewise, we are adopting several modifications to rule 12–12A regarding the presentation of securities sold short, in order to conform the instructions to rule 12–12.[658]

Funds are permitted to include in their reports to shareholders a summary portfolio schedule, in lieu of a complete portfolio schedule, so long as it conforms with current rule 12–12C

Street Comment Letter; MFS Comment Letter; ICI Comment Letter; BlackRock Comment Letter; AICPA Comment Letter. However, given the fact that we are not adopting this proposal, we believe a separate schedule is unnecessary.

[657] *See* rule 12–12, n. 5 of Regulations S–X; *see also* rules 12–12A, n. 4; rule 12–12B, n. 2 of Regulation S–X; *see also* rule 12–14, n. 7 of Regulation S–X.

[658] Instruction 2 will require the fund to organize the schedule in rule 12–12A in the same manner as is required by Instruction 2 of rule 12–12. *See* rule 12–12A, n. 2. Instruction 3 will require the fund to identify the interest rate or preferential dividend rate and maturity date as required by Instruction 4 of rule 12–12. *See* rule 12–12A, n. 3 of Regulation S–X. Instruction 4 will require the subtotals for each category of investments, subdivided both by type of investment and industry, country, or geographic region to be shown together with their percentage value compared to net assets, in the same manner as is required by Instruction 5 of rule 12–12. *See* rule 12–12A, n. 4 of Regulation S–X. Instruction 6 will require the fund to identify each issue of securities whose fair value was determined using significant unobservable inputs. *See* rule 12–12A, n. 6 of Regulation S–X; *see also infra* section II.C.4.

The proposal included an instruction in the schedule, as we proposed in the other schedules, that would require the fund to identify each issue of securities held in connection with open put or call option contracts. *See* proposed rule 12–12A, n. 7 of Regulation S–X. We are not adopting this instruction because, as noted by one commenter, it is not relevant to securities sold short. *See* AICPA Comment Letter.

(Summary schedule of investments in securities of unaffiliated issuers) and the full schedule is filed under Form N–CSR.[659] In order to maintain numbering consistency and organization throughout the regulation, we are renaming current rule 12–12C (Summary schedule of investments in securities of unaffiliated issuers) as rule 12–12B. As in rule 12–12 and 12–12A, we proposed to modify the schedule of proposed rule 12–12B (current rule 12–12C), but again added similar changes to its instructions. We received no comments addressing this proposal and, subject to the relevant modifications discussed above, we are adopting these instructions as proposed. [660]

4. Instructions Common to Rules 12–12 Through 12–12B and 12–13 Through 12–13D

We proposed several instructions to the proposed rules in order to maintain consistency with the disclosures required by current rules 12–12 and 12–13. Current rule 12–13 contains an instruction requiring identification of ''each investment not readily marketable.'' [661] We proposed to modify this requirement in current rule 12–13 (new rule 12–13D), and add it to the new schedules we are adopting or modifying concerning derivatives, by adding instructions that funds must indicate (1) whether an investment was fair valued by using significant unobservable inputs [662] and (2) whether an investment cannot be sold because of restrictions or conditions applicable to the investment.[663] These proposed instructions were intended to increase transparency into the marketability of, and observability of valuation inputs for, a fund's investments by instead requiring separate identification of investments that are restricted investments, as well as those investments that were fair valued using significant unobservable inputs. Similarly, for proposed rules 12–12, 12–12A, and 12–12B, we proposed to include an instruction requiring funds to indicate whether an issue of securities was fair valued by using significant unobservable inputs.[664]

We received comments generally supporting the disclosure of investments fair valued using significant unobservable inputs.[665] However, in order to make ''value'' consistent with current Article 12, the final rule amendments only refer to ''value'' (rather than ''fair value,'' as we do in the proposed amendments to Regulation S–X), which is consistently used and defined under Regulation S–X.[666] We are therefore adopting the requirement that funds indicate if an investment's value was determined using significant unobservable inputs.[667]

We received one comment relating to our proposed instruction requiring identification of a derivative that cannot be sold because of restrictions or conditions applicable to the derivative.[668] That commenter noted that we should clarify and provide examples of what is meant by restrictions applicable to derivatives.[669] We believe the instruction is clear that a derivative that cannot be sold as of the reporting date because of a restriction applicable to the investment itself (as opposed to *e.g.* illiquidity in the market) should be identified. Therefore, we are adopting the instruction as proposed.[670]

Current rules 12–12, 12–12C, and 12–13 each contain an instruction to include tax basis disclosures for investments.[671] We proposed extending this requirement to the proposed rules concerning derivatives holdings and securities sold short [672] because we believed that this type of tax basis information may be important to investors in investment companies, which are generally pass-through entities pursuant to Subchapter M of the Internal Revenue Code.[673] We received several comments arguing against extending our proposed tax basis disclosures to the proposed derivatives schedules. Several commenters noted their belief that disclosure of tax basis by investment type would not provide meaningful disclosure to investors, while increasing the volume and complexity of the financial statements.[674] Others stated that the tax-basis information is unnecessary in light of recently added GAAP-required disclosure of tax basis components of dividends and distributions.[675] The current GAAP requirement that funds disclose the components of distributable

[659] *See* rule 6–10(c)(2) of Regulation S–X [17 CFR 210.6–10(c)(2)]; *see also* Quarterly Portfolio Holdings Adopting Release, *supra* footnote 421.

[660] Instruction 2 will add ''type of investment'' to the current subtotal requirements for the summary schedule. *See* proposed rule 12–12B, n. 2 of Regulation S–X. Instruction 3 will extend rule 12–12's requirement that funds indicate the interest rate or preferential dividend rate and maturity date for certain enumerated securities. *See* rule 12–12B, n. 3 of Regulation S–X. Instruction 5 will require for options purchased all information that would be required by rule 12–13 for written option contracts. *See* rule 12–12B, n. 5 of Regulation S–X. Instruction 12 will require the fund to indicate each issue of securities whose fair value was determined using significant unobservable inputs. *See* rule 12–12B, n. 12 of Regulation S–X; *see also infra* section II.C.4. Instruction 13 will extend rule 12–12's requirement that the fund indicate ''where any portion of the issue is on loan.'' *See* rule 12–12B, n. 13 of Regulation S–X.

[661] *See* current rule 12–13, n. 4 of Regulation S–X (''The term 'investment not readily marketable' shall include investments for which there is no independent publicly quoted market and investments which cannot be sold because of restrictions or conditions applicable to the investment or the company.'').

[662] *See* proposed rules 12–13, n. 7; 12–13A, n. 5; 12–13B, n. 3; 12–13C, n. 6; 12–13D, n. 7 of Regulation S–X.

[669] *Id.* (''For example, it is unclear whether the lockup period for trading blocks would be included as a restriction applicable to derivatives. If the SEC's purpose is to have a narrow definition, then it is unclear whether the stricter definition includes limitation on the types of entities that would be able to buy an instrument such as rule 144a [sic] restrictions, which limits trading to qualified institutional buyers.''). Consistent with this example, a restricted security subject to rule 144A would be identified as restricted under rules 12–12, 12–12A, or 12–12B only if the security has restrictions and the fund cannot sell the security to qualified institutional buyers at the report date due to those restrictions.

[674] *See* PwC Comment Letter; EY Comment Letter; CRMC Comment Letter; State Street Comment Letter; MFS Comment Letter; ICI Comment Letter; AICPA Comment Letter.

[675] *See* Oppenheimer Comment Letter; MFS Comment Letter; and ICI Comment Letter (Recommending that the Commission require funds to present tax basis information relating to the tax basis components of dividends and distributions in the notes to the financial statements); *see also* FASB ASC 946–20–50–12 (Financial Services—Investment Companies, Investment Company Activities) (''ASC 946–20–50–12'');

earnings (including undistributed ordinary income, undistributed long-term capital gains, capital loss carryforwards and unrealized appreciation/depreciation) on a tax basis using the most recent tax year-end enables investors to determine the amount of accumulated and undistributed earnings that they could potentially receive in the future and on which they could be taxed.[676] Some commenters recommended an alternative that funds should disclose the aggregate tax basis of all investments relating to the portfolio as whole, or those that are recorded as assets or liabilities.[677]

We agree that tax disclosures relating to the portfolio as a whole provides sufficient information for investors. However, current GAAP disclosures do not require funds to report the cost of all investments in an unrealized appreciation and the cost of all assets in an unrealized depreciation on a gross basis, which we believe may be useful to investors to further understand the potential amounts they might receive and on which they could be taxed. As a result, we have determined not to extend the tax basis disclosures currently required by rules 12–12, 12–12B, and 12–13 to our new disclosures of derivative investments (rules 12–13 through 12–13C) and securities sold short (rule 12–12A). For the same reasons, we are removing this disclosure requirement from each of the rules 12–12, 12–12B (current rule 12–12C), and 12–13D (current rule 12–13)[678] and instead moving it to Article 6 of Regulation S–X as a rule of general application requiring that funds report these tax basis disclosures relating to the portfolio as a whole.[679]

We also proposed to require funds to identify illiquid investments.[680] As we stated in the proposal, liquidity is an important consideration for a fund's investors in understanding the risk exposure of a fund.[681] We received numerous comments registering concerns with this proposed instruction to require portfolio-level liquidity disclosures.[682] For example, commenters noted that disclosure of illiquid assets could confuse fund shareholders, as they could erroneously assume that disclosure of illiquid assets is an objective determination.[683] Similarly, commenters noted that liquidity information could become stale given the time delay between the end of the period and the time that such information would become available to the public.[684] Others expressed concern that portfolio-level liquidity disclosures in financial statements would be difficult and costly to audit, as auditors would be required to engage specialists to determine the validity of the fund's liquidity determinations for each investment.[685] Moreover, as discussed in the Liquidity Adopting Release, we are concurrently adopting portfolio-level liquidity reporting on Form N–PORT which we believe mitigates many of the commenters' concerns and is a more appropriate method of public reporting.[686] Accordingly, we are not adopting the proposed instructions in Regulation S–X relating to the liquidity of investments.[687]

5. Investments In and Advances to Affiliates—Rule 12–14

We proposed amendments to rule 12–14 (Investments in and advances to affiliates).[688] Rule 12–14 currently requires a fund to make certain disclosures about its investments in and advances to any ''affiliates'' or companies in which the investment company owns 5% or more of the outstanding voting securities.[689] The rule currently requires that a fund disclose the ''amount of equity in net profit and loss for the period'' for each controlled company, but does not require disclosure of realized or unrealized gains or losses. Based upon staff experience, we believe that the presentation of realized gains or losses and changes in unrealized appreciation or depreciation would assist investors with better understanding the impact of each affiliated investment on the fund's statement of operations. As a result, we had proposed to modify Column C of the schedule to rule 12–14 to require ''net realized gain or loss for the period,''[690] and Column D to require ''net increase or decrease in unrealized appreciation or depreciation for the period'' for each affiliated investment.[691] We received one comment supporting this aspect of the proposal and are adopting it as proposed.[692]

Likewise, in instruction 6(e) and (f), we proposed to require disclosure of total realized gain or loss and total net increase or decrease in unrealized appreciation or depreciation for affiliated investments in order to

[676] ASC 946–20–50–12; *see also* ICI Comment Letter. We believe that this level of information in the aggregate is sufficient for investor needs and additionally recognize the complexity involved in capturing the tax characterizations of certain investments in the format of the Schedules. *See* PwC Comment Letter.

[677] *See* PwC Comment Letter; and Vanguard Comment Letter (federal tax disclosure should be provided, annually instead of semiannually, on an aggregate basis, instead of in separate investment schedules).

[678] *See* current rules 12–12, n. 8; 12–12C, n. 11; 12–13, n. 7 of Regulation S–X.

[679] *See* rule 6–03(h)(2) (adding the requirement that the fund ''state the following amounts based on cost for Federal income tax purposes: (i) Aggregate gross unrealized appreciation for all investments in which there is an excess of value over tax cost, (ii) The aggregate gross unrealized depreciation for all investments in which there is an excess of tax cost over value, (iii) The net unrealized appreciation or depreciation, and (iv) The aggregate cost of investments for Federal income tax purposes.'')

[680] *See* proposed rule 12–12, n. 10 of Regulation S–X; *see also* proposed rules 12–12B, n. 13; and 12–13, n. 8 of Regulation S–X; *see also* proposed rules 12–13A, n. 6; 12–13B, n. 4; 12–13C, n. 7; and 12–13D, n. 8 of Regulation S–X. *See generally* 1992 Release, *supra* footnote 290.

[681] *See* Proposing Release, *supra* footnote 7, at 116. *See also* Liquidity Adopting Release, *supra* footnote 9.

[682] *See* State Street Comment Letter (Commission should provide guidance as to what assumptions would be appropriate in determining if an investment is illiquid); PwC Comment Letter (Recommending disclosure of fund's basis for determining illiquid investment as defined by management/board of directors); EY Comment Letter (defer adopting until the proposed illiquidity standards have been updated); CRMC Comment Letter (same); Pioneer Comment Letter; *contra* Morningstar Comment Letter (''The requirement to identify positions that are illiquid is adequate and appropriate to replace 'investments not readily marketable.' This information can tie directly to monitoring of investment limitations under the Act.'').

[683] *See, e.g.,* PwC Comment Letter; Oppenheimer Comment Letter; MFS Comment Letter (liquidity determinations should be non-public); Deloitte Comment Letter; Invesco Comment Letter; Schwab Comment Letter; ICI Comment Letter; and AICPA Comment Letter.

[684] *See* Deloitte Comment Letter.

[685] *See, e.g.,* PwC Comment Letter; ICI Comment Letter; and AICPA Comment Letter. Commenters also suggested, as an alternative, requiring registrant to label the disclosure of illiquid investments as ''unaudited subject to change based on market conditions'' as a way to mitigate financial statement and audit costs. *See* Deloitte Comment Letter. However, while this suggestion may mitigate some auditing costs for funds, as discussed above, we have determined that disclosures on Form N–PORT, with portfolio-level liquidity information being made public, provides an appropriate method of providing information for the benefit of the Commission, investors, and other interested third parties.

[686] *See* Liquidity Adopting Release, *supra* footnote 9.

[687] *See id.*

[688] *See* proposed rule 12–14 of Regulation S–X.

[689] *See* rule 12–14 of Regulation S–X; *see also* section 2(a)(3)(A) of the Investment Company Act (defining an ''Affiliated person'' as ''any person directly or indirectly owning, controlling, or holding with power to vote, 5 per centum or more of the outstanding voting securities of such other person.'').

[690] *See* proposed rule 12–14, Column C of Regulation S–X. Column C of current rule 12–14 requires disclosure of the ''amount of equity in net profit and loss for the period,'' which is derived from the controlled company's income statement and does not directly translate to the impact to a fund's statement of operations. We proposed to replace this requirement with ''net realized gain or loss for the period.''

[691] *See* proposed rule 12–14, Column D of Regulation S–X.

[692] *See* Morningstar Comment Letter; *see also* Columns C and D of Rule 12–14 of Regulation S–X.

correlate these totals to the statement of operations.[693] Disclosure of these realized gains or losses and changes in unrealized appreciation or depreciation, in addition to the current requirement to disclose the amount of affiliated income, will allow investors to understand the full impact of an affiliated investment on a fund's statement of operations.[694] We received no comments on this proposal and are therefore adopting our modifications to instructions 6(e) and 6(f) as proposed.[695]

Additionally, we proposed a new instruction 7 in order to make the categorization of investments in and advances to affiliates consistent with the method of categorization used in rules 12–12, 12–12A, and 12–12B, for which we received no comments and are adopting as proposed.[696]

We proposed several other amendments to the instructions to rule 12–14 in order to, in part, conform the rule to our disclosure requirements in rules 12–12 and 12–13. Subject to the modifications discussed above in section II.C.4, we are adopting as proposed.[697]

6. Form and Content of Financial Statements

Finally, we are adopting substantially as proposed, revisions to Article 6 of Regulation S–X, which prescribes the form and content of financial statements filed for funds. Many of the revisions we are adopting today are intended to conform Article 6 with our changes to Article 12 and update other financial statement requirements.[698] As part of these changes, we proposed to modify the title and the description of Article 6 from ''Registered Investment Companies'' to ''Registered Investment Companies and Business Development Companies'' to clarify that BDCs are subject to Article 6 of Regulation S–X.[699] This amendment is a technical amendment and does not change existing requirements for BDCs.[700] Commenters did not object to this change,[701] and we are adopting it as proposed.[702]

In order to allow a more uniform presentation of investment schedules in a fund's financial statements, we proposed to rescind subparagraph (a) of rule 6–10 under Regulation S–X, regarding which schedules are to be filed.[703] One commenter noted that consolidated subsidiary information could be useful for investors, as information about the specific entities' ownership may make the structure of the fund more transparent to investors.[704] We were persuaded that such information may be useful to investors and are therefore not rescinding subparagraph (a) of rule 6–10.[705]

Another commenter requested that we require disclosure of costs associated with the management of controlled foreign corporations (''CFCs'') or expenses embedded in the return being received in the footnotes to the financial statements.[706] The commenter also requested that funds be required to report these expenses either in calculations of total operating expenses or as acquired fund expenses in other filings.[707] We believe that disclosure of these expenses are already included, as applicable, in (1) the expenses reported within the statement of operations of the consolidated investment company where the CFC is a consolidated entity,[708] or (2) in the required Acquired Fund Fees and Expenses disclosures within the prospectus filing of the investment company where the CFC is not consolidated; and therefore no further modifications are necessary.[709]

Current rule 6–10(a) also provides that if the information required by any schedule (including the notes thereto) is shown in the related financial statement or in a note thereto without making such statement unclear or confusing, that procedure may be followed and the schedule omitted.[710] As we stated in the Proposing Release, we believe that some funds may have interpreted this guidance as allowing presentation of some Article 12 schedules (*e.g.,* rules 12–13 and 12–14) in the notes to the financial statements, as opposed to immediately following the schedules required by rules 12–12, 12–12A, and

[693] *See* proposed rule 12–14, n. 6(e) and (f) of Regulation S–X.

[694] *See* current rule 6–07 of Regulation S–X [17 CFR 210.6–07].

[695] *See* rule 12–14, n. 6(e) and (f) of Regulation S–X.

[696] *See id.,* n. 7; *see also* proposed rules 12–12, n. 5; 12–12A n. 4; and 12–12B, n. 2 of Regulation S–X.

[697] Instruction 1 will delete the instruction to segregate subsidiaries consolidated in order to make the disclosures under rule 12–14 consistent with the fund's balance sheet. *See* rule 12–14, n. 1 of Regulation S–X. Instruction 2 will require the fund to categorize the schedule to rule 12–14 in the same manner as is required by Instruction 2 of rule 12–12. *See* rule 12–14, n. 2 of Regulation S–X. Instruction 3 will require the fund to identify the interest rate or preferential dividend rated and maturity date, as applicable. *See* rule 12–14, n. 3 of Regulation S–X. Instruction 4 will add Column F to the columns to be totaled and update the instruction to state that Column F should agree with the correlative amount shown on the related balance sheet. *See* rule 12–14, n. 4 of Regulation S–X. Instruction 5 will update the reference to Instruction 8 of rule 12–12 and reference to rule 12–13 to reflect the changes in the numbering of the instructions for those rules. *See* rule 12–14, n. 5 of Regulation S–X. Instructions 6(a) and (b) will update references to Column D to reference Column E in order to reflect our proposed changes to rule 12–14's schedule. *See* rule 12–14, nn. 6(a) and (b) of Regulation S–X. Instruction 6(d), which adds clarifying language from Instruction 7 of rule 12–12, will provide the fund with more detail on the definition of non-income producing securities. *See* rule 12–14, n. 6(d) of Regulation S–X. Instruction 8 will require the fund to identify each issue of securities whose fair value was determined using significant unobservable inputs. *See* rule 12–14, n. 8 of Regulation S–X; *see supra* section II.C.4. Instruction 9 will require the fund to indicate each issue of securities held in connection with open put or call option contracts, loans for short sales, or where any portion of the issue is on loan, as required by note 10 to rule 12–12. *See* rule 12–14, n. 9 of Regulation S–X.

[698] We proposed to amend the reference in rule 6–03(c) to § 210.3A–05, as that section of Regulation S–X was rescinded in 2011. *See* Rescission of Outdated Rules and Forms, and Amendments to Correct References, Securities Act Release No. 33–9273 (Nov. 4, 2011) [76 FR 71872 (Nov. 21, 2011)]. We received no comments on this proposed amendment and are adopting as proposed. *See* rule 6–03(c) of Regulation S–X [17 CFR 210.6–03(c)].

[699] *See* proposed rules 6–01; 6–03; 6–03(c)(1); 6–03(d); 6–03(i); 6–04; and 6–07 of Regulation S–X.

A BDC is a closed-end fund that is operated for the purpose of making investments in small and developing businesses and financially troubled businesses and that elects to be regulated as a BDC. *See* section 2(a)(48) of the Investment Company Act (defining BDCs). BDCs are not subject to periodic reporting requirements under the Investment Company Act, although they must comply with periodic reporting requirements under the Exchange Act.

[700] *See* Instruction 1.a to Item 6.c of Form N–2 (''A business development company should comply with the provisions of Regulation S–X generally applicable to registered management investment companies. (*See* section 210.3–18 [17 CFR 210.3–18] and sections 210.6–01 through 210.6–10 of Regulation S–X [17 CFR 210.6–01 through 210.6–10]).'').

[701] *See, e.g.,* Deloitte Comment Letter. This commenter suggested that, in addition, we also clarify that Article 6 applies to Securities Act registrants who meet the definition of ''Investment Company'' under FASB or IFRS, yet are not registered under the Investment Company Act. *Id.* The change to reference BDCs is a technical change that is not intended to expand the entities subject to Article 6. *See supra* footnote 699 and accompanying text. The Proposing Release addressed the reporting and disclosure of information by registered investment companies and BDCs. Since the Proposing Release did not address the possibility of subjecting other entities, such as the ones described by the commenter, to this rulemaking, extending the regulations could have unforeseen implications, including potentially subjecting such entities to the requirements of Article 6. We believe such a change is beyond the scope of this rulemaking.

[702] *See* rules 6–01; 6–03; 6–03(c)(1); 6–03(d); 6–03(i); 6–04; 6–04.10; and 6–07 of Regulation S–X.

[703] *See* proposed rule 6–10 of Regulation S–X.

[704] Deloitte Comment Letter (''For example, if certain consolidated investments are owned by a consolidated subsidiary domiciled in a foreign jurisdiction where the political climate might be unstable or where creditors may have inferior or superior rights to assets, investors are better served when informed of these economic distinctions.'').

[710] *See* current rule 6–10(a) of Regulation S–X.

12–12C. Our proposal to rescind rule 6–10(a) would have also eliminated this instruction. Commenters generally supported eliminating this instruction as it would assist with the comparability of funds by shareholders.[711] In light of the increased use of derivatives by funds, we continue to believe that all schedules required by rule 6–10 should be presented together within a fund's financial statements, and not in the notes to the financial statements. We recognize that this may change current practice for some funds but believe that, coupled with more detailed disclosure rules for derivatives, this amendment would provide more consistent disclosure and improve the usability of financial statements for investors. However, as discussed above, we were persuaded to not rescind rule 6–10(a) in these final rules. Thus we are adopting a conforming modification to rule 6–10(a) to eliminate this specific instruction.[712]

We also proposed changes to rules 6–03 and 6–04 to specifically reference the investments required to be reported on separate schedules in amended Article 12.[713] We received no comment on these proposals and are adopting them as proposed.[714] Additionally, we proposed to eliminate current rule 6–04.4, which requires disclosure of ''Total investments'' on the balance sheet under ''Assets,'' recognizing that investments reported under proposed rules 12–13A through 12–13D could potentially be presented under both assets and liabilities on the balance sheet.[715] For example, a fund may hold a forward foreign currency contract with unrealized appreciation and a different forward foreign currency contract with unrealized depreciation. The fund may present on its balance sheet an asset balance for the contract with unrealized appreciation and a liability balance for the contract with unrealized depreciation. Totaling the amounts of investments reported under assets could be misleading to investors in this example, or in other examples where a fund holds derivatives in a liability position (*e.g.,* unrealized depreciation on an interest rate swap contract). A ''Total investments'' amount in the Assets section of the fund's balance sheet would include the fund's investments in securities and derivatives that are in an appreciated position, but it would not include the unrealized depreciation on the interest rate swap contract, which would be classified under the Liabilities section of the fund's balance sheet. Given the increasing use of derivatives by funds, we continue to believe eliminating current rule 6–04.4 would provide more complete information to investors. We received no comments on this proposal and are adopting this change as proposed, as well as the corresponding proposed change in rule 6–03(d) to remove the reference to ''total investments reported under [rule 6–04.4].'' [716] As discussed above in section II.C.4, we are also adding a requirement to rule 6–03(h) requiring funds to report the cost of all investments in an unrealized appreciation and the cost of all assets in an unrealized depreciation on a gross basis.[717]

We are also adopting, as proposed, an amendment to rule 6–04 to refer individually to our derivatives disclosures in proposed rules 12–13A through 12–13C.[718] As is currently the case, these proposed amendments are not meant to require gross presentation where netting is allowed under U.S. GAAP.[719] For example, if a fund held a forward foreign currency contract which had unrealized appreciation and another forward foreign currency contract which had unrealized depreciation, the fact that forward foreign currency contracts are mentioned in proposed rules 6–04.3(b) and 6–04.9(d) is not meant to require both contracts to be presented gross on the balance sheet if netting were allowed under U.S. GAAP. We received no comments on this proposal.

We also proposed, amendments to rule 6–05.3 which would specifically require presentation of items relating to investments other than securities in the notes to financial statements.[720] Current rule 6–05.3 only requires presentation in the notes to financial statements of disclosures required by rules 6–04.10 through 6–04.13, which include information relating to securities sold short and open option contracts written.[721] Our proposal would also have amended rule 6–05.3 to require fund financial statements to reflect all unaffiliated investments other than securities presented on separate schedules under Article 12.[722] We received no comments on this aspect of the proposal and are adopting it as proposed.[723]

We also proposed to add new disclosure requirements that are designed to increase transparency to investors about certain investments and activities. First, we proposed to add new subsection (m) to rule 6–03 that would require funds to make certain disclosures in connection with a fund's securities lending activities and cash collateral management in order to allow investors to better understand the income generated from, as well as the expenses associated with, securities lending activities.[724] As discussed in more detail below, after consideration of issues raised by commenters, we have determined that it is more appropriate to require that these disclosures be made in a fund's Statement of Additional Information (or, for closed-end funds, reports on Form N–CSR) or in Form N–CEN, rather than to require their inclusion in its financial statements.[725]

Second, we proposed to amend rule 6–07 to require funds to make a separate disclosure for income from non-cash dividends and payment-in-kind interest on the statement of operations.[726] Our proposed amendment to rule 6–07 was intended to increase transparency for investors in order to allow them to better understand when fund income is earned, but not received, in the form of cash. While one commenter generally supported disclosure for in-kind payments,[727] many recommended, if the Commission should adopt such a disclosure, that we provide a disclosure threshold for non-cash income, such as one similar to the requirement to disclose expense items that exceed 5

[711] *See, e.g.,* State Street Comment Letter; ICI Comment Letter.

[712] *See* rule 6–10(a) of Regulation S–X (''When information is required in schedules for both the person and its subsidiaries consolidated, it may be represented in the form of a single schedule, provided that items pertaining to the registrant are separately shown and that such single schedule affords a properly summarized presentation of the facts.'') Additionally, in order to conform rule 6–10(c) with the new requirements under Article 12, we added schedules corresponding to our proposed new schedules of derivatives investments, as discussed above. *See* rule 6–10(c) of Regulation S–X.

[713] *See* proposed rules 6–03(d); 6–04.3; 6–04.9 of Regulation S–X. We also proposed to amend rule 6–04.10 to reflect that the amount of liabilities for securities sold short and for open options contracts written would be reported under proposed rule 6–04.9. *See* proposed rule 6–04.10 of Regulation S–X.

[714] *See* rules 6–03(d); 6–04.3; 6–04.9; and 6–04.10 of Regulation S–X.

[724] *See* proposed rule 6.03(m) of Regulation S–X.

[725] *See infra* section II.F and section II.D.4.c.iii.

[726] *See* proposed rule 6–07.1 of Regulation S–X.

[727] *See* ICI Comment Letter (supporting disclosure of payment-in-kind income with a 5 percent threshold).

percent of total expenses.[728] We agree with commenters' that a disclosure threshold for non-cash disclosures would alleviate unnecessary reporting burdens. We also agree with commenters that, in order to keep all income disclosures under rule 6–07.1 consistent, a 5 percent *de minimis* threshold, which is the current requirement for categories of investment income and expenses under current rule 6–07.1, is also appropriate for our amended non-cash income disclosure under rule 6–07.1.[729] As a result, we are modifying the proposal by adopting a new instruction to rule 6–07.1 clarifying that a separate disclosure of income from payment-in-kind interest or non-cash dividends, like other types of income under current rule 6–07.1, is only required if all income of this type exceeds 5 percent of the fund's investment.[730]

Other commenters requested that we define ''non-cash dividends'' and ''payment-in-kind-interest earned.'' [731] Finally, as in Form N–PORT, some commenters noted that certain in-kind payments, such as when a fund has the option to elect to receive either cash or in-kind payments, do not raise the same risks as in-kind payments resulting from a distressed issuer and should therefore be disclosed separately.[732] As discussed above in connection with Form N–PORT, we agree that in-kind payments resulting from an election, rather than, for example, issuer distress, do not involve the same risk of issuer default. Therefore not requiring funds to report on Form N–PORT interest paid in-kind if the fund has the option of electing in-kind payments and has elected to be paid in-kind.[733] However, we believe for the statement of operations, it is important that all types of income from in-kind payments be subject to the separate disclosure threshold so that investors can compare this information to other funds. Thus, we do not believe that it is appropriate or necessary to provide prescriptive definitions of ''non-cash dividends'' and ''payment-in-kind-interest earned ''for purposes of income statement disclosure and, unlike Form N–PORT, we are not amending Regulation S–X to differentiate income from different types of in-kind payments.[734]

We proposed to amend rule 6–07.7(a) in order to conform statement of operations disclosures of the net realized gains or losses from investments to include our additional derivatives disclosures in proposed rules 12–13A through 12–13C.[735] Likewise, we proposed similar changes to proposed rule 6–07.7(c) (current rule 6–07.7(d)) in order to conform statement of operations disclosures of the net increase or decrease in the unrealized appreciation or depreciation of investments to include our new derivatives disclosures.[736] We received no comments on this proposal and are adopting both changes as proposed.[737]

We also proposed to eliminate Regulation S–X's requirement for specific disclosure of written options activity under current rule 6–07.7(c).[738] This provision was adopted prior to FASB adopting disclosures generally applicable to derivatives, including written options, now required by FASB ASC Topic 815.[739] We continue to believe that the requirement for specific disclosures for written options activity should be removed because they are generally duplicative of the requirements of FASB ASC Topic 815, which include disclosure of the fair value amounts of derivative instruments, gains and losses on derivative instruments, and information that would enable users to understand the volume of derivative activity.[740] Commenters expressed support for this proposal, which we are adopting.[741]

We proposed to eliminate the exception in Schedule II of current rule 6–10 which does not require reporting under current rule 12–13 if the investments, at both the beginning and end of the period, amount to one percent or less of the value of total investments.[742] We believe that it is appropriate to eliminate this exception, because a fund may have significant notional amounts in its portfolio that could be valued at one percent or less of the value of total investments. Accordingly, removing this exception will provide more transparency to investors regarding a fund's derivatives activity. We received no comments on this proposal, and we are adopting it as proposed.[743]

D. Form N–CEN and Rescission of Form N–SAR

1. Overview

We are adopting a new framework by which registered investment companies will report census-type information to the Commission by rescinding Form N–SAR and replacing it with a new form—Form N–CEN.[744] Most commenters generally supported our proposal to replace Form N–SAR with Form N–CEN, agreeing that Form N–CEN provides both the Commission and the public with enhanced and updated census-type information on a wide range of compliance, risk assessment, and policy related matters.[745] Form N–SAR was adopted by the Commission in

[728] *See* State Street Comment Letter (recommending a 10% benchmark); AICPA Comment Letter (5% threshold); MFS Comment Letter (opposed to separate presentation of non-cash income for payment-in-kind securities because the schedule of investments provides adequate disclosure of securities with payment-in-kind income, but supporting a de minimis threshold for other types of non-cash income); PwC Comment Letter (same).

[729] *See, e.g.,* PwC Comment Letter; and MFS Comment Letter.

[730] *See* rule 6–07.1 of Regulation S–X.

[731] *See* PwC Comment Letter; and AICPA Comment Letter.

[732] *See, e.g.,* AICPA Comment Letter; and PwC Comment Letter; *see also supra* section II.A.2.g.ii.

[733] *See supra* section II.A.2.g.ii; *see also* Item C.9.e of Form N–PORT.

[734] *See* rule 6–07.1 of Regulation S–X. Commenters specifically requested that we not require separate disclosures for amortization and accretion as it is unnecessary because shareholders generally do not distinguish between cash interest income and income in the form of accretion or amortization. *See, e.g.,* PwC Comment Letter; MFS Comment Letter; ICI Comment Letter; AICPA Comment Letter. We agree and are not including a separate disclosure for amortizations and accretions.

[735] *See* proposed rule 6–07.7(a) of Regulation S–X.

[736] *See* proposed rule 6–07.7(c) of Regulation S–X.

[737] *See* rules 6–07.7(a) and (c) of Regulation S–X.

[738] *See* current rule 6–07.7(c) of Regulation S–X [17 CFR 210.6–07.7(c)].

[739] *See* ASC 815 (Derivatives and Hedging).

[740] *Id.* Rule 6–07.7(c) requires disclosure in a note to the financial statements of the number and associated dollar amounts as to option contracts written: (i) At the beginning of the period; (ii) during the period; (iii) expired during the period; (iv) closed during the period; (v) exercised during the period; and (vi) balance at end of the period. The balances at the beginning of the period and end of the period are available in the prior period-end and current period-end schedules of open option contracts written, respectively. By eliminating the written options roll-forward, investors would no longer have information regarding the number of contracts expired, closed, or exercised during the period. However, disclosures required by ASC 815 provide gains and losses on derivative instruments, including written options, along with information that would enable users to understand the volume of derivative activity during the period.

[741] *See, e.g.,* ICI Comment Letter; BlackRock Comment Letter.

[742] *See* current rule 6–10(c)(1) Schedule II of Regulation S–X; *see also* proposed rule 6–10(b)(1) Schedule II of Regulation S–X.

[743] We also made several technical, non-substantive changes to the proposed rules. *See* rules 6–03(d) and 6–07 (moved ''business development companies'' to after ''other than face-amount certificates.'').

[744] We are rescinding Form N–SAR and replacing it with a new census reporting form, Form N–CEN, rather than amending Form N–SAR in order to avoid technical difficulties that could arise with filing reports on an amended Form N–SAR (*e.g.,* difficulties related to changes to filing format and form specifications). We have modified the numbering convention for items within Form N–CEN to be consistent with that of the numbering conventions of other forms (*e.g.,* Forms N–MFP and N–PORT).

[745] *See, e.g.,* SIFMA Comment Letter I; ICI Comment Letter; Invesco Comment Letter; Morningstar Comment Letter; BlackRock Comment Letter.

1985 and requires that funds report a variety of census-type information to the Commission, including information relating to a fund's organization, service providers, fees and expenses, portfolio strategies and investments, portfolio transactions, and share transactions. Funds generally must file reports on Form N–SAR semi-annually, except for UITs, which file annually.[746] By contrast, as discussed further below, all funds will now file reports on Form N–CEN annually.[747]

In recent years, Commission staff has found that the utility of the information reported on Form N–SAR has become increasingly limited. We believe there are two primary reasons for this limited utility. First, in the past two decades, we have not substantively updated the information reported on the form to reflect new market developments, products, investment practices, or risks. Second, the technology by which funds file reports on Form N–SAR has not been updated and limits the Commission staff's ability to extract and analyze the data reported. We believe that by updating the content and format requirements for census reporting through new Form N–CEN, the Commission will be better able to carry out its regulatory functions while at the same time reducing burdens on filers.

Many commenters agreed that Form N–SAR is outdated and commended the Commission's efforts to improve the relevance of information reported to the Commission.[748] Commenters generally supported Form N–CEN as proposed, and we are adopting the form substantially as proposed with some modifications to address specific issues raised by commenters, as discussed in more detail below.

Form N–CEN gathers similar census information about the fund industry that funds currently report on Form N–SAR, which will be able to be aggregated and analyzed by Commission staff to better understand industry trends, inform policy, and assist with the Commission's examination program. To improve the quality and utility of information reported, Form N–CEN streamlines and updates information reported to the Commission to reflect current Commission staff information needs and developments in the industry.[749] Where possible, we have endeavored to exclude items from Form N–CEN that are disclosed or reported pursuant to other Commission forms, or are otherwise available; however, in some limited cases, we are collecting information on Form N–CEN that may be similarly disclosed or reported elsewhere, but that the staff would benefit from collecting in a structured format.

In order to improve the utility of the information reported to the Commission, we are requiring that reports on Form N–CEN be structured in an XML format.[750] Under this format, filers will no longer be required to use outdated technology for census reporting. Additionally, the XML structured format will allow reported information to be more efficiently and effectively validated, aggregated, compared, and analyzed through automated means and, therefore, more useful to end users.

One commenter expressed support for the XML format.[751] As discussed above in connection with Form N–PORT, certain others generally advocated for XBRL, a tagged system that is based on XML and was created specifically for the purpose of reporting financial and business information.[752] Another commenter noted that the Commission should standardize the formatting requirements (*i.e.,* ASCII/TXT, HTML, XBRL, XML) across all fund reporting in order to ease the burden on funds that would have to comply with different formatting requirements.[753]

As discussed above in connection with Form N–PORT, based upon our experiences with Forms N–MFP and PF, both of which require filers to report information in an XML format, we believe that requiring funds to report information on Form N–CEN in an XML format will provide the information that we seek in an appropriate manner.[754] Moreover, the interoperability of data between Forms N–MFP, PF, N–PORT, and N–CEN will aid the staff with cross-checking information reported to the Commission and in monitoring the fund industry.[755] As discussed further below in the economic analysis, the XML format will also improve the quality of the information disclosed by imposing constraints on how the information will be provided and by providing a built-in validation framework of the data in the reports.[756] We are therefore adopting the requirement that reports on Form N–CEN be filed in an XML format as proposed.

2. Who Must File Reports on Form N–CEN

We are adopting, as proposed, the requirement that all registered investment companies, except face-amount certificate companies,[757] file reports on Form N–CEN.[758] No commenters objected to this requirement.[759] As proposed, funds offering multiple series will be required to report information in Part C of the form as to each series separately, even if some information is the same for two

[746] *See* current rule 30b1–1 and current rule 30a–1.

[747] *See* rule 30a–1.

[748] *See, e.g.,* ICI Comment Letter; SIFMA Comment Letter I; Invesco Comment Letter; BlackRock Comment Letter.

[749] We are streamlining our data collection, in part, through the use of yes/no questions in order to flag certain information for follow-up, if necessary, by Commission staff. *See, e.g.,* Item B.10 and Item C.6.a of Form N–CEN. For example, staff of our Office of Compliance Inspections and Examinations may rely on responses to flag questions in Form N–CEN to indicate areas for follow-up discussion or to request additional information.

[750] The Commission has adopted a number of other forms that are structured in an XML format, including Form N–MFP. Reports on Form N–SAR, by contrast, are filed using an outdated filing application.

[751] Morningstar Comment Letter (noting that the format will provide more accessible data to the public and reduce the amount of defective reporting currently possible in Form N–SAR).

[752] *See* AICPA Comment Letter; XBRL US Comment Letter; *but see* Morningstar Comment Letter (''Extensible Business Reporting Language has had very limited success, and certain aspects of the standard are too lenient for regular data validation.''). *See also supra* footnotes 444–449 and accompanying text.

[753] *See* Schnase Comment Letter (opining that the Commission should also ease the burdens on funds by allowing funds to input their data through a pre-formatted web portal or web form).

[754] *See supra* footnotes 444–449 and accompanying text. Based on our experience with reports on Form N–MFP and other XML-based reports, we anticipate that the XML structured data file will be compatible with a wide range of open source and proprietary information management software applications. Continued advances in structured data software, search engines, and other web-based tools may further enhance the accessibility and usability of the data. *See, e.g.,* Money Market Reform 2010 Release, *supra* footnote 447, at n. 341.

[755] *See* Morningstar Comment Letter.

[756] *See infra* section III.B.

[757] Face-amount certificate companies are investment companies which are engaged or propose to engage in the business of issuing face-amount certificates of the installment type, or which have been engaged in such businesses and have any such certificates outstanding. *See* section 4(1) of the Investment Company Act. Face-amount certificate companies currently are not required to file reports on Form N–SAR. *See* General Instruction A of Form N–SAR. Face-amount certificate companies will continue to file periodic reports pursuant to section 13 [17 CFR 240.13a–1] or section 15(d) of the Exchange Act [17 CFR 240.15d–1].

[758] *See* Proposing Release, *supra* footnote 7, at section II.E.2. *See also* rule 30a–1. Consistent with Form N–SAR, BDCs, which are not registered investment companies, will not be required to file reports on Form N–CEN.

[759] *See* Morningstar Comment Letter (noting that the filing requirement is appropriate, but also suggesting that the Commission allow flexibility on how a fund chooses to report the data, including filing at the CIK-level with separate ''nodes'' for each series ID and designing the data base that is to house this information using the filing data and CIK as a key for each registrant-level data record).

or more series.[760] One commenter opined that one report covering multiple series would be sufficient as many questions apply to the registrant.[761]

Like Form N–SAR, the sections of Form N–CEN that a fund is required to complete will depend on the type of registrant in order to better tailor the reporting requirements.[762] As was proposed, all funds will be required to complete Parts A and B, and file any attachments required under Part G. In addition, funds will be required to complete the following Parts as applicable:

- All management companies, other than SBICs, will complete Part C;
- Closed-end funds and SBICs will complete Part D;
- ETFs (including those that are UITs) will complete Part E;[763] and
- UITs will complete Part F.[764]

3. Frequency of Reporting and Filing Deadline

Management investment companies currently file reports on Form N–SAR semi-annually,[765] and UITs file such reports annually.[766] To reduce reporting burdens, we proposed that reports on Form N–CEN be filed on an annual basis, regardless of type of filer.[767] While one commenter suggested semi-annual reporting on Form N–CEN if certain additional requirements were to be included,[768] most commenters generally supported the annual filing requirement.[769] Because Form N–CEN requires census-type information, which in our experience does not change as frequently as, for example, portfolio holdings information, we continue to believe that an annual filing requirement will be sufficient for purposes of review by Commission staff, as well as investors and other market participants that might use this information.[770] We are, therefore, adopting as proposed the requirement that reports on Form N–CEN be filed on an annual basis.[771]

We proposed that for all funds, the reporting period for Form N–CEN reports would be based on the fund's fiscal year.[772] Currently, management companies file Form N–SAR reports on a fiscal year basis,[773] while UITs file Form N–SAR reports on a calendar year basis.[774] After further consideration, we have determined to require that management companies and UITs include in Form N–CEN reports information from the same time period as they currently report on Form N–SAR because we believe that calendar-year reporting for UITs will yield more comparable data while also reducing costs for reporting UITs.[775] One commenter expressed support for reporting by funds on a fiscal year basis, as that would permit comparisons by data users between information reported on Form N–CEN and information on Form N–CSR.[776] As regards management investment companies, which are required to file reports on Form N–CSR, we agree that fiscal year reporting could have this beneficial effect, though the same would not be true of UITs. Therefore, under the final rule, management companies will file reports on Form N–CEN on a fiscal year basis while UITs will file such reports on a calendar year basis.[777]

We have also added an instruction to the form to clarify that management investment companies that offer multiple series with different fiscal year ends must file a report as of each fiscal year end that responds to (i) Parts A, B, and G, and (ii) Part C and, if applicable, Part E as to only those series with the fiscal year end covered by the report.[778] UITs that offer multiple series will file a single annual report covering all series as of the end of the calendar year.
