FEDERAL REGISTER

Vol. 81 Tuesday,

No. 225 November 22, 2016

Book 1 of 2 Books

Pages 83623–83932

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, Washington, DC 20402 is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see *www.ofr.gov.*

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at *www.fdsys.gov*, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 59, 1 (January 2, 1994) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, *gpocusthelp.com.*

The annual subscription price for the **Federal Register** paper edition is $749 plus postage, or $808, plus postage, for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $165, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register,** including postage, is based on the number of pages: $11 for an issue containing less than 200 pages; $22 for an issue containing 200 to 400 pages; and $33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for $3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see *bookstore.gpo.gov.*

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 81 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

[Docket No. DHS–2009–0036]

RIN 1601–AA00

Freedom of Information Act Regulations

AGENCY: Office of the Secretary, U.S. Customs and Border Protection, and Federal Emergency Management Agency, Department of Homeland Security.

ACTION: Final rule.

SUMMARY: This rule amends the Department's regulations under the Freedom of Information Act (FOIA). The regulations have been revised to update and streamline the language of several procedural provisions, and to incorporate changes brought about by the amendments to the FOIA under the OPEN Government Act of 2007. Additionally, the regulations have been updated to reflect developments in the case law.

DATES: This rule is effective December 22, 2016.

FOR FURTHER INFORMATION CONTACT: James V.M.L. Holzer, Deputy Chief FOIA Officer, DHS Privacy Office, (202) 343–1743.

SUPPLEMENTARY INFORMATION:

I. Background

The Secretary of Homeland Security has authority under 5 U.S.C. 301, 552, and 552a, and 6 U.S.C. 112(e), to issue FOIA and Privacy Act regulations. On January 27, 2003, the Department of Homeland Security (Department or DHS) published an interim rule in the **Federal Register** (68 FR 4056) that established DHS procedures for obtaining agency records under the FOIA, 5 U.S.C. 552, or Privacy Act, 5 U.S.C. 552a. DHS solicited comments on this interim rule, but received none.

In 2005, Executive Order 13392 called for the designation of a Chief FOIA Officer and FOIA Public Liaisons, along with the establishment of FOIA Requester Service Centers as appropriate. Subsequently, the Openness Promotes Effectiveness in our National Government Act of 2007 (OPEN Government Act), Public Law 110–175, required agencies to designate a Chief FOIA Officer who is then to designate one or more FOIA Public Liaisons (5 U.S.C. 552(j) and 552(k)(6)). Sections 6, 7, 9, and 10 of the OPEN Government Act amended provisions of the FOIA by setting time limits for agencies to act on misdirected requests and limiting the tolling of response times (5 U.S.C. 552(a)(6)(A)); requiring tracking numbers for requests that will take more than 10 days to process (5 U.S.C. 552(a)(7)(A)); providing requesters a telephone line or Internet service to obtain information about the status of their requests, including an estimated date of completion (5 U.S.C. 552(a)(7)(B)); expanding the definition of "record" to include records "maintained for an agency by an entity under Government contract, for the purposes of records management" (5 U.S.C. 552(f)(2)); and introducing alternative dispute resolution to the FOIA process through FOIA Public Liaisons (5 U.S.C. 552(a)(6)(B)(ii) & (l)) and the Office of Government Information Services (5 U.S.C. 552(h)(3)).

On July 29, 2015, the Department of Homeland Security published a proposed rule to amend existing regulations under the FOIA. *See* 80 FR 45101.[1] DHS accepted comments on the proposed rule through September 28, 2015. Finally, on June 30, 2016, the President signed into law the FOIA Improvement Act of 2016, Public Law 114–185, into law. DHS is now issuing a final rule that responds to public comments on the proposed rule and incorporates a number of changes required by the FOIA Improvement Act of 2016.

II. Discussion of Final Rule

A. Non-Discretionary Changes Required by the FOIA Improvement Act of 2016

In compliance with the FOIA Improvement Act of 2016, DHS has made the following changes to the proposed rule text:[2]

DHS has revised proposed CFR 5.8(a)(1), "Requirements for filing an appeal," to change the current appeals period from 60 days to 90 days as required by section 2(1)(C) of the Act. DHS has also provided further clarification regarding the timely receipt of electronic submissions.

DHS has added 6 CFR 5.11(d)(3) to incorporate the portion of the Act that restricts an agency's ability to charge certain fees. Specifically, section 2(1)(B) of the Act provides that an agency may continue to charge fees as usual for an untimely response only if: A court has determined that exceptional circumstances exist, or (1) the requester has been timely advised of unusual circumstances, (2) more than 5000 pages are necessary to respond to the request, and (3) the component has contacted the requester (or made at least three good-faith attempts) about ways to narrow or revise the scope of the request. DHS has incorporated this requirement into this final rule without change.

DHS has removed a reference in proposed 6 CFR 5.1(a)(2) that referenced the agency's nonbinding policy to disclose exempt information when the agency reasonably foresees that disclosure would not harm an interest protected by an exemption. Because section 2(1)(D) of the Act codifies a substantially similar standard in law,

[1] Except as explicitly stated below, DHS incorporates by reference the section-by-section analysis contained in the preamble to the proposed rule.

[2] Although these changes represent departures from the proposed rule text, DHS for good cause finds that advance notice and an opportunity for public comment are not necessary in connection with these changes. *See* 5 U.S.C. 553(b)(B). Notice-and-comment is unnecessary because these changes simply reflect the current state of the law, consistent with the 2016 Act, and because these changes constitute a procedural rule exempt from notice-and-comment requirements under 5 U.S.C. 553(b)(A).

DHS is eliminating the proposed statement of policy to avoid confusion.

DHS has revised proposed 6 CFR 5.2 to conform to section 2(1)(A)(i) of the Act, which strikes a reference to public records that must be made available ''for public inspection and copying,'' and inserts in its place a reference to public records that must be made available ''for public inspection *in an electronic format*'' (emphasis added).

Finally, DHS has also revised proposed 6 CFR 5.5(c), 5.6(c), and 5.6(e) to conform to requirements in section 2(1)(C) of the Act, which require the agency to notify requesters of the availability of the Office of Government Information Services (OGIS) and the agency's FOIA Public Liaison to provide dispute resolution services.

B. Response to Comments and Other Changes From the Proposed Rule

In total, DHS received fifteen public submissions to its proposed rule, including one submission from another agency. DHS has given due consideration to each of the comments received and has made several modifications to the rule, as discussed in greater detail below. Below, DHS summarizes and responds to the significant comments received.[3] DHS has grouped the comments by section.

1. Comments on Proposed 6 CFR 5.1 (General Provisions) and 5.2 (Proactive Disclosures of DHS Records)

DHS proposed to revise 6 CFR 5.1 and 5.2 to, among other things, eliminate redundant text and incorporate reference to additional DHS policies and procedures relevant to the FOIA process. Two commenters suggested that the Department retain text in original 6 CFR 5.1(a)(1), which provides that information routinely provided to the public as part of a regular Department activity (for example, press releases) may be provided to the public without following the DHS FOIA regulations. The commenters stated that they opposed DHS's proposed removal of that language because not all DHS FOIA officers and FOIA personnel understand that such information is to be provided routinely. The commenters also stated that retaining the language would promote greater consistency in FOIA review. The Department has considered this suggestion and has determined that the revised language at 6 CFR 5.2 on proactive disclosure of department records adequately replaces the language in original 6 CFR 5.1(a)(1). The revised language provides for posting of records required to be made available to the public, as well as additional records of interest to the public that are appropriate for public disclosure (such as press releases). The Department has made considerable efforts across the components to ensure that records appropriate for public disclosure are proactively posted in agency reading rooms.

One commenter suggested that proposed 6 CFR 5.1(a)(1) be amended to reflect that the 1987 OMB guidelines referenced in the paragraph would only apply to the extent they are consistent with subsequent statutory changes. As is the case with any statutory change, if the law changes and the regulation or guidance is no longer consistent with the law, then DHS will comply with the law: In this case, changes in the statute would override the OMB guidelines. DHS declines to make this change, because it is self-evident that DHS only complies with OMB guidelines to the extent they are consistent with the governing statute.

Finally, upon further consideration of the proposed rule text, DHS has made a number of clarifying edits to proposed 6 CFR 5.1(a)(1). Because this content is adequately covered in 6 CFR 5.10, DHS has removed much of the discussion of this topic in 6 CFR 5.1(a)(1).

2. Comments on Proposed 6 CFR 5.3 (Requirements for Making Requests)

One commenter suggested that DHS retain the current 6 CFR 5.3(a), which requires requests for information about third-party individuals be accompanied by signed authorizations from the subject of the information. The commenter argued that removing the requirement for signed authorizations could harm individual privacy. However, the subject language in proposed 6 CFR 5.3(a)(4) brings the DHS regulation more into line with the language used by many other government agencies, including the Department of Justice, which provides interagency leadership on FOIA matters. *See* 28 CFR 16.3. In addition, final section 5.3(a)(4) makes plain the importance of third-party authorization. And as a matter of established case law, in conducting the balancing test between privacy interest and the public interest in disclosure of personal information, DHS will weigh the existence or non-existence of a signed authorization on a case-by-case basis; in many, but not all cases, the lack of a signed authorization may prove to be a barrier to access of third-party records unless a significant public interest is raised. As such, DHS declines to alter the proposed language.

The same commenter suggested that a caveat be included allowing access to the records of public officials without signed authorization because this would facilitate access to information about government officials. As noted above, DHS considers every request seeking access to third party information under a balancing test that evaluates the privacy of the individual subject of the records against the public interest in disclosing such information. Depending on the information sought, some of the records of government officials may be available without the need for a signed authorization. However, all records of all government officials will not meet the requirements of the balancing test. Therefore, DHS declines to create a blanket policy to waive the personal privacy interests of government officials in their records.

As proposed, 6 CFR 5.3(c) would allow DHS to administratively close a request that does not adequately describe the records, if the requester does not respond within 30 days to DHS's request for additional information. One commenter requested that DHS clarify how DHS may make such a request (*e.g.,* by telephone or in writing or both), how a requester may respond, and whether a written response would be considered timely if it were postmarked or transmitted electronically within 30 days. DHS has revised the regulatory text to make clear that each communication must be in writing (physical or electronic) and that a written response would be considered timely if it were postmarked within 30 working days or transmitted electronically and received by 11:59:59 p.m. ET on the 30th working day.

Proposed 6 CFR 5.3(c) provided for administrative closure if the requester fails to provide an adequate description of the records sought within 30 days of DHS's request for such a description. A commenter suggested amending this section to provide that an inadequately described request may lose priority in the processing queue until the requester provides an adequate description, but will not be administratively closed. For purposes of placement in the processing queue, an unperfected request (*i.e.* a request that requires additional clarification or other information in order for the agency or component to process the request) is not considered to be in the queue. As a result, the unperfected request has no ''priority'' in the processing queue. Under this rule, DHS will continue to place a request into the queue for processing only after the request is perfected. DHS believes

[3] DHS also received a broad range of supportive comments with respect to a number of the rule's provisions. In the interest of brevity, DHS has not summarized all of the supportive comments below.

that this outcome is the fairest to all requesters, because unperfected requests place a heavy administrative burden on DHS to track and process. A policy to process all such requests would result in a reduction in service for other requesters.

One commenter suggested amending proposed 6 CFR 5.3 to provide that if a requester fails to respond to a request for clarification within 30 days, the agency or component should make an effort to contact the requester using more than one means of communication, before administratively closing the request. The commenter stated that if the requester ultimately responds after the 30-day deadline, DHS should not place the clarified requested at the end of the processing line, but should reopen the request and place it back in the processing queue as though the request had been was perfected on the date when the original request was filed. The commenter stated that this outcome would be consistent with DOJ guidance on ''still interested'' letters. DHS declines to commit to always seeking further clarification following the 30-day deadline. This would be inconsistent with the purpose of the 30-day deadline. And for the reasons described earlier in this preamble, DHS also declines to deem responses perfected retrospectively. DHS notes that DOJ's guidance on ''still interested'' letters is unrelated to agency requests for clarification.[4] DHS also notes that proposed 6 CFR 5.3 does not contain an exhaustive list of reasons for administratively closing a request; for example, a request may be administratively closed at the request of the entity or individual that made the request. Pending requests may also be closed if DHS learns that a requester is deceased.

A commenter suggested that DHS commit to always seek additional information from a requester before administratively closing the request. The commenter stated that this would ensure that FOIA officials do not simply close a request without explanation. DHS recognizes that requesters may have difficulty formulating proper FOIA requests and as such, has provided information and resources to aid requesters in drafting proper FOIA requests. Resources permitting, DHS will attempt to seek additional clarification rather than administratively close requests, but out of fairness to other requesters, in the interest of efficiency, and consistent with its historical practice and the practice of other agencies, DHS will not impose an affirmative requirement to seek additional information or clarification in every instance. DHS has clarified 6 CFR 5.3(c) to this end. DHS notes that it does not administratively close requests without any explanation.

Another commenter proposed to extend the deadline for clarification to 30 business days rather than 30 calendar days. The commenter stated that a 30-business-day deadline would ''conform to the Department of Justice's recommended deadline with respect to 'still-interested' letters.'' DHS agrees with the commenter that 30 working days is more appropriate. DHS has therefore extended the clarification period from 30 calendar days to 30 working days. This has the additional benefit of being consistent with the separate 30-working-day deadline in DOJ's recommended guidelines on still-interested letters.

One commenter suggested amending proposed 6 CFR 5.3(c) to allow for 60 days, rather than 30 days, after a request for clarification and before administrative closure. The commenter stated that the change was necessary because of ''inevitable delays in processing outgoing communications from federal agencies.'' The commenter stated that many journalists are often on assignment without access to physical mail or email for days and weeks at a time, and that ''a 30-day window could unfairly jeopardize the processing of their FOIA requests in the event that a DHS component requests a clarification, requiring them to unnecessarily re-submit requests, and delaying their access to requested records. Extending the response time to 60 days does not impose any additional burden on DHS components, but would assist requesters.'' While DHS recognizes that certain requesters may have some difficulty responding to a request for clarification within a specified time period, in the interest of not creating additional administrative burdens, DHS has determined that the 30-working-day time period established by this rule strikes the appropriate balance. DHS notes that an administrative closure of an unperfected request does not prevent the requester from resubmitting the request at a future date, and that since an unperfected request is by definition not placed in the processing queue, there is no negative impact on a requester with respect to losing their place in the queue if a requester needs to submit a revised request.

A commenter suggested that DHS limit the use of administrative closure to those circumstances described in proposed section 5.3(c), and not administratively close requests based on any other grounds. The commenter specifically stated that DHS sometimes administratively closes cases based on a requester's failure to respond to a ''still interested'' letter, and that the use of still-interested letters ''place[s] a significant an unwarranted burden on FOIA requesters that runs counter to FOIA.'' The commenter also stated that the proposed rule did not include provision for administratively closing a FOIA request based on the requester's failure to respond to a ''still interested'' letter, and suggested that DHS should not introduce new regulatory text on ''still-interested'' letters in the final rule, because the proposal did not afford commenters a sufficient opportunity to comment on this topic. DHS disagrees that it lacks authority to administratively close requests on grounds that are not referenced in its FOIA regulations. For example, although DHS regulations do not provide for the administrative closure of a request at the requester's election, DHS may administratively close such a request. This example is very similar to the use of ''still interested'' letters, described earlier in this preamble.

One commenter suggested that the text of proposed 6 CFR 5.3 be amended to state that when a request is clear on its face that it is being made by an attorney on behalf of a client, no further proof of the attorney-client relationship would be required. The commenter stated that DHS inconsistently requires attorneys for requesters provide documentation of the attorney-client relationship in the form of (1) a signed DHS Form G–28, (2) a signed statement on the letterhead of the entity for which the FOIA request is being made, or (3) a signed statement from the actual requester. The commenter stated that such documentation should not be required where the FOIA request clearly states that it is being made by an attorney on behalf of a client. DHS is unable to make this modification. DHS analyzes third-party requests for records under both the Privacy Act and the FOIA. As part of this process, DHS determines if the records are being sought with the consent of the subject of the records. Without proper documentation, DHS is unable to assess whether a third party, be it an attorney or other representative of the subject of the records, is properly authorized to

[4] A ''still interested'' letter is a letter that the agency sends to a requester if a substantial period of time has elapsed since the time when the request was submitted and is used as a method to make sure that the requester continues to seek the original information. A requester may respond to a ''still interested'' letter by indicating that she or he continues to be interested in the original information sought, seek to modify his or her request, or indicate that he or she is no longer interested in the request.

make a Privacy Act request for the records. Without authorization, DHS applies a balancing test to determine whether the personal privacy interests of the individual outweigh the public interest in disclosure of such records, which may result in a denial of access to third party requests that are not accompanied with proper signed authorization.

3. Comments on Proposed 6 CFR 5.4 (Responsibility for Responding to Requests)

One commenter suggested amending proposed 6 CFR 5.4(d), which pertains to interagency consultations, to clarify the extent to which consultations may also be required with the White House. The commenter stated that ''[t]o promote transparency,'' the final rule should ''address [DHS's] FOIA-related consultations with the Office of White House Counsel.'' Consultations occur on a case-by-case basis and depend on the specific information that may be revealed in a request. Depending on the specific request at issue, DHS and its components consult with entities throughout state, local, and federal government, including the White House. An attempt to catalogue every possible consultation would be impracticable, and would be inconsistent with the overall goal of streamlining the regulations. DHS therefore declines to make this suggested change.

One commenter stated that DHS should always notify the requester of referrals because DHS had not substantiated its claim that merely naming the agency to which a FOIA request had been referred could ''harm an interest protected by an applicable exemption.'' The commenter also stated that proposed 6 CFR 5.4(f) mistakenly referenced referral of records, rather than requests. The commenter stated that ''referrals do not entail referrals of records, but instead implicate requests.'' DHS and its components make every effort to notify requesters when records are referred to other components. A referral differs from a consultation in several ways, but most significantly to the requester, when records are referred to another agency, the receiving agency is the entity that will ordinarily respond directly to the requester unless such a response might compromise a law enforcement or intelligence interest. DHS and its components have a very broad mission space that includes law enforcement and intelligence functions. As such, there may be times when DHS is unable to disclose the referral of records from one component to another or from a DHS component to another agency due to law enforcement and/or intelligence concerns. As such, DHS declines to make this a mandatory requirement.[5] Finally, the reference to ''records'' at the end of proposed 6 CFR 5.4(f) was intentional. In general, when DHS makes a referral to another agency, it is referring responsive records to that agency, rather than referring the request itself without records.

4. Comments on Proposed 6 CFR 5.5(e)(3) and 5.11(b)(6) (Timing of Responses to Requests and Fees, With Respect to News Media)

Five commenters suggested amendments to the proposed language of 6 CFR 5.5(e)(3) and 5.11(b)(6) to make the definition of news media less restrictive. Commenters felt that it would be difficult or cumbersome for certain requesters to establish that news dissemination was their ''primary professional activity.'' In response, DHS has eliminated the requirement in proposed 5.5(e)(3) that a requester seeking expedited processing establish that he or she engages in information dissemination as his or her primary professional activity. DHS has also removed the ''organized and operated'' restriction. These changes are consistent with existing case law.[6]

One commenter also proposed that DHS eliminate the requirement in proposed 6 CFR 5.11(b)(6) that news be broadcast to the ''public at large'' and that periodicals qualify for news media status only if their products are available to the general public. The commenter suggested that the proposed rule should make clear that no particular audience size was required. The reference to the ''public at large'' and the ''general public'' are merely exemplary and do not act as hard-and-fast restrictions. The standard identified in the final rule, as revised in response to public comments, allows DHS to classify a requester as a member of the news media on a case-by-case basis without a rigid requirement of audience size.

One commenter proposed that DHS eliminate the availability of expedited processing for the news media. As the FOIA statute clearly contemplates expedited processing for news media, DHS is unable to eliminate this provision.

5. Comments on Proposed 6 CFR 5.6 (Responses to Requests)

Two commenters requested that the language of proposed 6 CFR 5.6 be amended to include a statement that there is a ''presumption in favor of disclosure.'' The first commenter sought inclusion of the language based upon memoranda issued by the President Obama and Attorney General, respectively.[7] The second commenter also cited the model civil society FOIA rules as the basis for requesting the additional language. DHS operates in accordance with guidance promulgated by the Department of Justice, including Attorney General Holder's 2009 memorandum which urged agencies to ''adopt a presumption in favor of disclosure.'' DHS FOIA regulations are intended to inform and advise the public about DHS operations and procedures for processing FOIA requests. Because proposed 6 CFR 5.6 deals strictly with the administrative steps of processing a FOIA request, and because the Department already adheres to the direction in the memoranda without relying on additional regulatory text, the Department declines to make this suggested change.

One commenter suggested that the regulations specify greater use of electronic means of communication by DHS components to allow the electronic filing of FOIA requests to avoid the delay and uncertainty occasioned by first-class mail. The Department already encourages the electronic filing of FOIA requests and the service is available for all components through the DHS FOIA portal at *www.dhs.gov/steps-file-foia* or through the DHS mobile application (available for both iOS and Android platforms). The Department has incorporated language into 6 CFR 5.6(a) which specifies that DHS components should use electronic means of communicating with requesters whenever practicable.

One commenter proposed changing the language of 6 CFR 5.6(b) to state that DHS will assign a request a tracking number if processing the request would take longer than ten calendar days, rather than ten working days as the proposed rule provided. The commenter stated that the FOIA statute specified ''calendar'' days rather than working

[5] For more information on consultations and referrals, please see the Memorandum from DHS Chief FOIA Office Mary Ellen Callahan to DHS FOIA Officers, DHS Freedom of Information Act Policy Guidance: (1) Processing ''Misdirected'' FOIA Requests; and (2) Implementation of the Department of Justice Office of Information Policy (OIP) December 2011 OIP Guidance: Referrals, Consultations, and Coordination: Procedures for Processing Records When Another Agency or Entity Has an Interest in Them (Mar. 9, 2012), available at *https://www.dhs.gov/sites/default/files/publications/dhs-foia-handling-guidance_1.pdf.*

[6] *See Cause of Action* v. *FTC,* 799 F.3d 1108 (D.C. Cir. 2015)

[7] *See* 74 FR 4683 (Jan. 26, 2009); Memorandum from the Attorney General to the Heads of Executive Departments and Agencies, The Freedom of Information Act (FOIA) (Mar. 19, 2009), available at *https://www.justice.gov/sites/default/files/ag/legacy/2009/06/24/foia-memo-march2009.pdf.*

days. The FOIA statute provides only that a tracking number be assigned if the request will take longer than ''ten days'', 5 U.S.C. 552(a)(7)(A), and is silent on the issue of working or calendar days. However, in light of the use of working days to determine the twenty-day time limitations for original responses and responses to appeals (which specify twenty days ''excepting Saturdays, Sundays, and legal public holidays'' 5 U.S.C. 552(a)(6)(A)(i) and (ii)), DHS has also implemented 5 U.S.C. 552(a)(7)(A) using a working days standard. For clarification, working days refers to weekdays (Monday through Friday), and not legal holidays and weekends (Saturday and Sunday).

One commenter suggested that the initial acknowledgment letter contain information on how to file an administrative appeal because if DHS fails to provide a timely response to the FOIA request, a requester is entitled to file an administrative appeal or seek judicial review. The commenter stated that in cases of constructive denial, the requester would not be informed how to administratively appeal the constructive denial. DHS declines to add the appeals language to the initial acknowledgment letter. While DHS acknowledges that in situations of constructive denial, a requester may seek to file an administrative appeal, at the time the initial letter is sent, there is no adverse determination from which to appeal, which may serve to confuse members of the public. In addition. DHS provides information on how to file an appeal on its Web site (*https://www.dhs.gov/foia-appeals-mediation*), and information is always available by contacting the DHS Privacy Office or any of the component FOIA officers via U.S. mail, electronic mail, or by telephone. Contact information for DHS FOIA officers can be found at the following link: *https://www.dhs.gov/foia-contact-information.*

One commenter suggested that proposed 6 CFR 5.6(d) be amended to exclude language that characterizes as an ''adverse determination'' the agency's determination that a ''request does not reasonably describe the records sought.'' The commenter stated that the language would allow DHS components to deny FOIA requests based on inadequate descriptions of records sought, rather than seeking more information from requesters. As provided in proposed 6 CFR 5.3, DHS components try to obtain clarification from requesters by use of ''needs more information'' letters and contacting requesters via telephone or electronic mail to seek additional information. In many, but not all, circumstances the additional information is sufficient to allow DHS to process the request. However, if DHS ultimately administratively closes a request, DHS treats such a closure as an adverse determination from which the requester can seek administrative appeal.

One commenter suggested that proposed 6 CFR 5.6(g) be amended to specifically prohibit DHS from making a ''false'' response to a request when DHS determines that the request falls within 5 U.S.C. 552(c). Section 5.6(g) was intended to provide notice that records determined to be properly subject to an exclusion are not considered to be responsive to the FOIA request because excluded records, by law, ''are not subject to the requirements of [the FOIA].'' 5 U.S.C. 552(c). By definition, when DHS determines that an exclusion under 552(c) applies, any documents would no longer be subject to FOIA and DHS's statement to a requester of such fact could not be considered ''false''. While the commenter would prefer that the agency make a ''Glomar'' response, that is, refuse to confirm or deny the existence of responsive records, the FOIA statutory scheme clearly allows agencies to utilize an exclusion when the situation is appropriate. And as proposed 6 CFR 5.6(g) and 5 U.S.C. 552(c) make clear, once an agency lawfully applies an exclusion, the excluded records are not responsive to the request. Accordingly, DHS is maintaining the language as proposed.

6. Comments on Proposed 6 CFR 5.7 (Confidential Commercial Information)

One commenter suggested that proposed 6 CFR 5.7 be amended to require ''a more detailed notification'' to the requester when the agency denies a FOIA request on the basis of FOIA exemption 4. FOIA exemption 4 protects trade secrets and commercial or financial information obtained from a person that is privileged or confidential. The commenter stated that requiring more detail would ''ensure that the requester can properly obtain judicial review.'' DHS already strives to provide as much information as possible to a requester when a request for information is denied. DHS must weigh the requester's need for information against the interests of the submitter of the information; particularly where the information is being withheld as confidential commercial information, it may be impossible for DHS to provide additional information without revealing information that DHS would be required to protect under FOIA Exemption 4. As such, DHS declines to make this suggested change.

Another commenter suggested that DHS revise proposed 6 CFR 5.7(e) and (g) to specify the minimum number of days that will be afforded to submitters to provide comments and file reverse-FOIA lawsuits. The commenter stated that establishing such a standard would prevent the agency from inconsistently interpreting the requirement to provide a ''reasonable'' period of time. DHS agrees that it is appropriate to set a minimum number of days. Accordingly, this final rule specifies that submitters will have a minimum of 10 working days to provide comments. DHS may provide a longer time period, at its discretion. Further, submitters will be given a minimum of 10 working days' notice if information is to be disclosed over their objection. The same commenter also sought clarification of whether ''submitter'' as used in proposed 6 CFR 5.7 was the same as ''business submitter'' as used in proposed 6 CFR 5.12(a). Section 5.12 applies only to CBP operations and should be read independently from 6 CFR 5.7.

7. Comments on Proposed 6 CFR 5.8 (Administrative Appeals)

As noted above, based upon requirements in the FOIA Improvement Act of 2016, DHS has changed the appeals period from 60 working days to 90 working days.

One commenter suggested that proposed 6 CFR 5.8(a)(1) be amended to state that appeals will be considered timely if *delivered* within 60 working days of an adverse determination. An adverse determination can refer to any outcome which the requester seeks to appeal. The commenter stated that the proposed regulations do not specify with enough certainty when the 60 workdays begin to run for purposes of filing an administrative appeal. The proposed rule already considered appeals to be timely if the appeal is postmarked, or transmitted in the case of electronic submissions, within 90 workdays of the date of the component's response. DHS considers the postmark rule to be clear and more favorable to appealing requesters. DHS therefore will not require delivery within 90 days of the notice of an adverse determination. However, in the interests of clarifying the exact time period, DHS has added language to reflect that an electronically transmitted appeal will be considered timely if transmitted to the appeals officer by 11:59:59 p.m. ET or EDT of the 90th working day following the date of an adverse determination on a FOIA request.

An agency commenter suggested that proposed 6 CFR 5.8(c) be amended to clarify that DHS and its components will participate in mediation with the

Office of Government Information Services, National Archives and Records Administration, should a requester elect to mediate any dispute related to a FOIA request. DHS reaffirms its commitment to actively participate in mediation should any FOIA requester seek to resolve a dispute and has added language to this section to reflect such.

One commenter suggested that proposed 6 CFR 5.8(d) be amended to clarify that the time period for response to an appeal may not be extended for greater than 10 days. DHS considers this amendment to be unnecessary as the statute clearly does not provide for extensions beyond a single 10-day period.

One commenter suggested amending proposed 6 CFR 5.8(e) to clarify that judicial review is available without pursuing administrative appeal where a request has been constructively denied through agency inaction. DHS has determined that this proposed change is unnecessary as the FOIA statute itself provides judicial review of constructive denial without the necessity of administrative exhaustion.

8. Comments on Proposed 6 CFR 5.9 (Preservation of Records) or 5.10 (FOIA Requests for Information Contained in a Privacy Act System of Records)

No comments requiring agency response were received regarding proposed 6 CFR 5.9 or 5.10.

9. Comments on Proposed 6 CFR 5.11 (Fees)

Several public submissions contained comments regarding the Department's assessment of fees. As a general matter, the Department notes that the fee provisions are written to conform to the OMB Guidelines, which establish uniform standards for fee matters. Conformity with the OMB Guidelines is required by the FOIA. *See* 5 U.S.C. 552(a)(4)(A)(i).

DHS has revised the ''Definitions'' section of proposed 6 CFR 5.11(b) by inserting the word ''primarily'' before ''commercial interest'' to more accurately conform to the statutory language of the FOIA. Consistent with other provisions of the proposed rule, the change clarifies that fee waivers are available to requesters even if they have a commercial interest as long as the requester can show a public interest in the information and that the primary interest in the information is not commercial.

One commenter suggested that DHS retain the definition of ''commercial use request'' in current 6 CFR 5.11(b)(1) instead of the proposed revisions because the commenter felt that the proposed regulation significantly broadened DHS's discretion in determining whether a request is commercial in nature. The DHS definition of ''commercial use request'' conforms to the definition promulgated by DOJ in its FOIA regulations. DHS has not changed the definition of a commercial request and continues to rely on the same definition in the current interim regulations at 6 CFR 5.11 that ''a commercial use request is a request that asks for information for a use or a purpose that furthers a commercial, trade, or profit interest, which include furthering those interests through litigation.''

The same commenter opposed the removal of the requirement that ''the component shall provide a reasonable opportunity to submit further clarification.'' The proposed changes do not require DHS to seek further clarification from a requester, but rather allow each component to make a case-by-case determination, which may, in the agency's discretion, include seeking further information from the requester regarding the purpose for the request. This change comports with the DHS proposed regulation at 6 CFR 5.3(c), which gives the agency discretion to determine which requests will be the subject of requests for clarification in the event the request is insufficient. Requiring DHS to seek further information would increase the administrative burden on the agency and prejudice other requesters. The final rule text reflects the need to allow components to assess the intended purpose of each request on a case-by-case basis. As such, DHS declines to make any changes to this language.

One commenter suggested that DHS retain the broader definition of ''educational institution'' in current 6 CFR 5.11(b)(4) because the proposed definition of educational institution would exclude students enrolled in educational institutions that make FOIA requests in furtherance of their own research. DHS agrees and has changed the proposed definition of educational institutions to include students seeking FOIA requests to further their own scholarly research by eliminating the example which had excluded such requesters from categorization as educational institutions. The revisions are also consistent with *Sack* v. *Dep't of Defense,* 823 F.3d 687 (D.C. Cir. 2016).

Several commenters sought revision of the definition in proposed 6 CFR 5.11(b)(6) of ''news media.'' This issue is discussed earlier in this preamble, under the section for comments on proposed 6 CFR 5.5.

One commenter suggested amending proposed 6 CFR 5.11(e) to clarify that a non-commercial requester that does not pay fees or declines to pay an estimated fee would still be eligible for two hours of search time without charge. The commenter sought the change because they stated that there was disagreement between agencies about whether or not such requesters would be entitled to the two free hours of search times under such circumstances. DHS has added language to section 5.11(e)(1) to make this more clear; the fee table at proposed 6 CFR 5.11(k)(6) also contains this information.

One commenter suggested that DHS eliminate proposed 6 CFR 5.11(k)(5), concerning the closure of requests where the required advance fee payment has not been received within 30 days. The commenter stated that the requirement of advance payment posed an additional financial barrier to accessing information, particularly in light of DHS's proposed redefinition of educational institutions to exclude students making FOIA requests in furtherance of their own educational coursework. As noted above, DHS has already addressed the concern about students being excluded from the definition of educational request. Regarding the remainder of the commenter's suggestion that DHS eliminate the closure of requests for which the required advance fee payment has not been timely received, DHS declines to make this change. While DHS recognizes that this requirement may impose a burden on some requesters, DHS has a strong interest in maintaining the integrity of the administrative process. As numerous court decisions have noted, government agencies are not required to process requests for free for those requesters that do not qualify for a fee waiver regardless of the requester's ability to pay the estimated fee. Further, the FOIA statute itself allows agencies to collect advance payment of fees when the requester has previously failed to pay fees in a timely fashion, or the agency has determined that the fee will exceed $250. 5 U.S.C. 552(a)(4)(A)(v).

10. Comments on Proposed 6 CFR 5.12 (Confidential Commercial Information; CBP Procedures)

One commenter stated that the second sentence of proposed 6 CFR 5.12(a) was redundant in that it provided that ''commercial information that CBP [U.S. Customs and Border Protection] determines is privileged or confidential . . . will be treated as privileged or confidential.'' DHS has determined that this language is not redundant because

there may be information that a submitter deems privileged and confidential that does not meet the criteria established by CBP. The text identified by the commenter serves to clarify to submitters that only information that CBP has deemed ''privileged or confidential'' will be treated as such by the agency. The same commenter also sought clarification of whether the term ''business submitter'' used in proposed 6 CFR 5.12 was the same as the definition of ''submitter'' used in proposed 6 CFR 5.7. As DHS noted above in the section covering comments on proposed 6 CFR 5.7, these sections are to be read independently and definitions may not be interchangeable.

11. Other Comments

One commenter stated that he had previously submitted FOIA requests to DHS on behalf of his small business, and that DHS had extended the estimated delivery date of its responses without providing notice or a reason, and that his requests had been sent to the wrong offices and subsequently terminated because found to be duplicative. The commenter asserted, without further elaboration, that delays in FOIA processing imposed direct costs on a small business he represented. The commenter also stated that DHS has a large backlog of FOIA requests. The commenter requested that DHS provide additional economic and small entity analysis related to the costs of FOIA processing delays and the proposed rule, and that ''once these have been completed . . . DHS reopen the comment period for at least 60 days for public comment.'' The commenter stated that ''[i]t is inconceivable that the current backlog has not imposed costs on small and large businesses under this proposal.'' The commenter requested DHS develop an estimate of the quantifiable costs and benefits of the rule and also complete a Regulatory Flexibility Act analysis of the impacts of the rule on small entities. The commenter also submitted two related comments regarding specific interactions he had in submitting FOIA requests to two DHS components, the Transportation Security Administration (TSA), and CBP. Those two comments included a list of eight questions related to the TSA request and 11 questions related to the CBP request, which the commenter requested be addressed in an economic analysis.

Much of the commenter's submission is well outside the scope of the proposed rule, which was intended primarily to update and streamline regulatory text to reflect intervening statutory and other changes. For example, the commenter raised specific issues with previous FOIA requests to DHS components (whether a specific FOIA request was closed properly and changes in a delivery date with another FOIA request). The delay costs associated with past DHS processing of a past FOIA request or the impacts of the current backlog are by definition not due to any changes made in this rule and therefore are not direct costs of this rule. Issues regarding specific pending or historical FOIA requests are more properly addressed to the component's FOIA office and not as comments to the FOIA proposed rule. Regarding the commenter's request for an assessment of the quantified costs and benefits of the rule and a Regulatory Flexibility Act analysis, DHS did consider the costs, benefits and impacts of the proposed rule on small entities. The proposed rule's Executive Orders 12866 and 13563 analysis and Regulatory Flexibility Act both reflect DHS's consideration of the economic impacts of the proposed rule, as well as DHS's conclusion that the proposed rule would not impose additional costs on the public or the government. DHS affirmatively stated that (1) the proposed rule would not collect additional fees compared to current practice or otherwise introduce new regulatory mandates, (2) the benefits of the rule included additional clarity for the public, and (3) regarding the impacts on small entities, the proposed rule did not impose additional direct costs on small entities. See 80 FR 45104 for this discussion of costs, benefits, and small entity impacts. DHS notes the commenter did not identify any specific provisions of the proposed rule that he believed would lead to delays in FOIA processing or otherwise increase costs as compared to FOIA current procedures, or suggest any alternatives to the proposed rule that would result in increased efficiencies. The proposed rule did not invite an open-ended search for any and all potential changes to DHS FOIA regulations that might potentially result in processing improvements; the rule's economic analysis reflects full consideration of the limited changes included in the proposed rule.[8]

[8] Alternatively, to the extent the commenter implies that DHS FOIA regulations are primarily responsible for processing delays, misdirected FOIA requests, or other challenges associated with FOIA processing, DHS finds the commenter's views completely unsupported, and likely incorrect. DHS is unaware of any study of its FOIA processing challenges that cites flaws in existing regulations as a major causal factor. *See http://www.gao.gov/products/GAO-15-82* and *http://www.gao.gov/products/GAO-12-828.*

One commenter suggested that the regulation be amended to allow individuals protected by the confidentiality provisions in the Violence Against Women Act (VAWA) as amended, 42 U.S.C. 13701 and 8 U.S.C. 1367, to submit FOIA requests for their own information without that information subsequently being made public. DHS agrees with the commenter that this sensitive information should not be made public. But DHS believes the commenter's concerns are misplaced, because DHS does not apply the ''release to one, release to all'' policies of FOIA to first-party requests for personal information. DHS will not release to the public information covered by the aforementioned authorities subsequent to a first-party request for that his or her own information.

One commenter suggested that proactive disclosure include automatic disclosure of alien files to individuals in removal proceedings. The Department has determined that automatic disclosure of alien files to all individuals in removal proceedings falls well outside of the scope of the proposed rule and FOIA generally, and therefore will not be addressed here.

Finally, one commenter sought inclusion of a proposed section 5.14, which would require DHS to review records to determine if the release of information contained in records would be in the public interest ''because it is likely to contribute significantly to public understanding of the operations or activities of the DHS.'' As provided in proposed 6 CFR 5.2, DHS already proactively posts certain Department records it determines are of interest to the public. In addition, DHS generally follows the rule that records are publicly posted after the Department has received three requests for such records. DHS also recently participated in a DOJ pilot program which sought to examine the feasibility of posting all requested records as long as no privacy interests were implicated. Proactive review and posting of records, whether they are the subject of FOIA requests or not, is a time and resource intensive undertaking. DHS will continue to examine the feasibility of expanding the public posting of records, but due to practical and operational concerns, cannot divert resources away from the processing of FOIA requests to devote the additional resources that would be required to comply with the scope of proactive posting suggested by this comment. As such, DHS declines to incorporate this proposed new section.

III. Regulatory Analyses

Executive Orders 12866 and 13563—Regulatory Review

Executive Orders 13563 and 12866 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This rule has not been designated a ''significant regulatory action,'' under section 3(f) of Executive Order 12866. Accordingly, the rule has not been reviewed by the Office of Management and Budget.

DHS has considered the costs and benefits of this rule. This rule will not introduce new regulatory mandates. In the proposed rule we stated that this rule would not result in additional costs on the public or the government. As explained above, some commenters raised concerns about the potential burden associated with a streamlined process for administratively closing unclear requests, though none offered a quantified estimate of that burden. We continue to believe that DHS's general assessment of the economic impacts of this rule, as stated in the proposed rule, is accurate. DHS does acknowledge that there will be a limited number of cases, however, in which this rule will result in some requesters clarifying *and resubmitting* a request, rather than simply clarifying a request. DHS believes that the burden associated with resubmitting a request would be minimal, because requesters that are required to resubmit requests that lack sufficient information or detail to allow DHS to respond are required to submit the same information as requesters that are required to provide clarification (*i.e.,* information that will supplement the information provided with the original request such that DHS can reasonably identify the records the requester is seeking and process the request). Since both sets of requesters must provide additional information in writing to allow the agency to process their requests, it is difficult to quantify any additional cost associated with resubmission as compared to clarification. The rule's benefits include additional clarity for the public and DHS personnel with respect to DHS's implementation of the FOIA and subsequent statutory amendments.

Regulatory Flexibility Act

Under the Regulatory Flexibility Act (RFA), 5 U.S.C. 601–612, and section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996, 5 U.S.C. 601 note, agencies must consider the impact of their rulemakings on ''small entities'' (small businesses, small organizations and local governments). The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. DHS has reviewed this regulation and by approving it certifies that this regulation will not have a significant economic impact on a substantial number of small entities. DHS does not believe this rule imposes any additional direct costs on small entities. However, as explained in the previous Executive Orders 12866 and 13563 section, it is possible that an entity that resubmits a request might incur a slightly different impact than one that clarifies a request. Such a cost difference would be so minimal it would be difficult to quantify. DHS further notes that although one commenter stated that he found the proposed rule's regulatory flexibility certification ''challenging,'' no commenter stated the proposed rule would cause a significant economic impact on a substantial number of small entities, or provided any comments suggesting such an impact on a substantial number of small entities. Based on the previous analysis and the comments on the proposed rule, DHS certifies this rule will not have a significant economic impact on a substantial number of small entities.

Unfunded Mandates Reform Act of 1995

This rule will not result in the expenditure by State, local, and tribal governments, in the aggregate, or by the private sector, of $100,000,000 or more in any one year, and it will not significantly or uniquely affect small governments. Therefore, no actions were deemed necessary under the provisions of the Unfunded Mandates Reform Act of 1995.

Small Business Regulatory Enforcement Fairness Act of 1996

This rule is not a major rule as defined by section 251 of the Small Business Regulatory Enforcement Fairness Act of 1996 (as amended), 5 U.S.C. 804. This rule will not result in an annual effect on the economy of $100,000,000 or more; a major increase in costs or prices; or significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based companies to compete with foreign-based companies in domestic and export markets.

List of Subjects

6 CFR Part 5

Classified information, Courts, Freedom of information, Government employees, Privacy.

19 CFR Part 103

Administrative practice and procedure, Confidential business information, Courts, Freedom of information, Law enforcement, Privacy, Reporting and recordkeeping requirements.

44 CFR Part 5

Courts, Freedom of information, Government employees.

For the reasons stated in the preamble, the Department of Homeland Security amends 6 CFR chapter I, part 5, 19 CFR chapter I, part 103, and 44 CFR chapter I, part 5, as follows:

Title 6—Domestic Security

PART 5—DISCLOSURE OF MATERIAL OR INFORMATION

■ 1. The authority citation for part 5 is revised to read as follows:

Authority: 5 U.S.C. 552; 5 U.S.C. 552a; 5 U.S.C. 301; 6 U.S.C. 101 *et seq.;* E.O. 13392.

■ 2. Revise subpart A of part 5 to read as follows:

Subpart A—Procedures for Disclosure of Records Under the Freedom of Information Act

Sec.

5.1 General provisions.
5.2 Proactive disclosures of DHS records.
5.3 Requirements for making requests.
5.4 Responsibility for responding to requests.
5.5 Timing of responses to requests.
5.6 Responses to requests.
5.7 Confidential commercial information.
5.8 Administrative appeals.
5.9 Preservation of records.
5.10 FOIA requests for information contained in a Privacy Act system of records.
5.11 Fees.
5.12 Confidential commercial information; CBP procedures.
5.13 Other rights and services.
Appendix I to Subpart A—FOIA Contact Information

Subpart A—Procedures for Disclosure of Records Under the Freedom of Information Act

§ 5.1 General provisions.

(a)(1) This subpart contains the rules that the Department of Homeland Security follows in processing requests for records under the Freedom of Information Act (FOIA), 5 U.S.C. 552 as amended.

(2) The rules in this subpart should be read in conjunction with the text of the FOIA and the Uniform Freedom of Information Fee Schedule and Guidelines published by the Office of Management and Budget at 52 FR 10012 (March 27, 1987) (hereinafter ''OMB Guidelines''). Additionally, DHS has additional policies and procedures relevant to the FOIA process. These resources are available at *http://www.dhs.gov/freedom-information-act-foia.* Requests made by individuals for records about themselves under the Privacy Act of 1974, 5 U.S.C. 552a, are processed under subpart B of part 5 as well as under this subpart.

(b) As referenced in this subpart, component means the FOIA office of each separate organizational entity within DHS that reports directly to the Office of the Secretary.

(c) DHS has a decentralized system for processing requests, with each component handling requests for its records.

(d) *Unofficial release of DHS information.* The disclosure of exempt records, without authorization by the appropriate DHS official, is not an official release of information; accordingly, it is not a FOIA release. Such a release does not waive the authority of the Department of Homeland Security to assert FOIA exemptions to withhold the same records in response to a FOIA request. In addition, while the authority may exist to disclose records to individuals in their official capacity, the provisions of this part apply if the same individual seeks the records in a private or personal capacity.

§ 5.2 Proactive disclosure of DHS records.

Records that are required by the FOIA to be made available for public inspection in an electronic format are accessible on DHS's Web site, *http://www.dhs.gov/freedom-information-act-foia-and-privacy-act.* Each component is responsible for determining which of its records are required to be made publicly available, as well as identifying additional records of interest to the public that are appropriate for public disclosure, and for posting and indexing such records. Each component shall ensure that posted records and indices are updated on an ongoing basis. Each component has a FOIA Public Liaison who can assist individuals in locating records particular to a component. A list of DHS's FOIA Public Liaisons is available at *http://www.dhs.gov/foia-contact-information* and in appendix I to this subpart. Requesters who do not have access to the internet may contact the Public Liaison for the component from which they seek records for assistance with publicly available records.

§ 5.3 Requirements for making requests.

(a) *General information.* (1) DHS has a decentralized system for responding to FOIA requests, with each component designating a FOIA office to process records from that component. All components have the capability to receive requests electronically, either through email or a web portal. To make a request for DHS records, a requester should write directly to the FOIA office of the component that maintains the records being sought. A request will receive the quickest possible response if it is addressed to the FOIA office of the component that maintains the records sought. DHS's FOIA Reference Guide contains or refers the reader to descriptions of the functions of each component and provides other information that is helpful in determining where to make a request. Each component's FOIA office and any additional requirements for submitting a request to a given component are listed in Appendix I of this subpart. These references can all be used by requesters to determine where to send their requests within DHS.

(2) A requester may also send his or her request to the Privacy Office,

U.S. Department of Homeland Security, 245 Murray Lane SW STOP–0655, or via the internet at *http://www.dhs.gov/dhs-foia-request-submission-form,* or via fax to (202) 343–4011. The Privacy Office will forward the request to the component(s) that it determines to be most likely to maintain the records that are sought.

(3) A requester who is making a request for records about him or herself must comply with the verification of identity provision set forth in subpart B of this part.

(4) Where a request for records pertains to a third party, a requester may receive greater access by submitting either a notarized authorization signed by that individual, in compliance with the verification of identity provision set forth in subpart B of this part, or a declaration made in compliance with the requirements set forth in 28 U.S.C. 1746 by that individual, authorizing disclosure of the records to the requester, or by submitting proof that the individual is deceased (*e.g.,* a copy of a death certificate or an obituary). As an exercise of its administrative discretion, each component can require a requester to supply additional information if necessary in order to verify that a particular individual has consented to disclosure.

(b) *Description of records sought.* Requesters must describe the records sought in sufficient detail to enable DHS personnel to locate them with a reasonable amount of effort. A reasonable description contains sufficient information to permit an organized, non-random search for the record based on the component's filing arrangements and existing retrieval systems. To the extent possible, requesters should include specific information that may assist a component in identifying the requested records, such as the date, title or name, author, recipient, subject matter of the record, case number, file designation, or reference number. Requesters should refer to Appendix I of this subpart for additional component-specific requirements. In general, requesters should include as much detail as possible about the specific records or the types of records that they are seeking. Before submitting their requests, requesters may contact the component's FOIA Officer or FOIA public liaison to discuss the records they are seeking and to receive assistance in describing the records. If after receiving a request, a component determines that it does not reasonably describe the records sought, the component should inform the requester what additional information is needed or why the request is otherwise insufficient. Requesters who are attempting to reformulate or modify such a request may discuss their request with the component's designated FOIA Officer, its FOIA Public Liaison, or a representative of the DHS Privacy Office, each of whom is available to assist the requester in reasonably describing the records sought.

(c) If a request does not adequately describe the records sought, DHS may at its discretion either administratively close the request or seek additional information from the requester. Requests for clarification or more information will be made in writing (either via U.S. mail or electronic mail whenever possible). Requesters may respond by U.S. Mail or by electronic mail regardless of the method used by DHS to transmit the request for additional information. In order to be

considered timely, responses to requests for additional information must be postmarked or received by electronic mail within 30 working days of the postmark date or date of the electronic mail request for additional information or received by electronic mail by 11:59:59 p.m. ET on the 30th working day. If the requester does not respond to a request for additional information within thirty (30) working days, the request may be administratively closed at DHS's discretion. This administrative closure does not prejudice the requester's ability to submit a new request for further consideration with additional information.

§ 5.4 Responsibility for responding to requests.

(a) *In general.* Except in the instances described in paragraphs (c) and (d) of this section, the component that first receives a request for a record and maintains that record is the component responsible for responding to the request. In determining which records are responsive to a request, a component ordinarily will include only records in its possession as of the date that it begins its search. If any other date is used, the component shall inform the requester of that date. A record that is excluded from the requirements of the FOIA pursuant to 5 U.S.C. 552(c), shall not be considered responsive to a request.

(b) *Authority to grant or deny requests.* The head of a component, or designee, is authorized to grant or to deny any requests for records that are maintained by that component.

(c) *Re-routing of misdirected requests.* Where a component's FOIA office determines that a request was misdirected within DHS, the receiving component's FOIA office shall route the request to the FOIA office of the proper component(s).

(d) *Consultations, coordination and referrals.* When a component determines that it maintains responsive records that either originated with another component or agency, or which contains information provided by, or of substantial interest to, another component or agency, then it shall proceed in accordance with either paragraph (d)(1), (2), or (3) of this section, as appropriate:

(1) The component may respond to the request, after consulting with the component or the agency that originated or has a substantial interest in the records involved.

(2) The component may respond to the request after coordinating with the other components or agencies that originated the record. This may include situations where the standard referral procedure is not appropriate where disclosure of the identity of the component or agency to which the referral would be made could harm an interest protected by an applicable exemption, such as the exemptions that protect personal privacy or national security interests. For example, if a non-law enforcement component responding to a request for records on a living third party locates records within its files originating with a law enforcement agency, and if the existence of that law enforcement interest in the third party was not publicly known, then to disclose that law enforcement interest could cause an unwarranted invasion of the personal privacy of the third party. Similarly, if a component locates material within its files originating with an Intelligence Community agency, and the involvement of that agency in the matter is classified and not publicly acknowledged, then to disclose or give attribution to the involvement of that Intelligence Community agency could cause national security harms. In such instances, in order to avoid harm to an interest protected by an applicable exemption, the component that received the request should coordinate with the originating component or agency to seek its views on the disclosability of the record. The release determination for the record that is the subject of the coordination should then be conveyed to the requester by the component that originally received the request.

(3) The component may refer the responsibility for responding to the request or portion of the request to the component or agency best able to determine whether to disclose the relevant records, or to the agency that created or initially acquired the record as long as that agency is subject to the FOIA. Ordinarily, the component or agency that created or initially acquired the record will be presumed to be best able to make the disclosure determination. The referring component shall document the referral and maintain a copy of the records that it refers.

(e) *Classified information.* On receipt of any request involving classified information, the component shall determine whether information is currently and properly classified and take appropriate action to ensure compliance with 6 CFR part 7. Whenever a request involves a record containing information that has been classified or may be appropriate for classification by another component or agency under any applicable executive order concerning the classification of records, the receiving component shall refer the responsibility for responding to the request regarding that information to the component or agency that classified the information, or should consider the information for classification. Whenever a component's record contains information classified by another component or agency, the component shall coordinate with or refer the responsibility for responding to that portion of the request to the component or agency that classified the underlying information.

(f) *Notice of referral.* Whenever a component refers any part of the responsibility for responding to a request to another component or agency, it will notify the requester of the referral and inform the requester of the name of each component or agency to which the records were referred, unless disclosure of the identity of the component or agency would harm an interest protected by an applicable exemption, in which case the component should coordinate with the other component or agency, rather than refer the records.

(g) *Timing of responses to consultations and referrals.* All consultations and referrals received by DHS will be handled according to the date that the FOIA request initially was received by the first component or agency, not any later date.

(h) *Agreements regarding consultations and referrals.* Components may establish agreements with other components or agencies to eliminate the need for consultations or referrals with respect to particular types of records.

(i) *Electronic records and searches*–(1) *Significant interference.* The FOIA allows components to not conduct a search for responsive documents if the search would cause significant interference with the operation of the component's automated information system.

(2) *Business as usual approach.* A ''business as usual'' approach exists when the component has the capability to process a FOIA request for electronic records without a significant expenditure of monetary or personnel resources. Components are not required to conduct a search that does not meet this business as usual criterion.

(i) Creating computer programs or purchasing additional hardware to extract email that has been archived for emergency retrieval usually are not considered business as usual if extensive monetary or personnel resources are needed to complete the project.

(ii) Creating a computer program that produces specific requested fields or records contained within a well-defined database structure usually is considered

business as usual. The time to create this program is considered as programmer or operator search time for fee assessment purposes and the FOIA requester may be assessed fees in accordance with § 5.11(c)(1)(iii). However, creating a computer program to merge files with disparate data formats and extract specific elements from the resultant file is not considered business as usual, but a special service, for which additional fees may be imposed as specified in § 5.11. Components are not required to perform special services and creation of a computer program for a fee is up to the discretion of the component and is dependent on component resources and expertise.

(3) *Data links.* Components are not required to expend DHS funds to establish data links that provide real time or near-real-time data to a FOIA requester.

§ 5.5 Timing of responses to requests.

(a) *In general.* Components ordinarily will respond to requests according to their order of receipt. Appendix I to this subpart contains the list of components that are designated to accept requests. In instances involving misdirected requests that are re-routed pursuant to § 5.4(c), the response time will commence on the date that the request is received by the proper component, but in any event not later than ten working days after the request is first received by any DHS component designated in appendix I of this subpart.

(b) *Multitrack processing.* All components must designate a specific track for requests that are granted expedited processing, in accordance with the standards set forth in paragraph (e) of this section. A component may also designate additional processing tracks that distinguish between simple and more complex requests based on the estimated amount of work or time needed to process the request. Among the factors a component may consider are the number of pages involved in processing the request or the need for consultations or referrals. Components shall advise requesters of the track into which their request falls, and when appropriate, shall offer requesters an opportunity to narrow their request so that the request can be placed in a different processing track.

(c) *Unusual circumstances.* Whenever the statutory time limits for processing a request cannot be met because of ''unusual circumstances,'' as defined in the FOIA, and the component extends the time limits on that basis, the component shall, before expiration of the twenty-day period to respond, notify the requester in writing of the unusual circumstances involved and of the date by which processing of the request can be expected to be completed. Where the extension exceeds ten working days, the component shall, as described by the FOIA, provide the requester with an opportunity to modify the request or agree to an alternative time period for processing. The component shall make available its designated FOIA Officer and its FOIA Public Liaison for this purpose. The component shall also alert requesters to the availability of the Office of Government Information Services (OGIS) to provide dispute resolution services.

(d) *Aggregating requests.* For the purposes of satisfying unusual circumstances under the FOIA, components may aggregate requests in cases where it reasonably appears that multiple requests, submitted either by a requester or by a group of requesters acting in concert, constitute a single request that would otherwise involve unusual circumstances. Components will not aggregate multiple requests that involve unrelated matters.

(e) *Expedited processing.* (1) Requests and appeals will be processed on an expedited basis whenever the component determines that they involve:

(i) Circumstances in which the lack of expedited processing could reasonably be expected to pose an imminent threat to the life or physical safety of an individual;

(ii) An urgency to inform the public about an actual or alleged federal government activity, if made by a person who is primarily engaged in disseminating information;

(iii) The loss of substantial due process rights; or

(iv) A matter of widespread and exceptional media interest in which there exist possible questions about the government's integrity which affect public confidence.

(2) A request for expedited processing may be made at any time. Requests based on paragraphs (e)(1)(i), (ii), and (iii) of this section must be submitted to the component that maintains the records requested. When making a request for expedited processing of an administrative appeal, the request should be submitted to the DHS Office of General Counsel or the component Appeals Officer. Address information is available at the DHS Web site, *http://www.dhs.gov/freedom-information-act-foia,* or by contacting the component FOIA officers via the information listed in Appendix I. Requests for expedited processing that are based on paragraph (e)(1)(iv) of this section must be submitted to the Senior Director of FOIA Operations, the Privacy Office, U.S. Department of Homeland Security, 245 Murray Lane SW STOP–0655, Washington, DC 20598–0655. A component that receives a misdirected request for expedited processing under the standard set forth in paragraph (e)(1)(iv) of this section shall forward it immediately to the DHS Senior Director of FOIA Operations, the Privacy Office, for determination. The time period for making the determination on the request for expedited processing under paragraph (e)(1)(iv) of this section shall commence on the date that the Privacy Office receives the request, provided that it is routed within ten working days, but in no event shall the time period for making a determination on the request commence any later than the eleventh working day after the request is received by any component designated in appendix I of this subpart.

(3) A requester who seeks expedited processing must submit a statement, certified to be true and correct, explaining in detail the basis for making the request for expedited processing. For example, under paragraph (e)(1)(ii) of this section, a requester who is not a full-time member of the news media must establish that he or she is a person who primarily engages in information dissemination, though it need not be his or her sole occupation. Such a requester also must establish a particular urgency to inform the public about the government activity involved in the request—one that extends beyond the public's right to know about government activity generally. The existence of numerous articles published on a given subject can be helpful to establishing the requirement that there be an ''urgency to inform'' the public on the topic. As a matter of administrative discretion, a component may waive the formal certification requirement.

(4) A component shall notify the requester within ten calendar days of the receipt of a request for expedited processing of its decision whether to grant or deny expedited processing. If expedited processing is granted, the request shall be given priority, placed in the processing track for expedited requests, and shall be processed as soon as practicable. If a request for expedited processing is denied, any appeal of that decision shall be acted on expeditiously.

§ 5.6 Responses to requests.

(a) *In general.* Components should, to the extent practicable, communicate with requesters having access to the

Internet using electronic means, such as email or web portal.

(b) *Acknowledgments of requests.* A component shall acknowledge the request and assign it an individualized tracking number if it will take longer than ten working days to process. Components shall include in the acknowledgment a brief description of the records sought to allow requesters to more easily keep track of their requests.

(c) *Grants of requests.* Ordinarily, a component shall have twenty (20) working days from when a request is received to determine whether to grant or deny the request unless there are unusual or exceptional circumstances. Once a component makes a determination to grant a request in full or in part, it shall notify the requester in writing. The component also shall inform the requester of any fees charged under § 5.11 and shall disclose the requested records to the requester promptly upon payment of any applicable fees. The component shall inform the requester of the availability of its FOIA Public Liaison to offer assistance.

(d) *Adverse determinations of requests.* A component making an adverse determination denying a request in any respect shall notify the requester of that determination in writing. Adverse determinations, or denials of requests, include decisions that the requested record is exempt, in whole or in part; the request does not reasonably describe the records sought; the information requested is not a record subject to the FOIA; the requested record does not exist, cannot be located, or has been destroyed; or the requested record is not readily reproducible in the form or format sought by the requester. Adverse determinations also include denials involving fees, including requester categories or fee waiver matters, or denials of requests for expedited processing.

(e) *Content of denial.* The denial shall be signed by the head of the component, or designee, and shall include:

(1) The name and title or position of the person responsible for the denial;

(2) A brief statement of the reasons for the denial, including any FOIA exemption applied by the component in denying the request;

(3) An estimate of the volume of any records or information withheld, for example, by providing the number of pages or some other reasonable form of estimation. This estimation is not required if the volume is otherwise indicated by deletions marked on records that are disclosed in part, or if providing an estimate would harm an interest protected by an applicable exemption; and

(4) A statement that the denial may be appealed under § 5.8(a), and a description of the requirements set forth therein.

(5) A statement notifying the requester of the assistance available from the agency's FOIA Public Liaison and the dispute resolution services offered by OGIS.

(f) *Markings on released documents.* Markings on released documents must be clearly visible to the requester. Records disclosed in part shall be marked to show the amount of information deleted and the exemption under which the deletion was made unless doing so would harm an interest protected by an applicable exemption. The location of the information deleted also shall be indicated on the record, if technically feasible.

(g) *Use of record exclusions.* (1) In the event that a component identifies records that may be subject to exclusion from the requirements of the FOIA pursuant to 5 U.S.C. 552(c), the head of the FOIA office of that component must confer with Department of Justice's Office of Information Policy (OIP) to obtain approval to apply the exclusion.

(2) Any component invoking an exclusion shall maintain an administrative record of the process of invocation and approval of the exclusion by OIP.

§ 5.7 Confidential commercial information.

(a) *Definitions*—(1) *Confidential commercial information* means commercial or financial information obtained by DHS from a submitter that may be protected from disclosure under Exemption 4 of the FOIA.

(2) *Submitter* means any person or entity from whom DHS obtains confidential commercial information, directly or indirectly.

(b) *Designation of confidential commercial information.* A submitter of confidential commercial information must use good faith efforts to designate by appropriate markings, either at the time of submission or within a reasonable time thereafter, any portion of its submission that it considers to be protected from disclosure under Exemption 4. These designations will expire ten years after the date of the submission unless the submitter requests and provides justification for a longer designation period.

(c) *When notice to submitters is required.* (1) A component shall promptly provide written notice to a submitter whenever records containing such information are requested under the FOIA if, after reviewing the request, the responsive records, and any appeal by the requester, the component determines that it may be required to disclose the records, provided:

(i) The requested information has been designated in good faith by the submitter as information considered protected from disclosure under Exemption 4; or

(ii) The component has a reason to believe that the requested information may be protected from disclosure under Exemption 4.

(2) The notice shall either describe the commercial information requested or include a copy of the requested records or portions of records containing the information. In cases involving a voluminous number of submitters, notice may be made by posting or publishing the notice in a place or manner reasonably likely to accomplish it.

(d) *Exceptions to submitter notice requirements.* The notice requirements of paragraphs (c) and (g) of this section shall not apply if:

(1) The component determines that the information is exempt under the FOIA;

(2) The information lawfully has been published or has been officially made available to the public;

(3) Disclosure of the information is required by a statute other than the FOIA or by a regulation issued in accordance with the requirements of Executive Order 12600 of June 23, 1987; or

(4) The designation made by the submitter under paragraph (b) of this section appears obviously frivolous, except that, in such a case, the component shall give the submitter written notice of any final decision to disclose the information and must provide that notice within a reasonable number of days prior to a specified disclosure date.

(e) *Opportunity to object to disclosure.* (1) A component will specify a reasonable time period, but no fewer than 10 working days, within which the submitter must respond to the notice referenced above. If a submitter has any objections to disclosure, it should provide the component a detailed written statement that specifies all grounds for withholding the particular information under any exemption of the FOIA. In order to rely on Exemption 4 as basis for nondisclosure, the submitter must explain why the information constitutes a trade secret, or commercial or financial information that is privileged or confidential.

(2) A submitter who fails to respond within the time period specified in the notice shall be considered to have no

objection to disclosure of the information. Information received by the component after the date of any disclosure decision will not be considered by the component. Any information provided by a submitter under this subpart may itself be subject to disclosure under the FOIA.

(f) *Analysis of objections.* A component shall consider a submitter's objections and specific grounds for nondisclosure in deciding whether to disclose the requested information.

(g) *Notice of intent to disclose.* Whenever a component decides to disclose information over the objection of a submitter, the component shall provide the submitter written notice, which shall include:

(1) A statement of the reasons why each of the submitter's disclosure objections was not sustained;

(2) A description of the information to be disclosed; and

(3) A specified disclosure date, which shall be a reasonable time subsequent to the notice, but no fewer than 10 working days.

(h) *Notice of FOIA lawsuit.* Whenever a requester files a lawsuit seeking to compel the disclosure of confidential commercial information, the component shall promptly notify the submitter.

(i) *Requester notification.* The component shall notify a requester whenever it provides the submitter with notice and an opportunity to object to disclosure; whenever it notifies the submitter of its intent to disclose the requested information; and whenever a submitter files a lawsuit to prevent the disclosure of the information.

(j) *Scope.* This section shall not apply to any confidential commercial information provided to CBP by a business submitter. Section 5.12 applies to such information. Section 5.12 also defines ''confidential commercial information'' as used in this paragraph.

§ 5.8 Administrative appeals.

(a) *Requirements for filing an appeal.* (1) A requester may appeal adverse determinations denying his or her request or any part of the request to the appropriate Appeals Officer. A requester may also appeal if he or she questions the adequacy of the component's search for responsive records, or believes the component either misinterpreted the request or did not address all aspects of the request (*i.e.,* it issued an incomplete response), or if the requester believes there is a procedural deficiency (*e.g.,* fees were improperly calculated). For the address of the appropriate component Appeals Officer, contact the applicable component FOIA liaison using the information in appendix I to this subpart, visit *www.dhs.gov/foia,* or call 1–866–431–0486. An appeal must be in writing, and to be considered timely it must be postmarked or, in the case of electronic submissions, transmitted to the Appeals Officer within 90 working days after the date of the component's response. An electronically filed appeal will be considered timely if transmitted to the Appeals Officer by 11:59:59 p.m. ET or EDT on the 90th working day. The appeal should clearly identify the component determination (including the assigned request number if the requester knows it) that is being appealed and should contain the reasons the requester believes the determination was erroneous. To facilitate handling, the requester should mark both the letter and the envelope, or the transmittal line in the case of electronic transmissions ''Freedom of Information Act Appeal.''

(2) An adverse determination by the component appeals officer will be the final action of DHS.

(b) *Adjudication of appeals.* (1) The DHS Office of the General Counsel or its designee (*e.g.,* component Appeals Officers) is the authorized appeals authority for DHS;

(2) On receipt of any appeal involving classified information, the Appeals Officer shall consult with the Chief Security Officer, and take appropriate action to ensure compliance with 6 CFR part 7;

(3) If the appeal becomes the subject of a lawsuit, the Appeals Officer is not required to act further on the appeal.

(c) *Appeal decisions.* The decision on the appeal will be made in writing. A decision that upholds a component's determination will contain a statement that identifies the reasons for the affirmance, including any FOIA exemptions applied. The decision will provide the requester with notification of the statutory right to file a lawsuit and will inform the requester of the mediation services offered by the Office of Government Information Services, of the National Archives and Records Administration, as a non-exclusive alternative to litigation. Should the requester elect to mediate any dispute related to the FOIA request with the Office of Government Information Services, DHS and its components will participate in the mediation process in good faith. If the adverse decision is reversed or modified on appeal, in whole or in part, the requester will be notified in a written decision and the request will be thereafter be further processed in accordance with that appeal decision.

(d) *Time limit for issuing appeal decision.* The statutory time limit for responding to appeals is generally 20 working days after receipt. However, the Appeals Officer may extend the time limit for responding to an appeal provided the circumstances set forth in 5 U.S.C. 552(a)(6)(B)(i) are met.

(e) *Appeal necessary before seeking court review.* If a requester wishes to seek court review of a component's adverse determination on a matter appealable under paragraph (a)(1) of this section, the requester must generally first appeal it under this subpart. However, a requester is not required to first file an appeal of an adverse determination of a request for expedited processing prior to seeking court review.

§ 5.9 Preservation of records.

Each component shall preserve all correspondence pertaining to the requests that it receives under this subpart, as well as copies of all requested records, until disposition or destruction is authorized pursuant to title 44 of the United States Code or the General Records Schedule 4.2 and/or 14 of the National Archives and Records Administration. Records will not be disposed of or destroyed while they are the subject of a pending request, appeal, or lawsuit under the FOIA.

§ 5.10 FOIA requests for information contained in a Privacy Act system of records.

(a) *Information subject to Privacy Act.* (1) If a requester submits a FOIA request for information about him or herself that is contained in a Privacy Act system of records applicable to the requester (*i.e.,* the information contained in the system of records is retrieved by the component using the requester's name or other personal identifier, and the information pertains to an individual covered by the Privacy Act) the request will be processed under both the FOIA and the Privacy Act.

(2) If the information the requester is seeking is not subject to the Privacy Act (*e.g.,* the information is filed under another subject, such as an organization, activity, event, or an investigation not retrievable by the requester's name or personal identifier), the request, if otherwise properly made, will be treated only as a FOIA request. In addition, if the information is covered by the Privacy Act and the requester does not provide proper verification of the requester's identity, the request, if otherwise properly made, will be processed only under the FOIA.

(b) *When both Privacy Act and FOIA exemptions apply.* Only if both a Privacy Act exemption and a FOIA

exemption apply can DHS withhold information from a requester if the information sought by the requester is about him or herself and is contained in a Privacy Act system of records applicable to the requester.

(c) *Conditions for release of Privacy Act information to third parties in response to a FOIA request.* If a requester submits a FOIA request for Privacy Act information about another individual, the information will not be disclosed without that person's prior written consent that provides the same verification information that the person would have been required to submit for information about him or herself, unless—

(1) The information is required to be released under the FOIA, as provided by 5 U.S.C. 552a (b)(2); or

(2) In most circumstances, if the individual is deceased.

(d) *Privacy Act requirements.* See DHS's Privacy Act regulations in 5 CFR part 5, subpart B for additional information regarding the requirements of the Privacy Act.

§ 5.11 Fees.

(a) *In general.* Components shall charge for processing requests under the FOIA in accordance with the provisions of this section and with the OMB Guidelines. Components will ordinarily use the most efficient and least expensive method for processing requested records. In order to resolve any fee issues that arise under this section, a component may contact a requester for additional information. A component ordinarily will collect all applicable fees before sending copies of records to a requester. If you make a FOIA request, it shall be considered a firm commitment to pay all applicable fees charged under § 5.11, up to $25.00, unless you seek a waiver of fees. Requesters must pay fees by check or money order made payable to the Treasury of the United States.

(b) *Definitions.* Generally, ''requester category'' means one of the three categories in which agencies place requesters for the purpose of determining whether a requester will be charged fees for search, review and duplication; categories include commercial requesters, noncommercial scientific or educational institutions or news media requesters, and all other requesters. The term ''fee waiver'' means that processing fees will be waived, or reduced, if a requester can demonstrate that certain statutory standards are satisfied including that the information is in the public interest and is not requested for a primarily commercial interest. For purposes of this section:

(1) *Commercial use request* is a request that asks for information for a use or a purpose that furthers a commercial, trade, or profit interest, which can include furthering those interests through litigation. A component's decision to place a requester in the commercial use category will be made on a case-by-case basis based on the requester's intended use of the information.

(2) *Direct costs* are those expenses that an agency expends in searching for and duplicating (and, in the case of commercial use requests, reviewing) records in order to respond to a FOIA request. For example, direct costs include the salary of the employee performing the work (*i.e.,* the basic rate of pay for the employee, plus 16 percent of that rate to cover benefits) and the cost of operating computers and other electronic equipment, such as photocopiers and scanners. Direct costs do not include overhead expenses such as the costs of space, and of heating or lighting a facility.

(3) *Duplication* is reproducing a copy of a record or of the information contained in it, necessary to respond to a FOIA request. Copies can take the form of paper, audiovisual materials, or electronic records, among others.

(4) *Educational institution* is any school that operates a program of scholarly research. A requester in this fee category must show that the request is made in connection with his or her role at the educational institution. Components may seek verification from the requester that the request is in furtherance of scholarly research.

Example 1. A request from a professor of geology at a university for records relating to soil erosion, written on letterhead of the Department of Geology, would be presumed to be from an educational institution if the request adequately describes how the requested information would further a specific research goal of the educational institution.

Example 2. A request from the same professor of geology seeking immigration information from the U.S. Immigration and Customs Enforcement in furtherance of a murder mystery he is writing would not be presumed to be an institutional request, regardless of whether it was written on institutional stationery.

Example 3. A student who makes a request in furtherance of their coursework or other school-sponsored activities and provides a copy of a course syllabus or other reasonable documentation to indicate the research purpose for the request, would qualify as part of this fee category.

Note: These examples are provided for guidance purposes only. Each individual request will be evaluated under the particular facts, circumstances, and information provided by the requester.

(5) *Noncommercial scientific institution* is an institution that is not operated on a ''commercial'' basis, as defined in paragraph (b)(1) of this section, and that is operated solely for the purpose of conducting scientific research the results of which are not intended to promote any particular product or industry. A requester in this category must show that the request is authorized by and is made under the auspices of a qualifying institution and that the records are sought to further scientific research and not for a commercial use.

(6) *Representative of the news media* is any person or entity that actively gathers information of potential interest to a segment of the public, uses its editorial skills to turn the raw materials into a distinct work, and distributes that work to an audience. The term ''news'' means information that is about current events or that would be of current interest to the public. Examples of news media entities include television or radio stations that broadcast ''news'' to the public at large and publishers of periodicals that disseminate ''news'' and make their products available through a variety of means to the general public, including but not limited to, news organizations that disseminate solely on the Internet. A request for records that supports the news-dissemination function of the requester shall not be considered to be for a commercial use. In contrast, data brokers or others who merely compile and market government information for direct economic return shall not be presumed to be news media entities. ''Freelance'' journalists must demonstrate a solid basis for expecting publication through a news media entity in order to be considered as working for a news media entity. A publication contract would provide the clearest evidence that publication is expected; however, components shall also consider a requester's past publication record in making this determination.

(7) *Review* is the page-by-page, line-by-line examination of a record located in response to a request in order to determine whether any portion of it is exempt from disclosure. Review time includes processing any record for disclosure, such as doing all that is necessary to prepare the record for disclosure, including the process of redacting the record and marking the appropriate exemptions. Review costs are properly charged even if a record ultimately is not disclosed. Review time also includes time spent both obtaining

and considering any formal objection to disclosure made by a confidential commercial information submitter under § 5.7 or § 5.12, but it does not include time spent resolving general legal or policy issues regarding the application of exemptions.

(8) *Search* is the process of looking for and retrieving records or information responsive to a request. Search time includes page-by-page or line-by-line identification of information within records; and the reasonable efforts expended to locate and retrieve information from electronic records. Components shall ensure that searches are done in the most efficient and least expensive manner reasonably possible by readily available means.

(c) *Charging fees.* In responding to FOIA requests, components shall charge the following fees unless a waiver or reduction of fees has been granted under paragraph (k) of this section. Because the fee amounts provided below already account for the direct costs associated with a given fee type, unless otherwise stated in § 5.11, components should not add any additional costs to those charges.

(1) *Search.* (i) Search fees shall be charged for all requests subject to the restrictions of paragraph (d) of this section. Components may properly charge for time spent searching even if they do not locate any responsive records or if they determine that the records are entirely exempt from disclosure.

(ii) For each quarter hour spent by personnel searching for requested records, including electronic searches that do not require new programming, the fees will be as follows: Managerial—$10.25; professional—$7.00; and clerical/administrative—$4.00.

(iii) Requesters will be charged the direct costs associated with conducting any search that requires the creation of a new computer program, as referenced in section 5.4, to locate the requested records. Requesters shall be notified of the costs associated with creating such a program and must agree to pay the associated costs before the costs may be incurred.

(iv) For requests that require the retrieval of records stored by an agency at a federal records center operated by the National Archives and Records Administration (NARA), additional costs shall be charged in accordance with the Transactional Billing Rate Schedule established by NARA.

(2) *Duplication.* Duplication fees will be charged to all requesters, subject to the restrictions of paragraph (d) of this section. A component shall honor a requester's preference for receiving a record in a particular form or format where it is readily reproducible by the component in the form or format requested. Where photocopies are supplied, the component will provide one copy per request at a cost of ten cents per page. For copies of records produced on tapes, disks, or other media, components will charge the direct costs of producing the copy, including operator time. Where paper documents must be scanned in order to comply with a requester's preference to receive the records in an electronic format, the requester shall pay the direct costs associated with scanning those materials. For other forms of duplication, components will charge the direct costs.

(3) *Review.* Review fees will be charged to requesters who make commercial use requests. Review fees will be assessed in connection with the initial review of the record, *i.e.,* the review conducted by a component to determine whether an exemption applies to a particular record or portion of a record. No charge will be made for review at the administrative appeal stage of exemptions applied at the initial review stage. However, when the appellate authority determines that a particular exemption no longer applies, any costs associated with a component's re-review of the records in order to consider the use of other exemptions may be assessed as review fees. Review fees will be charged at the same rates as those charged for a search under paragraph (c)(1)(ii) of this section.

(d) *Restrictions on charging fees.* (1) No search fees will be charged for requests by educational institutions, noncommercial scientific institutions, or representatives of the news media, unless the records are sought for a commercial use.

(2) If a component fails to comply with the FOIA's time limits in which to respond to a request, it may not charge search fees, or, in the instances of requests from requesters described in paragraph (d)(1) of this section, may not charge duplication fees, except as described in (d)(2)(i) through (iii).

(i) If a component has determined that unusual circumstances as defined by the FOIA apply and the component provided timely written notice to the requester in accordance with the FOIA, a failure to comply with the time limit shall be excused for an additional 10 days.

(ii) If a component has determined that unusual circumstances, as defined by the FOIA, apply and more than 5,000 pages are necessary to respond to the request, a component may charge search fees, or, in the case of requesters described in paragraph (d)(1) of this section, may charge duplication fees, if the following steps are taken. The component must have provided timely written notice of unusual circumstances to the requester in accordance with the FOIA and the component must have discussed with the requester via written mail, email, or telephone (or made not less than three good-faith attempts to do so) how the requester could effectively limit the scope of the request in accordance with 5. U.S.C. 552(a)(6)(B)(ii). If this exception is satisfied, the component may charge all applicable fees incurred in the processing of the request.

(iii) If a court has determined that exceptional circumstances exist, as defined by the FOIA, a failure to comply with the time limits shall be excused for the length of time provided by the court order.

(3) No search or review fees will be charged for a quarter-hour period unless more than half of that period is required for search or review.

(4) Except for requesters seeking records for a commercial use, components will provide without charge:

(i) The first 100 pages of duplication (or the cost equivalent for other media); and

(ii) The first two hours of search.

(5) When, after first deducting the 100 free pages (or its cost equivalent) and the first two hours of search, a total fee calculated under paragraph (c) of this section is $14.00 or less for any request, no fee will be charged.

(e) *Notice of anticipated fees in excess of $25.00.* (1) When a component determines or estimates that the fees to be assessed in accordance with this section will exceed $25.00, the component shall notify the requester of the actual or estimated amount of the fees, including a breakdown of the fees for search, review and/or duplication, unless the requester has indicated a willingness to pay fees as high as those anticipated. If only a portion of the fee can be estimated readily, the component shall advise the requester accordingly. If the requester is a noncommercial use requester, the notice will specify that the requester is entitled to his or her statutory entitlements of 100 pages of duplication at no charge and, if the requester is charged search fees, two hours of search time at no charge, and will advise the requester whether those entitlements have been provided. Two hours of search time will be provided free of charge to non-commercial requesters regardless of whether they agree to pay estimated fees.

(2) In cases in which a requester has been notified that the actual or estimated fees are in excess of $25.00, the request shall not be considered received and further work will not be completed until the requester commits in writing to pay the actual or estimated total fee, or designates some amount of fees he or she is willing to pay, or in the case of a noncommercial use requester who has not yet been provided with his or her statutory entitlements, designates that he or she seeks only that which can be provided by the statutory entitlements. The requester must provide the commitment or designation in writing, and must, when applicable, designate an exact dollar amount the requester is willing to pay. Components are not required to accept payments in installments.

(3) If the requester has indicated a willingness to pay some designated amount of fees, but the component estimates that the total fee will exceed that amount, the component will toll the processing of the request while it notifies the requester of the estimated fees in excess of the amount the requester has indicated a willingness to pay. The component shall inquire whether the requester wishes to revise the amount of fees he or she is willing to pay and/or modify the request. Once the requester responds, the time to respond will resume from where it was at the date of the notification.

(4) Components will make available their FOIA Public Liaison or other FOIA professional to assist any requester in reformulating a request to meet the requester's needs at a lower cost.

(f) *Charges for other services.* Although not required to provide special services, if a component chooses to do so as a matter of administrative discretion, the direct costs of providing the service will be charged. Examples of such services include certifying that records are true copies, providing multiple copies of the same document, or sending records by means other than first class mail.

(g) *Charging interest.* Components may charge interest on any unpaid bill starting on the 31st day following the date of billing the requester. Interest charges will be assessed at the rate provided in 31 U.S.C. 3717 and will accrue from the billing date until payment is received by the component. Components will follow the provisions of the Debt Collection Act of 1982 (Pub. L. 97–365, 96 Stat. 1749), as amended, and its administrative procedures, including the use of consumer reporting agencies, collection agencies, and offset.

(h) *Aggregating requests.* When a component reasonably believes that a requester or a group of requesters acting in concert is attempting to divide a single request into a series of requests for the purpose of avoiding fees, the component may aggregate those requests and charge accordingly. Components may presume that multiple requests of this type made within a 30-day period have been made in order to avoid fees. For requests separated by a longer period, components will aggregate them only where there is a reasonable basis for determining that aggregation is warranted in view of all the circumstances involved. Multiple requests involving unrelated matters will not be aggregated.

(i) *Advance payments.* (1) For requests other than those described in paragraphs (i)(2) and (3) of this section, a component shall not require the requester to make an advance payment before work is commenced or continued on a request. Payment owed for work already completed (*i.e.,* payment before copies are sent to a requester) is not an advance payment.

(2) When a component determines or estimates that a total fee to be charged under this section will exceed $250.00, it may require that the requester make an advance payment up to the amount of the entire anticipated fee before beginning to process the request. A component may elect to process the request prior to collecting fees when it receives a satisfactory assurance of full payment from a requester with a history of prompt payment.

(3) Where a requester has previously failed to pay a properly charged FOIA fee to any component or agency within 30 calendar days of the billing date, a component may require that the requester pay the full amount due, plus any applicable interest on that prior request and the component may require that the requester make an advance payment of the full amount of any anticipated fee, before the component begins to process a new request or continues to process a pending request or any pending appeal. Where a component has a reasonable basis to believe that a requester has misrepresented his or her identity in order to avoid paying outstanding fees, it may require that the requester provide proof of identity.

(4) In cases in which a component requires advance payment, the request shall not be considered received and further work will not be completed until the required payment is received. If the requester does not pay the advance payment within 30 calendar days after the date of the component's fee determination, the request will be closed.

(j) *Other statutes specifically providing for fees.* The fee schedule of this section does not apply to fees charged under any statute that specifically requires an agency to set and collect fees for particular types of records. In instances where records responsive to a request are subject to a statutorily-based fee schedule program, the component will inform the requester of the contact information for that source.

(k) *Requirements for waiver or reduction of fees.* (1) Records responsive to a request shall be furnished without charge or at a reduced rate below that established under paragraph (c) of this section, where a component determines, on a case-by-case basis, based on all available information, that the requester has demonstrated that:

(i) Disclosure of the requested information is in the public interest because it is likely to contribute significantly to public understanding of the operations or activities of the government; and

(ii) Disclosure of the information is not primarily in the commercial interest of the requester.

(2) In deciding whether disclosure of the requested information is in the public interest because it is likely to contribute significantly to public understanding of operations or activities of the government, components will consider the following factors:

(i) The subject of the request must concern identifiable operations or activities of the federal government, with a connection that is direct and clear, not remote or attenuated.

(ii) Disclosure of the requested records must be meaningfully informative about government operations or activities in order to be "likely to contribute" to an increased public understanding of those operations or activities. The disclosure of information that already is in the public domain, in either the same or a substantially identical form, would not contribute to such understanding where nothing new would be added to the public's understanding.

(iii) The disclosure must contribute to the understanding of a reasonably broad audience of persons interested in the subject, as opposed to the individual understanding of the requester. A requester's expertise in the subject area as well as his or her ability and intention to effectively convey information to the public shall be considered. It shall be presumed that a representative of the news media will satisfy this consideration.

(iv) The public's understanding of the subject in question must be enhanced by

the disclosure to a significant extent. However, components shall not make value judgments about whether the information at issue is ''important'' enough to be made public.

(3) To determine whether disclosure of the requested information is primarily in the commercial interest of the requester, components will consider the following factors:

(i) Components shall identify any commercial interest of the requester, as defined in paragraph (b)(1) of this section, that would be furthered by the requested disclosure. Requesters shall be given an opportunity to provide explanatory information regarding this consideration.

(ii) A waiver or reduction of fees is justified where the public interest is greater than any identified commercial interest in disclosure. Components ordinarily shall presume that where a news media requester has satisfied the public interest standard, the public interest will be the interest primarily served by disclosure to that requester. Disclosure to data brokers or others who merely compile and market government information for direct economic return shall not be presumed to primarily serve the public interest.

(4) Where only some of the records to be released satisfy the requirements for a waiver of fees, a waiver shall be granted for those records.

(5) Requests for a waiver or reduction of fees should be made when the request is first submitted to the component and should address the criteria referenced above. A requester may submit a fee waiver request at a later time so long as the underlying record request is pending or on administrative appeal. When a requester who has committed to pay fees subsequently asks for a waiver of those fees and that waiver is denied, the requester will be required to pay any costs incurred up to the date the fee waiver request was received.

(6) *Summary of fees.* The following table summarizes the chargeable fees (excluding direct fees identified in § 5.11) for each requester category.

Category	Search fees	Review fees	Duplication fees
Commercial-use	Yes	Yes	Yes.
Educational or Non-Commercial Scientific Institution	No	No	Yes (100 pages free).
News Media	No	No	Yes (100 pages free).
Other requesters	Yes (2 hours free)	No	Yes (100 pages free).

§ 5.12 Confidential commercial information; CBP procedures.

(a) *In general.* For purposes of this section, ''commercial information'' is defined as trade secret, commercial, or financial information obtained from a person. Commercial information provided to CBP by a business submitter and that CBP determines is privileged or confidential commercial or financial information will be treated as privileged or confidential and will not be disclosed pursuant to a Freedom of Information Act request or otherwise made known in any manner except as provided in this section.

(b) *Notice to business submitters of FOIA requests for disclosure.* Except as provided in paragraph (b)(2) of this section, CBP will provide business submitters with prompt written notice of receipt of FOIA requests or appeals that encompass their commercial information. The written notice will describe either the exact nature of the commercial information requested, or enclose copies of the records or those portions of the records that contain the commercial information. The written notice also will advise the business submitter of its right to file a disclosure objection statement as provided under paragraph (c)(1) of this section. CBP will provide notice to business submitters of FOIA requests for the business submitter's commercial information for a period of not more than 10 years after the date the business submitter provides CBP with the information, unless the business submitter requests, and provides acceptable justification for, a specific notice period of greater duration.

(1) *When notice is required.* CBP will provide business submitters with notice of receipt of a FOIA request or appeal whenever:

(i) The business submitter has in good faith designated the information as commercially- or financially-sensitive information. The business submitter's claim of confidentiality should be supported by a statement by an authorized representative of the business entity providing specific justification that the information in question is considered confidential commercial or financial information and that the information has not been disclosed to the public; or

(ii) CBP has reason to believe that disclosure of the commercial information could reasonably be expected to cause substantial competitive harm.

(2) *When notice is not required.* The notice requirements of this section will not apply if:

(i) CBP determines that the commercial information will not be disclosed;

(ii) The commercial information has been lawfully published or otherwise made available to the public; or

(iii) Disclosure of the information is required by law (other than 5 U.S.C. 552).

(c) *Procedure when notice given.* (1) *Opportunity for business submitter to object to disclosure.* A business submitter receiving written notice from CBP of receipt of a FOIA request or appeal encompassing its commercial information may object to any disclosure of the commercial information by providing CBP with a detailed statement of reasons within 10 days of the date of the notice (exclusive of Saturdays, Sundays, and legal public holidays). The statement should specify all the grounds for withholding any of the commercial information under any exemption of the FOIA and, in the case of Exemption 4, should demonstrate why the information is considered to be a trade secret or commercial or financial information that is privileged or confidential. The disclosure objection information provided by a person pursuant to this paragraph may be subject to disclosure under the FOIA.

(2) *Notice to FOIA requester.* When notice is given to a business submitter under paragraph (b)(1) of this section, notice will also be given to the FOIA requester that the business submitter has been given an opportunity to object to any disclosure of the requested commercial information.

(d) *Notice of intent to disclose.* CBP will consider carefully a business submitter's objections and specific grounds for nondisclosure prior to determining whether to disclose commercial information. Whenever CBP decides to disclose the requested commercial information over the objection of the business submitter, CBP will provide written notice to the business submitter of CBP's intent to disclose, which will include:

(1) A statement of the reasons for which the business submitter's disclosure objections were not sustained;

(2) A description of the commercial information to be disclosed; and

(3) A specified disclosure date which will not be less than 10 days (exclusive of Saturdays, Sundays, and legal public holidays) after the notice of intent to disclose the requested information has been issued to the business submitter. Except as otherwise prohibited by law, CBP will also provide a copy of the notice of intent to disclose to the FOIA requester at the same time.

(e) *Notice of FOIA lawsuit.* Whenever a FOIA requester brings suit seeking to compel the disclosure of commercial information covered by paragraph (b)(1) of this section, CBP will promptly notify the business submitter in writing.

§ 5.13 Other rights and services.

Nothing in this subpart shall be construed to entitle any person, as of right, to any service or to the disclosure of any record to which such person is not entitled under the FOIA.

Appendix I to Subpart A—FOIA Contact Information

Department of Homeland Security Chief FOIA Officer

Chief Privacy Officer/Chief FOIA Officer, The Privacy Office, U.S. Department of Homeland Security, 245 Murray Lane SW., STOP–0655, Washington, DC. 20528–0655

Department of Homeland Security Deputy Chief FOIA Officer

Deputy Chief FOIA Officer, The Privacy Office, U.S. Department of Homeland Security, 245 Murray Lane SW., STOP–0655, Washington, DC 20528–0655

Senior Director, FOIA Operations

Sr. Director, FOIA Operations, The Privacy Office, U.S. Department of Homeland Security, 245 Murray Lane SW., STOP–0655, Washington, DC 20528–0655, Phone: 202–343–1743 or 866–431–0486, Fax: 202–343–4011, Email: *foia@hq.dhs.gov*

Director, FOIA Production and Quality Assurance

Public Liaison, FOIA Production and Quality Assurance, The Privacy Office, U.S. Department of Homeland Security, 245 Murray Lane SW., STOP–0655, Washington, DC 20528–0655, Phone: 202–343–1743 or 866–431–0486, Fax: 202–343–4011, Email: *foia@hq.dhs.gov*

U.S. Customs & Border Protection (CBP)

FOIA Officer/Public Liaison, 90 K Street NE., 9th Floor, Washington, DC 20229–1181, Phone: 202–325–0150, Fax: 202–325–0230

Office of Civil Rights and Civil Liberties (CRCL)

FOIA Officer/Public Liaison, U.S. Department of Homeland Security, Washington, DC 20528, Phone: 202–357–1218, Email: *CRCL@dhs.gov*

Federal Emergency Management Agency (FEMA)

FOIA Officer/Public Liaison, 500 C Street SW., Room 7NE, Washington, DC 20472, Phone: 202–646–3323, Email: *fema-foia@dhs.gov*

Federal Law Enforcement Training Center (FLETC)

FOIA Officer/Public Liaison, Building #681, Suite 187B, Glynco, GA 31524, Phone: 912–267–3103, Fax: 912–267–3113, Email: *fletc-foia@dhs.gov*

National Protection and Programs Directorate (NPPD)

FOIA Officer/Public Liaison, U.S. Department of Homeland Security, Washington, DC 20528, Phone: 703–235–2211, Fax: 703–235–2052, Email: *NPPD.FOIA@dhs.gov*

Office of Biometric Identity Management (OBIM) FOIA Officer, Department of Homeland Security, Washington, DC 20598–0628, Phone: 202–298–5454, Fax: 202–298–5445, E-Mail: *OBIM–FOIA@ice.dhs.gov*

Office of Intelligence & Analysis (I&A)

BILLING CODE 9110–9L–P

FEDERAL DEPOSIT INSURANCE CORPORATION

12 CFR Part 309

RIN 3064–AE53

Revision of the FDIC's Freedom of Information Act Regulations

AGENCY: Federal Deposit Insurance Corporation.

ACTION: Interim final rule and request for comment.

SUMMARY: This rule amends the Federal Deposit Insurance Corporation's (FDIC) regulations under the Freedom of Information Act (FOIA) to incorporate certain changes made to the FOIA by the FOIA Improvement Act of 2016 (FOIA Improvement Act). In addition, this rule amends certain provisions to reflect changes brought about by prior amendments to the FOIA that had been incorporated into agency practice and corrects inaccurate contact information and adjusts numbering and lettering of current provisions because of additions to the regulations.

DATES: This rule is effective November 22, 2016. Comments must be submitted by January 23, 2017.

ADDRESSES: You may submit written comments, which must include the agency name and RIN 3064–AE53, by one of the following methods:

- *Agency Web site: www.fdic.gov/regulations/laws/federal/.* Follow instructions for submitting comments on the Agency Web site.
- *Email: Comments@fdic.gov.* Include ''Disclosure of Information'' in the subject line of the message.
- *Mail:* Robert E. Feldman, Executive Secretary, Attention: Comments, Federal Deposit Insurance Corporation, 550 17th Street NW., Washington, DC 20429.
- *Hand Delivery:* Comments may be hand-delivered to the guard station at the rear of the 550 17th Street Building (located on F Street) on business days between 7:00 a.m. and 5:00 p.m.
- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.

Public Inspection: All comments received will be posted without change to *http://www.fdic.gov/regulations/laws/federal/,* including any personal information provided. Paper copies of public comments may be ordered from the FDIC Public Information Center, 3501 North Fairfax Drive, Room E–1002, Arlington, VA 22226, or by telephone at (877) 275–3342 or (703) 562–2200.

FOR FURTHER INFORMATION CONTACT: Hugo Zia, Supervisory Counsel, FDIC, FOIA/Privacy Act Group, Legal Division, at *hzia@fdic.gov* or (703) 562–2671; or John Elmore, Counsel, FDIC, FOIA/Privacy Act Group, Legal Division, at *joelmore@fdic.gov* or (703) 562–2047; or Sarah Jirousek, Counsel, FDIC, FOIA/Privacy Act Group, Legal Division, at *sjirousek@fdic.gov* or (703) 562–2125.

SUPPLEMENTARY INFORMATION:

I. Policy Objectives

The policy objective of this interim final rule is to bring the FDIC's FOIA regulations [1] into accord with the changes to the FOIA made by the FOIA Improvement Act,[2] the OPEN Government Act,[3] and the OPEN FOIA Act.[4]

II. Background

This rule amends the FDIC's regulations under the FOIA to incorporate certain changes made to the FOIA, 5 U.S.C. 552, by the FOIA Improvement Act. Among other things, the FOIA Improvement Act requires agencies to provide a minimum of 90 days for requesters to file an administrative appeal. The FOIA Improvement Act also requires agency regulations to address dispute resolution procedures and to provide notification to requesters about the availability of dispute resolution services. The FOIA Improvement Act requires the FDIC to issue regulations which incorporate the changes made by the FOIA Improvement Act not later than 180 days after the date of its enactment (*i.e.,* by December 27, 2016). This rule updates the FDIC's regulations in 12 CFR part 309 to reflect those statutory changes.

In addition, as explained below, this rule amends certain provisions to reflect changes brought about by the amendments to the FOIA in the OPEN Government Act and the OPEN FOIA Act. These amendments to the FOIA from 2007 and 2009 have been followed by the FDIC even though the agency's regulations had not been amended.

Finally, the rule corrects one instance of inaccurate contact information and adjusts the numbering and lettering of current provisions because of additions made to the regulations.

III. Description of the Rule

The following changes have been made to the FDIC's FOIA regulations:

Section 309.2 Definitions

Paragraph (e) of § 309.2 (Definitions) is revised to include the current definition for a record under the FOIA. Section 9 of the OPEN Government Act amended the definitions section of the FOIA, 5 U.S.C. 552(f), by including within the definition of ''record'' any information ''maintained for an agency by an entity under Government contract, for the purposes of records management.'' This amendment made clear that records, in the possession of Government contractors for purposes of records management, are considered agency records for purposes of the FOIA. Through this change to the regulations, the FDIC adopts the statutory definition of ''record.''

Section 309.4 Publicly Available Records

Paragraph (a)(2) of § 309.4 (Records available on the FDIC's World Wide Web page) is revised to replace outdated wording concerning the inspection of records that are required to be made available to the public. In the current version of the FDIC's regulations, the phrase ''via computer telecommunications'' is used. The FOIA Improvement Act changed this wording to ''for inspection in an electronic format.'' Through this change to the regulations, the FDIC adopts the language concerning public inspection of records in the FOIA Improvement Act.

Paragraph (a)(2)(i)(D) of § 309.4 (Records available on the FDIC's World Wide Web page) is revised to include

[1] 12 CFR 309.2, 309.4, 309.5.

[2] Public Law 114–185, 130 Stat. 538 (2016).

[3] Public Law 110–175, 121 Stat. 2524 (2007).

[4] Public Law 111–83, 123 Stat. 2142, 2184 (2009).

the requirement that the FDIC make available for public inspection in an electronic format any record that has been released and (i) that the FDIC determines has become or is likely to become the subject of subsequent requests for substantially the same records, or (ii) that has been requested three or more times. This requirement has been the practice of the FDIC for a number of years, is in accord with the current practice of the FDIC and is required by the FOIA Improvement Act.

Paragraph (b) of § 309.4 (Public Information Center) is revised to correct inaccurate contact information for the FDIC's Public Information Center. This revision to the regulations is required so that requesters have the correct contact information when inquiring about publicly available records.

Section 309.5 Procedures for Requesting Records

Paragraph (a)(6) of § 309.5 (Representative of the news media) is revised to include the current definition of ''representative of the news media'' under the FOIA. Section 3 of the OPEN Government Act amended 5 U.S.C. 552(a)(4)(A)(ii) of the FOIA by expressly providing a definition of ''representative of the news media.'' Through this change to the regulations, the FDIC adopts the definition of ''representative of the news media'' that is in the OPEN Government Act.

Paragraph (d)(1) of § 309.5 (Receipt of requests) is revised to specify that the FDIC will provide a requester with an individualized tracking number for any FOIA request that satisfies 12 CFR 309.5(b), no matter how long it will take to process the request. Section 7 of the OPEN Government Act amended 5 U.S.C. 552(a) by requiring agencies to assign an individualized tracking number for each request that will require more than ten days to process. This section codified existing requirements set forth in Executive Order 13,392. Providing tracking numbers for every FOIA request that satisfies § 309.5(b), including those that will take less than ten days to process, has been the practice of the FDIC for a number of years, is in accord with the current practice of the FDIC and adopts the language of the OPEN Government Act.

Paragraph (d)(4) of § 309.5 is revised to account for a change in numbering because of the addition of § 309.5(h) (Dispute resolution). Previously, the paragraph covering procedures concerning appeals that is cross-referenced in this paragraph was § 309.5(h); it is now § 309.5(i). This adjustment to numbering is necessary to maintain the organizational integrity of the regulations.

Paragraph (d)(6) of § 309.5 (Checking status of request) is added to notify requesters of the contact information for FDIC's FOIA Service Center (telephone number and Web site address), thereby enabling requesters to obtain certain information about the status of their request. Section 7 of the OPEN Government Act amended 5 U.S.C. 552(a) by requiring agencies to establish a telephone number or a Web site to allow requesters to inquire about the status of their request, obtain the date an agency originally received their request, and obtain an estimated date for the completion of the agency's processing of their request. This section of the OPEN Government Act codified existing requirements set forth in Executive Order 13,392. The FDIC has a FOIA Service Center that is accessible via the internet and telephone and, through either method, requesters are provided with the date of the FDIC's receipt of their request and the estimated date on which the FDIC will complete its processing of their request. The FDIC has made these services and information available to requesters for a number of years. The addition of this notification provision to the regulations is in accord with the FDIC's current practice and adopts the language in the OPEN Government Act.

Paragraph (d)(7) of § 309.5 (Notification) is revised in numbering because of the addition of § 309.5(d)(6) (Checking status of request). Previously this paragraph was § 309.5(d)(6) (Notification); it is now § 309.5(d)(7) (Notification). This adjustment to numbering is necessary to maintain the organizational integrity of the regulations.

Paragraph (d)(8) of § 309.5 (Response to request) is revised in numbering because of the addition of § 309.5(d)(6) (Checking status of request). Previously this paragraph was § 309.5(d)(7); it is now § 309.5(d)(8). This adjustment to numbering is necessary to maintain the organizational integrity of the regulations.

Paragraph (d)(8)(iii) of § 309.5 (Response to request) is added to require the FDIC to notify requesters, in its response to their request, of their right to seek assistance from the FDIC's FOIA Public Liaison, if the FDIC determines such request satisfies 12 CFR 309.5(b). Section 2 of the FOIA Improvement Act added 5 U.S.C. 552(a)(6)(A)(i)(II), which requires agencies to offer the services of their FOIA Public Liaison when issuing their determinations of requests. The addition of this notification provision to the regulations is in accord with the FDIC's current practice and is required by the FOIA Improvement Act.

Paragraph (d)(8)(iv) of § 309.5 (Response to request) is revised in numbering because of the addition of § 309.5(d)(8)(iii) (Checking status of request). Previously this paragraph was § 309.5(d)(8)(iii); it is now § 309.5(d)(8)(iv). This adjustment to numbering is necessary to maintain the organizational integrity of the regulations.

Paragraph (d)(8)(iv)(C) of § 309.5 (Response to request) is revised to remove an ''and'' because of the addition of § 309.5(d)(8)(iv)(E). This removal is necessary to maintain the organizational integrity of the regulations.

Paragraph (d)(8)(iv)(D) of § 309.5 (Response to request) is revised to provide for notification to the requester that the deadline to file an administrative appeal is extended to 90 days, in conformity with the 90-day time period established by the FOIA Improvement Act. Section 2 of the FOIA Improvement Act amended 5 U.S.C. 552(a)(6)(A)(i) by changing the time period for an appeal of adverse determinations, from 30 days to 90 days. This paragraph is also revised to add an ''and'' because of the addition of § 309.5(d)(8)(iv)(E). These changes are required by the FOIA Improvement Act and for the regulation to remain organized.

Paragraph (d)(8)(iv)(E) of § 309.5 (Response to request) is added to include a requirement that the FDIC notify requesters, in response to an adverse determination of a request that satisfies § 309.5(b), of their right to seek assistance from the FDIC's FOIA Public Liaison and/or the Office of Government Information Services (OGIS) at the National Archives and Records Administration. Section 2 of the FOIA Improvement Act added 5 U.S.C. 552(a)(6)(A)(i)(III), which requires that when agencies make adverse determinations on requests, they must offer the services of their FOIA Public Liaison and/or OGIS. The addition of this provision concerning notification to the regulations is required by the FOIA Improvement Act.

Paragraph (f)(1)(x) of § 309.5 is revised to account for a change in numbering because of the addition of § 309.5(h) (Dispute resolution). Previously, the paragraph referring to procedures concerning appeals that is cross-referenced in this paragraph was § 309.5(h); it is now § 309.5(i). This adjustment to numbering is necessary to maintain the organizational integrity of the regulations.

Paragraph (g)(3)(i) of § 309.5 (Exempt information) is revised in numbering and by adding an ''and'' because of the addition of § 309.5(g)(3)(ii). Previously this paragraph was § 309.5(d)(8)(iii); it is now § 309.5(d)(8)(iv). This adjustment to numbering and the addition of an ''and'' is necessary to maintain the organizational integrity of the regulations.

Paragraph (g)(3)(ii) of § 309.5 (Exempt information) is added to include a requirement codified in the OPEN FOIA Act that statutes enacted after the date of the enactment of the OPEN FOIA Act must specifically cite to Exemption 3 of the FOIA in order to qualify under Exemption 3. The OPEN FOIA Act was enacted on October 28, 2009, and so this amendment impacts statutes enacted after that date. In order for any statute enacted after that date to qualify as an Exemption 3 statute, it must satisfy one of the traditional requirements, *i.e.,* it must ''require that the matters be withheld from the public in such a manner as to leave no discretion on the issue'' or it must ''establish particular criteria for withholding or refer to particular types of matters to be withheld;'' and, the statute enacted after October 28, 2009, must also specifically cite to Exemption 3. Through this change to the regulations, the FDIC is bringing the language concerning withholdings made pursuant to Exemption 3 into accord with the OPEN FOIA Act.

Paragraph (h) of § 309.5 (Dispute resolution) is added to include procedures for engaging in dispute resolution through the FOIA Public Liaison and OGIS. Section 3 of the FOIA Improvement Act requires agencies to amend their regulations to include procedures for engaging in dispute resolution through the FOIA Public Liaison and OGIS. The FDIC has pointed requesters to its FOIA Service Center at *http://www.fdic.gov,* which contains details about the procedures for contacting these entities in order to engage in dispute resolution. The addition of these procedures to the FDIC's regulations is required by the FOIA Improvement Act.

Paragraph (i) of § 309.5 (Appeals) is revised in numbering because of the addition of § 309.5(h) (Dispute resolution). Previously this paragraph was § 309.5(h); it is now § 309.5(i). This adjustment to numbering is necessary to maintain the organizational integrity of the regulations.

Paragraph (i)(2) of § 309.5 (Appeals) is revised to extend the time to file an administrative appeal to 90 days, in conformity with the 90-day time period established by the FOIA Improvement Act. Section 2 of the FOIA Improvement Act amended 5 U.S.C. 552(a)(6)(A)(i), changing the time period for appeal of adverse determinations from 30 days to 90 days. This change to the regulations is required by the FOIA Improvement Act.

Paragraph (j) of § 309.5 (Records of another agency) is revised in numbering because of the addition of § 309.5(h) (Dispute resolution). Previously this paragraph was § 309.5(i); it is now § 309.5(j). This adjustment to numbering is necessary to maintain the organizational integrity of the regulations.

IV. Expected Effects of the Rule

The FDIC has analyzed the expected effects of the interim final rule and estimates them to be relatively small. The rule makes two primary changes to the existing regulations: Extending the deadline for requesters to file an appeal, and establishing procedures for dispute resolution and requiring notice to requesters about the availability of dispute resolution services. These changes help support the policy objective of the FOIA, which is to provide public access to government information.

The provision in the interim final rule that extends the time period for which an appeal will be considered will likely result in a small increase in administrative costs associated with FOIA requests, but that may be offset by a decrease in lawsuits brought since requesters will now have a larger window for seeking administrative review of an adverse request determination. In the past ten fiscal years, the FDIC has received 238 appeals from FOIA requesters, an average of 24 appeals per fiscal year. The extension of the appeal time period from 30 business days to 90 calendar days will likely result in a general increase in number of appeals, given the larger window for filing an appeal. A general increase in the number of appeals will likely increase administrative costs for the FDIC. Any potential increase in administrative costs as a result of the extension of the appeal period rule is difficult to estimate given that costs will depend upon both the volume of requests received and the extent to which the requests may be subject, in whole or in part, to denial. However, the extension of the appeal period will benefit the public by expanding the deadline for requesters to file an administrative appeal of adverse determinations made by the FDIC.

The establishment of a dispute resolution process also supports public access to government information while likely posing a small increase in administrative costs for the FDIC and/or the OGIS. The establishment of a dispute resolutions process, in addition to the FDIC appeal process, will support public access to government records by providing requesters with an additional mechanism for the review of adverse determinations, in the event of a dispute. Any potential increase in administrative costs as a result of the establishment of a dispute resolution process by the interim final rule is difficult to estimate, given the unpredictable elements noted above.

The interim final rule also makes changes to the FDIC's FOIA regulations to reflect FDIC FOIA practices initially prompted by the OPEN Government Act and the OPEN FOIA Act. Most of the changes to the FDIC FOIA regulations are procedural and either codify current practice or make benign changes to the FOIA regulations that are unlikely to pose any costs or benefits for the Public.

In conclusion, there is potential for a small increase in administrative costs for the FDIC posed by the revisions, but the policy objective of public access to government information continues to be supported and would in fact be enhanced—as required by the FOIA Improvement Act.

V. Alternatives Considered

The changes in the interim final rule are mandated by the FOIA Improvement Act and are in accord with the OPEN Government Act and the OPEN FOIA Act. Under the FOIA Improvement Act, the FDIC has no discretion to make or consider alternative specifications to the provisions in the interim final rule. The other technical changes to 12 CFR part 309 are minor and designed to improve the transparency and readability of the CFR, and therefore FDIC staff did not actively consider alternative approaches to these changes.

VI. Request for Comment

Pursuant to the Administrative Procedure Act (the ''APA''), at 5 U.S.C. 553(b), notice and comment are not required prior to the issuance of a final rule if an agency, for good cause, finds that ''notice and public procedure thereon are impracticable, unnecessary, or contrary to the public interest.'' As discussed above, the FOIA Improvement Act requires the FDIC to issue regulations which incorporate the changes made by the FOIA Improvement Act not later than 180 days after the date of its enactment (*i.e.,* by December 27, 2016). Because the statutory changes under the FOIA Improvement Act were effective

immediately and due to the statutory deadline imposed for rulemaking, the FDIC has concluded that publishing notice and taking comment before issuing a final rule would be impracticable. In addition, since these changes merely bring the regulations into alignment with the provisions contained in the FOIA Improvement Act, the OPEN Government Act, and the OPEN FOIA Act, and improve the rule's accuracy and organization, publishing prior notice would be unnecessary. Therefore, the FDIC finds good cause exists to publish this rule as final without prior notice and comment and with an effective date as of the date of its publication in the **Federal Register** to allow the public to benefit immediately. Nevertheless, the FDIC welcomes public comments from any interested person on any aspect of the changes made by this interim final rule. Please refer to the **ADDRESSES** section above. The FDIC will carefully consider all public comments, if any, in any further development of this rule.

VII. Regulatory Analysis

Riegle Community Development and Regulatory Improvement Act

Section 302 of the Riegle Community Development and Regulatory Improvement Act[5] generally requires that regulations prescribed by federal banking agencies which impose additional reporting, disclosures, or other new requirements on insured depository institutions take effect on the first day of a calendar quarter unless the regulation is required to take effect on another date pursuant to another act of Congress or the agency determines for good cause that the regulation should become effective on an earlier date. This interim final rule makes revisions in the FDIC's FOIA regulations, because these changes are merely bringing the regulations into alignment with the provisions contained in the FOIA Improvement Act, the OPEN Government Act, and the OPEN FOIA Act, as well as for purposes of accuracy and organization. It does not impose any new or additional reporting, disclosures, or other requirements on insured depository institutions. Additionally, as previously noted, the FOIA Improvement Act requires the FDIC to issue regulations which incorporate the changes made by the FOIA Improvement Act not later than 180 days after the date of its enactment (*i.e.,* by December 27, 2016). Accordingly, this interim final rule will be effective upon publication.

[5] 12 U.S.C. 4802.

Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA)[6] applies only to rules for which an agency publishes a general notice of proposed rulemaking pursuant to 5 U.S.C. 553(b). As discussed above, consistent with section 553(b)(B) of the APA, the FDIC has determined for good cause that general notice and opportunity for public comment is not necessary. Accordingly, the RFA's requirements relating to initial and final regulatory flexibility analysis do not apply. Nonetheless, the FDIC observes that because this interim final rule only amends the FDIC's regulations under the FOIA to incorporate certain changes made by the FOIA Improvement Act, the OPEN Government Act, and the OPEN FOIA Act, and for purposes of accuracy and organization, it should not have a significant economic impact on a substantial number of small entities. The FDIC requests comment on these conclusions.

The Omnibus Consolidated and Emergency Supplemental Appropriations Act, 1999: Assessment of Federal Regulations and Policies on Families

The FDIC determined that this interim final rule will not affect family wellbeing within the meaning of section 654 of the Omnibus Consolidated and Emergency Supplemental Appropriations Act, 1999.[7]

Paperwork Reduction Act

The Paperwork Reduction Act of 1995[8] states that no agency may conduct or sponsor, nor is the respondent required to respond to, an information collection unless it displays a currently valid Office of Management and Budget (OMB) control number. The FDIC has determined that this interim final rule does not create any new, or revise any existing, collections of information under the Paperwork Reduction Act. Consequently, no information collection request will be submitted to the OMB for review. The FDIC invites comment on its PRA determination.

Plain Language Act

Section 722 of the Gramm-Leach-Bliley Act requires the FDIC to use plain language in all proposed and final rules published after January 1, 2000.[9] The FDIC invites comment on how to make this rule easier to understand. For example:

- Has the FDIC organized the material to suit your needs? If not, how could the FDIC present the rule more clearly?
- Are the requirements in the rule clearly stated? If not, how could the rule be more clearly stated?
- Does the rule contain technical language or jargon that is not clear? If so, which language requires clarification?
- Would a different format (grouping and order of sections, use of headings, paragraphing) make the rule easier to understand? If so, what changes would achieve that?
- Is this section format adequate? If not, which of the sections should be changed and how?
- What other changes can the FDIC incorporate to make the rule easier to understand?

List of Subjects in 12 CFR Part 309

Federal Deposit Insurance Corporation, Procedure and Rules of Practice, Disclosure of Information.

Accordingly, for the reasons stated in the preamble, 12 CFR chapter 3, subchapter A, part 309 is amended as follows:

PART 309—DISCLOSURE OF INFORMATION

■ 1. The authority citation for part 309 continues to read as follows:

Authority: 5 U.S.C. 552; 12 U.S.C. 1819 ''Seventh'' and ''Tenth.''

■ 2. Section 309.2 is amended by revising paragraph (e) to read as follows:

§ 309.2 Definitions.

* * * * *

(e) The term *record* means*:*

(1) Any information that would be an agency record subject to the requirements of this section when maintained by the FDIC in any format, including an electronic format; and

(2) Any information described under paragraph (e)(1) of this section that is maintained for the FDIC by an entity under Government contract, for purposes of records management.

* * * * *

■ 3. Section 309.4 is amended by revising the paragraph (a)(2) subject heading and paragraphs (a)(2)(i) introductory text, (a)(2)(i)(D), and (b) to read as follows:

§ 309.4 Publicly available records.

(a) * * *

(2) *Documents required to be made available for inspection in an electronic*

format. (i) The following types of documents created on or after November 1, 1996, and required to be made available for inspection in an electronic format, may be found on the FDIC's World Wide Web page located at: *http://www.fdic.gov:*

* * * * *

(D) Copies of all records released to any person under § 309.5:

(*1*) That, because of the nature of their subject matter, the FDIC determines have become or are likely to become the subject of subsequent requests for substantially the same records; or

(*2*) That have been requested 3 or more times; and

* * * * *

(b) *Public Information Center.* The FDIC maintains a Public Information Center or ''PIC'' that contains Corporate records that the Freedom of Information Act requires be made available for regular inspection and copying, as well as any records or information the FDIC, in its discretion, has regularly made available, to the public. The PIC has extensive materials of interest to the public, including many Reports, Summaries and Manuals used or published by the Corporation that are made available, by appointment, for inspection and copying. The PIC is open from 9 a.m. to 4 p.m., Monday through Friday, excepting Federal holidays. It is located at 3501 North Fairfax Drive, Room E–1005, Arlington, VA 22226. The PIC may be reached during business hours by calling 1(877) 275–3342 or 1-(703) 562–2200.

* * * * *

■ 4. Section 309.5 is amended by:
■ a. Revising paragraphs (a)(6), (d)(1), and (d)(4);
■ b. Redesignating paragraphs (d)(6) and (d)(7) as paragraphs (d)(7) and (d)(8), respectively and adding new paragraph (d)(6);
■ c. Redesignating newly redesignated paragraph (d)(8)(iii) as paragraph (d)(8)(iv) and adding a new paragraph (d)(8)(iii);
■ d. Revising newly redesignated paragraphs (d)(8)(iv)(C) and (d)(8)(iv)(D) and adding paragraph (d)(8)(iv)(E);
■ e. Revising paragraphs (f)(1)(x) and (g)(3);
■ f. Redesignating paragraphs (h) and (i) as paragraphs (i) and (j), respectively;
■ g. Adding new paragraph (h); and
■ h. Revising newly redesignated paragraph (i)(2).

The revisions and additions read as follows:

§ 309.5 Procedures for requesting records.

(a) * * *

(6) *Representative of the news media* means any person or entity that gathers information of potential interest to a segment of the public, uses its editorial skills to turn the raw materials into a distinct work, and distributes that work to an audience. The term *news* means information that is about current events or that would be of current interest to the public. Examples of news-media entities are television or radio stations broadcasting to the public at large and publishers of periodicals (but only if such entities qualify as disseminators of *news*) who make their products available for purchase by or subscription by or free distribution to the general public. These examples are not all-inclusive. Moreover, as methods of news delivery evolve (for example, the adoption of the electronic dissemination of newspapers through telecommunications services), such alternative media will be considered to be news-media entities. A freelance journalist will be regarded as working for a news-media entity if the journalist can demonstrate a solid basis for expecting publication through that entity, whether or not the journalist is actually employed by that entity. A publication contract would present a solid basis for such an expectation; the FDIC may also consider the past publication record of the requester in making this determination.

(d) * * *

(1) *Receipt of requests.* Upon receipt of a request that satisfies paragraph (b) of this section, the FOIA/PA Group will acknowledge receipt of the request in writing to the requester and provide the requester with an individualized tracking number for the request. The date of receipt for such request, including one that is addressed incorrectly or that is referred by another agency, is the date the FOIA/PA Group actually receives the request.

* * * * *

(4) A requester seeking expedited processing will be notified whether expedited processing has been granted within ten (10) working days of the receipt of the request. If the request for expedited processing is denied, the requester may file an appeal pursuant to the procedures set forth in paragraph (i) of this section, and the FDIC shall respond to the appeal within ten (10) working days after receipt of the appeal.

* * * * *

(6) *Checking status of request.* A requester may check on the status of a request using the tracking number assigned to the request to obtain information about the request including the date on which the FDIC originally received the request and an estimated date on which the FDIC will complete action on the request. The status of a request may be obtained:

(i) Online at the FDIC's FOIA Service Center, at *http://www.fdic.gov,* if the request was submitted electronically using the FDIC's online FOIA request form; or

(ii) By calling the FDIC's FOIA Service Center at (202) 898–7021, if the request was submitted by email, facsimile or regular mail.

* * * * *

(8) * * *

(iii) The right of the requester to seek assistance from the FDIC's FOIA Public Liaison; and

(iv) * * *

(C) The exemptions relied on for the denial;

(D) The right of the requester to appeal the denial to the FDIC's General Counsel within 90 calendar days following receipt of the notification, as specified in paragraph (i) of this section; and

(E) The right of the requester to seek dispute resolution services from the FDIC's FOIA Public Liaison and/or the Office of Government Information Services (OGIS).

(f) * * *

(1) * * *

(x) As part of the initial request, a requester may ask that the FDIC waive or reduce fees if disclosure of the records is in the public interest because it is likely to contribute significantly to public understanding of the operations or activities of the government and is not primarily in the commercial interest of the requester. Determinations as to a waiver or reduction of fees will be made by the FOIA/PA Group, Legal Division (or designee) and the requester will be notified in writing of his/her determination. A determination not to grant a request for a waiver or reduction of fees under this paragraph may be appealed to the FDIC's General Counsel (or designee) pursuant to the procedure set forth in paragraph (i) of this section.

* * * * *

(g) * * *

(3) Records specifically exempted from disclosure by statute, provided that such statute:

(i)(A) Requires that the matters be withheld from the public in such a manner as to leave no discretion on the issue; or

(B) Establishes particular criteria for withholding or refers to particular types of matters to be withheld; and

(ii) if enacted after the date of enactment of the OPEN FOIA Act of 2009, specifically cites to 5 U.S.C. 552(b)(3);

* * * * *

(h) *Dispute resolution.* A requester seeking to engage in dispute resolution may make a request to the FOIA Public Liaison and/or OGIS by following the procedures set forth online in the FDIC's FOIA Service Center at *http://www.fdic.gov.*

(i) * * *

(2) A person whose initial request for records under this section, or whose request for a waiver of fees under paragraph (f)(1)(x) of this section, has been denied, either in part or in whole, has the right to appeal the denial to the FDIC's General Counsel (or designee) within 90 calendar days after receipt of notification of the denial. Appeals of denials of initial requests or for a waiver of fees must be in writing and include any additional information relevant to consideration of the appeal.

* * * * *

Dated at Washington, DC, this 15th day of November, 2016.

By order of the Board of Directors.

Federal Deposit Insurance Corporation.

Valerie J. Best,

Assistant Executive Secretary.

[FR Doc. 2016–27961 Filed 11–21–16; 8:45 am]

BILLING CODE 6714–01–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2016–3701; Directorate Identifier 2015–NM–015–AD; Amendment 39–18689; AD 2016–21–08]

RIN 2120–AA64

Airworthiness Directives; Airbus Airplanes

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: We are superseding Airworthiness Directive (AD) 2013–25–08 for all Airbus Model A330–200, –200 Freighter, and –300 series airplanes; and Model A340–200 and –300 series airplanes. AD 2013–25–08 required a repetitive inspection program on certain check valves in the hydraulic systems that includes, among other things, inspections for lock wire presence and integrity, traces of seepage or black deposits, proper torque, alignment of the check valve and manifold, installation of new lock wire, and corrective actions if needed. This new AD removes airplanes from the applicability, and requires modifying the green, blue, and yellow high pressure hydraulic manifolds by replacing certain check valves with improved check valves, which terminates the repetitive inspections required by this AD. This AD was prompted by multiple reports of hydraulic line check valves loosening. We are issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective December 27, 2016.

The Director of the Federal Register approved the incorporation by reference of certain publications listed in this AD as of December 27, 2016.

The Director of the Federal Register approved the incorporation by reference of certain other publications listed in this AD as of January 31, 2014 (78 FR 78694, December 27, 2013).

The Director of the Federal Register approved the incorporation by reference of certain other publications listed in this AD as of December 14, 2009 (74 FR 62208, November 27, 2009).

ADDRESSES: For service information identified in this final rule, contact Airbus SAS—Airworthiness Office—EAL, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France; telephone +33 5 61 93 36 96; fax +33 5 61 93 45 80; email *airworthiness.A330-A340@airbus.com;* Internet *http://www.airbus.com.* You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221. It is also available on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–3701.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–3701; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the regulatory evaluation, any comments received, and other information. The address for the Docket Office (telephone 800–647–5527) is Docket Management Facility, U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Vladimir Ulyanov, Aerospace Engineer, International Branch, ANM–116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057–3356; telephone 425–227–1138; fax 425–227–1149.

SUPPLEMENTARY INFORMATION:

Discussion

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 to supersede AD 2013–25–08, Amendment 39–17704 (78 FR 78694, December 27, 2013) (''AD 2013–25–08''). AD 2013–25–08 applied to all Airbus Model A330–200, –200 Freighter, and –300 series airplanes; and Model A340–200 and –300 series airplanes. The NPRM published in the **Federal Register** on February 25, 2016 (81 FR 9374) (''the NPRM''). The NPRM was prompted by multiple reports of hydraulic line check valves loosening. The NPRM proposed to continue to require a repetitive inspection program on certain check valves in the hydraulic systems that includes, among other things, inspections for lock wire presence and integrity, traces of seepage or black deposits, proper torque, alignment of the check valve and manifold, installation of new lock wire, and corrective actions if needed. The NPRM also proposed to add airplanes to the applicability, and require modifying the green, blue, and yellow high pressure hydraulic manifolds by replacing certain check valves with improved check valves, which would terminate the repetitive inspections required by the proposed AD. We are issuing this AD to detect and correct hydraulic check valve loosening; loosened valves could result in hydraulic leaks, possibly leading to the loss of all three hydraulic systems and consequent loss of control of the airplane.

The European Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Union, has issued EASA Airworthiness Directive 2015–0009, dated January 16, 2015 (referred to after this as the Mandatory Continuing Airworthiness Information, or ''the MCAI''), to correct an unsafe condition. The MCAI states:

> An A330 operator experienced a Yellow hydraulic circuit low level due to a loose check valve, Part Number (P/N) CAR401. During the inspection on the other two hydraulic systems, the other three check valves P/N CAR401 were also found to be loose with their lock wire broken in two instances. Airbus A340 aeroplanes are also equipped with P/N CAR401 high pressure manifold check valves.
>
> Additional cases of P/N CAR401 check valve loosening have been reported on aeroplanes having accumulated more than 1,000 flight cycles (FC). The check valve fitted on the Yellow hydraulic system is more

affected, due to additional system cycles induced by cargo door operation.

This condition, if not detected and corrected, could result in hydraulic leaks, possibly leading to the loss of all three hydraulic systems and consequent loss of control of the aeroplane.

To address this unsafe condition, EASA issued Emergency AD 2009–0223–E [which corresponds to FAA AD 2009–24–09, Amendment 39–16068 (74 FR 62208, November 27, 2009)] to require an inspection programme to detect any check valve loosening and, if necessary, to apply the applicable corrective actions.

EASA AD 2010–0145, which superseded EASA EAD 2009–0223–E retaining its requirements, was issued to expand the applicability to the newly certified models A330–223F and A330–243F.

Prompted by further reported in-service events of check valve P/N CAR401 loosening before reaching the threshold of 700 FC, EASA AD 2011–0139, which superseded EASA AD 2010–0145, retaining its requirements, was issued to:

—Extend the requirement to identify the P/N CAR401 check valves to all aeroplanes, and

—reduce the inspection threshold for aeroplanes fitted with check valve P/N CAR401, either installed in production through Airbus modification 54491, or installed in service through Airbus Service Bulletin (SB) A330–29–3101 or Airbus SB A340–29–4078.

EASA AD 2012–0070, which superseded EASA AD 2011–0139, retaining its requirements, was issued to require an increased torque value of the check valve tightening and High Pressure (HP) manifold re-identification.

Since EASA AD 2012–0070 was issued, additional in-service events have been reported on aeroplanes fitted with check valves on which the increased torque value had been applied. Based on those events, it has been concluded that the action to re-torque the check valves with an increased value is not a satisfactory terminating action for addressing the issue of those check valves.

To address that, EASA issued AD 2012–0244, which partially retained the requirements of EASA AD 2012–0070, which was superseded. Additionally, for aeroplanes equipped with P/N CAR401 on which the increased torque value had been applied, EASA AD 2012–0244 required repetitive inspections of the check valves and HP manifolds. Finally, EASA AD 2012–0244 also required application of a lower torque value when a check valve P/N CAR401 is installed on an aeroplane.

Note: The reporting and the torque value increase requirements for check valves P/N CAR401 of EASA AD 2012–0070 were no longer part of EASA AD 2012–0244.

EASA AD was revised to clarify which actions are required for P/N CAR401 check valves, depending on applied (or not) torque value.

Since EASA AD 2012–0244R1 was issued, Airbus developed an improved check valve P/N CAR402, which is embodied in production through Airbus modification 203972, and in service through associated Airbus SB A330–29–3125, or Airbus SB A340–29–4096, as applicable to aeroplane type. In addition, these SBs provide instructions about the torque value (between 230 and 250 Nm) and re-identification of HP manifolds after check valve P/N CAR402 installation.

For the reasons described above, this [EASA] AD retains the requirements of EASA AD 2012–0244R1, which is superseded, and requires the installation of check valves P/N CAR402 as terminating action to the repetitive inspections [and removes airplanes on which Airbus modification 203972 has been embodied from the applicability].

You may examine the MCAI in the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–3701.

Comments

We gave the public the opportunity to participate in developing this AD. The following presents the comment received on the NPRM and the FAA's response to the comment.

Support for the NPRM

American Airlines (AAL) stated that it operates 24 airplanes that will be affected by the NPRM, and that it agrees with the need to accomplish Airbus Service Bulletin A330–29–3125 on these airplanes.

Request To Reference Revised Service Information

AAL requested that we revise the NPRM to reference Airbus Service Bulletin A330–29–3125, Revision 02, including Appendixes 01 and 02, dated January 21, 2016. AAL pointed out that this revision includes several corrections in the Accomplishment Instructions.

We agree to reference the latest service information in this final rule. Since we issued the NPRM, Airbus has issued Airbus Service Bulletin A330–29–3125, Revision 03, including Appendixes 01 and 02, dated April 8, 2016; and Service Bulletin A340–29–4096, Revision 02, including Appendixes 01 and 02, dated April 8, 2016. This service information states that no additional work is required by these revisions for airplanes modified by any previous issue. We have revised paragraph (p) of this AD to reference this revised service information as appropriate sources of service information for accomplishing the actions required by that paragraph. We have also revised paragraph (s) of this AD by adding credit for actions required by paragraph (p) of this AD, if those actions were performed before the effective date of this AD using Airbus Service Bulletin A330–29–3125, Revision 02, including Appendixes 01 and 02, dated January 21, 2016; or Airbus Service Bulletin A330–29–3125, Revision 01, including Appendixes 01 and 02, dated July 30, 2015; or Airbus Service Bulletin A340–29–4096, Revision 01, including Appendixes 01 and 02, dated July 30, 2015; as applicable. Additionally, we have reformatted paragraph (s) of this AD to improve readability; this change does not affect the intent or requirements of that paragraph.

Conclusion

We reviewed the available data, including the comment received, and determined that air safety and the public interest require adopting this AD with the changes described previously and minor editorial changes. We have determined that these changes:

- Are consistent with the intent that was proposed in the NPRM for correcting the unsafe condition; and
- Do not add any additional burden upon the public than was already proposed in the NPRM.

Related Service Information Under 1 CFR Part 51

Airbus has issued Service Bulletin A330–29–3125, Revision 03, including Appendixes 01 and 02, dated April 8, 2016; and Service Bulletin A340–29–4096, Revision 02, including Appendixes 01 and 02, dated April 8, 2016. This service information describes procedures for modifying the green, blue, and yellow high pressure hydraulic manifolds by replacing each check valve having P/N CAR401 with an improved check valve having P/N CAR402. These documents are distinct since they apply to different airplane models. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Costs of Compliance

We estimate that this AD affects 88 airplanes of U.S. registry.

We estimate the following costs to comply with this AD:

The actions required by AD 2013–25–08, and retained in this AD take about 10 work-hours per product, at an average labor rate of $85 per work-hour. Based on these figures, the estimated cost of the actions that were required by AD 2013–25–08 is $850 per product.

We also estimate that it would take about 32 work-hours per product to comply with the basic requirements of this AD. The average labor rate is $85

per work-hour. Based on these figures, we estimate the cost of this AD on U.S. operators to be $239,360, or $2,720 per product.

We have received no definitive data that would enable us to provide cost estimates for the on-condition actions specified in this AD. We have no way of determining the number of aircraft that might need these actions.

According to the manufacturer, some of the costs of this AD may be covered under warranty, thereby reducing the cost impact on affected individuals. We do not control warranty coverage for affected individuals. As a result, we have included all available costs in our cost estimate.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. ''Subtitle VII: Aviation Programs,'' describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in ''Subtitle VII, Part A, Subpart III, Section 44701: General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

1. Is not a ''significant regulatory action'' under Executive Order 12866;

2. Is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979);

3. Will not affect intrastate aviation in Alaska; and

4. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by removing Airworthiness Directive (AD) 2013–25–08, Amendment 39–17704 (78 FR 78694, December 27, 2013), and adding the following new AD:

2016–21–08 Airbus: Amendment 39–18689; Docket No. FAA–2016–3701; Directorate Identifier 2015–NM–015–AD.

(a) Effective Date

This AD is effective December 27, 2016.

(b) Affected ADs

This AD replaces AD 2013–25–08, Amendment 39–17704 (78 FR 78694, December 27, 2013) (''AD 2013–25–08'').

(c) Applicability

This AD applies to Airbus airplanes, certificated in any category, as identified in paragraphs (c)(1) and (c)(2) of this AD.

(1) Model A330–201, –202, –203, –223, –223F, –243, –243F, –301, –302, –303, –321, –322, –323, –341, –342, and –343 airplanes, all manufacturer serial numbers except those on which Airbus modification 203972 has been embodied in production.

(2) Model A340–211, –212, –213, –311, –312, and –313 airplanes, all manufacturer serial numbers.

(d) Subject

Air Transport Association (ATA) of America Code 29, Hydraulic power.

(e) Reason

This AD was prompted by multiple reports of hydraulic line check valves loosening. We are issuing this AD to detect and correct hydraulic check valve loosening; loosened valves could result in hydraulic leaks, possibly leading to the loss of all three hydraulic systems and consequent loss of control of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Retained Inspections, With No Changes

This paragraph restates the requirements of paragraph (g) of AD 2013–25–08, with no changes. Except for Model A330–223F and A330–243F airplanes: Do the actions required by paragraphs (g)(1) and (g)(2) of this AD.

(1) For airplanes that do not have Airbus Modification 54491 embodied in production, or Airbus Service Bulletin A330–29–3101 or Airbus Service Bulletin A340–29–4078 embodied in service: Within 100 flight cycles or 28 days after December 14, 2009 (the effective date of AD 2009–24–09, Amendment 39–16068 (74 FR 62208, November 27, 2009) (''AD 2009–24–09'')), whichever occurs first, inspect the check valves on the blue, green, and yellow hydraulic systems to identify their part numbers (P/Ns), in accordance with the instructions of Airbus All Operators Telex (AOT) A330–29A3111, Revision 1, dated October 8, 2009 (for Model A330–200 and –300 series airplanes); or Airbus AOT A340–29A4086, Revision 1, dated October 8, 2009 (for Model A340–200 and –300 series airplanes). Accomplishment of the inspection required by paragraph (h) of this AD terminates the requirements of this paragraph.

(i) If check valves having P/N CAR401 are installed on all three hydraulic systems, before further flight, do the actions specified in paragraph (g)(2)(i) of this AD. After accomplishing the actions required by paragraph (g)(2)(i) of this AD, do the actions specified in paragraphs (g)(2)(ii) and (g)(2)(iii) of this AD at the applicable compliance times specified in those paragraphs. Accomplishment of the inspection required by paragraph (i) of this AD terminates the requirements of this paragraph.

(ii) If check valves having P/N CAR401 are not installed on all three hydraulic systems, no further action is required by this paragraph until any check valve having P/N CAR400 is replaced with a check valve having P/N CAR401. If any check valve having P/N CAR400 is replaced by a check valve having P/N CAR401, before further flight, do the inspection specified in paragraph (g)(1) of this AD to determine if all three hydraulic systems are equipped with check valves having P/N CAR401. Accomplishment of the inspection required by paragraph (h) of this AD terminates the requirements of this paragraph.

(2) For airplanes on which Airbus Modification 54491 was embodied in production, or Airbus Service Bulletin A330–29–3101; or Airbus Service Bulletin A340–29–4078 was embodied in service, do the actions specified in paragraphs (g)(2)(i), (g)(2)(ii), and (g)(2)(iii) of this AD.

(i) Except as required by paragraph (g)(1)(i) of this AD, at the applicable times specified in paragraphs (g)(2)(i)(A) and (g)(2)(i)(B) of this AD, as applicable: Do the inspection program (detailed inspection of the lock wire for presence and integrity, a detailed inspection for traces of seepage or black deposits, and an inspection for proper torque) on yellow and blue high pressure manifolds, install new lock wires, and do all applicable corrective actions, in accordance with the instructions of paragraph 4.1.1 of Airbus AOT A330–29A3111, Revision 1, dated October 8, 2009 (for Model A330–200 and –300 series airplanes); or Airbus AOT A340–29A4086, Revision 1, dated October 8,

2009 (for Airbus Model A340–200 and –300 series airplanes). Do all applicable corrective actions before further flight. Accomplishment of the inspection required by paragraph (h)(1) of this AD terminates the requirements of this paragraph.

(A) For airplanes on which Airbus Modification 54491 has been embodied in production: At the later of the times specified in paragraphs (g)(2)(i)(A)(*1*) and (g)(2)(i)(A)(*2*) of this AD.

(*1*) Before the accumulation of 1,000 total flight cycles since first flight but no earlier than the accumulation of 700 total flight cycles since first flight.

(*2*) Within 100 flight cycles or 28 days after December 14, 2009 (the effective date of AD 2009–24–09), whichever occurs first.

(B) For airplanes on which Airbus Service Bulletin A330–29–3101 or Airbus Service Bulletin A340–29–4078 was embodied in service: At the later of the times specified in paragraphs (g)(2)(i)(B)(*1*) and (g)(2)(i)(B)(*2*) of this AD.

(*1*) Within 1,000 flight cycles since the embodiment of Airbus Service Bulletin A330–29–3101 or Airbus Service Bulletin A340–29–4078 but no earlier than 700 flight cycles after the embodiment of Airbus Service Bulletin A330–29–3101 or Airbus Service Bulletin A340–29–4078.

(*2*) Within 100 flight cycles or 28 days after December 14, 2009 (the effective date of AD 2009–24–09), whichever occurs first.

(ii) Within 900 flight hours after accomplishment of paragraph (g)(2)(i) of this AD, do the inspection program (detailed inspection of the lock wire for presence and integrity, a detailed inspection for traces of seepage or black deposits, and an inspection for proper torque) and install a new lock wire on the green high pressure manifold; and do an inspection (detailed inspection for traces of seepage or black deposits, and detailed inspection to determine alignment of the check valve and manifold) on the yellow and blue high pressure manifolds, and do all applicable corrective actions; in accordance with the instructions of paragraph 4.1.2 of Airbus AOT A330–29A3111, Revision 1, dated October 8, 2009 (for Model A330–200 and –300 series airplanes); or Airbus AOT A340–29A4086, Revision 1, dated October 8, 2009 (for Model A340–200 and –300 series airplanes). Do all applicable corrective actions before further flight. Accomplishment of the inspection program required by paragraph (i) of this AD terminates the requirements of this paragraph.

(iii) Within 900 flight hours after accomplishment of paragraph (g)(2)(ii) of this AD, and thereafter at intervals not to exceed 900 flight hours, do the inspection program (detailed inspection for traces of seepage or black deposits, and detailed inspection to determine alignment of the check valve and manifold) on the green, yellow, and blue high pressure manifolds, and do all applicable corrective actions, in accordance with the instructions of paragraph 4.1.3 of Airbus AOT A330–29A3111, Revision 1, dated October 8, 2009 (for Model A330–200 and –300 series airplanes); or Airbus AOT A340–29A4086, Revision 1, dated October 8, 2009 (for Model A340–200 and –300 series airplanes). Do all applicable corrective actions before further flight. Accomplishment of the inspection program required by paragraph (i) of this AD terminates the requirements of this paragraph.

(h) Retained Inspection, With No Changes

This paragraph restates the requirements of paragraph (h) of AD 2013–25–08, with no changes. For airplanes equipped with check valves having P/N CAR400; and for airplanes equipped with check valves having P/N CAR401, except for airplanes on which Airbus Modification 201384 has been embodied during production, or on which Airbus Service Bulletin A330–29–3119 (for Model A330–200, –200F, and –300 series airplanes) or Airbus Service Bulletin A340–29–4091 (for Model A340–200 and –300 series airplanes) has been embodied in service: Within 900 flight hours after January 31, 2014 (the effective date of AD 2013–25–08), inspect the check valves on the blue, green, and yellow hydraulic systems to identify their part numbers, in accordance with the Accomplishment Instructions of Airbus Mandatory Service Bulletin A330–29–3111, Revision 02, dated June 23, 2011 (for Model A330–200, –200F, and –300 series airplanes); or Airbus Mandatory Service Bulletin A340–29–4086, Revision 02, dated June 23, 2011 (for Model A340–200 and –300 series airplanes). Accomplishment of the actions required by this paragraph terminates the requirements specified in paragraphs (g)(1) and (g)(1)(ii) of this AD.

(1) If check valves having P/N CAR401 are installed on all three hydraulic systems: Before further flight, do the inspection program (detailed inspection for red mark presence and alignment integrity of the check valve and manifold, a detailed inspection for traces of seepage or black deposits, and an inspection for proper torque) on yellow and blue high pressure manifolds, and do all applicable corrective actions, in accordance with the Accomplishment Instructions of Airbus Mandatory Service Bulletin A330–29–3111, Revision 02, dated June 23, 2011 (for Model A330–200, –200F, and –300 series airplanes); or Airbus Mandatory Service Bulletin A340–29–4086, Revision 02, dated June 23, 2011 (for Model A340–200 and –300 series airplanes). Accomplishment of the actions required by this paragraph terminates the requirements specified in paragraph (g)(2)(i) of this AD.

(2) If check valves having P/N CAR401 are not installed on all three hydraulic systems, no further action is required by this paragraph until any check valve having P/N CAR400 is replaced with a check valve having P/N CAR401. If any check valve having P/N CAR400 is replaced by a check valve having P/N CAR401: Before further flight after such replacement, do the actions specified in paragraph (h) of this AD, to determine if all three hydraulic systems are equipped with check valves having P/N CAR401. If check valves having P/N CAR401 are installed on all three hydraulic systems: Before further flight, do the actions specified in paragraphs (h)(1) and (i) of this AD.

(i) Retained Repetitive Inspection Program and Corrective Actions, With No Changes

This paragraph restates the requirements of paragraph (i) of AD 2013–25–08, with no changes. Within 900 flight hours after accomplishment of paragraph (h)(1) of this AD, do the inspection program (detailed inspection for red mark presence and alignment integrity of the check valve and manifold, a detailed inspection for traces of seepage or black deposits, and an inspection for proper torque) on the green, yellow, and blue system check valves, and do all applicable corrective actions, in accordance with the Accomplishment Instructions of Airbus Mandatory Service Bulletin A330–29–3111, Revision 02, dated June 23, 2011 (for Model A330–200, –200F, and –300 series airplanes); or Airbus Mandatory Service Bulletin A340–29–4086, Revision 02, dated June 23, 2011 (for Model A340–200 and –300 series airplanes). Do all applicable corrective actions before further flight. Repeat the inspection program thereafter at intervals not to exceed 900 flight hours. Accomplishment of the actions required by this paragraph terminates the requirements specified in paragraphs (g)(1)(i), (g)(2)(ii), and (g)(2)(iii) of this AD.

(j) Retained Repetitive Inspection for Certain Airplanes, With No Changes

This paragraph restates the requirements of paragraph (j) of AD 2013–25–08, with no changes. For airplanes equipped with check valves having P/N CAR401 and on which Airbus Modification 201384 has been embodied during production, or on which Airbus Service Bulletin A330–29–3119 (for Model A330–200, –200F, and –300 series airplanes); or Airbus Service Bulletin A340–29–4091 (for Model A340–200 and –300 series airplanes) has been embodied in service: Within 1,000 flight hours after January 31, 2014 (the effective date of AD 2013–25–08), do a general visual inspection of the green, yellow, and blue high pressure manifolds and check valves having P/N CAR401 for any sign of rotation of the check valve head, and for any signs of hydraulic fluid leakage or seepage (including black deposits), in accordance with the instructions of Airbus Alert Operators Transmission A29L001–12, dated October 11, 2012. Repeat the inspection thereafter at interval not to exceed 900 flight hours.

(k) Retained Corrective Action for Certain Airplanes, With No Changes

This paragraph restates the requirements of paragraph (k) of AD 2013–25–08, with no changes. If, during any inspection required by paragraph (j) of this AD, any sign of rotation of the check valve head is found, or any sign of hydraulic fluid leakage or seepage (including black deposits) is found: Before further flight, do all applicable corrective actions, in accordance with the instructions of Airbus Alert Operators Transmission A29L001–12, dated October 11, 2012.

(l) Retained Provisions Regarding Terminating Action, With No Changes

This paragraph restates the provisions of paragraph (l) of AD 2013–25–08, with no changes. Accomplishment of the corrective actions required by this AD does not constitute terminating action for the repetitive inspections required by this AD.

(m) Retained Replacement Check Valve Torque Value, With No Changes

This paragraph restates the requirements of paragraph (m) of AD 2013–25–08, with no changes. As of January 31, 2014 (the effective date of AD 2013–25–08), at each replacement of a check valve with a check valve having P/N CAR401, apply a torque of 141 to 143 newton meters (N.m) (103.98 to 105.45 pounds-foot (lbf.ft)) during installation.

(n) Retained Credit for Previous Actions, With No Changes

This paragraph restates the provisions of paragraph (n) of AD 2013–25–08, with no changes.

(1) This paragraph provides credit for actions required by paragraph (g)(2)(i) of this AD, if those actions were performed before December 14, 2009 (the effective date of AD 2009–24–09), using the applicable service information specified in paragraphs (n)(1)(i) and (n)(1)(ii) of this AD.

(i) Airbus AOT A330–29A3111, dated September 2, 2009 (for Model A330–200 and –300 series airplanes), which is not incorporated by reference in this AD.

(ii) Airbus AOT A340–29A4086, dated September 2, 2009 (for Model A340–200 and –300 series airplanes), which is not incorporated by reference in this AD.

(2) This paragraph provides credit for actions required by paragraph (h) of this AD, if those actions were performed before January 31, 2014 (the effective date of AD 2013–25–08), using the applicable service information specified in paragraphs (n)(2)(i) through (n)(2)(iv) of this AD.

(i) Airbus AOT A330–29A3111, dated September 2, 2009 (for Model A330–200 and –300 series airplanes), which is not incorporated by reference in this AD.

(ii) Airbus AOT A330–29A3111, Revision 1, dated October 8, 2009 (for Model A330–200 and –300 series airplanes), which is incorporated by reference in this AD.

(iii) Airbus AOT A340–29A4086, dated September 2, 2009 (for Model A340–200 and –300 series airplanes), which is not incorporated by reference in this AD.

(iv) Airbus AOT A340–29A4086, Revision 1, dated October 8, 2009 (for Model A340–200 and –300 series airplanes), which is incorporated by reference in this AD.

(o) Retained Provisions for Reporting, With No Changes

This paragraph restates the provisions of paragraph (o) of AD 2013–25–08, with no changes. Although the service information specified in paragraphs (o)(1) through (o)(5) of this AD specifies to submit certain information to the manufacturer, this AD does not include that requirement.

(1) Airbus Alert Operators Transmission A29L001–12, dated October 11, 2012.

(2) Airbus Mandatory Service Bulletin A330–29–3111, Revision 02, dated June 23, 2011.

(3) Airbus Mandatory Service Bulletin A340–29–4086, Revision 02, dated June 23, 2011.

(4) Airbus AOT A330–29A3111, Revision 1, dated October 8, 2009.

(5) Airbus AOT A340–29A4086, Revision 1, dated October 8, 2009.

(p) New Requirement of This AD: Modify Hydraulic Systems

Within 36 months after the effective date of this AD, modify the green, blue, and yellow high pressure hydraulic manifolds by replacing each check valve having P/N CAR401 with an improved check valve having P/N CAR402, in accordance with the Accomplishment Instructions of Airbus Service Bulletin A330–29–3125, Revision 03, including Appendixes 01 and 02, dated April 8, 2016; or Airbus Service Bulletin A340–29–4096, Revision 02, including Appendixes 01 and 02, dated April 8, 2016; as applicable.

(q) New Provision of This AD: Terminating Action for Repetitive Inspections

Modification of an airplane, as required by paragraph (p) of this AD, constitutes terminating action for the repetitive inspections required by this AD.

(r) New Requirement of This AD: Parts Installation Limitations

(1) For an airplane that, as of the effective date of this AD, has a check valve having P/N CAR401 installed, after modification as required by paragraph (p) of this AD, no person may install a check valve having P/N CAR401, on that airplane.

(2) For an airplane that does not have a check valve having P/N CAR401 installed, as of the effective date of this AD, no person may install a check valve having P/N CAR401, on that airplane.

(s) Credit for Previous Actions

This paragraph provides credit for actions required by paragraph (p) of this AD, if those actions were performed before the effective date of this AD using the applicable service information specified in paragraphs (s)(1) through (s)(5) of this AD, which are not incorporated by reference in this AD.

(1) Airbus Service Bulletin A330–29–3125, dated August 8, 2014.

(2) Airbus Service Bulletin A330–29–3125, Revision 01, including Appendixes 01 and 02, dated July 30, 2015.

(3) Airbus Service Bulletin A330–29–3125, Revision 02, including Appendixes 01 and 02, dated January 21, 2016.

(4) Airbus Service Bulletin A340–29–4096, dated August 8, 2014.

(5) Airbus Service Bulletin A340–29–4096, Revision 01, including Appendixes 01 and 02, dated July 30, 2015.

(t) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the International Branch, send it to ATTN: Vladimir Ulyanov, Aerospace Engineer, International Branch, ANM–116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057–3356; telephone 425–227–1138; fax 425–227–1149. Information may be emailed to: *9-ANM-116-AMOC-REQUESTS@faa.gov.*

(i) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(ii) AMOC ANM–116–14–180 R1, dated February 21, 2014, is approved as an AMOC for the corresponding provisions of this AD.

(iii) AMOC ANM–116–14–429, dated September 25, 2014, is not approved as an AMOC for the corresponding provisions of this AD.

(2) *Contacting the Manufacturer:* As of the effective date of this AD, for any requirement in this AD to obtain corrective actions from a manufacturer, the action must be accomplished using a method approved by the Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA; or the European Aviation Safety Agency (EASA); or Airbus's EASA Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature.

(3) *Required for Compliance (RC):* If any service information contains procedures or tests that are identified as RC, those procedures and tests must be done to comply with this AD; any procedures or tests that are not identified as RC are recommended. Those procedures and tests that are not identified as RC may be deviated from using accepted methods in accordance with the operator's maintenance or inspection program without obtaining approval of an AMOC, provided the procedures and tests identified as RC can be done and the airplane can be put back in an airworthy condition. Any substitutions or changes to procedures or tests identified as RC require approval of an AMOC.

(u) Related Information

(1) Refer to Mandatory Continuing Airworthiness Information (MCAI) EASA Airworthiness Directive 2015–0009, dated January 16, 2015, for related information. This MCAI may be found in the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–3701.

(2) Service information identified in this AD that is not incorporated by reference is available at the addresses specified in paragraphs (v)(6) and (v)(7) of this AD.

(v) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(3) The following service information was approved for IBR on December 27, 2016.

(i) Airbus Service Bulletin A330–29–3125, Revision 03, including Appendixes 01 and 02, dated April 8, 2016.

(ii) Airbus Service Bulletin A340–29–4096, Revision 02, including Appendixes 01 and 02, dated April 8, 2016.

(4) The following service information was approved for IBR on January 31, 2014 (78 FR 78694, December 27, 2013).

(i) Airbus Alert Operators Transmission A29L001–12, dated October 11, 2012.

(ii) Airbus Mandatory Service Bulletin A330–29–3111, Revision 02, dated June 23, 2011.

(iii) Airbus Mandatory Service Bulletin A340–29–4086, Revision 02, dated June 23, 2011.

(5) The following service information was approved for IBR on December 14, 2009 (74 FR 62208, November 27, 2009).

(i) Airbus Alert Operators Telex A330–29A3111, Revision 1, dated October 8, 2009. Only the first page of this document contains the document number, revision level, and date; no other pages of this document contain this information.

(ii) Airbus Alert Operators Telex A340–29A4086, Revision 1, dated October 8, 2009. Only the first page of this document contains the document number, revision level, and date; no other pages of this document contain this information.

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2016–7421; Directorate Identifier 2015–NM–145–AD; Amendment 39–18705; AD 2016–22–16]

RIN 2120–AA64

Airworthiness Directives; Bombardier, Inc. Airplanes

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: We are adopting a new airworthiness directive (AD) for certain Bombardier, Inc. Model CL–600–2C10 (Regional Jet Series 700, 701, and 702), CL–600–2D15 (Regional Jet Series 705), CL–600–2D24 (Regional Jet Series 900), and CL–600–2E25 (Regional Jet Series 1000) airplanes. This AD was prompted by a determination that wear and possible leakage of the high-pressure seal in the cylinder of the No. 3 hydraulic system reservoir could occur and cause high hydraulic fluid temperature and/or prevent the system from reaching normal operating pressure. This AD requires repetitive operational checks for wear and leakage of the high-pressure seal in the cylinder of the reservoir of the No. 3 hydraulic system, and corrective actions if necessary. We are issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective December 27, 2016.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of December 27, 2016.

ADDRESSES: For service information identified in this final rule, contact Bombardier, Inc., 400 Côte Vertu Road West, Dorval, Québec H4S 1Y9, Canada; Widebody Customer Response Center North America toll-free telephone 1–866–538–1247 or direct-dial telephone 1–514–855–2999; fax 514–855–7401; email *ac.yul@aero.bombardier.com*; Internet *http://www.bombardier.com*. You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221. It is also available on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–7421.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–7421; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Office (telephone 800–647–5527) is Docket Management Facility, U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Cesar Gomez, Aerospace Engineer, Airframe and Mechanical Systems Branch, ANE–171, FAA, New York Aircraft Certification Office, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone 516–228–7318; fax 516–794–5531.

SUPPLEMENTARY INFORMATION:

Discussion

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to certain Bombardier, Inc. Model CL–600–2C10 (Regional Jet Series 700, 701, and 702), CL–600–2D15 (Regional Jet Series 705), CL–600–2D24 (Regional Jet Series 900), and CL–600–2E25 (Regional Jet Series 1000) airplanes. The NPRM published in the **Federal Register** on July 1, 2016 (81 FR 43122) (''the NPRM''). The NPRM was prompted by a determination that wear and possible leakage of the high-pressure seal in the cylinder of the No. 3 hydraulic system reservoir could occur and cause high hydraulic fluid temperature and/or prevent the system from reaching normal operating pressure. The NPRM proposed to require repetitive operational checks for wear and leakage of the high-pressure seal in the cylinder of the reservoir of the No. 3 hydraulic system, and corrective actions if necessary. We are issuing this AD to detect and correct wear and leakage of the high-pressure seal in the cylinder of the reservoir of the No. 3 hydraulic system, which can result in high hydraulic fluid temperature. High hydraulic fluid temperature combined with a temperature transducer malfunction could result in un-annunciated overheating of the hydraulic system and consequent ignition sources inside the fuel tank, which, combined with flammable fuel vapors, could result in a fuel tank explosion and consequent loss of the airplane.

Transport Canada Civil Aviation (TCCA), which is the aviation authority for Canada, has issued Canadian Airworthiness Directive CF–2015–27, dated September 14, 2015 (referred to after this as the Mandatory Continuing Airworthiness Information, or ''the MCAI''), to correct an unsafe condition for certain Bombardier, Inc. Model CL–600–2C10 (Regional Jet Series 700, 701, and 702), CL–600–2D15 (Regional Jet Series 705), CL–600–2D24 (Regional Jet Series 900), and CL–600–2E25 (Regional Jet Series 1000) airplanes. The MCAI states:

It was discovered that the high-pressure seal in the cylinder of the No. 3 hydraulic system reservoir with P/N 960450–1 could wear and leak. This can cause high hydraulic fluid temperature and/or prevent the system from reaching normal operating pressure. High hydraulic fluid temperature, in combination with a temperature transducer malfunction, could result in an unannunciated overheat of the hydraulic system that could result in a potential ignition source within the fuel system.

This [Canadian] AD mandates the repetitive operational check of the hydraulic system No. 3 fluid temperature indication as an interim mitigating action.

Required actions include repeating any operational check that fails until the operational check passes. You may examine the MCAI in the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–7421.

Comments

We gave the public the opportunity to participate in developing this AD. We received no comments on the NPRM or on the determination of the cost to the public.

Clarification of Applicability in This AD

Bombardier, Inc. Model CL–600–2D15 airplanes are derivatives of the Model CL–600–2D24 and should have been included in paragraph (c)(2) of the proposed AD. Therefore, Model CL–600–2D15 is added to paragraph (c)(2) of this AD. The serial number range specified in paragraph (c)(2) of the proposed AD remains unchanged.

Clarification of Unsafe Condition

In the SUMMARY and Discussion sections of the NPRM and paragraph (e) of the proposed AD, we specified that the AD was to detect and correct a malfunctioning temperature indication of the No. 3 hydraulic system. However, the operational check is for wear and leakage of the high-pressure seal in the cylinder of the reservoir of the No. 3 hydraulic system, which can result in high hydraulic fluid temperature. We have revised the SUMMARY and Discussion sections of the final rule and paragraph (e) of this AD accordingly.

Conclusion

We reviewed the relevant data and determined that air safety and the public interest require adopting this AD with the change described previously and minor editorial changes. We have determined that these minor changes:

- Are consistent with the intent that was proposed in the NPRM for correcting the unsafe condition; and
- Do not add any additional burden upon the public than was already proposed in the NPRM.

Related Service Information Under 1 CFR Part 51

We reviewed Bombardier Service Bulletin 670BA–29–018, Revision A, dated October 13, 2015. The service information describes procedures for performing an operational check for wear and leakage of the high-pressure seal in the cylinder of the reservoir of the No. 3 hydraulic system. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Costs of Compliance

We estimate that this AD affects 509 airplanes of U.S. registry.

We also estimate that it takes about 1 work-hour per product to comply with the basic requirements of this AD. The average labor rate is $85 per work-hour. Based on these figures, we estimate the cost of this AD on U.S. operators to be $43,265, or $85 per airplane.

We have received no definitive data that enables us to provide a cost estimate for the on-condition actions specified in this AD.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. ''Subtitle VII: Aviation Programs,'' describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in ''Subtitle VII, Part A, Subpart III, Section 44701: General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

1. Is not a ''significant regulatory action'' under Executive Order 12866;
2. Is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979);
3. Will not affect intrastate aviation in Alaska; and
4. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

2016–22–16 Bombardier, Inc.: Amendment 39–18705; Docket No. FAA–2016–7421; Directorate Identifier 2015–NM–145–AD.

(a) Effective Date

This AD is effective December 27, 2016.

(b) Affected ADs

None.

(c) Applicability

This AD applies to the Bombardier, Inc. airplanes identified in paragraph (c)(1), (c)(2), or (c)(3) of this AD, certificated in any category, equipped with No. 3 hydraulic system reservoir having part number 960450–1.

(1) Model CL–600–2C10 (Regional Jet Series 700, 701, and 702) airplanes, having serial numbers 10002 through 10999 inclusive.

(2) Model CL–600–2D15 (Regional Jet Series 705) and CL–600–2D24 (Regional Jet Series 900) airplanes, having serial numbers 15001 through 15990 inclusive.

(3) Model CL–600–2E25 (Regional Jet Series 1000) airplanes, having serial numbers 19001 through 19990 inclusive.

(d) Subject

Air Transport Association (ATA) of America Code 29, Hydraulic power.

(e) Reason

This AD was prompted by a determination that wear and possible leakage of the high-pressure seal in the cylinder of the No. 3 hydraulic system reservoir could occur and cause high hydraulic fluid temperature and/or prevent the system from reaching normal operating pressure. We are issuing this AD to detect and correct wear and leakage of the high-pressure seal in the cylinder of the reservoir of the No. 3 hydraulic system, which can result in high hydraulic fluid temperature. High hydraulic fluid temperature combined with a temperature transducer malfunction could result in un-annunciated overheating of the hydraulic system and consequent ignition sources inside the fuel tank, which, combined with flammable fuel vapors, could result in a fuel tank explosion and consequent loss of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Operational Check and Repair, if Necessary

Within 660 flight hours or 4 months after the effective date of this AD, whichever occurs first: Perform an operational check for wear and leakage of the high-pressure seal in the cylinder of the reservoir of the No. 3 hydraulic system, in accordance with the Accomplishment Instructions of Bombardier Service Bulletin 670BA–29–018, Revision A, dated October 13, 2015. If the operational check fails, before further flight, do applicable corrective actions and repeat the operational check and applicable corrective actions until the operational check passes. Repeat the operational check thereafter at intervals not to exceed 660 flight hours or 4 months, whichever occurs first.

(h) Credit for Previous Actions

This paragraph provides credit for the applicable actions required by paragraph (g) of this AD, if those actions were performed before the effective date of this AD using Bombardier Service Bulletin 670BA–29–018, dated June 25, 2015.

(i) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, New York Aircraft Certification Office (ACO), ANE–170, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. Send information to ATTN: Program Manager, Continuing Operational Safety, FAA, New York ACO, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone 516–228–7300; fax 516–794–5531. Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(2) *Contacting the Manufacturer:* For any requirement in this AD to obtain corrective actions from a manufacturer, the action must be accomplished using a method approved by the Manager, New York ACO, ANE–170, FAA; or Transport Canada Civil Aviation (TCCA); or Bombardier, Inc.'s TCCA Design Approval Organization (DAO). If approved by the DAO, the approval must include the DAO-authorized signature.

(j) Related Information

(1) Refer to Mandatory Continuing Airworthiness Information (MCAI) Canadian Airworthiness Directive CF–2015–27, dated September 14, 2015, for related information. This MCAI may be found in the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–7421.

(2) Service information identified in this AD that is not incorporated by reference is available at the addresses specified in paragraphs (k)(3) and (k)(4) of this AD.

(k) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(i) Bombardier Service Bulletin 670BA–29–018, Revision A, dated October 13, 2015.

(ii) Reserved.

(3) For service information identified in this AD, contact Bombardier, Inc., 400 Côte Vertu Road West, Dorval, Québec H4S 1Y9, Canada; Widebody Customer Response Center North America toll-free telephone 1 866 538 1247 or direct-dial telephone 1 514 855 2999; fax 514 855–7401; email *ac.yul@aero.bombardier.com;* Internet *http://www.bombardier.com.*

(4) You may view this service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221.

(5) You may view this service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030, or go to: *http://www.archives.gov/federal-register/cfr/ibr-locations.html.*

Issued in Renton, Washington, on October 25, 2016.

Dionne Palermo,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2016–9103; Directorate Identifier 2016–NE–18–AD; Amendment 39–18711; AD 2016–23–04]

RIN 2120–AA64

Airworthiness Directives; BRP-Powertrain GmbH & Co KG Reciprocating Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; request for comments.

SUMMARY: We are adopting a new airworthiness directive (AD) for certain BRP-Powertrain GmbH & Co KG Rotax 912 F2, 912 F3, 912 F4, 912 S2, 912 S3, 912 S4, 914 F2, 914 F3, and 914 F4 reciprocating engines. This AD requires replacement of any affected carburetor float with a float that is eligible for installation. This AD was prompted by a report of a quality escape in the manufacturing of the affected floats. We are issuing this AD to prevent failure of the carburetor float, failure of the engine, in-flight shutdown, and loss of the airplane.

DATES: This AD becomes effective December 7, 2016.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of December 7, 2016.

We must receive comments on this AD by January 6, 2017.

ADDRESSES: You may send comments by any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Mail:* U.S. Department of Transportation, 1200 New Jersey Avenue SE., West Building Ground Floor, Room W12–140, Washington, DC 20590–0001.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.
- *Fax:* 202–493–2251.

For service information identified in this AD, contact BRP-Powertrain GmbH & Co KG, Rotaxstrasse 1, A–4623 Gunskirchen, Austria; phone: +43 7246 6010; fax: +43 7246 601 9130; email: *airworthiness@brp.com;* Internet: *http://www.FLYROTAX.com.* You may view this service information at the FAA, Engine & Propeller Directorate, 1200 District Avenue, Burlington, MA 01803. For information on the availability of

this material at the FAA, call 781–238–7125. It is also available on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–9103.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–9103; or in person at the Docket Operations office between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the mandatory continuing airworthiness information (MCAI), regulatory evaluation, any comments received, and other information. The address for the Docket Office (phone: 800–647–5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Michael Richardson-Bach, Aerospace Engineer, Engine Certification Office, FAA, Engine & Propeller Directorate, 1200 District Avenue, Burlington, MA 01803; phone: 781–238–7747; fax: 781–238–7199; email: *michael.richardson-bach@faa.gov.*

SUPPLEMENTARY INFORMATION:

Comments Invited

This AD is a final rule that involves requirements affecting flight safety, and we did not precede it by notice and opportunity for public comment. We invite you to send any written relevant data, views, or arguments about this AD. Send your comments to an address listed under the **ADDRESSES** section. Include ''Docket No. FAA–2016–9103; Directorate Identifier 2016–NE–18–AD'' at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this AD. We will consider all comments received by the closing date and may amend this AD because of those comments.

We will post all comments we receive, without change, to *http://www.regulations.gov,* including any personal information you provide. We will also post a report summarizing each substantive verbal contact with FAA personnel concerning this AD.

Discussion

The European Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Community, has issued EASA AD 2016–0144, dated July 19, 2016 (corrected July 25, 2016) (referred to hereinafter as ''the MCAI''), to correct an unsafe condition for the specified products. The MCAI states:

> Due to a quality escape in the manufacturing process of certain floats, Part Number (P/N) 861185, a partial separation of the float outer skin may occur during engine operations. Separated particles could lead to a restriction of the jets in the carburetor, possibly reducing or blocking the fuel supply to the affected cylinder.
>
> This condition, if not detected and corrected, could lead to in-flight engine shutdown and forced landing, possibly resulting in damage to the aeroplane and injury to the occupants.

You may obtain further information by examining the MCAI in the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–9103.

Related Service Information Under 1 CFR Part 51

BRP-Powertrain GmbH & Co KG has issued Alert Service Bulletin ASB–912–069R1/ASB–914–051R1 (one document), Revision 1, dated July 22, 2016. The service information describes procedures for removal and replacement of the carburetor float. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

FAA's Determination and Requirements of This AD

This product has been approved by the aviation authority of Austria, and is approved for operation in the United States. Pursuant to our bilateral agreement with the European Community, EASA has notified us of the unsafe condition described in the MCAI and service information referenced above. We are issuing this AD because we evaluated all information provided by EASA and determined the unsafe condition exists and is likely to exist or develop on other products of the same type design. This AD requires removal and replacement of the affected carburetor float.

FAA's Determination of the Effective Date

No domestic operators use this product. Therefore, we find that notice and opportunity for prior public comment are unnecessary and that good cause exists for making this amendment effective in less than 30 days.

Costs of Compliance

We estimate that this AD affects 0 engines installed on aircraft of U.S. registry. We also estimate that it will take about 4 hours per engine to search maintenance records, disassemble the carburetor, and replace the float. The average labor rate is $85 per hour. Based on these figures, we estimate the cost of this AD on U.S. operators to be $0.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. ''Subtitle VII: Aviation Programs,'' describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in ''Subtitle VII, Part A, Subpart III, Section 44701: General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979),

(3) Will not affect intrastate aviation in Alaska to the extent that it justifies making a regulatory distinction, and

(4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

2016–23–04 BRP-Powertrain GmbH & Co KG (formerly BRP-Rotax GmbH & Co KG, Bombardier-Rotax GmbH & Co. KG, and Bombardier-Rotax GmbH): Amendment 39–18711; Docket No. FAA–2016–9103; Directorate Identifier 2016–NE–18–AD.

(a) Effective Date

This AD is effective December 7, 2016.

(b) Affected ADs

None.

(c) Applicability

This AD applies to BRP-Powertrain GmbH & Co KG Rotax model 912 F2, 912 F3, 912 F4, 912 S2, 912 S3, and 912 S4 engines, and Rotax 914 F2, 914 F3, and 914 F4 engines with:

(1) Engine serial numbers (S/Ns) listed in Planning Information, Paragraph 1, Criterion A, of BRP-Powertrain GmbH & Co KG Alert Service Bulletin (ASB) ASB–912–069R1/ASB–914–051R1 (one document), Revision 1, dated July 22, 2016.

(2) Carburetor part numbers (P/Ns) and S/Ns listed in Planning Information, Paragraph 1, Criterion B, of BRP-Powertrain GmbH & Co KG ASB ASB–912–069R1/ASB–914–051R1 (one document), Revision 1, dated July 22, 2016; or

(3) Carburetor floats, P/N 861185, that do not have 3 dots molded on the surface, and installed after May 9, 2016.

(d) Reason

This AD was prompted by a report of a quality escape in the manufacturing of the affected carburetor floats. We are issuing this AD to prevent failure of the carburetor float, failure of the engine, in-flight shutdown, and loss of the airplane.

(e) Actions and Compliance

Comply with this AD within the compliance times specified, unless already done.

(1) Within 25 flight hours (FHs) or 30 days after the effective date of this AD, replace any affected carburetor float with a float that is eligible for installation in accordance with the Accomplishment Instructions, Paragraph 3, of BRP-Powertrain GmbH & Co KG Rotax ASB ASB–912–069R1/ASB–914–051R1 (one document), Revision 1, dated July 22, 2016.

(2) After the effective date of this AD, do not install on any engine a carburetor float, P/N 861185, delivered between May 8, 2016, and July 17, 2016, that does not have 3 dots molded into the surface. If the delivery date is not documented, do not install the part.

(f) Alternative Methods of Compliance (AMOCs)

The Manager, Engine Certification Office, FAA, may approve AMOCs for this AD. Use the procedures found in 14 CFR 39.19 to make your request. You may email your request to: *ANE-AD-AMOC@faa.gov.*

(g) Related Information

(1) For more information about this AD, contact Michael Richardson-Bach, Aerospace Engineer, Engine Certification Office, FAA, Engine & Propeller Directorate, 1200 District Avenue, Burlington, MA 01803; phone: 781–238–7747; fax: 781–238–7199; email: *michael.richardson-bach@faa.gov.*

(2) Refer to MCAI European Aviation Safety Agency AD 2016–0144, dated July 19, 2016 (corrected July 25, 2016), for more information. You may examine the MCAI in the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating it in Docket No. FAA–2016–9103.

(h) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(i) BRP-Powertrain GmbH & Co KG Alert Service Bulletin ASB–912–069R1/ASB–914–051R1 (one document), Revision 1, dated July 22, 2016.

(ii) Reserved.

(3) For BRP-Powertrain GmbH & Co KG service information identified in this AD, contact BRP-Powertrain GmbH & Co KG, Rotaxstrasse 1, A–4623 Gunskirchen, Austria; phone: +43 7246 6010; fax: +43 7246 601 9130; email: *airworthiness@brp.com;* Internet: *http://www.FLYROTAX.com.*

(4) You may view this service information at FAA, Engine & Propeller Directorate, 1200 District Avenue, Burlington, MA 01803. For information on the availability of this material at the FAA, call 781–238–7125.

(5) You may view this service information at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030, or go to: *http://www.archives.gov/federal-register/cfr/ibr-locations.html.*

Issued in Burlington, Massachusetts, on November 7, 2016.

Ann C. Mollica,

Acting Directorate Manager, Engine & Propeller Directorate, Aircraft Certification Service.

RIN 2120–AA64

Airworthiness Directives; The Boeing Company Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: We are adopting a new airworthiness directive (AD) for all The Boeing Company Model 737–600, –700, –700C, –800, –900, and –900ER series airplanes. This AD was prompted by an evaluation by the design approval holder (DAH) indicating that lap splices for certain stringers are subject to widespread fatigue damage (WFD). This AD requires repetitive inspections for cracking in the lower fastener row of the lap splices of certain stringers, and repair if necessary. We are issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective December 27, 2016.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of December 27, 2016.

ADDRESSES: For service information identified in this final rule, contact Boeing Commercial Airplanes, Attention: Contractual & Data Services (C&DS), 2600 Westminster Blvd., MC 110–SK57, Seal Beach, CA 90740; telephone 562–797–1717; Internet *https://www.myboeingfleet.com.* You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221. It is also available on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–5034.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–5034; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the regulatory evaluation, any comments received, and

other information. The address for the Docket Office (phone: 800–647–5527) is Docket Management Facility, U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT:

Gaetano Settineri, Aerospace Engineer, Airframe Branch, ANM–120S, FAA, Seattle Aircraft Certification Office (ACO), 1601 Lind Avenue SW., Renton, WA 98057–3356; phone: 425–917–6577; fax: 425–917–6590; email: *gaetano.settineri@faa.gov.*

SUPPLEMENTARY INFORMATION:

Discussion

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to all The Boeing Company Model 737–600, –700, –700C, –800, –900, and –900ER series airplanes. The NPRM published in the **Federal Register** on March 29, 2016 (81 FR 17415) (''the NPRM''). The NPRM was prompted by an evaluation by the DAH indicating that the S–14L and S–14R lap splices are subject to WFD. The NPRM proposed to require repetitive low frequency eddy current inspections for cracking in the lower fastener row of the S–14L and S–14R lap splices, and repair if necessary. We are issuing this AD to detect and correct widespread cracking in the S–14L and S–14R lap splices that could rapidly link up and result in possible rapid decompression and reduced structural integrity of the airplane.

Comments

We gave the public the opportunity to participate in developing this AD. The following presents the comments received on the NPRM and the FAA's response to each comment.

Support for the NPRM

Boeing and a commenter, Jordan Ibsen, supported the content of the NPRM.

Effect of Winglets on Accomplishment of the Proposed Actions

Aviation Partners Boeing stated that accomplishing the supplemental type certificate (STC) ST00830SE does not affect compliance with the actions specified in the NPRM.

We agree with the commenter. We have redesignated paragraph (c) of the NPRM as (c)(1) and added a new paragraph (c)(2) to this final rule to state that installation of STC ST00830SE does not affect the ability to accomplish the actions required by this final rule. Therefore, for airplanes on which STC ST00830SE is installed, a ''change in product'' Alternative Method of Compliance (AMOC) approval request is not necessary to comply with the requirements of 14 CFR 39.17.

Request To Revise Compliance Time

The European Aviation Safety Agency (EASA) noted that Boeing Alert Service Bulletin 737–53A1352, dated October 2, 2015, specifies that the existing 737–600/700/800/900 Maintenance Planning Document (MPD), Section 9, Airworthiness Limitation Instruction (ALI) Inspection Program, is not sufficient to prevent WFD in the S–14L and S–14R lap splice, lower fastener rows, between station (STA) 360–540 and STA 727–887, as the airplane ages. EASA added that this service information specifies inspections at principal structural elements (PSEs) 53–30–04–6, 53–30–04–6a, 53–60–04–6 and 53–60–04–6a before accumulating 54,000 total flight cycles. However, EASA noted that 737–600/700/800/900 MPD, Section 9, C626AOO 1–CMR Table 9–2, Revision August 2012, requires doing the inspections before accumulating 50,000 flight cycles; which contradicts the initial statement that the ALI inspection program is not sufficient to preclude WFD. EASA concluded that if the current ALI is not sufficient to preclude WFD, then the 50,000 flight cycles should be reduced, rather than increased to 54,000 flight cycles.

We infer the commenter is requesting that we reduce the 54,000 flight-cycle compliance time specified in Boeing Alert Service Bulletin 737–53A1352, Revision 1, dated March 10, 2016 (which is the appropriate source of service information for accomplishing the required actions in this AD). We do not agree with the request to reduce the compliance time. However, we do agree to clarify the WFD analysis. Boeing uses a different methodology than the standard damage tolerance analysis for evaluating structure that is susceptible to WFD. This methodology can sometimes produce a longer initial inspection threshold than the baseline maintenance program, but requires more frequent repetitive inspections, as in the case of the S–14L and S–14R lap splices. Although, for certain airplanes, the initial WFD threshold specified in Boeing Alert Service Bulletin 737–53A1352, Revision 1, dated March 10, 2016, is 4,000 flight cycles more than the ALI threshold; the repetitive inspection interval is reduced by 6,000 flight cycles.

Operators are still required to accomplish the ALI inspections in accordance with 14 CFR 91.403(c). However, if the inspections specified in Boeing Alert Service Bulletin 737–53A1352, Revision 1, dated March 10, 2016, and the ALI inspections overlap (same location, inspection detail, and technique) then the more restrictive of the two programs satisfies both requirements. Since a specific revision of the ALI inspections are required by AD 2013–19–23, Amendment 39–17605 (78 FR 61173, October 3, 2013), Boeing Alert Service Bulletin 737–53A1352, Revision 1, dated March 10, 2016, contains an approved AMOC to AD 2013–19–23, for certain PSEs, after the initial inspections in that service bulletin are accomplished. We have not changed this AD in this regard.

Request for Clarification of Extent of Boeing Organization Designation Authorization (ODA)

Southwest Airlines (SWA) asked for clarification that the Boeing ODA identified in paragraph (i)(3) of the proposed AD can provide an AMOC for any ''repair, modification, or alteration'' that includes the authority to approve existing repairs in the inspection area that inhibit accomplishment of the AD requirements as terminating action to paragraph (g) of the proposed AD. SWA also asked if the ODA has the authority to provide alternative inspection procedures for repaired areas where the inspection in paragraph (g) of the proposed AD cannot be accomplished. Additionally, SWA asked that we clarify that the Boeing ODA identified in paragraph (i)(3) of the proposed AD is able to issue an AMOC for an existing repair at the S–14 lap joint (where the location of the repair inhibits accomplishing the initial inspection), provided the repair was approved by any FAA designation authority and there are a minimum of three fastener rows above and below the lap joint. SWA stated that neither Boeing Alert Service Bulletin 737–53A1352, dated October 2, 2015, nor the NPRM clearly state how to address existing repairs that prevent accomplishment of the inspections specified in paragraph (g) of the proposed AD.

We agree with the commenter that clarification of the extent of the authority of the Boeing ODA is necessary. The Boeing ODA includes the authority to evaluate existing repairs and provide alternative inspection programs in the repaired area, and includes approval of alternative inspections as AMOCs if accomplishment of the inspections required by paragraph (g) of this AD is inhibited. We have not changed this AD in this regard.

We infer that SWA is asking if the Boeing ODA can issue a global AMOC for the referenced repair. The Boeing ODA does not have that authority. We have not received any information from Boeing that defines such a repair that would be considered for a global AMOC. If Boeing provides supporting data, we will evaluate the data to determine if that repair and any associated inspections provide an acceptable level of safety. We have not changed this AD in this regard.

Change to This AD

We have reviewed Boeing Alert Service Bulletin 737–53A1352, Revision 1, dated March 10, 2016, and there are no substantial changes. Therefore, we have included Boeing Alert Service Bulletin 737–53A1352, Revision 1, dated March 10, 2016, as the appropriate source of service information for accomplishing in the actions required by paragraph (g) of this AD. We have also added a new paragraph (h) to this AD to provide credit for actions done prior to the effective date of this AD using Boeing Alert Service Bulletin 737–53A1352, dated October 2, 2015. We have redesignated subsequent paragraphs accordingly.

Conclusion

We reviewed the relevant data, considered the comments received, and determined that air safety and the public interest require adopting this AD with the changes described previously and minor editorial changes. We have determined that these minor changes:

- Are consistent with the intent that was proposed in the NPRM for correcting the unsafe condition; and
- Do not add any additional burden upon the public than was already proposed in the NPRM.

We also determined that these changes will not increase the economic burden on any operator or increase the scope of this AD.

Related Service Information Under 1 CFR Part 51

We reviewed Boeing Alert Service Bulletin 737–53A1352, Revision 1, dated March 10, 2016. The service information describes procedures for low frequency eddy current inspections and repair for cracking in the lower fastener row of the S–14L and S–14R lap splices. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Costs of Compliance

We estimate that this AD affects 1,513 airplanes of U.S. registry. We estimate the following costs to comply with this AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Inspection for Group 1 airplanes (1,471 airplanes).	84 work-hours × $85 per hour = $7,140 per inspection cycle.	$0	$7,140 per inspection cycle.	$10,502,940 per inspection cycle.
Inspection for Group 2 airplanes (42 airplanes).	65 work-hours × $85 per hour = $5,525 per inspection cycle.	0	$5,525 per inspection cycle.	$232,050 per inspection cycle.

We have received no definitive data that enables us to provide cost estimates for the on-condition actions specified in this AD.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: "General requirements." Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a "significant regulatory action" under Executive Order 12866,

(2) Is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979),

(3) Will not affect intrastate aviation in Alaska, and

(4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

2016–22–13 The Boeing Company: Amendment 39–18702; Docket No. FAA–2016–5034; Directorate Identifier 2015–NM–172–AD.

(a) Effective Date

This AD is effective December 27, 2016.

(b) Affected ADs

None.

(c) Applicability

(1) This AD applies to all The Boeing Company Model 737–600, –700, –700C, –800, –900, and –900ER series airplanes, certificated in any category.

(2) Installation of Supplemental Type Certificate (STC) ST00830SE (*http://rgl.faa.gov/Regulatory_and_Guidance_Library/rgSTC.nsf/0/38B606833BBD98B386257FAA00602538?OpenDocument&Highlight=st00830se*) does not affect the ability to accomplish the actions required by this AD. Therefore, for airplanes on which STC

ST00830SE is installed, a "change in product" alternative method of compliance (AMOC) approval request is not necessary to comply with the requirements of 14 CFR 39.17.

(d) Subject

Air Transport Association (ATA) of America Code 53, Fuselage.

(e) Unsafe Condition

This AD was prompted by an evaluation by the design approval holder (DAH) indicating that the stringer (S)–14L and S–14R lap splices are subject to widespread fatigue damage (WFD). We are issuing this AD to detect and correct widespread cracking in the S–14L and S–14R lap splices that could rapidly link up and result in possible rapid decompression and reduced structural integrity of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Repetitive Inspections

At the applicable compliance time specified in paragraph 1.E., "Compliance," of Boeing Alert Service Bulletin 737–53A1352, Revision 1, dated March 10, 2016, do a low frequency eddy current inspection for cracking of the lower fastener row of S–14L and S–14R lap splices, in accordance with the Accomplishment Instructions of Boeing Alert Service Bulletin 737–53A1352, Revision 1, dated March 10, 2016. Repeat the inspection thereafter at the applicable times specified in paragraph 1.E., "Compliance," of Boeing Alert Service Bulletin 737–53A1352, Revision 1, dated March 10, 2016. If any cracking is found, before further flight, repair using a method approved in accordance with the procedures specified in paragraph (i) of this AD.

(h) Credit for Previous Actions

This paragraph provides credit for the actions required by paragraph (g) of this AD, if those actions were performed before the effective date of this AD using Boeing Alert Service Bulletin 737–53A1352, dated October 2, 2015.

(i) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Seattle Aircraft Certification Office (ACO), FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the ACO, send it to the attention of the person identified in paragraph (j) of this AD. Information may be emailed to: *9-ANM-Seattle-ACO-AMOC-Requests@faa.gov.*

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(3) An AMOC that provides an acceptable level of safety may be used for any repair, modification, or alteration required by this AD if it is approved by the Boeing Commercial Airplanes Organization Designation Authorization (ODA) that has been authorized by the Manager, Seattle ACO, to make those findings. To be approved, the repair method, modification deviation, or alteration deviation must meet the certification basis of the airplane, and the approval must specifically refer to this AD.

(4) For service information that contains steps that are labeled as Required for Compliance (RC), the provisions of paragraphs (i)(4)(i) and (i)(4)(ii) of this AD apply.

(i) The steps labeled as RC, including substeps under an RC step and any figures identified in an RC step, must be done to comply with the AD. If a step or substep is labeled "RC Exempt," then the RC requirement is removed from that step or substep. An AMOC is required for any deviations to RC steps, including substeps and identified figures.

(ii) Steps not labeled as RC may be deviated from using accepted methods in accordance with the operator's maintenance or inspection program without obtaining approval of an AMOC, provided the RC steps, including substeps and identified figures, can still be done as specified, and the airplane can be put back in an airworthy condition.

(j) Related Information

For more information about this AD, contact Gaetano Settineri, Aerospace Engineer, Airframe Branch, ANM–120S, FAA, Seattle ACO, 1601 Lind Avenue SW., Renton, WA 98057–3356; phone: 425–917–6577; fax: 425–917–6590; email: *gaetano.settineri@faa.gov.*

(k) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(i) Boeing Alert Service Bulletin 737–53A1352, Revision 1, dated March 10, 2016.

(ii) Reserved.

(3) For service information identified in this AD, contact Boeing Commercial Airplanes, Attention: Contractual & Data Services (C&DS), 2600 Westminster Blvd., MC 110–SK57, Seal Beach, CA 90740; telephone 562–797–1717; Internet *https://www.myboeingfleet.com.*

(4) You may view this service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221.

(5) You may view this service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030, or go to: *http://www.archives.gov/federal-register/cfr/ibr-locations.html.*

Issued in Renton, Washington, on October 21, 2016.

Michael Kaszycki,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

RIN 2120–AA64

Airworthiness Directives; Various Restricted Category Helicopters

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: We are adopting a new airworthiness directive (AD) for various restricted category helicopters. This AD requires cleaning and visually inspecting certain main rotor (M/R) blades and, depending on the outcome of the inspections, repairing or replacing the M/R blades. This AD was prompted by a report of an M/R blade with multiple fatigue cracks around the blade retention bolt hole. The actions are intended to detect a crack in the M/R blade, and prevent failure of the M/R blade and subsequent loss of helicopter control.

DATES: This AD is effective December 27, 2016.

ADDRESSES: For service information identified in this final rule, contact Bell Helicopter Textron, Inc., P.O. Box 482, Fort Worth, TX 76101; telephone (817) 280–3391; fax (817) 280–6466; or at *http://www.bellcustomer.com/files/.* You may review a copy of the referenced service information at the FAA, Office of the Regional Counsel, Southwest Region, 10101 Hillwood Pkwy, Room 6N–321, Fort Worth, TX 76177.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2015–3820; or in person at the Docket Operations Office between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the economic evaluation, any comments received, and other information. The street address for

the Docket Operations Office (phone: 800–647–5527) is U.S. Department of Transportation, Docket Operations Office, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Charles Harrison, Project Manager, Fort Worth Aircraft Certification Office, 10101 Hillwood Pkwy., Fort Worth, Texas 76177; telephone 817–222–5140; email *Charles.C.Harrison@faa.gov.*

SUPPLEMENTARY INFORMATION:

Discussion

On April 11, 2016, at 81 FR 21288, the **Federal Register** published our notice of proposed rulemaking (NPRM), which proposed to amend 14 CFR part 39 by adding an AD that would apply to Model TH–1F, UH–1B, UH–1F, UH–1H, and UH–1P helicopters with a M/R blade, part number 204–011–250–005 or 204–011–250–113, installed. The NPRM proposed to require repetitively cleaning and visually inspecting the M/R blades for a crack, corrosion, an edge void, loose or damaged adhesion, and an edge delamination. Depending on the outcome of the inspections, the NPRM proposed repairing or replacing the M/R blades. The actions in the NPRM were prompted by a Bell Helicopter Textron Inc. evaluation of an M/R blade installed on a Model UH–1H helicopter that had multiple fatigue cracks around the blade retention bolt hole. The cracks resulted from a void between the lower grip plate and the grip pad. A ''substantial'' void also was found at the outboard doubler tip on the lower blade surface. A different part-numbered M/R blade of the same type installed on the Model UH–1H helicopter may also be installed on Model TH–1F, UH–1B, UH–1F, and UH–1P helicopters.

These actions are intended to detect a crack in an M/R blade, and prevent failure of the M/R blade, and subsequent loss of helicopter control.

Comments

We gave the public the opportunity to participate in developing this AD, but we received no comments on the NPRM (81 FR 21288, April 11, 2016).

FAA's Determination

We have reviewed the relevant information and determined that an unsafe condition exists and is likely to exist or develop on other products of these same type designs and that air safety and the public interest require adopting the AD requirements as proposed.

Related Service Information

Bell Helicopter issued Alert Service Bulletin (ASB) No. UH–1H–13–09, dated January 14, 2013, for the Model UH–1H helicopter. ASB No. UH–1H–13–09 specifies a one-time visual inspection, within 10 hours time-in-service (TIS), of the lower grip pad and upper and lower grip plates for cracks, edge voids, and loose or damaged adhesive squeeze-out. ASB No. UH–1H–13–09 also specifies a repetitive and more detailed visual inspection, daily and at every 150 hours TIS, of the lower grip pad, upper and lower grip plates, and all upper and the lower doublers for cracks, corrosion, edge voids, and loose or damaged adhesive squeeze-out.

Bell Helicopter Textron also issued ASB No. 204–75–1 for Model 204B helicopters and ASB No. 205–75–5 for Model 205A–1 helicopters, both Revision C and both dated April 25, 1979. ASB No. 204–75–1 and ASB No. 205–75–5 call for visually inspecting the M/R blades during each daily inspection and repetitively washing the blades and applying WD–40. ASB No. 204–75–1 and ASB No. 205–75–5 also provide instructions for repetitively inspecting the blades every 1,000 hours of operation or every 12 months, whichever occurs first, or within 150 hours or 30 days, whichever occurs first, if the blades have more 1,000 hours of operation or have been in service more than 12 months. While ASB No. 204–75–1 and ASB No. 205–75–5 do not apply to the helicopters that are the subject of this AD, they do apply to the affected M/R blades.

Differences Between This AD and the Service Information

ASB No. UH–1H–13–09 specifies a one-time inspection and then a second repetitive inspection daily and at every 150 hours TIS, and ASB No. 204–75–1 and ASB 205–75–5 call for visually inspecting the M/R blades daily and every 1,000 hours TIS or 12 months, whichever occurs first. This AD requires all inspections at intervals not to exceed 25 hours TIS or two weeks, whichever occurs first. This AD contains more detailed inspection requirements and a more specific inspection area than the instructions in ASB No. UH–1H–13–09. Lastly, ASB No. UH–1H–13–09 applies to Model UH–1H helicopters with M/R blade P/N 204–011–250–113, ASB No. 204–75–1 applies to Model 204B helicopters with M/R blade P/N 204–011–250 (all dash numbers), and ASB No. 205–75–5 applies to Model 205A–1 helicopters with M/R blade P/N 204–011–250 (all dash numbers). This AD applies to Model TH–1F, UH–1B, UH–1F, UH–1H, and UH–1P helicopters with M/R blade P/N 204–011–250–005 or 204–011–250–113.

Costs of Compliance

We estimate that this AD affects 607 helicopters of U.S. Registry and that labor costs average $85 a work-hour. Based on these estimates, we expect the following costs:

- Cleaning and performing all inspections of a set of M/R blades (2 per helicopter) requires a total of ½ work-hour. No parts are needed. At an estimated 24 inspections a year, the cost would be $1,032 per helicopter and $626,424 for the U.S. fleet.
- Replacing an M/R blade requires 12 work hours while parts cost $90,656, for a total cost of $91,676 per blade.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: ''General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866;

(2) Is not a ''significant rule'' under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979);

(3) Will not affect intrastate aviation in Alaska to the extent that it justifies making a regulatory distinction; and

(4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities

under the criteria of the Regulatory Flexibility Act.

We prepared an economic evaluation of the estimated costs to comply with this AD and placed it in the AD docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

2016–23–09 Various Restricted Category Helicopters: Amendment 39–18716; Docket No. FAA–2015–3820; Directorate Identifier 2014–SW–024–AD.

(a) Applicability

This AD applies to Model TH–1F, UH–1B, UH–1F, UH–1H, and UH–1P helicopters with a main rotor (M/R) blade, part number 204–011–250–005 or 204–011–250–113, installed.

(b) Unsafe Condition

This AD defines the unsafe condition as a crack in an M/R blade, which could result in failure of the M/R blade and subsequent loss of helicopter control.

(c) Effective Date

This AD becomes effective December 27, 2016.

(d) Compliance

You are responsible for performing each action required by this AD within the specified compliance time unless it has already been accomplished prior to that time.

(e) Required Actions

(1) Within 25 hours time-in-service (TIS) or 2 weeks, whichever occurs first, and thereafter at intervals not to exceed 25 hours TIS or 2 weeks, whichever occurs first, clean the upper and lower exposed surfaces of each M/R blade from an area starting at the butt end of the blade to three inches outboard of the doublers. Using a 3X or higher power magnifying glass and a light, inspect as follows:

(i) Visually inspect the exposed area of the lower grip pad and upper and lower grip plates of each M/R blade for a crack and any corrosion.

(ii) On the upper and lower exposed surfaces of each M/R blade from blade stations 24.5 to 35 for the entire chord width, visually inspect each layered doubler and blade skin for a crack and any corrosion. Pay particular attention for any cracking in a doubler or skin near or at the same blade station as the blade retention bolt hole (blade station 28).

(iii) Visually inspect the exposed areas of each bond line at the edges of the lower grip pad, upper and lower grip plates, and each layered doubler (bond lines) on the upper and lower surfaces of each M/R blade for the entire length and chord width for an edge void, any corrosion, loose or damaged adhesive squeeze-out, and an edge delamination. Pay particular attention to any crack in the paint finish that follows the outline of a grip pad, grip plate, or doubler, and to any loose or damaged adhesive squeeze-out, as these may be the indication of an edge void.

(2) If there is a crack, any corrosion, an edge void, loose or damaged adhesive squeeze-out, or an edge delamination during any inspection in paragraph (e)(1) of this AD, before further flight, do the following:

(i) If there is a crack in a grip pad or any grip plate or doubler, replace the M/R blade with an airworthy M/R blade.

(ii) If there is a crack in the M/R blade skin that is within maximum repair damage limits, repair the M/R blade. If the crack exceeds maximum repair damage limits, replace the M/R blade with an airworthy M/R blade.

(iii) If there is any corrosion within maximum repair damage limits, repair the M/R blade. If the corrosion exceeds maximum repair damage limits, replace the M/R blade with an airworthy M/R blade.

(iv) If there is an edge void in the grip pad or in a grip plate or doubler, determine the length and depth using a feeler gauge. Repair the M/R blade if the edge void is within maximum repair damage limits, or replace the M/R blade with an airworthy M/R blade.

(v) If there is an edge void in a grip plate or doubler near the outboard tip, tap inspect the affected area to determine the size and shape of the void. Repair the M/R blade if the edge void is within maximum repair damage limits, or replace the M/R blade with an airworthy M/R blade.

(vi) If there is any loose or damaged adhesive squeeze-out along any of the bond lines, trim or scrape away the adhesive without damaging the adjacent surfaces or parent material of the M/R blade. Determine if there is an edge void or any corrosion by lightly sanding the trimmed area smooth using 280 or finer grit paper. If there is no edge void or corrosion, refinish the sanded area.

(vii) If there is an edge delamination along any of the bond lines or a crack in the paint finish, determine if there is an edge void or a crack in the grip pad, grip plate, doubler, or skin by removing paint from the affected area by lightly sanding in a span-wise direction using 180–220 grit paper. If there are no edge voids and no cracks, refinish the sanded area.

(viii) If any parent material is removed during any sanding or trimming in paragraphs (e)(2)(vi) or (e)(2)(vii) of this AD, repair the M/R blade if the damage is within maximum repair damage limits, or replace the M/R blade with an airworthy M/R blade.

(f) Special Flight Permits

Special flight permits are prohibited.

(g) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Rotorcraft Certification Office, FAA, may approve AMOCs for this AD. Send your proposal to: Charles Harrison, Project Manager, Fort Worth Aircraft Certification Office, 10101 Hillwood Pkwy., Fort Worth, Texas 76177; telephone 817–222–5140; email *9-ASW-FTW-AMOC-Requests@faa.gov.*

(2) For operations conducted under a 14 CFR part 119 operating certificate or under 14 CFR part 91, subpart K, we suggest that you notify your principal inspector, or lacking a principal inspector, the manager of the local flight standards district office or certificate holding district office before operating any aircraft complying with this AD through an AMOC.

(h) Additional Information

Bell Helicopter Alert Service Bulletin (ASB) No. UH–1H–13–09, dated January 14, 2013, and Bell Helicopter Textron ASB No. 204–75–1 and ASB 205–75–5, both Revision C and both dated April 25, 1979, which are not incorporated by reference, contain additional information about the subject of this final rule. For service information identified in this final rule, contact Bell Helicopter Textron, Inc., P.O. Box 482, Fort Worth, TX 76101; telephone (817) 280–3391; fax (817) 280–6466; or at *http://www.bellcustomer.com/files/.* You may review a copy of this service information at the FAA, Office of the Regional Counsel, Southwest Region, 10101 Hillwood Pkwy., Room 6N–321, Fort Worth, TX 76177.

(i) Subject

Joint Aircraft Service Component (JASC) Code: 6210, Main Rotor Blades.

Issued in Fort Worth, Texas, on November 4, 2016.

Lance T. Gant,

Manager, Rotorcraft Directorate, Aircraft Certification Service.

[FR Doc. 2016–27767 Filed 11–21–16; 8:45 am]

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2016–4223; Directorate Identifier 2015–NM–108–AD; Amendment 39–18693; AD 2016–22–04]

RIN 2120–AA64

Airworthiness Directives; Gulfstream Aerospace Corporation Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: We are adopting a new airworthiness directive (AD) for certain

Gulfstream Aerospace Corporation Model GV and GV–SP airplanes. This AD was prompted by a new revision to the Airworthiness Limitations Section (ALS) of the Aircraft Maintenance Manual (AMM) based on fatigue and damage tolerance testing, and updated analysis. This AD requires revising the maintenance or inspection program to incorporate updated inspection requirements and life limits that address fatigue cracking of principal structural elements (PSEs). We are issuing this AD to ensure that fatigue cracking of PSEs is detected and corrected; such fatigue cracking could result in reduced structural integrity of the PSEs and critical components.

DATES: This AD is effective December 27, 2016.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of December 27, 2016.

ADDRESSES: For service information identified in this final rule, contact Gulfstream Aerospace Corporation, Technical Publications Dept., P.O. Box 2206, Savannah, GA 31402–2206; telephone: 800–810–4853; fax: 912–965–3520; email: *pubs@gulfstream.com*; Internet: *http://www.gulfstream.com/product_support/technical_pubs/pubs/index.htm*. You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221. It is also available on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–4223.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–4223; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the regulatory evaluation, any comments received, and other information. The address for the Docket Office (phone: 800–647–5527) is Docket Management Facility, U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT:
Ronald Wissing, Aerospace Engineer, Airframe Branch, ACE–117A, FAA, Atlanta Aircraft Certification Office (ACO), 1701 Columbia Avenue, College Park, GA 30337; phone: 404–474–5552; fax: 404–474–5606; email: *ronald.wissing@faa.gov*.

SUPPLEMENTARY INFORMATION:

Discussion

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to certain Gulfstream Aerospace Corporation Model GV and GV–SP airplanes. The NPRM published in the **Federal Register** on March 14, 2016 (81 FR 13301) (''the NPRM''). The NPRM was prompted by a new revision to the ALS of the AMM, Chapter 05–10–10, based on fatigue and damage tolerance testing, and updated analysis. The NPRM proposed to require revising the maintenance or inspection program to update inspection requirements and life limits that address fatigue cracking of principal structural elements (PSEs). We are issuing this AD to ensure that fatigue cracking of PSEs is detected and corrected; such fatigue cracking could result in reduced structural integrity of the PSEs and critical components.

Comments

We gave the public the opportunity to participate in developing this AD. The following presents the comments received on the NPRM and the FAA's response to each comment.

Request To Specify Referenced Document

Gulfstream requested that we revise the **SUMMARY** section and the Discussion section of the NPRM, and paragraph (e) of the proposed AD, to refer to the AMM, Chapter 05–10–10, which contains updated inspection requirements and life limits.

We agree with the request. We have revised the **SUMMARY** and Discussion sections of this final rule, and paragraph (e) of this AD accordingly.

Request To Remove Certain Language From the NPRM

Gulfstream requested that we revise the FAA's Determination section of the NPRM, which states that the unsafe condition is likely to exist or develop ''in other products of the same type design.'' Gulfstream requested that we remove the quoted language, and pointed out that they believe the statement is irrelevant to the unsafe condition.

We disagree with the commenter's request. Our phrasing is intentional. The finding that the condition is likely to exist or develop in other products of the same type design is necessary to ensure that the AD falls within the scope of 14 CFR part 39 (''Airworthiness Directives''.) (Specifically, see 14 CFR 39.5.) Additionally, the FAA's Determination section of the NPRM is not restated in this final rule. We have not changed this AD regarding this issue.

Request for Clarification of Certain Language From the NPRM

Gulfstream requested clarification regarding which ''operator maintenance documents'' require revision. Gulfstream did not provide any justification for its request.

We agree that clarification is necessary. Regardless of the maintenance program that an operator uses, this AD requires revising the applicable maintenance or inspection program documentation. The owner or operator is responsible for maintaining its fleet in an airworthy condition, including compliance with 14 CFR part 39. This final rule has not been changed in this regard.

Request To Clarify Applicability

Gulfstream requested that we revise the ''Differences Between This Proposed AD and the Service Information'' section of the NPRM. Gulfstream pointed out that they believe the applicability is contradictory to Gulfstream Document GV–GER–9973, Summary of Changes to the GV Series Airworthiness Limitations, Revision C, dated January 8, 2015. Gulfstream also mentioned that it does not believe an operator would be able to log compliance with the proposed AD.

We agree to clarify. The applicability of this AD differs from the effectivity of Gulfstream Document GV–GER–9973, Summary of Changes to the GV Series Airworthiness Limitations, Revision C, dated January 8, 2015, which excludes airplanes on which certain supplemental type certificates (STCs) have been accomplished. Airplanes on which those STCs have been accomplished are included in the applicability of this AD because those airplanes could have inspections and limits that are applicable. If it is determined that an airplane with a listed STC cannot accomplish the requirements of this AD, the operator may request an alternative method of compliance (AMOC) in accordance with paragraph (i) of this AD.

Also, we do not agree with the statement in Gulfstream Document GV–GER–9973, Summary of Changes to the GV Series Airworthiness Limitations, Revision C, dated January 8, 2015, indicating that airplanes with specific STCs installed should be excluded from the effectivity of Gulfstream Document GV–GER–9973, Summary of Changes to

the GV Series Airworthiness Limitations, Revision C, dated January 8, 2015. We have not changed this AD in this regard.

Request To Allow the Use of Later-Approved Service Information

Gulfstream requested that we revise Note 1 to paragraph (g) of the proposed AD. Gulfstream specifically requested adding language that would specify ''or later FAA approved revision'' to clarify operator compliance with the proposed AD.

We do not agree to revise Note 1 to paragraph (g) of this AD to allow use of ''later FAA-approved revisions.'' Note 1 to paragraph (g) of this AD specifies the AMM revisions specifically identified in Gulfstream Document GV–GER–9973, Summary of Changes to the GV Series Airworthiness Limitations, Revision C, dated January 8, 2015. This AD does not require any actions to be done in accordance with the AMM revisions specified in Note 1 to paragraph (g) of this AD. Additionally, we may not refer to any document that does not yet exist. However, we have revised Note 1 to paragraph (g) of this AD to clarify the intent of that note.

Request To Verify the Contact Information for Gulfstream

Gulfstream requested that we verify the contact information used in the ADDRESSES section and paragraph (k)(3) of this AD before publication. Gulfstream stated that its contact information and data storage location may change before the publication date of the final rule.

We have verified the contact information used in the ADDRESSES section of this final rule, and found that no change is necessary.

Conclusion

We reviewed the relevant data, considered the comments received, and determined that air safety and the public interest require adopting this AD with the changes described previously and minor editorial changes. We have determined that these minor changes:

- Are consistent with the intent that was proposed in the NPRM for correcting the unsafe condition; and
- Do not add any additional burden upon the public than was already proposed in the NPRM.

We also determined that these changes will not increase the economic burden on any operator or increase the scope of this AD.

Related Service Information Under 1 CFR part 51

We reviewed Gulfstream Document GV–GER–9973, Summary of Changes to the GV Series Airworthiness Limitations, Revision C, dated January 8, 2015. The service information describes inspection requirements and life limits that address fatigue cracking of the PSEs. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the ADDRESSES section.

Costs of Compliance

We estimate that this AD affects 392 airplanes of U.S. registry.

We estimate the following costs to comply with this AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Revision of the maintenance or inspection program.	1 work-hour × $85 per hour = $85	$0	$85	$33,320

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: ''General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Is not a ''significant rule'' under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979),

(3) Will not affect intrastate aviation in Alaska, and

(4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

2016–22–04 Gulfstream Aerospace Corporation: Amendment 39–18693; Docket No. FAA–2016–4223; Directorate Identifier 2015–NM–108–AD.

(a) Effective Date

This AD is effective December 27, 2016.

(b) Affected ADs

None.

(c) Applicability

This AD applies to Gulfstream Aerospace Corporation Model GV airplanes, certificated in any category, serial numbers 501 through 693 inclusive and serial number 699; and Model GV–SP airplanes, certificated in any category, serial numbers 5001 through 5433 inclusive.

(d) Subject

Air Transport Association (ATA) of America Code 32, Landing Gear; 53, Fuselage; 54, Nacelles/Pylons; 55, Stabilizers; and 57, Wings.

(e) Unsafe Condition

This AD was prompted by a new revision to the Airworthiness Limitations Section (ALS) of the Aircraft Maintenance Manual (AMM), Chapter 05–10–10, based on fatigue and damage tolerance testing, and updated analysis. We are issuing this AD to ensure fatigue cracking of principal structural elements (PSEs) is detected and corrected; such fatigue cracking could result in reduced structural integrity of the PSEs and critical components.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Revise Maintenance or Inspection Program

Within 12 months after the effective date of this AD, revise the maintenance or inspection program, as applicable, to incorporate the airworthiness limitations specified in Gulfstream Document GV–GER–9973, Summary of Changes to the GV Series Airworthiness Limitations, Revision C, dated January 8, 2015. The initial compliance times for the tasks identified in Gulfstream Document GV–GER–9973, Summary of Changes to the GV Series Airworthiness Limitations, Revision C, dated January 8, 2015, are at the applicable times specified in Gulfstream Document GV–GER–9973, Summary of Changes to the GV Series Airworthiness Limitations, Revision C, dated January 8, 2015, or within twelve months after the effective date of this AD, whichever occurs later.

Note 1 to paragraph (g) of this AD: Gulfstream Document GV–GER–9973, Summary of Changes to the GV Series Airworthiness Limitations, Revision C, dated January 8, 2015, specifies the following AMM revisions as additional sources of guidance for the actions required by paragraph (g) of this AD. For Model GV airplanes, AMM Revision 43, dated February 15, 2015; and for Model GV–SP airplanes, G500 or G550 AMM Revision 24, dated February 15, 2015, as applicable.

(h) No Alternative Actions or Intervals

After the maintenance or inspection program has been revised as required by paragraph (g) of this AD, no alternative actions (*e.g.,* inspections) or intervals may be used unless the actions or intervals are approved as an alternative method of compliance (AMOC) in accordance with the procedures specified in paragraph (i) of this AD.

(i) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Atlanta Aircraft Certification Office (ACO), FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the ACO, send it to the attention of the person identified in paragraph (j) of this AD.

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(j) Related Information

For more information about this AD, contact Ronald Wissing, Aerospace Engineer, Airframe Branch, ACE–117A, FAA, Atlanta ACO, 1701 Columbia Avenue, College Park, GA 30337; phone: 404–474–5552; fax: 404–474–5606; email: *ronald.wissing@faa.gov.*

(k) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(i) Gulfstream Document GV–GER–9973, Summary of Changes to the GV Series Airworthiness Limitations, Revision C, dated January 8, 2015. The revision level and date of this document are not specified on the title page of the document.

(ii) Reserved.

(3) For Gulfstream Aerospace Corporation service information identified in this AD, contact Gulfstream Aerospace Corporation, Technical Publications Dept., P.O. Box 2206, Savannah, GA 31402–2206; telephone: 800–810–4853; fax: 912–965–3520; email: *pubs@gulfstream.com;* Internet: *http://www.gulfstream.com/product_support/technical_pubs/pubs/index.htm.*

(4) You may view this service information at FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA 98057–3356. For information on the availability of this material at the FAA, call 425–227–1221.

(5) You may view this service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030, or go to: *http://www.archives.gov/federal-register/cfr/ibr-locations.html.*

Issued in Renton, Washington, on October 14, 2016.

Michael Kaszycki,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

RIN 2120–AA64

Airworthiness Directives; The Boeing Company Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: We are adopting a new airworthiness directive (AD) for certain The Boeing Company Model 787–8 airplanes. This AD was prompted by a report that the grounding jumpers between the environmental control system (ECS) bracket and the current return network (CRN) straps near certain passenger entry doors were not bonded correctly during manufacturing. This AD requires changing the configuration of the grounding jumpers connecting the ECS brackets and CRN straps; measuring the bond resistance; and doing related investigative and corrective actions if necessary. We are issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective December 27, 2016.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of December 27, 2016.

ADDRESSES: For service information identified in this final rule, contact Boeing Commercial Airplanes, Attention: Data & Services Management, P. O. Box 3707, MC 2H–65, Seattle, WA 98124–2207; telephone 206–544–5000, extension 1; fax 206–766–5680; Internet *https://www.myboeingfleet.com.* You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221. It is also available on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–6672.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–6672; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday,

except Federal holidays. The AD docket contains this AD, the regulatory evaluation, any comments received, and other information. The address for the Docket Office (phone: 800–647–5527) is Document Management Facility, U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT:

Brendan Shanley, Aerospace Engineer, Systems and Equipment Branch, ANM–130S, FAA, Seattle Aircraft Certification Office (ACO), 1601 Lind Avenue SW., Renton, WA 98057–3356; phone: 425–917–6492; fax: 425–917–6590; email: *brendan.shanley@faa.gov.*

SUPPLEMENTARY INFORMATION:

Discussion

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to certain The Boeing Company Model 787–8 airplanes. The NPRM published in the **Federal Register** on June 3, 2016 (81 FR 35655) (''the NPRM''). The NPRM was prompted by a report that the grounding jumpers between the ECS bracket and the CRN straps near passenger 1 left and 1 right entry doors were not bonded correctly during manufacturing. The NPRM proposed to require changing the configuration of the grounding jumpers connecting the ECS brackets and CRN straps; measuring the bond resistance; and doing related investigative and corrective actions if necessary. We are issuing this AD to prevent an incorrectly bonded jumper between the ECS bracket and the CRN strap, which does not provide proper grounding to the door frames at doors 1 left and 1 right. If a fault occurs, an electrical shock hazard can exist and could result in serious or fatal injury to passengers and flight crew.

Comments

We gave the public the opportunity to participate in developing this AD. The following presents the comments received on the NPRM and the FAA's response to each comment.

Support for the NPRM

Boeing stated that it concurs with the content of the NPRM. United Airlines (UAL) stated that the 12-month compliance time is a safe and reasonable timeframe.

Requests To Reference New Service Information and Add Credit

All Nippon Airways and UAL requested that we revise the NPRM to reference Boeing Service Bulletin B787–81205–SB530025–00, Issue 002, dated June 2, 2016 (''B787–81205–SB530025–00 Issue 002''), and give credit for actions accomplished using Boeing Service Bulletin B787–81205–SB530025–00, Issue 001, dated July 17, 2014 (''B787–81205–SB530025–00 Issue 001'').

We agree with the commenters' requests. B787–81205–SB530025–00 Issue 002 clarifies instructions and specifies the category of fay seal application. No additional work is required by B787–81205–SB530025–00 Issue 002. B787–81205–SB530025–00 Issue 002 has steps that are labeled as Required for Compliance (RC).

We have revised paragraphs (c) and (g) of this AD to reference B787–81205–SB530025–00 Issue 002, and added new paragraph (h) of this AD to provide credit for actions accomplished prior to the effective date of this AD using B787–81205–SB530025–00 Issue 001. We have redesignated subsequent paragraphs accordingly. We have added new paragraph (i)(4) of this AD to address the steps marked RC in B787–81205–SB530025–00 Issue 002.

Conclusion

We reviewed the relevant data, considered the comments received, and determined that air safety and the public interest require adopting this AD with the changes described previously and minor editorial changes. We have determined that these minor changes:

- Are consistent with the intent that was proposed in the NPRM for correcting the unsafe condition; and
- Do not add any additional burden upon the public than was already proposed in the NPRM.

We also determined that these changes will not increase the economic burden on any operator or increase the scope of this AD.

Related Service Information Under 1 CFR Part 51

We reviewed B787–81205–SB530025–00 Issue 002. The service information describes procedures for changing the configuration of the grounding jumpers connecting the ECS brackets and CRN straps; measuring the bond resistance; and related investigative and corrective actions if necessary. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Costs of Compliance

We estimate that this AD affects 6 airplanes of U.S. registry.

We estimate the following costs to comply with this AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Installation	6 work-hours × $85 per hour = $510	$100	$610	$3,660

We have received no definitive data that would enable us to provide cost estimates for the on-condition actions specified in this AD.

According to the manufacturer, some of the costs of this AD may be covered under warranty, thereby reducing the cost impact on affected individuals. We do not control warranty coverage for affected individuals. As a result, we have included all costs in our cost estimate.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: ''General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Is not a ''significant rule'' under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979),

(3) Will not affect intrastate aviation in Alaska, and

(4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

2016–22–17 The Boeing Company: Amendment 39–18706; Docket No. FAA–2016–6672; Directorate Identifier 2016–NM–022–AD.

(a) Effective Date

This AD is effective December 27, 2016.

(b) Affected ADs

None.

(c) Applicability

This AD applies to The Boeing Company Model 787–8 airplanes, certificated in any category, as identified in Boeing Service Bulletin B787–81205–SB530025–00, Issue 002, dated June 2, 2016 (''B787–81205–SB530025–00 Issue 002'').

(d) Subject

Air Transport Association (ATA) of America Code 53; Fuselage.

(e) Unsafe Condition

This AD was prompted by a report that the grounding jumpers between the environmental control system (ECS) bracket and the current return network (CRN) straps near passenger 1 left and 1 right entry doors were not bonded correctly during manufacturing. We are issuing this AD to prevent an incorrectly bonded jumper between the ECS bracket and the CRN strap, which does not provide proper grounding to the door frames at doors 1 left and 1 right. If a fault occurs, an electrical shock hazard can exist and could result in serious or fatal injury to passengers and flight crew.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Grounding Jumper Revision

Within 12 months after the effective date of this AD: Change the configuration of the grounding jumpers connecting the ECS brackets and CRN straps, including measuring the bond resistance and doing all applicable related investigative and corrective actions, in accordance with the Accomplishment Instructions of B787–81205–SB530025–00 Issue 002. Do all applicable related investigative and corrective actions before further flight.

(h) Credit for Previous Actions

This paragraph provides credit for the actions specified in paragraph (g) of this AD, if those actions were performed before the effective date of this AD using Boeing Service Bulletin B787–81205–SB530025–00, Issue 001, dated July 17, 2014.

(i) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Seattle Aircraft Certification Office (ACO), FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the ACO, send it to the attention of the person identified in paragraph (j) of this AD. Information may be emailed to: *9-ANM-Seattle-ACO-AMOC-Requests@faa.gov.*

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(3) An AMOC that provides an acceptable level of safety may be used for any repair, modification, or alteration required by this AD if it is approved by the Boeing Commercial Airplanes Organization Designation Authorization (ODA) that has been authorized by the Manager, Seattle ACO, to make those findings. To be approved, the repair method, modification deviation, or alteration deviation must meet the certification basis of the airplane, and the approval must specifically refer to this AD.

(4) For service information that contains steps that are labeled as Required for Compliance (RC), the provisions of paragraphs (i)(4)(i) and (i)(4)(ii) of this AD apply.

(i) The steps labeled as RC, including substeps under an RC step and any figures identified in an RC step, must be done to comply with the AD. If a step or substep is labeled ''RC Exempt,'' then the RC requirement is removed from that step or substep. An AMOC is required for any deviations to RC steps, including substeps and identified figures.

(ii) Steps not labeled as RC may be deviated from using accepted methods in accordance with the operator's maintenance or inspection program without obtaining approval of an AMOC, provided the RC steps, including substeps and identified figures, can still be done as specified, and the airplane can be put back in an airworthy condition.

(j) Related Information

For more information about this AD, contact Brendan Shanley, Aerospace Engineer, Systems and Equipment Branch, ANM–130S, FAA, Seattle Aircraft Certification Office (ACO), 1601 Lind Avenue SW., Renton, WA 98057–3356; phone: 425–917–6492; fax: 425–917–6590; email: *brendan.shanley@faa.gov.*

(k) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(i) Boeing Service Bulletin B787–81205–SB530025–00, Issue 002, dated June 2, 2016.

(ii) Reserved.

(3) For Boeing service information identified in this AD, contact Boeing Commercial Airplanes, Attention: Data & Services Management, P.O. Box 3707, MC 2H–65, Seattle, WA 98124–2207; telephone 206–544–5000, extension 1; fax 206–766–5680; Internet *https://www.myboeingfleet.com.*

(4) You may view this service information at FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221.

(5) You may view this service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030, or go to: *http://www.archives.gov/federal-register/cfr/ibr-locations.html.*

Issued in Renton, Washington, on October 25, 2016.

Dionne Palermo,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Docket No. FAA–2016–9101; Airspace Docket No. 16–ASO–14]

Amendment of Class D and Class E Airspace; Savannah, GA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; technical amendment.

SUMMARY: This action amends Class D and Class E airspace at Savannah, GA, by adjusting the geographic coordinates of Hunter Army Airfield (AAF), and updating the name of Savannah/Hilton Head International Airport. The boundaries and operating requirements of these airports remain the same.

DATES: Effective 0901 UTC, January 5, 2017. The Director of the Federal Register approves this incorporation by reference action under title 1, Code of Federal Regulations, part 51, subject to the annual revision of FAA Order 7400.11 and publication of conforming amendments.

ADDRESSES: FAA Order 7400.11A, Airspace Designations and Reporting Points, and subsequent amendments can be viewed online at *http://www.faa.gov/air_traffic/publications/*. For further information, you can contact the Airspace Policy Group, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone: 202–267–8783. The Order is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of FAA Order 7400.11A at NARA, call 202–741–6030, or go to *http://www.archives.gov/federal_register/code_of_federal-regulations/ibr_locations.html.*

FAA Order 7400.11, Airspace Designations and Reporting Points, is published yearly and effective on September 15.

FOR FURTHER INFORMATION CONTACT: John Fornito, Operations Support Group, Eastern Service Center, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone (404) 305–6364.

SUPPLEMENTARY INFORMATION:

Authority for this Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part, A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it amends Class D and Class E airspace in the Savannah, GA, area.

Availability and Summary of Documents for Incorporation by Reference

This document amends FAA Order 7400.11A, Airspace Designations and Reporting Points, dated August 3, 2016, and effective September 15, 2016. FAA Order 7400.11A is publicly available as listed in the **ADDRESSES** section of this document. FAA Order 7400.11A lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Rule

This action amends Title 14 Code of Federal Regulations (14 CFR) Part 71 by adjusting the geographic coordinates of Hunter Army Airfield, and recognizing the name change of Savannah/Hilton Head International Airport (formerly Savannah International Airport) to be in concert with the FAA's aeronautical database.

This is an administrative change and does not affect the boundaries, or operating requirements of the airspace, therefore, notice and public procedure under 5 U.S.C. 553(b) are unnecessary.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this regulation: (1) Is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant rule'' under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that only affects air traffic procedures and air navigation, it is certified that this rule, when promulgated, does not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Lists of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

Adoption of the Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of Federal Aviation Administration Order 7400.11A, Airspace Designations and Reporting Points, dated August 3, 2016, effective September 15, 2016, is amended as follows:

Paragraph 5000 Class D Airspace.

* * * * *

ASO GA D Savannah, GA [Amended]

Hunter AAF
(Lat. 32°00′36″ N., long. 81°08′46″ W.)
Savannah/Hilton Head International Airport, GA
(Lat. 32°07′39″ N., long. 81°12′08″ W.)

That airspace extending upward from the surface to and including 2,500 feet MSL within a 4.5-mile radius of Hunter AAF; excluding that portion of the overlying Savannah, GA, Class C airspace area and that airspace north of lat. 32°02′30″ N. This Class D airspace is effective during the specific dates and times established in advance by a Notice to Airmen. The effective date and time will thereafter be continuously published in the Chart Supplement.

Paragraph 6002 Class E Surface Area Airspace

* * * * *

ASO GA E2 Savannah, GA [Amended]

Hunter AAF
(Lat. 32°00′36″ N., long. 81°08′46″ W.)
Savannah/Hilton Head International Airport, GA
(Lat. 32°07′39″ N., long. 81°12′08″ W.)

Within a 5-mile radius of Savannah/Hilton Head International Airport and within a 4.5-mile radius of Hunter AAF. This Class E airspace area is effective during the specific dates and times established in advance by a Notice to Airmen. The effective date and time will thereafter be continuously published in the Chart Supplement.

Paragraph 6005 Class E Airspace Areas Extending Upward From 700 Feet or More Above the Surface of the Earth.

* * * * *

ASO GA E5 Savannah, GA [Amended]

Hunter AAF
(Lat. 32°00′36″ N., long. 81°08′46″ W.)

Savannah/Hilton Head International Airport, GA

(Lat. 32°07′39″ N., long. 81°12′08″ W.)

That airspace extending upward from 700 feet above the surface within a 10-mile radius of Savannah/Hilton Head International Airport and within a 7-mile radius of Hunter AAF.

Issued in College Park, Georgia, on November 7, 2016.

Ryan W. Almasy,

Manager, Operations Support Group, Eastern Service Center, Air Traffic Organization.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 97

[Docket No. 31103; Amdt. No. 3719]

Standard Instrument Approach Procedures, and Takeoff Minimums and Obstacle Departure Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule establishes, amends, suspends, or removes Standard Instrument Approach Procedures (SIAPs) and associated Takeoff Minimums and Obstacle Departure Procedures (ODPs) for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, adding new obstacles, or changing air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: This rule is effective November 22, 2016. The compliance date for each SIAP, associated Takeoff Minimums, and ODP is specified in the amendatory provisions.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of November 22, 2016.

ADDRESSES: Availability of matters incorporated by reference in the amendment is as follows:

For Examination

1. U.S. Department of Transportation, Docket Ops-M30, 1200 New Jersey Avenue SE., West Bldg., Ground Floor, Washington, DC 20590–0001.

2. The FAA Air Traffic Organization Service Area in which the affected airport is located;

3. The office of Aeronautical Navigation Products, 6500 South MacArthur Blvd., Oklahoma City, OK 73169 or,

4. The National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030, or go to: *http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html.*

Availability

All SIAPs and Takeoff Minimums and ODPs are available online free of charge. Visit the National Flight Data Center at *nfdc.faa.gov* to register. Additionally, individual SIAP and Takeoff Minimums and ODP copies may be obtained from the FAA Air Traffic Organization Service Area in which the affected airport is located.

FOR FURTHER INFORMATION CONTACT: Thomas J. Nichols, Flight Procedure Standards Branch (AFS–420), Flight Technologies and Programs Divisions, Flight Standards Service, Federal Aviation Administration, Mike Monroney Aeronautical Center, 6500 South MacArthur Blvd. Oklahoma City, OK 73169 (Mail Address: P.O. Box 25082, Oklahoma City, OK 73125) Telephone: (405) 954–4164.

SUPPLEMENTARY INFORMATION: This rule amends Title 14 of the Code of Federal Regulations, Part 97 (14 CFR part 97), by establishing, amending, suspending, or removes SIAPS, Takeoff Minimums and/or ODPS. The complete regulatory description of each SIAP and its associated Takeoff Minimums or ODP for an identified airport is listed on FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. 552(a), 1 CFR part 51, and 14 CFR part § 97.20. The applicable FAA forms are FAA Forms 8260–3, 8260–4, 8260–5, 8260–15A, and 8260–15B when required by an entry on 8260–15A.

The large number of SIAPs, Takeoff Minimums and ODPs, their complex nature, and the need for a special format make publication in the **Federal Register** expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, Takeoff Minimums or ODPs, but instead refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP, Takeoff Minimums and ODP listed on FAA form documents is unnecessary. This amendment provides the affected CFR sections and specifies the types of SIAPs, Takeoff Minimums and ODPs with their applicable effective dates. This amendment also identifies the airport and its location, the procedure, and the amendment number.

Availability and Summary of Material Incorporated by Reference

The material incorporated by reference is publicly available as listed in the **ADDRESSES** section.

The material incorporated by reference describes SIAPS, Takeoff Minimums and/or ODPS as identified in the amendatory language for part 97 of this final rule.

The Rule

This amendment to 14 CFR part 97 is effective upon publication of each separate SIAP, Takeoff Minimums and ODP as Amended in the transmittal. Some SIAP and Takeoff Minimums and textual ODP amendments may have been issued previously by the FAA in a Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts.

The circumstances that created the need for some SIAP and Takeoff Minimums and ODP amendments may require making them effective in less than 30 days. For the remaining SIAPs and Takeoff Minimums and ODPs, an effective date at least 30 days after publication is provided.

Further, the SIAPs and Takeoff Minimums and ODPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Procedures (TERPS). In developing these SIAPs and Takeoff Minimums and ODPs, the TERPS criteria were applied to the conditions existing or anticipated at the affected airports. Because of the close and immediate relationship between these SIAPs, Takeoff Minimums and ODPs, and safety in air commerce, I find that notice and public procedure under 5 U.S.C. 553(b) are impracticable and contrary to the public interest and, where applicable, under 5 U.S.C. 553(d), good cause exists for making some SIAPs effective in less than 30 days.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a

''significant rule'' under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 97

Air traffic control, Airports, Incorporation by reference, Navigation (air).

Issued in Washington, DC, on October 21, 2016.

John S. Duncan,

Director, Flight Standards Service.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Title 14, Code of Federal Regulations, Part 97 (14 CFR part 97) is amended by establishing, amending, suspending, or removing Standard Instrument Approach Procedures and/or Takeoff Minimums and Obstacle Departure Procedures effective at 0901 UTC on the dates specified, as follows:

PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

■ 1. The authority citation for part 97 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g), 40103, 40106, 40113, 40114, 40120, 44502, 44514, 44701, 44719, 44721–44722.

■ 2. Part 97 is amended to read as follows:

Availability

All SIAPs and Takeoff Minimums and ODPs are available online free of charge. Visit the National Flight Data Center at *nfdc.faa.gov* to register. Additionally, individual SIAP and Takeoff Minimums and ODP copies may be obtained from the FAA Air Traffic Organization Service Area in which the affected airport is located.

FOR FURTHER INFORMATION CONTACT: Thomas J. Nichols, Flight Procedure Standards Branch (AFS–420), Flight Technologies and Programs Divisions, Flight Standards Service, Federal Aviation Administration, Mike Monroney Aeronautical Center, 6500 South MacArthur Blvd. Oklahoma City, OK 73169 (Mail Address: P.O. Box 25082, Oklahoma City, OK 73125) Telephone: (405) 954–4164.

SUPPLEMENTARY INFORMATION: This rule amends Title 14 of the Code of Federal Regulations, Part 97 (14 CFR part 97), by establishing, amending, suspending, or removes SIAPS, Takeoff Minimums and/or ODPS. The complete regulatory description of each SIAP and its associated Takeoff Minimums or ODP for an identified airport is listed on FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. 552(a), 1 CFR part 51, and 14 CFR part § 97.20. The applicable FAA forms are FAA Forms 8260–3, 8260–4, 8260–5, 8260–15A, and 8260–15B when required by an entry on 8260–15A.

The large number of SIAPs, Takeoff Minimums and ODPs, their complex nature, and the need for a special format make publication in the **Federal Register** expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, Takeoff Minimums or ODPs, but instead refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP, Takeoff Minimums and ODP listed on FAA form documents is unnecessary. This amendment provides the affected CFR sections and specifies the types of SIAPs, Takeoff Minimums and ODPs with their applicable effective dates. This amendment also identifies the airport and its location, the procedure, and the amendment number.

Availability and Summary of Material Incorporated by Reference

The material incorporated by reference is publicly available as listed in the **ADDRESSES** section.

The material incorporated by reference describes SIAPS, Takeoff Minimums and/or ODPS as identified in the amendatory language for part 97 of this final rule.

The Rule

This amendment to 14 CFR part 97 is effective upon publication of each separate SIAP, Takeoff Minimums and ODP as Amended in the transmittal. Some SIAP and Takeoff Minimums and textual ODP amendments may have been issued previously by the FAA in a Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts.

The circumstances that created the need for some SIAP and Takeoff Minimums and ODP amendments may require making them effective in less than 30 days. For the remaining SIAPs and Takeoff Minimums and ODPs, an effective date at least 30 days after publication is provided.

Further, the SIAPs and Takeoff Minimums and ODPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Procedures (TERPS). In developing these SIAPs and Takeoff Minimums and ODPs, the TERPS criteria were applied to the conditions existing or anticipated at the affected airports. Because of the close and immediate relationship between these SIAPs, Takeoff Minimums and ODPs, and safety in air commerce, I find that notice and public procedure under 5 U.S.C. 553(b) are impracticable and contrary to the public interest and, where applicable, under 5 U.S.C 553(d), good cause exists for making some SIAPs effective in less than 30 days.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant rule'' under DOT Regulatory Policies and Procedures (44 FR 11034; February 26,1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 97

Air traffic control, Airports, Incorporation by reference, Navigation (air).

Issued in Washington, DC, on November 4, 2016.

John S. Duncan,

Director, Flight Standards Service.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Title 14, Code of Federal Regulations, Part 97 (14 CFR part 97) is amended by establishing, amending, suspending, or removing Standard Instrument Approach Procedures and/or Takeoff Minimums and Obstacle Departure Procedures effective at 0901 UTC on the dates specified, as follows:

PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

■ 1. The authority citation for part 97 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g), 40103, 40106, 40113, 40114, 40120, 44502, 44514, 44701, 44719, 44721–44722.

■ 2. Part 97 is amended to read as follows:

Effective 8 December 2016

Grass Valley, CA, Nevada County Air Park, GPS RWY 7, Orig-A
Oakland, CA, Metropolitan Oakland Intl, RNAV (GPS) Y RWY 30, Amdt 5B

Rescinded: On October 26, 2016 (81 FR 74289), the FAA published an Amendment in Docket No. 31098, Amdt No. 3715 to Part 97 of the Federal Aviation Regulations under section 97.31. The following entry for Midland, TX, effective November 10, 2016, is hereby rescinded in its entirety:

Midland, TX, Midland Intl Air & Space Port, RADAR–1, Amdt 7

[FR Doc. 2016–27698 Filed 11–21–16; 8:45 am]

BILLING CODE 4910–13–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 176

[Docket No. FDA–2016–F–1153]

Indirect Food Additives: Paper and Paperboard Components

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA or we) is amending the food additive regulations to no longer provide for the use of two specific perfluoroalkyl containing substances as oil and water repellents for paper and paperboard for use in contact with aqueous and fatty foods because these uses have been abandoned. This action is in response to a petition filed by Keller and Heckman LLP on behalf of 3M Corporation.

DATES: This rule is effective November 22, 2016. See section VIII for further information on the filing of objections. Submit either electronic or written objections and requests for a hearing by December 22, 2016.

ADDRESSES: You may submit objections and requests for a hearing as follows.

Electronic Submissions

Submit electronic objections in the following way:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments. Objections submitted electronically, including attachments, to *http://www.regulations.gov* will be posted to the docket unchanged. Because your objection will be made public, you are solely responsible for ensuring that your objection does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your objection, that information will be posted on *http://www.regulations.gov.*
- If you want to submit an objection with confidential information that you do not wish to be made available to the public, submit the objection as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper objections submitted to the Division of Dockets Management, FDA will post your objection, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2016–F–1153 for ''Indirect Food Additives: Paper and Paperboard Components.'' Received objections will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *http://www.regulations.gov* or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

- *Confidential Submissions*—To submit an objection with confidential information that you do not wish to be made publicly available, submit your objections only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *http://www.regulations.gov.* Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *http://www.fda.gov/regulatoryinformation/dockets/default.htm.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *http://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: Vanee Komolprasert, Center for Food Safety and Applied Nutrition (HFS–275), Food and Drug Administration, 5001 Campus Dr., College Park, MD 20740–3835, 240–402–1217.

SUPPLEMENTARY INFORMATION:

I. Background

In a document published in the **Federal Register** of April 29, 2016 (81 FR 25625), we announced that we filed a food additive petition (FAP 6B4814) submitted on behalf of 3M Corporation (Petitioner) by Keller and Heckman LLP, 1001 G Street NW., Suite 500 West, Washington, DC 20001. The petition proposed to amend § 176.170 (21 CFR 176.170) to no longer provide for the use of two different perfluoroalkyl containing substances as oil and water repellents for paper and paperboard for use in contact with aqueous and fatty foods because these uses have been intentionally and permanently abandoned. The two substances that are the subjects of the petition are as follows:

(1) Ammonium bis (*N*-ethyl-2-perfluoroalkylsulfonamido ethyl) phosphates, containing not more than 15 percent ammonium mono (*N*-ethyl-2-perfluoroalkylsulfonamido ethyl) phosphates, where the alkyl group is more than 95 percent C_8 and the salts have a fluorine content of 50.2 percent to 52.8 percent as determined on a solids basis; and

(2) Perfluoroalkyl acrylate copolymer (CAS Reg. No. 92265–81–1) containing 35 to 40 weight percent fluorine, produced by the copolymerization of ethanaminium, *N,N,N*-trimethyl-2-[(2-methyl-1-oxo-2-propenyl)-oxy]-, chloride; 2-propenoic acid, 2-methyl-, oxiranylmethyl ester; 2-propenoic acid, 2-ethoxyethyl ester; and 2-propenoic acid, 2[[(heptadecafluoro-octyl)sulfonyl]methyl amino]ethyl ester.

In response to food additive petitions submitted by the Petitioner (33 FR 14544, September 27, 1968; 35 FR 14840, September 24, 1970; 37 FR 9762, May 17, 1972; and 52 FR 3603, February 5, 1987), FDA authorized certain uses of these two substances as food additives under § 176.170.

II. Evaluation of Abandonment

Section 409(i) of the Federal, Food, Drug, and Cosmetic Act (the FD&C Act) (21 U.S.C. 348(i)) states that we may by regulation establish the procedure for amending or repealing a food additive regulation, and that this procedure shall conform to the procedure provided in section 409 for the promulgation of such regulations. FDA's regulations specific to the administrative actions for food additives provide that the Commissioner, on his own initiative or on the petition of any interested person, may propose the issuance of a regulation amending or repealing a regulation pertaining to a food additive (§ 171.130(a) (21 CFR 171.130(a))). The regulations further provide that any such petition must include an assertion of facts, supported by data, showing that new information exists with respect to the food additive or that new uses have been developed or old uses abandoned, that new data are available as to toxicity of the chemical, or that experience with the existing regulation or exemption may justify its amendment or appeal. New data must be furnished in the form specified in 21 CFR 171.1 and 171.100 for submitting petitions (§ 171.130(b)). Under these regulations, a petitioner may propose that we amend a food additive regulation if the petitioner can demonstrate that there are ''old uses abandoned'' for the relevant food additive. Such abandonment must be complete and permanent for any intended uses in the U.S. market. While section 409 of the FD&C Act and § 171.130 also provide for amending or revoking a food additive regulation based on safety, an amendment or revocation based on abandonment is not based on safety of the food additive. Instead, the amendment or revocation is based on the fact that regulatory authorization is no longer necessary because the use of the food additive has been permanently and completely abandoned.

Abandonment may be based on the abandonment of certain authorized food additive uses for a substance (*e.g.,* if a substance is no longer used in certain product categories) or on the abandonment of all authorized food additive uses of a substance (*e.g.,* if a substance is no longer being manufactured). If a petition seeks to amend the food additive regulations based on the abandonment of certain uses of the food additive, such uses must be adequately defined so that both the scope of the abandonment and any amendment to the food additive regulation are clear.

The petition submitted on behalf of 3M Corporation includes the following information to support the claim that the uses of the two substances are no longer being introduced into interstate commerce. The Petitioner provides a statement that the Petitioner does not currently manufacture the two substances for food contact use in the United States, and that to the best of the Petitioner's knowledge, the Petitioner was the sole and exclusive domestic and international manufacturer of the two substances for the abandoned uses. In addition, the Petitioner submitted information on its May 2000 voluntary agreement with the U.S. Environmental Protection Agency to phase out production of perfluorooctane sulfonate (PFOS); which is used to produce the two substances (*https://nepis.epa.gov/Exe/ZyPDF.cgi/P100LTG6.PDF?Dockey=P100LTG6.PDF*). According to the petition, the Petitioner completed a voluntary phase-out of PFOS production in 2002. The Petitioner states that it does not intend to manufacture or import, nor does it maintain an inventory for sale or distribution, of the two substances for use in food-contact applications in the United States in the future.

III. Comments on the Filing Notice

We provided 60 days for comments on the filing notice. We received two comments from an individual and a consumer group. Both comments raised two issues, which are discussed in the paragraphs that follow. For ease of reading, we preface each comment discussion with a numbered ''Comment,'' and each response with ''Response.''

(Comment 1) One comment asked why we are amending the regulations if the substances are no longer in use.

(Response) FDA is responding to an FAP, as required under section 409 of the FD&C Act. Amending these food additive regulations addresses the FAP under the process set forth in the FD&C Act. In the case of abandonment, regulatory authorization is no longer necessary for these substances because their use as food additives has been permanently and completely abandoned. Our action also gives interested parties better information about what substances are used as food contact substances.

(Comment 2) Another comment asked FDA to remove the approvals of seven effective food contact notifications for long-chain perfluorinated compounds.

(Response) We decline to address food contact substances that are outside the scope of this food additive petition.

IV. Conclusion

We reviewed the data and information in the petition and other available relevant material to determine whether the use of the two perfluoroalkyl containing substances as oil and water repellents for paper and paperboard for use in contact with aqueous and fatty foods has been permanently and completely abandoned. Based on the available information, we conclude that the use of these substances has been permanently and completely abandoned. Therefore, we are amending 21 CFR part 176 as set forth in this document. Upon the effective date (see **DATES**), these food additive uses are no longer authorized.

V. Public Disclosure

In accordance with § 171.1(h) (21 CFR 171.1(h)), the petition and the documents that we considered and relied upon in reaching our decision to approve the petition will be made available for public disclosure (see **FOR FURTHER INFORMATION CONTACT**). As provided in § 171.1(h), we will delete from the documents any materials that are not available for public disclosure.

VI. Analysis of Environmental Impact

We previously considered the environmental effects of this rule, as stated in the **Federal Register** of April 29, 2016, notice of petition for FAP 6B4814. We stated that we had determined, under 21 CFR 25.32(m), that this action ''is of a type that does not individually or cumulatively have a significant effect on the human environment,'' such that neither an environmental assessment nor an environmental impact statement is required. We have not received any new information or comments that would affect our previous determination.

VII. Paperwork Reduction Act of 1995

This final rule contains no collection of information. Therefore, clearance by the Office of Management and Budget under the Paperwork Reduction Act of 1995 is not required.

VIII. Objections

If you will be adversely affected by one or more provisions of this regulation, you may file with the Division of Dockets Management (see **ADDRESSES**) either electronic or written objections. You must separately number each objection, and within each numbered objection you must specify with particularity the provision(s) to which you object, and the grounds for your objection. Within each numbered objection, you must specifically state whether you are requesting a hearing on the particular provision that you specify in that numbered objection. If you do not request a hearing for any particular objection, you waive the right to a hearing on that objection. If you request a hearing, your objection must include a detailed description and analysis of the specific factual information you intend to present in support of the objection in the event that a hearing is held. If you do not include such a description and analysis for any particular objection, you waive the right to a hearing on the objection.

Any objections received in response to the regulation may be seen in the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday, and will be posted to the docket at *http://www.regulations.gov.*

List of Subjects in 21 CFR Part 176

Food additives, Food packaging.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and re-delegated to the Director, Center for Food Safety and Applied Nutrition, 21 CFR part 176 is amended as follows:

PART 176—INDIRECT FOOD ADDITIVES: PAPER AND PAPERBOARD COMPONENTS

■ 1. The authority citation for part 176 continues to read as follows:

Authority: 21 U.S.C. 321, 342, 346, 348, 379e.

§ 176.170 [Amended]

■ 2. Amend § 176.170 in the table in paragraph (a)(5) by removing the entries for ''Ammonium bis (*N*-ethyl-2-perfluoroalkylsulfonamido ethyl) phosphates'' and ''Perfluoroalkyl acrylate copolymer.''

Dated: November 17, 2016.

Susan Bernard,

Director, Office of Regulations, Policy and Social Science, Center for Food Safety and Applied Nutrition.

RIN 2577–AC90

Native American Housing Assistance and Self-Determination Act; Revisions to the Indian Housing Block Grant Program Formula

AGENCY: Office of the Assistant Secretary for Public and Indian Housing, HUD.

ACTION: Final rule.

SUMMARY: This final rule revises the Indian Housing Block Grant (IHBG) Program allocation formula authorized by section 302 of the Native American Housing Assistance and Self-Determination Act of 1996, as amended (NAHASDA). Through the IHBG Program, HUD provides federal housing assistance for Indian tribes in a manner that recognizes the right of Indian self-determination and tribal self-government. HUD negotiated this final rule with active tribal participation and using the procedures of the Negotiated Rulemaking Act of 1990. The regulatory changes reflect the consensus decisions reached by HUD and the tribal representatives on ways to improve and clarify the current regulations governing the IHBG Program formula.

DATES: *Effective Date:* December 22, 2016.

FOR FURTHER INFORMATION CONTACT: Heidi J. Frechette, Deputy Assistant Secretary for Native American Programs, Office of Public and Indian Housing, Department of Housing and Urban Development, 451 Seventh Street SW., Room 4126, Washington, DC 20410, telephone number 202–401–7914 (this is not a toll-free number). Hearing- or speech-impaired individuals may access this number via TTY by calling the toll-free Federal Relay Service at 1–800–877–8339.

SUPPLEMENTARY INFORMATION:

I. Background

The Native American Housing Assistance and Self-Determination Act of 1996 (25 U.S.C. 4101 *et seq.*) (NAHASDA) changed the way that housing assistance is provided to Native Americans. NAHASDA eliminated several separate assistance programs and replaced them with a single block grant program, known as the Indian Housing Block Grant (IHBG) Program. NAHASDA and its implementing regulations, codified at 24 CFR part 1000, recognize tribal self-determination and self-governance while establishing reasonable standards of accountability. Reflective of this, section 106 of NAHASDA provides that HUD shall develop implementing regulations with active tribal participation and using the procedures of the Negotiated Rulemaking Act of 1990 (5 U.S.C. 561–570).

Under the IHBG program, HUD makes assistance available to eligible Indian tribes for affordable housing activities. The amount of assistance made available to each Indian tribe is determined using a formula developed as part of the NAHASDA negotiated process. Based on the amount of funding appropriated for the IHBG program, HUD calculates the annual grant for each Indian tribe and provides this information to the Indian tribes. Indian tribes are required to submit to HUD an Indian Housing plan that includes, among other things, a description of planned activities and statement of needs. If the Indian Housing Plan complies with statutory and regulatory requirements, the grant is awarded.

Following the enactment of the Native American Housing Assistance and Self-Determination Reauthorization Act of 2008 (Pub. L. 110–411, approved October 14, 2008) (NAHASDA Reauthorization Act) HUD established a negotiated rulemaking committee [1] that focused on implementing the NAHASDA Reauthorization Act and prior amendments to NAHASDA, except those provisions which govern the NAHASDA allocation formula. As a result of that negotiated rulemaking, HUD published a final rule on December 3, 2012 (77 FR 71513).

On July 3, 2012 (77 FR 39452) and September 18, 2012 (77 FR 57544), HUD announced its intent to establish a negotiated rulemaking committee for the purpose of reviewing the NAHASDA allocation formula regulations at 24 CFR part 1000, subpart D, and negotiating recommendations for a possible proposed rule modifying the IHBG formula. On July 30, 2013 (78 FR 45903), after considering public comment on the proposed membership, HUD published a **Federal Register** document announcing the final list of members of the IHBG Formula Negotiated Rulemaking Committee (Committee) and announcing the date of the first meeting of the Committee. The Committee consists of 24 designated representatives of tribal governments (or authorized designees of those tribal governments) which, as required by NAHASDA, reflects a balanced representation of Indian tribes geographically and based on size, and two HUD representatives.

In developing this final rule, the Committee met nine times. Committee meetings took place on August 27–28, 2013, September 17–19, 2013, April 23–24, 2014, June 11–13, 2014, July 29–31, 2014, August 26–28, 2014, August 11–13, 2015, January 26–27, 2016, and September 20–21, 2016. The Committee agreed to operate based on consensus rulemaking and its approved charter and protocols. All of the Committee meetings were announced in the **Federal Register** and were open to the public.[2]

During this negotiated rulemaking, the Committee undertook a comprehensive review of the IHBG formula and statutory changes that needed to be addressed in the regulations. With the full and active participation of the tribes, HUD and the Committee identified certain areas of the IHBG formula that required clarification, were outdated, or could be improved and, on May 31, 2016, published a proposed rule (81 FR 34290). With the exception of changes to § 1000.330(b)(ii), the proposed rule reflected the consensus decisions reached by the Committee during the negotiated rulemaking process on the best way to address these issues.

The Committee convened for a 2-day meeting in Oklahoma City, OK, on September 20–21, 2016, to review and consider public comments received on the proposed rule. This final rule takes into consideration the public comments on the proposed rule, and makes some changes, based on the public comments, to the May 31, 2016, proposed rule. It also reflects the consensus decisions reached by HUD and the Committee.

II. Changes and Clarifications Made in This Final Rule

This final rule follows publication of the May 31, 2016, proposed rule and takes into consideration the public comments received on the proposed rule. In response to the public comments, a discussion of which is presented in the following section of this preamble, and in further consideration of issues addressed at the proposed rule stage, HUD and the Committee are making the following regulatory changes at this final rule stage:

- HUD has decided not to move forward with the single non-consensus provision in the proposed rule; the adjustment to the American Community Survey (ACS) proposed in § 1000.330(b). HUD meaningfully considered the public comments and engaged in extensive additional analysis. HUD has decided that the adjustment does not do enough to address volatility associated with small areas to warrant its introduction as a non-consensus adjustment.
- The Committee agreed by consensus to add a new § 1000.318(d) to establish the eligibility criteria for Formula Current Assisted Stock (FCAS) units that are demolished and rebuilt. The provision provides that a unit demolished pursuant to a planned demolition may be considered eligible as a FCAS unit if, after demolition is completed, the unit is rebuilt within one year. The provision provides that demolition is completed when the site of the demolished unit is ready for rebuilding and allows IHBG recipients to request approval for a one-time, one-year extension based on the formula factors in section 302(c)(1) of NAHASDA.
- The Committee agreed to revise § 1000.329(c) which requires that a tribe receiving Minimum Total Grant Allocation of Carryover Funds, certify the presence of households at or below 80 percent of median income, to more closely parallel a similar provision codified at § 1000.328(b)(2).
- The Committee agreed to clarify the undercount adjustment to the U.S. Decennial Census for Reservation and Trust Lands in § 1000.330(b). Specifically, the Committee agreed to change ''Indian Lands in Remote Alaska'' to ''For Remote Alaska as designated by the U.S. Census Bureau, Alaska Formula Areas in Remote Alaska shall be treated as Reservation and Trust Lands for purposes of this paragraph''.

III. The Public Comments

The public comment period for this rule closed on August 1, 2016, and HUD received 22 comments. Included in these 22 comments were 2 sets of identical comments; one set that contained 7 identical comments and a second set that contained 2 identical comments. Comments were submitted by federally recognized Indian tribes, tribal and regional housing authorities, TDHEs, associations comprised of tribes, tribal housing authorities, a law office, a nonprofit devoted to issues of race and ethnicity, and members of the public.

As discussed in this preamble, the Committee met on September 20 and 21, 2016, to review and consider responses to the public comments. This section of the preamble addresses the significant issues raised in the public comments and organizes the comments by subject category, with a brief description of the issue, followed by the Committee's response.

A. Comments Regarding Non-Consensus Provision To Control Total Weights Within ACS (§ 1000.330(b))

Comment: Control weights within the ACS not a valid measure of other variables. Several commenters expressed concern with the adjustment of § 1000.330(b) and stated it is not reasonable to assume that an undercount of one variable, American Indian and Alaska Native (AIAN) persons, should be applied to the other variables.

Response: The Committee acknowledges this was a non-consensus decision taken by HUD. HUD appreciates the comment. HUD proposed the adjustment to reduce some of the likely error in the ACS for small areas caused by county based sampling in the ACS and to address the undercount in the base Decennial

[1] 75 FR 423 (January 5, 2010).

[2] See, 78 FR 45903 (July 30, 2013); 78 FR 54416 (September 4, 2013); 79 FR 14204 (March 13, 2014); 79 FR 28700 (May 23, 2014); 80 FR 30004 (May 26, 2015); 80 FR 33157 (June 11, 2015); 81 FR 881 (January 8, 2016); 81 FR 57506 (August 23, 2016).

Census that is used as a core component of the weighting of ACS data. After careful consideration, however, HUD has decided not to move forward with the adjustment. HUD has determined that it does not do enough to address volatility associated with small areas to warrant its introduction as a non-consensus adjustment.

Comment: *Opposition to implementing a non-consensus adjustment to the ACS data.* Several commenters expressed disappointment with HUD in proposing to implement the reweighting adjustment that is part of § 1000.330(b) despite broad opposition from tribal Committee members. The commenters urged HUD to respect the perspective of the majority of the Committee tribal members and not implement the reweighting proposal. Other commenters stated that HUD should not unilaterally move forward with its own proposals if no consensus is found but rather should rely on the existing language of the regulations since that approach was the result of a prior consensus between HUD and the tribes.

Several commenters also stated that they do not support the implementation of any non-consensus items, and referred to the adoption of the ACS adjustment. Several of these commenters also concluded that implementing a non-consensus item severely dilutes the significance of this process, is not a sign of negotiating in good faith, and is inconsistent with what constitutes Government-to-Government consultation. One of the commenters also stated that the summary section of the proposed rule was inaccurate by stating that the proposed regulatory changes reflect the consensus decision of the Committee since the adoption of the data source itself was not made by consensus, and recommended that HUD revise the sentence to reflect that the proposal included regulatory changes that did not achieve consensus.

Response: HUD appreciates the concerns of the commenters but disagrees with the suggestion that moving forward unilaterally with this non-consensus item reflects a lack of good faith or detracts from the Government-to-Government relationship that HUD has with the tribes. HUD has agreed, however, to remove the ACS adjustment (control total weights within the ACS).

B. Comments Regarding Minimum Total Grant Allocation of Carryover Funds (§ 1000.329).

Comment: The Minimum Total Grant Allocation of Carryover Funds is inconsistent with NAHASDA. One commenter expressed opposition to the Minimum Total Grant Allocation of Carryover Funds stating that it is an arbitrary allocation rather than a need-based allocation, as required by NAHASDA. The commenter stated that adjusting the formula simply because carryover funds are added is a departure from the need-based model and will mean funding is withheld from tribes with more demonstrable need. The commenter suggested that if carryover funds cannot be added to the total allocation, then the funds should be used for drug clean-up grants.

Response: The Committee considered this comment and disagrees that § 1000.329 is arbitrary and not based on need. In considering the provision, the Committee sought to augment the minimum allocation amount already provided under the need component in § 1000.328 in the event there are funds voluntarily returned or not accepted by other tribes in the prior year (''carryover''). Just as § 1000.328 recognized that allocations in minimum amounts are needed if there exist eligible households below 80 percent of median income in the tribe's formula area, proposed § 1000.329 simply recalibrates the minimum if there are carryover funds. The Committee also notes that HUD does not have the statutory authority to award funds specifically to fund drug control/elimination grants, however, grantees may choose to spend their IHBG funds to remediate units as doing so is an eligible activity in the IHBG program.

Comment: Minimum Total Grant Allocation of Carryover Funds should be clarified. Another commenter recommended that § 1000.329(c) be clarified to read, ''To be eligible, a tribe must certify in its Indian Housing Plan the presence of any eligible households at or below 80 percent of median income.''

Response: The Committee considered this comment and agrees that § 1000.329(c) be clarified to parallel § 1000.328.

C. Comments Regarding the Data Sources for the Need Variables (§ 1000.330).

Comment: Counting and averaging of the U.S. Decennial Census data. Several commenters recommended the U.S. Decennial Census data be adjusted for both over and undercounts for accuracy. The commenters also requested clarification on who determines what is ''significant'' since it is not defined in the regulations. Other commenters recommended that HUD must determine the actual undercounts on a reservation-by-reservation basis instead of utilizing an average undercount for its adjustment.

Response: The Committee considered these comments and agreed that the regulation should not make adjustments to add for any statistically significant overcount. The Committee during its eighth session considered how to address undercounts and overcounts reported by the U.S. Census Bureau. The Committee, by consensus, determined that adjustments to data should be made for statistically significant undercounts. The Committee did not reach consensus on any adjustments to data based upon overcounts. The Census reports reviewed during the convening of the Committee did not indicate any statistically significant overcounts. The U.S. Census Bureau determines whether overcounts or undercounts are statistically significant. Currently there is no way to determine actual undercounts or overcounts on a reservation-by-reservation basis.

Comment: The term ''Indian Lands'' is ambiguous and needs to be clarified in the undercount adjustment to the U.S. Decennial Census. Several commenters stated that the term ''Indian Lands'' in § 1000.330(b) needs to be clarified as it pertains to Alaska Native villages in remote Alaska. One commenter stated that the term was not meant to mean ''Indian Country'' but was meant to refer to the lands within the formula area of the villages (Alaska Native Village Statistical Areas). The commenter recommended that the Committee not change this section if this is the understanding of how this term would be interpreted. The commenter requested, however, that the term be clarified as including those lands comprising the formula areas of the Alaska Native Villages if there is confusion regarding this interpretation.

Another commenter stated that aggravating the ambiguity is the absence of any definition of the term ''Indian Lands'' in NAHASDA or the NAHASDA regulations, and the various uses of the term by other Federal agencies (*e.g.,* the Department of Energy under the Alaska Native Claims Settlement Act, 25 U.S.C. 3501). This commenter stated that there are no reservation or trust lands in Remote Alaska other than the Metlakatla Reservation, and concluded that confining the term to reservations and trust lands in this unique context would render the provision meaningless. The commenters asserted that the Committee adopted the term ''Indian Lands'' in the committee briefings to also include Alaskan Native Village areas in remote Alaska and proposed a documented definition or a technical amendment

specifically stating that Alaskan Native Villages or Indian Lands in remote Alaska shall be treated as reservation and trust lands.

Response: The Committee agreed with the commenters on the ambiguity of the term ''Indian Lands,'' and clarified the regulation at § 1000.330 by changing ''Indian Lands in Remote Alaska'' to ''For Remote Alaska as designated by the U.S. Census Bureau, Alaska Formula Areas in Remote Alaska shall be treated as Reservation and Trust Lands'' for purposes of this paragraph.

Comment: Require HUD to issue a report on data source and update data source if necessary (Proposed § 1000.330(d)). A commenter recommended that the volatility control provision, in § 1000.331, be retained if HUD proceeds with using the ACS, as adjusted, to determine the variables described in § 1000.324. The commenter also recommended that the rule require HUD to renegotiate this provision if it determines that the use of ACS data or U.S. Census Bureau county level population estimates for Native Americans results in inaccurate figures. Specifically, the commenter recommended the addition of the following provision:

§ 1000.330(d). After fiscal year 2018 but before fiscal year 2023, HUD shall prepare a report on the use of the data sources in this Section, including whether the data sources provide reliable information on the funding variables described on § 1000.324, and provide tribes an opportunity to comment on the report. If the report determines that the data sources used in this section result in unreliable data, HUD shall propose a more reliable data source.

Response: The Committee considered this comment and agreed not to add the language proposed by the commenter. In reaching this decision, the Committee notes that the language recommended is ambiguous. Additionally, the IHBG Negotiated Rulemaking Data Study Group extensively evaluated all data sources used in the formula during negotiated rulemaking. The resulting report outlining the Committee's Data Study Group's process and final recommendations to the Committee was published with the proposed rule.

Comment: The American Community Survey (ACS) data is unreliable. One commenter stated that they did not support § 1000.330(b)(ii) because the ACS is neither reflective nor representative of the commenter's tribal community. The commenter also stated that the flaws in the ACS data cannot be fixed by a weighting that uses the ACS count of American Indian and Native persons. Another commenter questioned the accuracy of ACS data given the sampling, response and inclusion rates, as well as its failure to capture tribal enrollment information. The commenter concluded that reliance on these data would harm poorer tribes with the worst housing, and thus disproportionately affect the funding accessible to them via the need component of the IHBG funding formula.

Response: The Committee's Data Study Group did a thorough review of the ACS as a data source. Although consensus was not achieved on using the ACS as a data source, HUD has determined that the ACS is the most current and accurate data available for measuring the need for funding under the IHBG. The ACS data are more current than the data currently being used in the formula and are available for all eligible tribes, as discussed in the final Data Study Group Report. HUD recognizes that the ACS data does have some limitations. In addition, the 4.88 percent undercount of the 2010 Decennial Census for Reservation and Trust Lands is potentially present in the ACS because the ACS uses the Decennial Census, adjusted for post Census population growth, as its base data for weighting the ACS.

HUD is committed to work with the Census Bureau to improve the accuracy of the counts. Tribes may still challenge the ACS data.

D. Comments Regarding Volatility Control (§ 1000.331).

Comment: The Committee should clarify the volatility control provision. Several commenters stated that a strict construction of § 1000.331(a) would defeat the intent of the Committee in agreeing to the provision. According to these commenters, the intent of § 1000.331(a) was to limit the impact of adopting a new data source (ACS) on those tribes that will be significantly and adversely affected by that conversion. The commenters wrote that as written, however, the relief would only be available if the tribe can show that the greater than 10 percent needs grant decline occurred ''solely as a direct result of the introduction'' of the ACS. The commenters stated that the record of the Committee proceedings indicates that was not the Committee's intent. One commenter presented several examples, including one which provided that if a tribe suffered a 65 percent reduction and can trace only 64.9 percent of its reduction to adoption of the ACS it would be disqualified from receiving any volatility control assistance, because its decline would not have been ''solely as a direct result of the introduction'' of ACS. The commenters recommended that § 1000.331(a) be revised by substituting ''primarily as a result'' for ''solely as a direct result.'' These same commenters also recommended that the intent of § 1000.331(a) be clarified by adding a definition for ''primarily as a result'' to read, ''As used in this section, 'primarily as a result' means that the introduction of a new data source, in-and-of-itself, would result in greater than a 10 percent decline in the tribe's need component allocation, irrespective of any declines attributable to causes other than introduction of that data source.''

Response: Ensuring that grantees have stable allocations is a priority for the Committee. The original intent of § 1000.331 was to protect tribes against significant fluctuations with the introduction of the Decennial Census and ACS data. When HUD introduces a new data set, HUD will not apply volatility control. When HUD introduces a new data source, HUD will apply volatility control. When HUD first introduces ACS data into the IHBG formula in Fiscal Year 2018, HUD will apply volatility control. When a new ACS data set is available from year to year, HUD will not apply volatility control. When new Decennial Census data is available and is introduced into the formula, HUD will apply volatility control (*e.g.,* 2020 Decennial Census).

HUD understands, however, the concern expressed by the commenters. HUD is able to isolate the impact on tribes' funding allocations that is due to the introduction of the ACS as a new data source. This ability to isolate the impact, and apply the control on the basis of that impact alone alleviates the concern of the commenters. HUD will continue to apply the same methodology to calculate the impacts of introduction of a new data source to avoid the concerns raised by the commenters with the agreed upon language.

E. Comments Regarding Demolition and Rebuilding of Formula Current Assisted Stock (FCAS) Units (§ 1000.318(d))

Comment: Recommended language for demolition and rebuilding should provide maximum flexibility to tribes. One commenter supported the preamble definition of demolition ''as occurring only when a recipient voluntarily demolishes units in order to clear a site for a new replacement unit.'' The commenter also recommended that the Committee define ''demolition'' in a way as to provide maximum flexibility to tribes. Flexibility is important,

according to the commenter, because a significant problem that many tribes face are housing units that are irreparably contaminated by methamphetamine production and tribes must engage in time-consuming testing of a substance that cannot be seen or smelled.

The second problem, according to the commenter, is the potentially limited time for rebuilding the home where the weather conditions can delay or completely halt construction from October through May. Tribes should not lose their FCAS funds if these homes are not rebuilt within the one-year time frame. The commenter recommended, therefore, a definition for demolition that takes these concerns into account and allows tribes and TDHEs maximum flexibility in rehabilitation and reconstruction of FCAS units that are destroyed or demolished due to events beyond the control of the tribe/TDHE.

Response: The Committee appreciates the commenter's recommendation to define demolition in a way that maximizes flexibility for tribes. As stated, the intent of § 1000.318(d) is to incentivize tribes to rebuild expeditiously within a reasonable time period. The Committee understands the unique construction constraints faced by some IHBG recipients due to short building seasons, units contaminated by methamphetamine or other contaminants, remote locations and high construction costs and has considered these factors in the structuring of the demolition provision.

Comment: Recommended language for demolition and rebuilding. Another commenter stated that section 302(b)(1)(C) of NAHASDA triggers a one-year time period at the time of demolition, regardless of how demolition occurs. The commenter stated that section 302(b)(1)(C) does not require completion of the unit within the one-year period, but requires that the construction process begin within one year of the demolition. Based on this interpretation of the statute, the commenter recommended that the Committee adopt the following language:

- If a FCAS unit is demolished, it will continue to be eligible as a FCAS unit if the following conditions are met:
  - Construction of a replacement unit begins within one year of the time the original unit is demolished. If the unit is demolished by the occurrence of a natural disaster or fire, demolition shall be defined to occur on the date of the event. If the unit is demolished by the voluntary act of the recipient, demolition shall be defined to occur on the date that the replacement unit is demolished to a point where construction can commence;
  - The replacement unit is complete within 24 months from the commencement of construction, except that if more than 5 units are being replaced, the time for completion of the units shall be 36 months.

Response: The Committee appreciates the recommendation submitted by the commenter on the demolition provision pursuant to § 1000.318(d). The Committee considered the proposed language but ultimately concluded that the statute requires that rebuilding be completed within one year of the demolition. The Committee agreed by consensus, however, to a revised § 1000.318(d) that provides that the one-year clock does not begin until demolition is complete.

Comment: Recommended language for demolition and rebuilding based on defining the terms ''demolish'' and ''rebuilds''. Another commenter wrote that the purposes of the statute is to create an incentive for tribes to expeditiously rebuild housing units that are so badly damaged, as to require demolition and to give tribes a reasonable period of time to rebuild. The commenter wrote that Congressional intent was to incentivize rebuilding in a reasonable time but balance that goal with the realities that Indian country suffers not only from remoteness but short construction seasons. The commenter recommended that the Committee define the terms ''demolish'' and ''rebuilds'' using a standard dictionary definition and consistent with Congressional intent. With regard to the term ''demolish'' the commenter stated that standard dictionary definitions convey a sense of completeness and define this term as requiring a deliberate, human, caused process. In defining ''rebuilds'' the commenter notes that the statute uses the present active tense. With these foundations, the commenter recommends that the Committee adopt the following provision:

- If an affordable housing unit is demolished and rebuilding occurs within 1 year of demolition of the unit, the unit may continue to be considered Formula Current Assisted Stock.
- As used in this subsection:
  - Demolition'' means the intentional act or process of the tribe, and demolition occurs when the structure is completely destroyed and its component parts, including demolition debris, are removed from the site; and
  - Rebuilding occurs when the tribe has made substantial, initial, on-going site improvements to the site of the replacement housing unit, including laying or altering the foundation.

Response: The Committee appreciates the commenter's thoughtful responses on the demolition issue posed in the proposed rule. Specifically, the comments regarding the past and present tense of the terms ''demolish'' and ''rebuilds'' respectively, as used in the statute, offered the Committee a useful starting point for developing a revised section addressing demolition. The Committee also agrees that the purpose of the statute is to create an incentive for tribes to expeditiously rebuild housing units. The revised demolition regulation agreed to by consensus at § 1000.318(d) incorporates and builds on the comments provided.

F. Other Issues and Comments.

Comment: There is a need for a federally conducted National Tribal Survey. Several commenters recommended that tribes continue to find common ground on changes to the IHBG funding formula and push for the self-determined goal of building tribally driven data sources. These commenters also stated that it is the duty of HUD and the Federal government to assist tribes in seeking data sources that most appropriately reflect and represent the conditions and characteristics of their tribal communities and that this includes providing tribes the training and technical assistance to develop their own tribal data sources for housing and community development purposes.

Other commenters recommended that HUD should consider developing or using a federally conducted national tribal survey to collect demographic and enrollment information for NAHASDA-eligible tribes. According to the commenters, a National Tribal Survey, jointly designed by HUD and tribes, would collect demographic data directly related to the IHBG formula. The commenters wrote that the survey could be administered by the Census Bureau under contract from HUD, much the same way the American Housing Survey is now done for special data related to public housing information. The commenters concluded that there would be many advantages to such a survey, including a focus on information essential for IHBG fund allocation, providing flexibility in survey design to accommodate future changes to the IHBG formula, and using said survey to inform a more accurate allocation of funds in other Indian programs like education and health care.

Response: The Committee emphasizes that the IHBG Negotiated Rulemaking Data Study Group examined the development of a National Tribal

Survey that would rely on tribally driven data sources. The pros and cons of the Committee's analysis are presented in the Final Data Study Group Report and, more particularly, the individual data source evaluations in the appendices. No consensus could be reached on using any alternative to ACS data, including a National Tribal Survey. HUD has stated that it does not have the resources to design or administer a National Tribal Survey, or to audit data collection efforts to ensure that data from tribal sources is being collected in a fair and equitable manner, and thus unusable in the IHBG formula.

Comment: Impact on other organizations that use the IHBG factors or data. One commenter responded to HUD's request for public comment regarding how the proposed changes to the IHBG formula would potentially impact nonprofits, state and local governments, and other organizations that are not IHBG recipients. The commenter stated that the effect of the IHBG formula on outside stakeholders should have no bearing on the implementation of changes to the IHBG formula. The commenter also stated that the purpose of the IHBG formula is to allocate federal Indian Housing resources to eligible recipients to address the housing needs of Alaska Native and American Indian families and that impact on other entities is not within the scope of factors that HUD may consider in the course of negotiating the IHBG formula.

Response: The Committee is aware that some organizations, such as the U.S. Department of Transportation, use the IHBG formula for various reasons. Nevertheless, the Committee agrees with the commenter that the effect of the IHBG formula on these outside stakeholders should have no bearing on whether such changes are implemented. As stated by the commenter, section 302 of NAHASDA delineates the factors that the Committee must consider in determining the formula. HUD is not authorized to consider in the course of negotiating the IHBG formula how elements of the formula might impact entities that are not IHBG recipients.

Comment: The negotiated rulemaking was successful. One commenter thanked everyone who was involved in the negotiated rulemaking process and described the process as thoughtful and deliberate, and the final product the best that could be expected given the limitations on current funding for the program. The commenter expressed support for all of the final proposed changes, and described the rule as necessary, fair and consistent with the mission of the Committee and the IHBG Program overall, and developed in the spirit of compromise. The commenter concluded that moving to an updated data source is the single greatest achievement of this Committee and urged HUD to adopt this final language and begin implementation as provided in the proposed rule. Another commenter wrote to recognize the many significant, positive outcomes of this negotiated rulemaking. This commenter stated that despite the somewhat distributive nature of this process, HUD and tribes were able to reach consensus on numerous important issues, including the minimum allocations of carryover funds, the undisbursed funds factor, the volatility control and establishing adjustments for undercounts. Both commenters agreed that the negotiated rulemaking process was successful.

Response: The Committee appreciates these comments and agrees that this Negotiated Rulemaking was educational, productive and successful. The Committee also extends its appreciation to each tribal representative and to HUD leadership and staff for their hard work and dedication to the Negotiated Rulemaking process, and believes that this final rule reflects the thoughtful and deliberate work of everyone involved in this rulemaking, The Committee believes that the success of the Negotiated Rulemaking rests on the spirit of cooperation and hard work that tribal representatives and HUD leadership and staff brought to the negotiations.

IV. Findings and Certifications

Regulatory Review—Executive Orders 12866 and 13563

Under Executive Order 12866 (Regulatory Planning and Review), a determination must be made whether a regulatory action is significant and, therefore, subject to review by the Office of Management and Budget (OMB) in accordance with the requirements of the order. Executive Order 13563 (Improving Regulations and Regulatory Review) directs executive agencies to analyze regulations that are ''outmoded, ineffective, insufficient, or excessively burdensome, and to modify, streamline, expand, or repeal them in accordance with what has been learned.'' Executive Order 13563 also directs that, where relevant, feasible, and consistent with regulatory objectives, and to the extent permitted by law, agencies are to identify and consider regulatory approaches that reduce burdens and maintain flexibility and freedom of choice for the public. This final rule was determined not to be a ''significant regulatory action'' as defined in section 3(f) of Executive Order 12866, and therefore was not reviewed by OMB.

Paperwork Reduction Act

The information collection requirements contained in this rule have been approved by OMB in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520) and assigned OMB Control Number 2577–0218. In accordance with the Paperwork Reduction Act, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless the collection displays a currently valid OMB control number.

Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*) generally requires an agency to conduct a regulatory flexibility analysis for any rule that is subject to notice and comment rulemaking requirements, unless the agency certifies that the rule will not have a significant economic impact on a substantial number of small entities. The requirements of this rule apply to Indian tribal governments and their tribal housing authorities. Tribal governments and their tribal housing authorities are not covered by the definition of ''small entities'' under the RFA. Accordingly, the undersigned certifies that this rule will not have a significant impact on a substantial number of small entities.

Executive Order 13132, Federalism

Executive Order 13132 (entitled ''Federalism'') prohibits, to the extent practicable and permitted by law, an agency from promulgating a regulation that has federalism implications and either imposes substantial direct compliance costs on state and local governments and is not required by statute, or preempts state law, unless the relevant requirements of section 6 of the Executive Order are met. This rule does not have federalism implications and does not impose substantial direct compliance costs on state and local governments or preempt state law within the meaning of the Executive Order.

Unfunded Mandates Reform Act

Title II of the Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) (UMRA) establishes requirements for federal agencies to assess the effects of their regulatory actions on state, local, and tribal governments, and on the private sector. This rule will not impose any federal mandate on any

state, local, or tribal government, or on the private sector, within the meaning of UMRA.

Environmental Review

This rule is a statutorily required establishment of a rate determination that does not constitute a development decision that affects the physical condition of specific project areas or buildings sites. Accordingly, under 24 CFR 50.19(c)(6), this rule is categorically excluded from environmental review under the National Environmental Policy Act of 1969 (42 U.S.C. 4321).

Catalog of Federal Domestic Assistance

The Catalog of Federal Domestic Assistance Number (CFDA) for Indian Housing Block Grants is 14.867, and the CFDA for Title VI Federal Guarantees for Financing Tribal Housing Activities is 14.869.

List of Subjects in 24 CFR Part 1000

Aged, Community development block grants, Grant programs—housing and community development, Grant programs—Indians, Indians, Individuals with disabilities, Public housing, Reporting and recordkeeping requirements.

Accordingly, for the reasons described in the preamble, HUD amends 24 CFR part 1000 as follows:

PART 1000—NATIVE AMERICAN HOUSING ACTIVITIES

■ 1. The authority citation for 24 CFR part 1000 continues to read as follows:

Authority: 25 U.S.C. 4101 *et seq.;* 42 U.S.C. 3535(d).

■ 2. In § 1000.302, revise paragraph (2)(i) of the definition of ''Formula area'' to read as follows:

§ 1000.302 What are the definitions applicable for the IHBG formula?

* * * * *

Formula area. * * *

(2) * * *

(i) For a geographic area not identified in paragraph (1) of this definition, and for expansion or re-definition of a geographic area from the prior year, including those identified in paragraph (1) of this definition, the Indian tribe must submit, on a form agreed to by HUD, information about the geographic area it wishes to include in its Formula Area, including proof that the Indian tribe, where applicable, has agreed to provide housing services pursuant to a Memorandum of Agreement (MOA) with the tribal and public governing entity or entities of the area, or has attempted to establish such an MOA, and is providing substantial housing services and will continue to expend or obligate funds for substantial housing services, as reflected in its Indian Housing Plan and Annual Performance Report for this purpose.

* * * * *

§ 1000.306 [Amended]

■ 3. In § 1000.306, remove paragraph (c).

■ 4. Revise § 1000.310 to read as follows:

§ 1000.310 What are the components of the IHBG formula?

The IHBG formula consists of four components:

(a) Formula Current Assisted Stock (FCAS) (§ 1000.316);

(b) Need (§ 1000.324);

(c) 1996 Minimum (§ 1000.340); and

(d) Undisbursed IHBG funds factor (§ 1000.342).

■ 5. In § 1000.316, add paragraph (c) to read as follows:

§ 1000.316 How is the Formula Current Assisted Stock (FCAS) Component developed?

* * * * *

(c) *Conversion.* Conversion of FCAS units from homeownership (Mutual Help or Turnkey III) to low-rent or from low-rent to a home ownership program.

(1) If units were converted before October 1, 1997, as evidenced by an amended ACC, then those units will be counted for formula funding and eligibility purposes as the type of unit to which they were converted.

(2) If units were converted on or after October 1, 1997, the following applies:

(i) *Funding type.* Units that converted after October 1, 1997 will be funded as the type of unit specified on the original ACC in effect on September 30, 1997.

(ii) *Continued FCAS eligibility.* Whether or not it is the first conversion, a unit converted after October 1, 1997, will be considered as the type converted to when determining continuing FCAS eligibility. A unit that is converted to low-rent will be treated as a low-rent unit for purposes of determining continuing FCAS eligibility. A unit that is converted to homeownership will be treated as a homeownership unit for purposes of determining continuing FCAS eligibility.

(3) The Indian tribe, TDHE, or IHA shall report conversions on the Formula Response Form.

■ 6. Amend § 1000.318 by redesignating paragraphs (b) and (c) as paragraphs (c) and (d), respectively, and adding paragraphs (b) and (e) to read as follows:

§ 1000.318 When do units under Formula Current Assisted Stock cease to be counted or expire from the inventory use for the formula?

* * * * *

(b)(1) A Mutual Help or Turnkey III unit not conveyed after the unit becomes eligible for conveyance by the terms of the MHOA may continue to be considered Formula Current Assisted Stock only if a legal impediment prevented conveyance; the legal impediment continues to exist; the tribe, TDHE, or IHA has taken all other steps necessary for conveyance and all that remains for conveyance is a resolution of the legal impediment; and the tribe, TDHE, or IHA made the following reasonable efforts to overcome the impediments:

(i) No later than four months after the unit becomes eligible for conveyance, the tribe, TDHE, or IHA creates a written plan of action, which includes a description of specific legal impediments as well as specific, ongoing, and appropriate actions for each applicable unit that have been taken and will be taken to resolve the legal impediments within a 24-month period; and

(ii) The tribe, TDHE, or IHA has carried out or is carrying out the written plan of action; and

(iii) The tribe, TDHE, or IHA has documented undertaking the plan of action.

(2) No Mutual Help or Turnkey III unit will be considered FCAS 24 months after the date the unit became eligible for conveyance, unless the tribe, TDHE, or IHA provides evidence from a third party, such as a court or state or federal government agency, documenting that a legal impediment continues to prevent conveyance. FCAS units that have not been conveyed due to legal impediments on December 22, 2016 shall be treated as having become eligible for conveyance on December 22, 2016.

* * * * *

(e) A unit that is demolished pursuant to a planned demolition may be considered eligible as a FCAS unit if, after demolition is completed, the unit is rebuilt within one year. Demolition is completed when the site of the demolished unit is ready for rebuilding. If the unit cannot be rebuilt within one year because of relative administrative capacities and other challenges faced by the recipient, including, but not limited to geographic distribution within the Indian area and technical capacity, the Indian tribe, TDHE or IHA may request approval for a one-time, one-year extension. Requests must be submitted

in writing and include a justification for the request.

■ 7. In § 1000.326, revise paragraph (a)(3), redesignate paragraph (c) as paragraph (d), and add a new paragraph (c) to read as follows:

§ 1000.326 What if a formula area is served by more than one Indian tribe?

(a) * * *

(3) In cases where a State recognized tribe's formula area overlaps with the formula area of a Federally recognized Indian tribe, the Federally recognized Indian tribe receives the allocation for the formula area up to its population cap, and the State recognized tribe receives the balance of the overlapping area (if any) up to its population cap.

* * * * *

(c) Upon receiving a request for expansion or redefinition of a tribe's formula area, if approving the request would create an overlap, HUD shall follow the notice and comment procedures set forth in paragraph (2)(ii) of the definition of ''Formula area'' in § 1000.302.

* * * * *

■ 8. Add § 1000.329 to read as follows:

§ 1000.329 What is the minimum total grant allocated to a tribe if there is carryover funds available?

(a) If in any given year there are carryover funds, then HUD will hold the lesser amount of $3 million or available carryover funds for additional allocations to tribes with grant allocations of less than 0.011547 percent of that year's appropriations. All tribes eligible under this section shall receive a grant allocation equal to 0.011547 percent of that year's appropriations.

(b)(1) If the set-aside carryover funds are insufficient to fund all eligible tribes at 0.011547 percent of that year's appropriations, the minimum total grant shall be reduced to an amount which can be fully funded with the available set-aside carryover funds.

(2) If less than $3 million is necessary to fully fund tribes under paragraph (a) of this section, any remaining carryover amounts of the set aside shall be carried forward to the next year's formula.

(c) To be eligible, an Indian tribe must certify in its Indian Housing Plan the presence of any households at or below 80 percent of median income.

(d) For purposes of this section, carryover funds means grant funds voluntarily returned to the formula or not accepted by tribes in a fiscal year.

■ 9. Revise § 1000.330 to read as follows:

§ 1000.330 What are the data sources for the need variables?

(a) The sources of data for the need variables shall be data that are available and collected in a uniform manner that can be confirmed and verified for all AIAN households and persons living in an identified area. Until fiscal year 2018, the data used are 2000 U.S. Decennial Census data and any HUD-accepted Census challenges. The 2000 U.S. Decennial Census data shall be adjusted annually using IHS projections based upon birth and death rate data provided by the National Center for Health Statistics.

(b)(1) Beginning fiscal year 2018, the data source used to determine the AIAN persons variable described in § 1000.324(g) shall be the most recent U.S. Decennial Census data adjusted for any statistically significant undercount for AIAN population confirmed by the U.S. Census Bureau and updated annually using the U.S. Census Bureau county level Population Estimates for Native Americans. For Remote Alaska as designated by the U.S. Census Bureau, Alaska Formula Areas in Remote Alaska shall be treated as Reservation and Trust Lands, unless the U.S. Census Bureau includes Remote Alaska in their Census Coverage Measurement or comparable study. The data under this paragraph (b) shall be updated annually using the U.S. Census Bureau county level Population Estimates for Native Americans.

(2) Beginning fiscal year 2018, the data source used to determine the variables described in paragraphs (a) through (f) of § 1000.324 shall initially be the American Community Survey (ACS) 5-year Estimates.

(c) Indian tribes may challenge the data described in this section pursuant to § 1000.336.

■ 10. Add § 1000.331 to read as follows:

§ 1000.331 How will the impacts from adoption of a new data source be minimized as the new data source is implemented?

(a) To minimize the impact of funding changes based on the introduction of a new data source under § 1000.330, in fiscal year 2018 and each year thereafter, if, solely as a direct result of the introduction of a new data source, an Indian tribe's allocation under the need component of the formula is less than 90 percent of the amount it received under the need component in the immediate previous fiscal year, the Indian tribe's need allocation shall be adjusted up to an amount equal to 90 percent of the previous year's need allocation.

(b) Nothing in this section shall impact other adjustments under this part, including minimum funding, census challenges, formula area changes, or an increase in the total amount of funds available under the need component.

(c) In the event of a decrease in the total amount of funds available under the need component, an Indian tribe's adjusted allocation under paragraph (a) of this section shall be reduced by an amount proportionate to the reduced amount available for distribution under the need component of the formula.

(d) Adjustments under paragraph (b) or (c) of this section shall be made to a tribe's need allocation after adjusting that allocation under paragraph (a) of this section.

■ 11. Revise § 1000.336 as follows:

■ a. In paragraph (a)(6), remove ''and'';

■ b. In paragraph (a)(7), remove the period and add in its place ''; and'';

■ c. Add paragraph (a)(8); and

■ d. Revise paragraphs (d), (e), and (f).

The addition and revisions read as follows:

§ 1000.336 How may an Indian tribe, TDHE, or HUD challenge data or appeal HUD formula determinations?

(a) * * *

(8) The undisbursed funds factor.

* * * * *

(d) An Indian tribe or TDHE that seeks to appeal data or a HUD formula determination, and has data in its possession that are acceptable to HUD, shall submit the challenge or appeal in writing with data and proper documentation to HUD. An Indian tribe or TDHE may appeal the undisbursed funds factor no later than 30 days after the receipt of the formula determination. Data used to challenge data contained in the U.S. Census must meet the requirements described in § 1000.330(a). Further, in order for a census challenge to be considered for the upcoming fiscal year allocation, documentation must be submitted by March 30th.

(e) HUD shall respond to all challenges or appeals no later than 45 days after receipt and either approve or deny the appeal in writing, setting forth the reasons for its decision.

(1) If HUD challenges the validity of the submitted data HUD and the Indian tribe or TDHE shall attempt in good faith to resolve any discrepancies so that such data may be included in the formula allocation.

(2) If HUD denies a challenge or appeal, the Indian tribe or TDHE may request reconsideration of HUD's denial within 30 calendar days of receipt of HUD's denial. The request shall be in writing and set forth justification for reconsideration.

(3) HUD shall in writing affirm or deny the Indian tribe's or TDHE's request for reconsideration, setting forth HUD's reasons for the decision, within 20 calendar days of receiving the request. HUD's denial of a request for reconsideration shall constitute final agency action.

(4) If HUD approves the Indian tribe or TDHE's appeal, HUD will adjust to the Indian tribe's or TDHE's subsequent fiscal year allocation to include only the disputed fiscal year(s).

(f) In the event HUD questions whether the data contained in the formula accurately represents the Indian tribe's need, HUD shall request the Indian tribe to submit supporting documentation to justify the data and, if applicable, to provide a commitment to serve the population indicated in the geographic area.

■ 12. Add § 1000.342 to subpart D to read as follows:

§ 1000.342 Are undisbursed IHBG funds a factor in the grant formula?

Yes, beginning fiscal year 2018. After calculating the initial allocation calculation for the current fiscal year by calculating FCAS, need, the 1996 Minimum, and repayments or additions for past over- or under-funding for each Indian tribe, the undisbursed funds factor shall be applied as follows:

(a) The undisbursed funds factor applies if an Indian tribe's initial allocation calculation is $5 million or more and the Indian tribe has undisbursed IHBG funds in an amount that is greater than the sum of the prior 3 years' initial allocation calculations.

(b) If subject to paragraph (a) of this section, the Indian tribe's grant allocation shall be the greater of the initial allocation calculation minus the amount of undisbursed IHBG funds that exceed the sum of the prior 3 years' initial allocation calculations, or its 1996 Minimum.

(c) For purposes of this section, ''undisbursed IHBG funds'' means the amount of IHBG funds allocated to an Indian tribe in HUD's line of credit control system on October 1 of the fiscal year for which the allocation is made. For Indian tribes under an umbrella TDHE (a recipient that has been designated to receive grant amounts by more than one Indian tribe), if the Indian tribe's initial allocation calculation is $5 million or more, its undisbursed IHBG funds is the amount calculated by multiplying the umbrella TDHE's total balance in HUD's line of credit control system on October 1 of the fiscal year for which the allocation is made by a percentage based on the Indian tribe's proportional share of the initial allocation calculation of all tribes under the umbrella.

(d) Amounts subtracted from an initial allocation calculation under this section shall be redistributed under the need component among all Indian tribes not subject to paragraph (a) of this section (while also retaining the 1996 Minimum).

■ 13. Revise appendices A and B of part 1000 to read as follows:

Appendix A to Part 1000—Indian Housing Block Grant Formula Mechanics

This appendix shows the different components of the Indian Housing Block Grant (IHBG) formula. The following text explains how each component of the IHBG formula is calculated.

1. The first step in running the IHBG formula is to determine the amount available for allocation in the Fiscal Year (FY). It is the sum of:

(a) The FY appropriation for the IHBG program less amounts in the Appropriations Act mandated for purposes other than the formula allocation.

(b) The net amount, if any, made available as a result of corrections for over- or under-allocations in prior FYs.

(c) The amount, if any, made available pursuant to § 1000.536.

(d) The amounts, if any, made available because tribes voluntarily returned, or did not accept, the amounts allocated to them in prior FYs, defined as ''carryover'' (see § 1000.329).

2. If there is carryover as defined in § 1000.329, the amount of carryover up to $3 million, is then held aside for allocation under the minimum total grant provisions of the formula (see 11 below).

3. The IHBG formula first calculates the amount each tribe is allocated under the Formula Current Assisted Stock (FCAS) component (See §§ 1000.310 through 1000.322). The FCAS component is comprised of two parts, Operating Subsidy (§ 1000.316(a)) and Modernization (§ 1000.316(b)).

(a) The Operating Subsidy component is calculated in two steps, as follows:

(i) Each tribe's counts of Low Rent, Homeownership (Mutual Help and Turnkey III), and Section 8 units are multiplied by the National Per Unit Subsidy for operations for that category of unit, which is a 1996 index for the type of unit that is adjusted for inflation (see § 1000.302 defining National Per Unit Subsidy). The amounts are summed to create an initial calculation of the operating subsidy component.

(ii) The initial operating subsidy component amount is then adjusted for local area costs, using an adjustment factor called the AELFMR. The AELFMR factor is calculated for each tribe in three steps. First, an Allowable Expense Level (AEL) factor is calculated by dividing the tribe's AEL, a historic per-unit measure of operating cost, by the national weighted average AEL (see § 1000.302 defining Allowable Expense Level). Second, a Fair Market Rent (FMR) factor is calculated by dividing the tribe's FMR amount, an area-specific index published annually by HUD (see § 1000.302 Fair Market Rent factor), by the national weighted average FMR. Third, an AELFMR factor is created by assigning each tribe the greater of its AEL or FMR factor, and dividing that figure by the national weighted average AELFMR. In all cases, when the national average figure is calculated, tribes are weighted by the amount of their initial operating subsidy as calculated in 3(a)(i). (See § 1000.320).

(b) The Modernization component is determined using two methods depending on the number of public housing units that a tribe's housing authority operated prior to the Native American Housing and Self-Determination Act.

(i) For all tribes, the number of Low Rent, Mutual Help, and Turnkey III units are multiplied by the National Per Unit Subsidy for modernization from 1996 adjusted for inflation (see § 1000.302 defining National Per Unit Subsidy).

(ii) For Indian tribes with an Indian Housing Authority (IHA) that owned or operated fewer than 250 units on October 1, 1997, an alternative modernization component is calculated from the amount of funds the IHA received under the assistance program authorized by Section 14 of the 1937 Act (not including funds provided as emergency assistance) for FYs 1992 through 1997 (see § 1000.316(b)(2)). If this alternative calculation is greater than the amount calculated in paragraph (a) above, it is used to calculate the tribe's modernization component.

(iii) The Modernization component is then multiplied by a local area cost adjustment factor based on the Total Development Cost (TDC) for the tribe (see § 1000.302) divided by the national weighted average of all TDCs weighted by each tribe's pre-adjustment Modernization calculation in paragraph (b)(i) or (ii) above as applicable.

4. The total amounts calculated under the FCAS component for each tribe are then added together to determine the national total amount allocated under the FCAS component. That total is subtracted from the funds available for allocation less the carryover amount held aside for allocation under the minimum total grant provision in § 1000.329. The remainder is the total amount available for allocation under the need component of the IHBG formula.

5. The first step in calculating need component is identifying weighted needs variables and adjusting for local area cost differences.

(a) Need is first calculated using seven factors, where each factor is a tribe's share of the national totals for each of seven variables. The data used for the seven variables is described in § 1000.330. The person count variable is adjusted for statistically significant undercounts for reservations, trust lands and remote Alaska and for growth in population since the latest Decennial Census. The Population Cap provision in § 1000.302 Formula Area (5) is then applied. Needs data are capped if the American Indian and Alaska Native (AIAN) population counts exceed twice tribal enrollment unless a tribe

can demonstrate that it serves more than twice as many non-tribal members as tribal members, in which case the cap is adjusted upward.

The factors are weighted as set forth in § 1000.324, as follows:

(i) 22 percent of the amount available for allocation under the needs component are allocated by the share of the total AIAN households paying more than 50 percent of their income for housing and living in each tribe's Formula Area (see § 1000.302);

(ii) 25 percent are allocated by the share of the total AIAN households living in overcrowded housing and/or without kitchen or plumbing in each tribe's Formula Area;

(iii) 15 percent are allocated by the share of the total AIAN households with an annual income less than or equal to 80 percent of Formula Median Income (see § 1000.302) living in each tribe's Formula Area less the tribe's number of FCAS.

(iv) 13 percent are allocated by the share of AIAN households with annual income less than or equal to 30 percent of Formula Median Income living in each tribe's Formula Area;

(v) 7 percent are allocated by the share of AIAN households with annual income between 30 percent and 50 percent of Formula Median Income living in each tribe's Formula Area;

(vi) 7 percent are allocated by the share of AIAN households with annual income between 50 percent and 80 percent of Formula Median Income living in each tribe's Formula Area;

(vii) 11 percent are allocated by the share of AIAN persons living in each tribe's Formula Area.

(b) The result of these calculations for each tribe is then multiplied by a local area cost adjustment based on the Total Development Cost for the tribe (see § 1000.302) divided by the national weighted average of TDCs weighted by each tribe's pre-adjustment need calculation. (See § 1000.325).

6. Each tribe's initial need allocation amount is then adjusted under the minimum need allocation provision of § 1000.328. Tribes that are allocated less than $200,000 under the FCAS component of the IHBG formula and that certify the presence of any households at or below 80 percent of median income in their Indian Housing Plans will be allocated no less than a specified minimum under the needs component of the formula. The specified minimum amount shall equal 0.007826 percent of the appropriation for that FY after set-asides. The increase in funding for the tribes allocated the minimum need amount is funded by a reallocation from other tribes whose needs allocation exceeds the minimum need amount. This is necessary in order to keep the total allocation within the appropriation level (See § 1000.328).

7. Whenever a new Data Source is first introduced, provision is made to moderate extreme impacts through phase down adjustments. For purposes of these adjustments, new data sources (see § 1000.331) include the initial introduction of the American Community Survey and 2010 Decennial Census in 2018, and the initial introduction of the 2020 Decennial Census when it becomes available. Tribes whose allocation under the need component decrease by more than ten percent in the first year of introduction will have that decrease moderated by subsequent adjustments, as required to prevent a drop of more than ten percent per year in the tribes' needs allocation attributable solely to the introduction of the New Data Source. After allocation adjustments are made under § 1000.331 for a FY, the needs allocation of an Indian tribe whose needs allocation increased as a result of the introduction of a New Data Source under § 1000.331 shall be adjusted downward proportionate to its share of the total increase in funding resulting from the introduction of a New Data Source to keep the overall needs allocation within available appropriations.

8. A tribe's preliminary total allocation for a grant is calculated by summing the amounts calculated under the FCAS and need components. This amount is compared to how much a tribe received in FY 1996 for operating subsidy and modernization under the 1937 Housing Act. If a tribe received more in FY 1996 for operating subsidy and modernization than it does under the IHBG formula allocation, its preliminary total allocation is adjusted up to the FY 1996 amount (See § 1000.340(b)). Indian tribes receiving more under the IHBG formula than in FY 1996 have their grant allocations adjusted downward to offset the upward adjustments for the other tribes.

9. The initial allocation amount for the current FY is calculated by adding any adjustments for over- or under-funding occurring in prior FYs to the allocation calculated in the previous step. These adjustments typically result from late reporting of FCAS changes, or conveyances which occur in a timely manner following the removal of units from eligibility due to conveyance eligibility.

10. The Undisbursed Funds Factor component is calculated based on the initial allocation amounts calculated above. Tribes with an initial allocation of $5 million or more and undisbursed IHBG grant amounts (the amount available to the tribe in HUD's line of credit control on October 1 of the FY for which the allocation is being made) in an amount greater than the sum of the prior 3 years' initial allocation calculations will have their initial allocation amount adjusted down by the difference between the tribe's undisbursed grant amounts and the sum of its prior 3 years' initial allocation calculations. If this adjustment would bring the tribe below its FY 1996 minimum (see § 1000.340(b)), then the tribe will be allocated its FY 1996 minimum. The sum of the adjustments will be reallocated among the other tribes proportionally under the need component.

11. A final adjustment is made under § 1000.329 which allocates available carryover amounts up to $3 million to achieve minimum total allocations. Tribes that certify in their Indian Housing Plans the presence of any eligible households at or below 80 percent of median income and whose current FY formula allocation after the Undisbursed Funds Factor adjustment determined in the preceding step is less than 0.011547 percent of the FY appropriation after set-asides, will have their allocation adjusted upwards to 0.011547 percent of the FY appropriation after set-asides, or to a lesser percentage which can be achieved for all eligible tribes with available carryover held for this adjustment (see 2 above).

Appendix B to Part 1000—IHBG Block Grant Formula Mechanisms

1. The first step in running the Indian Housing Block Grant (IHBG) formula is to determine the total amount available for allocation in the current Fiscal Year (FY).

ALLOCAMT = APPROP + ADJ1 + ADJ2 + CARRYOVER.

Where:

ALLOCAMT = amount available for allocation under the formula.

APPROP = current FY appropriation for the IHBG program less amounts in the Appropriations Act mandated for purposes other than the formula allocation.

ADJ1= net amount, if any, made available as a result of corrections for over-or under allocations in prior FYs.

ADJ2 = amount, if any, made available under § 1000.536.

CARRYOVER = amounts, if any, made available because tribes voluntarily returned, or did not accept, the amounts allocated to them in prior FYs.

2. If there is carryover as defined in § 1000.329, the amount of carryover up to $3 million, is then held aside for allocation under the minimum total grant provisions of the formula (see Step 10), then:

MGHOLD = amount set-aside for allocation under minimum total grant provision.

If CARRYOVER = 0, MGHOLD = 0.

If CARRYOVER > 0 and CARRYOVER < = $3 million, MGHOLD = CARRYOVER.

If CARRYOVER > $3 million, MGHOLD = $3 million.

3. The FCAS component is calculated first. FCAS consists of two parts, Operating Subsidy (OPSUB) and Modernization (MOD), such that:

FCAS = OPSUB + MOD.

a. OPSUB is calculated in two steps, as follows:

(i) First, the number of Low-Rent, Section 8 and homeownership units are multiplied by the applicable national per unit subsidy (§ 1000.302 National Per Unit Subsidy). The amounts are summed to create an initial calculation of the Operating Subsidy component.

OPSUB1 = [LR * LRSUB] + [(MH + TK) * HOSUB] + [S8 * S8SUB].

Where:

OPSUB1 = initial calculation of Operating Subsidy component.

LR = number of Low-Rent units.

LRSUB = national per unit subsidy for Low-Rent units ($2,440 * INF).

INF = adjustment for inflation since 1995, as determined by the Consumer Price Index for housing.

MH + TK = number of Mutual Help and Turnkey III units.

HOSUB = national per unit subsidy for Homeownership units ($528 * INF).

S8 = number of Section 8 units.
S8SUB = national per unit subsidy for Section 8 units = ($3,625 * INF).

(ii) The initial Operating Subsidy component amount is then adjusted for local area costs, using an adjustment factor called the AELFMR. The AELFMR factor is calculated for each tribe in three steps. First, an AEL factor is calculated by dividing the tribe's Allowable Expense Level (AEL), a historic per-unit measure of operating cost, by the national weighted average AEL (see § 1000.302 defining Allowable Expense Level)

AEL FACTOR = AEL/NAEL.

Where:

AEL = local Allowable Expense Level.
NAEL = national weighted average for AEL, where the weight is a tribe's initial calculation of operating subsidy.

Second, an FMR factor is calculated by dividing the tribe's Fair Market Rent amount (FMR), an area-specific index published annually by HUD (see § 1000.302 Fair Market Rent factor), by the national weighted average FMR.

FMR FACTOR = FMR/NFMR.

Where:

FMR= local Fair Market Rent.
NFMR = national weighted average for FMR, where the weight is a tribe's initial calculation of operating subsidy.

Third, an AELFMR factor is created by assigning each tribe the greater of its AEL or FMR factor, and dividing that figure by the national weighted average AELFMR. In all cases, when the national average figure is calculated, tribes are weighted by the amount of their initial operating subsidy as calculated in 3(a)(i) above. (See § 1000.320).

AELFMRFACTOR = final local area cost adjustment factor (AELFACTOR or FMRFACTOR)/NAELFMR.

Where:

NAELFMR = national weighted average for greater of AEL Factor or FMR factor, where weight is a tribe's initial calculation of operating subsidy

Finally, the AELFMR factor is used to adjust the initial operating subsidy calculation for differences in local area costs.

OPSUB = OPSUB1 * AELFMRFACTOR.

Where:

OPSUB = Operating Subsidy component after adjustment for local cost differences.

b. The modernization component, MOD, is calculated by two different methods, depending on whether the tribe had an Indian housing authority (IHA) that owned or operated more than 250 public housing units on October 1, 1997.

(i) MOD1 is calculated for all tribes and considers the number of Low-Rent, and Mutual Help and Turnkey III FCAS units. Each of these is adjusted by the national per-unit modernization subsidy

MOD1 = [LR + MH + TK] * MODPU.

Where:

LR = number of Low-Rent units.
MH = number of Mutual Help units.
TK = number of Turnkey III units.
MODPU = national per-unit amount for modernization in 1996 adjusted for inflation ($1,974 * INF).
INF = adjustment for inflation since 1995, as determined by the Consumer Price Index for housing.

(ii) MODAVG is calculated only for tribes that had an IHA that owned or operated fewer than 250 public housing units on October 1, 1997, as the annual average amount they received for FYs 1992 through 1997 under the assistance program authorized by section 14 of the 1937 Act (not including emergency assistance). If this alternative calculation is greater than the amount calculated in (i), it is used to calculate the tribe's modernization component.

MODAVG = Average (FY 1992 to FY 1997) amount received by Section 14 of the 1937 Act.

If MODAVG > MOD1, MOD1 = MODAVG.

c. The modernization calculation is adjusted for local area costs:

MOD = MOD1 * (TDC/NTDC).

Where:

TDC = Local Total Development Costs defined in § 1000.302.
NTDC = weighted national average for TDC, where the weight is the initial calculation of modernization amount of tribe with CAS.

4. Now that calculation for FCAS is complete, the amount allocated using the need component of the formula can be determined:

NEEDALLOCAMT = ALLOCAMT − MGHOLD − NATCAS.

Where:

NEEDALLOCAMT = amount allocated using the need component of the formula.
ALLOCAMT = amount available for allocation under the formula.
MGHOLD = amount held for allocation under minimum total grant provision.
NATCAS = national summation of FCAS allocation for all tribes.

5. The first step in calculating needs is identifying weighted needs variables and adjusting for local area cost differences.

a. The basic needs calculation uses seven weighted criteria based on population and housing data in a tribe's Formula Area or share of Formula Area if Formula Areas overlap (see § 1000.302 Formula Area and § 1000.326) to allocate the funds available for the needs component. The person count variable is adjusted for statistically significant undercounts for reservations, trust lands and remote Alaska and for changes in population since the latest Decennial Census.

PERADJ = PER * UCFACTOR * POPCHGFACTOR.

Where:

PER = American Indian and Alaskan Native (AIAN) persons as reported in the most recent Decennial Census.
UCFACTOR= 1+ the percentage undercount identified by the Census by type of land (in 2010 1.0488 for reservation and trust lands only and assumed also to apply to remote Alaska).
POPCHGFACTOR = the ratio of the most recent AIAN Census population estimate for county to the AIAN count for county from the Decennial Census.

The Population Cap provision in § 1000.302 Formula Area (5) is then applied. Needs data are capped if AIAN population counts exceed twice tribal enrollment unless a tribe can demonstrate that it serves more than twice as many non-tribal members as tribal members, in which case the cap is adjusted upward.

POPCAPTEST=1 if PERADJ > TEmultiplier * TE

If POPCAPTEST=1, (tribes subject to Population Cap) then:

PER = TEmultiplier * TE
POPCAPADJF = PER/PERADJ

For tribes NOT subject to Population Cap,
PER = PERADJ and POPCAPADJF = 1.

Where:

POPCAPTEST = an indicator showing whether a tribe's needs data must be adjusted downward because its Formula Area population is disproportionally large relative to tribe's enrollment,
TEmultiplier = 2, or a larger factor if justified by tribe on annual basis.
TE = Tribal enrollment.
POPCAPADJF = factor used to adjust household needs variables.

An initial calculation of the needs component is then calculated by determining each tribe's share of national totals on each variable, and applying weights to the variables as specified in regulation.

BASENEED = [(0.11 * (PER)/NPER) + (0.13 * HHLE30/NHHLE30) + (0.07 * HH30T50/NHH30T50) + (0.07 * HH50T80/NHH50T80) + (0.25 * OCRPR/NOCRPR) + (0.22 * SCBTOT/NSCBTOT) + (0.15 * HOUSHOR/NHOUSHOR)] * NEEDALLOCAMT.

Where:

PER = count of AIAN persons after adjustments.
NPER = national total of PER.
HHLE30 = count of AIAN households less than 30% of formula median income multiplied by POPCAPADJF.
NHHLE30 = national total of HHLE30.
HH30T50 = count of AIAN households 30% to 50% of formula median income multiplied by POPCAPADJF.
NHH30T50 = national total of HH30T50.
HH50T80 = count of AIAN households 50% to 80% of formula median income multiplied by POPCAPADJF.
NHH50T80 = national total of HH50T80.
OCRPR = count of AIAN households crowded or without complete kitchen or plumbing multiplied by POPCAPADJF.
NOCRPR = national total of OCRPR.
SCBTOT = count of AIAN households paying more than 50% of their income for housing multiplied by POPCAPADJF.
NSCBTOT = national total SCBTOT.
HOUSHOR = a measure of housing shortage calculated as (HHLE30 + HH30T50 + HH50T80)—(LR + MH + TKIII)
NHOUSHOR = national total of HOUSHOR.
NEEDALLOCAMT = amount allocated using the need component of the formula.

b. The basic needs calculation is adjusted to reflect differences in local area costs.

NEED = BASENEED * (TDC/NATDC).

Where:

TDC = Local Total Development Costs defined in § 1000.302.

NATDC = average for TDC for all tribes weighted using BASENEED.

6. The need allocation computed above is adjusted to take into account the minimum needs provision. Tribes allocated less than $200,000 under the FCAS component of the IHBG formula and that certify the presence of any households at or below 80 percent of median income in their Indian Housing Plan are allocated an additional amount so their needs allocation equals 0.007826 percent of the available appropriations for that FY after set-asides.

MINNEED = APPROP * 0.00007826.

Where:

APPROP = current FY appropriation for the IHBG program less amounts in the Appropriations Act mandated for purposes other than the formula allocation.

If in the first need computation, a qualified tribe is allocated less than the minimum needs funding level, its need allocation will go up. Other tribes whose needs allocations are greater than the minimum needs amount will have their allocations adjusted downward to keep the total allocation within available funds:

If NEED < MINNEED and FCAS < $200,000 and income-based need has been identified in a tribe's IHP, then NEED1 = MINNEED.

If NEED > = MINNEED, then NEED1 = NEED1 − {UNDERMIN$ * [(NEED1 − MINNEED)/OVERMIN$]}.

Where:

MINNEED = minimum needs amount.

UNDERMIN$ = for all tribes qualifying for an increase under the minimum needs provision, sum of the differences between MINNEED and NEED1.

OVERMIN$ = for all tribes with needs allocations larger than the minimum needs amount, the sum of the difference between NEED1 and MINNEED.

7. Whenever a new data source (see § 1000.331) is first introduced, provision is made to moderate extreme impacts through phase down adjustments. Tribes whose allocation under the need component decrease by more than ten percent in the first year of introduction will have that decrease moderated by subsequent adjustments, as required to prevent a drop of more than ten percent per year in the tribes' needs allocation attributable solely to the introduction of the new data source. A phase down adjustment schedule is calculated, containing adjustment amounts ($PDADJ_n$) for the first and all subsequent FYs, based on the amount allocated to a tribe under the need component in the FY prior to the introduction of the new data source using the old data source. That is,

If NEED1NewDS < 0.9 * NEED1OldDS, then a tribe qualifies for a phase down adjustment (PDADJ) (see § 1000.331(c)).

$PDADJ_n$ = $(((0.9^n)$ * NEED1OldDS)—NEED1NewDS), where n = 1 to ∞ provided $PDADJ_n > 0$ for at least one tribe.

Where:

NEED1NewDS = the amount the tribe would have received in the FY prior to the introduction of the new data source had the new data source been used to determine their need component in that FY.

NEED1OldDS = the amount a tribe actually received in the FY prior to the introduction of the new data source based on the old data source.

$PDADJ_n$ = the size of the adjustment that qualifying tribes will receive in each year n, where the n represents the number of years elapsed since the introduction of the new data source and is equal to one in the first year.

After allocation adjustments are made under § 1000.331 for a FY, the needs allocation of an Indian tribe whose needs allocation increased as a result of the introduction of a new data source shall be adjusted downward proportionate to its share of the total increase in funding resulting from the introduction of a new data source to keep the overall need component within available appropriations. For each tribe which benefitted from the introduction of the new data source, their share of the total gain is calculated and that share is used to determine the amount of contribution they will make in each year following the introduction of the new data source to allow the phase down adjustments to be made without exceeding the amount available for allocation.

If NEED1NewDS > NEED1OldDS, then tribe gained from the introduction of the new data source and contributes a portion of their gain to offset the phase down adjustments.

GAINSHR = (NEED1NewDS –NEED1OldDS)/TOTGAINYR1.

$CONTRIB_n$ = GAINSHR * $TOTPDADJ_n$.

Where:

NEEDd1NewDS = the amount the tribe would have received in the FY prior to the of introduction of the new data source had the new data source been used to determine their needs funding in that FY.

NEED1OldDS = the amount a tribe actually received in the FY prior to the introduction the new data source based on the old data source.

GAINSHR = a tribe's share of the total gains realized by all tribes that benefitted from the introduction of the new data source.

TOTGAINYR1 = the sum of the amounts that tribes gain from the introduction of the new data source in year one.

$CONTRIB_n$ = the size of the contribution that non-qualifying tribes give in each year n, where the n represents the number of years elapsed since the introduction of the new data source and equal to one in the first year.

$TOTPDADJ_n$ = the total amount in each year n required to cover the cost of phase down adjustments in that year, *i.e.* Σ $PDADJ_n$.

The initial needs allocation for each tribe is adjusted based on the phase down adjustments and contribution amounts in the phase down schedule.

NEED1PD = NEED1 +_$PDADJ_n$ − $CONTRIB_n$.

Where:

NEED1PD = a tribe's allocation under the need component after applying the phase down adjustment schedule.

NEED1= the initial calculation of need in the current FY from step 6 above.

$PDADJ_n$ = the size of the adjustment that qualifying tribes will receive in each year n, where the n represents the number of years elapsed since the introduction of the new data source and is equal to one in the first year.

$CONTRIB_n$ = the size of the contribution that non-qualifying tribes give in each year n, where the n represents the number of years elapsed since the introduction of the new data source and equal to one in the first year.

$PDADJ_n$ and $CONTRIB_n$ as calculated in the initial phase down adjustment schedule may have to be adjusted downward in subsequent FYs if the total amount available for allocation under the needs Component (*i.e.* NEEDALLOCAMT in Step 4) is lower than the amount available for that purpose in the FY prior to the introduction of the new data source. If so, both $PDADJ_n$ and $CONTRIB_n$ will be reduced by a factor which is the ratio of NEEDALLOCAMT in current FY to NEEDALLOCAMT in the year prior to the introduction of the new data source.

Furthermore, when the 2020 Decennial Census or other new data source is introduced, a new phase down adjustment schedule will be calculated in a similar manner as that was calculated for FY 2018.

8. A tribe's preliminary total allocation is calculated by summing the amounts calculated under the FCAS and need components that will serve as the basis for further adjustments in accordance with § 1000.340.

GRANT1 = FCAS + NEED1PD.

Where:

GRANT1 = preliminary total allocation before applying 1996 Operating Subsidy and Modernization minimum funding (see Step 8), Undisbursed Funds Factor (see Step 9) and Minimum Grant provision (see Step 10).

FCAS = Formula Current Assisted Stock component equal to OPSUB + MOD.

NEED1PD = the Tribe's needs allocation after applying the phase down adjustment schedule.

GRANT1 is compared to how much a tribe received in FY 1996 for operating subsidy and modernization under the 1937 Housing Act. If a tribe received more in FY 1996 for operating subsidy and modernization than its IHBG formula allocation, its preliminary total allocation is adjusted up to the FY 1996 amount (See § 1000.340(b)). Indian tribes receiving more under the IHBG formula than in FY 1996 have their grant allocations adjusted downward to offset the upward adjustment for the other tribes.

TEST = GRANT1 − OPMOD96.

If TEST is < = than 0, then GRANT2 = OPMOD96.

If TEST is greater than 0 and GRANT1 > MINNEED, then:

GRANT2 = GRANT1 − [UNDER1996 * (TEST/OVER1996)].

Where:

TEST = variable to decide whether tribes qualify for adjustments under 1996 minimum funding.

GRANT1 = preliminary total allocation before applying 1996 Operating Subsidy and Modernization minimum funding (see Step 8), Undisbursed Funds Factor (see Step 9) and Minimum Grant provision (see Step 10).

OPMOD96 = funding received by tribe in FY 1996 for Operating Subsidy and Modernization.

MINNEED = minimum needs amount.

UNDER1996 = for all tribes with TEST less than 0, sum of the absolute value of TEST.

OVER1996 = for all tribes with TEST greater than 0, sum of TEST.

GRANT2 = preliminary total allocation after applying 1996 Operating Subsidy and Modernization minimum funding (see Step 8) but before applying the Undisbursed Funds Factor (see Step 9) and Minimum Grant provision (see Step 10).

9. The initial allocation amount for the current FY is calculated by adding any adjustments for over- or under-funding occurring in prior FYs to the allocation calculated in the previous step. These adjustments typically result from late reporting of FCAS changes, or conveyances.

REPGRANT = GRANT2 + ADJUST1.

Where:

REPGRANT = Initial Allocation Amount in current FY (see § 1000.342).

GRANT2 = preliminary total allocation after applying 1996 Operating Subsidy and Modernization minimum funding (see Step 8) but before applying the Undisbursed Funds Factor (see Step 9) and Minimum Grant provision (see Step 10).

ADJUST1 = adjustments for over- or under-funding occurring in prior FYs.

10. The Undisbursed Funds Factor is determined by subtracting the sum of each tribe's Initial Allocation Amount for the prior three FYs from the IHBG amounts in HUD's Line of Credit Control System (LOCCS) on October 1 of the FY for which the new allocation is being determined. If the undisbursed funds factor is > $0 and the tribe's initial allocation for the FY exceeds $5 million, its final allocation will be the initial allocation minus the Undisbursed Funds Factor or its 1996 minimum, whichever is greater. Reductions to the initial allocation amounts due to the Undisbursed Funds Factor are summed and redistributed to other tribes in proportion to their initial needs allocation, NEED1PD, calculated above.

If REPGRANT > = $5 MILLION and UNDISB$ > (REPGRANTYR1 + REPGRANTYR2 + REPGRANTYR3), then UDFFtest = 1.

Where:

REPGRANT = Initial Allocation Amount in current FY.

REPGRANTYR1 = Initial Allocation Amount in one year prior to current FY.

REPGRANTYR2 = Initial Allocation Amount in two years prior to current FY.

REPGRANTYR3 = Initial Allocation Amount in three years prior to current FY.

UDFFTest = is an indicator as to whether the tribe will give up a portion of its needs allocation due to an excessive amount of undisbursed funds.

For tribes whose UDFFtest = 1, a reduction will occur as follows:

REPGRANTaftUDFF = (GRANT2 − (UNDISB$ − (REPGRANTYR1 + REPGRANTYR2 + REPGRANTYR3))

Except if, OPMOD96 > (GRANT2 − (UNDISB$ − (REPGRANTYR + REPGRANTYR2 + REPGRANTYR3)) then, REPGRANTaftUDFF = OPMOD96.

Where:

REPGRANTaftUDFF = Initial Allocation Amount in current FY adjusted for the Undisbursed Funds Factor.

GRANT2 = preliminary total allocation after applying 1996 Operating Subsidy and Modernization minimum funding (see Step 8) but before applying the Undisbursed Funds Factor (see Step 9) and Minimum Grant provision (see Step 10).

UNDISB$ = amount in HUD's LOCCS on October 1 of the FY.

REPGRANTYR1 = Initial Allocation Amount in one year prior to current FY.

REPGRANTYR2 = Initial Allocation Amount in two years prior to current FY.

REPGRANTYR3 = Initial Allocation Amount in three years prior to current FY.

OPMOD96 = funding received by tribe in FY 1996 for Operating Subsidy and Modernization.

So the UDFFadj = REPGRANTaftUDFF − GRANT2 and UDFFadjTOT= Absolute value of the sum of UDFF adjustments for tribes subject to reduction.

If UDFFtest is not equal to 1, tribes receive a portion of the funds recovered under the UDFF provision based on their share of total needs excluding any tribes with UDFFtest = 1. For these tribes, then:

UDFFadj = (NEED1PD/Σ Need1PD) * UDFFadjTOT).

REPGRANTaftUDFF = REPGRANT + UDFFadj.

Where:

UDFFadj = amount of the Undisbursed Fund Factor adjustments. Negative amount represents excess undisbursed funds. Positive represents amounts being transferred to other tribes without excess undisbursed funds.

NEED1PD = the Tribe's needs allocation after applying the phase down adjustment schedule.

UDFFadjTOT = absolute value of the sum of Undisbursed Fund Factor adjustments for tribes that meet the criteria for reduction and is equal to the sum available for redistribution among other tribes based on their initial needs allocation.

REPGRANTaftUDFF = Initial Allocation Amount in current FY adjusted for the Undisbursed Funds Factor.

REPGRANT = Initial Allocation Amount in current FY.

11. A final adjustment is made under § 1000.329 which allocates available carryover amounts up to $3 million to achieve minimum total allocations. Tribes that certify in their Indian Housing Plans the presence of any eligible households at or below 80 percent of median income and whose total allocation determined in the preceding step is less than 0.011547 percent of the FY appropriation after set-asides, will have their allocation adjusted upwards to 0.011547 percent of the FY appropriation after set-asides, or to a lesser percentage which can be achieved for all eligible tribes with available carryover funds set-aside for this purpose.

MINGRANT = APPROP * 0.0001547.

Where:

APPROP = current FY appropriation for the IHBG program less amounts in the Appropriations Act mandated for purposes other than the formula allocation.

If (GRANT2 + UDFFADJ) < MINGRANT and income-based need has been identified in a tribe's IHP, then tribe qualifies for MINGRANTADJ. For Tribes that qualify, calculate:

MINGRTADJTEST = MINGRANT—(GRANT2 + UDFFADJ).

If the Sum for all tribes of MINGRTADJTEST < MGHOLD, then:

MINGRANTADJ = MINGRTADJTEST.

If the Sum for all tribes of MINGRANTADJTEST > MGHOLD, then:

MINGRANTADJ = MINGRANTADJTEST * (MGHOLD/Σ MINGRANTADJ)

Where:

GRANT2 is the approximate grant allocation in any given year for any given tribe.

UDFFADJ = amount of UDFF adjustment.

MINGRANT = Minimum total allocation established in § 1000.329.

MINGRANTADJTEST = amount required to bring all qualifying tribes' allocations up to the minimum total allocation amount. This amount can then be compared.

MGHOLD = amount set-aside for allocation under minimum total grant provision (see Step 2).

MINGRANTADJ = actual amount of the minimum grant adjustment that can be accommodated with the amount set aside from carryover for this purpose.

12. A tribe's final allocation consists of the initial current FY formula allocation with three adjustments.

FINALALLOCATION = GRANT2 + ADJUST1 + UDFFadj + MINGRANTADJ

Where:

FINALALLOCATION = total amount a tribe is eligible to receive as a grant in the current FY.

GRANT2 = preliminary total allocation after applying 1996 Operating Subsidy and Modernization minimum funding (see Step 8) but before applying the Undisbursed Funds Factor (see Step 9) and Minimum Grant provision (see Step 10).

ADJUST1 = adjustments for over- or under-funding occurring in prior FYs.

UDFFadj = amount of the Undisbursed Fund Factor adjustments. Negative amount represents excess undisbursed funds.

Positive represents amounts being transferred to other tribes without excess undisbursed funds.

MINGRANTADJ = actual amount of the minimum grant adjustment that can be accommodated with the amount set aside from carryover for this purpose.

Dated: November 4, 2016.

Lourdes Castro Ramirez,

Principal Deputy Assistant, Secretary for Public and Indian Housing.

Nani A. Coloretti,

Deputy Secretary.

[FR Doc. 2016–27208 Filed 11–21–16; 8:45 am]

BILLING CODE 4210–67–P

DEPARTMENT OF DEFENSE

Department of the Air Force

32 CFR Part 842

[Docket ID: USAF–2015–0003]

RIN 0701–AA79

Administrative Claims

AGENCY: Department of the Air Force, DoD.

ACTION: Final rule.

SUMMARY: This rule contains amendments for policy changes and clarification and deletions for the Air Force guidance on Administrative claims and Personnel and Carrier Recovery Claims. The rule relates to the Air Force processes for claims filed for and against the Air Force as well as Air Force processes for filing personnel and carrier recovery claims.

DATES: This rule is effective on December 22, 2016.

FOR FURTHER INFORMATION CONTACT: Mr. Daniel Lemieux (AFLOA/JACC), 1500 West Perimeter Rd, Ste 1700, Joint Base Andrews, MD 20762, (240) 612–4646, *daniel.g.lemieux.civ@mail.mil.*

SUPPLEMENTARY INFORMATION: On March 30, 2016 (81 FR 17621–17635), the Department of the Air Force published a proposed rule titled ''Administrative Claims'' for a 60-day public comment period. At the end of the public comment period, no public comments were received. As a result, no changes were made to the regulatory text.

Executive Summary

I. Purpose of This Regulatory Action

The purpose of this rule is to provide the public with information necessary to file a claim against the United States Air Force for money damages and to notify the public of the procedures used to collect money from the public for damages to property under the control of the United States Air Force. Additionally, it is to provide the public with information about changes and deletions concerning the settlement and payment of claims under the Military Personnel and Civilian Employee's Claims Act for incident to service loss and damage to personal property.

II. Summary of the Major Provisions of This Regulatory Action

This part describes the process and procedures by which claims against the Air Force will be addressed, including who are proper claimants, how, where and when to file a claim, what claims are payable, how the Air Force will adjudicate claims and how to appeal unfavorable decisions. It also describes the process the Air Force will use for asserting claims against persons who damage Air Force property.

Changes: This part has been substantially revised since last codified and should be reviewed in its entirety to determine the changes made.

Deletions: This part has been substantially revised since last codified and should be reviewed in its entirety to determine the deletions made.

III. Costs and Benefits

The regulations contained herein require the public who wish to file a claim against the Air Force to substantiate their loss, which may result in minor or incidental costs to the claimant. Revised regulations pertaining to how the Air Force asserts claims for damage to Air Force property may result in increased costs to those who cause said damage. The benefits of these regulations include increased safeguards to ensure public funds are not expended for fraudulent claims and to ensure the U.S. government receives adequate compensation for damages to its property wrongfully caused by others.

Retrospective Review

This rule is part of DoD's retrospective plan, completed in August 2011, under Executive Order 13563, ''Improving Regulation and Regulatory Review,'' DoD's full plan and updates can be accessed at: *http://www.regulations.gov/#!docketDetail;dct=FR+PR+N+O+SR;rpp=10;po=0;D=DOD-2011-OS-0036.*

Regulatory Procedures

Executive Order 12866, ''Regulatory Planning and Review'' and Executive Order 13563, ''Improving Regulation and Regulatory Review''

Executive Orders 13563 and 12866 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distribute impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. The Department of Air Force has assessed this rule and determined this rule to be a ''non-significant regulatory action.''

Unfunded Mandates Reform Act (Sec. 202, Pub. L. 104–4)

Section 202 of the Unfunded Mandates Reform Act of 1995 (UMRA) (Pub. L. 104–4) requires agencies assess anticipated costs and benefits before issuing any rule whose mandates require spending in any 1 year of $100 million in 1995 dollars, updated annually for inflation. In 2014, that threshold is approximately $141 million. This rule will not mandate any requirements for State, local, or tribal governments, nor will it affect private sector costs.

Public Law 96–354, ''Regulatory Flexibility Act'' (5 U.S.C. 601)

It has been certified that this rule is not subject to the Regulatory Flexibility Act (5 U.S.C. 601) because it would not, if promulgated, have a significant economic impact on a substantial number of small entities. Therefore, the Regulatory Flexibility Act, as amended, does not require us to prepare a regulatory flexibility analysis.

Public Law 96–511, ''Paperwork Reduction Act'' (44 U.S.C. Chapter 35)

This rule does not impose reporting or recordkeeping requirements under the Paperwork Reduction Act of 1995.

Executive Order 13132, ''Federalism''

Executive Order 13132 establishes certain requirements that an agency must meet when it promulgates a proposed rule (and subsequent final rule) that imposes substantial direct requirement costs on State and local governments, preempts State law, or otherwise has Federalism implications. This rule will not have a substantial effect on State and local governments.

List of Subjects in 32 CFR Part 842

Administrative claims.

Accordingly, 32 CFR part 842 is amended as follows:

PART 842—[AMENDED]

■ 1. The authority citation for 32 CFR part 842 continues to read as follows:

Authority: Sec. 8013, 100 Stat. 1053, as amended; 10 U.S.C. 8013, except as otherwise noted; 28 CFR 14.11, except as otherwise noted.

■ 2. The Note for part 842 is revised to read as follows:

Note: Air Force Regulations are available on the e-Publishing Web site at *http://www.e-publishing.af.mil/* for downloading. This part is derived from Air Force Instruction 51–501, *Tort Claims,* and Air Force Instruction 51–502, *Personnel and Carrier Recovery Claims.*

■ 3. Amend part 842 by revising all references to ''HQ USAF/JACC'' to read ''AFLOA/JACC.''

■ 4. Revise § 842.0 to read as follows:

§ 842.0 Scope.

This part establishes standard policies and procedures for all administrative claims resulting from Air Force activities and for which the Air Force has assigned responsibility.

■ 5. Amend § 842.2 by:
■ a. Revising paragraph (f).
■ b. Removing paragraph (g).
■ c. Redesignating paragraphs (h) through (o) as (g) through (n).
■ d. Revising newly redesignated paragraph (g).

The revisions read as follows:

§ 842.2 Definitions.

* * * * *

(f) *AFLOA/JACC.* Claims and Tort Litigation Division, 1500 West Perimeter Road, Suite 1700, Joint Base Andrews, MD 20762.

(g) *Owner.* A holder of a legal title or an equitable interest in certain property. Specific examples include:

(1) *For real property.* The mortgagor, and the mortgagee if that individual can maintain a cause of action in the local courts involving a tort to that specific property.

(2) *For personal property.* A bailee, lessee, mortgagee and a conditional vendee. A mortgagor, conditional vendor, title loan company or someone else other than the owner, who has the title for purposes of security are not owners.

* * * * *

■ 6. Revise § 842.4 to read as follows:

§ 842.4 Where to file a claim.

File a claim at the base legal office of the unit or installation at or nearest to where the accident or incident occurred. If the accident or incident occurred in a foreign country where no Air Force unit is located, file the claim with the Defense Attache (DATT) or Military Assistance Advisory Group (MAAG) personnel authorized to receive claims (DIAM 100–1 and AFR 400–45). In a foreign country where a claimant is unable to obtain adequate assistance in filing a claim, the claimant may contact the nearest Air Force SJA. The SJA then advises AFLOA/JACC through claims channels of action taken and states why the DATT or MAAG was unable to adequately assist the claimant.

§ 842.9 [Removed]

■ 7. Remove § 842.9.

Subpart B—[Removed]

■ 8. Remove subpart B, consisting of §§ 842.10 through 842.14.

Subpart C—[Redesignated as Subpart B]

■ 9. Redesignate subpart C, consisting of §§ 842.15 through 842.20, as subpart B, consisting of §§ 842.9 through 842.14, respectively.

■ 10. Amend newly redesignated § 842.10 by revising paragraphs (a), (b), and (d) to read as follows:

§ 842.10 Definitions.

(a) *Appointing commander.* The commander exercising special court-martial jurisdiction over the offender.

(b) *Board of officers.* One to three commissioned officers appointed to investigate a complaint of willful property damage or wrongful taking by Air Force personnel.

* * * * *

(d) *Willful damage.* Damage or destruction caused intentionally, knowingly, and purposely, without justifiable excuse.

* * * * *

■ 11. Amend newly redesignated § 842.12 by adding paragraphs (g) through (i) to read as follows:

§ 842.12 Claims not payable.

* * * * *

(g) Claims involving wrongful taking stemming from larceny, forgery or deceit, which are not accompanied by riotous or violent action.

(h) Claims against Air National Guard members unless they are performing duty under Title 10 U.S.C.

(i) Claims for indirect, consequential or remote damages.

■ 12. Revise newly redesignated § 842.13 to read as follows:

§ 842.13 Limiting provisions.

(a) A complaint must be submitted within 90 days of the date of the incident. The appointing commander may find good cause for the delay and accept a late claim. The appointing commander's determination of good cause is final and not reviewable.

(b) Assessment of damages in excess of $5,000 against an offender's pay for a single incident requires AFLOA/JACC approval.

■ 13. Revise newly redesignated § 842.14 to read as follows:

§ 842.14 Filing a claim.

Claimant complains (orally or in writing) to the commander of a military organization or unit of the alleged offending member or members or to the commander of the nearest military installation. If the claim is made orally, the individual must assist the commander to reduce the complaint to writing within a reasonable time. The complainant need not request a sum certain in writing at the time the complaint is filed, but they must present such value and evidence before settlement is made.

Subpart D—[Redesignated as Subpart C]

■ 14. Redesignate subpart D, consisting of §§ 842.21 through 842.35, as subpart C, consisting of §§ 842.15 through 842.29.

§ 842.16 [Amended]

■ 15. Amend newly redesignated § 842.16 by:
■ a. Removing paragraphs (a), (c), (e), and (g).
■ b. Redesignating paragraphs (b), (d), (f), and (h) as paragraphs (a), (b), (c), and (d).

■ 16. Revise newly designated § 842.17 to read as follows:

§ 842.17 Delegations of authority.

(a) *Settlement authority.* The Secretary of the Air Force has delegated the authority to assign areas of responsibility and designate functional responsibility for claims under the Military Personnel and Civilian Employees' Claims Act to The Judge Advocate General (TJAG).

(b) *Reconsideration authority.* A settlement authority has the same authority specified in paragraph (a) of this section. However, with the exception of TJAG, a settlement authority may not deny a claim on reconsideration that it, or its delegate, had previously denied.

(c) *Authority to reduce, withdraw and restore delegated settlement authority.* Any superior settlement authority may reduce, withdraw, or restore delegated authority.

■ 17. Amend newly designated § 842.18 by revising paragraph (a) to read as follows:

§ 842.18 Filing a claim.

(a) *How and when to file a claim.* A claim is filed when a federal military

agency receives from a claimant or duly authorized agent a properly completed AF Form 180, DD Form 1842 or other written and signed demand for a determinable sum of money.

(1) A claim is also filed when a federal military agency receives from a claimant or duly authorized agent an electronic submission, through a Department of Defense claims Web site, indicating that the claimant intends for the appropriate military branch to consider a digitally signed demand for a determinable sum of money.

(2) A claim is also filed when the Air Force receives from a claimant or duly authorized agent an electronic submission, through the Air Force claims Web site, a digitally signed demand for a determinable sum of money.

* * * * *

■ 18. Revise newly designated § 842.19 introductory text to read as follows:

§ 842.19 Partial payments.

Upon request of a claimant, a settlement authority may make a partial payment in advance of final settlement when a claimant experiences personal hardship due to extensive property damage or loss. Partial payments are made if a claim for only part of the loss is submitted and is readily provable, up to the amount of the settlement authority. (The claimant may later amend the claim for the remainder of the loss.) If the total payable amount of the claim exceeds the payment limits of the settlement authority, send it with recommendations to the proper settlement authority.

* * * * *

■ 19. Revise newly designated § 842.21 to read as follows:

§ 842.21 Who may file a claim.

A claim may be filed by:

(a) A proper claimant.

(b) An authorized agent or legal representative of a proper claimant.

(c) A survivor of a deceased proper claimant in this order:

(1) Spouse.

(2) Children.

(3) Father or mother.

(4) Brothers or sisters.

■ 20. Amend newly designated § 842.24 by revising paragraph (d) to read as follows:

§ 842.24 General provisions.

* * * * *

(d) Property that is owned by the claimants, or their immediate families, or borrowed for their use, or in which the claimants or their immediate families has an enforceable ownership interest.

* * * * *

■ 21. Amend newly designated § 842.25 by revising the introductory text and paragraphs (a) and (b) to read as follows:

§ 842.25 Claims payable.

Claims may be payable for loss of or damage to tangible personal property when the damage occurs incident to service. For loss of or damage to property to be incident to service, it must occur at a place and time that is connected to the service of an active duty military member or employment of a civilian employee.

(a) *Authorized location.* Claims are only payable when the claimed property is located in an authorized location. There must be some connection between the claimant's service and the location of the claimed property. Duty locations where personal property is used, stored or held because of official duties are authorized places. Other authorized places may include:

(1) Any location on a military installation not otherwise excluded.

(2) Any office, building, recreation area, or real estate the Air Force or any other DoD element uses or controls.

(3) Any place a military member is required or ordered to be pursuant to their duties and while performing those duties.

(4) Assigned Government housing or quarters in the United States or provided in kind. The Military Personnel and Civilian Employees' Claims Act specifically prohibits payment for loss of or damage to property in quarters within the US unless the housing or quarters are assigned or otherwise provided in kind. Base housing that has not been privatized is generally considered assigned or provided in kind wherever it is located.

(i) Privatized housing or quarters within the United States subject to the Military Housing Privatization Initiative located within the fence line of a military installation or on federal land in which the DoD has an interest is considered assigned or otherwise provided in kind for the purposes of the Military Personnel and Civilian Employees' Claims Act.

(ii) [Reserved]

(5) Housing or quarters outside the United States. Outside the US, authorized off-base quarters, as well as assigned quarters, including quarters in US territories and possessions, are authorized places. The residence of a civilian employee is not an authorized location if the employee is a local inhabitant.

(6) Temporary duty (TDY) quarters and locations en route to the TDY destination. Significant deviations from the direct travel route are not authorized locations.

(7) Permanent change of station (PCS) temporary quarters and locations enroute to the PCS destination. Significant deviations from the direct travel route are not authorized locations.

(8) Entitlement and benefit locations. For these locations to be authorized, the claimant must be using them for the intended purpose and the property must be reasonably linked to that purpose.

(9) Locations where personal property shipped or stored at government expense are found. Government facilities where property is stored at the claimant's expense or for their convenience without an entitlement are not authorized places.

(b) *Payable causes of loss incident to service.* Because the Personnel Claims Act (PCA) is not a substitute for private insurance, loss or damage at quarters or other authorized locations may only be paid if caused by:

(1) An unusual occurrence;

(2) Theft, vandalism or other malfeasance;

(3) Hostile action;

(4) A carrier, contractor, warehouseman or other transportation service provider storing or moving goods or privately owned vehicles at government expense;

(5) An agent of the US; or

(6) A permanent seizure of a witness' property by the Air Force.

* * * * *

■ 22. Amend newly designated § 842.26 by:

■ a. Revising paragraphs (d), (j), (m), (n), (u), (y), and (z).

■ b. Remove paragraphs (aa), (bb), (cc), and (dd).

The revisions read as follows:

§ 842.26 Claims not payable.

* * * * *

(d) The loss is recovered or recoverable from an insurer or other source unless the settlement authority determines there is good cause for not claiming against the insurer.

* * * * *

(j) It is an appraisal fee, unless the settlement authority requires one to adjudicate the claim.

* * * * *

(m) It is an item acquired, possessed, shipped, or stored in violation of any US Armed Force directive or regulation.

(n) It is an item fraudulently claimed.

* * * * *

(u) It is an inconvenience expense.

* * * * *

(y) It is damage to, or loss of a rental vehicle which TDY or PCS orders authorized.

(z) It is a cost to relocate a telephone or mobile or manufactured home due to a government ordered quarters move.

Subpart E—[Removed]

■ 23. Remove subpart E.

Subpart F—[Redesignated as Subpart D]

■ 24. Redesignate subpart F, consisting of §§ 842.40 through 842.54, as subpart D consisting of §§ 842.30 through 842.44.

■ 25. Revise newly redesignated § 842.30 to read as follows:

§ 842.30 Scope of this subpart.

This subpart establishes policies and procedures for all administrative claims under the Military Claims Act for which the Air Force has assigned responsibility.

■ 26. Amend newly redesignated § 842.31 by revising paragraph (b) to read as follows:

§ 842.31 Definitions.

* * * * *

(b) *Final denial.* A letter mailed from the settlement authority to the claimant or authorized agent advising the claimant that the Air Force denies the claim. Final denial letters mailed from within the United States shall be sent by US Mail, certified mail, return receipt requested.

* * * * *

■ 27. Amend newly redesignated § 842.32 by:

■ a. Revising paragraphs (a)(1) introductory text, (a)(3) introductory text, (a)(3)(ii) and (iii), (a)(4) and (5), (b), and (f) introductory text.

■ b. Removing paragraph (f)(8) and redesignating paragraphs (f)(9) through (11) as paragraphs (f)(8) through (10).

The revisions read as follows:

§ 842.32 Delegations of authority.

(a) *Settlement authority.* (1) The Secretary of the Air Force has authority to:

* * * * *

(3) The following individuals have delegated authority to settle claims for $25,000 or less and to deny claims in any amount:

* * * * *

(ii) The Director, Civil Law and Litigation.

(iii) The Chief, Associate Chief and Branch Chiefs, Claims and Tort Litigation Division.

(4) SJAs of the Air Force component commander of the US geographic combatant commands for claims arising within their respective combatant command areas of responsibility have delegated authority to settle claims payable or deny claims filed for $25,000 or less.

(5) SJAs of GCMs in PACAF and USAFE have delegated authority to settle claims payable, or deny claims filed for $15,000 or less.

(b) *Redelegation of authority.* The Chief, Claims and Tort Litigation Division may redelegate his or her authority to Staff Judge Advocates. A settlement authority may redelegate his or her authority for claims not exceeding $25,000, to a subordinate judge advocate or civilian attorney in writing. The Chief, AFLOA/JACC may redelegate up to $25,000, in writing, to paralegals assigned to AFLOA/JACC and, upon request, may authorize installation Staff Judge Advocates to redelegate their settlement authority to paralegals under their supervision.

* * * * *

(f) *Special exceptions.* Do not settle or deny claims for the following reasons without AFLOA/JACC approval:

* * * * *

■ 28. Amend newly redesignated § 842.33 by revising paragraph (a) to read as follows:

§ 842.33 Filing a claim.

(a) *Elements of a proper claim.* A claim is must be filed on a Standard Form 95 or other written document. It must be signed by the Claimant or authorized agent, be for money damages in a sum certain, and lay out a basic statement as to the nature of the claim that will allow the Air Force to investigate the allegations contained therein.

* * * * *

■ 29. Revise newly redesignated § 842.34 to read as follows:

§ 842.34 Advance payments.

Subpart P of this part sets forth procedures for advance payments.

■ 30. Amend newly redesignated § 842.35 by revising paragraphs (a) and (c) to read as follows:

§ 842.35 Statute of limitations.

(a) A claim must be filed in writing within 2 years after it accrues. It is deemed to be filed upon receipt by The Judge Advocate General, AFLOA/JACC, or a Staff Judge Advocate of the Air Force. A claim accrues when the claimant discovers or reasonably should have discovered the existence of the act that resulted in the claimed loss. The same rules governing accrual pursuant to the Federal Tort Claims Act should be applied with respect to the Military Claims Act. Upon receipt of a claim that properly belongs with another military department, the claim is promptly transferred to that department.

* * * * *

(c) A claim filed after the statute of limitations has run is considered if the US is at war or in an armed conflict when the claim accrues or if the US enters a war or armed conflict after the claim accrues, and if good causes shows how the war or armed conflict prevented the claimant from diligently filing the claim within the statute of limitations. But in no case will a claim be considered if filed more than two years after the war or armed conflict ends.

■ 31. Revise newly redesignated § 842.37 to read as follows:

§ 842.37 Who are proper claimants.

(a) Citizens and inhabitants of the United States. US inhabitants includes dependents of the US military personnel and federal civilian employees temporarily outside the US for purposes of US Government service.

(b) US military personnel and civilian employees. Note: These personnel are not proper claimants for claims for personal injury or death that occurred incident to their service.

(c) Foreign military personnel when the damage or injury occurs in the US. Do not pay for claims under the Military Claims Act (MCA) for personal injury or death of a foreign military personnel that occurred incident to their service.

(d) States, state agencies, counties, or municipalities, or their political subdivisions.

(e) Subrogees of proper claimants to the extent they have paid for the claim in question.

■ 32. Revise newly redesignated § 842.38 to read as follows:

§ 842.38 Who are not proper claimants.

(a) Governments of foreign nations, their agencies, political subdivisions, or municipalities.

(b) Agencies and nonappropriated fund instrumentalities (NAFIs) of the US Government.

(c) Subrogees of § 842.42(a) and (b).

(d) Inhabitants of foreign countries.

■ 33. Amend newly redesignated § 842.39 by:

■ a. Revising paragraph (a).

■ b. Removing paragraphs (c), (d), and (f).

■ c. Redesignating paragraph (e) as paragraph (c).

The revision reads as follows:

§ 842.39 Claims payable.

(a) Claims arising from negligent or wrongful acts or omissions committed by United States military or civilian personnel while acting in the scope of their employment, subject to the exceptions listed in this subpart.

* * * * *

■ 34. Revise newly redesignated § 842.40 to read as follows:

§ 842.40 Claims not payable.

(a) Claims covered by the Federal Tort Claims Act (FTCA), Foreign Claims Act (FCA), International Agreements Claims Act (IACA), 10 U.S.C. 2734a and 2734b, Air Force Admiralty Claims Act (AFACA), 10 U.S.C. 9801–9804, 9806, National Guard Claims Act (NGCA), 32 U.S.C. 715, or covered under the Military Personnel and Civilian Employees' Claims Act (MPCECA), 31 U.S.C. 3701, 3721.

(1) MCA claims arising from noncombat activities in the US are not covered by the FTCA because more elements are needed to state an FTCA claim than are needed to state a claim under the MCA for noncombat activities. All FTCA claims are based on elements of traditional tort liability (*i.e.,* duty, breach, causation, and damages); that is, they are fault based. Noncombat activity claims under the MCA are based solely on causation and damages. Because MCA claims for noncombat activities are not fault based, they are not covered by the FTCA.

(2) Claims for incident-to-service damage to vehicles caused by the negligence of a member or employee of the armed forces acting in the scope of employment are paid under the MCA, instead of the Military Personnel and Civilian Employees' Claims Act.

(b) Arises with respect to the assessment or collection of any customs duty, or the detention of any goods or merchandise by any US officer of customs or excise, or any other US law enforcement officer. Note: This includes loss or damage to property detained by members of the Security Forces or Office of Special Investigation (OSI).

(c) Is cognizable under US admiralty and maritime law, to include:

(1) The Suits in Admiralty Act, 46 U.S.C. 30901 and following.

(2) The Death on the High Seas Act, 46 U.S.C. 30301 and following.

(3) The Public Vessels Act, 46 U.S.C. 31101 and following.

(4) Exception: Claims arising from noncombat activities may be paid under the MCA, even if they are also cognizable under paragraphs (c)(1) through (3) of this section.

(d) Arises out of assault, battery, false imprisonment, false arrest, malicious prosecution, or abuse of process. Exception: Unless such actions were committed by an investigative or law enforcement officer of the US who is empowered by law to conduct searches, seize evidence, or make arrests for violations of federal law.

(e) Arises out of libel, slander, misrepresentation, or deceit.

(f) Arises out of an interference with contract rights.

(g) Arises out of the combat activities of US military forces.

(h) Is for the personal injury or death of a member of the Armed Forces of the US incident to the member's service.

(i) Is for the personal injury or death of any person for workplace injuries covered by the Federal Employees' Compensation Act, 5 U.S.C. 8101, and following.

(j) Is for the personal injury or death of any employee of the US, including nonappropriated fund employees, for workplace injuries covered by the Longshore and Harbor Workers' Compensation Act, 33 U.S.C. 901, and following.

(k) Is for a taking of property, *e.g.,* by technical trespass or over flight of aircraft.

(l) Is for patent or copyright infringement.

(m) Results wholly from the negligent or wrongful act of the claimant.

(n) Is for the reimbursement of medical, hospital, or burial expenses furnished at the expense of the US, either directly or through contractual payments.

(o) Arises from contractual transactions, express or implied (including rental agreements, sales agreements, leases, and easements), that:

(1) Are payable or enforceable under oral or written contracts; or

(2) Arise out of an irregular procurement or implied contract.

(p) Is for the personal injury or death of military or civilian personnel of a foreign government incident to their service.

(q) Is based on an act or omission of an employee of the government, exercising due care, in the execution of a statute or regulation, whether or not such statute or regulation is valid. Do not deny claims solely on this exception without the prior approval of USAF/JACC. Claims under the noncombat activities provision of this subpart may be paid even if this paragraph (q) applies. Is based on the exercise or performance of, or the failure to exercise or perform, a discretionary function or duty on the part of a federal agency or a Federal Government employee, whether or not the discretion involved is abused. Do not deny claims solely on this exception without the prior approval of USAF/JACC. Exception: Claims under the noncombat activities provision may be paid even if this paragraph (q) applies.

(r) Is not in the best interests of the US, is contrary to public policy, or is otherwise contrary to the basic intent of the MCA. Examples include, but are not limited to, when a claimant's criminal conduct or failure to comply with a nonpunitive regulation is a proximate cause of the loss. Prior approval must be obtained from USAF/JACC before denying claims solely on this exception.

(s) Arises out of an act or omission of any employee of the government in administering the provisions of the Trading With the Enemy Act, 50 U.S.C. app. 1–44.

(t) Is for damages caused by the imposition or establishment of a quarantine by the US.

(u) Arises from the fiscal operations of the Department of the Treasury or from the regulation of the monetary system.

(v) Arises from the activities of the Tennessee Valley Authority.

(w) Arises from the activities of a federal land bank, a federal intermediate credit bank, or a bank for cooperatives.

(x) Is for the personal injury or death of any government contractor employee for whom benefits are available under any worker's compensation law, or under any contract or agreement providing employee benefits through insurance, local law, or custom when the US pays insurance either directly or as part of the consideration under the contract. Only USAF/JACC may act on these claims.

(y) Is for damage, injury or death from or by flood or flood waters at any place.

(z) Is for damage to property or other losses of a state, commonwealth, territory, or the District of Columbia caused by Air National Guard personnel engaged in training or duty under 32 U.S.C. 316, 502, 503, 504, or 505 who are assigned to a unit maintained by that state, commonwealth, territory, or the District of Columbia.

(aa) Is for damage to property or for any death or personal injury arising out of activities of any federal agency or employee of the government in carrying out the provisions of the Disaster Relief Act of 1974 (42 U.S.C. 5121, *et seq.*), as amended.

(bb) Arises from activities that present a political question.

(cc) Arises from private, as distinguished from government, transactions.

(dd) Is based solely on compassionate grounds.

(ee) Is for rent, damage, or other expenses or payments involving the

regular acquisition, use, possession, or disposition of real property or interests therein by and for the US.

(ff) Is presented by a national, or a corporation controlled by a national, of a country at war or engaged in armed conflict with the US., or any country allied with such enemy country unless the appropriate settlement authority determines that the claimant is, and at the time of the incident was, friendly to the US. A prisoner of war or an interned enemy alien is not excluded as to a claim for damage, loss, or destruction of personal property in the custody of the US otherwise payable. Forward claims considered not payable under this paragraph (ff), with recommendations for disposition, to USAF/JACC.

(gg) Arises out of the loss, miscarriage, or negligent transmission of letters or postal matter by the US Postal Service or its agents or employees.

(hh) Is for damage to or loss of bailed property when the bailor specifically assumes such risk.

(ii) Is for property damage, personal injury, or death occurring in a foreign country to an inhabitant of a foreign country.

(jj) Is for interest incurred prior to the payment of a claim.

(kk) Arises out of matters which are in litigation against the US.

(ll) Is for attorney fees or costs in connection with pursuing an administrative or judicial remedy against the US or any of its agencies.

(mm) Is for bail, interest or inconvenience expenses incurred in connection with the preparation and presentation of the claim.

(nn) Is for a failure to use a duty of care to keep premises owned or under the control of the US safe for use for any recreational purpose, or for a failure by the US to give any warning of hazardous conditions on such premises to persons entering for a recreational purpose unless there is a willful or malicious failure to guard or warn against a dangerous condition, or unless consideration was paid to the US (including a nonappropriated fund instrumentality) to use the premises.

■ 35. Revise newly redesignated § 842.41 to read as follows:

§ 842.41 Applicable law.

This section provides the existing law governing liability, measurement of liability and the effects of settlement upon awards.

(a) *Federal preemption.* Many of the exclusions in this subpart are based upon the wording of 28 U.S.C. 2680 or other federal statutes or court decisions interpreting the Federal Tort Claims Act. Federal case law interpreting the same exclusions under the Federal Tort Claims Act is applied to the Military Claims Act. Where state law differs with federal law, federal law prevails.

(b) *Extent of liability.* Where the claim arises is important in determining the extent of liability.

(1) *Applicable law.* When a claim arises in the United States, its territories or possessions, the same law as if the claim was cognizable under the FTCA will be applied.

(2) *Claims in foreign countries.* In claims arising in a foreign country, where the claim is for personal injury, death, or damage to or loss of real or personal property caused by an act or omission alleged to be negligent, wrongful, or otherwise involving fault of military personnel or civilian officers or employees of the United States acting within the scope of their employment, liability or the United States is determined according to federal case law interpreting the FTCA. Where the FTCA requires application of the law of the place where the act or omission occurred, settlement authorities will use the rules set forth in the currently adopted edition of the *Restatement of the* Law, published by the American Law Institute, to evaluate the liability of the Air Force, subject to the following rules:

(i) Foreign rules and regulations governing the operation of motor vehicles (rules of the road) are applied to the extent those rules are not specifically superseded or preempted by United States military traffic regulations.

(ii) Absolute or strict liability will not apply for claims not arising from noncombat activities.

(iii) Hedonic damages are not payable.

(iv) The collateral source doctrine does not apply.

(v) Joint and several liability does not apply. Payment will be made only upon the portion of loss, damage, injury or death attributable to the Armed Forces of the United States.

(vi) Future economic loss will be discounted to present value after deducting for federal income taxes and, in cases of wrongful death, personal consumption.

(c) *Claims not payable.* Do not approve payment for:

(i) Punitive damages.

(ii) Cost of medical or hospital services furnished at the expense of the United States.

(iii) Cost of burial expenses paid by the United States.

(d) *Settlement by insurer or joint tortfeasor.* When settlement is made by an insurer or joint tortfeasor and an additional award is warranted, an award may be made if both of the following are present:

(1) The United States is not protected by the release executed by the claimant.

(2) The total amount received from such source is first deducted.

■ 36. Amend newly redesignated § 842.42, by revising paragraphs (a) and (c) to read as follows:

§ 842.42 Appeal of final denials.

(a) A claimant may appeal the final denial of the claim. The claimant sends the request, in writing, to the settlement authority that issued the denial letter within 60 days of the date the denial letter was mailed. The settlement authority may waive the 60 day time limit for good cause.

* * * * *

(c) Where the settlement authority does not reach a final agreement on an appealed claim, he or she sends the entire claim file to the next higher settlement authority, who is the appellate authority for that claim. Any higher settlement authority may act upon an appeal.

* * * * *

Subpart G—[Redesignated as Subpart E]

■ 37. Redesignate subpart G, consisting of §§ 842.55 through 842.68, as subpart E, consisting of §§ 842.45 through 842.58, respectively.

■ 38. Revise newly redesignated § 842.47 to read as follows:

§ 842.47 Delegations of authority.

(a) *Settlement authority.* (1) The Secretary of the Air Force has the authority to:

(i) Settle claims for payment of $100,000 or less.

(ii) Settle claims for more than $100,000, pay the first $100,000, and report the excess to the Department of the Treasury for payment.

(iii) Deny claims in any amount.

(2) The Judge Advocate General, Deputy Judge Advocate General, Director of Civil Law, and the Chief, Deputy Chief and Branch Chiefs, Claims and Tort Litigation Staff are FCCs and have delegated authority to:

(i) Settle claims for payment of $100,000 or less.

(ii) Deny claims in any amount.

(3) The SJAs of the Air Force component commander of the US geographic combatant commands are FCC for claims arising in their respective combatant command Areas of Responsibility (AORs) and may deny claims of $50,000 or less and will pay claims filed in any amount when payment is for $50,000 or less.

(b) *Redelegating settlement authority.* A settlement authority appointed as a FCC in paragraph (a) of this section may appoint one or more subordinate judge advocates or civilian attorneys to act as FCC, and redelegate all or part of that settlement authority to such persons.

(c) *Settlement negotiations.* A settlement authority may settle a claim in any sum within its settlement authority, regardless of the amount claimed. Send uncompromised claims in excess of the delegated authority through claims channels to the level with settlement authority. Unsuccessful negotiations at one level do not bind higher authority.

(d) *Special exceptions.* Do not settle claims for medical malpractice without HQ USAF/JACC approval.

■ 39. Amend newly redesignated § 842.48 by revising paragraph (a) to read as follows:

§ 842.48 Filing a claim.

(a) *How and when filed.* A claim is filed when the Air Force receives from a claimant or authorized agent a properly completed SF 95 or other signed and written demand for money damages in a sum certain. A claim may be presented orally only if oral claims are the custom in the country where the incident occurred and the claimant is functionally illiterate. In any case where an oral claim is made, claims personnel must promptly reduce the claim to writing with all particulars carefully noted. A claim belonging to another agency is promptly transferred to the appropriate agency.

* * * * *

■ 40. Revise newly redesignated § 842.49 to read as follows:

§ 842.49 Advance payments.

Subpart P of this part outlines procedures for advance payments.

■ 41. Amend newly redesignated § 842.50 by revising paragraph (a) to read as follows:

§ 842.50 Statute of limitations.

(a) A claim must be presented to the Air Force within 2 years after it accrues. It accrues when the claimant discovers or reasonably should have discovered the existence of the act that resulted in the claimed loss or injury.

* * * * *

■ 42. Amend newly redesignated § 842.52 by revising paragraphs (a) and (b) to read as follows:

§ 842.52 Who are proper claimants.

* * * * *

(a) Foreign nationals. In a wrongful death case, if the decedent is an inhabitant of a foreign country, even though his or her survivors are US inhabitants, the FCA will apply.

(b) US nationals residing abroad, unless the claim arises from a benefit, privilege or service provided to them by the US Government, or they reside in the foreign country primarily because they are employed directly by the United States, or sponsored by or accompanying such a person, or employed by a US civilian contractor in furtherance of a contract with the US Government, or sponsored by or accompanying such a person.

* * * * *

■ 43. Amend newly redesignated § 842.53 by revising paragraphs (b), (c), and (e) to read as follows:

§ 842.53 Who are not proper claimants.

* * * * *

(b) Persons determined to be US inhabitants. US inhabitants include dependents of US military personnel and US Government civilian employees.

(c) Foreign military personnel suffering personal injury, or death arising incident to service or pursuant to combined and/or joint military operations. Such operations include, but are not limited to, military exercises and United Nations, NATO, and other regional peacekeeping and humanitarian missions.

* * * * *

(e) National governments and their political subdivisions engaging in war or armed conflict with the United States or its allies. This includes factions that have not necessarily been recognized by the international community as a legitimate nation state.

* * * * *

■ 44. Amend newly redesignated § 842.54 by:

■ a. Revising paragraph (a).

■ b. Removing paragraph (b).

■ c. Redesignating paragraph (c) as paragraph (b).

The revision reads as follows:

§ 842.54 Payment criteria.

* * * * *

(a) The incident causing the damage or injury must arise in a foreign country and be caused by noncombatant activities of the US Armed Forces or by the negligent or wrongful acts of civilian employees or military members of the Armed Forces.

(1) It is a prerequisite to US responsibility if the employee causing the damage or injury is a local inhabitant, a prisoner of war, or an interned enemy alien. These persons are ''employees'' within the meaning of the Foreign Claims Act (FCA) only when in the service of the United States. Ordinarily, a slight deviation as to time or place does not constitute a departure from the scope of employment. The purpose of the activity and whether it furthers the general interest of the United States is considered. If the claim arose from the operation or use of a US Armed Forces vehicle or other equipment by such a person, pay it provided local law imposes liability on the owner of the vehicle or other equipment in the circumstances involved.

(2) It is immaterial when the claim arises from the acts or omissions of any US Armed Forces member or employee not listed in § 842.64(c)(1). The Act imposes responsibility on the United States when it places a US citizen or non-US citizen employee in a position to cause the injury or damage. If the cause is a criminal act clearly outside the scope of employment, ordinarily pay the claim and consider disciplinary action against the offender.

* * * * *

■ 45. Amend newly redesignated § 842.55 by:

■ a. Revising paragraphs (a), (c), (f), (h), (m), (o), and (q).

■ b. Adding paragraphs (s) and (t).

The revisions and additions read as follows:

§ 842.55 Claims not payable.

* * * * *

(a) Is waived under an applicable international agreement, or pursuant to an applicable international agreement, a receiving state should adjudicate and pay the claim. However, if a foreign government subject to such an international agreement disputes its legal responsibilities under the agreement, and the claimant has no other means of compensation, USAF/JACC may authorize payment.

* * * * *

(c) Is for attorney fees, punitive damages, a judgment or interest on a judgment, bail, or court costs. FCC should consider providing early notice to claimants that attorney fees are not payable as an item of damage under the FCA.

* * * * *

(f) Is a paternity claim.

* * * * *

(h) Results wholly from the negligent or wrongful act of the claimant or agent.

* * * * *

(m) Results from an action by an enemy, or directly or indirectly from an act of the US Armed Forces in combat, except that a claim may be allowed if it arises from an accident or malfunction incident to the operation of an aircraft

of the US Armed Forces, including its airborne ordnance, indirectly related to combat, and occurring while preparing for or going to, or returning from a combat mission.

* * * * *

(o) Arises out of personal activities of family members, guests, servants, or activities of the pets of members and employees of the US Armed Forces.

* * * * *

(q) Is covered under US admiralty or maritime laws, unless authorized by The Judge Advocate General or Chief, Claims and Tort Litigation Staff.

* * * * *

(s) Is not in the best interest of the United States, is contrary to public policy, or otherwise contrary to the basic intent of the FCA. Claims considered not payable on this basis will be forwarded to USAF/JACC for final decision.

(t) Is presented by a national, or a corporation controlled by a national, of a country at war or engaged in armed conflict with the United States, or any country allied with such enemy country unless the settlement authority determines the claimant is, and at the time of the incident was, friendly to the United States. Exception: A prisoner of war or interned enemy alien is not excluded from filing a claim for damage, loss, or destruction of personal property within the US Armed Forces' custody if the claim is otherwise payable.

■ 46. Revise newly redesignated § 842.56 to read as follows:

§ 842.56 Applicable law.

This section provides guidance to determine the applicable law for assessment of liability.

(a) In adjudicating FCA claims, settlement authorities will follow the law, customs, and standards of the country where the claim arose, except:

(1) Causation is determined based upon general principles of US tort law found in federal case law and standard legal publications.

(2) Joint and several liability does not apply. Payment is based solely on the portion of loss, damage, injury or death attributable to the US Armed Forces.

(3) If lost income or lost profits is recoverable under the law where the claim arose, they shall be limited to net lost income or net lost profits, taking into account appropriate deductions for taxes, regular business expenditures, and in the case of wrongful death, personal consumption during the loss period.

(b) Settlement authorities will not deduct compensation from collateral sources except for:

(1) Direct payments by a member or civilian employee of the US Armed Forces for damages (not solatia).

(2) Any payments recovered or recoverable from an insurance policy when premiums were paid, directly or indirectly, by the United States, or a member or civilian employee of the US Armed Forces; or when the member or employee has the benefit of the insurance (such as when a US member or employee borrows a vehicle of a local national, and the vehicle carries insurance for the benefit of any driver with permission to drive the vehicle).

■ 47. Revise newly redesignated § 842.57 to read as follows:

§ 842.57 Reconsideration of final denials.

This section provides the procedures used to reconsider a final denial.

(a) An FCC has the inherent authority to reconsider a final decision. The mere fact that a request for reconsideration is received does not obligate the settlement authority to reopen the claim.

(b) The FCC does not mention a reconsideration right in the original denial letter.

(c) A settlement authority must reconsider the final action when there is:

(1) New and material evidence concerning the claim; or

(2) Obvious errors in the original decision.

(d) The FCC must document in the claim file the reason for reconsideration.

(e) A FCC above the original settlement authority may direct a claim be forwarded to a higher FCC for reconsideration.

■ 48. Revise newly redesignated § 842.58 to read as follows:

§ 842.58 Right of subrogation, indemnity, and contribution.

The Air Force has all the rights of subrogation, indemnity and contribution, as local law permits. However, settlement authorities will not seek contribution or indemnity from US military members or civilian employees whose conduct gave rise to US Government liability, or whenever it would be harmful to international relations.

Subpart H—[Redesignated as Subpart F]

■ 49. Redesignate subpart H, consisting of §§ 842.69 through 842.72, as subpart F, consisting of §§ 842.59 through 842.62, respectively.

■ 50. Revise newly redesignated § 842.59 to read as follows:

§ 842.59 Scope of this subpart.

This subpart governs Air Force actions in investigating, processing, and settling claims under the International Agreement Claims Act.

■ 51. Amend newly redesignated § 842.60 by revising paragraphs (a), (d), (e), (f), and (g) to read as follows:

§ 842.60 Definitions.

* * * * *

(a) *Civilian component.* Civilian personnel accompanying and employed by an international agreement contracting force. Local employees, contractor employees, or members of the American Red Cross are not a part of the civilian component unless specifically included in the agreement.

* * * * *

(d) *Legally responsible.* A term of art providing for settlement of claims under cost sharing international agreements in accordance with the law of the receiving state. Often, employees who are local inhabitants, not part of the civilian component of the force, could cause the sending state to be legally responsible under a respondeat superior theory.

(e) *Receiving state.* The country where the force or civilian component of another contracting party is temporarily located. It is often thought of as the ''host nation.''

(f) *Sending state.* The country sending the force or civilian component to the receiving State. In cases where US personnel are stationed in a foreign country, the US is the sending state.

(g) *Third parties.* A term of art used in International Agreements. Parties other than members of the force and civilian component of the sending or receiving States. Dependents, tourists, and other noninhabitants of a foreign country are third parties (and therefore can generally make a claim under a SOFA) unless the international agreement, or an understanding between the countries involved, specifically excludes them.

■ 52. Revise newly redesignated § 842.61 to read as follows:

§ 842.61 Delegations of authority.

(a) *Overseas settlement authority.* Staff Judge Advocates of the Air Force component commands of the US geographic combatant commands will, within their combatant command AORs, fulfill US obligations concerning claims abroad subject to 10 U.S.C. 2734a for which the Air Force has settlement authority. Consistent with 10 U.S.C. 2734a and the international agreement, they may reimburse or pay the pro rata share of a claim as agreed, or if inconsistent with the IACA or the

international agreement, they may object to a bill presented,

(b) *Settlement authority.* The Secretary of the Air Force, The Judge Advocate General, the Deputy Judge Advocate General, The Director of Civil Law and Chief of the Claims and Tort Litigation Division may also exercise settlement authority under 10 U.S.C. 2734a.

(c) *Redelegation of authority.* A settlement authority may redelegate his or her authority to a subordinate judge advocate or civilian attorney in writing.

(d) *Authority to reduce, withdraw, and restore settlement authority.* Any superior settlement authority may reduce, withdraw, or restore delegated authority.

■ 53. Amend newly redesignated § 842.62 by revising paragraph (b) to read as follows:

§ 842.62 Filing a claim.

* * * * *

(b) *Claims arising in the United States.* The claimant files tort claims arising from the act or omission of military or civilian personnel of another contracting party at any US military installation. The Staff Judge Advocate for the installation where such military or civilian personnel is assigned or attached will promptly notify the Foreign Claims Branch of USAF/JACC as well as the Commander, US Army Claims Service. If the claimant files said claim at an installation other than the location where said military or civilian personnel is assigned, the Staff Judge Advocate for that installation will promptly forward the claim to the appropriate installation Staff Judge Advocate.

Subpart I—[Redesignated as Subpart G]

■ 54. Redesignate subpart I, consisting of §§ 842.73 through 842.81 as subpart G, consisting of §§ 842.63 through 842.71, respectively.

■ 55. Revise newly redesignated § 842.63 to read as follows:

§ 842.63 Scope of this subpart.

This subpart explains how to settle and pay claims against the United States, for property damage, personal injury, or death incident to the use of a government vehicle or any other government property on a government installation which are not payable under any other statute.

■ 56. Amend newly redesignated § 842.65 by revising paragraph (a)(5) to read as follows:

§ 842.65 Delegations of authority.

(a) * * *

(5) SJA of the Air Force component commands of the US geographic combatant commands.

* * * * *

■ 57. Amend newly redesignated § 842.68 by:

■ a. Removing the parentheses in the second sentence of paragraph (a).

■ b. Revising paragraph (c).

The revision reads as follows:

§ 842.68 Claims payable.

* * * * *

(c) Arose from the use of a government vehicle at any place or from the use of other government property on a government installation.

* * * * *

■ 58. Amend newly redesignated § 842.69 by adding paragraph (e) to read as follows:

§ 842.69 Claims not payable.

* * * * *

(e) For pain and suffering or other general damages.

■ 59. Revise newly redesignated § 842.71 to read as follows:

§ 842.71 Settlement agreement.

Do not pay a claim unless the claimant accepts the amount offered in full satisfaction of the claim and signs a settlement agreement to that effect, in which the claimant agrees to release any and all claims against the United States, its employees and agents arising from the incident in question. Use the settlement agreement approved for use by the Department of Justice for the settlement of FTCA claims, tailored to this claim.

Subpart J—[Redesignated as Subpart H]

■ 60. Redesignate subpart J, consisting of §§ 842.82 through 842.85, as subpart H, consisting of §§ 842.72 through 842.75, respectively.

■ 61. Amend newly redesignated § 842.74 by:

■ a. Revising paragraph (a)(1)(i).

■ b. Removing and reserving paragraph (a)(1)(ii) and removing paragraph (a)(1)(iii).

■ c. Revising paragraph (b)(3)(iv).

The revisions read as follows:

§ 842.74 Delegations of authority.

(a) * * *

(1) * * *

(i) Settle or deny a claim in any amount. Settlements for payment of more than $500,000 are certified to Congress for payment.

* * * * *

(b) * * *

(3) * * *

(iv) The Chief and Deputy Chief, Claims and Tort Litigation Division.

■ 62. In newly redesignated § 842.75, add paragraph (c) to read as follows:

§ 842.75 Reconsidering claims against the United States.

* * * * *

(c) There is no time limit for submitting a request for reconsideration, but it is within the discretion of the settlement authority to decline to reconsider a claim based on the amount of time passed since the claim was originally denied.

Subpart K—[Removed]

■ 63. Remove subpart K, consisting of §§ 842.86 through 842.91.

■ 64. Add new subpart I, consisting of §§ 842.76 through 842.79, to read as follows:

Subpart I—Claims Under the Federal Tort Claims Act (28 U.S.C. 1346(b), 2402, 2671, 2672, 2674–2680)

Sec.

842.76 Scope of this subpart.
842.77 Delegations of authority.
842.78 Settlement agreements.
842.79 Administrative claim; when presented.

Subpart I—Claims Under the Federal Tort Claims Act (28 U.S.C. 1346(b), 2402, 2671, 2672, 2674–2680)

§ 842.76 Scope of this subpart.

This subpart, promulgated under the authority of 28 CFR 14.11, governs claims against the United States for property damage, personal injury, or death, from the negligent or wrongful acts or omission of Air Force military or civilian personnel while acting within the scope of their employment.

§ 842.77 Delegations of authority.

(a) *Settlement authority.* The following individuals are delegated the full authority of the Secretary of the Air Force to settle and deny claims:

(1) The Judge Advocate General.

(2) The Deputy Judge Advocate General.

(3) The Director of Civil Law.

(4) The Division Chief of Claims and Tort Litigation.

(5) The Division Chief of Environmental Law and Litigation.

(b) *Redelegation of authority.* A settlement authority may be redelegated, in writing, to a subordinate judge advocate or civilian attorney. The Chief, AFLOA/JACC may redelegate up to $25,000, in writing, to paralegals assigned to AFLOA/JACC and, upon request, may authorize installation Staff

Judge Advocates to redelegate their settlement authority to paralegals under their supervision.

(c) *Authority to reduce, withdraw, and restore settlement authority.* Any superior settlement authority may reduce, withdraw, or restore delegated authority.

(d) *Settlement negotiations.* A settlement authority may settle a claim filed in any amount for a sum within the delegated authority. Unsettled claims in excess of the delegated authority will be sent to the next highest level with settlement authority. Unsuccessful negotiations at one level do not bind higher authority.

§ 842.78 Settlement agreements.

The claimant must sign a settlement agreement and general release before any payment is made.

§ 842.79 Administrative claim; when presented.

When the Air Force is the proper agency to receive a claim pursuant to 28 CFR 14.2(b), for purposes of the provisions of 28 U.S.C. 2401(b), 2672 and 2675, a claim shall be deemed to have been presented when it is received by:

(a) The office of the Staff Judge Advocate of the Air Force installation nearest the location of the incident; or

(b) The Claims and Tort Litigation Division, 1500 West Perimeter Road, Suite 1700, Joint Base Andrews, MD 20762.

Subpart L—[Redesignated as Subpart J]

■ 65. Redesignate subpart L, consisting of §§ 842.92 through 842.99, as subpart J, consisting of §§ 842.80 through 842.87, respectively.

■ 66. Revise newly redesigated § 842.80 to read as follows:

§ 842.80 Scope of this subpart.

This subpart describes how to assert, administer, and collect claims for damage to or loss or destruction of government property and lost wages of Air Force servicemembers through negligent or wrongful acts. It does not cover admiralty, hospital recovery, or nonappropriated fund claims.

■ 67. Amend newly redesignated § 842.81 by revising paragraph (a) to read as follows:

§ 842.81 Delegations of authority.

(a) *Settlement authority.* (1) The following individuals have delegated authority to settle, compromise, suspend, or terminate action on claims asserted for $100,000 or less and to accept full payment on any claim:

(i) The Judge Advocate General.

(ii) The Deputy Judge Advocate General.

(iii) The Director of Civil Law.

(iv) Chief, Deputy Chief, and Branch Chiefs, Claims and Tort Litigation Staff.

(2) Installation staff judge advocates have authority to assert claims in any amount, accept full payment on any claim and to compromise, suspend or terminate action on claims asserted for $25,000 or less.

* * * * *

■ 68. Amend newly redesignated § 842.82 by revising paragraphs (a)(2), (c), and (e) to read as follows:

§ 842.82 Assertable claims.

* * * * *

(a) * * *

(2) Less than $100 but collection is practicable and economical.

* * * * *

(c) The claim is for property damage arising from the same incident as a hospital recovery claim.

* * * * *

(e) The claim is assertable as a counterclaim under an international agreement. (The claim should be processed under subpart G of this part).

* * * * *

■ 69. Amend newly redesignated § 842.83 by revising paragraph (b)(2) and adding paragraph (f) to read as follows:

§ 842.83 Non-assertable claims.

* * * * *

(b) * * *

(2) Caused by a person who has accountability and responsibility for the damaged property under the Report of Survey system.

* * * * *

(f) Loss or damage caused by an employee of another federal agency while the employee was acting in the scope of his employment.

■ 70. Revise newly redesignated § 842.85 to read as follows:

§ 842.85 Referring a claim to the US Attorney or the Department of Justice.

If collection efforts are unsuccessful, AFLOA/JACC may refer a claim to the appropriate US Attorney's Office or the Department of Justice for initiation of a lawsuit.

Subpart M—[Redesignated as Subpart K]

■ 71. Redesignate subpart M, consisting of §§ 842.100 through 842.114, as subpart K, consisting of §§ 842.88 through 842.102, respectively.

■ 72. Revise newly redesignated § 842.88 to read as follows:

§ 842.88 Scope of this subpart.

This subpart establishes policies and procedures for all administrative claims under the National Guard Claims Act for which the Air Force has assigned responsibility. Unless otherwise outlined in this subpart, follow procedures as outlined in subpart E of this part for claims arising out of noncombat activities.

■ 73. Revise newly redesignated § 842.89 to read as follows:

§ 842.89 Definitions.

(a) *Air National Guard (ANG).* The federally recognized Air National Guard of each state, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, and Guam.

(b) *ANG member.* An ANG member is one who is performing duty under 32 U.S.C., section 316, 502, 503, 504, or 505 for which the member is entitled to pay from the United States or for which the member has waived pay from the United States.

(c) *ANG duty status*—(1) *Active federal service.* ANG members may serve on active Federal duty under 10 U.S.C. to augment the active Air Force under certain circumstances or for certain types of duty or training (*e.g.,* overseas training exercises and ANG alert duty). Duty under 10 U.S.C. does not fall under this subpart.

(2) *Federally funded duty.* ANG members perform specified federally funded duty or training under 32 U.S.C. such as weekend drills, annual training, field exercises, range firing, military schooling, full time unit support, or recruiting duties. Duty under 32 U.S.C. falls under this subpart for noncombat activities.

(3) *State duty.* State duty is duty not authorized by federal law but required by the governor of the state and paid for from state funds. Such duty includes civil emergencies (natural or other disasters), civil disturbances (riots and strikes), and transportation requirements for official state functions, public health, or safety. State duty does not fall under this subpart.

(d) *ANG technicians.* An ANG technician is a Federal employee employed under 32 U.S.C. 709. Tort claims arising out of his or her activity are settled under the Federal Tort Claims Act (FTCA).

■ 74. Amend newly redesignated § 842.90 by:

■ a. Removing the introductory text.

■ b. Revising paragraphs (a)(4) and (5) and (b).

■ c. Removing paragraph (f)(1) and redesignating paragraphs (f)(2) and (3) as (f)(1) and (2), respectively.

The revisions read as follows:

§ 842.90 Delegations of authority.

(a) * * *

(4) The SJAs of the Air Force component commander of the US geographic combatant commands for claims arising within their respective combatant command areas of responsibility have delegated authority to settle claims payable or to deny claims filed for $25,000 or less.

(5) SJAs of GCMs in PACAF and USAFE have delegated authority to settle claims payable, and deny claims filed, for $15,000 or less.

(b) *Redelegation of authority.* A settlement authority may redelegate up to $25,000 of settlement authority to a subordinate judge advocate or civilian attorney. This redelegation must be in writing and can be for all claims or limited to a single claim. The Chief, AFLOA/JACC may redelegate up to $25,000, in writing, to paralegals assigned to AFLOA/JACC and, upon request, may authorize installation Staff Judge Advocates to redelegate their settlement authority to paralegals under their supervision.

* * * * *

■ 75. Revise newly redesignated § 842.91 to read as follows:

§ 842.91 Filing a claim.

(a) *Elements of a proper claim.* A claim is must be filed on a Standard Form 95 or other written document. It must be signed by the Claimant or authorized agent, be for money damages in a sum certain, and lay out a basic statement as to the nature of the claim that will allow the Air Force to investigate the allegations contained therein.

(b) *Amending a claim.* A claimant may amend a claim at any time prior to final action. To amend a claim the claimant or his or her authorized agent must submit a written, signed demand.

■ 76. Revise newly redesignated § 842.92 to read as follows:

§ 842.92 Advance payments.

Subpart P of this part sets forth procedures for such payments.

■ 77. Revise newly redesignated § 842.93 to read as follows:

§ 842.93 Statute of limitations.

(a) A claim must be filed in writing within 2 years after it accrues. It is deemed to be filed upon receipt by The Judge Advocate General, USAF/JACC, or a Staff Judge Advocate of the Air Force. A claim accrues when the claimant discovers or reasonably should have discovered the existence of the act that resulted in the claimed loss. The same rules governing accrual pursuant to the Federal Tort Claims Act should be applied with respect to the National Guard Claims Act. Upon receipt of a claim that properly belongs with another military department, the claim is promptly transferred to that department.

(b) The statutory time period excludes the day of the incident and includes the day the claim was filed.

(c) A claim filed after the statute of limitations has run is considered if the US is at war or in an armed conflict when the claim accrues or if the US enters a war or armed conflict after the claim accrues, and if good causes shows how the war or armed conflict prevented the claimant from diligently filing the claim within the statute of limitations. But in no case will a claim be considered if filed more than two years after the war or armed conflict ends.

■ 78. Revise newly redesignated § 842.94 to read as follows:

§ 842.94 Who may file a claim.

The following individuals may file a claim under this subpart.

(a) Owners of the property or their authorized agents may file claims for property damage.

(b) Injured persons or their duly authorized agents may file claims for personal injury.

(c) Duly appointed guardians of minor children or any other persons legally entitled to do so under applicable local law may file claims for minors' personal injuries.

(d) Executors or administrators of a decedent's estate or another person legally entitled to do so under applicable local law, may file claims based on:

(1) An individual's death.

(2) A cause of action surviving an individual's death.

(e) Insurers with subrogation rights may file claims for losses paid in full by them. The parties may file claims jointly or individually, to the extent of each party's interest, for losses partially paid by insurers with subrogation rights.

(f) Authorized agents signing claims show their title or legal capacity and present evidence of authority to present the claims.

■ 79. Revise newly redesignated § 842.95 to read as follows:

§ 842.95 Who are proper claimants.

(a) Citizens and inhabitants of the United States. US inhabitants includes dependents of the US military personnel and federal civilian employees temporarily outside the US for purposes of US Government service.

(b) US military personnel and civilian employees. Note: These personnel are not proper claimants for claims for personal injury or death that occurred incident to their service.

(c) Foreign military personnel when the damage or injury occurs in the US. Do not pay for claims under the MCA for personal injury or death of a foreign military personnel that occurred incident to their service.

(d) States, state agencies, counties, or municipalities, or their political subdivisions.

(e) Subrogees of proper claimants to the extent they have paid for the claim in question.

■ 80. Revise newly redesignated § 842.96 to read as follows:

§ 842.96 Who are not proper claimants.

(a) Governments of foreign nations, their agencies, political subdivisions, or municipalities.

(b) Agencies and nonappropriated fund instrumentalities of the US Government including the District of Columbia government.

(c) Inhabitants of foreign countries.

(d) The state, territory and its political subdivisions whose Air National Guard member caused the loss.

(e) Subrogees of the claimants in paragraphs (a) through (d) of this section.

■ 81. Revise newly redesignated § 842.97 to read as follows:

§ 842.97 Claims payable.

Claims arising from noncombat activities of the United States when caused by ANG members performing duty under 32 U.S.C. and acting within the scope of their employment, whether or not such injuries or damages arose out of their negligent or wrongful acts or omissions.

■ 82. In newly redesignated § 842.98, revise paragraphs (a), (b), and (c) to read as follows:

§ 842.98 Claims not payable.

* * * * *

(a) Claims covered by the FTCA, FCA, IACA, 10 U.S.C. 2734a and 2734b, Air Force Admiralty Claims Act (AFACA), 10 U.S.C. 9801–9804, 9806, MCA, 10 U.S.C. 2733, or covered under the Military Personnel and Civilian Employees' Claims Act (MPCECA), 31 U.S.C. 3701, 3721.

(b) NGCA claims arising from noncombat activities in the US are not covered by the FTCA because more elements are needed to state an FTCA claim than are needed to state a claim under the NGCA for noncombat activities. All FTCA claims are based on elements of traditional tort liability (*i.e.,* duty, breach, causation, and damages); that is, they are fault based. Noncombat

activity claims under the NGCA are based solely on causation and damages. Because NGCA claims for noncombat activities are not fault based, they are not covered by the FTCA.

(c) See subpart E of this part for other claims not payable.

* * * * *

■ 83. Revise newly redesignated § 842.99 to read as follows:

§ 842.99 Applicable law.

(a) *Federal preemption.* Many of the exclusions in this subpart are based upon the wording of 28 U.S.C. 2680 or other federal statutes or court decisions interpreting the Federal Tort Claims Act. Federal case law interpreting the same exclusions under the Federal Tort Claims Act is applied to the National Guard Claims Act. Where state law differs with federal law, federal law prevails.

(b) *Extent of liability.* Where the claim arises is important in determining the extent of liability.

(1) *Applicable law.* When a claim arises in the United States, its territories or possessions, the same law as if the claim was cognizable under the FTCA will be applied.

(2) *Claims in foreign countries.* In claims arising in a foreign country, where the claim is for personal injury, death, or damage to or loss of real or personal property caused by an act or omission alleged to be negligent, wrongful, or otherwise involving fault of military personnel or civilian officers or employees of the United States acting within the scope of their employment, liability or the United States is determined according to federal case law interpreting the FTCA. Where the FTCA requires application of the law of the place where the act or omission occurred, settlement authorities will use the rules set forth in the currently adopted edition of the *Restatement of the Law,* published by the American Law Institute, to evaluate the liability of the Air Force, subject to the following rules:

(i) Absolute or strict liability will not apply for claims not arising from noncombat activities.

(ii) Hedonic damages are not payable.

(iii) The collateral source doctrine will not apply.

(iv) Joint and several liability does not apply. Payment will be made only upon the portion of loss, damage, injury or death attributable to the Armed Forces of the United States.

(v) Future economic loss will be discounted to present value after deducting for federal income taxes and, in cases of wrongful death, personal consumption.

(c) *Claims not payable.* Do not approve payment for:

(1) Punitive damages.

(2) Cost of medical or hospital services furnished at US expense.

(3) Cost of burial expenses paid by the United States.

(d) *Settlement by insurer or joint tortfeasor.* When settlement is made by an insurer or joint tortfeasor and an additional award is warranted, an award may be made if both of the following are present:

(1) The United States is not protected by the release executed by the claimant.

(2) The total amount received from such source is first deducted.

■ 84. Revise newly redesignated § 842.100 to read as follows:

§ 842.100 Appeal of final denials.

This section explains the steps to take when a denial is appealed.

(a) A claimant may appeal the final denial of the claim. The claimant sends the request, in writing, to the settlement authority that issued the denial letter within 60 days of the date the denial letter was mailed. The settlement authority may waive the 60 day time limit for good cause.

(b) Upon receipt of the appeal, the original settlement authority reviews the appeal.

(c) Where the settlement authority does not reach a final agreement on an appealed claim, he or she sends the entire claim file to the next higher settlement authority, who is the appellate authority for that claim. Any higher settlement authority may act upon an appeal.

(d) The decision of the appellate authority is the final administrative action on the claim.

■ 85. Revise newly redesignated § 842.101 to read as follows:

§ 842.101 Government's right of subrogation, indemnity, and contribution.

The Air Force becomes subrogated to the rights of the claimant upon settling a claim. The Air Force has the rights of contribution and indemnity permitted by the law of the situs or under contract. Do not seek contribution or indemnity from ANG members whose conduct gave rise to Government liability.

■ 86. Revise newly redesignated § 842.102 to read as follows:

§ 842.102 Attorney fees.

In the settlement of any claim pursuant to 32 U.S.C. 715 and this subpart, attorney fees will not exceed 20 percent of any award provided that when a claim involves payment of an award over $1,000,000, attorney fees on that part of the award exceeding $1,000,000 may be determined by the Secretary of the Air Force. For the purposes of this section, an award is deemed to be the cost to the United States at the time of purchase of a structured settlement, and not its future value.

Subpart N—[Redesignated as Subpart L]

■ 87. Redesignate subpart N, consisting of §§ 842.115 through 842.125 as subpart L, consisting of §§ 842.103 through 842.113, respectively.

■ 88. Revise newly redesignated § 842.103 to read as follows:

§ 842.103 Scope of this subpart.

This subpart explains how the United States asserts and settles claims for costs of medical care, against third parties under the Federal Medical Care Recovery Act (FMCRA) (10 U.S.C. 1095) and various other laws.

■ 89. Amend newly redesignated § 842.104 by revising the introductory text and paragraph (a) and adding paragraphs (h) and (i) to read as follows:

§ 842.104 Definitions.

This section defines terms which are used within this subpart.

(a) *Medical Cost Reimbursement Program Regional Field Offices.* The Chief of the Medical Cost Reimbursement Program (MCRP) Branch determines and assigns geographic responsibility for all regional field offices. Each field office is responsible for investigating all potential claims and asserting claims within their jurisdiction for the cost of medical care provided by either a Medical Treatment Facility or at a civilian facility through Tricare.

* * * * *

(h) *Accrued pay.* The total of all pay accrued to the account of an active duty member during a period when the member is unable to perform military duties. It does not include allowances.

(i) *Future care.* Medical care reasonably expected to be provided or paid for in the future treatment of an injured party as determined during the investigative process.

■ 90. Revise newly redesignated § 842.105 to read as follows:

§ 842.105 Delegations of authority.

(a) *Settlement authority.* The following individuals have delegated authority to settle, compromise, or waive MCRP claims for $300,000 or less and to accept full payment on any claim:

(1) The Judge Advocate General.

(2) The Deputy Judge Advocate General.

(3) The Director of Civil Law.

(4) Chief, Claims and Tort Litigation Staff and the Chief, MCRP.

(b) *Redelegation of authority.* The individuals described in paragraph (a) of this section may re-delegate a portion or all of their authority to subordinates, subject to the following limitations:

(1) SJAs, when given Medical Cost Reimbursement (MCR) claims jurisdiction, are granted authority to waive, compromise, or settle claims in amounts of $25,000 or less. This authority may be re-delegated in writing with authority to re-delegate to subordinates.

(2) SJAs of numbered Air Forces, when given MCR claims jurisdiction, are granted authority to waive, compromise, or settle claims in amounts of $40,000 or less. This authority may be re-delegated in writing with authority to re-delegate to subordinates.

(3) SJAs of single base GCMs, the SJAs of GCMs in PACAF and USAFE, and the SJAs of each Air Force base, station, or fixed installation have delegated authority to compromise or waive claims for $15,000 or less and to accept full payment on any claim.

(c) *Authority to assert a claim.* Each settlement authority has authority to assert a claim in any amount for the reasonable value of medical care.

(d) *Authority to reduce, withdraw, and restore settlement authority.* Any superior settlement authority may reduce, withdraw, or restore delegated authority.

(e) *Settlement negotiations.* A settlement authority may settle a claim filed for an amount within the delegated settlement authority. Claims in excess of the delegated authority must be approved by the next higher settlement authority. Unsuccessful negotiations at one level do not bind higher authority.

Note to paragraph (e): Telephonic approvals, in the discretion of the higher settlement authority, are authorized.

(f) *Special exceptions.* Only the Department of Justice (DOJ) may approve claims involving:

(1) Compromise or waiver of a claim for more than $300,000.

(2) Settlement previously referred to DOJ.

(3) Settlement where a third party files suit against the US or the injured party arising out of the same incident.

■ 91. Revise newly redesignated § 842.107 to read as follows:

§ 842.107 Nonassertable claims.

The following are considered nonassertable claims and should not be asserted:

(a) *Claims against any department, agency, or instrumentality of the United States.* "Agency or instrumentality" includes any self-insured nonappropriated fund activity whether revenue producing, welfare, or sundry. The term does not include private associations.

(b) *Claims for care furnished a veteran by the Department of Veterans Affairs (VA) for service connected disability.* However, claims may be asserted for the reasonable value of medical care an Air Force member receives prior to his or her discharge and transfer to the VA facility or when the Air Force has reimbursed the VA facility for the care.

(c) *Claims for care furnished a merchant seaman under 42 U.S.C. 249.* A claim against the seaman's employer should not be filed.

(d) *Government contractors.* In claims in which the United States must reimburse the contractor for a claim according to the terms of the contract, settlement authorities investigate the circumstances surrounding the incident to determine if assertion is appropriate. If the US is not required to reimburse the contractor, the MCR authority may assert a claim against the contractor.

(e) *Foreign governments.* Settlement authorities investigate any claims that might be made against foreign governments, their political subdivisions, armed forces members or civilian employees.

(f) *U.S. personnel.* Claims are not asserted against members of the uniformed services; employees of the US, its agencies or instrumentalities; or an individual who is a dependent of a service member or employee at the time of assertion unless they have insurance to pay the claim, they were required by law or regulation to have insurance which would have covered the Air Force, or their actions, which necessitated the medical treatment provided at government expense, constituted willful misconduct or gross negligence.

■ 92. Amend newly redesignated § 842.108 by revising paragraphs (a) and (b) to read as follows:

§ 842.108 Asserting the claim.

* * * * *

(a) MCR personnel assert a claim against a tortfeasor or other third party using a formal letter on Air Force stationery. The assertion is made against all potential payers, including insurers. The demand letter should state the legal basis for recovery and sufficiently describe the facts and circumstances surrounding the incident giving rise to medical care. Applicable bases of recovery include US status as a third-party beneficiary under various types of insurance policies, workers' compensation laws, no-fault laws, or other Federal statutes, including Coordination of Benefits (COB) or FMCRA.

(b) The MCR authority must promptly notify the injured parties or their legal representatives, in writing, that the United States will attempt to recover from the third parties the reasonable value of medical care furnished or to be furnished and that they:

(1) Should seek advice from a legal assistance officer or civilian counsel.

(2) Must cooperate in the prosecution of all actions of the United States against third parties.

(3) Must furnish a complete statement regarding the facts and circumstances surrounding the incident which caused the injury.

(4) Must not execute a release or settle any claim which exists as a result of the injury without prior notice to the MCR authority.

* * * * *

■ 93. Revise newly redesignated § 842.109 to read as follows:

§ 842.109 Referring a claim to the US Attorney.

(a) All cases that require forwarding to the DoJ must be routed through the Chief, MCRP. The MCR authority ensures that personnel review all claims for possible referral not later than two years after the date of the incident for tort based cases.

(b) The United States or the injured party on behalf of the United States must file suit within 3 years after an action accrues. This is usually 3 years after the initial treatment is provided in a federal medical facility or after the initial payment is made by Tricare, whichever is first.

■ 94. Revise newly redesignated § 842.111 to read as follows:

§ 842.111 Recovery rates in government facilities.

The **Federal Register** contains the rates set by the Office of Management and Budget, of which judges take judicial notice. Apply the rates in effect at the time of care to claims.

■ 95. Revise newly redesignated § 842.112 to read as follows:

§ 842.112 Waiver and compromise of United States interest.

Waivers and compromises of government claims can be made. This section lists the basic guidance for each action. (See this subpart for claims involving waiver and compromise of amounts in excess of settlement authorities' delegated amounts.)

(a) *Convenience of the Government.* When compromising or waiving a claim

for convenience of the Government, settlement authorities should consider the following factors:

(1) Risks of litigation.

(2) Questionable liability of the third party.

(3) Costs of litigation.

(4) Insurance (Uninsured or Underinsured Motorist and Medical Payment Coverage) or other assets of the tortfeasor available to satisfy a judgment for the entire claim.

(5) Potential counterclaim against the US.

(6) Jury verdict expectancy amount.

(7) Amount of settlement with proposed distribution.

(8) Cost of any future care.

(9) Tortfeasor cannot be located.

(10) Tortfeasor is judgment proof.

(11) Tortfeasor has refused to pay and the case is too weak for litigation.

(b) *Hardship on the injured party.* When compromising or waiving a claim to avoid undue hardship on the injured party, settlement authorities should consider the following factors:

(1) Permanent disability or disfigurement of the injured party.

(2) Decreased earning power of the injured party.

(3) Out of pocket losses to the injured party.

(4) Financial status of the injured party.

(5) Pension rights of the injured party.

(6) Other government benefits available to the injured party.

(7) An offer of settlement from a third party which includes virtually all of the thirty party's assets, although the amount is considerably less than the calculation of the injured party's damages.

(8) Whether the injured party received excessive treatment.

(9) Amount of settlement with proposed distribution, including reductions in fees or damages by other parties, medical providers, or attorneys in order to reduce the hardship on the injured party.

(c) *Compromise or waiver.* A compromise or waiver can be made upon written request from the injured party or the injured party's legal representative.

■ 96. Revise newly redesignated § 842.113 to read as follows:

§ 842.113 Reconsideration of a waiver for undue hardship.

A settlement authority may reconsider its previous action on a request for waiver or compromise whether requested or not. Reconsideration is normally on the basis of new evidence or discovery of errors in the waiver submission or settlement, but can be based upon a re-evaluation of the claim by the settlement authority.

Subpart O—[Removed]

■ 97. Remove subpart O, consisting of §§ 842.126 through 842.136.

■ 98. Add new subpart M, consisting of §§ 842.114 through 842.117, to read as follows:

Subpart M—Nonappropriated Fund Claims

Sec.

842.114 Scope of this subpart.
842.115 Definitions.
842.116 Payment of claims against NAFIs.
842.117 Claims by customers, members, participants, or authorized users.

§ 842.114 Scope of this subpart.

This subpart describes how to settle claims for and against the United States for property damage, personal injury, or death arising out of the operation of nonappropriated fund instrumentalities (NAFIs). Unless stated below, such claims will follow procedures outlined in other subparts of this part for the substantive law applicable to the particular claim. For example, a NAFI claim adjudicated under the Federal Tort Claims Act will follow procedures in this subpart as well as subpart K of this part.

§ 842.115 Definitions.

(a) *Army and Air Force Exchange Service (AAFES).* The Army and Air Force Exchange Service is a joint command of the Army and Air Force, under the jurisdiction of the Chiefs of Staff of the Army and Air Force, which provides exchange and motion picture services to authorized patrons.

(b) *Morale, welfare, and recreation (MWR) activities.* Air Force MWR activities are activities operated directly or by contract which provide programs to promote morale and well-being of the Air Force's military and civilian personnel and their dependents. They may be funded wholly with appropriated funds, primarily with nonappropriated funds (NAF), or with a combination of appropriated funds and NAFs.

(c) *Nonappropriated funds.* Nonappropriated funds are funds generated by Department of Defense military and civilian personnel and their dependents and used to augment funds appropriated by the Congress to provide a comprehensive morale-building, welfare, religious, educational, and recreational program, designed to improve the well-being of military and civilian personnel and their dependents.

(d) *Nonappropriated funds instrumentality.* A nonappropriated fund instrumentality is a Federal Government instrumentality established to generate and administer nonappropriated funds for programs and services contributing to the mental and physical well-being of personnel.

§ 842.116 Payment of claims against NAFIs.

Substantiated claims against NAFIs must not be paid solely from appropriated funds. Claims are sent for payment as set out in this subpart. Do not delay paying a claimant because doubt exists whether to use appropriated funds or NAFs. Pay the claim initially from appropriated funds and decide the correct funding source later.

§ 842.117 Claims by customers, members, participants, or authorized users.

(a) *Customer complaints.* Do not adjudicate claims complaints or claims for property loss or damage under this subpart that the local NAFI activity can satisfactorily resolve.

(b) *Claims generated by concessionaires.* Most concessionaires must have commercial insurance. Any unresolved claims or complaints against concessionaires or their insurers are sent to the appropriate contracting officers.

Subpart P—[Redesignated as Subpart N]

■ 99. Redesignate subpart P, consisting of §§ 842.137 through 842.143, as subpart N, consisting of §§ 842.118 through 842.124.

■ 100. Revise newly redesignated § 842.118 to read as follows:

§ 842.118 Scope of this subpart.

(a) This subpart explains how to process certain administrative claims:

(1) Against the United States for property damage, personal injury, or death, arising out of Air Force assigned noncombat missions performed by the Civil Air Patrol (CAP), as well as certain other Air Force authorized missions performed by the CAP in support of the Federal Government.

(2) In favor of the United States for damage to US Government property caused by CAP members or third parties.

(b) Unless stated in this subpart, such claims will follow procedures outlined in other subparts of this part for the substantive law applicable to the particular claim. For example, a CAP claim adjudicated under the Military Claims Act will follow procedures in this subpart as well as subpart E of this part.

§§ 842.120 and 842.121 [Removed]

■ 101. Remove newly redesignated §§ 842.120 and 842.121.

§§ 842.122 through 842.124 [Redesignated as §§ 842.120 through 842.122]

■ 102. Newly redesignated §§ 842.122 through 842.124 are further redesignated as §§ 842.120 through 842.122, respectively.

Subpart Q—[Redesignated as Subpart O]

■ 103. Redesignate subpart Q, consisting of §§ 842.144 through 842.150, as subpart O, consisting of §§ 842.123 through 842.129.

■ 104. Revise newly redesignated § 842.123 to read as follows:

§ 842.123 Scope of this subpart.

This subpart tells how to make an advance payment before a claim is filed or finalized under the Military Claims, Foreign Claims and National Guard Claims Acts.

■ 105. In newly redesignated § 842.124, revise paragraph (c)(4) to read as follows:

§ 842.124 Delegation of authority.

* * * * *

(c) * * *

(4) SJAs of the Air Force component commander of the U.S. geographic combatant commands for claims arising within their respective combatant command areas of responsibility.

* * * * *

■ 106. In newly redesignated § 842.126, revise paragraph (b) to read as follows:

§ 842.126 When authorized.

* * * * *

(b) The potential claimant has an immediate need amounting to a hardship for food, shelter, medical or burial expenses, or other necessities. In the case of a commercial enterprise, severe financial loss or bankruptcy will result if the Air Force does not make an advance payment.

* * * * *

Henry Williams,

Acting Air Force Federal Liaison Officer.

[FR Doc. 2016–25554 Filed 11–21–16; 8:45 am]

BILLING CODE 5001–10–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 63

[EPA–HQ–OAR–2014–0492; FRL–9955–50–OAR]

RIN 2060–AR97

Clarification of Requirements for Method 303 Certification Training

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is finalizing revisions to better define the requirements associated with conducting Method 303 training courses. Method 303 is an air pollution test method used to determine the presence of visible emissions (VE) from coke ovens. This action adds language that clarifies the criteria used by the EPA to determine the competency of Method 303 training providers, but does not change the requirements for conducting the test method. These revisions will help entities interested in conducting the required training courses by clearly defining the requirements necessary to do so.

DATES: The final rule is effective on December 22, 2016.

ADDRESSES: The EPA has established a docket for this action under Docket ID No. EPA–HQ–OAR–2014–0492. All documents in the docket are listed on the *http://www.regulations.gov* Web site. Although listed in the index, some information is not publicly available, *e.g.,* Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available electronically through *http://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Ms. Kim Garnett, U.S. EPA, Office of Air Quality Planning and Standards, Air Quality Assessment Division, Measurement Technology Group (Mail Code: E143–02), Research Triangle Park, NC 27711; telephone number: (919) 541–1158; fax number: (919) 541–0516; email address: *garnett.kim@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. General Information
A. Does this action apply to me?
B. What action is the agency taking?
C. Judicial Review
II. Background
III. Changes Included in the Final Method 303 Clarification
IV. Summary of Major Comments and Responses
A. Technology Improvement
B. Training Requirements
V. Statutory and Executive Order Reviews
A. Executive Order 12866: Regulatory Planning and Review and Executive Order 13563: Improving Regulation and Regulatory Review
B. Paperwork Reduction Act (PRA)
C. Regulatory Flexibility Act (RFA)
D. Unfunded Mandates Reform Act (UMRA)
E. Executive Order 13132: Federalism
F. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments
G. Executive Order 13045: Protection of Children From Environmental Health Risks and Safety Risks
H. Executive Order 13211: Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use
I. National Technology Transfer and Advancement Act (NTTAA)
J. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations
K. Congressional Review Act (CRA)

I. General Information

A. Does this action apply to me?

This action applies to you if you are a potential provider of Method 303 training services, someone seeking training to conduct Method 303, or a facility subject to Method 303.

B. What action is the agency taking?

This final action adds language that further clarifies the criteria used by the EPA to determine the competency of Method 303 training providers, but does not change the requirements for conducting the test method.

C. Judicial Review

Under section 307(b)(1) of the Clean Air Act (CAA), judicial review of this final rule is available by filing a petition for review in the United States Court of Appeals for the District of Columbia Circuit by January 23, 2017. Under section 307(d)(7)(B) of the CAA, only an objection to this final rule that was raised with reasonable specificity during the period for public comment can be raised during judicial review. Moreover, under section 307(b)(2) of the CAA, the requirements that are the subject of this final rule may not be challenged later in civil or criminal proceedings brought by the EPA to enforce these requirements.

II. Background

On October 27, 1993, we published Method 303 for determining VE from

coke ovens (58 FR 57898). Method 303 is applicable for the determination of VE from the following by-product coke oven battery sources: Charging systems during charging; doors, topside port lids and offtake systems on operating coke ovens; and collecting mains. Method 303 is also applicable to qualifying observers for visually determining the presence of VE from by-product coke ovens. The EPA received inquiries from state/local agencies seeking the specifics of the procedures used to qualify observers. The EPA proposed these clarifications on February 25, 2016 (81 FR 9407). We received public comments from two individuals.

III. Changes Included in the Final Method 303 Clarification

Method 303 section 10.1 (40 CFR part 63, appendix B) presently states that ''*The Method 303 course shall be conducted by or under the sanction of the EPA and shall consist of classroom instruction, field observation, and a proficiency test. . . .*'' We are amending this language by removing the statement indicating that these courses be conducted by or under the sanction of the EPA. Instead, Administrator-approved training providers will be allowed to conduct Method 303 training and certification. We are, therefore, revising Method 303 to define the administrative and recordkeeping requirements that must be followed by Method 303 training providers. This action: (1) Defines Administrator approval of Method 303 training providers, clarifies the minimum training course requirements, and details the recordkeeping requirements that the training provider must follow in order to attain Administrator approval (section 10.1); (2) adds language to clarify that VE readers must demonstrate a perfect score on the recertification exam (section 10.1.2); (3) updates and expands the criteria used to determine who is qualified to participate on the proficiency test panel (section 10.1.3); (4) adds criteria for training certificates, submittal of this information, and recordkeeping (sections 10.1.4–10.1.6); and (5) defines conditions for suspension of the training provider's approval by the Administrator (section 10.1.7). There are no changes to the requirements for conducting the test method.

IV. Comments and Responses

A. Technology Improvement

The first commenter suggested that the EPA should require the inspector to utilize digital imagery to document the visible emission observation. This comment is beyond the scope of the present action. This action does not involve the merits of Method 303, but rather training requirements in order for observers to be qualified to conduct Method 303 testing. No change to the rule was made in response to this comment.

B. Training Requirements

The first commenter, also, stated that the quality of third-party Method 9 lectures is simply not good enough to ensure that any level of training is achieved, and seems to suggest that the Method 9 lecture is the only training involved. While attending the lecture portion of Method 9 is a prerequisite to receiving Method 303 certification, this requirement is to ensure individuals have a basic understanding of opacity measurement. It is not the sole training requirement. For example, the trainee must successfully complete the Method 303 training course, satisfy the field observation requirement, and demonstrate adequate performance and sufficient knowledge of Method 303 (see section 10.1). A trainee must also verify completion of at least 12 hours of field observation prior to attending the Method 303 certification course (see section 10.1.1). There are numerous other requirements as well. Therefore, the EPA believes an approved Method 303 training course will be comprehensive enough to assure that individuals who receive certification to determine VE from coke oven battery sources are proficient regardless of any perceived inadequacy of Method 9 lectures. No change to the rule was made in response to this comment.

The second commenter expressed concerns over the possible use of ad hoc panel members, stating these panel members may have inconsistent interpretations of Method 303 and different inspection practices at the plants. The EPA agrees with the comment regarding the make-up of the certification panel, and is amending the Method 303 rule language in section 10.1.3 to specify that the composition of the panel will be approved by the Administrator as part of the training course approval process. During this approval process, the experience of each panel member will be reviewed in order to ensure consistency.

V. Statutory and Executive Order Reviews

A. Executive Order 12866: Regulatory Planning and Review and Executive Order 13563: Improving Regulation and Regulatory Review

This action is not a significant regulatory action and was, therefore, not submitted to the Office of Management and Budget (OMB) for review.

B. Paperwork Reduction Act (PRA)

This action does not impose an information collection burden under the PRA. This action better defines the requirements associated with conducting Method 303 training courses and does not impose additional regulatory requirements on sources.

C. Regulatory Flexibility Act (RFA)

I certify that this action will not have a significant economic impact on a substantial number of small entities under the RFA. This action will not impose any requirements on small entities. This action better defines the requirements associated with conducting Method 303 training courses and does not impose additional regulatory requirements on sources.

D. Unfunded Mandates Reform Act (UMRA)

This action does not contain an unfunded mandate of $100 million or more for as described in UMRA, 2 U.S.C. 1531–1538, and does not significantly or uniquely affect small governments. This action imposes no enforceable duty on any state, local or tribal governments or the private sector.

E. Executive Order 13132: Federalism

This action does not have federalism implications. It will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government.

F. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

This action does not have tribal implications, as specified in Executive Order 13175. This action clarifies the criteria used by the EPA to determine the competency of training providers, but does not change the requirements for conducting the test method. Thus, Executive Order 13175 does not apply to this action.

G. Executive Order 13045: Protection of Children From Environmental Health Risks and Safety Risks

The EPA interprets Executive Order 13045 as applying only to those regulatory actions that concern environmental health or safety risks that the EPA has reason to believe may disproportionately affect children, per the definition of ''covered regulatory action'' in section 2–202 of the Executive Order. This action is not subject to Executive Order 13045 because it does not concern an environmental health risk or safety risk.

H. Executive Order 13211: Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use

This action is not subject to Executive Order 13211 because it is not a significant regulatory action under Executive Order 12866.

I. National Technology Transfer and Advancement Act (NTTAA)

This rulemaking does not involve technical standards.

J. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations

The EPA believes that this action is not subject to Executive Order 12898 (59 FR 7629, February 16, 1994) because it does not establish an environmental health or safety standard. This action would make corrections and updates to an existing protocol for assessing the precision and accuracy of alternative test methods to ensure they are comparable to the methods otherwise required; thus, it does not modify or affect the impacts to human health or the environment of any standards for which it may be used.

K. Congressional Review Act

The Congressional Review Act, 5 U.S.C. 801 *et seq.,* as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2). This rule will be effective January 23, 2017.

Clarification of Requirements for Method 303 Certification Training

List of Subjects in 40 CFR Part 63

Environmental protection, Air pollution control, Test methods.

Dated: November 8, 2016.

Gina McCarthy,

Administrator.

For the reasons stated in the preamble, the EPA is amending title 40, chapter I of the Code of Federal Regulations as follows:

PART 63—[AMENDED]

■ 1. The authority citation for part 63 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

■ 2. In Appendix A, amend Method 303:
■ a. In section 5.0 by revising paragraph 5.2; and
■ b. In section 10.0 by:
■ i. Revising paragraphs 10.1, 10.1.1, 10.1.2, and 10.1.3;
■ ii. Adding paragraphs 10.1.4, 10.1.5, 10.1.6, and 10.1.7; and
■ iii. Revising paragraph 10.2.

The revisions and additions read as follows.

Appendix A to Part 63—Test Methods

* * * * *

Method 303—Determination of Visible Emissions From By-Product Coke Oven Batteries

* * * * *

5.0 Safety

* * * * *

5.2 Safety Training. Because coke oven batteries have hazardous environments, the training materials and the field training (section 10.0) shall cover the precautions required to address health and safety hazards.

* * * * *

10.0 Calibration and Standardization

* * * * *

10.1 Certification Procedures. This method requires only the determination of whether VE occur and does not require the determination of opacity levels; therefore, observer certification according to Method 9 in appendix A to part 60 of this chapter is not required to obtain certification under this method. However, in order to receive Method 303 observer certification, the first-time observer (trainee) shall have attended the lecture portion of the Method 9 certification course. In addition, the trainee shall successfully complete the Method 303 training course, satisfy the field observation requirement, and demonstrate adequate performance and sufficient knowledge of Method 303. The Method 303 training provider and course shall be approved by the Administrator and shall consist of classroom instruction, field training, and a proficiency test. In order to apply for approval as a Method 303 training provider, an applicant must submit their credentials and the details of their Method 303 training course to Group Leader, Measurement Technology Group (E143–02), Office of Air Quality Planning and Standards, U.S. Environmental Protection Agency, Research Triangle Park, NC 27711. Those details should include, at a minimum:

(a) A detailed list of the provider's credentials.

(b) An outline of the classroom and the field portions of the class.

(c) Copies of the written training and lecture materials, to include:

(1) The classroom audio-visual presentation(s).

(2) A classroom course manual with instructional text, practice questions and problems for each of the elements of the Method 303 inspection (*i.e.,* charging, doors, lids and offtakes, and collecting mains). A copy of Method 303 and any related guidance documents should be included as appendices.

(3) A copy of the Method 303 demonstration video, if not using the one available at: *http://www3.epa.gov/ttn/emc/methods/method303trainingvideo.mp4.*

(4) Multiple-choice certification tests, with questions sufficient to demonstrate knowledge of the method, as follows: One (1) Initial certification test and three (3) third-year recertification tests (the questions on any one recertification test must be at least 25 percent different from those on the other recertification tests).

(5) A field certification checklist and inspection forms for each of the elements of the Method 303 inspection (*i.e.,* charging, doors, lids and offtakes, and collecting mains).

(6) The criteria used to determine proficiency.

(7) The panel members to be utilized (see Section 10.1.3) along with their qualifications.

(8) An example certificate of successful course completion.

10.1.1 A trainee must verify completion of at least 12 hours of field observation prior to attending the Method 303 certification course. Trainees shall observe the operation of a coke oven battery as it pertains to Method 303, including topside operations, and shall also practice conducting Method 303 or similar methods. During the field observations, trainees unfamiliar with coke battery operations shall receive instruction from an experienced coke oven observer who is familiar with Method 303 or similar methods and with the operation of coke batteries.

10.1.2 The classroom instruction shall familiarize the trainees with Method 303 through lecture, written training materials, and a Method 303 demonstration video. Successful completion of the classroom portion of the Method 303 training course shall be demonstrated by a perfect score on the initial certification test. Those attending the course for third-year recertification must complete one of the recertification tests selected at random.

10.1.3 All trainees must demonstrate proficiency in the application of Method 303 to a panel of three certified Method 303

observers, including an ability to differentiate coke oven emissions from condensing water vapor and smoldering coal. The composition of the panel must be approved by the Administrator as part of the training course approval process. The panel members will be EPA, state or local agency personnel, or industry contractors listed in 59 FR 11960 (March 15, 1994) or qualified as part of the training provider approval process of section 10.1 of this method.

Each panel member shall have at least 120 days experience in reading visible emissions from coke ovens. The visible emissions inspections that will satisfy the experience requirement must be inspections of coke oven battery fugitive emissions from the emission points subject to emission standards under subpart L of this part (*i.e.,* coke oven doors, topside port lids, offtake system(s), and charging operations), using either Method 303 or predecessor state or local test methods. A ''day's experience'' for a particular inspection is a day on which one complete inspection was performed for that emission point under Method 303 or a predecessor state or local method. A ''day's experience'' does not mean 8 or 10 hours performing inspections, or any particular time expressed in minutes or hours that may have been spent performing them. Thus, it would be possible for an individual to qualify as a Method 303 panel member for some emission points, but not others (*e.g.,* an individual might satisfy the experience requirement for coke oven doors, but not topside port lids). Until November 15, 1994, the EPA may waive the certification requirement (but not the experience requirement) for panel members. The composition of the panel shall be approved by the EPA.

The panel shall observe the trainee in a series of training runs and a series of certification runs. There shall be a minimum of 1 training run for doors, topside port lids, and offtake systems, and a minimum of 5 training runs (*i.e.,* 5 charges) for charging. During training runs, the panel can advise the trainee on proper procedures. There shall be a minimum of 3 certification runs for doors, topside port lids, and offtake systems, and a minimum of 15 certification runs for charging (*i.e.,* 15 charges). The certification runs shall be unassisted. Following the certification test runs, the panel shall approve or disapprove certification based on the trainee's performance during the certification runs. To obtain certification, the trainee shall demonstrate, to the satisfaction of the panel, a high degree of proficiency in performing Method 303. To aid in evaluating the trainee's performance, a checklist, approved by the EPA, will be used by the panel members.

10.1.4 Those successfully completing the initial certification or third-year recertification requirements shall receive a certificate showing certification as a Method 303 observer and the beginning and ending dates of the certification period.

10.1.5 The training provider will submit to the EPA or its designee the following information for each trainee successfully completing initial certification or third-year recertification training: Name, employer, address, telephone, cell and/or fax numbers, email address, beginning and ending dates of certification, and whether training was for 3-year certification or 1-year recertification. This information must be submitted within 30 days of the course completion.

10.1.6 The training provider will maintain the following records, to be made available to EPA or its designee on request (within 30 days of a request):

(a) A file for each Method 303 observer containing the signed certification checklists, certification forms and test results for their initial certification, and any subsequent third-year recertifications. Initial certification records must also include documentation showing successful completion of the training prerequisites. Testing results from any interim recertifications must also be included, along with any relevant communications.

(b) A searchable master electronic database of all persons for whom initial certification, third-year recertification or interim recertification. Information contained therein must include: The observer's name, employer, address, telephone, cell and fax numbers and email address, along with the beginning and ending dates for each successfully completed initial, third-year and interim recertification.

10.1.7 Failure by the training provider to submit example training course materials and/or requested training records to the Administrator may result in suspension of the approval of the provider and course.

10.2 Observer Certification/Recertification. The coke oven observer certification is valid for 1 year. The observer shall recertify annually by reviewing the training material, viewing the training video and answering all of the questions on the recertification test correctly. Every 3 years, an observer shall be required to pass the proficiency test in section 10.1.3 in order to be certified. The years between proficiency tests are referred to as interim years.

[EPA–HQ–OPP–2015–0488; FRL–9953–40]

Spodoptera frugiperda Multiple Nucleopolyhedrovirus Strain 3AP2; Exemption From the Requirement of a Tolerance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This regulation establishes an exemption from the requirement of a tolerance for residues of *Spodoptera frugiperda* multiple nucleopolyhedrovirus strain 3AP2 in or on all food commodities when used in accordance with label directions and good agricultural practices. MacIntosh and Associates, Inc. (on behalf of AgBiTech Pty Ltd.) submitted a petition to EPA under the Federal Food, Drug, and Cosmetic Act (FFDCA), requesting an exemption from the requirement of a tolerance. This regulation eliminates the need to establish a maximum permissible level for residues of *Spodoptera frugiperda* multiple nucleopolyhedrovirus strain 3AP2 under FFDCA.

DATES: This regulation is effective November 22, 2016. Objections and requests for hearings must be received on or before January 23, 2017, and must be filed in accordance with the instructions provided in 40 CFR part 178 (see also Unit I.C. of the **SUPPLEMENTARY INFORMATION**).

ADDRESSES: The docket for this action, identified by docket identification (ID) number EPA–HQ–OPP–2015–0488, is available at *http://www.regulations.gov* or at the Office of Pesticide Programs Regulatory Public Docket (OPP Docket) in the Environmental Protection Agency Docket Center (EPA/DC), West William Jefferson Clinton Bldg., Rm. 3334, 1301 Constitution Ave. NW., Washington, DC 20460–0001. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566–1744, and the telephone number for the OPP Docket is (703) 305–5805. Please review the visitor instructions and additional information about the docket available at *http://www.epa.gov/dockets.*

FOR FURTHER INFORMATION CONTACT: Robert McNally, Biopesticides and Pollution Prevention Division (7511P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460–0001; main telephone number: (703) 305–7090; email address: *BPPDFRNotices@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this action apply to me?

You may be potentially affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. The following list of North American Industrial Classification System (NAICS) codes is not intended to be exhaustive, but rather provides a guide to help readers determine whether this document applies to them. Potentially affected entities may include:

- Crop production (NAICS code 111).
- Animal production (NAICS code 112).

• Food manufacturing (NAICS code 311).
• Pesticide manufacturing (NAICS code 32532).

B. How can I get electronic access to other related information?

You may access a frequently updated electronic version of 40 CFR part 180 through the Government Printing Office's e-CFR site at *http://www.ecfr.gov/cgi-bin/text-idx?&c=ecfr&tpl=/ecfrbrowse/Title40/40tab_02.tpl.*

C. How can I file an objection or hearing request?

Under FFDCA section 408(g), 21 U.S.C. 346a(g), any person may file an objection to any aspect of this regulation and may also request a hearing on those objections. You must file your objection or request a hearing on this regulation in accordance with the instructions provided in 40 CFR part 178. To ensure proper receipt by EPA, you must identify docket ID number EPA–HQ–OPP–2015–0488 in the subject line on the first page of your submission. All objections and requests for a hearing must be in writing, and must be received by the Hearing Clerk on or before January 23, 2017. Addresses for mail and hand delivery of objections and hearing requests are provided in 40 CFR 178.25(b).

In addition to filing an objection or hearing request with the Hearing Clerk as described in 40 CFR part 178, please submit a copy of the filing (excluding any Confidential Business Information (CBI)) for inclusion in the public docket. Information not marked confidential pursuant to 40 CFR part 2 may be disclosed publicly by EPA without prior notice. Submit the non-CBI copy of your objection or hearing request, identified by docket ID number EPA–HQ–OPP–2015–0488, by one of the following methods:

• *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be CBI or other information whose disclosure is restricted by statute.
• *Mail:* OPP Docket, Environmental Protection Agency Docket Center (EPA/DC), (28221T), 1200 Pennsylvania Ave. NW., Washington, DC 20460–0001.
• *Hand Delivery:* To make special arrangements for hand delivery or delivery of boxed information, please follow the instructions at *http://www.epa.gov/dockets/contacts.html.* Additional instructions on commenting or visiting the docket, along with more information about dockets generally, is available at *http://www.epa.gov/dockets.*

II. Background

In the **Federal Register** of November 25, 2015 (80 FR 73695) (FRL–9937–14), EPA issued a document pursuant to FFDCA section 408(d)(3), 21 U.S.C. 346a(d)(3), announcing the filing of a pesticide tolerance petition (PP 5F8361) by MacIntosh and Associates, Inc., 1203 Hartford Ave., St. Paul, MN 55116–1622 (on behalf of AgBiTech Pty Ltd, 8 Rocla Ct., Glenvale, Queensland 4350, Australia). The petition requested that 40 CFR part 180 be amended by establishing an exemption from the requirement of a tolerance for residues of *Spodoptera frugiperda* multiple nucleopolyhedrovirus—3AP2 in or on food crops. That document referenced a summary of the petition prepared by the petitioner MacIntosh and Associates, Inc. (on behalf of AgBiTech Pty Ltd), which is available in the docket via *http://www.regulations.gov.* There were no comments received in response to the notice of filing.

III. Final Rule

A. EPA's Safety Determination

Section 408(c)(2)(A)(i) of FFDCA allows EPA to establish an exemption from the requirement for a tolerance (the legal limit for a pesticide chemical residue in or on a food) only if EPA determines that the exemption is ''safe.'' Section 408(c)(2)(A)(ii) of FFDCA defines ''safe'' to mean that ''there is a reasonable certainty that no harm will result from aggregate exposure to the pesticide chemical residue, including all anticipated dietary exposures and all other exposures for which there is reliable information.'' This includes exposure through drinking water and in residential settings but does not include occupational exposure. Pursuant to FFDCA section 408(c)(2)(B), in establishing or maintaining in effect an exemption from the requirement of a tolerance, EPA must take into account the factors set forth in FFDCA section 408(b)(2)(C), which require EPA to give special consideration to exposure of infants and children to the pesticide chemical residue in establishing a tolerance or tolerance exemption and to ''ensure that there is a reasonable certainty that no harm will result to infants and children from aggregate exposure to the pesticide chemical residue . . .'' Additionally, FFDCA section 408(b)(2)(D) requires that EPA consider ''available information concerning the cumulative effects of a particular pesticide's . . . residues and other substances that have a common mechanism of toxicity.''

EPA evaluated the available toxicity and exposure data on *Spodoptera frugiperda* multiple nucleopolyhedrovirus strain 3AP2 and considered its validity, completeness, and reliability, as well as the relationship of this information to human risk. A full explanation of the data upon which EPA relied and its risk assessment based on that data can be found within the August 31, 2016, document entitled ''Federal Food, Drug, and Cosmetic Act (FFDCA) Considerations for *Spodoptera frugiperda* Multiple Nucleopolyhedrovirus strain 3AP2.'' This document, as well as other relevant information, is available in the docket for this action as described under **ADDRESSES**. Based upon its evaluation, EPA concludes that there is a reasonable certainty that no harm will result to the U.S. population, including infants and children, from aggregate exposure to residues of *Spodoptera frugiperda* multiple nucleopolyhedrovirus strain 3AP2. Therefore, an exemption from the requirement of a tolerance is established for residues of *Spodoptera frugiperda* multiple nucleopolyhedrovirus strain 3AP2 in or on all food commodities when used in accordance with label directions and good agricultural practices.

B. Analytical Enforcement Methodology

An analytical method is not required for enforcement purposes for the reasons contained in the August 31, 2016, document entitled ''Federal Food, Drug, and Cosmetic Act (FFDCA) Considerations for *Spodoptera frugiperda* Multiple Nucleopolyhedrovirus strain 3AP2'' and because EPA is establishing an exemption from the requirement of a tolerance without any numerical limitation.

IV. Statutory and Executive Order Reviews

This action establishes a tolerance exemption under FFDCA section 408(d) in response to a petition submitted to EPA. The Office of Management and Budget (OMB) has exempted these types of actions from review under Executive Order 12866, entitled ''Regulatory Planning and Review'' (58 FR 51735, October 4, 1993). Because this action has been exempted from review under Executive Order 12866, this action is not subject to Executive Order 13211, entitled ''Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use'' (66 FR 28355, May 22, 2001), or Executive

Order 13045, entitled ''Protection of Children from Environmental Health Risks and Safety Risks'' (62 FR 19885, April 23, 1997). This action does not contain any information collections subject to OMB approval under the Paperwork Reduction Act (PRA), 44 U.S.C. 3501 *et seq.,* nor does it require any special considerations under Executive Order 12898, entitled ''Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations'' (59 FR 7629, February 16, 1994).

Since tolerances and exemptions that are established on the basis of a petition under FFDCA section 408(d), such as the tolerance exemption in this action, do not require the issuance of a proposed rule, the requirements of the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*) do not apply.

This action directly regulates growers, food processors, food handlers, and food retailers, not States or tribes. As a result, this action does not alter the relationships or distribution of power and responsibilities established by Congress in the preemption provisions of FFDCA section 408(n)(4). As such, EPA has determined that this action will not have a substantial direct effect on States or tribal governments, on the relationship between the national government and the States or tribal governments, or on the distribution of power and responsibilities among the various levels of government or between the Federal Government and Indian tribes. Thus, EPA has determined that Executive Order 13132, entitled ''Federalism'' (64 FR 43255, August 10, 1999), and Executive Order 13175, entitled ''Consultation and Coordination with Indian Tribal Governments'' (65 FR 67249, November 9, 2000), do not apply to this action. In addition, this action does not impose any enforceable duty or contain any unfunded mandate as described under Title II of the Unfunded Mandates Reform Act (UMRA) (2 U.S.C. 1501 *et seq.*).

This action does not involve any technical standards that would require EPA's consideration of voluntary consensus standards pursuant to section 12(d) of the National Technology Transfer and Advancement Act (NTTAA) (15 U.S.C. 272 note).

V. Congressional Review Act

Pursuant to the Congressional Review Act (5 U.S.C. 801 *et seq.*), EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2).

List of Subjects in 40 CFR Part 180

Environmental protection, Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: October 20, 2016.

Jack E. Housenger,

Director, Office of Pesticide Programs.

Therefore, 40 CFR chapter I is amended as follows:

PART 180—[AMENDED]

■ 1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 321(q), 346a and 371.

■ 2. Add § 180.1339 to subpart D to read as follows:

§ 180.1339 *Spodoptera frugiperda* multiple nucleopolyhedrovirus strain 3AP2; exemption from the requirement of a tolerance.

An exemption from the requirement of a tolerance is established for residues of *Spodoptera frugiperda* multiple nucleopolyhedrovirus strain 3AP2 in or on all food commodities when used in accordance with label directions and good agricultural practices.

BILLING CODE 6560–50–P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 54

[WC Docket No. 10–90; FCC 16–143]

Connect America Fund

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: In this document, the Federal Communications Commission (Commission) adopts tailored service obligations for Alaska Communications Systems (ACS), a carrier serving a non-contiguous area that elected to receive nearly $20 million annually in Connect America Phase II frozen support amounts in lieu of model-based support.

DATES: Effective December 22, 2016, except for the certification in paragraph 33 which contains a new information collection requirement that will not be effective until approved by the Office of Management and Budget. The Commission will publish a document in the **Federal Register** announcing the effective date for that certification.

FOR FURTHER INFORMATION CONTACT: Alexander Minard, Wireline Competition Bureau, (202) 418–7400 or TTY: (202) 418–0484.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Order in WC Docket No. 10–90; FCC 16–143, adopted on October 24, 2016 and released on October 31, 2016. The full text of this document is available for public inspection during regular business hours in the FCC Reference Center, Room CY–A257, 445 12th Street SW., Washington, DC 20554, or at the following Internet address: *http://transition.fcc.gov/Daily_Releases/Daily_Business/2016/db1031/FCC-16-143A1.pdf.*

I. Introduction

1. In this Order, the Commission adopts tailored service obligations for Alaska Communications Systems (ACS), a carrier serving a non-contiguous area that elected to receive nearly $20 million annually in Connect America Phase II frozen support amounts in lieu of model-based support. The Commission finds these obligations are in the public interest and will advance the Commission's goal of ensuring universal availability of modern networks capable of providing voice and broadband service. Specifically, ACS will receive Phase II frozen support for a 10-year term and be required to offer voice service and broadband service at the same speed, latency, usage and pricing metrics as established for Phase II model-based carriers to at least 31,571 locations, primarily in census blocks identified as high-cost that are unserved by unsubsidized competitors, with limited exceptions. These service obligations strike the appropriate balance of ensuring Alaska consumers receive broadband service while also allowing ACS the flexibility to provide that service in a way that is logical, maximizes its network and is reasonable considering the unique climate and geographic conditions of its service territory.

II. Discussion

2. As described below, the Commission adopts specific service obligations for ACS as a non-contiguous carrier electing to receive Phase II frozen support. The service obligations established today maintain many of the same public interest standards as those established for model-based price cap carriers, but allow flexibility in both buildout locations and the deployment schedule to account for the distinctive

geographic and climate challenges of building and providing voice and broadband service in Alaska. By adopting these standards today, the Commission establishes clear deadlines for planning and deploying new broadband services to consumers in Alaska, as well as clear obligations to maintain existing service. The Commission finds these service obligations are in the public interest as ACS will provide advanced communication service to at least 31,571 locations.

3. *Speed.* The Commission adopts 10/1 Mbps as the minimum broadband speed requirement for ACS's Phase II broadband deployment.

4. ACS stated in its comments in response to the *April 2014 Connect America FNPRM,* 79 FR 39196, July 9, 2014, that it intends to provide speeds of at least 10/1 Mbps in its service territory and did not request a lesser speed in any location. In fact, ACS stated that it prefers a 10/1 Mbps service obligation, and planned its proposal accordingly. ACS explains that providing 10/1 Mbps service is more costly, however, than providing 4/1 Mbps service and requests that the 10/1 Mbps standard only be adopted if a ten-year term of support is adopted.

5. In the *December 2014 Connect America Order,* 80 FR 4446, January 27, 2015, the Commission adopted 10/1 Mbps as the minimum broadband speed for all ETCs subject to broadband performance obligations. Although the Commission has determined that 25/3 Mbps reflects ''advanced'' capabilities, the Commission has explained that ''[b]y setting a lower baseline for Connect America funding, the Commission establishes a framework to ensure a basic level of service to be available for all Americans, while at the same time working to provide access to advanced services.'' Based on the record before us, the Commission sees no reason to apply a different standard to ACS. Accordingly, the Commission adopts 10/1 Mbps as the minimum broadband speed requirement for deployment of broadband services to a specified number of locations in the ACS service territory and as a condition of receiving frozen support. While this represents the minimum, consistent with our recent decision to improve oversight over the outcomes achieved by rate-of-return carriers, ACS will also report to us the number of locations that will receive 25/3 Mbps service so that the Commission can track progress over time in achieving higher speeds.

6. *Latency.* The Commission adopts a roundtrip provider network latency requirement of 100 ms or less for ACS's Phase II broadband deployment.

7. In the *April 2014 Connect America FNPRM,* the Commission proposed that non-contiguous carriers be required to meet a roundtrip provider network latency of 100 ms or less. The Commission proposed that non-contiguous carriers choosing frozen support conduct their latency network testing from the customer location to a point at which traffic is consolidated for transport to an Internet exchange point in the continental United States. The Commission also proposed exempting non-contiguous carriers from the latency requirements to the extent the carriers rely exclusively on satellite backhaul facility and certify annually that no terrestrial backhaul options exist.

8. ACS stated in its comments that it intends to meet the Phase II parameters for roundtrip latency of 100 ms or less. Further, ACS confirms that none of the areas where it proposes to deploy new broadband rely exclusively on the use of satellite backhaul to deliver service. Accordingly, there is no reason in the record before us to relax the latency standard for ACS' proposed Phase II deployment. The Commission adopts the same requirement as implemented by the Bureau for model-based carriers in the *Phase II Service Obligations Order,* 78 FR 70881, November 27, 2013. Specifically, ACS must certify that 95 percent or more of all peak period measurements (also referred to as observations) of network round trip latency are at or below 100 ms. The measurements should be conducted over a minimum of two consecutive weeks during peak hours for at least 50 randomly-selected customer locations within the census blocks for which the provider is receiving frozen support using existing network management systems, ping tests, or other commonly available network measurement tools. ACS should conduct its latency network testing from the customer location to a point at which traffic is consolidated for transport to an Internet exchange point in the continental United States. The Commission adopts this latency standard for deployment of broadband services in the ACS service territory and as a condition of receiving of frozen support.

9. *Usage Allowance.* The Commission concludes that ACS will be required to provide a usage allowance that evolves over time to remain reasonably comparable to usage by subscribers in urban areas, similar to the approach adopted for price cap carriers.

10. In the *April 2014 Connect America FNPRM,* the Commission proposed that non-contiguous carriers continuing to receive frozen support be subject to the same usage allowance as that specified by the Bureau for price cap carriers receiving model-based support. Under the approach previously implemented by the Bureau for Phase II model-based support, price cap carriers must either provide a usage allowance based on the nationwide annual urban rate survey, or a usage allowance consistent with the usage level of 80 percent of their own broadband subscribers including those subscribers that live outside of Phase II-funded areas, subject to a 100 gigabyte (GB) per month floor. The Commission sought comment on whether—in light of the potentially unique circumstances in non-contiguous areas—it would be appropriate to relax the 100 GB minimum usage allowance for non-contiguous carriers and instead allow them to meet their usage requirements based on a comparison to 80 percent of their entire subscriber base. The Commission also proposed exempting non-contiguous carriers from the usage requirements to the extent the carriers rely exclusively on satellite backhaul facility and certify annually that no terrestrial backhaul options exist.

11. ACS stated in its comments that it intends to meet the Phase II obligations for usage and did not suggest any relaxation of the usage requirement was necessary. ACS also later explained that it is not its practice or policy to impose a data usage cap on its customers, and ACS has no intention of limiting usage in the future. ACS proposes to be subject to the same usage standard as that required for those carriers accepting the offer of model-based support.

12. Earlier this year, the Bureau announced that, based on the most recent publicly available Measuring Broadband America data, 80 percent of cable subscribers nationwide are using 156 GB, and it therefore set the 2016 minimum usage allowance for eligible telecommunications carriers subject to broadband public interest obligations at 150 GB per month. The Commission concludes that ACS as a non-contiguous carrier should be subject to the same general approach as implemented by the Bureau for the carriers that accepted model-based support. Like the price cap carriers receiving model-based support, the Commission requires ACS to offer at least one service option that provides a usage allowance that meets or exceeds the usage level of 80 percent of cable or fiber-based fixed broadband subscribers, whichever is higher, according to the most current publicly available Measuring Broadband America usage data. This minimum will be announced

annually by the Bureau. Alternatively, ACS may offer a usage allowance consistent with the usage level of 80 percent of its own broadband subscribers, including those subscribers that live outside of Phase II-funded areas, subject to a 150 GB floor. The Commission concludes it appropriate to update the minimum floor that ACS will be subject to in light of the more current information regarding usage trends. The Commission expects that ACS should have no problems meeting this requirement given its representation that it does not currently impose a usage limit on its customers or have any intent to do so in the future.

13. *Reasonably Comparable Rates.* ACS will be subject to the same obligation as all other recipients of high-cost universal service support to provide voice and broadband service at reasonably comparable rates.

14. In the *April 2014 Connect America FNPRM,* the Commission proposed to require non-contiguous carriers electing frozen support to offer both voice and broadband service at rates reasonably comparable to those services offered in urban areas. The Commission proposed the same two options for showing reasonable comparability as were adopted for model-based carriers: compliance with reasonable comparability benchmarks or a certification by the carrier that it offers the same or lower rates in rural areas as it does in urban areas. The Commission sought comment on whether non-contiguous carriers would face any challenges meeting this requirement. ACS stated in its comments that it does not anticipate challenges in meeting the statutory requirement to provide voice and broadband service at rates reasonably comparable to those offered in urban areas.

15. In a separate order, the Commission recently directed the Wireline Competition Bureau to establish an Alaska-specific reasonable comparability benchmark using data from its urban rate survey or other sources, as appropriate. The Commission will provide ACS the same two options for demonstrating compliance with this statutory requirement: by meeting the Alaska-specific benchmark or offering the same or lower rates in rural areas as it does in urban areas. As with model-based carriers, ACS will be required to certify annual compliance with this requirement as explained further below.

16. The Commission adopts a 10-year term of support for ACS's Phase II frozen support (2016–2025). As noted above, in the *April 2014 Connect America FNPRM,* the Commission sought comment on whether to specify a five-year term for those non-contiguous carriers that elect to receive frozen support, and whether there is a need to modify the term of support for such non-contiguous carriers. The Commission sought comment on any specific extenuating circumstances in non-contiguous areas that would require extending the term of frozen support for longer than five years.

17. ACS stated in its proposal that it will require a 10-year term of support to complete buildout to the stated number of locations and that buildout within five years is impossible. ACS explained that due to the harsh weather conditions of Alaska it is forced into a shortened construction season of three to four summer months throughout its service territory and thus a slower pace of progress. Further, ACS states it is challenged by decreased availability of experienced and qualified professionals knowledgeable in designing and deploying these services in Alaska—extending the time required to plan for deployment. Also, due to its remote northern location and unique construction limitations, ACS claims that it also confronts higher costs for broadband deployment. Ultimately, ACS argues these factors together require a 10-year term of support.

18. The Commission recognizes the climate and geographic challenges ACS faces in serving Alaska and find that adopting a 10-year term of support for ACS is in the public interest. While the Commission expects ACS to use its best efforts to expedite deployment, the Commission recognizes the shortened construction season and limited availability of experienced personnel is a unique limitation for ACS in Alaska that could slow the pace of buildout. Accordingly, the Commission adopts a 10-year term of support for ACS as a non-contiguous carrier electing Phase II frozen support, which will run from January 1, 2016, and end on December 31, 2025. For administrative reasons, the Commission finds it necessary to conform the term of support to the calendar year, to align reporting and other monitoring activities with that of other carriers. As discussed more completely below, ACS will be required to report its proposed list of locations by October 1, 2018. In year eight, the Commission expects it will conduct a rulemaking to determine how support will be awarded to serve these locations after the end of the ten-year period.

19. In the *April 2014 Connect America FNPRM,* the Commission sought comment on the specific build out obligations that non-contiguous carriers receiving frozen support would have in those census blocks that do not currently have broadband service meeting the Commission's requirements. Specifically, the Commission asked whether non-contiguous carriers receiving frozen support should be required to deploy voice and broadband-capable networks and offer services meeting the adopted performance metrics to all locations in those funded areas, consistent with the state-level commitments required of carriers receiving model-based support. In the alternative, the Commission asked whether these carriers should be allowed to serve some subset of locations within their respective service areas where the average cost equals or exceeds the funding benchmark established by the Bureau. Lastly, the Commission asked whether they should also be required to extend broadband-capable networks to locations in census blocks determined by the model to be above the extremely high-cost threshold.

20. ACS elected to receive Phase II frozen support for its entire service territory, and therefore, none of the census blocks in its service territory are eligible for the Phase II competitive bidding process. Below, the Commission addresses the specific geographic parameters for ACS' provision of voice and broadband service within its existing designated service territory and provide ACS with flexibility in its broadband deployment to account for the unique nature of serving Alaska. The Commission also provides ACS with forbearance relief consistent with the relief it provided other price cap carriers.

21. *Number of Locations.* The Commission requires ACS to offer voice and broadband service to a minimum of 31,571 locations that are not served by an unsubsidized competitor at 10/1 Mbps or better to meet its Phase II obligations, subject to the flexibility described below.

22. ACS proposes to use Phase II frozen support to offer service to a minimum of 26,000 locations that are not served by any provider, which would occur in those census blocks that were identified as high-cost by the cost model with certain exceptions discussed below. Initially, ACS proposed to offer service to 29,418 locations but later revised that number to 26,000. ACS explains that its initial calculation was based on CAM v4.1.1 and the revision was due to a recalculation using newer data from CAM v4.2, which excluded locations served by subsidized competitors. ACS then adjusted its initial estimate to exclude the off-road census blocks in the Alaskan Bush that ACS does not

propose to serve with broadband at this time.

23. While ACS proposes to establish a deployment obligation with a minimum number of locations, it does not provide a specific list of proposed census blocks or locations at this time. Instead, ACS suggests that two years will be necessary for planning, coordination and identifying the total number and precise locations for buildout. ACS claims that it needs this time to ''fully explore the most efficient options for network infrastructure deployment.'' Once the pre-planning and coordination stage is completed, ACS intends to submit a list to the Commission of its proposed locations.

24. Based on our review of June 2015 FCC Form 477 data for the number of high-cost locations, the Commission finds that requiring ACS to serve 31,571 locations is reasonable, given the other flexibility provided in this Order. While the Commission hopes that ACS will find after it engages in this planning process that it is possible to offer broadband services to more than 31,571 locations with the amount of funding provided, the Commission adopts this number as a strict minimum. Additionally, while ACS has proposed to select these locations using coverage data from the 2014 National Broadband Map, the Commission instead requires ACS to select its locations in blocks not served by a qualifying competitor using the June 2015 FCC Form 477 data. The Commission also adopts a challenge process for locations in blocks where another provider is reporting service, and for those blocks it requires ACS to utilize more recent publicly available data. This will ensure that support is targeted appropriately to those areas where there are no other providers offering broadband service meeting the Commission's requirements for high-cost support.

25. Consistent with the approach taken with respect to other price cap carriers, the Commission does not dictate which *specific* locations ACS must serve within its eligible areas, so long as it provides voice and broadband service meeting the obligations described in this Order to the minimum number of required locations, subject to the specific parameters adopted below. The Commission emphasizes, however, that it will hold ACS to its commitment to continue providing voice service throughout the Phase II term of support to all locations where it currently provides voice service, including those in the Alaskan Bush.

26. *Partially-served Census Blocks.* In satisfaction of its Phase II deployment obligations, the Commission will allow ACS the flexibility to deploy to up to 7,900 locations unserved by any provider within census blocks that also have locations served by an unsubsidized competitor, which the Commission refers to as ''partially served census blocks,'' subject to the conditions described below.

27. In the *April 2014 Connect America FNPRM,* the Commission proposed that non-contiguous carriers receiving frozen support not use such support in any areas where there is a terrestrial provider of fixed residential voice and broadband service that meets our Phase II performance requirements. However, the Commission also asked whether allowing substitution in partially-served census blocks could enable more effective network deployment and bring service to unserved consumers in those partially-served census blocks. In the *December 2014 Connect America Order,* the Commission declined to adopt the flexibility for non-contiguous carriers receiving frozen support to use support in any census block where there is a competitor providing service of 10/1 Mbps or greater to at least one location within the census block, and instead required them to relinquish the relevant Phase II frozen support for those areas. At the same time, the Commission acknowledged that all parties potentially interested in Connect America support have an interest in building economically efficient networks, which may not neatly align with census boundaries, and the Commission encouraged stakeholders to work together towards proposals that help ensure unserved consumers in partially served census blocks are not left behind.

28. ACS requests the flexibility to substitute up to 25 percent of its eligible locations with unserved locations in partially-served census blocks. ACS explains these substitutions are necessary, because even though the census block is treated as served, due to the geography and topography of the census block, some specific locations within a census block are not in fact served by any carrier. Compared to other states, Alaska has relatively large census blocks. ACS argues it would be more logical and economically efficient for ACS to serve these ''stranded'' customer locations, because in many cases these locations are very near or contiguous to ACS service territory and are clearly not easily served by the competitor given the particular geography of the census block. ACS proposes a public challenge process to ensure the substituted locations are actually unserved. ACS promises the substitutions would be made conservatively and would be limited to unserved locations in eligible census blocks in outlying areas—primarily surrounding Fairbanks and on the Kenai Peninsula.

29. In the *USF/ICC Transformation Order,* 76 FR 73830, November 29, 2011, the Commission decided to target Phase II support to those census blocks that are not served by an unsubsidized competitor. However, the Commission did not foreclose other ways of supporting high-cost locations within partially-served census blocks. Where, as here, there are physically isolated and distinct unserved locations within large census blocks, the Commission is willing to implement an approach that allows it to extend service to unserved consumers, while balancing our policy goal of not providing high-cost support to overbuild locations that are already served by another competitor. The Commission has recognized in other contexts that the fact a competitor reports service on FCC Form 477 does not mean it serves all of the locations within a census block. Therefore, the Commission finds that it is in the public interest to permit ACS to substitute unserved locations in partially-served census blocks for eligible model-based locations, because such locations may not otherwise receive service from ACS or a competitor. However, as suggested by ACS, the Commission limits ACS to no more than 7,900 unserved locations in partially-served census blocks. The Commission also requires ACS to certify that it does not itself serve the locations in such blocks at the time it submits its list, no later than October 1, 2018.

30. *Challenge Process.* The Commission will conduct a challenge process to ensure that all of the selected locations in partially served blocks in fact are unserved by any provider at 10/1 Mbps or better. The coverage data utilized in the cost model was State Broadband Initiative data as of June 2013. The Commission finds that it is in the public interest to ensure that the locations selected are unserved by any fixed, terrestrial competitors, including those that currently receive high-cost universal service support, before allowing ACS to build and deploy services to those locations. ACS suggested a format for conducting challenges for partially-served census blocks similar to the Phase II challenge process. The Commission concludes the process can be streamlined by using an approach similar to that previously adopted by the Commission for reporting changes to planned deployment for Phase I incremental support. Under this approach, the

Commission requires ACS to submit its proposed list of geocoded locations in partially served census blocks as soon as possible, but no later than October 1, 2018, along with certification of notice filed on any carrier that reports service in the relevant census block according to the most recent FCC Form 477 data available at that time, the Regulatory Commission of Alaska, and any relevant Tribal government. To ensure that the public is aware of the proposed deployment plan, the Commission directs the Bureau to issue a public notice announcing the proposed deployment plan, census blocks and geocoded locations. This will give any existing provider the opportunity to notify ACS and the Commission that the provider already serves the identified census blocks and specific locations with service meeting the Commission's standards for an unsubsidized competitor, thereby furthering the Commission's objective of not supporting areas where there are competitors already offering service. The Commission concludes that it is reasonable and most efficient to provide potential existing providers 45 days from the release of the Bureau's public notice to file a response notifying ACS and the Commission that they are currently providing service meeting the requisite requirements to the locations selected by ACS. Any identified locations that receive no response will automatically be deemed eligible for deployment with Phase II frozen support. The Commission delegates to the Bureau the authority to implement this process consistent with prior delegations regarding other challenge processes.

31. *Non-High-Cost Census Blocks.* The Commission adopts the additional flexibility for ACS to deploy to unserved locations within census blocks that were not identified as high-cost by the adopted version of the CAM, subject to the several limitations described below.

32. ACS requests the flexibility to substitute up to 10 percent of its eligible locations with unserved locations in census blocks that were not deemed high-cost by the cost model. ACS argues that the cost model did not accurately capture all of the costs of serving particular census blocks in Alaska, and excluded unserved areas and customers that are truly rural and where the cost to deploy service is in-fact high. For example, ACS explains there are several instances where all the census blocks surrounding a location are identified as high-cost, *i.e.,* eligible for support, but the middle ''land locked'' census block is not identified as such. ACS argues these census blocks are not served today, leaving hundreds of stranded customers without broadband service or the opportunity to be served in the future. ACS argues that it makes good policy and economic sense to let ACS deploy services to the unserved non-high-cost locations that can efficiently be reached during deployment to the eligible high-cost locations. ACS suggests a 10 percent cap on such substitutions.

33. The Commission grants ACS the flexibility to count towards its service obligation up to 2,714 locations in census blocks identified by the model as low-cost, so long as those locations are unserved with broadband by either ACS or a competitor, and the ''low-cost'' census block is immediately adjacent to high-cost census blocks. The Commission finds that it is in the public interest to permit ACS to use its Phase II frozen support to deploy to these unserved locations given the unique geographic characteristics of Alaska. However, as suggested by ACS, the Commission finds a limitation is appropriate. The model calculates that there are 2,714 low-cost, unserved, on-road locations, using June 2015 FCC Form 477 data. As such, the Commission finds it is reasonable and in the public interest to limit ACS to no more than 2,714 location substitutions in such census blocks that are not identified as high-cost by the model. Further, for each location ACS substitutes under the terms of this flexibility, the Commission requires ACS to certify that deployment to that location was, in fact, high cost. Specifically, the Commission requires ACS to certify that the capital expenditures (capex) it incurs to build out to each location within a qualifying ''low-cost'' census block was at least $5,000. According to the model, the average capital expenditure for high-cost locations in Alaska is at least $5,007.95, so the Commission concludes that ACS should only be able to count towards its total these locations if they in fact require at least this amount of capex to newly serve the location. This certification will be due along with the annual location report. ACS may be required to produce documentation regarding its actual capex for such locations to support its certification when USAC validates completion of its deployment obligations or in the course of an audit. Any location that cannot meet this certification will not be counted toward the minimum location requirement.

34. *Forbearance.* The Commission takes the opportunity today to adopt the same forbearance for ACS as it did for other price cap carriers in the *December 2014 Connect America Order.* As the Commission did in that order and for the same reasons, it now concludes that it is in the public interest to forbear, pursuant to section 10 of the Communications Act of 1934, as amended (the Act) from enforcing a federal high-cost requirement that ACS offer voice telephony service throughout its service territory pursuant to section 214(e)(1)(A) in three types of geographic areas: (1) Census blocks determined by the adopted cost model to be low-cost, (2) census blocks served by an unsubsidized competitor, to the extent ACS does not identify locations within partially-served census blocks to meet its deployment obligation, and (3) in census blocks where another ETC is receiving high-cost support to deploy modern networks capable of providing voice and broadband to fixed locations. ACS will be able to avail itself of this forbearance upon the conclusion of the Bureau's review of ACS's submitted locations, and finalization of the specific census blocks containing locations to be served.

35. *Phase I Obligations.* ACS seeks clarification regarding the relationship between Phase I and Phase II obligations with regard to the issue of upgrading facilities. ACS asks whether it can use Phase II frozen support to upgrade locations built in Phase I that are currently served with 4/1 Mbps broadband, and are in census blocks eligible for support in Phase II. The Commission finds it is not in the public interest for ACS to use Phase II funding to upgrade Phase I locations. Consistent with Commission goals of universal service, the Commission finds it is an economically inefficient use of funds at this time to provide support to deploy service to a location and then provide support to upgrade that location while other locations remain unserved entirely. Instead, the Commission's goals are better served by reaching new customers that do not currently have any advanced communication. Therefore, the Commission concludes it is not in the public interest to allow ACS to use its Phase II frozen support funds to upgrade the existing Phase I locations served with 4/1 Mbps to 10/1 Mbps service.

36. *Timeline.* ACS supports interim buildout milestones and requests a timeline that reflects its proposed ten-year term of support. As discussed above, ACS suggests that it needs two years to determine its broadband buildout plan before ACS can begin deployment. Accordingly, ACS suggests buildout milestones that are ''backloaded'' as compared with the model-based timeline—30 percent

completion by year four, 60 percent completion by year seven, and full completion by year ten.

37. Above the Commission adopted a 10-year term of support. The Commission also acknowledged the unique challenges that ACS confronts as a non-contiguous carrier building in Alaska. However, the Commission also wants to ensure that ACS begins construction no later than 2019. Accordingly, the Commission adopts a timeframe that requires ACS to complete its planning by October 1, 2018, with the remaining time to complete deployment of voice and broadband-capable networks. As such, the Commission will require ACS to complete initial planning and submit its proposed list of census blocks and locations to the Commission by October 1, 2018. Thereafter, as explained above, the Commission will conduct an efficient challenge process for those locations in partially served blocks to determine final deployment locations, which the Commission anticipates will be completed during first quarter 2019. ACS will then be able to commence deployment in those partially served census blocks no later than the summer of 2019. Full completion of the planning process is not a requisite, however, for it to begin deployment in the high-cost census blocks not subject to a challenge process. The Commission emphasizes that ACS is not precluded from, and indeed it is encouraged to begin, extending broadband to unserved locations in those high-cost blocks (the high-cost blocks lacking an unsubsidized competitor according to the June 2015 FCC Form 477 data).

38. The Commission is not persuaded that ACS should only be subject to two intermediate milestones for the 10-year term. The Commission recently adopted evenly spaced interim deployment milestones for rate-of-return carriers electing to receive Phase II model-based support. For similar reasons, the Commission concludes here that annual interim milestones are appropriate for ACS. This will enable the Commission to monitor ACS' progress throughout the term of support. Accordingly, the Commission adopts the following timeline for offering broadband service meeting the Commission's requirements: 30 percent of all locations by the end of 2018, 40 percent by the end of 2019, 50 percent by the end of 2020, 60 percent by the end of 2021, 70 percent by the end of 2022, 80 percent by the end of 2023, 90 percent by the end of 2024, and all locations by the end of 2025.

39. *Standard for Meeting Deployment Obligation.* ACS asks that it be allowed to serve between 95–100 percent of its minimum required number of locations, with a reduction in support for the locations not served if those locations are identified by a date certain in the planning process. ACS argues this flexibility is needed due to the inaccuracy of the cost model to determine proper high-cost census blocks in Alaska, and due to the lack of interest in building to these locations should ACS not deploy services there. ACS explains that while the substitution flexibilities will go a long way to correcting the alleged imprecisions of the cost model to provide service to those consumers that need it most, it simply is not enough flexibility.

40. In the *December 2014 Connect America Order,* the Commission allowed price cap carriers the flexibility of deploying to between 95–100 percent of required locations subject to a required refund of support based on the number of required locations left unserved at the end of the support term. The Commission recognized that there may be a variety of unforeseen factors, after the initial planning stage, that can cause significant changes as a network is actually being deployed in the field. The Commission balanced our goal of advancing the availability of broadband to these high-cost locations with this flexibility and adopted a metric to recover support. This metric was based on the assumption that many of the locations left unserved would have higher than the average costs calculated by the model. In particular, the Commission calculated the factor based on the average support for the top five percent of the funded locations nationwide compared to the average support for all funded locations. The Commission then divided that nationwide figure by one-half, in recognition that the average could vary widely between carriers and states.

41. Consistent with the general approach adopted for price cap carriers accepting model-based support in the *December 2014 Connect America Order,* the Commission accepts the ACS proposal and allow ACS the flexibility to build to between 95–100 percent of its minimum required locations, subject to the requirement to refund support based on the number of unserved locations as the end of the 10-year support term. Accordingly, the Commission establishes a similar metric for refunding support calculated specifically for Alaska. The average support for the top five percent of ACS high-cost locations is 8.2 times the average for all of ACS' funded high-cost locations. The Commission does not divide that figure in half, as this is an Alaska-specific and carrier-specific number. Therefore, should ACS fail to build to 100 percent of its required minimum locations at the end of its support term, the Commission will require ACS to refund a support amount based on the number of locations left unserved times $51,152—the average per-location Phase II frozen support ACS receives multiplied by 8.2.

42. The Commission requires ACS to comply with our existing high-cost reporting and oversight mechanisms, unless otherwise modified as described below. In the *April 2014 Connect America FNPRM,* the Commission sought comment on how to monitor and enforce compliance by non-contiguous carriers receiving frozen support once the Commission determined their specific service obligations. The Commission asked about measures that must be in place to ensure that it has the ability to monitor compliance with these service obligations. The Commission asked whether there were considerations specific to non-contiguous areas that it should account for when determining whether these carriers have complied with their service obligations.

43. *Annual Reporting Requirements.* Pursuant to section 54.313 of the Commission's rules, ACS must continue to file its FCC Form 481 on July 1 each year. ACS supports monitoring and enforcement measures and did not request accommodations with regard to compliance standards. Further, consistent with the relief granted to other price cap carriers in the *2016 Rate-of-Return Reform Order,* 79 FR 24282, April 25, 2016, the Commission also eliminates the requirement that ACS file the five-year service quality improvement plan and annual updates, as it instead will be filing annual progress updates throughout the term. The Commission also adopts the same reporting obligation for ACS as required of the model-based price cap carriers to report the total amount of Connect America Phase II support, if any, it used for capital expenditures in the previous calendar year.

44. *Location Reporting Requirements.* In the *December 2014 Connect America Order,* the Commission required all price cap carriers accepting model-based support to include in their annual reports a list of the geocoded locations to which they have newly deployed facilities using Connect America support in the prior year. The Commission also required those companies to report with their first list (*i.e.* the one due on July 1, 2016) geocoded locations where the carrier already was offering service meeting the

Commission's requirements. The list must identify which locations are located in a Phase II-funded block and which locations are located in extremely high-cost census blocks. In the *2016 Rate-of-Return Reform Order,* the Commission updated the Phase II location reporting obligations—moving this data collection out of the annual report and revising deadlines for submission. Specifically, instead of reporting geocoded location information in the annual report, due July 1 for the prior calendar year, the Commission concluded that it will serve the public interest for price cap carriers to report on deployment by March 1 every year with respect to the prior calendar year, rather than six months later. The Commission also required all rate-of-return ETCs to report annually to the Commission on the number of geocoded locations where they are offering 4/1 Mbps, 10/1 Mbps or 25/3 Mbps. The Commission directed the Bureau to work with USAC to develop an online portal that will enable all carriers to submit their geocoded information on a rolling basis throughout the year. Further, the Commission decided that price cap carriers will continue to make annual certifications that they are meeting their public interest obligations, but will do so when submitting the information to USAC by this deadline, rather than in their annual reports.

45. Additionally, price cap ETCs' geolocation data and associated deployment certifications no longer be are provided pursuant to the deadlines specified in section 54.313. The penalties in section 54.313(j) for failure to timely file that information do not apply absent additional conforming modifications to our rules. Therefore, as is the case for rate-of-return ETCs, the penalties for price cap ETCs to fail to timely file geolocation data and associated deployment certifications are located in new section 54.316(c).

46. The Commission adopts similar reporting obligations for ACS as a recipient of Phase II frozen high-cost support. ACS will be required to submit the requisite information to USAC no later than March 1 of each year, for locations where they offered service in the prior year. Similar to the rate-of-return carriers, ACS will be required to separately identify the number of locations where it is offering speeds of at least 10/1 Mbps or 25/3 Mbps. While ACS's deployment obligation is to offer at least 10/1 Mbps broadband to the requisite number of locations, depending on network design, some of those locations may receive better than 10/1 Mbps service, and the Commission sees value in tracking progress at the higher speed tier as well. As with other carriers subject to obligations to report their progress in broadband deployment, ACS is encouraged to submit information on a rolling basis throughout the year, as soon as service is offered, to avoid filing all of its locations at the deadline.

47. *Reductions in Support.* Today, the Commission adopts specific defined deployment milestones for ACS. Based on the record before us, the Commission finds no reason to relax our compliance standards for ACS as a non-contiguous carrier electing frozen support. The table below summarizes the regime previously adopted by the Commission for non-compliance with defined deployment milestones.

NON-COMPLIANCE MEASURES

Compliance gap	Non-Compliance measure
5% to less than 15%	Quarterly reporting.
15% to less than 25%	Quarterly reporting + withhold 15% of monthly support.
25% to less than 50%	Quarterly reporting + withhold 25% of monthly support.
50% or more	Quarterly reporting + withhold 50% of monthly support for six months; after six months withhold 100% of monthly support and recover percentage of support equal to compliance gap plus 10% of support disbursed to date.

48. *Appropriate Uses of Support.* The Commission clarifies, at ACS's request, that ACS may use Phase II frozen support for middle mile costs and reasonable operation expenses, so long as it otherwise meets the obligations to offer service meeting the requirements of this Order to 31,571 locations. Recipients of model-determined support are free to use such support to defray the cost of middle mile transport necessary to deliver broadband service meeting the Commission's requirements to end-user customers. The Commission sees no reason to treat ACS differently because it is receiving Phase II frozen support as opposed to Phase II support calculated by the cost model.

49. The Commission also finds that ACS's Phase II frozen support is sufficient to carry out its deployment obligations as well as maintain existing voice service in the high-cost and extremely high-cost census blocks in its territory, and the Commission clarifies that ACS may use its support for either such purpose.

III. Procedural Matters

50. This Order contains a modified information collection, which will be submitted to the Office of Management and Budget (OMB) for review under section 3507(d) of the PRA. OMB, the general public, and other Federal agencies will be invited to comment on the new information collection requirement contained in this Order. In addition, the Commission notes that pursuant to the Small Business Paperwork Relief Act of 2002, it previously sought specific comment on how the Commission might further reduce the information collection burden for small business concerns with fewer than 25 employees. The Commission describes impacts that might affect small businesses, which includes most businesses with fewer than 25 employees, in the Supplemental Final Regulatory Flexibility Analysis (FRFA) below, *infra.*

51. The Commission previously sent a copy of the *December 2014 Connect America Order* to Congress and the Government Accountability Office pursuant to the Congressional Review Act and will supplement this filing with a copy of this Order.

52. As required by the Regulatory Flexibility Act of 1980 (RFA), as amended, an Initial Regulatory Flexibility Analyses (IRFA) was incorporated in the *Further Notice of Proposed Rulemaking* adopted in November 2011 (*USF/ICC Transformation FNPRM*) and the *Further Notice of Proposed Rulemaking* adopted in April 2014 (*April 2014 Connect America FNPRM*) in this proceeding. The Commission included a Final Regulatory Flexibility Analysis (FRFA) in Appendix B of the *December 2014 Connect America Order.* This Supplemental Final Regulatory Flexibility Analysis (Supplemental

FRFA) supplements the FRFA to reflect the actions taken in this Order and conforms to the RFA.

53. In this Order, the Commission adopts tailored public service obligations for Alaska Communications Systems (ACS), a price-cap carrier serving Alaska, to support the deployment of voice and broadband-capable networks in Alaska.

54. In the *USF/ICC Transformation Order,* the Commission recognized that price cap carriers serving specific non-contiguous areas of the United States, including Alaska, face difference operating conditions and challenges from those faced by carriers in the contiguous 48 states. In April 2014, the Commission proposed to establish the same service obligations but sought comment the flexibility required for non-contiguous carriers to meet the standards. In December 2014, the Commission concluded tailored service obligations for each non-contiguous carrier was the best approach.

55. In this Order, the Commission adopts targeted changes to the price cap model-based support public service obligations to accommodate the unique circumstances of ACS service in Alaska. Specifically, the Commission makes an adjustment to the term of support, establish a minimum number of locations where service must be offered, establish a planning phase deadline, adopt revised interim deployment milestones, and allow a limited number of location substitutions—allowing ACS to use its support to provide service in locations that are in partially-served census blocks and ''high-cost'' locations in ''low-cost'' census blocks. The Commission establishes a challenge process for determining the substitute locations in partially-served census blocks, and amend the location certification requirement to effectively monitor substitutions in ''low-cost'' census blocks. The Commission also forbears from the federal high-cost universal service obligation of ACS to offer voice service in low-cost areas where it does not receive high-cost support, in areas served by an unsubsidized competitor, and in areas where ACS is replaced by another eligible telecommunications carrier (ETC).

56. Pursuant to the Small Business Jobs Act of 2010, which amended the RFA, the Commission is required to respond to any comments filed by the Chief Counsel of the Small Business Administration (SBA), and to provide a detailed statement of any change made to the proposed rule(s) as a result of those comments. The Chief Counsel did not file any comments in response to the proposed rule(s) in this proceeding.

57. As noted above, a FRFA was incorporated into the *December 2014 Connect America Order.* In that analysis, the Commission described in detail the small entities that might be significantly affected by the rules adopted in the *Order.* Those entities may be found in a number of services including, *e.g.:* wired telecommunications carriers, local exchange carriers, incumbent local exchange carriers, competitive local exchange carriers, interexchange carriers, local resellers, toll resellers, wireless telecommunications carriers, broadband personal communications service, advanced wireless services, satellite telecommunications, cable companies and systems, cable system operators, internet service providers, and all other information services. In this Order, the Commission hereby incorporates by reference the descriptions and estimates of the number of small entities from the previous FRFA in this proceeding.

58. The rule changes in this Order will affect one entity, Alaska Communications Systems, which fits the descriptions of entities outlined in the FRFA.

59. The data, information and document collection required by the *December 2014 Connect America Order* as described in the previous FRFA in this proceeding is hereby incorporated by reference. The actions taken in this Order amend the collection by altering the reporting milestones, adding one reporting requirement, and adding one certification requirement.

60. In this Order, the Commission amends the reporting requirements by requiring ACS to file a report at the conclusion of its planning phase, and no later than October 1, 2018. This report will provide the Commission with a list of the proposed locations to which ACS intends to offer service over the 10-year support term.

61. In this Order, the Commission amends the interim milestones reports to accommodate the extended term. ACS will be provided support for a 10-year term and will be required to offer voice and broadband service meeting certain latency, data usage, speed and reasonably comparable rate obligations to a certain number of locations. Accordingly, ACS will be required to report that it has built 30 percent of all locations by the end of 2018, 40 percent by the end of 2019, 50 percent by the end of 2020, 60 percent by the end of 2021, 70 percent by the end of 2022, 80 percent by the end of 2023, 90 percent by the end of 2024, and all locations by the end of 2025. Should ACS fail to meet these milestones, it will be subject to certain non-compliance measures, including support reductions and reporting.

62. Lastly, in this Order, the Commission amends the collection to include a new cost certification requirement. In that certification, ACS must certify that the capital investment cost incurred to newly extend service to a location in a ''low-cost'' census block is at least $5,000. ACS may be required to maintain documentation regarding this certification. The Commission concludes that requiring this certification will ensure that the Commission can monitor compliance with the section 254(b) principle that ''[c]onsumers in all regions of the Nation . . . including . . . those in . . . high cost areas, should have access to telecommunications and information services . . .''

63. The analysis of the Commission's efforts to minimize the possible significant economic impact on small entities as described in the previous FRFA in this proceeding is hereby incorporated by reference. It is unchanged by this Order, save the addition of the reporting and certification obligations described above. This increased burden is outweighed by the importance of monitoring the use of the public's funds and ensuring support is used for its intended purpose.

64. The Commission notes that the reporting and certification requirements it adopts for ACS are tailored to its unique circumstance. Additionally, the information that the Commission is requiring ACS report and certify is information it expects the company will already be tracking to ensure its system is built economically and effectively.

65. *People with Disabilities.* To request materials in accessible formats for people with disabilities (braille, large print, electronic files, audio format), send an email to *fcc504@fcc.gov* or call the Consumer & Governmental Affairs Bureau at 202–418–0530 (voice), 202–418–0432 (tty).

IV. Ordering Clauses

66. *Accordingly, it is ordered,* pursuant to the authority contained in sections 1, 2, 4(i), 5, 10, 201–206, 214, 218–220, 251, 252, 254, 256, 303(r), 332, 403, and 405 of the Communications Act of 1934, as amended, and section 706 of the Telecommunications Act of 1996, 47 U.S.C. 151, 152, 154(i), 155, 160, 201–206, 214, 218–220, 251, 252, 254, 256, 303(r), 332, 403, 405, 1302, and sections 1.1, 1.427, and 1.429 of the Commission's rules, 47 CFR 1.1, 1.427,

and 1.429, that this Order, Is Adopted, effective thirty (30) days after publication of the text or summary thereof in the **Federal Register**, except for the certification in paragraph 33, which contains information collections subject to PRA review and Shall Become Effective immediately upon announcement in the **Federal Register** of OMB approval.

67. *It is further ordered* that the Commission Shall Send a copy of this Order to Congress and the Government Accountability Office pursuant to the Congressional Review Act, *see* 5 U.S.C. 801(a)(1)(A).

Federal Communications Commission.

Marlene H. Dortch,

Secretary.

[FR Doc. 2016–28114 Filed 11–21–16; 8:45 am]

BILLING CODE 6712–01–P

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

49 CFR Part 376

Lease and Interchange of Vehicles by Mexico-Domiciled Motor Carriers

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice on applicability.

SUMMARY: Section 219(d) of the Motor Carrier Safety Improvement Act of 1999 (MCSIA) restricted Mexico-domiciled motor carriers from leasing commercial motor vehicles (CMVs) to U.S. carriers to transport property into the United States until the international obligations under the North American Free Trade Agreement (NAFTA) chapter on cross-border trade in services were met. Given FMCSA's acceptance of applications for long-haul operating authority from Mexico-domiciled motor carriers following the conclusion of the U.S.-Mexico Cross Border Long-Haul Trucking Pilot Program, the obligations are fulfilled and the restriction is no longer applicable.

DATES: Effective November 22, 2016.

FOR FURTHER INFORMATION CONTACT: Bryan Price, Chief, North American Borders Division, FMCSA, 1200 New Jersey Avenue SE., Washington, DC 20590–0001. Telephone (202) 366–2995; email *bryan.price@dot.gov.*

SUPPLEMENTARY INFORMATION:

Background

The Motor Carrier Safety Improvement Act of 1999[1] (MCSIA) created FMCSA and transferred authority for motor carrier safety from the Federal Highway Administration.

Section 219(d) prohibited the leasing by a Mexico-domiciled motor carrier (lessor) of its equipment to a U.S. motor carrier (lessee) for operation beyond the commercial zones on the U.S.-Mexico border. This restriction specifically applied ''Before the implementation of the land transportation provisions of NAFTA . . .'' The second clause in section 219(d) further states that this prohibition exists ''during any period in which a suspension, condition, restriction or limitation imposed under section 13902(c) of title 49 . . . applies to a [long-haul] motor carrier (as defined in section 13902(e)).'' Section 13902(c) addresses ''Restrictions on motor carriers domiciled in or owned or controlled by nationals of a contiguous foreign country.''

Section 13902(c)(3) provides that only ''The President'' or his delegate may ''remove or modify in whole or in part any action taken under paragraph (1)(A) if the President or such delegate determines that such removal or modification is consistent with the obligations of the United States under a trade agreement or with United States transportation policy.'' In November 2002, President Bush issued a presidential memorandum lifting the moratorium on granting long-haul operating authority to qualified Mexico-domiciled motor carriers of property and of passengers.[2] The only limitation that remained following this presidential action was the restriction on point-to-point transportation within the United States, which did not impact the NAFTA land transportation provisions.

In March 2002, FMCSA issued Interim Final Rules that fulfilled a Congressional mandate to ensure the safe operation of Mexican vehicles in the United States. Several organizations filed suit in the U.S. Court of Appeals for the Ninth Circuit challenging those rules. The Court set aside the rules, and the United States sought Supreme Court review of the decision. In 2004, the Supreme Court reversed the Ninth Circuit and upheld the Agency's Interim Final Rules (*Department of Transportation, et al.* v. *Public Citizen, et al.,* 541 U.S. 752 (2004)).

Congress, however, subsequently passed Section 6901 of the U.S. Troop Readiness, Veterans' Care, Katrina Recovery, and Iraq Accountability Appropriations Act of 2007,[3] imposing further limitations on the Agency's ability to expend appropriated funds to issue operating authority to Mexico-domiciled motor carriers. The Agency was unable to process applications for long-haul operating authority from Mexico-domiciled motor carriers until a pilot program was completed pursuant to these new requirements.

From October 14, 2011, through October 10, 2014, FMCSA conducted a pilot program to determine the ability of Mexican motor carriers to operate safely in the United States. FMCSA delivered the requisite report to Congress in January, 2015. On January 15, 2015 (80 FR 2179), FMCSA announced that it would begin accepting and processing applications for long-haul operating authority from Mexico-domiciled property carriers under 49 U.S.C. 13902.

Because Mexico-domiciled motor carriers may now apply for and receive long-haul operating authority, the land transportation provisions of NAFTA for property carriers have been implemented. Therefore, the previous leasing restrictions are not applicable, consistent with Section 219(d) of MCSIA.

This notice is being issued to prevent inconsistent enforcement of a law that is no longer applicable. It also serves to inform all motor carriers and the general public that, in accordance with NAFTA and MCSIA, Mexican-domiciled motor carriers (lessors) are allowed to lease their equipment to U.S. motor carriers (lessees) regardless of the destination of the cargo, as long as the carriers meet the requirements of 49 CFR part 376. Included in part 376 are requirements that the ''authorized carrier'' (in this case, the U.S. motor carrier) assume ''complete responsibility for the operation of the equipment for the duration of the lease'' [49 CFR 376.12(c)]. These types of leasing arrangements are compliant with MCSIA and the Agency's regulations.

Issued on: November 9, 2016.

T.F. Scott Darling, III,

Acting Administrator.

RIN 0648–XF035

Fisheries of the Northeastern United States; Atlantic Bluefish Fishery; Quota Transfer

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; approval of quota transfer.

SUMMARY: NMFS announces its approval of a transfer of 2016 commercial bluefish quota from the State of Maine to the State of Rhode Island. The approval of the transfer complies with the Atlantic Bluefish Fishery Management Plan quota transfer provision. This announcement also informs the public of the revised commercial quotas for Maine and Rhode Island.

DATES: Effective November 21, 2016, through December 31, 2016.

FOR FURTHER INFORMATION CONTACT: Reid Lichwell, Fishery Management Specialist, (978) 281–9112.

SUPPLEMENTARY INFORMATION: Regulations governing the Atlantic bluefish fishery are found in 50 CFR 648.160 through 648.167. The regulations require annual specification of a commercial quota that is apportioned among the coastal states from Maine through Florida. The process to set the annual commercial quota and the percent allocated to each state are described in § 648.162.

The final rule implementing Amendment 1 to the Bluefish Fishery Management Plan was published in the **Federal Register** on July 26, 2000 (65 FR 45844), and provided a mechanism for transferring bluefish quota from one state to another. Two or more states, under mutual agreement and with the concurrence of the Administrator, Greater Atlantic Region, NMFS (Regional Administrator), can request approval of a transfer of bluefish commercial quota under § 648.162(e)(1)(i) through (iii). The Regional Administrator must first approve any such transfer based on the criteria in § 648.162(e).

Maine and Rhode Island have requested the transfer of 32,000 pounds (lb) (14,515 kilogram (kg)) of bluefish commercial quota from Maine to Rhode Island. Both states have certified that the transfer meets all pertinent state requirements. This quota transfer was requested by Rhode Island to ensure that its 2016 quota would not be exceeded. The Regional Administrator has approved this quota transfer based on his determination that the criteria set forth in § 648.162(e)(1)(i) through (iii) have been met. The revised bluefish quotas for calendar year 2016 are: Maine, 655 lb (297 kg); and Rhode Island, 464,561 lb (210,721 kg). These quota adjustments revise the quotas specified in the final rule implementing the 2016–2018 Atlantic Bluefish Specifications published on August 4, 2016 (81 FR 51370), and reflect all subsequent commercial bluefish quota transfers completed to date. For information of previous transfers for fishing year 2016 visit: *http://go.usa.gov/xZT8H.*

Classification

This action is taken under 50 CFR part 648 and is exempt from review under Executive Order 12866.

Pacific Island Pelagic Fisheries; 2016 Commonwealth of the Northern Mariana Islands Bigeye Tuna Fishery; Closure

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; closure.

SUMMARY: NMFS is closing the U.S. pelagic longline fishery for bigeye tuna in the western and central Pacific Ocean because the fishery will reach the 2016 allocation limit for the Commonwealth of the Northern Mariana Islands (CNMI). This action is necessary to comply with regulations managing this fish stock.

DATES: Effective 12:01 a.m. local time December 1, 2016, through December 31, 2016.

FOR FURTHER INFORMATION CONTACT: Ariel Jacobs, NMFS PIRO Sustainable Fisheries, 808–725–5182.

SUPPLEMENTARY INFORMATION: On July 22, 2016, NMFS restricted the retention, transshipment and landing of bigeye tuna captured by longline gear in the western and central Pacific Ocean (WCPO) because the U.S. longline fishery reached 2016 U.S. bigeye tuna limit of 3,554 mt (81 FR 45982, July 15, 2016). Regulations at 50 CFR 300.224(d) provide an exception to this closure for bigeye tuna caught by U.S. longline vessels identified in a valid specified fishing agreement under 50 CFR 665.819(c). Further, 50 CFR 665.819(c)(9) authorized NMFS to attribute catches of bigeye tuna made by U.S. longline vessels identified in a valid specified fishing agreement to the U.S. territory to which the agreement applies.

Effective on September 9, 2016, NMFS specified a 2016 catch limit of 2,000 mt of longline-caught bigeye tuna for the U.S. territories of American Samoa, Guam and the Commonwealth of the Northern Mariana Islands or CNMI (81 FR 63145, September 14, 2016). NMFS also authorized each territory to allocate up to 1,000 mt of its 2,000 mt bigeye tuna limit to U.S. longline fishing vessels permitted to fish under the Fishery Ecosystem Plan for Pelagic Fisheries of the Western Pacific (FEP).

On September 9, 2016, the Western Pacific Fishery Management Council, through its Executive Director, transmitted to NMFS a specified fishing agreement between the CNMI and Quota Management, Inc. (QMI) dated April 14, 2016. NMFS reviewed the agreement and determined that it was consistent with the requirements at 50 CFR 665.819, the FEP, the Magnuson-Stevens Fishery Conservation and Management Act, and other applicable laws (81 FR 64356, September 20, 2016). The criteria that a specified fishing agreement must meet, and the process for attributing longline-caught bigeye tuna, followed the procedures in 50 CFR 665.819—Territorial catch and fishing effort limits.

In accordance with 50 CFR 300.224(d) and 50 CFR 665.819(c)(9), NMFS began attributing bigeye tuna caught in the WCPO by vessels identified in the CNMI/QMI agreement to the CNMI, beginning on September 9, 2016. NMFS monitored catches of longline-caught bigeye tuna by the CNMI longline fisheries, including catches made by U.S. longline vessels operating under the CNMI/QMI agreement. Based on this monitoring, NMFS forecasted that the

CNMI territorial allocation limit of 1,000 mt will be reached by December 1, 2016, and is, as an accountability measure, prohibiting the catch and retention of longline-caught bigeye tuna by vessels in the CNMI/QMI agreement.

Notice of Closure and Temporary Rule

Effective 12:01 a.m. local time December 1, 2016, through December 31, 2016, NMFS closes the U.S. pelagic longline fishery for bigeye tuna in the western and central Pacific Ocean as a result of the fishery reaching the 2016 allocation limit of 1,000 mt for the CNMI.

During the closure, a U.S. fishing vessel operating under the CNMI/QMI agreement may not retain on board, transship, or land bigeye tuna captured by longline gear in the WCPO, except that any bigeye tuna already on board a fishing vessel upon the effective date of the restrictions may be retained on board, transshipped, and landed, provided that they are landed within 14 days of the start of the closure; that is, by December 15, 2016. Additionally, U.S. fishing vessels operating under the CNMI/QMI agreement are also prohibited from transshipping bigeye tuna caught in the WCPO by longline gear to any vessel other than a U.S. fishing vessel with a valid permit issued under 50 CFR 660.707 or 665.801.

During the closure, all other restrictions and requirements NMFS established on July 22, 2016, as a result of the U.S. longline fishery reaching the 2016 U.S. bigeye tuna limit of 3,554 mt (81 FR 45982, July 15, 2016) shall remain valid and effective.

If, prior to December 1, 2016, NMFS receives a valid specified fishing agreement between a U.S. longline fishing vessel(s) and another U.S. territory, any vessel included in the CNMI/QMI agreement that is also included in the subsequent agreement may continue to transship, retain, and land bigeye tuna caught by longline gear in the WCPO. Additionally, if any such vessel is engaged in a longline fishing trip in the WCPO on December 1, 2016, that vessel would not need to return to port before December 15, 2016. NMFS would announce any valid specified fishing agreement in the **Federal Register**.

Classification

There is good cause under 5 U.S.C. 553(b)(B) to waive prior notice and the opportunity for public comment on this action, because it would be impracticable and contrary to public interest, as discussed below. This rule closes the U.S. longline fishery for bigeye tuna in the WCPO as a result of reaching the bigeye tuna allocation limit established by the 2016 specification for catch and allocation limits of bigeye tuna for the CNMI, and the specified fishing agreement between the Government of the CNMI and QMI dated April 14, 2016.

NMFS forecasted that the fishery would reach the 2016 CNMI allocation limit by December 1, 2016. Fishermen have been subject to longline bigeye tuna limits in the western and central Pacific since 2009. They have received ongoing, updated information about the 2016 catch and progress of the fishery in reaching the U.S. bigeye tuna limit via the NMFS Web site, social media, and other means. The publication timing of this rule, moreover, provides longline fishermen with seven days' advance notice of the closure date, and allows two weeks to return to port and land their catch of bigeye tuna. This action is intended to comply with regulations managing this stock, and, accordingly NMFS finds it impracticable and contrary to the public interest to have prior notice and public comment.

For the reasons stated above, there is also good cause under 5 U.S.C. 553(d)(3) to waive the 30-day delay in effectiveness for this temporary rule. NMFS must close the fishery to ensure that fishery does not exceed the allocation limit. NMFS implemented the catch and allocation limits for the CNMI consistent with management objectives to sustainable manage the bigeye tuna stock and restore the stock to levels capable of producing maximum sustainable yield on a continuing basis. Failure to close the fishery before the limit is reached would be inconsistent with bigeye tuna management objections and in violation of Federal law.

This action is required by 50 CFR 665.819(d), and is exempt from review under Executive Order 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: November 17, 2016.

RIN 0648–XE958

Fisheries of the Exclusive Economic Zone Off Alaska; Inseason Adjustment to the 2016 Gulf of Alaska Pollock Seasonal Apportionments

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; inseason adjustment.

SUMMARY: NMFS is adjusting the 2016 D seasonal apportionments of the total allowable catch (TAC) for pollock in the Gulf of Alaska (GOA) by re-apportioning unharvested pollock TAC in Statistical Areas 610, 620, and 630 of the GOA. This action is necessary to provide opportunity for harvest of the 2016 pollock TAC, consistent with the goals and objectives of the Fishery Management Plan for Groundfish of the Gulf of Alaska.

DATES: Effective 1200 hours, Alaska local time (A.l.t.), November 17, 2016, until 2400 hours A.l.t., December 31, 2016.

FOR FURTHER INFORMATION CONTACT: Josh Keaton, 907–586–7228.

SUPPLEMENTARY INFORMATION: NMFS manages the groundfish fishery in the GOA exclusive economic zone according to the Fishery Management Plan for Groundfish of the Gulf of Alaska (FMP) prepared by the North Pacific Fishery Management Council (Council) under authority of the Magnuson-Stevens Fishery Conservation and Management Act. Regulations governing fishing by U.S. vessels in accordance with the FMP appear at subpart H of 50 CFR part 600 and 50 CFR part 679.

The annual pollock TACs in Statistical Areas 610, 620, and 630 of the GOA are apportioned among four seasons, in accordance with § 679.23(d)(2). Regulations at § 679.20(a)(5)(iv)(B) allow the underharvest of a seasonal apportionment to be added to subsequent seasonal apportionments, provided that any revised seasonal apportionment does not exceed 20 percent of the seasonal apportionment for a given statistical area. Therefore, NMFS is increasing the D season

apportionment of pollock in Statistical Areas 620 and 630 of the GOA to reflect the underharvest of pollock in those areas during the B season. In addition, any underharvest remaining beyond 20 percent of the originally specified seasonal apportionment in a particular area may be further apportioned to other statistical areas. Therefore, NMFS also is increasing the D season apportionment of pollock to Statistical Areas 610 and 630 based on the underharvest of pollock in Statistical Areas 620 of the GOA. These adjustments are described below.

The D seasonal apportionment of the 2016 pollock TAC in Statistical Area 610 of the GOA is 24,421 metric tons (mt) as established by the final 2016 and 2017 harvest specifications for groundfish of the GOA (81 FR 14740, March 18, 2016). In accordance with § 679.20(a)(5)(iv)(B), the Administrator, Alaska Region, NMFS (Regional Administrator), hereby increases the D season apportionment for Statistical Area 610 by 3,508 mt to account for both the Statistical Area 610 C season overharvest of 1,376 mt and the Statistical Areas 620 C season TAC underharvest. This increase is in proportion to the estimated pollock biomass and is not greater than 20 percent of the D seasonal apportionment of the TAC in Statistical Area 610. Therefore, the revised D seasonal apportionment of the pollock TAC in Statistical Area 610 is 27,929 mt (24,421 mt plus 3,508 mt).

The D seasonal apportionment of the pollock TAC in Statistical Area 620 of the GOA is 15,402 mt as established by the final 2016 and 2017 harvest specifications for groundfish of the GOA (81 FR 14740, March 18, 2016). In accordance with § 679.20(a)(5)(iv)(B), the Regional Administrator hereby increases the D seasonal apportionment for Statistical Area 620 by 3,080 mt to account for the underharvest of the TAC in Statistical Areas 620 in the C season. This increase is not greater than 20 percent of the D seasonal apportionment of the TAC in Statistical Area 620. Therefore, the revised D seasonal apportionment of the pollock TAC in Statistical Area 620 is 18,482 mt (15,402 mt plus 3,080 mt).

The D seasonal apportionment of pollock TAC in Statistical Area 630 of the GOA is 19,822 mt as established by the final 2016 and 2017 harvest specifications for groundfish of the GOA (81 FR 14740, March 18, 2016). In accordance with § 679.20(a)(5)(iv)(B), the Regional Administrator hereby increases the D seasonal apportionment for Statistical Area 630 by 3,964 mt to account for the underharvest of the TAC in Statistical Areas 620 and 630 in the C season. This increase is in proportion to the estimated pollock biomass and is not greater than 20 percent of the D seasonal apportionment of the TAC in Statistical Area 630. Therefore, the revised D seasonal apportionment of pollock TAC in Statistical Area 630 is 23,786 mt (19,822 mt plus 3,964 mt).

Classification

This action responds to the best available information recently obtained from the fishery. The Assistant Administrator for Fisheries, NOAA (AA), finds good cause to waive the requirement to provide prior notice and opportunity for public comment pursuant to the authority set forth at 5 U.S.C. 553(b)(B) as such requirement is impracticable and contrary to the public interest. This requirement is impracticable and contrary to the public interest as it would prevent NMFS from responding to the most recent fisheries data in a timely fashion and would provide opportunity to harvest increased pollock seasonal apportionments. NMFS was unable to publish a notice providing time for public comment because the most recent, relevant data only became available as of November 16, 2016.

The AA also finds good cause to waive the 30-day delay in the effective date of this action under 5 U.S.C. 553(d)(3). This finding is based upon the reasons provided above for waiver of prior notice and opportunity for public comment.

This action is required by § 679.20 and is exempt from review under Executive Order 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: November 16, 2016.

Proposed Rules

Federal Register
Vol. 81, No. 225
Tuesday, November 22, 2016

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

SMALL BUSINESS ADMINISTRATION

13 CFR Part 131

RIN 3245–AG02

Office of Women's Business Ownership: Women's Business Center Program

AGENCY: Small Business Administration.

ACTION: Notice of proposed rulemaking.

SUMMARY: The U.S. Small Business Administration (SBA) is seeking comments on this Notice of Proposed Rulemaking (NPRM) regarding the Women's Business Center (WBC) Program. An Advance Notice of Proposed Rulemaking (ANPRM) was published on April 22, 2015, which received eight comments. This NPRM is being issued to continue the consultative process with stakeholders to examine the proposed WBC regulations. This NPRM also proposes to codify policy and procedural changes that have been included in the Notice of Award, such as language on risk determination as required by, limitations on carryovers, who is considered key personnel and a reduction in the reporting requirements. Implementing these regulations will result in standardization and transparency to the delivery of the WBC Program.

DATES: Comments must be received on or before January 23, 2017.

ADDRESSES: You may submit comments, identified by RIN 3245–AG02, by one of the following methods:

(1) *Federal Rulemaking Portal: www.regulations.gov.* Follow the instructions for submitting comments;

(2) *Mail/Hand Delivery/Courier:* U.S. Small Business Administration, Attn: Bruce Purdy, Deputy Assistant Administrator for the Office of Women's Business Ownership (DAA/OWBO), 409 3rd Street SW., Washington, DC 20416;

(3) *Facsimile:* (202) 481–0554; or

(4) *Email: owbo@sba.gov.*

The SBA will post all comments on *www.regulations.gov.* If you wish to submit confidential business information (CBI) as defined in the User Notice at *www.regulations.gov,* you must submit such information to the U.S. Small Business Administration, Attn: Bruce Purdy, Deputy Assistant Administrator for the Office of Women's Business Ownership (DAA/OWBO), 409 3rd Street SW., Washington, DC 20416, or via facsimile to (202) 481–0554, or submit them via email to *owbo@sba.gov.* Highlight the information that you consider to be CBI and explain why you believe the SBA should hold this information as confidential. The SBA will review your information and determine whether it will make the information public.

FOR FURTHER INFORMATION CONTACT: Sheila Williams, Lead Program Analyst, U.S. Small Business Administration, 409 3rd Street SW., Washington, DC 20416, telephone number (202) 205–7285 or *Sheila.Williams@sba.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

A. Statutory

The Women's Business Center (WBC) Program was created under the authority of Title II of the Women's Business Ownership Act of 1988 (Pub. L. 100–533). The WBC Program authority is now codified in section 29 of the Small Business Act (the Act), 15 U.S.C. 656. The initial Demonstration Training Program, later renamed the WBC Program, was created with the congressional intent to remove barriers to the creation and development of small businesses owned and controlled by women and to stimulate the economy by aiding and encouraging the growth and development of such businesses. The specific objectives of the Demonstration Training Program were to provide long-term Training and Counseling to potential and current women business owners, including those who are Socially and Economically Disadvantaged as defined in 13 CFR 124.103 and 124.104.

Since its creation, the Women's Business Center Program has changed through a number of public laws that have turned the WBC Program from a Demonstration Training Program into a permanent program. The laws that have impacted the WBC Program include: The Women's Business Development Act of 1991 (Pub. L. 102–191); The Women's Business Centers Sustainability Act of 1999 (Pub. L. 106–165): U.S. Troop Readiness, Veterans' Care, Katrina Recovery, and Iraq Accountability Appropriations Act of 2007 (Pub. L. 110–28); and, The Small Business Jobs Act of 2010 (Pub. L. 111–240).

Section 29 of the Act, 15 U.S.C. 656, authorizes the SBA to provide financial assistance to private nonprofit organizations to conduct 5-year projects for the benefit of small business concerns owned and controlled by women. The Act further authorizes SBA to renew a grant for additional 3-year periods and provides that there are no limitations on the number of times a grant may be renewed.

B. History

On April 22, 2015, the SBA published an Advance Notice of Proposed Rulemaking (ANPRM) soliciting comments on the interpretations of statutory language, including ''distinct population that would otherwise not be served,'' ''whose services are targeted to women'' and ''full-time program director or program manager to manage the program'' (80 FR 22434). The SBA also requested comments on how to define what is acceptable for activities that fall under ''in-kind,'' what guidelines grantees should use in determining reasonable costs associated with in-kind activities, acceptable guidelines for documenting in-kind match, selection criteria used in deciding whether to award an initial WBC grant, guidelines SBA should use in evaluating ''the experience of the Applicant Organization'' and ''the proposed location for the women's business center,'' and what an appropriate ''minimum amount of time'' would be to commence operating as a women's business center following receipt of an award. Comments from the ANPRM have been considered in the drafting of these proposed regulations.

Currently, there are over 100 nonprofit entities that participate in the WBC Program and provide services as described in the Act. These participants are known as SBA Women's Business Centers (WBCs) and receive annual Federal funding limited by the authority of the Act and subject to the appropriations of Congress and the nonprofit's ability to provide the required Matching Funds.

Through its authority, the SBA's Office of Women's Business Ownership

oversees the WBC Program and the portfolio of WBCs that participate in the WBC Program. Since 1988, the number of participating WBCs has grown along with the number of women entrepreneurs assisted by these centers. The SBA has managed the performance and compliance of the WBCs through Cooperative Agreements with each individual nonprofit entity that hosts a WBC project, through regular reporting and programmatic and financial examinations of each WBC.

II. Proposal

The proposed rule would incorporate the SBA's oversight of the WBC Program into regulations in a new Part 131 of the SBA's regulations by: (A) Creating standard definitions for the program (13 CFR 131.110); (B) incorporating program-participation requirements and application procedures (13 CFR 131.300, 13 CFR 131.400); (C) incorporating financial-management and grant-administration requirements (13 CFR 131.500); (D) incorporating reporting requirements (13 CFR 131.600); (E) incorporating oversight and programmatic and financial-examination provisions (13 CFR 131.700 and 13 CFR 131.720); (F) incorporating procedures for Dispute resolution (13 CFR 131.840), and suspension, termination and non-renewal of a grant (13 CFR 131.830); and G) privacy requirements (13 CFR 131.900).

III. Section-by-Section Analysis

131.100 Introduction

The WBC Program was created under the authority of Title II of the Women's Business Ownership Act of 1988 (Pub. L. 100–533) to remove barriers to the creation and development of small businesses owned and controlled by women and to stimulate the economy by aiding and encouraging the growth and development of such businesses. Since its creation, the WBC Program has changed through a number of public laws that have turned the WBC Program from a Demonstration Training Program into a permanent program. The WBC Program has grown and evolved to provide a variety of services to many entrepreneurs, ranging from those interested in starting businesses to those looking to expand existing businesses.

Over the last several years, the SBA has incorporated processes to monitor the WBC Program, including conducting financial examinations required by statute. The SBA proposes to implement this rule to incorporate its oversight of the WBC Program into regulations to ensure consistency in application and provide transparency for applicants and participants.

131.110 Definitions

This section defines 57 words and phrases used in the management and oversight of the WBC Program. These definitions have been consolidated from existing documents, including Program Announcements and Cooperative Agreements, to ensure consistency and clarity within the WBC Program.

Through the ANPRM, commenters raised concerns on whether Distinct Populations were limited to Socially and Economically Disadvantaged populations. Under this proposed rule, definitions are provided for Distinct Population and Socially and Disadvantaged populations. Under the statute, 15 U.S.C. 656, a representative portion of clients should be Socially and or Economically Disadvantaged women. However, WBCs are expected to serve all women entrepreneurs and not just those that are Socially and Economically Disadvantaged.

131.200 Eligible Entities

This proposed section codifies the types of organizations that are eligible by statute to participate in the WBC Program and those organizations that are prohibited from participating in the program. Section 29 of the Act, 15 U.S.C. 656, identifies eligible entities as private nonprofit organizations that are described in section 501(c) of title 26 and exempt from taxation under section 501(a) of that title.

131.300 Women's Business Centers (WBCs)

This section describes how SBA proposes to provide financial assistance to private nonprofit organizations to conduct projects for the benefit of small business concerns owned and controlled by women, as authorized in 15 U.S.C. 656. In addition, under 15 U.S.C. 656(5), the SBA may renew a grant for an additional 3-year period, if the nonprofit organization submits an Application for such renewal at such time, in such manner, and accompanied by such information as the SBA establishes. This section describes the SBA's proposed process for renewal applicants to continue in the WBC Program.

131.310 Operating Requirements

This proposed section codifies the statutory requirement at 15 U.S.C. 656, on the process by which the SBA must issue Notices of Award, which outline the terms and conditions of the awards to the WBC Recipient Organizations. To ensure that the Recipient Organization maintains clear and separate functions from the WBC, as stated in the Cooperative Agreement, this rule proposes to require that the Recipient Organization manage the WBC Program as a separate entity within its organization, consistent with 2 CFR part 303, Internal Controls.

Historically, Women's Business Centers that have established partnerships in the community in conjunction with an advisory board have had less difficulty working within the community and meeting the match requirements of the program. This section proposes to require that each WBC establish an advisory board that will confer with and provide recommendations to the WBC Program Director on matters pertaining to the operation of the WBC and assist the WBC in raising Matching Funds.

This section also provides a proposed description of WBC facilities and administrative infrastructure requirements, including the requirement that the facility comply with the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 *et seq.*) and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794). These requirements serve to ensure that the WBC has the capacity to deliver the Counseling (including space to provide one-to-one Counseling that will ensure client privacy), Training and other services outlined in its statement of work.

In the past, the SBA has found that some WBCs do not clearly reference that they are Women's Business Centers, with an emphasis on providing services to prospective or existing women entrepreneurs. Therefore, the SBA is proposing that any new WBC accepted into the WBC Program after the effective date of the rule be required to include the specific identification ''WBC'' as part of its official name. The SBA is further proposing that all other WBCs prominently include on their Web sites and promotional documents that the ''Women's Business Center is funded in part by the U.S. Small Business Administration''. This transparency would ensure that WBCs are clearly discernable and are easily recognized by women attempting to contact organizations for business services focused on women.

Historically, WBCs with insufficient staff have been identified as more likely to face difficulties in providing services at an adequate level as outlined in their statements of work. The SBA also has concerns related to the inability for a WBC to grow or expand services when the WBC is not properly staffed. To ensure maximum productivity of a WBC, this rule proposes to require that

the WBC include at least a Full-time WBC Program Director and at least one other staff person, preferably a business counselor.

131.320 Area of Service

This section proposes to require WBCs to identify their geographic service area(s) as part of the application process. Currently, many WBCs do not clearly define their proposed geographic service areas; rather, they indicate that services will be provided for an entire state. Historically, this has caused some confusion, as some WBCs include service areas where an existing SBA-funded WBC is already providing services. This is especially true in states where there is more than one WBC and more than one Recipient Organization. Under this proposed rule, SBA plans to define, in writing, the geographic area for each Recipient Organization funded under the WBC Program. WBCs would also be required to submit a written request to change a geographic service area so as to ensure that no two WBCs are awarded WBC Project Funds to provide services in the same area while some areas remain underserved. To that end, this rule proposes that Applicant Organizations submitting new WBC projects within proximity of an existing WBC include a justification of need, including a discussion of the population density, submitted in its proposal. The SBA is seeking comment on how to best define proximity.

131.330 WBC Services and Restrictions on Services

This proposed section lists the required services that Women's Business Centers must provide to participate in the WBC Program. Consistent with the statute, 15 U.S.C. 656, the Office of Women's Business Ownership requires in its program announcement(s) that Women's Business Centers provide Training and Counseling services to women, as well as services that will assist their businesses in securing business credit and investment capital. In accordance with this requirement, WBCs assist women business owners in identifying available funds from lenders, the SBA and other resources. These resources include collaboration with state, local and federal government agencies and assisting its clients pursue designation as women-owned, small businesses. This section also names the proposed services that a WBC can provide to assist a women business owner access capital. To assist with delivery of its access to capital services, the WBCs rely on programs provided by other agencies. These programs include, but are not limited to, use of the FDIC Smart Money Curriculum, Census Bureau data tools, and the SBA's Microloan Program. Further, many of the WBC host organizations are microlenders and work with other lenders in the community.

Historically, (see links below) men have started their businesses with significantly more capital than women, and women's access to capital remains an obstacle to women growing their businesses. This has been included in reports by the U.S. Department of Commerce and the National Women's Business Council included here. *http://www.esa.doc.gov/sites/default/files/women-owned-businesses.pdf.*

https://www.sba.gov/sites/default/files/files/Gender%20Differences%20in%20Startup%20Financings.pdf. OWBO will monitor the WBCs support of capital access services through the review of WBC reporting, as described in Section 131.600 of this proposed rule. Under 15 U.S.C. 656 (B)(1), the SBA is authorized to provide financial assistance to private nonprofit organizations to conduct projects for the benefit of small-business concerns owned and controlled by women. The services provided under these projects can include Training and Counseling on how to apply for and secure business credit and investment capital, preparing and presenting financial statements, and managing cash flow and other financial operations of a business concern. Given this authorization, this rule proposes to require WBCs to provide specific services related to access to capital for women entrepreneurs as authorized in 15 U.S.C. 656. The SBA further proposes to provide guidance concerning the provision of access to capital services in this section.

Given the SBA's involvement in disaster-relief assistance and the WBCs' participation in addressing the business needs in communities impacted by catastrophes, the SBA is also proposing to include a section on Specialized Services.

131.340 Specific WBC Program Responsibilities

This proposed section outlines the role of the Assistant Administrator/OWBO, as defined in 15 U.S.C. 656. This rule also proposes to explicitly define the roles of the WBC Program Director and Principal Investigator of the Recipient Organization. Additionally, under this proposed rule, the SBA clearly defines the tasks and responsibilities for the WBC Program Director, as the Full-time Key Employee for the WBC, as those completed solely for the WBC project.

131.350 Selection and Retention of the WBC Program Director

This section outlines the proposed competencies for the WBC Program Director, as well as the process the WBC must undertake if the position is vacant. The WBC Program Director, considered by the Agency as the key position for the WBC project, is responsible for managing the day-to-day operation of the WBC. Responsibilities related to the overall management of the WBC may include providing direct services (*i.e.,* Counseling and Training), marketing the program and ensuring program compliance. To ensure effective management of the WBC project, this rule proposes core competencies for the WBC Program Director position and proposes rules for the Interim Program Directors when the Program Director position is vacant.

131.400 Application Procedure

This section outlines the proposed grant application submission process for new and existing WBC Applicant Organizations to participate in the WBC Program. It also identifies proposed general selection criteria. In the ANPRM, comments were received that suggest the SBA should not use geography to help determine the location of a WBC and that proximity to another WBC is not a disqualifier. The SBA follows statutory guidance that individual Applicant Organizations reach a Distinct Population that would not be otherwise served. The Agency proposes Applicant Organizations within proximity of an existing WBC provide a justification for the need of an additional WBC within that area including information about the population density. This helps to ensure that the WBC Program is serving the maximum number of clients with as much coverage as possible, while meeting the statutory requirement of reaching a Distinct Population that would otherwise not be served. This section also outlines the proposed criteria that SBA will use to determine a WBC's level of risk, consistent with 2 CFR part 200, subpart C.

131.410 New Applications

This proposed section codifies the Agency's statutory authority at 15 U.S.C. 656 (B)(1), to use unawarded amounts to fund new Women's Business Centers. This section outlines the process proposed by the SBA to fund new WBCs.

131.420 Renewal Applications

This proposed section proposes to codify the Agency's statutory authority at U.S.C. Code 656 (2), to fund

organizations seeking the renewal of grant awards under the WBC Program. This proposed rule also lists the application criteria and process for existing participants requesting to renew a grant award under the WBC Program.

131.430 Application Decisions

This section outlines the proposed conditions for approval or rejection of an Application for the WBC Program, as authorized by 15 U.S.C. 656 (3)(C). This section also proposes the appeal process WBCs can complete if a renewal application is rejected, as outlined in Section 131.840.

131.500 Grant Administration and Cost Principles

This proposed section codifies the Agency's statutory authority at 15 U.S.C. 656 to fund projects following grant administration guidance under 2 CFR part 200—Uniform Administrative Requirements, Cost Principles and Audit Requirements for Federal Awards.

131.510 Maximum Grant

This proposed section codifies the Agency's statutory requirement that no individual WBC project receive funds in excess of the amount authorized by statute. This rule proposes to include this section to clarify that while an individual WBC project cannot exceed the statutory limit, a Recipient Organization is not limited from establishing multiple WBC projects so long as the projects are distinct from each other and are serving Distinct Populations that would not otherwise be served. A Recipient Organization seeking additional funding for a new project shall follow the Application process, as defined in section 131.400 of this proposed rule for new Applications.

131.520 Carryover of Federal Funds

This proposed section outlines the requirements for the use of Carryover Funds and proposes to limit the number of Carryovers to prevent a WBC from creating a cycle of dependency on Carryover funding. Historically, a significant number of WBCs have consistently requested Carryover of funds. A Carryover of funds generally occurs when a WBC does not fully spend the Federal funds or the Matching Funds as requested and approved in the WBC's budget. This Carryover results in a Recipient Organization having both the Carryover Funds and Option Year funding running concurrently, both of which require Matching Funds. When the Carryover is granted, the Recipient Organization has the responsibility of raising Matching Funds for the Carryover Funds, if not already matched, as well as Option Year funding. This often creates a cycle in which the Recipient Organization will match and spend the Carryover funding, but is then not able to spend the current year funding, thus creating a situation where it must request Carryover funding the following year. While there is never a penalty to requesting less funding, Carryover funding represents an underutilization of the Federal funds provided. The rule proposes to limit Carryover of Federal funds to those WBCs in the first or second year of an initial phase grant.

WBCs in an initial phase of funding may have fewer expenses in the first year as the WBC is establishing itself. However, the WBCs may need additional resources as the programming offered grows. Permitting new WBCs the flexibility to carry over funds during the first two years of participating in the WBC Program ensures that the SBA is utilizing WBC funding efficiently. If a WBC in the initial phase requests a Carryover for both of the first two years, SBA proposes to reduce the funding in the third year by the amount of the second year Carryover to eliminate the cycle of Carryover funding.

131.530 Matching Funds

This proposed section codifies the statutory requirement at 15 U.S.C. 656 for a Recipient Organization to provide Matching Funds equal to half of the Federal amount of the SBA funding for the first two years of its initial award. For the remainder of the time the Recipient Organization participates in the WBC Program, it must provide match of one dollar for every one Federal dollar of its annual Federal award amount, as prescribed in the statute, 15 U.S.C. 656. This rule proposes language which clarifies the process of documenting the match funds and also identifies types of funding that cannot be used as match, such as other Federal funding.

Section 200.306 of Title 2 requires any funds used to match the Federal grant, to be verifiable from the Non-Federal Entity's records. The WBC Program requires a 1 to 1 match for WBCs that have been in the WBC Program for more than two years. A 2 to 1 match (for every two dollars of Federal funds used, 1 dollar of Matching Funds) is required for WBCs in the first two years of the WBC Program). In other words, the statute requires a 2:1 (Federal to non-Federal dollars) match for the first year; 2:1 match for the second year; 1:1 match for the third year; 1:1 match for the fourth year; and a 1:1 match for the fifth year. WBCs can provide Overmatch if they choose to do so; however, if they have used Federal funds to raise match above the required amount, these funds must be used to meet the Federal objective of the WBC Program and must be verifiable. This does not prohibit the Recipient Organization from raising funds separate and apart from the WBC Program. Those funds that are not used as match and are not raised with WBC funds are not subject to the same recordkeeping requirements, as they are not tied to the WBC Program.

131.540 Program Income and Fees

Consistent with 2 CFR 200.307, Recipient Organizations are allowed to charge clients fees for WBC Program services and use the income to defray the costs of delivering the objectives of the grant. This rule proposes to codify that WBCs may charge fees for services provided to their clients. This rule also proposes to identify the type of activities for which the WBC can charge fees and allows WBCs to use the fee income to be counted towards the cash portion of Matching Funds required under section 131.530 of this proposed rule. Historically, WBCs have often collected fees for Training classes to cover the cost of materials and supplies affiliated with providing a Training session or fees when helping clients complete a loan package. Some WBCs have also used a membership model that includes fees. Over the past several years, many WBCs have been exploring ways to charge fees for Counseling in order to ensure that clients commit to participation for a Counseling session. This rule proposes to allow WBCs to charge a retainer fee for Counseling services; however, such fees must not restrict access to any services for economically disadvantaged entrepreneurs.

131.550 Budget Justification

Consistent with 2 CFR part 200, subpart E, Recipient Organizations must follow the cost principles when completing and submitting a budget along with an Application or Annual Work Plan. The budget must include justification for the expenses. This section clarifies several specific cost categories, including Indirect Cost rates and audit expenses. This rule proposes to include guidance on salaries and travel. Under the cost principle section, all costs must be reasonable. Salaries vary by state and region and position. Using a reasonableness standard, SBA proposes that salaries for WBC staff be comparable to similar positions within similarly sized programs in other states

or regions. For travel, reasonableness should be justified in terms of the benefit to the small business community that the WBC is serving. The proposed requirements are consistent with standard cost principles and serve to provide clarity to the Applicant or Recipient Organization. See § 131.600 Reports for details.

131.560 Restricted and Prohibited Costs

Consistent with 2 CFR part 200, subpart E, Recipient Organizations must not use Federal funds or Matching Funds to pay for certain items that are prohibited. This rule proposes language that establishes what costs are considered prohibited. For example, there have been instances in which WBCs have requested the use of WBC Project Funds as collateral for loans. Because this would bind the Federal dollars for a purpose other than delivering the WBC project, the viability of the WBC could be jeopardized. Recipient Organizations have also inquired about using Project Funds to purchase items that could be viewed either as promotional materials, marketing materials, or gifts. Although marketing/advertising the WBC Program is considered an allowable cost under 2 CFR 200.421, certain types of materials are considered gifts for individual use and are not broad-based marketing materials that will reach the population that the women's business center serves.

131.570 Payments and Reimbursements

This proposed section codifies the Agency's statutory authority at 15 U.S.C. 656, to provide payments in lump sum or installments, and in advance or by way of reimbursement to Recipient Organizations. The Agency may disburse up to 25 percent of each year's Federal share awarded to a recipient organization after the Notice of Award has been issued and before the non-Federal Matching Funds are obtained. This rule proposes payments be disbursed as quarterly advances for the first three quarters and on a reimbursement basis for the final quarter, except in cases where a Recipient Organization has not demonstrated its ability to obtain match or has not provided adequate information to demonstrate the use of the Project Funds. On a case-by-case basis, the Agency may determine that a Recipient Organization has not fully complied with the terms of the grant, in which case payments may be made by reimbursement.

131.600 Reports

This section proposes a list of the types of reports required to be submitted and the frequency of submission of the reports. This rule proposes using semi-annual reporting of programmatic and financial reports, and quarterly reporting of Counseling and Training data. In instances where the Agency may have reasons to believe that a Recipient Organization poses a higher risk of non-performance or non-compliance, the Agency will include any additional requirements to report quarterly in the annual Notice of Award. Consistent with 2 CFR part 200, subpart C, the Agency is required to assess the risk level of each WBC or WBC Applicant Organization prior to making an award. Section 131.400 of this rule proposes the risk assessment criteria the Agency will use for WBC awards. This rule also proposes to require Recipient Organizations to submit client activity reports, including Counseling and Training Records. These reports are submitted electronically and allow the Agency to monitor and report on WBC Program performance for each Recipient Organization and the WBC Program as a whole. The information also enables the Agency, in a streamlined process, to conduct detailed WBC Program evaluations, assess program management and performance, and conduct performance monitoring and program-outcome reporting. Performance reports should be consistent with the budget justification that is submitted as part of the application process or Annual Work Plan submission.

131.700 Oversight of the WBC Program

This proposed section codifies the statutory requirement at 15 U.S.C. 656 for the Agency to conduct annual programmatic and financial examinations of each WBC. Currently, to satisfy these requirements, the Agency utilizes reports submitted by the WBCs, reports submitted by the SBA District Office staff, programmatic site visits, and financial examinations. This combination of oversight allows the Agency to effectively monitor the WBC portfolio without requiring WBCs to submit all of the documentation for the program. Additionally, the Agency has also recently changed the frequency of the reporting schedule outlined in 131.600 to minimize the burden on WBCs that are effectively delivering the program.

131.710 SBA Review Authority

This section of the rule proposes how the SBA will monitor program performance consistent with 2 CFR 200.328.

131.720 Audits, Examinations and Investigations

This section proposes to require new Women's Business Centers participating in the Women's Business Center Program for the first time to have post-award financial examinations conducted by Agency staff or designee(s). Many new initial Recipient Organizations have never received Federal funds and may never have been required to meet Federal financial management standards. As part of the proposed post-award examination process, the examiner would determine the adequacy of the WBC's financial management system and make recommendations for improvement, if needed. The Agency anticipates that the examinations and recommendations will assist the WBC in avoiding financial findings and/or recoupment during future financial examinations or audits.

In addition to the post-award examination, this section outlines the SBA's proposed requirement, consistent with the statute 15 U.S.C. 656, that all other WBCs receive comprehensive financial examinations, as scheduled by the SBA's Financial Examination Unit. The proposed process for complying with this requirement is outlined in this section.

131.800 Cooperative Agreements and Contracts

This proposed section codifies the statutory requirement at 15 U.S.C. 656 for the Agency to provide financial assistance to Recipient Organizations in the form of grants, contract, or Cooperative Agreement. Currently, a Cooperative Agreement serves as the vehicle to provide the financial assistance to the Recipient Organization to establish and maintain a WBC. The Cooperative Agreement is signed annually and contains the amount of Federal funding, a negotiated budget and agreed-upon performance milestones. The Cooperative Agreement contains the terms and conditions of the award and identifies any special considerations, including the annual determination of risk level. This rule proposes to require SBA District Offices to negotiate the annual performance goals with each Recipient Organization. SBA District Offices have a better understanding of local and regional economic conditions and the needs of women entrepreneurs, and can therefore make a better informed determination of the appropriate performance milestones with Recipient Organizations in their

respective districts. In addition, this section proposes specific requirements when WBCs use Federal funds to contract for goods and services. This is to ensure WBCs do not supersede the contracting limits and thereby, in effect, change the grant to a pass-through grant.

It is the Agency's policy that contracting out more than 49 percent of a grant (except in certain circumstances) constitutes a subgrant. Consistent with this policy, this rule proposes that the WBC not expend more than 49 percent of its total Project Funds on contractors and consultants.

131.810 Other Federal Grants

This proposed section codifies the statutory requirement at 15 U.S.C. 656(d) to allow a WBC to enter into a contract with other Federal departments or agencies to provide specific assistance to women entrepreneurs. With the exception of Community Development Block Grants (CBDG), grants received from other Federal entities may not be used as Matching Funds for the WBC grant. CDBG statutory language allows CDBG funds to be used as Matching Funds to other Federal programs. The CDBG regulations at 24 CFR 570.201(g) further elaborate on this eligibility criterion. On occasion, the Agency may provide additional assistance to a WBC through programs such as the Recovery Improvements for Small Entities (RISE) After Disaster Act. These funds are separate from the regular WBC grants but are provided to WBCs to spur disaster recovery.

131.820 Revisions and Amendments to Cooperative Agreements

Consistent with 2 CFR part 200, subpart D, Post Federal Award Requirements, Recipient Organizations are required to report deviations from budget or project scope or objective, and request Prior Approvals from Federal awarding agencies for budget and WBC Program plan revisions. This proposed rule outlines the common revisions that require Prior Approval by the Agency. These include changes in the staffing of the WBC Program Director, changes in project scope, program activity or location that could potentially alter the negotiated milestones in the Cooperative Agreement.

131.830 Suspension, Termination and Non-Renewal

Consistent with 2 CFR 200.338, the Agency may take action to suspend, terminate or non-renew a grant to a Recipient Organization for cause. This rule proposes the instances for which the Agency may take action, identifies the administrative procedures for each action, and outlines the appeal rights for each action. This rule also proposes the process that the SBA will take when an action is reversed.

131.840 Dispute Resolution Procedures

Consistent with 2 CFR 200.341, the Agency currently provides opportunity for Recipient Organizations to Dispute financial and programmatic decisions of the Office of Women's Business Ownership. This rule proposes to codify the current Dispute procedures to provide an opportunity for a Recipient Organization to submit a written statement describing the subject of a Dispute and to submit an appeal if the Recipient Organization receives an unfavorable decision from the Agency.

131.850 Closeout Procedures

Consistent with 2 CFR 200.343, this rule proposes to codify the current process by which the Agency would close out a Federal award if it is determined that all applicable administrative actions and all required work of the Federal award have been completed by the Recipient Organization. These actions help to ensure that the final proper payment can be made to the Recipient Organization after completing a reconciliation of all accounts, including an inventory of property and usable supplies, WBC Program Income balances, and client and financial records. After receiving the final annual financial report to ensure proper final payments, the Agency would issue a final letter indicating that all financial and WBC Program issues are fully reconciled.

131.900 Ensuring Client Privacy

SBA proposes to codify the legislative requirements for WBCs and the Administration to protect the privacy of any individual or small business receiving assistance in the Program. Under this proposed rule, in accordance with Section 21(a)(7) of the Act, a WBC, including its contractors and other agents, is not permitted to disclose to an entity outside the individual WBC, the name, address, or telephone number, referred to as 'client contact data' of any individual or small business without the consent of such individual or small business with three exceptions.

This rule proposes to require WBCs to provide an opportunity for clients to opt in to allow the SBA to obtain their contact data. The rule would codify how the SBA could use the permitted client contact data only to conduct studies that help stakeholders better understand how the services the client received affect their business outcomes over time. These studies would include, but not be limited to, program evaluation and performance management studies.

In the past, SBA District Offices may have used client contact data to solicit loan applications. The functions and goals of the District Offices have changed over the years. Today this type of solicitation is not a function of SBA District Offices and has not been in recent years. The agency will not allow use of client contact data for any other purpose beyond program studies.

This rule also proposes to prohibit the denial of services to clients solely based on a client's refusal to provide consent to use their contact data for study purposes. Section 21(a)(7)(C) of the Act directs the agency to publish standards for requiring disclosures of client information during a financial audit. This rule proposes to require other Federal or State agencies making such disclosure requests to submit formal requests including a justification for the need for individual client contact and/ or program activity data for the Administrator's review on a case-by-case basis. Public comments on these proposed standards are encouraged.

This rule also proposes to codify the current privacy protections in place in the Program currently employed by the agency. Under this proposed rule, any reports on the Program produced by a WBC, including its contractors and other agents, and the agency, cannot disclose individual client information without consent from the client. Any such reports must only report activity data in the aggregate, unless given consent, so as to protect the individual privacy of clients.

IV. Comments Request

Readers are encouraged to review closely each section of the proposed rule in conjunction with current regulations to fully comprehend the extent of the rule and its changes. The SBA invites comment on all aspects of this proposed rule, including the underlying policies. Submitted comments will be available to any person or entity upon request.

Compliance With Executive Orders 12866, 13563, 12988, 13132, the Regulatory Flexibility Act (5 U.S.C. 601–612), and the Paperwork Reduction Act (44 U.S.C. Ch. 35)

Executive Order 12866

The Office of Management and Budget has determined that this proposed rule constitutes a ''significant regulatory action'' under Executive Order 12866.

This is not a major rule, however, under the Congressional Review Act, 5 U.S.C. 800.

Regulatory Impact Analysis

1. Is there a need for this regulatory action?

The WBC Program was established in 1988 as a pilot program and became permanent in 2007. Regulations for the WBC Program had not been previously promulgated. The SBA has used the Program Announcement and Notice of Award to incorporate statutory requirements to implement the WBC Program. The annual Program Announcement and Notice of Award have become, for all practical purposes, documents which interpret the statute. The SBA believes it is past time for regulations outlining guidance for the policies and procedures for the WBC Program. This regulation incorporates the changes required by the OMB circular published by OMB and other program changes that have taken place since the WBC Program was initially established. Additionally, the Association of Women's Business Centers has supported implementing regulations to streamline and standardize processes.

Further, the SBA received eight comments to the ANPRM that was published on April 22, 2015. All of the comments relevant to the WBC Program regulations were considered in the drafting of this proposed rule.

2. What are the potential benefits and costs of this regulatory action?

The WBC Program received $17 million in Federal funds which it provided to over 100 Women's Business Centers in fiscal year 2016. The Grantees are required to supply a 1-to-1 match of those funds, except in the first two initial years in the program for which the match is 2 to 1 (Federal to match). The benefit of this requirement is that the Grantee is invested as much as the Federal government in making the WBC Program a success. The small businesses benefit from the no-cost or low-cost Counseling and Training. Specifically, in 2015, the WBC Program counseled 20,473 entrepreneurs; trained 120,030 entrepreneurs, created 771 new businesses and raised $87,630,000 in capital infusion. Further, as stated above, the potential benefits of this proposed rule are based on incorporating all the changes that have occurred with the publication of 2 CFR part 200 and a streamlining of both the Program Announcement and the Notice of Award. The new regulations will provide additional clarification for the Program Announcement(s) issued by the Office of Women's Business Ownership.

The costs to the SBA in making this revision are minimal, as most of the requirements of this rule are currently being followed. The estimated annual cost to the Federal government for oversight of these WBCs is currently provided for in the existing SBA infrastructure. Similarly, the costs to the grantees is also minimal as they, too, are following the requirements in this NPRM, which are currently included in their annual Cooperative Agreement. No additional direct costs are projected to be incurred by WBCs for oversight and related functions in this proposed rule.

3. What alternatives have been considered?

After publishing the ANPRM on April 22, 2015, and reviewing the comments submitted, the SBA believes that publishing regulations for the WBC Program would be the best way to create long-lasting consistency in the implementation of the WBC Program. Another alternative would be to do nothing and continue to rely on grant documents to implement the WBC Program. Furthermore, the statute requires SBA to publish regulations in general and specifically in regards to the Privacy Act Requirements of the WBC Program. The Privacy Act Requirements are included in this regulation to satisfy that requirement.

Executive Order 13563

The ANPRM was published on April 22, 2015, (Docket Number 2015–09391) and eight comments were received. The comments varied greatly from specific to general and covered a wide variety of topics, from providing clearer definitions to streamlining procedures and identifying actions requiring Prior Approval from the SBA. The SBA reviewed all the comments and took them under consideration when revising these proposed regulations. Further, SBA held monthly conference calls with the grantees, discussing various current topics which included the proposed regulations. Additionally, the Office of Women's Business Ownership staff attends the annual Women's Business Center training conferences that include discussions of policy, procedures and the proposed regulations. A summary and disposition of the comments includes, but is not limited to, the following: (1) Training should be ongoing for Women's Business Centers. The Office of Women's Business Ownership has initiated ongoing training for Women's Business Centers through its monthly conference calls and one-on-one teleconference calls, as requested; (2) The SBA should provide full funding to WBCs and not require fundraising. The funding levels and match requirements that are included are consistent with the statute, 15 U.S.C. 656; (3) The SBA data collection system must be upgraded. SBA is currently working to improve the system; (4) The regulation should provide a definition for Distinct Population. A definition is included in the proposed regulations; (5) Develop a repository of information that could be used by all of the WBCs, including templates, program updates and training materials. While, the Office of Women's Business Ownership did not include the requirement for a repository in these draft regulations, the office will work with women's organizations to develop information that will be available to all WBCs; 6) Provide a definition for in-kind services and do not limit the amount a volunteer can provide as in-kind activity. The draft regulations references 2 CFR 200.96 for the definition of in-kind. Also, the SBA does not limit the amount of In-kind Contributions from a service provider, but the amount of in-kind that can be used as match is limited and is consistent with the statute, 15 U.S.C. 656. Comments for the ANPRM can be located at: *https://www.regulations.gov/docketBrowser?rpp=50&so=DESC&sb=postedDate&po=0&dct=PS&D=SBA-2015-0007.*

The SBA did not consult with any other agencies when drafting the proposed regulations as the Women's Business Center Program does not have any joint grants with other agencies.

Executive Order 12988

For the purposes of Executive Order 12988, Civil Justice Reform, the SBA has determined that this proposed rule is drafted, to the extent practicable, in accordance with the standards set forth in Sec. 3(a) and 3(b)(2), to minimize litigation, eliminate ambiguity and reduce burden. The proposed regulations would provide for rights of appeal to the SBA's WBC Program participants in the event they are aggrieved by an Agency decision, thereby limiting the possibility of litigation by these entities. This proposed rule would not have retroactive or pre-emptive effect.

Executive Order 13132

For the purposes of Executive Order 13132, the SBA determined that this rule has no federalism implications warranting preparation of a federalism assessment.

Compliance With the Regulatory Flexibility Act, 5 U.S.C. 601–612

When an agency promulgates a proposed rule, the Regulatory Flexibility Act requires the agency to prepare an initial regulatory flexibility analysis (IRFA), which describes the potential economic impact of the rule on small entities and alternatives that may minimize that impact. Section 605 of the RFA allows an agency to certify a rule, in lieu of preparing an IRFA, if the rulemaking is not expected to have a significant economic impact on a substantial number of small entities. This rule covers both the application process to become funded as a Women's Business Center and the on-going operations for currently funded WBCs. As the populations are different for the application process and the existing WBCs, the analysis is included for each.

This proposed rule could theoretically affect all nonprofit entities as the statute requires that an entity be organized as a nonprofit in order to participate. According to the IRS, for tax year 2010, there are over 269,000 entities that filed returns as a 501(c)(3). The NAICs codes that are most relevant to participate in the program are 541611, Administrative Management and General Management Consulting Services and 541990, All Other Professional, Scientific and Technical Services. The size standard for both of these NAICs codes is $15 million in average annual receipts. According to the IRS, 92 percent of all 501(c)(3) filers had total revenue greater than $10 million. The majority of the 501(c)(3) entities would fall under the threshold as a small entity. In addition, as the application process is voluntary and does not require a nonprofit entity to apply, the vast majority of nonprofits would not be affected. Over the past 5 years, there were a total of 133 new applications submitted for the WBC Program—averaging 25–35 applications per year. The SF 424 (Application for Federal Assistance) on *grants.gov* does not include a field for revenue size. Based on the majority of the entities being small, SBA can presume that the majority of the Applicant Organizations are also small. It is projected that a grants writer would take approximately 20 hours to complete and submit the required application forms through grants.gov. For a grants writer at an average of $30-per hour, this would cost approximately $600. These estimates are based on the burden statements associated with the grants.gov application forms and anecdotal information from Applicant Organizations to the WBC Program. Therefore, the SBA has determined that the application section of the proposed rule would not have a significant impact on a substantial number of small entities.

There are currently 114 entities that participate in the WBC Program, all of which are small entities. However, the SBA has determined that the impact on these entities affected by the proposed rule will not be significant. The proposed rule codifies current policies and procedures that are already achieved through a Cooperative Agreement with the SBA. It does not include new reporting requirements. Rather it standardizes existing policies to ensure transparency and consistency which in theory will reduce the cost to both the WBC participants and SBA. A WBC participating in the WBC Program submits a Federal Financial Report and attachments twice a year. The estimated burden for these reports is 2 hours twice a year. The annual submission of a work plan is substantially less than the Application and is only to update any changes from the initial Application. The estimate for these forms on an annual basis is a total of 14 hours. For a grants writer at $30 per hour, the annual estimated cost would be $420. Accordingly, the Administrator of the SBA hereby certifies that this proposed rule will not have a significant impact on a substantial number of small entities.

Paperwork Reduction Act, 44 U.S.C. Ch. 35

SBA has determined that this proposed rule would not impose additional reporting and recordkeeping requirements under the Paperwork Reduction Act (PRA), 44 U.S.C. Chapter 35. Currently, there are eight Paperwork Reduction Act submissions associated specifically with the WBC Program: (1) OMB control number 3245–0140 Notice of Award and Cooperative Agreement; (2) OMB control number 3245–0169, Federal Cash Transaction Report, Financial Status Report, Program Income Report, and Narrative Program Report; (3) OMB control number 3245–0324, EDMIS data collection (641 and 888 forms); (4) OMB control number 4040–0004, SF 424, Application for Financial Assistance; (5) OMB control number 4040–0006, SF 424A, Budget Summary for non-construction projects; (6) OMB control number 4040–0007, SF 424B, Assurances for non-construction projects; (7)OMB control number 4040–0013, SF–LLL, Disclosure of Lobbying Activities; and, (8) 4040–0014SF–425, Federal Financial Report. These reports will not change and no new reports are required in the proposed rule.

List of Subjects in 13 CFR Part 131

Entrepreneurship, Grant programs—business, Minority businesses—women, Reporting and recordkeeping requirements, Small businesses.

For the reasons set forth above, SBA proposes to add 13 CFR part 131 as follows:

PART 131—WOMEN'S BUSINESS CENTER PROGRAM

Sec.

131.100 Introduction.
131.110 Definitions.
131.200 Eligible Entities.
131.300 Women's Business Centers (WBCs).
131.310 Operating Requirements.
131.320 Area of Service.
131.330 WBC Services and Restrictions on Service.
131.340 Specific WBC Program Responsibilities.
131.350 Selection and Retention of the WBC Program Director.
131.400 Application Procedures.
131.410 New Applications.
131.420 Renewal Applications.
131.430 Application Decisions.
131.500 Grant Administration and Cost Principles.
131.510 Maximum Grant.
131.520 Carryover of Federal Funds.
131.530 Matching Funds.
131.540 Program Income and Fees.
131.550 Budget Justification.
131.560 Restricted and Prohibited Costs.
131.570 Payments and Reimbursements.
131.600 Reports.
131.700 Oversight of the WBC Program.
131.710 SBA Review Authority.
131.720 Audits, Examinations and Investigations.
131.800 Cooperative Agreement and Contracts.
131.810 Other Federal Grants.
131.820 Revisions and Amendments to Cooperative Agreements.
131.830 Suspension, Termination and Non-renewal.
131.840 Dispute Procedures.
131.850 Closeout Procedures.
131.900 Ensuring Client Privacy.

Authority: 15 U.S.C. 656.

§ 131.100 Introduction.

The Women's Business Centers (WBC) program has grown and evolved to provide a variety of services to many entrepreneurs ranging from those interested in starting businesses to those looking to expand existing businesses.

SBA, through the Office of Women's Business Ownership (OWBO) is responsible for the general management and oversight of the Women's Business Center Program (WBC program). SBA issues an annual cooperative agreement to recipient organizations for the delivery of assistance to individuals and small businesses. The WBC program acts as a catalyst for providing in-depth,

substantive outcome-oriented business services, including training, counseling, and other technical assistance, to women entrepreneurs, both nascent and established businesses, a representative number of whom are socially and economically disadvantaged. By providing a wide variety of training curriculum and counseling expertise through Women's Business Centers (WBCs), the SBA meets the needs of the individual client in the local marketplace.

§ 131.110 Definitions.

Advisory board. A group established to confer with and provide recommendations to the Women's Business Center Program Director on matters pertaining to the operation of the WBC. The advisory board will also act as a catalyst to raise funds for the Women's Business Center.

Applicant organization. An entity that applies for Federal financial assistance to establish, administer, and operate a WBC under a new or renewed cooperative agreement.

Application (also known as the proposal). The written submission by a new applicant organization or an existing recipient organization describing its projected WBC activities for the upcoming budget period and requesting SBA funding for use in its operations.

Annual work plan. See option year work plan and budget.

Area of service. The State or Territory, or a regional portion of a State or U.S. Territory, in which SBA approves the WBC to provide services.

Assistant Administrator of Office of Women's Business Ownership. (AA/OWBO) The AA/OWBO is statutorily responsible for management of the WBC program. The AA/OWBO may elect to designate staff to complete tasks assigned to the AA/OWBO position. When AA/OWBO is referenced, it includes the designee.

Authorized official. A person who has the legal authority to sign for and/or speak on behalf of an organization.

Budget period. The period of performance in which expenditures and obligations are incurred by a WBC, consistent with 2 CFR 200.77.

Carryover funds (carryover). Unobligated Federal funds reallocated from one budget period to the next through an amendment to the current year's cooperative agreement.

Cash match. Non-Federal funds specifically budgeted and expended by the recipient organization for the operation of a WBC project. Cash match must be in the form of cash and/or program income.

Client. An entrepreneur or existing small business seeking services provided by the WBC.

Conditional approval. May be granted when an application has been determined to meet eligibility requirements and has been recommended for funding, but may require special conditions, such as submitting required certifications, assurances or other documentation.

Cognizant agency for audit. The Federal agency designated to carry out the responsibilities as described in 2 CFR 200.513(a) responsibilities.

Cognizant agency for indirect costs. The Federal agency responsible for reviewing, negotiating, and approving cost allocation plans or indirect cost proposals developed under 2 CFR 200.19.

Counseling record. A record that provides individual client contact information, demographics about the client/business and data on the counseling provided.

Cooperative agreement (also known as notice of award). A legal instrument of financial assistance between the SBA and a recipient organization that is consistent with 31 U.S.C. 6302–6305 and provides for substantial involvement between SBA and the recipient organization in carrying out the proposed activities.

Counseling. Services provided to an individual and/or small business owner that are substantive in nature and require assistance from a resource partner or SBA district office personnel in the formation, management, financing, and/or operation of a small business enterprise and are specific to the needs of the business or individual.

Direct costs. Costs as defined in 2 CFR 200.413.

Dispute. A programmatic or financial disagreement that the recipient organization requests be handled according to the dispute resolution procedures under § 131.840.

Distinct population. A specific targeted group. For the purpose of the WBC program, the targeted group is women entrepreneurs.

District office. The local SBA office charged, in collaboration with the WBCs, with meeting the needs of women entrepreneurs in the community.

District office technical representative. An SBA employee located within an SBA district office and designated by the SBA to provide local oversight and monitoring of a particular WBC or WBCs.

Financial examiner. An SBA employee, or designee, charged with conducting financial examinations.

Full-time. An employee all of whose time and effort (minimum of 30 hours per week, as defined by the Internal Revenue Service, § 4980H(c)(4)) is allocated to the WBC project. An employee who is full-time under the WBC should not engage in activities that do not pertain to the WBC project.

Grants and Cooperative Agreement Appeals Committee. The SBA committee, appointed by the SBA Administrator that resolves appeals arising from disputes between a recipient organization and the SBA.

Grants management specialist. An SBA employee within Office of Women's Business Ownership responsible for the budgetary review and financial oversight of WBC agreements.

Indirect costs. Costs as defined in 2 CFR 200.56.

In-kind contributions (third party). Costs incurred as described in 2 CFR 200.96.

Interim Program Director. An individual temporarily assigned by the recipient organization for no more than 60 days to fulfill the responsibilities of a vacant WBC Program Director position.

Key personnel/key employee. For the purposes of the WBC program, the WBC Program Director is identified as the key employee.

Loan packaging. Includes any activity done in support of a client or in preparation of the client's credit application to a lender for a loan, line of credit, or other financial instrument.

Matching funds. For all Federal awards, any shared costs or matching funds and all contributions, as defined in 2 CFR 200.306.

Microloan. A short-term, fixed-interest rate loan of not more than $50,000 made by an Intermediary to an eligible small business. The SBA manages a Microloan Program that focuses on reaching socially and economically disadvantaged entrepreneurs. See 13 CFR 120, Subpart G—Microloan Program.

Non-federal entity. An organization, as defined in 2 CFR 200.

Nonprofit organization. Any corporation, trust, association, cooperative, or other organization as defined in 2 CFR 200.70.

Notice of award. See cooperative agreement.

Option year. Additional 12-month budget period awarded after the first budget year (base year) as determined by the period of performance identified in the cooperative agreement.

Option year work plan and budget. The written submission by an existing WBC applying for an additional year of

grant funding. This submission is required to ensure the recipient organization's continued alignment with the WBC program and to update its description of projected WBC activities for the upcoming option year budget period.

Overmatch. Any non-Federal contribution applied to the WBC award in excess of the minimum amount of match required. See § 131.530 for specific details on match requirements.

Office of Women's Business Ownership Grants Management Officer. An SBA employee within the Office of Women's Business Ownership with authority delegated by the AA/Office of Women's Business Ownership, who meets Office of Management and Budget standards and certifications to obligate Federal funds by signing the notice of award.

Office of Women's Business Ownership Program Manager. An SBA employee designated by the AA/OWBO who oversees and monitors WBC operations.

Period of performance. The period of time as specified in 2 CFR 200.77.

Principal investigator. The individual primarily responsible for achieving the technical success of the project, while also complying with the financial and administrative policies and regulations associated with the grant

Prior approval. The written concurrence from the appropriate Office of Women's Business Ownership official for a proposed action or amendment to a WBC cooperative agreement. Specific guidelines governing the prior approval process, including the documentation required, are outlined in the cooperative agreement.

Program announcement. The SBA's annual publication of requirements, to which an applicant organization must respond to in its new 5-year initial or 3-year renewal application.

Program income. Gross income earned by the non-Federal entity, as described in 2 CFR 200.80.

Project funds. All funds authorized under the cooperative agreement including, Federal funds and non-Federal cash, third-party in-kind contributions (third party) and program income, as well as the Federal funds and non-Federal match authorized or reported as carryover funds.

Project period. The period of time specified in the notice of award, which identifies the start and end date of the recipient organization's 5-year or 3-year project.

Recipient organization. The selected applicant organization that receives Federal funding to deliver WBC services under a cooperative agreement. By statute, only private, nonprofit organizations certified under § 501c of the Internal Revenue Code of 1986 can be recipient organizations.

Socially and economically disadvantaged women. Women who have been subjected to racial or ethnic prejudice or cultural bias within American society because of their identities as members of groups and without regard to their individual qualities. Also includes women whose ability to compete in the free enterprise system has been impaired due to diminished capital and credit opportunities as compared to others in the same or similar line of business.

Specialized services. WBC services other than basic counseling and training. The services can include, but are not limited to: assistance with disaster readiness; home-based businesses; agribusinesses; and construction, child care, elder care, manufacturing or procurement businesses.

State or U.S. Territory. For the purpose of these regulations, State or U.S. Territory will mean the 50 United States, and the U.S. Territories of Guam, the U.S. Virgin Islands, American Samoa, the Northern Mariana Islands, the Commonwealth of Puerto Rico and the District of Columbia.

Training. A qualified activity or event presented or cosponsored by a WBC, that delivers a structured program of knowledge, information or experience on an entrepreneurial or business-related subject.

Training record. A record that provides aggregate data about a training event to include training topic, date, attendance, program format and evaluation of the training.

Women's Business Centers. Women's Business Centers represent a national network of educational centers throughout the United States and its territories that assist women in starting and growing small businesses.

WBC Program Director. An individual whose time and effort is allocated solely to the WBC program. The WBC Program Director position is the only positon that requires approval from the Office of Women's Business Ownership prior to hiring.

Women-owned businesses. Business concern that is not less than 51 percent owned by 1 or more women and the management and daily operations are controlled by 1 or more women.

§ 131.200 Eligible Entities.

(a) *Eligible Organizations.* By statute, only a nonprofit organization with active 501c certification from the United States Department of Treasury/Internal Revenue Service is eligible to apply for Federal funding to operate a WBC project.

(b) *Ineligible Organizations.* Organizations ineligible to receive Federal funds to manage a WBC project include, but are not limited to the following:

(1) Any organization that owes an outstanding and unresolved financial obligation to the Federal government;

(2) Any organization, employee or principal investigator of an organization that is currently suspended, debarred or otherwise prohibited from receiving awards, contracts or grants from the Federal government;

(3) Any organization with an outstanding and unresolved material deficiency reported under the requirements of the Single Audit Act within the past three years, consistent with 2 CFR 200.501;

(4) Any organization that has had a grant or cooperative agreement involuntarily terminated or non-renewed by the SBA for cause;

(5) Any organization that has filed for bankruptcy within the past five years;

(6) Any organization that does not propose to hire and employ a full-time WBC Program Director whose time is solely dedicated to managing the day-to-day operation of the WBC and staff;

(7) Any organization that proposes to serve as a pass-through and permit another organization to manage the day-to-day operations of the project;

(8) Any organization that had an officer or agent acting on its behalf convicted of a felony criminal violation under any Federal law within the preceding 24 months; and,

(9) Any other organization the SBA reasonably determines to be ineligible to receive Federal funds to manage a WBC project.

§ 131.300 Women's Business Centers (WBCs).

Women's Business Centers (WBCs) are established under the statutory authority of the SBA through cooperative agreements with nonprofit recipient organizations. WBC program announcements and requests for work plans and budgets establish the operating and performance parameters, initiatives, and strategies for each project period.

(a) *Program Announcements.* (1) The SBA will issue an annual program announcement each fiscal year to fund those recipient organizations already operating successful WBC projects. This program announcement will detail the goals, objectives and other terms and conditions for renewable projects entering a three-year program. The

issuance of the program announcement is contingent upon SBA's approved budget and funding availability.

(2) At any time during the current fiscal year, and based on the availability of funds, the SBA may, at its discretion, also issue a program announcement for the upcoming fiscal year, detailing the goals, objectives and other terms and conditions for new WBC projects. New WBC projects may be awarded a maximum of one base year and 4 additional option years of funding.

(3) The SBA reserves the right to cancel a program announcement, in whole or in part, at the agency's discretion.

(b) *Option Year Work Plans and Budgets.* (1) By April 30, of each year, the SBA will issue instructions for the submission of the option year work plan and budget for those WBCs currently in (and wishing to continue in) SBA's WBC program that will have successfully completed year 1, 2, 3, or 4 of an initial project, or year 1 or 2 of a renewal project by September 29th, In order to be considered for renewal, submissions for option year work plans and budget must be received in the Office of Women's Business Ownership by the timeline specified in the annual instructions for the submission of each work plan.

(2) The SBA reserves the right to revise the submission requirements, in whole or in part, at the agency's discretion.

(3) Awarding option year funding is at the sole discretion of the SBA and is subject to continuing program authority, the availability of funds and satisfactory performance by the recipient organization.

(c) *Cooperative Agreement.* (1) The terms and conditions must include, but are not limited to, Office of Management and Budget guidelines for grant administration and cost principles, regulations and laws governing the WBC project and federally sponsored programs, and current-year guidelines from the program announcement.

(2) The SBA will issue a notice of award annually to each eligible WBC participant, based on the acceptance of the annual proposal or work plan.

(d) *Negotiating the Cooperative Agreement.* The WBC's participation in negotiations should include, but is not limited, to the following:

(1) Collaborating with the local SBA district office to develop annual goals for the WBC project;

(2) Receiving written concurrence from the SBA district office staff for inclusion in the application submission;

(3) Developing data and analyses to design the WBC services needed by the small business community, with focus on women and women-owned businesses;

(4) Proposing services and the appropriate structure to deliver those services to meet the needs of the small business community, specifically targeting women, including a representative number of women whom are socially and economically disadvantaged;

(5) Ensuring that adequate technical and managerial resources are proposed for the WBC to achieve the performance goals and program objectives as set forth in the cooperative agreement.

(e) *Women's Business Center (WBC) Funds.* Budgeted WBC funds (including match) must be used solely for the WBC project.

§ 131.310 Operating Requirements.

(a) The recipient organization has the contractual responsibility for the duties of the WBC project, which must be a separate and distinct entity within the recipient organization, having its own budget, its own staff, and a full-time WBC Program Director.

(b) The Women's Business Center must establish an advisory board that is representative of the community it will serve and that will confer with and provide recommendations to the WBC Program Director on matters pertaining to the operation of the WBC. The advisory board will also assist the WBC in meeting the match requirements of the program.

(c) An employee who is full-time under the Women's Business Center program should not engage in activities that do not pertain to the WBC project. The WBC is not prohibited from operating other Federal programs that focus on women or other underserved small business concerns as long as doing so does not hinder the ability to deliver the services of the WBC program.

(d) The WBC must have the facilities and administrative infrastructure sufficient to operate a center, including program development, program management, financial management, reports management, promotion and public relations, program assessment, program evaluation and internal quality control. The Women's Business Center must document annual financial and programmatic reviews and evaluations of its center(s) consistent with § 131.600(a).

(e) Any new WBC that is accepted into the WBC program after the effective date of this rule must include the specific identification ''Women's Business Center'' as part of its official name. Any WBC that is applying for a renewal grant after the effective date of this rule must also include the specific identification ''WBC'' as part of its official name. Any existing WBC that does not include ''Women's Business Center'' in its name must include the following language prominently on their Web site and promotional documents: ''The Women's Business Center is funded in part by the U.S. Small Business Administration.''

(f) The WBC must maintain adequate staff to operate the WBC, including the WBC Program Director and at least one other person, preferably a business counselor.

(g) The WBC must use an enforceable conflict-of-interest policy that is consistent with the requirements of 2 CFR 2701.112 and which is signed annually by each WBC employee, contractor, consultant and volunteer. The policy must be uniform among all employees, contractors, consultants and volunteers working for or with the WBC program.

(h) The WBC must be open to the public a minimum of 40 hours a week (which must include evening and weekend hours) and meet other requirements as specified in the program announcement. Emergency closures must be reported to the district office technical representative and OWBO Program Manager as soon as is feasible.

(i) The WBC will comply with 13 CFR parts 112, 113, 117, and 136 requiring that no person be excluded from participation in, be denied the benefits of, or otherwise be subjected to discrimination under any program or activity conducted by the WBC. However, all WBC marketing programs and services must target women.

(j) The WBC project must not be listed in the organizational structure under any other federal grant.

§ 131.320 Area of Service.

(a) *Cooperative Agreement.* The recipient organization will identify in its application the area of service for which it plans to provide assistance. Once approved, the AA/OWBO will define, in writing, the geographic area of service of each recipient organization. More than one recipient organization may be located in a State, Territory or other geographic area. Once the SBA has entered into a cooperative agreement with a recipient organization, the area of service cannot be changed without prior approval by the Office of Women's Business Ownership. A subsequent decision by the recipient organization to change the area of service in the cooperative agreement without prior approval by the SBA may constitute

grounds for suspension, non-renewal and/or termination as set forth in § 131.830.

(b) *Location of WBC Projects.* An organization responding to a program announcement within proximity of an existing WBC project shall provide in its written narrative a justification for placing another WBC in the proximity of an existing WBC, including the number of socially and economically disadvantaged persons within the proposed service area, census data, and population density. The information provided must clearly justify the necessity for an additional WBC project within the same area of service as the existing WBC project. SBA will take the narrative and any supporting documentation into consideration when reviewing, ranking and scoring the applicant organization's proposal.

(c) *Resources.* An applicant organization's plan for the commitment and allocation of resources, including the site location where the WBC plans to provide services will be reviewed as part of the application review process for each budget period to ensure adequate coverage in the area of service.

§ 131.330 WBC Services and Restrictions on Services.

(a) *Services.* The WBC must provide prospective entrepreneurs and existing small businesses, known as clients, with training, counseling, and specialized services. The services provided must relate to the formation, financing, management and operation of small business enterprises. The WBC must create and update counseling records to document each time that counseling is provided to a client. The WBC must provide services that meet local needs as determined through periodic needs assessments and that must be adjusted accordingly to keep pace with changing small business needs. Any changes to the scope of services provided during the budget period must be in accordance with § 131.820.

(b) *Access to Capital.* (1) WBCs must provide training and counseling services that enhance a small business concern's ability to access capital, such as business plan development, financial statement preparation/analysis, and cash-flow preparation/analysis.

(2) WBCs may provide loan packaging services and other services to WBC clients, and may charge a fee for such assistance. See § 131.540. Any fees so generated will constitute program income. The WBC must ensure that these services are not credited to both the WBC program and any other Federally-funded program, thereby double counting the efforts.

(3) WBCs shall prepare their clients to represent themselves to lending institutions. WBC personnel may attend meetings with lenders to assist clients in preparing financial packages; however, neither WBC staff nor their agents may take a direct or indirect role in representing clients in any loan negotiations.

(4) WBCs shall disclose to their clients that financial counseling assistance, including loan packaging, will not guarantee receipt or imply approval of a loan or loan guarantee.

(5) WBCs must not intervene in loan decisions, service loans, make credit recommendations or influence decisions regarding the award of any loans or lines of credit on behalf of the WBC's clients unless the WBC operates as an SBA microlender and is awarding an individual or small business concern an SBA microloan.

(6) When the recipient organization operates both a WBC and a separate loan program, the WBC must disclose to the client other financing options that may be available besides the one offered by the recipient organization to ensure that the client has the opportunity to seek financing outside of the recipient organization.

(7) WBCs must disclose to loan packaging clients any financial relationships between the WBC and a lender or the sale of their credit products.

(8) With respect to loan programs, allowable activities include: assisting clients in formulating a business plan, preparing financial statements, completing forms that are part of a loan application, and accompanying an applicant appearing before the SBA or other lenders. See paragraph (5) of this section for further limitations.

(9) WBCs are to collaborate with state, local and federal government agencies to identify other resources that may be available to its clients and to facilitate interactions deriving from these collaborations.

(c) *Special Emphasis Initiatives.* In addition to requiring WBCs to assist women entrepreneurs including a representative number of women who are socially and economically disadvantaged, the SBA may identify and include in the cooperative agreement other portions of the general population WBCs must target for assistance.

§ 131.340 Specific WBC Program Responsibilities.

(a) *Policy Development.* The AA/OWBO will establish and modify WBC program policies and procedures to improve the delivery of services by WBCs to the small business community, and to enhance compliance with applicable laws, regulations, Office of Management and Budget guidelines and Executive Orders.

(b) *Program Administration.* The AA/OWBO will recommend the annual program budget, establish appropriate funding levels in compliance with the statute and review the annual budgets submitted by each organization.

(c) *Responsibilities of WBC Program Director.* (1) The WBC Program Director must be a full-time employee of the recipient organization and not a contractor, consultant or company. The WBC Program Director will direct and monitor all program activities and all financial affairs of the WBC to ensure effective delivery of services to the small business community and compliance with applicable laws, regulations, Office of Management and Budget circulars, Executive Orders, and the terms and conditions of the cooperative agreement.

(2) The WBC Program Director must have the necessary authority from the recipient organization to control all WBC budgets and expenditures, as well as any hiring and staffing decisions required to meet the program objectives, under the cooperative agreement.

(3) The WBC Program Director may not manage any other programs under the recipient organization.

(4) The WBC Program Director will serve as the SBA's principal contact for all matters involving the WBC.

(d) *Principal Investigator.* The principal investigator is primarily responsible for achieving the technical success of the project, while also complying with the financial and administrative policies and regulations associated with the grant. Although principal investigators may have administrative staff to assist them with the management of the project, the ultimate responsibility for the management of the project rests with the principal investigator. The principal investigator of a recipient organization could include the Executive Director, WBC Program Director, President/CEO, or other key position.

§ 131.350 Selection and Retention of the WBC Program Director.

(a) *General.* (1) The WBC Program Director selected to manage the daily operations of the WBC shall possess core competencies in the areas of business and/or entrepreneurship training, project and/or small business management, effective communication, and collaboration skills.

(2) The recipient organization must provide written notification to the local

SBA district office and AA/OWBO within 10 business days following a vacancy in a WBC Program Director position. This position may not be vacant more than 30 calendar days a new WBC Program Director should be in place within 90 days of the vacancy. Hiring a new WBC Program Director prior approval from the SBA. See 2 CFR 200.308.

(3) Within 30 days of the position becoming vacant, the recipient organization must appoint an Interim Program Director to serve during the period of the vacancy. The recipient organization must document the appointment of the Interim Program Director in accordance with its policies and procedures and the cooperative agreement.

(4) The recipient organization must provide the name, qualifications and contact information for the Interim WBC Program Director to the SBA district office and the AA/OWBO within 10 days of the appointment.

(5) An Interim Program Director must allocate his/her time and effort solely to the WBC program until a permanent WBC Program Director is in position.

(6) If it is anticipated that the Interim Program Director will be in the position for more than 60 days, the recipient organization must submit a key personnel change request to the district office and the AA/OWBO for prior approval.

(7) The recipient organization must submit a request for a key personnel change (including the resume of the candidate) to the local SBA district office within the timeframe specified in the notice of award prior to hiring a new WBC Program Director. This should be completed within the 90 days allotted to fill the vacancy. Failure to comply with this section may subject the recipient organization to corrective actions, restrictions, disallowances, suspension, revocation or termination proceedings.

(b) *SBA Involvement.* (1) SBA employees may not recruit or hire the WBC Program Director; however; the AA/Office of Women's Business Ownership will review the key personnel change request submitted by the recipient organization and recommendation provided by the SBA district office technical representative to ensure that the candidate has the qualifications necessary to manage the day-to-day operations of the WBC. Prior to hiring a new WBC Program Director, the recipient organization must notify and provide the district office technical representative with a complete key personnel change request, including the credentials of the preferred candidate. The district office technical representative will evaluate the request to determine whether that individual meets the requirements necessary for the position and will then forward the request to the AA/OWBO with his/her concurrence or objection to the selection. If the district office technical representative objects to the selection of the WBC Program Director candidate, he/she must provide a written copy of the objection to the recipient organization and also to the AA/OWBO and OWBO Program Manager within 10 business days of receipt of the key personnel change request. The objection must set forth the relevant selection criteria that the district office technical representative believes the candidate fails to meet.

(2) If the AA/OWBO upholds the district office technical representative's objection, he/she must send written justification for the decision to the recipient organization, district office technical representative and OWBO Program Manager. The recipient organization must then proceed to the selection of another candidate. If the AA/OWBO denies the objection, then the AA/OWBO must send written justification for the denial to the recipient organization, district office technical representative and OWBO Program Manager.

(c) *Recruitment Activity and Associated Costs.* Allocable personnel compensation and benefits costs as provided in 2 CFR 200.463.

§ 131.400 Application Procedures.

(a) Each applicant organization seeking a new or renewal grant is required to submit its application electronically to the SBA, via *grants.gov*, as designated in the program announcement.

(b) The selection criteria for new or renewal grants will include, but is not limited to the following:

(1) Expertise of the applicant organization to provide long-term and short-term training and counseling programs, and, most specifically, experience in providing targeted business development services to a distinct population; and,

(2) The ability of the applicant organization to commence the WBC project within 90 days from execution of the cooperative agreement. All other specific criteria will be published in each program announcement issued by the SBA.

(c) As required by 2 CFR 200.205(b), applicant organizations receiving acceptable scores will be further evaluated by OWBO to assess the possible risks they may pose. An assessment of the possible risks posed by an applicant organization will include, but is not limited to, the applicant organization's financial stability, management systems and ability to effectively implement statutory, regulatory and other requirements, as determined by the SBA.

(d) Each WBC within its final option year period is required to submit an application consistent with the date and instructions listed in the program announcement.

§ 131.410 New Applications.

(a) An application for initial funding must follow the format and requirements outlined in the program announcement and set forth in these regulations for initial funding.

(b) All new awards will be made using an open and competitive process. After completion of the review process, the AA/OWBO will make a determination and notify the applicant organization of the final decision.

§ 131.420 Renewal Applications.

(a) Women's Business Centers must comply with the requirements in the annual program announcement and set forth in these regulations to receive consideration of their three year renewal applications. WBCs must have successfully completed an initial five year period or a three year renewal period in order to receive funding under the program announcement. Recipient organizations that have not been renewed and recipient organizations that have been terminated or suspended are not eligible to apply for renewal funds. The recipient organization must submit the complete renewal application to the SBA through the *grants.gov* or other authorized electronic submission process specified in the program announcement.

(b) Significant factors considered in the renewal application review will include, but shall not be limited to:

(1) The applicant organization's continued ability to contribute matching funds;

(2) The quality of prior performance under the cooperative agreement as determined by compliance with projects goals, and outputs/outcomes; and

(3) The results of any examination conducted pursuant to § 131.710(b).

(c) The SBA will review the renewal application for conformity with the program announcement. OWBO staff may request supplemental information and documentation prior to issuing the cooperative agreement.

(d) If the SBA rejects renewal of an existing recipient organization (see due process procedures set forth in

§ 131.830) or the recipient organization elects not to reapply, the SBA may award the funds elsewhere, as the agency deems appropriate.

§ 131.430 Application Decisions.

The AA/OWBO may approve, conditionally approve, or reject any initial or renewal Application.

(a) *Approval.* Upon approval, the OWBO grants management specialist will issue a notice of award.

(b) *Conditional Approval.* (1) If the AA/OWBO determines there is a reasonable basis to believe the applicant organization will take remedial action to correct any issues identified or respond to an enforcement action in a timely way, the AA/OWBO may conditionally approve an application. The conditions and applicable remedies will be specified as special terms and conditions in the cooperative agreement (notice of award). Upon conditional approval, the OWBO grants management specialist will issue a cooperative agreement.

(2) In the event of a conditional approval, SBA may fund a recipient organization for one or more specified periods of time up to a maximum of 90 days.

(c) *Rejection.* The AA/OWBO may reject any application for initial awards. For renewal awards, the AA/OWBO may reject any application after following due process procedures set forth in § 131.830.

§ 131.500 Grant Administration and Cost Principles.

Upon approval of the WBC's initial or renewal application, the SBA will enter into a cooperative agreement with the recipient organization, setting forth the programmatic and fiscal responsibilities of the recipient organization and SBA, the scope of the project to be funded, and the budget for the period covered by the cooperative agreement. The WBC program adopts and implements Office of Management and Budget regulations as published and amended in 2 CFR part 200. Additional qualifications or clarifications may be promulgated through the program announcement, a revised notice of award or the regulatory process.

§ 131.510 Maximum Grant.

No individual WBC project will receive a WBC grant, in any fiscal year under a cooperative agreement, in excess of the amount authorized by statute. While an individual WBC project cannot exceed the statutory limit, a recipient organization is not limited from establishing multiple WBC projects as long as the projects are distinct from each other and are serving distinct populations that would not otherwise be served.

§ 131.520 Carryover of Federal funds.

Only a WBC in the first or second year of an initial phase project may request permission to carry over any unexpended funds remaining under its award.

(a) Such a recipient organization may request that the SBA reauthorize any remaining unexpended and unobligated Federal funds from their cooperative agreement for use in the subsequent program year/period of performance. All carryover requests must be completed within 90 days after the end of the budget period identified in block 5 of the notice of award or page 2 of the modification of the award. The request must be submitted in writing to OWBO with the final semi-annual financial report and reimbursement request package. If the carryover request is not submitted within this timeframe, OWBO may elect to de-obligate all remaining Federal funds and the funds will no longer be available to the recipient organization.

(b) The AA/OWBO will determine the funding priorities for the awarding of carryover funds. Notification of the approval of carryover funds will be provided in writing by modification to the award.

(c) Carryover funds must be used in accordance with the approved option year work plan and budget. Furthermore, expenditures of carryover funds must not be commingled with current year WBC project funds or other non-WBC funds, and must be reported separately from the current year award.

(d) Any organization that requests carryover funds for two consecutive budget periods will be subject to a reduction of the next budget period. The award amount for the next budget period available will be reduced by the average amount of the two consecutive carryover amounts.

§ 131.530 Matching Funds.

(a) The recipient organization must provide matching funds equal to one-half of the Federal amount of SBA funding for the first two years of its initial award. For the remainder of the time the recipient organization is in the WBC program, it must provide matching funds of one dollar for every Federal dollar of their annual Federal award amount. The statutory match ratio is 2:1 (Federal to non-Federal) for the first and second years and 1:1 for the third, fourth, and fifth years. At least 50% of the matching funds must be in cash (the sum of cash and program income). The remaining 50 percent may be provided through allowable combinations of cash, In-kind contributions (third party), or authorized indirect costs.

Once the cash match and total match requirements have been met, any additional matching funds are considered overmatch. WBCs may provide overmatch if they choose to do so; however, if they have used Federal funds to raise match above the required amount, these funds must only be used to meet the Federal objective of the WBC program and must be verifiable from the non-Federal entity's records. When applied to a WBC project through a budget proposal, all funds for use by the WBC for the budget period are subject to Federal rules and regulations, consistent with 2 CFR part 200. This does not prohibit WBC recipient organizations from raising funds separate and apart from the WBC program. Those funds that are not used as match and are not raised with WBC funds are not subject to the same recordkeeping requirements as they are not tied to the WBC Program.

(b) If the recipient organization indicates difficultly in meeting the match requirement, it can request a reduction of the Federal award.

(c) All sources of matching funds must be identified as specifically as possible with supporting documentation. Cash sources must be identified by name, amount, and account. Any additional requirements, specifications, or deliverables must be clearly identified in the budget narrative.

(d) All applicant organizations must submit a certification of cash match and program income. This certification must be executed by an authorized official of the recipient organization and the WBC Program Director.

(e) All matching funds, in addition to the Federal and program income funds, must be under the direct management of the WBC Program Director.

(f) Program income generated by the WBC may be used as matching funds. All WBC program income must be accounted for within the WBC's semi-annual financial reports (unless otherwise specified in the cooperative agreement) and the WBC's general ledger as validation for the district office technical representative's mid-year and year-end review.

(g) The Grants Management Specialist will determine whether matching funds and cash match set forth in the budget proposal are sufficient to recommend the proposal for funding.

(h) When applied to a WBC project through a budget proposal, all funds for use by the WBC for the budget period

are subject to Federal rules and regulations and must be used solely for the WBC project.

(i) The following will not be considered as sources of matching funds for the WBC:

(1) Uncompensated student labor;

(2) SCORE, SBA, or other SBA resource partners;

(3) Federal funds other than Community Development Block Grant (CDBG) funds. CDBG funds may be used to match WBC grants where the WBC project activities are consistent with the authorized CDBG activities, and are identified either in the consolidated plan of the CDBG grantee or in the agreement between the CDBG grantee and the WBC recipient of the funds;

(4) Funds, in-kind contributions (third party), or indirect costs used as match for other programs, not solely dedicated to the WBC program, or under its control; and

(5) Funds or other resources provided for an agreed upon scope of work inconsistent with the authorized activities of the WBC program.

§ 131.540 Program Income and Fees.

(a) Program income, including any interest earned on program income, may only be used for authorized purposes and in accordance with the cooperative agreement. Program income may be used as matching funds and, when expended, is counted towards the cash match requirement of the award. Program income must be used to expand the quantity or quality of services, and for resources or outreach provided by the WBC project.

(b) Unused program income may be carried over to the subsequent budget period by the WBC. The WBC must report the consolidated program income sources and uses.

(c) A WBC may charge clients a reasonable fee for services, including items such as the costs of training and counseling provided by the WBC (sponsored or cosponsored), the sale of books, and the rental of equipment or space. Any fees so generated will constitute program income, and such fees must not restrict access to any services for economically disadvantaged entrepreneurs.

§ 131.550 Budget Justification.

(a) *General.* The WBC Program Director or non-federal entity finance person will prepare and submit the budget justification for the upcoming program/budget period for review by the SBA as part of its application package pursuant to the applicable program announcement. Worksheets are provided by the Office of Women's Business Ownership for this purpose.

(b) *Audit Expenses.* Audit expenses may not be charged to the grant as a direct (Federal or non-Federal) expense. Audit expenses may only be charged as an indirect expense. See 2 CFR 200.425.

(c) *Indirect Costs.* If the budget includes indirect costs and the recipient organization has never had an approved indirect rate agreement issued by the cognizant agency for indirect costs, the recipient organization may utilize a *de minimis* rate of 10 percent of modified total direct cost (to include Federal and non-Federal) indefinitely or until the recipient organization chooses to negotiate for a rate, which it may apply to do at any time through its cognizant agency for audit. This rule does not apply to organizations that have an expired indirect cost rate agreement. See 2 CFR 200.414. If the Applicant or recipient organization waives all indirect costs, then 100 percent of the project funds must be allocated to program delivery. The recipient organization may then count any indirect costs to which it would otherwise have been entitled as matching contributions.

(d) *Option Year Work Plan and Budgets.* (1) In Its proposal, the recipient organization will include its budget estimate of Federal funds needed for the balance of the project period using the SF–424A, Section E, as indicated by the specific program announcement.

(e) *Salaries.* (1) Salaries for WBC Program Directors should be comparable with salaries paid to individuals in similar positions in other states or regions with similarly-sized programs, responsibilities, and authority.

(2) Salaries for all other positions within the WBC should be based upon level of responsibility, and should be comparable to salaries for similar positions in the area served by the WBC.

(f) *Equipment.* In accordance with SBA policy, expenditures for equipment are not a permitted expense under the WBC project. Equipment is defined as any item of valued at $5000 or more. See 2 CFR 200.33.

(g) *Travel.* (1) All travel must be separately identified in the proposed budget under the following categories: planned travel within the area of service and planned travel outside of the area of service. Travel outside of the WBC area of service is considered a distance beyond 50 miles of the stated area of service proposed in the recipient organization's annual budget submission, as defined in 2 CFR 200.474.

(2) Transportation costs must be justified in writing, including the estimated cost, purpose of travel, number of persons traveling, and the benefit to be derived by the small business community from the proposed travel.

(3) A request to include any travel outside of the WBC's area of service that was not included in the approved budget must be submitted to SBA through the district office technical representative for OWBO prior approval on a case-by-case basis.

§ 131.560 Restricted and Prohibited Costs.

SBA prohibitions are consistent with those set forth in 2 CFR part 200.

(a) A WBC may not use project funds as collateral for a loan, assign an interest in them, or use them for any other such monetary purpose.

Project funds found to be used in violation of these restrictions may be cause for termination, suspension, or non-renewal of the cooperative agreement.

§ 131.570 Payments and Reimbursements.

(a) Advancement and reimbursement of Federal funds to WBCs from the SBA are accomplished electronically. Detailed instructions for the WBCs will be included in the annual cooperative agreement.

(b) Advancement and reimbursement requests allow for quarterly draw down of funds required to meet the estimated or actual quarterly Federal share of WBC expenses.

(c) For guidance regarding interest earned on advances of Federal funds, See 2 CFR 200.305 (b)(7) through (9).

(d) If there is a determination that an overpayment of Federal funds to a WBC has been made, the overpayment amount will be due and payable to the agency within 30 days of written notice to the WBC.

§ 131.600 Reports.

(a) *General.* The recipient organization will submit consolidated performance and financial reports for the WBC to the SBA for review. These reports will reflect actual WBC activity and accomplishments pertinent to the budget periods. Report formats and proper recipients will be specified in the annual program announcement and cooperative agreement.

(b) *Frequency.*

In each budget period and unless otherwise instructed in correspondence from the Office of Women's Business Ownership, the recipient organization of the WBC project must submit semi-annual programmatic and financial reports no later than 30 calendar days after each six-month reporting period, as specified in the program announcement.

(c) *Electronic Data Reports.* Unless otherwise instructed in correspondence from the Office of Women's Business Ownership, and consistent with the notice of award, WBC Program Directors are responsible for reporting counseling and training records in the format and frequency designated in the program announcement. WBC Program Directors must ensure that the required data is submitted to SBA within the timeframe stipulated by the cooperative agreement and that the data is accurate and complete.

(d) *Performance Reports.* (1) The semi-annual performance report shall address, in a brief narrative, the WBC's major activities and objectives achieved during the six-month period. The reports must include a discussion on the progress toward achieving those objectives submitted in its proposal.

(2) The final performance report must also include a brief overall summary of effort expended to deliver the core services in the cooperative agreement for the full budget period. A discussion of performance measurements achieved as well as an explanation of those objectives or measurements not met should be included. The performance report should include a brief summary of the activities, events or achievements by reportable category with an accompanying management analysis.

(e) *Financial Reports.* The recipient organization must provide all semi-annual financial reports to SBA as required by the program announcement, the cooperative agreement and in accordance with 2 CFR part 200. These reports must have the signatures of both the WBC Program Director and the recipient organization's financial representative. To ensure that expenditures are proper and in accordance with the terms and conditions of the notice of award and approved project budgets, final fiscal reports or requests for payment under the cooperative agreement must include the certification required by 2 CFR 200.415.

§ 131.700 Oversight of the WBC Program.

(a) The AA/Office of Women's Business Ownership will monitor the WBC's performance and its ongoing operations under the cooperative agreement to determine if the WBC is making effective and efficient use of program funds, in compliance with applicable law and other requirements, for the benefit of the small business community.

(b) The AA/Office of Women's Business Ownership may revoke delegated authority of oversight responsibilities at any time it is deemed necessary and will notify the recipient organization of such a change in a timely manner.

§ 131.710 SBA Review Authority.

Site Reviews/Visits. The SBA district office, or a contractor on its behalf, will coordinate with, and provide written notice to the WBC Program Director that biannual periodic programmatic and financial reviews/visits to the recipient organization will be conducted. The SBA's district office personnel will inspect WBC records and client files to analyze and assess WBC activities, and, if necessary, to make recommendations for improved service delivery. In addition, the SBA Office of Women's Business Ownership, or a contractor on its behalf, may conduct periodic site reviews.

§ 131.720 Audits, Examinations and Investigations.

(a) *General Audits.* The SBA may conduct WBC audits. (1) Audits of a recipient organization will be conducted pursuant to the Single Audit Act of 1984 (if applicable) and applicable Office of Management and Budget circulars.

(2) The SBA Office of Inspector General or its agents may inspect, audit, investigate or otherwise review the WBC as the Inspector General deems appropriate.''

(b) *Financial Examinations.* The WBC will have periodic financial examinations conducted by either the SBA or an independent contracted firm. WBCs, in accordance with the program announcement and the cooperative agreement, must comply with all requirements set forth for such purposes. (1) *Post-Award Examination.* Applicant organizations proposing to enter the WBC program for the first time shall be subject to a post-award examination or sufficiency review conducted by or coordinated with the SBA Financial Examination Unit or designee. As part of the financial examination, the financial examiner will verify the adequacy of the accounting system, the suitability of proposed costs and the nature and sources of proposed matching funds.

(2) The examinations by the SBA will not serve as a substitute for audits required of Federal recipients under the Single Audit Act of 1984, 31 U.S.C Chapter 75 or applicable Office of Management and Budget guidelines (see 2 CFR part 200), nor will such internal reviews serve as a substitute for audits to be conducted by the SBA Office of the Inspector General under authority of the Inspector General Act of 1978, as amended.

(c) *Investigations.* SBA may conduct investigations to determine whether any person or entity has engaged in acts or practices constituting a violation of the Small Business Act, 15 U.S.C. 656, any rule, order or regulation, or any other applicable Federal law.

(d) *Audited Financial Statements.* Audited financial statements shall be required of all WBCs in a new initial phase period of performance. Thereafter, the SBA reserves the right to require a recipient organization to submit audited financial statements as a condition of a cooperative agreement when the results of a financial or programmatic examination demonstrate significant financial issues or significant internal control issues.

§ 131.800 Cooperative Agreement and Contracts.

(a) *General.* A recipient organization will incorporate into its WBC the applicable provisions of the cooperative agreement.

(b) *Goals and Milestones.* (1) The SBA district office and the WBC Program Director will negotiate the goals, milestones, and activities for the cooperative agreement annually. Agency loan goals may not be negotiated or incorporated into the cooperative agreement without the prior written approval of the SBA Administrator.

(2) Failing to meet the goals and milestones of the cooperative agreement may result in suspension, termination, non-renewal in accordance with § 131.830.

(c) *Procurement Policies and Procedures.* (1) The WBC may contract out for certain functions as permitted by the terms and conditions of the cooperative agreement, but may not expend more than 49 percent of the total project funds on contractors and consultants in conducting the project.

(2) The SBA may direct or otherwise approve any obligations or expenditures by recipient organizations, including those related to vendors or contractors, as deemed appropriate by the agency.

§ 131.810 Other Federal Grants.

(a) *Grants from Other Agencies.* A recipient organization may enter into a contract or grant with another Federal department or agency to provide specific assistance to small business concerns in accordance with the following conditions:

(1) Any additional contract or grant funds obtained from a Federal source may not be used as matching funds for the WBC project, with the exception of Community Development Block Grant funds.

(2) Federal funds from the SBA and match expenditures reported to the SBA

under the cooperative agreement may not be used or reported as match for another Federal program.

(3) The SBA does not impose any requirements for additional matching funds for those recipient organizations managing other Federal contracts.

(4) The WBC must report these other Federal funds and any associated matching funds separately to the SBA.

(b) *RISE After Disaster Grants.* In accordance with 15 U.S.C. 636(b)(12), SBA may provide financial assistance to a Women's Business Center, Small Business Development Center under 13 CFR part 130, SCORE, or any proposed consortium of such individuals or entities to spur disaster recovery and growth of small business concerns located in an area for which the President has declared a major disaster. (1) The Administrator, in cooperation with the recipients of financial assistance under this paragraph shall establish metrics and goals for performance of grants, contracts, and cooperative agreements under this paragraph, which shall include recovery of sales, recovery of employment, reestablishment of business premises and establishment of new small-business concerns.

(2) Matching funds are not required for any grant, contract or cooperative agreement under this paragraph. (See section 7(b) of the Small Business Act 15 U.S.C. 636 (b)).

§ 131.820 Revisions and Amendments to Cooperative Agreements.

Requests for Revisions. During a project period, the WBC may request, in writing, one or more revisions to the cooperative agreement. The request must be submitted by the recipient organization's authorized official. Revisions will normally relate to changes in scope, work or funding during the specified budget period. No proposed revision will be implemented without the prior approval from the Office of Women's Business Ownership Grants Management Officer. Revisions that require an amendment include the prior approval items listed in 2 CFR 200.308 and 200.407.

§ 131.830 Suspension, Termination, and Non-renewal.

(a) General. After entering into a cooperative agreement with a recipient organization, the SBA may take, as it deems appropriate, any of the following enforcement actions based upon one or more of the circumstances listed in (b) below:

(1) Suspension. The SBA may suspend a cooperative agreement with a recipient organization at any point. A decision to suspend a cooperative agreement with a recipient organization is effective immediately as of the date of the notice of suspension. The period of suspension will begin on the date of the notice of suspension and will last no longer than 6 months. At the end of the period of suspension, or at any point during that period, the SBA will either reinstate the cooperative agreement or commence an action for termination or non-renewal.

The notice of suspension will recommend that the recipient organization cease work on the project immediately. The SBA is under no obligation to reimburse any expenses incurred by a recipient organization while its cooperative agreement is under suspension. Where the SBA decides to lift a suspension and reinstate a recipient organization's cooperative agreement, the agency may, at its discretion, choose to make funds available to reimburse a recipient organization for some or all of the expenses it incurred in furtherance of project objectives during the period of suspension. However, there is no guarantee that the agency will elect to accept such expenses and recipient organizations incurring expenses while under suspension do so at their own risk.

(2) Termination. The SBA may terminate a cooperative agreement with a recipient organization at any point. A decision to terminate a cooperative agreement is effective immediately as of the date of the notice of termination. A recipient organization may not incur further obligations under the cooperative agreement after the date of termination unless it has been expressly authorized to do so in the notice of termination.

Funds remaining under the cooperative agreement may be made available by the SBA to satisfy financial obligations properly incurred by the recipient organization prior to the date of termination. Award funds will not be available for obligations incurred subsequent to the effective date of termination unless expressly authorized under the notice of termination. A recipient organization that has had its cooperative agreement terminated will have 90 days to submit final closeout documents as instructed by the SBA.

(3) Non-Renewal. The SBA may elect not to renew a cooperative agreement with a recipient organization at any point. In undertaking a non-renewal action, the SBA may either decline to accept or consider any application for renewal the organization submits, or the agency may decline to exercise any option years remaining under the cooperative agreement. A recipient organization that has had its cooperative agreement non-renewed may continue to conduct project activities and incur allowable expenses until the end of the current budget period.

Funds remaining under a non-renewed cooperative agreement may be utilized to satisfy financial obligations the recipient organization properly incurred prior to the end of the budget period. Award funds will not be available for obligations incurred subsequent to the end of the current budget period. A recipient organization that has had its cooperative agreement non-renewed will have until the end of the current budget period or 120 days, whichever is longer, to conclude its operations and submit close-out documents as instructed by the SBA.

(b) Causes. The SBA may suspend, terminate, or not renew a cooperative agreement with a recipient organization for cause. Cause may include, but is not limited to, the following:

(1) Non-performance;

(2) Poor performance;

(3) Unwillingness or inability to implement changes to improve performance;

(4) Willful or material failure to comply with the terms of the cooperative agreement, including relevant OMB circulars;

(5) Conduct reflecting a lack of business integrity or honesty on the part of the recipient organization, the WBC Program Director, or other significant employee(s), which has not been properly addressed;

(6) A conflict of interest on the part of the recipient organization, the WBC Program Director, or other significant employees causing real or perceived detriment to a small business concern, a contractor, the WBC or the SBA;

(7) Improper use of federal funds;

(8) Failure of a WBC to consent to audits, examinations, or to maintain required documents or records;

(9) Failure to implement recommendations from the audits or examinations within 30 days of their receipt;

(10) Failure of the WBC Program Director to work at the WBC on a 100 percent full-time basis on the WBC project;

(11) Failure to promptly suspend or terminate the employment of a WBC Program Director, or other significant employee upon receipt of knowledge or written information by the recipient organization and/or the SBA indicating that such individual has engaged in conduct which may result or has resulted in a criminal conviction or civil judgment which would cause the public

to question the WBC's integrity. In making the decision to suspend or terminate such an employee, the recipient organization must consider such factors as the magnitude and repetitiveness of the harm caused and the remoteness in time of the behavior underlying any conviction or judgment;

(12) Failure to maintain adequate client service facilities or service hours;

(13) Any other action that the SBA believes materially and adversely affects the operation or integrity of a WBC or the WBC program.

(c) *Procedures.* The same procedures will apply regardless of whether a cooperative agreement with a recipient organization is being suspended, terminated or non-renewed by the SBA. (1) *Taking Action.* When the Office of Women's Business Ownership has reason to believe there is cause to suspend, terminate or non-renew a cooperative agreement with a recipient organization (either based on its own knowledge or upon information provided to it by other parties), the AA/Office of Women's Business Ownership may undertake such an enforcement action by issuing a written notice of suspension, termination, or non-renewal to the recipient organization.

(2) *Notice Requirements.* Each notice of suspension, termination, or non-renewal will set forth the specific facts and reasons for the AA/Office of Women's Business Ownership's decision and will include reference to the appropriate legal authority. The notice will also advise the recipient organization that it has the right to request an administrative review of the decision to suspend, terminate or non-renew its cooperative agreement in accordance with the procedures set forth in 131.830 (d). The notice will be transmitted to the recipient organization on the same date it is issued by both U.S. Mail and facsimile or as an email attachment.

(3) *Relationship to Government-Wide Suspension and Debarment.* A decision by the SBA to suspend, terminate or not renew a WBC cooperative agreement does not constitute a nonprocurement suspension or debarment of a recipient organization under E. O. 12549 and SBA's implementing regulations (2 CFR part 2700). However, a decision by the SBA to undertake a suspension, termination, or non-renewal enforcement action with regard to a particular WBC cooperative agreement does not preclude or preempt the agency from also taking action to suspend or debar a recipient organization for purposes of all Federal procurement and/or nonprocurement opportunities.

(d) *Administrative Review.* Any recipient organization that has had its cooperative agreement suspended, terminated, or non-renewed has the right to request an administrative review of the SBA enforcement action. Administrative review of WBC enforcement actions will be conducted by the Associate Administrator for the Office of Entrepreneurial Development (AA/OED). (1) *Format.* There is no prescribed format for a request for administrative review of an SBA enforcement action. While a recipient organization has the right to retain legal counsel to represent its interests in connection with an administrative review, it is under no obligation to do so. Formal briefs and other technical forms of pleading are not required. However, a request for administrative review of an SBA enforcement action must be in writing, should be concise and logically arranged, and must at a minimum include the following information:

(i) Name and address of the recipient organization;

(ii) Identification of the relevant SBA office/program (*i.e.,* Office of Women's Business Ownership/Women's Business Center Program);

(iii) Cooperative agreement number;

(iv) Copy of the notice of suspension, termination, or non-renewal;

(v) Statement regarding why the recipient organization believes the SBA's actions were arbitrary, capricious, an abuse of discretion, and/or otherwise not in accordance with the law;

(vi) Identification of the specific relief being sought (*e.g.,* lifting of the suspension);

(vii) Statement as to whether the recipient organization is requesting a hearing and, if so, the reasons why it believes a hearing is necessary; and

(viii) Copies of any documents or other evidence the recipient organization believes support its position.

(2) *Service.* Any recipient organization requesting administrative review of an SBA enforcement action must submit copies of its request (including any attachments) to all of the following parties:

Associate Administrator for the Office of Entrepreneurial Development, U.S. Small Business Administration, 409 Third St. SW., 6th Floor, Washington, DC 20416. Email: *owbo@sba.gov.*

Assistant Administrator for the Office of Women's Business Ownership, U.S. Small Business Administration, 409 Third St. SW., 6th Floor, Washington, DC 20416. Email: *owbo@sba.gov.*

Associate General Counsel for Procurement Law, U.S. Small Business Administration, 409 Third St. SW., 5th Floor, Washington, DC 20416. Facsimile number: 202–205–6846.

(e) *Timeliness.* In order to be considered timely, the AA/OED must receive a recipient organization's request for administrative review within 30 days of the date of the notice of suspension, termination, or non-renewal. Any request for administrative review received by the AA/OED more than 30 days after the date of the notice of suspension, termination, or non-renewal will be considered untimely and will automatically be rejected without being considered.

In addition, if the AA/OED does not receive a request for administrative review within the 30-day deadline, then the decision by the AA/Office of Women's Business Ownership to suspend, terminate, or non-renew a recipient organization's cooperative agreement will automatically become the final agency decision on the matter.

(f) *Standard of Review.* In order to have the suspension, termination, or non-renewal of a cooperative agreement reversed on administrative review, a recipient organization must successfully demonstrate that the SBA enforcement action was arbitrary, capricious, an abuse of discretion, and/or otherwise not in accordance with the law.

(g) *Conduct of the Proceeding.* Each party must serve the opposing party with copies of all requests, arguments, evidence, and any other filings it submits pursuant to the administrative review. Within 30 days of the AA/OED receiving a request for administrative review, the AA/OED must also receive the SBA's arguments and evidence in defense of its decision to suspend, terminate, or non-renew a recipient organization's cooperative agreement. If the SBA fails to provide its arguments and evidence in a timely manner, the administrative review will be conducted solely on the basis of the information provided by the recipient organization.

After receiving the SBA's response to the request for administrative review or the passage of the 30-day deadline for filing such a response, the AA/OED will take one or more of the following actions, as applicable:

(i) Notify the parties whether she/he has decided to grant a request for a hearing;

(ii) direct the parties to submit further arguments and/or evidence on any issues which she/he believes require clarification;

(iii) notify the parties that she/he has declared the record to be closed and therefore she/he will refuse to admit any further evidence or argument.

The AA/OED will only grant a request for a hearing if she/he concludes that there is a genuine dispute as to a material fact that cannot be resolved except by the taking of testimony and the confrontation of witnesses. If the AA/OED grants a request for a hearing, she/he will set the time and place for the hearing, determine whether the hearing will be conducted in person or via telephone, and identify which witnesses will be permitted to give testimony.

Within 10 calendar days of declaring the record to be closed, the AA/OED will provide all parties with a copy of her/his written decision on the merits of the administrative review.

(h) *Evidence.* The recipient organization and the SBA each have the right to submit whatever evidence they believe is relevant to the matter in dispute. No form of discovery will be permitted unless a party has made a substantial showing, based upon credible evidence and not mere allegation that the other party has acted in bad faith or engaged in improper behavior.

(i) *Decision.* The decision of the AA/Office of Entrepreneurial Development will be effective immediately as of the date it is issued. The decision of the AA/OED will represent the final agency decision on all matters in dispute on administrative review. No further relief may be sought from or granted by the agency. If the AA/OED determines that the SBA's decision to suspend, terminate, or non-renew a cooperative agreement was arbitrary, capricious, an abuse of discretion, and/or otherwise not in accordance with the law, she/he will reverse the agency's enforcement action and direct the SBA to reinstate the recipient organization's cooperative agreement.

Where an enforcement action has been reversed on administrative review, the SBA will have no more than 10 calendar days to implement the AA/OED's decision. However, to the extent permitted under the applicable OMB circulars, the SBA reserves the right to impose such special conditions in the recipient organization's cooperative agreement as it deems necessary to protect the government's interests.

§ 131.840 Dispute Procedures.

(a) *Financial and Programmatic Disputes.* (1) A recipient organization wishing to resolve a dispute regarding a financial or programmatic matter other than suspension, termination, or non-renewal of its award must submit a written statement describing the subject of the dispute, along with any relevant documentation, to the Chairman of the Grants Appeal Committee.

(2) If the recipient organization receives an unfavorable decision from the SBA, it may file an appeal with the AA/OED within 30 calendar days from receipt of the decision.

(3) The AA/Office of Entrepreneurial Development may request additional information or documentation from the recipient organization at any stage of the proceedings. The response to the request for additional information must be provided, in writing, to the AA/OED within 15 calendar days of receipt of the request. The AA/OED will transmit a written decision to the recipient organization within 15 calendar days of receipt of the appeal, or within 15 calendar days of receipt of additional information requested.

(4) If the recipient organization receives an unfavorable decision from the AA/OED, it may make a final appeal to the SBA Grants and Cooperative Agreements Appeals Committee (the ''committee''). The final appeal to the committee must be filed within 30 calendar days of the date of receipt of the AA/Office of Entrepreneurial Development's written decision. Copies of the appeal must also be sent to the AA/Office of Women's Business Ownership and the OWBO grants management specialist. If the recipient organization elects not to file an appeal with the committee, the decision of the AA/Office of Entrepreneurial Development becomes the final decision. (See paragraph (a)(3) of this section).

(5) Requests for an appeal before the committee will not be granted unless the agency determines there are substantial material facts in dispute. Legal briefs and other technical forms of pleading are not required. Final appeals must be in writing and contain all of the following:

(i) Name and address of the recipient organization;

(ii) Name and address of the appropriate SBA district office(s);

(iii) The cooperative agreement number, including amendments;

(iv) A statement of the grounds for appeal, with reasons why the appeal should be sustained;

(v) The specific relief desired on appeal; and

(vi) If an appeal is requested, a statement of the material facts that are substantially in dispute.

(6) The committee may request additional information or documentation from the recipient organization at any stage in the proceedings. The recipient organization's response to the committee's request for additional information or documentation must be submitted, in writing, to the committee within 15 calendar days of receipt of the request. In the event that the recipient organization fails to follow the procedures specified in paragraph (a)(5) of this section, the committee may dismiss the appeal by a written order.

(7) If a request for an appeal is granted, the committee will provide the recipient organization with written instructions, and will afford the parties an opportunity to present their positions to the committee in writing.

(8) The chairperson of the committee, with advice from the SBA Office of General Counsel, will issue a final written decision within 30 calendar days of receipt of all information or inform the recipient organization that additional time to issue a decision is necessary. A copy of the decision will be transmitted to the recipient organization, with copies to the AA/Office of Women's Business Ownership, the grants management specialist, and the SBA district office.

(9) At any time within 120 days of the end of the budget period, the recipient organization may submit a written request to use an expedited dispute appeal process. The committee, by an affirmative vote of a majority of its total membership, may expedite the appeals process to attain final resolution of a dispute before the issuance date of a new cooperative agreement.

§ 131.850 Closeout procedures.

(a) *General.* Closeout procedures are used to ensure that the WBC program funds and property acquired or developed under the WBC cooperative agreement are fully reconciled and transferred seamlessly between the recipient organization and other Federal programs. The responsibility of conducting closeout procedures is vested with the recipient organization whose cooperative agreement is being relinquished, terminated, non-renewed or suspended.

(b) *Responsibilities.* (1) *Recipient Organizations.* When a WBC cooperative agreement is not being renewed or a WBC is terminated, regardless of cause, the recipient organization will address the following in their closeout process and perform the necessary inventories and reconciliations prior to submitting the final annual financial report.

(i) An inventory of WBC property must be compiled, evaluated, and all property and the aggregate of usable supplies and materials accounted for in this inventory.

(ii) Program income balances will be reconciled and unused WBC program income which is not used as match or cannot otherwise be used to offset legitimate expenditures of the WBC, must be returned to SBA.

(iii) Client counseling and training records, paper and electronic, will be compiled to facilitate an SBA program closeout review.

(iv) Financial records will be compiled to facilitate a closeout of the SBA financial examination.

(2) *SBA.* Upon receipt of the final annual financial report from a non-renewing or terminated recipient organization, the AA/OWBO will issue disposition instructions to the former recipient organization.

(c) *Final disposition.* (1) The final financial status report from the recipient organization must include the information identified in the inventory process and identify any WBC program income collected for services provided.

(2) The AA/OWBO will issue written disposition instructions to the recipient organization providing:

(i) The name and address of the entity or agency to which property and program income must be transferred;

(ii) A date by which the transfer must be completed;

(iii) Actions to be taken regarding property and WBC program income;

(iv) Actions to be taken regarding WBC program records such as client and training files; and

(v) Authorization to incur costs for accomplishing the transfer. Such costs may, when authorized, be applied to residual WBC program income, or Federal or matching funds.

§ 131.900 Ensuring Client Privacy.

(a) Women's Business Centers, including their contractors and other agents, are not permitted to disclose the name, address, or telephone number of individuals or small businesses that obtain any type of assistance from the program, hereafter referred to as ''client contact data,'' to any person or entity other than the WBC, without the consent of the Client, except in instances where:

(1) Court orders require the Administrator to do so in any civil or criminal enforcement action initiated by a Federal or State agency;

(2) the Administrator considers such a disclosure to be necessary for the purpose of conducting a financial audit of a center, not including those required under section 130.830, as determined on a case-by-case basis when formal requests are made by a Federal or State agency. Such formal requests must justify and document the need for individual client contact and/or program activity data to the satisfaction of the Administrator;

(3) the agency requires client contact data to directly survey WBC clients.

(b) Women's Business Centers must provide an opportunity for a client to opt-in to allow the SBA to obtain client contact data. The SBA may use the permitted client contact data only to conduct surveys and studies that help stakeholders better understand how the services the client received affect their business outcomes over time. These studies would include, but not be limited to:

(1) Program evaluation and performance management studies;

(2) Measuring the effect and economic or other impact of agency programs;

(3) Assessing public and WBC partner needs;

(4) Measuring customer satisfaction;

(5) Guiding program policy development;

(6) Improving grant-making processes; and

(7) Other areas the SBA determines would be valuable to strengthen the WBC program and/or enhance support for WBC clients.

(c) Women's Business Centers may not deny access to services to clients solely based on their refusal to provide consent as referenced in this section.

(d) All data collections will adhere to 5 CFR 1320. The collection standards and oversight will be coordinated with SBA Office of General Counsel and approved by OMB in compliance with the Paperwork Reduction Act. That process is designed to reduce, minimize and control burdens and maximize the practical utility and public benefit of the information created, collected, disclosed, maintained, used, shared and disseminated.

(e) Any reports or studies on program activity produced by the Administrator and/or a WBC, including its contractors and other agents, may not disseminate client contact data and must only report data in the aggregate. Individual client contact data will not be disclosed in any way that could individually identify a client.

(f) The Administrator and the WBC, including its contractors and other agents, must obtain consent from the client prior to publishing media or reports that identify an individual client.

(g) This section does not restrict the agency in any way from access and use of program performance data.

Maria Contreras-Sweet,

Administrator.

BILLING CODE 8025–01–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 23

[Docket No.FAA–2016–9409; Notice No. 23–16–03–SC]

Special Conditions: Cranfield Aerospace Limited, Cessna Aircraft Company Model 525; Tamarack Load Alleviation System and Cranfield Winglets—Interaction of Systems and Structures

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed special conditions.

SUMMARY: This action proposes special conditions for the Cessna Aircraft Company model 525 airplane. This airplane as modified by Cranfield Aerospace Limited will have a novel or unusual design features associated with the installation of a Tamarack Active Technology Load Alleviation System and Cranfield Winglets. These design features will include winglets and an Active Technology Load Alleviation System. The applicable airworthiness regulations do not contain adequate or appropriate safety standards for this design feature. These proposed special conditions contain the additional safety standards the Administrator considers necessary to establish a level of safety equivalent to that established by the existing airworthiness standards.

DATES: Send your comments on or before December 22, 2016.

ADDRESSES: Send comments identified by docket number FAA–2016–9409 using any of the following methods:

▪ *Federal eRegulations Portal:* Go to *http://www.regulations.gov* and follow the online instructions for sending your comments electronically.

▪ *Mail:* Send comments to Docket Operations, M–30, U.S. Department of Transportation (DOT), 1200 New Jersey Avenue SE., Room W12–140, West Building Ground Floor, Washington, DC 20590–0001.

▪ *Hand Delivery of Courier:* Take comments to Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m., and 5 p.m., Monday through Friday, except Federal holidays.

▪ *Fax:* Fax comments to Docket Operations at 202–493–2251.

Privacy: The FAA will post all comments it receives, without change, to *http://regulations.gov,* including any personal information the commenter provides. Using the search function of

the docket Web site, anyone can find and read the electronic form of all comments received into any FAA docket, including the name of the individual sending the comment (or signing the comment for an association, business, labor union, etc.). DOT's complete Privacy Act Statement can be found in the **Federal Register** published on April 11, 2000 (65 FR 19477–19478), as well as at *http://DocketsInfo.dot.gov.*

Docket: Background documents or comments received may be read at *http://www.regulations.gov* at any time. Follow the online instructions for accessing the docket or go to the Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m., and 5 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Mike Reyer, Continued Operational Safety, ACE–113, Small Airplane Directorate, Aircraft Certification Service, 901 Locust; Kansas City, Missouri 64106; telephone (816) 329–4131; facsimile (816) 329–4090.

SUPPLEMENTARY INFORMATION:

Comments Invited

We invite interested people to take part in this rulemaking by sending written comments, data, or views. The most helpful comments reference a specific portion of the special conditions, explain the reason for any recommended change, and include supporting data. We ask that you send us two copies of written comments.

We will consider all comments we receive on or before the closing date for comments. We will consider comments filed late if it is possible to do so without incurring expense or delay. We may change these special conditions based on the comments we receive.

Background

On January 25, 2016, Cranfield Aerospace Limited (CAL) applied for a supplemental type certificate to install winglets on the Cessna Aircraft Company (Cessna) model 525. The Cessna model 525 twin turbofan engine airplane is certified in the normal category for eight seats, including a pilot, a maximum gross weight of 10,700 pounds, and a maximum altitude of 41,000 feet mean sea level.

Special conditions have been applied on past 14 CFR part 25 airplane programs in order to consider the effects on systems on structures. The regulatory authorities and industry developed standardized criteria in the Aviation Rulemaking Advisory Committee (ARAC) forum based on the criteria defined in Advisory Circular 25.672–1, dated November 15, 1983. The ARAC recommendations have been incorporated in the European Aviation Safety Agency Certification Specifications (CS) 25.302 and CS 25, appendix K. The special conditions used for part 25 airplane programs, can be applied to part 23 airplane programs in order to require consideration of the effects of systems on structures. However, some modifications to the part 25 special conditions are necessary to address differences between parts 23 and 25 as well as differences between parts 91 and 121 operating environments.

Winglets increase aerodynamic efficiency. However, winglets also increase wing design static loads, increase the severity of the wing fatigue spectra, and alter the wing fatigue stress ratio, which under limit gust and maneuvering loads factors, may exceed the certificated wing design limits. The addition of the Tamarack Active Technology Load Alleviation System (ATLAS) mitigates the winglet's adverse structural effects by reducing the aerodynamic effectiveness of the winglet when ATLAS senses gust and maneuver loads above a predetermined threshold.

The ATLAS functions as a load-relief system. This is accomplished by measuring airplane loading via an accelerometer and moving an aileron-like device called a Tamarack Active Control Surface (TACS) that reduces lift at the tip of the wing. The TACS are located outboard and adjacent to the left and right aileron control surfaces. The TACS movement reduces lift at the tip of the wing, resulting in the wing spanwise center of pressure moving inboard, thus reducing bending stresses along the wing span. Because the ATLAS compensates for the increased wing root bending at elevated load factors, the overall effect of this modification is that the required reinforcement of the existing Cessna wing structure due to the winglet installation is reduced. The applicable airworthiness regulations do not contain adequate or appropriate safety standards for this design feature.

The ATLAS is not a primary flight control system, a trim device, or a wing flap. However, several regulations under Part 23, Subpart D—Design and Construction—Control Systems, have applicability to ATLAS, which might otherwise be considered ''Not Applicable'' under a strict interpretation of the regulations. These Control System regulations include §§ 23.672, 23.675, 23.677, 23.681, 23.683, 23.685, 23.693, 23.697, and 23.701.

An airplane designed with a load-relief system must provide a equivalent level of safety to an airplane with similar characteristics designed without a load-relief system. In the following special conditions, an equivalent level of safety is provided by relating the required structural safety factor to the probability of load-relief system failure and the probability of exceeding the frequency of design limit and ultimate loads.

These special conditions address several issues with the operation and failure of the load-relief system. These issues include the structural requirements for the system in the fully operational state; evaluation of the effects of system failure, both at the moment of failure and continued safe flight and landing with the failure annunciated to the pilot; and the potential for failure of the failure monitoring/pilot annunciation function.

The structural requirements for the load-relief system in the fully operational state are stated in special condition 2(e) of these special conditions. In this case, the structure must meet the full requirements of part 23, subparts C and D with full credit given for the effects of the load-relief system.

In the event of a load-relief system failure in-flight, the effects on the structure at the moment of failure must be considered as described in special condition 2(f)(l) of these special conditions. These effects include, but are not limited to the structural loads induced by a hard-over failure of the load-relief control surface and oscillatory system failures that may excite the structural dynamic modes. In evaluating these effects, pilot corrective actions may be considered and the airplane may be assumed to be in 1g (gravitation force) flight prior to the load-relief system failure. These special conditions allows credit, in the form of reduced structural factors of safety, based on the probability of failure of the load-relief system. Effects of an in-flight failure on flutter and fatigue and damage tolerance must also be evaluated.

Following the initial in-flight failure, the airplane must be capable of continued safe flight and landing. Special condition 2(f)(2) in these special conditions assumes that a properly functioning, monitoring, and annunciating system has alerted the pilot to the load-relief failure. Since the pilot has been made aware of the load-relief failure, appropriate flight limitations, including speed restrictions, may be considered when evaluating structural loads, flutter, and fatigue and

damage tolerance. These special conditions allows credit, in the form of reduced structural factors of safety, based on the probability of failure of the load-relief system and the flight time remaining on the failure flight.

Special condition 2(g) of these special conditions addresses the failure of the load-relief system to annunciate a failure to the pilot. These special conditions addresses this concern with maintenance actions and requirements for monitoring and annunciation systems.

These special conditions have been modified from previous, similar part 25 special conditions because of the differences between parts 23 and 25 as well as to address the part 91 operating and maintenance environment. Paragraph (c)(3) of the part 25 special condition [2] is removed from these special conditions. Special condition 2(h) of these special conditions is modified to require a ferry permit for additional flights after an annunciated failure or obvious system failure.

Type Certification Basis

Under the provisions of § 21.101, Cranfield Aerspace Limited must show that the Cessna model 525, as changed, continues to meet the applicable provisions of the regulations incorporated by reference in Type Certificate No. A1WI, revision 24, or the applicable regulations in effect on the date of application for the change. The regulations incorporated by reference in the type certificate are commonly referred to as the ''original type certification basis.'' The regulations incorporated by reference in Type Certificate No. A1WI, revision 24 are 14 CFR part 23 effective February 1, 1965, amendments 23–1 through 23–38 and 23–40.

If the Administrator finds the applicable airworthiness regulations (*i.e.,* 14 CFR part 23) do not contain adequate or appropriate safety standards for the Cessna model 525 because of a novel or unusual design feature, special conditions are prescribed under the provisions of § 21.16.

Special conditions are initially applicable to the model for which they are issued. Should the applicant apply for a supplemental type certificate to modify any other model included on the same type certificate to incorporate the same or similar novel or unusual design feature, the FAA would apply these special conditions to the other model under § 21.101.

[2] Special Condition No. 25–164–SC, ''Boeing Model 737–700 IGW, Interaction of Systems and Structures,'' Effective August 30, 2000 (65 FR 55443).

In addition to the applicable airworthiness regulations and special conditions, the Cessna 525 must comply with the fuel vent and exhaust emission requirements of 14 CFR part 34 and the noise certification requirements of 14 CFR part 36.

The FAA issues special conditions, as defined in 14 CFR 11.19, in accordance with § 11.38, and they become part of the type-certification basis under § 21.101.

Novel or Unusual Design Features

The Cessna model 525 will incorporate the following novel or unusual design features: Cranfield winglets with a Tamarack Active Technology Load Alleviation System.

Discussion

Airplanes equipped with systems that affect structural performance, either directly or as a result of a failure or malfunction, the applicant must take into account the influence of these systems and their failure conditions when showing compliance with the requirements of part 23, subparts C and D.

The applicant must use the following criteria for showing compliance with these special conditions for airplanes equipped with flight control systems, autopilots, stability augmentation systems, load alleviation systems, flutter control systems, fuel management systems, and other systems that either directly or as a result of failure or malfunction affect structural performance. If these special conditions are used for other systems, it may be necessary to adapt the criteria to the specific system.

Applicability

As discussed above, these special conditions are applicable to the Cessna model 525. Should Cranfield Aerspace Limited apply at a later date for a supplemental type certificate to modify any other model included on A1WI, revision 24 to incorporate the same novel or unusual design feature, the FAA would apply these special conditions to that model as well.

Conclusion

This action affects only certain novel or unusual design features on one model of airplanes. It is not a rule of general applicability and it affects only the applicant who applied to the FAA for approval of these features on the airplane.

List of Subjects in 14 CFR Part 23

Aircraft, Aviation safety, Signs and symbols.

The authority citation for these special conditions is as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701, 44702, 44704.

The Proposed Special Conditions

Accordingly, the Federal Aviation Administration (FAA) proposes the following special conditions as part of the type certification basis for Cessna Aircraft Company 525 airplanes modified by Cranfield Aerospace Limited.

1. Active Technology Load Alliviation System (ATLAS)

SC 23.672 Load Alleviation System

The load alleviation system must comply with the following:

(a) A warning, which is clearly distinguishable to the pilot under expected flight conditions without requiring the pilot's attention, must be provided for any failure in the load alleviation system or in any other automatic system that could result in an unsafe condition if the pilot was not aware of the failure. Warning systems must not activate the control system.

(b) The design of the load alleviation system or of any other automatic system must permit initial counteraction of failures without requiring exceptional pilot skill or strength, by either the deactivation of the system or a failed portion thereof, or by overriding the failure by movement of the flight controls in the normal sense.

(1) If deactivation of the system is used to counteract failures, the control for this initial counteraction must be readily accessible to each pilot while operating the control wheel and thrust control levers.

(2) If overriding the failure by movement of the flight controls is used, the override capability must be operationally demonstrated.

(c) It must be shown that, after any single failure of the load alleviation system, the airplane must be safely controllable when the failure or malfunction occurs at any speed or altitude within the approved operating limitations that is critical for the type of failure being considered;

(d) It must be shown that, while the system is active or after any single failure of the load alleviation system—

(1) The controllability and maneuverability requirements of part 23, subpart D, are met within a practical operational flight envelope (*e.g.,* speed, altitude, normal acceleration, and airplane configuration) that is described in the Airplane Flight Manual (AFM); and

(2) The trim, stability, and stall characteristics are not impaired below a

level needed to permit continued safe flight and landing.

SC 23.677 Load Alleviation Active Control Surface

(a) Proper precautions must be taken to prevent inadvertent or improper operation of the load alleviation system. It must be demonstrated that with the load alleviation system operating throughout its operational range, a pilot of average strength and skill level is able to continue safe flight with no objectionable increased workload.

(b) The load alleviation system must be designed so that, when any one connecting or transmitting element in the primary flight control system fails, adequate control for safe flight and landing is available.

(c) The load alleviation system must be irreversible unless the control surface is properly balanced and has no unsafe flutter characteristics. The system must have adequate rigidity and reliability in the portion of the system from the control surface to the attachment of the irreversible unit to the airplane structure.

(d) It must be demonstrated the airplane is safely controllable and a pilot can perform all maneuvers and operations necessary to effect a safe landing following any load allevation system runaway not shown to be extremely improbable, allowing for appropriate time delay after pilot recognition of the system runaway. The demonstration must be conducted at critical airplane weights and center of gravity positions.

SC 23.683 Operation Tests

(a) It must be shown by operation tests that, when the flight control system and the load alleviation systems are operated and loaded as prescribed in paragraph (c) of this section, the flight control system and load alleviation systems are free from—

(1) Jamming;

(2) Excessive friction; and

(3) Excessive deflection.

(b) The operation tests in paragraph (a) of this section must also show the load alleviation system and associated surfaces do not restrict or prevent aileron control surface movements, or cause any adverse response of the ailerons, under the loading prescribed in paragraph (c) of this section that would prevent continued safe flight and landing.

(c) The prescribed test loads are for the entire load alleviation and flight control systems, loads corresponding to the limit airloads on the appropriate surfaces.

Note: Advisory Circular (AC) 23–17C ''Systems and Equipment Guide to Certification of Part 23 Airplanes'' provides guidance on potential methods of compliance with this section and other regulations applicable to this STC project.

SC 23.685 Control System Details

(a) Each detail of the load alleviation system and related moveable surfaces must be designed and installed to prevent jamming, chafing, and interference from cargo, passengers, loose objects, or the freezing of moisture.

(b) There must be means in the cockpit to prevent the entry of foreign objects into places where they would jam any one connecting or transmitting element of the load alleviation system.

(c) Each element of the load alleviation system must have design features, or must be distinctively and permanently marked, to minimize the possibility of incorrect assembly that could result in malfunctioning of the control system.

SC 23.697 Load Alleviation System Controls

(a) The load alleviation control surface must be designed so that during normal operation, when the surface has been placed in any position, it will not move from that position unless the control is adjusted or is moved by the operation of a load alleviation system.

(b) The rate of movement of the control surface in response to the load alleviation system controls must give satisfactory flight and performance characteristics under steady or changing conditions of airspeed, engine power, attitude, flap configuration, speedbrake position, and during landing gear extension and retraction.

SC 23.701 Load Alleviation System Interconnection

(a) The load alleviation system and related movable surfaces as a system must—

(1) Be synchronized by a mechanical interconnection between the movable surfaces or by an approved equivalent means; or

(2) Be designed so the occurrence of any failure of the system that would result in an unsafe flight characteristic of the airplane is extremely improbable; or

(b) The airplane must be shown to have safe flight characteristics with any combination of extreme positions of individual movable surfaces.

(c) If an interconnection is used in multiengine airplanes, it must be designed to account for unsymmetrical loads resulting from flight with the engines on one side of the plane of symmetry inoperative and the remaining engines at takeoff power. For single-engine airplanes, and multiengine airplanes with no slipstream effects on the load alleviation system, it may be assumed that 100 percent of the critical air load acts on one side and 70 percent on the other.

§§ 23.675, ''Stops;'' 23.681, ''Limit Load Static Tests;'' and 23.693, ''Joints''

The load alleviation system must comply with §§ 23.675, 23.681, and 23.693 as written and no unique special condition will be required for these regulations.

Applicability of Control System Regulations to Other Control Systems

The load alleviation system must comply with §§ 23.675, 23.681, and 23.693 as written and no unique special condition will be required for these regulations.

2. Interaction of Systems and Structures

(a) The criteria defined herein only address the direct structural consequences of the system responses and performances and cannot be considered in isolation but should be included in the overall safety evaluation of the airplane. These criteria may in some instances duplicate standards already established for this evaluation. These criteria are only applicable to structure whose failure could prevent continued safe flight and landing. Specific criteria that define acceptable limits on handling characteristics or stability requirements when operating in the system degraded or inoperative mode are not provided in this special condition.

(b) Depending upon the specific characteristics of the airplane, additional studies may be required that go beyond the criteria provided in this special condition in order to demonstrate the capability of the airplane to meet other realistic conditions such as alternative gust or maneuver descriptions for an airplane equipped with a load alleviation system.

(c) The following definitions are applicable to this special condition.

(1) *Structural performance:* Capability of the airplane to meet the structural requirements of 14 CFR part 23.

(2) *Flight limitations:* Limitations that can be applied to the airplane flight conditions following an in-flight occurrence and that are included in the flight manual (*e.g.,* speed limitations, avoidance of severe weather conditions, etc.).

(3) Reserved.

(4) *Probabilistic terms:* The probabilistic terms (probable, improbable, extremely improbable) used in this special condition are the same as those used in § 23.1309. For the purposes of this special condition, extremely improbable for normal, utility, and acrobatic category airplanes is defined as 10^{-8} per hour. For commuter category airplanes, extremely improbable is defined as 10^{-9} per hour.

(5) *Failure condition:* The term failure condition is the same as that used in § 23.1309, however this special condition applies only to system failure conditions that affect the structural performance of the airplane (*e.g.,* system failure conditions that induce loads, change the response of the airplane to inputs such as gusts or pilot actions, or lower flutter margins).

(d) *General.* The following criteria (paragraphs (e) through (i)) will be used in determining the influence of a system and its failure conditions on the airplane structure.

(e) *System fully operative.* With the system fully operative, the following apply:

(1) Limit loads must be derived in all normal operating configurations of the system from all the limit conditions specified in subpart C (or defined by special condition or equivalent level of safety in lieu of those specified in subpart C), taking into account any special behavior of such a system or associated functions or any effect on the structural performance of the airplane that may occur up to the limit loads. In particular, any significant nonlinearity (rate of displacement of control surface, thresholds or any other system nonlinearities) must be accounted for in a realistic or conservative way when deriving limit loads from limit conditions.

(2) The airplane must meet the strength requirements of part 23 (static strength and residual strength for failsafe or damage tolerant structure), using the specified factors to derive ultimate loads from the limit loads defined above. The effect of nonlinearities must be investigated beyond limit conditions to ensure the behavior of the system presents no anomaly compared to the behavior below limit conditions. However, conditions beyond limit conditions need not be considered when it can be shown that the airplane has design features that will not allow it to exceed those limit conditions.

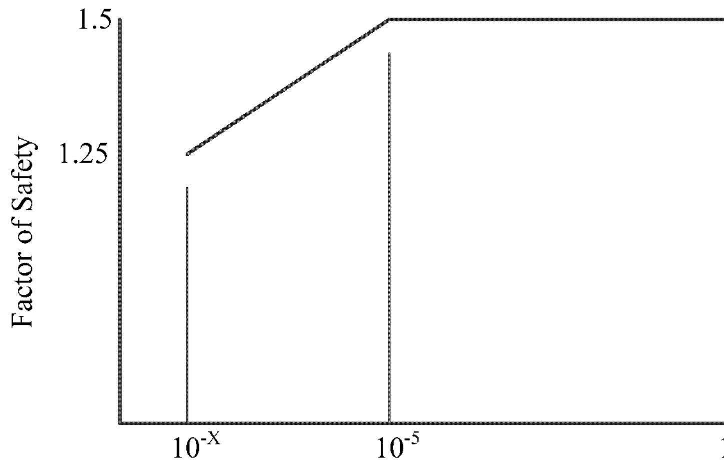
(3) The airplane must meet the aeroelastic stability requirements of § 23.629.

(f) *System in the failure condition.* For any system failure condition not shown to be extremely improbable, the following apply:

(1) *At the time of occurrence.* Starting from 1-g level flight conditions, a realistic scenario, including pilot corrective actions, must be established to determine the loads occurring at the time of failure and immediately after failure.

(i) For static strength substantiation, these loads, multiplied by an appropriate factor of safety that is related to the probability of occurrence of the failure, are ultimate loads to be considered for design. The factor of safety is defined in figure 1.

Figure 1—Factor of Safety at the Time of Occurrence



10^{-X} = 10^{-8} for Normal, Utility, and Acrobatic Category Airplanes

= 10^{-9} for Commuter Category Airplanes

(ii) For residual strength substantiation, the airplane must be able to withstand two thirds of the ultimate loads defined in subparagraph (f)(1)(i).

(iii) For pressurized cabins, these loads must be combined with the normal operating differential pressure.

(iv) Freedom from aeroelastic instability must be shown up to the speeds defined in § 23.629(f). For failure conditions that result in speeds beyond V_D/M_D, freedom from aeroelastic instability must be shown to increased speeds, so that the margins intended by § 23.629(f) are maintained.

(v) Failures of the system that result in forced structural vibrations (oscillatory failures) must not produce loads that could result in detrimental deformation of primary structure.

(2) *For the continuation of the flight.* For the airplane, in the system failed state and considering any appropriate

reconfiguration and flight limitations, the following apply:

(i) The loads derived from the following conditions (or defined by special condition or equivalent level of safety in lieu of the following conditions) at speeds up to V_C/M_C, or the speed limitation prescribed for the remainder of the flight, must be determined:

(A) The limit symmetrical maneuvering conditions specified in §§ 23.321, 23.331, 23.333, 23.345, 23.421, 23.423, and 23.445.

(B) The limit gust and turbulence conditions specified in §§ 23.341, 23.345, 23.425, 23.443, and 23.445.

(C) The limit rolling conditions specified in § 23.349 and the limit unsymmetrical conditions specified in §§ 23.347, 23.427, and 23.445.

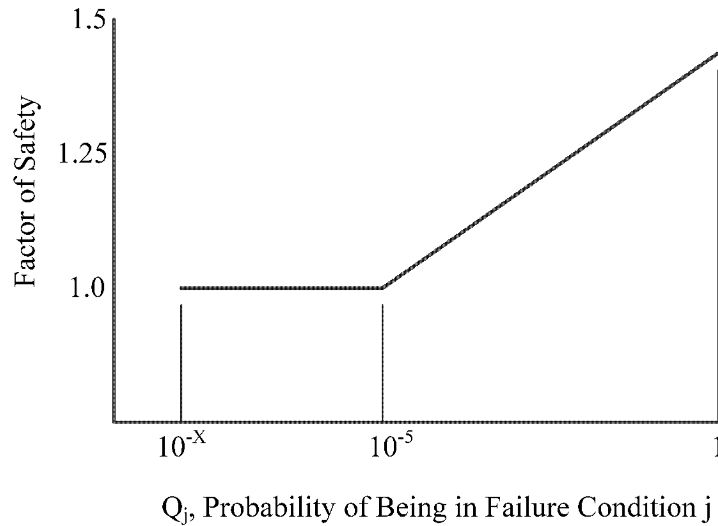
(D) The limit yaw maneuvering conditions specified in §§ 23.351, 23.441, and 23.445.

(E) The limit ground loading conditions specified in §§ 23.473 and 23.493.

(ii) For static strength substantiation, each part of the structure must be able to withstand the loads in paragraph (f)(2)(i) of this special condition multiplied by a factor of safety depending on the probability of being in this failure state. The factor of safety is defined in figure 2.

BILLING CODE 4910–13–P

Figure 2—Factor of Safety for Continuation of Flight



10^{-X} = 10^{-8} for Normal, Utility, and Acrobatic Category Airplanes

= 10^{-9} for Commuter Category Airplanes

$Q_j = (T_j)(P_j)$ where:

T_j = Average time spent in failure condition j, hours

P_j = Probability of occurrence of failure mode j, per hour

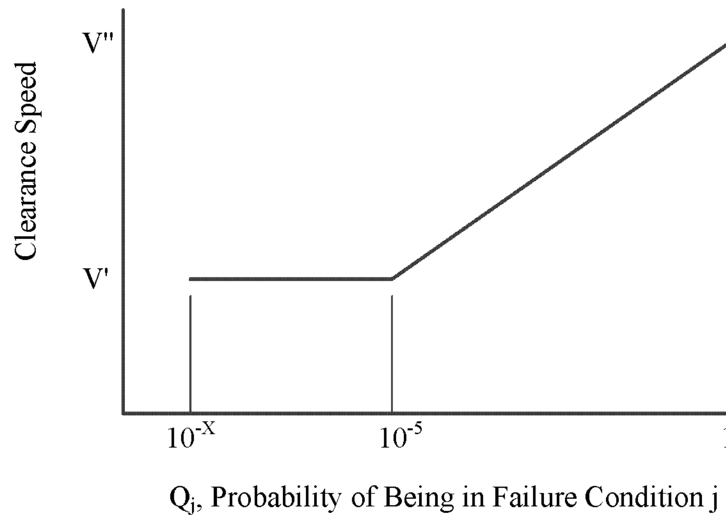
Note: If P_j is greater than 10^{-3} per flight hour then a 1.5 factor of safety must be applied to all limit load conditions specified in part 23 subpart C.

(iii) For residual strength substantiation, the airplane must be able to withstand two thirds of the ultimate loads defined in paragraph (f)(2)(ii) of this special condition. For pressurized cabins, these loads must be combined with the normal operating pressure differential.

(iv) If the loads induced by the failure condition have a significant effect on fatigue or damage tolerance then their effects must be taken into account.

(v) Freedom from aeroelastic instability must be shown up to a speed determined from figure 3. Flutter clearance speeds V′ and V″ may be based on the speed limitation specified for the remainder of the flight using the margins defined by § 23.629.

Figure 3—Clearance Speed



$10^{-X} = 10^{-8}$ for Normal, Utility, and Acrobatic Category Airplanes

$= 10^{-9}$ for Commuter Category Airplanes

V' = Clearance speed as defined by §23.629(f)
V" = Clearance speed as defined by §23.629(b)

$Q_j = (T_j)(P_j)$ where:
T_j = Average time spent in failure condition j, hours
P_j = Probability of occurrence of failure mode j, per hour

Note: If P_j is greater than 10^{-3} per flight hour then the flutter clearance speed must not be less than V"

(vi) Freedom from aeroelastic instability must also be shown up to V′ in figure 3 above, for any probable system failure condition combined with any damage required or selected for investigation by §§ 23.571 through 23.574.

(3) Consideration of certain failure conditions may be required by other sections of 14 CFR part 23 regardless of calculated system reliability. Where analysis shows the probability of these failure conditions to be less than 10^{-8} for normal, utility, or acrobatic category airplanes or less than 10^{-9} for commuter category airplanes, criteria other than those specified in this paragraph may be used for structural substantiation to show continued safe flight and landing.

(g) *Failure indications.* For system failure detection and indication, the following apply:

(1) The system must be checked for failure conditions, not extremely improbable, that degrade the structural capability below the level required by part 23 or significantly reduce the reliability of the remaining system. As far as reasonably practicable, the flightcrew must be made aware of these failures before flight. Certain elements of the control system, such as mechanical and hydraulic components, may use special periodic inspections, and electronic components may use daily checks, in lieu of detection and indication systems to achieve the objective of this requirement. These certification maintenance requirements must be limited to components that are not readily detectable by normal detection and indication systems and where service history shows that inspections will provide an adequate level of safety.

(2) The existence of any failure condition, not extremely improbable, during flight that could significantly affect the structural capability of the airplane and for which the associated reduction in airworthiness can be minimized by suitable flight limitations, must be signaled to the flightcrew. The probability of not annunciating these failure conditions must be extremely improbable (unannunciated failure). For example, failure conditions that result in a factor of safety between the airplane strength and the loads of subpart C below 1.25, or flutter margins below V″, must be signaled to the flightcrew during flight.

(h) *Further flights with known load-relief system failure.* Additional flights after an annunciated failure of the load-relief system or obvious failure of the load-relief system are permitted with a ferry permit only. In these cases, ferry permits may be issued to allow moving the airplane to an appropriate maintenance facility. Additional flights are defined as, further flights after landing on a flight where an annunciated or obvious failure of the load-relief system has occurred or after an annunciated or obvious failure of the

load-relief system occurs during preflight preparation.

(i) *Fatigue and damage tolerance.* If any system failure would have a significant effect on the fatigue or damage evaluations required in §§ 23.571 through 23.574, then these effects must be taken into account.

Issued in Kansas City, Missouri, on November 10, 2016.

Mel Johnson,

Acting Manager, Small Airplane Directorate Aircraft Certification Service.

[Docket No.: FAA–2016–9275; Notice No. 16–07]

RIN 2120–AK91

Rotorcraft Pilot Compartment View; Extension of Comment Period

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM); Reopening of comment period.

SUMMARY: This action reopens the comment period for an NPRM that was published on October 17, 2016. In that document, the FAA proposed to revise its rules for pilot compartment view to allow ground tests to demonstrate compliance for night operations. The FAA is extending the comment period closing date to allow time to adequately analyze the draft advisory circulars (ACs) associated with the proposed rule and prepare comments.

DATES: The comment period for the NPRM published on October 17, 2016, and closed November 16, 2016, and is reopened until December 13, 2016.

ADDRESSES: You may send comments identified by docket number FAA–2016–9275 using any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov* and follow the online instructions for sending your comments electronically.
- *Mail:* Send comments to Docket Operations, M–30; U.S. Department of Transportation (DOT), 1200 New Jersey Avenue SE., Room W12–140, West Building Ground Floor, Washington, DC 20590–0001.
- *Hand Delivery or Courier:* Take comments to Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.
- *Fax:* Fax comments to Docket Operations at 202–493–2251.

Privacy: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *www.dot.gov/privacy.*

Docket: Background documents or comments received may be read at *http://www.regulations.gov* at any time. Follow the online instructions for accessing the docket or Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Thuy H. Cooper, ARM–106, Office of Rulemaking, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591, telephone (202) 267–4715; email *thuy.cooper@faa.gov.*

SUPPLEMENTARY INFORMATION: See the ''Additional Information'' section for information on how to comment on this proposal and how the FAA will handle comments received. The ''Additional Information'' section also contains related information about the docket, privacy, the handling of proprietary or confidential business information. In addition, there is information on obtaining copies of related rulemaking documents.

Background

On October 17, 2016, the FAA issued Notice No. 16–07, entitled ''Rotorcraft Pilot Compartment View'' (81 FR 71415). Comments to that document were to be received on or before November 16, 2016.

The FAA did not post for public comment the draft ACs associated with the NPRM until November 9, 2016.[1] The FAA finds that providing an additional 21 days is sufficient to analyze the draft ACs and provide meaningful comment to Notice No. 16–07.

Absent unusual circumstances, the FAA does not anticipate any further extension of the comment period for this rulemaking.

[1] *See* Docket FAA–2016–9275 and *https://www.faa.gov/aircraft/draft_docs/ac/.*

Extension of Comment Period

The FAA has determined that extension of the comment period is consistent with the public interest, and that good cause exists for taking this action.

Accordingly, the comment period for Notice No. 16–07 is reopened until December 13, 2016.

Additional Information

A. Comments Invited

The FAA invites interested persons to participate in this rulemaking by submitting written comments, data, or views. The agency also invites comments relating to the economic, environmental, energy, or federalism impacts that might result from adopting the proposals in this document. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. To ensure the docket does not contain duplicate comments, commenters should send only one copy of written comments, or if comments are filed electronically, commenters should submit only one time.

The FAA will file in the docket all comments it receives, as well as a report summarizing each substantive public contact with FAA personnel concerning this proposed rulemaking. Before acting on this proposal, the FAA will consider all comments it receives on or before the closing date for comments. The FAA will consider comments filed after the comment period has closed if it is possible to do so without incurring expense or delay. The agency may change this proposal in light of the comments it receives.

B. Availability of Rulemaking Documents

An electronic copy of rulemaking documents may be obtained from the Internet by—

1. Searching the Federal eRulemaking Portal (*http://www.regulations.gov*);
2. Visiting the FAA's Regulations and Policies Web page at *http://www.faa.gov/regulations_policies* or
3. Accessing the Government Printing Office's Web page at *http://www.gpo.gov/fdsys/.*

Copies may also be obtained by sending a request to the Federal Aviation Administration, Office of Rulemaking, ARM–1, 800 Independence Avenue SW., Washington, DC 20591, or by calling (202) 267–9680. Commenters must identify the docket or notice number of this rulemaking.

All documents the FAA considered in developing this proposed rule,

including economic analyses and technical reports, may be accessed from the Internet through the Federal eRulemaking Portal referenced in item (1) above.

Issued under authority provided by 49 U.S.C. 106(f), 44701(a), and 44703 in Washington, DC, on November 14, 2016.

Dale Bouffiou,

Acting Director, Office of Rulemaking.

Airworthiness Directives; The Boeing Company Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: We propose to supersede Airworthiness Directive (AD) 2008–12–04, which applies to certain Boeing Model 737–600, –700, –700C, –800, and –900 series airplanes. AD 2008–12–04 currently requires various repetitive inspections to detect cracks along the chem-milled steps of the fuselage skin, and to detect missing or loose fasteners in the area of the preventive modification or repairs, replacement of the time-limited repair with the permanent repair if applicable, and applicable corrective actions, if necessary, which would end certain repetitive inspections. Since we issued AD 2008–12–04, an evaluation by the design approval holder (DAH) has indicated that the upper skin panel at the chem-milled step above the lap joint is subject to widespread fatigue damage (WFD) if the modification was installed after 30,000 total flight cycles. This proposed AD would reduce the post-modification inspection compliance times, limit installation of the preventive modification to airplanes with fewer than 30,000 total flight cycles, and add repetitive inspections for modified airplanes. We are proposing this AD to detect and correct cracking of the upper skin panel at the chem-milled step above the lap joint, which could result in reduced structural integrity of the airplane.

DATES: We must receive comments on this proposed AD by January 6, 2017.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov.* Follow the instructions for submitting comments.
- Fax: 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this NPRM, contact Boeing Commercial Airplanes, Attention: Contractual & Data Services (C&DS), 2600 Westminster Blvd., MC 110–SK57, Seal Beach, CA 90740; telephone 562–797–1717; Internet *https://www.myboeingfleet.com.* You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221. It is also available on the internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–9301.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–9301; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this proposed AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Office (phone: 800–647–5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Gaetano Settineri, Aerospace Engineer, Airframe Branch, ANM–120S, FAA, Seattle Aircraft Certification Office (ACO), 1601 Lind Avenue SW., Renton, WA 98057–3356; phone: 425–917–6577; fax: 425–917–6590; email: *Gaetano.Settineri@faa.gov.*

SUPPLEMENTARY INFORMATION:

Comments Invited

We invite you to send any written relevant data, views, or arguments about this proposed AD. Send your comments to an address listed under the **ADDRESSES** section. Include ''Docket No. FAA–2016–9301; Directorate Identifier 2015–NM–193–AD'' at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this proposed AD. We will consider all comments received by the closing date and may amend this proposed AD because of those comments.

We will post all comments we receive, without change, to *http://www.regulations.gov,* including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this proposed AD.

Discussion

Fatigue damage can occur locally, in small areas or structural design details, or in widespread areas. Multiple-site damage is widespread damage that occurs in a large structural element such as a single rivet line of a lap splice joining two large skin panels. Widespread damage can also occur in multiple elements such as adjacent frames or stringers. Multiple-site damage and multiple-element damage cracks are typically too small initially to be reliably detected with normal inspection methods. Without intervention, these cracks will grow, and eventually compromise the structural integrity of the airplane. This condition is known as widespread fatigue damage. It is associated with general degradation of large areas of structure with similar structural details and stress levels. As an airplane ages, WFD will likely occur, and will certainly occur if the airplane is operated long enough without any intervention.

The FAA's WFD final rule (75 FR 69746, November 15, 2010) became effective on January 14, 2011. The WFD rule requires certain actions to prevent structural failure due to WFD throughout the operational life of certain existing transport category airplanes and all of these airplanes that will be certificated in the future. For existing and future airplanes subject to the WFD rule, the rule requires that DAHs establish a limit of validity (LOV) of the engineering data that support the structural maintenance program. Operators affected by the WFD rule may not fly an airplane beyond its LOV, unless an extended LOV is approved.

The WFD rule (75 FR 69746, November 15, 2010) does not require identifying and developing maintenance actions if the DAHs can show that such actions are not necessary to prevent WFD before the airplane reaches the

LOV. Many LOVs, however, do depend on accomplishment of future maintenance actions. As stated in the WFD rule, any maintenance actions necessary to reach the LOV will be mandated by airworthiness directives through separate rulemaking actions.

In the context of WFD, this action is necessary to enable DAHs to propose LOVs that allow operators the longest operational lives for their airplanes, and still ensure that WFD will not occur. This approach allows for an implementation strategy that provides flexibility to DAHs in determining the timing of service information development (with FAA approval), while providing operators with certainty regarding the LOV applicable to their airplanes.

On May 29, 2008, we issued AD 2008–12–04, Amendment 39–15547 (73 FR 32991, June 11, 2008) (''AD 2008–12–04''), for certain Boeing Model 737–600, –700, –700C, –800, and –900 series airplanes. AD 2008–12–04 requires various repetitive inspections to detect cracks along the chem-milled steps of the fuselage skin, and to detect missing or loose fasteners in the area of the preventive modification or repairs, replacement of the time-limited repair with the permanent repair if applicable, and applicable corrective actions, if necessary, which would end certain repetitive inspections. AD 2008–12–04 resulted from a fatigue test that revealed numerous cracks in the upper skin panel at the chem-milled step above the lap joint. We issued AD 2008–12–04 to detect and correct such fatigue-related cracks, which could result in the crack tips continuing to turn and grow to the point where the skin bay flaps open, causing decompression of the airplane.

Actions Since AD 2008–12–04 Was Issued

Since we issued AD 2008–12–04, an evaluation by the DAH indicated that the upper skin panel at the chem-milled step above the lap joint is subject to WFD if the modification was installed after that airplane had accumulated 30,000 total flight cycles. We have determined that it is necessary to reduce the post-modification inspection compliance times, limit installation of the preventive modification to airplanes that have accumulated fewer than 30,000 total flight cycles, and add repetitive inspections for modified airplanes.

Related Service Information Under 1 CFR Part 51

We reviewed Boeing Alert Service Bulletin 737–53A1232, Revision 3, dated July 27, 2015. This service information describes procedures for an external detailed inspection and an external nondestructive inspection (NDI) for cracks in the fuselage skin at chem-milled steps. Corrective actions include a permanent or time-limited repair, a preventive modification, and replacement of loose and missing fasteners. Related investigative actions include internal and external detailed inspections of the repair area. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

FAA's Determination

We are proposing this AD because we evaluated all the relevant information and determined the unsafe condition described previously is likely to exist or develop in other products of the same type design.

Proposed AD Requirements

Although this proposed AD does not explicitly restate the requirements of AD 2008–12–04, this proposed AD would retain all requirements of AD 2008–12–04. Those requirements are referenced in the service information identified previously, which, in turn, is referenced in paragraphs (g), (h), and (i) of this proposed AD. This proposed AD would require accomplishing the actions specified in the service information described previously, except as discussed under ''Difference Between this AD and the Service Information.'' This proposed AD would reduce the post-modification compliance times required by AD 2008–12–04, limit installation of the preventive modification to airplanes that have not yet accumulated 30,000 total flight cycles, and add repetitive post-modification inspections and applicable corrective actions.

The phrase ''related investigative actions'' is used in this proposed AD. Related investigative actions are follow-on actions that (1) are related to the primary action, and (2) further investigate the nature of any condition found. Related investigative actions in an AD could include, for example, inspections.

The phrase ''corrective actions'' is used in this proposed AD. Corrective actions are actions that correct or address any condition found. Corrective actions in an AD could include, for example, repairs.

Difference Between This Proposed AD and the Service Information

Boeing Alert Service Bulletin 737–53A1232, Revision 3, dated July 27, 2015, specifies to contact the manufacturer for certain instructions, but this proposed AD would require accomplishment of repair methods, modification deviations, and alteration deviations in one of the following ways:

- In accordance with a method that we approve; or
- Using data that meet the certification basis of the airplane, and that have been approved by the Boeing Commercial Airplanes Organization Designation Authorization (ODA) whom we have authorized to make those findings.

Costs of Compliance

We estimate that this proposed AD affects 376 airplanes of U.S. registry.

We estimate the following costs to comply with this proposed AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Inspections	Up to 25 work-hours × $85 per hour = $2,125 per inspection cycle.	$0	Up to $2,125 per inspection cycle.	Up to $799,000 per inspection cycle

We estimate the following costs to do any necessary repairs and replacements that would be required based on the results of the proposed inspections. We have no way of determining the number of aircraft that might need these replacements:

ON-CONDITION COSTS

Action	Labor cost	Parts cost	Cost per product
Fastener replacement	Up to 1 work-hour × $85 per hour = $85	Minimal	$85

We have received no definitive data that would enable us to provide cost estimates for the related investigative actions, certain repairs, and other applicable actions specified in this proposed AD.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, Section 106, describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701, ''General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We have determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that the proposed regulation:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979),

(3) Will not affect intrastate aviation in Alaska, and

(4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by removing Airworthiness Directive (AD) 2008–12–04, Amendment 39–15547 (73 FR 32991, June 11, 2008), and adding the following new AD:

The Boeing Company: Docket No. FAA–2016–9301; Directorate Identifier 2015–NM–193–AD.

(a) Comments Due Date

The FAA must receive comments on this AD action by January 6, 2017.

(b) Affected ADs

This AD replaces AD 2008–12–04, Amendment 39–15547 (73 FR 32991, June 11, 2008) (''AD 2008–12–04'').

(c) Applicability

This AD applies to The Boeing Company Model 737–600, –700, –700C, –800, and –900 series airplanes, certificated in any category, as identified in Boeing Alert Service Bulletin 737–53A1232, Revision 3, dated July 27, 2015.

(d) Subject

Air Transport Association (ATA) of America Code 53, Fuselage.

(e) Unsafe Condition

This AD was prompted by an evaluation by the design approval holder (DAH) that indicated that the upper skin panel at the chem-milled step above the lap joint is subject to widespread fatigue damage (WFD) if the modification was installed after 30,000 total flight cycles. We are issuing this AD to detect and correct cracking of the upper skin panel at the chem-milled step above the lap joint, which could result in reduced structural integrity of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Inspections at Locations Without the Preventive Modification, Time-limited Repair, or Permanent Repair Installed

At locations where a preventive modification, time-limited repair, or permanent repair has not been installed as specified in Boeing Service Bulletin 737–53A1232: At the applicable time specified in paragraph 1.E., ''Compliance,'' of Boeing Alert Service Bulletin 737–53A1232, Revision 3, dated July 27, 2015, do an external detailed inspection and an inspection specified in either paragraph (g)(1) or (g)(2) of this AD, for any crack in the fuselage skin at the chem-milled steps at specified locations, in accordance with Accomplishment Instructions of Boeing Alert Service Bulletin 737–53A1232, Revision 3, dated July 27, 2015. Do all applicable related investigative and corrective actions before further flight in accordance with the Accomplishment Instructions of Boeing Alert Service Bulletin 737–53A1232, Revision 3, dated July 27, 2015, except as required by paragraph (l)(1) of this AD. Repeat the inspections thereafter at the applicable time specified in paragraph 1.E., ''Compliance,'' of Boeing Alert Service Bulletin 737–53A1232, Revision 3, dated July 27, 2015.

(1) Do an external medium frequency eddy current (MFEC), or magneto optic imager (MOI), or C-Scan inspection.

(2) Do an external ultrasonic phased array (UTPA) inspection.

(h) Repetitive Post-Modification Inspections and Repair at Any Location With the Preventive Modification but No Time-Limited or Permanent Repair

At any location with a preventive modification installed as specified in Boeing Alert Service Bulletin 737–53A1232: At the applicable time specified in paragraph 1.E., ''Compliance,'' of Boeing Alert Service Bulletin 737–53A1232, Revision 3, dated July 27, 2015, except as required by paragraph (l)(2) of this AD, do the actions specified in paragraphs (h)(1) and (h)(2) of this AD.

(1) Do external detailed and external high frequency and medium frequency eddy current inspections for any crack, in accordance with Part 7 of the Accomplishment Instructions of Boeing Alert Service Bulletin 737–53A1232, Revision 3, dated July 27, 2015. If no crack is found during the inspection, repeat the inspections thereafter at the applicable time specified in paragraph 1.E., ''Compliance,'' of Boeing Alert Service Bulletin 737–53A1232, Revision 3, dated July 27, 2015. If any crack is found during any inspection required by this paragraph, repair before further flight, in accordance with the Accomplishment Instructions of Boeing Alert Service Bulletin 737–53A1232, Revision 3, dated July 27, 2015, except as required by paragraph (l)(1) of this AD.

(2) Do a detailed inspection for any crack and any loose or missing fasteners, in accordance with Part 7 of the Accomplishment Instructions of Boeing Alert Service Bulletin 737–53A1232, Revision 3, dated July 27, 2015. Repeat the inspections thereafter at applicable time specified in paragraph 1.E, ''Compliance,'' of Boeing Alert Service Bulletin 737–53A1232, Revision 3, dated July 27, 2015. If a crack is found during the inspection, or any loose or missing fastener is found, before further flight, do all applicable corrective actions, in accordance with Part V of the Accomplishment Instructions of Boeing Alert Service Bulletin 737–53A1232, Revision 3, dated July 27, 2015, except as specified in paragraph (l)(1) of this AD.

(i) Additional Actions for Modified Airplanes

(1) Except for preventive modifications installed on airplanes listed in Appendix A of Boeing Alert Service Bulletin 737–53A1232 at the specified total flight cycles, at any location where a preventive modification as specified in Boeing Alert Service Bulletin 737–53A1232 was installed after the accumulation of 30,000 total flight cycles: At the applicable time specified in paragraph 1.E., ''Compliance,'' of Boeing Alert Service Bulletin 737–53A1232, Revision 3, dated July 27, 2015, except as required by paragraph (l)(2) of this AD, do all applicable investigative and corrective actions using a method approved in accordance with the procedures specified in paragraph (p) of this AD.

(2) For airplanes which have installed supplemental type certificate (STC) ST01697SE (*http://rgl.faa.gov/Regulatory_and_Guidance_Library/rgstc.nsf/0/0812969a86af879b8625766400600105/$FILE/ST01697SE.pdf*) and the preventative modification has been installed after 15,000 total flight cycles: Before the accumulation of 25,000 total flight cycles, do all applicable investigative and corrective actions using a method approved in accordance with the procedures specified in paragraph (p) of this AD.

(j) Inspections and Repair at Locations With the Permanent Chem-Milled Step Repair Installed

At any location where a permanent repair has been installed as specified in Boeing Service Bulletin 737–53A1232: At the applicable time specified in paragraph 1.E., ''Compliance,'' of Boeing Alert Service Bulletin 737–53A1232, Revision 3, dated July 27, 2015: Do the inspections specified in paragraph (j)(1) or (j)(2) of this AD, in accordance with Accomplishment Instructions of Boeing Alert Service Bulletin 737–53A1232, Revision 3, dated July 27, 2015. Repeat the inspections thereafter at the applicable time specified in paragraph 1.E., ''Compliance,'' of Boeing Alert Service Bulletin 737–53A1232, Revision 3, dated July 27, 2015. Do all applicable related investigative and corrective actions before further flight in accordance with Boeing Alert Service Bulletin 737–53A1232, Revision 3, dated July 27, 2015, except as required by paragraph (l)(1) of this AD.

(1) Do an external low frequency eddy current (LFEC) inspection for any crack, and doubler external LFEC and external detailed inspections for any crack and loose or missing fasteners.

(2) Do an external LFEC inspection for any crack, and doubler external LFEC and external detailed inspections for any crack and loose or missing fasteners; and an internal MFEC for any crack.

(k) Inspection and Replacement at Locations With a Chem-Milled Time-Limited Repair Installed

At any location where a chem-milled time-limited repair is installed, do the actions specified in paragraphs (k)(1) and (k)(2) of this AD, at the applicable time specified in 1.E. ''Compliance,'' of Boeing Alert Service Bulletin 737–53A1232, Revision 3, dated July 27, 2015.

(1) Do internal and external detailed inspections of the time-limited repair for any crack, or loose or missing fasteners, in accordance with Part IV of the Accomplishment Instructions of Boeing Alert Service Bulletin 737–53A1232, Revision 3, dated July 27, 2015. Repeat the inspections thereafter at the applicable time specified in paragraph 1.E., ''Compliance,'' of Boeing Alert Service Bulletin 737–53A1232, Revision 3, dated July 27, 2015. If any crack is found during the inspection, or if any loose or missing fastener is found, before further flight, do all applicable corrective actions, in accordance with Part IV of the Accomplishment Instructions of Boeing Alert Service Bulletin 737–53A1232, Revision 3, dated July 27, 2015, except as specified in paragraph (l)(1) of this AD.

(2) Replace the time-limited repair with the permanent repair, in accordance with Part IV of the Accomplishment Instructions of Boeing Alert Service Bulletin 737–53A1232, Revision 3, dated July 27, 2015.

(l) Exceptions to Service Information Specifications

(1) Where Boeing Alert Service Bulletin 737–53A1232, Revision 3, dated July 27, 2015, specifies to contact Boeing for repair instructions, this AD requires repair before further flight using a method approved in accordance with the procedures specified in paragraph (p) of this AD.

(2) Where paragraph 1.E., ''Compliance,'' of Boeing Alert Service Bulletin 737–53A1232, Revision 3, dated July 27, 2015, specifies a compliance time ''after the date of Revision 2 of this service bulletin,'' this AD requires compliance within the specified compliance time after the effective date of this AD.

(m) Optional Terminating Action

(1) For airplanes that have accumulated 30,000 total flight cycles or fewer, or for airplanes on which supplemental type certificate (STC) ST0l697SE (*http://rgl.faa.gov/Regulatory_and_Guidance_Library/rgstc.nsf/0/0812969a86af879b8625766400600105/$FILE/ST01697SE.pdf*) was installed and have accumulated 15,000 total flight cycles or fewer, accomplishment of the preventive modification specified in Part V of Boeing Alert Service Bulletin 737–53A1232, Revision 3, dated July 27, 2015, terminates the inspections required by paragraph (g) of this AD in the modified areas only.

(2) Installation of a permanent repair as specified in Part III of Boeing Alert Service Bulletin 737–53A1232, Revision 3, dated July 27, 2015, or a time-limited repair as specified in Part IV of Boeing Alert Service Bulletin 737–53A1232, Revision 3, dated July 27, 2015, terminates the inspections required by paragraph (g) of this AD in the repaired areas only.

(n) Installation Limitations of Preventive Modification

As of the effective date of this AD, installation of the preventive modification specified in Boeing Alert Service Bulletin 737–53A1232, is prohibited on the airplanes identified in paragraphs (n)(1) and (n)(2) of this AD.

(1) Airplanes that have accumulated more than 30,000 total flight cycles.

(2) Airplanes which have installed STC ST01697SE and that have accumulated more than 15,000 total flight cycles.

(o) Credit for Previous Actions

This paragraph provides credit for the corresponding actions specified in paragraphs (g), (h), (i), (j), (k), and (m) of this AD, if those actions were performed before the effective date of this AD using the service information identified in paragraph (o)(1), (o)(2), or (o)(3) of this AD.

(1) Boeing Special Attention Service Bulletin 737–53A1232, dated April 2, 2007, which was incorporated by reference in AD 2008–12–04.

(2) Boeing Special Attention Service Bulletin 737–53A1232, Revision 1, dated May 18, 2012, which is not incorporated by reference in this AD.

(3) Boeing Special Attention Service Bulletin 737–53A1232, Revision 2, dated July 26, 2013, which is not incorporated by reference in this AD.

(p) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Seattle Aircraft Certification Office (ACO), FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the ACO, send it to the attention of the person identified in paragraph (q)(1) of this AD. Information may be emailed to: *9-ANM-Seattle-ACO-AMOC-Requests@faa.gov.*

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(3) An AMOC that provides an acceptable level of safety may be used for any repair, modification, or alteration required by this AD if it is approved by the Boeing Commercial Airplanes Organization Designation Authorization (ODA) that has been authorized by the Manager, Seattle ACO, to make those findings. To be approved, the repair method, modification deviation, or alteration deviation must meet

the certification basis of the airplane, and the approval must specifically refer to this AD.

(4) AMOCs approved previously for repairs or preventive modifications for AD 2008–12–04 are approved as AMOCs for the installation of the repair or preventive modification specified in this AD, provided all post-repair or post-modification inspections are done at the applicable times specified in the AMOC, or in tables 1a, 1b, 2, and 3 of paragraph 1.E., ''Compliance,'' of Boeing Alert Service Bulletin 737–53A1232, Revision 3, dated July 27, 2015, whichever occurs first.

(q) Related Information

(1) For more information about this AD, contact Gaetano Settineri, Aerospace Engineer, Airframe Branch, ANM–120S, FAA, Seattle ACO, 1601 Lind Avenue SW., Renton, WA 98057–3356; phone: 425–917–6577; fax: 425–917–6590; email: *Gaetano.Settineri@faa.gov.*

(2) For service information identified in this AD, contact Boeing Commercial Airplanes, Attention: Contractual & Data Services (C&DS), 2600 Westminster Blvd., MC 110–SK57, Seal Beach, CA 90740; telephone 562–797–1717; Internet *https://www.myboeingfleet.com.* You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221.

Issued in Renton, Washington, on October 25, 2016.

Dionne Palermo,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Docket No. FAA–2016–8164; Airspace Docket No. 15–ANM–25]

Proposed Establishment of Class E Airspace, Manti, UT

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action proposes to establish Class E airspace extending upward from 700 feet above the surface at Manti-Ephraim Airport, Manti, UT, to accommodate new Instrument Flight Rules (IFR) operations for standard instrument approach and departure procedures. The establishment of Class E airspace is necessary to support the safety and management of IFR operations at the airport.

DATES: Comments must be received on or before January 6, 2017.

ADDRESSES: Send comments on this proposal to the U.S. Department of Transportation, Docket Operations, 1200 New Jersey Avenue SE., West Building Ground Floor, Room W12–140, Washington, DC 20590; telephone: 1–800–647–5527, or (202) 366–9826. You must identify FAA Docket No. FAA–2016–8164; Airspace Docket No. 15–ANM–25, at the beginning of your comments. You may also submit comments through the Internet at *http://www.regulations.gov.*

FAA Order 7400.11A, Airspace Designations and Reporting Points, and subsequent amendments can be viewed online at *http://www.faa.gov/air_traffic/publications/.* For further information, you can contact the Airspace Policy Group, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone: 202–267–8783. The Order is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of FAA Order 7400.11A at NARA, call 202–741–6030, or go to *http://www.archives.gov/federal_register/code_of_federal-regulations/ibr_locations.html.*

FAA Order 7400.11, Airspace Designations and Reporting Points, is published yearly and effective on September 15.

FOR FURTHER INFORMATION CONTACT: Tom Clark, Federal Aviation Administration, Operations Support Group, Western Service Center, 1601 Lind Avenue SW., Renton, WA 98057; telephone (425) 203–4511.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part, A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would establish Class E airspace at Manti-Ephraim Airport, Manti, UT.

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments, as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal. Communications should identify both docket numbers and be submitted in triplicate to the address listed above. Persons wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: ''Comments to Docket No. FAA–2016–8164/Airspace Docket No. 15–ANM–25.'' The postcard will be date/time stamped and returned to the commenter.

All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in light of the comments received. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRMs

An electronic copy of this document may be downloaded through the Internet at *http://www.regulations.gov.* Recently published rulemaking documents can also be accessed through the FAA's Web page at *http://www.faa.gov/air_traffic/publications/airspace_amendments/.*

You may review the public docket containing the proposal, any comments received, and any final disposition in person in the Dockets Office (see the **ADDRESSES** section for the address and phone number) between 9:00 a.m. and 5:00 p.m., Monday through Friday, except federal holidays. An informal docket may also be examined during normal business hours at the Northwest Mountain Regional Office of the Federal Aviation Administration, Air Traffic Organization, Western Service Center, Operations Support Group, 1601 Lind Avenue SW., Renton, WA 98057.

Availability and Summary of Documents Proposed for Incorporation by Reference

This document proposes to amend FAA Order 7400.11A, Airspace

Designations and Reporting Points, dated August 3, 2016, and effective September 15, 2016. FAA Order 7400.11A is publicly available as listed in the **ADDRESSES** section of this document. FAA Order 7400.11A lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Proposal

The FAA is proposing an amendment to Title 14 Code of Federal Regulations (14 CFR) Part 71 by establishing Class E airspace extending upward from 700 feet above the surface at Manti-Ephraim Airport, Manti, UT. Class E airspace would be established within a 4-mile radius of the Manti-Ephraim Airport, with segments extending from the 4-mile radius to 11 miles southwest of the airport, and 7.2 miles northeast of the airport. This airspace is necessary to support the development of IFR operations in standard instrument approach and departure procedures at the airport.

Class E airspace designations are published in paragraph 6005 of FAA Order 7400.11A, dated August 3, 2016, and effective September 15, 2016, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designations listed in this document will be published subsequently in the Order.

Regulatory Notices and Analyses

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current, is non-controversial and unlikely to result in adverse or negative comments. It, therefore: (1) Is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant rule'' under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, would not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, ''Environmental Impacts: Policies and Procedures'' prior to any FAA final regulatory action.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order 7400.11A, Airspace Designations and Reporting Points, dated August 3, 2016, and effective September 15, 2016, is amended as follows:

Paragraph 6005: Class E Airspace Areas Extending Upward From 700 Feet or More Above the Surface of the Earth:

* * * * *

ANM UT E5 Manti, UT [New]

Manti-Ephraim Airport, Utah
(Lat. 39°19′53″ N., long. 111°36′45″ W.)

That airspace extending upward from 700 feet above the surface within a 4-mile radius of Manti-Ephraim Airport, and that airspace 2 miles either side of the airport 225° bearing extending from the 4-mile radius to 11 miles southwest of the airport, and 1.8 miles east of the line beginning at lat. 39°17′50″ N., long. 111°39′27″ W., to lat. 39°14′35″ N., long. 111°41′06″ W., and that airspace beginning at the point where the 065° bearing from the airport intersects the 4-mile radius to lat. 39°26′34″ N., long. 111°31′41″ W., to lat. 39°26′54″ N., long. 111°36′20″ W., to the point where the 001° bearing from the airport intersects the 4-mile radius, thence clockwise along the 4-mile radius to the point of beginning.

Issued in Seattle, Washington, on November 8, 2016.

Tracey Johnson,

Manager, Operations Support Group, Western Service Center.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This proposed rulemaking is promulgated under the authority described in Subtitle VII, Part, A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would establish Class E airspace at First Flight Airport, Kill Devil Hills, NC.

Comments Invited

Interested persons are invited to comment on this proposed rule by submitting such written data, views, or arguments, as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal.

Communications should identify both docket numbers and be submitted in triplicate to the address listed above. You may also submit comments through the Internet at *http://www.regulations.gov.*

Persons wishing the FAA to acknowledge receipt of their comments on this action must submit with those comments a self-addressed stamped postcard on which the following statement is made: ''Comments to Docket No. FAA–2016–9266; Airspace Docket No. 16–ASO–5.'' The postcard will be date/time stamped and returned to the commenter.

All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in light of the comments received. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRMs

An electronic copy of this document may be downloaded through the internet at *http://www.regulations.gov.* Recently published rulemaking documents can also be accessed through the FAA's Web page at *http://www.faa.gov/air_traffic/publications/airspace_amendments/.*

You may review the public docket containing the proposal, any comments received, and any final disposition in person in the Dockets Office (see the **ADDRESSES** section for address and phone number) between 9:00 a.m. and 5:00 p.m., Monday through Friday, except Federal Holidays. An informal docket may also be examined between 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal Holidays at the office of the Eastern Service Center, Federal Aviation Administration, Room 350, 1701 Columbia Avenue, College Park, Georgia 30337.

Availability and Summary of Documents for Incorporation by Reference

This document proposes to amend FAA Order 7400.11A, Airspace Designations and Reporting Points, dated August 3, 2016, and effective September 15, 2016. FAA Order 7400.11A is publicly available as listed in the **ADDRESSES** section of this document. FAA Order 7400.11A lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Proposal

The FAA is considering an amendment to Title 14, Code of Federal Regulations (14 CFR) part 71 to establish Class E airspace at Kill Devil Hills, NC, providing the controlled airspace required to support the new RNAV (GPS) standard instrument approach procedures for First Flight Airport. Controlled airspace extending upward from 700 feet above the surface within a 6.5-mile radius of the airport would be established for IFR operations.

Class E airspace designations are published in Paragraph 6005 of FAA Order 7400.11A, dated August 3, 2016, and effective September 15, 2016, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in the Order.

Regulatory Notices and Analyses

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) Is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant rule'' under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal would be subject to an environmental analysis in accordance with FAA Order 1050.1F, ''Environmental Impacts: Policies and Procedures'' prior to any FAA final regulatory action.

Lists of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order 7400.11A, Airspace Designations and Reporting Points, dated August 3, 2016, effective September 15, 2016, is amended as follows:

Paragraph 6005. Class E Airspace Areas Extending Upward From 700 Feet or More Above the Surface of the Earth.

* * * * *

ASO NC E5 Kill Devil Hills, NC [New]

First Flight Airport, NC

(Lat. 36°1′3″ N., long. 75°40′18″ W.)

That airspace extending upward from 700 feet above the surface within a 6.5-mile radius of First Flight Airport.

Issued in College Park, Georgia, on November 7, 2016.

27 CFR Part 24

[Docket No. TTB–2016–0010; Notice No. 164]

RIN 1513–AB61

Wine Treating Materials and Related Regulations

AGENCY: Alcohol and Tobacco Tax and Trade Bureau.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Alcohol and Tobacco Tax and Trade Bureau (TTB) is proposing to amend its regulations pertaining to the production of wine and in particular in regard to the permissible treatments that may be applied to wine and to juice from which wine is made. These proposed amendments are in response to requests from wine industry members to authorize certain wine treating materials and processes not currently authorized by TTB regulations. TTB invites comments on the proposed regulatory changes described in this document, as well as on other wine treatment issues for which regulatory amendments are not proposed in this document.

DATES: Comments must be received by January 23, 2017.

ADDRESSES: Please send your comments on this document to one of the following addresses:

- *https://www.regulations.gov* (via the online comment form for this document as posted within Docket No. TTB–2016–0010 at *Regulations.gov*, the Federal e-rulemaking portal);
- *U.S. Mail:* Director, Regulations and Rulings Division, Alcohol and Tobacco Tax and Trade Bureau, 1310 G Street NW., Box 12, Washington, DC 20005; or
- *Hand delivery/courier in lieu of mail:* Alcohol and Tobacco Tax and Trade Bureau, 1310 G Street NW., Suite 400, Washington, DC 20005.

See the Public Participation section of this document for specific instructions and requirements for submitting comments, and for information on how to request a public hearing or view or obtain copies of the petition and supporting materials.

FOR FURTHER INFORMATION CONTACT: Kara Fontaine, Regulations and Rulings Division, Alcohol and Tobacco Tax and Trade Bureau, 1310 G Street NW., Box 12, Washington, DC 20005; phone 202–453–1039, ext. 103.

SUPPLEMENTARY INFORMATION:

Background

TTB Authority

Chapter 51 of the Internal Revenue Code of 1986, as amended (IRC), 26 U.S.C. chapter 51, contains provisions concerning the taxation and production of distilled spirits, wines, and beer. The Alcohol and Tobacco Tax and Trade Bureau (TTB) has been delegated authority to promulgate regulations pertaining to wine under Chapter 51 of the IRC. The statutory provisions of the IRC related to the distilled spirits and wine regulations that TTB promulgates include, but are not limited to, the following:

- Section 5002(a)(4) of the IRC (26 U.S.C. 5002(a)(4)), which defines the term ''distiller,'' in pertinent part, as including any person who ''(A) produces distilled spirits from any source or substance'' or ''(C) by any process separates alcoholic spirits from any fermented substance * * *.''
- Section 5171(a) of the IRC (26 U.S.C. 5171(a)), which requires that operations ''as a distiller'' only be conducted on the bonded premises of a distilled spirits plant by a person who is qualified under subchapter B of chapter 51 of the IRC.
- Section 5373 of the IRC (26 U.S.C. 5373), which authorizes the promulgation of regulations regarding the type of wine spirits that may be used in wine production.
- Section 5381 of the IRC (26 U.S.C. 5381), which provides that natural wine is the product of the juice or must of sound, ripe grapes or other sound, ripe fruit, made with such cellar treatment as may be authorized under section 5382.
- Section 5382(a) of the IRC (26 U.S.C. 5382(a)), which provides that proper cellar treatment of natural wine constitutes those practices and procedures in the United States, of using various methods and materials to correct or stabilize the wine, or the fruit juice from which it is made, so as to produce a finished product acceptable in good commercial practice as prescribed by regulation. Section 5382(c) also authorizes the promulgation of regulations setting forth limitations on the preparation and use of methods and materials for clarifying, stabilizing, preserving, fermenting, and correcting wine and juice.
- Section 5387(a) of the IRC (26 U.S.C. 5387(a)), which authorizes the production of agricultural wine, classed as ''standard agricultural wine,'' from agricultural products other than the juice of fruit. Such agricultural wine must be made in accordance with good commercial practice as prescribed by regulation and may be cellar treated in accordance with sections 5382(a) and (c) of the IRC. Also, section 5387(b) prohibits the addition of wine spirits, coloring material or herbs, or other flavoring material (except hops in the case of honey wine) to agricultural wine, as well as the blending together of wines from different agricultural commodities.

The regulations promulgated under the IRC regarding the production of wine are set forth in part 24 of title 27 of the Code of Federal Regulations (27 CFR part 24) and include, but are not limited to, the following provisions:

- 27 CFR 24.10, which contains the definitions of certain terms used in 27 CFR part 24.
- 27 CFR 24.225, which sets forth rules under which proprietors of a bonded wine premises may withdraw and receive spirits without payment of tax from the bonded premises of a distilled spirits plant and add the spirits to natural wine on bonded wine premises.
- 27 CFR 24.246, which includes a table that lists the materials authorized for the treatment of wine and juice.
- 27 CFR 24.247, which includes a table that lists materials authorized for the treatment of distilling material.
- 27 CFR 24.248, which includes a table that lists processes authorized for the treatment of wine, juice, and distilling materials.

TTB administers chapter 51 of the IRC and its implementing regulations pursuant to section 1111(d) of the Homeland Security Act of 2002, as codified at 6 U.S.C. 531(d). The Secretary has delegated various authorities through Treasury Department Order 120–01, dated December 10, 2013 (superseding Treasury Order 120–01 dated January 24, 2003), to the TTB Administrator to perform the functions and duties in the administration and enforcement of these laws.

In addition, TTB consults with the U.S. Food and Drug Administration (FDA) on whether alcohol beverages are adulterated under the Federal Food, Drug, and Cosmetic Act (FD&C Act), including whether a substance added to an alcohol beverage is an unapproved food additive. Alcohol beverages are

considered ''food'' under the FD&C Act. A substance added to food is a food additive unless it is otherwise excluded from the definition of a food additive under the FD&C Act. For example, the use of a substance in food that is generally recognized as safe by qualified experts (GRAS) is excluded from the definition of a food additive under the FD&C Act. The use of a food additive in food must be authorized by FDA either through a food additive regulation or an effective food contact notification (FCN). FDA has listed certain GRAS uses in its regulations. In addition, FDA has a voluntary notification procedure by which any person may notify FDA of a conclusion that a use of a substance is GRAS. FDA evaluates whether the notice provides a sufficient basis for a GRAS conclusion (which results in a ''no questions'' response) or whether FDA believes there is an insufficient basis for a GRAS conclusion (which results in an ''insufficient basis'' response). For the purpose of this rulemaking, we use the term ''consistent with the food additive requirements under the FD&C Act'' to refer to: (1) Authorized food additive uses; (2) uses that are GRAS under FDA's regulations, that are the subject of a ''no questions'' letter from FDA in response to a GRAS notice, or that are subject to an opinion letter from FDA stating that the use is GRAS or otherwise permissible; or (3) uses that are otherwise excluded from regulation as a food additive.

Based on TTB's experience in administering the statutory and regulatory provisions mentioned above, TTB is proposing in this document a number of amendments to the TTB regulations and inviting comments from the public on these proposed regulatory changes. In addition, TTB is outlining in this document a number of other issues that are not the subject of proposed regulatory changes. TTB invites comments from the public on those issues to assist TTB in determining whether any of those issues warrant specific regulatory changes.

Terms Used in This Document

TTB is providing the following definitions to assist in the comprehension of this final rule. The definitions of agricultural wine, amelioration, brix, natural wine, standard wine, and wine spirits come from § 24.10, the definition of essences is derived from 27 CFR 24.85, and the definition of special natural wine is derived from 27 CFR 24.10 and 24.195. The definitions of ''natural wine'' and ''standard wine'' are consistent with statutory provisions at sections 5381 and 5392, respectively. The definitions of ''agricultural wine,'' ''amelioration,'' and ''special natural wine'' reflect language used in statutory provisions at sections 5387, 5383, and 5386, respectively. The definition of ''brix'' is derived, in part, from statutory provisions at sections 5382 and 5393. Definitions of industry member and yeast nutrients also are provided, although these terms are not specifically defined in statutory provisions or elsewhere in the regulations.

- *Agricultural wine:* Wine made from suitable agricultural products other than the juice of grapes, berries, or other fruits.
- *Amelioration:* The addition to juice or natural wine before, during, or after fermentation, of either water or pure dry sugar, or a combination of water and sugar to adjust the acid level.
- *Brix:* The quantity of dissolved solids expressed as grams of sucrose in 100 grams of solution at 68 degrees F (20 degrees C.) (Percent by weight of sugar). (The definition of ''Brix'' in § 24.10 incorrectly refers to 60 degrees F rather than 68, which is the equivalent of 20 degrees C; TTB is proposing to correct this typographical error in this document.)
- *Essences:* Preparations of natural constituents extracted from fruit, herbs, berries, etc.
- *Industry member:* For the purposes of this document, a proprietor of a bonded wine premises.
- *Natural wine:* The product of the juice or must of sound, ripe grapes or other sound, ripe fruit (including berries) made with any cellar treatment authorized by 27 CFR part 24, subparts F and L, and containing not more than 21 percent by weight (21 degrees Brix dealcoholized wine) of total solids.
- *Special natural wine:* A product produced from a base of natural wine (including heavy bodied blending wine) to which natural flavorings are added, and made pursuant to an approved formula in accordance with 27 CFR part 24, subpart H. In subpart H, § 24.195 additionally explains that, among other things, natural flavorings are added in quantities or proportions such that the resulting product derives character and flavor distinctive from the base wine and distinguishable from other natural wine.
- *Standard wine:* Natural wine, specially sweetened natural wine, special natural wine, and standard agricultural wine, produced in accordance with 27 CFR part 24, subparts F, H, and I.
- *Wine spirits:* Brandy or wine spirits authorized under 26 U.S.C. 5373 for use in wine production.
- *Yeast nutrients:* For the purposes of this document, vitamins and minerals that aid in the fermentation of juice to wine by acting as food for yeast.

TTB Administrative Approvals of Wine and Juice Treatments

Industry members who wish to experiment with, or commercially use, a treating material or process not specifically authorized in 27 CFR part 24 must file an application with TTB requesting authorization to use the new material or process. TTB may approve such requests as experiments under 27 CFR 24.249 or allow for the continual use of the new material or process under 27 CFR 24.250.

Standards regarding approval of the experimental use of a new treating material or process are set forth in § 24.249. The provisions covering applications for commercial use of a new material or process are contained in § 24.250. Consistent with §§ 24.246 and 24.248, TTB may approve the use of wine treating materials and processes that are determined to be acceptable in good commercial practice. In general, good commercial practice includes addressing the reasonable technological or practical need to enhance the keeping, stability, or other qualities of the wine, and achieving the winemaker's desired effect without creating an erroneous impression about the character and composition of the wine.

If TTB believes that it would be appropriate to approve the request, whether as an experiment under § 24.249 or for continued commercial use under § 24.250, it will send a letter to the industry member authorizing use of the material or process and setting forth the conditions for that use. Also, when TTB approves the continued commercial use of a wine treatment material or process under § 24.250, it will provide public notice of such approval on its Web site at *https://www.ttb.gov/wine/wine_treating_materials.shtml.* The listing of administrative approvals on the TTB Web site affords all industry members the opportunity to use an administratively approved wine treating material or process pending future rulemaking.

TTB conducts rulemaking to consider adding to or amending the materials and processes authorized in the regulations for treating wine, juice, and distilling material listed in §§ 24.246 through 24.248 for several reasons. First, when TTB administratively approves wine treatments for continued commercial use under § 24.250, TTB makes an initial determination that such material

or process is consistent with ''good commercial practice.'' Administrative approval provides a more expeditious process than rulemaking for industry members to obtain approval to use new materials and processes. On the other hand, the rulemaking process allows industry members and the public an opportunity to comment on, and specifically to confirm or refute, TTB's initial determination that the use of a material or process is consistent with good commercial practice. TTB believes that input from industry members, the users and potential users of these treatments commercially, should be obtained before making a final determination concerning the acceptability of the treatment in good commercial practice.

Similarly, TTB might not approve a request for administrative approval of a wine treatment because the Bureau is reluctant to approve the use of that particular wine treatment without input from industry members and the public concerning the treatment's acceptability in good commercial practice. After obtaining information and comments through rulemaking, TTB may determine that the wine treatment is consistent with good commercial practice and approve the use of such treatment. As discussed below, through this document, TTB is seeking comments on the approval of the use of several proposed treatments that have not been administratively approved by the Bureau.

In addition, administrative approval of a wine treatment under § 24.250 does not guarantee acceptance in foreign markets of any wine so treated, and conducting rulemaking and adding wine treating materials and processes to §§ 24.246 through 24.248 results in acceptance of the treated wines in certain foreign jurisdictions. For example, under Article 4.2 of the 2006 Agreement between the United States of America and the European Community on Trade in Wine (Wine Agreement), the United States and the European Union agreed not to restrict ''on the basis of either wine-making practices or product specifications, the importation, marketing or sale of wine originating in the territory of the other Party that is produced using wine-making practices that are authorized under laws, regulations and requirements of the other Party listed in Annex I and published or communicated to it by that other Party.'' Article 5.1 of the Wine Agreement also contains provisions to authorize new or modified wine-making practices if a party to the Wine Agreement provides public notice and specific notice to the other Party, and provides a reasonable opportunity for comment and to have those comments considered. For new wine treatments administratively approved in the United States, TTB provides such public notice and opportunity to comment through the regulatory rulemaking process.

TTB's most recent amendment of §§ 24.246 through 24.248 to reflect treating material and process approvals was published as Treasury Decision (T.D.) TTB–61 in the **Federal Register** (72 FR 51707) on September 11, 2007. Since that time, TTB has received and approved a number of applications for experimental or commercial uses. These include the 15 wine and juice treating materials and the combined use of two existing wine treatment processes, discussed below, on which TTB believes it has accumulated enough analytical data or other information to propose adding them to the list of approved materials and processes in the TTB regulations at §§ 24.246 and 24.248.

TTB is soliciting comments from all interested persons on TTB's position that, based on the information set forth below, the use of each of these materials or processes is consistent with good commercial practice.

Yeast Nutrients

Seven of the administrative approvals mentioned above authorize the use of additional yeast nutrients in the treatment of wine. TTB and its predecessor agencies have recognized the need to supply yeast with appropriate nutrients to facilitate healthy fermentation and to prevent ''stuck fermentation'' (fermentation that has halted before completion due to, among other things, high sugar levels or nutrient deficiencies). The following yeast nutrients are currently listed in § 24.246 as authorized wine and juice treating materials:

- Ammonium phosphate;
- Calcium pantothenate (for apple wine);
- Soy flour (defatted);
- Thiamine hydrochloride;
- Yeast, autolyzed; and
- Yeast, cell wall/membrane of autolyzed yeast.

In 2007, TTB received a petition from Gusmer Enterprises Inc. (Gusmer) to amend § 24.246 to allow the use of 19 vitamins and minerals as yeast nutrients in the production of wine. Gusmer provided the names, descriptions, functional roles for yeast metabolism, conditions of use, and suggested maximum amounts for the proposed vitamins and minerals. The petitioner also provided documentation on the regulatory status of the uses of 15 of the 19 proposed vitamins and minerals. Four materials identified by the petitioner, selenium, boron, molybdenum, and chromium, are not included in this proposal because no information was provided to demonstrate that their uses would be consistent with the food additive requirements under the FD&C Act.

Of the remaining 15 vitamins and minerals proposed as yeast nutrients for the production of wine by the petitioner, seven have been administratively approved by TTB for continued commercial use as yeast nutrients under § 24.250 in response to industry member requests which were received by TTB subsequent to TTB's receipt of the Gusmer petition. TTB is proposing, in this document, to amend the regulations to add six of these vitamins and minerals to the list of approved treating materials and expand the approved use of a seventh that already appears on the list. Specifically, TTB is proposing to add biotin, folic acid, inositol, magnesium sulfate, niacin, and pyridoxine hydrochloride to the list of authorized wine and juice treating materials in § 24.246, and to expand the current permitted use of calcium pantothenate in that section, as described later in this document.

For each of these seven yeast nutrients TTB is proposing to limit the amount of usage to the amounts provided in the Gusmer petition. While many of these yeast nutrients are vitamins that are authorized for use in food, in the recent past FDA has advised TTB that the fortification of ''alcoholic beverages'' with nutrients is not consistent with FDA's fortification policy in 21 CFR 104.20 or the Dietary Guidelines for Americans. In addition, FDA has informed TTB that FDA regulations for certain vitamins (*e.g.,* folic acid and inositol) would not authorize their use in alcohol beverages as nutrients. Nonetheless, FDA has stated to TTB that these vitamins could be used for the purpose of providing nutrients to the yeast, and not to fortify the wine, where the levels of the vitamin remaining in the wine would be of a de minimis level. For these reasons, TTB believes it is important to place limitations on the use of these substances that permit their use as nutrients for yeast growth but not as food additives for human consumption.

For reasons discussed below in the section titled ''Other Issues for Public Comment and Possible Regulatory Action,'' TTB is not proposing in this document to add the eight vitamins and minerals that TTB has not approved administratively under § 24.250 to the list of authorized wine and juice treating

materials in § 24.246. However, TTB is seeking comments on whether these eight additional vitamins and minerals should be approved as authorized wine treating materials.

Proposed Regulatory Amendments

Wine Treating Materials

General Comment on Yeast Nutrients

The six new yeast nutrients that TTB is proposing for the first time, based on the Gusmer petition described above, and the six yeast nutrients already authorized for use by regulation, as listed in § 24.246 (including calcium pantothenate), have been grouped together in the proposed § 24.246 table below under the heading ''Yeast nutrients.'' This format is similar to the one that currently exists for ''Enzymatic activity.'' TTB is also broadening the use of those yeast nutrients that are currently listed in § 24.246 to allow for their use in all juice and wine.

Blends and Other Combinations of Approved Treating Materials

TTB notes that, while the table in § 24.246 includes some references to approved materials used in combination (see, for example, the entry for potassium carbonate), there is no general statement to the effect that one or more approved materials may be used as a blend or otherwise in combination with another. TTB believes that such combined uses should be permitted, provided that the use of each material conforms to the conditions specified for that material (that is, the reason or purpose for its use and the references and limitations that apply to its use). TTB is proposing, in this document, to amend § 24.246 accordingly. This revision appears in proposed § 24.246(b), with the current § 24.246(b) moved to the proposed § 24.246(c).

Specific Wine Treating Materials

Acacia (gum arabic): TTB is proposing to authorize a maximum use rate of 8 pounds of acacia per 1,000 gallons (1.92 grams per Liter (g/L)) of wine in the list of authorized wine and juice treating materials in § 24.246. Acacia is currently listed in § 24.246 as an authorized treating material to clarify and stabilize wine, subject to a limitation that its use shall not exceed 2 pounds per 1,000 gallons (0.24 g/L) of wine. TTB has administratively approved several requests from industry members to use acacia to treat wine at levels exceeding the current maximum. The current limitation in § 24.246 was based on earlier evaluations of treated wine and was adopted through a public rulemaking procedure on September 24, 1984 (T.D. ATF–182, 49 FR 37522). Acacia also has a long record of use at the level prescribed in the regulation.

While the increased amounts specified in those requests ranged as high as 25 pounds of acacia per 1,000 gallons of wine, 16 pounds per 1,000 gallons was the highest level that TTB approved. In those reviews and approvals, TTB referenced FDA's regulation (21 CFR 184.1330) for the use of acacia at a rate greater than the amount listed in § 24.246, and TTB reviewed and considered relevant submitted data required under § 24.250(b). TTB notes that some of the requests to use higher amounts of acacia also requested approval for an additional purpose, that is, to improve ''mouthfeel''; however, TTB's authority under 26 U.S.C. 5382 to authorize wine treating materials only extends to correcting or stabilizing the wine or the fruit juice from which it is made. As reflected in its implementing regulations in § 24.246, TTB policy is to allow for wine treating materials that filter, clarify, or purify wine or juice as materials that correct or stabilize wine. Accordingly, TTB did not approve the use of acacia for the purpose of improving the ''mouthfeel'' of wine.

TTB's administrative approvals authorized the use of acacia in the treatment of wine at a level of 16 pounds per 1,000 gallons of wine, which is equivalent to a maximum usage level of 2 percent. Subsequent to those administrative approvals, TTB learned that although the FDA regulation cited for acacia gum in § 24.246 (§ 184.1330) is the correct citation, the beverage category listed in the table of FDA's regulation does not cover TTB's intended use in wine. This is because the FDA regulation further cites the food category definition in 21 CFR 170.3(n)(3), which does not cover use in wine. Accordingly, the correct category from the table in § 184.1330 is ''all other food categories.'' This category has a limit of one percent acacia gum (rather than 2 percent); the functional effects for this category match TTB's uses as clarifying and stabilizing wine. TTB is correcting this mistake in this rulemaking by proposing to increase the maximum use rate of acacia gum in wine to 8 pounds per 1,000 gallons of wine. TTB's earlier administrative approvals authorizing the use of acacia at levels greater than 8 pounds per 1,000 gallons of wine are revoked.

Bakers yeast mannoprotein: TTB is proposing to add bakers yeast mannoprotein, at a use rate of 50–400 milligram per liter (mg/L) of wine, to the list of approved wine and juice treating materials contained in § 24.246.

TTB administratively approved the use of bakers yeast mannoprotein to stabilize wine from the precipitation of potassium bitartrate crystals, in response to a number of requests from industry members. In response to GRAS Notice No. GRN 000284, the FDA stated that it had no questions regarding the notifier's conclusion that bakers yeast mannoprotein is GRAS for use as a stabilizing agent in wines at levels ranging from 50–400 milligrams per liter (mg/L), to prevent tartaric acid precipitation. In its administrative approval, TTB restricted the use of bakers yeast mannoprotein to 50–400 mg/L.

Beta-glucanase having an enzyme activity derived from Trichoderma harzianum: TTB is proposing to add beta-glucanase, at a use rate of 30 parts per million (ppm) of wine, to the list of approved wine and juice treating materials contained in § 24.246. TTB administratively approved the use of beta-glucanase having an enzyme activity derived from *Trichoderma harzianum.* Several industry members requested approval to treat wine with an enzymatic blend consisting of pectinase and beta-glucanase having an enzyme activity derived from *Trichoderma harzianum.* Pectinase is an approved wine treating material listed with carbohydrase in § 24.246. While beta-glucanase is also approved as a wine treating material listed with cellulose in § 24.246, that approval is limited to beta-glucanase having an enzyme activity derived from *Trichoderma longibrachiatum.* In response to GRAS Notice No. GRN 000149, FDA stated that it had no questions concerning the notifier's conclusion that the beta-glucanase enzyme preparation derived from *Trichoderma harzianum* is GRAS at the minimum levels necessary to achieve the desired effect, typically ranging from 1 to 3 grams per hectoliter of wine (10–30 ppm). In its administrative approval posted on *https://www.ttb.gov/wine/wine_treating_materials.shtml* in 2010, TTB inadvertently stated that the amount of beta-glucanase derived from *Trichoderma harzianum* used must not exceed 300 ppm. TTB is correcting this mistake in this rulemaking by aligning the proposed use rate with the rate stated in GRAS Notice No. GRN 000149. Accordingly, TTB is proposing to amend the table in § 24.246 by adding to the entry on ''Enzymatic activity: Cellulase (beta-glucanase)'' a second source, *Trichoderma harzianum,* stating that its use must not exceed 30 ppm, and by referencing GRAS Notice No.

GRN 000149. TTB is soliciting comments on this proposed addition, the limitation of 30 ppm, and also on whether beta-glucanase enzymatic activity derived from *Trichoderma longibrachiatum* is still relevant for wine treatments.

Biotin: TTB is proposing the addition of biotin to the list of authorized wine and juice treating materials in § 24.246 as a yeast nutrient at a use rate not to exceed 25 parts per billion (ppb). TTB administratively approved an industry member's request to use biotin as a yeast nutrient in the production of wine. FDA has stated to TTB in an informal opinion that biotin can be used for the purpose of providing nutrients to yeast, and not to fortify the wine, where the levels of biotin remaining in the wine would be of a de minimis level. The Gusmer petition proposed a maximum use rate for biotin of 25 ppb.

Calcium pantothenate (vitamin B5): TTB is proposing to amend § 24.246 to expand the current authorized use of calcium pantothenate from use as a yeast nutrient in just apple wine to use as a yeast nutrient in all wine. TTB administratively approved an industry member's request to use calcium pantothenate as a yeast nutrient in the production of wine. FDA has stated to TTB in an informal opinion that calcium pantothenate can be used for the purpose of providing nutrients to yeast, and not to fortify the wine, where the levels of calcium pantothenate remaining in the wine would be of a de minimis level. TTB's administrative approval restricted its use to that which is consistent with good commercial practice. TTB is proposing to apply the same use limit as is provided for the use of calcium pantothenate in apple wine, that is, a use rate of 0.1 pound of calcium pantothenate per 25,000 gallons (1.5 ppm), and to allow for the use of calcium pantothenate for all juice and wine by removing the current apple wine limitation specified in § 24.246.

Chitosan: TTB is proposing to add chitosan from *Aspergillus niger,* at a use rate not to exceed 10 grams per 100 liters of wine, to the list of approved wine and juice treating materials contained in § 24.246. TTB administratively approved several industry member requests to use chitosan from *Aspergillus niger* to remove spoilage organisms, such as Brettanomyces, from wine. In its response to GRAS Notice No. GRN 000397, FDA stated that it had no questions regarding the notifier's conclusion that chitosan from *Aspergillus niger* is GRAS for use as a secondary direct food ingredient in alcoholic beverage production at levels between 10 and 500 grams per hectoliter (100 liters). In its administrative approvals, TTB restricted the use of chitosan from *Aspergillus niger* to an amount not to exceed 10 grams per 100 liters of wine.

Folic acid: TTB is proposing to add folic acid to the list of authorized wine and juice treating materials in § 24.246 for use as a yeast nutrient at a use rate not to exceed 100 ppb. TTB administratively approved an industry member's request to use folic acid as a yeast nutrient in the production of wine. FDA has stated to TTB in an informal opinion, that folic acid can be used for the purpose of providing nutrients to the yeast, and not to fortify the wine, where the levels of folic acid remaining in the wine would be of a de minimis level. In TTB's administrative approval, TTB limited the use of folic acid to that which is consistent with good commercial practice and did not provide a specific use limit. The Gusmer petition proposed a maximum use rate of 100 ppb for folic acid when used as a yeast nutrient in the production of wine. Such a use rate will ensure that any folic acid remaining in the wine would be of a de minimis level.

Inositol (myo-inositol): TTB is proposing to add inositol to the list of authorized wine and juice treating materials in § 24.246 to be used as a yeast nutrient at a use rate not to exceed 2 ppm. TTB administratively approved an industry member's request to use inositol as a yeast nutrient in the production of wine. FDA has stated to TTB in an informal opinion that inositol could be used for the purpose of providing nutrients to the yeast, and not to fortify the wine, where the levels of inositol remaining in the wine would be of a de minimis level. In TTB's administrative approval, TTB restricted the use of inositol to that which is consistent with good commercial practice and did not provide a specific use limit. The Gusmer petition proposed a maximum use rate of 2 ppm for inositol when used as a yeast nutrient in the production of wine. The maximum use rate of 2 ppm will ensure that any inositol remaining in the wine would be of a de minimis level.

L(+) tartaric acid: TTB administratively approved several industry member requests to use L(+) tartaric acid, prepared using an enzyme from immobilized *Rhodococcus ruber* cells, to correct natural acid deficiencies and to reduce pH when ameliorating material is used in the production of grape wine. Tartaric acid is currently listed in § 24.246 as a material authorized for the treatment of wine and juice for these same purposes; however, the current reference in § 24.246 is to the FDA regulation at 21 CFR 184.1099, which specifies that tartaric acid with the L configuration is obtained as a byproduct of wine manufacturing.

In response to GRAS Notice No. GRN 000187 for L(+) tartaric acid (alternative method) prepared using an enzyme from immobilized *Rhodococcus ruber* cells, FDA stated that it had no questions regarding the notifiers' conclusion that the substance is GRAS for use as an alternative source of L(+) tartaric acid in food at levels not to exceed current good manufacturing practices for use as a firming agent, a flavor enhancer, a flavoring agent, a humectant, and a pH control agent, as described in 21 CFR 184.1099. The FDA also noted that the material is chemically identical to the tartaric acid affirmed as GRAS in 21 CFR 184.1099.

Based on the FDA response to the GRAS notice and TTB's analysis of wine treated with L(+) tartaric acid, TTB is proposing to amend the entry for "tartaric acid" in the table at the end of § 24.246 to indicate that "tartaric acid" may be manufactured by either the method specified in 21 CFR 184.1099 or the method specified in GRAS Notice No. GRN 000187, and to add the citation to the FDA GRAS notice in the "Specific limitation" column.

Magnesium sulfate: TTB is proposing to add magnesium sulfate to the list of authorized wine and juice treating materials in § 24.246 to be used as a yeast nutrient at a use rate not to exceed 15 ppm. TTB administratively approved an industry member's request to use magnesium sulfate as a yeast nutrient in the production of wine. FDA has stated to TTB in an informal opinion that magnesium sulfate can be used for the purpose of providing nutrients to yeast, and not to fortify the wine, where the levels of magnesium sulfate remaining in the wine would be of a de minimis level. In TTB's administrative approval, TTB restricted the use of magnesium sulfate as a yeast nutrient to that which is consistent with good commercial practice and did not provide a specific use limit. The Gusmer petition proposed a maximum use rate of 15 ppm for magnesium sulfate when used as a yeast nutrient in the production of wine.

Niacin (vitamin B3): TTB is proposing to add niacin to the list of authorized wine and juice treating materials in § 24.246 to be used as a yeast nutrient at a use rate not to exceed 1 ppm. TTB administratively approved an industry member's request to use niacin as a yeast nutrient in the production of wine. FDA has stated to TTB in an informal opinion that niacin can be used for the purpose of providing nutrients to yeast,

and not to fortify the wine, where the levels of niacin remaining in the wine would be of a de minimis level. In TTB's administrative approval, TTB restricted the use of niacin as a yeast nutrient to that which is consistent with good commercial practice and did not provide a specific use limit. The Gusmer petition proposed a maximum use rate of 1 ppm for niacin when used as a yeast nutrient in the production of wine.

Polyvinyl-pyrrolidone (PVP)/ polyvinylimadazole (PVI) polymer: In 2005, TTB began administratively approving industry member requests to use a polyvinyl-pyrrolidone (PVP) and polyvinylimadazole (PVI) copolymer (PVP/PVI) as a wine treating material to be used for clarifying and stabilizing alcohol beverages. PVP had once been listed as an authorized wine treating material in ATF regulations at 27 CFR 240.1051, Materials Authorized for Treatment of Wine. Specifically, it was authorized as a clarifying agent for wine. After a 1990 recodification of 27 CFR part 240, ATF rescinded its approval of PVP as a wine treating material because it was no longer in use by wine producers. See T.D. ATF–299 (55 FR 24974). However, in the past several years TTB has received a number of requests to use the PVP/PVI copolymer as an authorized wine treating material. The PVP/PVI copolymer binds heavy metal ions and sulfides present in juice and wine, after which the bound materials and the PVI/PVP can be removed from the liquid during filtration.

On July 5, 2003, FDA allowed BASF Corporation's Food Contact Substance (FCS) Notification for their PVP/PVI copolymer to become effective (FCN No. 320). Under section 409(h)(2)(C) of the FD&C Act (21 U.S.C. 348 (h)(2)(C)) a food contact notification (FCN) is only effective for the manufacturer or supplier identified in the notification. Persons who market a FCS based on an effective notification must be able to demonstrate that the notification is effective for their food contact substance. All persons who purchase a food contact substance manufactured or supplied by a manufacturer or supplier identified in an effective notification may rely on that notification to legally market or use the food contact substance for the use that is the subject of the notification, consistent with any limitations in that notification. According to FDA FCN No. 320, the blend ''is intended to be added directly to alcoholic beverages during the maturation process . . . is to be completely removed by filtration . . . and is limited to single use applications.'' The amount must not exceed 80 grams per 100 liters of wine.

Based on FDA FCN No. 320, TTB's experience with the use of sulfide and metal reducing matrix sheets (which contain PVI and are approved wine treating processes listed in § 24.248), and TTB's analysis of wine treated with the PVP/PVI copolymer, TTB is proposing to amend the table at the end of § 24.246 by adding the PVP/PVI copolymer as described by FDA FCN No. 320 for use at a level not to exceed 80 grams per 100 liters of wine to remove heavy metal ions and sulfides from wine.

Potato protein isolates: TTB is proposing to add potato protein isolates, at a use rate of 500 ppm or 50 grams per 100 liters (50 g/hL) of wine, as a fining agent, to the list of approved wine and juice treating materials contained in § 24.246. TTB administratively approved an industry member's request to use potato protein isolates as a fining agent for wine. In response to GRAS Notice No. GRN 000447, FDA stated that it had no questions regarding the notifier's conclusion that potato protein isolates are GRAS for various technical effects in a variety of foods that include alcoholic beverages at levels ranging from 0.01 to 15 percent. In its administrative approval, TTB restricted the use of potato protein isolates to an amount not to exceed 500 ppm or 50 g/hL of wine for the purpose of fining wine. The proposed limitation is consistent with that of other countries.

Pyridoxine hydrochloride (vitamin B6): TTB is proposing to add pyridoxine hydrochloride to the list of authorized wine and juice treating materials in § 24.246 to be used as a yeast nutrient at a use rate not to exceed 150 ppb. TTB administratively approved an industry member's request to use pyridoxine hydrochloride as a yeast nutrient in the production of wine. FDA has stated to TTB in an informal opinion that pyridoxine hydrochloride can be used for the purpose of providing nutrients to yeast, and not to fortify the wine, where the levels of pyridoxine hydrochloride remaining in the wine would be of a de minimis level. In its administrative approval, TTB restricted the use of pyridoxine hydrochloride as a yeast nutrient to that which is consistent with good commercial practice and did not provide a specific use limit. The Gusmer petition proposed a maximum use rate of 150 ppb for pyridoxine hydrochloride when used as a yeast nutrient in the production of wine.

Sodium carboxymethyl cellulose: TTB is proposing to add sodium carboxymethyl cellulose to the list of authorized wine and juice treating materials in § 24.246, to be used to stabilize wine from tartrate precipitation at a level not to exceed 0.8 percent of the wine. TTB administratively approved several industry member requests to use sodium carboxymethyl cellulose to stabilize wine by preventing tartrate precipitation. FDA regulations at 21 CFR 182.1745 state that sodium carboxymethyl cellulose is GRAS when used in accordance with good manufacturing practice. In TTB's administrative approval, TTB restricted the use of sodium carboxymethyl cellulose to stabilize wine by preventing tartrate precipitation to an amount not to exceed 0.8 percent of the wine.

Processes for the Treatment of Wine, Juice, and Distilling Material

TTB is proposing to amend the regulations in § 24.248, which set forth certain processes that TTB has approved as being consistent with good commercial practice for use by proprietors in the production, cellar treatment, or finishing of wine, juice, and distilling materials, within the limitations of that section. Please note that industry members are responsible for ensuring that any component used in an approved process, including materials in contact with wine or juice, is used in a way that is consistent with any applicable FDA regulations, including FDA food contact regulations.

Cross Flow Filtration

TTB is proposing to expand the authorized uses of nanofiltration and ultrafiltration in § 24.248 to include dealcoholization (reduction of the alcohol content). Currently, nanofiltration is authorized to reduce the level of volatile acidity in wine when used with ion exchange. Ultrafiltration is authorized for use to remove proteinaceous material from wine; to reduce harsh tannic material from white wine produced from white skinned grapes; to remove pink color from blanc de noir wine; and to separate red wine into high color and low color wine fractions for blending purposes. Ultrafiltration has also been administratively approved to separate red juice into low color and high color fractions. (The administrative approval for ultrafiltration is discussed later in this document.)

Both nanofiltration and ultrafiltration are capable of reducing alcohol content in wine, and this proposed liberalization will provide industry members with more tools to reduce the alcohol content of wine. However, as required with those processes for dealcoholization currently authorized in § 24.248 (reverse osmosis, osmotic

transport, and spinning cone column), ultrafiltration and nanofiltration, when used to reduce the alcohol content of wine, must take place on distilled spirits plant premises. TTB also is proposing to place nanofiltration, ultrafiltration, and reverse osmosis under the umbrella term ''cross flow filtration.'' In cross flow filtration, the wine is passed across the filter membrane (tangentially) at positive pressure relative to the permeate side. A proportion of the wine which is smaller than the membrane pore size passes through the membrane as permeate or filtrate; everything else is retained on the feed side of the membrane as retentate. TTB is adding this definition of ''cross flow filtration'' as a footnote to the table at the end of § 24.248.

Reverse Osmosis in Combination With Osmotic Transport

TTB administratively approved several requests to use reverse osmosis in combination with osmotic transport to reduce the ethyl alcohol content in wine. Reverse osmosis and osmotic transport are both separately listed in § 24.248 as approved wine treatment processes to reduce the ethyl alcohol content of wine. Under this combined process, the wine to be treated is separated by reverse osmosis into two portions called permeate and concentrate streams. The alcohol rich permeate is then degassed, warmed, and pumped along one side of a completely hydrophobic microporous osmotic transport membrane, which is used to separate out the alcohol. The dealcoholized permeate is then recombined with the wine from which it was extracted, thus lowering the alcohol content of the wine.

TTB is proposing to amend the table at the end of § 24.248 by revising the listings for reverse osmosis and osmotic transport to state that each process can be used in combination with the other to reduce the ethyl alcohol content of wine. These processes, whether used separately or in combination, must take place on distilled spirits plant premises.

Ultrafiltration

In two separate requests, an industry member requested to use ultrafiltration to separate red grape juice into high and low color fractions for blending purposes, and to separate white grape juice that had darkened due to oxidation during storage into high and low color fractions for blending purposes. As described above, ultrafiltration is authorized for use under § 24.248 to remove proteinaceous material from wine; to reduce harsh tannic material from white wine produced from white skinned grapes; to remove pink color from blanc de noir wine; and to separate red wine into low color and high color wine fractions for blending purposes. Since ultrafiltration is currently authorized under § 24.248 to separate red wine into low color and high color fractions for blending, TTB administratively approved use of ultrafiltration to separate red grape juice into low and high color fractions and is proposing to amend the table at the end of § 24.248 accordingly. TTB did not administratively approve the use of ultrafiltration to separate high and low colored fractions of discolored white grape juice, but as discussed under the heading ''Other Issues for Public Comment and Possible Regulatory Action'' in this document, invites comments on whether this practice constitutes good commercial practice.

Use of Wood To Treat Natural Wine

Section 24.246 currently authorizes the use of uncharred and untreated oak chips or particles to smooth wine. TTB's predecessor agency had a longstanding policy allowing the use of ''toasted'' wood as a wine treating material, and TTB has issued several private letter rulings allowing this use. In addition, wooden storage tanks used for the addition of spirits to wine may be used for the baking of wine under § 24.225.

TTB is proposing a new 27 CFR 24.185 to clarify TTB's policy on the treatment of wine with wood contact. Section 24.185(a) would clarify that natural wine may be treated by contact with any wood that is consistent with the food additive requirements under the FD&C Act and that wood may be toasted, but not charred. Toasted wood refers to wood that has been heated but has not undergone combustion (that is, hasn't been burned or blackened). TTB is authorizing the use of toasted wood in this proposal. Section 24.185(b) would state TTB's position on the use of wood essences and extracts in the production of wine.

TTB is also proposing to remove the last sentence from § 24.225 (''Wooden storage tanks used for the addition of spirits may be used for the baking of wine'') and include it in the new § 24.185, and to remove the reference to oak chips from § 24.246 and include it in new § 24.185, in an effort to maintain in one location all regulatory provisions pertaining to the treatment of wine with wood.

Wine Spirits/Revision of § 24.225

TTB is proposing to amend § 24.225 by removing the last sentence as described above, by revising the section heading, and by dividing the text into paragraph (a), covering withdrawal of spirits, paragraph (b), covering production and use of wine spirits, and paragraph (c), covering spirits other than wine spirits, and by otherwise revising the text, in order to accomplish the following:

- To incorporate the terms of section 5373(a) of the IRC related to standards for the production of wine spirits, including that portion of section 5373(a) that reads, ''where, in the production of natural wine or special natural wine, sugar has been used, the wine or the residuum thereof may not be used if the unfermented sugars therein have been refermented.'' The proposed text clarifies and simplifies this statutory language without changing the meaning or intent, which TTB believes is to prevent the production of wine spirits by refermenting wine to develop alcohol from sugar added to the wine after fermentation.
- To allow the use of lower-proof spirits in wine production in certain circumstances. Section 5373(a) of the IRC sets a general standard of 140 degrees of proof or above for wine spirits used in wine production but also provides for two exceptions to this rule: (1) Distillation may be at less than 140 degrees of proof if regulations so provide; and (2) commercial brandy aged in wood for not less than 2 years, and barreled at not less than 100 degrees of proof, is deemed to be wine spirits for purposes of section 5373(a). TTB believes that allowing the byproducts of alcohol reduction to be used as wine spirits if they are 100 degrees of proof or more is consistent with the intent of the statute. TTB notes that these alcohol reduction treatments, which are listed in § 24.248, must be performed at a qualified distilled spirits plant because they result in a spirits byproduct. Thus, when the wine subjected to alcohol reduction is natural wine or special natural wine (and is subject to the other conditions of section 5373(a) and § 24.225), the alcohol-containing byproduct would still constitute wine spirits even though the spirits may not have been distilled at or above 140 degrees of proof. Accordingly, TTB is proposing, in revised § 24.225, to allow spirits derived from authorized alcohol reduction treatments to be used as wine spirits if the spirits were distilled at 100 degrees of proof or more and if the spirits conform to the other terms of section 5373(a) as reflected in the revised regulatory text.
- To clarify the status of wine spirits derived from special natural wine. This source of spirits was codified in section 5373(a) of the IRC, which also authorized the Secretary of the Treasury

to impose conditions on the use of special natural wine to make wine spirits. TTB is proposing to specify in the revised text that wine spirits derived from special natural wine may only be used in the production of special natural wine when such wine spirits contain a distinctive flavor from the ingredients used in the originating special natural wine.

Within the proposed new paragraph (b) text, subparagraphs (1) through (3) primarily reflect the terms of section 5373(a) of the IRC that TTB believes should be reflected in the regulatory text as discussed above, and subparagraph (4) primarily reflects the existing § 24.225 text.

Accidental Water Additions

TTB is proposing to add a new 27 CFR 24.251, to provide for the correction of standard wine when the wine becomes other than standard wine due to accidental water additions in excess of the authorized levels provided for in 27 CFR part 24, subparts F and L. Accidental water additions can occur during production of wine at various stages, for example during filtration when water is accidentally left in a tank that is later filled with wine. TTB has received requests from industry members who wish to be allowed to take corrective action regarding these water additions. To correct wine that has been diluted with water is referred to within TTB as ''to salvage.''

The most common way to salvage wine is to remove the water accidentally added to the wine through the use of reverse osmosis, in combination with distillation. The reverse osmosis creates a colorless and flavorless permeate, essentially consisting of alcohol and water. The permeate is distilled to create a high ethanol fraction and a low ethanol fraction. The high ethanol fraction is returned to the wine and the low ethanol fraction is discarded. Through the use of reverse osmosis and distillation, the industry member removes the accidentally added water and raises the alcohol by volume of the wine back to its level before the accidental water addition, without affecting the vinous character of the wine.

TTB has approved the use of reverse osmosis and distillation to remove water from wine under TTB's authority in § 24.249. In those reviews, TTB considered how the accidental water addition occurred, the ratio of water to wine, and whether or not the requesting industry member has submitted similar requests in the past. TTB applied the following conditions to those approvals. The industry member must:

- Return the wine to its original condition;
- Transfer the wine to and from the distilled spirits plant for treatment in bond;
- Not remove more water than was accidentally added;
- Not alter the vinous character of the wine; and
- Keep the usual and customary records of the processing.

TTB believes that proprietors should have the authority to remove small amounts of accidentally added water from wine using reverse osmosis and distillation without first seeking TTB approval. Proposed § 24.251 sets forth authority and standards to allow for removal of accidental additions of water of not more than 10 percent of the original volume of the wine without the need to first seek TTB approval. Proposed § 24.251 also allows the appropriate TTB officer to approve other removals of accidentally added water upon application by a proprietor and sets forth the requirements for submitting an application to TTB. It also specifies that, in evaluating any request under this section, the appropriate TTB officer may consider as a factor whether the proprietor has demonstrated good commercial practices, taking into account the proprietor's prior history of accidental dilutions of water to wine and of compliance with other regulations in part 24.

TTB has also received requests to allow wine to be salvaged by blending the accidentally diluted wine with standard wine to reduce the level of unauthorized water addition to less than 1 percent of the volume of the blended wine. The requesters have asserted that, since § 24.246 provides that when a wine or juice treating material is used and water is added to facilitate the solution or dispersal of the material, the volume of water added may not exceed 1 percent of the juice or wine, reduction of the accidentally added water to less than 1 percent by blending wines meets the intent of the regulations. TTB has not approved these requests because the accidental addition of water renders the wine an ''other than standard'' wine, and such wine cannot be blended with standard wine. Also, TTB's authority to approve experimental or new wine treatments under §§ 24.249 and 24.250 does not extend to blending of wine, which is not a wine treatment or process. Additionally, wine diluted with water in excess of that permitted in part 24 renders the wine ''other than standard'' (see 27 CFR 24.218). Section 24.218 provides that other than standard wine must be segregated from standard wine, and accordingly the blending of standard and other than standard wine generally is not permitted under TTB's regulations.

While TTB has not previously approved these requests, TTB notes that current § 24.246 permits the addition to wine of a limited amount of water with a wine treating material without affecting the classification of the wine as a standard wine. Accordingly, TTB believes that the regulations should be changed to recognize that the accidental addition of water to a standard wine that represents 1 percent or less of the total volume of the wine does not render the wine other than standard. TTB also believes that blending wine should be permitted to reduce the accidentally added water to 1 percent or less of the total volume of the blended wine, and the resultant blended wine should be considered standard wine. Accordingly, TTB has incorporated these two provisions into a new section, proposed § 24.186, with a reference to a new § 24.251, regarding accidental additions of water to wine.

Other Proposed Regulatory Amendments

In addition to the changes discussed above, this document includes the following proposed regulatory amendments:

Definitions

As a consequence of the proposed changes to § 24.225(a), discussed above, TTB is proposing to revise the definition of ''wine spirits'' in § 24.10 to include a reference to that regulatory provision.

Wood Essences

TTB is proposing to amend § 24.85, which concerns essences, by adding the term ''wood'' as an additional example of a source material for essences used in the production of formula wine. (The TTB regulations at 27 CFR 24.10 define formula wine as special natural wine, agricultural wine, and other than standard wine (except for distilling material and vinegar stock) produced on bonded wine permises under an approval formula.) TTB believes that it is appropriate to add wood to this provision to reflect a longstanding policy that an extract of wood made using any solvent but wine should be treated as an essence or flavoring material.

List of Authorized Wine and Juice Treating Materials

TTB is proposing to amend the heading in paragraph (a) of § 24.246 to read ''Wine and juice'' rather than just ''Wine.'' This is a clarifying change. TTB is also proposing numerous

technical and clarifying changes to the table in § 24.246. A significant portion of these technical changes involves revising the measurement references specified for the limitation on use of the authorized wine treating materials by making the notation of units of measurement consistent throughout the chart, supplying closing parentheses where they were absent, and removing decimal points followed only by zeroes. In addition, where units are only in U.S. Common (English) units or SI (International Standard, or metric) units, TTB is adding the other unit of measure for reference purposes, where appropriate. Since the majority of the units are expressed in U.S. Common units first and then in SI units, TTB is proposing to continue with that convention. TTB is including a footnote reference after each use of ppm and ppb in the chart to indicate parts per million and parts per billion, respectively. TTB is also including a definition of the word ''stabilize'' at the end of the chart and footnoting every appearance of the word ''stabilize'' with a ''1'' in the table. TTB is also adding a third column to the table in § 24.246 titled ''FDA reference''. This new column contains references to relevant FDA regulations in title 21 of the CFR, FDA GRAS notifications, and FDA advisory opinions. These references have been moved to this new column wherever such a reference appears in the table. The ''FDA reference'' column provides a limit or reference where there is no ''Specific limit'' listed for a wine treating material.

FDA recently provided TTB with a new advisory opinion dated September 8, 2016, updating their acceptance of TTB's approval for certain materials as wine and juice treating materials. This new advisory opinion was necessary because in some cases, TTB's current listing of FDA's acceptance of the material as a wine treating material was not entirely accurate because those references were not specific to the use of wine. In other cases, references to old advisory opinions were subsequently revoked by FDA rulemaking. TTB is replacing the current FDA references in § 24.246 with an updated reference to an advisory opinion in which FDA stated ''We have evaluated the list of substances * * * along with their proposed limitations for use in wine and juice treatment and conclude that they are safe under the conditions of their intended use. We would not question a conclusion that these uses of substances added to wine would be generally recognized as safe (GRAS).'' Accordingly, TTB is updating the FDA reference for: Acetaldehyde, activated carbon, albumen (egg white), casein, potassium salt of casein, gelatin, potassium bi-tartrate, silica gel (colloidal silicon dioxide), and tannin.

FDA also provided TTB with an advisory opinion dated August 29, 2016, regarding the use of current and proposed yeast nutrients. With regard to current yeast nutrients, FDA indicated that the use of yeast nutrients as a treatment for wine is not listed in its regulations or GRAS notices. FDA did, however, state: ''We have evaluated the list of yeast nutrients * * * along with their proposed limitations for use prior to and during juice fermentations for wine production, taking into consideration: (1) Their likely consumption by yeasts and bacteria [is] likely to be largely consumed during fermentations and (2) their likely presence in finished wine products at levels that would not exceed those in unprocessed grape juice. We conclude that [the] increase in human dietary exposure to the substances resulting from their addition to wine juice is de minimis with respect to human nutrition, [and that] they are safe under the conditions of their intended use. Such levels would be far below any level that would result in a safety concern for any of these substances. Thus, we would not consider this very low level exposure to be significant and we would not question a conclusion that these uses of substances added to wine as yeast nutrients would be GRAS.'' Accordingly, TTB is updating the FDA reference for calcium panthothenate, soy flour, thiamine, yeast autolyzed, and yeast cell wall/membranes of autolyzed yeast.

Due to the large number of proposed changes to § 24.246, this document presents those changes as a revision of the entire section. Finally, TTB is proposing to make the following other changes to the current entries in the table:

- *Activated carbon:* One of the entries in the ''Materials and use'' column currently refers to removing color in wine and/or juice from which the wine was produced. TTB is proposing to refer instead to removing color from wine and/or juice, for clarity.
- *Albumen:* In the ''Specific limitation'' column, TTB is adding the words ''of brine'' in the second sentence after the word ''Usage'' and removing the words ''of solution.''
- *Ammonium phosphate (mono- and di basic):* TTB is revising the name of the material to include ''diammonium phosphate'' and including it on the list of yeast nutrients in the table in § 24.246. (TTB is also making a conforming change revising the name of the material in § 24.247.)
- *Calcium carbonate:* TTB is adding the abbreviation ''$CaCO_3$'' and, in the ''Materials and use'' column, TTB is replacing the word ''and'' with the word ''or'' in the first use entry and replacing the word ''A'' with the words ''As a'' in the second use entry.
- *Casein, potassium salt of casein:* In the ''Specific limitation'' column, TTB is referring only to the citation ''27 CFR 24.243'' and removing references to FDA's GRAS opinions.
- *Citric acid:* In the ''Materials and use'' column, TTB is adding the words ''certain juice or'' after the word ''in'' in the first use entry. The limitations on what types of juice or wine may be treated with citric acid may be found in the regulations cited in the ''Specific limitation'' column.
- *Copper sulfate:* In the ''Specific limitation'' column, TTB is removing the word ''added'' after the word ''sulfate'' and adding the words ''added to wine'' after the first parenthetical.
- *Dimethyl dicarbonate:* For purposes of clarity, TTB is adding the abbreviation ''(DMDC)'' after the material name ''Dimethyl dicarbonate'' and removing the phrases ''dealcoholized wine,'' and ''low alcohol wine,'' from the entry to reduce redundancy.
- *Ferrocyanide:* TTB believes that ferrocyanide compounds are no longer available on the United States market and no longer being used by the U.S. wine industry. Accordingly, TTB is removing ''ferrocyanide'' from the list of authorized wine treating materials.
- *Milk products:* With the publication of T.D. ATF–350 (58 FR 52222) in the **Federal Register** on October 7, 1993, ATF approved the use of milk products as a fining agent in white grape wine or sherry. With the publication of T.D. TTB–17 (69 FR 67639) in the **Federal Register** on November 19, 2004, TTB extended this approval to all wines. The listing in § 24.246 for the use of milk products, revised in 2004, reads, ''Fining agent for grape wine or sherry.'' TTB believes this phrase may cause confusion because under the standards of identity in § 4.21(a) sherry is a grape wine. Accordingly, TTB is amending the first listed use in the ''Materials and use'' column for this entry to read: ''Fining agent for grape wine.''
- *Oxygen and compressed air:* In the ''Materials and use'' column, TTB is replacing the words ''May be used in juice and wine'' with the words ''Various uses in juice and wine.''
- *Polyvinyl-polypry-rolidone (PVPP):* In the ''Materials and use'' column, TTB is making a technical change by

removing the phrase ''black wine.'' In the ''Specific limitation'' column, TTB is replacing the two asterisk footnote references with a reference to footnote ''3'' after the abbreviation ''AOAC.''

- *Sorbic acid and potassium salt of sorbic acid:* In the ''Materials and use'' column, TTB is adding the words ''potassium sorbate'' in parentheses before the colon.
- *Sulfur dioxide:* Sulfur dioxide was added to the list of approved materials with the issuance of T.D. Internal Revenue Service (IRS)–6475 (25 FR 6184) in 1960. At that time, the stated use of sulfur dioxide was to sterilize and preserve wine. The list of authorized treating materials in 1960 was codified in 26 CFR 240.1051 and was titled ''Materials authorized for treatment of wine.''

Through the publication of T.D. ATF–182 (49 FR 37510) in 1984, ATF retitled the list of authorized wine treating materials as ''Materials authorized for treatment of wine and juice.'' In T.D. ATF–182, the comment discussion refers to the use of sulfur dioxide in wine as ''necessary, common to, and historically documented in winemaking,'' and it is further referred to in the use of juice for purposes of winemaking twice on page 37513, under the subheading Antimicrobial Agents. Sulfur dioxide is GRAS in the FDA regulations at 21 CFR 182.3862 as a chemical preservative. Section 182.3862 states that sulfur dioxide cannot be applied to fruit that is intended to be served or sold raw to consumers. Juice to be used in the production of wine is not fruit to be served or sold raw to consumers; thus, the use of sulfur dioxide in juice that will be used in the production of wine is GRAS. Further, 27 CFR 24.176 authorizes the use of sterilizing agents in juice. Accordingly, TTB is correcting the entry for sulfur dioxide to include its use in juice.

- *Thiamine hydrochloride:* As noted above, the yeast nutrient Thiamine hydrochloride will be re-organized and grouped under the heading, ''Yeast nutrients'' with the other yeast nutrients.
- *Shall vs. must:* Finally, to promote the use of plain language, TTB is also proposing to change ''shall'' to ''must'' wherever the former appears in the affected regulations.

TTB is proposing to amend § 24.250(a)(4) to require that an industry member must provide documentary evidence from the FDA showing that the proposed material is consistent with the food additive requirements under the FD&C Act for its intended purpose in the amounts proposed for the particular treatment contemplated. This differs from the original text in that it is not requiring documentary evidence that the FDA has ''approved'' the use of the proposed material. This editorial change is consistent with similar changes in §§ 24.246 and 24.248.

Other Issues for Public Comment and Possible Regulatory Action

In addition to the comments TTB is soliciting on the proposed regulatory changes contained in this document, as discussed above, TTB is inviting public comments on a number of other regulatory issues to assist TTB in determining whether it would be appropriate to incorporate additional changes to part 24 in a final rule. Most of these issues were raised in petitions for rulemaking or arose in connection with wine treatment approval requests under §§ 24.249 or 24.250, and in each case, TTB determined that more information would be required before a decision could be taken on whether, and if so how, appropriate regulatory changes should be proposed. The issues in question, and the specific points on which TTB is requesting public comments, are outlined below.

TTB requests comments and, where appropriate, evidence supporting the position that the particular wine treatment is consistent with good commercial practice. If applicable, use rates should be recommended, and the rationale as to why those use rates are recommended should be stated in any comments.

Alcoholic Oak Extract

In 2008, Oak Tannin Technologies submitted a petition to amend the regulations to allow ''alcoholic oak extracts for use in natural wines as a stabilizing, enriching and integrating agent.'' The petitioner stated that use of such extracts in wine is approved by the South African Wine and Spirit Board. However, TTB understands that South Africa passed legislation that actually prohibits the use of such extracts in natural wines. In addition, TTB and its predecessor agencies' longstanding policy has been to treat such materials as essences or extracts, which, under § 24.85, may be used only in the production of formula wines except agricultural wine.

As noted earlier in this document, TTB approves the use of wine treating materials for, among other things, the stabilization, clarification, and filtration of natural wine based on the materials' acceptance in good commercial practice. In order to assist TTB in determining whether it would be appropriate to propose a specific regulatory change in response to this petition, TTB is inviting comments regarding the use of an alcoholic oak extract in the production of natural wines, in particular, as a material for use as a wine stabilizer, but also for any other purpose that is consistent with good commercial practice. TTB also advises that a manufacturer of alcoholic oak extract must contact FDA and go through the FDA pre-market review processes.

Lactic Acid

In 2007, Hyman, Philips, & McNamara, P.C. petitioned TTB to amend 27 CFR 24.182 and 24.246 to allow use of lactic acid in juice, must, and wine prior to fermentation. Lactic acid is most commonly found in dairy products and is a common component in both plant and animal metabolic processes. Under § 24.246, lactic acid is currently authorized for use in grape wine to correct natural acid deficiencies. In the table in § 24.246, the entry in the ''Reference or limitation'' column for lactic acid simply provides a citation to 27 CFR 24.182 and 24.192. Section 24.192 then refers back to the limitations on the use of acid, among other things, prescribed in § 24.182. The regulations in § 24.182 state that acids of the kinds occurring in grapes or other fruit (including berries) may be added within the limitations of § 24.246 to juice or wine in order to correct natural deficiencies. Section 24.182 also states that, after fermentation is completed, citric acid, fumaric acid, malic acid, lactic acid, or tartaric acid, or a combination of two or more of these acids, may be added to correct natural deficiencies. The petitioner noted that lactic acid is currently allowed by § 24.246 for treatment of wine after fermentation and provided evidence that lactic acid may be added before fermentation in certain other countries. Further, the petitioner noted that lactic acid is less expensive and more reliably available than tartaric acid.

TTB is not proposing any changes to the regulations concerning the use of lactic acid in this document; however, TTB invites comments regarding whether or not the use of lactic acid prior to fermentation is good commercial practice in the production of natural wine. Comments should address whether or not lactic acid should be authorized for use prior to the fermentation of natural wine and provide detailed evidence supporting the stated position.

Reverse Osmosis To Enhance the Phenol Flavor and Characteristics of Wine and To Reduce the Water Content of Standard Wine

Section 24.248 currently provides for the use of reverse osmosis to reduce the ethyl alcohol content of wine and to remove off flavors in wine. However, in 2014, Constellation Wines U.S. Inc. submitted a petition to TTB requesting an expansion of the authorized uses of reverse osmosis in § 24.248 to include (1) improving the phenol and flavor character of wine, and (2) reducing the water content in standard wine. The petition included the following arguments in support of this change:

- Reverse osmosis can effectively eliminate the weak and watery character of the retentate (which, as a product of the reverse osmosis process, is considered to be standard wine but with reduced levels of alcohol and water), resulting in a wine with improved phenol and flavor characteristics.
- The present situation puts U.S. winemakers at a competitive disadvantage in the global marketplace in two ways. First, the petitioner asserts that many foreign countries permit the use of reverse osmosis as an acceptable winemaking practice to concentrate phenols and flavors in wine and in grape must. Exported U.S. wines, which cannot be produced in this way under the current regulations, would not reflect these characteristics in those foreign markets. Second, under the terms of section 5382 of the IRC, most imported wines that were subjected to such a process would be allowed to compete in the U.S. market against domestic wines to which that process may not be applied.
- Reverse osmosis benefits grape growers, winemakers, and consumers. The expanded use of reverse osmosis would allow grape growers to sell more grapes, particularly those of marginal quality, to winemakers who could produce better quality standard wine with such grapes. Winemakers would be able to produce better quality wine at lower costs, and consumers would be able to purchase better quality wine at lower prices.
- The expanded use of reverse osmosis would provide winemakers with better ability to regulate the alcohol content of wines.

TTB notes that the byproduct of reverse osmosis (the retentate) is only considered to be standard wine if the wine that was processed with reverse osmosis was standard wine. TTB understands that the European Union (EU) only authorizes the use of reverse osmosis to remove water from wine in cold and wet regions and that wine produced with the use of reverse osmosis in the EU must be labeled as ''table wine.'' TTB's counterparts in Australia indicate that while authorized, reverse osmosis is not a process officially recognized in the Australia New Zealand Food Standards Code, and is not used frequently. TTB understands that South Africa authorizes the use of reverse osmosis on juice but not wine.

TTB has not received other requests from industry members to use reverse osmosis to improve the phenol and flavor character of wine. However, TTB did receive a request to use reverse osmosis to improve the ''sensory quality'' of finished wines and to evaluate the potential sensory benefit of water content reduction compared to the resultant loss of volume.

TTB has received and approved industry member requests to use reverse osmosis in combination with distillation to reduce the water content of wine only for the purpose of salvage, discussed above, rather than as a winemaking process to improve the character of the wine. In salvage, the removal of water returns the wine to its previous condition and, as a condition of approval, TTB strictly limited the amount of water to be removed to no more than the amount that had been accidentally added to the wine.

TTB believes that it should provide the public the opportunity to comment before it makes a decision on whether the removal of water from wine to improve the characteristics of the wine would be acceptable in good commercial practice. To assist TTB in deciding whether to adopt any specific regulatory change in this regard, TTB is inviting comments on whether the use of reverse osmosis to reduce the water content of wine, improve the phenol and flavor character of wine, or to improve the sensory quality of the wine would be acceptable in good commercial practice.

If you believe that the use of reverse osmosis for these purposes is consistent with good commercial practice, your comments should explain your position in detail, as well as provide guidelines/standards concerning how much water (maximum percentage) may be removed. If you believe that the use of reverse osmosis for these purposes is not consistent with good commercial practice, your comments should explain your position in detail.

Ultrafiltration

As previously discussed, an industry member requested to use ultrafiltration to separate white grape juice that had darkened due to oxidation during storage into high and low color fractions for blending purposes. The low color fraction would be blended with white wine, and the high color fraction would be blended with red wine. Ultrafiltration is authorized for use under § 24.248 to separate red wine into low color and high color wine fractions for blending purposes; but the regulations do not provide for the use of ultrafiltration to separate white wine.

TTB believes it should provide the public with the opportunity to comment before it makes a decision on whether the use of ultrafiltration to separate discolored wine for blending as described above would be acceptable in good commercial practice. If you wish to submit a comment on this matter, your comment should explain in detail your position as to why the use of ultrafiltration in this manner is or is not acceptable in good commercial practice.

Yeast Nutrients (Gusmer Petition)

The following list of vitamins and minerals were proposed in the Gusmer petition as yeast nutrients in the production of wine but have not been administratively approved by TTB pursuant to § 24.250: Cobalamin (vitamin B12), iodine (potassium iodide), iron, manganese sulfate, nickel, potassium chloride, riboflavin (Vitamin B2), and zinc sulfate. With the exception of riboflavin, TTB has not received requests under §§ 24.249 or 24.250 to use these vitamins and minerals as yeast nutrients in the production of wine. TTB did not administratively approve the use of riboflavin as a yeast nutrient because the evidence submitted with the request was not sufficient to conclude that the use of riboflavin as a yeast nutrient is consistent with good commercial practice. Gusmer provided information on the FDA regulatory status, functional roles, and use rates for the following vitamins and minerals as yeast nutrients. TTB is interested in receiving comments supporting or rejecting the argument that the use of these vitamins and minerals as yeast nutrients in the production of wine is consistent with good commercial practice. Unless otherwise noted, the information that follows was supplied by Gusmer.

- *Cobalamin (vitamin B12):* Cobalamin is used to promote growth of yeast, and Gusmer proposed that cobalamin be used at a rate not to exceed 15 ppb.
- *Iodine (potassium iodide):* Iodine is required for yeast growth and fermentation, and Gusmer proposed that iodine be used at a rate not to exceed 10 ppb.

• *Iron:* Iron is a catalyst for oxidation reactions, and Gusmer proposed that iron be used at a rate not to exceed 2 ppm.

• *Manganese sulfate:* Manganese sulfate is a pale pink, odorless powder that is freely soluble in water and insoluble in alcohol. Gusmer proposed that manganese sulfate be used at a rate not to exceed 100 ppb.

• *Nickel:* Nickel is a catalyst for hydrogenation, and Gusmer proposed that nickel be used at a rate not to exceed 5 ppm.

• *Potassium chloride:* Potassium chloride is a salt that disassociates into ions that are necessary for phosphate uptake by yeast. Gusmer proposed that potassium chloride be used at a rate not to exceed 100 ppm.

• *Riboflavin (vitamin B2):* Riboflavin is used as a coenzyme in oxidation/reduction reactions, and Gusmer proposed riboflavin be used at a rate not to exceed 600 ppb.

• *Zinc sulfate:* Zinc sulfate increases alcohol tolerance, and Gusmer proposed zinc sulfate be used at a rate not to exceed 1.5 ppm.

Public Participation

Comments Sought

TTB requests comments from the public and all interested parties. TTB is particularly interested in comments that address the question of whether a particular material, process, or practice addressed in this document is consistent with good commercial practice. Please support your comment with specific information about the material, process, or practice in question.

After TTB analyzes any comments received in response to the regulatory amendments TTB has proposed in this document, we plan to issue a final rule. If TTB receives comments and evidence that persuade it that the use of a particular wine treating material or process is not consistent with good commercial practice, TTB will not include it in the final rule. As a result, and as stated in previously issued administrative approvals, if TTB has determined that the use of a wine or juice treating material or process is not consistent with good commercial practice, previous approvals of that wine or juice treating material or process will be rescinded by operation of law on the effective date of the final rule.

Additionally, if TTB has determined that the authorized amount of a wine or juice treating material should be decreased because its current authorized amount is not consistent with good commercial practice, previous approvals authorizing the higher amount of that wine or juice treating material will be rescinded on the effective date of the final rule. Wines produced using treatments pursuant to an administrative approval that has been rescinded based upon this rulemaking may nevertheless be labeled as if the materials or processes were authorized, provided such treatments were used prior to the date of rescission.

Submitting Comments

You may submit comments on the proposals described in this document by using one of the following three methods:

• *Federal e-Rulemaking Portal:* You may send comments via the online comment form linked to this document in Docket No. TTB–2016–0010 on ''*Regulations.gov*,'' the Federal e-rulemaking portal, at *https://www.regulations.gov.* Direct links to the comment form and docket are available under Notice No. 164 on the TTB Web site at *https://www.ttb.gov/wine/wine-rulemaking.shtml.* Supplemental files may be attached to comments submitted via *Regulations.gov.* For information on how to use *Regulations.gov*, click on the site's Help tab.

• *U.S. Mail:* You may send comments via postal mail to the Director, Regulations and Rulings Division, Alcohol and Tobacco Tax and Trade Bureau, 1310 G Street NW., Box 12, Washington, DC 20005.

• *Hand Delivery/Courier:* You may hand-carry your comments or have them hand-carried to the Alcohol and Tobacco Tax and Trade Bureau, 1310 G Street NW., Suite 400, Washington, DC 20005.

Please submit your comments by the closing date shown above in this document. Your comments must reference Notice No. 164 and include your name and mailing address. Your comments also must be made in English, be legible, and be written in language acceptable for public disclosure. TTB does not acknowledge receipt of comments, and TTB considers all comments as originals.

In your comment, please clearly state if you are commenting for yourself or on behalf of an association, business, or other entity. If you are commenting on behalf of an entity, your comment must include the entity's name, as well as your name and position title. If you comment via *Regulations.gov*, please enter the entity's name in the ''Organization'' blank of the online comment form. If you comment via postal mail or hand delivery/courier, please submit your entity's comment on letterhead.

You may also write to the Administrator before the comment closing date to ask for a public hearing. The Administrator reserves the right to determine whether to hold a public hearing.

Confidentiality

All submitted comments and attachments are part of the public record and subject to disclosure. Do not enclose any material in your comments that you consider to be confidential or that is inappropriate for public disclosure.

Public Disclosure

On the Federal e-rulemaking portal, *Regulations.gov*, TTB will post, and the public may view, copies of this document, selected supporting materials, and any electronic or mailed comments TTB receives about this proposal. A direct link to the *Regulations.gov* docket containing this document and the posted comments on it is available on the TTB Web site at *https://www.ttb.gov/wine/wine-rulemaking.shtml* under Notice No. 164. You may also reach the docket containing this document and the posted comments received on it through the *Regulations.gov* search page at *https://www.regulations.gov.*

All posted comments will display the commenter's name, organization (if any), city, and State, and, in the case of mailed comments, all address information, including email addresses. TTB may omit voluminous attachments or material that TTB considers unsuitable for posting.

You and other members of the public may view copies of this document, all supporting materials, and any electronic or mailed comments TTB receives about these proposals by appointment at the TTB Information Resource Center, 1310 G Street NW., Washington, DC 20005. You may also obtain copies at 20 cents per 8.5- x 11-inch page. Contact TTB's information specialist at the above address or by telephone at 202–453–2270 to schedule an appointment or to request copies of comments or other materials.

Regulatory Flexibility Act

Pursuant to the requirements of the Regulatory Flexibility Act (5 U.S.C. chapter 6), TTB certifies that these proposed regulations, if adopted, would not have a significant economic impact on a substantial number of small entities. This proposed rule provides for the voluntary use of additional wine and juice treating materials and

processes in the production of wine. This authorization does not impose any required change to current winemaking practices, nor does it impose additional compliance burden on small businesses. TTB authorizes new wine treating materials and processes by evaluating proprietors' requests to experiment with such materials and processes, such requests being made via letterhead application to TTB. This rule, if adopted, would allow for certain treatments, under limited circumstances, without the submission of a letterhead application to TTB. TTB estimates that the proposed regulation will reduce the number of respondents by approximately 10 applicants per year, thus slightly reducing the overall burden of the information collection.

In addition, TTB currently requires wineries to maintain usual and customary business records. Included in these records are those records that evidence the details and results of experiments approved by TTB under § 24.249. This recordkeeping requirement remains unchanged by this proposal as wineries subject to this part still will be required to maintain those usual and customary records. This proposal has a neutral effect on the current recordkeeping requirements.

Because this proposed rule will not have a significant economic impact on a substantial number of small entities no regulatory flexibility analysis is required. Pursuant to 26 U.S.C. 7805(f), TTB will submit the proposed regulations to the Chief Counsel for Advocacy of the Small Business Administration for comment on the impact of the proposed regulations on small businesses.

Paperwork Reduction Act

Two collections of information approved by the Office of Management and Budget (OMB) would be affected by the adoption of the proposed regulatory changes described in this document. These collections of information, approved in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3507), are assigned control numbers 1513–0057, titled ''Letterhead Applications and Notices Relating to Wine (TTB REC 5120/2),'' and 1513–0115, titled ''Usual and Customary Business Records Relating to Wine (TTB REC 5120/1).'' An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid control number assigned by OMB.

OMB Control Number 1513–0057

TTB authorizes new wine treating materials and processes by evaluating proprietors' requests to experiment with such materials and processes under § 24.249. Section 24.249 states, in part, that such requests must be made in the form of an application filed with TTB. Under this authorization, TTB has approved proprietors' requests to take corrective action when water has been accidentally added to wine in amounts exceeding those authorized for the production of standard wine under 27 CFR part 24. In this notice, TTB is proposing to add a new § 24.251 to provide for the correction of accidentally diluted wine under certain circumstances without the submission of a letterhead application to TTB. TTB estimates that the proposed regulation will reduce the number of respondents by approximately 10 applicants per year and, therefore, will slightly reduce the information collection's overall burden.

TTB estimates that, as a result of the proposed amendments, the new annual burden for control number 1513–0057 will be as follows:

- *Estimated total annual reporting and/or recordkeeping burden:* 820 hours.
- *Estimated average annual burden hours per respondent:* 0.5 hours (30 minutes).
- *Estimated number of respondents:* 1,640.
- *Estimated annual frequency of respondents:* 1.

Comments on this collection of information should be sent to OMB to Office of Management and Budget, Attention: Desk Officer for the Department of the Treasury, Office of Information and Regulatory Affairs, Washington, DC 20503; or email to *OIRA_submission@omb.eop.gov.* A copy also should be sent to the Alcohol and Tobacco Tax and Trade Bureau by any of the methods previously described. Comments on the information collection should be submitted not later than January 23, 2017.

OMB Control Number 1513–0115

Under TTB's authority in 26 U.S.C. 5367, 5369, 5370, and 5555, TTB requires wineries to maintain usual and customary business records. Included in these records are those evidencing the details and results of experiments approved by TTB under § 24.249. The proposed regulations contained in this document provide for a recordkeeping requirement in new § 24.251 when wine is corrected for accidental water dilutions. The recordkeeping requirement in this proposed section is already accounted for under OMB Control Number 1513–0115 because such requests currently are treated as experiments under § 24.249. Therefore, TTB does not believe that there is a change in the burden for this recordkeeping requirement, even for those wineries that are exempted from submitting a letterhead request under § 24.251 because still they will be required to maintain the currently required usual and customary business records.

Comments on this collection of information should be sent to OMB to Office of Management and Budget, Attention: Desk Officer for the Department of the Treasury, Office of Information and Regulatory Affairs, Washington, DC 20503; or email to *OIRA_submission@omb.eop.gov.* A copy also should be sent to the Alcohol and Tobacco Tax and Trade Bureau by any of the methods previously described. Comments on the information collection should be submitted not later than January 23, 2017.

Executive Order 12866

Certain TTB regulations issued under the IRC, including this one, are exempt from the requirements of Executive Order 12866, as supplemented and reaffirmed by Executive Order 13563. Therefore, a regulatory impact assessment is not required.

Drafting Information

Kara Fontaine of the Regulations and Rulings Division, Alcohol and Tobacco Tax and Trade Bureau drafted this document.

List of Subjects in 27 CFR Part 24

Administrative practice and procedure, Claims, Electronic fund transfers, Excise taxes, Exports, Food additives, Fruit juices, Labeling, Liquors, Packaging and containers, Reporting and recordkeeping requirements, Research, Scientific equipment, Spices and flavoring, Surety bonds, Vinegar, Warehouses, Wine.

Amendments to the Regulations

For the reasons discussed in the preamble, TTB proposes to amend 27 CFR part 24 as follows.

PART 24—WINE

■ 1. The authority citation for 27 CFR part 24 continues to read as follows:

Authority: 5 U.S.C. 552(a); 26 U.S.C. 5001, 5008, 5041, 5042, 5044, 5061, 5062, 5121, 5122–5124, 5173, 5206, 5214, 5215, 5351, 5353, 5354, 5356, 5357, 5361, 5362, 5364–5373, 5381–5388, 5391, 5392, 5511, 5551, 5552, 5661, 5662, 5684, 6065, 6091, 6109, 6301, 6302, 6311, 6651, 6676, 7302, 7342, 7502, 7503, 7606, 7805, 7851; 31 U.S.C. 9301, 9303, 9304, 9306.

■ 2. Section 24.10 is amended by:

■ a. Removing the number ''60'' in the definition of ''Brix'' and adding, in its place, the number ''68''; and

■ b. Revising the definition of ''Wine spirits'' to read as follows:

§ 24.10 Meaning of terms.

* * * * *

Wine spirits. Brandy or wine spirits authorized under 26 U.S.C. 5373 and § 24.225 of this part for use in wine production.

§ 24.85 [Amended]

■ 3. In § 24.85, the first sentence is amended by adding the word ''wood,'' after the word ''berries.''

■ 4. Section 24.185 is added to read as follows:

§ 24.185 Use of wood to treat natural wine.

(a) *Treatment by contact.* Natural wine may be treated by contact with any wood that is consistent with the food additive requirements under the Federal Food, Drug, and Cosmetic Act for food contact (see 21 CFR part 7). The wood may be in the form of barrels, staves, chips, particles, or storage tanks that were used for the addition of wine spirits if the tanks are used for the baking of wine. The wood may be toasted (that is, heated to low, medium, or high temperature without undergoing combustion), but not charred, and the wood must not be otherwise treated.

(b) *Use of wood essences and extracts.* A proprietor may make or purchase for blending purposes wine that has been heavily treated with wood; however, wood preparations made with an alcohol solution stronger than 24 percent alcohol by volume are essences and must be used in accordance with § 24.85. If any solvent other than alcohol or water is used to make a wood extract, the resulting extract must be consistent with the food additive requirements under the Federal Food, Drug, and Cosmetic Act for that purpose and may be used only in ''other wine'' in accordance with § 24.218. This paragraph applies to liquid extracts and essences and to the extracts and essences in powder form or dissolved in water after the solvent has been evaporated.

(c) *Use of wooden storage tanks.* Wooden storage tanks used for the addition of spirits may be used for the baking of wine.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1383–1384, 1386, as amended (26 U.S.C. 5382, 5386))

■ 5. Section 24.186 is added to read as follows:

§ 24.186 Accidental additions of water.

(a) *Accidental additions of water totaling 1 percent or less of the volume of standard wine.* When in the production, storage, treatment, or finishing of standard wine water is accidentally added to a standard wine in an amount that does not exceed 1 percent of the total volume of the wine, such wine shall remain standard wine and the proprietor need not take any action to correct the wine.

(b) *Correction of accidental additions of water.* When in the production, storage, treatment, or finishing of standard wine water is accidentally added to a standard wine in an amount that exceeds 1 percent of the volume of the wine, such wine may be corrected by either:

(1) Blending the diluted wine with a quantity of wine of the same kind so that the amount of water accidentally added does not exceed 1 percent of the total volume of the blended wine; or

(2) Removal of the accidentally added water from the wine in accordance with § 24.251.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1383–1384, as amended (26 U.S.C. 5382))

■ 6. Section 24.225 is revised to read as follows:

§ 24.225 Production and use of spirits.

(a) *Withdrawal of spirits.* The proprietor of a bonded wine premises may withdraw and receive wine spirits without payment of tax from the bonded premises of a distilled spirits plant for use as provided in this section.

(b) *Production and use of wine spirits.*

(1) *In general.* The only products considered to be wine spirits authorized for use in wine production under this section are brandy or wine spirits produced in a distilled spirits plant (with or without the use of water to facilitate extraction and distillation) exclusively from:

(i) Fresh or dried fruit, or their residues;

(ii) Natural wine or wine residues from fresh or dried fruit, including spirits byproducts of authorized wine treatments to reduce alcohol; or

(iii) Special natural wine. If wine spirits produced from special natural wine contain any flavor characteristics of the special natural wine, those wine spirits may be used only in the production of a special natural wine.

(2) *Distillation proof requirements.* The proof of wine spirits at distillation must not be reduced by the addition of water. In addition, a product is not considered to be wine spirits if it is distilled at less than 140 degrees of proof except in the following cases:

(i) Commercial brandy aged in wood for a period of not less than 2 years, and barreled at not less than 100 degrees of proof, shall be deemed wine spirits for purposes of this section; and

(ii) Spirits byproducts of alcohol reduction processing authorized under § 24.248 that are produced at a distilled spirits plant and distilled, if necessary, at not less than 100 degrees of proof shall be deemed wine spirits for purposes of this section.

(3) *Addition of sugar after fermentation.* When, in the production of natural wine or special natural wine, sugar has been added after fermentation, the wine may not be refermented to develop alcohol from such added sugar and then used in the production of wine spirits.

(4) *Addition of wine spirits to natural wine.*

(i) Wine spirits produced in the United States may be added to natural wine on bonded wine premises if both the wine and the spirits are produced from the same kind of fruit.

(ii) In the case of natural still wine, wine spirits may be added in any State only to wine produced by fermentation on bonded wine premises located within the same State.

(iii) If wine has been ameliorated, wine spirits may be added (whether or not wine spirits were previously added) only if the wine contains not more than 14 percent of alcohol by volume derived from fermentation.

(c) *Spirits other than wine spirits.* Spirits other than wine spirits may be received, stored, and used on bonded wine premises only for the production of nonbeverage wine and nonbeverage wine products.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1381–1384, as amended, and sec. 455, Pub. L. 98–369, (26 U.S.C. 5214, 5362, 5373, 5382, 5383, 5386))

■ 7. Section 24.246 is revised to read as follows:

§ 24.246 Materials authorized for the treatment of wine and juice.

(a) *Wine and juice.* Materials used in the process of filtering, clarifying, or purifying wine may remove cloudiness, precipitation, and undesirable odors and flavors, but the addition of any substance foreign to wine that changes the character of the wine, or the abstraction of ingredients so as to change the character of the wine, if not consistent with good commercial practice, is not permitted on bonded wine premises. The materials listed in this section are approved as being consistent with good commercial practice in the production, cellar treatment, or finishing of wine and,

where applicable, in the treatment of juice, within the ''Specific TTB limitation'' of this section and subject to the following conditions:

(1) If the FDA informs TTB that a specified use or limitation of any material listed in this section is inconsistent with the food additive requirements under the Federal Food, Drug, and Cosmetic Act, the appropriate TTB officer may cancel or amend the approval for use of the material in the treatment of wine and juice in the production, cellar treatment, or finishing of wine; and

(2) Where water is added to facilitate the solution or dispersal of a material, the volume of water added, whether the material is used singly or in combination with other water-based treating materials, may not total more than 1 percent of the volume of the treated wine or juice, or of both the wine and the juice, from which the wine is produced.

(b) *Use in combination or in multiple lots.* Subject to the conditions specified in paragraph (a) of this section, a proprietor may use the materials listed in this section in combination, provided that each material is used for its specified use and in accordance with any limitation specified for that use. If a proprietor uses several lots that contain the same material, it is the proprietor's responsibility to ensure that the cumulative amount of the material does not exceed the limitation specified in this section for that material.

(c) *Formula wine.* In addition to the materials listed in this section, other materials may be used in formula wine if approved for such use.

MATERIALS AUTHORIZED FOR TREATMENT OF WINE AND JUICE

Materials and use	Specific TTB limitation (if applicable)	FDA reference
Acacia (gum arabic): To clarify and stabilize [1] wine.	The amount used must not exceed 8 pounds per 1000 gallons (1.92 g/L) of wine.	21 CFR 184.1330.
Acetaldehyde: For color stabilization of juice prior to concentration.	The amount used must not exceed 300 ppm,[2] and the finished concentrate must have no detectable level of the material.	FDA advisory opinion dated September 8, 2016.
Activated carbon:		
To assist precipitation during fermentation.	27 CFR 24.176	FDA advisory opinion dated September 8, 2016.
To clarify and purify wine	The amount used to clarify and purify wine must be included in the total amount of activated carbon used to remove excessive color in wine. 27 CFR 24.241 and 24.242.	FDA advisory opinion dated January 26, 1979.
To remove color from wine and/or juice from which wine is produced.	The amount used to treat the wine, including the juice from which the wine was produced, must not exceed 25 pounds per 1000 gallons (3 g/L). If the amount necessary exceeds this limit, a notice is required pursuant to 27 CFR 24.242.	FDA advisory opinion dated January 26, 1979.
Albumen (egg white): Fining agent for wine	May be prepared in a light brine 1 ounce (28.35 grams) potassium chloride, 2 pounds (907.2 grams) egg white, 1 gallon (3.785 L) of water. Usage of brine not to exceed 1.5 gallons per 1,000 gallons (1.5 milliliters per liter) of wine.	FDA advisory opinion dated September 8, 2016.
Alumino-silicates (hydrated) e.g., Bentonite (Wyoming clay) and Kaolin: To clarify and stabilize [1] wine or juice.	None	21 CFR 182.2727, 182.2729, 184.1155 and 186.1256. FDA advisory opinion dated July 26, 1985.
Ascorbic acid *iso*-ascorbic acid (erythorbic acid): To prevent oxidation of color and flavor components of juice or wine.	May be added to grapes, other fruit (including berries), and other primary wine making materials, or to the juice of such materials, or to the wine, within limitations which do not alter the class or type of the wine.	21 CFR 182.3013 and 182.3041.
Bakers Yeast Mannoprotein: To stabilize [1] wine from the precipitation of potassium bitartrate crystals.	The amount used must not exceed 3.3 pounds per 1000 gallons (400 mg/L) of wine.	GRAS Notice No. GRN 284.
Calcium carbonate ($CaCO_3$) (with or without calcium salts of tartaric and malic acids):		
To reduce the excess natural acids in high acid wine, or in juice prior to or during fermentation.	The natural or fixed acids must not be reduced below 40 pounds per 1000 gallons (5 g/L).	21 CFR 184.1069, 184.1099, and 184.1191.
As a fining agent for cold stabilization	The amount used must not exceed 30 pounds per 1000 gallons (3.59 g/L) of wine.	
Calcium sulfate (gypsum): To lower pH in sherry wine.	The sulfate content of the finished wine must not exceed 1.67 pounds per 1000 gallons (0.2 g/L), expressed as potassium sulfate. 27 CFR 24.214.	21 CFR 184.1230.
Carbon dioxide (including food grade dry ice): To stabilize [1] and preserve wine.	See 27 CFR 24.245	21 CFR 184.1240.
Casein, potassium salt of casein: To clarify wine.	See 27 CFR 24.243	FDA advisory opinion dated September 8, 2016.
Chitosan from *Aspergillus niger:* To remove spoilage organisms such as Brettanomyces from wine.	The amount used must not exceed 0.8 pounds per 1000 gallons (10 g/hL) of wine.	GRAS Notice No. GRN 000397.

MATERIALS AUTHORIZED FOR TREATMENT OF WINE AND JUICE—Continued

Materials and use	Specific TTB limitation (if applicable)	FDA reference
Citric acid:		
To correct natural acid deficiencies in certain juice or wine.	See 27 CFR 24.182 and 24.192	21 CFR 184.1033.
To stabilize[1] wine other than citrus wine.	The amount of citric acid must not exceed 5.8 pounds per 1000 gallons (0.7 g/L). 27 CFR 24.244.	21 CFR 184.1033.
Copper sulfate: To remove hydrogen sulfide and/or mercaptans from wine.	The quantity of copper sulfate (calculated as copper) added to wine must not exceed 6 ppm.[2] The residual level of copper in the finished wine must not exceed 0.5 ppm[2].	21 CFR 184.1261.
Defoaming agents (polyoxyethylene 40 monostearate, silicon dioxide, dimethylpoly-siloxane, sorbitan monostearate, glyceryl monooleate and glyceryl dioleate): To control foaming, fermentation adjunct.	Defoaming agents which are 100 percent active may be used in amounts not exceeding 0.15 pounds per 1000 gallons (18 mg/L) of wine. Defoaming agents which are 30 percent active may be used in amounts not exceeding 0.5 pounds per 1000 gallons (60 mg/L) of wine. Silicon dioxide must be completely removed by filtration. The amount of silicon remaining in the wine must not exceed 10 ppm[2].	21 CFR 173.340 and 184.1505.
Dimethyl dicarbonate (DMDC): To sterilize and stabilize[1] wine.	DMDC may be added to wine in a cumulative amount not to exceed 200 ppm[2].	Must meet the conditions prescribed by FDA in 21 CFR 172.133.
Enzymatic activity: Various enzymes and uses, as shown below:	The enzyme preparation used must be prepared from nontoxic and nonpathogenic microorganisms in accordance with good manufacturing practice and be consistent with FDA's regulations.	
Carbohydrase (*alpha*-Amylase): To convert starches to fermentable carbohydrates.	The amylase enzyme activity must be derived from: *Aspergillus niger, Aspergillus oryzae, Bacillus subtilis,* or barley malt; or.	FDA advisory opinion of August 18, 1983.
	from *Rhizopus oryzae:* or	21 CFR 173.130.
	from *Bacillus licheniformis*	21 CFR 184.1027.
Carbohydrase (*beta*-Amylase): To convert starches to fermentable carbohydrates.	The amylase enzyme must be derived from barley malt.	FDA advisory opinion dated August 18, 1983.
Carbohydrase (Glucoamylase, Amylogluco-sidase): To convert starches to fermentable carbohydrates.	The amylase enzyme activity must be derived from *Aspergillus niger, Aspergillus oryzae,* or.	FDA advisory opinion dated August 18, 1983.
	from *Rhizopus oryzae,*	21 CFR 173.130.
	or from *Rhizopus niveus*	21 CFR 173.110.
Carbohydrase (pectinase, cellulase, hemicellulase): To facilitate separation of juice from the fruit.	The enzyme activity must be derived from *Aspergillus aculeatus*.	FDA advisory opinion dated December 19, 1996.
Catalase: To clarify and stabilize[1] wine.	The enzyme activity must be derived from *Aspergillus niger* or bovine liver.	FDA advisory opinion dated August 18, 1983.
Cellulase: To clarify and stabilize[1] wine and facilitate separation of the juice from the fruit.	The enzyme activity must be derived from *Aspergillus niger*.	FDA advisory opinion dated August 18, 1983.
Cellulase (beta-glucanase): To clarify and filter wine.	The enzyme activity must be derived from *Trichoderma longibrachiatum* or *Trichoderma harzianum*. The amount used must not exceed 30 ppm[2].	For beta-gucanase derived from *Trichoderma longibrachiatum,* 21 CFR 184.1250. For beta-glucanase derived from *Trichoderma harzianum,* GRAS Notice No. GRN 149.
Glucose oxidase: To clarify and stabilize[1] wine	The enzyme activity must be derived from *Aspergillus niger*.	FDA advisory opinion of August 18, 1983.
Lysozyme: To stabilize[1] wines from malolactic acid bacterial degradation.	The amount used must not exceed 500 ppm.[2]	FDA advisory opinion dated December 15, 1993.
Pectinase: To clarify and stabilize[1] wine and to facilitate separation of juice from the fruit.	The enzyme activity used must be derived from *Aspergillus niger*.	FDA advisory opinion dated August 18, 1983.
Protease (general): To reduce or to remove heat labile proteins.	The enzyme activity must be derived from: *Aspergillus niger* or *Bacillus subtilis* or from;.	FDA advisory opinion dated August 18, 1983.
	Bacillus licheniformis	21 CFR 184.1027.
Protease (Bromelin): To reduce or remove heat labile proteins.	The enzyme activity must be derived from *Ananus comosus* or *Ananus bracteatus (L)*.	FDA advisory opinion dated August 18, 1983.
Protease (Ficin): To reduce or remove heat labile proteins.	The enzyme activity must be derived from *Ficus spp*.	FDA advisory opinion dated August 18, 1983.
Protease (Papain): To reduce or remove heat labile proteins.	The enzyme activity must be derived from *Carica papaya (L)*.	21 CFR 184.1585.

MATERIALS AUTHORIZED FOR TREATMENT OF WINE AND JUICE—Continued

Materials and use	Specific TTB limitation (if applicable)	FDA reference
Protease (Pepsin): To reduce or remove heat labile proteins.	The enzyme activity must be derived from porcine or bovine stomachs.	FDA advisory opinion dated August 18, 1983.
Protease (Trypsin): To reduce or remove heat labile proteins.	The enzyme activity must be derived from porcine or bovine pancreas.	FDA advisory opinion dated August 18, 1983.
Urease: To reduce levels of naturally occurring urea in wine to help prevent the formation of ethyl carbamate.	The enzyme activity must be derived from *Lactobacillus fermentum.* Use is limited to not more than 200 ppm[2] and must be filtered prior to final packaging.	21 CFR 184.1924.
Ethyl maltol: To stabilize[1] wine	Use authorized at a maximum level of 100 ppm[2] in all standard wines except natural wine produced from *Vitis vinifera* grapes.	FDA advisory opinion dated December 1, 1986.
Ferrous sulfate: To clarify and stabilize[1] wine	The amount used must not exceed 3 ounces per 1000 gallons (0.022 g/L) of wine.	21 CFR 184.1315.
Fumaric acid:		
To correct natural acid deficiencies in grape wine.	The fumaric acid content of the finished wine must not exceed 25 pounds per 1000 gallons (3 g/L). 27 CFR 24.182 and 24.192.	21 CFR 172.350.
To stabilize[1] wine	The fumaric acid content of the finished wine must not exceed 25 pounds per 1000 gallons (3 g/L). 27 CFR 24.244.	21 CFR 172.350.
Gelatin (food grade): To clarify juice or wine	None	FDA advisory opinion dated September 8, 2016.
Granular cork: To smooth wine	The amount used must not exceed 10 pounds per 1000 gallons of wine (1.2 g/L).	FDA advisory opinion dated February 25, 1985.
Isinglass: To clarify wine	None	FDA advisory opinion dated February 25, 1985.
Lactic acid: To correct natural acid deficiencies in grape wine.	27 CFR 24.182 and 24.192	21 CFR 184.1061.
Malic acid: To correct natural acid deficiencies in juice or wine.	27 CFR 24.182, 24.192	21 CFR 184.1069.
Malo-lactic bacteria: To stabilize[1] grape wine	Malo-lactic bacteria of the type *Leuconostoc oenos* may be used in treating wine.	FDA advisory opinion dated February 25, 1985.
Maltol: To stabilize[1] wine	Use authorized at a maximum level of 2 pounds per 1000 gallons (250 mg/L) in all standard wine except natural wine produced from *Vitis vinifera* grapes.	FDA advisory opinion dated December 1, 1986.
Milk products (pasteurized whole, skim, or half-and-half):		
Fining agent for grape wine	The amount used must not exceed 2 parts of milk products per 1,000 parts (0.2 percent V/V) of wine.	
To remove off flavors in wine	The amount used must not exceed 10 parts of milk products per 1,000 parts (1 percent V/V) of wine.	
Nitrogen gas: To maintain pressure during filtering and bottling or canning of wine and to prevent oxidation of wine.	None	21 CFR 184.1540.
Oxygen and compressed air: Various uses in juice and wine.	None.	
Polyvinyl-polypyr-rolidone (PVPP): To clarify and stabilize[1] wine and to remove color from red wine or juice.	The amount used to treat the wine, including the juice from which the wine was produced, must not exceed 60 pounds per 1000 gallons (7.19 g/L) and must be removed during filtration. PVPP may be used in a continuous or batch process. The finished wine must retain vinous character and must have color of not less than 0.6 Lovibond in a one-half inch cell or not more than 95 percent transmittance per AOAC Method 11.003–11.004 (14th Ed.)[3].	21 CFR 173.50.
Polyvinyl-pyrrolidone (PVP)/polyvinylimadazole (PVI) polymer: To remove heavy metal ions and sulfides from wine.	The amount used to treat the wine must not exceed 6.7 pounds per 1000 gallons (80 g/hL) of wine.	21 CFR 173.55 and FDA FCN No. 320.
Potassium bitartrate: To stabilize[1] grape wine	The amount used must not exceed 35 pounds per 1000 gallons (4.19 g/L) of grape wine.	FDA advisory opinion dated September 8, 2016.
Potassium carbonate and/or potassium bicarbonate: To reduce excess natural acidity in wine and in juice prior to or during fermentation.	The natural or fixed acids must not be reduced below 0.668 ounces per gallon (5 g/L).	21 CFR 184.1619 and 184.1613.

MATERIALS AUTHORIZED FOR TREATMENT OF WINE AND JUICE—Continued

Materials and use	Specific TTB limitation (if applicable)	FDA reference
Potassium citrate: pH control agent and sequestrant in the treatment of citrus wines.	The amount of potassium citrate must not exceed 25 pounds per 1000 gallons (3 g/L) of finished wine. 27 CFR 24.182.	21 CFR 184.1625.
Potassium meta-bisulfite: To sterilize and preserve wine.	The sulfur dioxide content of the finished wine must not exceed the limitations prescribed in 27 CFR 4.22.	21 CFR 182.3637.
Potato protein isolate: Fining agent for wine	Use must not exceed 500 ppm[2] (50 g/hL) of wine.	GRAS Notice No. GRN 000447.
Silica gel (colloidal silicon dioxide): To clarify wine or juice.	Use must not exceed the equivalent of 20 pounds colloidal silicon dioxide at a 30 percent concentration per 1000 gallons (2.4 g/L) of wine. Silicon dioxide must be completely removed by filtration.	FDA advisory opinion dated September 8, 2016.
Sodium carboxymethyl cellulose: To stabilize[1] wine by preventing tartrate precipitation.	The amount used must not exceed 0.8% of the wine.	21 CFR 182.1745.
Sorbic acid and potassium salt of sorbic acid (potassium sorbate): To sterilize and preserve wine; to inhibit mold growth and secondary fermentation.	The finished wine must not contain more than 300 ppm[2] of sorbic acid.	21 CFR 182.3089 and 182.3640.
Sulfur dioxide: To sterilize and to preserve wine or juice.	The sulfur dioxide content of the finished wine must not exceed the limitations prescribed in 27 CFR 4.22(b)(1).	21 CFR 182.3862.
Tannin:		
To adjust tannin content in apple juice or in apple wine.	The residual amount of tannin must not exceed 24 pounds per 1000 gallons (3 g/L), calculated as gallic acid equivalents (GAE). Total tannin must not be increased by more than 150 ppm[2] by the addition of tannic acid (polygalloylglucose).	FDA advisory opinion dated September 8, 2016.
To clarify, or adjust tannin content of, juice or wine (other than apple).	The residual amount of tannin, calculated in GAE, must not exceed 6.4 GAE per 1000 gallons of wine (800 mg/L) in white wine and 24 pounds per 1000 gallons (3 g/L) in red wine. Only tannin which does not impart color may be used in the cellar treatment of juice or wine. Total tannin must not be increased by more than 150 ppm[2] by the addition of tannic acid (poly-galloylglucose).	FDA advisory opinion dated September 8, 2016.
Tartaric acid (L(+) tartaric acid):		
To correct natural acid deficiencies in grape juice or wine and to reduce the pH of grape juice or wine where ameliorating material is used in the production of grape wine.	Use as prescribed in 27 CFR 24.182 and 24.192.	21 CFR 184.1099 and GRAS Notice No. GRN 000187.
Yeast nutrients: To facilitate fermentation of juice and wine		
Ammonium phosphate/diammonium phosphate (*mono*- and *di* basic).	The amount used must not exceed 8 pounds per 1000 gallons (0.96 g/L).	FDA advisory opinion dated August 29, 2016.
Biotin	The amount used must not exceed 25 ppb[4]	FDA advisory opinion dated August 29, 2016.
Calcium pantothenate (vitamin B5)	The amount used must not exceed 1.5 ppm[2]	FDA advisory opinion dated August 29, 2016.
Folic acid (folate)	The amount used must not exceed 100 ppb[4]	FDA advisory opinion dated August 29, 2016.
Inositol (myo-inositol)	The amount used must not exceed 2 ppm[2]	FDA advisory opinion dated August 29, 2016.
Magnesium sulfate	The amount used must not exceed 15 ppm[2]	FDA advisory opinion dated August 29, 2016.
Niacin (vitamin B3)	The amount used must not exceed 1 ppm[2]	FDA advisory opinion dated August 29, 2016.
Pyridoxine hydrochloride (vitamin B6)	The amount used must not exceed 150 ppb[4]	FDA advisory opinion dated August 29, 2016.
Soy flour (defatted)	The amount used must not exceed 2 pounds per 1000 gallons (0.24 g/L) of wine.	FDA advisory opinion dated August 29, 2016.
Thiamine hydrochloride	The amount used must not exceed 0.005 pounds per 1000 gallons (0.6 mg/L) of wine or juice.	FDA advisory opinion dated August 29, 2016.
Yeast, autolyzed	None	FDA advisory opinion dated August 29, 2016.
Yeast, cell wall/membranes of autolyzed yeast.	The amount used must not exceed 3 pounds per 1000 gallons (0.36 g/L) of wine or juice.	FDA advisory opinion dated August 29, 2016.

[1] To stabilize—To prevent or to retard unwanted alteration of chemical and/or physical properties.
[2] Parts per million—1 ppm = 0.128 ounces per 1000 gallons = 1 mg/L = 1000 ppb.
[3] Official Methods of Analysis of AOAC INTERNATIONAL, Volumes I & II, AOAC INTERNATIONAL, 481 North Frederick Avenue, Suite 500, Gaithersburg, MD 20877–2417.
[4] Parts per billion—1ppb = 0.000128 ounces per 1000 gallons = 1 mg/1000L.

* * * * *

■ 8. Section 24.247 is amended by:

■ a. Revising the introductory text;

■ b. Revising the entry in the table for ''Ammonium phosphate (*mono*- and *di* basic''; and

■ c. Removing the footnote at the end of the table.

The revisions read as follows:

§ 24.247 Materials authorized for the treatment of distilling material.

The materials listed in this section as well as the materials listed in § 24.246 are approved as being acceptable in good commercial practice for use by proprietors in the treatment of distilling material within the limitations specified in this section. If, however, the U.S. Food and Drug Administration (FDA) informs TTB that a specified use or limitation of any material listed in this section is inconsistent with the food additive requirements under the Federal Food, Drug, and Cosmetic Act, the appropriate TTB officer may cancel or amend the approval for use of the material in the treatment of distilling material.

Materials	Use	Reference or limitation
Ammonium phosphate/diammonium phosphate (*mono*-and *di* basic).	Yeast nutrient in distilling material	The amount used shall not exceed 10 pounds per 1000 gallons (1.2 g/L). 21 CFR 184.1141a and 184.1141b.
* *	* * *	* *

* * * * *

■ 9. Section 24.248 is amended by:

■ a. Revising the introductory text;

■ b. Removing the entries for ''Nanofiltration,'' ''Reverse osmosis,'' and ''Ultrafiltration'';

■ c. Adding an entry for ''Cross flow filtration'', including subentries for ''Nanofiltration'', ''Reverse osmosis'', and ''Ultrafiltration'', at the top of the table;

■ d. Revising the entries for ''Osmotic transport'', ''Spinning cone column'', and ''Thin-film evaporation under reduced pressure''; and

■ e. Removing footnote 1 at the end of the table and adding new footnotes 1 and 2.

The additions and revisions to the table and its footnotes read as follows:

§ 24.248 Processes authorized for the treatment of wine, juice, and distilling material.

The processes listed in this section are approved as being consistent with good commercial practice for use by proprietors in the production, cellar treatment, or finishing of wine, juice, and distilling material, within the general limitations of this section. If, however, the U.S. Food and Drug Administration (FDA) informs TTB that a specified use or limitation of any material listed in this section is inconsistent with the food additive requirements under the Federal Food, Drug, and Cosmetic Act, the appropriate TTB officer may cancel or amend the approval for use of the process in the production, cellar treatment, or finishing of wine, juice, and distilling material.

PROCESSES AUTHORIZED FOR THE TREATMENT OF WINE, JUICE, AND DISTILLING MATERIAL

Process	Use	Reference or limitation
Cross flow filtration	Various processes and uses. [1]	
Nanofiltration [2]	To reduce the level of volatile acidity in wine (used with ion exchange), to reduce the ethyl alcohol content of wine.	This process must use permeable membranes which are selective for molecules not greater than 150 molecular weight with transmembrane pressures of 250 psi or less.
Reverse osmosis [2]	To reduce the ethyl alcohol content of wine and to remove off flavors in wine.	Permeable membranes that are selective for molecules not greater than 500 molecular weight with transmembrane pressures of 200 pounds per square inch (psi) and greater. The addition of water other than that originally present prior to processing will render standard wine ''other than standard.'' Use must not alter the vinous character of the wine. May be used in combination with osmotic transport.
Ultrafiltration [2]	To remove proteinaceous material from wine; to reduce harsh tannic material from white wine produced from white skinned grapes; to remove pink color from blanc de noir wine; to separate red juice and wine into low color and high color fractions for blending purposes, to reduce the ethyl alcohol content of wine.	Permeable membranes that are selective for molecules greater than 500 and not less than 25,000 molecular weight with transmembrane pressures less than 200 psi. Shall not alter vinous character.
* *	* * *	* *
Osmotic transport [2]	For alcohol reduction	(1) Use must not alter the vinous character of the wine. (2) None of the stripping solution may migrate into the wine. (3) May be used in combination with reverse osmosis.

PROCESSES AUTHORIZED FOR THE TREATMENT OF WINE, JUICE, AND DISTILLING MATERIAL—Continued

Process	Use	Reference or limitation
* * *	* * *	* *
Spinning cone column[2]	To reduce the ethyl alcohol content of wine and to remove off flavors in wine.	Use shall not alter vinous character. For standard wine, the same amount of essence must be added back to any lot of wine as was originally removed.
* * *	* * *	* *
Thin film evaporation under reduced preasure[2].	To separate wine into a low alcohol wine fraction and into a higher alcohol distillate.	Use shall not alter vinous character. Water separated with alcohol during processing may be recovered by refluxing in a closed continuous system and returned to the wine. The addition of water other than that originally present in the wine prior to processing, will render standard wine other than standard wine.

[1] In cross-flow filtration, the wine is passed across the filter membrane (tangentially) at positive pressure relative to the permeate side. A proportion of the wine which is smaller than the membrane pore size passes through the membrane as permeate or filtrate; everything else is retained on the feed side of the membrane as retentate.

[2] When used to remove ethyl alcohol (dealcoholization), this process must be done on distilled spirits plant premises. However, reverse osmosis and nanofilitration, under certain limited conditions, may be used on bonded winery premises if ethyl alcohol is only temporarily created within a closed system.

* * * * *

■ 10. Paragraph (b) of § 24.250 is amended to read as follows:

§ 24.250 Application for use of new treating material or process.

(b) Documentary evidence from the U.S. Food and Drug Administration that the material is consistent with the food additive requirements under the Federal Food, Drug, and Cosmetic Act for its intended purpose in the amounts proposed for the particular treatment contemplated;

* * * * *

■ 11. Section 24.251 is added to read as follows:

§ 24.251 Salvaging accidentally diluted wine.

(a) *Removal of accidentally added water without prior TTB approval.* If a proprietor accidentally adds to standard wine water in excess of limitations specified in subparts F and L of this part, the accidentally diluted wine may be returned to its original condition through the use of reverse osmosis and distillation without prior application to TTB provided that:

(1) The accidentally added water represents no more than 10 percent of the original volume of the wine;

(2) The wine is returned to its original condition by removing an amount of water equal to the amount that was accidentally added to the wine;

(3) The vinous character of the wine is not altered;

(4) The proprietor transfers the wine in bond to a distilled spirits plant for treatment; and

(5) Records are maintained in accordance with paragraph (c) of this section.

(b) *Removal of accidentally added water with TTB approval.* If a proprietor accidentally adds water to standard wine and the accidentally added water represents more than 10 percent of the original volume of the wine, then the proprietor must request permission from TTB prior to treating the wine. A proprietor may submit an application requesting permission to treat the wine to remove the water and return the wine to its original condition. The removal of water may not be conducted until the appropriate TTB officer has approved the request. The application, which is to be submitted to the appropriate TTB officer, must be in writing, must provide evidence of the exact amount of water accidentally added to the wine and an explanation of how the water was accidentally added, and must specify the method the proprietor will use to remove the water from the wine. In approving any request under this section, the appropriate TTB officer may require the proprietor to take steps to prevent future accidental additions of water to wine. In evaluating any request under this section, the appropriate TTB officer may consider as a factor whether the proprietor has demonstrated good commercial practices, taking into account the proprietor's prior history of accidental addition of water to wine and of compliance with other regulations in part 24.

(c) *Records.* The proprietor must, with respect to removals of water from wine authorized under this section, maintain records that document the accidental addition of water, the use of any treatment or process to remove the water from the wine, and the fact that only the amount of water that was accidentally added to the wine was removed as a result of the treatment or process.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1383–1384, as amended (26 U.S.C. 5382))

Signed: June 16, 2016.

John J. Manfreda,

Administrator.

Approved: October 25, 2016.

Timothy E. Skud,

Deputy Assistant Secretary. (Tax, Trade, and Tariff Policy).

BILLING CODE 4810–31–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R06–OAR–2016–0206; FRL–9954–83–Region 6]

Approval and Promulgation of Implementation Plans; Louisiana; Revisions to the New Source Review State Implementation Plan; Air Permit Procedure Revisions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing to partially approve and partially disapprove severable portions of four revisions to the Louisiana New Source Review (NSR) State Implementation Plan (SIP) submitted by the Louisiana Department of Environmental Quality (LDEQ). Specifically, we are proposing to partially approve and partially

disapprove provisions contained within the Chapter 5 air construction permit rules as initially submitted on November 15, 1993, November 10, 1994, November 9, 2007, and November 3, 2014. The EPA is proposing this action under section 110 and parts C and D of the Clean Air Act (CAA).

DATES: Comments must be received on or before December 22, 2016.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R06–OAR–2016–0206, at *http://www.regulations.gov* or via email to *kordzi.stephanie@epa.gov.* Follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from *Regulations.gov.* The EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.* on the web, cloud, or other file sharing system). For additional submission methods, please contact Stephanie Kordzi, 214–665–7520, *kordzi.stephanie@epa.gov.* For the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *http://www2.epa.gov/dockets/commenting-epa-dockets.*

Docket: The index to the docket for this action is available electronically at *www.regulations.gov* and in hard copy at EPA Region 6, 1445 Ross Avenue, Suite 700, Dallas, Texas. While all documents in the docket are listed in the index, some information may be publicly available only at the hard copy location (*e.g.,* copyrighted material), and some may not be publicly available at either location (*e.g.,* CBI).

FOR FURTHER INFORMATION CONTACT:
Stephanie Kordzi, (214) 665–7520, *kordzi.stephanie@epa.gov* or Mr. Bill Deese at 214–665–7253.

SUPPLEMENTARY INFORMATION: Throughout this document whenever ''we,'' ''us,'' or ''our'' is used, we mean the EPA.

I. Background

The Act at Section 110(a)(2)(C) requires states to develop and submit to the EPA for approval into the SIP, preconstruction review programs applicable to new and modified stationary sources of air pollutants for attainment and nonattainment areas that cover both major and minor new sources and modifications, collectively referred to as the NSR SIP. The CAA NSR SIP program is composed of three separate programs: Prevention of Significant Deterioration (PSD), Non-attainment NSR (NNSR), and Minor NSR. PSD is established in part C of title I of the CAA and applies in areas that meet the National Ambient Air Quality Standards (NAAQS), *i.e.,* ''attainment areas'', as well as areas where there is insufficient information to determine if the area meets the NAAQS, *i.e.,* ''unclassifiable areas.'' The NNSR SIP program is established in part D of title I of the CAA and applies in areas that are not in attainment of the NAAQS, *i.e.,* ''nonattainment areas.'' The Minor NSR SIP program addresses construction or modification activities that do not emit, or have the potential to emit, beyond certain major source thresholds and thus do not qualify as ''major'' and applies regardless of the designation of the area in which a source is located.

The EPA regulations governing the criteria that states must satisfy for the EPA approval of the NSR programs as part of the SIP are contained in 40 CFR Sections 51.160–51.166. In addition, there are several provisions in 40 CFR part 51 that apply generally to all SIP revisions.

As stated above, 40 CFR Section 51.160 establishes the enforceable procedures that all NSR programs must include. Sections 51.160–51.164 require that a SIP revision demonstrate that the adopted rules will not interfere with any applicable requirement concerning attainment and reasonable further progress, or any other applicable requirement of the CAA. Section 51.165 provides the minimum regulatory criteria for NNSR permitting programs and Section 51.166 provides the minimum regulatory criteria for approvable PSD permitting programs. Based upon our evaluation of the submittals, the EPA has concluded that three of the regulatory citations identified in this action do not meet the requirements of the CAA section 110(l). Below are summaries of the individual SIP submittals from the Secretary of the LDEQ.

A. The November 15, 1993, Louisiana SIP Submittal

On November 15, 1993, the LDEQ submitted revisions to the SIP. This SIP submittal incorporated revisions to the Louisiana Administrative Code (LAC) during the year 1993. It includes from Chapter 5, final revised regulation Sections 501, 502, 503, 504, 505, 507, 511, 513, 515, 517, 519, 521, 523, 525, 527, 529, 531, and 533. The EPA acted on most of the rule language contained in these sections in its August 4, 2016, final notice. *See* 81 FR 51341 (August 4, 2016). The EPA is proposing action at this time on the portions of the November 15, 1993 submittal that were not included in our August 4, 2016 final action. This action is on those portions that were not included in that notice.

The EPA is proposing approval of LAC 33:III, Chapter 5, Sections 525.A., 525.A.1., 525.A.3., 525.B., 525.B.1., 525.B.2, 527.A., 527.A.1., 527.A.2., 527.A.3., 527.B., 527.BN.1., 527.B.2., 529.A., 529.A.1., 529.A.2, 531.B.2 and 531.B.3. The LDEQ withdrew LAC 33:III, Chapter 5, Sections 525.A.2., 525.B.2.c., 525.B.3., 525.B.4., 525.B.5., 525.B.6., 525.B.7., 525.B.8., 527.B.5., 529.B.1., 529.B.2., 529.B.3., 529.B.4., in its letter of July 14, 2016, due to the provisions applying only to Part 70 sources. The EPA is proposing disapproval of section 501.B.1.d. which adds ''upsets'' to the list of activities exempt from permitting requirements. The basis for our disapproval is that the rule references the definition of ''upset'' in LAC 33:III.507.J.1 which is not part of the SIP submittal; the definition of ''upset'' is part of Louisiana's Title V program rules and mirrors the definition of ''emergency condition'' found at 40 CFR 70.6(g)(1), a rule which the EPA has proposed for removal from its Part 70 rules. See 81 FR 38645 (June 4, 2016).

The EPA is also proposing disapproval of the provisions for public notice that are inconsistent with federal laws and found in sections 513.A.1. and 531.A.1.

B. November 10, 1994, Submittal

On November 10, 1994, the LDEQ submitted revisions to the SIP. This SIP submittal incorporated revisions to the LAC published in the Louisiana Register on November 20, 1994. It includes final revised regulations at LAC 33:III, Chapter 5, Sections 501, 507, 517, 521, 527, and 533. The EPA acted on most of the rule language contained in these sections in its final notice 81 FR 51341 (August 4, 2016). This action is on those portions that were not included in that notice. The EPA is proposing to take action on sections 527.A.2., 527.A.2.c., 527.B., 527.B.1., 527.B.2.a., and 527.B.2.b. The EPA returned sections 507 and 533 rules due to their association with part 70 sources requirements to LDEQ on August 4, 2015.

C. The November 9, 2007, Louisiana SIP Submittal

On November 9, 2007, the LDEQ submitted the 2006 General Revisions to the Louisiana SIP. This SIP submittal incorporated revisions to the LAC during the year 2006 and revisions to the LAC not previously federally approved. It includes from Chapter 5, final revised regulation sections 501, 504, 509, 513, and 531. The EPA acted on most of the rule language contained in these sections in its final notice 80 FR 68451 (November 5, 2015) and final notice 81 FR 51341 (August 4, 2016). This action is on those portions that were not included in those notices. The EPA proposes approval for section 531.B.3. This action proposes for disapproval the provisions for public notice that are inconsistent with federal laws and found in sections 513.A.1.

D. The November 3, 2014, Louisiana SIP Submittal

On November 3, 2014, the LDEQ submitted the 2011–2013 Permit Rule revisions to the SIP. This SIP submittal incorporated revisions to the LAC during the years 2011–2012. It includes from Chapter 5, final revised regulation sections 501, 502, 503, 504, 523, and 537. The EPA acted on most of the rule language contained in these sections in its final notice 81 FR 51341 (August 4, 2016). This action is on that portion that was not included in that notice. This action proposes disapproval of the provisions regarding section 501.B.1.d. which adds ''upsets'' to the list of activities exempt from permitting requirements. The basis for our disapproval is that the rule references the definition of ''upset'' in LAC 33:III.507.J.1 which is not part of the SIP submittal; the definition of ''upset'' is part of Louisiana's Title V program rules and mirrors the definition of ''emergency condition'' found at 40 CFR 70.6(g)(1), a rule which the EPA has proposed for removal from its Part 70 rules. See 81 FR 38645 (June 4, 2016).

II. The EPA's Evaluation

We evaluated the SIP submissions of the specific citations of the Louisiana Air Permit Procedure Revisions identified above and revised in the November 15, 1993, November 10, 1994, November 9, 2007, and November 3, 2014, submissions.

A. Revisions to the NSR Air Permit Procedures

We evaluated the SIP submissions and are proposing approval of the Louisiana Permit Procedures Revisions, as identified, beginning with the November 15, 1993, through the November 3, 2014, submissions.

Prior to this action, the EPA proposed full approval of the major PSD and NNSR and minor NSR permitting program update. Those actions were finalized on November 5, 2015 (80 FR 68451) and August 4, 2016 (81 FR 51341).

Our evaluation of the proposed NSR revisions found, with the exception of the items proposed for disapproval and discussed below, the proposed revisions address requirements that enhance the SIP. These changes proposed for approval, in general: (1) Clarify the rules; (2) make the rules more consistent with Federal rules; (3) establish permit modification procedures; (4) establish reopening procedures: and (5) establish notification procedures of PSD permit actions to states outside of Louisiana.

- *Proposed Disapproval:* The EPA is proposing disapproval of the SIP revisions to section 501.B.1.d. submitted by the State of Louisiana on November 15, 1993, and updated on November 3, 2014. More specifically, Louisiana submitted a revision to LAC 33:III.501.B.1 that revises the list of specific activities that are exempt from the requirement to obtain a permit to add: ''*d. any upset, as defined in LAC 33:III.507.J.1; however, the permitting authority shall be advised of such occurrences without delay, in accordance with all applicable upset or emergency provisions of Louisiana Air Quality regulations and of LAC 33.I. Chapter 39; . . .*'' EPA's interpretation of the CAA requirements for SIPs, including minor NSR permitting programs, is that upsets are generally not the kind of activities that are amenable to NSR permitting due to their nature of being unforeseeable, unpredictable, beyond the control of the owner or operator of the source. However, the reference to the definition of ''upset'' in LAC 33:III.507.J.1 is problematic because that definition is not in the Louisiana SIP or currently before EPA for review, rather it is part of Louisiana's Title V regulations that are inconsistent with EPA's proposed rulemaking found in 81 FR 38645 (June 4, 2016), to amend its Title V regulations to remove the ''emergency provision'' found in 40 CFR 70.6(g) and 71.6(g). The ''emergency provision'' definition in 40 CFR 70.6(g)(1) mirrors LDEQ's definition of ''upset'' found in LAC 33:III.507.J.1, which is referenced in section 501.B.1.d. If finalized, that rulemaking would require LDEQ to also remove the affirmative defense language from its Title V rules, including the language at LAC 33:III.507.J which is part of Louisiana's approved Title V program.
- *Proposed Approval:* The EPA is proposing approval of sections 525.A.1. and 525.A.3. rules for incorporating minor modification procedures consistent with federal law. Section 525.A.1. pertains to the minor NSR permit program only.
- *Proposed Approval:* The EPA is proposing approval of sections 527.A., 527.A.1., 527.A.2., 527.A.2.a., 527.A.2.b., 527.A.2.c., 527.B., 527 B.1., B.2., B.3., and B.4., rules that incorporate significant modification procedures consistent with federal law.
- *Proposed Approval:* The EPA is proposing approval of sections 529.A., 529.A.1., 529.A.1.a., 529.A.1.b., and 529.A.2. for permit reopening for cause procedures consistent with federal law.
- *Proposed Approval:* The EPA is proposing approval of sections 531.B.2. and 531.B.3. for state permit notification procedures consistent with federal law.
- *Proposed Disapproval:* The EPA is proposing disapproval of Section 513A.1. based on this rule language referencing and relying on the discretionary public notice rule found in section 531.A.1 which is being proposed for partial disapproval. However, as stated above, the currently approved SIP contains adequate public notice provisions for minor NSR sources.
- *Proposed Disapproval:* The EPA is proposing disapproval of section 531.A. based on the information in its March 3, 2003, letter to LDEQ, which is included in the docket. The EPA notified the LDEQ that 40 CFR 51.161(a) requires opportunity for public comment and applies to all proposed decisions concerning new and modified sources. As currently written, Louisiana's revised rule section 531.A. submitted on November 15, 1993, states: ''*531.A. Public Notice 1. At the discretion of the permitting authority, public notice may be provided prior to issuance of any new or revised permit under this Chapter.*'' This discretionary language does not conform to the Federal requirements at Section 51.161. Section 51.161(a) provides: ''The legally enforceable procedures in § 51.160 *must* also require the State or local agency to provide opportunity for public comment on information submitted by owners and operators. The public information *must* include the agency's analysis of the effect of construction or modification on ambient air quality, including the agency's proposed approval or disapproval.'' (*Emphasis added.*) Section 51.161(a), clearly mandates that legally enforceable procedures require the State or local agency to provide

opportunity for public comment. Thus the current language in 531.A. is not approvable under 40 CFR 51.161 as it allows the permitting agency discretion whether to provide for public notice.

B. Does the proposed approval of the Louisiana Minor and Nonattainment NSR Air Permit Procedure Revisions interfere with attainment, reasonable further progress, or any other applicable requirement of the Act?

We have determined that the regulations submitted to the EPA and being proposed for approval as SIP revisions meet the requirements of CAA section 110(l). The EPA's conclusion is based upon a line-by-line comparison of the proposed revisions with the federal requirements. The goal is to demonstrate that the proposed revisions will not interfere with the attainment of the NAAQS, Rate of Progress, RFP or any other applicable requirement of the CAA. Most of the changes were not substantial. Our analysis shows that in most cases, the state regulatory language is consistent with and in support of the intent of the federal rules and definitions. The EPA is therefore proposing to approve these submittals.

III. Proposed Action

We are proposing to partially approve and partially disapprove the Louisiana SIP revisions submitted by the State of Louisiana in accordance with the EPA regulations at 40 CFR 51.160–51.164 and under Section 110 and part C of the Act, and for the reasons presented above and included in our accompanying TSD. Table 1 below summarizes the changes that are in the SIP revision submittals. The accompanying Technical Support Document (TSD) includes a detailed evaluation of the submittals and our rationale. The TSD may be accessed online at *www.regulations.gov,* Docket No. EPA–R06–OAR–2016–0206.

TABLE 1—SUMMARY OF EACH NSR SIP SUBMITTAL AFFECTED BY THIS ACTION PROPOSED APPROVAL

Section	Date submitted to EPA as SIP amendment	Affected regulation
Section 525—Minor Modifications		
Section 525.A	11/15/1993	Sections 525.A., 525.A.1., 525.A.3.
Section 525.B	11/15/1993	Sections 525.B., 525.B.1. and 525.B.2.
Section 527—Significant Modifications		
Section 527.A	11/15/1993	Sections 527.A., 527.A.1., 527.A.2., and 527.A.3.
	11/10/1994	Sections 527.A.2., 527.A.2.c.
Section 527.B	11/15/1993	Sections 527.B., 527.B.1., 527.B.2.a., and 527.B.2.b.
	11/10/1994	Section 527.B.
Section 529—Reopenings for Cause		
Section 529.A	11/15/1993	Sections 529.A., 529.A.1. and 529A.2.
Section 529.B	11/15/1993	Sections 529.B., 529.B.1., 529.B.2., 529.B.3., and 529.B.4.
Section 531—Public Notice and Affected State Notice		
Section 531.B	11/15/1993	Section 531.B.2. and 531.B.3.
	11/9/2007	Section 531.B.3.

TABLE 2—SUMMARY OF EACH NSR SIP SUBMITTAL AFFECTED BY THIS ACTION PROPOSED DISAPPROVAL

Section	Date submitted to EPA as SIP amendment	Affected regulation
Section 501—Scope and Applicability		
Section 501.B	11/15/1993	Section 501.B.1.d.
	11/3/2014	Section 501.B.1.d.
Section 513—General Permits, Temporary Sources, and Relocation of Portable Facilities		
Section 513.A	11/15/1993	Section 513.A.1.
	11/9/2007	Section 513.A.1.
Section 531—Public Notice and Affected State Notice		
Section 531.A	11/15/1993	Section 531.A.1.

IV. Incorporation by Reference

In this action, we are proposing to include in a final rule regulatory text that includes incorporation by reference. In accordance with the requirements of 1 CFR 51.5, we are proposing to incorporate by reference revisions to the Louisiana regulations as described in the Proposed Action section above. We have made, and will continue to make, these documents generally available electronically through *www.regulations.gov* and/or in hard copy at the EPA Region 6 office.

V. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, the EPA's role is to act on state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law.

A. Executive Order 12866: Regulatory Planning and Review and Executive Order 13563: Improving Regulation and Regulatory Review

This proposed action is not a significant regulatory action and was therefore not submitted to the Office of Management and Budget for review.

B. Paperwork Reduction Act (PRA)

This proposed action does not impose an information collection burden under the PRA because the portion of the rules that are proposed for approval do not contain any information collection activities and incorporate notification requirements to government entities consistent with federal law, significant and minor permit modification criteria, and permit reopening criteria. Further, this action proposes to disapprove specific submitted revisions regarding discretionary public notice and upset that are not consistent with federal laws for the regulation and permitting of air emission sources.

C. Regulatory Flexibility Act (RFA)

I certify that this action will not have a significant economic impact on a substantial number of small entities under the RFA. This action will not impose any requirements on small entities. This action proposes to approve regulatory citations that incorporate notification requirements to government entities consistent with federal law, significant and minor permit modification criteria, and permit reopening criteria. This action proposes to disapprove revisions regarding discretionary public notice and an exemption of upsets from permitting requirements that are no longer consistent with federal law for the regulation and permitting of air emission sources. Therefore it will have no impact on small entities.

D. Unfunded Mandates Reform Act (UMRA)

This action does not contain any unfunded mandate as described in UMRA, 2 U.S.C. 1531–1538, and does not significantly or uniquely affect small governments. The action imposes no enforceable duty on any state, local or tribal governments or the private sector. This action proposes to approve specific citations that incorporate notification requirements to government entities consistent with federal law, significant and minor permit modification criteria, and permit reopening criteria. This action proposes to disapprove submitted revisions regarding discretionary public notice and upset exemptions that are no longer consistent with federal law for the regulation and permitting of air emission sources. It therefore will have no impact on small governments.

E. Executive Order 13132, Federalism

This action does not have federalism implications. It will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government.

F. Executive Order 13175, Coordination With Indian Tribal Governments

This action does not have tribal implications as specified in Executive Order 13175. This action proposes to approve specific citations that incorporate notification requirements to government entities consistent with federal law, significant and minor permit modification criteria, and permit reopening criteria. This action proposes to disapprove submitted revisions regarding discretionary public notice and upset exemptions that are no longer consistent with federal law for the regulation and permitting of air emission sources. There are no requirements or responsibilities added or removed from Indian Tribal Governments. Thus, Executive Order 13175 does not apply to this action.

G. Executive Order 13045, Protection of Children From Environmental Health Risks and Safety Risks

EPA interprets Executive Order 13045 as applying only to those regulatory actions that concern environmental health or safety risks that the EPA has reason to believe may disproportionately affect children, per the definition of ''covered regulatory action'' in section 2–202 of the Executive Order. This action is not subject to Executive Order 13045 because it proposes to approve specific citations that incorporate notification requirements to government entities consistent with federal law, significant and minor permit modification criteria, and permit reopening criteria. This action proposes to disapprove submitted revisions regarding discretionary public notice and upset exemptions that are no longer consistent with federal law for the regulation and permitting of air emission sources.

H. Executive Order 13211, Actions That Significantly Affect Energy Supply, Distribution or Use

This action is not subject to Executive Order 13211 because it is not a significant regulatory action under Executive Order 12866.

I. National Technology Transfer and Advancement Act

This rulemaking does not involve technical standards.

J. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations

EPA believes the human health or environmental risk addressed by this action will not have potential disproportionately high and adverse human health or environmental effects on minority, low-income or indigenous populations. This action is not subject to Executive Order 12898 because it proposes to approve specific citations that incorporate notification requirements to government entities consistent with federal law, significant and minor permit modification criteria, and permit reopening criteria. This action proposes to disapprove submitted revisions regarding discretionary public notice and upset exemptions that are no longer consistent with federal law for the regulation and permitting of air emission sources.

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Carbon monoxide, Incorporation by reference, Intergovernmental relations, Lead, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, Sulfur oxides, Volatile organic compounds.

Authority: 42 U.S.C. 7401 *et seq.*

[EPA–HQ–OAR–2016–0544; FRL–9955–36–OAR]

Notice of Opportunity to Comment on Proposed Denial of Petitions for Rulemaking To Change the RFS Point of Obligation

AGENCY: Environmental Protection Agency (EPA).

ACTION: Petitions for rulemaking.

SUMMARY: The Environmental Protection Agency (EPA) is proposing to deny several petitions requesting that EPA initiate a rulemaking process to reconsider or change its regulations that identify refiners and importers of gasoline and diesel fuel as the entities responsible for complying with the annual percentage standards adopted under the Renewable Fuel Standard (RFS) program. EPA is providing an opportunity for the public to comment on the petitions we have received and on our proposed denial of the requests to initiate rulemaking.

DATES: Written comments must be received on or before January 23, 2017.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–HQ–OAR–2016–0544, to the *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the online instructions for submitting comments. Once submitted, comments cannot be edited or withdrawn. The EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.* on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *http://www2.epa.gov/dockets/commenting-epa-dockets.*

SUPPLEMENTARY INFORMATION:

I. General Information

(A) What should I consider as I prepare my comments for EPA?

Submitting CBI. Do not submit this information to EPA through *www.regulations.gov* or email. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD–ROM that you mail to EPA, mark the outside of the disk or CD–ROM as CBI and then identify electronically within the disk or CD–ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

Tips for Preparing Your Comments. When submitting comments, remember to:

- Identify the rulemaking by docket number and other identifying information (subject heading, **Federal Register** date and page number).
- Follow directions—The agency may ask you to respond to specific questions or organize comments by referencing a Code of Federal Regulations (CFR) part or section number.
- Explain why you agree or disagree; suggest alternatives and substitute language for your requested changes.
- Describe any assumptions and provide any technical information and/or data that you used.
- If you estimate potential costs or burdens, explain how you arrived at your estimate in sufficient detail to allow for it to be reproduced.
- Provide specific examples to illustrate your concerns, and suggest alternatives.
- Explain your views as clearly as possible, avoiding the use of profanity or personal threats.
- Make sure to submit your comments by the comment period deadline identified.

II. Background

On March 26, 2010, the EPA issued a final rule (75 FR 14670) establishing regulatory amendments to the renewable fuel standards (''RFS'') program regulations to reflect statutory amendments to Section 211(o) of the Clean Air Act enacted as part of the Energy Independence and Security Act of 2007. These amended regulations included 40 CFR 80.1406, imposing the obligation for compliance with the RFS annual standards on refiners and importers of gasoline and diesel fuel. These entities are referred to in the RFS regulations as ''obligated parties.'' Beginning in 2014, and continuing to the present, obligated parties and other stakeholders have questioned whether 40 CFR 80.1406 should be amended, and a number of them have filed formal petitions for reconsideration or revision of the definition of ''obligated party'' in 40 CFR 80.1406, or petitions for rulemaking to amend the provision. On January 27, 2014, Monroe Energy LCC (''Monroe'') filed a ''petition to revise'' 40 CFR 80.1406 to change the RFS point of obligation, and on January 28, 2016, Monroe filed a ''petition for reconsideration'' of the regulation. On February 11, 2016, Alon Refining Krotz Springs, Inc.; American Refining Group, Inc.; Calumet Specialty Products Partners, L.P.; Lion Oil Company; Ergon-West Virginia, Inc.; Hunt Refining Company; Placid Refining Company LLC; U.S. Oil & Refining Company (the ''Small Refinery Owners Ad Hoc Coalition'') filed a petition for reconsideration of 40 CFR 80.1406. On February 12, 2016, Valero Energy Corporation and its subsidiaries (''Valero'') filed a ''petition to reconsider and revise'' the rule. On June 13, 2016, Valero submitted a petition for rulemaking to change the definition of ''obligated party.'' On August 4, 2016, the American Fuel and Petrochemical Manufacturers (''AFPM'') filed a petition for rulemaking to change the definition of ''obligated party.'' On September 2, 2016, Holly Frontier also filed a petition for rulemaking to change the definition of ''obligated party.'' The petitions, comments received to date on the petitions, and EPA's draft analysis are available in a public docket that EPA has established for this Notice under Docket ID No. EPA–HQ–OAR–2016–0544.

III. What information is EPA particularly interested in?

The petitioners all seek to have the point of obligation shifted from refiners and importers, but differ somewhat in their suggestions for alternatives. Some request that EPA shift the point of obligation from refiners and importers to those parties that blend renewable fuel into transportation fuel. Others suggest that it be shifted to those parties that hold title to the gasoline or diesel fuel immediately prior to the sale of these fuels at the terminal (these parties

are commonly called the position holders), or to ''blenders and distributors.'' All petitioners argue, among other things, that shifting the point of obligation to parties downstream of refiners and importers in the fuel distribution system would align compliance responsibilities with the parties best positioned to make decisions on how much renewable fuel is blended into the transportation fuel supply in the United States. Some of the petitioners further claim that changing the point of obligation would result in an increase in the production, distribution, and use of renewable fuels in the United States and would reduce the cost of transportation fuel to consumers.

In the draft analysis available in the docket referenced above (Docket ID No. EPA–HQ–OAR–2016–0544), we present our rationale for proposing to deny the requests to initiate a rulemaking on the issue. In evaluating this matter, EPA's primary consideration is whether or not a change in the point of obligation would improve the effectiveness of the program to achieve Congress's goals. At the same time, EPA believes that a change in the point of obligation would be a substantial disruption that has the potential to undermine the success of the RFS program, as a result of increasing instability and uncertainty in programmatic obligations. We believe that the proponents of such a change bear the burden of demonstrating that the benefits are sufficiently large and likely that the disruption associated with such a transition would be worthwhile.

We believe that the current structure of the RFS program is working to incentivize the production, distribution, and use of renewable transportation fuels in the United States, while providing obligated parties a number of options for acquiring the RINs they need to comply with the RFS standards. We do not believe that petitioners have demonstrated that changing the point of obligation would likely result in increased use of renewable fuels. Changing the point of obligation would not address challenges associated with commercializing cellulosic biofuel technologies and the marketplace dynamics that inhibit the greater use of fuels containing higher levels of ethanol, two of the primary issues that inhibit the rate of growth in the supply of renewable fuels today. Changing the point of obligation could also disrupt investments reasonably made by participants in the fuels industry in reliance on the regulatory structure the agency established in 2007 and reaffirmed in 2010. While we do not anticipate a benefit from changing the point of obligation, we do believe that such a change would significantly increase the complexity of the RFS program, which could negatively impact its effectiveness. In the short term we believe that initiating a rulemaking to change the point of obligation could work to counter the program's goals by causing significant confusion and uncertainty in the fuels marketplace. Such a dynamic would likely cause delays to the investments necessary to expand the supply of renewable fuels in the United States, particularly investments in cellulosic biofuels, the category of renewable fuels that Congress envisioned would provide the majority of volume increases in future years.

In addition, changing the point of obligation could cause restructuring of the fuels marketplace as newly obligated parties alter their business practices to purchase fuel under contract ''below the rack'' instead of ''above the rack'' to avoid the compliance costs associated with being an obligated party under the RFS program. We believe these changes would have no beneficial impact on the RFS program or renewable fuel volumes and would decrease competition among parties that buy and sell transportation fuels at the rack, potentially increasing fuel prices for consumers and profit margins for refiners, especially those not involved in fuel marketing. EPA is also not persuaded, based on our analysis of available data, including that supplied by petitioners, by their arguments that they are disadvantaged compared to integrated refiners in terms of their costs of compliance, nor that other stakeholders such as unobligated blenders are receiving windfall profits.

EPA specifically requests comments that address whether or not changing the point of obligation in the RFS program would be likely to significantly increase the production, distribution, and use of renewable fuels as transportation fuel in the United States, as well as any data that can substantiate such claims. We also seek comment on any of the issues discussed here and in the more complete draft analysis of the petitions available in the docket referenced above, including EPA's authority to place the point of obligation on distributors and position holders; the significance of limiting the number and nature of obligated parties; the number of parties that are currently blenders or position holders; the extent to which blenders and position holders may be small businesses for whom designation as an obligated party would be particularly burdensome; whether it is likely that current renewable fuel blenders and/or position holders would reposition themselves in the market to avoid RFS obligations if designated as obligated parties and the likely impact of such repositioning; the significance of transitional issues and potential regulatory uncertainty that would result from changing the point of obligation; and the extent to which a change in the point of obligation could lead to unintended market changes or consequences.

Dated: November 10, 2016.

Janet McCabe,

Acting Assistant Administrator, Office of Air and Radiation.

Centers for Medicare & Medicaid Services

42 CFR Part 438

[CMS–2402–P]

RIN 0938–AT10

Medicaid Program; The Use of New or Increased Pass-Through Payments in Medicaid Managed Care Delivery Systems

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Proposed rule.

SUMMARY: This proposed rule addresses changes, consistent with the CMCS Informational Bulletin (CIB) concerning ''The Use of New or Increased Pass-Through Payments in Medicaid Managed Care Delivery Systems,'' published on July 29, 2016, to the pass-through payment transition periods and the maximum amount of pass-through payments permitted annually during the transition periods under Medicaid managed care contract(s) and rate certification(s). The changes prevent increases in pass-through payments and the addition of new pass-through payments beyond those in place when the pass-through payment transition periods were established in the final Medicaid managed care regulations.

DATES: To be assured consideration, comments must be received at one of the addresses provided below, no later than 5 p.m. December 22, 2016.

ADDRESSES: In commenting please refer to file code CMS–2402–P. Because of staff and resource limitations, we cannot accept comments by facsimile (FAX) transmission.

You may submit comments in one of four ways (please choose only one of the ways listed):

1. *Electronically.* You may submit electronic comments on this regulation to *http://www.regulations.gov.* Follow the ''Submit a comment'' instructions.

2. *By regular mail.* You may mail written comments to the following address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS–2402–P, P.O. Box 8016, Baltimore, MD 21244–8016.

Please allow sufficient time for mailed comments to be received before the close of the comment period.

3. *By express or overnight mail.* You may send written comments to the following address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS–2402–P, Mail Stop C4–26–05, 7500 Security Boulevard, Baltimore, MD 21244–1850.

4. *By hand or courier.* Alternatively, you may deliver (by hand or courier) your written comments ONLY to the following addresses prior to the close of the comment period:

a. For delivery in Washington, DC—Centers for Medicare & Medicaid Services, Department of Health and Human Services, Room 445–G, Hubert H. Humphrey Building, 200 Independence Avenue SW., Washington, DC 20201.

(Because access to the interior of the Hubert H. Humphrey Building is not readily available to persons without federal government identification, commenters are encouraged to leave their comments in the CMS drop slots located in the main lobby of the building. A stamp-in clock is available for persons wishing to retain a proof of filing by stamping in and retaining an extra copy of the comments being filed.)

b. For delivery in Baltimore, MD—Centers for Medicare & Medicaid Services, Department of Health and Human Services, 7500 Security Boulevard, Baltimore, MD 21244–1850.

If you intend to deliver your comments to the Baltimore address, call telephone number (410) 786–7195 in advance to schedule your arrival with one of our staff members.

Comments erroneously mailed to the addresses indicated as appropriate for hand or courier delivery may be delayed and received after the comment period.

For information on viewing public comments, see the beginning of the **SUPPLEMENTARY INFORMATION** section.

FOR FURTHER INFORMATION CONTACT: John Giles, (410) 786–1255.

SUPPLEMENTARY INFORMATION:

Inspection of Public Comments: All comments received before the close of the comment period are available for viewing by the public, including any personally identifiable or confidential business information that is included in a comment. We post all comments received before the close of the comment period on the following Web site as soon as possible after they have been received: *http://regulations.gov.* Follow the search instructions on that Web site to view public comments.

Comments received timely will also be available for public inspection as they are received, generally beginning approximately 3 weeks after publication of a document, at the headquarters of the Centers for Medicare & Medicaid Services, 7500 Security Boulevard, Baltimore, Maryland 21244, Monday through Friday of each week from 8:30 a.m. to 4 p.m. To schedule an appointment to view public comments, phone 1–800–743–3951.

I. Background

In the June 1, 2015 **Federal Register** (80 FR 31098), we published the ''Medicaid and Children's Health Insurance Program (CHIP) Programs; Medicaid Managed Care, CHIP Delivered in Managed Care, Medicaid and CHIP Comprehensive Quality Strategies, and Revisions Related to Third Party Liability'' proposed rule (''June 1, 2015 proposed rule''). As part of the actuarial soundness proposals, we proposed to define actuarially sound capitation rates as those sufficient to provide for all reasonable, appropriate, and attainable costs that are required under the terms of the contract, including furnishing of covered services and operation of the managed care plan for the duration of the contract. Among the proposals was a general rule that the state may not direct the MCO's, PIHP's, or PAHP's expenditures under the contract.

In the May 6, 2016 **Federal Register** (81 FR 27498), we published the ''Medicaid and Children's Health Insurance Program (CHIP) Programs; Medicaid Managed Care, CHIP Delivered in Managed Care, and Revisions Related to Third Party Liability'' final rule (''May 6, 2016 final rule''), which finalized the June 1, 2015 proposed rule. In the final rule, we finalized, with some revisions, the proposal which limited state direction of payments, including pass-through payments as defined below.

A. Summary of the Medicaid Managed Care May 6, 2016 Final Rule

We finalized a policy to limit state direction of payments, including pass-through payments at § 438.6(d) in the May 6, 2016 final rule (81 FR 27587 through 27592). Specifically, under the final rule (81 FR 27588), we defined pass-through payments at § 438.6(a) as any amount required by the state to be added to the contracted payment rates, and considered in calculating the actuarially sound capitation rate, between the MCO, PIHP, or PAHP and hospitals, physicians, or nursing facilities that is not for the following purposes: A specific service or benefit provided to a specific enrollee covered under the contract; a provider payment methodology permitted under § 438.6(c)(1)(i) through (iii) for services and enrollees covered under the contract; a subcapitated payment arrangement for a specific set of services and enrollees covered under the contract; GME payments; or FQHC or RHC wrap around payments. We noted that section 1903(m)(2)(A) of the Social Security Act (the Act) requires that capitation payments to managed care plans be actuarially sound; we interpret this requirement to mean that payments under the managed care contract must align with the provision of services to beneficiaries covered under the contract. We provided that these pass-through payments are not consistent with our standards for actuarially sound rates because they do not tie provider payments with the provision of services. The final rule contains a detailed description of the policy rationale (81 FR 27587 through 27592).

In an effort to provide a smooth transition for network providers, to support access for the beneficiaries they serve, and to provide states and managed care plans with adequate time to design and implement payment systems that link provider reimbursement with services covered under the contract or associated quality outcomes, we finalized transition periods related to pass-through payments for specified provider types to which states make most pass-through payments under Medicaid managed care programs: Hospitals, physicians, and nursing homes (81 FR 27590 through 27592). As finalized, § 438.6(d)(2) and (3) provide a 10-year transition period for hospitals, subject to limitations on the amount of pass-through payments. For MCO, PIHP, or PAHP contracts beginning on or after July 1, 2027, states will not be permitted to require pass-through payments for hospitals. The final rule also provides a 5-year transition period for pass-through payments to physicians and nursing facilities. For MCO, PIHP, or PAHP contracts beginning on or after July 1,

2022, states will not be permitted to require pass-through payments for physicians or nursing facilities. These transition periods provide states, network providers, and managed care plans significant time and flexibility to integrate current pass-through payment arrangements into allowable payment structures under actuarially sound capitation rates, including enhanced fee schedules or the other approaches consistent with § 438.6(c)(1)(i) through (iii).

As finalized, § 438.6(d) limits the amount of pass-through payments to hospitals as a percentage of the ''base amount,'' which is defined in paragraph (a) and calculated pursuant to rules in paragraph (d)(2). Section 438.6(d)(3) specifies a schedule for the phased reduction of the base amount, limiting the amount of pass-through payments to hospitals. For contracts beginning on or after July 1, 2017, the state may require pass-through payments to hospitals under the contract up to 100 percent of the base amount, as defined in the final rule. For subsequent contract years (contracts beginning on or after July 1, 2018 through contracts beginning on or after July 1, 2026), the portion of the base amount available for pass-through payments decreases by 10 percentage points per year. For contracts beginning on or after July 1, 2027, no pass-through payments to hospitals are permitted. The May 6, 2016 final rule noted that nothing would prohibit a state from eliminating pass-through payments to hospitals before contracts beginning on or after July 1, 2027. However, the final rule provided for a phased reduction in the percentage of the base amount that can be used for pass-through payments, because a phased transition would support the development of stronger payment approaches while mitigating any disruption to states and providers.

We believe that states will be able to more easily transition existing pass-through payments to physicians and nursing facilities to payment structures linked to services covered under the contract. Consequently, the May 6, 2016 final rule, in § 438.6(d)(5), provided a shorter time period for eliminating pass-through payments to physicians and nursing facilities and did not require a prescribed limit or phase down for these payments; states have the option to eliminate these payments immediately or phase down these payments over the 5 year transition period if they prefer. As noted in the final rule, the distinction between hospitals and nursing facilities and physicians was also based on the comments from stakeholders during the public comment period (81 FR 27590).

B. Questions About the Final Rule

Since publication of the May 6, 2016 final rule, we have received inquiries about states' ability to integrate new or increased pass-through payments into Medicaid managed care contracts. As explained in the CMCS Informational Bulletin (CIB) published on July 29, 2016,[1] adding new or increased pass-through payments for hospitals, physicians, or nursing facilities complicates the required transition of these pass-through payments to permissible provider payment models.

The transition periods under the final rule provide states, network providers, and managed care plans significant time and flexibility to move existing pass-through payment arrangements (that is, those in effect when the final rule was published) into different, permissible payment structures under actuarially sound capitation rates, including enhanced fee schedules or the other approaches consistent with § 438.6(c)(1)(i) through (iii). We did not intend states to begin additional or new pass-through payments, or to increase existing pass-through payments, notwithstanding the adjustments to the base amount permitted in § 438.6(d)(2), after the final rule was published but before July 1, 2017; such actions are contrary to and undermine the policy goal of eliminating pass-through payments. We clarify that we would not permit a pass-through payment amount to exceed the lesser of the amounts calculated pursuant to paragraph (d)(3) of this proposed rule. For states to add new or to increase existing pass-through payments is inconsistent with longstanding CMS policy, the proposal made in the June 1, 2015 proposed rule, and the May 6, 2016 final rule, which reflects the general policy goal to effectively and efficiently transition away from pass-through payments.

Under the final rule, we provided a delayed compliance date for § 438.6(c) and (d); we will enforce compliance with § 438.6(c) and (d) no later than the rating period for Medicaid managed care contracts beginning on or after July 1, 2017. Our exercise of enforcement discretion in permitting delayed compliance was not intended to create new opportunities for states to add or increase existing pass-through payments before July 1, 2017. This delay was intended to address concerns articulated by commenters, among them states and providers, that an abrupt end to directed pass-through payments could cause damaging disruption to safety-net providers. As discussed in the final rule and this proposal, pass-through payments are inconsistent with our interpretation and implementation of the statutory requirement for actuarially sound capitation rates because pass-through payments do not tie provider payments to the provision of services under the contract (81 FR 27588). Further, such required payments reduce managed care plans' ability to control expenditures, effectively use value-based purchasing strategies, and implement provider-based quality initiatives. The May 6, 2016 final rule made clear our position on these payments and our intent that they be eliminated from Medicaid managed care delivery systems, except for the directed payment models permitted by § 438.6(c), or the payments excluded from the definition of a pass-through payment in § 438.6(a), such as FQHC wrap payments.

The transition periods provided under § 438.6(d) are for states to identify existing pass-through payments and begin either tying such payments directly to services and utilization covered under the contract or eliminating them completely in favor of other support mechanisms for providers that comply with the requirements in § 438.6(c). The transition periods for current pass-through payments minimize disruption to local health care systems and interruption of beneficiary access by permitting a gradual step down from current levels of pass-through payments: (1) At the schedule and subject to the limit announced in the May 6, 2016 final rule for hospitals under § 438.6(d)(3); and (2) at a schedule adopted by the state for physicians and nursing facilities under § 438.6(d)(5). By providing states, network providers, and managed care plans significant time and flexibility to integrate current pass-through payment arrangements into different payment structures (including enhanced fee schedules or the other approaches consistent with § 438.6(c)(1)(i) through (c)(1)(iii)) and into actuarially sound capitation rates, we intended to address comments that the June 1, 2015 proposed rule would be unnecessarily disruptive and endanger safety-net provider systems that states have developed for Medicaid.

Recent questions from states indicate the transition period and delayed enforcement date have caused some confusion regarding our intent for increased and new pass-through

[1] The Use of New or Increased Pass-Through Payments in Medicaid Managed Care Delivery Systems; available at: *https://www.medicaid.gov/federal-policy-guidance/downloads/cib072916.pdf.* CMCS also noted in this CIB that it intended to further address in future rulemaking the issue of adding new or increased pass-through payments to managed care contracts.

payments for contracts prior to July 1, 2017, because the final rule did not explicitly prohibit such additions or increases. While we assumed such a prohibition in the final rule, we believe that additional rulemaking is necessary to clarify this issue in light of these comments. Under this proposed rule, we are linking pass-through payments permitted during the transition period to the aggregate amounts of pass-through payments that were in place at the time the May 6, 2016 final rule became effective on July 5, 2016, which is consistent with the intent under the final rule to phase out pass-through payments under Medicaid managed care contracts.

II. Provisions of the Current Proposed Rule

For reasons discussed above, we propose to revise § 438.6(d) to better effectuate the intent of the May 6, 2016 final rule. First, we propose to limit the availability of the transition periods in § 438.6(d)(3) and (5) (that is, the ability to continue pass-through payments for hospitals, physicians, or nursing facilities) to states that can demonstrate that they had such pass-through payments in either: (A) Managed care contract(s) and rate certification(s) for the rating period that includes July 5, 2016, and that were submitted for our review and approval on or before July 5, 2016; or (B) if the managed care contract(s) and rate certification(s) for the rating period that includes July 5, 2016 had not been submitted to us on or before July 5, 2016, the managed care contract(s) and rate certification(s) for a rating period before July 5, 2016 that had been most recently submitted to us for review and approval as of July 5, 2016.

Second, we propose to prohibit retroactive adjustments or amendments, notwithstanding the adjustments to the base amount permitted in § 438.6(d)(2), to managed care contract(s) and rate certification(s) to add new pass-through payments or increase existing pass-through payments defined in § 438.6(a). In this proposed rule, we clarify that we would not permit a pass-through payment amount to exceed the lesser of the amounts calculated pursuant to paragraph (d)(3).

Third, we propose to establish a new maximum amount of permitted pass-through payments for each year of the transition period. For hospitals, a state would be limited (in the total amount of permissible pass-through payments) during each year of the transition period to the lesser of either: (A) The percentage of the base amount applicable to that contract year; or (B) the pass-through payment amount identified in proposed paragraph (d)(1)(i). Thus, the amount of pass-through payments identified by the state in order to satisfy proposed paragraph (d)(1)(i) would be compared to the amount representing the applicable percentage of the base amount that is calculated for each year of the transition period. For pass-through payments to physicians and nursing facilities, we also propose to limit the amount of pass-through payments during the transition period to the amount of pass-through payments to physicians and nursing facilities under the contract and rate certification identified in proposed paragraph (d)(1)(i). In making these comparisons to the pass-through payments under the managed care contract(s) in effect for the rating period covering July 5, 2016 as identified in proposed paragraph (d)(1)(i)(A), or the rating period before July 5, 2016 as identified in proposed paragraph (d)(1)(i)(B), we will look at total pass-through payment amounts for the specified provider types. Past aggregate amounts of hospital pass-through payments will be used in determining the maximum amount for hospital pass-through payments during the transition period; past aggregate amounts of physician pass-through payments will be used in determining the maximum amount for physician pass-through payments during the transition period; and past aggregate amounts of nursing facility pass-through payments will be used in determining the maximum amount for nursing facility pass-through payments during the transition period.

Under our proposed rule, the aggregate amounts of pass-through payments in each provider category would be used to set applicable limits for the provider type during the transition period, without regard to the specific provider(s) that receive a pass-through payment. For example, if the pass-through payments in the contract identified under paragraph (d)(1)(i) were to 5 specific hospitals, the aggregate amount of pass-through payments to those hospitals would be relevant in establishing the limit during the transition period, but different hospitals could be the recipients of pass-through payments during the transition. As an alternative, we also considered whether the state should be limited by amount and recipient during the transition period; in our example, this would mean that only those 5 hospitals that received pass-through payments could receive such payments during the transition period. However, we believe this narrower policy would be more limiting than originally intended under the May 6, 2016 final rule when the transition periods were finalized. We request comment on our proposed approach. To implement our proposal, we propose to amend the existing regulation text to revise paragraph (d)(1) (including new (d)(1)(i) and (ii)), revise paragraph (d)(3) (including new (d)(3)(i) and (ii)), and revise paragraph (d)(5) as described below.

We propose to revise paragraph (d)(1) to clarify that a state may continue to require an MCO, PIHP, or PAHP to make pass-through payments (as defined in § 438.6(a)) to network providers that are hospitals, physicians, or nursing facilities under the contract, provided the requirements of paragraph (d) are met. We are proposing to retain the regulation text that provides explicitly that states may not require MCOs, PIHPs, or PAHPs to make pass-through payments other than those permitted under paragraph (d).

Under proposed paragraph (d)(1)(i), a state would be able to use the transition period for pass-through payments to hospitals, physicians, or nursing facilities only if the state can demonstrate that it had pass-through payments for hospitals, physicians, or nursing facilities, respectively, in both the managed care contract(s) and rate certification(s) that meet the requirements in either proposed paragraph (d)(1)(i)(A) or (B). We recognize that states may have multiple managed care plans and therefore multiple contracts and rate certifications that are necessary to establish the existence and amount of pass-through payments. We propose in paragraph (d)(1)(i)(A) that the managed care contract(s) and rate certification(s) must be for the rating period that includes July 5, 2016 and have been submitted for our review and approval on or before July 5, 2016. If the state had not yet submitted MCO, PIHP, or PAHP contract(s) and rate certification(s) for the rating period that includes July 5, 2016, we propose in paragraph (d)(1)(i)(B) that the state must demonstrate that it required the MCO, PIHP, or PAHP to make pass-through payments for a rating period before July 5, 2016 in the managed care contract(s) and rate certification(s) that were most recently submitted for our review and approval as of July 5, 2016. We propose to use the date July 5, 2016 for the purpose of identifying the pass-through payments in managed care contract(s) and rate certification(s) that are eligible for the pass-through payment transition period because it is consistent with the intent of the May 6, 2016 final rule that the transition period be used by states

that had pass-through payments in their MCO, PIHP, or PAHP contracts when we finalized that rule. These are the states for which we were concerned, based on the comments to the June 1, 2015 proposed rule, that an abrupt end to pass-through payments could be disruptive to their health care delivery system and safety-net providers. We believe that limiting the use of the transition period to states that had pass-through payments in effect as of the effective date of the May 6, 2016 final rule provides for the achievement of the policy goal of eliminating these types of payments. We did not intend for the May 6, 2016 final rule to incentivize or encourage states to add new pass-through payments, as we believe that these payments are inconsistent with actuarially sound rates.

Under proposed paragraph (d)(1)(ii), we would not approve a retroactive adjustment or amendment, notwithstanding the adjustments to the base amount permitted in § 438.6(d)(2), to managed care contract(s) and rate certification(s) to add new pass-through payments or increase existing pass-through payments defined in § 438.6(a). We clarify that we would not permit a pass-through payment amount to exceed the lesser of the amounts calculated pursuant to paragraph (d)(3) of this proposed rule. We are proposing paragraph (d)(1)(ii) to prevent states from undermining our policy goal to limit the use of the transition period to states that had pass-through payments in effect as of the effective date of the May 6, 2016 final rule. This proposed change also supports the policy rationale under the May 6, 2016 final rule and the July 29, 2016 CMCS Informational Bulletin (CIB) by prohibiting new or increased pass-through payments in Medicaid managed care contract(s), notwithstanding the adjustments to the base amount described above. As stated in the final rule and CIB, we believe that pass-through payments are not consistent with the statutory requirements in section 1903(m) of the Act and regulations for actuarially sound capitation rates because pass-through payments do not tie provider payments with the provision of services. The proposed change also addresses our concern that new or increased pass-through payments substantially complicate the required transition of pass-through payments to permissible provider payment models, as such additions or increases by states will further delay the development of permissible, stronger payment approaches that are based on the utilization or delivery of services to enrollees covered under the contract, or the quality and outcomes of services.

As an alternative to proposed paragraphs (d)(1)(i) and (ii), we considered linking eligibility for the transition period to those states with pass-through payments for hospitals, physicians, or nursing facilities that were in approved (not just submitted for our review and approval) managed care contract(s) and rate certification(s) only for the rating period covering July 5, 2016. However, we believe that such an approach is not administratively feasible for states or CMS because it does not recognize the nuances of the timing and approval processes; we believe our proposed approach provides the appropriate parameters and conditions for pass-through payments in managed care contract(s) and rate certification(s) during the transition period. We request comment on our proposed approach.

In proposed paragraph (d)(3), we propose to amend the cap on the amount of pass-through payments to hospitals that may be incorporated into managed care contract(s) and rate certification(s) during the transition period for hospital payments, which will apply to rating periods for contract(s) beginning on or after July 1, 2017. Specifically, we propose to revise § 438.6(d)(3) to require that the limit on pass-through payments each year of the transition period be the lesser of: (A) The sum of the results of paragraphs (d)(2)(i) and (ii),[2] as modified under the schedule in this paragraph (d)(3); or (B) the total dollar amount of pass-through payments to hospitals identified by the state in the managed care contract(s) and rate certification(s) used to meet the requirement in paragraph (d)(1)(i). This proposed language would limit the amount of pass-through payments each contract year to the lesser of the calculation adopted in the May 6, 2016 final rule (the ''base amount''), as decreased each successive year under the schedule in this paragraph (d)(3), or the total dollar amount of pass-through payments to hospitals identified by the state in managed care contract(s) and rate certification(s) described in paragraph (d)(1)(i). For example, if a state had $10 million in pass-through payments to hospitals in the contract and rate certification used to meet the requirement in paragraph (d)(1)(i), that $10 million figure would be compared each year to the base amount as reduced on the schedule described in this paragraph (d)(3); the lower number would be used to limit the total amount of pass-through payments to hospitals allowed for that specific contract year.

This proposed language would prevent increases of aggregate pass-through payments for hospitals during the transition period beyond what was already in place when the pass-through payment limits and transition periods were finalized in the May 6, 2016 final rule. As an alternative to our proposal here, we considered stepping down both the base amount (as provided in paragraph (d)(3)) and the total dollar amount of pass-through payments to hospitals identified by the state in managed care contract(s) and rate certification(s) described in paragraph (d)(1)(i), as part of the lesser of calculation. The lower stepped-down amount would be used as the cap each year of the transition period. However, we believe such an approach would require a state to phase down their pass-through payments more quickly than originally intended under the May 6, 2016 final rule. Our proposal here is not intended to speed up the rate of a state's phase down of pass-through payments; rather, we are intending to prevent increases in pass-through payments and the addition of new pass-through payments beyond what was already in place when the pass-through payment limits and transition periods were finalized given that this was the final rule's intent. We request comment on our proposed approach.

In addition, we are proposing to amend paragraph (d)(3) to provide that states must meet the requirements in paragraph (d)(1)(i) to continue pass-through payments for hospitals during the transition period. We believe this additional text is necessary to be consistent with our intent, explained above, for the proposed revisions to paragraph (d)(1). As in the May 6, 2016 final rule, pass-through payments to hospitals must be phased out no longer than on the 10-year schedule, beginning with rating periods for contracts that start on or after July 1, 2017. We added the phrase ''rating periods'' to be consistent with our terminology in the final rule; we made this clarifying edit throughout proposed paragraphs (d)(3) and (d)(5). We request comment on our proposed amendments to paragraph (d)(3).

[2] The portion of the base amount calculated in § 438.6(d)(2)(i) is analogous to performing UPL calculations under a FFS delivery system, using payments from managed care plans for Medicaid managed care hospital services in place of the state's payments for FFS hospital services under the state plan. The portion of the base amount calculated in § 438.6(d)(2)(ii) takes into account hospital services and populations included in managed care during the rating period that includes pass-through payments which were in FFS two years prior.

Finally, we are proposing to revise § 438.6(d)(5) to be consistent with the proposed revisions in § 438.6(d)(1)(i) and to limit the total dollar amount of pass-through payments that is available each contract year for physicians and nursing facilities. We are not proposing to implement a phase-down for pass-through payments to physicians or nursing facilities. We propose that for states that meet the requirements in paragraph (d)(1)(i), rating periods for contracts beginning on or after July 1, 2017 through rating periods for contracts beginning on or after July 1, 2021, may continue to require pass-through payments to physicians or nursing facilities under the MCO, PIHP, or PAHP contract; such pass-through payments may be no more than the total dollar amount of pass-through payments for each category identified in the managed care contracts and rate certifications used to meet the requirement in paragraph (d)(1)(i). We added the phrase ''rating periods'' to be consistent with our terminology in the final rule; we made this clarifying edit throughout proposed paragraphs (d)(3) and (d)(5). This approach is consistent with the general goal of not increasing pass-through payments beyond what was included as of the effective date of the final rule when the pass-through payment limits and transition periods were finalized and creating a consistent standard in alignment with the proposed changes in § 438.6(d)(3) to limit increasing pass-through payments made to hospitals, physicians, and nursing facilities under Medicaid managed care contracts. We request comment on our proposal as a whole and the specific proposed regulation text.

III. Collection of Information Requirements

This rule would not impose any new or revised information collection, reporting, recordkeeping, or third-party disclosure requirements or burden. Our proposed revision of § 438.6(d) would not impose any new or revised IT system requirements or burden because the existing regulation at § 438.7 requires the rate certification to document special contract provisions under § 438.6. Consequently, there is no need for review by the Office of Management and Budget under the authority of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

IV. Regulatory Impact Analysis

A. Statement of Need

As discussed throughout this proposed rule, we have significant concerns that pass-through payments have negative consequences for the delivery of services in the Medicaid program. The existence of pass-through payments may affect the amount that a managed care plan is willing or able to pay for the delivery of services through its base rates or fee schedule. In addition, pass-through payments make it more difficult to implement quality initiatives or to direct beneficiaries' utilization of services to higher quality providers because a portion of the capitation rate under the contract is independent of the services delivered and outside of the managed care plan's control. Put another way, when the fee schedule for services is set below the normal market, or negotiated rate, to account for pass-through payments, moving utilization to higher quality providers can be difficult because there may not be adequate funding available to incentivize the provider to accept the increased utilization. When pass-through payments guarantee a portion of a provider's payment and divorce the payment from service delivery, it is more challenging for managed care plans to negotiate provider contracts with incentives focused on outcomes and managing individuals' overall care.

We realize that some pass-through payments have served as a critical source of support for safety-net providers who provide care to Medicaid beneficiaries. Several commenters raised this issue in response to the June 1, 2015 proposed rule.[3] Therefore, in response to some commenters' request for a delayed implementation of the limitation on directed payments and to address concerns that an abrupt end to these payments could create significant disruptions for some safety-net providers who serve Medicaid managed care enrollees, we included in the May 6, 2016 final rule a delay in the compliance date and a transition period for existing pass-through payments to hospitals, physicians, and nursing facilities. These transition periods begin with the compliance date, and were designed and finalized to enable affected providers, states, and managed care plans to transition away from existing pass-through payments. Such payments could be transitioned into payments tied to covered services, value-based payment structures, or delivery system reform initiatives without undermining access for the beneficiaries; alternatively, states could step down such payments and devise other methods to support safety-net providers to come into compliance with § 438.6(c) and (d).

However, as noted previously, the transition period and delayed enforcement date caused some confusion regarding increased and new pass-through payments. The May 6, 2016 final rule created a strong incentive for states to move swiftly to put pass-through payments into place in order to take advantage of the pass-through payment transition periods established in the May 6, 2016 final rule. Contrary to our discussion in the May 6, 2016 final rule regarding the statutory requirements in section 1903(m) of the Act and regulations for actuarially sound capitation rates, some states expressed interest in developing new and increased pass-through payments for their respective Medicaid managed care programs as a result of the May 6, 2016 final rule. In response to this interest, we published the July 29, 2016 CMCS Informational Bulletin (CIB) to quickly address questions regarding the ability of states to increase or add new pass-through payments under Medicaid managed care plan contracts and capitation rates, and to describe our plan for monitoring the transition of pass-through payments to approaches for provider payment under Medicaid managed care programs that are based on the delivery of services, utilization, and the outcomes and quality of the delivered services.

We noted in the CIB that the transition from one payment structure to another requires robust provider and stakeholder engagement, agreement on approaches to care delivery and payment, establishing systems for measuring outcomes and quality, planning efforts to implement changes, and evaluating the potential impact of change on Medicaid financing mechanisms. Whether implementing value-based payment structures, implementing other delivery system reform initiatives, or eliminating pass-through payments, there will be transition issues for states coming into compliance; adequately working through transition issues, including ensuring adequate base rates, is central to both delivery system reform and to strengthening access, quality, and efficiency in the Medicaid program. We stressed that the purpose and intention of the transition periods is to acknowledge that pass-through payments existed prior to the final rule and to provide states, network providers, and managed care plans time and flexibility to integrate existing pass-through payment arrangements into permissible payment structures.

[3] Available at: *https://www.gpo.gov/fdsys/pkg/FR-2015-06-01/pdf/2015-12965.pdf.*

As we noted in the CIB and throughout this proposed rule, we believe that adding new or increased pass-through payments for hospitals, physicians, or nursing facilities, beyond what was included as of July 5, 2016, into Medicaid managed care contracts exacerbates a problematic practice that is inconsistent with our interpretation of statutory and regulatory requirements, complicates the required transition of these pass-through payments to stronger payment approaches that are based on the utilization or delivery of services to enrollees covered under the contract, or the quality and outcomes of such services, and reduces managed care plans' ability to effectively use value-based purchasing strategies and implement provider-based quality initiatives. In the CIB, we signaled the possible need, and our intent, to further address this policy in future rulemaking and link pass-through payments through the transition period to the amounts of pass-through payments in place at the time the Medicaid managed care rule was effective on July 5, 2016.

B. Overall Impact

We have examined the impacts of this rule as required by Executive Order 12866 on Regulatory Planning and Review (September 30, 1993), Executive Order 13563 on Improving Regulation and Regulatory Review (January 18, 2011), the Regulatory Flexibility Act (RFA) (September 19, 1980, Pub. L. 96–354), section 1102(b) of the Act, section 202 of the Unfunded Mandates Reform Act of 1995 (March 22, 1995; Pub. L. 104–4), Executive Order 13132 on Federalism (August 4, 1999), and the Congressional Review Act (5 U.S.C. 804(2)).

Executive Orders 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Section 3(f) of Executive Order 12866 defines a ''significant regulatory action'' as an action that is likely to result in a rule: (1) Having an annual effect on the economy of $100 million or more in any 1 year, or adversely and materially affecting a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or state, local or tribal governments or communities (also referred to as ''economically significant''); (2) creating a serious inconsistency or otherwise interfering with an action taken or planned by another agency; (3) materially altering the budgetary impacts of entitlement grants, user fees, or loan programs or the rights and obligations of recipients thereof; or (4) raising novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in the Executive Order.

A regulatory impact analysis (RIA) must be prepared for major rules with economically significant effects ($100 million or more in any 1 year). We estimate that this rule is ''economically significant'' as measured by the $100 million threshold, and hence a major rule under the Congressional Review Act.

The May 6, 2016 final rule included a RIA (81 FR 27830). During that analysis, we did not project a significant fiscal impact for § 438.6(d). When we reviewed and analyzed the May 6, 2016 final rule, we concluded that states would have other mechanisms to build in the amounts currently provided through pass-through payments in approvable ways, such as approaches consistent with § 438.6(c)(1)(i) through (iii). If a state was currently building in $10 million in pass-through payments to hospitals under their current managed care contracts, we assumed that the state would incorporate the $10 million into their managed care rates in permissible ways rather than spending less in Medicaid managed care. While it is possible that this would be more difficult for states with relatively larger amounts of pass-through payments, the long transition period provided under the May 6, 2016 final rule to phase out pass-through payments should help states to integrate existing pass-through payments into actuarially sound capitation rates through permissible Medicaid financing structures, including enhanced fee schedules or the other approaches consistent with § 438.6(c)(1)(i) through (iii).

A number of states have integrated some form of pass-through payments into their managed care contracts for hospitals, nursing facilities, and physicians. In general, the size and number of the pass-through payments for hospitals has been more significant than for nursing facilities and physicians. We noted in the final rule (81 FR 27589) a number of reasons provided by states for using pass-through payments in their managed care contracts. As of the effective date of the final rule, we estimate that at least eight states have implemented approximately $105 million in pass-through payments for physicians annually; we estimate that at least three states have implemented approximately $50 million in pass-through payments for nursing facilities annually; and we estimate that at least 16 states have implemented approximately $3.3 billion in pass-through payments for hospitals annually. These estimates are somewhat uncertain, as before the final rule, we did not have regulatory requirements for states to document and describe pass-through payments in their managed care contracts or rate certifications. The amount of pass-through payments often represents a significant portion of the overall capitation rate under a managed care contract. We have seen pass-through payments that have represented 25 percent, or more, of the overall managed care contract and 50 percent of individual rate cells. The rationale for these pass-through payments in the development of the capitation rates is often not transparent, and it is not clear what the relationship of these pass-through payments is to the provision of services or the requirement for actuarially sound rates.

Since the publication of the final rule, we received a formal proposal from one state regarding $250–275 million in pass-through payments to hospitals; we have been working with the state to identify permissible implementation options for their proposal, including under § 438.6(c), and tie such payments to the utilization and delivery of services (as well as the outcomes of delivered services). We heard informally that two additional states are working to develop pass-through payment mechanisms to increase total payments to hospitals by approximately $10 billion cumulatively. We also heard informally from one state regarding a $200 million proposal for pass-through payments to physicians. We also continue to receive inquiries from states, provider associations, and consultants who are developing formal proposals to add new pass-through payments, or increase existing pass-through payments, and incorporate such payments into Medicaid managed care rates. While it is difficult for us to conduct a detailed quantitative analysis given this considerable uncertainty and lack of data, we believe that without this proposed (and a subsequent final) rulemaking, states would continue to ramp-up pass-through payments in ways that are not consistent with the pass-through payment transition periods established in the final rule.

Since we cannot produce a detailed quantitative analysis, we have developed a qualitative discussion for this RIA. We believe there are many benefits with this regulation, including consistency with the statutory requirements in section 1903(m) of the

Act and regulations for actuarially sound capitation rates, improved transparency in rate development processes, stronger payment approaches that are based on the utilization or delivery of services to enrollees covered under the contract, or the quality and outcomes of such services, and improved support for delivery system reform that is focused on improved care and quality for Medicaid beneficiaries. We believe that the costs of this regulation to state and federal governments will not be significant; CMS currently reviews and works with states on managed care contracts and rates, and because pass-through payments exist today, any additional costs to state or federal governments should be negligible.

Relative to the current baseline, this rule is likely to prevent increases in or the development of new pass-through payments, which would reduce state and federal government transfers to hospitals, physicians, and nursing facilities. Because we lack sufficient information to forecast the eventual overall impact of the May 6, 2016 final rule on state pass-through payments, we provide only a qualitative discussion of the impact of this rule on avoided transfers. Given these avoided transfers, we believe this rule is economically significant as defined by Executive Order 12866.

C. Anticipated Effects

The RFA requires agencies to analyze options for regulatory relief of small businesses. For purposes of the RFA, small entities include small businesses, nonprofit organizations, and small governmental jurisdictions. Small entities are those entities, such as health care providers, having revenues between $7.5 million and $38.5 million in any 1 year. Individuals and states are not included in the definition of a small entity. We do not believe that this proposed rule would have a significant economic impact on a substantial number of small businesses.

In addition, section 1102(b) of the Act requires us to prepare a regulatory impact analysis for any rule that may have a significant impact on the operations of a substantial number of small rural hospitals. This analysis must conform to the provisions of section 603 of the RFA. For purposes of section 1102(b) of the Act, we define a small rural hospital as a hospital that is located outside a Metropolitan Statistical Area and has fewer than 100 beds. We do not anticipate that the provisions in this proposed rule will have a substantial economic impact on small rural hospitals. We are not preparing analysis for either the RFA or section 1102(b) of the Act because we have determined, and the Secretary certifies, that this proposed rule will not have a significant economic impact on a substantial number of small entities or a significant impact on the operations of a substantial number of small rural hospitals in comparison to total revenues of these entities.

Section 202 of the Unfunded Mandates Reform Act of 1995 (UMRA) also requires that agencies assess anticipated costs and benefits before issuing any rule whose mandates require spending in any 1 year of $100 million in 1995 dollars, updated annually for inflation. In 2016, that is approximately $146 million. This proposed rule does not mandate any costs (beyond this threshold) resulting from (A) imposing enforceable duties on state, local, or tribal governments, or on the private sector, or (B) increasing the stringency of conditions in, or decreasing the funding of, state, local, or tribal governments under entitlement programs.

Executive Order 13132 establishes certain requirements that an agency must meet when it issues a proposed rule that imposes substantial direct requirements or costs on state and local governments, preempts state law, or otherwise has federalism implications. Since this proposed rule does not impose any costs on state or local governments, the requirements of Executive Order 13132 are not applicable. In accordance with the provisions of Executive Order 12866, this proposed rule was reviewed by the Office of Management and Budget.

D. Alternatives Considered

During the development of this proposed rule, we assessed all regulatory alternatives and discussed in the preamble a few alternatives that we considered. First, in discussing our proposed revisions to paragraphs (d)(1)(i) and (ii) in this proposed rule, we considered linking eligibility for the transition period to those states with pass-through payments for hospitals, physicians, or nursing facilities that were in approved (not just submitted for CMS review and approval) managed care contract(s) and rate certification(s) only for the rating period covering July 5, 2016. However, we believe that such an approach is not administratively feasible for states or CMS because it does not recognize the nuances of the timing and approval processes; we believe our proposed approach provides the appropriate parameters and conditions for pass-through payments in managed care contract(s) and rate certification(s) during the transition period.

Second, in discussing our proposed revisions to paragraphs (d)(3) and (d)(5) in this proposed rule, we described that the aggregate amounts of pass-through payments in each provider category would be used to set applicable limits for the provider type during the transition period, without regard to the specific provider(s) that receive a pass-through payment. As an alternative, we considered whether the state should be limited by amount and recipient during the transition period; however, we believe this narrower policy would be more limiting than originally intended under the May 6, 2016 final rule when the pass-through payment transition periods were finalized.

E. Accounting Statement

As discussed in this RIA, the benefits, costs, and transfers of this regulation are identified in table 1 as qualitative impacts only.

TABLE 1—ACCOUNTING STATEMENT

Category	Primary estimate	Low estimate	High estimate	Units			Notes
				Year dollars	Discount rate	Period covered	
Benefits							
Non-Quantified	*Benefits include:* Consistency with the statutory requirements in section 1903(m) of the Act and regulations for actuarially sound capitation rates; improved transparency in rate development processes; stronger payment approaches that are based on the utilization or delivery of services to enrollees covered under the contract, or the quality and outcomes of such services; and improved support for delivery system reform that is focused on improved care and quality for Medicaid beneficiaries.						
Costs							
Non-Quantified	Costs to state or federal governments should be negligible.						
Transfers							
Non-Quantified	Relative to the current baseline, this rule is likely to prevent increases in or the development of new pass-through payments, which would reduce state and federal government transfers to hospitals, physicians, and nursing facilities. Given these avoided transfers, we believe this rule is economically significant as defined by Executive Order 12866.						

List of Subjects in 42 CFR Part 438

Grant programs—health, Medicaid, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, the Centers for Medicare & Medicaid Services proposes to amend 42 CFR chapter IV as set forth below:

PART 438—MANAGED CARE

■ 1. The authority citation for part 438 continues to read as follows:

Authority: Sec. 1102 of the Social Security Act (42 U.S.C. 1302).

■ 2. Section 438.6 is amended by revising paragraphs (d)(1), (3), and (5) to read as follows:

§ 438.6 Special contract provisions related to payment.

* * * * *

(d) * * * (1) *General rule.* States may continue to require MCOs, PIHPs, and PAHPs to make pass-through payments (as defined in paragraph (a) of this section) to network providers that are hospitals, physicians, or nursing facilities under the contract, provided the requirements of this paragraph (d) are met. States may not require MCOs, PIHPs, and PAHPs to make pass-through payments other than those permitted under this paragraph (d).

(i) In order to use a transition period described in this paragraph (d), a State must demonstrate that it had pass-through payments for hospitals, physicians, or nursing facilities in:

(A) Managed care contract(s) and rate certification(s) for the rating period that includes July 5, 2016, and were submitted for CMS review and approval on or before July 5, 2016; or

(B) If the managed care contract(s) and rate certification(s) for the rating period that includes July 5, 2016 had not been submitted to CMS on or before July 5, 2016, the managed care contract(s) and rate certification(s) for a rating period before July 5, 2016 that had been most recently submitted for CMS review and approval as of July 5, 2016.

(ii) CMS will not approve a retroactive adjustment or amendment, notwithstanding the adjustments to the base amount permitted in paragraph (d)(2) of this section, to managed care contract(s) and rate certification(s) to add new pass-through payments or increase existing pass-through payments defined in paragraph (a) of this section.

* * * * *

(3) *Schedule for the reduction of the base amount of pass-through payments for hospitals under the MCO, PIHP, or PAHP contract and maximum amount of permitted pass-through payments for each year of the transition period.* For States that meet the requirement in paragraph (d)(1)(i) of this section, pass-through payments for hospitals may continue to be required under the contract but must be phased out no longer than on the 10-year schedule, beginning with rating periods for contract(s) that start on or after July 1, 2017. For rating periods for contract(s) beginning on or after July 1, 2027, the State cannot require pass-through payments for hospitals under a MCO, PIHP, or PAHP contract. Until July 1, 2027, the total dollar amount of pass-through payments to hospitals may not exceed the lesser of:

(i) A percentage of the base amount, beginning with 100 percent for rating periods for contract(s) beginning on or after July 1, 2017, and decreasing by 10 percentage points each successive year; or

(ii) The total dollar amount of pass-through payments to hospitals identified in the managed care contract(s) and rate certification(s) used to meet the requirement of paragraph (d)(1)(i) of this section.

* * * * *

(5) *Pass-through payments to physicians or nursing facilities.* For States that meet the requirement in paragraph (d)(1)(i) of this section, rating periods for contract(s) beginning on or after July 1, 2017 through rating periods for contract(s) beginning on or after July 1, 2021, may continue to require pass-through payments to physicians or nursing facilities under the MCO, PIHP, or PAHP contract of no more than the total dollar amount of pass-through payments to physicians or nursing facilities, respectively, identified in the managed care contract(s) and rate certification(s) used to meet the requirement of paragraph (d)(1)(i) of this section. For rating periods for contract(s) beginning on or after July 1, 2022, the State cannot require pass-through payments for physicians or nursing facilities under a MCO, PIHP, or PAHP contract.

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

46 CFR Parts 2 and 8

[Docket No. USCG–2016–0880]

RIN 1625–AC35

Adding the Polar Ship Certificate to the List of SOLAS Certificates and Certificates Issued by Recognized Classification Societies

AGENCY: Coast Guard, DHS.

ACTION: Notice of proposed rulemaking.

SUMMARY: This proposed rule would add a new Polar Ship Certificate to the list of existing certificates required to be carried on board all U.S. and foreign-flagged vessels subject to the International Convention for Safety of Life at Sea (SOLAS) and operating in Arctic and Antarctic waters, generally above 60 degrees north latitude and below 60 degrees south latitude lines. Additionally, the Coast Guard proposes to add this certificate to the list of SOLAS certificates that recognized classification societies are authorized to issue on behalf of the Coast Guard. The proposed rule would apply to commercial cargo ships greater than 500 gross tons engaging in international voyages, and passenger ships carrying more than 12 passengers engaging in international voyages, when these ships operate within polar waters as defined by the Polar Code.

DATES: Comments and related material must be submitted to the online docket via *http://www.regulations.gov* by December 22, 2016.

ADDRESSES: You may submit comments identified by docket number USCG–2016–0880 using the Federal eRulemaking Portal at *http://www.regulations.gov.* See the ''Public Participation and Request for Comments'' portion of the **SUPPLEMENTARY INFORMATION** section for further instructions on submitting comments.

Collection of Information: You must submit comments on the collection of information discussed in section V.D. of this preamble both to the Coast Guard's docket and to the Office of Information and Regulatory Affairs (OIRA) in the White House Office of Management and Budget. OIRA submissions can use one of the listed methods:

- *Email* (preferred)—*oira_submission@omb.eop.gov* (include the docket number and ''Attention: Desk Officer for Coast Guard, DHS'' in the subject line of the email);
- *Fax*—202–395–6566; or
- *Mail*—Office of Information and Regulatory Affairs, Office of Management and Budget, 725 17th Street NW., Washington, DC 20503, ATTN: Desk Officer, U.S. Coast Guard.

FOR FURTHER INFORMATION CONTACT: For information about this document call or email CDR Todd Howard, Systems Engineering Division (CG–ENG–3), Coast Guard; telephone 202–372–1375, email *Todd.M.Howard@uscg.mil.*

I. Public Participation and Request for Comments

We view public participation as essential to effective rulemaking, and will consider all comments and material received during the comment period. Your comment can help shape the outcome of this rulemaking. If you submit a comment, please include the docket number for this rulemaking, indicate the specific section of this document to which each comment applies, and provide a reason for each suggestion or recommendation.

We encourage you to submit comments through the Federal eRulemaking Portal at *http://www.regulations.gov.* If your material cannot be submitted using *http://www.regulations.gov,* contact the person in the **FOR FURTHER INFORMATION CONTACT** section of this document for alternate instructions. Documents mentioned in this notice and all public comments, are in our online docket at *http://www.regulations.gov* and can be viewed by following that Web site's instructions. Additionally, if you go to the online docket and sign up for email alerts, you will be notified when comments are posted or a final rule is published.

We accept anonymous comments. All comments received will be posted without change to *http://www.regulations.gov* and will include any personal information you have provided. For more about privacy and the docket, you may review a Privacy Act notice regarding the Federal Docket Management System in the March 24, 2005, issue of the **Federal Register** (70 FR 15086).

We are not planning to hold a public meeting but may do so if public comments indicate a meeting would be helpful. We would issue a separate **Federal Register** notice to announce the date, time, and location of that meeting.

III. Basis, Purpose, and Background

In 2014 and 2015, in resolutions MSC.384(94) and MEPC.264(68), respectively, the International Maritime Organization (IMO) adopted the safety and environmental provisions of the International Code for Ships Operating in Polar Waters (Polar Code). The Polar Code adds requirements to existing IMO Conventions—the International Convention for the Safety of Life at Sea (SOLAS), the International Convention for the Prevention of Pollution from Ships (MARPOL), and the International

Convention on Standards of Training, Certification, and Watchkeeping for Seafarers (STCW)—in consideration of hazards and conditions unique to the polar waters, and an expected increase in traffic in Arctic and Antarctic waters. These additional hazards include navigation in ice and low temperatures, high latitude communications and navigation, remoteness from response resources, and limited hydrographic charting. The Polar Code enters into force on January 1, 2017.

One of the requirements for ships subject to the Polar Code is to carry a Polar Ship Certificate pursuant to SOLAS. The Polar Ship Certificate attests that the vessel has met applicable requirements of SOLAS to the satisfaction of the U.S. Government. As a signatory to SOLAS, the United States has a treaty obligation to ensure compliance with SOLAS requirements. This rulemaking creates a certificate that U.S. vessels subject to SOLAS will need in order to travel internationally within polar waters as defined by the Polar Code beginning January 1, 2017. Beginning on that date, U.S. vessels that are subject to the SOLAS Convention and elect to travel through the polar waters of States other than the United States will have to carry a Polar Ship Certificate or risk detention, denial of entry, or expulsion from the polar waters of other States. This rulemaking is necessary to allow the Coast Guard to create the new Polar Ship Certificate and add it to the list of certificates in 46 CFR part 2, and to allow third-party organizations to issue it on the Coast Guard's behalf by adding the new Polar Ship Certificate to the list of certificates in 46 CFR part 8. Foreign flagged vessels, subject to SOLAS and operating in polar waters, must also carry the Polar Ship Certificate but the certificate will be issued by the vessel's class society or flag state. However, the Coast Guard will examine foreign flagged vessels during Port State Control boardings to ensure that they are properly certificated. The SOLAS requirement applies to commercial cargo ships greater than 500 gross tons engaging in international voyages, and passenger ships carrying more than 12 passengers engaging in international voyages, when these ships operate within polar waters as defined by the Polar Code.

The Coast Guard is authorized to regulate this subject matter under, among other authorities, Executive Order 12234, ''Enforcement of the Convention for the Safety of Life at Sea,'' 45 FR 58801; 33 U.S.C. 1231; 46 U.S.C. 2103, 3306, 3316, and 3703; and Department of Homeland Security Delegation No. 0170.1.

This rulemaking does not address the Polar Code requirements added to SOLAS other than the Polar Code Certificate. Furthermore, this rulemaking does not address the Polar Code requirements added to MARPOL or STCW. In order to begin issuing Polar Code certificates as soon as possible after January 1, 2017, the Coast Guard is implementing the Polar Code through several rulemakings. The first project, which is this rulemaking, only requires SOLAS vessels operating in polar waters to carry a Polar Ship Certificate. It contains the regulatory changes required for the issuance of the certificates and reflects only the documentation costs for the certificates. Subsequent rulemakings will implement the design, engineering, and personnel standards found in the Polar Code. The incremental costs for industry to comply with these standards will be accounted for in the regulatory analyses for those rulemakings.

IV. Discussion of Proposed Rule

This proposed rule would amend 46 CFR 2.01–6(a)(1), and 2.01–25 (a)(1) and (a)(2), to include the Polar Ship Certificate in the list of International Convention Certificates to be issued by the Officer in Charge of Marine Inspection and carried on certain passenger, cargo, and tankships engaged in international voyages. This proposed requirement would apply to commercial cargo ships greater than 500 gross tons and passenger ships carrying more than 12 passengers that engage in international voyages within polar waters as defined by the Polar Code.

This proposed rule would also amend 46 CFR 8.320(b) to include the Polar Ship Certificate in the list of International Convention Certificates that could be issued by recognized classification societies. Both the Coast Guard and classification societies would have the ability to issue these certificates.

By adding this certificate to the Code of Federal Regulations, we enable marine inspectors to ensure compliance with the SOLAS requirement to carry a Polar Ship Certificate, which fulfills the United States' treaty obligations with regard to the certification. Additionally, without this certificate, the U.S.-flagged vessels sailing on international routes would be subject to deficiencies, detentions, denial of entry or expulsion from the polar waters of other port States due to lack of proper certificates.

V. Regulatory Analyses

We developed this proposed rule after considering numerous statutes and Executive orders related to rulemaking. Below we summarize our analyses based on these statutes or Executive orders.

A. Regulatory Planning and Review

Executive Orders 12866 (Regulatory Planning and Review) and 13563 (Improving Regulation and Regulatory Review) direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This rule has not been designated a ''significant regulatory action,'' under section 3(f) of Executive Order 12866. Accordingly, the rule has not been reviewed by the Office of Management and Budget.

This proposed rule would add a new Polar Ship Certificate to the list of existing SOLAS certificates required to be carried onboard all U.S. and foreign-flagged vessels above 500 GT ITC, (the International Convention on Tonnage Measurement of Ships 1969 or gross tonnage assigned under this system) or passenger ships carrying more than 12 passengers on international routes operating in polar waters, generally above 60 degrees north latitude and below 60 degrees south latitude lines. The IMO adopted the Polar Code in 2014 and 2015 to acknowledge that polar waters impose additional operating demands and risks.[1] Since the United States is signatory to the SOLAS convention, the United States has an obligation to ensure that all U.S.-flagged vessels subject to SOLAS that transit in polar waters carry a Polar Ship Certificate. Owners and operators of all foreign-flagged vessels subject to SOLAS would have their Polar Ship Certificates issued by the appropriate flag state.

This proposed rule would amend 46 CFR part 2, ''Vessel Inspections'', Subpart 2.01, ''Inspecting and Certificating of Vessels'' including Section 2.01–25, ''International Convention for Safety of Life at Sea'' to include the new Polar Ship Certificate. The proposed rule would also amend 46 CFR part 8, ''Vessel Inspection

[1] *http://www.imo.org/en/MediaCentre/HotTopics/polar/Documents/POLAR%20CODE%20TEXT%20AS%20ADOPTED.pdf.*

Alternatives'', Subpart C, ''International Convention Certificate Issuance'', Section 8.320, ''Classification Society Authorization to Issue International Certificates'', at paragraph (b) to include the Polar Ship Certificate as one of the certificates that can be issued by a recognized classification society on behalf of the Coast Guard.

Affected Population

Based on Coast Guard field data and Coast Guard databases such as the Marine Information for Safety and Law Enforcement (MISLE) database, the Coast Guard's Ship Arrival Notification System (SANS), and data from the Coast Guard's Navigation Data Center (NDC), we estimate the total number of U.S. vessels this proposed rule would affect to be about 41 total vessels. This is the number of U.S. vessels that have transited internationally in polar waters, which are generally above and below the 60 degree north and 60 degree south latitudes lines, respectively, over the past 5 years and have made port calls in Alaskan ports over this time period. Of the 41 U.S. vessels that have transited polar waters during the 5-year period, some entered polar waters in the first year and not the following year, but returned in subsequent years. The opposite is also true; some vessels that did not transit polar waters in the first year of the data period did so in the following years of the data period.

Recognized classification societies that have been granted delegated authority from the Coast Guard would issue the Polar Ship Certificate, an international convention certificate, on behalf of the Coast Guard for U.S.-flagged vessels that are classed under the authority in 46 CFR 8.320(a). Although multiple classification societies could request authorization to issue the Polar Ship Certificate on behalf of the Coast Guard, for the purpose of this analysis, the Coast Guard assumes one classification society would issue the Polar Ship Certificate to vessel owners and operators on behalf of the Coast Guard for vessels that are classed.

Cost Analysis

Classification Societies Cost

This proposed rule would amend 46 CFR 8.320(b) to enable recognized class societies to request authorization to issue the Polar Ship Certificate on behalf of the Coast Guard. For vessels that are not classed, the Coast Guard would issue the Polar Ship Certificate.

There are two cost elements associated with a classification society issuing a Polar Ship Certificate: The cost to review and return a signed copy of the Memorandum of Agreement (MOA) between the recognized classification society and the Coast Guard, and the cost to create the certificate once the MOA is approved by each party. As stated in 46 CFR 8.320(c), the Coast Guard will enter into an agreement with the classification society to issue international convention certificates such as the Polar Ship Certificate. The MOA essentially represents a delegation letter and is a standard document that allows a recognized classification society to issue the Polar Ship Certificate on behalf of the Coast Guard.

Based on Coast Guard data from the Office of Design and Engineering Standards, we estimate it would take a recognized classification society 1 hour to review the MOA. A classification and documentation specialist would review the MOA and because there is no equivalent labor category in the Bureau of Labor Statistics' (BLS) Occupational Employment Statistics National Industry-Specific Occupational Employment and Wage Estimates for May 2015, we used the ''Business Operations Specialist, All Other'' (Occupation Code 13–1199) category for Deep Sea, Coastal, and Great Lakes Water Transportation with a North American Industry Classification Code of 483100 as a representative occupation. The mean hourly wage rate for this occupation is $38.63. Since this is an unloaded hourly wage rate, we added a load factor to obtain a loaded hourly wage rate. We used BLS' 2015 Employer Cost for Employee Compensation databases to calculate and apply a load factor of 1.53 to obtain a loaded hourly labor rate of about $59.10 for this occupation.[2] We also estimate it would take a recognized classification society attorney 1 hour to review the MOA for legal sufficiency. Using the Bureau of Labor Statistics' (BLS) Occupational Employment Statistics National Industry-Specific Occupational Employment and Wage Estimates for May 2015, we used the category ''Lawyers'' (Occupation Code 23–1011) for Deep Sea, Coastal, and Great Lakes Water Transportation with a North American Industry Classification Code of 483100. The mean hourly wage for this occupation is $65.51. Since this is an unloaded hourly wage rate, we apply the same load factor of 1.53 as derived above to obtain a loaded hourly wage rate of about $100.23.

We estimate the one-time cost of the proposed rule to the classification society to review the MOA to be about $162.33, undiscounted, which includes a $3 postage cost to mail the signed MOA to the Coast Guard for approval and signature [($59.10 × 1 hour) + ($100.23 × 1 hour) + $3 for postage].

Based on a recognized classification society estimate, it would take approximately 40 hours to create the Polar Ship Certificate once the MOA is approved. As with the MOA, a classification and documentation specialist would create the certificate. We again used the ''Business Operations Specialist, All Other'' as a representative occupation. We estimate the one-time labor cost for a documentation specialist to create the certificate to be about $2,364.00 (40 hours[3] × $59.10/hour), undiscounted. Since the certificate is presented to a vessel owner or operator during the normal course of a vessel survey, we did not estimate a cost for this action.

We estimate the total undiscounted cost of the proposed rule to a recognized classification society to be about $2,526.33 ($2,364 document development cost + $162.33 MOA review cost).

Vessel Cost

There are two cost elements associated with vessel owners and operators: The fee a recognized classification society would charge a vessel owner or operator for issuing the certificate for U.S. classed vessels only, and the cost associated with a crewmember posting the certificate onboard a vessel. Based on Coast Guard vessel data, approximately 20 percent, or 8 out of the 41 U.S.-flagged vessels, are not classed by a recognized classification society.

The entry into force date for the Polar Code is Jan 1, 2017 but the requirement for ships is to have the certificate by their first renewal or intermediate exam after the entry into force date. This is a phased in approach that will likely

[2] Information can be viewed at, *http://www.bls.gov/oes/current/naics4_483100.htm.* A loaded labor rate is what a company pays per hour to employ a person, not the hourly wage. The loaded labor rate includes the cost of benefits (health insurance, vacation, etc.). The load factor for wages is calculated by dividing total compensation by wages and salaries. For this analysis, we used BLS' Employer Cost for Employee Compensation/Transportation and Materials Moving Occupations, Private Industry Report (Series IDs, CMU2010000520000D and CMU2020000520000D for all workers using the multi-screen data search). Using 2015 Q4 data for the cost of compensation and cost per hour worked, we divide the total compensation amount of $27.46 by the wage and salary amount of $17.91 to obtain the load factor of about 1.53, rounded. *See* the following Web site, *http://data.bls.gov/cgi-bin/dsrv.* Multiplying 1.53 by $38.63, we obtain a loaded hourly wage rate of about $59.10.

[3] Based on estimate provided by a recognized class society to USCG.

spread out the issuing of the certificates over a period of about 3 years. Therefore, the Coast Guard would issue the Polar Ship Certificate to those vessel owners and operators as part of its routine inspection regime. A recognized classification society would issue the Polar Ship Certificate to the remaining 33 vessel owners and operators in the first, second, third, sixth, seventh, and eighth year of the analysis period.

The Polar Ship Certificate is valid for a 5-year period and, after this time, the recognized classification society and the Coast Guard would issue a new Polar Ship Certificate to vessel owners and operators, depending upon whether a vessel is classed or not classed. The cost of the reissued Polar Ship Certificate is $100 if a recognized classification society issues the certificate (for 33 classed U.S. vessels); therefore, it would cost each U.S. classed vessel owner and operator $100 after 5 years to renew the certificate, or in the sixth, seventh, and eighth year of the analysis period. We assume a 3-year phase-in period for owners and operators to obtain the certificates. For the purpose of this analysis, we assume 13 U.S. vessels owners and operators (11 classed and 2 unclassed) would obtain a certificate in the first year and 14 (11 classed and 3 unclassed) U.S. vessel owners and operators would obtain one in the second year and third year. For reissuance, we again assume the same 13 vessel owners and operators would obtain a certificate in the sixth year and the same 14 vessel owners and operators would obtain one in the seventh and eighth year each; we divided the population accordingly to obtain even values.

Vessel owners and operators would be required to post the certificate in a conspicuous area onboard the vessel with other applicable operating certificates. Based on the Office of Management and Budget's (OMB) approved collection of information (COI) entitled ''Various International Agreement Safety Certificates,'' OMB control number 1625–0017, a crewmember onboard a vessel equivalent to a U.S. Coast Guard cadet would post the Polar Ship Certificate. Using the Coast Guard's Commandant Instruction 7310.1P for loaded hourly wages outside of the Government, the hourly wage rate of a person outside of the Government equivalent to a cadet is $26.00. We estimate it takes a crewmember about 6 minutes, or 0.1 hours, to post the Polar Ship Certificate at a labor cost of about $2.60 per vessel ($26.00 × 0.1 hours). To post the Polar Ship Certificate, we estimate the total initial cost of the proposed rule to 13 U.S. vessel owners and operators to be about $33.80 (13 U.S. classed and unclassed vessels × 0.1 hours × $26.00); regardless of whether the Polar Ship Certificate is issued by a recognized classification society, or by the Coast Guard. Owners and operators of U.S. vessels would incur this cost again in the sixth year because a crewmember would review and post the reissued certificate for the same 13 vessels.

We estimate the initial cost of the proposed rule to vessel owners and operators to be about $1,133.80 in the first year (11 classed vessels × $100) + (11 classed vessels × $2.60 to post the certificate) + two unclassed vessels × $2.60 to post the certificate). Because vessel owners and operators would be required to carry the Polar Ship Certificate beginning January 2017, the cost for the renewed certificate in the sixth year (or 5 years after the initial year) would again be $1,133.80 for these 13 vessels. In the second and third and seventh and eighth year, we estimate the cost for 14 U.S. vessel owners and operators to obtain and post a Polar Ship Certificate to be about $1,136.40 [(11 classed vessels × $100) + (11 classed vessels × $2.60 to post the certificate) + three unclassed vessels in each of these years × $2.60 each year to post the certificate]. See Table 1 below.

TABLE 1—SUMMARY OF CLASSIFICATION SOCIETY AND VESSEL OWNERS AND OPERATORS COSTS

[Undiscounted]

Cost item	Unit cost	Labor rate	Hours	Total cost
Classification Society Certificate Creation.		$59.10	40	$2,364 (incurred in year one).
Classification Society Review of MOA.		$100.23 (Attorney)	1	$162.33 (incurred in year one and includes $3 postage).
		$59.10 (Business Operations Specialist).	1	
Certificate Fee Charged to Vessel Owners and Operators.	$100			$1,100 (incurred in years one to three and six to eight); $3,300 for 33 classed vessels in years one to three and six to eight.
Vessel Crewmember Reviews and Posts Certificate.		$26	0.1	$2.60 (incurred in year one to three and six to eight); $33.80 in year one and six and $36.40 in years two and three; seven and eight.
Total Undiscounted Cost (Initial year).				$3,660.13.

We estimate the total 10-year undiscounted cost to be $6,813.20 for all 41 U.S. vessel owners and operators ($1,133.80 in the first and sixth year + $1,136.40 in the second, third, seventh and eighth years of the analysis period). See Table 2 below.

We estimate the initial undiscounted cost of the proposed rule to a recognized classification society and to 13 (11 classed and 2 unclassed vessels) U.S. vessel owners and operators to be about $3,660.13 ($2,364 for the classification society to create the certificate + $162.33 for the classification society to review the MOA + $1,100 fee charged by a classification society to issue the certificate to the 11 classed vessel owners and operators + $33.80 for crewmembers of the 13 classed and unclassed vessels to post the certificate). We estimate the total 10-year undiscounted cost of the proposed rule to industry to be about $9,339.53 ($3,660.13 in the first year + $1,136.40 in the second, third, seventh, and eighth years + $1,133.80 in the sixth year). See Table 2 below.

We estimate the 10-year present value, or discounted cost of the proposed rule to industry to be between $7,465.49 and $8,435.28 at 7 and 3 percent discount rates, respectively. We estimate the annualized cost to be between $1,062.92 and $988.87 at 7 and

3 percent discount rates, respectively. See Table 2 below.

TABLE 2—TOTAL COSTS OF THE PROPOSED RULE TO INDUSTRY

[10-Year period of analysis, 7 and 3 percent discount rates, 2016 dollars]

Period	Cost (undiscounted)	7%	3%
1	$3,660.13	$3,420.68	$3,553.52
2	1,136.40	992.58	1,071.17
3	1,136.40	927.64	1,039.97
4			
5			
6	1,133.80	755.50	949.54
7	1,136.40	707.69	924.00
8	1,136.40	661.40	897.08
9			
10			
Total	9339.53	7,465.49	8,435.28
Annualized		1,062.92	988.87

Note: Totals may not sum due to independent rounding.

Government Costs

There are 3 cost elements associated with this proposed rule for the Coast Guard: A one-time cost of creating the certificate and issuing (in the initial year, second, third, sixth, seventh, and eighth year) the Polar Ship Certificate to a vessel owner or operator if a vessel is not classed by a class society, reviewing the certificate onboard a vessel as part of the Coast Guard's routine inspection regime, and a one-time cost of creating and sending the delegation letter or MOA to a classification society for signature.

For the eight U.S. vessels that are not classed by a recognized classification society, the Coast Guard would issue the Polar Ship Certificate in the first through the third year and the sixth through the eighth year. Because of the phase-in period, we divided the eight vessels evenly over three years to arrive at two in the first and sixth year and three in the second, third, seventh, and eighth year, with the sixth, seventh, and eighth year being the years when the certificate is reissued.

Based on information from personnel in the Coast Guard's Office of Vessel Compliance, we estimate it takes Coast Guard personnel with the average equivalence of a GS–15 about 40 hours to create and review a Polar Ship Certificate at an average loaded hourly wage rate of $109 using the Coast Guard's Commandant Instruction 7310.1P. We estimate the one-time cost for the Coast Guard to create the Polar Ship Certificate to be about $4,360 (40 hours × $109/hour), for the eight U.S. vessels without a classification.

Based on an OMB-approved COI (Control Number 1625–0017), we estimate it takes a Coast Guard Officer, the Officer in Charge Marine Inspection (OCMI), or more specifically, a Lieutenant with the rank of an O–3, about 30 minutes, or 0.5 hours per vessel, to review the Polar Ship Certificate for validity and correctness (the Coast Guard issues and reviews the certificate at the same time during its normal inspection regime). Using the Coast Guard's Commandant Instruction 7310.1P for loaded hourly wages, an O–3 has a loaded hourly wage rate of $78.00. Therefore, we estimate the total undiscounted cost to the Government to review the Polar Ship Certificate for all 41 affected vessels to be about $1,599.00 ($78.00 × 41 vessels × 0.5 hours), or about $39.00 per vessel. We use the same methodology as above with owners and operators obtaining certificates over a three-year period (13 in the first and sixth year and 14 in the second, third, seventh and eighth year), with the sixth, seventh and eighth year being the renewal years. Again, 13 inspections (11 classed and 2 unclassed) would take place in the first and sixth year, and 14 (11 classed and 3 unclassed) in second, third, seventh, and eighth year. Therefore, the first year cost to the Government to review the certificate would be about $507.00 (11 classed and 2 unclassed vessels × $39.00). The Government would incur this cost again in the sixth year when the certificate is reissued. In years two, three, seven, and eight, the Government would incur a certificate review cost of about $546.00 (11 classed and 3 unclassed vessels × $39.00) in each of these years.

The Coast Guard would also examine the certificates of foreign-flagged vessels that enter U.S. ports in polar waters as part of its routine Port State Control vessel boardings. Because this will take place during routine Coast Guard examinations and for issuing certificates of compliance, the time it takes to perform this task is minimal and as such we do not estimate a cost to the Government.

Because this proposed rule would also enable a recognized classification society to issue the Polar Ship Certificate on behalf of the Coast Guard, the Coast Guard and a recognized classification society would enter into an MOA which delegates authority to the classification society and sets forth guidelines for cooperation between the Coast Guard and a classification society with respect to initial and subsequent inspections for certifications and periodic re-inspections or examinations of vessels of the United States, as defined by 46 U.S.C. 2101 (46).

Based on information from the Coast Guard's Office of Design and Engineering Standards, Coast Guard personnel with the average equivalence of a GS–15 would prepare the MOA for delivery to a classification society. Again, we used an average loaded hourly labor rate of $109 for a GS–15. We estimate it would take Government personnel about 6.25 hours to prepare and review the MOA. We estimate it would cost about $3 in postage for the Government to send the MOA to the classification society.

We estimate the total cost incurred by the Government for the MOA to be about $681.25 plus $3 for postage, or a total cost of $684.25, undiscounted (6.25 hours × $109). Other than the postage cost, other costs incurred are

opportunity costs, since personnel would perform this function in the normal course of his or her duties.

We estimate the total initial cost to the Government to be about $5,551.25 ($4,360 to create and review the certificate, $507.00 to review the certificates for 11 classed and 2 unclassed U.S. vessels, and $684.25 for the MOA). We estimate the total 10-year undiscounted cost to the Government to be about $8,242.25 ($5,551.25 in the initial year + $546.00 in the second, third, seventh and eighth years + $507.00 in the sixth year). We estimate the 10-year present value, or discounted cost of the proposed rule to the Government, to be between $7,106.31 and $7,703.46, using 7 and 3 percent discount rates, respectively. We estimate the annualized cost to be between $1,011.78 and $903.08, using 7 and 3 percent discount rates, respectively. See Table 3 below.

TABLE 3—TOTAL COSTS OF THE PROPOSED RULE TO THE GOVERNMENT

[10-Year period of analysis, 7 and 3 percent discount rates, 2016 dollars]

Period	Cost (undiscounted)	7%	3%
1		$5,188.08	$5,389.56
2		476.90	514.66
3		445.70	499.67
4			
5			
6		337.84	424.60
7		340.02	443.95
8		317.78	431.02
9			
10			
Total	8,242.25	7,106.31	7,703.46
Annualized		1,011.78	903.08

Note: Totals may not sum due to independent rounding.

Total Cost of the Proposed Rule to Industry and Government

We estimate the total 10-year combined undiscounted cost of the proposed rule to industry and the Government to be about $17,582. We estimate the 10-year present value, or discounted cost of the proposed rule to industry and the Government, to be between $14,572 and $16,139 at 7 and 3 percent discount rates, respectively. We estimate the annualized cost to be between $2,075 and $1,892 using the same discount rates. See Table 4 below.

TABLE 4—SUMMARY OF COSTS OF THE PROPOSED RULE TO INDUSTRY AND GOVERNMENT

[10-Year period of analysis, 2016 dollars]

Type of cost	Industry	Government	Total cost	Annualized
Undiscounted	$9,339.53	$8,242.25	$17,581.78	
7%	7,465.49	7,106.31	14,571.80	2,074.70
3%	8,435.28	7,703.46	16,138.74	1,891.95

Benefits

The primary benefit of this proposed rule is to ensure that vessel owners and operators have a valid Polar Ship Certificate onboard the vessel, which shows compliance with applicable SOLAS regulations and requirements. Without a Polar Ship Certificate, a vessel would be subject to deficiencies, detention, denial of entry, or expulsion from the polar waters of other port States. Adherence to SOLAS would ensure vessels are capable of operating in polar waters, and the hazards and adverse weather conditions unique to polar waters. Furthermore, since the United States is a signatory to SOLAS and has a treaty obligation to ensure compliance with SOLAS requirements, this rulemaking would ensure that the United States is compliant with this SOLAS requirement.

Alternatives

When creating this proposed rule, the Coast Guard considered several alternatives. The previous analysis represents the preferred alternative, which would ensure U.S. vessel owners and operators that operate vessels in polar waters would be compliant with the IMO Polar Code and SOLAS Convention. With the carriage of the Polar Ship Certificate onboard vessels, U.S. vessel owners and operators would be compliant with the SOLAS convention and applicable SOLAS operating requirements when transiting in polar waters.

Alternative 1: Preferred Alternative

The analysis for this alternative appears in the ''Regulatory Analysis'' section of the preamble of this proposed rule.

Alternative 2: No Action Alternative

In this alternative, the United States would take no action regarding the issuance of a Polar Ship Certificate and none of the costs itemized in the preferred alternative would be incurred. However, with this alternative, the United States would not be compliant with its international legal obligations as a signatory Government to the SOLAS Convention. Additionally, the lack of appropriate certifications would likely negatively impact U.S.-flagged vessels on international voyages in polar waters of other port States. United States vessels would potentially be subject to deficiencies, detentions, denial of entry, or expulsion from the polar waters of other port states due to the lack of proper certificates. Because the United States would not meet its international treaty obligations in this

alternative, the Coast Guard rejects this alternative.

Alternative 3: Large Scale Regulatory Implementation of the Polar Code

In this alternative, the Coast Guard would implement the entire Polar Code in one regulatory effort. This would create or modify regulations throughout 46 and 33 CFR. The affected vessels, operators, and the Government would also incur the costs and impacts of the implementation of the entire Polar Code from a single regulatory effort. The Coast Guard rejected this alternative because it would greatly delay the issuance of the certificate beyond the January 1, 2017 effective date of the Polar Code.

By moving forward with the proposed alternative, U.S. vessel owners and operators who obtain a Polar Ship Certificate would be in compliance with the operating requirements in the SOLAS Convention. Therefore, they would be permitted to transit in polar waters of foreign nations as soon as possible after January 1, 2017, without adverse consequences such as denial of entry, expulsion, or possibly detainment.

B. Small Entities

Under the Regulatory Flexibility Act (RFA), 5 U.S.C. 601–612, we have considered whether this proposed rule would have a significant economic impact on a substantial number of small entities. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. In accordance with the Regulatory Flexibility Act (RFA) (5 U.S.C. 601–612), the Coast Guard prepared this threshold analysis that examines the impacts of the proposed rule on small entities.

Based on our analysis of the entities affected by this proposed rule, all of the 41 affected U.S.-flagged vessels are owned by U.S. entities. To determine which entities are small, we compiled the data used in this analysis from publicly available and proprietary sources such as Manta and Cortera, and from the affected entities' Web sites. We used available owner's business information to identify the entities' primary line of business as coded by the North American Industry Classification System (NAICS) to find employee and revenue size information. We used this information to determine whether we should consider a business ''small'' by comparing it to the Small Business Administration's (SBA) ''Table of Small Business Size Standards Matched to North American Industry Classification System Codes.'' In some cases, SBA classifies businesses on a standard either based on the number of employees or annual revenues.[4] We found that no small government jurisdictions or non-profits own any of the U.S. vessels affected by this proposed rule.

We found that 19 of the 41 (46 percent) affected companies are small entities and the remaining companies are not small, based on SBA's size standards. We found 11 different NAICS codes represent the 19 small entities with the NAICS code 488330, ''Navigational Services to Shipping'', representing 8 of the 19 small entities or 42 percent of them.

We estimate the initial cost to each classed vessel owner and operator to be about $102.60 [$1,100/11 classed U.S vessel owners and operators that have their vessels classed by a class society + $28.60 (11 classed vessels × $2.60)/11 (cost for crewmembers of 11 classed U.S. vessel owners and operators to post the certificate divided by the number of U.S. classed vessel owners and operators. Again, in the sixth year, these 11 classed U.S. vessel owners and operators would incur this cost)]. In the second, third, seventh, and eighth year, 11 classed vessel U.S. vessel owners and operators would incur this same cost. The eight U.S. vessel owners who own vessels that are not classed would only incur a cost of $2.60 per vessel in the each of the years described above or the first (two vessels) through the third year (three vessels in the second and third year each) and sixth (the same two vessels as in the first year) through the eighth year (the same three vessels as in the second and third year in the seventh and eighth year each) of the analysis period.

Of the 19 small entities, 16 had annual revenue information (the remaining three small entities only had employee information). Of the 16, 12 are classed, which means four (12/3 years for the phase-in period) would incur the $102.60 in the initial year and again in the second and third year and for reissuance of the certificate again in the sixth, seventh, and eighth year of the analysis period. The four that are not classed would only incur the cost of posting the certificate of $2.60 in each year described above (or essentially one in the first year and second year and again in the sixth and seventh year when the certificate is reissued and two in the third year and again in the eighth year when the certificate is reissued). All 16 small entities or 100 percent would have an annual revenue impact of less than 1 percent in the initial year and in the second, third, sixth, seventh, and eighth year of the analysis period. Thus, the estimated impact on the affected entities is not a significant economic impact.

Based on the preceding analysis, the Coast Guard certifies under 5 U.S.C. 605(b) that this proposed rule would not have a significant economic impact on a substantial number of small entities. If you think that your business, organization, or governmental jurisdiction qualifies as a small entity and that this rule would have a significant economic impact on it, please submit a comment to the Docket Management Facility at the address under **ADDRESSES**. In your comment, explain why you think it qualifies and how and to what degree this proposed rule would economically affect it.

C. Assistance for Small Entities

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996, Public Law 104–121, we want to assist small entities in understanding this proposed rule so that they can better evaluate its effects on them and participate in the rulemaking. If the proposed rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please consult CDR Todd Howard using the contact information given in the **FOR FURTHER INFORMATION CONTACT** section of this proposed rule. The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247).

D. Collection of Information

The Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520) requires that the Coast Guard consider the impact of paperwork and other information collection burdens imposed on the

[4] Readers can access small entity information online at *http://www.sba.gov/size/indextableofsize.html.*

public. According to the 1995 amendments to the Paperwork Reduction Act, an agency may not collect or sponsor the collection of information, nor may it impose an information collection requirement unless it displays a currently valid OMB control number.

This action contains proposed amendments to the existing information collection requirements previously approved under OMB Control Number 1625–0017.

As defined in 5 CFR 1320.3(c), ''collection of information'' comprises reporting, recordkeeping, monitoring, posting, labeling, and other similar actions. The title and description of the information collections, a description of those who must collect the information, and an estimate of the total annual burden follow. The estimate covers the time for reviewing instructions, searching existing sources of data, gathering and maintaining the data needed, and completing and reviewing the collection.

The summary of revised 1625–0017 collection follows:

Title: Various International Agreement Safety Certificates.

OMB Control Number: 1625–0017.

Summary of the Collection of Information: The International Convention for the Safety of Life at Sea (SOLAS) is a product of the International Maritime Organization (IMO), an agency of the United Nations. SOLAS applies to all mechanically propelled cargo and tank vessels of 500 or more gross tons (GT), and to all mechanically propelled passenger vessels carrying more than 12 passengers that engage in international voyages. By IMO's definition, an ''international voyage'' means a voyage from a country to which the Convention applies to a port outside the country, or vice versa. The United States, represented by the U.S. Coast Guard, was a major contributor and proponent of the 1974 Convention (SOLAS 74). President Carter's Executive Order 12234 (September 3, 1980), noted that SOLAS 74 was signed at London on November 1, 1974, proclaimed by the President of the United States on January 28, 1980, and entered into force for the United States on May 25, 1980.

SOLAS 1974 currently requires one or more of the following certificates to be carried on onboard certain passenger and cargo ships engaged in international voyages (46 CFR 2.01–25):

(1) Passenger Ship Safety Certificate and Record
(2) Cargo Ship Safety Construction Certificate
(3) Cargo Ship Safety Equipment Certificate and Record
(4) Cargo Ship Safety Radio Certificate (issued by Federal Communications Commission (FCC))
(5) Nuclear Passenger Ship Safety Certificate
(6) Nuclear Cargo Ship Safety Certificate
(7) Safety Management Certificate
(8) International Ship Security Certificate
(9) High-Speed Craft Safety Certificate

The Coast Guard is adding the Polar Ship Certificate to the list of certificates that it can issue.

Need for Information: In June of 2015, in resolutions MSC.384(94) and MEPC.264(68), the International Maritime Organization (IMO) adopted the International Code for Ships Operating in Polar Waters (Polar Code). The Polar Code raises the safety standards for commercial ships operating in or transiting through Arctic and Antarctic waters as well as enhances environmental protection for polar waters that include coastal communities in the U.S. Arctic. As a signatory to the International Convention for the Safety of Life at Sea (SOLAS), the United States has a treaty obligation to ensure compliance with SOLAS requirements.

All mechanically propelled passenger vessels carrying more than 12 passengers that engage in international voyages and all mechanically propelled cargo vessels of more than 500 gross tons that engage in international voyages within polar waters as defined by the Polar Code would be required to have the Polar Ship Certificate. The Polar Ship Certificate is valid for 5 years.

The purpose of this rulemaking is to ensure that marine inspectors could issue certificates required by the Polar Code and that these certificates are being carried on all applicable vessels. Additionally, this rulemaking will add the Polar Ship Certificate to the list of certificates that classification societies could issue on behalf of the Coast Guard-in consideration of hazards and conditions unique to polar waters and a potential increase in traffic in Arctic and Antarctic waters. These additional hazards include navigation in ice and low temperatures, high latitude communications and navigation, remoteness from response resources, and limited hydrographic charting.

We calculate the hour burden on an annual basis, which takes into account the reissuance of the certificate every fifth year. The estimated burden is 1/10 of an hour or 6 minutes. About 8 vessels (41 total vessels/5 years) annually equates to 48 minutes or 0.8 hours for the hour burden. Or equivalently, 13 classed and unclassed U.S. vessels (11 classed and 2 unclassed) × 6 minutes in the first and sixth years + 14 classed unclassed U.S vessels (11 classed and 3 unclassed) × 6 minutes in the second, third, seventh and eighth year for a total of 492 minutes divided by 82 vessels (13 in the first and sixth years and 14 in the second, third, seventh, and eighth year of the analysis period. Recall, because vessel owners and operators would have 3 years to obtain a certificate, we divided the population essentially into thirds, 13 in the first and sixth years and 14 in the second, third, and seventh and eighth years).

Proposed use of Information: The Polar Ship Certificate attests that the vessel has met applicable requirements of SOLAS to the satisfaction of the U.S. Government. Without the certificate, U.S.-flagged vessels could be detained in foreign ports as being unsafe.

Description of the Respondents: Respondents are the owner, agent, Master, operator, or person in charge of a U.S.-flagged vessel that transits in polar waters.

Number of Respondents: The existing OMB-approved number of respondents is 413. This proposed rule would not change the number of respondents because the vessel population that would be affected is a subset of the existing number of respondents; this proposed rule is not adding new respondents to this collection.

Frequency of Response: The existing OMB-approved number of responses is 912. This proposed rule would increase the number of responses by 14 annually (41 vessels/3-year renewal period) to 926.

Burden of Response: The existing OMB-approved burden of response is 6 minutes, or 0.1 hours, or the time it takes for a crewmember of a vessel to post the Polar Ship Certificate onboard the vessel.

Estimate of Total Annual Burden: The existing OMB-approved total annual burden is 94 hours. This proposed rule would increase the burden hours annually by one hour. The estimated total annual burden would now be 95 hours annually.

As required by 44 U.S.C. 3507(d), we will submit a copy of this proposed rule to OMB for its review of the COI.

We ask for public comment on the proposed COI to help us determine how useful the information is; whether it can help us perform our functions better; whether it is readily available elsewhere; how accurate our estimate of the burden of collection is; how valid our methods for determining burden

are; how we can improve the quality, usefulness, and clarity of the information; and how we can minimize the burden of collection.

If you submit comments on the COI, submit them both to OMB and to the Docket Management Facility where indicated under the **ADDRESSES** section of this proposed rule, by the date under the **DATES** section.

You need not respond to a COI unless it displays a currently valid control number from OMB. Before the Coast Guard could enforce the COI requirements in this proposed rule, OMB would need to approve the Coast Guard's request to collect this information.

E. Federalism

A rule has implications for federalism under Executive Order 13132 (''Federalism'') if it has a substantial direct effect on States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this proposed rule under Executive Order 13132 and have determined that it is consistent with the fundamental federalism principles and preemption requirements as described in Executive Order 13132. Our analysis is explained below.

It is well settled that States may not regulate in categories reserved for regulation by the Coast Guard. It is also well settled that Coast Guard regulations regarding vessel design, construction, alteration, repair, maintenance, operation, equipping, personnel qualification, and manning issued under the authority of 46 U.S.C. 3306, 3703, 7101, and 8101 are within fields foreclosed from regulation by the States. *See United States* v. *Locke,* 529 U.S. 89, 90 (2000) (stating ''Congress has left no room for state regulation of these matters.''). This rule adds the Polar Ship Certificate to the list of certificates required, if applicable, by the SOLAS. Additionally, this rule adds this certificate to the list of SOLAS certificates that recognized classification societies are authorized to issue on behalf of the Coast Guard. The issuance of international certificates is within the sole purview of the Coast Guard to regulate pursuant to 46 U.S.C. 3306, 3703, 7101, and 8101; Executive Order 12234; and the principles discussed in *Locke.* Thus, the regulations are consistent with the principles for federalism and preemption requirements in Executive Order 13132.

While it is settled that States may not regulate in categories in which Congress intended the Coast Guard to be the sole source of a vessel's obligations, the Coast Guard recognizes the key role that State and local governments may have in making regulatory determination. Additionally, for rules with federalism implications and preemptive effect, Executive Order 13132 specifically directs agencies to consult with State and local governments during the rulemaking process. If you believe this rule has implications for federalism under Executive Order 13132, please contact the person listed in the **FOR FURTHER INFORMATION** section of this preamble.

F. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995, 2 U.S.C. 1531–1538, requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 (adjusted for inflation) or more in any one year. Though this proposed rule would not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

G. Taking of Private Property

This proposed rule would not cause a taking of private property or otherwise have taking implications under Executive Order 12630 (''Governmental Actions and Interference with Constitutionally Protected Property Rights'').

H. Civil Justice Reform

This proposed rule meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988, (''Civil Justice Reform''), to minimize litigation, eliminate ambiguity, and reduce burden.

I. Protection of Children

We have analyzed this proposed rule under Executive Order 13045 (''Protection of Children from Environmental Health Risks and Safety Risks''). This rule is not an economically significant rule and would not create an environmental risk to health or risk to safety that might disproportionately affect children.

J. Indian Tribal Governments

This proposed rule does not have tribal implications under Executive Order 13175 (''Consultation and Coordination with Indian Tribal Governments''), because it would not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

K. Energy Effects

We have analyzed this proposed rule under Executive Order 13211 (''Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use''). We have determined that it is not a ''significant energy action'' under that order because it is not a ''significant regulatory action'' under Executive Order 12866 and is not likely to have a significant adverse effect on the supply, distribution, or use of energy.

L. Technical Standards

The National Technology Transfer and Advancement Act, codified as a note to 15 U.S.C. 272, directs agencies to use voluntary consensus standards in their regulatory activities unless the agency provides Congress, through OMB, with an explanation of why using these standards would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (*e.g.,* specifications of materials, performance, design, or operation; test methods; sampling procedures; and related management systems practices) that are developed or adopted by voluntary consensus standards bodies.

This proposed rule does not use technical standards. Therefore, we did not consider the use of voluntary consensus standards.

M. Environment

We have analyzed this proposed rule under Department of Homeland Security Management Directive 023–01 and Commandant Instruction M16475.lD, which guide the Coast Guard in complying with the National Environmental Policy Act of 1969, 42 U.S.C. 4321–4370f, and have made a preliminary determination that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. A preliminary environmental analysis checklist supporting this determination is available in the docket where indicated under the ''Public Participation and Request for Comments'' section of this preamble. This proposed rule involves: (1) Adding a Polar Ship Certificate to the list of certificates required, if applicable, by SOLAS; and (2) adding the Polar Ship Certificate to the list of SOLAS certificates that recognized classification societies may issue on behalf of the Coast Guard. These

proposed actions constitute editorial or procedural changes concerning vessel documentation requirements (*i.e.,* issuance of Polar Ship Certificates) and the delegation of authority for issuing such certificates. Thus, this proposed rule is likely to be categorically excluded under section 2.B.2 and figure 2–1, paragraphs (34)(a), (b), and (d) of the Instruction. This proposed rule would promote the Coast Guard's maritime safety and environmental protection missions. We seek any comments or information that may lead to the discovery of a significant environmental impact from this proposed rule.

List of Subjects

46 CFR Part 2

Marine Safety, Reporting and recordkeeping requirements, Vessels.

46 CFR Part 8

Administrative practice and procedure, Organization and functions (Government agencies), Reporting and recordkeeping requirements, Vessels.

For the reasons discussed in the preamble, the Coast Guard proposes to amend 46 CFR parts 2 and 8 as follows:

Title 46—Shipping

PART 2—VESSEL INSPECTIONS

■ 1. The authority citation for 46 CFR part 2 continues to read as follows:

Authority: Sec. 622, Pub. L. 111–281; 33 U.S.C. 1903; 43 U.S.C. 1333; 46 U.S.C. 2103, 2110, 3306, 3703; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277, sec. 1–105; Department of Homeland Security Delegation No. 0170.1(II)(77), (90), (92)(a), (92)(b).

§ 2.01–6 [Amended]

■ 2. In § 2.01–6(a)(1), after the words ''passengers in U.S. ports'' and before the words ''holds a valid'', remove the word ''and''; and after the text ''Passenger Ship Safety Certificate'', add the text '', and, if applicable, holds a valid Polar Ship Certificate''.

■ 3. Amend § 2.01–25 by adding paragraphs (a)(1)(x) and (a)(2)(x) to read as follows:

§ 2.01–25 International Convention for Safety of Life at Sea, 1974.

(a) * * *

(1) * * *

(x) Polar Ship Certificate.

(2) * * *

(x) Polar Ship Certificate.

* * * * *

PART 8—VESSEL INSPECTION ALTERNATIVES

■ 4. The authority citation for 46 CFR part 8 continues to read as follows:

Authority: 33 U.S.C. 1903, 1904, 3803 and 3821; 46 U.S.C. 3103, 3306, 3316, and 3703; Department of Homeland Security Delegation No. 0170.1 and Aug. 8, 2011 Delegation of Authority, Anti-Fouling Systems.

■ 5. Amend § 8.320 as follows:

■ a. In paragraph (b)(13), remove the word ''and'';

■ b. In paragraph (b)(14), remove the text ''.''; and add, in its place, the text ''; and''; and

■ c. Add new paragraph (b)(15) to read as follows:

§ 8.320 Classification society authorization to issue international certificates.

* * * * *

(b) * * *

(15) Polar Ship Certificate.

* * * * *

Dated: November 16, 2016.

F.J. Sturm,

Acting Director, Commercial Regulations and Standards, U.S. Coast Guard.

BILLING CODE 9110–04–P

DEPARTMENT OF TRANSPORTATION

Pipeline and Hazardous Materials Safety Administration

49 CFR Part 192

[Docket No. PHMSA–2016–0136]

Pipeline Safety: Meeting of the Gas Pipeline Safety Advisory Committee

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), DOT.

ACTION: Notice of advisory committee meeting.

SUMMARY: This notice announces a public meeting of the Technical Pipeline Safety Standards Committee, also known as the Gas Pipeline Advisory Committee (GPAC). The GPAC will meet to discuss a proposed rulemaking to address regulatory requirements for onshore gas transmission and gathering pipelines.

DATES: The committee will meet on Wednesday, December 7, 2016, from 8:30 a.m. to 5 p.m. and on Thursday, December 8, 2016, from 8:30 a.m. to 5 p.m., EST.

The meetings will not be web cast; however, presentations will be available on the meeting Web site and posted on the E-Gov Web site: *http://www.regulations.gov* under docket number PHMSA–2016–0136 within 30 days following the meeting.

ADDRESSES: The meeting will be held at a location yet to be determined in the Washington, DC Metropolitan area. The meeting location, agenda and any additional information will be published on the following pipeline advisory committee meeting and registration page at: *https://primis.phmsa.dot.gov/meetings/MtgHome.mtg?mtg=121.*

Public Participation

This meeting will be open to the public. Members of the public who wish to attend in person are asked to register at: *https://primis.phmsa.dot.gov/meetings/MtgHome.mtg?mtg=121* no later than December 1, 2016, in order to facilitate entry and guarantee seating. Members of the public who attend in person will also be provided an opportunity to make a statement during the meeting.

Written comments: Persons who wish to submit written comments on the meeting may be submitted to the docket in the following ways:

E-Gov Web site: http://www.regulations.gov. This site allows the public to enter comments on any **Federal Register** notice issued by any agency.

Fax: 1–202–493–2251.

Mail: Docket Management Facility; U.S. Department of Transportation (DOT), 1200 New Jersey Avenue SE., West Building, Room W12–140, Washington, DC 20590–0001.

Hand Delivery: Room W12–140 on the ground level of the DOT West Building, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except on Federal holidays.

Instructions: Identify the docket number PHMSA–2016–0136 at the beginning of your comments. Note that all comments received will be posted without change to *http://www.regulations.gov,* including any personal information provided. Anyone can search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). Therefore, consider reviewing DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000, (65 FR 19477) or view the Privacy Notice at *http://www.regulations.gov* before submitting any such comments.

Docket: For access to the docket or to read background documents or comments, go to *http://www.regulations.gov* at any time or to Room W12–140 on the ground level of the DOT West Building, 1200 New Jersey Avenue SE., Washington, DC, between 9:00 a.m. and 5:00 p.m.,

Monday through Friday, except Federal holidays.

If you wish to receive confirmation of receipt of your written comments, please include a self-addressed, stamped postcard with the following statement: ''Comments on PHMSA–2016–0136.'' The Docket Clerk will date stamp the postcard prior to returning it to you via the U.S. mail.

Privacy Act Statement

In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *www.dot.gov/privacy.*

Services for Individuals with Disabilities: The public meeting will be physically accessible to people with disabilities. Individuals requiring accommodations, such as sign language interpretation or other ancillary aids, are asked to notify Cheryl Whetsel at *cheryl.whetsel@dot.gov* by December 1, 2016.

FOR FURTHER INFORMATION CONTACT: For information about the meeting, contact Cheryl Whetsel by phone at 202–366–4431 or by email at *cheryl.whetsel@dot.gov.*

SUPPLEMENTARY INFORMATION:

I. Meeting Details and Agenda

The GPAC will be discussing the proposed rule, ''Safety of Gas Transmission and Gathering Pipelines'' published in the **Federal Register** on April 8, 2016, (81 FR 20722) and on the associated regulatory analysis. PHMSA is proposing changes to part 192 which include:

- Requiring periodic assessments of pipelines in locations where persons are expected to be at risk that are not already covered under the integrity management program requirements;
- Modifying the repair criteria, both inside and outside of high consequence areas (HCAs);
- Requiring inspections of pipelines in areas affected by extreme weather, man-made and natural disasters, and other similar events;
- Providing additional specificity for inline inspection, including explicit requirements to account for uncertainty of reported inspection data when evaluating inline inspection data to identify anomalies;
- Expanding integrity assessment methods to explicitly address guided wave ultrasonic inspection, and excavation with direct in-situ examination;
- Providing clearer functional requirements for conducting risk assessment for integrity management, including addressing seismic risk;
- Expanding the mandatory data collection and integration requirements for integrity management, including data validation and seismicity;
- Adding requirements to address Management of Change;
- Repealing the use of API 80 for gathering lines;
- Applying Type B requirements to newly regulated Type A gathering lines in Class 1 locations to > 8-inch along with emergency requirements (GAO Recommendation 14–667);
- Extending the reporting requirements to all gathering lines;
- Expanding requirements for corrosion protection to specify additional post-construction quality checks, and periodic operational and maintenance checks to address coating integrity, cathodic protection, and gas quality monitoring;
- Requiring operators to report MAOP Exceedance;
- Requiring safety features on Launchers and Receivers;
- Adding certain types of roadways to definition of ''identified sites'' (NTSB P–14–1); and
- Addressing grandfather pipe; and pipe with inadequate records.

The Agenda will be published on the PHMSA Web site.

II. Committee Background

The GPAC is a statutorily mandated advisory committee that advises PHMSA on proposed gas pipeline safety standards and risk assessments for transporting gas and for gas pipeline facilitiesnatural gas pipelines. The committee is established in accordance with the Federal Advisory Committee Act (5 U.S.C. App. 2, as amended) and 49 U.S.C. 60115. The committee consists of 15 members—with membership evenly divided among the federal and state governments, the regulated industry, and the general public. The committees advise PHMSA on the technical feasibility, reasonableness, cost-effectiveness, and practicability of each proposed pipeline safety standard.

Issued in Washington, DC on November 17, 2016, under authority delegated in 49 CFR 1.97.

Alan K. Mayberry,

Acting Associate Administrator for Pipeline Safety

[FR Doc. 2016–28065 Filed 11–21–16; 8:45 am]

DEPARTMENT OF AGRICULTURE

Rural Utilities Service

Dairyland Power Cooperative: Notice of Intent To Prepare an Environmental Impact Statement and Hold Additional Public Scoping Meetings

AGENCY: Rural Utilities Service, USDA.

ACTION: Notice of intent to prepare an Environmental Impact Statement and hold additional public scoping meetings.

SUMMARY: The Rural Utilities Service (RUS) intends to prepare an Environmental Impact Statement (EIS) and hold additional public scoping meetings in connection with possible impacts related to the Cardinal-Hickory Creek Transmission Line Project proposed by Dairyland Power Cooperative (DPC). Other utilities participating in the Project are American Transmission Company LLC, by its corporate manager ATC Management Inc. and ITC Midwest LLC.

The proposal consists of the construction of a 345-kilovolt (kV) transmission line and associated infrastructure connecting the Hickory Creek Substation in Dubuque County, Iowa, with the Cardinal Substation in the Town of Middleton, Wisconsin (near Madison, Wisconsin). The Project also includes a new intermediate 345/138-kV substation near the Village of Montfort in either Grant County or Iowa County, Wisconsin. The total length of the 345-kV transmission lines associated with the proposed project will be approximately 125 miles. DPC and the other project participants have identified proposed and alternate segments and locations for transmission lines and associated facilities and for the intermediate substation. Dairyland Power Cooperative is requesting RUS to provide financing for its portion of the proposed project.

DATES: RUS will conduct two public scoping meetings in an open-house format at the following locations:

Date	Location	Time	Venue
December 6, 2016	Peosta, Iowa	4:00–7:00 p.m	Peosta Community Center, 7896 Burds Road, Peosta, IA 53068.
December 7, 2016	Barneveld, Wisconsin	4:00–7:00 p.m	Deer Valley Lodge, 401 West Industrial Drive, Barneveld, WI 53507.

The additional meetings are being held to give the public more opportunities to review the project and provide comments.

ADDRESSES: To send comments or for further information, contact Dennis Rankin, Environmental Protection Specialist, U.S. Department of Agriculture, Rural Utilities Service, 1400 Independence Avenue SW., Room 2244, Stop 1571, Washington, DC 20250–1571 Email: *dennis.rankin@wdc.usda.gov* Washington, DC 20250–1571. The public comment period for the proposed project will extend through January 6, 2017.

An Alternative Evaluation Study (AES) and Macro Corridor Study (MCS), prepared by Dairyland Power Cooperative, will be presented at the public scoping meetings. The reports are available for public review at the RUS address provided in this notice and at Dairyland Power Cooperative, 3251 East Avenue South, La Crosse, WI 54602. In addition, the reports will be available at RUS' Web site, *http://www.rd.usda.gov/publications/environmental-studies/impact-statements* and at local libraries in the project area.

SUPPLEMENTARY INFORMATION: Preliminary proposed transmission line corridors, the siting area for the intermediate substation, and the two existing end-point substations have been identified. The EIS will address the construction, operation, and management of the proposed project, which includes the following: A new 345-kV terminal within the existing Hickory Creek Substation in Dubuque County, Iowa; a new intermediate 345/138-kV substation near the Village of Montfort in either Grant or Iowa County, Wisconsin; a new 345 kV terminal within the existing Cardinal Substation in the Town of Middleton in Dane County, Wisconsin; a new 45- to 65-mile (depending on the final route) 345-kV transmission line between the Hickory Creek Substation and the intermediate substation; a new 45- to 60-mile (depending on the final route) 345-kV transmission line between the intermediate substation and the existing Cardinal Substation; a short, less than one-mile, 69-kV line in Iowa; facility reinforcement needed in Iowa and Wisconsin; construction and maintenance of access roads for all proposed transmission lines and rebuild of the Turkey River Substation in Dubuque County, Iowa with two 161/69 kV transformers, four 161-kV circuit breakers, and three 69-kV circuit breakers.

Total length of the transmission lines for the proposed project will be approximately 125 miles. The project study area includes part or all of the following counties in Iowa: Clayton and Dubuque. In Wisconsin, the project area includes parts of the following counties: Dane, Grant, Iowa, and Lafayette.

Among the alternatives RUS will address in the EIS is the No Action alternative, under which the project would not be undertaken. In the EIS, the effects of the proposed project will be compared to the existing conditions in the area affected. Alternative transmission line corridors and the intermediate substation location will be refined as part of the EIS scoping process and will be addressed in the Draft EIS. RUS will carefully study public health and safety, environmental impacts, and engineering aspects of the proposed project and all related facilities.

The U.S. Army Corps of Engineers (USACE) and the U.S. Fish and Wildlife

Service (USFWS) are participating in the environmental review process as cooperating agencies, with RUS as the lead Federal agency.

RUS will use input provided by government agencies, private organizations, and the public in the preparation of the Draft EIS. The Draft EIS will be available for review and comment for 45 days. A Final EIS that considers all comments received will subsequently be prepared. The Final EIS will be available for review and comment for 30 days. Following the 30-day comment period, RUS will prepare a Record of Decision (ROD). Notices announcing the availability of the Draft EIS, the Final EIS, and the ROD will be published in the **Federal Register** and in local newspapers.

Any final action by RUS related to the proposed project will be subject to, and contingent upon, compliance with all relevant federal, state, and local environmental laws and regulations and completion of the environmental review requirements as prescribed in the RUS Environmental Policies and Procedures (7 CFR part 1970).

Dated: November 15, 2016.

BILLING CODE P

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[B–79–2016]

Foreign-Trade Zone (FTZ) 38—Spartanburg County, South Carolina; Notification of Proposed Production Activity; ZF Transmissions Gray Court, LLC; (Automatic Transmission and Powertrain Subassemblies and Parts, Transmission Shafts and Cranks); Gray Court, South Carolina

ZF Transmissions Gray Court, LLC (ZF Transmissions) submitted a notification of proposed production activity to the FTZ Board for its facilities in Gray Court, South Carolina within FTZ 38. The notification conforming to the requirements of the regulations of the FTZ Board (15 CFR 400.22) was received on November 10, 2016.

ZF Transmissions already has authority to produce automatic transmissions for motor vehicles within Sites 20 and 25 of FTZ 38. The current request would add finished products and foreign status materials/components to the scope of authority. Pursuant to 15 CFR 400.14(b), additional FTZ authority would be limited to the specific foreign-status materials/components and specific finished products described in the submitted notification (as described below) and subsequently authorized by the FTZ Board.

Production under FTZ procedures could exempt ZF Transmissions from customs duty payments on the foreign-status materials/components used in export production. On its domestic sales, ZF Transmissions would be able to choose the duty rates during customs entry procedures that apply to automatic transmissions and powertrain subassemblies and parts, transmission shafts and cranks (duty rate ranges from free to 2.5%) for the foreign-status materials/components noted below and in the existing scope of authority. Customs duties also could possibly be deferred or reduced on foreign-status production equipment.

The materials/components sourced from abroad include: Adhesive labels; steel chains; steel torx screws; steel hexagon screws; steel hexalobular driving screws; steel hexalobular and hexalobular screws; snap rings; studs; split rings; wire rings; supporting rings; retaining clamps; cylindrical pins; retaining rings; USIT rings; stop rings; pole rings; U-rings; crescent rings; damper rings; slot pins; grooved pins; splash rings; support rings; pressure pins; differential shafts; plugs; retaining clips; detent disks; cable terminals; sockets; retaining rings; circlips; balls; clips; closing caps; shackles; oil coolers; tapered-roller bearings; roller bearings; axial needle bearings; needle cages; needle sleeves; combination bearings; needle bearings; axial bearings; axial plain bearings; plain bearings; metal gaskets; metal pressure seals; metal gaskets; front axle shafts; axle drives; stator shafts; input shafts; output shafts; differential and bearing brackets; differential covers; silencers; gear shift systems; guide discs; rear axle outputs; spur gears and differentials; spur gear drives and differentials; differential cases; holding fixtures; frames; front axle outputs; and, front axle differentials (duty rate ranges from free to 8.5%).

Public comment is invited from interested parties. Submissions shall be addressed to the Board's Executive Secretary at the address below. The closing period for their receipt is January 3, 2017.

A copy of the notification will be available for public inspection at the Office of the Executive Secretary, Foreign-Trade Zones Board, Room 21013, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230–0002, and in the ''Reading Room'' section of the Board's Web site, which is accessible via *www.trade.gov/ftz.*

For further information, contact Christopher Kemp at *Christopher.Kemp@trade.gov* or (202) 482–0862.

Dated: November 16, 2016.

Andrew McGilvray,

Executive Secretary.

[S–162–2016]

Foreign-Trade Zone 163—Ponce, Puerto Rico, Application for Subzone, Best Petroleum Corporation, Toa Baja, Puerto Rico

An application has been submitted to the Foreign-Trade Zones Board (the Board) by CODEZOL, C.D., grantee of FTZ 163, requesting subzone status for the facility of Best Petroleum Corporation, located in Toa Baja, Puerto Rico. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a–81u), and the regulations of the Board (15 CFR part 400). It was formally docketed on November 15, 2016.

The proposed subzone (5 acres) is located at Road #2, KM. 20.5, BO. Candelaria Arenas, Toa Baja. The proposed subzone would be subject to the existing activation limit of FTZ 163. No authorization for production activity has been requested at this time.

In accordance with the Board's regulations, Camille Evans of the FTZ Staff is designated examiner to review the application and make recommendations to the Executive Secretary.

Public comment is invited from interested parties. Submissions shall be addressed to the Board's Executive Secretary at the address below. The closing period for their receipt is January 3, 2017. Rebuttal comments in response to material submitted during the foregoing period may be submitted during the subsequent 15-day period to January 17, 2017.

A copy of the application will be available for public inspection at the Office of the Executive Secretary, Foreign-Trade Zones Board, Room 21013, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230–0002, and in the

''Reading Room'' section of the Board's Web site, which is accessible via *www.trade.gov/ftz.*

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[B–78–2016]

Foreign-Trade Zone 115—Beaumont, Texas; Expansion of Subzone 115B; ExxonMobil Oil Corporation; Jefferson and Liberty Counties, Texas

An application has been submitted to the Foreign-Trade Zones (FTZ) Board by the Foreign-Trade Zone of Southeast Texas, Inc., grantee of FTZ 115, requesting an expansion of Subzone 115B on behalf of ExxonMobil Oil Corporation to include an additional site in Jefferson County, Texas. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a-81u), and the regulations of the FTZ Board (15 CFR part 400). It was formally docketed on November 15, 2016.

Subzone 115B was approved on October 13, 1995 (Board Order 780, 60 FR 54471–54472, October 24, 1995). The subzone (2,566 acres) currently consists of six sites located in Jefferson and Liberty Counties: *Site 1* (2,200 acres)—main refinery and petrochemical feedstock complex located along the Neches River at end of Burt Road in Jefferson County; *Site 2* (51 acres)—Mobil Colonial Tank Farm located at 13300 West Port Arthur Road in Jefferson County; *Site 3* (24 acres)—Mobil Hull underground storage facility located northwest of the refinery at end of Mobil Road in the City of Hull (Liberty County); *Site 4* (188 acres)—Daisetta underground petrochemical storage facility located northwest of the refinery at end of Bobcat Lane in the City of Daisetta (Liberty County); *Site 6* (38 acres)—Unocal Terminal located at State Highway 366 in Nederland (Jefferson County); and, *Site 7* (65 acres)—Sunoco Marine Terminal located at State Highway 347 in Nederland. (Site 5 expired in January 2000.)

The applicant is requesting authority to expand the subzone to include an additional site: *Proposed Site 8* (27.5 acres)—3275 Amoco Road EXN, Beaumont (Jefferson County). No additional authorization for production activity has been requested at this time.

In accordance with the FTZ Board's regulations, Camille Evans of the FTZ Staff is designated examiner to review the application and make recommendations to the FTZ Board.

Public comment is invited from interested parties. Submissions shall be addressed to the FTZ Board's Executive Secretary at the address below. The closing period for their receipt is January 3, 2017. Rebuttal comments in response to material submitted during the foregoing period may be submitted during the subsequent 15-day period to January 17, 2017.

A copy of the application will be available for public inspection at the Office of the Executive Secretary, Foreign-Trade Zones Board, Room 21013, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230–0002, and in the ''Reading Room'' section of the FTZ Board's Web site, which is accessible via *www.trade.gov/ftz.*

President's Export Council Subcommittee on Export Administration; Notice of Open Meeting

The President's Export Council Subcommittee on Export Administration (PECSEA) will meet on December 7, 2016, 10:00 a.m., at the U.S. Department of Commerce, Herbert C. Hoover Building, Room 3884, 14th Street between Pennsylvania and Constitution Avenues NW., Washington, DC. The PECSEA provides advice on matters pertinent to those portions of the Export Administration Act, as amended, that deal with United States policies of encouraging trade with all countries with which the United States has diplomatic or trading relations and of controlling trade for national security and foreign policy reasons.

Agenda

Open Session

1. Opening remarks by the Chairman and Vice Chairman.
2. Remarks by Deputy Secretary Bruce Andrews.

3. Final Thoughts.
4. Presentation of papers or comments by the Public.
5. STARS Data Elements.
6. Discussion of PECSEA Trade Priorities Paper.
7. Subcommittee Updates.

The open session will be accessible via teleconference to 25 participants on a first come, first served basis. To join the conference, submit inquiries to Ms. Yvette Springer at *Yvette.Springer@bis.doc.gov* no later than November 30, 2016.

A limited number of seats will be available for the public session. Reservations are not accepted. To the extent that time permits, members of the public may present oral statements to the Committee. The public may submit written statements at any time before or after the meeting. However, to facilitate the distribution of public presentation materials to the Committee members, the Committee suggests that presenters forward the public presentation materials prior to the meeting to Ms. Springer via email.

For more information, call Yvette Springer at (202) 482–2813.

Dated: November 16, 2016.

International Trade Administration

[A–570–932]

Certain Steel Threaded Rod From the People's Republic of China: Final Results of Antidumping Duty Administrative Review; 2014–2015

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (the ''Department'') published the *Preliminary Results* of the sixth administrative review of the antidumping duty order on certain steel threaded rod from the People's Republic of China (''PRC'') on May 13, 2016. The period of review (''POR'') is April 1, 2014, through March 31, 2015. This review covers two PRC exporters of subject merchandise, RMB Fasteners Ltd., IFI & Morgan Ltd., and Jiaxing Brother Standard Part Co., Ltd. (collectively ''the RMB/IFI Group''), and Zhejiang New Oriental Fastener Co., Ltd. (''New Oriental''). The final dumping margins are listed below in the ''Final Results of Administrative Review'' section of this notice.

DATES: Effective November 22, 2016.

FOR FURTHER INFORMATION CONTACT: Andrew Devine or Paul Walker, AD/CVD Operations, Office V, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230; telephone 202–482–0238 or 202–482–0413, respectively.

SUPPLEMENTARY INFORMATION:

Background

As noted above, the Department published the *Preliminary Results* on May 13, 2016.[1] In accordance with 19 CFR 351.309, we invited parties to comment on our *Preliminary Results.* Between June 20, 2016, and June 27, 2016, Vulcan Threaded Products Inc. (''Petitioner''), the RMB/IFI Group, and New Oriental submitted case and rebuttal briefs. On August 10, 2016, the Department extended the deadline for the final results to November 14, 2016.[2]

Scope of the Order

The merchandise covered by the order includes steel threaded rod. The subject merchandise is currently classifiable under subheading 7318.15.5051, 7318.15.5056, 7318.15.5090, and 7318.15.2095 of the United States Harmonized Tariff Schedule (''HTSUS''). Although the HTSUS subheadings are provided for convenience and customs purposes, our written description of the scope of the order, which is contained in the accompanying Issues and Decision Memorandum (''I&D Memo''), is dispositive.[3]

[1] *See Certain Steel Threaded Rod From the People's Republic of China: Preliminary Results and Partial Rescission of the Antidumping Duty Administrative Review; 2014–2015*, 81 FR 29843 (May 13, 2016) (''*Preliminary Results*'') and accompanying Preliminary Decision Memorandum.

[2] *See* Memorandum to Christian Marsh, Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, through James Doyle, Office Director, from Julia Hancock, Senior International Trade Compliance Analyst, ''Certain Steel Threaded Rod From the People's Republic of China: Extension of Deadline for Final Results of Antidumping Duty Administrative Review'' (August 10, 2016).

[3] For a full description of the scope of the order, *see* Memorandum from Christian Marsh, Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, to Paul Piquado, Assistant Secretary for Enforcement and Compliance, ''Issues and Decision Memorandum for the Final Results of the Sixth Administrative Review of the Antidumping Duty Order on Certain Steel Threaded Rod From the People's Republic of China'' (November 14, 2015) (''I&D Memo'').

Analysis of Comments Received

We addressed all issues raised in the case and rebuttal briefs by parties in this review in the I&D Memo. Attached to this notice, in Appendix I, is a list of the issues which parties raised. The I&D Memo is a public document and is on file in the Central Records Unit (''CRU''), Room B8024 of the main Department of Commerce building, as well as electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (''ACCESS''). ACCESS is available to registered users at *http://access.trade.gov* and in the CRU. In addition, a complete version of the I&D Memo can be accessed directly on the internet at *http://enforcement.trade.gov/frn/index.html.* The signed I&D Memo and the electronic versions of the I&D Memo are identical in content.

Changes Since the Preliminary Results

Based on our review of the record and comments received from interested parties regarding our *Preliminary Results,* we have now recalculated a dumping margin based on revisions to the surrogate financial ratios and changes to the calculation methodology regarding treatment of New Oriental's cost, insurance, and freight (''CIF'') sales. For a list of all issues addressed in these final results, please refer to Appendix I accompanying this notice.

PRC-Wide Entity

The Department continues to find that the following six companies subject to this review that are not eligible for separate rate status or rescission are part of the PRC-wide entity: Brother Holding Group Co., Ltd.; Jiaxing Xinyue Standard Part Co., Ltd.; Zhejiang Heiter Industries Co., Ltd.; Zhejiang Heiter MFG & Trade Co., Ltd.; Zhejiang Junyue Standard Part Co., Ltd.; and Zhejiang Morgan Brother Technology Co., Ltd.

Final Results of Administrative Review

The weighted-average dumping margins for the administrative review are as follows:

Exporter	Weighted-average margin (percent)
IFI & Morgan Ltd. and RMB Fasteners Ltd. (collectively "RMB/IFI Group")	0.00
Zhejiang New Oriental Co., Ltd.	11.07

Assessment Rates

Pursuant to section 751(a)(2)(A) of the Tariff Act of 1930, as amended (the ''Act''), and 19 CFR 351.212(b), the Department has determined, and U.S. Customs and Border Protection (''CBP'') shall assess, antidumping duties on all appropriate entries of subject merchandise in accordance with the final results of this review. The Department intends to issue appropriate assessment instructions directly to CBP 15 days after publication of the final results of this administrative review.

Where the respondent reported reliable entered values, we calculated importer (or customer)-specific *ad valorem* rates by aggregating the dumping margins calculated for all U.S. sales to each importer (or customer) and dividing this amount by the total entered value of the sales to each importer (or customer).[4] Where the Department calculated a weighted-average dumping margin by dividing the total amount of dumping for reviewed sales to that party by the total sales quantity associated with those transactions, the Department will direct CBP to assess importer-specific assessment rates based on the resulting per-unit rates.[5] Where an importer- (or customer-) specific *ad valorem* or per-unit rate is greater than *de minimis,* the Department will instruct CBP to collect the appropriate duties at the time of liquidation.[6] Where an importer- (or customer-) specific *ad valorem* or per-unit rate is zero or *de minimis,* the Department will instruct CBP to liquidate appropriate entries without regard to antidumping duties.[7]

Pursuant to the Department's assessment practice, for entries that were not reported in the U.S. sales databases submitted by companies individually examined during this review, the Department will instruct CBP to liquidate such entries at the PRC-wide entity rate. Additionally, if the Department determines that an exporter had no shipments of the subject merchandise, any suspended entries that entered under that exporter's case number (*i.e.,* at that exporter's rate) will be liquidated at the PRC-wide entity rate.[8]

Cash Deposit Requirements

The following cash deposit requirements will be effective upon publication of the final results of this administrative review for all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the publication date, as provided for by section 751(a)(2)(C) of the Act: (1) For the exporters listed above, the cash deposit rate will be the rate established in the final results of review (except, if the rate is zero or *de minimis, i.e.,* less than 0.5 percent, a zero cash deposit rate will be required for that company); (2) for previously investigated or reviewed PRC and non-PRC exporters not listed above that have separate rates, the cash deposit rate will continue to be the exporter-specific rate published for the most recent period; (3) for all PRC exporters of subject merchandise which have not been found to be entitled to a separate rate, the cash deposit rate will be the PRC-Wide rate of 206 percent; and (4) for all non-PRC exporters of subject merchandise which have not received their own rate, the cash deposit rate will be the rate applicable to the PRC exporters that supplied that non-PRC exporter. The deposit requirements shall remain in effect until further notice.

Disclosure

We will disclose the calculations performed within five days of the date of publication of this notice to parties in this proceeding in accordance with 19 CFR 351.224(b).

Notification to Importers

This notice also serves as a final reminder to importers of their responsibility under 19 CFR 351.402(f) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this POR. Failure to comply with this requirement could result in the Department's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of doubled antidumping duties.

Administrative Protective Orders

This notice also serves as a reminder to parties subject to administrative protective order (''APO'') of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3), which continues to govern business proprietary information in this segment of the proceeding. Timely written notification of the return or destruction of APO materials, or conversion to judicial protective order, is hereby requested. Failure to comply with the regulations and terms of an APO is a violation which is subject to sanction.

We are issuing and publishing these final results of administrative review in accordance with sections 751(a)(1) and 777(i) of the Act.

Dated: November 14, 2016.

Paul Piquado,

Assistant Secretary for Enforcement and Compliance.

Uncovered Innerspring Units From the People's Republic of China: Initiation of Anticircumvention Inquiry on Antidumping Duty Order

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: Based on available information, the Department of Commerce (Department) is self-initiating an anticircumvention inquiry to determine whether certain imports are circumventing the antidumping duty order on uncovered innerspring units (innerspring units) from the People's Republic of China (PRC).

DATES: Effective November 22, 2016.

FOR FURTHER INFORMATION CONTACT: Matthew Renkey, AD/CVD Operations, Office V, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482–2312.

SUPPLEMENTARY INFORMATION:

Background

On December 31, 2007, Petitioner[1] filed a petition seeking imposition of antidumping duties on imports of uncovered innerspring units from,

[1] Leggett and Platt, Incorporated.

among other countries, the PRC.[2] Following the completion of investigations by the Department and the U.S. International Trade Commission, the Department imposed an antidumping duty order on subject merchandise.[3]

In the sixth administrative review of the *Order,*[4] Petitioner requested that the Department review Macao Commercial and Industrial Spring Mattress Manufacturer (Macao Commercial) and East Grace Corporation. The Department initiated the review on April 3, 2015,[5] and sent questionnaires to the named respondents, including Macao Commercial. During the course of the sixth administrative review, and in response to the Department's original and supplemental questionnaires, Macao Commercial acknowledged that it imports innerspring unit components from the PRC for use in the production of innerspring units in Macau.[6] In the final results, the Department found that Macao Commercial failed to demonstrate that it had no shipments of PRC-origin innersprings, and assigned a rate to Macao Commercial using adverse facts available. The Department stated that this determination applied only with respect to Macao Commercial's PRC-origin subject merchandise, but explained that it intended to evaluate whether self-initiation of a circumvention inquiry would be warranted based upon information submitted during the review and in light of the Department's prior circumvention findings in this proceeding.[7]

Scope of the Order

The merchandise subject to the *Order* is uncovered innerspring units composed of a series of individual metal springs joined together in sizes corresponding to the sizes of adult mattresses (*e.g.,* twin, twin long, full, full long, queen, California king, and king) and units used in smaller constructions, such as crib and youth mattresses. All uncovered innerspring units are included in the scope regardless of width and length. Included within this definition are innersprings typically ranging from 30.5 inches to 76 inches in width and 68 inches to 84 inches in length. Innersprings for crib mattresses typically range from 25 inches to 27 inches in width and 50 inches to 52 inches in length.

Uncovered innerspring units are suitable for use as the innerspring component in the manufacture of innerspring mattresses, including mattresses that incorporate a foam encasement around the innerspring. Pocketed and non-pocketed innerspring units are included in this definition. Non-pocketed innersprings are typically joined together with helical wire and border rods. Non-pocketed innersprings are included in this definition regardless of whether they have border rods attached to the perimeter of the innerspring. Pocketed innersprings are individual coils covered by a ''pocket'' or ''sock'' of a nonwoven synthetic material or woven material and then glued together in a linear fashion.

Uncovered innersprings are classified under subheading 9404.29.9010 and have also been classified under subheadings 9404.10.0000, 7326.20.0070, 7320.20.5010, or 7320.90.5010 of the Harmonized Tariff Schedule of the United States (HTSUS). The HTSUS subheadings are provided for convenience and customs purposes only; the written description of the scope of the *Order* is dispositive.

Initiation of Circumvention Proceeding

Section 781(b)(1) of the Tariff Act of 1930, as amended (the Act) provides that the Department may find circumvention of an antidumping duty order when merchandise of the same class or kind subject to the order is completed or assembled in a foreign country other than the country to which the order applies. In conducting anticircumvention inquiries, under section 781(b)(1) of the Act, the Department will also evaluate whether: (1) The process of assembly or completion in the other foreign country is minor or insignificant; (2) the value of the merchandise produced in the foreign country to which the antidumping duty order applies is a significant portion of the total value of the merchandise exported to the United States; and (3) action is appropriate to prevent evasion of such an order or finding.

A. Merchandise of the Same Class or Kind

Available information shows that the innerspring units that Macao Commercial completes or assembles in Macau and subsequently ships to the United States are of the same class or kind as that subject to the *Order.*[8] Macao Commercial acknowledged this fact in the sixth administrative review when it stated: ''With respect to the Department's request for documentation demonstrating 'the production process of Macao Commercial and all affiliates in Macao that manufactured subject merchandise that was shipped to the United States during the POR,' as previously advised, Macao Commercial is the only entity which manufactures innersprings sold and shipped to the U.S.'' [9]

B. Completion of Merchandise in a Foreign Country

The *Order* indicates that innerspring units are assembled from three key components: Steel wire coils, helical wires, and in certain cases border rods.[10] Information from the sixth administrative review indicates that Macao Commercial sources components used in the production of innerspring units from the PRC, the country with respect to which the *Order* applies, and that Macao Commercial then sells innerspring units to the United States.[11]

C. Minor or Insignificant Process

Under section 781(b)(2) of the Act, the Department will take into account five

[2] The petition also included imports of uncovered innerspring units from South Africa and the Socialist Republic of Vietnam. *See Uncovered Innerspring Units From the People's Republic of China, South Africa, and the Socialist Republic of Vietnam: Initiation of Antidumping Duty Investigations,* 73 FR 4817 (January 28, 2008).

[3] *See Uncovered Innerspring Units From the People's Republic of China: Notice of Antidumping Duty Order,* 74 FR 7661 (February 19, 2009) (''*Order*'').

[4] The sixth administrative review covered the period of review (''POR'') February 1, 2014, through January 31, 2015. *See Initiation of Antidumping and Countervailing Duty Administrative Reviews,* 80 FR 18202 (April 3, 2015).

[5] *Id.*

[6] *See, e.g.,* Memorandum to the File ''Factual Information from the Sixth Administrative Review,'' dated concurrently with this initiation notice (AR6 Factual Information Memo), at Attachment 1. In the *AR6 Final Results,* we found that ''Macao Commercial submitted this inventory report in two different exhibits within its July 21, 2016 QR response and that within Exhibit 5 is an invoice for not just raw materials but PRC-origin innerspring components from Company X.'' *See Uncovered Innerspring Units From the People's Republic of China: Final Results of Antidumping Duty Administrative Review; 2014–2015,* 81 FR 62729 (September 12, 2016) (*AR6 Final Results*) and accompanying Issues and Decision Memorandum at Comment 1.

[7] *See AR6 Final Results.*

[8] *See* AR6 Factual Information Memo at Attachment 2, page 6.

[9] *Id.*

[10] The United States International Trade Commission also noted that innerspring coils and border rods are major components of an innerspring unit. *See Uncovered Innerspring Units from South Africa and Vietnam,* USITC Pub. 4051, Inv. Nos. 731–TA–1141–1142 at I–11 (December 2008) (hereinafter, ''*USITC Uncovered Innersprings Report*''). In its final determination regarding imports of uncovered innersprings from the PRC, the Commission adopted the findings and analyses in its determinations and views regarding subject imports from South Africa and Vietnam with respect to the domestic like product, the domestic industry, cumulation, and material injury. *Uncovered Innerspring Units from China,* USITC Pub. 4061, Inv. No. 731–TA–1140 at 3 and I–1 (February 2009).

[11] *See* AR6 Factual Information Memo at Attachment 2, pages 6–8 and Exhibit 1, and Attachment 1, at page 10; *see also AR6 Final Results,* and accompanying Issues and Decision Memorandum at 6–9.

factors to determine whether the process of assembly or completion of merchandise in a foreign country is minor or insignificant. An examination of these factors indicates that Macao Commercial's process of assembly and completion of innerspring units in Macau is likely not significant.

(1) Level of Investment in Macau

The level of investment to assemble innerspring components into innerspring units appears to be limited. In initiating a prior circumvention inquiry under the *Order,* we cited evidence that the process employed to assemble innerspring components into innerspring units is relatively simple and requires only limited investment and labor. Petitioner explained that the start-up investment costs and the barriers to entry into manual and semi-automatic assembly operation are low.[12] In particular, Petitioner provided evidence that in the most basic, fully-manual operation, coils are assembled manually using a wooden or steel jig in which the coils (continuous or bonnell)[13] are hand-loaded, then hand-laced with helical wire and finished by clipping the border rods to the unit.[14] Petitioner estimated that the cost of a new wooden (or steel) jig is approximately $200–$400.[15] The information provided by Petitioner in that inquiry indicated that the level of investment would also be low for companies that rely on a semi-automated assembly operation where a machine is used to assemble the rows of coils. Macao Commercial's production process does not appear to be markedly different than the assembly operations described above.[16]

(2) Level of Research and Development in Macau

In the sixth administrative review, there was no evidence of Macao Commercial performing any research and development related to the assembly and/or production of innerspring units. Moreover, we would not expect Macao Commercial to incur significant (if any) research and development expenses related to its innerspring assembly operations, given that in a prior circumvention inquiry, the respondent affirmatively stated that innerspring units are a ''mature'' product and that its research and development activities were limited to ''trial and error'' type manufacturing improvements.[17] The Department found this level of research and development to be minor, and did not change this finding in the final determination.[18]

(3) Nature of the Production Process in Macau

In the sixth administrative review, Macao Commercial indicated that its manufacturing process for assembling innerspring units from imported components appears to be relatively simple and does not require significant start-up costs, sophisticated machinery and inputs, or substantial labor.[19] This process, as described by Macao Commercial, is similar to the process found to be insignificant by the Department in a prior circumvention inquiry under this *Order.*[20]

(4) Extent of Production Facilities in Macau

In initiating a prior circumvention inquiry under this *Order,* we relied upon evidence that the company in question had one production facility with only six to seven workers involved in assembly of innersprings units, with another one or two workers devoted to packing.[21] Macao Commercial's information from the sixth administrative review shows that its production facilities are similarly limited in nature. It has one modestly-sized facility devoted to the assembly and packing of innersprings, the production machinery required is not extensive,[22] and the amount of labor involved appears minimal.[23]

(5) Value of Processing in Macau as Compared to Uncovered Innerspring Units Imported Into the United States

We do not have information showing whether the value of assembling the innerspring components into finished units by Macao Commercial represents a small portion of the total value of the unit imported into the United States. Nonetheless, in initiating a prior circumvention inquiry under this *Order,* we cited evidence provided by the Petitioner that the value of assembly processing performed in another third country (Malaysia) likely represented a small portion of the total value of the innerspring units imported into the United States.[24] We find that this information is relevant here. This information indicates that similar assembly operations in Macau would likely represent an insignificant portion of the total value.

D. Value of Merchandise Produced in the PRC

In initiating a prior circumvention inquiry under this *Order,* we cited evidence that the value of the components that the respondent imported from the PRC for further assembly in Malaysia into subject merchandise was a significant portion of the total value of the innerspring units exported to the United States.[25] As noted previously, innerspring coils, helical wires, and border rods are key components of an innerspring unit. Petitioner explained that these components also constitute a significant portion of the overall costs of an innerspring unit.[26] Because Petitioner did not have access to other PRC innerspring unit producer/exporter costs, it conducted an analysis related to the production costs of various

[12] *See Uncovered Innerspring Units From the People's Republic of China: Initiation of Anticircumvention Inquiry on Antidumping Duty Order,* 79 FR 78792 (December 31, 2014) (*Goldon Initiation*) and Memorandum to the File ''Factual Information from the Goldon Circumvention Inquiry,'' dated concurrently with this initiation notice (Goldon Factual Information Memo), at Attachment at page 10.

[13] Bonnell coils, the most commonly used type of coils in innerspring units, have an hour-glass shape which tapers inward from top to center and then outward from the center to bottom. Bonnell coils are generally the lowest priced units and the type of coil generally used in imported innerspring units. Continuous coils have entire rows of continuous coils formed from a single piece of wire. For a more detailed description of the types of innerspring coils, *see USITC Uncovered Innersprings Report* at I–8 to I–10.

[14] *See* Goldon Factual Information Memo at Attachment at pages 10–11. A somewhat more advanced assembly operation may involve manual assembly using a wooden or steel jig in which the coils are hand-set, and a lacing machine is used to feed the helical to join the rows, and then the borders are manually clipped to the unit. *Id.*

[25] Goldon Factual Information Memo Attachment at 14–15.

[26] *Id.*

innerspring unit models at its own facility in Guangzhou, PRC. Petitioner believed that its operation (and costs) in the PRC are representative of the operations (and costs) of other PRC innerspring unit producers/exporters, as it is the largest producer of innersprings in the PRC.[27] According to Petitioner's analysis of its own production costs in the PRC, the total value of these innerspring components compose a significant portion of the total value of an innerspring unit.[28] Similarly, based on the limited information available from the sixth administrative review, we find that the value of production in the PRC appears to comprise a significant portion of the value of Macao Commercial's innersprings units.[29]

E. Additional Factors for Consideration

Section 781(b)(3) of the Act directs the Department to consider additional factors in determining whether to include merchandise assembled or completed in a foreign country within the scope of the *Order.*

(1) Pattern of Trade

Macao Commercial stated that it expressly set up the flow of trade of innerspring components from the PRC in order to make Macau the country of origin for shipment to countries with antidumping duty orders.[30] Additionally, data from the United States International Trade Commission DataWeb show a significant increase of U.S. imports of innerspring units from Macau since the imposition of the *Order.*[31]

(2) Affiliation

Macao Commercial is affiliated with a producer of subject merchandise in the PRC and is also affiliated with other Macanese companies involved in the innersprings industry.[32] Generally, the Department considers circumvention to be more likely to occur when the manufacturer of the PRC-origin merchandise is related to the third country assembler and is a critical element in our evaluation of circumvention.[33]

(3) Increase of Subject Imports From the PRC to Macau After the Investigation Initiation

We did not examine any evidence regarding an increase in subject imports (*i.e.,* completed uncovered innerspring units) from the PRC to Macau after the initiation of the investigation. Further, Macao Commercial stated in the sixth administrative review that it does not transship PRC-origin innerspring units to the United States.[34] Nonetheless, this factor does not appear particularly relevant in a completion/assembly in a third country circumvention inquiry because the issue is not subject imports from the PRC to Macau, but rather parts for assembly.[35]

F. Whether Action Is Appropriate To Prevent Evasion of the Order

Based on the factual information placed on the record concurrently with this initiation, and for the reasons provided in the analysis above, pursuant to section 781(b)(1)(E) of the Act, the Department determines that initiating an anticircumvention inquiry is appropriate to identify any potential evasion of the *Order.*

Analysis of the Request

Based on our analysis of the record information from prior segments placed on the record concurrently with this initiation, and our prior circumvention findings under this *Order,* the Department determines that this self-initiation of an anticircumvention inquiry is warranted. Pursuant to 19 CFR 351.225(b), the Department will notify by mail all parties on the Department's scope service list of the initiation of an anticircumvention inquiry.

In accordance with 19 CFR 351.225(l)(2), if the Department issues a preliminary affirmative determination, we will then instruct U.S. Customs and Border Protection to suspend liquidation and require a cash deposit of estimated duties on the merchandise. This circumvention inquiry covers Macao Commercial. If, within sufficient time, the Department receives a formal request from an interested party regarding potential circumvention of the *Order* by other Macanese companies, or if the Department determines from available information that an inquiry is warranted with respect to other Macanese companies, we will consider conducting additional inquiries concurrently.

The Department will establish a schedule for questionnaires and comments on the issues. In accordance with 19 CFR 351.225(f)(5) and section 781(f) of the Act, unless extended, the Department intends to issue its final determination within 300 days of the date of publication of this initiation. This notice is published in accordance 19 CFR 351.225(f).

Dated: November 16, 2014.

Christian Marsh,

Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

DEPARTMENT OF COMMERCE

International Trade Administration

[A–570–008]

Calcium Hypochlorite From the People's Republic of China: Final Decision To Rescind the New Shipper Review of Haixing Jingmei Chemical Products Sales Co., Ltd.

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: On June 27, 2016, the Department of Commerce (the ''Department'') published its *Preliminary Rescission* for the new shipper review (''NSR'') of the antidumping duty order on calcium hypochlorite from the People's Republic of China (''PRC''). The period of review is July 25, 2014 through June 30, 2015. As discussed below, we preliminarily determined to rescind this review because we requested but were not provided sufficient information to conduct a *bona fide* analysis as required by the statute, and accordingly cannot determine whether the new shipper sales of Haixing Jingmei Chemical Products Sales Co., Ltd. (''Jingmei'') are *bona fide.* Based on our analysis of the comments received, we make no changes to the *Preliminary Rescission.* Accordingly, we have determined to rescind this NSR with respect to Jingmei.

DATES: Effective November 22, 2016.

FOR FURTHER INFORMATION CONTACT: Kabir Archuletta or Amanda Brings, AD/CVD Operations, Office V, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482–2593 or (202) 482–3927, respectively.

SUPPLEMENTARY INFORMATION:

Background

For a complete description of the events that followed the publication of the *Preliminary Rescission,*[1] see the Issues and Decision Memorandum.[2] The Issues and Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (''ACCESS''). ACCESS is available to registered users at *http://access.trade.gov* and in the Department's Central Records Unit, room B8024 of the main Department of Commerce building. In addition, a complete version of the Issues and Decision Memorandum can be accessed directly on the Internet at *http://enforcement.trade.gov/frn/*. The signed Issues and Decision Memorandum and the electronic version of the Issues and Decision Memorandum are identical in content.

Scope of the Order

The merchandise covered by the Order is calcium hypochlorite, regardless of form (*e.g.,* powder, tablet (compressed), crystalline (granular), or in liquid solution), whether or not blended with other materials, containing at least 10% available chlorine measured by actual weight. Calcium hypochlorite is currently classifiable under the subheading 2828.10.0000 of the Harmonized Tariff Schedule of the United States.[3]

Analysis of Comments Received

All issues raised in the case briefs by parties are addressed in the Issues and Decision Memorandum.[4] A list of the issues which parties raised is attached to this notice as an Appendix.

Final Rescission of Jingmei New Shipper Review

In the *Preliminary Rescission,* we preliminarily determined to rescind this review because we requested but were not provided sufficient information to conduct a *bona fide* analysis as required by the statute, and accordingly cannot determine whether the new shipper sales of Jingmei are *bona fide.* Based on the Department's complete analysis of all of the information and comments on the record of this review, we make no changes to the *Preliminary Rescission.* Accordingly, we have determined to rescind this NSR with respect to Jingmei. For a complete discussion, see the Preliminary *Bona Fide* Memo[5] and the Issues and Decision Memorandum.

Assessment

As the Department is rescinding this NSR, we have not calculated a company-specific dumping margin for Jingmei.

Cash Deposit Requirements

Effective upon publication of this notice of the final rescission of the NSR of Jingmei, the Department will instruct U.S. Customs and Border Protection to discontinue the option of posting a bond or security in lieu of a cash deposit for entries of subject merchandise from Jingmei. Because we did not calculate a dumping margin for Jingmei, Jingmei continues to be part of the PRC-wide entity. The cash deposit rate for the PRC-wide entity is 200.90 percent.[6] The current cash deposit requirements shall remain in effect until further notice.

Administrative Protective Orders

This notice also serves as a reminder to parties subject to administrative protective orders (''APO'') of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305, which continues to govern business proprietary information in this segment of the proceeding. Timely written notification of the return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a violation which is subject to sanction.

The Department is issuing and publishing these results in accordance with sections 751(a)(2)(B) and 777(i) of the Tariff Act of 1930, as amended, and 19 CFR 351.214 and 19 CFR 351.221(b)(5).

Dated: November 14, 2016.

Paul Piquado,

Assistant Secretary for Enforcement and Compliance.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648–XC644

Marine Mammals; File No. 18016

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; receipt of application for permit amendment.

SUMMARY: Notice is hereby given that Tamara McGuire, LGL Alaska Research Associates, Inc., 2000 W International Airport Rd, Suite C1, Anchorage, AK 99502, has applied for an amendment to Scientific Research Permit No. 18016.

DATES: Written, telefaxed, or email comments must be received on or before December 22, 2016.

ADDRESSES: The application and related documents are available for review by selecting ''Records Open for Public Comment'' from the ''Features'' box on the Applications and Permits for Protected Species home page, *https://apps.nmfs.noaa.gov,* and then selecting File No. 18016 from the list of available applications.

These documents are also available upon written request or by appointment in the Permits and Conservation Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13705, Silver Spring, MD 20910; phone (301) 427–8401; fax (301) 713–0376.

Written comments on this application should be submitted to the Chief, Permits and Conservation Division, at

the address listed above. Comments may also be submitted by facsimile to (301)713–0376, or by email to *NMFS.Pr1Comments@noaa.gov*. Please include the File No. in the subject line of the email comment.

Those individuals requesting a public hearing should submit a written request to the Chief, Permits and Conservation Division at the address listed above. The request should set forth the specific reasons why a hearing on this application would be appropriate.

FOR FURTHER INFORMATION CONTACT: Amy Hapeman or Sara Young, (301) 427–8401.

SUPPLEMENTARY INFORMATION: The subject amendment to Permit No. 18016 is requested under the authority of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*), the regulations governing the taking and importing of marine mammals (50 CFR part 216), the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*), and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR 222–226).

Permit No. 18016, issued on May 29, 2014 (79 FR 41991), authorizes the permit holder to conduct vessel surveys in Cook Inlet, Alaska for photo-identification and observations of Cook Inlet beluga whales (*Delphinapterus leucas*). The purpose of the research is to identify individual whales and to provide information about movement patterns, habitat use, survivorship, reproduction, and population size. The permit holder is requesting the permit be amended to increase the number of whales that may be approached during surveys from 72 to 340 whales annually. Animals may be taken up to 10 times per year during surveys. The amendment is needed to increase the effectiveness of photo-identification studies and to decrease the total time spent operating the survey boat around whales. No other details of the permit would change.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), an initial determination has been made that the activity proposed is categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of this application to the Marine Mammal Commission and its Committee of Scientific Advisors.

Dated: November 16, 2016.

Julia Harrison,

Chief, Permits and Conservation Division, Office of Protected Resources, National Marine Fisheries Service.

[FR Doc. 2016–28022 Filed 11–21–16; 8:45 am]

BILLING CODE 3510–22–P

BUREAU OF CONSUMER FINANCIAL PROTECTION

[Docket No.: CFPB–2016–0048]

Request for Information Regarding Consumer Access to Financial Records

AGENCY: Bureau of Consumer Financial Protection.

ACTION: Notice and request for information.

SUMMARY: The Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act) provides for consumer rights to access financial account and account-related data in usable electronic form. The Bureau of Consumer Financial Protection (Bureau or CFPB) is seeking comments from the public about consumer access to such information, including access by entities acting with consumer permission, in connection with the provision of products or services that make use of that information. Submissions to this Request for Information will assist market participants and policymakers to develop practices and procedures that enable consumers to realize the benefits associated with safe access to their financial records, assess necessary consumer protections and safeguards, and spur innovation.

DATES: Comments must be received on or before February 21, 2017.

ADDRESSES: You may submit responsive information and other comments, identified by Docket No. CFPB–2016–0048, by any of the following methods:

- *Electronic:* Go to *http://www.regulations.gov*. Follow the instructions for submitting comments.
- *Email: FederalRegisterComments@cfpb.gov*. Include Docket No. CFPB–2016–0048 in the subject line of the message.
- *Mail:* Monica Jackson, Office of the Executive Secretary, Consumer Financial Protection Bureau, 1700 G Street NW., Washington, DC 20552.
- *Hand Delivery/Courier:* Monica Jackson, Office of the Executive Secretary, Consumer Financial Protection Bureau, 1275 First Street NE., Washington, DC 20002.

Instructions: Please note the number associated with any question to which you are responding at the top of each response (you are not required to answer all questions to receive consideration of your comments). The Bureau encourages the early submission of comments. All submissions must include the document title and docket number. Because paper mail in the Washington, DC area and at the Bureau is subject to delay, commenters are encouraged to submit comments electronically. In general, all comments received will be posted without change to *http://www.regulations.gov*. In addition, comments will be available for public inspection and copying at 1275 First Street NE., Washington, DC 20002, on official business days between the hours of 10 a.m. and 5 p.m. eastern standard time. You can make an appointment to inspect the documents by telephoning 202–435–7275.

All submissions, including attachments and other supporting materials, will become part of the public record and subject to public disclosure. Sensitive personal information, such as account numbers or Social Security numbers, or names of other individuals, should not be included. Submissions will not be edited to remove any identifying or contact information.

FOR FURTHER INFORMATION CONTACT: For general inquiries, submission process questions or any additional information, please contact Monica Jackson, Office of the Executive Secretary, at 202–435–7275.

Authority: 12 U.S.C. 5511(c); 12 U.S.C. 5512(c).

SUPPLEMENTARY INFORMATION: The Bureau is seeking public comment through this Request for Information (RFI) to better understand the consumer benefits and risks associated with market developments that rely on access to consumer financial account and account-related information. This RFI generally refers to such information as ''consumer financial account data.'' [1] It further refers to consumer access to such information, including access by entities acting with consumer permission, as ''consumer-permissioned'' access. The RFI also labels account information that is obtained via consumer-permissioned access as ''consumer-permissioned account data.''

[1] The RFI sometimes distinguishes ''consumer financial account data'' from ''non-financial'' consumer account data, the latter being held by companies that offer consumers non-financial products and services. The RFI uses the term ''consumer account data'' to refer collectively to both kinds of consumer account data, financial and non-financial.

The information obtained in response to this RFI may help industry develop best practices to deliver benefits to consumers and address potential consumer harms. It may also help the Bureau in prioritizing resources. For example, the Bureau may use the information obtained to evaluate whether any guidance or other action by the Bureau is called for, including future rulemaking.

The Bureau encourages comments from all members of the public. The Bureau anticipates that the responding public may encompass the following groups, some of which may overlap in part:

- Individual consumers;
- Consumer and civil rights groups;
- Privacy advocates;
- Consumer financial product and service providers that control or possess data about consumer use of their products and services (for purposes of this RFI, ''consumer financial account providers'');
- Consumer financial product and service providers that rely, at least in part, on consumer-permissioned access to consumer financial account data (for purposes of this RFI, ''consumer-permissioned providers'' or ''permissioned parties''); [2]
- Entities that obtain consumer financial account data directly from consumer financial account providers for consumer-permissioned providers (for purposes of this RFI, ''account aggregators'');
- Consumer reporting agencies;
- Data brokers, processors and platform providers;
- Regulators;
- Providers of non-financial consumer products and services that may have knowledge of or experience in the use of consumer-permissioned account data to provide products and services to consumers;
- Participants in non-U.S. consumer markets with knowledge of or experience in the use of consumer-permissioned account data to provide products and services to consumers; and
- Any other interested parties.

Part A: Regulatory Framework Applicable to Consumer-Permissioned Access to Account Information

General Background

In the Dodd-Frank Act, Congress instructed the Bureau to implement and enforce consumer financial law ''for the purpose of ensuring that all consumers have access to markets for consumer financial products and services and that markets for consumer financial products and services are fair, transparent, and competitive.'' [3] Congress further instructed the Bureau to exercise its authorities so that ''markets for consumer financial products and services operate transparently and efficiently to facilitate access and innovation.'' [4]

The Bureau has jurisdiction with respect to a number of Federal statutes and regulations that establish rights and protections related to consumer financial account-related information. These well-established statutory and regulatory frameworks cover a broad range of entities, including traditional providers of consumer financial products and services and newer entrants. In some cases, they may cover service providers to such entities as well.

Many of these frameworks impose requirements that consumer financial account providers disclose certain information to their customers about their accounts. Disclosure requirements may include, for example, periodic statements with account information on transactions and fees or disclosures about the collection, sharing, use, and protection of consumers' non-public personal information.[5] A consumer also has the right to access information about himself or herself held by certain entities, such as information in a consumer reporting agency's file on the consumer.[6]

These and other legal frameworks also establish substantive consumer protections with respect to certain types of consumer information. Such protections include limitations on the use of such information, limitations on the disclosure of such information to third parties, and requirements relating to the security of such information.[7] Other protections include limitations on consumer liability if a consumer's information is lost or stolen and the consumer suffers a loss from unauthorized use or an erroneous electronic debit.[8] The Bureau also has authority under Title X to take action to prevent covered persons and service providers from committing or engaging in unfair, deceptive, or abusive acts or practices (UDAAPs). An entity's consumer data privacy or security practices can violate UDAAP standards.[9]

Consumer-Permissioned Access to Consumer Financial Account Information

In the context of this existing statutory and regulatory landscape, section 1033 of the Dodd-Frank Act provides for consumer rights to access information.[10] More specifically, section 1033 requires that ''[s]ubject to rules prescribed by the Bureau, a covered person shall make available to a consumer, upon request, information in the control or possession of such person concerning the consumer financial product or service that the consumer obtained from such covered person, including information relating to any transaction, or series of transactions, to the account including costs, charges,

[2] For purposes of this RFI, consumer-permissioned providers are *third-party* providers. Thus, consumer financial account providers do not themselves count as consumer-permissioned providers by virtue of using the account data that they already hold to deliver additional services to customers.

[3] 12 U.S.C. 5511(a).

[4] 12 U.S.C. 5511(b)(5).

[5] *See, e.g.,* Regulation Z, 12 CFR 1026.5(b)(2) and 1026.7(b) (implementing the Truth in Lending Act with respect to periodic statements for credit cards); Regulation E, 12 CFR 1005.9(b) (implementing the Electronic Fund Transfer Act with respect to periodic statements for traditional bank accounts and other consumer asset accounts); Regulation DD, 12 CFR 1030.6(a)(3) (implementing the Truth in Saving Act with respect to periodic statements for deposit accounts held at depository institutions); Gramm-Leach Bliley Act, 15 U.S.C. 6803, and its implementing regulations. Further, on October 5, 2016, the Bureau issued a final rule amending Regulations E and Z for prepaid accounts. For prepaid accounts, the final rule provides that as an alternative to providing the periodic statement, a financial institution must, among other things, make an electronic history of a consumer's account transactions available to the consumer that covers at least 12 months preceding the date the consumer electronically accesses the account. The requirement will become effective on October 1, 2017.

[6] Fair Credit Reporting Act, 15 U.S.C. 1681g(a).

[7] *See, e.g.,* Fair Credit Reporting Act, 15 U.S.C. 1681 through 1681x, Gramm-Leach-Bliley Act, 15 U.S.C. 6801 through 6809, and their implementing regulations.

[8] TILA, as implemented by Regulation Z, protects credit card consumers from unauthorized credit card use. *See* TILA section 133; 15 U.S.C. 1643; 12 CFR 1026.12(b). EFTA, as implemented by Regulation E, does the same with respect to EFTs. *See* EFTA section 909(a); 15 U.S.C. 1693g(a); 12 CFR 1005.6(b)(2).

[9] In March 2016 the Bureau entered into a consent order with a provider of a consumer-facing, online payment network. Among other things, the Bureau found that the entity falsely represented to consumers that it employed reasonable and appropriate measures to protect data obtained from consumers from unauthorized access. (*See http://files.consumerfinance.gov/f/201603_cfpb_consent-order-dwolla-inc.pdf*.) Relying on section 5 of the Federal Trade Commission Act, which makes unlawful all ''unfair or deceptive acts or practices in or affecting commerce,'' *see* 15 U.S.C. 45(a)(1), the FTC has also taken action against companies that fail to take reasonable measures to protect the security of consumer data. *See, e.g.,* FTC Matter/File Numbers 1023142–X120032 (Wyndham Worldwide Corporation); 052–3148 (CardSystems Solutions, Inc.); 052–3136 (Superior Mortgage Corp.); 052–3096 (DSW Inc.); 052–3117 (Nations Title Agency, Inc.); 062–3057 (Guidance Software, Inc.); 072–3046 (Life is good, Inc.); 072–3055 (TJX Companies); and 052–3094 (Reed Elsevier, Inc.).

[10] 12 U.S.C. 5533.

and usage data.''[11] Section 1033 further provides that the information must be in an electronic form usable by the consumer, although it does not impose any duty to maintain or keep any information about a consumer. Additionally, section 1033 applies only to information that the consumer financial account data holder can ''retrieve in the ordinary course of its business with respect to that information.''[12]

Part B: Current Market Practices in Connection With Consumer-Permissioned Access to Account Information

General Market Practice

In recent years, the availability of consumer financial account data in electronic form, often in real-time or near-real-time, has made possible a range of benefits to consumers. When made readily available, such data foster consumer convenience, and they can help consumers understand and control their financial lives, make useful decisions, monitor spending and debt, set and achieve savings goals, communicate effectively with their financial service providers, and solve financial problems in timely ways.[13]

Many providers of consumer financial products and services, from traditional providers like banks and credit unions to newer entrants such as online lenders, make available to consumers extensive electronic data about their accounts at that firm. Many consumers, however, maintain accounts with several financial service providers. As a result, by the late 1990s, market participants began to offer consumers services that depended, at least in part, on broader, consumer-permissioned access to data across a consumer's financial accounts—sometimes combined with other information about the consumer. Traditional account providers like banks have been the predominant users of such consumer account data. By obtaining data about the consumers' other accounts, banks and other traditional market participants have been able to supplement their use of existing in-house data for online advisory and account management services.[14] Over time, however, newer entrants have also begun to provide products and services to consumers using consumer-permissioned, electronically-sourced account data.[15]

Some consumer-permissioned providers have used their own proprietary technology solutions to access data from consumer financial account providers. However, given the large number of potential data sources and the transaction costs associated with obtaining consumer account data (sometimes on a recurring basis), other providers have relied on third-party ''account aggregators'' to provide the necessary technology. (Some entities have provided both account aggregation services to third parties and direct services to consumers using permissioned data.) In either case, the process of accessing consumer account data is often referred to as account or data aggregation.[16]

Technology advances have facilitated the development of aggregation services and the associated delivery of products and services that rely on consumer account data access. The Bureau understands that methods to access consumer account data—and to obtain consumer permission to do so—are technically complex and actively evolving. To enable access, consumers are often prompted to provide their online account credentials, including user name and password, and other forms of authentication such as knowledge-based security questions. Depending on the product or service, consumers may be asked to permit access only to a single account with an individual company or financial institution, or to multiple accounts held by a number of financial institutions and other companies.

Typically, consumers provide their account credentials for a particular company or financial institution where they hold an account. Those credentials are then used to obtain their account data through either: (1) A structured data feed or an application program interface (API) hosted by the company or financial institution, or (2) the company or financial institution's consumer-facing Web site in a process known as screen-scraping.[17] If an account aggregator is an intermediary in this process, it will generally transmit the consumer's data to permissioned parties through an API. The Bureau understands that account aggregators, as well as product and service providers that use consumer-permissioned data, sometimes store consumer account data for a range of uses, including those discussed further below. In addition, they sometimes obtain updated consumer account data on a recurring basis.

Consumer Benefits From Specific Market Uses

The Bureau is aware of a number of types of products and services provided to consumers that make use of consumer financial account data on a consumer-permissioned basis, including the following:

- *Personal financial management:* Many personal financial management (PFM) tools allow consumers to view their account information from many accounts and financial service providers in a single, consolidated view.
- *Automatic or motivational savings:* Some companies provide automatic savings mechanisms for consumers to choose as well as messages to encourage savings. These companies may use algorithms that rely on permissioned account data to determine how much a consumer can afford to save or, at the transaction level, to ''round-up'' transaction amounts to the next dollar and save the remainder.
- *Budgeting analysis and advice:* Many providers allow consumers to set budgets and analyze their spending activity based on the classification of transaction data into categories like entertainment, food, and health care. Some services send a mobile or email notification when a consumer is over-budget or close to being over-budget. Consumers may be provided with other budgetary advice based on analysis of their transaction data, including comparisons with peer groups.

[11] 12 U.S.C. 5533(a). The Dodd-Frank Act defines ''covered person'' in detail at 12 U.S.C. 5481(6). The Act defines a ''consumer'' as ''an individual or an agent, trustee, or representative acting on behalf of an individual.'' 12 U.S.C. 5481(4).

[12] *See id.,* 5533(c), & 5533(b)(4). Section 1033 contains a number of other exceptions. *See* 5533(b)(1)–(3). In addition, it requires the Bureau to prescribe standards to promote the development and use of standardized formats for information to be made available to consumers, including through the use of machine readable files. *See* 5533(d).

[13] *See, e.g.,* Aite Group, *Personal Financial Management: A Platform for Customer Engagement* (Feb. 24, 2010).

[14] As far back as 2001, the Office of the Comptroller of the Currency (OCC) issued guidance to depository institutions under its supervision about using third parties to provide data aggregation services. *See* Office of the Comptroller of Currency, OCC Bulletin 2001–12, *Bank-Provided Account Aggregation* Services (February 28, 2001), *available at https://www.occ.gov/news-issuances/bulletins/2001/bulletin-2001-12.html#.*

[15] *See, e.g., https://www.mint.com/terms* (''The Mint Service is a personal finance information management service that allows you to consolidate and track your financial information. The Mint Service is provided to you by Intuit without charge[.]'') Intuit is Mint's parent company.

[16] This RFI generally uses the terms ''account aggregation'' or ''aggregation.''

[17] For example, Yodlee, an account aggregator, reports that 75 percent of the data it aggregates from over 14,500 sources is collected through structured feeds from its financial institution customers and other financial institutions. *See* Envestnet, 2015 Annual Report, at 14 (Feb. 29, 2016), *available at http://ir.envestnet.com/phoenix.zhtml?c=235783&p=irol-IRHome.* Yodlee was an independent company until it was acquired by Envestnet in 2015.

• *Product recommendations:* Some advisors or providers may make product recommendations based on consumer financial account data. For example, if checking account data show the consumer incurring ATM fees, a provider might recommend other checking accounts with lower or no ATM fees.

• *Account verification:* Many consumer financial and non-financial products and services require consumers to verify their identity and bank account information. Account aggregation technology may be used for near-instant verification of account ownership. When used in this manner, such technology eliminates any need for the consumer to enter their account and routing number, a manual process that carries the possibility of typographical error. Account aggregation technology used for verification purposes can also eliminate the use of ''micro-deposits,'' which is a verification method that can take significantly longer to confirm account ownership.

• *Loan application information verification:* Some lenders may access consumer financial account data, such as the account's deposit history, to verify income and other stated loan application data. Aggregation can make this kind of verification process more efficient and more reliable.

• *Credit decisioning:* Some lenders may be using or considering using consumer or small business owner account data for underwriting or credit scoring purposes.

• *Cash flow management:* Some third-party providers notify consumers when transactions occur, when funds clear, or when an account balance approaches or dips below zero. These alerts can help consumers manage their cash flow and, in some cases, transfer money into their account to avoid NSF and overdraft fees.

• *Funds transfer and bill payment:* Some providers may obtain consumer authorizations to transfer funds for other purposes, such as timely bill payment or automatic transfers to retirement plans, and use information based on consumer financial account data to inform decisions about the transfer, such as its size and timing. Some companies also receive available funds data to verify account balances before initiating an account debit. Using that data they can avoid debiting an account that has insufficient funds and triggering NSF or overdraft fees for the consumer. In addition, some providers may retrieve bill information for consumers and allow the consumer to pay their bills, a process sometimes known as EBPP (for electronic bill presentment and payment).

• *Fraud and identity theft detection:* Some service providers may analyze consumer transactions across various financial accounts to identify and alert consumers to potential fraudulent or erroneous transactions.

• *Investment management and other non-consumer business services:* Some product and service providers rely on consumer financial account data to provide individuals with investment management services. In a similar manner, non-consumer data (such as data from a small business's checking account) may be used to provide accounting and expense management services to small business owners, their investors, or lenders.

Current Market Issues and Risks

Market developments to date speak to the consumer benefits associated with consumer-permissioned account data access. However, such access may also present risks to market participants, including consumers. Public discussion of access to consumer financial account data has focused significant attention on data security and privacy issues.[18] In particular, some consumer financial account providers have raised concerns about whether account aggregators or permissioned parties employ adequate security and privacy procedures with respect to consumers' online account credentials and consumer account data obtained through aggregation.[19]

Privacy and security concerns have also been raised about whether account aggregators and permissioned parties obtain or retain more consumer information than is necessary for the specific product or service being provided, as well as the extent to which—and terms under which—they may use the data for purposes other than providing the requested product and service and may make data available to other entities.[20] A number of parties have also raised concerns about the application of the Fair Credit Reporting Act in this area.[21] In addition, some consumer financial account providers have expressed concern about their liability for unauthorized transactions that may result from a breach of consumer credentials or consumer financial account data held by an account aggregator or a permissioned party.[22] The Bureau understands that discussions among market participants surrounding these and other security and privacy-related issues are ongoing.

The Bureau also understands that market participants, including financial institutions that provide consumer deposit and other financial accounts, non-financial providers of consumer products and services, account aggregators, and permissioned parties continue to address their working arrangements, often bilaterally, with respect to consumer account data. Those efforts encompass the sharing of technical burdens, the frequency and volume of data provision, counterparty vetting, consumer protection obligations (particularly in the event of a data breach), compensation and indemnity arrangements, and other concerns. The Bureau believes, however, that such market participants do not necessarily share common views about consumer protection and other consumer interests.

More fundamental still, the Bureau does not believe that consumer views have been adequately represented in this area. The Bureau is concerned, therefore, that some market participants may decide to restrict consumer-permissioned access to data in ways that undermine consumer interests identified in section 1033—and that are broader than necessary to address legitimate privacy and security concerns.

[18] In a different context, commenters have told the Bureau that such concerns—what data will be retrieved, how securely it will be stored, and with whom it will be shared—may cause consumers not to adopt new, potentially beneficial products and services. *See* Consumer Financial Protection Bureau, *Report on Mobile Financial Services,* at 54–64 (November 2015) (listing ''security'' and ''privacy'' as the top two challenges or risks to adoption of mobile financial services by the underserved), *available at http://files.consumerfinance.gov/f/201511_cfpb_mobile-financial-services.pdf.*

[19] *See* Peter Rudegeair, *J.P. Morgan Warns It Could Unplug Quicken and Quickbooks Users,* Wall St. J. (Nov. 24, 2015), *available at http://www.wsj.com/articles/j-p-morgan-may-unplug-some-customers-access-to-account-data-1448375950?alg=y.*

[20] *See, e.g.,* Bradley Hope, *Provider of Personal Finance Tools Tracks Bank Cards, Sells Data to Investors,* Wall St. J. (Aug. 6, 2015) (reporting that Yodlee sells some of the data it collects to investment firms but that Yodlee has not publicly disclosed that it does so, and that Yodlee has stated that individuals' identities cannot be discerned from its data set), *available at http://www.wsj.com/articles/provider-of-personal-finance-tools-tracks-bank-cards-sells-data-to-investors-1438914620.*

[22] *See, e.g.,* Jamie Dimon, *Letter to Shareholders,* at 21 (April 6, 2016) (expressing ''extreme concern'' over, among other things, data security and privacy, because customers have let aggregators access their bank accounts and account information); *see also,* Robin Sidel, *Big Banks Lock Horns with Personal-Finance Web Portals,* Wall St. J., Nov. 4, 2015, *available at http://www.wsj.com/articles/big-banks-lock-horns-with-personal-finance-web-portals-1446683450.*

Part C: Questions Related to Consumer-Permissioned Access to Account Information

This request for information is intended to cover practices—and potential practices—concerning consumer-permissioned access to consumer financial account data. The Bureau is interested in learning more about how consumer products and services may rely on such data, regardless of whether the products or services that make use of such data are technically ''consumer financial'' products or services, or whether such products also rely on consumer-permissioned data from non-financial accounts or on data from other sources. So long as submissions shed light on the use of consumer-permissioned access to consumer financial account data, they will be responsive. Except where specifically noted, therefore, these questions use consumer ''products'' and ''services'' to refer to consumer products or services that are financial or non-financial, *but that rely at least in part on consumer-permissioned access to consumer financial account data.*

Questions 1 through 17 below seek information about current market practices. Questions 18 through 20 enable commenters to describe how they believe market practices may or should change over time. Questions use ''consumer-permissioned access'' to cover direct access by the consumer upon request and access by the consumer's permissioned designees, but, where they deem it appropriate, respondents may provide different answers for these two forms of consumer access.

Current Practices

1. What types of products and services are currently made available to consumers that rely, at least in part, on consumer-permissioned electronic access to consumer financial account data? What benefits do consumers realize as a result? This question covers the use of such data to deliver products or services or to assess eligibility for a given product or service.

2. How many consumers are using or seeking to use such products or services? What demographic or other aggregate information is available about these consumers?

3. To provide or assess eligibility for these products and services, what kinds of consumer *financial* account data are being accessed, by what means, under what terms, and how often? How long is accessed data stored by permissioned parties or account aggregators?

4. To provide or assess eligibility for these products and services, what kinds of *non-financial* consumer account data are being accessed by parties that also access consumer financial account data? By what means, under what terms, and how often? How long is accessed data stored by permissioned parties or account aggregators?

5. What types of companies offer products and services that rely, at least in part, on consumer-permissioned electronic access to consumer financial account data, either to deliver the product or service or to assess eligibility for the product or service? To what extent are such products and services offered by entities that offer transaction accounts? To what extent are they offered by other market participants?

6. In what ways, if any, do consumer products and services that rely, at least in part, on consumer-permissioned electronic access to consumer financial account data differ according to whether the offering company provides or does not provide transaction accounts to consumers? Do any such differences impact consumers? If so, how?

7. To what extent do market participants compete to offer consumer products and services that rely, at least in part, on consumer-permissioned access to consumer financial account data? How does such competition impact consumers?

8. What incentives or disincentives exist for consumer financial account providers to facilitate or discourage consumer-permissioned access to the account data that they hold by permissioned parties or account aggregators? In what ways do consumer financial account providers directly or indirectly facilitate or restrict consumer-permissioned access to account data? What are the associated impacts to consumers and other market participants?

9. What impediments, obstacles or risks do consumer financial account providers currently face in providing data to or allowing access to data by permissioned parties or account aggregators? Describe specific operational costs, risks, and actual or potential losses, and identify their specific causes.

10. What impediments, obstacles or risks do permissioned parties or account aggregators currently face in obtaining such data? Describe specific operational costs, risks, and actual or potential losses, and identify their specific causes.

11. What impediments, obstacles or risks do consumers currently face in obtaining—including permitting access to—such data?

12. What security and other risks do consumers incur if they permit access to their financial account data in order to obtain a particular product or service? What steps have consumer financial account providers, account aggregators, permissioned parties and other users of consumer-permissioned account data taken to mitigate such risks? What information do these parties communicate to consumers about associated risks?

13. In what ways, do account aggregators or permissioned parties use consumer-permissioned account data for purposes other than offering or facilitating the delivery of a specific product or service to the permissioning consumer? Do such companies continue to access or store data after the consumer ceases to use the product for which the permissioned data use was intended by the consumer? Do such companies share the data with other parties and, if so, under what terms and conditions? What are the associated impacts to consumers?

14. When consumers permit access to their financial account data, what do they understand about: what data are accessed; how often they are accessed; for what purposes the data are used; whether the permissioned party or account aggregator continues to access, store or use such data after the consumer ceases to use the product or service for which the permissioned data use was intended by the consumer; and with which entities a permissioned party or account aggregator shares the data and on what terms and conditions? What drives or impacts their level of understanding? What impact does their level of understanding have on consumers and on other parties, including on consumers' willingness to permit access?

15. To what extent are consumers able to control how data is used by permissioned parties or account aggregators that obtain that data via consumer-permissioned access? Are consumers able to control what data are accessed, how often they are accessed, for what purposes and for how long the data are used, and with which entities, if any, a permissioned party or account aggregator may share the data and on what terms and conditions? Are they able to request that permissioned parties, account aggregators, or other users delete such data? Is such data otherwise deleted and, if so, when and by what means? To what extent are consumers consenting to permissioned party and account aggregator practices with respect to access, use and sharing of consumer financial account data?

16. Do consumer financial account providers vet account aggregators or permissioned parties before providing

data to them? Do consumer financial account providers perform any ongoing vetting of account aggregators or permissioned parties? If so, for what purposes and using what procedures? What are the associated impacts to consumers and to other parties?

17. What industry standards currently exist, in development or otherwise, to enable consumer-permissioned access to financial account data?

Potential Market Developments

18. What changes are or may be expected to happen to any market practice described in response to questions 1 through 17, why, and with what impacts to consumers, consumer financial account providers, permissioned parties, and account aggregators? Responses to this question may be integrated into responses to questions 1 through 17 if commenters prefer.

19. What changes *should* happen to any market practice described in response to questions 1 through 18, why, and with what impacts to consumers, consumer financial account providers, permissioned parties, and account aggregators? Responses to this question also may be integrated into responses to questions 1 through 17 if commenters prefer.

20. Are ''industry standard'' practices that provide consumers with data access comparable to that envisioned by section 1033 of the Dodd-Frank Act likely to be broadly adopted by consumer financial account providers, permissioned parties and account aggregators in the absence of regulatory action? If not, how will ''industry standard'' practices be insufficient? What marketplace considerations are likely to bear on such developments? Generally, how will the advent of standard practices for consumer-permissioned access to consumer financial account data affect competition and innovation in various consumer financial service markets?

Dated: November 14, 2016.

Richard Cordray,

Director, Bureau of Consumer Financial Protection.

[FR Doc. 2016–28086 Filed 11–21–16; 8:45 am]

BILLING CODE 4810–25–P

BUREAU OF CONSUMER FINANCIAL PROTECTION

Supervisory Highlights: Fall 2016

AGENCY: Bureau of Consumer Financial Protection.

ACTION: Supervisory highlights; notice.

SUMMARY: The Bureau of Consumer Financial Protection (CFPB) is issuing its thirteenth edition of its Supervisory Highlights. In this issue of *Supervisory Highlights,* we report examination findings in the areas of auto originations, automobile loan servicing, debt collection, mortgage origination, student loan servicing, and fair lending. As in past editions, this report includes information about a recent public enforcement action that was a result, at least in part, of our supervisory work. The report also includes information on recently released examination procedures and Bureau guidance.

DATES: The Bureau released this edition of the Supervisory Highlights on its Web site on October 31, 2016.

FOR FURTHER INFORMATION CONTACT: Adetola Adenuga, Consumer Financial Protection Analyst, Office of Supervision Policy, 1700 G Street NW., 20552, (202) 435–9373.

SUPPLEMENTARY INFORMATION:

1. Introduction

In this thirteenth edition of *Supervisory Highlights,* the Consumer Financial Protection Bureau (CFPB) shares recent supervisory observations in the areas of automobile loan origination, automobile loan servicing, debt collection, mortgage origination, mortgage servicing, student loan servicing and fair lending. The findings reported here reflect information obtained from supervisory activities completed during the period under review. Corrective actions regarding certain matters remain in process at the time of this report's publication.

CFPB supervisory reviews and examinations typically involve assessing a supervised entity's compliance with Federal consumer financial laws. When Supervision examinations determine that a supervised entity has violated a statute or regulation, Supervision directs the entity to implement appropriate corrective measures, such as refunding moneys, paying of restitution, or taking other remedial actions. Recent supervisory resolutions have resulted in total restitution payments of approximately $11.3 million to more than 225,000 consumers during the review period. Additionally, CFPB's supervisory activities have either led to or supported two recent public enforcement actions, resulting in over $28 million in consumer remediation and an additional $8 million in civil money penalties.

This report highlights supervision-related work generally completed between May 2016 and August 2016 (unless otherwise stated), though some completion dates may vary. Please submit any questions or comments to *CFPB_Supervision@cfpb.gov.*

2. Supervisory Observations

Recent supervisory observations are reported in the areas of automobile loan origination, automobile loan servicing, debt collection, mortgage origination, mortgage servicing and student loan servicing. Worthy of note are the beneficial practices centered on good compliance management systems (CMS) found during the period under review in the areas of automobile loan origination (2.1.1), debt collection (2.3.7), and mortgage origination (2.4.1).

2.1 Automobile Origination

The Bureau's rule defining larger participants in the auto loan market went into effect in August 2015.[1] The consequence was that the Bureau now has supervisory authority over auto lending not only by the largest banks, but also by various other large financial companies. Examinations completed in the period under review focused on assessing CMS and automobile financing practices to determine whether entities are complying with applicable Federal consumer financial laws.

2.1.1 CMS Strengths

During the period under review at one or more entities, examiners determined that the overall CMS of their automobile loan origination business was strong for its size, risk profile, and operational complexity. These institutions effectively identified inherent risks to consumers and managed consumer compliance responsibilities. They maintained: Strong board and management oversight; policies and procedures to address compliance with all applicable Federal consumer financial laws relating to automobile loan origination; current and complete compliance training designed to reinforce policies and procedures; adequate internal controls and monitoring processes with timely corrective actions where appropriate; and processes for appropriately escalating and resolving consumer complaints and analyzing them for root causes, patterns or trends.

These entities also showed strength in their oversight programs for service providers. In particular, they defined processes that outlined the steps to assess due diligence information, and their oversight programs varied commensurate with the risk and

[1] 12 CFR 1090.108.

complexity of the processes or services provided by the relevant service providers.

2.1.2 CMS Deficiencies

Despite improvements at a number of other entities, examiners found that the overall CMS at one or more entities remained weak. These weaknesses included failure to: Create and implement consumer compliance-related policies and procedures; develop and implement compliance training; perform adequate root cause analysis of consumer complaints to address underlying issues identified through complaints; and adequately oversee service providers.

Also, the board of directors and management failed to: Demonstrate clear expectations about compliance; have an adequate compliance audit program; adopt clear policy statements regarding consumer compliance; and ensure that compliance-related issues are raised to the entity's board of directors or other principals.

The relevant financial institutions have undertaken remedial and corrective actions regarding these weaknesses, which are under review by the Bureau.

2.2 Automobile Loan Servicing

The Bureau began supervising nonbank auto loan servicing companies after the rule defining larger participants came into effect in August 2015. In addition to automobile loan originations, the Bureau is examining auto loan servicing activities, primarily assessing whether entities have engaged in unfair, deceptive, or abusive acts or practices prohibited by the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act).[2] As in all applicable markets, Supervision also reviews practices related to furnishing of consumer information to consumer reporting agencies for compliance with the Fair Credit Reporting Act (FCRA) and its implementing regulation, Regulation V. In the Bureau's recent auto servicing examinations, examiners have identified unfair practices relating to repossession fees.

2.2.1 Repossession Fees and Refusal To Return Property

To secure an auto loan, a borrower gives a creditor a security interest in his or her vehicle. When a borrower defaults, the creditor can exercise its right under the contract and repossess the secured vehicle. Depending upon state law and the contract with the consumer, auto loan servicers may in certain cases charge the borrower for the cost of repossessing the vehicle.

Borrowers often have personal property and belongings in vehicles that are repossessed. These items often are not merely incidental, but can be of substantial emotional attachment or practical importance to borrowers, which are not appropriate matters for the creditor to decide for itself. State law typically requires auto loan servicers and repossession companies to maintain borrowers' property so that it may be returned upon request. Some companies charge borrowers for the cost of retaining the property.

In one or more recent exams, Supervision found that companies were holding borrowers' personal belongings and refusing to return the property to borrowers until after the borrower paid a fee for storing the property. If borrowers did not pay the fee before the company was no longer obligated to hold on to the property under state law (often 30–45 days), the companies would dispose of the property instead of returning it to the borrower and add the fee to the borrowers' balance.

CFPB examiners concluded that it was an unfair practice to detain or refuse to return personal property found in a repossessed vehicle until the consumer paid a fee or where the consumer requested return of the property, regardless of what the consumer agreed to in the contract. Even when the consumer agreements and state law may have supported the lawfulness of charging the fee, examiners concluded there were no circumstances in which it was lawful to refuse to return property until after the fee was paid, instead of simply adding the fee to the borrower's balance as companies do with other repossession fees. Examiners observed circumstances in which this tactic of leveraging personal situations for collection purposes was extreme, including retention of tools essential to the consumer's livelihood and retention of personal possessions of negligible market value but of substantial emotional attachment or practical importance for the consumer.

Examiners also found that in some instances, one or more companies were engaging in the unfair practice of charging a borrower for storing personal property found in a repossessed vehicle when the consumer agreement disclosed that the property would be stored, but not that the borrower would need to pay for the storage. In these instances, based on the consumer contracts, it was unfair to charge these undisclosed fees at all.

In response to examiners' findings, one or more companies informed Supervision that it ceased charging borrowers to store personal property found in repossessed vehicles. In Supervision's upcoming auto loan servicing exams, examiners will be looking closely at how companies engage in repossession activities, including whether property is being improperly withheld from consumers, what fees are charged, how they are charged, and the context of how consumers are being treated to determine whether the practices were lawful.

2.3 Debt Collection

The Bureau examines certain bank creditors that originate and collect their own debt, as well as nonbanks that are larger participants in the debt collection market. During recent examinations, the Bureau's examiners have identified several violations of the Fair Debt Collection Practices Act (FDCPA), including charging consumers unlawful convenience fees, making several false representations to consumers, and unlawfully communicating with third parties in connection with the collection of a debt. Additionally, examiners have identified several violations of the FCRA, including failing to investigate indirect disputes, and having inadequate furnishing policies and procedures. Examiners also observed a beneficial practice that involved using collections scripts and guides to improve compliance when communicating with consumers.

2.3.1 Unlawful Fees

Prior editions of *Supervisory Highlights* noted that the FDCPA limits situations where a debt collector may impose convenience fees.[3] Under Section 808(1) of the FDCPA,[4] a debt collector may not collect any amount unless such amount is expressly authorized by the agreement creating the debt or permitted by law. In one or more exams, examiners observed that one or more debt collectors charged consumers a ''convenience fee'' to process payments by phone and online. Examiners determined that this convenience fee violated Section 808(1) where the consumer's contract does not expressly permit convenience fees and the applicable state's law was silent on whether such fees are permissible. Additionally, under section 807(2)(B) of the FDCPA,[5] a debt collector may not make false representations of compensation which may be lawfully received by the debt collector.

[2] 12 U.S.C. 5514(a)(1)(B).

[3] CFPB, *Supervisory Highlights,* 2.2.1 (Fall 2014).

[4] 15 U.S.C. 1692f(1).

[5] 15 U.S.C. 1692e(2)(B).

Examiners determined that collectors who demanded these unlawful fees, stated that the fees were ''nonnegotiable,'' or withheld information from consumers about other avenues to make payments that would not incur the fee after the consumer requested such information violated section 807(2)(B) of the FDCPA.

Supervision also found that one or more debt collectors violated section 808(1) of the FDCPA by charging collection fees in states where collection fees were prohibited or in states that capped collection fees at a threshold lower than the fees that were charged. Examiners also observed a CMS weakness at one or more collectors that had not maintained any records showing the relationship between the amount of the collection fee and the cost of collection.

The relevant entities have undertaken remedial and corrective actions regarding these violations; these matters remain under review by the Bureau.

2.3.2 False Representations

Section 807(10) of the FDCPA [6] prohibits debt collectors from using any false representation or deceptive means to collect a debt or obtain information concerning a consumer. At one or more debt collectors, examiners identified collection calls where employees purported to assess consumers' creditworthiness, credit scores, or credit reports, which were misleading because collectors could not assess overall borrower creditworthiness. Collectors also misled consumers by representing that an immediate payment would need to be made in order to prevent a negative impact on consumers' credit.

In one or more instances, examiners observed that collectors had impersonated consumers while using the relevant creditors' consumer-facing automated telephone system to obtain information about the consumer's debt. Examiners concluded that this constituted a false representation or deceptive means to collect or attempt to collect any debt or to obtain information concerning a consumer.

On one or more collection calls, examiners heard collectors tell consumers that the ability to settle the collection account was revoked or would expire. Examiners determined that these statements were false or were a deceptive means to collect a debt because the consumers still had the ability to settle. The relevant entities have undertaken remedial and corrective actions regarding these violations; these matters remain under review by the Bureau.

2.3.3 Communication With Third Parties

Section 805 of the FDCPA [7] prohibits debt collectors from communicating in connection with the collection of a debt with persons other than the consumer, unless the purpose is to acquire information about the consumer's location. Under section 804 of the FDCPA,[8] when communicating with third parties to acquire information about the consumer's location, a collector is prohibited from disclosing the name of the debt collection company unless the third party expressly requests it.

At one or more debt collectors, examiners identified several instances where collectors disclosed the debt owed by the consumer to a third party. These third-party communications were often caused by inadequate identity verification during telephone calls. Additionally, examiners observed several instances where collectors identified their employers to third parties without first being asked for that information by the third party.

The relevant entities have undertaken remedial and corrective actions regarding these violations; these matters remain under review by the Bureau.

2.3.4 Furnishing Policies and Procedures

Regulation V [9] requires a furnisher to establish and implement reasonable written policies and procedures regarding the accuracy and integrity of the information furnished to consumer reporting agencies. Furnishers must consider the guidelines in Appendix E to Regulation V [10] in developing their policies and procedures and incorporate those guidelines that are appropriate. Examiners observed that one or more entities failed to provide adequate guidance and training to staff regarding differentiating FCRA disputes from general customer inquiries, complaints, or FDCPA debt validation requests. As a result, employees could not review the historic records of FCRA disputes or perform effective root cause analyses of disputes.

Supervision directed one or more entities to develop and implement reasonable policies and procedures to ensure that direct and indirect disputes are appropriately logged, categorized, and resolved. In addition, Supervision directed one or more entities to develop and implement a training program appropriately tailored to employees responsible for logging, categorizing, and handling FCRA direct and indirect disputes.

2.3.5 FCRA Dispute Handling

Section 623(b)(1) of the FCRA [11] requires furnishers to conduct investigations and report the results after receiving notice of a dispute from a consumer reporting agency. Examiners determined that one or more debt collectors never investigated indirect disputes that lacked detail or were not accompanied by attachments with relevant information from the consumer, in violation of Section 623(b)(1) of the FCRA.

For disputes that consumers make directly with furnishers under Section 1022.43(f)(3) of Regulation V, furnishers are required to provide the consumer with a notice of determination if a direct dispute is determined to be frivolous. The notice of determination must include the reasons for such determination and identify any information required to investigate the disputed information. At one or more debt collectors, examiners observed that for disputes categorized as frivolous, the notices did not say what the consumer needed to provide in order for the collector to complete the investigation. The relevant entities have undertaken remedial and corrective actions regarding these violations; the matters are under review by the Bureau.

2.3.6 Regulation E Authorization for Preauthorized Electronic Fund Transfers

Regulation E [12] requires companies to provide consumers with a copy of the authorization for preauthorized electronic fund transfers.[13] Examiners found that one or more debt collectors failed to provide consumers with a copy of the terms of the authorization, either electronically or in paper form. Some of the debt collectors instead sent consumers a payment confirmation notice before each electronic fund transfer. This notice did not describe the recurring nature of the preauthorized transfers from the consumer's account, such as by describing the timing and amount of the recurring transfers. Examiners found that the payment confirmation notices did not meet

Regulation E's requirement to send consumers a written copy of the terms of the authorization.

Supervision directed one or more entities to revise their policies and procedures to ensure compliance with the requirement to provide consumers with a copy of the authorization as required by Regulation E. Supervision also directed the debt collectors to modify their training and monitoring to reflect this change and to prevent future violations of Regulation E.

2.3.7 Effective and Beneficial Use of Scripts and Guides in Compliance With FDCPA

Debt collection calls must comply with the FDCPA and any applicable state laws and regulations. At one or more entities, exam teams observed a well-established, formal compliance program that met CFPB's supervisory expectations. In particular, agents were supplied with guides and scripts to improve adherence to compliance policies. Script adherence was regularly monitored and infractions led to salary/bonus reductions. Additionally, compliance personnel analyzed trends of violations, conducted root cause analyses, and escalated identified violation trends to management for proposed changes to policies and procedures. Examiners found that, as a result, collection agents at one or more entities consistently followed collection scripts which led to greater compliance.

2.4 Mortgage Origination

The Bureau continues to examine entities' compliance with provisions of the CFPB's Title XIV rules,[14] existing Truth in Lending Act (TILA) and Real Estate Settlement Procedures Act (RESPA)[15] disclosure provisions,[16] and other applicable Federal consumer financial laws. Examiners also evaluate entities' CMS.

2.4.1 CMS Strengths

During the period under review at one or more institutions, examiners determined that the overall CMS was strong for the size, risk profile, and operational complexity of their mortgage origination business. Board and management took an active role in reviewing and approving policies and procedures; the compliance program addressed compliance with applicable Federal consumer financial laws; training was tailored to the institutions' job functions and was updated and delivered annually; the monitoring function adapted to changes and took corrective action to address deficiencies; institutions had policies and procedures that established clear expectations for timely handling and resolution of complaints and analyzed the root causes of complaints; and audit programs that were comprehensive and independent of the compliance program and business functions.

2.4.2 CMS Deficiencies

Despite the identified strengths at one or more institutions, examiners concluded that the overall mortgage origination CMS at one or more other institutions was weak because it allowed violations of Regulations G, N, X, and Z to occur. For example, one or more institutions did not conduct compliance audits of mortgage origination activities, had weak oversight of service providers, and had not implemented procedures for establishing clear expectations to adequately mitigate the risk of harm arising from third-party relationships. Supervision directed the entities' management to take corrective action.

2.4.3 Failure To Verify Total Monthly Income in Determining Ability To Repay

Regulation Z requires creditors to make a reasonable and good faith determination of a consumer's ability to repay (ATR) at or before consummation.[17] Accordingly, Regulation Z sets forth eight factors a creditor must consider[18] when making the required ATR determination.[19] A creditor must verify the information that will be relied upon in determining the consumer's repayment ability and this verification must be specific to the individual consumer.[20] One factor Regulation Z requires a creditor to consider is the consumer's current or reasonably expected income or assets.[21] Another factor a creditor must consider is the consumer's monthly debt-to-income (DTI) ratio or residual income. Regulation Z outlines how to calculate the monthly DTI ratio, residual income, and the total monthly income.[22] Total monthly income[23] used to calculate the consumer's monthly debt-to-income ratio or residual income must be verified using third-party records that provide reasonably reliable evidence of the consumer's income or assets, specific to the individual consumer.[24] Whether the creditor considers the consumer's current or reasonably expected income or the consumer's assets, a creditor remains obligated to consider the consumer's monthly DTI ratio or residual income in accordance with Regulation Z. This means that a creditor must verify the income that it relies on in considering the monthly DTI ratio or residual income.[25]

In one or more instances, supervised entities offered mortgage loan programs that accepted alternative income documentation for salaried consumers as part of their underwriting requirements. According to the supervised entities, they relied primarily on the assets of each consumer when making an ATR determination, but also established a maximum monthly DTI ratio in their underwriting policies and procedures.[26] For these loans, examiners confirmed the assets were verified using reasonably reliable third-party records such as financial institution records. However, examiners found that the income disclosed on the application to calculate the consumer's monthly DTI ratio was not verified, but instead was tested for reasonableness using an internet-based tool that aggregates employer data and estimates income based upon each consumer's residence zip code address, job title, and years in their current occupation.

Supervision concluded that this practice of failing to properly verify the consumer's income relied upon in considering and calculating the consumer's monthly DTI ratio violated ATR requirements.[27] Supervision directed these supervised entities to revise their underwriting policies and

[14] These Title XIV rules include the Loan Originator Rule (12 CFR 1026.36), the Ability to Repay rule (12 CFR 1026.43), and rules reflecting amendments to the Equal Credit Opportunity Act and Truth in Lending Act regarding appraisals and valuations (12 CFR 1002.14 and 12 CFR 1026.35).

[15] TILA is implemented by Regulation Z and RESPA by Regulation X.

[16] These mortgage origination examination findings cover a period preceding the effective date of the Know Before You Owe Integrated Disclosure Rule. The disclosures reviewed in these exams are the Good Faith Estimate (GFE), the Truth in Lending disclosure, and the HUD–1 form.

[17] 12 CFR 1026.43(c)(1).

[18] One of the eight factors, the consumer's current employment status under 12 CFR 1026.43(c)(2)(ii), is conditional and considered if the creditor relies on income from the consumer's employment.

[19] 12 CFR 1026.43(c)(2)(i)–(c)(2)(viii).

[20] 12 CFR 1026.43(c)(3); Official Interpretation to 43(c)(3)–1 [Verification Using Third-Party Records—Records Specific to the Individual Consumer]. Records a creditor uses for verification under § 1026.43(c)(3) and (4) must be specific to the individual consumer. Records regarding average incomes in the consumer's geographic location or average wages paid by the consumer's employer, for example, are not specific to the individual consumer and are not sufficient for verification.

procedures in order to comply with the consideration, calculation, and verification of income requirements concerning the consumer's monthly DTI ratio or residual income when making the consumer's repayment ability determination.

2.4.4 Failure To Provide Timely Disclosures

Creditors are required to provide several disclosures to consumers no later than three business days after receiving a consumer's application for a close-end loan secured by a first lien on a dwelling. For examinations covering the period prior to the October 3, 2015, effective date for the Know Before You Owe mortgage disclosure rule, these disclosures included a written notice of the consumer's right to receive a copy of all written appraisals developed in connection with the application,[28] and a good faith estimate (GFE) of settlement costs.[29] Creditors were also required to provide a clear and conspicuous written list of homeownership counseling organizations.[30] One or more institutions failed to provide these disclosures within three business days after receiving the consumer's application. The institutions agreed to strengthen their monitoring and corrective action functions to address the timeliness of disclosures.

2.4.5 Failure To Ensure That Loan Originators Are Properly Licensed or Registered Under the Applicable SAFE Act Regulation

Regulation Z requires that loan originator organizations ensure that, before individuals who work for them act as loan originators in consumer credit transactions, they must be licensed or registered as required by the SAFE Act, its implementing Regulations G and H, and state SAFE Act implementing law.[31] One or more Federally-regulated depository institutions used employees of a staffing agency to originate loans on their behalf. These employees were improperly registered in the National Multistate Licensing System and Registry (NMLSR) as employees of the depository institutions. The staffing agency was not a Federally-regulated depository, and its employees were not eligible to register under Regulation G; instead, their eligibility was governed by Regulation H and applicable state law. Supervision directed the institutions to discontinue the practice of using employees of third parties who are not properly registered or licensed.

2.5 Student Loan Servicing

The Bureau continues to examine Federal and private student loan servicing activities, primarily assessing whether entities have engaged in unfair, deceptive, or abusive acts or practices prohibited by the Dodd-Frank Act. In the Bureau's recent student loan servicing examinations, examiners identified a number of unfair or deceptive acts or practices.

2.5.1 Income-Driven Repayment Plan Applications

Borrowers with Federal loans are eligible for specific income-driven repayment (IDR) plans that allow them to lower their monthly payments to an affordable amount based on their monthly income.[32] In response to a request for information last year, the Bureau heard from a significant number of consumers and commenters that borrowers are encountering problems when attempting to enroll and apply for IDR plans.[33] In August of this year, the Bureau issued a midyear update on student loan complaints. The report notes that the Bureau has received complaints on issues relating to enrollment in IDR plans since the Bureau began accepting Federal student loan servicing complaints.[34]

During one or more recent exams of student loan servicers, examiners determined that servicers were engaging in the unfair practice of denying, or failing to approve, IDR applications that should have been approved on a regular basis. When servicers fail to approve valid IDR applications, borrowers can be injured by having to make higher payments, losing months that would count towards loan forgiveness, or being subjected to unnecessary interest capitalization.

In light of this unfair practice, Supervision has directed one or more servicers to remedy borrowers who were improperly denied, and significantly enhance policies and procedures to promptly follow up with consumers who submit applications that are incomplete, prioritize applications that are approaching recertification deadlines, and implement a monitoring program to rigorously verify the accuracy of IDR application decisions. Servicers seeking guidance on how to improve IDR application processing may wish to refer to the policy memo published by the Department of Education on July 20, 2016.[35]

2.5.2 Borrower Choice for Payment Allocation

Supervision has continued to identify unfair practices relating to how servicers provide borrower choice on allocating payments among multiple loans.[36] Borrowers often have to take out multiple student loans to pay for school, and servicers usually manage multiple student loans by compiling them into one account, billing statement, and/or consumer profile. But borrowers generally retain the right to choose how their payments are allocated among the discrete student loan obligations.

In one or more recent exams, Bureau examiners cited servicers for the unfair practice of failing to provide an effective choice on how payments should be allocated among multiple loans where the lack of choice can cause a financial detriment to consumers. One or more servicers failed to provide an effective choice by, for example, not giving borrowers the ability to allocate payments to individual loans in certain circumstances, not effectively disclosing that borrowers have the ability to provide payment instructions, or not effectively disclosing important information (like the allocation methodology used when instructions are not provided).

Examiners have found that failing to provide borrowers with an effective choice on how to allocate payments can result in financial detriment when a servicer allocates payments proportionally among all loans absent payment instructions from the borrower. For payments that exceed a borrower's monthly payment, borrowers may wish to allocate funds to loans with higher interest rates instead of a default proportional allocation. For payments that are lower than a borrower's monthly payment, borrowers may wish

[36] *See* CFPB, *Supervisory Highlights,* 2.5.1 (Fall 2014), *available at http://files.consumerfinance.gov/f/201410_cfpb_supervisory-highlights_fall-2014.pdf;* CFPB, *Supervisory Highlights,* 2.5.1 (Fall 2015), *available at http://files.consumerfinance.gov/f/201510_cfpb_supervisory-highlights.pdf.*

to allocate funds in a manner that minimizes late fees, interest accrual, or the severity of delinquency, or in other manners, rather than proportionally allocating the underpayment.

After finding this unfair practice, the Bureau directed one or more servicers to hire an independent consultant to conduct user testing of servicer communications in order to improve how the communications describe the basic principles of the servicer's payment allocation methodologies, as well as the consumer's ability to provide payment instructions. Servicers seeking guidance on how to improve their billing statements, Web sites, or allocation methodologies may wish to consider the applicable content in the Department of Education's recent policy memo.[37]

2.5.3 Communications Relating to Paid-Ahead Status

When borrowers submit a payment in an amount that would cover the current month's payment and at least another monthly payment, servicers apply the excess funds immediately to accrued interest and principal. Unless borrowers choose otherwise, servicers also typically advance the due date such that $0 is billed in the months that were covered by the extra funds from the overpayment.[38] These loans are considered to be ''paid ahead,'' and borrowers don't have to make payments when they are billed $0. However, a significant amount of accrued interest can accumulate during a paid ahead period, depending on how long the borrower doesn't pay, because interest continues to accrue. When borrowers resume making monthly payments on a loan, their payments must be applied to that accumulated interest before any money is used to pay down principal on that loan.

On one or more occasions, Supervision cited a student loan servicer for a deceptive practice relating to how the servicer describes what the consumer owes and when. Supervision concluded that one or more servicers' billing statements could have misled reasonable borrowers to believe additional payments during *or after* a paid-ahead period would be applied largely to principal. The bills noted that $0.00 was due in months that the borrower was paid ahead, but misled consumers as to how much interest would accrue or had accrued, and how that would affect the application of consumers' payments when the borrower began making payments again.

After finding this deceptive practice, the Bureau directed one or more servicers to hire an independent consultant to conduct user testing of servicer communications to improve how the servicer communicates about these concepts. Servicers seeking guidance on what to include in their billing statements may wish to consider the applicable content in the Department of Education's recent policy memo.[39]

2.5.4 System Errors

Supervision continues to identify systems errors impacting student loan borrowers.[40] For example, examiners found a data error affecting thousands of Federal loan accounts that caused borrowers' next-to-last payment to be significantly smaller, contrary to consumers' repayment plans. Because borrowers were not billed amounts that would add up to cover the whole balance in accordance with the borrower's repayment plan, the borrower continued to be billed small amounts for months or years, increasing the total amount of interest that accrued. On one or more occasions, examiners cited this practice as unfair, and directed the servicer to remediate consumers and fix the data corruption for borrowers who had not yet reached the next-to-last payment.

3. Fair Lending

3.1 Provision of Language Services to Limited English Proficient (LEP) Consumers

The Dodd-Frank Act, the Equal Credit Opportunity Act (ECOA),[41] and Regulation B mandate that the Office of Fair Lending and Equal Opportunity (Office of Fair Lending) ''ensure the fair, equitable, and nondiscriminatory access to credit''[42] and ''promote the availability of credit.''[43] Consistent with that mandate, the CFPB, including through its Office of Fair Lending, continues to encourage lenders to provide assistance to consumers with limited English proficiency (LEP consumers).[44] Financial institutions may provide access to credit in languages other than English in a manner that is beneficial to consumers as well as the institution, while taking steps to ensure their actions are compliant with ECOA and other applicable laws.

3.1.1 Supervisory Observations

In the course of conducting supervisory activity, examiners have observed one or more financial institutions providing services in languages other than English, including to consumers with limited English proficiency,[45] in a manner that did not result in any adverse supervisory or enforcement action under the facts and circumstances of the reviews. Specifically, examiners observed:

- Marketing and servicing of loans in languages other than English;
- Collection of customer language information to facilitate communication with LEP consumers in a language other than English;
- Translation of certain financial institution documents sent to borrowers, including monthly statements and payment assistance forms, into languages other than English;
- Use of bilingual and/or multilingual customer service agents, including single points of contact,[46] and other forms of oral customer assistance in languages other than English; and
- Quality assurance testing and monitoring of customer assistance provided in languages other than English.

[44] According to recent American Community Survey estimates, there are approximately 25 million people in the United States who speak English less than ''very well.'' 2010–2014 American Community Survey 5-Year Estimates, Language Spoken at Home, *available at http://factfinder.census.gov/faces/tableservices/jsf/pages/productview.xhtml?pid=ACS_14_5YR_S1601&prodType=table.*

[45] The Bureau recently updated its ECOA baseline review modules. *See* Supervisory Highlights: Winter 2016 4.1.1, *available at http://files.consumerfinance.gov/f/201603_cfpb_supervisory-highlights.pdf.* Among other updates, the modules include new questions related to the provision of language services, including to LEP consumers, in the context of origination and servicing. *See* ECOA Baseline Review Module 13, 21–22 (Oct. 2015), *available at http://files.consumerfinance.gov/f/201510_cfpb_ecoa-baseline-review-modules.pdf.* These modules are ''used by examiners during ECOA baseline reviews to identify and analyze risks of ECOA violations, to facilitate the identification of certain types of ECOA and Regulation B violations, and to inform fair lending prioritization decisions for future CFPB reviews.'' *Id.* at 1.

[46] *See* 12 CFR 1024.40(a)(1) and (2) (requiring mortgage servicers to assign personnel to a delinquent borrower within a certain time after delinquency and make assigned personnel available by phone in order to respond to borrower inquiries and assist with loss mitigation options, as applicable).

Examiners have observed a number of factors that financial institutions consider in determining whether to provide services in languages other than English and the extent of those services, some of which include: Census Bureau data on the demographics or prevalence of non-English languages within the financial institution's footprint; communications and activities that most significantly impact consumers (*e.g.,* loss mitigation and/or default servicing); and compliance with Federal, state, and other regulatory provisions that address obligations pertaining to languages other than English.[47] Factors relevant in the compliance context may vary depending on the institution and circumstances.

3.1.2 Observations

Examiners also have observed situations in which financial institutions' treatment of LEP and non-English-speaking consumers posed fair lending risk. For example, examiners observed one or more institutions marketing only some of their available credit card products to Spanish-speaking consumers, while marketing several additional credit card products to English-speaking consumers. One or more such institutions also lacked documentation describing how they decided to exclude those products from Spanish language marketing, raising questions about the adequacy of their compliance management systems related to fair lending. To mitigate any compliance risks related to these practices, one or more financial institutions revised their marketing materials to notify consumers in Spanish of the availability of other credit card products and included clear and timely disclosures to prospective consumers describing the extent and limits of any language services provided throughout the product lifecycle. Institutions were not required to provide Spanish language services to address this risk beyond the Spanish language services they were already providing.

3.1.3 Supervisory Activity Resulting in Enforcement Actions

Bureau supervisory activity has also revealed violations of Federal consumer financial law related to treatment of LEP and non-English-speaking consumers. In June 2014, the Bureau and the Department of Justice announced an enforcement action against Synchrony Bank, formerly known as GE Capital Retail Bank, to address violations of ECOA based on, among other things, the exclusion of consumers who had indicated that they preferred to communicate in Spanish from two different promotions about beneficial debt-relief offers. For as long as three years, the bank did not provide the offers to these consumers, in *any* language, including English, even if the consumer otherwise met the promotion's qualifications.[48] In addition to requiring remediation to affected consumers, the bank was ordered to ensure that consumers who had expressed a preference for communicating in Spanish were not excluded from receiving credit offers.

In December 2013, the Bureau announced an enforcement action against American Express Centurion Bank addressing, among other violations of law, deceptive acts or practices in telemarketing of a credit card add-on product to Spanish-speaking customers in Puerto Rico. The vast majority of consumers enrolled in this product enrolled via telemarking calls conducted in Spanish. Yet American Express did not provide uniform Spanish language scripts for these enrollment calls, and all written materials provided to consumers were in English. As a result, American Express did not adequately alert consumers enrolled via telemarketing calls conducted in Spanish about the steps necessary to receive and access the full product benefits. The statements and omissions by American Express were likely to affect a consumer's choice or conduct regarding the product and were likely to mislead consumers acting reasonably under the circumstances.[49] In addition to requiring remediation to affected consumers, the bank was ordered to, among other things, eliminate all deceptive acts and practices, including deceptive representations, statements, or omissions in its add-on product marketing materials and telemarketing scripts.

3.1.4 Compliance Management

As with any consumer-facing program, financial institutions can mitigate fair lending and other risks associated with providing services in languages other than English by implementing a strong CMS that considers treatment of LEP and non-English-speaking consumers. Although the appropriate scope of an institution's fair lending CMS will vary based on its size, complexity, and risk profile, common features of a well-developed CMS include:

▪ An up-to-date fair lending policy statement, documenting the policies, procedures, and decision-making related to the institution's provision of language services;

▪ Regular fair lending training for all officers and board members as well as all employees involved with any aspect of the institution's credit transactions, including the provision of language services;

▪ Review of lending policies for potential fair lending risk;

▪ Ongoing monitoring for compliance with fair lending policies and procedures, and appropriate corrective action if necessary;

▪ Ongoing monitoring for compliance with other policies and procedures that are intended to reduce fair lending risk (such as controls on loan originator discretion), and appropriate corrective action if necessary;

▪ Depending on the size and complexity of the financial institution, regular statistical analysis (as appropriate) of loan-level data for potential disparities on a prohibited basis in underwriting, pricing, or other aspects of the credit transaction, including both mortgage and non-mortgage products such as credit cards, auto lending, and student lending;

▪ Regular assessment of the marketing of loan products. For example, institutions may elect to monitor language services for risk of steering, exclusion of LEP and non-English-speaking consumers from certain offers, or any other fair lending risk, and for risk of unfair, deceptive, or abusive acts or practices; and

[47] *See, e.g.,* 12 CFR 1005.31(g)(1)(i) (requiring disclosures in languages other than English in certain circumstances involving remittance transfers); 12 CFR 1026.24(i)(7) (addressing obligations relating to advertising and disclosures in languages other than English for closed-end credit); 12 CFR 1002.4(e) (providing that disclosures made in languages other than English must be available in English upon request); Cal Civ Code 1632(b) (requiring that certain agreements ''primarily'' negotiated in Spanish, Chinese, Tagalog, Vietnamese, or Korean must be translated to the language of the negotiation under certain circumstances); Or Rev Stat § 86A.198 (requiring a mortgage banker, broker, or originator to provide translations of certain notices related to the mortgage transaction if the banker, broker, or originator advertises and negotiates in a language other than English under certain circumstances); Tex Fin Code Ann 341.502(a–1) (providing that for certain loan contracts negotiated in Spanish, a summary of the loan terms must be made available to the debtor in Spanish in a form identical to required TILA disclosures for closed-end credit).

[48] *See* Supervisory Highlights: Fall 2014 Section 2.7.1, *available at http://files.consumerfinance.gov/f/201410_cfpb_supervisory-highlights_fall-2014.pdf. See also In re Synchrony Bank,* No. 2014–CFPB–0007 (June 19, 2014), *available at http://files.consumerfinance.gov/f/201406_cfpb_consent-order_synchrony-bank.pdf.*

[49] *See In re American Express Centurion Bank,* No. 2013–CFPB–0011 (Dec. 24, 2013), *available at http://files.consumerfinance.gov/f/201312_cfpb_consent_amex_centurion_011.pdf.*

▪ Meaningful oversight of fair lending compliance by management and, where appropriate, the financial institution's board of directors.[50]

While many CFPB-supervised institutions face similar fair lending risks, they may differ in how they manage those risks. The CFPB understands that compliance management will be handled differently by large, complex financial organizations at one end of the spectrum, and small entities that offer a narrow range of financial products and services at the other end. While the characteristics and manner of organization will vary from entity to entity, the CFPB expects compliance management activities to be a priority and to be appropriate for the nature, size, and complexity of the financial institution's consumer business.

The Bureau remains interested in understanding how institutions provide products and services in languages other than English in a way that promotes access to responsible credit and services. The Bureau welcomes engagement with institutions on how to promote access for LEP and non-English-speaking consumers.

3.2 HMDA Data Collection and Reporting Reminders for 2017

Beginning with Home Mortgage Disclosure Act (HMDA) data collected in 2017 and submitted in 2018, responsibility to receive and process HMDA data will transfer from the Federal Reserve Board (FRB) to the CFPB. The HMDA agencies have agreed that a covered institution filing HMDA data collected in or after 2017 with the CFPB will be deemed to have submitted the HMDA data to the appropriate Federal agency.[51]

The effective date of the change in the Federal agency that receives and processes the HMDA data does not coincide with the effective date for the new HMDA data to be collected and reported under the Final Rule amending Regulation C published in the **Federal Register** on October 28, 2015. The Final Rule's new data requirements will apply to data collected beginning on January 1, 2018. The data fields for data collected in 2017 have not changed.

The following information is from the Bureau's HMDA Filing Instructions Guide (FIG). Additional information about HMDA, the FIG and other data submission resources is located at: *http://www.consumerfinance.gov/data-research/hmda/.*

3.2.1 New HMDA Platform

Beginning with data collected in 2017, filers will submit their HMDA data using a web interface referred to as the ''HMDA Platform.'' The following submission methods will *not* be permitted for data collected in or after 2017:

▪ PC Diskette and CD–ROM.
▪ Submission via Web (from the Data Entry Software (DES)).
▪ Email to *HMDASUB@FRB.GOV*.
▪ Paper Submissions.

Also, beginning with the data collected in 2017, as part of the submission process, a HMDA reporter's authorized representative with knowledge of the data submitted shall certify to the accuracy and completeness of the data submitted. Filers will not fax or email the signed certification.

3.2.2 Loan/Application Register Format

Beginning with data collected in 2017, HMDA data loan/application registers (LAR) will be submitted in a pipe (also referred to as vertical bar) delimited text file format (.txt). This means that:

▪ Each data field within each row will be separated with a pipe character, ''|''.
▪ Zeros do not need to be added for the sole purpose of making a data field a specific number of characters.[52]
▪ Filler data fields will no longer be used in the file.
▪ The loan/application register will be a text file with a .txt file format extension.

Text entries in alphanumeric fields do not need to use all uppercase letters with the exception of:

▪ NA'' used when the reporting requirement is not applicable.
▪ Two letter state codes.

As with previous submissions:

▪ The first row of the HMDA LAR will begin with the number one (1) to indicate that the data fields in row one contain data fields for the transmittal sheet, with information relating to your institution.
▪ All subsequent rows of HMDA LAR will begin with the number two (2) to indicate that the data fields beginning in row two contain data fields for LAR, with information relating to the reported loan or application.
▪ Each row will end with a carriage return.

3.3 Redlining

The Office of Fair Lending has identified redlining as a priority area in the Bureau's supervisory work. Redlining is a form of unlawful lending discrimination under ECOA. Historically, actual red lines were drawn on maps around neighborhoods to which credit would not be provided, giving this practice its name.

The Federal prudential banking regulators have collectively defined redlining as ''a form of illegal disparate treatment in which a lender provides unequal access to credit, or unequal terms of credit, because of the race, color, national origin, or other prohibited characteristic(s) of the residents of the area in which the credit seeker resides or will reside or in which the residential property to be mortgaged is located.'' [53]

The Bureau considers various factors, as appropriate, in assessing redlining risk in its supervisory activity. These factors, and the scoping process, are described in detail in the Interagency Fair Lending Examination Procedures (IFLEP). These factors generally include (but are not limited to):

▪ Strength of an institution's CMS, including underwriting guidelines and policies;
▪ Unique attributes of relevant geographic areas (population demographics, credit profiles, housing market);
▪ Lending patterns (applications and originations, with and without purchased loans);
▪ Peer and market comparisons;
▪ Physical presence (full service branches, ATM-only branches, brokers, correspondents, loan production offices), including consideration of services offered;
▪ Marketing;
▪ Mapping;
▪ Community Reinvestment Act (CRA) assessment area and market area more generally;
▪ An institution's lending policies and procedures record;
▪ Additional evidence (whistleblower tips, loan officer diversity, testing evidence, comparative file reviews); and

[50] For additional information regarding strong CMS for managing fair lending risks, see *Supervisory Highlights,* section II, C (Fall 2012) *available at http://files.consumerfinance.gov/f/201210_cfpb_supervisory-highlights-fall-2012.pdf* and *Supervisory Highlights,* section 3.2.1 (Summer 2014) *available at http://files.consumerfinance.gov/f/201409_cfpb_supervisory-highlights_auto-lending_summer-2014.pdf.*

[51] The HMDA agencies refer collectively to the CFPB, the Office of the Comptroller of the Currency (OCC), the Federal Deposit Insurance Corporation (FDIC), the FRB, the National Credit Union Administration (NCUA), and the Department of Housing and Urban Development (HUD).

[52] The one exception to this instruction is for rate spreads collected in 2017; rate spread is entered to two decimal places using a leading zero, for example, 03.29.

[53] FFIEC Interagency Fair Lending Examination Procedures (IFLEP) Manual, *available at https://www.ffiec.gov/pdf/fairlend.pdf.*

CFPB Supervision and Examination Manual, *available at http://www.consumerfinance.gov/policy-compliance/guidance/supervision-examinations.*

▪ An institution's explanations for apparent differences in treatment.

The Bureau has observed that institutions with strong compliance programs examine lending patterns regularly, look for any statistically-significant disparities, evaluate physical presence, monitor marketing campaigns and programs, and assess CRA assessment areas and market areas more generally. Our supervisory experience reveals that institutions may reduce fair lending risk by documenting risks they identify and by taking appropriate steps in response to identified risks, as components of their fair lending compliance management programs.

Examination teams typically assess redlining risk, at the initial phase, at the Metropolitan Statistical Area (MSA) level for each supervised entity, and consider the unique characteristics of each MSA (population demographics, etc.).

To conduct the initial analysis, examination teams use HMDA data and census data [54] to assess the lending patterns at institutions subject to the Bureau's supervisory authority. To date, examination teams have used these publicly-available data to conduct this initial risk assessment. These initial analyses typically compare a given institution's lending patterns to other lenders in the same MSA to determine whether the institution received significantly fewer applications from minority [55] areas [56] relative to other lenders in the MSA.

Examination teams may consider the difference between the subject institution and other lenders in the percentage of their applications or originations that come from minority areas, both in absolute terms (for example, 10% vs. 20%) and relative terms (for example, the subject institution is half as likely to have applications or originations in minority areas as other lenders).[57]

Examination teams may also compare an institution to other more refined groups of peer institutions. Refined peers can be defined in a number of ways, and past Bureau redlining examinations and enforcement matters have relied on multiple peer comparisons. The examination team often starts by compiling a refined set of peer institutions to find lenders of a similar size—for example, lenders that received a similar number of applications or originated a similar number of loans in the MSA. The examination team may also consider an institution's mix of lending products. For example, if an institution participates in the Federal Housing Administration (FHA) loan program, it may be compared to other institutions that also originate FHA loans; if not, it may be compared to other lenders that do not offer FHA loans. Additional refinements may incorporate loan purpose (for example, focusing only on home purchase loans) or action taken (for example, incorporating purchased loans into the analysis). Examination teams have also taken suggestions, as appropriate, from institutions about appropriate peers in specific markets.

In considering lending patterns, examination teams also generally consider marketing activities and physical presence, including locations of branches, loan production offices, ATMs, brokers, or correspondents. In one or more supervisory matters, the institutions concentrated marketing in majority-White suburban counties of an MSA and avoided a more urban county with the greatest minority population in the MSA. In one or more other exams, examiners observed that, although there were disparities in branch locations, the location of branches did not affect access to credit in that case because, among other things, the branches did not accept ''walk-in'' traffic and all applications were submitted online. The results of the examinations were also dependent on other factors that showed equitable access to credit, and there could be cases in which branch locations in combination with other risk-based factors escalate redlining risk.

For redlining analyses, examination teams generally map information, including data on lending patterns (applications and originations), marketing, and physical presence, against census data to see if there are differences based on the predominant race/ethnicity of the census tract, county, or other geographic designation. Additionally, examination teams will consider any other available evidence about the nature of the lender's business that might help explain the observed lending patterns.

Examination teams have considered numerous factors in each redlining examination, and have invited institutions to identify explanations for any apparent differences in treatment. Although redlining examinations are generally scheduled at institutions where the Bureau has identified statistical disparities, statistics are never considered in a vacuum. The Bureau will always work with institutions to understand their markets, business models, and other information that could provide nondiscriminatory explanations for lending patterns that would otherwise raise a fair lending risk of redlining.

3.4 Consent Order Update: Ally Financial Inc. and Ally Bank

On December 19, 2013, working in close coordination with the DOJ, the CFPB ordered Ally Financial Inc. and Ally Bank (Ally) to pay $80 million in damages to harmed African-American, Hispanic, and Asian and/or Pacific Islander borrowers. The DOJ simultaneously filed a consent order in the United States District Court for the Eastern District of Michigan, which was entered by the court on December 23, 2013. This public enforcement action represented the federal government's largest auto loan discrimination settlement in history.

On January 29, 2016, approximately 301,000 harmed borrowers participating in the settlement—representing approximately 235,000 loans—were mailed checks by the Ally settlement administrator, totaling $80 million plus interest. In addition, and pursuant to its continuing obligations under the terms of the orders, Ally has also made ongoing payments to consumers affected after the consent orders were entered. Specifically, Ally paid approximately $38.9 million in September 2015 and an additional $51.5 million in May 2016, to consumers that Ally determined were both eligible and overcharged on auto

[54] The Bureau uses the most current United States national census data that apply to the HMDA data—for example, to date it has used 2010 census data for HMDA data 2011 and later. Specifically, the ''Demographic Profiles'' are used.

[55] For these purposes, the term ''minority'' ordinarily refers to anyone who identifies with any combination of race or ethnicity other than non-Hispanic White. Examination teams have also focused on African-American and Hispanic consumers, and could foreseeably focus on other more specific minority communities such as Asian, Native Hawaiian, or Native Alaskan populations, if appropriate for the specific geography. In one examination that escalated to an enforcement matter, the statistical evidence presented focused on African-American and Hispanic census tracts, rather than all minority consumers, because the harmed consumers were primarily African-American and Hispanic.

[56] Examination teams typically look at majority minority areas (>50% minority) and high minority areas (>80% minority), although sometimes one metric is more appropriate than another, and sometimes other metrics need to be used to account for the population demographics of the specific MSA.

[57] This relative analysis may be expressed as an odds ratio: the given lender's odds of receiving an application or originating a loan in a minority area divided by other lenders' comparable odds. An odds ratio greater than one means that the institution is more likely to receive applications or originate loans in minority areas than other lenders; an odds ratio lower than one means that the institution is less likely do so. Odds ratios show greater risk as they approach zero.

loans issued during 2014 and 2015, respectively.[58]

4. Remedial Actions

4.1.1. Public Enforcement Actions

The following public enforcement actions resulted, at least in part, from examination work.

First National Bank of Omaha

On August 25, the CFPB announced an enforcement action against First National Bank of Omaha for its deceptive marketing practices and illegal billing of customers of add-on products. The bank used deceptive marketing to lure consumers into debt cancellation add-on products and it charged consumers for credit monitoring services they did not receive. Among other things, the bank disguised the fact that it was selling consumers a product, distracted consumers into making a purchase, made cancellation of debt cancellation products difficult, and billed for credit monitoring services not provided.

The Bureau's order required First National Bank of Omaha to end unfair billing and other illegal practices, provide $27.75 million in relief to roughly 257,000 consumers harmed by its illegal practices, and pay a $4.5 million civil money penalty.

Wells Fargo Bank, N.A

On August 22, the CFPB took action against Wells Fargo Bank for illegal private student loan servicing practices that increased costs and unfairly penalized certain student loan borrowers. The Bureau identified breakdowns throughout Wells Fargo's loan servicing process, including failing to provide important payment information to consumers, charging consumers illegal fees, and failing to update inaccurate credit report information. The order requires Wells Fargo to improve its consumer billing and student loan payment processing practices, provide $410,000 in relief to borrowers, and pay a $3.6 million civil money penalty.

4.1.2 Non-Public Supervisory Actions

In addition to the public enforcement actions above, recent supervisory activities have resulted in approximately $11.3 million in restitution to more than 225,000 consumers. These non-public supervisory actions generally have been the product of CFPB ongoing supervision and/or targeted examinations, involving either examiner findings or self-reported violations of Federal consumer financial law. Recent non-public resolutions were reached in the areas of deposits, mortgage servicing, and credit cards.

5. Supervision Program Developments

5.1 Examination Procedures

5.1.1 Reverse Mortgage Servicing Examination Procedures

Today, the CFPB is publishing procedures for examining reverse mortgage servicers.[59] A reverse mortgage allows older homeowners to borrow against the equity in their homes. Unlike a traditional home equity loan, instead of making payments to the servicer, the borrower receives payments from the lender. Over time, the loan amount grows, and must be repaid when the borrower dies or an event of default occurs. The Bureau has received complaints from consumers relating to the servicing of reverse mortgages. The procedures detail how examiners will review a reverse mortgage servicer's compliance with applicable regulations and assess other risks to consumers. The publication of these procedures precedes supervision of reverse mortgage servicers.

5.1.2 Student Loan Servicing Examination Procedures

The Bureau is also publishing today new procedures for examining student loan servicers,[60] the entities that take payments and manage borrower accounts for consumers of Federal and private education loans. For the last few years, the Bureau has been examining student loan servicers using exam procedures released in 2013. The new procedures reflect the Bureau's new priorities based on experience in the market over those years. For example, we enhanced the sections related to servicer communications about income-driven repayment (IDR) plans, and relating to the IDR application process. We also enhanced the procedures relating to payment processing, and other communications with consumers like billing statements. The procedures detail how examiners in future student loan servicing exams will review student loan servicers' compliance with Federal consumer financial law, including the prohibition against unfair, deceptive, or abusive acts or practices.

5.1.3 Military Lending Act Examination Procedures

On September 30, 2016, the CFPB issued the procedures its examiners will use in identifying consumer harm and risks related to the Military Lending Act (MLA) rule.[61] The MLA rule was updated by the Department of the Defense in July 2015, and these exam procedures are based on the approved Federal Financial Institutions Examination Council (FFIEC) procedures. The exam procedures provide guidance to industry on what the CFPB will be looking for during reviews covering the amended regulation.

For most forms of credit subject to the updated MLA rule, creditors were required to comply with the amended regulation as of Oct. 3, 2016; credit card providers must comply with the new rule as of Oct. 3, 2017.

5.2 Recent CFPB Guidance

5.2.1 Amendment to the Service Provider Bulletin

Today, the CFPB is amending and reissuing its service provider bulletin as CFPB Compliance Bulletin and Policy Guidance 2016–02, Service Providers.[62] The amendment clarifies that the Bureau expects that ''the depth and formality of the entity's risk management program for service providers may vary depending upon the service being performed—its size, scope, complexity, importance, and potential for consumer harm—and the performance of the service provider in carrying out its activities in compliance with Federal consumer financial laws and regulations. While due diligence does not provide a shield against liability for actions by the service provider, using appropriate due diligence can reduce the risk that the service provider will commit violations for which the supervised entity may be responsible.''

Some entities may have interpreted the Bureau's 2012 bulletin to mean they had to use the same due diligence

[58] Additional information regarding this public enforcement action can be found in Supervisory Highlights, 2.6.1 (Winter 2016), available at *http://files.consumerfinance.gov/f/201603_cfpb_supervisory-highlights.pdf* and Supervisory Highlights (Summer 2014), *available at http://files.consumerfinance.gov/f/201409_cfpb_supervisory-highlights_auto-lending_summer-2014.pdf.*

[59] *See* the reverse mortgage servicing procedures, *available at files.consumerfinance.gov/f/documents/102016_cfpb_ReverseMortgageServicingExaminationProcedures.pdf.*

[60] *See* the student loan servicing procedures, *available at files.consumerfinance.gov/f/documents/102016_cfpb_EducationLoanServicingExamManualUpdate.pdf.*

[61] *See* the MLA examination procedures, *available at http://www.consumerfinance.gov/policy-compliance/guidance/supervision-examinations/military-lending-act-examination-procedures/.*

[62] *See* CFPB, Compliance Bulletin 2016–02, *available at files.consumerfinance.gov/f/documents/102016_cfpb_OfficialGuidanceServiceProviderBulletin.pdf.*

requirements for all service providers no matter the risk for consumer harm. As a result, some small service providers have reported that entities have imposed the same due diligence requirements on them as for the largest service providers. The amendment clarifies that the risk management program may be tailored very appropriately to the size, market, and level of risk for consumer harm presented by the service provider.

This change is consistent with the guidance of the Federal prudential regulators and aligns the bulletin with the Bureau's approach that a risk management program should take into account the risk of consumer harm presented by the service being provided and supervised entities may tailor their due diligence based on the risk of consumer harm. Appropriate risk management programs would further the goal of ensuring that entities comply with Federal consumer financial laws and avoid consumer harm, including when using service providers.

6. Conclusion

The Bureau expects that regular publication of *Supervisory Highlights* will continue to aid CFPB-supervised entities in their efforts to comply with Federal consumer financial law. The report shares information regarding general supervisory and examination findings (without identifying specific institutions, except in the case of public enforcement actions), communicates operational changes to the program, and provides a convenient and easily accessible resource for information on the CFPB's guidance documents.

Dated: October 31, 2016.

Richard Cordray,

Director, Bureau of Consumer Financial Protection.

[FR Doc. 2016–28094 Filed 11–21–16; 8:45 am]

BILLING CODE 4810–AM–P

DEPARTMENT OF DEFENSE

GENERAL SERVICES ADMINISTRATION

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[OMB Control No. 9000–0194; Docket No. 2016–0053; Sequence 32]

Submission for OMB Review; Public Disclosure of Greenhouse Gas Emissions and Reduction Goals-Representations

AGENCY: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Notice of request for comments regarding a new OMB clearance.

SUMMARY: Under the provisions of the Paperwork Reduction Act, the Regulatory Secretariat Division will be submitting to the Office of Management and Budget (OMB) a request for approval of an information collection requirement regarding Public Disclosure of Greenhouse Gas Emissions and Reduction Goals-Representations. A notice was published in the **Federal Register** at 81 FR 33192 on May 25, 2016, as part of a proposed rule under FAR Case 2015–024. No public comments were received on the information collection.

DATES: Submit comments on or before December 22, 2016.

ADDRESSES: Submit comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to: Office of Information and Regulatory Affairs of OMB, Attention: Desk Officer for GSA, Room 10236, NEOB, Washington, DC 20503. Additionally submit a copy to GSA by any of the following methods:

- *Regulations.gov: http://www.regulations.gov.* Submit comments via the Federal eRulemaking portal by searching the OMB control number 9000–0194. Select the link "Comment Now" that corresponds with "Information Collection 9000–0194, Public Disclosure of Greenhouse Gas Emissions and Reduction Goals-Representations". Follow the instructions provided on the screen. Please include your name, company name (if any), and "Information Collection 9000–0194, Public Disclosure of Greenhouse Gas Emissions and Reduction Goals-Representations" on your attached document.
- *Mail:* General Services Administration, Regulatory Secretariat Division (MVCB), 1800 F Street NW., Washington, DC 20405. ATTN: Ms. Flowers/IC 9000–0194, Public Disclosure of Greenhouse Gas Emissions and Reduction Goals-Representations.

Instructions: Please submit comments only and cite "Information Collection 9000–0194, Public Disclosure of Greenhouse Gas Emissions and Reduction Goals-Representations", in all correspondence related to this collection. Comments received generally will be posted without change to *http://www.regulations.gov,* including any personal and/or business confidential information provided. To confirm receipt of your comment(s), please check *www.regulations.gov,* approximately two to three days after submission to verify posting (except allow 30 days for posting of comments submitted by mail).

FOR FURTHER INFORMATION CONTACT: Mr. Charles Gray, Procurement Analyst, Office of Governmentwide Acquisition Policy, at telephone 703–795–6328, or via email to *charles.gray@gsa.gov.*

SUPPLEMENTARY INFORMATION:

A. Purpose

Public disclosure of Greenhouse Gas (GHG) emissions and reduction goals or targets has become standard practice in many industries, and companies are increasingly asking their own suppliers about their GHG management practices. Performing a GHG inventory provides insight into operations, spurs innovation, and helps identify opportunities for efficiency and savings that can result in both environmental and financial benefits. By asking suppliers whether or not they publicly report emissions and reduction targets, the Federal Government will have accurate, up-to-date information on its suppliers. An annual representation will promote transparency and demonstrate the Federal Government's commitment to reducing supply chain emissions. Furthermore, by promoting GHG management and emissions reductions in its supply chain, the Federal Government will encourage supplier innovation, greater efficiency, and cost savings, benefitting both the Government and suppliers and adding value to the procurement process.

This representation would be mandatory only for vendors who received $7.5 million or more in Federal contract awards in the preceding Federal fiscal year. The representation would be voluntary for all other vendors. Additionally, as long as the vendor's emissions are reported publicly—either by the entity itself or rolled up into the public emissions report of a parent company—the emissions would be considered publicly reported.

B. Annual Reporting Burden

Respondents: 5,500.
Responses per Respondent: 1.
Annual Responses: 5,500.
Hours Per Response: .25.
Total Burden Hours: 1,375.
Affected Public: Businesses or other for-profit and not for profit institutions.
Frequency: Annual.

C. Public Comments

Public comments are particularly invited on: Whether this collection of information is necessary for the proper

performance of functions of the FAR, and whether it will have practical utility; whether our estimate of the public burden of this collection of information is accurate, and based on valid assumptions and methodology; ways to enhance the quality, utility, and clarity of the information to be collected; and ways in which we can minimize the burden of the collection of information on those who are to respond, through the use of appropriate technological collection techniques or other forms of information technology.

Obtaining Copies of Proposals: Requesters may obtain a copy of the information collection documents from the General Services Administration, Regulatory Secretariat (MVCB), 1800 F Street NW., Washington, DC 20405, telephone 202–501–4755.

Please cite ''OMB Control No. 9000–0194, Public Disclosure of Greenhouse Gas Emissions and Reduction Goals-Representations'', in all correspondence.

Dated: November 16, 2016.

Lorin S. Curit,

Director, Federal Acquisition Policy Division, Office of Governmentwide Acquisition Policy, Office of Acquisition Policy, Office of Governmentwide Policy.

BILLING CODE 6820–EP–P

DEPARTMENT OF DEFENSE

Office of the Secretary

TRICARE; Calendar Year 2017 TRICARE Young Adult Program Premium Update

AGENCY: Office of the Secretary of Defense, Department of Defense.

ACTION: Notice of Updated TRICARE Young Adult Premiums for Calendar Year 2017.

SUMMARY: This notice provides the updated TRICARE Young Adult program premiums for Calendar Year (CY) 2017.

DATES: The CY 2017 rates contained in this notice are effective for services on or after January 1, 2017.

ADDRESSES: Defense Health Agency, TRICARE Health Plan, 7700 Arlington Boulevard, Suite 5101, Falls Church, Virginia 22042–5101.

FOR FURTHER INFORMATION CONTACT: Mr. Mark A. Ellis, (703) 681–0039.

SUPPLEMENTARY INFORMATION: The final rule published in the **Federal Register** (FR) on May 29, 2013 (78 FR 32116–32121) sets forth rules to implement the TRICARE Young Adult (TYA) program as required by Title 10, United States Code, Section 1110b. Included in the final rule were provisions for updating the TYA premiums for each CY. By law, qualified young adult dependents are charged TYA premiums that represent the full government cost of providing such coverage.

The Defense Health Agency has updated the monthly premiums for CY 2017 as shown below:

MONTHLY TYA PREMIUMS FOR CY 2017

Type of coverage	Monthly rate
TRICARE Standard Plans	$216
TRICARE Prime Plans	319

The above premiums are effective for services rendered on or after January 1, 2017.

Dated: November 16, 2016.

Aaron Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

Department of the Navy

Notice of Availability of Government-Owned Inventions; Available for Licensing

AGENCY: Department of the Navy, DoD.

ACTION: Notice.

SUMMARY: The inventions listed below are assigned to the United States Government, as represented by the Secretary of the Navy and are available for domestic and foreign licensing by the Department of the Navy.

The following patents are available for licensing: Patent Application No. 14/587,455 (Navy Case No. 103030): ADHESION IMPROVEMENT IVA MATEIRAL NANOSTRUCUTURING OR TEXTURIZING//Patent Application No. 15/077,352 (Navy Case No. 200332): MODIFYING THE SURFACE CHEMISTRY OF A MATERIAL//and Navy Case No. 200322: ADHESION IMPROVEMENT VIA MATERIAL NANOSTRUCTURING OR TEXTURIZING.

ADDRESSES: Requests for copies of the patents cited should be directed to Naval Surface Warfare Center, Crane Div, Code OOL, Bldg 2, 300 Highway 361, Crane, IN 47522–5001.

FOR FURTHER INFORMATION CONTACT: Mr. Christopher Monsey, Naval Surface Warfare Center, Crane Div, Code OOL, Bldg 2, 300 Highway 361, Crane, IN 47522–5001, Email *Christopher.Monsey@navy.mil,* telephone 812–854–4100.

Authority: 35 U.S.C. 207, 37 CFR Part 404.

Dated: November 16, 2016.

BILLING CODE 3810–FF–P

DEPARTMENT OF EDUCATION

President's Advisory Commission on Educational Excellence for Hispanics

AGENCY: White House Initiative on Educational Excellence for Hispanics, U.S. Department of Education.

ACTION: Announcement of an open meeting.

SUMMARY: This notice sets forth the schedule and agenda of the twelfth meeting of the President's Advisory Commission on Educational Excellence for Hispanics (Commission). The notice also describes the functions of the Commission. Notice of the meeting is required by section 10(a)(2) of the Federal Advisory Committee Act and intended to notify the public of its opportunity to attend.

DATES: The President's Advisory Commission on Educational Excellence for Hispanics meeting will be held on Tuesday, December 6, 2016 from 9:00 a.m.–2:00 p.m. Eastern Standard Time.

ADDRESSES: National Education Association, Robert E. Chanin Auditorium, 1201 16th Street NW., Washington, DC 20036, 202–453–5529.

FOR FURTHER INFORMATION CONTACT: Emmanuel Caudillo, Senior Advisor, White House Initiative on Educational Excellence for Hispanics, 400 Maryland Ave. SW., Room 4W108, Washington, DC 20202; telephone: 202–401–1411.

SUPPLEMENTARY INFORMATION: The President's Advisory Commission on Educational Excellence for Hispanics Statutory Authority: The President's Advisory Commission on Educational Excellence for Hispanics (the Commission) is established by Executive Order 13555 (Oct. 19, 2010; continued on September 30, 2015 by Executive Order 13708). The Commission is governed by the provisions of the Federal Advisory Committee Act (FACA), (Pub. L. 92–463; as amended, 5 U.S.C.A., Appendix 2) which sets forth standards for the formation and use of advisory committees. The purpose of the Commission is to advise the President and the Secretary of Education on all matters pertaining to the education attainment of the Hispanic community.

The Commission shall advise the President and the Secretary in the following areas: (i) Developing, implementing, and coordinating educational programs and initiatives at the Department and other agencies to improve educational opportunities and outcomes for Hispanics of all ages; (ii) increasing the participation of the Hispanic community and Hispanic-Serving Institutions in the Department's programs and in education programs at other agencies; (iii) engaging the philanthropic, business, nonprofit, and education communities in a national dialogue regarding the mission and objectives of this order; (iv) establishing partnerships with public, private, philanthropic, and nonprofit stakeholders to meet the mission and policy objectives of this order.

Meeting Agenda

The open meeting will facilitate a discussion on the transition of Administration as it pertains to Hispanics and education related issues. The Commission members will provide recommendations for the Initiative's priorities for 2017.

Access to Records of the Meeting: The Department will post the official report of the meeting on the Commission's Web site 90 days after the meeting. Pursuant to the FACA, the public may also inspect the materials at 400 Maryland Avenue SW., Washington, DC, by emailing *Emmanuel.Caudillo@ed.gov* or by calling (202) 401–1411 to schedule an appointment.

Individuals who wish to attend the Commission meeting must RSVP by 12 noon EST, Friday, December 2nd, 2016, to *WHIEEH@ed.gov*.

An opportunity for public comment will be available on Tuesday, December 6, 2016, from 1:15 p.m. to 1:45 p.m., EST. Individuals who wish to provide comments will be allowed three minutes to speak. Members of the public can sign up to provide comments at the meeting via email at *WHIEEH@ed.gov* and also the day-of the meeting. It is first come, first serve. Those members of the public interested in submitting written comments may do so by submitting them to the attention of Emmanuel Caudillo, White House Initiative on Educational Excellence for Hispanics, U.S. Department of Education, 400 Maryland Ave. SW., Room 4W108, Washington, DC 20202, by 5:00 p.m. EST Friday, December 2, 2016 or via email at *WHIEEH@ed.gov*.

Reasonable Accommodations: Individuals who will need accommodations in order to attend the meeting (*e.g.,* interpreting services, assistive listening devices, or material in alternative format) should notify Emmanuel Caudillo, Senior Advisor, White House Initiative on Educational Excellence for Hispanics at 202–401–1411, no later than Friday, December 2nd, 2016. We will attempt to meet requests for such accommodations after this date, but cannot guarantee their availability. The meeting site is accessible to individuals with disabilities.

Electronic Access to This Document: The official version of this document is the document published in the **Federal Register**. Free Internet access to the official edition of the **Federal Register** and the Code of Federal Regulations is available via the Federal Digital System at: *www.gpo.gov/fdsys*. At this site you can view this document, as well as all other documents of this Department published in the **Federal Register**, in text or Adobe Portable Document Format (PDF). To use PDF, you must have Adobe Acrobat Reader, which is available free at the site.

You may also access documents of the Department published in the **Federal Register** by using the article search feature at: *www.federalregister.gov*. Specifically, through the advanced search feature at this site, you can limit your search to documents published by the Department.

Authority: Executive Order 13555; continued by Executive Order 13708.

Ted Mitchell,

Under Secretary, U.S. Department of Education.

DEPARTMENT OF EDUCATION

[Docket No. ED–2016–ICCD–0130]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; ED School Climate Surveys (EDSCLS) National Benchmark Study 2017 Partial Cancellation Change Request

AGENCY: National Center for Education Statistics (NCES), Department of Education (ED).

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 3501 *et seq.*), ED is proposing a reinstatement of a previously approved information collection.

DATES: Interested persons are invited to submit comments on or before December 22, 2016.

ADDRESSES: To access and review all the documents related to the information

collection listed in this notice, please use *http://www.regulations.gov* by searching the Docket ID number ED–2016–ICCD–0130. Comments submitted in response to this notice should be submitted electronically through the Federal eRulemaking Portal at *http://www.regulations.gov* by selecting the Docket ID number or via postal mail, commercial delivery, or hand delivery. *Please note that comments submitted by fax or email and those submitted after the comment period will not be accepted*. Written requests for information or comments submitted by postal mail or delivery should be addressed to the Director of the Information Collection Clearance Division, U.S. Department of Education, 400 Maryland Avenue SW., LBJ, Room 2E–347, Washington, DC 20202–4537.

FOR FURTHER INFORMATION CONTACT: For specific questions related to collection activities, please contact NCES Information Collections at *NCES.Information.Collections@ed.gov.*

SUPPLEMENTARY INFORMATION: The Department of Education (ED), in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)), provides the general public and Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps the Department assess the impact of its information collection requirements and minimize the public's reporting burden. It also helps the public understand the Department's information collection requirements and provide the requested data in the desired format. ED is soliciting comments on the proposed information collection request (ICR) that is described below. The Department of Education is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: ED School Climate Surveys (EDSCLS) National Benchmark Study 2017 Partial Cancellation Change Request.

OMB Control Number: 1850–0923.

Type of Review: No material or non-substantive change to a currently approved collection.

Respondents/Affected Public: Individuals or Households.

Total Estimated Number of Annual Responses: 15,593.

Total Estimated Number of Annual Burden Hours: 10,967.

Abstract: The ED School Climate Surveys (EDSCLS) are a suite of survey instruments being developed for schools, districts, and states by the U.S. Department of Education's (ED) National Center for Education Statistics (NCES). This national effort extends current activities that measure school climate, including the state-level efforts of the Safe and Supportive Schools (S3) grantees, which were awarded funds in 2010 by the ED's Office of Safe and Healthy Students (OSHS) to improve school climate. Through the EDSCLS, schools nationwide will have access to survey instruments and a survey platform that will allow for the collection and reporting of school climate data across stakeholders at the local level. The surveys can be used to produce school-, district-, and state-level scores on various indicators of school climate from the perspectives of students, teachers, noninstructional school staff and principals, and parents and guardians. The 2017 national EDSCLS benchmark study data collection from a nationally representative sample of schools across the United States to create a national comparison point for users of EDSCLS was last approved in May 2016 (OMB# 1850–0923 v.4) with revisions to scope and timeline approved in July and September 2016 (OMB# 1850–0923 v.5–6). Data were to be collected from a nationally representative sample of 500 schools serving students in grades 5–12 to produce national school climate scores on the various topics covered by EDSCLS. The national statistics were to be released in the updated EDSCLS platform to provide a basis for comparison between data collected by schools and school systems and the national school climate. Because, to date the study's projected overall unweighted participation rate is far below the 50% response rate recommended by NCES Statistical Standards, NCES is requesting to cancel any further recruitment and the EDSCLS National Benchmark Study 2017 as soon as possible. NCES will still offer to conduct the EDSCLS survey in the schools that opted to participate in a universe sample of all of their school's eligible respondents.

Dated: November 16, 2016.

Kate Mullan,

Acting Director, Information Collection Clearance Division, Office of the Chief Privacy Officer, Office of Management.

DEPARTMENT OF EDUCATION

[Docket No.: ED–2016–ICCD–0097]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; Student Assistance General Provisions—Subpart E—Verification Student Aid Application Information

AGENCY: Federal Student Aid (FSA), Department of Education (ED).

ACTION: Notice

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, ED is proposing a revision of an existing information collection.

DATES: Interested persons are invited to submit comments on or before December 22, 2016.

ADDRESSES: To access and review all the documents related to the information collection listed in this notice, please use *http://www.regulations.gov* by searching the Docket ID number ED–2016–ICCD–0097. Comments submitted in response to this notice should be submitted electronically through the Federal eRulemaking Portal at *http://www.regulations.gov* by selecting the Docket ID number or via postal mail, commercial delivery, or hand delivery. *Please note that comments submitted by fax or email and those submitted after the comment period will not be accepted.* Written requests for information or comments submitted by postal mail or delivery should be addressed to the Director of the Information Collection Clearance Division, U.S. Department of Education, 400 Maryland Avenue SW, LBJ, Room 2E–347, Washington, DC 20202–4537.

FOR FURTHER INFORMATION CONTACT: For specific questions related to collection activities, please contact Beth Grebeldinger, 202–377–4018.

SUPPLEMENTARY INFORMATION: The Department of Education (ED), in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)), provides the general public and Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps the Department assess the impact of its information

collection requirements and minimize the public's reporting burden. It also helps the public understand the Department's information collection requirements and provide the requested data in the desired format. ED is soliciting comments on the proposed information collection request (ICR) that is described below. The Department of Education is especially interested in public comment addressing the following issues: (1) is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: Student Assistance General Provisions—Subpart E—Verification Student Aid Application Information.

OMB Control Number: 1845–0041.

Type of Review: A revision of an existing information collection.

Respondents/Affected Public: State, Local, and Tribal Governments; Individuals or Households; Private Sector.

Total Estimated Number of Annual Responses: 31,005,627.

Total Estimated Number of Annual Burden Hours: 5,011,254.

Abstract: This request is for a revision of the information collection supporting the policies and reporting requirements contained in Subpart E of Part 668—Verification and Updating of Student Aid Application Information. Sections 668.53, 668.54, 668.55, 668.56, 668.57, 668.59 and 668.61 contain information collection requirements (OMB control number 1845–0041). This subpart governs the verification and updating of the Free Application for Federal Student Aid used to calculate an applicant's Expected Family Contribution for purposes of determining an applicant's need for student financial assistance under Title IV of Higher Education Act of 1965, as amended. The collection of this documentation helps ensure that students (and parents in the case of PLUS loans) receive the correct amount of Title IV program assistance by providing accurate information to calculate an applicant's expected family contribution.

Dated: November 17, 2016.

Kate Mullan,

Acting Director, Information Collection Clearance Division, Office of the Chief Privacy Officer, Office of Management.

BILLING CODE 4000–01–P

DEPARTMENT OF ENERGY

Record of Decision for Issuing a Presidential Permit to Minnesota Power

AGENCY: U.S. Department of Energy.

ACTION: Record of decision.

SUMMARY: The U.S. Department of Energy (DOE) announces its decision to issue a Presidential permit to Minnesota Power, a regulated utility division of ALLETE, Inc. (Applicant), to construct, operate, maintain, and connect a new electric transmission line across the U.S./Canada border in northern Minnesota. The potential environmental impacts associated with the transmission line are analyzed in the *Great Northern Transmission Line Project Final Environmental Impact Statement* (DOE/EIS–0499). The transmission line would cross the U.S./Canada border in Roseau County, Minnesota and extend southeast approximately 220 miles to the proposed Iron Range 500-kilovolt (kV) Substation, located just east of the existing Blackberry Substation near Grand Rapids, Minnesota.

ADDRESSES: The Final Environmental Impact Statement (Final EIS) and this Record of Decision (ROD) are available on the DOE National Environmental Policy Act (NEPA) Web site at *http://energy.gov/nepa* and on the Great Northern Transmission Line (GNTL) Project EIS Web site at *http://www.greatnortherneis.org/.* The EIS Web site also includes a list of libraries in Minnesota where the Final EIS is available for review.

Electronic copies of the Final EIS and this ROD may be requested by contacting Dr. Julie A. Smith, Office of Electricity Delivery and Energy Reliability (OE–20), U.S. Department of Energy, 1000 Independence Avenue SW., Washington DC 20585; by electronic mail to *Juliea.Smith@hq.doe.gov;* or by facsimile to 202–318–7761.

FOR FURTHER INFORMATION CONTACT: For further information on the GNTL Project EIS, contact Dr. Julie A. Smith at the addresses above, or at 202–586–7668. For general information on DOE's NEPA process, contact Carol Borgstrom, Director, Office of NEPA Policy and Compliance (GC–54), U.S. Department of Energy, 1000 Independence Avenue SW., Washington, DC 20585; by email to *askNEPA@hq.doe.gov;* or by facsimile to 202–586–7031.

SUPPLEMENTARY INFORMATION: The EIS was jointly prepared by DOE and the Minnesota Department of Commerce—Energy Environmental Review and Analysis (DOC–EERA), acting as state co-lead, in order to avoid duplication and to comply with both federal and state environmental review requirements. The St. Paul District of the U.S. Army Corps of Engineers (USACE), the U.S. Environmental Protection Agency (EPA) Region 5, the Twin Cities Field Office (Region 3) of the U.S. Fish and Wildlife Service (USFWS), and the Red Lake Band of Chippewa Indians, Minnesota were cooperating agencies in preparing the EIS for the GNTL Project.

Background

Executive Order (EO) 10485 (September 9, 1953), as amended by EO 12038 (February 7, 1978), requires that a Presidential permit be issued by DOE before electricity transmission facilities may be constructed, operated, maintained, or connected at the U.S. border. DOE may issue or amend a Presidential permit if it determines that the permit is in the public interest and after obtaining favorable recommendations from the U.S. Departments of State and Defense. In determining whether issuance of a Presidential permit for a proposed action is in the public interest, DOE considers the potential environmental impacts of the proposed project, the project's impact on electricity reliability by ascertaining whether the proposed project would adversely affect the operation of the U.S. electric power supply system under normal and contingency conditions, and any other factors that DOE considers relevant to the public interest.

On April 15, 2014, Minnesota Power (the Applicant) applied to DOE for a Presidential permit to construct, operate, maintain, and connect an approximately 220-mile, 500-kV overhead, single circuit, alternating current (AC) electric power transmission system from the Canadian Province of Manitoba to the proposed Iron Range 500-kV Substation, located just east of the existing Blackberry Substation near Grand Rapids, Minnesota.

On October 29, 2014, the Applicant submitted an amendment to its Presidential permit application, changing the location of the proposed international border crossing approximately 4.3 miles east to cross the U.S./Canada border in Roseau County, Minnesota at latitude 49°00′00.00″ N and longitude 95°54′50.49″ W, which is approximately 2.9 miles east of Highway 89 in Roseau County.

The GNTL Project would be located on a new 200-foot-wide right-of-way (ROW) with a wider ROW required for certain spans at angle and corner structures, for guyed structures, or where special design requirements are dictated by topography. As part of the GNTL Project, the Applicant is also proposing to construct associated facilities including the proposed Iron Range 500-kV Substation, 500-kV Series Compensation Station, and three regeneration stations with permanent and temporary access roads.

Consultation

Pursuant to Section 7 of the Endangered Species Act (ESA), DOE has consulted with USFWS regarding potential impacts on federally-listed threatened or endangered species in the area of the GNTL Project. On October 29, 2015, DOE sent USFWS a letter requesting initiation of formal Section 7 consultation under the Endangered Species Act and submitted a Biological Assessment (BA), prepared by DOE. On April 26, 2016, USFWS issued a Biological Opinion (BO) indicating that the GNTL Project: ''may affect, and is likely to adversely affect the northern long-eared bat (*Myotis septentrionalis*); may affect, but not likely to adversely affect gray wolf (*Canis lupus*), gray wolf critical habitat, and Canada lynx (*Lynx canadensis*);'' and would result in no effect to other federally listed species. The BO further found that the GNTL Project is not likely to jeopardize the continued existence of the northern long-eared bat. The Presidential permit requires the Applicant to comply with all practicable means to avoid or minimize environmental harm, as required by USFWS. The BA is included as Appendix R of the Final EIS, and the BO is available on the GNTL Project EIS Web site (*http://www.greatnortherneis.org*).

DOE initiated consultation with the Minnesota State Historic Preservation Office (SHPO) under Section 106 of the National Historic Preservation Act regarding potential impacts on historic properties and determined the undertaking has the potential to adversely affect historic properties listed in or eligible for the National Register of Historic Places. On November 2, 2016, a programmatic agreement (PA) between DOE, Advisory Council on Historic Preservation (ACHP), the Red Lake Band of Chippewa Indians, Minnesota, and Minnesota SHPO was executed. The PA requires the Applicant to prepare a Cultural Resources Management Plan, which will meet the survey, data collection, and mitigation measures necessary, as identified by Minnesota SHPO. The PA is available on the GNTL Project EIS Web site (*http://www.greatnortherneis.org*).

NEPA Review

On June 27, 2014, DOE issued a Notice of Intent (NOI) (79 FR 36493) to prepare an EIS for the GNTL Project and to conduct Public Scoping Meetings. The NOI also indicated that because the

GNTL Project would involve actions in floodplains and wetlands, the EIS would include a Floodplain and Wetland Assessment.

On June 26, 2015, DOE published a Notice of Availability (NOA) of the Draft EIS (80 FR 36795) that began a 45-day public review period. DOE held nine public hearings on the Draft EIS and received more than 200 comments. Concerns raised during the comment period were related to the following topics: The regulatory process/public involvement, purpose and need, project description/design, alternatives, human settlement, noise and vibration, air quality/greenhouse gases, socioeconomics, recreation and tourism, public health and safety, aesthetics, land use and ownership, cultural resources, wetlands and water quality, and biological resources. See Section 1.4.4.1 of the Final EIS for additional information regarding these comments. DOE considered all comments received on the Draft EIS in the preparation of the Final EIS. Comment letters and detailed responses are included in Appendix Y of the Final EIS. Throughout the EIS process, DOE worked with the cooperating agencies to ensure that potential impacts were appropriately addressed. EPA announced the availability of the Final EIS on November 6, 2015 (80 FR 68867).

Alternatives Considered

In the EIS, DOE analyzed the No Action Alternative and the Proposed Action of granting a Presidential permit to authorize the Applicant to construct, operate, maintain, and connect a 500-kV transmission line across the U.S./Canada border. Under the No Action Alternative, DOE would not issue a Presidential permit for the proposed GNTL Project and the transmission line would not be built. Under the Proposed Action of granting the Presidential permit (the DOE Preferred Alternative), the transmission line would cross the U.S./Canada border in Roseau County, Minnesota at latitude 49°00′00.00″ N and longitude 95°54′50.49″ W. During the public scoping process, commenters proposed five alternative international border crossings, four of which DOE determined should be included for detailed analysis in the EIS.

DOE's Presidential permit decision is solely for the international border crossing; the proposed construction, operation, maintenance, and connection of the portion of the transmission line within the United States is a ‘‘connected action'' to DOE's Proposed Action. See 40 Code of Federal Regulations (CFR) 1508.25(a)(1). In addition to the international border crossing alternatives, the EIS analyzed the potential environmental impact associated with the Applicant's proposed route, the Applicant's alternative routes, and 22 alternative route segments and nine alignment modifications that were proposed by agencies and the public during scoping.

Analysis of Potential Environmental Impacts

The EIS analyzed potential environmental impacts associated with the alternatives for each of the following resource areas: Human settlement, public health and safety, land-based economies, archaeological and historic resources, natural environment, rare and unique natural resources, use of paralleling existing corridors, electrical system reliability, and cumulative impacts. The analysis of potential impacts of the alternatives is described in the Summary and Chapter 6 of the Final EIS. This analysis assumes the implementation of all Applicant-proposed measures to minimize adverse impacts (Table 2–2 of the Final EIS).

DOE prepared a Floodplain and Wetland Assessment and Floodplain Statement of Findings in accordance with DOE regulations, 10 CFR part 1022 (Compliance with Floodplain and Wetland Environmental Review Requirements). The DOE Floodplain and Wetland Assessment, which contains the statement of findings, is available on the DOE NEPA Web site (*http://energy.gove/nepa*) and the GNTL Project Web site (*http://greatnortherneis.org*). The assessment considered potential impacts to floodplains and wetlands. DOE concluded that the proposed international border crossing is not located in a 100-year floodplain. The MN PUC-approved Route Alternative for the electric power transmission line (a connected action to DOE's Presidential permit action) would cross 100-year floodplains that are too large to span. This would require construction and placement of transmission structures (towers) within floodplains. No FEMA-designated 100-year floodplain has been identified in the locations proposed for associated facilities. Current design details and Applicant-proposed mitigation measures would minimize potential impacts to floodplains and wetlands to the extent practicable. Potential impacts to floodplain and wetland resources from the GNTL Project would not result in subsequent impacts to human lives and property. Therefore, DOE finds that potential impacts to floodplains will be avoided to the maximum extent practicable, that appropriate measures to minimize adverse effects on human health and safety and the functions and values provided by floodplains would be taken, and that the project would comply with applicable floodplain protection standards.

Implementation of the No Action Alternative would not result in changes to existing conditions and is therefore, the environmentally preferable alternative.

Comments Received on the Final EIS

Comment letters regarding the Final EIS were submitted to DOE by the U.S. Department of the Interior (DOI) Office of Environmental Policy and Compliance and EPA on December 3, 2015. Comments received on the Final EIS are available on the Minnesota Public Utilities (MN PUC) Web site (*http://mn.gov/commerce/energyfacilities/Docket.html?Id=33847*) and the GNTL Project EIS Web site (*http://www.greatnortherneis.org*).

DOI Comment Letter

On December 3, 2015, DOI submitted a comment letter that indicated that the Final EIS did not adequately address impacts to USFWS Interest Lands or compensatory mitigation. At that time the MN PUC had not issued a Route Permit for the proposed GNTL Project and it was not clear if USFWS interest lands would be potentially impacted by the Project. The DOI comment letter further indicated that if impacts to USFWS Interest Lands occur, USFWS would consider compensatory mitigation mandatory before USFWS would grant a ROW permit. Because the designated route in the MN PUC-issued Route Permit crosses USFWS Interest land, a ROW permit from USFWS will be necessary. USFWS is conducting its own Environmental Assessment for that action using the Final EIS as a primary/major source of information to complete the USFWS analysis. However, DOE notes that the Applicant has adequately addressed the concerns articulated in the DOI comment letter related to impacts to USFWS Interest Lands and compensatory mitigation through the execution of a July 26, 2016, ‘‘Memorandum of Understanding (MOU) for Conservation Measures for the Great Northern Transmission Line Project.'' The MOU can be found on the GNTL Project EIS Web site (*http://www.greatnortherneis.org*).

The December 3, 2015, DOI comment letter also indicated an appreciation that the Final EIS added a commitment that the Applicant would continue working with USFWS to determine which measures are appropriate for addressing potential impacts to migratory bird

species from the GNTL Project and that any avoidance, minimization, and conservation measures imposed by USFWS would be addressed in the ROD or Presidential permit. DOI reiterated in the comment letter that pursuant to EO 13186 and the ESA, USFWS considers all three elements (avoiding, minimizing, and restoring/enhancing) necessary to adequately mitigate for impacts to listed species and migratory bird habitat. Following the publication of the Final EIS in November 2015, the Applicant and USFWS engaged in discussion for both mandatory and negotiable mitigation opportunities. Compensatory mitigation agreements between the Applicant and USFWS have been developed as a part of the July 26, 2016, MOU discussed above. DOE conditioned its Presidential permit to require the Applicant to comply with all practicable means to avoid or minimize environmental harm as required by USFWS.

EPA Comment Letter

The December 3, 2015, EPA comment letter expressed an appreciation that the Final EIS incorporated additional information, analysis, clarification, and/or discussion regarding cultural resources, tribal consultation, and inclusion of a National Historic Preservation Act Section 106 draft PA. DOE notes that consultation under Section 106 of the National Historic Preservation Act has been completed and a PA between DOE, the ACHP, Red Lake Band of Chippewa Indians, Minnesota, and Minnesota SHPO was executed on November 2, 2016. The PA is available on the GNTL Project EIS Web site (*http://www.greatnortherneis.org*). The EPA comment letter also expressed an appreciation that the Final EIS incorporated estimates of construction emissions of criteria pollutants, CO_2, and greenhouse gases (this information is provided in Appendix W of the Final EIS).

The December 3, 2015, EPA comment letter indicated that the Final EIS did not identify the Applicant's proposed locations for access roads, laydown areas, stringing areas, fly-in sites, and potential pole locations along with their potential resources impacts. DOE notes that these detailed project components are not determined at this point in the development of the GNTL Project, and that the Final EIS discloses the potential nature of the (mostly temporary) impacts to resources such as wetlands and forests that may be expected from the construction and use of such locations. Further, the BO indicates a commitment that the Applicant will work with USFWS to avoid, minimize, and mitigate potential impacts from the proposed GNTL Project once the necessary details are known. The DOE Presidential permit conditions require the implementation of all avoidance, minimization, and mitigation measures identified, not only in the Final EIS, but also in the Biological Opinion. The EPA comment letter also acknowledges the right of EPA to further review and comment on the GNTL Project during the USACE Clean Water Act Section 404 permitting process.

The December 3, 2015, EPA comment letter raised concerns regarding resource impacts and suggested the ROD include additional information to help ensure that adequate safeguards and mitigation measures are in place to fully protect the environment. The following is a summary of EPA recommendations from the agency's December 3, 2015, comment letter:

- The ROD should include the MN PUC Route Permit for the GNTL Project. DOE notes that the MN PUC Route Permit is available on the MN PUC Web site (*http://mn.gov/commerce/energyfacilities/Docket.html?Id=33847*), and the GNTL Project EIS Web site (*http://www.greatnortherneis.org*).
- The ROD should identify the plans, mitigation measures, and state and federal agencies' requirements that the MN PUC Route Permit requires the Applicant to develop and undertake, such as an Avian Mitigation Plan, Vegetation Management Plan (including control of invasive/noxious plant species), Erosion and Sediment Control Plan, and Stormwater Pollution Prevention Plan. DOE notes that development of these plans generally occurs during the permitting process and is not part of a Final EIS. The MN PUC Route Permit for the GNTL Project identifies permit conditions, including the development of the various plans referenced by the EPA. The MN PUC Route Permit also identifies the appropriate agencies the Applicant will need to coordinate with to satisfy these permit conditions. The MN PUC Route Permit is available on the MN PUC Web site (*http://mn.gov/commerce/energyfacilities/Docket.html?Id=33847*), and the GNTL Project EIS Web site (*http://www.greatnortherneis.org*).
- The ROD should disclose why a particular plan and/or mitigation measure identified in the Final EIS is not a MN PUC Route Permit requirement. DOE notes that the MN PUC Route Permit requires adherence to mitigation measures in the Final EIS.
- A third party independent environmental inspector, such as the Minnesota Department of Natural Resources (MnDNR), should be utilized. The ROD should disclose whether or not an inspector will be used and if this is a requirement in the MN PUC Route Permit. DOE notes that the MN PUC Route Permit conditions indicate that the Applicant shall provide a dedicated independent environmental inspector to oversee the construction process and to monitor compliance with the Avian Mitigation Plan, Vegetation Management Plan, and requirements of the Construction Environmental Control Plan and all other environmental permits.
- The Applicant should pursue opportunities for emission reduction strategies during construction. The ROD should identify additional air quality measures that the Applicant proposed to utilize and/or MN PUC intends to include as conditions/requirements in the Route Permit. DOE notes that employment of additional emission reduction strategies during construction of the GNTL Project will be dependent on the Applicant to implement, as the GNTL Project is not expected to result in long-term adverse criteria pollutant or climate change and greenhouse gas emissions. Information on construction emissions of criteria pollutants, CO_2, and greenhouse gases is provided in Appendix W of the Final EIS.
- The Applicant should undertake voluntary forest compensation for forest impacts that do not require compensation under existing federal and/or state regulations. The ROD should identify whether or not the Applicant will conduct voluntary forest compensation and the amount, location, and timing, if applicable. DOE notes that compensatory mitigation agreements between the Applicant and USFWS have been developed, as referenced in the February 12, 2016, DOI letter.
- The ROD should include the executed Section 106 PA and/or provide a direct link to the document. DOE notes that consultation under Section 106 of the National Historic Preservation Act is summarized under ''Consultation'' in this ROD. The PA is available on the GNTL Project EIS Web site (*http://www.greatnortherneis.org*).

DOE ascertains that all issues or concerns identified in the December 3, 2015, EPA and DOI comment letters, which are summarized above, have been addressed or are currently being addressed, principally through continued consultation between the Applicant and USFWS.

Decision

DOE has decided to issue Presidential permit DOE PP–398 to authorize the

Applicant to construct, operate, maintain, and connect a 500-kV transmission line across the U.S./Canada border. The Presidential permit includes a condition requiring the implementation of the Applicant-proposed avoidance, minimization, and mitigation measures described in the Final EIS, Biological Opinion, and the Section 106 Programmatic Agreement, all of which are included as conditions to the MN PUC Route Permit.

On April 11 2016, MN PUC issued a Route Permit to the Applicant for the proposed Blue Route, in combination with the Effie and Trout Lake Variations, as the designated route. The designated route is described as follows:

The international border crossing at the U.S./Canadian border is located at latitude 49°00′00.00″ N and longitude 95°54′50.49″ W, which is approximately 2.9 miles east of Minnesota State Highway 89 in Roseau County. From the international border, the designated route proceeds south 2.5 miles to 390th Street, approximately 0.5 miles east of 320th Avenue. The designated route then travels due east 6.5 miles to State Highway 310 before heading east-southeast approximately 12 miles to a point 0.5 miles west of CSAH 13/510th Avenue. From there, the designated route turns east and travels 2.3 miles to join the existing Minnkota Power Cooperative 230-kV transmission line. The designated route parallels the existing Minnkota 230-kV transmission line southeast for 1.8 miles where it meets the existing Xcel 500-kV transmission line. Beginning at 0.1 mile north of U.S. Highway 11, where the existing transmission lines intersect, the designated route parallels the existing Xcel 500-kV transmission line generally south and east for approximately 36.2 miles.

The designated route leaves the Xcel 500-kV transmission line approximately 1 mile south of the intersection of 19th Street SW and 65th Avenue SW in Lake of the Woods County. The designated route then proceeds east for 5.9 miles before turning northeast for 1.4 miles to rejoin the existing Minnkota Power 230-kV transmission line just west of its intersection with Pitt Grade Road NW. The designated route then parallels this existing 230-kV transmission line in an easterly direction for 31 miles to a point 0.3 miles west of Township Road 118 in Koochiching County. The designated route then proceeds south-southeast for 8.3 miles to Sandsmark Trail, 0.3 miles north of CSAH 32. The designated route travels south for 1.8 miles and then continues southeast for 21.4 miles where it intersects State Highway 71, approximately 4.2 miles northeast of Big Falls. The designated route continues an additional 9.6 miles to the southeast where it rejoins the existing Minnkota 230-kV transmission line and follows this existing transmission line south for 12.4 miles.

At this point the existing Minnkota 230-kV and Xcel 500-kV transmission lines meet and begin running parallel to the east and then south. The designated route parallels these existing transmission lines east and then south for 39.9 miles to a point 0.7 miles west of State Highway 65, 0.1 miles north of the Prairie River. At this point the existing transmission lines turn southeast while the designated route turns south-southwest and continues for 7.8 miles to approximately 0.6 miles west of Fork Lake Road and Harrison Lake and approximately 0.6 miles northeast of Kennedy Lake. The designated route then runs west-southwest for 2.1 miles before turning due south toward Grass Lake. The designated route travels south for approximately 5 miles where it crosses CSAH 56 and CSAH 8 before reaching a point just south of its crossing of CSAH 57, approximately 0.6 miles west of County Road 58. The designated route turns southwest again for 3.7 miles before turning south for 5.2 miles where it passes between Little Diamond Lake and Big Diamond Lake and meets U.S. Highway 169. From U.S. Highway 169, the designated route heads south-southeast for 1.6 miles. At the Swan River, the designated route heads south for 4.2 miles where it meets and generally parallels an existing Minnesota Power 230-kV transmission line east for 1.2 miles to the proposed Iron Range Substation.

The MN PUC Route Permit includes associated maps and conditions of the Route Permit. The MN PUC Route Permit is available on the MN PUC Web site (*http://mn.gov/commerce/energyfacilities/Docket.html?Id=33847*), and the GNTL Project EIS Web site (*http://www.greatnortherneis.org*).

Basis for Decision

DOE determined that the Proposed Action is in the public interest. The decision by DOE to grant a Presidential permit is based on consideration of the potential environmental impacts, impacts on the reliability of the U.S. electric power supply system under normal and contingency conditions, and the favorable recommendations of the U.S. Departments of State and Defense provided, respectively, in July and August of 2015.

DOE has determined that the proposed international electric transmission line would not have an adverse impact on the reliability of the U.S. electric power supply system. In reaching this determination, DOE considered the operation of the electrical grid with a specified maximum amount of electric power transmitted over the proposed transmission line. DOE reviewed the System Impact Study (MH-US TSR Sensitivity Analysis) conducted by the Midcontinent Independent System Operator (MISO) on the new transmission for the MH-US south bound (summer) and US-MH north bound (winter) transmission service requests (TSRs) on the proposed 500-kV GNTL—Dorsey-Iron Range 500-kV transmission line, from the Minnesota-Manitoba border to a new Iron Range 500-kV substation near Grand Rapids, Minnesota. In addition, DOE reviewed the GNTL Stability Analysis prepared by Siemens PTI, the Short Circuit Study prepared by Power Engineers, and the New Tie Line Loop Flow Impact study report submitted by Minnesota Power. These studies are available on the GNTL Project EIS Web site (*http://www.greatnortherneis.org*). DOE also considered MISO's interconnection standards and its restrictions on any requested transmission service to and from the proposed interconnection.

Mitigation

All practicable means to avoid or minimize environmental harm from the Proposed Action have been, or will be, adopted. Applicant-proposed measures to avoid and minimize adverse impacts are described in Section 2.13 (Table 2–2) of the Final EIS, and the Applicant will be responsible for implementing these avoidance and minimization measures. Additional measures will be required through the permitting process and as a result of ongoing consultations. The Presidential permit is conditioned on the Applicant's compliance with all commitments and requirements outlined in the BA, BO, PA, Final EIS, and MN PUC Route Permit.

Issued in Washington, DC, on November 15, 2016.

Meghan Conklin,

Deputy Assistant Secretary, Transmission Permitting and Technical Assistance, Office of Electricity Delivery & Energy Reliability.

Federal Energy Regulatory Commission

Combined Notice of Filings #2

Take notice that the Commission received the following electric rate filings:

Docket Numbers: ER16–2706–001.
Applicants: Idaho Power Company.
Description: Compliance filing: Amendment to LGIA/SGIA Order Nos. 827 and 828 Combined Compliance Filing to be effective 11/30/2016.
Filed Date: 11/15/16.
Accession Number: 20161115–5095.
Comments Due: 5 p.m. ET 12/6/16.

Docket Numbers: ER17–33–001.
Applicants: Breadbasket LLC.
Description: Tariff Amendment: Amend Cancellation MBR Filing to be effective 10/6/2016.
Filed Date: 11/15/16.
Accession Number: 20161115–5051.
Comments Due: 5 p.m. ET 12/6/16.

Docket Numbers: ER17–228–001.
Applicants: King Forest Industries, Inc.
Description: Tariff Amendment: Amended MBR Application to be effective 12/1/2016.
Filed Date: 11/15/16.
Accession Number: 20161115–5086.
Comments Due: 5 p.m. ET 12/6/16.

Docket Numbers: ER17–351–000.
Applicants: American Falls Solar, LLC.
Description: Baseline eTariff Filing: American Falls Solar LLC MBR Application to be effective 1/5/2017.
Filed Date: 11/15/16.
Accession Number: 20161115–5057.
Docket Numbers: ER17–352–000.
Applicants: New York Independent System Operator, Inc.
Description: § 205(d) Rate Filing: NYISO NYSEG Greenidge joint filing LGIA 2305 to be effective 10/31/2016.
Filed Date: 11/15/16.
Accession Number: 20161115–5110.
Comments Due: 5 p.m. ET 12/6/16.

Docket Numbers: ER17–353–000.
Applicants: Southwest Power Pool, Inc.
Description: § 205(d) Rate Filing: Bylaws Revisions to Expand Strategic Planning Committee and Oversight Committee to be effective 1/14/2017.
Filed Date: 11/15/16.
Accession Number: 20161115–5120.
Comments Due: 5 p.m. ET 12/6/16.

Docket Numbers: ER17–354–000.
Applicants: American Falls Solar II, LLC.
Description: Baseline eTariff Filing: American Falls Solar II MBR Application Filing to be effective 1/5/2017.
Filed Date: 11/15/16.
Accession Number: 20161115–5129.
Comments Due: 5 p.m. ET 12/6/16.

The filings are accessible in the Commission's eLibrary system by clicking on the links or querying the docket number.

Any person desiring to intervene or protest in any of the above proceedings must file in accordance with Rules 211 and 214 of the Commission's Regulations (18 CFR 385.211 and 385.214) on or before 5:00 p.m. Eastern time on the specified comment date. Protests may be considered, but intervention is necessary to become a party to the proceeding.

eFiling is encouraged. BILLING CODE 6717–01–P

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OPP–2016–0618; FRL–9954–80]

Notice of Receipt of Requests To Voluntarily Cancel Certain Pesticide Registrations and Amend Registrations To Terminate Certain Uses

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In accordance with the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), EPA is issuing a notice of receipt of requests by the registrants to voluntarily cancel their registrations of certain products containing the active ingredients dimethomorph, metiram, profenofos, propoxur, and sodium acifluorfen and to amend certain captan and propoxur product registrations to terminate one or more uses. For captan, if granted, the requests would terminate the last U.S. registered use on dichondra, grasses (lawn seed beds), turf (golf courses and sod farms), and turf grasses (golf courses and ornamentals in non-pastured areas). For propoxur, if granted, the requests would terminate the last indoor use of aerosol, spray, and liquid formulations, and terminate the last uses in food handling establishments and for indoor crack and crevice. The requests, if granted, would not cancel the last captan, dimethomorph, propoxur, and sodium acifluorfen products registered for use in the United States. The requests, if granted, would cancel the last profenofos and metiram products registered for use in the United States. EPA intends to grant these requests at the close of the comment period for this announcement unless the Agency receives substantive comments within the comment period that would merit its further review of the requests, or unless the registrants withdraw their requests. If these requests are granted, any sale, distribution, or use of products listed in this notice will be permitted after the affected registrations have been cancelled/use terminated only if such sale, distribution, or use is consistent with the terms as described in the final order.

DATES: Comments must be received on or before December 22, 2016.

ADDRESSES: Submit your comments, identified by docket identification (ID) number EPA–HQ–OPP–2016–0618, by one of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.
- *Mail:* OPP Docket, Environmental Protection Agency Docket Center (EPA/DC), (28221T), 1200 Pennsylvania Ave. NW., Washington, DC 20460–0001.
- *Hand Delivery:* To make special arrangements for hand delivery or delivery of boxed information, please follow the instructions at *http://www.epa.gov/dockets/contacts.html.*

Additional instructions on commenting or visiting the docket, along with more information about dockets generally, is available at *http://www.epa.gov/dockets.*

FOR FURTHER INFORMATION CONTACT: Brittany Pruitt, Pesticide Re-Evaluation Division (7508P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460–0001; telephone number: (703) 347–0289; email address: *pruitt.brittany@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this action apply to me?

This action is directed to the public in general, and may be of interest to a wide range of stakeholders including environmental, human health, and agricultural advocates; the chemical industry; pesticide users; and members of the public interested in the sale, distribution, or use of pesticides. Since others also may be interested, the Agency has not attempted to describe all the specific entities that may be affected by this action.

B. What should I consider as I prepare my comments for EPA?

1. *Submitting CBI.* Do not submit this information to EPA through regulations.gov or email. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD–ROM that you mail to EPA, mark the outside of the disk or CD–ROM as CBI and then identify electronically within the disk or CD–ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for preparing your comments.* When preparing and submitting your comments, see the commenting tips at *http://www.epa.gov/dockets/comments.html.*

II. Background on the Receipt of Requests To Cancel and/or Amend Registrations To Terminate Certain Uses

This notice announces receipt by EPA of requests from ABC Compounding Company, Inc.; Albaugh, LLC; Bonide Products, Inc.; BASF Corporation; Wellmark International; FMC Corporation; Summit Chemical Company; Sungro Products, LLC.; Syngenta Crop Protection; and Whitmore Micro-Gen to cancel certain product registrations or amend registrations to terminate certain uses of certain product registrations.

Captan is a broad spectrum fungicide registered for use on fruit and nut trees, grapes, berries, vegetables, corn, soybeans, cereal grains, and forage crops. In addition, captan is registered for use as a seed and seed piece treatment, as a preplant root dip, and as a post-harvest fruit dip. Captan is also registered for use on ornamentals and turf. In a letter dated October 5, 2016, Albaugh requested that EPA amend the technical and product registrations listed in Table 2 of Unit III of this document to terminate certain uses, including turf. If granted, the requests will result in termination of the last U.S. registered use of captan on dichondra, grasses (lawn seed beds), turf (golf courses and sod farms), and turf grasses (golf courses and ornamentals in non-pastured areas).

Dimethomorph is a systemic fungicide registered for use to control downy mildew, late blight, and crown

and root rot on plants. It is a cinnamic acid derivative and a member of the morpholine chemical family. Dimethomorph is used on numerous agricultural crops including leafy vegetables, bulb vegetables, fruiting vegetables, potatoes, tobacco, and tomatoes. In a letter dated March 8, 2016, BASF Corporation requested that EPA cancel five product registrations containing dimethomorph, identified in Table 1 of Unit III. If granted, this request will not result in cancellation of the last dimethomorph pesticide products registered for use in the United States.

Metiram is a broad spectrum fungicide that belongs to the ethylene bisdithiocarbamate (EBDC) group of fungicides. Metiram is registered for use to control scab and rust diseases on apples, early and late blight diseases on potatoes, and anthracnose disease on leather leaf ferns. In letters dated September 28, 2016 and October 24, 2016, BASF Corporation requested that EPA cancel three metiram product registrations. These registrations are identified in Table 1 of Unit III. If granted, this request will result in the cancellation of the last metiram pesticide products registered for use in the United States.

Profenofos is an organophosphate insecticide registered for use on cotton. The main target pests for profenofos are lepidopterans; however, other alternatives are available. In a letter dated September 28, 2016, Syngenta Corporation requested that EPA cancel two product registrations containing profenofos. These registrations are identified in Table 1 of Unit III. If granted, this request will result in cancellation of the last profenofos pesticide products registered for use in the United States.

Propoxur is an insecticide registered for use to kill a variety of insects including crickets, ants, cockroaches, silverfish and other pests. It is registered for use in and around industrial, institutional, commercial, and residential facilities. The propoxur preliminary human health risk assessment (*Propoxur: Human Health Preliminary Risk Assessment for Registration Review,* May 22, 2015) identified dietary and residential post-application risks of concern for indoor crack and crevice applications (liquid and aerosol formulations) in institutional settings (*i.e.,* hospitals, dormitories) and in food handling establishments (FHE). The technical registrant, Wellmark International, voluntarily requested amendments to terminate these uses to mitigate the risks of concern. The technical registrations were amended and the uses were terminated effective September 22, 2015 (80 FR 57179; FRL–9933–58). Subsequently, in letters dated April 11, 2016, April 12, 2016, April 27, 2016, May 6, 2016, and July 22, 2016, ABC Compounding Company, Inc., Wellmark International, FMC Corporation, Summit Chemical Company, Sungro Products, LLC., and Whitmore Micro-Gen requested that EPA cancel certain propoxur registrations and/or amend to terminate certain uses of propoxur pesticide product registrations identified in Tables 1 and 2 of Unit III. Specifically, the registrants requested that the following uses and formulations be terminated: all indoor aerosol, spray, and liquid formulations of propoxur; use in food handling establishments; and indoor crack and crevice use. If granted, these requests will result in cancellation of and/or amendment to terminate these uses of propoxur pesticide products registered in the United States. FMC Corporation, an end-use propoxur registrant, requested voluntary cancellation of their end-use propoxur product registered for the terminated uses with an effective cancellation date of December 31, 2017. EPA anticipates granting an effective cancellation date of December 31, 2017 for the propoxur product registrations identified in Tables 1 of Unit III, which will allow the registrants to sell and distribute existing stocks of these products until December 31, 2017. Thereafter, registrants will be prohibited from selling or distributing the propoxur products identified in Table 1 of Unit III., except for export consistent with FIFRA section 17 (7 U.S.C. 136o) or for proper disposal.

Sodium acifluorfen is a selective, diphenyl ether herbicide and a light dependent peroxidizing herbicide (LDPH) registered for use for post-emergent weed control on soybeans, peanuts, rice, and strawberries. In a letter dated February 26, 2016, Bonide Products Inc. requested that EPA cancel one product registration containing sodium acifluorfen identified in Table 1 of Unit III. If granted, this request will cancel the last sodium acifluorfen pesticide product registered for residential use in the United States.

III. What action is the agency taking?

This notice announces receipt by EPA of requests from registrants to cancel certain product registrations of dimethomorph, metiram, profenofos, propoxur, and sodium acifluorfen and to amend certain captan and propoxur product registrations to terminate one or more uses. The affected products and the registrants making the requests are identified in Tables 1–3 of this unit.

Unless requests are withdrawn by the registrants or if the Agency determines that there are substantive comments that warrant further review of these requests, EPA intends to issue an order canceling the affected registrations and amending to terminate certain uses of the affected registrations for which the Agency received use termination requests.

TABLE 1—DIMETHOMORPH, METIRAM, PROFENOFOS, PROPOXUR AND SODIUM ACIFLUORFEN PRODUCT REGISTRATIONS WITH PENDING REQUESTS FOR CANCELLATION

Registration No.	Product name	Company
4–433	Bonide Kleen up Grass and Weed Killer, Ready to Use	Bonide Products Inc.
100–598	Profenofos Technical	Syngenta Crop Protection.
100–699	Curacron 8E	Syngenta Crop Protection.

89459	Central Garden & Pet Company, 1501 E. Woodfield Road, Suite 200, West Schaumburg, IL 60173.

IV. What is the agency's authority for taking this action?

Section 6(f)(1) of FIFRA (7 U.S.C. 136d(f)(1)) provides that a registrant of a pesticide product may at any time request that any of its pesticide registrations be cancelled or amended to terminate one or more uses. FIFRA further provides that, before acting on the request, EPA must publish a notice of receipt of any such request in the **Federal Register**.

Section 6(f)(1)(B) of FIFRA (7 U.S.C. 136d(f)(1)(B)) requires that before acting on a request for voluntary cancellation, EPA must provide a 30-day public comment period on the request for voluntary cancellation or use termination. In addition, FIFRA section 6(f)(1)(C) (7 U.S.C. 136d(f)(1)(C)) requires that EPA provide a 180-day comment period on a request for voluntary cancellation or termination of any minor agricultural use before granting the request, unless:

1. The registrants request a waiver of the comment period, or

2. The EPA Administrator determines that continued use of the pesticide would pose an unreasonable adverse effect on the environment.

The captan, dimethomorph, metiram, profenofos, propoxur and sodium acifluorfen registrants have requested that EPA waive the 180-day comment period. Accordingly, EPA will provide a 30-day comment period on the proposed requests.

V. Procedures for Withdrawal of Requests

Registrants who choose to withdraw a request for product cancellation or use termination should submit the withdrawal in writing to the person listed under **FOR FURTHER INFORMATION CONTACT**. If the products(s) have been subject to a previous cancellation action, the effective date of cancellation and all other provisions of any earlier cancellation action are controlling.

VI. Provisions for Disposition of Existing Stocks

Existing stocks are those stocks of registered pesticide products that are currently in the United States and that were packaged, labeled, and released for shipment prior to the effective date of

the action. If the requests for voluntary cancellation and amendments to terminate uses are granted, the Agency intends to publish the cancellation order in the **Federal Register**.

In any order issued in response to these requests for cancellation of product registrations and for amendments to terminate uses, EPA proposes to include the following provisions for the treatment of any existing stocks of the products listed in Tables 1 and 2 of Unit III.

A. For Propoxur Products 279–3395, 3862–135, 6218–24, 11556–33, 89459–39, 89459–28 Identified in Table 1 of Unit III

FMC Corporation requested that the voluntary cancellation of propoxur begin on December 31, 2017. EPA anticipates allowing the registrants to sell and distribute existing stocks of these products until December 31, 2017, which will be the effective product cancellation date. Thereafter, registrants will be prohibited from selling or distributing the propoxur products identified in Table 1 of Unit III., except for export consistent with FIFRA section 17 (7 U.S.C. 136o) or for proper disposal.

Persons other than the registrant may sell, distribute, or use existing stocks of the affected cancelled products until supplies are exhausted, provided that such sale, distribution, or use is consistent with the terms of the previously approved labeling on, or that accompanied, the cancelled products.

B. For All Other Products Identified in Table 1 of Unit III

For the other voluntary product cancellations noted, registrants will be permitted to sell and distribute existing stocks of voluntarily cancelled products for 1 year after the effective date of the cancellation, which will be the date of publication of the cancellation order in the **Federal Register**. Thereafter, registrants will be prohibited from selling or distributing the products identified in Table 1 of Unit III., except for export consistent with FIFRA section 17 (7 U.S.C. 136o) or for proper disposal.

Once EPA has approved product labels reflecting the requested amendments to terminate uses, the registrant will be permitted to sell or distribute products under the previously approved labeling for a period of 18 months after the date of **Federal Register** publication of the cancellation order, unless other restrictions have been imposed. Thereafter, the registrant will be prohibited from selling or distributing the products whose labels include the deleted uses identified in Table 2 of Unit III., except for export consistent with FIFRA section 17 or for proper disposal.

Persons other than the registrant may sell, distribute, or use existing stocks of the affected cancelled products until supplies are exhausted, provided that such sale, distribution, or use is consistent with the terms of the previously approved labeling on, or that accompanied, the cancelled products.

Authority: 7 U.S.C. 136 *et seq.*

Dated: November 14, 2016.

Yu-Ting Guilaran,

Director, Pesticide Re-Evaluation Division, Office of Pesticide Programs.

BILLING CODE 6560–50–P

EXPORT-IMPORT BANK

[Public Notice EIB–2016–0004]

Proposal To Adopt the 2010 Small Business Jobs Act Interim Rule as an Alternative Size Standard for Defining a Small Business for Export-Import Bank Programs

AGENCY: Export-Import Bank of the United States.

ACTION: Notice and request for comments.

SUMMARY: The Export-Import Bank of the United States (''EXIM Bank'') proposes to adopt the Interim Rule (as defined below) set forth in Section 1116 of the Small Business Jobs Act of 2010 (Pub. L. 111–240) (the ''Jobs Act'') as an alternative standard for defining a small business for all of its programs. The Jobs Act mandated that the U.S. Small Business Administration (''SBA'') use maximum tangible net worth and average net income as an alternative to the use of industry based size standards as follows: Not more than $15 million in tangible net worth and $5 million in average net income after Federal income taxes to define a small business concern (''Interim Rule''). The SBA currently uses the Interim Rule for its business loans under Section 7(a) of the Small Business Act (''7(a) Loan Program'') and development company loans under Title V of the Small Business Investment Act of 1958 (''504 Loan Program'', and together with the 7(a) Loan Program, the ''SBA Loan Programs'') to determine size eligibility for an applicant if such applicant does not meet the size standards that it has developed for individual industries as defined under the North American Industry Classification System (''NAICS''). If approved by the SBA's Administrator, EXIM Bank will apply the Interim Rule as an alternative size standard in addition to using size standards established by SBA for individual industries to determine whether or not participants of EXIM programs can be categorized as small business concerns.

DATES: Comments must be received on or before December 6, 2016 to be assured of consideration.

ADDRESSES: Comments may be submitted through the Federal rulemaking portal at *WWW.REGULATIONS.GOV*. To submit a comment, enter EIB–2016–0004 under the heading ''enter keyword or ID'' and select ''Search.'' Follow the instructions provided at the Submit a Comment screen. Please include your name, company name (if any) and EIB–2016–0004 on any attached document. Comments received will be made available to the public at *WWW.REGULATIONS.GOV.*

PURPOSE AND USE: EXIM Bank proposes to align its size standards for determining a small business with SBA's current standards for the SBA Loan Programs by adopting the Interim Rule, set forth in the Jobs Act. The Interim Rule would be used as an alternative size standard, in addition to and not a replacement of, SBA's industry based size standards currently used for defining a ''small business concern'' for EXIM Bank's programs and reporting obligations. The Interim Rule provides that an applicant for a SBA Loan Program may be eligible for such a loan if (i) the tangible net worth of the applicant is not more than $15,000,000; and (ii) the average net income after Federal income taxes (excluding any carry-over losses) of the applicant for the two full fiscal years before the date of the application is not more than $5,000,000. If the request to adopt the Interim Rule as an alternative size standard is approved by the SBA's Administrator for EXIM Bank programs, any applicant for any EXIM Bank product would be screened to determine whether or not it is a small business concern as follows: (i) First by using the industry-based size standards and (ii) then by applying the Interim Rule, if such applicant does not qualify as a small business concern under the industry based- size standards. It is EXIM Bank's belief and understanding that the approval for EXIM Bank to adopt the Interim Rule would align its small business size definitions with SBA's current practices and bring consistency to the marketplace, would possibly increase the number of applicants qualifying as a small business concern for EXIM Bank's

programs and increase the accuracy of EXIM Bank's reporting to Congress on its small business activities.

Legal Framework and Statutory Background

Section 2(b)(1)(E)(v) of the EXIM Bank Charter requires EXIM Bank to make available not less than 25% of its overall loan, guarantee and insurance authority to support the financing of exports by "small business concerns." The Charter further states that a "small business concern" is "as defined under Section 3 of the Small Business Act". In addition to criteria for determining a "small business concern" set forth therein, Section 3 of the Small Business Act grants the Administrator of the SBA the general authority to establish small business size standards for Federal government programs. Through this authority, SBA has promulgated industry-specific size standards which determine eligibility as a small business for more than 1000 industry categories as defined by the North American Industry Classification System (NAICS). Historically, EXIM Bank has relied on these industry-based size standards to be able to determine which participants in its programs can be considered a small business concern.

Under the Jobs Act, Congress amended the definition of "Small Business Concerns" in Section 3(a) of the Act by adding an "Alternative Size Standard" as an additional component of such definition. Under the new Section 3(a)(5) of the Small Business Act, Congress directed the SBA to establish an alternative size standard using maximum tangible net worth and average net income for applicants for the SBA Loan Programs. Further, the Jobs Act provided that until the SBA establishes a permanent tangible net worth and net income based alternative size standard, the Interim Rule would enable applicants to be eligible for the SBA Loan Programs if the applicant's: (1) Tangible net worth is not more than $15 million, and (2) the average net income after federal income taxes for the two fiscal years prior to the date of application is not more than $5 million. As of the publication of this notice, the SBA has not established a permanent alternative size standard definition and as a result, the SBA continues to apply the Interim Rule to define a small business concern for the SBA Loan Programs, in addition to using the industry based size standards. Based on EXIM Bank's Charter which emphasizes assistance to small business concerns and its mandate to adhere to SBA's definitions of small business, EXIM Bank proposes to adopt the Interim Rule as appropriate and necessary to accomplish those mandates, following approval by the SBA's Administrator.

Business Rationale

An important rationale for aligning EXIM Bank's definition of small business with the SBA's definition as it applies to the SBA Loan Programs is that EXIM Bank programs are complementary and/or work in conjunction with the 7(a) Loan Programs. As a result, we believe that EXIM Bank and the SBA may often serve many of the same concerns. However, currently, small businesses that qualify for 7(a) Loan Programs under the Interim Rule but not under industry based size standards would not be considered small businesses for programs offered by EXIM Bank. Notwithstanding a small business's eligibility for the SBA Loan Programs under the Interim Rule, the same small business may potentially be subject to different size criteria for EXIM Bank's program's because EXIM Bank is currently unable to use the Interim Rule to determine whether a concern can be considered a small business for its programs. This inconsistency can cause confusion in the marketplace and cause the same entities to be treated differently by SBA and EXIM Bank even though such entities may be evaluated for similar purposes. It also poses a difficulty for EXIM Bank in providing accurate reporting on the size of its participants to Congress because the same concern may be considered a small business under a SBA Loan Program but not under an EXIM Bank program. Accordingly, EXIM Bank proposes to align its small business size criteria with the Interim Rule so that small businesses that are eligible for SBA Loan Programs under the Interim Rule will also be considered small businesses for EXIM Bank purposes.

The 7(a) Loan Program represents the bulk of SBA's small business guaranteed loans. Furthermore, SBA's working capital and all of its international guaranteed loan programs fall under the umbrella of the 7(a) Loan Program. The SBA's international programs include the Export Express Loan Program, Export Working Capital Program and the International Trade Loan Program. In each case, SBA is authorized to guarantee loans to small businesses using its industry based size standards or using the Interim Rule for businesses that otherwise may not be eligible under the industry based size standards. Similarly, EXIM Bank programs also provide various financing and other support to small businesses through working capital programs, medium and long term guaranteed credit, direct loans, trade credit insurance and other financial support that facilitates the export of US made goods and services. Although EXIM Bank programs are available to businesses of all sizes, significant efforts are made to make these programs accessible to small businesses, and some EXIM Bank programs are available exclusively to small businesses, such as Express Insurance. The SBA may require trade credit insurance on its loan guarantee programs where the borrower is exporting on open account terms. These credit insurance requirements could be met by EXIM Bank through the Express Insurance program. As further incentive, EXIM Bank provides a 25% discount on insurance premiums for SBA borrowers who use any one of the many EXIM Bank insurance policy options. Other EXIM Bank programs are likewise useful to current SBA borrowers. For example, if a borrower's working capital needs exceed $5 million (the maximum loan amount under the 7(a) Loan Program), the EXIM Bank Business Credit Working Capital Guarantee Program ("WCGP") can be used to replace the borrower's SBA guaranteed working capital facilities. In fact, to facilitate such a transition, EXIM Bank and the SBA share a common application with respect to these working capital guarantee programs. If the borrower needs to sell on terms longer than the three year maturity authorized for the SBA's Export Working Capital Program, EXIM Bank has a range of medium and long term buyer options that can ensure the booking of a sale. Given the complementary nature and similarities of the 7(a) Loan Program and EXIM Bank financing products, EXIM Bank believes it is in the best interest of the public that the Interim Rule be adopted for EXIM Bank products so that the standards for a small business are consistent between these federal agencies.

Impact of Adopting the Interim Rule

EXIM Bank believes that the adoption of the Interim Rule for its programs would enable business concerns that do not qualify as small business concerns under the industry based size standards to qualify as small business concerns under the Interim Rule. EXIM Bank also believes that some business concerns that currently qualify as small business concerns for the SBA Loan Programs but not for EXIM Bank Programs will also qualify as small business concerns under the Interim Rule. EXIM Bank intends to collect data showing the amount of participants that qualify as a small business concern under the

Interim Rule if the Interim Rule is approved for EXIM Bank programs.

Request for Comments: EXIM Bank seeks comments from the public with respect to its proposal to use the Interim Rule as an alternative size standard in addition to the industry based standards in determining what participants of EXIM Bank programs can be considered a small business. Commenters addressing this proposed rule should include data and/or other information they consider relevant in support of their comments.

INFORMATION ON DECISION: Information on the final decision for this proposal will be available in the **Federal Register**.

In accordance with SBA's small business size regulations, specifically 13 CFR 121.901–904, EXIM Bank must evaluate the comments and must submit them with its recommendation to the SBA's Administrator's approval. The public must be made aware that the proposed alternative size standard under the Interim Rule will not take effect until EXIM Bank publishes a final notice in the **Federal Register**, which will only occur after the SBA's Administrator has approved the adoption of the Interim Rule for EXIM Bank programs as an alternative size standard.

Joyce B. Stone,

Program Specialist, Office of the General Counsel.

BILLING CODE 6690–01–P

FEDERAL COMMUNICATIONS COMMISSION

Open Commission Meeting, Thursday, November 17, 2016

November 10, 2016.

The Federal Communications Commission will hold an Open Meeting on the subjects listed below on Thursday, November 17, 2016 which is scheduled to commence at 10:30 a.m. in Room TW–C305, at 445 12th Street SW., Washington, DC.

Item No.	Bureau	Subject
1	WIRELESS TELECOMMUNICATIONS	TITLE: Universal Service Reform—Mobility Fund (WT Docket No. 10–208); Connect America Fund (WC Docket No. 10–90); A National Broadband Plan for Out Future (GN Docket No. 09–51); Establishing Just and Reasonable Rates for Local Exchange Carriers (WC Docket No. 07–135); High-Cost Universal Service Support (WC Docket No. 05–337); Developing an Unified Intercarrier Compensation Regime (CC Docket No. 01–92); Federal-State Joint Board on Universal Service (CC Docket No. 96–45); Lifeline and Link-Up (WC Docket No. 03–109). SUMMARY: The Commission will consider a Report and Order that would adopt rules for the second phase of the Mobility Fund, which would provide ongoing universal service support dedicated to expanding the availability of mobile broadband networks.
2	WIRELESS TELECOMMUNICATIONS	TITLE: Roaming Obligations of Commercial Mobile Service Providers and Regulatory Classification of Voice over LTE Service (WT Docket No. 16–356) SUMMARY: The Commission will consider a Notice of Proposed Rulemaking that would seek comment on proposals to implement a unified roaming standard and to classify Voice over LTE.
3	WIRELINE COMPETITION	TITLE: Business Data Services in an Internet Protocol Environment (WC Docket No. 16–143); Investigation of Certain Price Cap Local Exchange Carrier Business Data Services Tariff Pricing Plans (WC Docket No. 15–247); Technology Transitions (GN Docket No. 13–5); Special Access for Price Cap Local Exchange Carriers (WC Docket No. 05–25); AT&T Corporation Petition for Rulemaking to Reform Regulation of Incumbent Local Exchange Carrier Rates for Interstate Special Access Services (RM–10593). SUMMARY: The Commission will consider a Report and Order and Second Further Notice of Proposed Rulemaking that would allow for light-touch regulation of packet-based Business Data Services and retain and update price cap regulation for lower-bandwidth TDM-based Business Data Services to ensure that lack of competition does not unfairly harm commercial customers or the consumers who rely upon these services.
4	MEDIA	TITLE: Video Description: Implementation of the Twenty-First Century Communications and Video Accessibility Act of 2010 (MB Docket No. 11–43). SUMMARY: The Commission will consider a Report and Order which addresses the amount of video described programming required to be made available to consumers.

* * * * *

Consent Agenda

The Commission will consider the following subjects listed below as a consent agenda and these items will not be presented individually:

1	ENFORCEMENT	TITLE: Enforcement Bureau Action. SUMMARY: The Commission will consider an enforcement action.
2	GENERAL COUNSEL	TITLE: In the Matters of Lara V. Carlson on Request for Inspection of Records (FOIA Control No. 2015–601). SUMMARY: The Commission will consider a Memorandum Opinion and Order concerning Applications for Review filed by Lara Carlson which appealed a decision by the Wireline Competition Bureau addressing a Freedom of Information Act request.

The meeting site is fully accessible to people using wheelchairs or other mobility aids. Sign language interpreters, open captioning, and assistive listening devices will be provided on site. Other reasonable accommodations for people with disabilities are available upon request. In your request, include a description of the accommodation you will need and a way we can contact you if we need more information. Last minute requests will be accepted, but may be impossible to fill. Send an email to: *fcc504@fcc.gov* or call the Consumer & Governmental Affairs Bureau at 202–418–0530 (voice), 202–418–0432 (TTY).

Additional information concerning this meeting may be obtained from the Office of Media Relations, (202) 418–0500; TTY 1–888–835–5322. Audio/Video coverage of the meeting will be broadcast live with open captioning over the Internet from the FCC Live Web page at *www.fcc.gov/live.*

For a fee this meeting can be viewed live over George Mason University's Capitol Connection. The Capitol Connection also will carry the meeting live via the Internet. To purchase these services, call (703) 993–3100 or go to *www.capitolconnection.gmu.edu.*

Federal Communications Commission.

Marlene H. Dortch,

Secretary.

BILLING CODE 6712–01–P

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–0484]

Information Collection Being Submitted for Review and Approval to the Office of Management and Budget

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501–3520), the Federal Communications Commission (FCC or Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collections. Comments are requested concerning: Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees. The FCC may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

DATES: Written comments should be submitted on or before December 22, 2016. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contacts below as soon as possible.

ADDRESSES: Direct all PRA comments to Kimberly R. Keravuori, OMB, via email *Kimberly_R_Keravuori@omb.eop.gov;* and to Nicole Ongele, FCC, via email *PRA@fcc.gov* and to *Nicole.Ongele@fcc.gov*. Include in the comments the OMB control number as shown in the **SUPPLEMENTARY INFORMATION** section below.

FOR FURTHER INFORMATION CONTACT: For additional information or copies of the information collection, contact Nicole Ongele at (202) 418–2991. To view a copy of this information collection request (ICR) submitted to OMB: (1) Go to the Web page <*http://www.reginfo.gov/public/do/PRAMain*>, (2) look for the section of the Web page called ''Currently Under Review,'' (3) click on the downward-pointing arrow in the ''Select Agency'' box below the ''Currently Under Review'' heading, (4) select ''Federal Communications Commission'' from the list of agencies presented in the ''Select Agency'' box, (5) click the ''Submit'' button to the right of the ''Select Agency'' box, (6) when the list of FCC ICRs currently under review appears, look for the OMB control number of this ICR and then click on the ICR Reference Number. A copy of the FCC submission to OMB will be displayed.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060–0484.

Title: Part 4 of the Commission's Rules Concerning Disruptions to Communications.

Form Number: Not applicable.

Type of Review: Revision of a currently approved collection.

Respondents: Business or other for-profit entities; not-for-profit institutions.

Number of Respondents and Responses: 798 respondents; 13,012 responses.

Estimated Time per Response: 2 hours.

Frequency of Response: On occasion and annual reporting requirements, recordkeeping requirement and third party disclosure requirement.

Obligation To Respond: Mandatory. Statutory authority for this information collection is contained in 47 U.S.C. 151, 154(i)–(j) & (o), 201(b), 214(d), 218, 251(e)(3), 301, 303(b), 303(g), 303(r), 307, 309(a), 316, 332, 403, 615a–1, and 615c.

Total Annual Burden: 25,006 hours.

Total Annual Cost: No cost.

Privacy Act Impact Assessment: No impact(s).

Nature and Extent of Confidentiality: In accordance with 47 CFR 4.2, reports and information contained therein are presumed confidential. The filings are shared with the Department of Homeland Security through a password-protected real time access to NORS. Other persons seeking disclosure must follow the procedures delineated in 47 CFR Sections 0.457 and 0.459 of the Commission's rules for requests for and disclosure of information. The revisions noted in this information collection do not affect the confidential treatment of information provided to the Commission through outage reports filed in NORS.

Needs and Uses: On May 26, 2016, the Commission released a Report and Order, Order on Reconsideration, and Further Notice of Proposed Rulemaking, PS Docket Nos. 15–80, 11–60, and ET Docket No. 04–35; FCC 16–63 (The Report and Order and Order on Reconsideration) adopting final and proposed rules. The information to be collected pertains to final rules summarized and published in the **Federal Register** on July 12, 2016, 81 FR 45055.

The general purpose of the Commission's Part 4 rules is to gather sufficient information regarding disruptions to telecommunications to facilitate FCC monitoring, analysis, and investigation of the reliability and security of voice, paging, and interconnected VoIP communications services, and to identify and act on potential threats to our Nation's telecommunications infrastructure. The Commission uses this information collection to identify the duration, magnitude, root causes, and

contributing factors with respect to significant outages, and to identify outage trends; support service restoration efforts; and help coordinate with public safety officials during times of crisis. The Commission also maintains an ongoing dialogue with reporting entities, as well as with the communications industry at large, generally regarding lessons learned from the information collection in order to a foster better understanding of the root causes of significant outages, and to explore preventive measures in the future so as to mitigate the potential scale and impact of such outages.

Federal Communications Commission.

Marlene H. Dortch,

Secretary, Office of the Secretary.

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–1211]

Information Collection Being Reviewed by the Federal Communications Commission

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501–3520), the Federal Communications Commission (FCC or Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collections. Comments are requested concerning: Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business with fewer than 25 employees.

The FCC may not conduct or sponsor a collection of information unless it displays a currently valid OMB control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

DATES: Written PRA comments should be submitted on or before January 23, 2017. If you anticipate that you will submit comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Cathy Williams, FCC, via email *PRA@fcc.gov* and to *Cathy.Williams@fcc.gov.*

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection, contact Cathy Williams at (202) 418–2918.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060–1211.

Title: Sections 96.17; 96.21; 96.23; 96.25; 96.33; 96.35; 96.39; 96.41; 96.43; 96.45; 96.51; 96.57; 96.59; 96.61; 96.63; 96.67, Commercial Operations in the 3550–3650 MHz Band.

Form Number: N/A.

Type of Review: Revision of a currently approved information collection.

Respondents: Business or other for-profit entities, state, local, or tribal government and not for profit institutions.

Number of Respondents: 110,782 respondents; 226,099 responses.

Estimated Time per Response: .25 to 1 hour.

Frequency of Response: One-time and on occasion reporting requirements; other reporting requirements—as-needed basis for equipment safety certification that is no longer in use, and consistently (likely daily) responses automated via the device.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for, these collections are contained in 47 U.S.C. 151, 152, 154(i), 154(j), 155(c), 302(a), 303, 304, 307(e), and 316 of the Communications Act of 1934.

Total Annual Burden: 64,561 hours.

Total Annual Cost: $13,213,975.

Privacy Impact Assessment: No impact(s).

Nature and Extent of Confidentiality: There is no need for confidentiality with this collection of information.

Needs and Uses: The FCC adopted an Order on Reconsideration and Second Report and Order, FCC 16–55, that amends rules established in the First Report and Order, FCC 15–47, for commercial use of 150 megahertz in the 3550–3700 MHz (3.5 GHz) band and a new Citizens Broadband Radio Service, on April 28, 2016, published at 81 FR 49023 (July 26, 2016). The rule changes and information requirements contained in the First Report and Order are also approved under this Office of Management and Budget (OMB) control number and have not changed since they were last approved by OMB.

The Commission seeks approval from OMB for the information collection requirements contained in FCC 16–55. The amendments contained in the Second Report and Order create additional capacity for wireless broadband by adopting a new approach to spectrum management to facilitate more intensive spectrum sharing between commercial and federal users and among multiple tiers of commercial users. The Spectrum Access System (SAS) will use the information to authorize and coordinate spectrum use for Citizen Broadband Radio Service Devices (CBSDs). The Commission will use the information to coordinate among the spectrum tiers and determine Protection Areas for Priority Access Licensees (PALs).

The following is a description of the information collection requirements for which the Commission seeks OMB approval:

Section 96.25(c)(1)(i) requires PALs to inform the SAS if a CBSD is no longer in use.

Section 96.25(c)(2)(i) creates a default protection contour for any CBSD at the outer limit of the PAL Protection Area, but allows a PAL to self-report a contour smaller than that established by the SAS.

These rules which contain information collection requirements are designed to provide for flexible use of this spectrum, while managing three tiers of users in the band, and create a low-cost entry point for a wide array of users. The rules will encourage innovation and investment in mobile broadband use in this spectrum while protecting incumbent users. Without this information, the Commission would not be able to carry out its statutory responsibilities.

Federal Communications Commission.

Marlene H. Dortch,

Secretary, Office of the Secretary.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501–3520), the Federal Communication Commission (FCC or Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collections. Comments are requested concerning: Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees.

The FCC may not conduct or sponsor a collection of information unless it displays a currently valid OMB control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

DATES: Written comments should be submitted on or before December 22, 2016. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contacts below as soon as possible.

ADDRESSES: Direct all PRA comments to Nicholas A. Fraser, OMB, via email *Nicholas_A._Fraser@omb.eop.gov;* and to Cathy Williams, FCC, via email *PRA@fcc.gov* and to *Cathy.Williams@fcc.gov.* Include in the comments the OMB control number as shown in the **SUPPLEMENTARY INFORMATION** section below.

FOR FURTHER INFORMATION CONTACT: For additional information or copies of the information collection, contact Cathy Williams at (202) 418–2918. To view a copy of this information collection request (ICR) submitted to OMB: (1) Go to the Web page *http://www.reginfo.gov/public/do/PRAMain*, (2) look for the section of the Web page called ''Currently Under Review,'' (3) click on the downward-pointing arrow in the ''Select Agency'' box below the ''Currently Under Review'' heading, (4) select ''Federal Communications Commission'' from the list of agencies presented in the ''Select Agency'' box, (5) click the ''Submit'' button to the right of the ''Select Agency'' box, (6) when the list of FCC ICRs currently under review appears, look for the OMB control number of this ICR and then click on the ICR Reference Number. A copy of the FCC submission to OMB will be displayed.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060–0779.

Title: Sections 90.20(a)(1)(iii), 90.769, 90.767, 90.763(b)(l)(i)(a), 90.763(b)(l)(i)(B), 90.771(b) and 90.743, Rules for Use of the 220 MHz Band by the Private Land Mobile Radio Service.

Form Number: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities, not-for-profit institutions, and state, local or tribal government.

Number of Respondents: 140 respondents; 670 responses.

Estimated Time per Response: 2 hours to 20 hours.

Frequency of Response: On occasion reporting requirement and third party disclosure requirement.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this collection of information is contained in 47 U.S.C. 154(i), 303(g), 303(r) and 332(a).

Total Annual Burden: 5,886 hours.

Total Annual Cost: $135,000.

Privacy Impact Assessment: No impact(s).

Nature and Extent of Confidentiality: There is a need for confidentiality with this collection of information.

Needs and Uses: The Commission will submit this expiring collection to the Office of Management and Budget (OMB) for approval.

The Commission is requesting approval for an extension of information collection 3060–0779.

The collection includes rules to govern the future operation and licensing of the 220–222 MHz and (220 MHz service). In establishing this licensing plan, FCC's goal is to establish a flexible regulatory framework that allows for efficient licensing of the 220 MHz service, eliminates unnecessary regulatory burdens, and enhances the competitive potential of the 220 MHz service in the mobile service marketplace. However, as with any licensing and operational plan for a radio service, a certain number of regulatory and information burdens are necessary to verify licensee compliance with FCC rules.

Federal Communications Commission.

Marlene H. Dortch,

Secretary, Office of the Secretary.

BILLING CODE 6730–01–P

FEDERAL RESERVE SYSTEM

Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 *et seq.*) (BHC Act), Regulation Y (12 CFR part 225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a bank or bank holding company and all of the banks and nonbanking companies

owned by the bank holding company, including the companies listed below.

The applications listed below, as well as other related filings required by the Board, are available for immediate inspection at the Federal Reserve Bank indicated. The applications will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)). If the proposal also involves the acquisition of a nonbanking company, the review also includes whether the acquisition of the nonbanking company complies with the standards in section 4 of the BHC Act (12 U.S.C. 1843). Unless otherwise noted, nonbanking activities will be conducted throughout the United States.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than December 16, 2016.

A. Federal Reserve Bank of Chicago (Colette A. Fried, Assistant Vice President) 230 South LaSalle Street, Chicago, Illinois 60690–1414:

1. *Merchants Bancorp,* Carmel, Indiana to acquire Bluestem Development Corporation and thereby indirectly acquire Joy State Bank, both of Joy, Illinois.

Board of Governors of the Federal Reserve System, November 17, 2016.

Yao-Chin Chao,

Assistant Secretary of the Board.

FEDERAL RESERVE SYSTEM

Change in Bank Control Notices; Acquisitions of Shares of a Bank or Bank Holding Company

The notificants listed below have applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire shares of a bank or bank holding company. The factors that are considered in acting on the notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. The notices also will be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than December 5, 2016.

A. Federal Reserve Bank of St. Louis (David L. Hubbard, Senior Manager) P.O. Box 442, St. Louis, Missouri 63166–2034. Comments can also be sent electronically to *Comments.applications@stls.frb.org:*

1. *Pat McInnis Cooper Marital Trust, John A. Cooper III as trustee, individually and as part of a family control group that also includes the Pat McInnis Cooper Family Trust, John A. Cooper III as trustee, the Pat McInnis Cooper GS Trust, John A. Cooper III as trustee, and the John A. Cooper Jr. Family Trust, John A. Cooper III as trustee, all of Rogers, Arkansas;* to retain control of voting shares and for the family control group to retain control voting shares of FNBC Bancorp, Inc., Ash Flat, Arkansas, and thereby control shares of FNBC Bank, Ash Flat, Arkansas.

Board of Governors of the Federal Reserve System, November 17, 2016.

Yao-Chin Chao,

Assistant Secretary of the Board.

BILLING CODE 6210–01–P

GENERAL SERVICES ADMINISTRATION

[Notice–CIO–2016–01; Docket No. 2016–0002; Sequence No. 26]

Grace Hopper Day Hackathon

AGENCY: Chief Information Office, General Services Administration (GSA).

ACTION: Notice.

SUMMARY: This notice is to announce a competition for all open source contributors to redesign the GSA Open Web site, *http://open.gsa.gov,* the current developer portal for all GSA data, APIs, and source code open to the public. This competition is hosted by GSA's IT Digital Services team. The competition details can be viewed at: *http://open.gsa.gov/grace-hopper-hackathon/*. The goal of this redesign is to improve public engagement with GSA digital assets, and increase understanding and awareness of agency open technology. GSA challenges developers and designers from industry, academia, and Federal Government to create solutions using the site product roadmap provided on the competition details Web page.

DATES: Online registration for this event will open on November 22, 2016, and will close Tuesday, December 6, 2016, at 11:59 p.m. Eastern Standard Time (EST). The competition will take place on Friday; December 9, 2016, from 9:00 a.m. until 4:30 p.m., EST; check in will begin at 8:00 a.m., EST.

ADDRESSES: *Registration:* Registration for this event will be accomplished online at the following link: *http://open.gsa.gov/grace-hopper-hackathon/*.

The event space is limited to the first 100 people. Once registration is complete, participants will receive a confirmation email.

Event Location: GSA Headquarters, 1800 F Street NW., Washington, DC 20405. A government-issued ID shall be required to gain access into the building. All participants must enter through the main entrance located on 1800 F Street NW., Washington, DC 20405.

FOR FURTHER INFORMATION CONTACT: Contact Ms. Cindy A. Smith, at *cindya.smith@gsa.gov* or 816–823–5291.

SUPPLEMENTARY INFORMATION:

Purpose: In this competition, participants are asked to redesign the GSA Open Web site, *http://open.gsa.gov*.

Details of Challenge: Participants will be asked to redesign the current developer portal *open.gsa.gov*.

The solution should be a usability-driven feature to encourage public engagement with the site and GSA digital assets.

Predetermined teams (consisting of up to 5 individuals) are welcome to include a stand-alone or mix of private industry, academia, and eligible individuals. Cash prizes will be awarded to the best projects.

Data: Event information will be posted on the event page at, *http://open.gsa.gov/grace-hopper-hackathon/*.

Project: Participants are asked to redesign the GSA Open Web site, *http://open.gsa.gov,* the current developer portal for all GSA data, APIs, and source code open to the public.

Eligibility for Challenge: Eligibility to participate in the Grace Hopper Day Hackathon, and win a prize, is limited to entities/individuals who—

1. Have registered to participate in the Competition, and complied with the rules of the competition as explained in this posting.

2. Have been incorporated in, and maintain, a primary place of business in the United States. In the case of an individual, whether participating singly or in a group, the participant must be a citizen or permanent resident of the United States. Participants must be at least 18 years of age to participate in this event.

Participants may not be a Federal entity or Federal employee acting within the scope of employment. However, an individual or entity shall

not be deemed ineligible to win prize money because the individual or entity used Federal facilities or consulted with Federal employees during a competition, if the facilities and employees are made available to all individuals and entities participating in the competition on an equitable basis.

Participants agree to assume any and all risks and waive claims against the Federal Government and its related entities, except in the case of willful misconduct, for any injury, death, damage, or loss of property, revenue, or profits, whether direct, indirect, or consequential, arising from participation in this competition, whether the injury, death, damage, or loss arose through negligence or otherwise. Entrants are not required to obtain liability insurance or demonstrate financial responsibility in order to participate in this competition.

As the Federal Government is under a strict duty not to give preferential treatment to any private organization or individual, participants must agree to take diligent care to avoid the appearance of government endorsement of competition participation and submission. Participants must agree not to refer to the government's use of their submission (be it product or service) in any commercial advertising or similar promotions in a manner that could reasonably imply (in the judgment of a reasonable person) that GSA or the Federal Government endorses, prefers, sponsors, or has an affiliation with participants' products or services. Participants agree that GSA's trademarks, logos, service marks, trade names, or the fact that GSA awarded a prize to a participant, shall not be used by the participant to imply direct GSA endorsement of participant or participant's submission. Both participants and GSA may list the other party's name in a publicly available customer or other list so long as the name is not displayed in a more prominent fashion than any other third-party name.

Prizes: GSA may award prizes of no more than $1,000 to each member of a winning team (3 team's total). GSA is not required to award all prizes if the judges determine that a smaller number of entries meet the scope and requirements laid out for this competition, or if the agency only plans to use code from a smaller number of entries.

Funding for the Grace Hopper Day Hackathon awards will come from GSA. Prizes will be awarded to each member of a winning team via Electronic Funds Transfer (EFT), within 60 days of announcing the winner(s).

Requirements: The final solution should be open source code submitted as a pull request to the *https://github.com/GSA/open-gsa-redesign* GitHub repository. ''Open source'' refers to a program in which the source code is available to the general public for use and/or modification from its original design free of charge. In order to be Open Source Initiative Certified, the solution must meet the following nine criteria:

1. The author or holder of the license of the source code cannot collect royalties on the distribution of the code.
2. The distributed software must make the source code accessible to the user.
3. The author must allow modifications and derivations of the work under the software's original name.
4. No person, group, or field of endeavor can be denied access to the software.
5. The rights attached to the software must not depend on the software being part of a particular software distribution.
6. The licensed software cannot place restrictions on other software that is distributed with it.
7. The solution must be an online, interactive solution that meets the goals and objectives provided in this document.
8. The solution must include documentation of all data sources used.
9. The solution must include a description of how the solution can be updated with additional data from other agencies, if applicable.

The winner(s) of the competition will, in consideration of the prize(s) to be awarded, grant to GSA a perpetual, non-exclusive, royalty-free license to use any and all intellectual property to the winning entry for any governmental purpose, including the right to permit such use by any other agency or agencies of the Federal Government. All other rights of the winning entrant will be retained by the winner of the competition.

Scope: Any federal data and information that is publicly available is included in the scope of this challenge.

Judges: There will be a panel of judges, each with expertise in government-wide policy, information technology, and/or acquisition. Judges will award a score to each submission. The winner(s) of the competition will be decided based on the highest average overall score. Judges will only participate in judging submissions for which they do not have any conflicts of interest.

Judging Criteria: Each solution will be assessed based on technical competence and capabilities, use of design best practices to improve usability, creativity/innovation, and valuable information and insights.

Submissions will be judged based on the following metrics—

Technical competence and capabilities/Weight 50 percent: The solution addresses the primary goals of the competition. It is a finished feature that can improve Web site interaction with existing and potential customers, increase understanding and use of GSA open assets, and/or increase public engagement with GSA data, APIs and code.

Use of design best practices to improve usability/Weight 20 percent: The solution displays in a way that is easy to understand, visually appealing, and will help drive understanding of GSA open assets as well as engagement.

Creativity/Innovation/Weight 10 percent: The solution exceeds any internal capability that GSA has for Web site development through its incorporation of creative design elements and innovative capabilities.

Valuable information & insights regarding data/Weight 20 percent: The solver provides recommendations for additional functionality to the submitted feature for implementation by GSA. The solver identifies gaps in the feature and suggests additional enhancements to aid the agency in setting future product roadmap releases.

Challenge Objectives:

- Increase public understanding and use of GSA digital assets. Improve *open.gsa.gov* Web site interaction with existing and potential customers.
- Increase public engagement with GSA data, APIs and code.
- Post all open source solutions on the GSA *https://github.com/GSA/open-gsa-redesign* repository for future use by the federal government developer community and GSA.

All participants are required to check in with Security upon arriving at the GSA Central Office Building. Follow the posted signs to the GSA Auditorium. All participants must sign the document titled: Gratuitous Service Agreement.

Dated: November 16, 2016.

Steve Grewal,

Deputy, Chief Information Officer (CIO).

BILLING CODE 6820–34–P

DEPARTMENT OF DEFENSE

GENERAL SERVICES ADMINISTRATION

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[OMB Control No. 9000–0113; Docket 2016–0053; Sequence 43]

Information Collection; Acquisition of Helium

AGENCY: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Notice of request for public comments regarding an extension to an existing OMB clearance.

SUMMARY: Under the provisions of the Paperwork Reduction Act, the Regulatory Secretariat Division (MVCB) will be submitting to the Office of Management and Budget (OMB) a request to review and approve an extension of a previously approved information collection requirement concerning acquisition of helium.

DATES: Submit comments on or before January 23, 2017.

ADDRESSES: Submit comments identified by Information Collection 9000–0113, Acquisition of Helium, by any of the following methods:

- *Regulations.gov: http://www.regulations.gov.*

Submit comments via the Federal eRulemaking portal by searching the OMB control number 9000–0113. Select the link ''Comment Now'' that corresponds with ''Information Collection 9000–0113, Acquisition of Helium'', Follow the instructions provided on the screen. Please include your name, company name (if any), and ''Information Collection 9000–0113, Acquisition of Helium'', on your attached document.

- *Mail:* General Services Administration, Regulatory Secretariat Division (MVCB), 1800 F Street NW., Washington, DC 20405. ATTN: Ms. Flowers/IC 9000–0113, Acquisition of Helium.

Instructions: Please submit comments only and cite Information Collection 9000–0113, Acquisition of Helium, in all correspondence related to this collection. Comments received generally will be posted without change to *http://www.regulations.gov,* including any personal and/or business confidential information provided. To confirm receipt of your comment(s), please check *www.regulations.gov,* approximately two to three days after submission to verify posting (except allow 30 days for posting of comments submitted by mail).

FOR FURTHER INFORMATION CONTACT: Ms. Mahruba Uddowla, Procurement Analyst, Office of Governmentwide Acquisition Policy, GSA, via telephone 703–605–2868 or via email to *mahruba.uddowla@gsa.gov.*

SUPPLEMENTARY INFORMATION:

A. Purpose

The Helium Act (Pub. L. 86–777) (50 U.S.C. 167a, *et seq.*) and the Department of the Interior's implementing regulations (30 CFR parts 601 and 602) require Federal agencies to procure all major helium requirements from the Bureau of Land Management, Department of the Interior.

FAR 8.5, Acquisition of Helium, and the clause 52.208–8 Required Sources for Helium and Helium Usage Data, requires that the Contractor provide to the Contracting Officer the following data within 10 days after the Contractor or subcontractor receives a delivery of helium from a Federal helium supplier; (i) The name of the supplier; (ii) The amount of helium purchased; (iii) The delivery date(s); and (iv) the location where the helium was used. Such information will facilitate enforcement of the requirements of the Helium Act and the contractual provisions requiring the use of Government helium by agency contractors.

The information is used in administration of certain Federal contracts to ensure contractor compliance with contract clauses. Without the information, the required use of Government helium cannot be monitored and enforced effectively. The FAR requires that the contractor provide helium purchase information 10 days after delivery from a federal helium supplier, not for the contractor to forecast what they are going to purchase.

B. Annual Reporting Burden

In consultation with subject matter experts at the Department of the Interior, Bureau of Land Management, Helium Operations, the number of estimated responses per year was verified as being within an acceptable range, as was the average time required to read and prepare information which was estimated at 1 hour per response.

Respondents: 26.
Responses per Respondent: 1.
Total Responses: 26.
Hours per Response: 1.
Total Burden Hours: 26.

C. Public Comments

Public comments are particularly invited on: Whether this collection of information is necessary for the proper performance of functions of the FAR, and whether it will have practical utility; whether our estimate of the public burden of this collection of information is accurate, and based on valid assumptions and methodology; ways to enhance the quality, utility, and clarity of the information to be collected; and ways in which we can minimize the burden of the collection of information on those who are to respond, through the use of appropriate technological collection techniques or other forms of information technology.

Obtaining Copies of Proposals: Requesters may obtain a copy of the information collection documents from the General Services Administration, Regulatory Secretariat Division (MVCB), 1800 F Street NW., Washington, DC 20405, telephone 202–501–4755. Please cite OMB Control No. 9000–0113, Acquisition of Helium, in all correspondence.

Dated: November 17, 2016.

Lorin S. Curit,

Director, Federal Acquisition Policy Division, Office of Governmentwide Acquisition Policy, Office of Acquisition Policy, Office of Governmentwide Policy.

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

Proposed Information Collection Activity; Comment Request

Proposed Projects

Title: State Plan Child Support Collection and Establishment of Paternity Title IV–D, OCSE–100.

OMB No.: 0970–0017.

Description: The Office of Child Support Enforcement has approved a IV–D state plan for each state. Federal regulations require states to amend their state plans only when necessary to reflect new or revised federal statutes or regulations or material change in any state laws, regulations, policies, or IV–D agency procedures. The requirement for submission of a state plan and plan amendments for the Child Support Enforcement program is found in sections 452, 454, and 466 of the Social Security Act.

Respondents: State IV–D Agencies.

ANNUAL BURDEN ESTIMATES

Instrument	Number of respondents	Number of responses per respondent	Average burden hours per response	Total burden hours
State Plan (OCSE–100)	54	5	.5	135
State Plan Transmittal (OCSE–21–U4)	54	5	.25	67.5

Estimated Total Annual Burden Hours: 202.5.

In compliance with the requirements of the Paperwork Reduction Act of 1995 (Pub. L. 104–13, 44 U.S.C. Chap 35), the Administration for Children and Families is soliciting public comment on the specific aspects of the information collection described above. Copies of the proposed collection of information can be obtained and comments may be forwarded by writing to the Administration for Children and Families, Office of Planning, Research and Evaluation, 330 C Street SW., Washington DC 20201. Attn: ACF Reports Clearance Officer. Email address: *infocollection@acf.hhs.gov*. All requests should be identified by the title of the information collection.

The Department specifically requests comments on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted within 60 days of this publication.

Robert Sargis,

Reports Clearance Officer.

BILLING CODE 4184–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2015–E–4875]

Determination of Regulatory Review Period for Purposes of Patent Extension; ANAVIP

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) has determined the regulatory review period for ANAVIP and is publishing this notice of that determination as required by law. FDA has made the determination because of the submission of an application to the Director of the U.S. Patent and Trademark Office (USPTO), Department of Commerce, for the extension of a patent which claims that human biological product.

DATES: Anyone with knowledge that any of the dates as published (see the **SUPPLEMENTARY INFORMATION** section) are incorrect may submit either electronic or written comments and ask for a redetermination by January 23, 2017. Furthermore, any interested person may petition FDA for a determination regarding whether the applicant for extension acted with due diligence during the regulatory review period by May 22, 2017. See ''Petitions'' in the **SUPPLEMENTARY INFORMATION** section for more information.

ADDRESSES: You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2015–E–4875 for ''Determination of Regulatory Review Period for Purposes of Patent Extension; ANAVIP.'' Received comments will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

- *Confidential Submissions*—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *http://www.regulations.gov.* Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *http://www.fda.gov/regulatoryinformation/dockets/default.htm.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: Beverly Friedman, Office of Regulatory Policy, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, Rm. 6250, Silver Spring, MD 20993, 301–796–3600.

SUPPLEMENTARY INFORMATION:

I. Background

The Drug Price Competition and Patent Term Restoration Act of 1984 (Pub. L. 98–417) and the Generic Animal Drug and Patent Term Restoration Act (Pub. L. 100–670) generally provide that a patent may be extended for a period of up to 5 years so long as the patented item (human drug product, animal drug product, medical device, food additive, or color additive) was subject to regulatory review by FDA before the item was marketed. Under these acts, a product's regulatory review period forms the basis for determining the amount of extension an applicant may receive.

A regulatory review period consists of two periods of time: A testing phase and an approval phase. For human biological products, the testing phase begins when the exemption to permit the clinical investigations of the biological becomes effective and runs until the approval phase begins. The approval phase starts with the initial submission of an application to market the human biological product and continues until FDA grants permission to market the biological product. Although only a portion of a regulatory review period may count toward the actual amount of extension that the Director of USPTO may award (for example, half the testing phase must be subtracted as well as any time that may have occurred before the patent was issued), FDA's determination of the length of a regulatory review period for a human biological product will include all of the testing phase and approval phase as specified in 35 U.S.C. 156(g)(1)(B).

FDA has approved for marketing the human biologic product ANAVIP (crotalidae Immune F(ab')2 (equine)). ANAVIP is indicated for management of adult and pediatric patients with North American rattlesnake envenomation. Subsequent to this approval, the USPTO received a patent term restoration application for ANAVIP (U.S. Patent No. 6,709,655) from Instituto Bioclon, SA de CV, and the USPTO requested FDA's assistance in determining this patent's eligibility for patent term restoration. In a letter dated March 10, 2016, FDA advised the USPTO that this human biological product had undergone a regulatory review period and that the approval of ANAVIP represented the first permitted commercial marketing or use of the product. Thereafter, the USPTO requested that FDA determine the product's regulatory review period.

II. Determination of Regulatory Review Period

FDA has determined that the applicable regulatory review period for ANAVIP is 4,223 days. Of this time, 3,443 days occurred during the testing

phase of the regulatory review period, while 780 days occurred during the approval phase. These periods of time were derived from the following dates:

1. *The date an exemption under section 505(i) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(i)) became effective:* October 15, 2003. FDA has verified the applicant's claim that the date the investigational new drug application became effective was on October 15, 2003.

2. *The date the application was initially submitted with respect to the human biological product under section 351 of the Public Health Service Act (42 U.S.C. 262):* March 18, 2013. FDA has verified the applicant's claim that the biologics license application (BLA) for ANAVIP (BLA 125488/0) was initially submitted on March 18, 2013.

3. *The date the application was approved:* May 6, 2015. FDA has verified the applicant's claim that BLA 125488/0 was approved on May 6, 2015.

This determination of the regulatory review period establishes the maximum potential length of a patent extension. However, the USPTO applies several statutory limitations in its calculations of the actual period for patent extension. In its application for patent extension, this applicant seeks 5 years of patent term extension.

III. Petitions

Anyone with knowledge that any of the dates as published are incorrect may submit either electronic or written comments and ask for a redetermination (see **DATES**). Furthermore, any interested person may petition FDA for a determination regarding whether the applicant for extension acted with due diligence during the regulatory review period. To meet its burden, the petition must be timely (see **DATES**) and contain sufficient facts to merit an FDA investigation. (See H. Rept. 857, part 1, 98th Cong., 2d sess., pp. 41–42, 1984.) Petitions should be in the format specified in 21 CFR 10.30.

Submit petitions electronically to *https://www.regulations.gov* at Docket No. FDA–2013–S–0610. Submit written petitions (two copies are required) to the Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

Dated: November 16, 2016.

Leslie Kux,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2016–D–3848]

E11(R1) Addendum: Clinical Investigation of Medicinal Products in the Pediatric Population; International Council for Harmonisation; Draft Guidance for Industry; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing the availability of a draft guidance entitled ''E11(R1) Addendum: Clinical Investigation of Medicinal Products in the Pediatric Population'' (E11(R1) addendum). The draft guidance was prepared under the auspices of the International Council for Harmonisation (ICH), formerly the International Conference on Harmonisation. The draft guidance is an addendum to the guidance entitled ''E11 Clinical Investigation of Medicinal Products in the Pediatric Population'' (ICH E11 guidance). The draft guidance is intended to update the ICH E11 guidance and provide clarification and current regulatory perspective on topics in global pediatric drug development.

DATES: Although you can comment on any guidance at any time (see 21 CFR 10.115 (g)(5)), to ensure that the Agency considers your comment on this draft guidance before it begins work on the final version of the guidance, submit either electronic or written comments on the draft guidance by February 21, 2017.

ADDRESSES: You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2016–D–3848 for ''E11(R1) Addendum: Clinical Investigation of Medicinal Products in the Pediatric Population; International Council for Harmonisation; Draft Guidance for Industry; Availability.'' Received comments will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

- Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this

information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *http://www.fda.gov/regulatoryinformation/dockets/default.htm.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

Submit written requests for single copies of the draft guidance to the Division of Drug Information, Center for Drug Evaluation and Research (CDER), Food and Drug Administration, 10001 New Hampshire Ave., Hillandale Building, 4th Floor, Silver Spring, MD 20993–0002, or the Office of Communication, Outreach and Development, Center for Biologics Evaluation and Research (CBER), Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 3128, Silver Spring, MD 20993–0002. Send one self-addressed adhesive label to assist that office in processing your requests. The draft guidance may also be obtained by mail by calling CBER at 1–800–835–4709 or 240–402–8010. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the draft guidance document.

FOR FURTHER INFORMATION CONTACT:
Regarding the guidance: Lynne Yao, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 22, Silver Spring, MD 20993–0002, 301–796–2141; or CBER's Office of Communication, Outreach and Development; Center for Biologics Evaluation and Research; Food and Drug Administration; 10903 New Hampshire Ave., Bldg. 71; Silver Spring, MD 20993–0002; *ocod@fda.hhs.gov;* 1–800–835–4709 or 240–402–8010.

Regarding the ICH: Amanda Roache, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, Rm. 1176, Silver Spring, MD 20993–0002, *Amanda.roache@fda.hhs.gov,* 301–796–4548.

SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a draft guidance for industry entitled ''E11(R1) Addendum: Clinical Investigation of Medicinal Products in the Pediatric Population; International Council for Harmonisation; Draft Guidance for Industry; Availability.'' In recent years, many important initiatives have been undertaken by regulatory authorities and industry associations to promote international harmonization of regulatory requirements. FDA has participated in meetings designed to enhance harmonization and is committed to seeking scientifically based harmonized technical procedures for pharmaceutical development. One of the goals of harmonization is to identify and then reduce differences in clinical and scientific approaches for drug development among regulatory agencies.

ICH was organized to provide an opportunity for harmonization initiatives to be developed with input from both regulatory and industry representatives. FDA also seeks input from consumer representatives and others. ICH is concerned with harmonization of technical requirements for the registration of pharmaceutical products for human use among regulators around the world. The six founding members of the ICH are the European Commission; the European Federation of Pharmaceutical Industries Associations; the Japanese Ministry of Health, Labour, and Welfare; the Japanese Pharmaceutical Manufacturers Association; CDER and CBER, FDA; and the Pharmaceutical Research and Manufacturers of America. The Standing Members of the ICH Association include Health Canada and Swissmedic. Any party eligible as a Member in accordance with the ICH Articles of Association can apply for membership in writing to the ICH Secretariat. The ICH Secretariat, which coordinates the preparation of documentation, operates as an international nonprofit organization and is funded by the Members of the ICH Association.

The ICH Assembly is the overarching body of the Association and includes representatives from each of the ICH members and observers.

In September 2016, the ICH Assembly endorsed the draft guidance entitled ''E11(R1) Addendum: Clinical Investigation of Medicinal Products in the Pediatric Population'' and agreed that the guidance should be made available for public comment. The draft guidance is the product of the E11 Expert Working Group of the ICH. Comments about this draft will be considered by FDA and the E11 Expert Working Group.

The addendum to the ICH E11 guidance complements the guidance and provides clarification and current regulatory perspective on current and evolving topics in global pediatric drug development. The E11(R1) addendum includes sections on ethical considerations; age classification and pediatric subgroups, including neonates; and pediatric formulations that supplement the content in the ICH E11 guidance. A new section on Commonality of Scientific Approach for Pediatric Drug Development Programs addresses issues to aid scientific discussions at various stages of pediatric drug development in different regions. The section on Approaches to Optimize Pediatric Drug Development provides additional information on extrapolation and introduces modelling and simulation.

This draft guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the current thinking of FDA on ''E11(R1) Addendum: Clinical Investigation of Medicinal Products in the Pediatric Population.'' It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

II. Electronic Access

Persons with access to the Internet may obtain the draft guidance at *https://www.regulations.gov, http://www.fda.gov/Drugs/GuidanceComplianceRegulatoryInformation/Guidances/default.htm,* or *http://www.fda.gov/BiologicsBloodVaccines/GuidanceComplianceRegulatoryInformation/Guidances/default.htm.*

Dated: November 16, 2016.

Leslie Kux,

Associate Commissioner for Policy.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket Nos.: FDA–2015–E–0824; FDA–2015–E–0846; FDA–2015–E–0848; FDA–2015–E–0850]

Determination of Regulatory Review Period for Purposes of Patent Extension; CORE VALVE SYSTEM

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) has determined the regulatory review period for CORE VALVE SYSTEM and is publishing this notice of that determination as required by law. FDA has made the determination because of the submission of applications to the Director of the U.S. Patent and Trademark Office (USPTO), Department of Commerce, for the extension of a patent which claims that medical device.

DATES: Anyone with knowledge that any of the dates as published (see the **SUPPLEMENTARY INFORMATION** section) are incorrect may submit either electronic or written comments and ask for a redetermination by January 23, 2017. Furthermore, any interested person may petition FDA for a determination regarding whether the applicant for extension acted with due diligence during the regulatory review period by May 22, 2017. See ''Petitions'' in the **SUPPLEMENTARY INFORMATION** section for more information.

ADDRESSES: You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket Nos. FDA–2015–E–0824; FDA–2015–E–0846; FDA–2015–E–0848; and FDA–2015–E–0850 for ''Determination of Regulatory Review Period for Purposes of Patent Extension; CORE VALVE SYSTEM''. Received comments will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

- *Confidential Submissions*—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION''. The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *http://www.fda.gov/regulatoryinformation/dockets/default.htm.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: Beverly Friedman, Office of Regulatory Policy, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, Rm. 6250, Silver Spring, MD 20993–0002, 301–796–3600.

SUPPLEMENTARY INFORMATION:

I. Background

The Drug Price Competition and Patent Term Restoration Act of 1984 (Pub. L. 98–417) and the Generic Animal Drug and Patent Term Restoration Act (Pub. L. 100–670) generally provide that a patent may be extended for a period of up to 5 years so long as the patented item (human drug product, animal drug product, medical device, food additive, or color additive) was subject to regulatory review by FDA before the item was marketed. Under these acts, a product's regulatory review period forms the basis for determining the amount of extension an applicant may receive.

A regulatory review period consists of two periods of time: A testing phase and an approval phase. For medical devices, the testing phase begins with a clinical investigation of the device and runs until the approval phase begins. The approval phase starts with the initial submission of an application to market the device and continues until permission to market the device is granted. Although only a portion of a regulatory review period may count toward the actual amount of extension that the Director of USPTO may award (half the testing phase must be subtracted as well as any time that may have occurred before the patent was issued), FDA's determination of the length of a regulatory review period for a medical device will include all of the testing phase and approval phase as specified in 35 U.S.C. 156(g)(3)(B).

FDA has approved for marketing the medical device CORE VALVE SYSTEM.

CORE VALVE SYSTEM is indicated for relief of aortic stenosis in patients with symptomatic heart disease due to severe native calcific aortic stenosis (aortic valve area ≤0.8 cm², a mean aortic valve gradient of >40 mmHg, or a peak aortic-jet velocity of 4.0 m/s) and with native aortic annulus diameters between 18 and 29 mm who are judged by a heart team, including a cardiac surgeon, to be at extreme risk or inoperable for open surgical therapy (predicted risk of operative mortality and or serious irreversible morbidity ≥50% at 30 days). Subsequent to this approval, the USPTO received patent term restoration applications for CORE VALVE SYSTEM (U.S. Patent Nos. 5,957,949; 7,018,406; 8,226,710; and 8,579,966 from Medtronic Corevalve LLC and U.S. Patent No. 5,957,949 from Medtronic Vascular Inc.), and the USPTO requested FDA's assistance in determining the patents' eligibility for patent term restoration. In two letters dated October 19, 2015, FDA advised the USPTO that this medical device had undergone a regulatory review period and that the approval of CORE VALVE SYSTEM represented the first permitted commercial marketing or use of the product. Thereafter, the USPTO requested that FDA determine the product's regulatory review period.

II. Determination of Regulatory Review Period

FDA has determined that the applicable regulatory review period for CORE VALVE SYSTEM is 1,194 days. Of this time, 1,017 days occurred during the testing phase of the regulatory review period, while 177 days occurred during the approval phase. These periods of time were derived from the following dates:

1. *The date an exemption under section 520(g) of the Federal Food, Drug, and Cosmetic Act (the FD&C Act) (21 U.S.C. 360j(g)) involving this device became effective:* October 13, 2010. FDA has verified the applicants' claims that the date the investigational device exemption required under section 520(g) of the FD&C act for human tests to begin became effective October 13, 2010.

2. *The date an application was initially submitted with respect to the device under section 515 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360e):* July 25, 2013. FDA has verified the applicants' claims that the premarket approval application (PMA) for CORE VALVE SYSTEM (PMA P130021) was initially submitted July 25, 2013.

3. *The date the application was approved:* January 17, 2014. FDA has verified the applicants' claims that PMA P130021 was approved on January 17, 2014.

This determination of the regulatory review period establishes the maximum potential length of a patent extension. However, the USPTO applies several statutory limitations in its calculations of the actual period for patent extension. In its applications for patent extension, these applicants seek 685 days, 360 days, or 66 days of patent term extension.

III. Petitions

Anyone with knowledge that any of the dates as published are incorrect may submit either electronic or written comments and ask for a redetermination (see **DATES**). Furthermore, any interested person may petition FDA for a determination regarding whether the applicant for extension acted with due diligence during the regulatory review period. To meet its burden, the petition must be timely (see **DATES**) and contain sufficient facts to merit an FDA investigation. (See H. Rept. 857, part 1, 98th Cong., 2d sess., pp. 41–42, 1984.) Petitions should be in the format specified in 21 CFR 10.30.

Submit petitions electronically to *https://www.regulations.gov* at Docket No. FDA–2013–S–0610. Submit written petitions (two copies are required) to the Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852. Petitions that have not been made publicly available on *https://www.regulations.gov* may be viewed in the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 16, 2016.

Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *http://www.fda.gov/regulatoryinformation/dockets/default.htm.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT:
Beverly Friedman, Office of Regulatory Policy, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, Rm. 6250, Silver Spring, MD 20993, 301–796–3600.

SUPPLEMENTARY INFORMATION:

I. Background

The Drug Price Competition and Patent Term Restoration Act of 1984 (Pub. L. 98–417) and the Generic Animal Drug and Patent Term Restoration Act (Pub. L. 100–670) generally provide that a patent may be extended for a period of up to 5 years so long as the patented item (human drug product, animal drug product, medical device, food additive, or color additive) was subject to regulatory review by FDA before the item was marketed. Under these acts, a product's regulatory review period forms the basis for determining the amount of extension an applicant may receive.

A regulatory review period consists of two periods of time: A testing phase and an approval phase. For human biological products, the testing phase begins when the exemption to permit the clinical investigations of the biological product becomes effective and runs until the approval phase begins. The approval phase starts with the initial submission of an application to market the human biological product and continues until FDA grants permission to market the biological product. Although only a portion of a regulatory review period may count toward the actual amount of extension that the Director of USPTO may award (for example, half the testing phase must be subtracted as well as any time that may have occurred before the patent was issued), FDA's determination of the length of a regulatory review period for a human biological product will include all of the testing phase and approval phase as specified in 35 U.S.C. 156(g)(1)(B).

FDA has approved for marketing the human biologic product RUCONEST (rhC1INH). RUCONEST is indicated for treatment of acute attacks of hereditary angioedema in adult and adolescent patients. Subsequent to this approval, the USPTO received patent term restoration applications for RUCONEST (U.S. Patent Nos. 7,067,713 and RE43,691) from Pharming Intellectual Property B.V., and the USPTO requested FDA's assistance in determining this patent's eligibility for patent term restoration. In a letter dated October 19, 2015, FDA advised the USPTO that this human biological product had undergone a regulatory review period and that the approval of RUCONEST represented the first permitted commercial marketing or use of the product. Thereafter, the USPTO requested that FDA determine the product's regulatory review period.

II. Determination of Regulatory Review Period

FDA has determined that the applicable regulatory review period for RUCONEST is 3,502 days. Of this time, 3,045 days occurred during the testing phase of the regulatory review period, while 457 days occurred during the approval phase. These periods of time were derived from the following dates:

1. *The date an exemption under section 505(i) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(i)) became effective:* December 15, 2004. The applicant claims July 29, 2004, as the date the investigational new drug application (IND) became effective. However, FDA records indicate that the IND effective date was December 15, 2004, which was the first date after receipt of the IND that the investigational studies were allowed to proceed.

2. *The date the application was initially submitted with respect to the human biological product under section 351 of the Public Health Service Act (42 U.S.C. 262):* April 16, 2013. FDA has verified the applicant's claim that the biologics license application (BLA) for RUCONEST (BLA 125495) was initially submitted on April 16, 2013.

3. *The date the application was approved:* July 16, 2014. FDA has verified the applicant's claim that BLA 125495 was approved on July 16, 2014.

This determination of the regulatory review period establishes the maximum potential length of a patent extension. However, the USPTO applies several statutory limitations in its calculations of the actual period for patent extension. In its applications for patent extension, this applicant seeks 1,698 days or 557 days of patent term extension.

III. Petitions

Anyone with knowledge that any of the dates as published are incorrect may submit either electronic or written comments and ask for a redetermination (see **DATES**). Furthermore, any interested person may petition FDA for a determination regarding whether the applicant for extension acted with due diligence during the regulatory review period. To meet its burden, the petition must be timely (see **DATES**) and contain sufficient facts to merit an FDA investigation. (See H. Rept. 857, part 1, 98th Cong., 2d sess., pp. 41–42, 1984.) Petitions should be in the format specified in 21 CFR 10.30.

Submit petitions electronically to *https://www.regulations.gov* at Docket No. FDA–2013–S–0610. Submit written petitions (two copies are required) to the Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

Dated: November 16, 2016.

Leslie Kux,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2015–E–2724]

Determination of Regulatory Review Period for Purposes of Patent Extension; CERDELGA

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) has determined the regulatory review period for CERDELGA and is publishing this notice of that determination as required by law. FDA has made the determination because of the submission of an application to the Director of the U.S. Patent and Trademark Office (USPTO), Department of Commerce, for the extension of a patent which claims that human drug product.

DATES: Anyone with knowledge that any of the dates as published (in the **SUPPLEMENTARY INFORMATION** section) are incorrect may submit either electronic or written comments and ask for a redetermination by January 23, 2017. Furthermore, any interested person may petition FDA for a determination regarding whether the applicant for extension acted with due diligence during the regulatory review period by May 22, 2017. See ''Petitions'' in the **SUPPLEMENTARY INFORMATION** section for more information.

ADDRESSES: You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2015–E–2724 for ''Determination of Regulatory Review Period for Purposes of Patent Extension; CERDELGA.'' Received comments will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

- *Confidential Submissions*—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *http://www.fda.gov/regulatoryinformation/dockets/default.htm.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: Beverly Friedman, Office of Regulatory Policy, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, Rm. 6250, Silver Spring, MD 20993, 301–796–3600.

SUPPLEMENTARY INFORMATION:

I. Background

The Drug Price Competition and Patent Term Restoration Act of 1984 (Pub. L. 98–417) and the Generic Animal Drug and Patent Term Restoration Act (Pub. L. 100–670) generally provide that a patent may be extended for a period of up to 5 years so long as the patented item (human drug product, animal drug product, medical device, food additive, or color additive) was subject to regulatory review by FDA before the item was marketed. Under these acts, a product's regulatory review period forms the basis for determining the amount of extension an applicant may receive.

A regulatory review period consists of two periods of time: A testing phase and an approval phase. For human drug products, the testing phase begins when the exemption to permit the clinical investigations of the drug becomes effective and runs until the approval phase begins. The approval phase starts with the initial submission of an application to market the human drug product and continues until FDA grants permission to market the drug product.

Although only a portion of a regulatory review period may count toward the actual amount of extension that the Director of USPTO may award (for example, half the testing phase must be subtracted as well as any time that may have occurred before the patent was issued), FDA's determination of the length of a regulatory review period for a human drug product will include all of the testing phase and approval phase as specified in 35 U.S.C. 156(g)(1)(B).

FDA has approved for marketing the human drug product CERDELGA (eliglustat). CERDELGA is indicated for the long-term treatment of adult patients with Gaucher disease type 1 who are CYP2D6 extensive metabolizers, intermediate metabolizers, or poor metabolizers as detected by an FDA-cleared test. Subsequent to this approval, the USPTO received a patent term restoration application for CERDELGA (U.S. Patent No. 7,196,205) from Genzyme Corporation, and the USPTO requested FDA's assistance in determining this patent's eligibility for patent term restoration. In a letter dated October 15, 2015, FDA advised the USPTO that this human drug product had undergone a regulatory review period and that the approval of CERDELGA represented the first permitted commercial marketing or use of the product. Thereafter, the USPTO requested that FDA determine the product's regulatory review period.

II. Determination of Regulatory Review Period

FDA has determined that the applicable regulatory review period for CERDELGA is 3,854 days. Of this time, 3,520 days occurred during the testing phase of the regulatory review period, while 334 days occurred during the approval phase. These periods of time were derived from the following dates:

1. *The date an exemption under section 505(i) of the Federal Food, Drug, and Cosmetic Act (the FD&C Act) (21 U.S.C. 355(i)) became effective:* February 1, 2004. FDA has verified the applicant's claim that the date the investigational new drug application became effective was on February 1, 2004.

2. *The date the application was initially submitted with respect to the human drug product under section 505(b) of the FD&C Act:* September 20, 2013. FDA has verified the applicant's claim that the new drug application (NDA) for CERDELGA (NDA 205494) was initially submitted on September 20, 2013.

3. *The date the application was approved:* August 19, 2014. FDA has verified the applicant's claim that NDA 205494 was approved on August 19, 2014.

This determination of the regulatory review period establishes the maximum potential length of a patent extension. However, the USPTO applies several statutory limitations in its calculations of the actual period for patent extension. In its application for patent extension, this applicant seeks 1,518 days of patent term extension.

III. Petitions

Anyone with knowledge that any of the dates as published are incorrect may submit either electronic or written comments and ask for a redetermination (see **DATES**). Furthermore, any interested person may petition FDA for a determination regarding whether the applicant for extension acted with due diligence during the regulatory review period. To meet its burden, the petition must be timely (see **DATES**) and contain sufficient facts to merit an FDA investigation. (See H. Rept. 857, part 1, 98th Cong., 2d sess., pp. 41–42, 1984.) Petitions should be in the format specified in 21 CFR 10.30.

Submit petitions electronically to *https://www.regulations.gov* at Docket No. FDA–2013–S–0610. Submit written petitions (two copies are required) to the Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

Dated: November 16, 2016.

Leslie Kux,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Solicitation of Written Comments on the Mid-Course Review Working Group Draft Report and Draft Recommendations for Consideration by the National Vaccine Advisory Committee

AGENCY: National Vaccine Program Office, Office of the Assistant Secretary for Health, Office of the Secretary, Department of Health and Human Services.

ACTION: Notice.

SUMMARY: The National Vaccine Advisory Committee (NVAC) was established in 1987 to comply with Title XXI of the Public Health Service Act (Pub. L. 99–660) (section 2105) (42 U.S. Code 300aa–5). Its purpose is to advise and make recommendations to the Director of the National Vaccine Program on matters related to program responsibilities. The Assistant Secretary for Health (ASH) has been designated by the Secretary of Health and Human Services (HHS) as the Director of the National Vaccine Program. The National Vaccine Program Office (NVPO) is located within the Office of the Assistant Secretary for Health (OASH), Office of the Secretary, U.S. Department of Health and Human Services (HHS). NVPO provides leadership and fosters collaboration among the various Federal agencies involved in vaccine and immunization activities. The NVPO also supports the National Vaccine Advisory Committee (NVAC). The NVAC advises and makes recommendations to the ASH in her capacity as the Director of the National Vaccine Program on matters related to vaccine program responsibilities.

Recognizing the changes in the immunization landscape, the ASH charged the NVAC to conduct a Mid-course review to evaluate the progress of the National Vaccine Plan and provide recommendations to optimize priority areas. In March 2016, the NVAC formed the Mid-Course Review Working Group. Through a series of conference calls, electronic communication, and public discussions during the NVAC meetings, the working group identified a number of draft recommendations for consideration by the NVAC. These recommendations serve as a useful tool in refining collective strategies for shaping the future of the U.S. immunization enterprise, both domestically and globally. The draft report and draft recommendations from the working group will inform NVAC deliberations as the NVAC finalizes their recommendations for transmittal to the ASH.

On behalf of NVAC, NVPO is soliciting public comment on the draft report and draft recommendations from a variety of stakeholders, including the general public, for consideration by the NVAC as they develop their final recommendations to the ASH. It is anticipated that the draft report and draft recommendations, as revised with consideration given to public comment and stakeholder input, will be presented to the NVAC for adoption in February 2017 at the quarterly NVAC meeting.

DATES: Comments for consideration by the NVAC should be received no later than 5 p.m. EDT on December 27, 2016.

ADDRESSES:

- The draft report and draft recommendations are available on the Web at *http://www.hhs.gov/nvpo/nvac/index.html.*

• Electronic responses are preferred and may be addressed to: *anju.abraham@hhs.gov.*

• Written responses should be addressed to: National Vaccine Program Office, U.S. Department of Health and Human Services, 200 Independence Avenue SW., Room 733G.3B, Washington, DC 20201, *Attn:* NVAC Mid-course Review c/o Anju Abraham.

FOR FURTHER INFORMATION CONTACT: Anju Abraham, MS, MPH, National Vaccine Program Office, Office of the Assistant Secretary for Health, Department of Health and Human Services; telephone 202–205–5641; email *anju.abraham@hhs.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

Public health represents a collaboration of multiple sectors in society working together to prevent disease and promote health. These concerted efforts include the tremendous impacts of the U.S. vaccine and immunization system, which represents one of the most significant public health achievements in the 20th century. Estimates suggest that routine childhood immunizations prevented 322 million illnesses and averted 732,000 premature deaths from vaccine-preventable illnesses in children born between 1994–2013, with an estimated societal cost-savings of $1.38 trillion.

The 2010 National Vaccine Plan provides a ten-year strategic direction for all U.S. vaccine and immunization related activities to create a robust and coordinated system to improve the health of Americans by achieving optimal prevention of infectious diseases through vaccination. The Department of Health and Human Services recognized the need to conduct an evaluation of the plan and subsequently charged the National Vaccine Advisory Committee with making recommendations that would address the progress of the 2010 National Vaccine Plan.

In March 2016, the NVAC formed a Mid-Course Review Working Group (MCRWG) to evaluate the status of progress on the goals of the National Vaccine Plan (the document can be found here: *www.hhs.gov/nvpo/national-vaccine-plan/midcourse/index.html*) and develop recommendations to the ASH. The MCRWG began their efforts by reviewing and assessing the findings from the National Vaccine Program's (NVPO) Mid-course Review to identify the opportunity areas. Then, the MCRWG shifted its focus to coordinate additional information collection from non-federal stakeholders to represent consumer groups and from federal stakeholders to further inform their findings and recommendations. Through a number of conference calls, electronic communication, and public discussions at the NVAC meetings, the working group identified a number of draft recommendations. These recommendations frame the five areas that represent opportunities to advance the National Vaccine Program over the remaining five years of the National Vaccine Plan. These five areas of opportunity include:

(1) Strengthen health information and surveillance systems to track, analyze and visualize disease, immunization coverage, and safety data, both domestically and globally;

(2) Foster and facilitate efforts to strengthen confidence in vaccines and the immunization system to increase coverage rates across the lifespan;

(3) Eliminate financial and systems barriers for providers and consumers to facilitate access to routinely recommended vaccines;

(4) Strengthen the science base for the development and licensure of vaccines;

(5) Facilitate vaccine development.

The NVAC draft report outlines the background and rationale for each of the opportunity areas and addresses the challenges, characteristics that constitute success, metrics to measure each area, and proposed metrics to be developed in the future. The conclusions and recommendations detail how the ASH can support HHS activities in these areas.

II. Request for Comment

NVPO, on behalf of the NVAC Mid-course Review Working Group, requests input on the draft report and draft recommendations. In addition to general comments on the draft report and draft recommendations, NVPO is seeking input on characteristics of success, challenges, and metrics to achieve success in the five opportunity areas outlined in the report. Please limit your comments to six (6) pages.

III. Potential Responders

HHS invites input from a broad range of stakeholders including individuals and organizations that have interests U.S. vaccine and immunization efforts and the role of HHS in advancing those efforts.

Examples of potential responders include, but are not limited to, the following:

—General public;
—advocacy groups, non-profit organizations, and public interest organizations;
—academics, professional societies, and healthcare organizations;
—public health officials and immunization program managers;
—physician and non-physician providers that administer immunization services, including pharmacists; and
—representatives from the private sector.

When responding, please self-identify with any of the above or other categories (include all that apply) and your name. Anonymous submissions will not be considered. Written submissions should not exceed six (6) pages. Please do not send proprietary, commercial, financial, business, confidential, trade secret, or personal information.

Dated: November 10, 2016.

Bruce Gellin,

Executive Secretary, National Vaccine Advisory Committee, Deputy Assistant Secretary for Health, Director, National Vaccine Program Office.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Submission for OMB Review; 30-Day Comment Request; Materials To Support NIH Serving as an IRB of Record or a Single IRB for Outside Institutions (Office of the Director)

AGENCY: National Institutes of Health, HHS.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995, the National Institutes of Health (NIH) has submitted to the Office of Management and Budget (OMB) a request for review and approval of the information collection listed below. This proposed information collection was previously published in the **Federal Register** on August 22, 2016, page 56667 (81 FR 56667) and allowed 60 days for public comment. No public comments were received. The purpose of this notice is to allow an additional 30 days for public comment.

DATES: Comments regarding this information collection are best assured of having their full effect if received within 30 days of the date of this publication.

ADDRESSES: Written comments and/or suggestions regarding the items(s) contained in this notice, especially regarding the estimated public burden and associated response time, should be directed to the: Office of Management and Budget, Office of Regulatory Affairs, *OIRA_submission@omb.eop.gov* or by fax to 202–395–6974, Attention: Desk Officer for NIH.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the data collection plans and instruments, contact: Julia Slutsman, Health Science Policy Analyst, Office of Human Subjects Research Protections (OHSRP), IRP, OD, NIH, Building 10, Room 1C154, 10 Center Drive, Bethesda, MD 20892, or call non-toll-free number 301–402–3444 or email your request, including your address to: *PHERRB@mail.nih.gov.* Formal requests for additional materials must be requested in writing.

SUPPLEMENTARY INFORMATION: The Office of Human Subjects Research Protections (OHSRP), Office of the Director (OD), National Institutes of Health, may not conduct or sponsor, and the respondent is not required to respond to, an information collection that has been extended, revised, or implemented on or after October 1, 1995, unless it displays a currently valid OMB control number.

In compliance with Section 3507(a)(1)(D) of the Paperwork Reduction Act of 1995, the National Institutes of Health has submitted to the Office of Management and Budget (OMB) a request for review and approval of the information collection listed below.

Proposed Collection: Materials to Support NIH Serving As an IRB of Record or a Single IRB for Outside Institutions, 0925-New, Office of Human Subjects Research Protections (OHSRP), Office of the Director, National Institutes of Health (NIH).

Need and Use of Information Collection: The NIH Human Research Protections Program (HRPP) is preparing to implement the recent ''NIH Policy on the Use of a Single Institutional Review Board (sIRB) of Record for Multi-Site Research,'' which requires the use of a single IRB of record for human subject protections review of certain multisite studies. Additionally, the NIH and HHS have recently established the Public Health Emergency Research Review Board (PHERRB) mechanism, for human subject protections review of certain—typically multisite—public health emergency research studies. Any of the 12 NIH intramural IRBs can be designated to serve as the PHERRB for review of a public health emergency research protocol. Finally, proposed changes to federal human subject protections regulations, if finalized, will require the use of single IRB review for the majority of HHS funded, multi-site studies.

To meet all of these needs, and support efficient single IRB review, researchers at outside institutions will need to provide information to the NIH HRPP, which includes the NIH intramural IRBs, using materials developed by the NIH Office of Human Subject Protections. The required materials include: The Application for PHERRB Review (APR); the Initial Review Local Context Worksheet (IRLCW); and the Continuing Review Local Context Worksheet (CRLCW). This information collection is intended to provide the NIH HRPP and the NIH IRBs with information necessary for NIH to maintain regulatory compliance in its conduct of human subject protections review when an NIH IRB serves an IRB of record for multisite research and to provide high quality and timely human subject protections reviews.

OMB approval is requested for 3 years. There are no costs to respondents other than their time. The total estimated annual burden hours are 790.

ESTIMATED ANNUALIZED BURDEN HOURS

Data collection activity	Type of respondents	Estimated number of respondents	Estimated number of responses per respondent	Average time per response (in hours)	Estimated total annual burden hours
APR	Principal Investigator (MD or PhD)	20	1	2	40
IRLCW	Principal Investigator (MD or PhD degree) or Research Coordinator (RN, BA, MA degree) or Regulatory Staff (BA degree).	250	1	2	500
CRLCW	Principal Investigator (MD or PhD degree) or Research Coordinator (RN, BA, MA degree) or Regulatory Staff (BA degree).	250	1	1	250
Total		520	520		790

Dated: November 16, 2016.

Lawrence A. Tabak,

Deputy Director, National Institutes of Health.

AGENCY: National Institutes of Health.

ACTION: Notice.

SUMMARY: In compliance with the requirement of the Paperwork Reduction Act of 1995 to provide opportunity for public comment on proposed data collection projects, the National Cancer Institute (NCI) will publish periodic summaries of propose projects to be submitted to the Office of Management and Budget (OMB) for review and approval.

DATES: Comments regarding this information collection are best assured of having their full effect if received within 60 days of the date of this publication.

FOR FURTHER INFORMATION CONTACT: To obtain a copy of the data collection plans and instruments, submit comments in writing, or request more information on the proposed project, contact: Michael Montello, Pharm. D., Cancer Therapy Evaluation Program (CTEP), 9609 Medical Center Drive, MSC 9742, Rockville, MD 20850 or call non-toll-free number 240–276–6080 or Email your request, including your address to: *montellom@mail.nih.gov.* Formal requests for additional plans and instruments must be requested in writing.

SUPPLEMENTARY INFORMATION: Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 requires: Written comments and/or suggestions from the public and affected agencies are invited to address one or more of the following points: (1) Whether the proposed collection of information is necessary for the proper performance of the function of the agency, including whether the information will have practical utility; (2) The accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) Ways to enhance the quality, utility, and clarity of the information to be collected; and (4) Ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Proposed Collection Title: Cancer Trials Support Unit (CTSU) (NCI), 0925–0624, EXTENSION, National Cancer Institute (NCI), National Institutes of Health (NIH).

Need and Use of Information Collection: The Cancer Therapy Evaluation Program (CTEP) establishes and supports programs to facilitate the participation of qualified investigators on CTEP-supported studies, and to institute programs that minimize redundancy among grant and contract holders, thereby reducing overall cost of maintaining a robust treatment trials program. Currently guided by the efforts of the Clinical Trials Working Group (CTWG) and the Institute of Medicine (IOM) recommendations to revitalize the Cooperative Group program, CTEP has funded the Cancer Trials Support Unit (CTSU). The CTSU collects standardized forms to process site regulatory information, changes to membership, patient enrollment data, and routing information for case report forms. In addition, CTSU collects annual surveys of customer satisfaction for clinical site staff using the CTSU Help Desk, the CTSU Web site, and the Protocol and Information Office (PIO). An ongoing user satisfaction survey is in place for the Oncology Patient Enrollment Network (OPEN). User satisfaction surveys are compiled as part of the project quality assurance activities and are used to direct improvements to processes and technology.

OMB approval for an extension to the existing approval is requested for one year. There are no costs to respondents other than their time. The total estimated annualized burden hours are 25,204.

ESTIMATED ANNUALIZED BURDEN HOURS

Form name	Type of respondent	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total annual burden hour
CTSU IRB/Regulatory Approval Transmittal Form.	Health Care Practitioner	9,000	12	2/60	3,600
CTSU IRB Certification Form	Health Care Practitioner	8,500	12	10/60	17,000
CTSU Acknowledgement Form	Health Care Practitioner	500	12	5/60	500
Withdrawal from Protocol Participation Form	Health Care Practitioner	50	12	5/60	50

ESTIMATED ANNUALIZED BURDEN HOURS—Continued

Form name	Type of respondent	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total annual burden hour
Site Addition	Health Care Practitioner	25	12	5/60	25
CTSU Roster Update Form	Health Care Practitioner	50	12	4/60	40
CTSU Radiation Therapy Facilities Inventory Form.	Health Care Practitioner	20	12	30/60	120
CTSU IBCSG Drug Accountability Form	Health Care Practitioner	11	12	10/60	22
CTSU IBCSG Transfer of Investigational Agent Form.	Health Care Practitioner	3	12	20/60	12
Site Initiated Data Update Form	Health Care Practitioner	10	12	10/60	20
Data Clarification Form	Health Care Practitioner	341	12	20/60	1,364
RTOG 0834 CTSU Data Transmittal Form	Health Care Practitioner	60	12	10/60	120
MC0845(8233) CTSU Data Transmittal	Health Care Practitioner	50	12	10/60	100
CTSU Generic Data Transmittal Form	Health Care Practitioner	500	12	10/60	1,000
CTSU Patient Enrollment Transmittal Form	Health Care Practitioner	200	12	10/60	400
CTSU P2C Enrollment Transmittal Form	Health Care Practitioner	15	12	10/60	30
CTSU Transfer Form	Health Care Practitioner	20	12	10/60	40
CTSU System Account Request Form	Health Care Practitioner	20	12	20/60	80
CTSU Request for Clinical Brochure	Health Care Practitioner	75	12	10/60	150
CTSU Supply Request Form	Health Care Practitioner	75	12	10/60	150
CTSU Web Site Customer Satisfaction Survey.	Health Care Practitioner	275	1	15/60	69

National Institutes of Health

National Institute on Deafness and Other Communication Disorders; Notice of Meeting

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. App.), notice is hereby given of a meeting of the National Deafness and Other Communication Disorders Advisory Council.

The meeting will be open to the public as indicated below, with attendance limited to space available. Individuals who plan to attend and need special assistance, such as sign language interpretation or other reasonable accommodations, should notify the Contact Person listed below in advance of the meeting.

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and/or contract proposals and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications and/or contract proposals, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Deafness and Other Communication Disorders Advisory Council.

Date: January 27, 2017.

Closed: 8:30 a.m. to 9:40 a.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, Building 31, Conference Room 6, 31 Center Drive, Bethesda, MD 20892.

Open: 9:40 a.m. to 2:00 p.m.

Agenda: Staff reports on divisional, programmatic, and special activities.

Place: National Institutes of Health, Building 31, Conference Room 6, 31 Center Drive, Bethesda, MD 20892.

Contact Person: Craig A. Jordan, Ph.D., Director, Division of Extramural Activities, NIDCD, NIH, Room 8345, MSC 9670, 6001 Executive Blvd., Bethesda, MD 20892–9670, 301–496–8693, *jordanc@nidcd.nih.gov.*

Any interested person may file written comments with the committee by forwarding the statement to the Contact Person listed on this notice. The statement should include the name, address, telephone number and when applicable, the business or professional affiliation of the interested person.

In the interest of security, NIH has instituted stringent procedures for entrance onto the NIH campus. All visitor vehicles, including taxicabs, hotel, and airport shuttles will be inspected before being allowed on campus. Visitors will be asked to show one form of identification (for example, a government-issued photo ID, driver's license, or passport) and to state the purpose of their visit.

Information is also available on the Institute's/Center's home page: *http://www.nidcd.nih.gov/about/Pages/Advisory-Groups-and-Review-Committees.aspx,* where an agenda and any additional information for the meeting will be posted when available.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental Health Services Administration

Agency Information Collection Activities: Proposed Collection; Comment Request

In compliance with Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 concerning opportunity for public comment on proposed collections of information, the Substance Abuse and Mental Health Services Administration (SAMHSA) will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the information collection plans, call the SAMHSA Reports Clearance Officer on (240) 276–1243.

Comments are invited on: (a) Whether the proposed collections of information are necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Proposed Project: Community Mental Health Services Block Grant and Substance Abuse and Prevention Treatment Block Grant FY 2018–2019 Plan and Report Guidance and Instructions (OMB No. 0930–0168)—Revision

The Substance Abuse and Mental Health Services Administration (SAMHSA) is requesting approval from the Office of Management and Budget (OMB) for a revision of the 2016–17 Community Mental Health Services Block Grant (MHBG) and Substance Abuse Prevention and Treatment Block Grant (SABG) Plan and Report Guidance and Instructions.

Currently, the SABG and the MHBG differ on a number of their practices (*e.g.,* data collection at individual or aggregate levels) and statutory authorities (*e.g.,* method of calculating MOE, stakeholder input requirements for planning, set asides for specific populations or programs, etc.). Historically, the Centers within SAMHSA that administer these block grants have had different approaches to application requirements and reporting. To compound this variation, states have different structures for accepting, planning, and accounting for the block grants and the prevention set aside within the SABG. As a result, how these dollars are spent and what is known about the services and clients that receive these funds varies by block grant and by state.

Increasingly, under the Affordable Care Act, more individuals are eligible for Medicaid and private insurance. This expansion of health insurance coverage will continue to have a significant impact on how State Mental Health Authorities (SMHAs) and Single State Agencies (SSAs) use their limited resources. In 2009, more than 39 percent of individuals with serious mental illnesses (SMI) or serious emotional disturbances (SED) were uninsured. Sixty percent of individuals with substance use disorders whose treatment and recovery support services were supported wholly or in part by SAMHSA block grant funds were also uninsured. A substantial proportion of this population has gained health insurance coverage since enactment of the Affordable Care Act and now has various outpatient and other services covered through Medicaid, Medicare, or private insurance. However, coverage provided by these plans and programs do not necessarily provide access to the full range of support services needed to achieve and maintain recovery for most of these individuals and their families.

Given these changes, SAMHSA has conveyed that block grant funds be directed toward four purposes: (1) To fund priority treatment and support services for individuals without insurance or who cycle in and out of health insurance coverage; (2) to fund those priority treatment and support services not covered by Medicaid, Medicare or private insurance offered through the exchanges and that demonstrate success in improving outcomes and/or supporting recovery; (3) to fund universal, selective and targeted prevention activities and services; and (4) to collect performance and outcome data to determine the ongoing effectiveness of behavioral health prevention, treatment and recovery support services and to plan the implementation of new services on a nationwide basis.

To help states meet the challenges of 2018 and beyond, and to foster the implementation and management of an integrated physical health and mental health and addiction service system, SAMHSA must establish standards and expectations that will lead to an improved system of care for individuals with or at risk of mental and substance use disorders. Therefore, this application package includes fully exercising SAMHSA's existing authority regarding states', territories' and the Red Lake Band of the Chippewa Tribe's (subsequently referred to as ''states'') use of block grant funds as they fully integrate behavioral health services into the broader health care continuum.

Consistent with previous applications, the FY 2018–2019 application has sections that are required and other sections where additional information is requested. The FY 2018–2019 application requires states to submit a face sheet, a table of contents, a behavioral health assessment and plan, reports of expenditures and persons served, an executive summary, and funding agreements and certifications. In addition, SAMHSA is requesting information on key areas that are critical to the states success in addressing health care integration. Therefore, as part of this block grant planning process, SAMHSA is asking states to identify both their promising or effective strategies as well as their technical assistance needs to implement the strategies they identify in their plans for FYs 2018 and 2019.

To facilitate an efficient application process for states in FYs 2018–2019, SAMHSA convened an internal workgroup to review and modify the application for the block grant planning section. In addition, SAMHSA utilized the questions and requests for

clarification from representatives from SMHAs and SSAs to inform the proposed changes to the block grants. Based on these discussions with states, SAMHSA is proposing several changes to the block grant programs as discussed in greater detail below.

Changes to Assessment and Planning Activities

The proposed revisions reflect changes within the planning section of the application. The most significant change involves a movement away from a request for multiple narrative descriptions of the state's activities in a variety of areas to a more quantitative response to specific questions, reflecting statutory or regulatory requirements where applicable, or reflecting specific uses of block grant funding. In addition, to respond to the requests from states, the required and requested sections have been clearly identified.

The FY 2016–2017 application sections that gave states policy guidance on the planning and implementation of system issues which were not authorized services under either block grant have been eliminated to avoid confusion. In addition, the statutory criteria which govern the plan, report and application have been included in the document as references.

Other specific proposed revisions are described below:

• *Health Care System, Parity and Integration*—This section is a consolidation of the FY 2016–2017 sections on the Affordable Care Act, health insurance marketplace, parity, enrollment and primary and behavioral health care integration. It is vital that SMHAs and SSAs programming and planning reflect the strong connection between behavioral and physical health. Fragmented or discontinuous care may result in inadequate diagnosis and treatment of both physical and behavioral conditions, including co-occurring disorders. Health care professionals, consumers of mental, substance use disorders, co-occurring mental, and substance use disorders treatment recognize the need for improved coordination of care and integration of primary and behavioral health care. Health information technology, including electronic health records (EHRs), and telehealth are examples of important strategies to promote integrated care. Use of EHRs—in full compliance with applicable legal requirements—may allow providers to share information, coordinate care and improve billing practices.

• *Evidenced-Based Practices for Early Intervention for the MHBG*—In its FY 2016 appropriation, SAMHSA was directed to require that states set aside 10 percent of their MHBG allocation to support evidence-based programs that provide treatment to those with early SMI including but not limited to psychosis at any age. SAMHSA worked collaboratively with the National Institute on Mental Health (NIMH) to review evidence showing efficacy of specific practices in ameliorating SMI and promoting improved functioning. NIMH has released information on Components of Coordinated Specialty Care (CSC) for First Episode Psychosis. Results from the NIMH funded *Recovery After an Initial Schizophrenia Episode (RAISE)* initiative, a research project of the NIMH, suggest that mental health providers across multiple disciplines can learn the principles of CSC for First Episode of Psychosis (FEP), and apply these skills to engage and treat persons in the early stages of psychotic illness.

States can implement models across a continuum, which have demonstrated efficacy, including the range of services and principles identified by NIMH. Utilizing these principles, regardless of the amount of investment, and with leveraging funds through inclusion of services reimbursed by Medicaid or private insurance, every state will be able to begin to move their system toward earlier intervention, or enhance the services already being implemented.

Other Changes

While the statutory deadlines and block grant award periods remain unchanged, SAMHSA encourages states to turn in their application as early as possible to allow for a full discussion and review by SAMHSA. Applications for the MHBG-only is due no later than September 1, 2017. The application for SABG-only is due no later than October 1, 2017. A single application for MHBG *and* SABG is due no later than September 1, 2017.

Estimates of Annualized Hour Burden

The estimated annualized burden for the uniform application is 33,374 hours. Burden estimates are broken out in the following tables showing burden separately for Year 1 and Year 2. Year 1 includes the estimates of burden for the uniform application and annual reporting. Year 2 includes the estimates of burden for the recordkeeping and annual reporting. The reporting burden remains constant for both years.

TABLE 1—ESTIMATES OF APPLICATION AND REPORTING BURDEN FOR YEAR 1

BILLING CODE 4162–20–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–5913–N–33]

60-Day Notice of Proposed Information Collection: Home Equity Conversion Mortgage (HECM) Insurance Application for the Origination of Reverse Mortgages and Related Documents

AGENCY: Office of the Assistant Secretary for Housing-Federal Housing Commissioner, HUD.

ACTION: Notice.

SUMMARY: HUD is seeking approval from the Office of Management and Budget (OMB) for the information collection described below. In accordance with the Paperwork Reduction Act, HUD is requesting comment from all interested parties on the proposed collection of information. The purpose of this notice is to allow for 60 days of public comment.

DATES: *Comments Due Date:* January 23, 2017.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and/or OMB Control Number and should be sent to: Colette Pollard, Reports Management Officer, QDAM, Department of Housing and Urban Development, 451 7th Street SW., Room 4176, Washington, DC 20410–5000; telephone 202–402–3400 (this is not a toll-free number) or email at *Colette.Pollard@hud.gov* for a copy of the proposed forms or other available information. Persons with hearing or speech impairments may access this number through TTY by calling the toll-free Federal Relay Service at (800) 877–8339.

FOR FURTHER INFORMATION CONTACT: Cheryl Walker, Director, Home Valuation Policy Division, Department of Housing and Urban Development, 451-7th Street SW., Washington, DC 20410; email Colette Pollard at *Colette.Pollard@hud.gov* or telephone 202–402–3400. This is not a toll-free number. Persons with hearing or speech impairments may access this number through TTY by calling the toll-free Federal Relay Service at (800) 877–8339.

Copies of available documents submitted to OMB may be obtained from Ms. Pollard.

SUPPLEMENTARY INFORMATION: This notice informs the public that HUD is seeking approval from OMB for the information collection described in Section A.

A. Overview of Information Collection

Title of Information Collection: Home Equity Conversion Mortgage (HECM) Insurance Application for the Origination of Reverse Mortgages and Related Documents.

OMB Approval Number: 2502–0524.

Type of Request: Revision.

Form Number: HUD–92901, HUD–92902, HUD–92051, HUD–92561, HUD–92800.5b, HUD–92900–A, HUD–1, HUD–1Addendum, Fannie Mae (FNMA)–1009, FNMA–1025, FNMA–1003, FNMA–1004, FNMA–1004c, FNMA–1073.

Description of the need for the information and proposed use: The Home Equity Conversion Mortgage (HECM) program is the Federal Housing Administration's (FHA) reverse mortgage program that enables seniors who have equity in their homes to withdraw a portion of the accumulated equity. The intent of the HECM Program is to ease the financial burden on elderly homeowners facing increased health, housing, and subsistence costs at a time of reduced income. The currently approved information collection is necessary to screen mortgage insurance applications in order to protect the FHA insurance fund and the interests of consumers and potential borrowers.

Respondents: 1,603.

Estimated Number of Respondents: 1,603.

Estimated Number of Responses: 80,000.

Frequency of Response: Occasionally.

Average Hours per Response: 3.41.

Total Estimated Burdens: $11,366,400.

B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in Section A on the following:

(1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) The accuracy of the agency's estimate of the burden of the proposed collection of information; (3) Ways to enhance the quality, utility, and clarity of the information to be collected; and (4) Ways to minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

HUD encourages interested parties to submit comment in response to these questions.

C. Authority

Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. Chapter 35.

Dated: November 10, 2016.

Janet M. Golrick,

Associate General Deputy Assistant Secretary for Housing Associate Deputy Federal Housing Commissioner.

Receipt of an Incidental Take Permit Application To Participate in the Amended American Burying Beetle Oil and Gas Industry Conservation Plan in Oklahoma

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability; request for public comments.

SUMMARY: Under the Endangered Species Act, as amended (Act), we, the U.S. Fish and Wildlife Service, invite the public to comment on an incidental take permit application for federally listed American burying beetle (ABB) take resulting from activities associated with oil and gas well field infrastructure geophysical exploration (seismic) and construction, maintenance, operation, repair, and decommissioning in Oklahoma. If approved, the permit would be issued under the approved *Amended Oil and Gas Industry Conservation Plan (ICP)Associated with Issuing Endangered Species Act Section 10(a)(1)(B) American Burying Beetle Permits Oklahoma.*

DATES: To ensure consideration, written comments must be received on or before December 22, 2016.

ADDRESSES: You may obtain copies of all documents and submit comments on the applicant's ITP application by one of the following methods. Please refer to the proposed permit number when requesting documents or submitting comments.

○ *U.S. Mail:* U.S. Fish and Wildlife Service, Division of Endangered Species—HCP Permits, P.O. Box 1306, Room 6034, Albuquerque, NM 87103.

○ *Electronically: fw2_hcp_permits@fws.gov.*

FOR FURTHER INFORMATION CONTACT: Marty Tuegel, Branch Chief, by U.S. mail at: U.S. Fish and Wildlife Service, Environmental Review Division, P.O. Box 1306, Room 6034, Albuquerque, NM 87103; or by telephone at 505–248–6651.

SUPPLEMENTARY INFORMATION:

Introduction

Under the Endangered Species Act, as amended (16 U.S.C. 1531 *et seq.;* Act), we, the U.S. Fish and Wildlife Service, invite the public to comment on an incidental take permit (ITP) application for federally listed ABB (*Nicrophorus americanus*) take resulting from oil and gas well field infrastructure geophysical exploration (seismic) and construction, maintenance, operation, repair, and decommissioning, as well as oil and gas gathering, transmission and distribution pipeline infrastructure construction, maintenance, operation, repair, decommissioning, and reclamation in Oklahoma. If approved, the permit would be issued to the applicant under the *Amended Oil and Gas Industry Conservation Plan (ICP) Associated with Issuing Endangered Species Act Section 10(a)(1)(B) American Burying Beetle Permits Oklahoma.* The original ICP was approved on May 21, 2014 (FONSI notice publication was on July 25, 2014; 79 FR 43504). The draft amended ICP was made available for comment on March 8, 2016 (81 FR 12113), and approved on April 13, 2016. The ICP and the associated environmental assessment/finding of no significant impact are available on the Web site at *http://www.fws.gov/southwest/es/oklahoma/ABBICP.* However, we are no longer taking comments on these finalized, approved documents.

Applications Available for Review and Comment

We invite local, State, Tribal, and Federal agencies, and the public to comment on the following application under the ICP, for incidental federally listed ABB take. Please refer to the appropriate permit number (*e.g.,* TE–123456) when requesting application documents and when submitting comments. Documents and other information the applicants have submitted with this application are available for review, subject to Privacy Act (5 U.S.C. 552a) and Freedom of Information Act (5 U.S.C. 552) requirements.

Permit TE11102C

Applicant: Performance Petroleum Company, Barnsdall, OK

Applicant requests an amended permit for oil and gas upstream and midstream production, including oil and gas well field infrastructure geophysical exploration (seismic) and construction, maintenance, operation, repair, and decommissioning, as well as of oil and gas gathering, transmission and distribution pipeline infrastructure construction, maintenance, operation, repair, decommissioning, and reclamation in Oklahoma.

Comments Publically Available

Written comments we receive become part of the public record associated with this action. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can request in your comment that we withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so. We will not consider anonymous comments. All submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, will be made available for public disclosure in their entirety.

Authority

We provide this notice under the Act (16 U.S.C. 1531 *et seq.*) section 10(c) and its implementing regulations (50 CFR 17.22) and the National Environmental Policy Act (42 U.S.C. 4321 *et seq.*) and its implementing regulations (40 CFR 1506.6).

Joy E. Nicholopoulos,

Acting, Regional Director, Southwest Region, U.S. Fish and Wildlife Service.

Endangered Species; Recovery Permit Applications

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of receipt of permit applications; request for comment.

SUMMARY: We, the U.S. Fish and Wildlife Service, invite the public to comment on applications for recovery permits to conduct activities with the purpose of enhancing the survival of endangered species. With some exceptions, the Endangered Species Act of 1973, as amended (Act), prohibits certain activities with endangered species unless a Federal permit allows such activity. The Act also requires that we invite public comment before issuing these permits.

DATES: To ensure consideration, please send your written comments by December 22, 2016.

ADDRESSES: Program Manager, Restoration and Endangered Species Classification, Ecological Services, U.S. Fish and Wildlife Service, Pacific Regional Office, 911 NE 11th Avenue, Portland, OR 97232–4181. Please refer to the permit number for the application when submitting comments.

FOR FURTHER INFORMATION CONTACT: Colleen Henson, Fish and Wildlife Biologist, at the above address, or by telephone (503–231–6131) or fax (503–231–6243).

SUPPLEMENTARY INFORMATION:

Background

The Act (16 U.S.C. 1531 *et seq.*) prohibits certain activities with respect to endangered and threatened species unless a Federal permit allows such activity. Along with our implementing regulations in the Code of Federal Regulations (CFR) at 50 CFR 17, the Act provides for certain permits, and requires that we invite public comment before issuing these permits for endangered species.

A permit granted by us under section 10(a)(1)(A) of the Act authorizes the permittee to conduct activities (including take or interstate commerce) with respect to U.S. endangered or threatened species for scientific purposes or enhancement of propagation or survival. Our regulations implementing section 10(a)(1)(A) of the Act for these permits are found at 50 CFR 17.22 for endangered wildlife

species, 50 CFR 17.32 for threatened wildlife species, 50 CFR 17.62 for endangered plant species, and 50 CFR 17.72 for threatened plant species.

Applications Available for Review and Comment

We invite local, State, and Federal agencies and the public to comment on the following applications. Please refer to the permit number for the application when submitting comments.

Documents and other information submitted with these applications are available for review by request from the Program Manager for Restoration and Endangered Species Classification at the address listed in the ADDRESSES section of this notice, subject to the requirements of the Privacy Act (5 U.S.C. 552a) and the Freedom of Information Act (5 U.S.C. 552).

Permit Number: TE–08598C

Applicant: The Institute for Bird Populations, Point Reyes Station, California

The applicant requests a new permit to take (survey, monitor, capture, handle, band, collect bio-samples, attach transmitters, and release) Friendly ground-dove (*Gallicolumba stairi*) in conjunction with research, survey, and population monitoring activities in American Samoa, for the purpose of enhancing the species' survival.

Permit Number: TE–04236C

Applicant: James W. Gore, Paragould, Arizona

The applicant requests a new permit to take (survey, monitor, identify roosts, capture, handle, measure, band, attach transmitters, and release) Hawaiian hoary bat (*Lasiurus cinereus semotus*) in conjunction with research, survey, and population monitoring activities in Hawai'I, for the purpose of enhancing the species' survival.

Permit Number: TE–146777

Applicant: Arleone Dibben-Young, Kaunakakai, Hawaii

The applicant requests a permit amendment to take (mark with leg flags, collect blood and feather samples) the ae'o or Hawaiian stilt (*Himantopus mexicanus knudseni*) on the island of Molokai, Hawai'i, for the purposes of scientific research and enhancing the species' survival.

Public Availability of Comments

All comments and materials we receive in response to this request will be available for public inspection, by appointment, during normal business hours at the address listed in the ADDRESSES section.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Authority

We provide this notice under section 10 of the Act (16 U.S.C. 1531 *et seq.*).

Theresa E Rabot,

Acting Regional Director, Pacific Region, U.S. Fish and Wildlife Service.

Proposed Habitat Conservation Plan and Draft Environmental Assessment for Streaked Horned Lark; Port of Portland Properties, Portland, Oregon

AGENCY: Fish and Wildlife Service, Interior

ACTION: Notice of availability; notice of permit application; request for comments.

SUMMARY: We, the U.S. Fish and Wildlife Service, have received an incidental take permit application from the Port of Portland pursuant to the Endangered Species Act of 1973, as amended (ESA). The requested permit would authorize the take of the streaked horned lark. The permit application includes a proposed habitat conservation plan (HCP) that describes the activities that would result in the incidental taking, and the measures the applicant will take to minimize and mitigate for the potential adverse impacts to streaked horned larks. We also announce the availability of a draft environmental assessment (EA) that has been prepared to evaluate the permit application in accordance with the requirements of the National Environmental Policy Act of 1969 (NEPA). We are making the permit application package, including the HCP, and draft EA available for public review and comment.

DATES: To ensure consideration, written comments must be received from interested parties no later than January 6, 2017.

ADDRESSES: To request further information or submit written comments, please use one of the following methods, and note that your information request or comments are in reference to the ''Port of Portland HCP.''

- *Internet:* Documents may be viewed on the Internet at *http://www.fws.gov/oregonfwo/.*
- *Email: PDXHCPcomments@fws.gov.* Include ''Port of Portland HCP'' in the subject line of the message or comments.
- *U.S. Mail:* State Supervisor, Oregon Fish and Wildlife Office, U.S. Fish and Wildlife Service; 2600 SE 98th Avenue, Suite 100; Portland, OR 97266.
- *Fax:* 503–231–6195, Attn: Port of Portland HCP.
- *In-Person Drop-off, Viewing, or Pickup:* Comments and materials received will be available for public inspection, by appointment (necessary for viewing or picking up documents only), during normal business hours at the Oregon Fish and Wildlife Office, U.S. Fish and Wildlife Service; 2600 SE 98th Avenue, Suite 100; Portland, OR 97266; telephone 503–231–6179. Written comments can be dropped off during regular business hours at the above address on or before the closing date of the public comment period (see DATES).

FOR FURTHER INFORMATION CONTACT: Richard Szlemp, U.S. Fish and Wildlife Service (see ADDRESSES); telephone: 503–231–6179; facsimile: 503–231–6195. If you use a telecommunications device for the deaf, please call the Federal Information Relay Service at 800–877–8339.

SUPPLEMENTARY INFORMATION: We have received an incidental take permit application from the Port of Portland pursuant to the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.;* ESA). The requested permit would authorize the take of the streaked horned lark (*Eremophila alpestris strigata*). The permit application includes a proposed habitat conservation plan (HCP) that describes the activities that would result in the incidental taking, and the measures the applicant will take to minimize and mitigate for the potential adverse impacts to streaked horned larks. We also announce the availability of a draft environmental assessment (EA) that has been prepared to evaluate the permit application in accordance with the requirements of the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.;* NEPA). We are making the permit application package,

including the HCP, and draft EA available for public review and comment.

Background

Section 9 of the ESA prohibits the take of fish and wildlife species listed as endangered or threatened under section 4 of the ESA. Under the ESA, the term ''take'' means to harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct (16 U.S.C. 1532(19)). The term ''harm,'' as defined in our regulations, includes significant habitat modification or degradation that results in death or injury to listed species by significantly impairing essential behavioral patterns, including breeding, feeding, or sheltering (50 CFR 17.3). The term ''harass'' is defined in our regulations as an intentional or negligent act or omission which creates the likelihood of injury to wildlife by annoying it to such an extent as to significantly disrupt normal behavioral patterns, which include, but are not limited to, breeding, feeding, or sheltering (50 CFR 17.3).

Under specified circumstances, we may issue permits that authorize take of federally listed species, provided the take is incidental to, but not the purpose of, an otherwise lawful activity. Regulations governing permits for threatened species are at 50 CFR 17.32. Section 10(a)(1)(B) of the ESA contains provisions for issuing such incidental take permits to non-Federal entities for the take of federally listed species, provided the following criteria are met:

(1) The taking will be incidental;

(2) The applicant will prepare a conservation plan that, to the maximum extent practicable, identifies the steps the applicant will take to minimize and mitigate the impact of such taking;

(3) The applicant will ensure that adequate funding for the plan will be provided;

(4) The taking will not appreciably reduce the likelihood of the survival and recovery of the species in the wild; and

(5) The applicant will carry out any other measures that we may require as being necessary or appropriate for the purposes of the plan

We listed the streaked horned lark as a threatened species on October 3, 2013 (78 FR 61452), with critical habitat, and established a special rule under section 4(d) of the ESA to exempt certain airport maintenance activities and operations, agricultural activities, and noxious weed control activities from the take prohibitions of the ESA. Historically, nesting habitat was found on western Oregon prairies, and on sandy beaches and spits along the Columbia and Willamette Rivers. Today, the streaked horned lark nests in a broad range of habitats, including native prairies, coastal dunes, fallow and active agricultural fields, wetland mudflats, sparsely vegetated edges of grass fields, recently planted Christmas tree farms with extensive bare ground, fields denuded by overwintering Canada geese, gravel roads or gravel shoulders of lightly traveled roads, airports, and dredge deposition sites in the lower Columbia River. Wintering streaked horned larks use habitats that are very similar to breeding habitats.

Proposed Action

We propose to approve the HCP and to issue a permit with a term of 30 years to the Port of Portland for incidental take of streaked horned larks caused by covered activities, if permit issuance criteria are met. The Port of Portland owns and manages lands occupied by nesting and wintering streaked horned larks, including undeveloped lands within the Rivergate Industrial District (Rivergate) and at the Portland International Airport (PDX), including the PDX Intermediate Zone and Southwest Quadrant (SW Quad), collectively, the project areas. Incidental take of up to a total of 46 streaked horned lark nesting pairs over a 30-year permit term may occur. Incidental take would be associated with future commercial and industrial land development within the project areas, as well as aviation wildlife hazard management activities within the PDX Intermediate Zone and SW Quad. The Port of Portland would create the Sandy Island Conservation Area to mitigate for the anticipated take of streaked horned lark.

The Rivergate Project Area is located within the Rivergate Industrial District in Portland, Oregon, on the peninsula in north Portland bordered by the Columbia River, the Willamette River, and their confluence. The Rivergate Industrial District is Portland's largest industrial park, including 2,800 acres of warehousing, distribution, manufacturing, and processing facilities. The land itself was created or improved for development by the Port with the placement of fill material (mostly sandy dredged material) to elevate building sites to the surrounding grade and provide a substrate suitable for development. The Rivergate Project Area consists of approximately 120.5 acres across six undeveloped parcels that are scattered among other developed parcels within the industrial district, of which approximately 40.7 acres is considered suitable habitat for the streaked horned lark. The Rivergate parcels are bordered by roads, rail lines, parking lots, industrial buildings, and the Columbia Slough.

The creation of suitable habitat for streaked horned larks at Rivergate was an unintended consequence of the development of the Rivergate Industrial Park and the Port of Portland's ongoing use and maintenance of the site. The Port of Portland's preparation of building sites within the Rivergate Industrial Park, including the parcels of the Rivergate Project Area, created large open areas with exposed soils that have proved to be attractive to the streaked horned lark. These conditions have been largely maintained by routine site management, such as occasional mowing and discing, to keep parcels ready for development and to generally reduce seasonal fire hazards within the industrial district. This site is planned to be developed for industrial use within one to two years. Most of the Port of Portland's aviation wildlife hazard management activities occur within the 4,867-acre PDX Intermediate Zone comprising:

- The area within the airfield perimeter fence, a 300-foot buffer around the perimeter fence, and runway protection zones (together, the Primary Zone); and
- Port of Portland owned airport land outside of the Primary Zone, much of which is under the approach or transitional surfaces of the runways.

Land management decisions within the Primary Zone are subject to the single dedicated land use of operating an airport and the associated public aviation safety concerns. The Port of Portland's land management objectives for the remainder of the PDX Intermediate Zone are similar and land uses in this area are intended to be compatible with aviation public safety. Throughout the PDX Intermediate Zone, wildlife management is critical to airport safety and the Port of Portland designs and implements its Federal Aviation Administration approved wildlife hazard management plan with the objective of eliminating or reducing to the extent practicable all attractants for wildlife species of aviation concern, including streaked horned larks.

Most of the PDX Intermediate Zone is either developed or paved or is regularly mowed or disced to maintain low, sparse herbaceous cover or bare ground. This regular maintenance to eliminate or reduce aviation wildlife hazards, in accordance with the wildlife hazard management plan, promotes conditions consistent with suitable streaked horned lark habitat. Most of the undeveloped upland portions of the PDX

Intermediate Zone have the potential to be used by streaked horned larks, although the specific extent of currently suitable streaked horned lark habitat within the PDX Intermediate Zone is unknown.

The SW Quad is an approximately 204.7-acre open field within the PDX Intermediate Zone and immediately adjacent to PDX runways and taxiways. For this reason, the SW Quad is an optimal location for future PDX airport infrastructure. The SW Quad is also bordered by paved roads, other PDX commercial buildings, and open space lands associated with the Riverside Country Club and the Broadmoor Golf Course.

Historically, the SW Quad contained extensive wetlands. However, the Port of Portland filled these wetlands (in accordance with applicable regulations) between 1994 and 2005 and installed a perforated pipe drainfield to prevent the recurrence of wetland habitat attractive to wildlife species of concern to aviation safety. The SW Quad is currently an open expanse of mostly barren fill material with sparse herbaceous weedy plants. Much of the SW Quad is mowed or disced annually to deter and discourage avian species of concern to aviation safety from the airfield and surrounding properties and to reduce the risk of wildlife/aircraft collisions; however, this management inadvertently created and currently maintains suitable streaked horned lark habitat. Of the 204.7 acres at the SW Quad, approximately 77 acres are considered suitable habitat for the streaked horned lark. This site is anticipated to be developed about 20 or more years from now.

Sandy Island is located in the Columbia River at River Mile 75.8, directly across from the public boat ramp at the Port of Kalama in unincorporated Columbia County, Oregon. Sandy Island is composed of approximately 340 acres. Approximately 312 acres of Sandy Island is human-made by historic and current dredged material placement. This portion of the island is owned by the Oregon Department of State Lands (DSL). The original island landform is approximately 28 acres and is in private ownership. Because Sandy Island is within waters of the state, DSL regulates the natural resources of the island. Sandy Island is open to the public and accessible by boat.

The proposed Sandy Island Conservation Area consists of piled dredged sand with a relatively flat, sparsely vegetated plateau. The plateau is perched 40 to 50 feet above the shoreline and includes a small grove of approximately 20 black cottonwood (*Populus trichocarpa*) trees and a small depression along the northern portion of the site. Vegetation is partly sparse and the land cover is a mosaic of bare sand, grasses, forbs, invasive Scot's broom (*Cytisus scoparius*) shrubs, mosses, and lichens, but also transitions abruptly to forested wetlands and riparian habitat. The repeated placement of dredged material at the proposed Sandy Island Conservation Area, with the most recent depositions occurring between 1997 and 2011, created habitat for the streaked horned lark that has been occupied by three to five nesting pairs in recent years.

No additional dredged material placement is anticipated, as this site is considered to be full. Without recurring site disturbance and/or vegetation management, natural succession of the vegetation will degrade existing streaked horned lark habitat and is expected to cause the loss of suitable habitat at this site in the near future. The 32.0 acres of the proposed Sandy Island Conservation Area is designated critical habitat for the streaked horned lark.

Proposed mitigation measures consist of the Port of Portland refraining from conducting vegetation management within Rivergate, the SW Quad, and the proposed Sandy Island Conservation Area during the streaked horned lark nesting season (April 1 to August 31) to avoid directly killing or wounding individuals or causing nest abandonment. Interim conservation measures consist of the reinstatement or continuation of occasional mowing or discing at Rivergate, and continued implementation of similar activities at SW Quad for existing streaked horned lark habitat. The Port of Portland will also continue to mow roadside perimeters and will maintain Jersey barriers currently in place as an interim conservation measure at Rivergate to prevent unwarranted site access and to reduce the risk of fire. These activities satisfy the Port of Portland's needs to properly maintain its properties, but incidentally benefit the streaked horned lark by maintaining the characteristics of suitable habitat at Rivergate and the SW Quad until development occurs. The conservation benefit of this routine site management allows Rivergate and the SW Quad to maintain more habitat for use by streaked horned larks over the duration of the incidental take permit than would likely be achieved in the absence of these activities.

The Port of Portland will enter into a 30-year term conservation easement on the Sandy Island Conservation Area with DSL. Immediately following the issuance of the incidental take permit, the Port of Portland will provide for the protection, management, and monitoring of approximately 32 acres of currently suitable and restorable streaked horned lark habitat at the proposed Sandy Island Conservation Area to maintain and attract additional nesting streaked horned larks as added mitigation for the impacts of the requested incidental taking of streaked horned larks.

National Environmental Policy Act Compliance

The proposed issuance of a section 10(a)(1)(B) permit under the Act is a Federal action that triggers the need for compliance with NEPA. We have prepared a draft EA to analyze the environmental impacts of two alternatives related to the issuance of a permit and implementation of the conservation program under the proposed HCP. The two alternatives are the No Action alternative and the proposed action (see Proposed Action described above). We also considered several other alternatives that are briefly described in the draft EA but dismissed them from detailed analysis for the reasons described in the draft EA.

Under the No Action alternative, an incidental take permit would not be issued by the Service, and the Port of Portland's proposed HCP would not be approved. Any incidental take outside the 4(d) Special Rule exemption would not be authorized and the Port of Portland would assume all legal risks for unauthorized take without an incidental take permit.

Under the No Action Alternative, the Port of Portland would not use the project areas in a way that would result in the incidental taking of streaked horned larks outside activities covered under the 4(d) Special Rule Exemption. The Port of Portland has unintentionally created suitable streaked horned lark habitat within the Project Areas. The Port of Portland would cease active site management contributing to the creation of suitable streaked horned lark habitat, and allow the Project Areas to naturally transition out of suitable habitat as vegetation increases in density and height. Once streaked horned larks no longer breed on site at Rivergate, and streaked horned larks do not occupy the area, the Port of Portland would move forward in developing the parcels. The Port of Portland would continue to rely on the authority of the 4(d) Special Rule to continue aviation wildlife hazard management activities on SW Quad, likely changing the type of management strategies to those that do not favor the creation or maintenance of streaked

horned lark habitat. It is expected that streaked horned larks would leave the site before development of the SW Quad occurs. The Port of Portland would not establish the Sandy Island Conservation Area to provide conservation benefits to streaked horned larks. Without active site management to maintain and improve suitable streaked horned lark habitat at this site, increasing levels of encroaching vegetation would naturally transition out of suitable and occupied habitat.

Public Comments

You may submit your comments and materials by one of the methods listed in the **ADDRESSES** section. We request data, comments, new information, or suggestions from the public, other concerned governmental agencies, the scientific community, Tribes, industry, or any other interested party on our proposed Federal action.

Public Availability of Comments

All comments and materials we receive become part of the public record associated with this action. Before including your address, phone number, email address, or other personal identifying information in your comments, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so. All submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, will be made available for public disclosure in their entirety. Comments and materials we receive, as well as supporting documentation, will be available for public inspection by appointment, during normal business hours, at our Oregon Fish and Wildlife Office (see **ADDRESSES**).

Next Steps

After considering public comments, we will make a decision regarding whether the proposed HCP and draft EA meet the requirements of section 10(a)(1)(B) of the ESA and the requirements of NEPA. We will not make a final decision on our proposed action until after the end of the 45-day public comment period on this notice, and we will fully consider all comments we receive during the public comment period. If we determine that all the requirements are met, we would issue the incidental take permit under the authority of section 10(a)(1)(B) of the ESA and sign a finding of no significant impact following the requirements of NEPA.

Authority

We provide this notice in accordance with the requirements of section 10(c) of the ESA (16 U.S.C. 1531 *et seq.*), and NEPA (42 U.S.C. 4321 *et seq.*) and their implementing regulations (50 CFR 17.32, and 40 CFR 1506.6, respectively).

Theresa Rabot,

Deputy Regional Director, Pacific Region, U.S. Fish and Wildlife Service, Portland, Oregon.

BILLING CODE 4333–15–P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[MTM 109072]

Notice of Application for Withdrawal and Notification of Public Meeting; Montana

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The United States Forest Service (USFS) has filed an application with the Bureau of Land Management (BLM) requesting that the Secretary of the Interior withdraw, for a 20-year term, approximately 30,370 acres of National Forest System lands from location and entry under the United States mining laws, but not from leasing under mineral and geothermal laws. The purpose of the withdrawal is to protect and preserve the scenic integrity, important wildlife corridors, and high quality recreation values of the Emigrant Crevice area located in the Custer Gallatin National Forest, Park County, Montana. Publication of this notice temporarily segregates the lands for up to 2 years from location and entry under the United States mining laws while the withdrawal application is being processed. The lands have been and will remain open to such forms of disposition as may be allowed by law on National Forest System lands, and to leasing under the mineral and geothermal leasing laws. This notice also gives the public an opportunity to comment on the withdrawal application, and announces the date, time and location of the public meeting.

DATES: Comments must be received by February 21, 2017. The USFS will hold a public meeting in connection with the proposed withdrawal on January 18, 2017.

ADDRESSES: Comments should be sent to the Forest Supervisor, Custer Gallatin National Forest, P.O. Box 130, 10 East Babcock Avenue, Bozeman, Montana 59771; or the Bureau of Land Management, Montana State Office (MT924), 5001 Southgate Drive, Billings, Montana 59101.

FOR FURTHER INFORMATION CONTACT: Mary Erickson, Forest Supervisor, Custer Gallatin National Forest, 406–587–6949 or Deborah Sorg, BLM Montana/Dakotas State Office, 406–896–5045 during regular business hours, 8:00 a.m. to 4:30 p.m. Monday through Friday, except holidays. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Relay Service at 1–800–877–8339 to contact either of the above individuals. The Service is available 24 hours a day, 7 days a week, to leave a message or question. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: The applicant is the USFS. The application requests the Secretary of the Interior to withdraw, subject to valid existing rights, the following described lands from location and entry under the United States mining laws, but not from leasing under the mineral and geothermal leasing laws, for a period of 20 years, to protect and preserve the area for its scenic integrity, important wildlife corridors, and high quality recreation values. Portions of these lands are unsurveyed and the acres were obtained from protraction diagrams or calculated using the Geographic Information System.

M.S. No. 9035, that portion not within the Absaroka-Beartooth Wilderness;
M.S. Nos. 9681, 9771, 9906, and 10774.

Wormsbecker Boundary Adjustment Tract, Certificate of Survey No. 792BA, filed in Park County, Montana, July 22, 1985, Document No. 186782.

The areas described aggregate approximately 1,668 acres in Park County.

The purpose of the requested withdrawal is to protect and preserve the areas scenic integrity, important wildlife corridors, and high quality recreation values. The use of a right-of-way, interagency agreement, or cooperative agreement would not adequately constrain non-discretionary uses and would not provide adequate protection for these areas.

No alternative sites are feasible because the lands subject to the withdrawal application are the lands for which protection is sought from the impacts of exploration and development under the United States mining laws. No water will be needed to fulfill the purpose of the requested withdrawal.

Records related to the application may be examined by contacting either of the individuals listed in the **FOR FURTHER INFORMATION CONTACT** section above.

For a period until February 21, 2017, all persons who wish to submit comments, suggestions, or objections in connection with the withdrawal application may present their views in writing to the Forest Supervisor, Custer Gallatin National Forest at the address noted above. Comments, including names and street addresses of respondents, will be available for public review at the address indicated above during regular business hours.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Notice is hereby given that a public meeting in connection with the application for withdrawal will be held at the Shane Center, 415 E Lewis St., Livingston, Montana 59407 on January 18, 2017 from 4–7 p.m. The USFS will publish a notice of the time and place in a local newspaper at least 30 days before the scheduled date of the meeting.

For a period until *November 23, 2018,* subject to valid existing rights, the National Forest System lands described in this notice will be segregated from location and entry under the United States mining laws, unless the application is denied or canceled or the withdrawal is approved prior to that date. All other activities currently consistent with the Forest plan could continue, including public recreation and other activities compatible with preservation of the character of the area, subject to discretionary approval, during the temporary segregation period.

The application will be processed in accordance with the regulations set forth in 43 CFR part 2300.

Kimberly O. Prill,

Chief, Branch of Realty, Lands and Renewable Energy.

Information Collection Request Sent to the Office of Management and Budget (OMB) for Approval; Natural Sounds/Quiet Valuation Survey: Focus Group Pre-Test

AGENCY: National Park Service, Interior.

ACTION: Notice; request for comments.

SUMMARY: We (National Park Service, NPS) have sent an Information Collection Request (ICR) to OMB for review and approval. We summarize the ICR below and describe the nature of the collection and the estimated respondent burden. As required by the Paperwork Reduction Act of 1995 and as part of our continuing efforts to reduce paperwork and respondent burden, we invite the general public and other Federal agencies to take this opportunity to comment on this IC. This collection is scheduled to expire on November 30, 2016. We may not conduct or sponsor and you are not required to respond to a collection of information unless it displays a currently valid OMB control number.

DATES: To ensure that your comments on this ICR are considered, OMB must receive them on or before December 22, 2016.

ADDRESSES: Please direct all written comments on this ICR directly to the Office of Management and Budget (OMB) Office of Information and Regulatory Affairs, Attention: Desk Officer for the Department of the Interior, to *OIRA_Submission@omb.eop.gov* (email) or 202–395–5806 (fax); and identify your submission as ''1024–0296 NATSOUND''. Please also send a copy of your comments to Phadrea Ponds, Information Collection Coordinator, National Park Service, 1201 Oakridge Drive, Fort Collins, CO 80525 (mail); or *phadrea_ponds@nps.gov* (email). Please reference Information Collection ''1024–0296 NATSOUND'' in the subject line. You may also access this ICR at *www.reginfo.gov.* Follow the instructions to review Department of the Interior collections under review by OMB.

FOR FURTHER INFORMATION CONTACT: Frank Turina, Night Skies and Natural Sounds Division, National Park Service, 1201 Oakridge Drive, Fort Collins, Colorado 80525 (mail); *Frank_Turina@nps.gov* (email). Please reference Information Collection ''1024–0296 NATSOUND'' in the subject line.

SUPPLEMENTARY INFORMATION:

I. Abstract

Under the Organic Act of 1916 (54 U.S.C.100701), the NPS is charged with conserving the scenery, natural and historic objects, and wildlife in its units. The acoustical environment or soundscape is a fundamental aspect of NPS units and critical to visitors' interaction with and interpretation of said resources. While the NPS has policies in place to monitor and manage acoustical conditions, it does not have information on how visitors value preserving natural sounds and/or reducing noise impacts. We are planning to conduct a stated-preference survey of visitors, however additional testing is needed to ensure that the future results are as reliable as possible.

Between 2011 and 2014, researchers at the U.S. Department of Transportation Volpe Center (DOT) requested and received OMB approval (OMB Control Number 1024–0269) to conduct a series of focus groups to pre-test materials for a stated-preference valuation study designed to estimate values for maintaining and enhancing natural soundscapes. The findings from the study indicated that in order to advance the project, another expert panel should be convened to determine how to address the issues raised by the focus groups. A subsequent peer review of this work commissioned by Night Skies and Natural Sounds Division (NSNSD) indicated that fundamental aspects of the survey, notably the framing, presentation and format of the valuation scenario, required restructuring. The purpose of this ICR is to request approval to continue survey development and pre-testing activities that were initiated in 2013. This continuation will involve a series of eight focus groups in two NPS units (four per unit). The intent of the focus groups is to refine and test existing survey materials. Specifically, previous pre-testing efforts indicated that further refinement and testing of stated-preference questions was necessary. Best practice guidelines in the conduct of stated-preference studies require that survey content, language and instructions be clearly understood by respondents. Failure to continue testing the instrument could possibly compromise the accuracy of information collected through the survey when it is implemented

II. Data

OMB Control Number: 1024–0269.

Title: Natural Sounds/Quiet Valuation Survey.

Type of Request: Renewal of a currently approved collection.

Affected Public: Park visitors; individual and general households.

Respondent Obligation: Voluntary.

Frequency of Collection: One time.

Estimated Number of Annual Responses: 80 respondents. This collection will involve eight two-hour focus group sessions. We estimate that each group will have at most 10 participants.

Annual Burden Hours: 160 hours; two hours per respondent.

Estimated Annual Reporting and Recordkeeping ''Non-Hour Cost'': None.

III. Comments

A Notice was published in the **Federal Register** (81 FR 63492) on September 15, 2016, stating that we intended to request OMB approval of our information collection described above. In that Notice, we solicited public comment for 60 days ending November 23, 2013. We received the following two substantive comments in response to that Notice:

Comment #1 received October 31, 2016. ''I have reviewed the National Park Service's (NPS) Proposed Information Collection; Natural Sounds/Quiet Valuation Survey, notice and request for comments that appeared in the September 15, 2016 **Federal Register** (81 FR 63492). According to the notice, the NPS plans to conduct a stated-preference survey of visitors in two park units in order to estimate individual values for maintenance of improvement of acoustical conditions within a national park setting, including a series of focus groups in two NPS units. This ''sampling'' of two NPS units is far too small for the NPS to determine park users objections to noise inflected on our National Parks. In particular, Olympic National Park and Olympic National Forest continue to be adversely impact by U.S. Navy jets (*http://blog.seattlepi.com/seattlepolitics/2015/05/11/is-noise-from-navy-jets-a-threat-to-olympic-national-park-kilmer-wants-soundings/*). In addition, the Navy has proposed expanded its electronic warfare testing over Olympic National Park and Olympic National Forest (*http://www.military.com/daily-news/2015/11/09/navy-olympic-national-park-look-jet-noise.html*). In summary, the NPS proposed information collection will be woefully inadequate unless it includes Olympic National Park users.''

NPS response on October 31, 2016: ''Thank you for your response to the 60 day **Federal Register** Notice (81 FR 63492) dated September 15, 2016 for the Proposed Information Collection: Natural Sounds/Quiet Valuation Survey. To be clear, this request is not for the final study on this topic. This request is for sole purpose of conducting a series of focus groups at two National Parks. These focus groups will be used test the reliability and to validate the question we intend to use in the final version of the survey. In order to conduct these focus groups the request must receive OMB; therefore a **Federal Register** Notice is required. The questions will be calibrated as a result of the focus groups. We will not conduct a ''full''

survey until the questions are peer reviewed and deemed reliable by a panel of non-NPS social scientists. The final version of the survey will be submitted to OMB for review and a separate **Federal Register** Notice will be published at that time. Neither the date nor the parks to be used in the study have been determined. Thank you again and your comment and our response will be reported to OMB in our request for approval—of the focus groups.''

Comment #2 from the American Motorcyclist Association dated November 3, 2016 (received by postal mail November 7, 2016): This comment addressed the following issues: (1) Whether additional data collection is necessary, and a request for consultation in drafting language for policies addressing excessive noise; (2) A recommendation to measure vehicle noise levels according to established methods, and to consider the implications of alternative study funding sources; and, (3) A request to consider alternative data collection modes that may be less burdensome to visitors such as internet administration or mail-back postcards.

NPS response on November 8, 2016: Further refinement and testing of survey materials is necessary because previous focus group results, and an expert peer review, indicated that fundamental aspects of the valuation scenario and questionnaire were not functioning properly. No new noise measurement efforts will be conducted in conjunction with this study. Rather, existing recordings will be utilized to test respondent sensitivity to noise, and elicit a value for reducing or eliminating noises. To ensure that these audio recordings are properly and consistently administered to visitors in the full survey, it will be necessary to intercept them in the park units. NPS will take whatever measures are feasible to minimize respondent burden in the full survey.

We again invite comments concerning this information collection on:

- Whether the proposed collection of information is necessary for the agency to perform its duties, including whether the information is useful;
- The accuracy of the agency's estimate of the burden of the proposed collection of information;
- Ways to enhance the quality, usefulness, and clarity of the information to be collected; and
- Ways to minimize the burden on the respondents, including the use of automated collection techniques or other forms of information technology.

Comments that you submit in response to this notice are a matter of public record. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment, including your personal identifying information, may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Dated: November 16, 2016.

Madonna L. Baucum,

Information Collection Clearance Officer, National Park Service.

BILLING CODE 4312–52–P

DEPARTMENT OF THE INTERIOR

Bureau of Ocean Energy Management

[MMAA104000]

Final Programmatic Environmental Impact Statement for the 2017–2022 Outer Continental Shelf (OCS) Oil and Gas Leasing Program

AGENCY: Bureau of Ocean Energy Management (BOEM), Interior.

ACTION: Notice of availability.

SUMMARY: BOEM announces the availability of the Final 2017–2022 OCS Oil and Gas Leasing Program Programmatic Environmental Impact Statement (Programmatic EIS) to inform the 2017–2022 Proposed Final Program. The Final Programmatic EIS provides a discussion of potential impacts of the proposed action, provides an analysis of reasonable alternatives to the proposed action, and recognizes BOEM's preferred alternative. Under Council on Environmental Quality (CEQ) regulations at 40 CFR 1506.10(b)(2), the Secretary of the Interior will not finalize the 2017–2022 OCS Oil and Gas Leasing Program until at least 30 days after publication of the Final Programmatic EIS.

FOR FURTHER INFORMATION CONTACT: Jill Lewandowski, Ph.D., Bureau of Ocean Energy Management, 45600 Woodland Road VAM–OEP, Sterling, VA 20166. Dr. Lewandowski may also be reached by telephone at (703) 787–1703.

SUPPLEMENTARY INFORMATION: A Draft Programmatic EIS was published on March 18, 2016, with a 45-day public comment period that ended on May 2, 2016. BOEM considered all comments submitted on the Draft Programmatic EIS during preparation of the Final Programmatic EIS. Persons interested in obtaining the Final Programmatic EIS, OCS EIS/EA BOEM 2016–060, can download it from *www.boemoceaninfo.com,* or may contact BOEM at the address and phone number provided above to request a paper copy or a CD–ROM version. Please specify if you wish a CD–ROM or paper copy. If neither is specified, a CD–ROM containing the Final Programmatic EIS will be provided. The Final Programmatic EIS will also be available at libraries in states adjacent to the proposed lease sales. These libraries are listed at *www.boemoceaninfo.com.*

Authority: This Notice of Availability of a Final Programmatic EIS is in compliance with the National Environmental Policy Act of 1969, as amended (Pub. L. 91–190, 42 U.S.C. 4231 *et seq.*), and is published pursuant to 40 CFR 1506.6.

Dated: November 3, 2016.

Abigail Ross Hopper,

Director, Bureau of Ocean Energy Management.

INTERNATIONAL BOUNDARY AND WATER COMMISSION, UNITED STATES AND MEXICO

United States Section

Notice of Availability of a Draft Environmental Assessment for Alamito and Terneros Sediment and Vegetation Removal Below Presidio Flood Control Project, Presidio, Texas

AGENCY: United States Section, International Boundary and Water Commission, United States and Mexico.

ACTION: Notice of availability of the draft Environmental Assessment (EA).

SUMMARY: Pursuant to Section 102(2)(c) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Final Regulations (40 CFR parts 1500 through 1508); and the United States Section, Operational Procedures for Implementing Section 102 of NEPA, published in the **Federal Register** September 2, 1981, (46 FR 44083); the United States Section hereby gives notice that the Draft Environmental Assessment for Alamito and Terneros Sediment and Vegetation Removal below Presidio Flood Control Project, Presidio, Texas is available. An environmental impact statement will not be prepared unless additional information which may affect this decision is brought to our attention within 30-days from the date of this Notice.

FOR FURTHER INFORMATION CONTACT: Gilbert Anaya, Division Chief, Environmental Management Division; United States Section, International Boundary and Water Commission; 4171 N. Mesa, C–100; El Paso, Texas 79902. Telephone: (915) 832–4702, email: *Gilbert.Anaya@ibwc.gov.*

Background: This Draft Environmental Assessment analyzes the potential impacts of removing accumulated sediment from Alamito and Terneros Creeks at their confluence with the Rio Grande and removal of vegetation along the United States side of the Rio Grande between Brito Creek and Terneros Creek in Presidio County, Texas.

Availability: The electronic version of the Draft EA is available from the USIBWC Web page: *www.ibwc.gov/Organization/Environmental/EIS_EA_Public_Comment.html.*

Dated: November 4, 2016.

Rebecca A. Rizzuti,

Assistant Legal Advisor.

BILLING CODE 7010–01–P

INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 731–TA–1082–1083 (Second Review)]

Chlorinated Isocyanurates From China and Spain

Determinations

On the basis of the record[1] developed in the subject five-year reviews, the United States International Trade Commission (''Commission'') determines, pursuant to the Tariff Act of 1930 (''the Act''), that revocation of the antidumping duty orders on chlorinated isocyanurates from China and Spain would be likely to lead to continuation or recurrence of material injury to an industry in the United States within a reasonably foreseeable time.

Background

The Commission, pursuant to section 751(c) of the Act (19 U.S.C. 1675(c)), instituted these reviews on September 1, 2015 (80 FR 52789) and determined on December 7, 2015 that it would conduct full reviews (80 FR 79358, December 21, 2015).

Notice of the scheduling of the Commission's reviews and of a public hearing to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publishing the notice in the **Federal Register** on April 20, 2016 (81 FR 23328). The hearing was held in Washington, DC, on September 13, 2016, and all persons who requested the opportunity were permitted to appear in person or by counsel.

The Commission made these determinations pursuant to section 751(c) of the Act (19 U.S.C. 1675(c)). It completed and filed its determinations in these reviews on November 16, 2016. The views of the Commission are contained in USITC Publication 4646 (November 2016), entitled *Chlorinated Isocyanurates from China and Spain: Investigation Nos. 731–TA–1082–1083 (Second Review).*

By order of the Commission.

Issued: November 16, 2016.

Lisa R. Barton,

Secretary to the Commission.

[FR Doc. 2016–27990 Filed 11–21–16; 8:45 am]

BILLING CODE 7020–02–P

[1] The record is defined in sec. 207.2(f) of the Commission's Rules of Practice and Procedure (19 CFR 207.2(f)).

NUCLEAR REGULATORY COMMISSION

[NRC–2016–0239]

Biweekly Notice: Applications and Amendments to Facility Operating Licenses and Combined Licenses Involving No Significant Hazards Considerations

AGENCY: Nuclear Regulatory Commission.

ACTION: Biweekly notice.

SUMMARY: Pursuant to Section 189a. (2) of the Atomic Energy Act of 1954, as amended (the Act), the U.S. Nuclear Regulatory Commission (NRC) is publishing this regular biweekly notice. The Act requires the Commission to publish notice of any amendments issued, or proposed to be issued, and grants the Commission the authority to issue and make immediately effective any amendment to an operating license or combined license, as applicable, upon a determination by the Commission that such amendment involves no significant hazards consideration, notwithstanding the pendency before the Commission of a request for a hearing from any person.

This biweekly notice includes all notices of amendments issued, or proposed to be issued, from October 25 to November 7, 2016. The last biweekly notice was published on November 8, 2016.

DATES: Comments must be filed by December 22, 2016. A request for a hearing must be filed by January 23, 2017.

ADDRESSES: You may submit comments by any of the following methods (unless this document describes a different method for submitting comments on a specific subject):

- *Federal Rulemaking Web site:* Go to *http://www.regulations.gov* and search for Docket ID NRC–2016–0239. Address questions about NRC dockets to Carol Gallagher; telephone: 301–415–3463; email: *Carol.Gallagher@nrc.gov.* For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.
- *Mail comments to:* Cindy Bladey, Office of Administration, Mail Stop: OWFN–12–H08, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001.

For additional direction on obtaining information and submitting comments, see ''Obtaining Information and Submitting Comments'' in the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: Beverly Clayton, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–3475, email: *Beverly.Clayton@nrc.gov.*

SUPPLEMENTARY INFORMATION:

I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC–2016–0239, facility name, unit number(s), plant docket number, application date, and subject when contacting the NRC about the availability of information for this action. You may obtain publicly-available information related to this action by any of the following methods:

- *Federal Rulemaking Web site:* Go to *http://www.regulations.gov* and search for Docket ID NRC–2016–0239.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly-available documents online in the ADAMS Public Documents collection at *http://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''*ADAMS Public Documents*'' and then select ''*Begin Web-based ADAMS Search.*'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to *pdr.resource@nrc.gov.*
- *NRC's PDR:* You may examine and purchase copies of public documents at

the NRC's PDR, Room O1–F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

B. Submitting Comments

Please include Docket ID NRC–2016–0239, facility name, unit number(s), plant docket number, application date, and subject in your comment submission.

The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC will post all comment submissions at *http://www.regulations.gov* as well as enter the comment submissions into ADAMS. The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment submissions into ADAMS.

II. Notice of Consideration of Issuance of Amendments to Facility Operating Licenses and Combined Licenses and Proposed No Significant Hazards Consideration Determination

The Commission has made a proposed determination that the following amendment requests involve no significant hazards consideration. Under the Commission's regulations in § 50.92 of title 10 of the *Code of Federal Regulations* (10 CFR), this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated, or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. The basis for this proposed determination for each amendment request is shown below.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination.

Normally, the Commission will not issue the amendment until the expiration of 60 days after the date of publication of this notice. The Commission may issue the license amendment before expiration of the 60-day period provided that its final determination is that the amendment involves no significant hazards consideration. In addition, the Commission may issue the amendment prior to the expiration of the 30-day comment period if circumstances change during the 30-day comment period such that failure to act in a timely way would result, for example in derating or shutdown of the facility. If the Commission takes action prior to the expiration of either the comment period or the notice period, it will publish in the **Federal Register** a notice of issuance. If the Commission makes a final no significant hazards consideration determination, any hearing will take place after issuance. The Commission expects that the need to take this action will occur very infrequently.

A. Opportunity To Request a Hearing and Petition for Leave To Intervene

Within 60 days after the date of publication of this notice, any persons (petitioner) whose interest may be affected by this action may file a request for a hearing and a petition to intervene (petition) with respect to the action. Petitions shall be filed in accordance with the Commission's ''Agency Rules of Practice and Procedure'' in 10 CFR part 2. Interested persons should consult a current copy of 10 CFR 2.309, which is available at the NRC's PDR, located at One White Flint North, Room O1–F21, 11555 Rockville Pike (first floor), Rockville, Maryland 20852. The NRC's regulations are accessible electronically from the NRC's Library on the NRC's Web site at *http://www.nrc.gov/reading-rm/doc-collections/cfr/.* If a petition is filed within 60 days, the Commission or a presiding officer designated by the Commission or by the Chief Administrative Judge of the Atomic Safety and Licensing Board Panel, will rule on the petition; and the Secretary or the Chief Administrative Judge of the Atomic Safety and Licensing Board Panel will issue a notice of a hearing or an appropriate order.

As required by 10 CFR 2.309, a petition shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following general requirements: (1) The name, address, and telephone number of the petitioner; (2) the nature of the petitioner's right under the Act to be made a party to the proceeding; (3) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (4) the possible effect of any decision or order which may be entered in the proceeding on the petitioner's interest. The petition must also set forth the specific contentions which the petitioner seeks to have litigated at the proceeding.

Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner shall provide a brief explanation of the bases for the contention and a concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to rely to establish those facts or expert opinion to support its position on the issue. The petition must include sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to matters within the scope of the proceeding. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to satisfy these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing with respect to resolution of that person's admitted contentions consistent with the NRC's regulations, policies, and procedures.

Petitions for leave to intervene must be filed no later than 60 days from the date of publication of this notice. Requests for hearing, petitions for leave to intervene, and motions for leave to file new or amended contentions that are filed after the 60-day deadline will not be entertained absent a determination by the presiding officer that the filing demonstrates good cause by satisfying the three factors in 10 CFR 2.309(c)(1)(i) through (iii).

If a hearing is requested, and the Commission has not made a final determination on the issue of no significant hazards consideration, the Commission will make a final determination on the issue of no

significant hazards consideration. The final determination will serve to decide when the hearing is held. If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment. If the final determination is that the amendment request involves a significant hazards consideration, then any hearing held would take place before the issuance of any amendment unless the Commission finds an imminent danger to the health or safety of the public, in which case it will issue an appropriate order or rule under 10 CFR part 2.

A State, local governmental body, Federally-recognized Indian Tribe, or agency thereof, may submit a petition to the Commission to participate as a party under 10 CFR 2.309(h)(1).

The petition should state the nature and extent of the petitioner's interest in the proceeding. The petition should be submitted to the Commission by January 23, 2017. The petition must be filed in accordance with the filing instructions in the ''Electronic Submissions (E-Filing)'' section of this document, and should meet the requirements for petitions set forth in this section, except that under 10 CFR 2.309(h)(2) a State, local governmental body, or Federally-recognized Indian Tribe, or agency thereof does not need to address the standing requirements in 10 CFR 2.309(d) if the facility is located within its boundaries. A State, local governmental body, Federally-recognized Indian Tribe, or agency thereof may also have the opportunity to participate under 10 CFR 2.315(c).

If a hearing is granted, any person who does not wish, or is not qualified, to become a party to the proceeding may, in the discretion of the presiding officer, be permitted to make a limited appearance pursuant to the provisions of 10 CFR 2.315(a). A person making a limited appearance may make an oral or written statement of position on the issues, but may not otherwise participate in the proceeding. A limited appearance may be made at any session of the hearing or at any prehearing conference, subject to the limits and conditions as may be imposed by the presiding officer. Details regarding the opportunity to make a limited appearance will be provided by the presiding officer if such sessions are scheduled.

B. Electronic Submissions (E-Filing)

All documents filed in NRC adjudicatory proceedings, including a request for hearing, a petition for leave to intervene, any motion or other document filed in the proceeding prior to the submission of a request for hearing or petition to intervene (hereinafter ''petition''), and documents filed by interested governmental entities participating under 10 CFR 2.315(c), must be filed in accordance with the NRC's E-Filing rule (72 FR 49139; August 28, 2007, as amended at 77 FR 46562, August 3, 2012). The E-Filing process requires participants to submit and serve all adjudicatory documents over the internet, or in some cases to mail copies on electronic storage media. Participants may not submit paper copies of their filings unless they seek an exemption in accordance with the procedures described below.

To comply with the procedural requirements of E-Filing, at least 10 days prior to the filing deadline, the participant should contact the Office of the Secretary by email at *hearing.docket@nrc.gov,* or by telephone at 301–415–1677, to request (1) a digital identification (ID) certificate, which allows the participant (or its counsel or representative) to digitally sign documents and access the E-Submittal server for any proceeding in which it is participating; and (2) advise the Secretary that the participant will be submitting a petition (even in instances in which the participant, or its counsel or representative, already holds an NRC-issued digital ID certificate). Based upon this information, the Secretary will establish an electronic docket for the hearing in this proceeding if the Secretary has not already established an electronic docket.

Information about applying for a digital ID certificate is available on the NRC's public Web site at *http://www.nrc.gov/site-help/e-submittals/getting-started.html.* System requirements for accessing the E-Submittal server are available on the NRC's public Web site at *http://www.nrc.gov/site-help/e-submittals/adjudicatory-sub.html.* Participants may attempt to use other software not listed on the Web site, but should note that the NRC's E-Filing system does not support unlisted software, and the NRC Electronic Filing Help Desk will not be able to offer assistance in using unlisted software.

Once a participant has obtained a digital ID certificate and a docket has been created, the participant can then submit a petition. Submissions should be in Portable Document Format (PDF). Additional guidance on PDF submissions is available on the NRC's public Web site at *http://www.nrc.gov/site-help/electronic-sub-ref-mat.html.* A filing is considered complete at the time the documents are submitted through the NRC's E-Filing system. To be timely, an electronic filing must be submitted to the E-Filing system no later than 11:59 p.m. Eastern Time on the due date. Upon receipt of a transmission, the E-Filing system time-stamps the document and sends the submitter an email notice confirming receipt of the document. The E-Filing system also distributes an email notice that provides access to the document to the NRC's Office of the General Counsel and any others who have advised the Office of the Secretary that they wish to participate in the proceeding, so that the filer need not serve the documents on those participants separately. Therefore, applicants and other participants (or their counsel or representative) must apply for and receive a digital ID certificate before a hearing petition to intervene is filed so that they can obtain access to the document via the E-Filing system.

A person filing electronically using the NRC's adjudicatory E-Filing system may seek assistance by contacting the NRC Electronic Filing Help Desk through the ''Contact Us'' link located on the NRC's public Web site at *http://www.nrc.gov/site-help/e-submittals.html,* by email to *MSHD.Resource@nrc.gov,* or by a toll-free call at 1–866–672–7640. The NRC Electronic Filing Help Desk is available between 9 a.m. and 7 p.m., Eastern Time, Monday through Friday, excluding government holidays.

Participants who believe that they have a good cause for not submitting documents electronically must file an exemption request, in accordance with 10 CFR 2.302(g), with their initial paper filing stating why there is good cause for not filing electronically and requesting authorization to continue to submit documents in paper format. Such filings must be submitted by: (1) First class mail addressed to the Office of the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, Attention: Rulemaking and Adjudications Staff; or (2) courier, express mail, or expedited delivery service to the Office of the Secretary, 11555 Rockville Pike, Rockville, Maryland 20852, Attention: Rulemaking and Adjudications Staff. Participants filing a document in this manner are responsible for serving the document on all other participants. Filing is considered complete by first-class mail as of the time of deposit in

the mail, or by courier, express mail, or expedited delivery service upon depositing the document with the provider of the service. A presiding officer, having granted an exemption request from using E-Filing, may require a participant or party to use E-Filing if the presiding officer subsequently determines that the reason for granting the exemption from use of E-Filing no longer exists.

Documents submitted in adjudicatory proceedings will appear in the NRC's electronic hearing docket which is available to the public at *http://ehd1.nrc.gov/ehd/,* unless excluded pursuant to an order of the Commission, or the presiding officer. Participants are requested not to include personal privacy information, such as social security numbers, home addresses, or home phone numbers in their filings, unless an NRC regulation or other law requires submission of such information. However, in some instances, a petition will require including information on local residence in order to demonstrate a proximity assertion of interest in the proceeding. With respect to copyrighted works, except for limited excerpts that serve the purpose of the adjudicatory filings and would constitute a Fair Use application, participants are requested not to include copyrighted materials in their submission.

The Commission will issue a notice or order granting or denying a hearing request or intervention petition, designating the issues for any hearing that will be held and designating the Presiding Officer. A notice granting a hearing will be published in the **Federal Register** and served on the parties to the hearing.

For further details with respect to these license amendment applications, see the application for amendment which is available for public inspection in ADAMS and at the NRC's PDR. For additional direction on accessing information related to this document, see the ''Obtaining Information and Submitting Comments'' section of this document.

DTE Electric Company, Docket No. 50–341, Fermi 2, Monroe County, Michigan

Date of amendment request: July 25, 2016. A publicly-available version is in ADAMS under Accession No. ML16207A433.

Description of amendment request: The proposed amendment would eliminate Technical Specification (TS) Section 5.5.6, ''Inservice Testing and Inspection Program,'' as well as revise TS Section 5.5.4, ''Radioactive Effluent Controls Program,'' by clarifying that Surveillance Requirements (SRs) 3.0.2 and 3.0.3 are applicable to the radioactive effluents program. In addition, the amendment proposes adding a new definition for ''Inservice Testing Program'' (IST), to TS Section 1.1, ''Definitions.'' TS SRs that currently refer to the IST would be revised to refer to the new defined term, ''INSERVICE TESTING PROGRAM.'' The proposed changes are consistent with NRC-approved Technical Specifications Task Force (TSTF) Traveler, TSTF–545, Revision 3, ''TS Inservice Testing Program Removal & Clarify SR Usage Rule Application to TS Section 5.5 Testing.''

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. Does the proposed change involve a significant increase in the probability or consequences of an accident previously evaluated?

Response: No.

The proposed change revises TS Chapter 5, ''Administrative Controls,'' Section 5.5, ''Programs and Manuals,'' by eliminating the ''Inservice Testing Program'' specification. Most requirements in the Inservice Testing Program are removed, as they are duplicative of requirements in the ASME OM [American Society of Mechanical Engineers Operation and Maintenance] Code, as clarified by Code Case OMN–20, ''Inservice Test Frequency.'' The remaining requirements in the Section 5.5 IST Program are eliminated because the NRC has determined their inclusion in the TS is contrary to regulations. A new defined term, ''Inservice Testing Program,'' is added to the TS, which references the requirements of 10 CFR 50.55a(f).

Performance of inservice testing is not an initiator to any accident previously evaluated. As a result, the probability of occurrence of an accident is not significantly affected by the proposed change. Inservice test frequencies under Code Case OMN–20 are equivalent to the current testing period allowed by the TS with the exception that testing frequencies greater than 2 years may be extended by up to 6 months to facilitate test scheduling and consideration of plant operating conditions that may not be suitable for performance of the required testing. The testing frequency extension will not affect the ability of the components to mitigate any accident previously evaluated as the components are required to be operable during the testing period extension. Performance of inservice tests utilizing the allowances in OMN–20 will not significantly affect the reliability of the tested components. As a result, the availability of the affected components, as well as their ability to mitigate the consequences of accidents previously evaluated, is not affected.

Therefore, the proposed change does not involve a significant increase in the probability or consequences of an accident previously evaluated.

2. Does the proposed change create the possibility of a new or different kind of accident from any accident previously evaluated?

Response: No.

The proposed change does not alter the design or configuration of the plant. The proposed change does not involve a physical alteration of the plant; no new or different kind of equipment will be installed. The proposed change does not alter the types of inservice testing performed. In most cases, the frequency of inservice testing is unchanged. However, the frequency of testing would not result in a new or different kind of accident from any previously evaluated since the testing methods are not altered.

Therefore, the proposed change does not create the possibility of a new or different kind of accident from any previously evaluated.

3. Does the proposed change involve a significant reduction in a margin of safety?

Response: No.

The proposed change eliminates some requirements from the TS in lieu of requirements in the ASME Code, as modified by use of Code Case OMN–20. Compliance with the ASME Code is required by 10 CFR 50.55a. The proposed change also allows inservice tests with frequencies greater than 2 years to be extended by 6 months to facilitate test scheduling and consideration of plant operating conditions that may not be suitable for performance of the required testing. The testing frequency extension will not affect the ability of the components to respond to an accident as the components are required to be operable during the testing period extension. The proposed change will eliminate the existing TS SR [surveillance requirement] 3.0.3 allowance to defer performance of missed inservice tests up to the duration of the specified testing frequency, and instead will require an assessment of the missed test on equipment operability. This assessment will consider the effect on a margin of safety (equipment operability). Should the component be inoperable, the TS provide actions to ensure that the margin of safety is protected. The proposed change also eliminates a statement that nothing in the ASME Code should be construed to supersede the requirements of any TS. The NRC has determined that statement to be incorrect. However, elimination of the statement will have no effect on plant operation or safety.

Therefore, the proposed change does not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Attorney for licensee: Jon P. Christinidis, DTE Energy, Expert Attorney—Regulatory, 688 WCB, One Energy Plaza, Detroit, MI 48226–1279.

NRC Branch Chief: David J. Wrona.

Duke Energy Progress, LLC, Docket No. 50–261, H.B. Robinson Steam Electric Plant (HBRSEP) Unit No. 2, Darlington County, South Carolina

Date of amendment request: September 14, 2016. A publicly-available version is in ADAMS under Accession No. ML16259A169.

Description of amendment request: The proposed amendment would adopt a revised alternative source term (AST) to support the transition from an 18-month to a 24-month fuel cycle. The amendment would also change applicable licensing basis documents.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. The Proposed Change Does Not Involve a Significant Increase in the Probability or Consequences of an Accident Previously Evaluated.

Revision of the AST does not affect the design or operation of HBRSEP, Unit No. 2. Rather, once the occurrence of an accident has been postulated, the new source term is an input to evaluate the consequences of the postulated accident. The revision of the AST has been evaluated. Based on the results of this analysis, it has been demonstrated that the dose consequences are within the regulatory [requirements and] guidance provided by the NRC. This [These regulatory requirements and] guidance is [are] presented in 10 CFR 50.67 and Regulatory Guide 1.183 [, respectively].

Therefore, this change does not involve a significant increase in the probability or consequences of an accident previously evaluated.

2. The Proposed Change Does Not Create the Possibility of a New or Different Kind of Accident From Any Previously Evaluated.

The proposed change does not affect plant structures, systems, or components. The proposed change is a revision evaluation and does not initiate design basis accidents.

Thus, this change does not create the possibility of a new or different kind of accident from any accident previously evaluated.

3. The Proposed Change Does Not Involve a Significant Reduction in the Margin of Safety.

The proposed change is associated with a revision to the licensing basis for HBRSEP, Unit No. 2. The revised AST is in accordance with 10 CFR 50.67 and the associated Regulatory Guide 1.183. The analysis has been performed using conservative methodologies in accordance with regulatory guidance. The dose consequences are within the acceptance criteria found in the regulatory [requirements and] guidance associated with Alternative Source Terms.

The proposed change continues to ensure that doses at the exclusion area and low population zone boundaries, as well as the control room, are within the corresponding regulatory limits. Specifically, the margin of safety for the radiological consequences of these accidents is considered to be that provided by meeting the applicable regulatory limits.

Therefore, this change does not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Attorney for licensee: Kathryn B. Nolan, Associate General Counsel, Duke Energy Business Services, 550 South Tyron Street, Mail Code DEC45A, Charlotte, NC 28202.

Acting NRC Branch Chief: Jeanne A. Dion.

Entergy Operations, Inc. (Entergy), Docket No. 50–382, Waterford Steam Electric Station, Unit 3 (Waterford 3), St. Charles Parish, Louisiana

Date of amendment request: September 21, 2016. A publicly-available version is in ADAMS under Accession No. ML16245A359.

Description of amendment request: Entergy proposes to revise the Waterford 3 Technical Specifications (TS) to clarify the surveillance requirements for selected Engineered Safety Features Actuation System (ESFAS) Subgroup relays. Specifically, the license amendment would revise Table Notation for TS Table 4.3–2, ''Engineered Safety Features Actuation System Instrumentation Surveillance Requirements,'' to remove references to specific relays and to ensure the notation fully reflects the implementation of the Waterford 3 Surveillance Frequency Control Program (SFCP). The Waterford 3 SFCP was approved by letter dated July 26, 2016, via License Amendment No. 249 (ADAMS Accession No. ML16159A419).

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below with NRC staff's edits in [square brackets]:

1. Does the proposed change involve a significant increase in the probability or consequences of an accident previously evaluated?

Response: No.

The proposed change will allow relays K105 and K306 to not be tested during power operation but shall be tested in accordance with the same frequency identified in the SFCP for the primary relays, which currently requires that they be tested at least once per 18 months and during each cold shutdown condition unless tested within the previous 62 days. The probability of an accident previously evaluated remains unchanged since the primary relays K114, K305, and K313 are currently tested in accordance with the SFCP (not tested during power operation but are tested at least once per 18 months and during each cold shutdown condition unless tested within the previous 62 days), K105 and K306 are currently not tested during power operation, and K105 and K306 will be tested in accordance with the SFCP (at least once per 18 months and during each cold shutdown condition unless tested within the previous 62 days). Not testing relays K105 and K306 during power operation and testing during cold shutdown cannot initiate an accident because the specific accidents which inadvertent ESFAS actuation is an initiator (Loss of External Load, Loss of Normal Feedwater Flow, Asymmetric Steam Generator Transient, and Loss of Component Cooling to the RCPs [Reactor Coolant Pumps]) are not possible during cold shutdown.

The proposed change to allow relays K105 and K306 to not be tested during power operation have been evaluated for impact on the accident analyses. The accident analyses remain within the regulatory acceptance criteria.

Therefore, the proposed change does not involve a significant increase in the probability or consequences of an accident previously evaluated.

Moreover, testing of the modified relay scheme during power operation could result in inadvertent actuation and subsequent occurrence of an accident if either the permissive or primary relay has failed ''off,'' or actuated. Continued testing in accordance with the SFCP assures inadvertent actuation during testing resulting from a failed ''off'' relay will not result in an accident described in the UFSAR [Updated Final Safety Analysis Report].

2. Does the proposed change create the possibility of a new or different kind of accident from any accident previously evaluated?

Response: No.

The proposed change allows relays K105 and K306 to be tested in accordance with the SFCP (not tested during power operation but shall be tested at least once per 18 months and during each cold shutdown condition unless tested within the previous 62 days). This surveillance frequency does not change the design function or operation of the ESFAS. There are no credible new failure mechanisms, malfunctions, or accident initiators not considered in the design and licensing bases that can be created by implementing the proposed change.

Therefore, the proposed change does not create the possibility of a new or different kind of accident from any previously evaluated.

3. Does the proposed change involve a significant reduction in a margin of safety?

Response: No.

The inclusion of relays K105 and K306 in the list of relays in the SFCP that are not tested during power operation as proposed in this TS 3/4.3.2 amendment request has been determined to not exceed or alter a design basis or safety limit and therefore has no significant impact on the accident analyses described in the UFSAR, therefore this change does not involve a significant reduction in the existing margins of safety for the fuel, the fuel cladding, the reactor coolant system boundary, or the containment building.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Attorney for licensee: William B. Glew, Jr., Associate General Counsel—Entergy Services, Inc., 440 Hamilton Avenue, White Plains, New York 10601.

Acting NRC Branch Chief: Stephen S. Koenick.

Exelon Generation Company, LLC (Exelon), Docket No. 50–219, Oyster Creek Nuclear Generating Station (OCNGS), Ocean County, New Jersey

Date of amendment request: May 17, 2016, as supplemented by letter dated November 2, 2016. Publicly-available versions are available in ADAMS under Accession Nos. ML16138A129 and ML16308A029, respectively.

Description of amendment request: The licensee has provided a formal notification to the NRC, in a letter dated January 7, 2011 (ADAMS Accession No. ML110070507), of the intention to permanently cease power operations of OCNGS no later than December 31, 2019. Once certifications for permanent cessation of operations and permanent removal of fuel from the reactor are submitted to the NRC, certain staffing and training Technical Specifications (TSs) administrative controls will no longer be applicable or appropriate for the permanently defueled condition. Therefore, Exelon is requesting approval of changes to the staffing and training requirements in Section 6.0, ''Administrative Controls''; editorial and administrative changes to Section 6.0, and add additional definitions to TS Section 1.1, ''Definitions,'' of the OCNGS TSs. The proposed changes include additions to, deletions from, and conforming administrative changes to the OCNGS TSs. The proposed amendment would not be effective until the certification of permanent cessation of operation and certification of permanent removal of fuel from the reactor vessel are submitted to the NRC.

The license amendment request was originally noticed in the **Federal Register** on July 19, 2016 (81 FR 46963). The notice is being reissued in its entirety to include the revised scope and description of the amendment request.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. Does the proposed amendment involve a significant increase in the probability or consequences of an accident previously evaluated?

Response: No.

The proposed changes would not take effect until OCNGS has permanently ceased operation and entered a permanently defueled condition. The proposed changes would revise the OCNGS TS by deleting or modifying certain portions of the TS administrative controls described in Section 6.0 of the TS that are no longer applicable to a permanently shutdown and defueled facility.

The proposed changes do not involve any physical changes to plant Structures, Systems, and Components (SSCs) or the manner in which SSCs are operated, maintained, modified, tested, or inspected. The proposed changes do not involve a change to any safety limits, limiting safety system settings, limiting control settings, limiting conditions for operation, surveillance requirements, or design features.

The deletion and modification of provisions of the administrative controls do not directly affect the design of SSCs necessary for safe storage of spent irradiated fuel or the methods used for handling and storage of such fuel in the Spent Fuel Pool (SFP). The proposed changes are administrative in nature and do not affect any accidents applicable to the safe management of spent irradiated fuel or the permanently shutdown and defueled condition of the reactor.

In a permanently defueled condition, the only credible accidents are the Fuel Handling Accident (FHA), Radioactive Liquid Waste System Leak, and Postulated Radioactive Releases Due to Liquid Tank Failures. Other accidents such as Loss of Coolant Accident, Loss of Feedwater, and Reactivity and Power Distribution Anomalies will no longer be applicable to a permanently defueled reactor plant.

The probability of occurrence of previously evaluated accidents is not increased, since extended operation in a permanently defueled condition will be the only operation allowed, and therefore, bounded by the existing analyses. Additionally, the occurrence of postulated accidents associated with reactor operation is no longer credible in a permanently defueled reactor. This significantly reduces the scope of applicable accidents.

Therefore, the proposed changes do not involve a significant increase in the probability or consequence of an accident previously evaluated.

2. Does the proposed amendment create the possibility of a new or different kind of accident from any accident previously evaluated?

Response: No.

The proposed changes to delete and/or modify certain TS administrative controls have no impact on facility SSCs affecting the safe storage of spent irradiated fuel, or on the methods of operation of such SSCs, or on the handling and storage of spent irradiated fuel itself. The proposed changes do not result in different or more adverse failure modes or accidents than previously evaluated because the reactor will be permanently shut down and defueled and OCNGS will no longer be authorized to operate the reactor.

The proposed changes do not affect systems credited in the accident analysis for the FHA, Radioactive Liquid Waste System Leak, and Postulated Radioactive Releases Due to Liquid Tank Failures at OCNGS. The proposed changes will continue to require proper control and monitoring of safety significant parameters and activities.

The proposed changes do not result in any new mechanisms that could initiate damage to the remaining relevant safety barriers in support of maintaining the plant in a permanently shutdown and defueled condition (*e.g.,* fuel cladding and SFP cooling). Since extended operation in a defueled condition will be the only operation allowed, and therefore bounded by the existing analyses, such a condition does not create the possibility of a new or different kind of accident.

The proposed changes do not alter the protection system design, create new failure modes, or change any modes of operation. The proposed changes do not involve a physical alteration of the plant, and no new or different kind of equipment will be installed. Consequently, there are no new initiators that could result in a new or different kind of accident.

Therefore, the proposed changes do not create the possibility of a new or different kind of accident from any accident previously evaluated.

3. Does the proposed amendment involve a significant reduction in a margin of safety?

Response: No.

The proposed changes involve deleting and/or modifying certain TS administrative controls once the OCNGS facility has been permanently shutdown and defueled. As specified in 10 CFR 50.82(a)(2), the 10 CFR 50 license for OCNGS will no longer authorize operation of the reactor or emplacement or retention of fuel into the reactor vessel following submittal of the certifications required by 10 CFR 50.82(a)(1). As a result, the occurrence of certain design basis postulated accidents are no longer considered credible when the reactor is permanently defueled.

The only remaining credible accident is a fuel handling accident (FHA). The proposed changes do not adversely affect the inputs or assumptions of any of the design basis analyses that impact the FHA.

The proposed changes are limited to those portions of the TS administrative controls

that are related to the safe storage and maintenance of spent irradiated fuel. The requirements that are proposed to be revised and/or deleted from the OCNGS TS are not credited in the existing accident analysis for the remaining applicable postulated accident (*i.e.,* FHA); therefore, they do not contribute to the margin of safety associated with the accident analysis. Certain postulated DBAs [design-basis accidents] involving the reactor are no longer possible because the reactor will be permanently shut down and defueled and OCNGS will no longer be authorized to operate the reactor.

Therefore, the proposed changes do not involve a significant reduction in the margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Attorney for licensee: Tamra Domeyer, Associate General Counsel, Exelon Generation Company, LLC, 4300 Winfield Road, Warrenville, IL 60555.

Acting NRC Branch Chief: Douglas A. Broaddus.

NextEra Energy Duane Arnold, LLC, Docket No. 50–331, Duane Arnold Energy Center (DAEC), Linn County, Iowa

Date of amendment request: September 13, 2016. A publicly-available version is in ADAMS under Accession No. ML16263A071.

Description of amendment request: The proposed amendment would revise the DAEC Emergency Plan to increase staff augmentation times for Emergency Response Organization response functions.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. Does the proposed change involve a significant increase in the probability or consequences of an accident previously evaluated?

Response: No.

The proposed increase in staff augmentation times has no effect on normal plant operation or on any accident initiator or precursors and does not impact the function of plant structures, systems, or components (SCCs). The proposed change does not alter or prevent the ability of the Emergency Response Organization to perform their intended functions to mitigate the consequences of an accident or event. The ability of the emergency response organization to respond adequately to radiological emergencies has been demonstrated as acceptable through a staffing analysis as required by 10 CFR 50 Appendix E.IV.A.9.

Therefore, the proposed Emergency Plan changes do not involve a significant increase in the probability or consequences of an accident previously evaluated.

2. Does the proposed change create the possibility of a new or different kind of accident from any accident previously evaluated?

Response: No.

The proposed change does not impact the accident analysis. The change does not involve a physical alteration of the plant (*i.e.,* no new or different type of equipment will be installed), a change in the method of plant operation, or new operator actions. The proposed change does not introduce failure modes that could result in a new accident, and the change does not alter assumptions made in the safety analysis. This proposed change increases the staff augmentation response times in the Emergency Plan, which are demonstrated as acceptable through a staffing analysis as required by 10 CFR 50 Appendix E.IV.A.9. The proposed change does not alter or prevent the ability of the Emergency Response Organization to perform their intended functions to mitigate the consequences of an accident or event.

Therefore, the proposed change does not create the possibility of a new or different kind of accident from any accident previously evaluated.

3. Does the proposed change involve a significant reduction in a margin of safety?

Response: No.

Margin of safety is associated with confidence in the ability of the fission product barriers (*i.e.,* fuel cladding, reactor coolant system pressure boundary, and containment structure) to limit the level of radiation dose to the public. The proposed change is associated with the Emergency Plan staffing and does not impact operation of the plant or its response to transients or accidents. The change does not affect the Technical Specifications. The proposed change does not involve a change in the method of plant operation, and no accident analyses will be affected by the proposed change. Safety analysis acceptance criteria are not affected by this proposed change. The revised Emergency Plan will continue to provide the necessary response staff with the proposed change. A staffing analysis and a functional analysis were performed for the proposed change on the timeliness of performing major tasks for the functional areas of Emergency Plan. The analysis concluded that an extension in staff augmentation times would not significantly affect the ability to perform the required Emergency Plan tasks. Therefore, the proposed change is determined to not adversely affect the ability to meet 10 CFR 50.54(q)(2), the requirements of 10 CFR 50 Appendix E, and the emergency planning standards as described in 10 CFR 50.47 (b).

Therefore, the proposed change does not involve a significant reduction in the margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Attorney for licensee: William Blair, P.O. Box 14000 Juno Beach, FL 33408–0420.

NRC Branch Chief: David J. Wrona.

PSEG Nuclear LLC, Docket Nos. 50–354, 50–272, and 50–311, Hope Creek Generating Station (Hope Creek) and Salem Nuclear Generating Station, Unit Nos. 1 and 2 (Salem), Salem County, New Jersey

Date of amendment request: October 17, 2016. A publicly-available version is in ADAMS under Accession No. ML16291A318.

Description of amendment request: The amendments would revise the technical specifications (TSs) by removing certain training program requirements. Specifically, the amendments would remove TS requirements that are redundant to or superseded by the requirements contained in 10 CFR part 55 and 10 CFR 50.120.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. Does the proposed amendment involve a significant increase in the probability or consequences of an accident previously evaluated?

Response: No.

The proposed change is an administrative change to remove the plant staff retraining and replacement training program requirements from the TS. The proposed change does not directly impact accidents previously evaluated. The Salem and Hope Creek licensed operator training programs have been accredited by the Institute of Nuclear Power Operations (INPO) and are based on a systems approach to training. The proposed TS changes take credit for the INPO accreditation of the licensed operator training programs and require continued compliance with the requirements of 10 CFR 55. The TS requirements for all other unit staff qualifications remain unchanged.

The training program for appropriate unit staff personnel other than licensed operators is addressed by 10 CFR 50.120. With the 10 CFR 50.120 rule, the NRC is emphasizing the need to ensure that industry personnel training programs are based upon job performance requirements. Personnel who are subjected to training based on job performance requirements should be able to perform their jobs more efficiently and with fewer errors. This is accomplished using the systems approach to training implemented by INPO accredited training programs for selected nuclear personnel. Included within

the rule is the requirement that the training program must reflect industry experience.

Therefore, the proposed change does not involve a significant increase in the probability or consequences of an accident previously evaluated.

2. Does the proposed amendment create the possibility of a new or different kind of accident from any accident previously evaluated?

Response: No.

The proposed TS changes are administrative changes to clarify the current requirements for training programs and conform to 10 CFR 55 and 10 CFR 50.120.

The Salem and Hope Creek training programs for licensed operators and for non-licensed in the nine categories of personnel listed in 10 CFR 50.120 have been accredited by INPO and are based on a systems approach to training. The proposed TS changes take credit for the INPO accreditation of training programs and require continued compliance with the requirements of 10 CFR 55 and 10 CFR 120. The TS requirements for unit staff qualifications remain unchanged.

Therefore, the proposed change does not create the possibility of a new or different kind of accident from any previously evaluated.

3. Does the proposed amendment involve a significant reduction in a margin of safety?

Response: No.

The proposed changes are administrative in nature and do not affect the plant design, hardware, system operation, or operating procedures. The change does not exceed or alter a design basis or safety limit and thus does not reduce the margin of safety.

Therefore, the proposed change does not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Attorney for licensee: Jeffrie J. Keenan, PSEG Nuclear LLC—N21, P.O. Box 236, Hancocks Bridge, NJ 08038.

Acting NRC Branch Chief: Stephen S. Koenick.

South Carolina Electric & Gas Company, Docket Nos. 52–027 and 52–028, Virgil C. Summer Nuclear Station, Units 2 and 3, Fairfield, South Carolina

Date of amendment request: October 24, 2016. A publicly-available version is in ADAMS under Accession No. ML16298A385.

Description of amendment request: The amendment request proposes changes to update the Protection and Safety Monitoring System (PMS) design, specifically the description of the roles of the Qualified Data Processing System (QDPS) and the safety displays. The proposed changes add Main Control Room (MCR) safety-related display divisions A and D to plant-specific Tier 1 (and associated Combined License (COL) Appendix C) and the Updated Final Safety Analysis Report (UFSAR), and correct the name of the QDPS in the UFSAR by referring to the QDPS as a system, rather than a subsystem. Because, this proposed change requires a departure from Tier 1 information in the Westinghouse Electric Company's AP1000 Design Control Document (DCD), the licensee also requested an exemption from the requirements of the Generic DCD Tier 1 in accordance with 10 CFR 52.63(b)(1).

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. Does the proposed amendment involve a significant increase in the probability or consequences of an accident previously evaluated?

Response: No.

The proposed change to the roles of the qualified data processing system (QDPS) and safety-related displays, as well as the change to add Division A and Division D of the main control room (MCR) safety-related displays to the listing of PMS equipment, as identified in Combined License (COL) Appendix C (and plant-specific Tier 1) Table 2.5.2–1 and Updated Final Safety Analysis Report (UFSAR) Table 3.11–1 and 3l.6–2 do not alter any accident initiating component/system failure or event, thus the probabilities of the accidents previously evaluated are not affected.

The proposed changes do not adversely affect safety-related equipment or a radioactive material barrier, and this activity dos not involve the containment of radioactive material.

The radioactive material source terms and release paths used in the safety analysis are unchanged, thus the radiological releases in the UFSAR accident analysis are not affected.

Therefore, the proposed amendment does not involve a significant increase in the probability or consequences of an accident previously evaluated.

2. Does the proposed amendment create the possibility of a new or different kind of accident from any accident previously evaluated?

Response: No.

The proposed change to the roles of the QDPS and safety-related displays, as well as the change to add Division A and Division D of the MCR safety-related displays to the listing of PMS equipment, as identified in COL Appendix C (and plant-specific Tier 1) Table 2.5.2–1 and UFSAR Table 3.11–1 and 3l.6–2 does not create the possibility of a new or different kind of accident from any accident previously evaluated. The proposed changes do not alter the design or capability of any sensors which provide input to the QDPS. The functionality of the QDPS to process the input obtained from sensors into data to be sent to the safety displays is not affected by the proposed changes. The proposed changes do not affect any functions performed by the safety displays, nor do the proposed changes affect the capability of the safety displays to display the data received from the QDPS.

Therefore, the proposed amendment does not create the possibility of a new or different kind of accident from any accident previously evaluated.

3. Does the proposed amendment involve a significant reduction in a margin of safety?

Response: No.

There is no safety-related structure, system or component (SSC) or function adversely affected by the proposed change to the roles of the QDPS and safety-related displays, nor by the change to add Division A and Division D of the MCR safety-related displays to the listing of Protection and Safety Monitoring System (PMS) equipment. The proposed changes do not alter the mechanisms by which system components are actuated or controlled. Because no safety analysis or design basis acceptance limit/criterion is challenged or exceeded by the proposed changes, no margin of safety is reduced.

Therefore, the proposed amendment does not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Attorney for licensee: Ms. Kathryn M. Sutton, Morgan, Lewis & Bockius, LLC, 1111 Pennsylvania NW., Washington, DC 20004–2514.

NRC Branch Chief: Jennifer Dixon-Herrity.

Tennessee Valley Authority, Docket Nos. 50–390 and 50–391, Watts Bar Nuclear Plant (WBN), Units 1 and 2, Rhea County, Tennessee

Date of amendment request: March 29, 2016. A publicly-available version is in ADAMS under Accession No. ML16089A452.

Description of amendment request: The amendments would revise the WBN, Units 1 and 2, Technical Specification (TS) requirements for inoperable dynamic restraints (snubbers) by adding Limiting Condition for Operation (LCO) 3.0.8. The change is consistent with the NRC-approved Revision 4 to Technical Specification Task Force (TSTF) Standard Technical Specification Change Traveler, TSTF–372, ''Addition of LCO 3.0.8, Inoperability of Snubbers.''

The proposed amendment for WBN, Unit 1, would also make an

administrative change to add a reference to LCO 3.0.7 in LCO 3.0.1, consistent with TSTF–6, Revision 1, ''Add Exception for LCO 3.0.7 to LCO 3.0.1.''

The NRC staff issued a notice of availability of a model safety evaluation and model no significant hazards consideration (NSHC) determination for referencing in license amendment applications in the **Federal Register** on May 4, 2005 (70 FR 23252). The licensee affirmed the applicability of the model NSHC determination in its application dated March 29, 2016.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), an analysis of the issue of no significant hazards consideration is presented below:

Criterion 1—The Proposed Changes Do Not Involve a Significant Increase in the Probability or Consequences of an Accident Previously Evaluated.

The proposed change allows a delay time for entering a supported system TS when the inoperability is due solely to an inoperable snubber if risk is assessed and managed. The postulated seismic event requiring snubbers is a low-probability occurrence and the overall TS system safety function would still be available for the vast majority of anticipated challenges. Therefore, the probability of an accident previously evaluated is not significantly increased, if at all. The consequences of an accident while relying on allowance provided by proposed LCO 3.0.8 are no different than the consequences of an accident while relying on the TS required actions in effect without the allowance provided by proposed LCO 3.0.8. Therefore, the consequences of an accident previously evaluated are not significantly affected by this change. The addition of a requirement to assess and manage the risk introduced by this change will further minimize possible concerns.

The proposed administrative change for WBN, Unit 1, does not affect the structures, systems, or components (SSCs) of the plant, affect plant operations, or any design function or an analysis that verifies the capability of an SSC to perform a design function. No change is being made to any of the previously evaluated accidents in the WBN Unit 1 Updated Final Safety Analysis Report.

Therefore these changes do not involve a significant increase in the probability or consequences of an accident previously evaluated.

Criterion 2—The Proposed Changes Do Not Create the Possibility of a New or Different Kind of Accident From Any Previously Evaluated.

The proposed change does not involve a physical alteration of the plant (no new or different type of equipment will be installed). Allowing delay times for entering supported system TS when inoperability is due solely to inoperable snubbers, if risk is assessed and managed, will not introduce new failure modes or effects and will not, in the absence of other unrelated failures, lead to an accident whose consequences exceed the consequences of accidents previously evaluated. The addition of a requirement to assess and manage the risk introduced by this change will further minimize possible concerns.

The proposed administrative change for WBN, Unit 1, does not introduce any new accident causal mechanisms, since no physical changes are being made to the plant, nor do they impact any plant systems that are potential accident initiators.

Therefore, the proposed changes do not create the possibility of a new or different kind of accident from any accident previously evaluated.

Criterion 3—The Proposed Changes Do Not Involve a Significant Reduction in the Margin of Safety.

The proposed change allows a delay time for entering a supported system TS when the inoperability is due solely to an inoperable snubber, if risk is assessed and managed. The postulated seismic event requiring snubbers is a low-probability occurrence and the overall TS system safety function would still be available for the vast majority of anticipated challenges. The risk impact of the proposed TS changes was assessed following the three tiered approach recommended in NRC Regulatory Guide 1.177. A bounding risk assessment was performed to justify the proposed TS changes. This application of LCO 3.0.8 is predicated upon the licensee's performance of a risk assessment and the management of plant risk. The net change to the margin of safety is insignificant.

The proposed administrative change for WBN, Unit 1, will have no effect on the availability, operability, or performance of safety-related systems and components. The proposed change will not adversely affect the operation of plant equipment or the function of equipment assumed in the accident analysis. The proposed change does not involve changes to any safety analyses assumptions, safety limits, or limiting safety system settings. The change does not adversely affect plant-operating margins or the reliability of equipment credited in the safety analyses.

Therefore, the proposed changes do not involve a significant reduction in a margin of safety.

The NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Attorney for licensee: Sherry A. Quirk, Executive Vice President and General Counsel, Tennessee Valley Authority, 400 West Summit Hill Dr., 6A West Tower, Knoxville, TN 37902.

Acting NRC Branch Chief: Jeanne A. Dion.

III. Notice of Issuance of Amendments to Facility Operating Licenses and Combined Licenses

During the period since publication of the last biweekly notice, the Commission has issued the following amendments. The Commission has determined for each of these amendments that the application complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.

A notice of consideration of issuance of amendment to facility operating license or combined license, as applicable, proposed no significant hazards consideration determination, and opportunity for a hearing in connection with these actions, was published in the **Federal Register** as indicated.

Unless otherwise indicated, the Commission has determined that these amendments satisfy the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for these amendments. If the Commission has prepared an environmental assessment under the special circumstances provision in 10 CFR 51.22(b) and has made a determination based on that assessment, it is so indicated.

For further details with respect to the action see (1) the applications for amendment, (2) the amendment, and (3) the Commission's related letter, Safety Evaluation and/or Environmental Assessment as indicated. All of these items can be accessed as described in the ''Obtaining Information and Submitting Comments'' section of this document.

Energy Northwest, Docket No. 50–397, Columbia Generating Station (CGS), Benton County, Washington

Date of application for amendment: March 17, 2015, as supplemented by letters dated September 17, October 29,

November 17, and December 28, 2015; and April 7, May 11, and June 22, 2016.

Brief description of amendment: The amendment modified the CGS Technical Specifications by relocating specific surveillance frequencies to a licensee-controlled program consistent with NRC-approved Technical Specifications Task Force Traveler (TSTF)-425, Revision 3, ''Relocate Surveillance Frequencies to Licensee Control—RITSTF [Risk-Informed Technical Specifications Task Force] Initiative 5b,'' dated March 18, 2009. The availability of this TS improvement program was announced in the **Federal Register** on July 6, 2009 (74 FR 31996). The licensee has proposed certain plant-specific variations and deviations from TSTF–425, Revision 3, as described in its application dated March 17, 2015.

Date of issuance: November 3, 2016.

Effective date: As of its date of issuance and shall be implemented within 120 days from the date of issuance.

Amendment No.: 238. A publicly-available version is in ADAMS under Accession No. ML16253A025; documents related to this amendment are listed in the Safety Evaluation enclosed with the amendment.

Renewed Facility Operating License No. NPF–21: The amendment revised the Facility Operating License and Technical Specifications.

*Date of initial notice in **Federal Register**:* May 26, 2015 (80 FR 30100). The supplemental letters dated September 17, October 29, November 17, and December 28, 2015; and April 7, May 11, and June 22, 2016, provided additional information that clarified the application, did not expand the scope of the application as originally noticed, and did not change the staff's original proposed no significant hazards consideration determination as published in the **Federal Register**.

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated November 3, 2016.

No significant hazards consideration comments received: No.

Entergy Gulf States Louisiana, LLC, and Entergy Operations, Inc., Docket No. 50–458, River Bend Station, Unit 1 (RBS), West Feliciana Parish, Louisiana

Date of amendment request: October 29, 2015, as supplemented by letters dated April 19 and July 27, 2016.

Brief description of amendment: The amendment revises Technical Specification (TS) 5.5.13, ''Primary Containment Leakage Rate Testing Program,'' by incorporating Nuclear Energy Institute (NEI) topical report 94–01, Revision 3–A, as the implementation document for the RBS performance-based containment leakage rate testing program. Based on the guidance in NEI 94–01, Revision 3–A, the change allows the RBS Type A Test (Integrated Leak Rate Test, or ILRT) frequency to be extended from 120 to 180 months, and the Type C Tests (Local Leak Rate Tests, or LLRTs) frequency to be extended from 60 to 75 months. Additionally, the amendment modifies Surveillance Requirement (SR) 3.6.5.1.3 to extend the frequency of the Drywell Bypass Test from 120 to 180 months and revises its allowed extension per SR 3.0.2 from 12 to 9 months.

Date of issuance: October 27, 2016.

Effective date: As of the date of issuance and shall be implemented within 60 days from the date of issuance.

Amendment No.: 191. A publicly-available version is in ADAMS under Accession No. ML16287A599; documents related to this amendment are listed in the Safety Evaluation enclosed with the amendment.

Facility Operating License No. NPF–47: The amendment revised the Facility Operating License and TSs.

*Date of initial notice in **Federal Register**:* April 12, 2016 (81 FR 21597). The supplements dated April 19 and July 27, 2016, provided additional information that clarified the application, did not expand the scope of the application as originally noticed, and did not change the staff's original proposed no significant hazards consideration determination as published in the **Federal Register**.

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated October 27, 2016.

No significant hazards consideration comments received: No.

Entergy Nuclear Operations, Inc., Docket No. 50–255, Palisades Nuclear Plant, Van Buren County, Michigan

Date of amendment request: August 22, 2016, as supplemented by letter dated September 8, 2016.

Brief description of amendment: This amendment replaces existing license condition 2.C.(4) with a new license condition that states that Technical Specification (TS) Surveillance Requirement (SR) 3.1.4.3 is not required for control rod drive 13 (CRD–13) during cycle 25 until the next entry into Mode 3. In addition, the license condition states that CRD–13 seal leakage shall be repaired prior to entering Mode 2 following the next Mode 3 entry, and that the reactor shall be shut down if CRD–13 seal leakage exceeds 2 gallons per minute. The amendment also replaces an obsolete note in TS SR 3.1.4.3 with a note to clarify that TS SR 3.1.4.3 is not required to be performed or met for CRD–13 during cycle 25 provided CRD–13 is administratively declared immovable, but trippable, and Condition D is entered for CRD–13.

Date of issuance: October 28, 2016.

Effective date: As of the date of issuance and shall be implemented within 15 days.

Amendment No.: 260. A publicly-available version is in ADAMS under Accession No. ML16281A498; documents related to this amendment are listed in the Safety Evaluation enclosed with the amendment.

Renewed Facility Operating License No. DPR–20: Amendment revised the Renewed Facility Operating License and Technical Specifications.

*Date of initial notice in **Federal Register**:* September 27, 2016 (81 FR 66306).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated October 28, 2016.

No significant hazards consideration comments received: No.

Entergy Nuclear Operations, Inc., Docket No. 50–293, Pilgrim Nuclear Power Station (Pilgrim), Plymouth County, Massachusetts

Date of amendment request: January 14, 2016.

Brief description of amendment: This amendment reduced the level of Pilgrim's Emergency Response Organization staff training for the on-shift Chemistry Technician to support on-shift Radiation Protection Technician functions at the onset of a radiological event. The amendment also revised paragraph 3.B of the Renewed Facility Operating License.

Date of issuance: October 28, 2016.

Effective date: As of the date of issuance, and shall be implemented within 30 days.

Amendment No.: 245. A publicly-available version is in ADAMS under Accession No. ML16250A223; documents related to this amendment are listed in the Safety Evaluation enclosed with the amendment.

Renewed Facility Operating License No. DPR–35: The amendment revised the Renewed Facility Operating License.

*Date of initial notice in **Federal Register**:* April 12, 2016 (81 FR 21597).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated October 28, 2016.

No significant hazards consideration comments received: No.

Indiana Michigan Power Company, Docket Nos. 50–315 and 50–316, Donald C. Cook Nuclear Plant (CNP), Units 1 and 2, Berrien County, Michigan

Date of amendment request: March 14, 2016, as supplemented by letter dated October 28, 2016.

Brief description of amendments: The amendments revised the full implementation date (Milestone 8) of CNP, Units 1 and 2, Cyber Security Plan, and revised the associated license conditions for the renewed facility operating licenses.

Date of issuance: November 2, 2016.

Effective date: As of the date of issuance and shall be implemented within 60 days of issuance.

Amendment Nos.: 333 for Unit 1 and 315 for Unit 2. A publicly-available version is in ADAMS under Accession No. ML16077A029; documents related to this amendment are listed in the Safety Evaluation enclosed with the amendments.

Renewed Facility Operating License Nos. DPR–58 and DPR–74: Amendments revised the Renewed Facility Operating Licenses.

*Date of initial notice in **Federal Register**:* June 7, 2016 (81 FR 36605). The supplemental letter dated October 28, 2016, provided additional information that clarified the application, did not expand the scope of the application as originally noticed, and did not change the staff's original proposed no significant hazards consideration determination as published in the **Federal Register**.

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated November 2, 2016.

No significant hazards consideration comments received: No.

PSEG Nuclear LLC, Docket Nos. 50–272 and 50–311, Salem Nuclear Generating Station, Unit Nos. 1 and 2, Salem County, New Jersey

Date of amendment request: September 11, 2015, as supplemented by letters dated November 5, 2015; March 31, 2016; August 12, 2016; and August 30, 2016.

Brief description of amendments: The amendments revised the Technical Specifications to support planned plant modifications to implement chiller replacements, for performing maintenance, and for unplanned operational issues.

Date of issuance: November 2, 2016.

Effective date: As of the date of issuance and shall be implemented within 60 days.

Amendment Nos.: 316 (Unit 1) and 297 (Unit 2). A publicly-available version is in ADAMS under Accession No. ML16279A405; documents related to these amendments are listed in the Safety Evaluation enclosed with the amendments.

Renewed Facility Operating License Nos. DPR–70 and DPR–75: The amendments revised the Renewed Facility Operating Licenses and the Technical Specifications.

*Date of initial notice in **Federal Register**:* January 5, 2016 (81 FR 263). The supplemental letters dated March 31, 2016; August 12, 2016; and August 30, 2016, provided additional information that clarified the application, did not expand the scope of the application as originally noticed, and did not change the staff's original proposed no significant hazards consideration determination as published in the **Federal Register**.

The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated November 2, 2016.

No significant hazards consideration comments received: No.

South Carolina Electric & Gas Company, South Carolina Public Service Authority, Docket No. 50–395, Virgil C. Summer Nuclear Station, Unit No. 1, Fairfield County, South Carolina

Date of amendment request: April 7, 2016.

Brief description of amendment: The amendment approved a change to the Technical Specification (TS) emergency feedwater (EFW) system pump performance testing requirements in TS 3/4.7.1.2, ''Emergency Feedwater System.'' In addition, the request also included an administrative change to remove an expired note in TS 3/4.7.1.2 that temporarily extended the allowed outage time during testing and maintenance affecting the motor-driven EFW pump flow control valves.

Date of issuance: October 26, 2016.

Effective date: As of the date of issuance and shall be implemented within 30 days of issuance.

Amendment No.: 206. A publicly-available version is in ADAMS under Accession No. ML16264A411; documents related to this amendment are listed in the Safety Evaluation enclosed with the amendment.

Renewed Facility Operating License No. NPF–12: Amendment revised the Renewed Facility Operating License and TSs.

*Date of initial notice in **Federal Register**:* June 7, 2016 (81 FR 36622).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated October 26, 2016.

No significant hazards consideration comments received: No.

Southern Nuclear Operating Company, Inc., Docket No. 50–425, Vogtle Electric Generating Plant, Unit 2, Burke County, Georgia

Date of amendment request: August 12, 2016, as supplemented by letter dated September 15, 2016.

Brief description of amendment: The amendment modifies the Unit 2 Technical Specifications (TS) Limiting Condition for Operation (LCO) 3.7.9, ''Ultimate Heat Sink (UHS),'' to add a Note to extend the completion time of Condition D.2.2 of LCO 3.7.9 from 31 to 46 days to allow for refurbishing the 2B nuclear service cooling water (NSCW) transfer pump. This TS change would be a one-time change only for the 2B NSCW transfer pump during operating Cycle 19.

Date of issuance: October 31, 2016.

Effective date: As of the date of issuance and shall be implemented within 30 days of issuance.

Amendment No.: 164. A publicly-available version is in ADAMS under Accession No. ML16265A162; documents related to this amendment are listed in the Safety Evaluation enclosed with the amendment.

Renewed Facility Operating License No. NPF–81: Amendment revised the Renewed Facility Operating License and TSs.

*Date of initial notice in **Federal Register**:* August 30, 2016 (81 FR 59666). The supplemental letter dated September 15, 2016, provided additional information that clarified the application, did not expand the scope of the application as originally noticed, and did not change the staff's original proposed no significant hazards consideration (NSHC) determination as published in the **Federal Register**.

The Commission's related evaluation of the amendment and NSHC determination are contained in a Safety Evaluation dated October 31, 2016.

No significant hazards consideration comments received: No.

Dated at Rockville, Maryland, this 10th day of November 2016.

For the Nuclear Regulatory Commission.

Anne T. Boland,

Director, Division of Operating Reactor Licensing, Office of Nuclear Reactor Regulation.

PENSION BENEFIT GUARANTY CORPORATION

Proposed Submission of Information Collections for OMB Review; Comment Request; Payment of Premiums; Termination Premium

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Notice of intent to request extension of OMB approval of collection of information.

SUMMARY: The Pension Benefit Guaranty Corporation (PBGC) intends to request that the Office of Management and Budget (OMB) extend approval, under the Paperwork Reduction Act, of the collection of information for the termination premium under its regulation on Payment of Premiums (29 CFR part 4007) (OMB control number 1212–0064; expires February 28, 2017), without changes. This notice informs the public of PBGC's intent and solicits public comment on the collection of information.

DATES: Comments should be submitted by January 23, 2017.

ADDRESSES: Comments may be submitted by any of the following methods:

- *Federal eRulemaking portal: http://www.regulations.gov.* Follow the Web site instructions for submitting comments.
- *Email: paperwork.comments@pbgc.gov.*
- *Mail or hand delivery:* Regulatory Affairs Group, Office of the General Counsel, Pension Benefit Guaranty Corporation, 1200 K Street NW., Washington, DC 20005–4026.

Comments received, including personal information provided, will be posted to PBGC's Web site (*http://www.pbgc.gov*).

The currently approved collection of information (Form T and instructions) and PBGC's premium payment regulation may be accessed on PBGC's Web site at *http://www.pbgc.gov.* Copies of the proposed collection of information may also be obtained without charge by writing to the Disclosure Division of the Office of the General Counsel of PBGC at the above address or by calling 202–326–4040 during normal business hours. (TTY and TDD users may call the Federal relay service toll-free at 800–877–8339 and ask to be connected to 202–326–4040.)

FOR FURTHER INFORMATION CONTACT: Deborah C. Murphy (*murphy.deborah@pbgc.gov*), Assistant General Counsel for Regulatory Affairs, Office of the General Counsel, Pension Benefit Guaranty Corporation, 1200 K Street NW., Washington, DC 20005–4026, 202–326–4400 ext. 3451. (TTY and TDD users may call the Federal relay service toll-free at 800–877–8339 and ask to be connected to 202–326–4400 ext. 3451.)

SUPPLEMENTARY INFORMATION: The Pension Benefit Guaranty Corporation (PBGC) administers the pension plan termination insurance program under title IV of the Employee Retirement Income Security Act of 1974 (ERISA). Section 4006(a)(7) of ERISA provides for a ''termination premium'' (in addition to the flat-rate and variable-rate premiums under section 4006(a)(3) and (8) of ERISA) that is payable for three years following certain distress and involuntary plan terminations. PBGC's regulations on Premium Rates (29 CFR part 4006) and Payment of Premiums (29 CFR part 4007) implement the termination premium. Sections 4007.3 and 4007.13(b) of the premium payment regulation require the filing of termination premium information and payments with PBGC. PBGC has promulgated Form T and instructions for paying the termination premium.

In general, the termination premium applies where a single-employer plan terminates in a distress termination under ERISA section 4041(c) (unless contributing sponsors and controlled group members meet the bankruptcy liquidation requirements of ERISA section 4041(c)(2)(B)(i)) or in an involuntary termination under ERISA section 4042, and the termination date under section 4048 of ERISA is after 2005. The termination premium does not apply in certain cases where termination occurs during a bankruptcy proceeding filed before October 18, 2005.

The termination premium is payable for three years. The same amount is payable each year. The amount of each payment is based on the number of participants in the plan as of the day before the termination date. In general, the amount of each payment is equal to $1,250 times the number of participants. However, the rate is increased from $1,250 to $2,500 in certain cases involving commercial airline or airline catering service plans. The termination premium is due on the 30th day of each of three consecutive 12-month periods. The first 12-month period generally begins shortly after the termination date or after the conclusion of bankruptcy proceedings in certain cases.

The termination premium and related information must be filed by a person liable for the termination premium. The persons liable for the termination premium are contributing sponsors and members of their controlled groups, determined on the day before the plan termination date. Interest on late termination premiums is charged at the rate imposed under section 6601(a) of the Internal Revenue Code, compounded daily, from the due date to the payment date. Penalties based on facts and circumstances may be assessed both for failure to timely pay the termination premium and for failure to timely file required related information and may be waived in appropriate circumstances. A penalty for late payment will not exceed the amount of termination premium paid late. Section 4007.10 of the premium payment regulation requires the retention of records supporting or validating the computation of premiums paid and requires that the records be made available to PBGC.

OMB has approved the termination premium collection of information (Form T and instructions) under control number 1212–0064 through February 28, 2017. PBGC intends to request that OMB extend approval of this collection of information for three years, without changes. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

PBGC estimates that it will each year receive an average of about 1 filing for the first year a termination premium is due, 1 filing for the second year a termination premium is due, and 1 filing for the third year a termination premium is due, from a total of about 3 respondents. PBGC estimates that the total annual burden of the collection of information will be about 15 minutes and $200.

PBGC is soliciting public comments to—

- Evaluate whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Issued in Washington, DC, by:

Judith Starr,

General Counsel, Pension Benefit Guaranty Corporation.

OFFICE OF PERSONNEL MANAGEMENT

OMB No. 3206–0233, Civil Service Retirement System Survivor Annuitant Express Pay Application for Death Benefits, OPM Form RI 25–051

AGENCY: Office of Personnel Management.

ACTION: 30-Day Notice and request for comments.

SUMMARY: The Retirement Services, Office of Personnel Management (OPM) offers the general public and other Federal agencies the opportunity to comment on an extension, without change, of a currently approved information collection request (ICR) OMB No. 3206–0233, Civil Service Retirement System Survivor Annuitant Express Pay Application for Death Benefits, OPM Form RI 25–051. As required by the Paperwork Reduction Act of 1995 (Public Law 104–13, 44 U.S.C. chapter 35) as amended by the Clinger-Cohen Act (Pub. L. 104–106), OPM is soliciting comments for this collection. The information collection was previously published in the **Federal Register** (81 FR 47444, July 21, 2016) allowing for a 60-day public comment period. No comments were received for this information collection. The purpose of this notice is to allow an additional 30 days for public comments.

DATES: Comments are encouraged and will be accepted until December 22, 2016. This process is conducted in accordance with 5 CFR 1320.1.

ADDRESSES: Interested persons are invited to submit written comments on the proposed information collection to Office of Information and Regulatory Affairs, Office of Management and Budget, 725 17th Street NW., Washington, DC 20503, Attention: Desk Officer for the Office of Personnel Management or sent by email to *oira_submission@omb.eop.gov* or faxed to (202) 395–6974.

FOR FURTHER INFORMATION CONTACT: A copy of this ICR, with applicable supporting documentation, may be obtained by contacting the Office of Information and Regulatory Affairs, Office of Management and Budget, 725 17th Street NW., Washington, DC 20503, Attention: Desk Officer for the Office of Personnel Management or sent by email to *oira_submission@omb.eop.gov* or faxed to (202) 395–6974.

SUPPLEMENTARY INFORMATION: OPM Form RI 25–051 will be used by the Civil Service Retirement System solely to pay benefits to the widow(er) of an annuitant. This application is intended for use in immediately authorizing payments to an annuitant's widow or widower, based on the report of death, when our records show the decedent elected to provide benefits for the applicant. The Office of Management and Budget is particularly interested in comments that:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of functions of OPM, including whether the information will have practical utility;

2. Evaluate the accuracy of OPM's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

3. Enhance the quality, utility, and clarity of the information to be collected; and

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submissions of responses.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79323; File No. SR–ISEMercury-2016–20]

Self-Regulatory Organizations; ISE Mercury, LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Make Non-Controversial and Technical Changes to Exchange Rules

November 16, 2016.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 3, 2016, ISE Mercury, LLC (''ISE Mercury'' or ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to make a number of non-controversial and technical changes to its rules as described in more detail below.

The text of the proposed rule change is available on the Exchange's Web site at *www.ise.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange is proposing to make a number of non-controversial changes and technical corrections to its rules. Specifically, these changes are all to correct typographical errors and delete obsolete rule text.[3] The changes are described in more detail below.

1. No Bid Options/Limit Price

Rule 713(b), which deals with priority of orders, provides that if the lowest offer for any options contract is $0.05 then no member shall enter a market order to sell that series, and any such market order shall be considered a limit order to sell at a price of $0.05. This provision is intended to prevent members from submitting market orders to sell in no bid series, which could execute at a price of $0.00, and to instead convert those orders to limit orders with a limit price equal to the minimum trading increment, *i.e.,* $0.05 for most option classes.[4] A ''no bid'' or ''zero bid'' series refers to an option where the bid price is $0.00. Series of options quoted no bid are usually deep out-of-the-money series that are perceived as having little if any chance of expiring in-the-money. For options that trade in regular nickel increments, a best offer of $0.05 corresponds to a best bid of $0.00, *i.e.* one minimum trading increment below the offer. However, option series may be no bid with other offer prices as well. For example, an option class would be considered no bid if it is quoted at $0.00 (bid)—$0.15 (offer). In order to avoid having these orders execute at a price of $0.00, the Exchange proposes to clarify that Rule 713(b) applies to all option classes that are quoted no bid, rather than just those option classes that have an offer of $0.05. Currently, options exchanges have in place a pilot (the ''Penny Pilot'') to quote and trade options in one cent increments, lowering the minimum trading increment from $0.05 in certain symbols. The Exchange therefore proposes to amend Rule 713(b) to clarify that the Exchange will put a limit price equal to the minimum trading increment on market orders to sell a no bid option series. For example, if the deep out-of-the-money SPY December $230.00 call, which is traded in penny increments, is quoted at $0.00 (bid)—$0.03 (offer), a market order to sell would instead be treated as a limit order to sell at a price of $0.01.

2. Non-Displayed Penny Orders and Quotes

The Exchange currently has rules in place that allow members to enter non-displayed orders and quotes in penny increments in designated options with a minimum trading increment greater than one cent (''non-displayed penny orders and quotes'').[5] A non-displayed penny order or quote is available for execution at its penny price but is displayed at the closest minimum trading increment that does not violate the limit price.[6] The Exchange does not offer non-displayed penny orders or quotes and therefore proposes to delete obsolete references to this order type from its rules. First, the Exchange proposes to delete Rule 715(b)(4), which defines non-displayed penny orders. Second, the Exchange proposes to delete language in Rule 804(b)(1) and Rule 805(a) that permits market makers to enter non-displayed penny quotes and orders, respectively. Third, the Exchange proposes to delete language in Supplementary Material .06 to Rule 716 concerning split prices for non-displayed penny orders and quotes entered into the Facilitation and Solicitation Mechanisms. Finally, the Exchange proposes to delete language in Supplementary Material .03 to Rule 717 concerning the execution of non-displayed penny orders that an Electronic Access Member represents as agent against principal orders and orders solicited from other broker dealers.

3. Customer Participation Orders

A customer participation order (''CPO'') is an order type that can be used by Public Customers[7] to participate in the Price Improvement Mechanism (''PIM'').[8] Upon entry of a Crossing Transaction into the PIM,[9] a

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] *See also* Securities Exchange Act Release No. 73808 (December 10, 2014), 79 FR 74797 (December 16, 2014) (SR–ISE–2014–54) (Notice of Filing and Immediate Effectiveness of Proposed Rule Change to Make Technical Corrections to the International Securities Exchange, LLC (''ISE'') Rules).

[4] Symbols not included in the Penny Pilot generally trade in $0.05 increments if the options contract is trading at less than $3.00 per option, and $0.10 increments if the options contract is trading at $3.00 per option or higher. *See* Rule 710.

[5] *See* Rule 715(b)(4), Rule 804(b)(1) and Rule 805(a).

[6] *See* Rule 715(b)(4) and Rule 804(b)(1).

[7] The term ''Public Customer'' means a person or entity that is not a broker or dealer in securities. See Rule 100(a)(38).

[8] The PIM is a process by which an Electronic Access Member can provide price improvement opportunities for a transaction wherein the Electronic Access Member seeks to facilitate an order it represents as agent, and/or a transaction wherein the Electronic Access Member solicited interest to execute against an order it represents as agent (a ''Crossing Transaction''). *See* Rule 723(a).

[9] A Crossing Transaction is comprised of the order the Electronic Access Member represents as agent (the ''Agency Order'') and a counter-side order for the full size of the Agency Order (the ''Counter-Side Order''). The Counter-Side Order may represent interest for the Member's own account, or interest the Member has solicited from

broadcast message is sent to all members, who then have 500 milliseconds to enter orders that indicate the size and price at which they want to participate in the execution (''Improvement Orders'').[10] The CPO is an instruction to the member to enter an Improvement Order on behalf of a Public Customer. Specifically, a CPO is a limit order on behalf of a Public Customer that, in addition to the limit order price in standard increments, includes a price stated in one cent increments at which the Public Customer wishes to participate in trades executed in the same options series in penny increments through the PIM.[11] The Exchange does not offer CPOs and therefore proposes to delete obsolete references to this order type from its rules. The Exchange first proposes to delete Rule 715(f), which defines CPOs. Furthermore, the Exchange proposes to remove two references to CPOs in other rules. Specifically, the Exchange proposes to remove references to CPOs in Supplementary Material .06 to Rule 723, which explains when Improvement Orders can be entered with respect to CPOs,[12] and in Rule 723(d), which notes that the agency side of an order entered into the Price Improvement Mechanism may execute against CPOs at the end of the exposure period.

4. Linkage Rules

The Exchange proposes to delete Supplementary Material .04 and .05 to Rule 803, which contains duplicative and obsolete provisions relevant to away market routing. In particular, the content of Supplementary Material .04 and .05 to Rule 803 is now contained in Supplementary Material .06 and .07 to Rule 1901[13] because linkage handling is performed by unaffiliated broker dealers (*i.e.,* Linkage Handlers) on the Exchange. Therefore as described above, the Exchange proposes to delete this language from Rule 803, which concerns the obligations of market makers.

5. Supplementary Material

The Exchange notes that certain supplementary material is mistakenly labelled as ''supplemental'' material in the Exchange's rulebook.[14] In order to achieve consistency with how other rules are labelled, the Exchange proposes to change these to instead refer to ''supplementary'' material. Finally, the Exchange proposes to make a non-substantive change to Supplementary Material to Rule 803, which concerns the obligations of market makers, by updating the word ''To'' to lower case.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder that are applicable to a national securities exchange, and, in particular, with the requirements of Section 6(b) of the Act.[15] In particular, the proposal is consistent with Section 6(b)(5) of the Act[16] because it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanisms of a free and open market and a national market system and, in general, to protect investors and the public interest. The Exchange believes it is appropriate to make the proposed technical corrections to its rules so that Exchange members and investors have a clear and accurate understanding of the meaning of the ISE Mercury rules.

1. No Bid Options/Limit Price

The Exchange currently operates a pilot program to permit designated options classes to be quoted and traded in increments as low as one cent. The Exchange is proposing to amend Rule 713(b) to account for the fact that option classes selected for inclusion in the Penny Pilot are permitted to trade in penny increments. For penny classes that are quoted no bid, the Exchange will convert a market order to sell to a limit order with a price of one cent. In addition, the proposed rule change clarifies that Rule 713(b) applies to all series with a bid of $0.00, and not just those series that also have an offer of $0.05. The proposed rule change is necessary to account for options trading in multiple trading increments, including under the Penny Pilot, and will ensure that market orders to sell are not inadvertently executed at a price of zero. The Exchange believes that these changes more accurately reflect the intent of Rule 713(b), as described above, and will eliminate investor confusion with respect to the operation of this rule by more accurately describing the functionality provided by the Exchange.

2. Non-Displayed Penny Orders and Quotes/Customer Participation Orders

As explained above, the Exchange does not offer non-displayed penny orders and quotes or customer participation orders, and thus proposes to remove obsolete definitions and other outdated references to these order types. The Exchange believes that these changes will eliminate investor confusion regarding order types available for trading on ISE Mercury to the benefit of members and investors.

3. Linkage Rules

The proposed changes to the linkage rules are non-substantive and intended to reduce investor confusion. As explained above, the Exchange is deleting duplicative and obsolete rule text from Chapter 8 of its rulebook because linkage handling is handled by Linkage Handlers. Therefore, the Exchange believes that these rules are more appropriately located in Chapter 19 of the Exchange's rulebook, which incorporates by reference Chapter 19 of the ISE rulebook.

4. Supplementary Material

The proposed change to label supplementary material correctly is non-substantive and is intended to achieve consistency in how these rules are labelled to the benefit of members and investors.

B. Self-Regulatory Organization's Statement on Burden on Competition

In accordance with Section 6(b)(8) of the Act,[17] the Exchange does not believe that the proposed rule change will impose any burden on intermarket or intramarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change makes technical, non-substantive amendments to the Exchange's rules in order to eliminate investor confusion, and is not designed to have any competitive impact.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect

one or more other parties, or a combination of both. *See* Rule 723(b).

[10] *See* Rule 723(c)(1).

[11] *See* Rule 715(f).

[12] Although CPOs are no longer available, members will continue to be able to enter Improvement Orders for the account of Public Customers.

[13] *See* Securities Exchange Act Release No. 73808 (December 10, 2014), 79 FR 74797 (December 16, 2014) (SR–ISE–2014–54) (Notice of Filing and Immediate Effectiveness of Proposed Rule Change to Make Technical Corrections to the ISE Rules). Chapter 19 of the Exchange's rulebook incorporates Chapter 19 of the ISE rulebook by reference.

[14] *See* ''Supplemental'' Material to Rules 717 and 809. *See* also reference in Rule 721(a)(3) to ''Supplemental'' Material .01 to Rule 717.

[15] 15 U.S.C. 78f(b).

[16] 15 U.S.C. 78f(b)(5).

[17] 15 U.S.C. 78f(b)(8).

the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act [18] and subparagraph (f)(6) of Rule 19b–4 thereunder.[19]

A proposed rule change filed under Rule 19b–4(f)(6) normally does not become operative prior to 30 days after the date of filing. However, Rule 19b–4(f)(6)(iii) [20] permits the Commission to designate a shorter time if such action is consistent with the protection of investors and the public interest. In its filing with the Commission, the Exchange requests that the Commission waive the 30-day operative delay. The Exchange asserts that waiver of the operative delay is consistent with the protection of investors and the public interest because the proposed rule change makes non-substantive, technical changes to the Exchange's rules. The Exchange also believes that the proposed rule change increases the clarity of ISE Mercury rules to the benefit of members and investors that trade on the Exchange. For these reasons, the Commission believes that waiver of the 30-day operative delay is consistent with the protection of investors and the public interest. Therefore, the Commission designates the proposed rule change to be operative upon filing. [21]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) Necessary or appropriate in the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

[18] 15 U.S.C. 78s(b)(3)(A)(iii).

[19] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

[20] 17 CFR 240.19b–4(f)(6)(iii).

[21] For purposes only of waiving the 30-day operative delay, the Commission also has considered the proposed rule's impact on efficiency, competition, and capital formation. *See* 15 U.S.C. 78c(f).

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–ISEMercury–2016–20 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–ISEMercury-2016–20. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml).* Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–ISEMercury–2016–20 and should be submitted on or before December 13, 2016.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[22]

Brent J. Fields,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79322; File No. SR–Phlx–2016–97)

Self-Regulatory Organizations; NASDAQ PHLX LLC; Order Granting Approval of Proposed Rule Change To Delete Outdated or Unnecessary Rule Language in Phlx Rule 1020

November 16, 2016.

I. Introduction

On September 27, 2016, NASDAQ PHLX LLC (''Exchange'' or ''Phlx'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'') [1] and Rule 19b–4 thereunder,[2] a proposed rule change to delete or amend its rules relating to specialists. The proposed rule change was published for comment in the **Federal Register** on October 14, 2016.[3] The Commission received no comment letters on the proposed rule change. This order approves the proposed rule change.

II. Description of the Proposal

Phlx Rule 1020 contains provisions relating to the registration and functions of options specialists.[4] Section (b) provides that a member registered as a specialist in one or more options has an obligation to assist in the maintenance of a fair and orderly market, ''in addition to the execution of orders entrusted to him in such options.'' The Exchange proposes to delete the language in section (b) regarding execution of entrusted orders. The Exchange represents that today, specialists on the Exchange trade only for their own account and ''no longer handle any agency orders whatsoever in their role as specialists.'' [5]

[22] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] *See* Securities Exchange Act Release No. 79073 (October 11, 2016), 81 FR 71153 (October 14, 2016) (''Notice'').

[4] A ''specialist'' is an Exchange member who is registered as an options specialist pursuant to Phlx Rule 1020(a). Specialists are subject to quoting and registration obligations set forth in Phlx Rules 1014(b), 1020 and 1080.02.

[5] *See* Notice, *supra* note 3, at 71154.

Commentary .01 of Phlx Rule 1020 provides that in ''effecting transactions'' for a specialist's own account for the purpose of establishing or increasing a position, a specialist is to effect such transactions in a reasonable and orderly manner in relation to the condition of the general market, the market in the particular option, and the adequacy of his position to the immediate and reasonably anticipated needs of the options market. Commentary .01 sections (a) through (d) provide that certain types of transactions to establish or increase a position are not to be effected except when they are reasonably necessary to render the specialist's position adequate to such needs.[6] The Exchange proposes to delete the last sentence of Commentary .01 and sections (a) through (d). The Exchange represents that today, specialists do not ''effect transactions'' in the sense of matching bids and offers to cause a transaction execution, except in rare cases.[7] Instead, specialists submit bids and offers to be matched by the PHLX XL trading system.[8] Therefore, the Exchange believes that the specialist may be unable to determine the price of the last sale, which would be required for a specialist to comply with the language Phlx proposes to be deleted.

Commentary .02 of Phlx Rule 1020 provides that, for transactions of a specialist for his own account that liquidate or decrease his position in an option in which he is registered, such transactions are to be ''effected'' in a reasonable and orderly manner in relation to the condition of the general market, the market in the particular option, and the adequacy of the specialist's positions to the immediate and reasonably anticipated needs of the options market. Commentary .02 sections (a) through (c) describe certain restrictions on specialists when liquidating or decreasing such positions.[9] The Exchange proposes to delete part of the last sentence of Commentary .02 and sections (a) through (c). The Exchange represents that, as discussed above, a specialist may be unable to determine the ''last different price'' as required to comply with sections (a) and (c).[10] The Exchange believes also that section (b) is redundant to Rule 1020(b), which already contains the ''fair and orderly'' requirement.[11]

Commentary .03 of Phlx Rule 1020 provides that a specialist's quotation, made for his own account, should be such that a transaction effected at his quoted price or within the quoted spread, whether having the effect of reducing or increasing the specialist's position, would bear a proper relation to preceding transactions and anticipated succeeding transactions. The Exchange proposes to delete Commentary .03. The Exchange represents that, due to the speed of trading that occurs today on the Phlx XL trading system, specialists may not have knowledge of preceding transactions and would not be able to adjust quotes as needed to comply with Commentary .03 before the quotes are accessed.[12]

Commentary .04 of Phlx Rule 1020 provides that a specialist should avoid participating as a dealer in opening or reopening an option in such a manner as to reverse the balance of public supply and demand as reflected by market and limited price orders at or near the price of the previous close or halt, unless the condition of the general market or the specialist's position in light of the reasonably anticipated needs of the market make it advisable to do so, or unless the specialist has obtained the prior approval of an Options Exchange Official to do so. The commentary provides that he may, however, buy or sell an option as a dealer to minimize the disparity between supply and demand at an opening or reopening. The Exchange proposes to delete Commentary .04. The Exchange represents that a specialist no longer manually opens options classes; the PHLX XL trading system handles the opening and reopening of options.[13]

Commentary .05 of Phlx Rule 1020 prohibits a member acting as a specialist from effecting transactions for the purpose of adjusting a LIFO inventory in an option in which he is acting except as is reasonably necessary to assist in the maintenance of a fair and orderly market. The Exchange believes that Commentary .05 is no longer necessary and proposes to delete it.[14]

Commentary .06 of Phlx Rule 1020 restricts a specialist from assigning options in which he is registered to an investment account. The Commentary states that a specialist may not add to a position in an investment account unless reasonably necessary to permit the specialist to assist in the maintenance of a fair and orderly market. Furthermore, a specialist may not effect a transfer of options in which he is registered from his dealer account to an investment account if the transfer would result in a short position in the dealer account. The Commentary also provides that in the maintenance of price continuity with reasonable depth, it is commonly desirable for a specialist to supply options to the market, even though he may have to sell short to do so, to the extent reasonably necessary to meet the needs of the market. The Exchange proposes to delete Commentary .06 because investment accounts are no longer used by specialists.[15]

III. Discussion and Commission Findings

After careful review, the Commission finds that the proposed rule change is consistent with the requirements of the Act and rules and regulations thereunder applicable to a national securities exchange.[16] In particular, the Commission finds that the proposed rule change is consistent with Section

[6] Specifically, Commentary .01 sections (a) through (d) provide that the following types of transactions to establish or increase a position are not to be effected except when they are reasonably necessary to render the specialist's position adequate to such needs: (a) A purchase at a price above the last sale in the same trading session; (b) the purchase of all or substantially all the options offered on the book at a price equal to the last sale, when the option so offered represents all or substantially all the options offered in the market; and when a substantial amount of an option is offered at a price equal to the last sale price, the purchase of more than 50% of all the options offered at the last sale price; (c) the supplying of all or substantially all the options bid for on the book at a price equal to the last sale, when the option so bid for represents all or substantially all the options bid for in the market; and when a substantial amount of the options bid for at a price equal to the last sale price, the supplying of more than 50% of all the options bid for at the last sale price; (d) failing to re-offer or re-bid where necessary after effecting transactions described in (a), (b), or (c). The rule permits transactions of these types to be effected, however, with the approval of an Options Exchange Official or in relatively inactive markets where they are an essential part of a proper course of dealings and where the amount of an option involved and the price change, if any, are normal in relation to the market.

[7] *See* Notice, *supra* note 3, at 71154. The Exchange represents that although a specialist may ''effect transactions'' with a market maker on the Exchange's trading floor, the vast majority of transactions are executed electronically by the trading system.

[8] *See id.*

[9] Commentary .02 sections (a) through (c) also provide that, unless he has the prior approval of an Options Exchange Official, he should avoid: (a) Liquidation of all or substantially all of a position by selling options at prices below the last different price or by purchasing options at prices above the last different price unless such transactions are reasonably necessary in relation to the specialist's overall position in the options in which he is registered; (b) failing to maintain a fair and orderly market during liquidations; or (c) failing to re-enter the market where necessary, after effecting transactions described in (a) above.

[10] *See* Notice, *supra* note 3, at 71155.

[11] *See id.*

[12] *See id.*

[13] *See id.*

[14] *See id.*

[15] *See id.*

[16] In approving the proposed rule changes, the Commission has considered their impact on efficiency, competition, and capital formation. *See* 15 U.S.C. 78c(f).

6(b)(5) of the Act,[17] which requires, among other things, that the rules of a national securities exchange be designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest; and are not designed to permit unfair discrimination between customers, issuers, brokers, or dealers. The Commission believes that the deletion of Phlx Rules 1020(b), Commentary .01, Commentary .02 (a) and (c), Commentary .03, Commentary .04, and Commentary .06 should protect investors by helping to ensure that the Phlx rules accurately describe the current operations of the Exchange and obligations of its members. In addition, the Commission notes that the deletion of Commentary .02 (b) to remove redundant rule language should add clarity to Phlx's rules and that the deletion of Commentary .05 and Commentary .06 should provide more clarity regarding the obligations of specialists on the Exchange.

Accordingly, for the reasons discussed above, the Commission finds that the proposed rule change is consistent with Section 6(b)(5) of the Act.

V. Conclusion

It is therefore ordered pursuant to Section 19(b)(2) of the Act [18] that the proposed rule change (SR–PHLX–2016–97) be and hereby is approved.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[19]

SECURITIES AND EXCHANGE COMMISSION

[Release Nos. 33–10257; 34–79336; File No. 265–28]

Investor Advisory Committee Meeting

AGENCY: Securities and Exchange Commission.

ACTION: Notice of meeting of Securities and Exchange Commission Dodd-Frank Investor Advisory Committee.

SUMMARY: The Securities and Exchange Commission Investor Advisory Committee, established pursuant to Section 911 of the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010, is providing notice that it will hold a public meeting. The public is invited to submit written statements to the Committee.

DATES: The meeting will be held on Thursday, December 8, 2016 from 9:30 a.m. until 3:00 p.m. (ET). Written statements should be received on or before December 8, 2016.

ADDRESSES: The meeting will be held in Multi-Purpose Room LL–006 at the Commission's headquarters, 100 F Street NE., Washington, DC 20549. The meeting will be webcast on the Commission's Web site at *www.sec.gov.* Written statements may be submitted by any of the following methods:

Electronic Statements

- Use the Commission's Internet submission form (*http://www.sec.gov/rules/other.shtml*); or
- Send an email message to *rules-comments@sec.gov.* Please include File No. 265–28 on the subject line; or

Paper Statements

- Send paper statements to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File No. 265–28. This file number should be included on the subject line if email is used. To help us process and review your statement more efficiently, please use only one method.

Statements also will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Room 1580, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. All statements received will be posted without change; we do not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly.

FOR FURTHER INFORMATION CONTACT: Marc Oorloff Sharma, Senior Special Counsel, Office of the Investor Advocate, at (202) 551–3302, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549.

SUPPLEMENTARY INFORMATION: The meeting will be open to the public, except during that portion of the meeting reserved for an administrative work session during lunch. Persons needing special accommodations to take part because of a disability should notify the contact person listed in the section above entitled **FOR FURTHER INFORMATION CONTACT.**

The agenda for the meeting includes: remarks from Commissioners; a discussion regarding investor protection priorities for the New Year; the announcement of election results for open officer positions; an update on the Commission's response to the rulemaking mandate of the Fixing America's Surface Transportation Act concerning public company disclosure requirements; and a nonpublic administrative work session during lunch.

Dated: November 17, 2016.

Brent J. Fields,

Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79328; File No. SR–NYSEMKT–2016–102]

Self-Regulatory Organizations; NYSE MKT LLC; Notice of Filing of Proposed Rule Change, as Modified by Amendment No. 1 Thereto, Introducing NYSE OptX

November 16, 2016.

Pursuant to Section 19(b)(1) [1] of the Securities Exchange Act of 1934 (the "Act") [2] and Rule 19b–4 thereunder,[3] notice is hereby given that on November 3, 2016, NYSE MKT LLC, on behalf of NYSE Amex Options ("NYSE Amex Options" or the "Exchange") filed with the Securities and Exchange Commission (the "Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. On November 15, 2016, the Exchange filed Amendment No. 1 to the proposal.[4] The Commission is publishing this notice to solicit comments on the proposed rule change, as modified by Amendment No. 1, from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to introduce NYSE OptX, an order entry platform that would allow for the submission of Qualified Contingent Cross ("QCC") Orders and orders executed in the

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

[4] In Amendment No. 1, the Exchange proposed to amend note 10, *infra,* to clarify that QCC Orders sent through NYSE OptX to the Exchange for execution would comply with the order format and EOC entry requirements established by the Exchange, which are set forth in Rule 955NY.

Exchange's Customer Best Execution (''CUBE'') Auction by ATP Holders. The proposed rule change is available on the Exchange's Web site at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to introduce NYSE OptX, an order entry platform that would allow for the submission of QCC Orders and CUBE Orders (collectively, ''paired orders'') by ATP Holders.[5] ATP Holders currently send paired orders through the use of third party front end order management systems, such as PrecISE[6] or PULSe,[7] or by calling Floor Brokers and relaying their orders by telephone.

NYSE OptX is an order entry platform that utilizes a combination of Instant Messaging (IM) and browser-based technology to allow ATP Holders to submit paired orders for execution on the Exchange's trading system.[8] There are multiple steps required for ATP Holders to execute a paired order through NYSE OptX.[9] First, an ATP Holder would send a paired order in plain text to NYSE OptX.[10] NYSE OptX would be established by an ATP Holder as an IM contact that can be accessed through various instant messaging platforms. Next, upon receipt of the plain text message sent by an ATP Holder, NYSE OptX would translate the message into a pre-populated order ticket with details of the order and return the order ticket to the ATP Holder in a browser-based URL. When the ATP Holder opens the URL, the pre-populated order ticket would appear with the order information as entered by the ATP Holder. The ATP Holder would then confirm the order ticket and submit the order to the Exchange for execution, or send the order to a Floor Broker for execution. If an ATP Holder sends the order to a Floor Broker, the Floor Broker would verify the order and send it through NYSE OptX for execution on the Exchange's trading system much like how the Floor Broker would normally execute the order but without having to re-key the order into the Floor Broker's terminal. After an order is executed on the Exchange,[11] NYSE OptX would remit details of the execution back to the ATP Holder.

NYSE OptX is designed as an alternative to the front end order management systems, such as PrecISE and PULSe, and as an alternative to the use of telephones for the sending by ATP Holders of paired orders to the Exchange. NYSE OptX would not provide ATP Holders with the capability to send any other type of orders or the capability to send paired orders for execution to other options markets. At this time, ATP Holders would only be able to use NYSE OptX for the transmission of paired orders. Use of NYSE OptX by ATP Holders would be voluntary and ATP Holders would continue to be able to submit paired orders through the use of a third party front end order management system, or by telephone, as they do today.

While PrecISE and PULSe require software to be installed on a desktop computer, NYSE OptX does not require installation of any software as it relies on existing instant messaging technology which would make its use by ATP Holders seamless. ATP Holders would also not need a physical workstation to use NYSE OptX.

The Exchange notes that the use of NYSE OptX to send paired orders is optional. The Exchange is offering NYSE OptX as a convenience to ATP Holders and NYSE OptX would not be the exclusive means available to ATP Holders to execute paired orders on the Exchange. The Exchange will announce the effective date of NYSE OptX in a Trader Update to be published no later than 90 days following Commission approval. The effective date will be no later than 270 days following publication of that Trader Update.

2. Statutory Basis

The proposed rule change is consistent with Section 6(b)[12] of the Securities Exchange Act of 1934 (the ''Act''), in general, and furthers the objectives of Section 6(b)(5),[13] in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, and to remove impediments to and perfect the mechanism of a free and open market and a national market system.

The Exchange believes the proposed rule change would promote just and equitable principles of trade and remove impediments to and perfect the mechanism of a free and open market because offering NYSE OptX as an alternate means to submit paired orders for execution on the Exchange would generally allow the Exchange to better compete for such orders and thus enhance competition. The Exchange believes that the proposed rule change is reasonable as it could encourage ATP Holders to direct a greater number of paired orders to the Exchange instead of sending such orders to a competing exchange.

The Exchange further believes that the proposed rule change would allow the Exchange of [sic] offer a new service on an equitable and non-discriminatory basis. Specifically, the Exchange believes that use of NYSE OptX is equitable as it is voluntary and not required for ATP Holders to execute paired orders on the Exchange.

---

[5] The term ''ATP Holder'' refers to a natural person, sole proprietorship, partnership, corporation, limited liability company or other organization, in good standing, that has been issued an ATP. An ATP Holder must be a registered broker or dealer pursuant to Section 15 of the Securities Exchange Act of 1934. *See* Rule 900.2NY.(5).

[6] PrecISE Trade® is a front-end order and execution management system for trading options and stock-option combinations. *See https://www.ise.com/options/precise/.*

[7] PULSe℠ is a front end execution management system that allows users to send orders to CBOE, C2 and to other U.S. options and stock exchanges. *See https://www.cboe.org/hybrid/pulsesalessheet.pdf.*

[8] The Exchange represents that NYSE OptX is merely an instant messaging platform to link ATP Holders with the Exchange's trading system (*i.e.,* it is a new means of sending paired orders to the Exchange's existing trading system), and does not require any changes to the Exchange's communication or surveillance rules.

[9] ATP Holders would be required to log into NYSE OptX each trading day, similar to how they would log into any other front end order management system.

[10] ATP Holders would be required to provide all the essential information regarding paired orders when sending it to NYSE OptX, including the price of the option and the stock, the size and side of the order, *i.e.,* buy or sell, and delta. The Exchange represents that QCC Orders sent to the Exchange for execution would comply with the order format and EOC entry requirements established by the Exchange. *See* Rule 955NY—Order Format and System Entry Requirements. *See also* Amendment No. 1, *supra* note 4.

[11] All executions would be subject to the Exchange's standard transaction fees and credits applicable to QCC Orders and CUBE Orders.

[12] 15 U.S.C. 78f(b).

[13] 15 U.S.C. 78f(b)(5).

Additionally, as proposed, the Exchange would provide NYSE OptX to ATP Holders on a non-discriminatory basis in that NYSE OptX would be available to all ATP Holders in a 'one-size fits all' offering in which all ATP Holders would be subject to the same terms and conditions and would receive the same level of service.

For these reasons, the Exchange believes that the proposal is consistent with the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

In accordance with Section 6(b)(8) of the Act,[14] the Exchange does not believe that the proposed rule change would impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. To the contrary, the Exchange believes that the proposed rule change evidences the strength of competition in the options industry. Specifically, the Exchange believes the proposed rule change will enhance the competitiveness of the Exchange relative to other options exchanges that transact in paired orders.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or up to 90 days (i) as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve or disapprove the proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change, as modified by Amendment No. 1, is consistent with the Act. Comments may be submitted by any of the following methods:

[14] 15 U.S.C. 78f(b)(8).

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml);* or
- Send an email to *rule-comments@sec.gov. Please include File Number* SR–NYSEMKT–2016–102 *on the subject line.*

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSEMKT–2016–102. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml).* Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSEMKT–2016–102 and should be submitted on or before December 13, 2016.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[15]

Brent J. Fields,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79327; File No. SR–NYSEArca–2016–143]

Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Filing of Proposed Rule Change, as Modified by Amendment No. 1 Thereto, Introducing NYSE OptX

November 16, 2016.

Pursuant to Section 19(b)(1)[1] of the Securities Exchange Act of 1934 (the "Act")[2] and Rule 19b–4 thereunder,[3] notice is hereby given that on November 3, 2016, NYSE Arca, Inc. (the "Exchange" or "NYSE Arca") filed with the Securities and Exchange Commission (the "Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. On November 15, 2016, the Exchange filed Amendment No. 1 to the proposal.[4] The Commission is publishing this notice to solicit comments on the proposed rule change, as modified by Amendment No. 1, from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to introduce NYSE OptX, an order entry platform that would allow for the submission of Qualified Contingent Cross orders ("QCC Orders") by OTP Holders and OTP Firms. The proposed rule change is available on the Exchange's Web site at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below,

[1] 15 U.S.C.78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

[4] In Amendment No. 1, the Exchange proposed to amend note 11, *infra,* to clarify that QCC Orders sent through NYSE OptX to the Exchange for execution would comply with the order format and EOC entry requirements established by the Exchange, which are set forth in Rule 6.67.

of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to introduce NYSE OptX, an order entry platform that would allow for the submission of QCC Orders by OTP Holders [5] and OTP Firms [6] (collectively, ''OTPs''). OTPs currently send QCC Orders through the use of third party front end order management systems, such as PrecISE [7] or PULSe,[8] or by calling Floor Brokers and relaying their orders by telephone.

NYSE OptX is an order entry platform that utilizes a combination of Instant Messaging (IM) and browser-based technology to allow OTPs to submit QCC Orders for execution on the Exchange's trading system.[9] There are multiple steps required for OTPs to execute their QCC Orders through NYSE OptX.[10] First, an OTP would send a QCC Order in plain text to NYSE OptX.[11] NYSE OptX would be established by an OTP as an IM contact that can be accessed through various instant messaging platforms. Next, upon receipt of the plain text message sent by an OTP, NYSE OptX would translate the message into a pre-populated order ticket with details of the order and return the order ticket to the OTP in a browser-based URL. When the OTP opens the URL, the pre-populated order ticket would appear with the order information as entered by the OTP. The OTP would then confirm the order ticket and submit the order to the Exchange for execution, or send the order to a Floor Broker for execution. If an OTP sends the order to a Floor Broker, the Floor Broker would verify the order and send it through NYSE OptX for execution on the Exchange's trading system much like how the Floor Broker would normally execute the order but without having to re-key the order into the Floor Broker's terminal. After an order is executed on the Exchange,[12] NYSE OptX would remit details of the execution back to the OTP.

NYSE OptX is designed as an alternative to the front end order management systems, such as PrecISE and PULSe, and as an alternative to the use of telephones for the sending by OTPs of QCC Orders to the Exchange. NYSE OptX would not provide OTPs with the capability to send any other type of orders or the capability to send QCC Orders for execution to other options markets. At this time, OTPs would only be able to use NYSE OptX for the transmission of QCC Orders. Use of NYSE OptX by OTPs would be voluntary and OTPs would continue to be able to submit QCC Orders through the use of a third party front end order management system, or by telephone, as they do today.

While PrecISE and PULSe require software to be installed on a desktop computer, NYSE OptX does not require installation of any software as it relies on existing instant messaging technology which would make its use by OTPs seamless. OTPs would also not need a physical workstation to use NYSE OptX.

The Exchange notes that the use of NYSE OptX to send QCC Orders is optional. The Exchange is offering NYSE OptX as a convenience to OTPs and NYSE OptX would not be the exclusive means available to OTPs to execute QCC Orders on the Exchange. The Exchange will announce the effective date of NYSE OptX in a Trader Update to be published no later than 90 days following Commission approval. The effective date will be no later than 270 days following publication of that Trader Update.

2. Statutory Basis

The proposed rule change is consistent with Section 6(b) [13] of the Securities Exchange Act of 1934 (the ''Act''), in general, and furthers the objectives of Section 6(b)(5),[14] in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, and to remove impediments to and perfect the mechanism of a free and open market and a national market system.

The Exchange believes the proposed rule change would promote just and equitable principles of trade and remove impediments to and perfect the mechanism of a free and open market because offering NYSE OptX as an alternate means to submit QCC Orders for execution on the Exchange would generally allow the Exchange to better compete for QCC Orders and thus enhance competition. The Exchange believes that the proposed rule change is reasonable as it could encourage OTPs to direct a greater number of QCC Orders to the Exchange instead of sending such orders to a competing exchange.

The Exchange further believes that the proposed rule change would allow the Exchange of [sic] offer a new service on an equitable and non-discriminatory basis. Specifically, the Exchange believes that use of NYSE OptX is equitable as it is voluntary and not required for OTPs to execute QCC Orders on the Exchange. Additionally, as proposed, the Exchange would provide NYSE OptX to OPTs [sic] on a non-discriminatory basis in that NYSE OptX would be available to all OTPs in a 'one-size fits all' offering in which all OTPs would be subject to the same terms and conditions and would receive the same level of service.

For these reasons, the Exchange believes that the proposal is consistent with the Act.

[5] The term ''OTP Holder'' refers to a natural person, in good standing, who has been issued an OTP, or has been named as a Nominee. An OTP Holder must be a registered broker or dealer pursuant to Section 15 of the Securities Exchange Act of 1934, or a nominee or an associated person of a registered broker or dealer that has been approved by the Exchange to conduct business on the Exchange's Trading Facilities. *See* Rule 1.1(q).

[6] The term ''OTP Firm'' refers to a sole proprietorship, partnership, corporation, limited liability company or other organization in good standing who holds an OTP or upon whom an individual OTP Holder has conferred trading privileges on the Exchange's Trading Facilities pursuant to and in compliance with Exchange Rules. An OTP Firm must be a registered broker or dealer pursuant to Section 15 of the Securities Exchange Act of 1934. *See* Rule 1.1(r).

[7] PrecISE Trade® is a front-end order and execution management system for trading options and stock-option combinations. *See https://www.ise.com/options/precise/.*

[8] PULSe℠ is a front end execution management system that allows users to send orders to CBOE, C2 and to other U.S. options and stock exchanges. *See https://www.cboe.org/hybrid/pulsesalessheet.pdf.*

[9] The Exchange represents that NYSE OptX is merely an instant messaging platform to link OTPs with the Exchange's trading system (*i.e.,* it is a new means of sending QCC Orders to the Exchange's existing trading system), and does not require any changes to the Exchange's communication or surveillance rules.

[10] OTPs would be required to log into NYSE OptX each trading day, similar to how they would log into any other front end order management system.

[11] OTPs would be required to provide all the essential information regarding the QCC Order when sending it to NYSE OptX, including the price of the option and the stock, the size and side of the order, *i.e.,* buy or sell, and delta. The Exchange represents that QCC Orders sent to the Exchange for execution would comply with the order format and EOC entry requirements established by the Exchange. *See* Rule 6.67—Order Format and System Entry Requirements. *See also* Amendment No. 1, *supra* note 4.

[12] All executions would be subject to the Exchange's standard transaction fees and credits applicable to QCC Orders.

[13] 15 U.S.C. 78f(b).

[14] 15 U.S.C. 78f(b)(5).

B. Self-Regulatory Organization's Statement on Burden on Competition

In accordance with Section 6(b)(8) of the Act,[15] the Exchange does not believe that the proposed rule change would impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. To the contrary, the Exchange believes that the proposed rule change evidences the strength of competition in the options industry. Specifically, the Exchange believes the proposed rule change will enhance the competitiveness of the Exchange relative to other options exchanges that transact in QCC Orders.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or up to 90 days (i) as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve or disapprove the proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change, as modified by Amendment No. 1, is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSEArca–2016–143 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSEArca–2016–143. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSEArca–2016–143 and should be submitted on or before December 13, 2016.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[16]

Brent J. Fields,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79330; File No. SR–NASDAQ–2016–155]

Self-Regulatory Organizations; The NASDAQ Stock Market LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend the Limit Order Protection for Members Accessing the Nasdaq Market Center

November 16, 2016.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 4, 2016, The NASDAQ Stock Market LLC (''Nasdaq'' or ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the Limit Order Protection or ''LOP'' for members accessing the Nasdaq Market Center and adding rule text related to a collar applicable to Primary Pegging and Market Pegging Orders.

The text of the proposed rule change is available on the Exchange's Web site at *http://nasdaq.cchwallstreet.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange recently adopted a new mechanism to protect against erroneous Limit Orders, which are entered into the Nasdaq Market Center, at Rule 4757(c).[3] This mechanism addresses risks to market participants of human error in entering Limit Orders at unintended prices. Specifically, LOP prevents certain Limit Orders from executing or being placed on the Order Book at prices outside pre-set standard limits.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] *See* Securities Exchange Act Release No. 78246 [sic] (August 24, 2016), 81 FR 59672 (August 30, 2016) (SR–NASDAQ–2016–067).

The System rejects those Limit Orders, rather than executing them automatically. LOP rejects Limit Orders back to the member when the order exceeds certain defined logic. Specifically, LOP prevents certain Limit Orders at prices outside of pre-set standard limits (''LOP Limit'') from being accepted by the System.

Modifications of Orders

In its adoptive filing, the Exchange noted that LOP shall apply to all Quotes and Orders, including any modified Orders.[4] At this time, the Exchange proposes to remove ''including any modified Orders'' from the rule text at rule 4757(c)(i). The Exchange proposes to amend this language because it is misleading and may cause confusion. The Exchange proposes to state that LOP shall apply to all Quotes and Orders, including Quotes and Orders that have been modified, where the modification results in a new timestamp and priority.[5] Any Order that is modified within the System, but does not lose priority, for example an Order that was decremented, will not be subject to LOP after it was modified because the system does not cancel decremented orders from the Order Book. If an Order is cancelled either by the member or by the system and a new Order entered into the System, the new Order would be subject to LOP. For example, if the price of an Order is modified, the system will cancel the Order and the modified Order would receive a new timestamp and priority and this Order would be subject to LOP.

Exceptions to LOP

The Exchange also noted in its adoptive filing that LOP would not apply to Market Orders, Market Maker Peg Orders [6] or Intermarket Sweep Orders (ISO).[7] The Exchange proposes to modify this language to specifically state that LOP would not apply to Orders with Market and Primary Pegging.[8]

There are three types of Pegging Orders: Primary Pegging, Market Pegging and Midpoint Pegging. Pegging is an Order Attribute that allows an Order to have its price automatically set with reference to the NBBO; provided, however, that if Nasdaq is the sole market center at the Best Bid or Best Offer (as applicable), then the price of any Displayed Order with Primary Pegging (as defined below) will be set with reference to the highest bid or lowest offer disseminated by a market center other than Nasdaq. An Order with a Pegging Order Attribute may be referred to as a ''Pegged Order.'' [9] For purposes of this Rule 4703, the price to which an Order is pegged will be referred to as the Inside Quotation, the Inside Bid, or the Inside Offer, as appropriate. There are three varieties of Pegging:

- Primary Pegging means Pegging with reference to the Inside Quotation on the same side of the market. For example, if the Inside Bid was $11, an Order to buy with Primary Pegging would be priced at $11.
- Market Pegging means Pegging with reference to the Inside Quotation on the opposite side of the market. For example, if the Inside Offer was $11.06, an Order to buy with Market Pegging would be priced at $11.06.
- Midpoint Pegging means Pegging with reference to the midpoint between the Inside Bid and the Inside Offer (the ''Midpoint''). Thus, if the Inside Bid was $11 and the Inside Offer was $11.06, an Order with Midpoint Pegging would be priced at $11.03. An Order with Midpoint Pegging is not displayed. An Order with Midpoint Pegging may be executed in sub-pennies if necessary to obtain a midpoint price.

Midpoint Pegging will be the only Pegging Order subject to LOP, provided it has a limit price. Pegging is available only during Market Hours. An Order with Pegging may specify a limit price beyond which the Order may not be executed; provided, however, that if an Order has been assigned a Pegging Order Attribute and a Discretion Order [10] Attribute, the Order may execute at any price within the discretionary price range, even if beyond the limit price specified with respect to the Pegging Order Attribute. A Midpoint Pegging Order may have a discretion attribute. A Midpoint Pegging Order with a discretion price would not be subject to LOP. The Exchange notes that a Midpoint Pegging Order, similar to a Primary or Market Pegging Order, as explained below, may result is [sic] an aggressive or passive price. As a result, the LOP may remove orders that were intended to be more aggressive or passive due to the discretionary attribute. For this reason, the Exchange will not subject a Midpoint Pegging Order with a discretion price to LOP.

In addition, an Order with Primary Pegging or Market Pegging may specify an Offset Amount,[11] such that the price of the Order will vary from the Inside Quotation by the selected Offset Amount. The Offset Amount may be either aggressive or passive. Thus, for example, if a Participant entered an Order to buy with Primary Pegging and a passive Offset Amount of $0.05 and the Inside Bid was $11, the Order would be priced at $10.95. If the Participant selected an aggressive Offset Amount of $0.02, however, the Order would be priced at $11.02. An Order with Primary Pegging and an Offset Amount will not be Displayed, unless the Order is Attributable. The Exchange notes that both Market and Primary Pegging may impact the market by effecting the bid or offer.

The Exchange is not applying LOP to orders with Market or Primary Pegging because it may result in removing orders that were intended to be more aggressive or to set the bid or offer on the market due to the order attributes noted above. These Pegging Orders are also subject to a collar, which is explained in this rule change.

In contrast, an Order with Midpoint Pegging will only be at the midpoint and not have the same impact as the other two types of orders and therefore subjecting such an order to LOP does not impact the potential of the order since by definition it is set to the midpoint. An Order with Midpoint Pegging will not be displayed and is not subject to a collar.

An Order with Market Pegging and no Offset behaves as a ''market order'' with respect to any liquidity on the Nasdaq Book at the Inside Quotation on the opposite side of the market because it is

---

[4] If an Order is modified for price, LOP will review the order anew and, if LOP is triggered, such modification will not take effect and the original order will be rejected.

[5] *See* Rule 4756 (Entry and Display of Quotes and Orders) at (a)(3).

[6] A ''Market Maker Peg Order'' is an Order Type designed to allow a Market Maker to maintain a continuous two-sided quotation at a displayed price that is compliant with the quotation requirements for Market Makers set forth in Rule 4613(a)(2). The displayed price of the Market Maker Peg Order is set with reference to a ''Reference Price'' in order to keep the displayed price of the Market Maker Peg Order within a bounded price range. A Market Maker Peg Order may be entered through RASH, FIX or QIX only. A Market Maker Peg Order must be entered with a limit price beyond which the Order may not be priced. The Reference Price for a Market Maker Peg Order to buy (sell) is the then-current National Best Bid (National Best Offer) (including Nasdaq), or if no such National Best Bid or National Best Offer, the most recent reported last-sale eligible trade from the responsible single plan processor for that day, or if none, the previous closing price of the security as adjusted to reflect any corporate actions (*e.g.,* dividends or stock splits) in the security. *See* Nasdaq Rule 4702(b)(7).

[7] An Intermarket Sweep or ISO Order, which is an Order that is immediately executable within the Nasdaq Market Center against Orders against which they are marketable, is not subject to LOP. *See* NASDAQ Rule 4702.

[8] Orders with Market and Primary Pegging available through RASH, FIX, and QIX only.

[9] Rule 4703(d).

[10] Discretion is an Order Attribute under which an Order has a non-displayed discretionary price range within which the entering Participant is willing to trade; such an Order may be referred to as a ''Discretionary Order.'' *See* NASDAQ Rule 4703(g).

[11] An offset is not supported for a Midpoint Pegging Order.

immediately executable at that price. If, at the time of entry, there is no price to which a Pegged Order can be pegged, the Order will be rejected; provided, however, that a Displayed Order that has Market Pegging, or an Order with a Non-Display Attribute that has Primary Pegging or Market Pegging, will be accepted at its limit price.

In the case of an Order with Midpoint Pegging, if the Inside Bid and Inside Offer are locked, the Order will be priced at the locking price, if the Inside Bid and Inside Offer are crossed, the Order will nevertheless be priced at the midpoint between the Inside Bid and Inside Offer, and if there is no Inside Bid and/or Inside Offer, the Order will be rejected.[12] However, even if the Inside Bid and Inside Offer are locked or crossed, an Order with Midpoint Pegging that locked or crossed an Order on the Nasdaq Book would execute (provided, however, that a Midpoint Peg Post-Only Order would execute or post as described in Rule 4702(b)(5)(A)).[13] It is important to note that only to the extent that a Midpoint Pegging Order has a limit price that the Order would be subject to LOP, unless the Midpoint Pegging Order also has a discretion attribute. If no limit price is specified, the Midpoint Pegging Order would not be subject to LOP.

LOP will be operational each trading day, except for orders designated for opening, re-opening and closing crosses and initial public offerings. LOP would not be operational during trading halts and pauses. LOP will not apply in the event that there is no established LOP Reference Price.[14] The LOP Reference Price shall be the current National Best Bid or Best Offer (NBBO), the bid for sell orders and the offer for buy orders.[15] LOP will be applicable on all protocols.[16] The LOP feature will be mandatory for all Nasdaq members.

Implementation of LOP

The Exchange indicated in its adoptive rule change that it would implement this rule within ninety (90) days of the approval of the proposed rule change.[17] At this time, the Exchange proposes to delay this implementation an additional sixty (60) days from the original timeframe in order to implement the LOP with the changes proposed herein. The Exchange will issue an Equities Trader Alert in advance to inform market participants of such implementation date.

Pegging Order Collar

In 2009, the Exchange adopted a collar for certain Unpriced Orders.[18] At that time, the Exchange defined a Collared Order as all Unpriced Orders except: (1) Market On Open Orders as defined in Rule 4752; (2) Market On Close Orders as defined in Rule 4754; (3) Unpriced Orders included by the System in any Nasdaq Halt Cross or Nasdaq Imbalance Cross, each as defined in Rule 4753; or (4) Unpriced Orders that are Reference Price Cross Orders as defined in Rule 4770. Any portion of a Collared Order that would execute (either on NASDAQ or when routed to another market center) at a price more than $0.25 or 5 percent worse than the NBBO at the time when the order reaches the System, whichever is greater, will be cancelled. This rule related to the collar was inadvertently removed from the Exchange's rules.[19] At this time, the Exchange proposes to amend the Nasdaq rules to add the collar into the rules once again.

The purpose of the collar is to protect market participants by reducing the risk that Primary and Market Pegging Orders will execute at prices that are significantly worse than the national best bid and offer (''NBBO'') at the time the Exchange receives the order. The Exchange believes that most market participants expect that their order will be executed at its full size at a price reasonably related to the prevailing market. However, market participants may not be aware that there is insufficient liquidity at or near the NBBO to fill the entire order, particularly for more thinly-traded securities.

The Exchange proposes to memorialize this collar, which currently exists in its trading and routing systems functionality, and define it specifically as applicable to Primary and Market Pegging Orders. The Exchange seeks to memorialize the rule within Rule 4703, entitled ''Order Attributes.'' The new rule text would state, ''Primary Pegging Orders and Market Pegging Orders are subject to a collar. Any portion of a Primary Pegging Order or Market Pegging Order that would execute, either on the Exchange or when routed to another market center, at a price of more than $0.25 or 5 percent worse than the NBBO at the time when the order reaches the System, whichever is greater, will be cancelled.''

The following example illustrates how the collar works. A market participant submits a routable order to buy 500 shares. The NBBO is $6.00 bid by $6.05 offer, with 100 shares available on each side. Both sides of the NBBO are set by another market center (''Away Market''), but Nasdaq has 100 shares available at the $6.05 to sell at the offer price and also has reserve orders to sell 100 shares at $6.32 and 400 shares at $6.40. No other market center is publishing offers to sell the security in between $6.05 and $6.40.

In this example, the order would be executed in the following manner:

- 100 shares would be executed by Nasdaq at the $6.05;
- 400 shares would be routed to the Away Market as an immediate or cancel order with a price of $6.05;
- 100 shares executed by the Away Market;[20]
- 300 shares returned to Nasdaq;
- 100 shares executed by Nasdaq at $6.32 (more than $0.25 but less than 5 percent worse than the NBBO); and 200 shares, representing the remainder of the order, would be cancelled because the remaining liquidity available at $6.40 is more than 5 percent worse than the NBBO.

Implementation of Pegging Order Collar

The Exchange intends to implement the Pegging Order Collar as soon as practicable pursuant to this proposal. The Exchange requests a waiver of the

[12] This provision is subject to change by another rule change. *See* Securities Exchange Act Release No. 78908 (September 22, 2016), 81 FR 66702 (September 28, 2016) (SR–NASDAQ–2016–111). The Commission notes that it approved SR–NASDAQ–2016–111 on November 10, 2016. *See* Securities Exchange Act Release No. 79290.

[13] *Id.*

[14] For example, if there is a one-sided quote or if the NBB, when used as the LOP Reference Price, is equal to or less than $0.50.

[15] The Exchange will not accept incoming Limit Orders that exceed the LOP Reference Threshold. Limit Orders will not be accepted if the price of the Limit Order is greater than the LOP Reference Threshold for a buy Limit Order. Limit Orders will not be accepted if the price of the Limit Order is less than the LOP Reference Threshold for a sell Limit Order. The LOP Reference Threshold for buy orders will be the LOP Reference Price (offer) plus the applicable LOP Limit. The LOP Reference Threshold for sell orders will be the LOP Reference Price (bid) minus the applicable LOP Limit. The LOP Limit will be the greater of 10% of the LOP Reference Price or $0.50 for all securities across all trading sessions. The LOP Reference Price will be the current National Best Bid or Best Offer (NBBO), the bid for sell orders and the offer for buy orders.

[16] Nasdaq maintains several communications protocols for Participants to use in entering Orders and sending other messages to the Nasdaq Market Center, such as: OUCH, RASH, QIX, FLITE and FIX.

An ''Unpriced Order'' was defined in this rule change as any order type permitted by the System to buy or sell shares of a security at the national best bid (best offer) (''NBBO'') at the time when the order reaches the System.

[19] *See* Securities Exchange Act Release No. 75252 (June 22, 2016), 80 FR 36865 (June 26, 2015) (SR–NASDAQ–2015–024).

[20] This assumes that the Away Market's offer was still available and that the Away Market had no additional non-displayed orders at this price.

operative delay to implement the Pegging Order Collar.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act [21] in general, and furthers the objectives of Section 6(b)(5) of the Act [22] in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest, by mitigating risks to market participants of human error in entering Limit Orders at clearly unintended prices. The proposal will allow for protections for Limit Orders, which should encourage price continuity and, in turn, protect investors and the public interest by reducing executions occurring at dislocated prices.

The Exchange's proposal to amend the language concerning the modification of Orders is consistent with the Act because only new Orders would be subject to LOP. The proposed new language specifies that Orders that are modified for size and remain in the Order Book with the same priority, because only size was modified to reduce the size, will not be subject to LOP. Other modifications to Orders that amend the timestamp or priority will subject the modified orders to LOP because these Orders will be submitted into the System as new Orders. The LOP functionality protects market participants by reducing the risk that Midpoint Pegging Orders will execute at prices that are significantly worse than the national best bid and offer (''NBBO'') at the time the Exchange receives the order.

The LOP feature assists with the maintenance of fair and orderly markets by mitigating the risks associated with errors resulting in executions at prices that are away from the Best Bid or Offer and potentially erroneous. Further, it protects investors from potentially receiving executions away from the prevailing prices at any given time. The Exchange adopted LOP to avoid a series of improperly priced aggressive orders transacting in the Order Book.

The Exchange believes that excluding Primary Pegging and Market Pegging Orders is consistent with the Act because including such orders may result in removing orders that were intended to be more aggressive or to set the bid or offer on the market due to the order attributes noted in the Purpose section of this rule change. Market and Primary Pegging Orders are also currently subject to a collar. Market and Primary Pegging Orders that would execute, either on the Exchange or when routed to another market center, at a price of more than $0.25 or 5 percent worse than the NBBO at the time when the order reaches the System, whichever is greater, will be cancelled.[23] Further, the Market Pegging Order has its own process for rejecting those orders where no price exists to which a Pegged Order can be pegged.

This feature should create a level of protection that prevents the Limit Orders from entering the Order Book outside of an acceptable range for the Limit Order to execute. The LOP should reduce the negative impacts of sudden, unanticipated volatility, and serve to preserve an orderly market in a transparent and uniform manner, increase overall market confidence, and promote fair and orderly markets and the protection of investors.

Pegging Order Collar

The Exchange believes that the collar proposal is consistent with the Act because it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest, by avoiding execution of Primary and Market Pegging Orders (either on Nasdaq or on other market centers as a result of orders routed by Nasdaq) at prices that are significantly worse than the NBBO at the time the order is initially received. The NBBO provides reasonable guidance of the current value of a given security and therefore market participants should have confidence that their Market and Primary Pegging Orders will not be executed at a significantly worse price than the NBBO.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. The LOP feature should provide market participants with additional price protection from anomalous executions. This feature is not optional and is applicable to all members submitting Limit Orders. Thus, the Exchange does not believe the proposal creates any significant impact on competition. In addition, the proposed collar in Rule 4703 would be applicable to all Market and Primary Pegging Orders entered into the Nasdaq System. Similarly, all Midpoint Pegging Order will be subject to LOP, unless they have a discretion attribute.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act and Rule 19b–4(f)(6) thereunder.[24]

A proposed rule change filed pursuant to Rule 19b–4(f)(6) under the Act [25] normally does not become operative for 30 days after the date of its filing. However, Rule 19b–4(f)(6)(iii) [26] permits the Commission to designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has asked the Commission to waive the 30-day operative delay so that the proposal may become operative immediately upon filing. When the Exchange first proposed the LOP, the Exchange represented that it would implement the LOP within 90 days of obtaining Commission approval (*i.e.,* by November 22, 2016).[27] The Exchange now proposes to extend the LOP implementation date by 60 days in order to include the modifications in this proposed rule change with the implementation of the LOP. Waiver of the 30-day operative delay would allow the Exchange to immediately extend the

[21] 15 U.S.C. 78f(b).

[22] 15 U.S.C. 78f(b)(5).

[23] The Exchange inadvertently removed the rule from the Nasdaq Rulebook. The Exchange proposes to adopt the rule herein.

[24] 17 CFR 240.19b–4(f)(6). As required under Rule 19b–4(f)(6)(iii), the Exchange provided the Commission with written notice of its intent to file the proposed rule change, along with a brief description and the text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission.

[25] 17 CFR 240.19b–4(f)(6).

[26] 17 CFR 240.19b–4(f)(6)(iii).

[27] *See* Securities Exchange Act Release Nos. 78246 (July 7, 2016), 81 FR 45332 (July 13, 2016) (noticing SR–NASDAQ–2016–067) and 78667 (August 24, 2016), 81 FR 59672 (August 30, 2016) (approving SR–NASDAQ–2016–067).

LOP implementation date. The waiver would also permit the Exchange to immediately clarify the application of the LOP to modified orders. Moreover, the waiver would allow the Exchange to immediately exclude from the LOP Market Pegging Orders, Primary Pegging Orders, and Midpoint Pegging Orders that have a discretion price. As noted above, the Exchange proposes to exclude these Orders because these Orders may be intended to be aggressive or to set the bid or offer on the market. Moreover, as noted above, Market and Primary Pegging Orders are currently subject to collars. Lastly, the waiver would allow the Exchange's rules to immediately and accurately reflect the current collars for Market and Primary Pegging Orders, which were removed inadvertently. Accordingly, the Commission finds that waiving the 30-day operative delay is consistent with the protection of investors and the public interest and designates the proposal operative upon filing.[28]

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NASDAQ–2016–155 on the subject line.

Paper Comments

- Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–NASDAQ–2016–155. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*).

Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NASDAQ–2016–155 and should be submitted on or before December 13, 2016.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[29]

Brent J. Fields,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79331; File No. SR–MIAX–2016–43]

Self-Regulatory Organizations; Miami International Securities Exchange LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Exchange Rule 605 Market Maker Orders

November 16, 2016.

Pursuant to the provisions of Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 3, 2016, Miami International Securities Exchange LLC ("MIAX" or "Exchange") filed with the Securities and Exchange Commission ("Commission") a proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange is filing a proposal to amend Exchange Rule 605 (Market Maker Orders).

The text of the proposed rule change is available on the Exchange's Web site at *http://www.miaxoptions.com/filter/wotitle/rule_filing,* at MIAX's principal office, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to amend Exchange Rule 605 (Market Maker Orders) to (i) provide that a MIAX Market Maker[3] may not enter good 'til cancelled ("GTC") orders[4] in option classes to which the MIAX Market Maker is not appointed, and (ii) add a comparable provision setting forth the types of orders that an Electronic Exchange Member ("EEM")[5]

---

[28] For purposes only of waiving the 30-day operative delay, the Commission has considered the proposed rule's impact on efficiency, competition, and capital formation. 15 U.S.C. 78c(f).

[29] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] The term "Market Maker" refers to "Lead Market Makers", "Primary Lead Market Makers" and "Registered Market Makers", collectively. *See* Exchange Rule 100.

[4] A Good 'til Cancelled or "GTC" order is an order to buy or sell which remains in effect until it is either executed, cancelled or the underlying option expires. *See* Exchange Rule 516(l).

[5] The term "Electronic Exchange Member" means the holder of a Trading permit who is not a Market

may enter for the proprietary account of a non-MIAX Market Maker.[6]

Rule 605 presently governs the submission of orders by MIAX Market Makers, differentiating between orders submitted in classes to which the Market Maker is appointed and orders submitted in classes to which the Market Maker is not appointed. Paragraph (a) governs option classes to which the Market Maker is appointed. Pursuant to paragraph (a), Market Makers may not enter market orders or GTC orders in their appointed classes. Paragraph (b) governs option classes other than those to which the Market Maker is appointed. Subparagraph (b)(1) provides that Market Makers may enter all types of orders that are permitted to be entered by Non-Customer [7] participants under the Rules, except for market orders. Subparagraphs (b)(2) and (b)(3) place limitations on the overall percentage of executions that can occur in the non-appointed classes. Specifically, subparagraph (b)(2) limits a Registered Market Maker's [8] total number of contracts executed in non-appointed option classes to 25% of the Registered Market Maker's total number of contracts executed in its appointed option classes, and subparagraph (b)(3) limits a Lead Market Maker's [9] total number of contracts executed in non-appointed option classes to 10% of the Lead Market Maker's total number of contracts executed in its appointed option classes. Paragraph (c) governs priority of Market Maker orders, providing that Market Maker orders will always be allocated with other Professional Interest [10] (such as orders from broker-dealers, firms, non-Priority Customers [11] and non-priority Market Maker quotes) and after both Priority Customer interest and priority Market Maker quotes have been satisfied. The Exchange is not proposing to amend paragraph (a), subparagraphs (b)(2) or (b)(3), or paragraph (c).

The Exchange is proposing to amend subparagraph (b)(1) to provide that a Market Maker may not enter GTC orders in option classes to which the Market Maker is not appointed. Thus, as amended, pursuant to subparagraph (b)(1), a Market Maker may enter all order types permitted to be entered by Non-Customer participants under the Rules, except for market orders and GTC orders, in classes of options to which the Market Maker is not appointed. The purpose of this amendment is to make the permissible order types for Market Makers in non-appointed option classes consistent with the permissible order types in their appointed option classes. Accordingly, in both appointed and non-appointed option classes, Market Makers may enter all order types, except for market orders and GTC orders. The Exchange believes that making the permissible order types for Market Makers consistent in both appointed and non-appointed options classes simplifies order types across the Exchange for such participants. The Exchange also believes that GTC orders offer no advantage to Market Makers over day limit orders (which are a permissible order type for Market Makers in both appointed and non-appointed option classes) under the Exchange's market structure, including, but not limited to, under the priority and trade allocation rules (Exchange Rule 514) and various risk protection mechanism rules applicable to Market Makers (such as, for example, Exchange Rule 612, Aggregate Risk Manager). When the Exchange initially adopted Exchange Rule 605, the Exchange determined to permit Market Makers to enter GTC orders in non-appointed option classes. However, since adoption, the Exchange has observed that Market Makers generally have not entered GTC orders in their non-appointed option classes. Accordingly, since this is an unused order type for Market Makers and in order to promote consistency across the Exchange of available order types for Market Makers, the Exchange now proposes that Market Makers may not enter GTC orders in non-appointed option classes so that the permissible order types for Market Makers in non-appointed option classes are the same as those for Market Makers in appointed option classes.

The Exchange is also proposing to add new paragraph (d) to Rule 605 to establish the permissible order types that an EEM may enter for the proprietary account of a non-MIAX Market Maker. Pursuant to proposed paragraph (d), the permissible order types that an EEM may enter for the proprietary account of a non-MIAX Market Maker includes all order types permitted to be entered under the Rules by Members, except for market orders and GTC orders. Accordingly, the Exchange is proposing to make the permissible order types for non-MIAX Market Makers consistent with the permissible order types for MIAX Market Makers. The Exchange believes that making the permissible order types for the accounts of non-MIAX Market Makers consistent with the permissible order types for MIAX Market Makers simplifies order types across the Exchange for such participants. As discussed above, the Exchange also believes that GTC orders offer no advantage to non-MIAX Market Makers over day limit orders (which are a permissible order type for non-MIAX Market Makers) under the Exchange's market structure, including, but not limited to, under the priority and trade allocation rules (Exchange Rule 514) and various risk protection mechanism rules applicable to EEMs (such as, for example, Exchange Rule 519, MIAX Order Monitor, and Exchange Rule 519A, Risk Protection Monitor). The Exchange further believes that non-MIAX Market Makers (and, for that matter, MIAX Market Makers) are sophisticated professionals and thus generally do not use market orders. When the Exchange initially adopted Exchange Rule 605, the Exchange did not place any limitation on the types of orders that could be entered by an EEM for the proprietary account of a non-MIAX Market Maker. However, since adoption, the Exchange has observed that EEMs generally have not entered GTC orders or market orders for the proprietary account of non-MIAX Market Makers. Accordingly, since these are unused order types for non-MIAX Market Makers and in order to promote consistency across the Exchange of available order types for both non-MIAX Market Makers and Market Makers, the Exchange now proposes that EEMs may not enter GTC orders or market orders for the proprietary accounts of non-MIAX Market Makers so that the

Maker. Electronic Exchange members are deemed ''members'' under the Exchange Act. *See* Exchange Rule 100.

[6] The term ''non-MIAX Market Maker'' means a market participant that is market maker registered as such on another options exchange. *See* Exchange Fee Schedule, Section 1)a)ii), Other Market Participant Fees, in the notes table.

[7] The term ''Non-Customer'' means a person or entity that is a broker or dealer in securities. *See* Exchange Rule 100.

[8] The term ''Registered Market Maker'' means a Member registered with the Exchange for the purpose of making markets in securities traded on the Exchange, who is not a Lead Market Maker and is vested with the rights and responsibilities specified in Chapter VI of these Rules with respect to Registered Market Makers. *See* Exchange Rule 100.

[9] The term ''Lead Market Maker'' means a Member registered with the Exchange for the purpose of making markets in securities traded on the Exchange and that is vested with the rights and responsibilities specified in Chapter VI of these Rules with respect to Lead Market Makers. When a Lead Market Maker is appointed to act in the capacity of a Primary Lead Market Maker, the additional rights and responsibilities of a Primary Lead Market Maker specified in Chapter VI of these Rules will apply. *See* Exchange Rule 100.

[10] The term ''Professional Interest'' means (i) an order that is for the account of a person or entity that is not a Priority Customer, or (ii) an order or non-priority quote for the account of a Market Maker. *See* Exchange Rule 100.

[11] The term ''Priority Customer'' means an order for the account of a Priority Customer. *See* Exchange Rule 100.

permissible order types available to non-MIAX Market Makers are the same as those for Market Makers.

The Exchange believes that its proposal to define the permissible order types that an EEM may enter for the proprietary account of a non-MIAX Market Maker to include all order types permitted to be entered under the Rules by Members, except for market orders and GTC orders, is reasonable, equitable and not unfairly discriminatory because the same rule applies identically to MIAX Market Makers. Thus, the Exchange is treating all market makers (both MIAX Market Makers and non-MIAX Market Makers) the same, with respect to permissible order types for such market participants.

The Exchange notes that there is no uniform treatment of permissible order types for market makers among the various options exchanges. Some exchanges place no limitation on the types of orders that can be entered by market makers, such as NYSE Arca, Inc. (''NYSE Arca'') and NYSE MKT LLC (''NYSE MKT'').[12] Both such exchanges permit a market maker to enter all order types permitted to be entered by users under the rules, in both appointed and non-appointed option classes. Other exchanges do place certain limitations on permissible order types, with varying degree. Some differentiate between appointed and non-appointed options classes, and some don't. For example, International Securities Exchange, LLC (''ISE'') permits opening only orders, IOC orders, market orders, fill-or-kill orders, sweep orders, complex orders, and block-size orders in appointed classes.[13] It permits all order types permissible for non-customers in non-appointed classes.[14] NASDAQ PHLX LLC (''PHLX'') permits limit on opening, IOC, sweep, and day limit in appointed classes; and limit on opening, IOC, sweep, day limit, and GTC in non-appointed classes.[15] Accordingly, the Exchange believes that each options exchange generally determines permissible order types for market makers in its trading environment based on the exchange's individual business policy, objectives, and trading system. The Exchange's proposal reflects its policy and objectives, and it treats all market makers uniformly with respect to permissible order types. Therefore, the Exchange believes that the structure that it is proposing is reasonable, equitable, and not unfairly discriminatory.

The Exchange will announce the implementation date of the proposed rule change by Regulatory Circular to be published no later than 60 days following the operative date of the proposed rule. The implementation date will be no later than 60 days following the issuance of the Regulatory Circular.

2. Statutory Basis

MIAX believes that its proposed rule change is consistent with Section 6(b) of the Act [16] in general, and furthers the objectives of Section 6(b)(5) of the Act [17] in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to and perfect the mechanisms of a free and open market and a national market system and, in general, to protect investors and the public interest.

In particular, the Exchange believes this proposed rule change promotes just and equitable principles of trade because it simplifies order types across the Exchange for Market Makers. It eliminates order types that generally have not been entered by Market Makers and non-MIAX Market Makers. It makes consistent the types of orders than can be entered for both Market Makers and non-MIAX Market Makers. It makes the permissible order types for Market Makers in non-appointed option classes consistent with the permissible order types in their appointed option classes.

The Exchange believes that making the permissible order types for Market Makers consistent in both appointed and non-appointed options classes simplifies order types across the Exchange for such participants. The Exchange also believes that GTC orders offer no advantage to Market Makers over day limit orders (which are a permissible order type for Market Makers in both appointed and non-appointed option classes) under the Exchange's market structure, including, but not limited to, under the priority and trade allocation rules (Exchange Rule 514) and various risk protection mechanism rules applicable to Market Makers (such as, for example, Exchange Rule 612, Aggregate Risk Manager). The Exchange has observed that Market Makers generally have not entered GTC orders in their non-appointed option classes. Accordingly, since this is an unused order type for Market Makers and in order to promote consistency across the Exchange of available order types for Market Makers, the Exchange believes that its proposed rule change to provide that Market Makers may not enter GTC orders in non-appointed option classes so that the permissible order types for Market Makers in non-appointed option classes are the same as those for Market Makers in appointed option classes promotes just and equitable principles of trade.

The Exchange believes that its proposal to define the permissible order types that an EEM may enter for the proprietary account of a non-MIAX market maker to include all order types permitted to be entered under the Rules by Members, except for market orders and GTC orders, is reasonable, equitable and not unfairly discriminatory because the same rule applies identically to MIAX Market Makers. Thus, the Exchange is treating all market makers (both MIAX Market Makers and non-MIAX market makers) the same, with respect to permissible order types for such market participants. The Exchange also believes that GTC orders offer no advantage to non-MIAX Market Makers over day limit orders (which are a permissible order type for non-MIAX Market Makers) under the Exchange's market structure, including, but not limited to, under the priority and trade allocation rules (Exchange Rule 514) and various risk protection mechanism rules applicable to EEMs (such as, for example, Exchange Rule 519, MIAX Order Monitor, and Exchange Rule 519A, Risk Protection Monitor). The Exchange further believes that non-MIAX Market Makers (and, for that matter, MIAX Market Makers) are sophisticated professionals and thus generally do not use market orders. The Exchange has observed that EEMs generally have not entered GTC orders or market orders for the proprietary account of non-MIAX Market Makers. Accordingly, since these are unused order types for non-MIAX Market Makers and in order to promote consistency across the Exchange of available order types for both non-MIAX Market Makers and Market Makers, the Exchange believes that its proposal that EEMs may not enter GTC orders or market orders for the proprietary accounts of non-MIAX Market Makers so that the permissible order types available to non-MIAX Market Makers are the same as those for Market Makers promotes just and equitable principles of trade.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange operates in a highly competitive market comprised of fourteen U.S. options exchanges in which sophisticated and knowledgeable market participants can, and do, send order flow to competing exchanges if they deem trading practices at a particular exchange to be onerous or cumbersome. The proposed rule change allows the Exchange to make consistent across the Exchange the permissible order types available for both MIAX Market Makers and non-MIAX market makers. This consistency places all such market participants on an equal footing, and, as a consequence, will not impose any burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days after the date of the filing, or such shorter time as the Commission may designate, it has become effective pursuant to 19(b)(3)(A) of the Act [18] and Rule 19b–4(f)(6) [19] thereunder.

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

[18] 15 U.S.C. 78s(b)(3)(A).

[19] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov*. Please include File Number SR–MIAX–2016–43 on the subject line.

Paper Comments

- Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–MIAX–2016–43. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–MIAX–2016–43 and should be submitted on or before December 13, 2016.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[20]

Brent J. Fields,

Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Investment Company Act Release No. 32360; File No. 812–14547]

Legg Mason ETF Equity Trust, et al.; Notice of Application

November 16, 2016.

AGENCY: Securities and Exchange Commission ("Commission").

ACTION: Notice of an application for an order under section 6(c) of the Investment Company Act of 1940 (the "Act") for an exemption from sections 2(a)(32), 5(a)(1), 22(d), and 22(e) of the Act and rule 22c–1 under the Act, under sections 6(c) and 17(b) of the Act for an exemption from sections 17(a)(1) and 17(a)(2) of the Act, and under section 12(d)(1)(J) for an exemption from sections 12(d)(1)(A) and 12(d)(1)(B) of the Act. The requested order would permit (a) actively-managed series of certain open-end management investment companies ("Funds") to issue shares redeemable in large aggregations only ("Creation Units"); (b) secondary market transactions in Fund shares to occur at negotiated market prices rather than at net asset value ("NAV"); (c) certain Funds to pay redemption proceeds, under certain circumstances, more than seven days after the tender of shares for redemption; (d) certain affiliated persons of a Fund to deposit securities into, and receive securities from, the Fund in connection with the purchase and redemption of Creation Units; (e) certain registered management investment companies and unit investment trusts outside of the same group of investment companies as the Funds ("Funds of Funds") to acquire shares of the Funds; and (f) certain Funds ("Feeder Funds") to create and redeem Creation Units in-kind in a master-feeder structure.

Applicants: Legg Mason Partners Fund Advisor, LLC ("Initial Adviser"), a Delaware limited liability company registered as an investment adviser under the Investment Advisers Act of 1940, Legg Mason ETF Equity Trust and Legg Mason ETF Trust (each a "Trust," and together, the "Trusts"), each a

[20] 17 CFR 200.30–3(a)(12).

Maryland statutory trust registered under the Act as an open-end management investment company with multiple series, and Legg Mason Investor Services, LLC (''Distributor''), a Delaware limited liability company and broker-dealer registered under the Securities Exchange Act of 1934 (''Exchange Act'').

DATES: *Filing Dates:* The application was filed on September 15, 2015, and amended on January 20, 2016 and July 11, 2016.

Hearing or Notification of Hearing: An order granting the requested relief will be issued unless the Commission orders a hearing. Interested persons may request a hearing by writing to the Commission's Secretary and serving applicants with a copy of the request, personally or by mail. Hearing requests should be received by the Commission by 5:30 p.m. on December 12, 2016, and should be accompanied by proof of service on applicants, in the form of an affidavit, or for lawyers, a certificate of service. Pursuant to rule 0–5 under the Act, hearing requests should state the nature of the writer's interest, any facts bearing upon the desirability of a hearing on the matter, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by writing to the Commission's Secretary.

ADDRESSES: Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090; Applicants: Trusts and Initial Adviser, 620 Eighth Avenue, New York, NY 10018; Distributer, 100 International Drive, Baltimore, MD 21202.

FOR FURTHER INFORMATION CONTACT: Jessica Shin, Attorney-Adviser, at (202) 551–5921, or David J. Marcinkus, Branch Chief, at (202) 551–6821 (Division of Investment Management, Chief Counsel's Office).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained via the Commission's Web site by searching for the file number, or for an applicant using the Company name box, at *http://www.sec.gov/search/search.htm* or by calling (202) 551–8090.

Summary of the Application

1. Applicants request an order that would allow Funds to operate as actively-managed exchange traded funds (''ETFs'').[1] Fund shares will be purchased and redeemed at their NAV in Creation Units only. All orders to purchase Creation Units and all redemption requests will be placed by or through an ''Authorized Participant'', which will have signed a participant agreement with the Distributor. Shares will be listed and traded individually on a national securities exchange, where share prices will be based on the current bid/offer market. Certain Funds may operate as Feeder Funds in a master-feeder structure. Any order granting the requested relief would be subject to the terms and conditions stated in the application.

2. Each Fund will consist of a portfolio of securities and other assets and investment positions (''Portfolio Instruments''). Each Fund will disclose on its Web site the identities and quantities of the Portfolio Instruments that will form the basis for the Fund's calculation of NAV at the end of the day.

3. Shares will be purchased and redeemed in Creation Units and generally on an in-kind basis. Except where the purchase or redemption will include cash under the limited circumstances specified in the application, purchasers will be required to purchase Creation Units by depositing specified instruments (''Deposit Instruments''), and shareholders redeeming their shares will receive specified instruments (''Redemption Instruments''). The Deposit Instruments and the Redemption Instruments will each correspond pro rata to the positions in the Fund's portfolio (including cash positions) except as specified in the application.

4. Because shares will not be individually redeemable, applicants request an exemption from section 5(a)(1) and section 2(a)(32) of the Act that would permit the Funds to register as open-end management investment companies and issue shares that are redeemable in Creation Units only.

5. Applicants also request an exemption from section 22(d) of the Act and rule 22c–1 under the Act as secondary market trading in shares will take place at negotiated prices, not at a current offering price described in a Fund's prospectus, and not at a price based on NAV. Applicants state that (a) secondary market trading in shares does not involve a Fund as a party and will not result in dilution of an investment in shares, and (b) to the extent different prices exist during a given trading day, or from day to day, such variances occur as a result of third-party market forces, such as supply and demand. Therefore, applicants assert that secondary market transactions in shares will not lead to discrimination or preferential treatment among purchasers. Finally, applicants represent that share market prices will be disciplined by arbitrage opportunities, which should prevent shares from trading at a material discount or premium from NAV.

6. With respect to Funds that hold non-U.S. Portfolio Instruments and that effect creations and redemptions of Creation Units in kind, applicants request relief from the requirement imposed by section 22(e) in order to allow such Funds to pay redemption proceeds within fifteen calendar days following the tender of Creation Units for redemption. Applicants assert that the requested relief would not be inconsistent with the spirit and intent of section 22(e) to prevent unreasonable, undisclosed or unforeseen delays in the actual payment of redemption proceeds.

7. Applicants request an exemption to permit Funds of Funds to acquire Fund shares beyond the limits of section 12(d)(1)(A) of the Act; and the Funds, and any principal underwriter for the Funds, and/or any broker or dealer registered under the Exchange Act, to sell shares to Funds of Funds beyond the limits of section 12(d)(1)(B) of the Act. The application's terms and conditions are designed to, among other things, help prevent any potential (i) undue influence over a Fund through control or voting power, or in connection with certain services, transactions, and underwritings, (ii) excessive layering of fees, and (iii) overly complex fund structures, which are the concerns underlying the limits in sections 12(d)(1)(A) and (B) of the Act.

8. Applicants request an exemption from sections 17(a)(1) and 17(a)(2) of the Act to permit persons that are Affiliated Persons, or Second Tier Affiliates, of the Funds, solely by virtue of certain ownership interests, to effectuate purchases and redemptions in-kind. The deposit procedures for in-kind purchases of Creation Units and the redemption procedures for in-kind redemptions of Creation Units will be the same for all purchases and redemptions and Deposit Instruments and Redemption Instruments will be valued in the same manner as those Portfolio Instruments currently held by the Funds. Applicants also seek relief from the prohibitions on affiliated transactions in section 17(a) to permit a

[1] Applicants request that the order apply to the Funds and any additional series of the Trusts, and any other open-end management investment company or series thereof, that may be created in the future (each, included in the term ''Fund''), each of which will operate as an actively-managed ETF. Any Fund will (a) be advised by the Initial Adviser or an entity controlling, controlled by, or under common control with the Initial Adviser (each, an ''Adviser'') and (b) comply with the terms and conditions of the application.

Fund to sell its shares to and redeem its shares from a Fund of Funds, and to engage in the accompanying in-kind transactions with the Fund of Funds.[2] The purchase of Creation Units by a Fund of Funds directly from a Fund will be accomplished in accordance with the policies of the Fund of Funds and will be based on the NAVs of the Funds.

9. Applicants also request relief to permit a Feeder Fund to acquire shares of another registered investment company managed by the Adviser having substantially the same investment objectives as the Feeder Fund (''Master Fund'') beyond the limitations in section 12(d)(1)(A) and permit the Master Fund, and any principal underwriter for the Master Fund, to sell shares of the Master Fund to the Feeder Fund beyond the limitations in section 12(d)(1)(B).

10. Section 6(c) of the Act permits the Commission to exempt any persons or transactions from any provision of the Act if such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act. Section 12(d)(1)(J) of the Act provides that the Commission may exempt any person, security, or transaction, or any class or classes of persons, securities, or transactions, from any provision of section 12(d)(1) if the exemption is consistent with the public interest and the protection of investors. Section 17(b) of the Act authorizes the Commission to grant an order permitting a transaction otherwise prohibited by section 17(a) if it finds that (a) the terms of the proposed transaction are fair and reasonable and do not involve overreaching on the part of any person concerned; (b) the proposed transaction is consistent with the policies of each registered investment company involved; and (c) the proposed transaction is consistent with the general purposes of the Act.

For the Commission, by the Division of Investment Management, under delegated authority.

Brent J. Fields,

Secretary.

[FR Doc. 2016–28029 Filed 11–21–16; 8:45 am]

BILLING CODE 8011–01–P

[2] The requested relief would apply to direct sales of shares in Creation Units by a Fund to a Fund of Funds and redemptions of those shares. Applicants, moreover, are not seeking relief from section 17(a) for, and the requested relief will not apply to, transactions where a Fund could be deemed an Affiliated Person, or a Second-Tier Affiliate, of a Fund of Funds because an Adviser or an entity controlling, controlled by or under common control with an Adviser provides investment advisory services to that Fund of Funds.

SECURITIES AND EXCHANGE COMMISSION

Submission for OMB Review; Comment Request

Upon Written Request, Copies Available From: Securities and Exchange Commission Office of FOIA Services, 100 F Street NE., Washington, DC 20549–2736.

Extension:
Rule 17f–1(g); SEC File No. 270–30, OMB Control No. 3235–0290.

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501*et seq.*) (''PRA''), the Securities and Exchange Commission (''Commission'') has submitted to the Office of Management and Budget (''OMB'') a request for approval of extension of the previously approved collection of information provided for in Rule 17f–1(g) (17 CFR 240.17f–1(g)), under the Securities Exchange Act of 1934 (15 U.S.C. 78a *et seq.*).

Rule 17f–1(g) requires that all reporting institutions (*i.e.,* every national securities exchange, member thereof, registered securities association, broker, dealer, municipal securities dealer, registered transfer agent, registered clearing agency, participant therein, member of the Federal Reserve System, and bank insured by the FDIC) maintain and preserve a number of documents related to their participation in the Lost and Stolen Securities Program (''Program'') under Rule 17f–1. The following documents must be kept in an easily accessible place for three years, according to paragraph (g): (1) Copies of all reports of theft or loss (Form X–17F–1A) filed with the Commission's designee: (2) All agreements between reporting institutions regarding registration in the Program or other aspects of Rule 17f–1; and (3) all confirmations or other information received from the Commission or its designee as a result of inquiry.

Reporting institutions utilize these records and reports (a) to report missing, lost, stolen or counterfeit securities to the database, (b) to confirm inquiry of the database, and (c) to demonstrate compliance with Rule 17f–1. The Commission and the reporting institutions' examining authorities utilize these records to monitor the incidence of thefts and losses incurred by reporting institutions and to determine compliance with Rule 17f–1. If such records were not retained by reporting institutions, compliance with Rule 17f–1 could not be monitored effectively.

The Commission estimates that there are approximately 12,971 reporting institutions (respondents) and, on average, each respondent would need to retain 33 records annually, with each retention requiring approximately 1 minute (a total of 33 minutes or 0.55 hours per respondent per year). Thus, the total estimated annual time burden for all respondents is 7,134 hours (12,971 × 0.55 hours = 7,134). Assuming an average hourly cost for clerical work of $50.00, the average total yearly record retention cost of compliance for each respondent would be $27.50 ($50 × 0.55 hours). Based on these estimates, the total annual compliance cost for the estimated 12,971 reporting institutions would be approximately $356,702 (12,971 × $27.50).

Rule 17f–1(g) does not require periodic collection, but it does require retention of records generated as a result of compliance with Rule 17f–1. Under Section 17(b) and (f) of the Act, the information required by Rule 17f–1(g) is available to the Commission and Federal bank regulators for examinations or collection purposes. Rule 0–4 of the Securities Exchange Act deems such information to be confidential.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information under the PRA unless it displays a currently valid OMB control number.

The public may view background documentation for this information collection at the following Web site: *www.reginfo.gov.* Comments should be directed to (i) Desk Officer for the Securities and Exchange Commission, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 10102, New Executive Office Building, Washington, DC 20503 or by sending an email to: *Shagufta_Ahmed@omb.eop.gov;* and (ii) Pamela Dyson, Director/Chief Information Officer, Securities and Exchange Commission, c/o Remi Pavlik-Simon, 100 F Street NE., Washington, DC 20549 or by sending an email to: *PRA_Mailbox@sec.gov.* Comments must be submitted within 30 days of this notice.

Dated: November 16, 2016.

Brent J. Fields,

Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79329; File No. SR–BX–2016–058]

Self-Regulatory Organizations; NASDAQ BX, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend the Limit Order Protection

November 16, 2016.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 4, 2016, NASDAQ BX, Inc. (''BX'' or ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the Limit Order Protection or ''LOP'' for members accessing the BX Market Center and adding rule text related to a collar applicable to Primary Pegging and Market Pegging Orders.

The text of the proposed rule change is available on the Exchange's Web site at *http://nasdaqbx.cchwallstreet.com/*, at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange recently adopted a new mechanism to protect against erroneous Limit Orders which are entered into the BX Market Center at Rule 4757(d).[3] This mechanism addresses risks to market participants of human error in entering Limit Orders at unintended prices. Specifically, LOP prevents certain Limit Orders from executing or being placed on the Order Book at prices outside pre-set standard limits. The System rejects those Limit Orders, rather than executing them automatically. LOP rejects Limit Orders back to the member when the order exceeds certain defined logic. Specifically, LOP prevents certain Limit Orders at prices outside of pre-set standard limits (''LOP Limit'') from being accepted by the System.

Modifications of Orders

In its adoptive filing, the Exchange noted that LOP shall apply to all Quotes and Orders, including any modified Orders.[4] At this time, the Exchange proposes to remove ''including any modified Orders'' from the rule text at rule 4757(d)(i). The Exchange proposes to amend this language because it is misleading and may cause confusion.

The Exchange proposes to state that LOP shall apply to all Quotes and Orders, including Quotes and Orders that have been modified, where the modification results in a new timestamp and priority.[5] Any Order that is modified within the System, but does not lose priority, for example an Order that was decremented, will not be subject to LOP after it was modified because the system does not cancel decremented orders from the Order Book. If an Order is cancelled either by the member or by the system and a new Order entered into the System, the new Order would be subject to LOP. For example, if the price of an Order is modified, the system will cancel the Order and the modified Order would receive a new timestamp and priority and this Order would be subject to LOP.

Exceptions to LOP

The Exchange also noted in its adoptive filing that LOP would not apply to Market Orders, Market Maker Peg Orders[6] or Intermarket Sweep Orders (ISO).[7] The Exchange proposes to modify this language to specifically state that LOP would not apply to Orders with Market and Primary Pegging.[8]

There are three types of Pegging Orders: Primary Pegging, Market Pegging and Midpoint Pegging. Pegging is an Order Attribute that allows an Order to have its price automatically set with reference to the NBBO; provided, however, that if BX is the sole market center at the Best Bid or Best Offer (as applicable), then the price of any Displayed Order with Primary Pegging (as defined below) will be set with reference to the highest bid or lowest offer disseminated by a market center other than BX. An Order with a Pegging Order Attribute may be referred to as a ''Pegged Order.''[9] For purposes of this Rule 4703, the price to which an Order is pegged will be referred to as the Inside Quotation, the Inside Bid, or the Inside Offer, as appropriate. There are three varieties of Pegging:

- Primary Pegging means Pegging with reference to the Inside Quotation on the same side of the market. For example, if the Inside Bid was $11, an Order to buy with Primary Pegging would be priced at $11.
- Market Pegging means Pegging with reference to the Inside Quotation on the opposite side of the market. For example, if the Inside Offer was $11.06, an Order to buy with Market Pegging would be priced at $11.06.
- Midpoint Pegging means Pegging with reference to the midpoint between the Inside Bid and the Inside Offer (the ''Midpoint''). Thus, if the Inside Bid was

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] *See* Securities Exchange Act Release No. 78246 [sic] (August 24, 2016), 81 FR 59672 (August 30, 2016) (SR–BX–2016–037).

[4] If an Order is modified for price, LOP will review the order anew and, if LOP is triggered, such modification will not take effect and the original order will be rejected.

[5] *See* Rule 4756 (Entry and Display of Quotes and Orders) at (a)(3).

[6] A ''Market Maker Peg Order'' is an Order Type designed to allow a Market Maker to maintain a continuous two-sided quotation at a displayed price that is compliant with the quotation requirements for Market Makers set forth in Rule 4613(a)(2). The displayed price of the Market Maker Peg Order is set with reference to a ''Reference Price'' in order to keep the displayed price of the Market Maker Peg Order within a bounded price range. A Market Maker Peg Order may be entered through RASH, FIX or QIX only. A Market Maker Peg Order must be entered with a limit price beyond which the Order may not be priced. The Reference Price for a Market Maker Peg Order to buy (sell) is the then-current National Best Bid (National Best Offer) (including BX), or if no such National Best Bid or National Best Offer, the most recent reported last-sale eligible trade from the responsible single plan processor for that day, or if none, the previous closing price of the security as adjusted to reflect any corporate actions (*e.g.,* dividends or stock splits) in the security. *See* BX Rule 4702(b)(7).

[7] An Intermarket Sweep or ISO Order, which is an Order that is immediately executable within BX against Orders against which they are marketable, is not subject to LOP. *See* BX Rule 6951(g).

[8] Orders with Market and Primary Pegging available through RASH, FIX, and QIX only.

[9] Rule 4703(d).

$11 and the Inside Offer was $11.06, an Order with Midpoint Pegging would be priced at $11.03. An Order with Midpoint Pegging is not displayed. An Order with Midpoint Pegging may be executed in sub-pennies if necessary to obtain a midpoint price.

Midpoint Pegging will be the only Pegging Order subject to LOP, provided it has a limit price. Pegging is available only during Market Hours. An Order with Pegging may specify a limit price beyond which the Order may not be executed; provided, however, that if an Order has been assigned a Pegging Order Attribute and a Discretion Order [10] Attribute, the Order may execute at any price within the discretionary price range, even if beyond the limit price specified with respect to the Pegging Order Attribute. A Midpoint Pegging Order may have a discretion attribute. A Midpoint Pegging Order with a discretion price would not be subject to LOP.

The Exchange notes that a Midpoint Pegging Order, similar to a Primary or Market Pegging Order, as explained below, may result is [sic] an aggressive or passive price. As a result, the LOP may remove orders that were intended to be more aggressive or passive due to the discretionary attribute. For this reason, the Exchange will not subject a Midpoint Pegging Order with a discretion price to LOP.

In addition, an Order with Primary Pegging or Market Pegging may specify an Offset Amount, such that the price of the Order will vary from the Inside Quotation by the selected Offset Amount.[11] The Offset Amount may be either aggressive or passive. Thus, for example, if a Participant entered an Order to buy with Primary Pegging and a passive Offset Amount of $0.05 and the Inside Bid was $11, the Order would be priced at $10.95. If the Participant selected an aggressive Offset Amount of $0.02, however, the Order would be priced at $11.02. An Order with Primary Pegging and an Offset Amount will not be Displayed, unless the Order is Attributable. The Exchange notes that both Market and Primary Pegging may impact the market by effecting the bid or offer.

The Exchange is not applying LOP to orders with Market or Primary Pegging because it may result in removing orders that were intended to be more aggressive or to set the bid or offer on the market due to the order attributes noted above. These Pegging Orders are also subject to a collar, which is explained in this rule change.

In contrast, an Order with Midpoint Pegging will only be at the midpoint and not have the same impact as the other two types of orders and therefore subjecting such an order to LOP does not impact the potential of the order since by definition it is set to the midpoint. An Order with Midpoint Pegging will not be displayed and is not subject to a collar.

An Order with Market Pegging and no Offset behaves as a ''market order'' with respect to any liquidity on the BX Book at the Inside Quotation on the opposite side of the market because it is immediately executable at that price. If, at the time of entry, there is no price to which a Pegged Order can be pegged, the Order will be rejected; provided, however, that a Displayed Order that has Market Pegging, or an Order with a Non-Display Attribute that has Primary Pegging or Market Pegging, will be accepted at its limit price.

In the case of an Order with Midpoint Pegging, if the Inside Bid and Inside Offer are locked, the Order will be priced at the locking price, if the Inside Bid and Inside Offer are crossed, the Order will nevertheless be priced at the midpoint between the Inside Bid and Inside Offer, and if there is no Inside Bid and/or Inside Offer, the Order will be rejected.[12] However, even if the Inside Bid and Inside Offer are locked or crossed, an Order with Midpoint Pegging that locked or crossed an Order on the BX Book would execute (provided, however, that a Midpoint Peg Post-Only Order would execute or post as described in Rule 4702(b)(5)(A)).[13] It is important to note that only to the extent that a Midpoint Pegging Order has a limit price that the Order would be subject to LOP, unless the Midpoint Pegging Order also has a discretion attribute. If no limit price is specified, the Midpoint Pegging Order would not be subject to LOP.

LOP will be operational each trading day, except during trading halts and pauses. LOP will not apply in the event that there is no established LOP Reference Price.[14] The LOP Reference Price shall be the current National Best Bid or Best Offer (NBBO), the bid for sell orders and the offer for buy orders.[15]

LOP will be applicable on all protocols.[16] The LOP feature will be mandatory for all BX members.

Implementation of LOP

The Exchange indicated in its adoptive rule change that it would implement this rule within ninety (90) days of the approval of the proposed rule change.[17] At this time, the Exchange proposes to delay this implementation an additional sixty (60) days from the original timeframe in order to implement the LOP with the changes proposed herein. The Exchange will issue an Equities Trader Alert in advance to inform market participants of such implementation date.

Pegging Order Collar

In 2009, the Exchange adopted a collar for certain Unpriced Orders.[18] At that time, the Exchange defined an Unpriced Order as any order type permitted by the System to buy or sell shares of a security at the national best bid (best offer) (''NBBO'') at the time when the order reaches the System. Any portion of an Unpriced Order that would execute on BX at a price more than $0.25 or 5 percent worse than the NBBO at the time when the order reaches the System, whichever is greater, will be cancelled.

This rule related to the collar was inadvertently removed from the

[10] Discretion is an Order Attribute under which an Order has a non-displayed discretionary price range within which the entering Participant is willing to trade; such an Order may be referred to as a ''Discretionary Order.'' *See* BX Rule 4703(g).

[11] An offset is not supported for a Midpoint Pegging Order.

[12] This provision is subject to change by another rule change. *See* Securities Exchange Act Release No. 78909 (September 22, 2016), 81 FR 66708 (September 28, 2016) (SR–BX–2016–046). The Commission notes that it approved SR–BX–2016–046 on November 10, 2016. *See* Securities Exchange Act Release No. 79290.

[13] *Id.*

[14] For example, if there is a one-sided quote or if the NBB, when used as the LOP Reference Price, is equal to or less than $0.50.

[15] The Exchange will not accept incoming Limit Orders that exceed the LOP Reference Threshold. Limit Orders will not be accepted if the price of the Limit Order is greater than the LOP Reference Threshold for a buy Limit Order. Limit Orders will not be accepted if the price of the Limit Order is less than the LOP Reference Threshold for a sell Limit Order. The LOP Reference Threshold for buy orders will be the LOP Reference Price (offer) plus the applicable percentage specified in the LOP Limit. The LOP Reference Threshold for sell orders will be the LOP Reference Price (bid) minus the applicable percentage specified in the LOP Limit. The LOP Limit will be the greater of 10% of the LOP Reference Price or $0.50 for all securities across all trading sessions. The LOP Reference Price will be the current National Best Bid or Best Offer (NBBO), the bid for sell orders and the offer for buy orders.

[16] BX maintains several communications protocols for members to use in entering Orders and sending other messages to BX, such as: OUCH, RASH, FLITE, and FIX.

[17] *See* note 3 above.

[18] *See* Securities Exchange Act Release No. 63052 (October 6, 2010), 75 FR 62902 (October 13, 2010) (SR–BX–2010–067). An ''Unpriced Order'' was defined in this rule change as any order type permitted by the System to buy or sell shares of a security at the national best bid (best offer) (''NBBO'') at the time when the order reaches the System.

Exchange's rules.[19] At this time, the Exchange proposes to amend the BX rules to add the collar into the rules once again.

The purpose of the collar is to protect market participants by reducing the risk that Primary and Market Pegging Orders will execute at prices that are significantly worse than the national best bid and offer (''NBBO'') at the time the Exchange receives the order. The Exchange believes that most market participants expect that their order will be executed at its full size at a price reasonably related to the prevailing market. However, market participants may not be aware that there is insufficient liquidity at or near the NBBO to fill the entire order, particularly for more thinly-traded securities.

The Exchange proposes to memorialize this collar, which currently exists in its trading and routing systems functionality, and define it specifically as applicable to Primary and Market Pegging Orders. The Exchange seeks to memorialize the rule within Rule 4703, entitled ''Order Attributes.'' The new rule text would state, ''Primary Pegging Orders and Market Pegging Orders are subject to a collar. Any portion of a Primary Pegging Order or Market Pegging Order that would execute, either on the Exchange or when routed to another market center, at a price of more than $0.25 or 5 percent worse than the NBBO at the time when the order reaches the System, whichever is greater, will be cancelled.''

The following example illustrates how the collar works. A market participant submits a routable order to buy 500 shares. The NBBO is $6.00 bid by $6.05 offer, with 100 shares available on each side. Both sides of the NBBO are set by another market center (''Away Market''), but BX has 100 shares available at the $6.05 to sell at the offer price and also has reserve orders to sell 100 shares at $6.32 and 400 shares at $6.40. No other market center is publishing offers to sell the security in between $6.05 and $6.40.

In this example, the order would be executed in the following manner:

- 100 shares would be executed by BX at the $6.05;
- 400 shares would be routed to the Away Market as an immediate or cancel order with a price of $6.05;
- 100 shares executed by the Away Market; [20]
- 300 shares returned to BX;
- 100 shares executed by BX at $6.32 (more than $0.25 but less than 5 percent worse than the NBBO); and 200 shares, representing the remainder of the order, would be cancelled because the remaining liquidity available at $6.40 is more than 5 percent worse than the NBBO.

Implementation of Pegging Order Collar

The Exchange intends to implement the Pegging Order Collar as soon as practicable pursuant to this proposal. The Exchange requests a waiver of the operative delay to implement the Pegging Order Collar.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,[21] in general, and furthers the objectives of Section 6(b)(5) of the Act,[22] in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest, by mitigating risks to market participants of human error in entering Limit Orders at clearly unintended prices. The proposal will allow for protections for Limit Orders which should encourage price continuity and, in turn, protect investors and the public interest by reducing executions occurring at dislocated prices.

The Exchange's proposal to amend the language concerning the modification of Orders is consistent with the Act because only new Orders would be subject to LOP. The proposed new language specifies that Orders that are modified for size and remain in the Order Book with the same priority, because only size was modified to reduce the size, will not be subject to LOP. Other modifications to Orders that amend the timestamp or priority will subject the modified orders to LOP because these Orders will be submitted into the System as new Orders. The LOP functionality protects market participants by reducing the risk that Midpoint Pegging Orders will execute at prices that are significantly worse than the national best bid and offer (''NBBO'') at the time the Exchange receives the order.

The LOP feature assists with the maintenance of fair and orderly markets by mitigating the risks associated with errors resulting in executions at prices that are away from the Best Bid or Offer and potentially erroneous. Further it protects investors from potentially receiving executions away from the prevailing prices at any given time. The Exchange adopted LOP to avoid a series of improperly priced aggressive orders transacting in the Order Book.

The Exchange believes that excluding Primary Pegging and Market Pegging Orders is consistent with the Act because including such orders may result in removing orders that were intended to be more aggressive or to set the bid or offer on the market due to the order attributes noted in the Purpose section of this rule change. Market and Primary Pegging Orders are also currently subject to a collar. Market and Primary Pegging Orders that would execute, either on the Exchange or when routed to another market center, at a price of more than $0.25 or 5 percent worse than the NBBO at the time when the order reaches the System, whichever is greater, will be cancelled.[23] Further, the Market Pegging Order has its own process for rejecting those orders where no price exists to which a Pegged Order can be pegged.

This feature should create a level of protection that prevents the Limit Orders from entering the Order Book outside of an acceptable range for the Limit Order to execute. The LOP should reduce the negative impacts of sudden, unanticipated volatility, and serve to preserve an orderly market in a transparent and uniform manner, increase overall market confidence, and promote fair and orderly markets and the protection of investors.

Pegging Order Collar

The Exchange believes that the collar proposal is consistent with the Act because it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest, by avoiding execution of Primary and Market Pegging Orders (either on BX or on other market centers as a result of orders routed by BX) at prices that are significantly worse than the NBBO at the time the order is initially received. The NBBO provides reasonable guidance of the current value of a given security and therefore market participants should have confidence that their Market and Primary Pegging Orders will not be executed at a significantly worse price than the NBBO.

[19] *See* Securities Exchange Act Release No. 74617 (March 31, 2015), 80 FR 18473 (March 31, 2015) (SR–BX–2015–015).

[20] This assumes that the Away Market's offer was still available and that the Away Market had no additional non-displayed orders at this price.

[21] 15 U.S.C. 78f(b).

[22] 15 U.S.C. 78f(b)(5).

[23] The Exchange inadvertently removed the rule from the BX Rulebook. The Exchange proposes to adopt the rule herein.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. The LOP feature should provide market participants with additional price protection from anomalous executions. This feature is not optional and is applicable to all members submitting Limit Orders. Thus, the Exchange does not believe the proposal creates any significant impact on competition. In addition, the proposed collar in Rule 4703 would be applicable to all Market and Primary Pegging Orders entered into the BX System. Similarly, all Midpoint Pegging Order will be subject to LOP, unless they have a discretion attribute.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act and Rule 19b–4(f)(6) thereunder.[24]

A proposed rule change filed pursuant to Rule 19b–4(f)(6) under the Act[25] normally does not become operative for 30 days after the date of its filing. However, Rule 19b–4(f)(6)(iii)[26] permits the Commission to designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has asked the Commission to waive the 30-day operative delay so that the proposal may become operative immediately upon filing. When the Exchange first proposed the LOP, the Exchange represented that it would implement the LOP within 90 days of obtaining Commission approval (*i.e.,* by November 22, 2016).[27] The Exchange now proposes to extend the LOP implementation date by 60 days in order to include the modifications in this proposed rule change with the implementation of the LOP. Waiver of the 30-day operative delay would allow the Exchange to immediately extend the LOP implementation date. The waiver would also permit the Exchange to immediately clarify the application of the LOP to modified orders. Moreover, the waiver would allow the Exchange to immediately exclude from the LOP Market Pegging Orders, Primary Pegging Orders, and Midpoint Pegging Orders that have a discretion price. As noted above, the Exchange proposes to exclude these Orders because these Orders may be intended to be aggressive or to set the bid or offer on the market. Moreover, as noted above, Market and Primary Pegging Orders are currently subject to collars. Lastly, the waiver would allow the Exchange's rules to immediately and accurately reflect the current collars for Market and Primary Pegging Orders, which were removed inadvertently. Accordingly, the Commission finds that waiving the 30-day operative delay is consistent with the protection of investors and the public interest and designates the proposal operative upon filing.[28]

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

• Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or

• Send an email to *rule-comments@sec.gov.* Please include File Number SR–BX–2016–058 on the subject line.

Paper Comments

• Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–BX–2016–058. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml).* Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–BX–2016–058 and should be submitted on or before December 13, 2016.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[29]

Brent J. Fields,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79324; File No. SR–ICC–2016–013]

Self-Regulatory Organizations; ICE Clear Credit LLC; Notice of Filing of Proposed Rule Change to Amend the ICE Clear Credit Clearing Rules

November 16, 2016.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'') [1] and Rule 19b–4 thereunder [2] notice is hereby given that on November 4, 2016, ICE Clear Credit LLC (''ICC'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared primarily by ICC. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The principal purpose of the proposed rule change is to revise the ICC Rulebook (the ''Rules'') to amend the ICC Clearing Rules (''ICC Rules'') relating to default management, clearing house recovery and wind-down, and to adopt certain related default auction procedures.

II. Self-Regulatory Organization's Statement of the Purpose of, and tatutory Basis for, the Proposed Rule Change

In its filing with the Commission, ICC included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. ICC has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of these statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

(a) Purpose

ICC submits proposed amendments to the ICC Rules relating to clearing house default management, recovery and wind-down to address the risk of uncovered losses from a clearing participant (''Participant'') default or series of Participant defaults, among other risks. ICC also proposed to adopt two related sets of new default auction procedures: initial default auction procedures and secondary default auction procedures.[3]

I. Summary of Proposed Amendments

The amendments would, among other matters:

(i) Enhance existing tools and establish new tools and procedures (and an order of priority for using such tools and procedures) to manage a Participant default or series of defaults and return to a matched book, specifically:

(A) Initial default auctions, to be conducted in accordance with a defined set of default auction procedures;

(B) if such initial default auctions are not fully successful, conducting a secondary auction of all remaining positions, to be conducted in accordance with a defined set of secondary auction procedures; and

(C) if a secondary auction is unsuccessful, partial tear-up of positions of non-defaulting Participants corresponding to the defaulter's remaining portfolio; (Rules 20–605(d)–(f), 809)

(ii) in connection with the new default management steps described in (i) above, eliminate forced allocation as a default management tool; (Rule 20–605(c))

(iii) in connection with these default management steps, provide the ability to implement reduced gains distributions (a.k.a., variation margin haircutting) following exhaustion of other financial resources for up to five business days; (Rule 808)

(iv) adopt new governance and consultation requirements for the use of these default tools and procedures; (Rule 20–605(l))

(v) clarify in the Rules the distinction between the obligation of a Participant to ''replenish'' its guaranty fund contribution and its obligation to meet additional ''assessments'' that may be levied in respect of a Participant default. Consistent with the existing Rules, a Participant's liability for assessment contributions will remain capped at ''1x'' its guaranty fund contribution in respect of any single default; (Rule 803)

(vi) establish a ''cooling-off period'' triggered by certain Participant defaults that result in guaranty fund depletion, in which case the aggregate liability of Participants for replenishments of the guaranty fund and assessments would be capped at ''3x'' its guaranty fund contribution for all defaults during that period; (Rule 806)

(vii) establish a new process under which a Participant may withdraw from the clearing house, both in the ordinary course of business and during a cooling-off period, and related procedures for unwinding all positions of such a Participant and capping its continuing liability to ICC; (Rule 807)

(viii) move ICC's current ''pro rata'' contribution to the guaranty fund higher in the priority waterfall of default resources; and (Rule 802(b))

(ix) clarify the procedures for full clearing service termination, where that is determined to be appropriate by ICC. (Rule 810)

The proposed amendments are described in more detail in the following sections:

II. Revisions to Default Management Tools and Steps

Rule 20–605, which specifies ICC's remedies upon a Participant default, has been substantially revised, both to implement the additional recovery tools discussed herein and to improve overall clarity. ICC's existing default remedies (as modified as discussed herein), such as initial default auctions, are referred to in the revised rule as ''Standard Default Management Actions''. The additional default management tools being adopted, such as secondary auctions, partial tear-up and reduced gain distributions, are referred to in the revised rule as ''Secondary Default Management Actions''. As discussed herein, additional governance and other requirements apply to Secondary Default Management Actions.

Overall Structure of Revised Rule 20–605

Rule 20–605 has been restructured to reflect the distinction between Standard Default Management Actions and Secondary Default Management Actions referred to in the preceding paragraph, and to make certain drafting improvements. In the revised rule:

- Rules 20–605(a) and (b) set out the definition of Default and ICC's ability to declare a Participant in Default, which are substantially the same as in the current Rule.
- Rule 20–605(c) specifies the Defaulting Participant's resources that may be used to cover losses (and the order in which those resources may be applied). In substance, it is consistent with the current Rule.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] Although the auction procedures will not be published, ICC will make such procedures available to all Participants, subject to existing confidentiality arrangements between ICC and Participants and the confidentiality provisions set forth in the auction procedures. ICC will also make such procedures available to customers of Participants at the request of such customers (and/or permit Participants to do so), subject to confidentiality arrangements.

• Rule 20–605(d) and (e) provide for Standard Default Management Actions, which are largely consistent with the current Rules but include the improvements to initial default auctions discussed below. Rule 20–605(e) also sets out the ability of ICC to defer the use of Standard Default Management Actions (which is largely consistent with the current Rules) or bypass the use of Standard Default Management Actions and proceed to the use of Secondary Default Management Actions.

• Rule 20–605(f) provides for the Secondary Default Management Actions, as discussed below.

• Rule 20–605(l) has been revised to impose enhanced governance procedures for Secondary Default Management Actions and certain other matters, as discussed below. As revised, Rule 20–605(l) specifies certain default management actions to be taken in consultation with the CDS Default Committee and other default management actions to be taken in consultation with the Risk Committee. The rule also requires that certain default management actions be taken by the ICC Board (and provides that such decisions may not be delegated to an officer).

Initial Default Auctions

As revised, Rule 20–605(d)(v) provides for ICC to run one or more default auctions with respect to the remaining portfolio of the defaulting Participant.

Default auctions are to be conducted in accordance with a new defined set of default auction procedures. Under those procedures, ICC may break the portfolio into one or more lots, each of which will be auctioned separately. Participants will have an obligation to bid for each lot in a minimum amount determined by ICC. (A Participant may transfer or outsource its minimum bid requirement to an affiliated Participant, and similarly a Participant may aggregate its own minimum bid requirement with that of its affiliated Participant.) A minimum bid requirement will not apply where the bid would be in breach of applicable law or the Rules (including Rules relating to entry into self-referencing credit default swaps) or where the relevant lot includes sovereign credit default swaps referencing the country in which the Participant (or its ultimate parent) is domiciled.

Non-Participants may bid indirectly through a Participant. In addition, Non-Participants have the option to bid directly in the auction, provided that (i) a Participant has confirmed that it will clear any resulting transactions of the Non-Participant; (ii) the Non-Participant makes a minimum deposit of US$10 million which may be applied by ICC in the same manner as Participants' guaranty fund contributions (*e.g.,* subject to ''juniorization'' as described below); and (iii) the Non-Participant has entered into an agreement with ICC pursuant to which it agrees to the auction terms and confidentiality requirement in the same manner as they apply to Participants. If an auction for any lot or lots fails, as determined in accordance with the default auction procedures, ICC may determine to have a subsequent default auction or auctions under these auction procedures.

The auction for each lot will be conducted as a modified Dutch auction, with all winning bidders paying or receiving the auction clearing price.

Under Rule 802(b)(i)(B), all available default resources (both pre-funded guaranty fund contributions of Participant, assessment contributions of Participant and ICC contributions to the guaranty fund) may be used to pay the cost of an initial default auction. Guaranty fund and assessment contributions of non-defaulting Participants are subject to ''juniorization'' and will be applied using a defined default auction priority set out in the default auction procedures based on the competitiveness of their bids. A portion of each Participant's guaranty fund contributions is allocated to the auction cost of each lot, and is further divided into three tranches. The lowest (and first-used) tranche consists of contributions of Participants that failed to bid in the required amount in the relevant auction. The second, or subordinate, tranche includes contributions of Participants whose bids were less competitive than a defined threshold based on the auction clearing price. The final, or senior, tranche includes contributions of Participants whose bids were more competitive than a second threshold. (For Participants who bid in the band between the two thresholds, their contributions will be allocated between the senior and subordinate tranches based on a formula.) Thus, contributions of Participants who fail to bid will be used before those who bid, and contributions of those who bid uncompetitively will be used before those who bid competitively. A parallel juniorization approach applies to the use of assessment contributions. With this design, ICC believes that the default auction procedures give Participants a strong incentive to bid competitively, with the goal of reaching an efficient auction clearing price that permits the clearing house to close out the defaulter's portfolio within the resources of the clearing house.

Secondary Auction

If the initial default auctions are not fully successful in closing out the defaulting Participant's portfolio, ICC will proceed to use Secondary Default Management Actions with respect to the remaining portfolio. The first such step would be to conduct a secondary auction with respect to the defaulter's remaining portfolio under Rule 20–605(f)(ii). (As discussed below, ICC may in certain circumstances invoke reduced gains distributions in connection with such an auction.)

The secondary auction will be conducted pursuant to a separate set of secondary auction procedures. The secondary auction will also use a modified Dutch auction format, with all winning bidders paying or receiving the auction clearing price. ICC will endeavor to auction off the remaining portfolio in a single lot, although it may break the portfolio into separate lots if certain Participants are not able to bid on particular contracts or it otherwise determines that doing so would facilitate the auction process. A secondary auction for a lot will be deemed successful if it results in a price for the lot that is within ICC's remaining default resources, which will be allocated to each lot for this purpose based on the initial margin requirements for the lot. The secondary auction procedures contemplate that non-Participants may bid directly in the secondary auction (without need for a minimum deposit, but provided that a Participant has confirmed that it will clear any resulting transactions of the Non-Participant), or may bid through a Participant.

Under Rule 802(b)(i)(B), in the case of a secondary auction, ICC will apply all remaining clearing house default resources. Guaranty fund and assessment contributions of non-defaulting Participants, to the extent remaining, will be subject to ''juniorization'' in a secondary auction, similar to that described above for initial default auctions, in accordance with the secondary auction priority set forth in the secondary auction procedures.

If a secondary auction is unsuccessful for any lot, ICC may run another secondary auction for that lot on a subsequent business day. ICC may repeat this process as necessary. However, pursuant to Rule 808(e), if ICC has invoked reduced gains distributions, the last attempt at a secondary auction (if needed) will occur on the last day of the five-business-day reduced gain

distribution period. On that last day, the secondary auction for each lot will be successful if it results in a price that is within the default resources for such lot. ICC may also determine, for a secondary auction on that last day, that an auction for a lot will be partially filled. With respect to any lot that is not successfully auctioned, in whole or in part, ICC will proceed to partial tear-up under Rules 808(e) and 809, as described below.

Partial Tear-Up

If the secondary auction does not result in the close out of all of the defaulter's remaining portfolio within the clearing house's remaining resources, then ICC will proceed to a partial tear-up of the remaining positions under Rules 20–605(f)(iii) and 809. Under Rule 809(a), ICC will be permitted to use partial tear-up only after it has attempted one or more initial default or secondary auctions. Pursuant to revised Rule 20–605(l)(iv) and (v), ICC must consult with the Risk Committee before invoking partial tear-up, and any decision to use partial tear-up must be made by the ICC Board. Rule 809(b) specifies certain notice requirements in connection with any partial tear-up.

Pursuant to Rule 809(c), in a partial tear-up, ICC will terminate positions of non-defaulting Participants that exactly offset those in the defaulting Participant's remaining portfolio (*i.e.,* positions in the identical contracts and in the same aggregate notional amount) (''Tear-Up Positions''). ICC will terminate Tear-Up Positions across both the house and customer origin accounts of all non-defaulting Participants that have such positions, on a pro rata basis. Within the customer origin account of a non-defaulting Participant, Tear-Up Positions of customers will be terminated on a pro rata basis. Where ICC has entered into hedging transactions relating to the defaulter's positions that will not themselves be subject to tear-up, ICC may offer to assign or transfer those transactions to Participants with related Tear-Up Positions.

ICC will determine a termination price for all Tear-Up Positions, in accordance with Rule 809(e) based on the last established end-of-day mark-to-market settlement price. Under Rules 809(b)(iv) and (d), tear-up will occur contemporaneously with the determination of such price (at 5 p.m., New York time). Because the termination price will equal the current mark-to-market value as determined pursuant to the ICC end-of-day settlement price process (and will be satisfied by application of mark-to-market margin posted (or that would have been posted but for reduced gain distribution) under Rule 809(d)), no additional amount will be owed by ICC in connection with the tear-up.

Reduced Gains Distributions

As an additional Secondary Default Management Action, where ICC has exhausted its remaining available default resources (including assessment contributions), ICC may invoke reduced gain distributions under Rules 20–605(f)(i) and 808 for up to five consecutive business days. Reduced gain distribution will allow ICC to reduce payment of variation, or mark-to-market, gains that would otherwise be owed to Participants, as it attempts a secondary auction or conducts a partial tear-up. Rule 808(b) specified certain conditions to the commencement of reduced gain distribution, including that ICC has exhausted all other available default resources and has determined that reduced gain distribution is appropriate in connection with a secondary auction or partial tear-up. Pursuant to revised Rule 20–605(l)(iv) and (v), ICC must consult with the Risk Committee before using reduced gain distribution, and any decision to use reduced gain distribution must be made by the ICC Board. Rule 808(c) specifies certain notice requirements in connection with reduced gain distributions.[4]

Pursuant to Rule 808(d), at the end of each day in the five business day period, ICC must determine whether it expects that there will be favorable conditions for completing a successful secondary auction. If so, ICC may continue the reduced gain distribution for that day.

Under Rule 808(e), if ICC conducts a successful secondary auction on any day, any reduced gain distribution period that is in effect will end. If ICC has been unable to conduct a successful secondary auction by the end of the five business day reduced gain distribution period, ICC will proceed to conduct a partial tear-up under Rule 809 as of the close of business on such fifth business day.

Pursuant to Rule 808(f) and (h), if reduced gain distribution applies on any day, the net amount owed on such day to each Participant that is deemed to be a ''cash gainer'' in respect of its house or customer origin account (*i.e.,* a Participant that would otherwise be entitled to receive mark-to-market margin or other payments in respect of such account) will be subject to a percentage haircut. Haircuts are determined independently on each day of reduced gain distribution. Haircuts are applied separately for the house and customer origin accounts. Under Rule 808(p), within the customer origin account, haircuts are applied on a gross basis across the different customer portfolios, such that each customer portfolio receives the same haircut percentage. For each day of reduced gain distribution, ICC will notify Participants and the market more generally of the amount of the reduction, through a circular made available in the ordinary course on its Web site and through electronic distribution, promptly following the close of business on such day and completion of the relevant calculations as of the close of business (which is expected to be at approximately 7:30 p.m. New York time), in accordance with Rule 808(c).

Following the conclusion of the closing-out process for a default, ICC will apply any recoveries from the defaulting Participant to make payments to non-defaulting Participants in an amount equal to the aggregate net amount of haircuts made during the period of reduced gain distributions, pursuant to Rule 808(m).

Removal of Forced Allocation as a Default Management Tool

Existing Rule 20–605(c)(vii), which allowed ICC to make a forced allocation of positions in the defaulter's portfolio, has been removed in light of the new default management tools described above.

Governance for Use [sic] Default Management Tools

The proposed amendments add new governance requirements around the ICC's use of the revised default management tools.

Under new Rule 20–605(l)(iii), ICC will consult with its CDS Default Committee with respect to establishing the terms for default auctions and secondary auctions, including defining different lots for default auctions. In the context of an initial auction, ICC will also consult with the CDS Default Committee as to whether to hold additional such auctions and/or to accept a partial fill of any lot in such an auction. Under existing Rule 20–617, CDS Default Committee members consist of experienced trading personnel at Participants that serve on the CDS Default Committee on a rotating basis and who are seconded to ICC to assist with default management. Under revised Rule 20–617(g), and consistent

[4] An error in the description of rule 808(c) was corrected by SEC staff and confirmed by ICC counsel via email on November 15, 2016.

with current practice, seconded committee members are required to act in the best interests of ICE Clear Credit (rather than in the interests of their Participant firm). Members of the CDS Default Committee are expected to work together with, and under the supervision of, the ICC risk department, and are also supported by legal, compliance and other relevant ICC personnel. Ultimate decisions as to matters subject to consultation with the CDS Default Committee will be made by ICC management.

Under new Rule 20–605(l)(iv), ICC will consult with its Risk Committee, to the extent practicable, with respect to key decisions involving Secondary Default Management Actions, including whether to hold a secondary auction, invoke reduced gains distribution, implement a partial tear-up and/or terminate the clearing service. The amendments also establish notice and similar procedures for Risk Committee consultation in this context, and address circumstances in which such consultation is impracticable (in which case ICC may act without prior consultation but must generally consult as soon as is practicable). In particular, under the ICC Code of Business Conduct and Ethics for Committee Members,[5] the Risk Committee is charged with acting in the interests of the clearing house, rather than the interests of individual members (or the Participants they may represent). Consistent with its current practice, the Risk Committee would be provided with detailed, confidential information concerning the proposed actions to be taken. Under Chapter 5 of the Rules and the Charter of the Risk Committee,[6] the committee is to have the resources and authority appropriate to discharge its function. Under the Rules, the role of the Risk Committee is advisory, and accordingly, the final decision with respect to Secondary Default Management Actions (like other actions) will rest with the ICC Board as discussed below. In practice, ICC management and the ICC Board have worked collaboratively with the Risk Committee, and there is no history of the ICC Board acting over the objection of the Risk Committee. As discussed below, Participants and their interests are also significantly represented on the ICC Board.

In addition, new Rule 20–605(l)(v) provides that certain key decisions involving Secondary Default Management Actions must be made by majority vote of the ICC Board (and may not be delegated to an officer). These include whether to hold a secondary auction, invoke reduced gains distribution, implement a partial tear-up and/or terminate the clearing service. Under the existing constitutive documents of the clearing house, including the Board charter and Governance Playbook, a majority of the ICC Board is required to be independent of ICC management. In addition, under the Board charter, four of the eleven members of the Board are designated by the Risk Committee (two of which are independent of Participants and two of which need not be so independent (and thus may be representatives of Participants)).

III. Clarifications of Guaranty Fund Requirements and Uses

Various clarifications and conforming changes have been made to the provisions of Rules 801 and 802, which address the contributions to and uses of the guaranty fund. Provisions in Rules 803 and 804 have also been moved and reorganized. These changes include the following:

- The changes clarify the distinction between the obligation of a Participant to ''replenish'' its guaranty fund contribution (Rule 803(a)) and its obligation to make ''assessment contributions'' (Rule 803(b)). These clarifications do not change the substance of existing requirements. For this purpose, an ''assessment'' provides additional resources beyond funded resources to cover losses from a particular default that has already occurred. By contrast, a ''replenishment'' is designed to restore the required level of the guaranty fund following application thereof, and thus replenishments are to be used to cover future potential defaults.
- Rule 803(b) also permits assessments to be called in anticipation of any charge against the guaranty fund following a default, rather than only after such a charge.
- A parallel distinction has been made with respect to ICC's contribution to the guaranty fund between required replenishments and additional contributions where assessments have been levied on Participants (subject to a similar 1x limit per default (which is $25 million), and an aggregate 3x limit for replenishments and assessments in a cooling-off period (which is $75 million)). (Rule 801(b)).
- ICC's current ''pro rata'' contribution to the guaranty fund has been moved higher in the priority waterfall, such that it will be used prior to the application of guaranty fund contributions of non-defaulting Participants. Similarly, additional ICC contributions to the guaranty fund where assessments have been levied on Participants will be applied before such assessments. (Rule 801(b))
- Rule 801(a) has been revised generally to conform to the revised assessment limitations set forth in the other rules in Chapter 8.
- Rules 802(a) and (c), which address the allocation of recoveries from a defaulting Participant, have been simplified and revised to conform to the other changes in the default waterfall.
- Rule 802(c) has also been revised to state ICC's obligations with respect to seeking recoveries from a defaulting Participant. Specifically, ICC will exercise the same degree of care in enforcement and collection of any claims against the defaulter as it exercises with respect to its own assets that are not subject to allocation to Participants and others.

IV. Cooling-Off Period

New Rule 806 implements the ''cooling-off period'' concept. (Related definitions, including for ''cooling-off period,'' ''cooling-off period trigger event,'' ''cooling-off termination period'' and ''sequential guaranty fund depletion,'' have been included in Rule 102.) A ''cooling-off period'' is triggered by certain calls for assessments or by sequential guaranty fund depletion within a 30 calendar day period. Pursuant to Rule 806(b), liability of Participants for assessments as a result of the default or defaults that triggered the cooling-off period or that occur during the cooling-off period remains capped at ''1x'' the required guaranty fund contribution per default. In addition, the total amount of replenishments and assessment contributions during the cooling-off period cannot exceed three times the required guaranty fund contribution, regardless of the number of defaults during the period. The foregoing caps are based on a Participant's individual guaranty fund contribution immediately prior to the default that triggered the cooling-off period. Under Rule 806(e), Participants may also be required to provide additional initial margin during the period, which will facilitate ICC's ability to continue to satisfy its regulatory minimum financial resources requirements.

[5] An error in the title of ICC Code of Business Conduct and Ethics for Committee Members was corrected by SEC staff and confirmed by ICC counsel via email on November 9, 2016.

[6] An error in the title of Rules and the Charter of the Board of Managers of ICC was corrected by SEC staff and confirmed by ICC counsel via email on November 9, 2016.

V. Participant Withdrawal

New procedures for the withdrawal of Participants are added in revisions to Rule 207 and new Rule 807. These apply both to ordinary course terminations outside of a default scenario and termination during a cooling-off period. Under Rule 807(a), Participants may withdraw from ICC during a cooling-off period by providing an irrevocable notice of withdrawal in the first 10 business days of the period (subject to extension in certain cases if the cooling-off period is extended). Participants may withdraw from ICC at other times by notice to ICC under Rule 207. In either case, Participants must close out all outstanding positions by a specified deadline, generally within 20 to 30 business days following notice of withdrawal. Withdrawal is not effective, pursuant to Rule 807, until the Participant has closed out all outstanding positions and satisfied any related obligations, and a withdrawing Participant remains liable under Rule 807(b) with respect to charges and assessments resulting from defaults that occur before such time. Under Rule 807(f), a Participant that seeks to withdraw other than during the first 10 business days of a cooling-off period may, at the direction of ICC, be required to make a deposit of up to three times its required guaranty fund contribution (including any Specific WWR Guaranty Fund Contribution). Such a deposit would not impose new liabilities on the Participant, but provide assurance that the withdrawing Participant will continue to meet its obligations in respect of defaults and potential defaults before its withdrawal is effective. It thus reduces the potentially destabilizing effect that Participant withdrawal (or a series of Participant withdrawals) could have on the clearing house during a stressed situation. Rule 807(a) also specifies the timing for the return of guaranty fund contributions to a withdrawing Participant. Certain related definitions (including ''termination close-out deadline date'' and ''termination date'') have been added in Rule 102.

VI. Clearing Service Termination

New Rule 810 revises and replaces current Rule 804, and addresses the procedures for full clearing service termination. As under current Rule 804, full termination will occur following an ICC default as provided in Rule 805, and in circumstances where termination is otherwise determined to be appropriate by the ICC Board in consultation with the Risk Committee. In the latter case, pursuant to revised Rule 20–605(l)(iv) and (v), ICC must consult with the Risk Committee before terminating the clearing service, and any decision to do so must be made by the ICC Board.

Rule 810(b) specifies more precisely the time at which termination will occur, which, in the case of an ICC default, will be 5 p.m. New York time on the second business day following the default. In the case of other termination scenarios, termination will occur at the time specified by ICC in the circular, which must be within one business day of the issuance of the circular. Rule 810(c) specifies notice requirements for full termination. Rule 810(d) establishes a procedure for determination of the termination price. ICC will determine a termination price for all positions (based on the last established mark-to-market price, if available, a final price submission process, or certain other specified objective sources). Rule 810(e) clarifies the procedures for determining a net amount owed to or by each Participant (separately for its house and customer accounts) in connection with the termination. Rule 810(e) in particular clarifies the treatment of mark-to-market margin and reduced gain distributions in the calculation of net amounts owed. ICC will use all available default resources and net payments owed by Participants to make net payments owed to Participants, and in the event of a shortfall, available amounts will be applied on a pro rata basis.

VII. Additional Changes

ICC has proposed certain additional changes to the Rules that are generally in the nature of drafting improvements, clarifications and conforming changes. In particular, ICC has revised Rule 102 to include, for clarity, additional cross-references to various terms that are defined in other parts of the Rules. Similarly, updated definitions and cross-references have been added in new Rule 700 for Chapter 7 of the Rules, in Rule 901 for Chapter 9 of the Rules, in new Rule 2100 for Chapter 21 of the Rules, in Rule 2200 for Chapter 22 of the Rules,[7] and in Rule 26E–102 for Chapter 26E of the Rules. Rule 102 has also been revised to add new defined terms that are used in the rule changes discussed above, such as those relating to cooling-off period and the distinction between initial phase default resources (generally available for standard default management actions) and final phase default resources (generally available for secondary default management actions).

Certain other conforming changes have been made throughout the Rules to reflect the new default management tools and provisions discussed above, including in Rules 207, 209 and 502. In Rule 312, ICC has clarified its liability for certain actions in connection with the default management process, and made certain other conforming changes. In Rule 406(g), ICC has clarified its liability for certain investments of customer funds, consistent with Commodity Futures Trading Commission (''CFTC'') requirements. In Rule 601, ICC has clarified that its emergency authority does not override the limitations on Participant liability in Chapter 8 of the Rules, or permit partial tear-up of positions except as otherwise provided in the Rules. Certain other typographical and cross-reference corrections have been made throughout the Rules. Certain incorrect references in the Rules to the title of ''chief executive officer'' have been removed, in light of the fact that the senior ICC officer is titled ''president.''

(b) Statutory Basis

ICC believes that the proposed rule changes are consistent with the requirements of Section 17A of the Act[8] and the regulations thereunder applicable to it, including the standards under Rule 17Ad–22,[9] and in particular are consistent with the prompt and accurate clearance and settlement of securities transactions and derivative agreements, contracts and transactions cleared by ICC, the safeguarding of securities and funds in the custody or control of ICC or for which it is responsible, and the protection of investors and the public interest, within the meaning of Section 17A(b)(3)(F) of the Act.[10] As discussed herein, the proposed rule changes are principally designed to address the risks posed to ICC by a significant default by one or more Participants, as well as certain other loss events. Although ICC has established the level of its required financial resources in order to cover defaults in extreme but plausible market conditions, consistent with regulatory requirements, ICC nonetheless faces the risk of a loss scenario (however implausible) that exceeds such conditions (as a result of which its financial resources may not be sufficient to cover the loss in full). The proposed rule changes are intended to enhance the ability of ICC to manage the risk of

---

[7] An error in the citation was corrected by SEC staff and confirmed by ICC counsel via email on November 9, 2016.

[8] 15 U.S.C. 78q–1.

[9] 17 CFR 240.17Ad–22.

[10] 15 U.S.C. 78q–1(b)(3)(F).

such a default. ICC does not propose to change its existing risk methodology or margin framework, which are its initial lines of defense against losses from Participant default. However, as discussed herein, the amendments provide additional default tools and procedures, including initial and secondary auction procedures and partial tear-up, that are designed to permit ICC to restore a matched book and limit its exposure to potential losses from a Participant default in extreme scenarios that may not be able to be addressed by standard risk management and default procedures. The enhanced procedures for full termination also serve as a means of addressing general business risk, operational risk and other risks that may otherwise threaten the viability of the clearing house. Moreover, the amendments clarify the ability of Participants to withdraw from the clearing house (and specify the responsibilities and liabilities of the clearing house and the Participant in such situations.)

In the proposed rule changes, ICC has sought to develop default management tools that permit and incentivize involvement of both Participants and customers of Participants in a default management scenario. For example, the new default auction procedures are designed to incentivize competitive bidding through the possibility of juniorization of guaranty fund and assessment contributions. The auction procedures further contemplate that customers may participate directly in default auctions at their election (subject to making the required clearing deposit), or alternatively may participate through a Participant (without the need for such a deposit). ICE Clear Credit believes that such participation will lead to more effective and efficient auctions, and give customers of Participants the opportunity to protect against the possibility of partial tear-up (to the extent the consequences thereof are adverse to them) and reduced gain distribution through bidding competitively in the auction.

The amendments also more clearly allocate certain losses as among ICC, Participants and their customers. The amendments are designed to plan for a remote and unprecedented, but potentially extreme, type of loss event—a loss from one or more Participant defaults that exhausts funded resources and requires additional recovery or wind-down steps. Such losses will necessarily and adversely affect some or all Participants, customers or other stakeholders. In ICE Clear Credit's view, its current Rules, with the possibility of forced allocation, could force certain risks of loss only on Participants, in a way that is unpredictable and difficult to quantify in advance, and that Participants have strongly stated is undesirable from their perspective. ICE Clear Credit believes that the amendments take a more balanced approach that distributes potential losses more broadly, to both Participants and customers that would otherwise have potential gains. Specifically, in the event of a partial tear-up, all market participants (both Participants and customers) holding the relevant positions would be affected on a pro rata basis. Similarly, losses arising from reduced gain distribution (which would be invoked only following exhaustion of all other resources) would be shared on a pro rata basis by both Participants and customers with gain positions. In the event of a full termination, any shortfall in resources would similarly be shared on a pro rata basis across all Participants and their customers. ICE Clear Credit also believes that the amendments provide greater certainty as to the consequences of default and the resources that would be available to support clearing operations, to allow stakeholders to evaluate more fully the risks and benefits of clearing.

In light of extensive discussions with Participants, customers and others, and the views expressed by industry groups and others, ICE Clear Credit believes that the amendments provide an appropriate and equitable method to allocate the loss from an extreme default scenario to both Participants and their customers on the basis of their positions. ICE Clear Credit further believes that the approach taken will facilitate the ability of the clearing house to fully allocate the loss so that it can continue clearing operations and withstand and/or recover from extreme loss events. The amendments therefore further the prompt and accurate clearance and settlement of cleared transactions. The amendments will also support the stability of the clearing system, as part of the broader financial system, and will promote the protection of market participants from the risk of default by another market participant and the public interest more generally. In light of the importance of clearing houses to the financial markets they serve, the policy in favor of clearing of financial transactions as set out in the Dodd-Frank Wall Street Reform and Consumer Protection Act, and the potential adverse consequences of a clearing house failure for the financial markets, the amendments support the public interest.

In addition to the Act, the amendments are designed to satisfy the requirements of CFTC Rules 39.35 and 39.39 applicable to ICC as a derivatives clearing organization designated as systemically important under Title VIII of the Dodd-Frank Wall Street Reform and Consumer Protection Act, and to be consistent with relevant international standards, including the Principles of Financial Market Infrastructure developed by CPMI–IOSCO.

The amendments will also satisfy the specific relevant requirements of Rule 17Ad–22,[11] as set forth in the following discussion:

Financial Resources. ICC's funded margin and guaranty fund resources are currently designed to be sufficient to meet ICC's financial obligations to clearing members notwithstanding a default by the two clearing members creating the largest combined loss, in extreme but plausible market conditions, consistent with regulatory requirements. ICC does not propose to reduce such funded resources. The amendments are intended to enhance and provide greater certainty as to the additional resources, beyond the funded margin and guaranty fund resources, that will be available to support clearing operations in more extreme Participant default scenarios. ICC also proposes to maintain the current level of its own contributions to default resources, but to move those resources higher in the default waterfall (so that they are used prior to the guaranty fund contributions of non-defaulting Participants) and thus provide additional protection for the contributions of non-defaulting Participants.

As set forth above, the amendments would maintain the existing ''1x'' limitation on assessments per default, and impose a new limitation on guaranty fund replenishments and assessments during a cooling-off period resulting from guaranty fund depletion. The amendments will require that Participants continue to replenish and meet assessment obligations during the cooling-off period, subject to a 3x limit. In addition, in the event the 3x limit is reached, the amended rules allow ICC to call on Participants for additional initial margin in order to ensure that it maintains sufficient resources to comply with applicable minimum regulatory financial resources requirements. In ICC's view, these changes provide an appropriate balance between several competing interests of the clearing house and Participants. Although the amendments may in theory limit the maximum resources available to the

[11] 17 CFR 240.17Ad–22.

clearing house (as compared to the absence of a cap), the changes will provide greater certainty for Participants as to their maximum liability with respect to the guaranty fund in the event of defaults (and thus their maximum amount of mutualized risk), in order to facilitate their own risk management, regulatory and capital considerations. This greater certainty is in turn intended to help stabilize the clearing house during a period of significant stress, including where there are multiple defaults. In particular, a cooling-off period and limit on assessments may reduce the risk of cascading defaults, where the financial demands placed on non-defaulting Participants for repeated assessments or replenishments could cause such Participants to themselves experience financial stress or even default, which could make the default management process more difficult. The cooling-off period thus reduces the potential procyclical effect of requiring additional mutualized guaranty fund contributions in times of stress. The period is designed to give the clearing house time to work out the default without exacerbating these stresses, while also allowing the clearing house and Participants time to assess whether the defaults will be able to be resolved and normal clearing will be able to resume.

In addition, the amendments will ensure that ICC maintains sufficient resources to continue operations in compliance with minimum regulatory financial resources requirements, either through replenishment of the guaranty fund in the normal course, or in an extreme situation where the 3x cap is reached, by providing ICC the ability to call for additional initial margin. ICC recognizes that the ability to call for such additional initial margin, particularly in times of stress, may have a potential procyclical impact and potential liquidity impact on Participants and their customers that is greater than guaranty fund replenishment, because initial margin is not subject to mutualization. As a result, the amount of additional initial margin required may exceed the amount of guaranty fund replenishment that would be required in the absence of the 3X cap. At the same time, ICC believes that these risks are limited to a particular remote loss scenario, and are mitigated by certain factors. ICC expects to limit the additional margin to the amount necessary to maintain minimum regulatory financial resources compliance, which may be less than the amount ICC would otherwise require under its guaranty fund methodology. ICC also expects that over the course of a cooling-off period, aggregate potential stress losses, and thus the need for additional financial resources, will generally decrease. In particular, Participants (and their customers) have the opportunity during the cooling-off period to reduce or rebalance the risk in their own portfolios, and thus mitigate potential stress loss and exposure to initial margin increases. Participants and their customers can also participate in default management (through participation in auctions), which will help them reduce their own risk profile. Greater involvement in default management may enhance competitive bidding, which in turn may reduce the likelihood that the 3X cap will be reached. In addition, and most importantly, additional initial margin posted by Participants is not subject to mutualization and cannot be used to cover defaults of other Participants. As a result, while Participants may be required to post more funds as additional initial margin than in a replenishment of a mutualized guaranty fund, the risk of loss to Participants of those additional margin funds is substantially less than for guaranty fund replenishment. Based on discussions with its Participants, ICC understands that for these reasons Participants prefer the use of additional initial margin in this remote, but potentially highly stressed scenario, notwithstanding the potentially higher procyclical or liquidity effect.

The clearing house has set the length of the cooling-off period at a duration of 30 calendar days, which is intended to be long enough to provide the clearing house and Participants with a measure of stability and predictability as to the use of guaranty fund resources and avoid incentivizing Participants to withdraw from the clearing house following a default. This period is consistent with the timeframe for the normal, periodic recalculation of ICC's guaranty fund under Rule 801 (which is done on a monthly basis), a period that ICC has found appropriately balances stable guaranty fund requirements with the ability to make changes as necessary. ICC also believes, based on its analysis of the OTC derivatives markets and historical default scenarios involving a large OTC market participant, that 30 days has historically been an adequate period for the market to stabilize following a significant default event. (This was, for example, observed in the interest rate swap market following the Lehman insolvency.) ICC similarly believes that in the context of a cooling-off period, 30 calendar days is an appropriate time horizon to seek to stabilize the clearing house, in light of the products cleared by ICC, and reduce stress on non-defaulting Participants (and their customers) as the clearing house conducts its default management. It provides a minimum period for Participants (and their customers) to reduce or rebalance their positions in an orderly manner to facilitate continued clearing operations once the cooling-off period ends. The 30-day cooling-off period will thus help provide stability for the market and predictability for Participants and their customers as they seek to manage their own risks. In ICC's view, this may increase the willingness and ability of Participants and their customers to participate in a default auction and absorb the defaulter's positions through the default management process.

A shorter cooling-off period, in ICC's view, may result in greater potential assessment and replenishment liability for Participants, which in turn may increase the risk of a default (or series of defaults) caused by an inability of Participants to meet such liabilities on a timely basis. A shorter period may also give non-defaulting Participants an incentive to withdraw quickly from the clearing house following a default. That may destabilize the clearing house, make it more difficult to resolve the default and achieve recovery following default, and reduce confidence in the ability of the clearing house to resume non-distressed clearing operations going forward. A longer cooling-off period may thus help stabilize the clearing system during the default management process. On the other hand, a longer cooling-off period may make it more likely that the 3X cap will be reached, which could in turn increase the stress on clearing house resources and make it more likely that ICC would need to call additional margin from Participants in order to meet ICC's regulatory financial resources requirements, which can itself adversely affect Participants. In ICC's view, the 30-day cooling-off period and assessment limits balance the interests of both the clearing house and Participants and in the aggregate enhances the likelihood that the clearing house can withstand a default.

In ICC's view, the amendments are thus consistent with the financial resources requirements of Rule 17Ad–22(b)(2)–(3).[12]

Settlement Process and Reduced Gain Distribution. The amendments contemplate that as a Secondary Default Management Action, in extreme cases,

[12] 17 CFR 240.17Ad–22(b)(2)–(3)

ICC may implement reduced gains distributions for up to five business days where it has exhausted all other financial resources (including assessment contributions). In such case, ICC will continue to collect mark-to-market margin owed to it from all non-defaulting Participants, but will reduce outbound payments of mark-to-market margin owed to Participants to reflect available resources. ICC will calculate the haircut amount on a daily basis for each day of reduced gain distribution, without consideration of reductions on prior days. As a result, settlement on any day of reduced gain distributions will be final, as ICC does not have any ability to reverse or unwind the settlement. As a result, in ICC's view, the amendments are consistent with the requirements of requirements of Rule 17Ad–22(d)(5), (12) and (15) [13] as to the finality and accuracy of its daily settlement process.

Default Procedures. The amendments clarify and augment the Rules and procedures relating to default management, with the goal of enhancing the ability of the clearing house to withstand extreme default events. The amendments more clearly distinguish between standard default management events, largely covered by its existing default rules and procedures, and more extreme default management scenarios, for which recovery tools may be appropriate. The amendments include a new set of initial auction procedures, designed to facilitate liquidation of the defaulter's portfolio through a multi-lot modified Dutch auction. The auction procedures require participation of all Participants (unless outsourced to another Participant in accordance with the Rules), and permit direct participation in the auction by customers as well as Participants. The procedures also provide incentives for competitive bidding through juniorization of guaranty fund and assessment contributions, as discussed above. The amendments further include a set of secondary auction procedures, intended to provide for an effective final auction of the entire remaining portfolio, prior to the exercise of recovery tools such as tear-up.

Following extensive consultation with Participants, ICE Clear Credit is proposing to remove the existing tool of forced allocation, which may result in unpredictable and unquantifiable liability for Participants. Instead, ICE Clear Credit will have the option to invoke a partial tear-up of positions to restore a matched book in the event that it is unable to auction the defaulter's remaining portfolio. Partial tear-up, if used, will occur at the most recent mark-to-market settlement price determined by ICC, contemporaneously with such determination. As a result, partial tear-up will not result in additional loss to Participants as compared to the most recent mark to market settlement (and if reduced gain distribution is invoked, partial tear-up will not entail additional loss beyond that resulting from such reduced gain distribution). ICE Clear Credit believes that this revised set of tools will maximize the clearing house's ability to efficiently, fairly and safely manage extreme default events. The amendments further provide for the allocation of losses that exceed funded resources, through assessments and replenishments to the guaranty fund, as described herein, and the use of reduced gains distributions when necessary, following the exhaustion of all other resources. The amendments thus are designed to permit ICC to fully allocate losses arising from default by one or more Participants, with the goal of permitting the clearing house to resume normal operations.

As a result, in ICE Clear Credit's view, the amendments will allow it to take timely action to contain losses and liquidity pressures and to continue meeting its obligations in the event of clearing member insolvencies or defaults, in accordance with Rule 17Ad–22(d)(11).[14]

Operational Resources. ICC believes that its operational systems and capabilities are sufficient to support the proposed rule changes and new default management tools that would be implemented under those amendments. ICC contemplates testing of the use of the new tools and procedures as part of its regular default management exercises, in order to identify and manage any related operational risks. ICC has developed various automated systems relating to the default management process, and has done significant preparatory work to incorporate the new recovery tools and procedures in those systems. Once the rule amendments are effective, ICC will complete the incorporation of those tools into its systems, and test such systems as part of its regular system testing process. The results of such testing will be shared with appropriate ICC risk and governance committees and regulators, consistent with the treatment of the results of other default management testing. These arrangements will address relevant sources of operational risk in the default management process and are designed to minimize such risks, within the meaning of Rule 17Ad–22(d)(4).[15]

Well-Founded Legal Framework. Rule 17Ad–22(d)(1) requires that a clearing agency have rules and policies reasonably designed to provide a well-founded, transparent and enforceable legal framework for each aspect of its activities in all relevant jurisdictions. ICC believes that the amendments will provide a clearer and more transparent set of default management procedures for addressing extreme loss events, and thus provide greater certainty to the clearing house, Participants and other market participants as to the various tools available to the clearing house and the potential liabilities of Participants and others in such events. ICC further believes that the amendments will permit the clearing house to conduct an orderly recovery or, if necessary, wind-down process, in accordance with the requirements of applicable regulations. ICC has in addition considered and obtained legal advice, as appropriate, as to the enforceability of the amendments. As a result, ICC believes the amendments are consistent with the requirements of Rule 17Ad–22(d)(1).

Governance Arrangements. Rule 17Ad–22(d)(8) requires that a clearing agency have governance arrangements that are clear and transparent to fulfill the public interest requirements in Section 17A of the Act, to support the objectives of owners and participants, and to promote the effectiveness of the clearing agency's risk management procedures. ICE Clear Credit believes the amendments discussed herein satisfy these requirements. The amendments are designed to address extreme loss scenarios resulting from Participant default, and provide an orderly means for recovery or wind-down of clearing operations if necessary. The amendments also clarify the procedures for clearing service termination, which is designed to address other extreme loss scenarios that may necessitate wind-down of operations, to provide greater certainty as to the circumstances under which such termination may occur and the timing and price of any such termination, among other matters. The amendments set out in detail the responsibilities of ICE Clear Credit management, the ICE Clear Credit Board, the ICC Risk Committee (consisting of representatives of Participants) and the ICC CDS Default Committee (consisting of trading personnel seconded from Participants to assist with default management) for key

decisions relating to the use of recovery and wind-down tools. As discussed above, the revised Rules build on the existing procedures (and historical practice) for consultation with the Risk Committee and CDS Default Committee, and provide adequate resources for those committees to perform their functions. They also reflect the collaborative relationship between the Board and Risk Committee, and the independence of the Board and the significant participation of Participants on the Board. In taking decisions concerning these matters, the Rules, the ICC mission statement, and the relevant governance committee charters will require the Board to take into consideration both the interests of Participants, customers and other stakeholders and the broader goal of providing safe and sound central counterparty services to reduce systemic risk in an efficient and compliant manner, consistent with the requirements of the Act and Rule 17Ad–22(d)(8). These governance procedures have been tailored to provide for meaningful consultation with relevant stakeholders while preserving the ability of the clearing house to act decisively in the exigent and likely unpredictable circumstances of a major Participant default or defaults or other significant loss events.

As noted above, key decisions involving the use of recovery or wind-down tools (including the use of partial tear-up, reduced gain distribution or full clearing service termination) are subject to additional governance requirements that require consultation with the Risk Committee and further require that decisions must be made by the Board (and cannot be delegated to an officer). A majority of the members of the Board are independent of ICE management and the ICE parent. The interests of Participants are clearly taken into consideration, through both the recommendations of the Risk Committee and the participation of Participant representatives on the Board itself. ICC regularly also takes into account the feedback of customers of Participants, both through its buy-side advisory committee and otherwise. Although ICC does not provide for direct customer participation in governance (unlike in the case of Participants), ICC believes that approach is appropriate in light of the particular risks faced by Participants (in light of their financial responsibilities to the clearing house) and the role Participants are required to play in the default management process.

For the foregoing reasons, ICE Clear Credit believes that the proposed rule changes are consistent with the requirements of Section 17A of the Act[16] and the regulations thereunder applicable to it, including the standards under Rule 17Ad–22.[17]

(B) Self-Regulatory Organization's Statement on Burden on Competition
